1. Introduction

The Republic of South Africa first formally proclaimed a continental shelf, as defined under the 1958 Geneva Convention on the Continental Shelf, under the Territorial Waters Act No. 87 of 1963, as amended by the Territorial Waters Amendment Act, No. 98 of 1977. This was subsequently modified, as defined by Article 76 of the 1982 United Nations Convention on the Law of the Sea (hereinafter ‘UNCLOS’ or the ‘Convention’) by the Maritime Zones Act, No. 15 of 1994.

The Republic of South Africa ratified UNCLOS on 23 December 1997 and is accordingly a party to the Convention. Pursuant to Article 76 and Article 4 of Annex II of the Convention, the Republic of South Africa hereby lodges with the Commission on the Limits of the Continental Shelf (hereinafter the ‘Commission’) its submission in support of the establishment of the continental shelf in the area of the South African Mainland that lies beyond 200 nautical miles from the baselines from which the breadth of the territorial sea is measured.

In 2002, the South African government directed the Minister of Minerals and Energy to take responsibility for the extension of the continental shelf. In terms of a ministerial directive issued in October 2002, the South African Agency for the Promotion of Petroleum Exploration and Exploitation (Petroleum Agency SA) was instructed to manage the project in collaboration and consultation with appropriate government departments and institutions. An advisory steering committee was accordingly established which included representatives of the following entities:

Department of Minerals and Energy
Department of Foreign Affairs
Department of Environmental Affairs
Department of Science and Technology
Department of Defence (represented by the SA Hydrographic Office)
Council for Geoscience
Department of Transport (represented by the SA Maritime Safety Authority)
Institute of Maritime Technology

2. Outer limit of the continental shelf in respect of the South African mainland

This partial submission covers the continental shelf off the west, east and southern coasts of the mainland of the territory of the Republic of South Africa. This submission does not preclude the Republic of South Africa from making any other submission(s), either concurrently with the current submission, or at a later date.

3. Specific provisions of Article 76 invoked to support the submission

The outer limits contained in this submission are based on the provisions of Articles 76.4 (a)(i) and 76.4 (a)(ii) and 76.4 (b) and 76.5 of UNCLOS.

4. Names of Commission Members who provided advice during the preparation of the submission

The Republic of South Africa was assisted in the preparation of this submission by Dr. Harald Brekke, member of the Commission on the Limits of the Continental Shelf (1997-present). No advice was provided by any other member of the Commission.

5. Absence of disputes

In accordance with paragraph 2(a) of Annex I to the Commission's Rules of Procedures, the Republic of South Africa wishes to inform the Commission that there are unresolved areas of continental shelf between it and other coastal States.

Portions of the current submission concern areas under dispute or, at least, areas under which there remain unresolved matters. In the east, South Africa has an unresolved maritime boundary with Mozambique and in the west, South Africa has an unresolved boundary with Namibia.

In the spirit of Article 76(10) of the Convention and applying Rule 46(2) of the Rules of Procedure of the Commission and Annex I of the Rules of Procedure, South Africa has agreed with Mozambique, by means of an Exchange of Letters, that their

respective submissions may be considered by the Commission on the understanding that this shall not prejudice future delimitation. At the same time, South Africa has transmitted a note verbale to Namibia informing the latter that it intends to make a submission for an extended continental shelf and that such submission will be without prejudice to the rights of the two countries regarding any future finalisation or delimitation of the boundary between the two countries.

On account of these communications the Government of the Republic of South Africa is satisfied and hereby assures the Commission, that the submission shall not prejudice the delimitation of the continental shelf between South Africa and its neighbours.

6. Natural prolongation of the South African landmass

The continental shelf of South Africa surrounds the southern end of the African continent on its west, south and east sides and extends significantly beyond 200M. It has a complex bathymetric morphology and is characterised by the presence of a number of large submarine depressions and elevations.

It is the view of South Africa that in geomorphological and geological terms the continental margin appurtenant to the continental landmass forms part of the same single continuous continental margin. This is evidenced by the morphological and geological continuity of the component highs and elevations of the South African continental margin which have been derived from a progressive series of related geological events.

7. Detailed description of the outer limit of the continental shelf of the South African mainland

The outer limits of the continental shelf of the South African Mainland consist of a series of straight lines, as provided for in the Convention being not more than 60M long, which join fixed points, defined by coordinates of latitude and longitude, generated from the combination of Hedberg Line and Gardiner Line beyond 200M

and the two sets of constraints. A summary of these fixed points is provided in Figure 1 and the coordinates of latitude and longitude of the fixed points comprising the outer limit of the continental shelf are given in Table 1. A large scale map is included with this executive summary (Appendix 1).

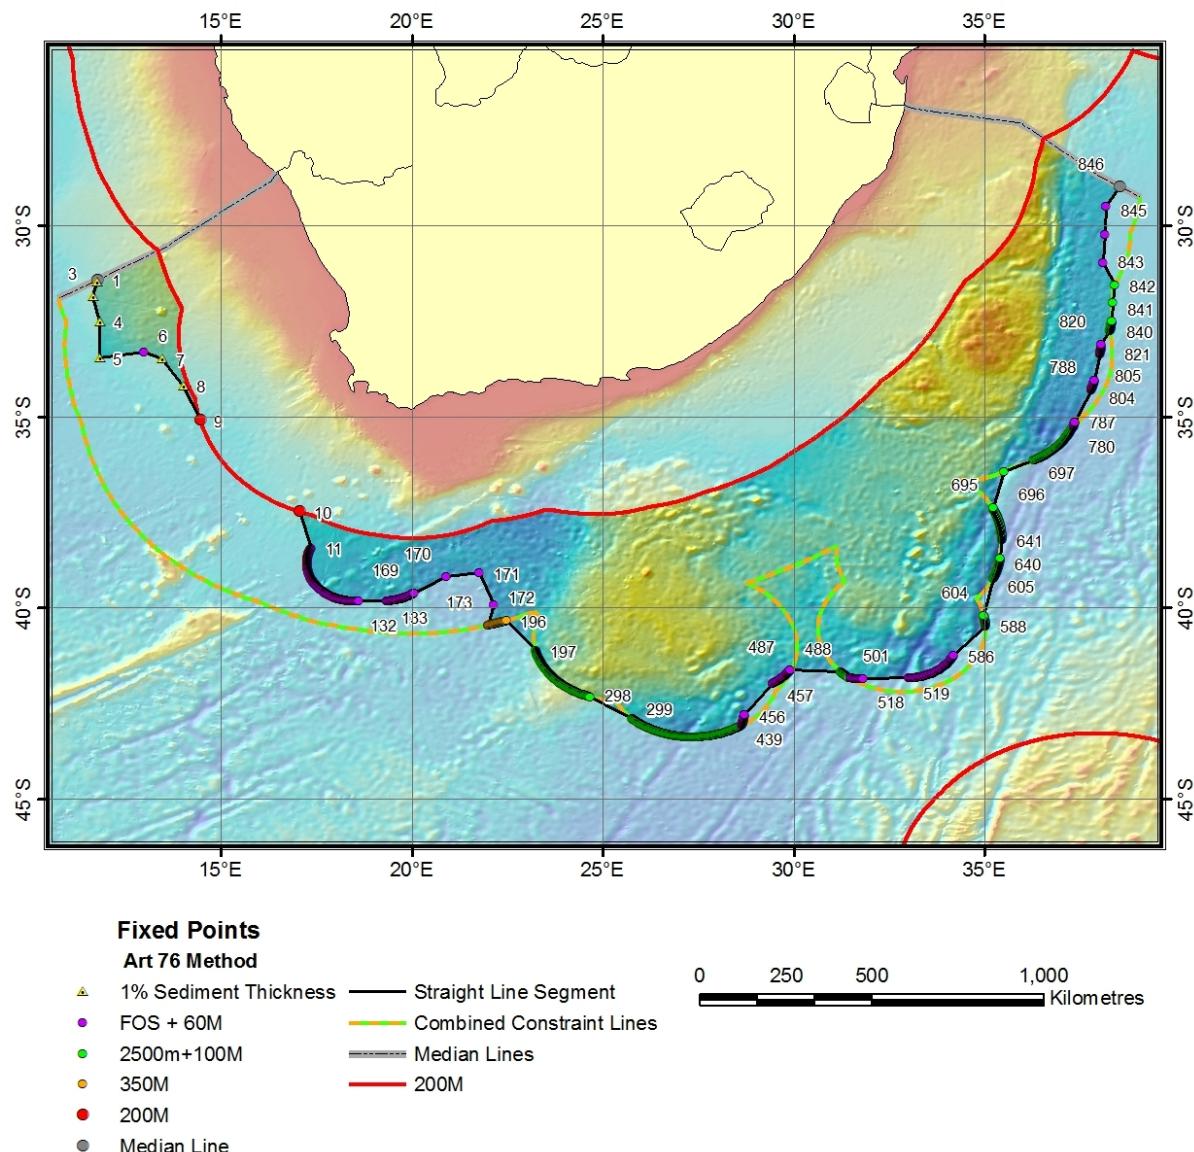

Figure 1: Outer limits of the continental shelf of the Republic of South Africa beyond 200M.

8. State bodies responsible for the preparation of the continental shelf submission

This submission, together with all maps, figures, enclosures, appendices and databases, was prepared by the Petroleum Agency SA.
