Duration: 4'23"

Languages: English, French, Spanish and Russian

SAVING BLACK SEA DOLPHINS WITH SOUND

The population numbers of this extremely popular and intelligent animal continue to dwindle in spite of commercial hunting bans. Many get accidentally caught every year in fishing nets all over the globe. A Program funded through the UN Development Programme is distributing acoustic devices to fishermen in the Black Sea to help keep dolphins at bay.

Interviews: Bortes Vasile
Local Fisherman

Andreea Burnescu
Programme Manager, Mare Nostrum NGO

Ligia Dima
Marine Biologist & Dolphins Expert

Producer: Chaim Litewski
Producer Assistant: Camilo Freire
