2. The Division for Ocean Affairs and the Law of the Sea, Office of Legal Affairs of the United Nations (Dr. François Bailet)

Research Abstract

Marine fisheries conservation and management in India taking recourse to the code of conduct for responsible fisheries (CCRF) and other legal instruments

Certain fish stocks in India are depleted and the Marine Fishing Regulation Act of the federal Governments and the maritime zones of India (Regulation of fishing by foreign vessels), Act, 1981 need amendments or upgradation in tune with the CCRF and other legal instruments. India has only acceded the 1995 UN Fish Stock Agreement and yet to accede the 1993 compliance agreement. CCRF have been disseminated to the end users through translations etc. to the regional languages of India. Considering all these aspects a marine fisheries management model for fishery resources in EEZ of India including depleted stocks will be formulated based on the legal instruments, CCRF, including National Plan of Action (NPOA) for fishing capacity, sharks, sea birds and Illegal, Unreported and Unregulated (IUU) Fishing.
