

## FOREWORD

Pursuant to the recommendations of the Population Commission, the United Nations Secretariat has been preparing several manuals describing methods of demographic analysis, estimation and projection needed for economic and social policy purposes and suitable for use in many countries, including those where demographic statistics and methods of analysis are not yet well advanced. Some of those manuals deal with the analysis and evaluation of basic statistics, notably those of population censuses, and others are concerned with the projection of various population quantities which are needed in diverse fields of economic and social planning. This manual, concerned with the projection of urban and rural population, is part of this longer-range programme.

The following manuals have been published so far in the *Manuals on Methods of Estimating Population* series:

*Manual I: Methods of Estimating Total Population for Current Dates*;<sup>1</sup>

*Manual II: Methods of Appraisal of Quality of Basic Data for Population Estimates*;<sup>2</sup>

*Manual III: Methods for Population Projections by Sex and Age*;<sup>3</sup>

*Manual IV: Methods of Estimating Basic Demographic Measures from Incomplete Data*;<sup>4</sup>

*Manual V: Methods of Projecting the Economically Active Population*;<sup>5</sup>

*Manual VI: Methods of Measuring Internal Migration*;<sup>6</sup>

*Manual VII: Methods of Projecting Households and Families*;<sup>7</sup> and, related to this series,

*Methods of Analysing Census Data on Economic Activities of the Population*.<sup>8</sup>

<sup>1</sup> United Nations publication, Sales No. 52.XIII.5.

<sup>2</sup> United Nations publication, Sales No. 56.XIII.2.

<sup>3</sup> United Nations publication, Sales No. 56.XIII.3.

<sup>4</sup> United Nations publication, Sales No. 67.XIII.2.

<sup>5</sup> United Nations publication, Sales No. E.70.XIII.2 (in co-operation with the ILO).

<sup>6</sup> United Nations publication, Sales No. E.70.XIII.3.

<sup>7</sup> United Nations publication, Sales No. 73.XIII.2.

<sup>8</sup> United Nations publication, Sales No. E.69.XIII.2.

Also, within the context of this coherent and cumulative programme, two other publications should be mentioned; namely, *Estimating Future School Enrolment in Developing Countries, a Manual of Methodology*, published jointly by the United Nations and UNESCO,<sup>9</sup> and a technical report entitled *The Concept of a Stable Population: Application to the Study of Populations of Countries with Incomplete Demographic Statistics*,<sup>10</sup> which presents the theoretical background of part of the aforementioned *Manual IV*.

In this manual, projections of urban and rural population are dealt with on the assumption that methods of projection of a country's total population, or its total population by groups of sex and age, are already known, and that such projections have in fact already been carried out. Those methods have been dealt with in *Manual III* of the present series. It is also assumed here that the reader is somewhat familiar with the appraisal of accuracy in basic statistics, a subject developed at some length in the previous *Manual II*.

This manual has been drawn up especially with a view to its uses in less developed countries or countries whose population statistics are not very detailed. It is addressed mainly to population analysts possessing limited technical means, and it does not consider the possible uses of computer methodology. The methods are accordingly simple, but, depending on opportunities, may be elaborated further.

The United Nations is indebted to the Demographic Research and Training Centre (CELADE) in Santiago, Chile; the United States Bureau of the Census; K. V. Ramachandran of the Regional Institute for Population Studies in Accra, Ghana; and D. Courgeau of the Institut National d'Etudes Démographiques in Paris for their review of the draft of this manual, and the many useful suggestions which have been incorporated in its final version.

<sup>10</sup> United Nations publication, Sales No. 65.XIII.3.

## CONTENTS

	<i>Page</i>
INTRODUCCIÓN .....	1
<i>Chapter</i>	
I. PROBLEMS OF DEFINITION OF URBAN POPULATION .....	9
Administrative definition: type of local government .....	9
Administrative definition: seats of district government .....	10
Definition by size of administrative units .....	10
Economic definition, applied to administrative units .....	11
Geographic definition: agglomerations .....	11
Geographic definition: metropolitan areas .....	12
Other definitions .....	12
Purposes served by various definitions .....	13
II. COMPONENTS OF URBAN AND RURAL POPULATION CHANGE .....	14
Differences between urban and rural sex-age structures .....	14
Urban residence ratios by sex and age .....	14
Differences between urban and rural crude death rates .....	16
Differences between urban and rural crude birth rates .....	18
Differences between urban and rural rates of natural increase .....	18
Differences due to the effects of international migration .....	19
Differences due to internal rural-to-urban migration .....	19
Effects of rural-to-urban area reclassification .....	20
Net rural-to-urban population transfers, i.e. combined effects of migration and area reclassification .....	21
Implications for projection methodology .....	23
III. TEMPO OF URBANIZATION AND URBAN CONCENTRATION .....	25
General considerations .....	25
Concept of a growth rate .....	25
Tempo of urbanization .....	26
Reasons for use of the urban-rural growth difference as a measure of the tempo of urbanization .....	27
Tempo of urban concentration .....	30
IV. PROJECTION OF URBAN AND RURAL POPULATION TOTALS USING THE SIMPLEST METHODS .....	32
Use of urban growth rates .....	32
Use of rural growth rates .....	33
Ratio method .....	34
Summary .....	35
V. UNITED NATIONS METHOD OF URBAN AND RURAL POPULATION PROJECTIONS. ....	36
Actual observations concerning urban-rural growth differences.....	36
Formula for iterative calculation .....	38
Year-to-year interpolation of a five-yearly projection .....	38
Applications of the method (by annual rates) .....	38

<i>Chapter</i>	<i>Page</i>
Same method, using exponential rates .....	42
Flexible assumptions .....	43
<b>VI. PROJECTIONS FOR INDIVIDUAL CITIES, GROUPS OF CITIES AND DISTINCT GROUPS OF LOCALITIES .....</b>	<b>45</b>
Methods not dealt with in this manual .....	45
Ratio method .....	46
United Nations method .....	46
Fixed groups of cities .....	48
Expanding groups of cities .....	48
Projection of population by size group of locality .....	50
<b>VII. SUPPLEMENTARY ESTIMATION OF SEX-AGE COMPOSITION FOR PROJECTED TOTALS OF URBAN AND RURAL POPULATION .....</b>	<b>55</b>
A. Preliminary considerations .....	55
Use of supplementary methods .....	55
Adjustment of defective age data for urban and rural projections.....	55
B. Method of difference elimination.....	56
Explanation of the method .....	56
Application to a projection .....	57
Further uses of this method .....	59
Additional considerations .....	62
A shorter method .....	63
C. Estimating sex-age groups with the use of the logistic table .....	63
<b>VIII. MIXED PROJECTION METHODS .....</b>	<b>69</b>
Crude components methods .....	69
Composite method employing urban residence ratios for fixed sex-age groups	70
Composite method employing urban residence ratios by cohort .....	72
Migration-survival method as applied to the rural population .....	78
<b>IX. COHORT-SURVIVAL METHOD .....</b>	<b>82</b>
A. Derivation of basic data and estimates .....	83
B. Standard projection .....	95
C. Variant projections.....	101

## ANNEXES

I. Table of logistic curve .....	117
II. Table of survival ratios ( $P_x$ ) of model life tables for five-year age groups and five-year intervals of time .....	123
