

Seas and Submerged Lands (Territorial Sea Baseline) Proclamation 2016

I, General the Honourable Sir Peter Cosgrove AK MC (Ret'd), Governor-General of the Commonwealth of Australia, acting with the advice of the Federal Executive Council, make the following Proclamation.

Signed and Sealed with the
Great Seal of Australia on

10 March 2016

Peter Cosgrove
Governor-General

By His Excellency's Command

George Brandis QC
Attorney-General

	<i>Seas and Submerged Lands (Territorial Sea Baseline) Proclamation 2006</i>	20

1 Name

This is the *Seas and Submerged Lands (Territorial Sea Baseline) Proclamation 2016*.

2 Commencement

- (1) Each provision of this instrument specified in column 1 of the table commences, or is taken to have commenced, in accordance with column 2 of the table. Any other statement in column 2 has effect according to its terms.

Commencement information		
Column 1	Column 2	Column 3
Provisions	Commencement	Date/Details
1. The whole of this instrument	The day after this instrument is registered.	12 March 2016

Note: This table relates only to the provisions of this instrument as originally made. It will not be amended to deal with any later amendments of this instrument.

- (2) Any information in column 3 of the table is not part of this instrument. Information may be inserted in this column, or information in it may be edited, in any published version of this instrument.

3 Authority

This instrument is made under section 7 of the *Seas and Submerged Lands Act 1973*.

4 Schedules

Each instrument that is specified in a Schedule to this instrument is amended or repealed as set out in the applicable items in the Schedule concerned, and any other item in a Schedule to this instrument has effect according to its terms.

5 Definitions

Note: A number of expressions used in this instrument are defined in the Act, including the following:

- (a) the Convention;
- (b) territorial sea.

- (1) In this instrument:

Act means the *Seas and Submerged Lands Act 1973*.

area of the indentation means the area lying between the low-water mark around the shore of the indentation and a line joining the low-water marks of its natural entrance points, and includes the area of any island within the indentation as if it were part of the water area.

baseline of the mainland, in relation to a State or the Northern Territory, means:

Section 6

- (a) for a State (other than Tasmania) or the Northern Territory—the line determined in accordance with sections 7, 10, 11 and 12; or
- (b) for Tasmania—the line determined in accordance with sections 8, 10, 11 and 12.

bay has the meaning given by section 6.

Geocentric Datum of Australia means the datum described in Schedule 1.

historic bay means a bay that is declared by an instrument under paragraph 8(a) of the Act to be an historic bay.

low-tide elevation has the same meaning as in Article 13 of the Convention.

low-water means lowest astronomical tide.

mile means an international nautical mile, being 1 852 metres.

straight line means a geodesic line.

- (2) For the purposes of this instrument, the outermost permanent harbour works (other than offshore installations and artificial islands) which form an integral part of a harbour system are regarded as forming part of the coast.
- (3) For the purposes of paragraphs 7(d), 8(d) and 9(d), the low-water line of a low-tide elevation must not be taken into account unless a lighthouse or similar installation that is permanently above sea level has been built on the low-tide elevation.
- (4) For the purposes of this instrument, the position on the surface of the Earth of a point, line or area is to be determined by reference to:
 - (a) if the position is to be determined by reference to any of the points of latitude and longitude specified in items 4012 to 4039 of Part 4 of Schedule 2—the International Terrestrial Reference Frame 2000, as defined by the International Earth Rotation Service at epoch 1 January 2000; or
 - (b) otherwise—the Geocentric Datum of Australia.

6 Bays

- (1) Subject to subsection (2), an indentation is a **bay** if the distance between the low-water marks of the natural entrance points of the indentation does not exceed 24 miles.
- (2) An indentation is not a **bay** if:
 - (a) for an indentation that has one mouth—the area of the indentation is less than that of the semi-circle whose diameter is a line drawn across the mouth of the indentation; and
 - (b) for an indentation that, because of the presence of islands, has more than one mouth—the area of the indentation is less than that of the semi-circle drawn on a line as long as the sum total of the lengths of the lines across the different mouths.

7 Baseline—mainland of Australia

Subject to sections 10, 11 and 12, the baseline from which the breadth of the part of the territorial sea adjacent to the mainland of Australia is to be measured is the line constituted by the following:

- (a) the low-water line along the coast, except where that low-water line is landward of a line mentioned in paragraph (b), (c), (d) or (e);
- (b) for each river that flows directly into the sea on the coast—the straight line drawn across the mouth of the river between points on the low-water lines of its banks, except where that line is landward of a line mentioned in paragraph (c) or (d);
- (c) for each bay (other than an historic bay) on the coast—the straight line drawn between the low-water marks of the natural entrance points of the bay, except where that line is landward of, or identical with, a line mentioned in paragraph (d);
- (d) the straight lines joining each of the points on the low-water line of the coast that are on, or closest to, the points of latitude and longitude specified in an item in Part 1 of Schedule 2;
- (e) for each historic bay specified in column 1 of an item in Part 2 of Schedule 2:
 - (i) if 2 points of latitude and longitude are specified in column 2 of the item—the straight line joining each of the points on the low-water line of the coast that are on, or closest to, those points; and
 - (ii) if more than 2 points of latitude and longitude are specified in column 2 of the item—the line constituted by each of the straight lines joining, respectively, each of the points on the low-water line of the coast that are on, or closest to, 2 points specified opposite each other in that column of that item.

8 Baseline—mainland of Tasmania

Subject to sections 10, 11 and 12, the baseline from which the breadth of the part of the territorial sea adjacent to the mainland of Tasmania is to be measured is the line constituted by the following:

- (a) the low-water line along the coast, except where that low-water line is landward of a line mentioned in paragraph (b), (c) or (d);
- (b) for each river that flows directly into the sea on the coast—the straight line drawn across the mouth of the river between points on the low-water lines of its banks, except where that line is landward of a line mentioned in paragraph (c) or (d);
- (c) for each bay on the coast—the straight line drawn between the low-water marks of the natural entrance points of the bay, except where that line is landward of, or identical with, a line mentioned in paragraph (d);
- (d) the straight lines joining each of the points on the low-water line of the coast that are on, or closest to, the points of latitude and longitude specified in an item in Part 3 of Schedule 2.

9 Baseline—lands off the coast of the States or the Northern Territory

Subject to sections 10, 11 and 12, the baseline from which the breadth of the part of the territorial sea adjacent to an island, or a group of islands, located within a State or the Northern Territory, and seaward of the baseline of the mainland of that State or Territory, is to be measured is the line constituted by the following:

- (a) the low-water line along the coast of the island, or along the coast of each island included in the group of islands, except where that low-water line is landward of a line mentioned in paragraph (b), (c) or (d);
- (b) for each river that flows directly into the sea on the coast of the island, or on the coast of an island included in the group of islands—the straight line drawn across the mouth of the river between points on the low-water lines of its banks, except where the line is landward of a line mentioned in paragraph (c) or (d);
- (c) for each bay on the coast of the island, or on the coast of an island included in the group of islands—the straight line drawn between the respective low-water marks of the natural entrance points of the bay, except where the line is landward of, or identical with, a line mentioned in paragraph (d);
- (d) the straight lines joining each of the points on the low-water line of the coast of the island, or on the low-water line of the coast of an island included in the group of islands, that are on, or closest to, the points of latitude and longitude specified in an item in Part 4 of Schedule 2.

Note: See also section 13.

10 Low-tide elevations

The baseline from which the breadth of the part of the territorial sea adjacent to a low-tide elevation, situated wholly or partly at a distance not exceeding the breadth of the territorial sea from the mainland or an island, is to be measured is the low-water line on the low-tide elevation.

Note: See also section 13.

11 Low-water line of naturally formed area

- (1) If the low-water line of a naturally formed area of land which is above water at high-tide would intersect a straight baseline drawn in accordance with this instrument, the part of the straight baseline that would be between the points of intersection of the low-water line and that baseline is to be substituted with the line that would be the baseline between those points if the seaward part of the area of land were part of the coast of the mainland of the State or Territory within which the naturally formed area of land is located.
- (2) For subsection (1):
 - (a) if the low-water line and baseline intersect at more than 2 points, the points of intersection of the low-water line of an area of land and a straight baseline are taken to be the 2 outermost points of intersection; and
 - (b) the seaward part of the area of land is the part, or parts, of the area of land on the seaward side of the straight baseline.

Note: See also section 13.

12 Low-water line of island

- (1) If straight lines mentioned in paragraph 7(d), 7(e), 8(d) or 9(d) join different points on the low-water line of the same island, the baseline from which the breadth of the part of the territorial sea adjacent to that island, or the group of islands in which that island is included, between those points is to be measured is the line that would be the baseline if the seaward part of the coast of the island between those points were part of the coast of the mainland of the State or Territory within which the island is located.
- (2) For subsection (1), the seaward part of the coast of an island between 2 points is the part of the coast of the island between those points that includes the most seaward part of the island.

Note: See also section 13.

13 Excluded islands and excluded group of islands

- (1) For the purposes of sections 9, 10, 11 and 12, an island does not include:
 - (a) each of the following islands located within Queensland:
 - (i) Pearce Cay;
 - (ii) Turnagain Island;
 - (iii) Turu Cay; and
 - (b) an island included in a group of islands mentioned in subsection (2).
- (2) For the purposes of sections 9, 10, 11 and 12, a group of islands does not include each of the following groups of islands located within Queensland:
 - (a) the group of islands known as Aubusi, Boigu and Moimi;
 - (b) the group of islands known as Dauan, Kaumag and Saibai;
 - (c) the group of islands known as Anchor Cay and East Cay;
 - (d) the group of islands known as Black Rocks and Bramble Cay;
 - (e) the group of islands known as Deliverance Island and Kerr Islet.

Schedule 1—Geocentric Datum of Australia

Note: See the definition of *Geocentric Datum of Australia* in subsection 5(1).

1 Reference ellipsoid

Geodetic Reference System 1980 ellipsoid with a semi-major axis of 6 378 137 metres and an inverse flattening of 298.257 222 101.

2 Reference frame

The Geocentric Datum of Australia is realised by the coordinates of the following Australian Fiducial Network geodetic stations referred to the Geodetic Reference System 1980 ellipsoid determined within the International Earth Rotation Service Terrestrial Reference Frame 1992 at the epoch of 1994.0.

Reference frame				
Item	Geodetic station	South latitude	East longitude	Ellipsoidal height (metres)
1	AU 012 Alice Springs	23°40'12.44592"	133°53'07.84757"	603.358
2	AU 013 Karratha	20°58'53.17004"	117°05'49.87255"	109.246
3	AU 014 Darwin	12°50'37.35839"	131°07'57.84838"	125.197
4	AU 015 Townsville	19°20'50.42839"	146°46'30.79057"	587.077
5	AU 016 Hobart	42°48'16.98506"	147°26'19.43548"	41.126
6	AU 017 Tidbinbilla	35°23'57.15627"	148°58'47.98425"	665.440
7	AU 019 Ceduna	31°52'00.01664"	133°48'35.37527"	144.802
8	AU 029 Yaragadee	29°02'47.61687"	115°20'49.10049"	241.291

Schedule 2—Straight baseline points under Article 7 of the Convention

Note: See sections 7, 8 and 9.

Part 1—Coast of the mainland of Australia

Coast of the mainland of Australia	
Item	Description
1001	From 32°44'27.0"S 152°11'09.5"E to 32°44'23.9"S 152°11'30.6"E
