With new and emerging global challenges, alternative development strategies are key for the post-2015 international development agenda

Scope of analysis

This book reflects the outcome of a research programme by a group of independent development experts brought together by the United Nations Committee for Development Policy (CDP), a subsidiary body of the Economic and Social Council. It provides a rigorous analytical response to the necessary definition of an alternative international development strategy for more equitable and sustainable progress for all. The analysis is based on a critical evaluation of past experience, taking into consideration the challenges brought about by the multiple and interrelated economic, food and environmental crises, as well as the damaging effects of inequality. It also reflects upon the asymmetries and shortcomings of the ongoing process of globalization which, in fact, have largely contributed to the emergence of these crises.

Building upon the Millennium Development Goals (MDGs)

This book is a timely contribution to the revision of the United Nations policy agenda for achievement of the MDGs by 2015. As the deadline approaches, the MDG agenda must be reviewed to identify its strengths and weaknesses and to define further action. So far, evidence shows that although progress has been made, many targets will not be met, and some important objectives were not given adequate priority. It is therefore the right moment to evaluate what has been achieved and to define the necessary measures to confront current and emerging global challenges.

Objectives

This book aims at identifying development strategies capable of generating broad-based economic growth with job creation while guaranteeing social equity and environmental sustainability — both at the national and international levels. However, the successful implementation of such strategies relies on increased coherence in the current global governance frameworks. Thus, this volume also identifies the much needed reforms to promote a more equitable distribution of development opportunities, a better management of global risks, a lower level of insecurity and greater welfare for all.

Contents

Overview
José Antonio Alonso, Professor, Complutense University of Madrid, CDP member
Giovanni Andrea Cornia, Professor, University of Florence, CDP member
Rob Vos, Director, Development Policy Analysis Division, UN-DESA

1. Globalization at a cross roads: key challenges for the twenty-first century
   Rob Vos

2. Should global goal setting continue, and how, in the post-2015 era?
   Sakiko Fukuda-Parr, Professor, New School for Social Research, CDP member

3. Do we need new development models? The impact of neo-liberal policies
   Frances Stewart, Professor, University of Oxford, CDP member

4. Learning from the past: which of the past/current development strategies are best suited to deal with the “quadruple crisis”?
   Giovanni Andrea Cornia
   Milica Uvalic, Professor, University of Perugia, CDP member

5. Towards climate compatible and resilient development
   J.B. (Hans) Opschoor, Professor, Institute of Social Studies, the Hague, CDP member

6. Aiming for food and nutrition security in a changed global context: strategies for ending hunger
   Joachim von Braun, Professor, University of Bonn

7. The international development strategy beyond 2015: taking demographic dynamics into account
   Ana Luiza Cortez, Chief, Committee for Development Policy Secretariat

8. Common elements of national development strategies consistent with the post-2015 achievements of MDGs
   Giovanni Andrea Cornia and Rob Vos

9. Building a stable and equitable global monetary system
   Bilge Erten, Research fellow, Columbia University
   José Antonio Ocampo, Professor, Columbia University

10. From aid to global development policy
    José Antonio Alonso

11. International migration in the development agenda
    José Antonio Alonso

12. Enabling international environment
    Norman Girvan, Professor, University of West Indies, CDP member
    Ana Luiza Cortez
