## PART VI MISCELLANEOUS

---

### Location of lines in cases of doubt

8. (1) In any case where there is doubt as to the location of a baseline or any other line delimited under this Act the Minister may, by notice published in the National Gazette, declare the location of the baseline or other line by whatever method appears to him to be appropriate.

(2) A reference in subsection (1) to a baseline or other line includes a reference to part of a baseline or other line.

---

## PART VII TRANSITIONAL

---

### Interim delimitation of archipelagic waters

9. (1) This section and Schedule 3 expire on the commencement of the first notice to be made under Section 7.

(2) Until the archipelagic waters are delimited in accordance with Section 7 the archipelagic waters shall be deemed to have been delimited under that section in accordance with the line described in Schedule 2.

---

## SCHEDULE 1

### PRINCIPLES FOR ASCERTAINING BASELINES

---

#### Interpretation of schedule 1

1. (1) In this schedule "bay" means an indentation in the coastline the area of which is at least as great as that of a semicircle with a diameter equal to the distance across the mouth of the indentation.

(2) For the purposes of this schedule the outermost permanent harbour works which form an integral part of the harbour system shall be deemed to form part of the coast.

#### General principle

2. Subject to this schedule, in respect of each part of the coast the baseline follows the low-water line.

#### Bays

3. Where the distance between the low-water line on each natural entrance point of a bay:

(a) Does not exceed 24 miles, the baseline follows a straight line between those two points; or

(b) Exceeds 24 miles, the baseline follows a straight line of 24 miles' length within the bay positioned so as to enclose the maximum area of water.

#### Low-water elevations

4. (1) Where a low-water elevation is situated wholly or partly within 12 miles of the coast the baseline follows the low-water line of the elevation.

(2) A low-water elevation does not become part of the coast by virtue of subsection (1).

#### Rivers

5. In respect of the mouth or each mouth of a river which flows into the sea the baseline follows a straight line across the river mouth between the points on the low-water line of each bank.
