Note:

a Regional averages are calculated as a weighted average of individual country growth rates of GDP, where weights are based on GDP in 2005 prices and exchange rates.

b Partly estimated.

c Baseline scenario forecasts, based in part on Project LINK and UN/DESA World Economic Forecasting Model.

d Downside scenario forecasts, based in part on Project LINK and UN/DESA World Economic Forecasting Model.

e Difference between growth forecasts in the baseline and downside scenarios, that is to say, growth that would be foregone if the downside scenario is realized.
