NOTE: The six scenarios can be described briefly as follows:

- I – Corresponds to the medium variant of the official United Nations population projections (*World Population Prospects, 1998 Revision*).
 - II – This scenario amends the medium variant by assuming no migration after 1995.
 - III – This scenario keeps the total population figure constant at the highest level that it would reach in the absence of migration after 1995.
 - IV – This scenario keeps the number of persons aged 15-64 constant at the highest level that it would reach in the absence of migration after 1995.
 - V – This scenario prevents the ratio of persons aged 15-64 to persons aged 65 and above from falling below 3.0.
 - VI – This scenario keeps the ratio of persons aged 15-64 and above at the highest level that it would reach in the absence of migration after 1995.
- This scenario is considered to be demographically unrealistic.
