LAC	Latin America and Caribbean
LTA	Long-term agreement
M&A	Management and Accountability (System)
MDBs	Multilateral Development Banks
MDGs	Millennium Development Goals
MoU	Memorandum of understanding
ODA	Official development assistance
OECD	Organization for Economic Cooperation and Development
OHCHR	Office of the United Nations High Commissioner for Human Rights
OMT	Operations Management Team
PIU	Programme implementation unit
QCPR	Quadrennial comprehensive policy review
RBM	Results-based management
RC	Resident Coordinator
SOPs	Standard operating procedures
TCPR	Triennial comprehensive policy review
UNAIDS	Joint United Nations Programme on HIV/AIDS
UNCDF	United Nations Capital Development Fund
UNCT	United Nations country team
UNCTAD	United Nations Conference on Trade and Development
UNDG	United Nations Development Group
UNDP	United Nations Development Programme
UNEG	United Nations Evaluation Group
UNEP	United Nations Environment Programme
UNESCO	United Nations Educational, Scientific and Cultural Organization
UNFPA	United Nations Population Fund
UN-Habitat	United Nations Human Settlements Programme
UNHCR	Office of the United Nations High Commissioner for Refugees
UNICEF	United Nations Children’s Fund
UNIDO	United Nations Industrial Development Organization
UNIFEM	United Nations Development Fund for Women
UN-OAD	United Nations operational activities for development
UNODC	United Nations Office on Drugs and Crime
UNRWA	United Nations Relief and Works Agency for Palestine Refugees in the Near East
UNV	United Nations Volunteers
UN-Women	United Nations Entity for Gender Equality and Women’s Empowerment
UNWTO	World Tourism Organization

UPN	UNDAF Programming Network
UPU	Universal Postal Union
WFP	World Food Programme
WHO	World Health Organization
WIPO	World Intellectual Property Organization
WMO	World Meteorological Organization

SUMMARY

The General Assembly in paragraphs 186 of resolution 67/226 requested the Secretary-General, on the basis of information provided by the funds, programmes and specialized agencies of the United Nations development system, to submit to the Economic and Social Council, at its substantive sessions of 2013, 2014 and 2015, analytical reports on results achieved and measures and processes implemented in follow-up to the quadrennial comprehensive policy review (QCPR), with a view to ensuring its full implementation. The present report responds to this mandate.

The report draws heavily on the findings of the surveys administered by the Secretary-General in the spring of 2012 and again this year. These surveys were addressed in 2012 to the governments of all programme countries and to all resident coordinators, United Nations country team (UNCT) members, chairs of Operations Management Teams (OMTs) at the country level, and civil society organizations in programme countries. The surveys in 2013 were sent to the headquarters of United Nations entities and to all resident coordinators and chairs of OMTs at the country level. Other important inputs to the report include the action and work plans established by the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination and the United Nations Development Group on QCPR implementation, as well as a number of background studies prepared for the 2012 QCPR.

In those decisions where General Assembly resolution 67/226 gave precise deadlines for action, the baselines and targets are already available. In other instances where such targets have not been set in the resolution, the Secretary-General, in consultation with the UNDG, will establish targets by end of this year with a view to further facilitating the full and timely implementation of the resolution.

1. Introduction

1. The General Assembly in paragraph 186 of resolution 67/226 requested the Secretary-General, on the basis of information provided by the funds, programmes and specialized agencies of the United Nations development system, to submit to the Economic and Social Council, at its substantive sessions of 2013, 2014 and 2015, analytical reports on results achieved and measures and processes implemented in follow-up to the quadrennial comprehensive policy review (QCPR), with a view to ensuring its full implementation. In paragraph 187, the General Assembly requested the Secretary-General to continue to strengthen the analytical quality of system-wide reporting on funding and performance and programme results for United Nations operational activities for development, including the coverage, timeliness, reliability, quality and comparability of system-wide data, definitions and classifications.

2. This report, which follows the structure of General Assembly resolution 67/226, was prepared just four months after the adoption of the landmark QCPR legislation. At the time of its writing, the entities of the United Nations system were still in the process of setting priorities and preparing work plans, with a view to implementing the many important decisions contained in the QCPR resolution.

3. The current report draws heavily on the findings of the surveys administered by the Secretary-General in the spring of 2012 and again this year. These surveys were addressed in 2012 to the governments of all programme countries and to all resident coordinators, United Nations country team (UNCT) members, chairs of Operations Management Teams (OMTs) at the country level, and civil society organizations in programme countries. The surveys in 2013 were sent to the headquarters of United Nations entities¹ and to all resident coordinators and chairs of OMTs at the country level². The findings from all the surveys will serve as key inputs to the development of a baseline for measuring progress in implementing the QCPR resolution.

4. The 2013 surveys of resident coordinators and chairs of OMTs at the country level received a high response rate. For example, some 90 per cent of resident coordinators who have served in that capacity for more than six months responded to the survey. The high response rate to these surveys and the almost equally high response rate to the programme country government survey in 2012 lend substantial credibility to the findings.

5. The High-level Committee on Management (HLCM) and the United Nations Development Group of the United Nations System Chief Executives Board for Coordination (CEB) have agreed on strategic priorities and work plans which stem from the QCPR. These documents and analytical papers prepared for the QCPR in 2012 provided important inputs to the Secretary-General's report. A more detailed

¹ Thirteen entities responded to the agency headquarters survey, namely: UN-Women, UNICEF, UNESCO, UNHCR, UNAIDS, UNEP, ITC, UNDP, WFP, ITU, UNRWA, FAO and UNFPA. These entities accounted for some 82 and 74 per cent of total and development-related activities, respectively, of the United Nations development system in 2011.

² This report also benefitted from a background paper on challenges and opportunities in implementing previous triennial comprehensive policy review (TCPR) decisions of the General Assembly, as well as two notes prepared for the informal meeting of the bureaux of ECOSOC and the Executive Boards of the funds and programmes, which took place on 8 May 2013. These background documents, as well as the survey instruments, can be found on the QCPR home page of DESA: <http://www.un.org/en/development/desa/oesc/qcpr.shtml>

analysis of the findings of the surveys will be circulated to Member States in advance of the operational activities segment of the 2013 substantive session of the Economic and Social Council.

6. An indicator framework organized around four key principles of coherence, relevance, effectiveness and efficiency has been developed with to facilitate focused monitoring of the implementation of the QCPR resolution. Given the limited time, or some four months, available to the Secretary-General to conduct the three surveys in the spring of 2013 and prepare the present report, this indicator framework should be considered as a work-in-progress and submitted to the Economic and Social Council for review and guidance.

7. In those decisions where General Assembly resolution 67/226 gave precise deadlines for action, the baselines and targets are already available. In other instances where such targets have not been set in the resolution, the Secretary-General, in consultation with the UNDG, will establish targets by end of this year, with a view to further facilitating the full and timely implementation of the resolution. Overall, the indicator framework developed by the Secretary-General should therefore be seen as an instrument to help minimize ambiguity and ensure accuracy in the interpretation of the QCPR resolution. This issue is further discussed in the follow-up and monitoring section of the report. The report of the Secretary-General in 2014 will include in-depth analysis of the progress made vis-à-vis the selected indicators against both the baseline and targets to be achieved in the present QCPR cycle.

8. The surveys of resident coordinators and chairs of OMTs included a number of questions that also featured in last year's questionnaires of programme country governments, resident coordinators and country team members and OMTs. This has permitted a degree of validation of the earlier findings, while also showing areas where significant progress or new challenges have appeared. As decided in General Assembly resolution 67/226, the survey of programme country governments will be conducted biennially, with the next one in early 2014.

2. Funding of operational activities of the United Nations system for development

9. This section presents a summary of key findings of the funding report of the Secretary-General, which itself provides more detailed analysis and other relevant background and contextual information.

(a) Contributions

Real term decline of total contributions in 2011

10. Total contributions to operational activities for development of the United Nations system in 2011 amounted to some \$22.8 billion, about the same as in 2010 in nominal terms and 6.9 per cent less in real terms. Total contributions were equivalent to about 15 per cent of total official development assistance (ODA) (excluding debt relief), as reported by the OECD/DAC. About 67 per cent of funding was directed to longer-term development-related activities, against 33 per cent to activities with a humanitarian assistance focus. This is similar to the distribution in 2010.

Most of the decline attributed to non-core funding

11. Total core contributions to operational activities for development amounted to \$6.3 billion in 2011, about the same in real terms as in 2010. A decline of 3 per cent in core funding for development-related

activities was offset by an increase of 12 per cent in core funding for humanitarian assistance-related activities. Non-core funding for operational activities for development and development-related activities declined in real terms by 9 and 11 per cent, respectively, in 2011.

Imbalance between core and non-core funding continues

12. Some 72 per cent of total funding for operational activities for development in 2011 was non-core, against 74 per cent in 2010. The non-core component of funding for humanitarian assistance-related activities was at 81 per cent higher than the 68 per cent for development-related activities. The global imbalance between core and non-core resources for development-related activities is primarily driven by contributions from other sources like the European Commission and global funds and not by direct DAC government contributions.

Longer-term funding trends positive

13. In the period from 1996 to 2011, overall trends have been positive for both development- and humanitarian assistance-related activities. In this 15-year period, funding for development-related activities and humanitarian assistance-related activities more than doubled in real terms; the non-core component of development-related contributions grew strongest, by about two-and-a-half times. Overall, contributions for United Nations operational activities for development grew at a faster rate during this 15-year period than total ODA as reported by OECD/DAC. Almost all of this growth was in the form of non-core resources, resulting in the decline of core ratio for operational activities for development as a whole from 50 per cent in 1996 to 28 per cent in 2011 and for development-related activities alone from 60 per cent in 1996 to 32 per cent in 2011.

Shorter-term funding trends more even

14. Since 2006, total funding for UN-OAD has grown for the first time at a slower pace than total ODA, pointing to a declining trend in the share of total ODA being channeled through the United Nations development system. Over the last four years, total contributions in nominal terms remained at approximately the same level, with some modest nominal growth in development-related funding offset by a decrease in humanitarian assistance-related activities. However, overall ODA flows have declined over the last two years.

Funding base broadened

15. The funding base for operational activities for development has seen general broadening. While the absolute volume of direct contributions of OECD/DAC countries increased by 83 per cent in real terms between 1995 and 2011, its overall share of total funding has declined from 76 to 63 per cent. Similarly, for development-related activities alone, the OECD/DAC share has declined from 71 per cent in 1995 to 60 per cent to 2011. The share of contributions from non-governmental organizations, public-private partnerships and other multilateral institutions (including global funds) for development-related activities increased from 9 per cent in 1995 to 21 per cent in 2011. In 2005, the share was 17 per cent indicating that the broadening of the funding base has continued in the shorter term.

United Nations system the largest multilateral partner of OECD/DAC countries

16. Some 27 per cent of all direct contributions to the multilateral system in 2011 as reported by the OECD/DAC were channeled through the United Nations development system, making the Organization the largest multilateral partner of DAC countries.

Contributions from developing countries growing

17. Contributions from developing countries (excluding local resources) for operational activities for development were \$562 million in 2011 and have increased by some 16 per cent in nominal terms between 2005 and 2011. About half of this funding was in the form of core contributions.

Non-core pooled funding and joint programmes not significant

18. Some 90 per cent of non-core funding for development-related activities in 2011 was predominantly single-donor and programme- and project-specific. This has contributed to the fragmentation of resources flows, with a consequent impact on overall programme coherence, efficiencies and transaction costs. Contributions to pooled funding arrangements like multi-donor trust funds, including One UN Funds and thematic funds of entities, accounted for the remaining 10 per cent of non-core resource flows. The value of newly approved joint programmes in 2011 financed from any combination of the above modalities was less than 3 per cent of total non-core funding in 2011 and therefore not significant from a financial point of view.

(b) Expenditures

General

19. Some 72 per cent of the total expenditures of \$25.1 billion for operational activities for development in 2011 concerned programme activities at the country level, of which 47 per cent or \$8.5 billion were in Africa. The remaining 28 per cent of total expenditures related to global and regional programme activities and programme support and management activities. Some entities refer to programme support as development effectiveness. Programme support and management costs are those that, in QCPR related discussions on cost recovery, have been referred to as so-called non-programme costs.

20. Expenditures on development-related activities reached \$17.2 billion in 2011, an increase of 19 per cent in real terms since 2006. About half of development-related expenditures (excluding local resources) at country-level were spent in low-income countries in 2011.

(c) Selected Issues

No significant change in predictability of resources flows

21. Annual changes in donor contributions can be quite significant, including as a result of volatility in exchange rates. The combined negative effect of fluctuations in contributions on the overall availability of resources has been limited during the recent period of general growth. However, this relative stability seems to be the result of coincidence rather than of a well-functioning funding system that has built-in mechanisms to address the challenges that are intrinsic to a heavy dependency on annual voluntary contributions. By and large, no significant change has occurred in predictability, reliability and stability of

funding flows, despite the adoption of integrated strategic and multi-year financing frameworks by entities of the United Nations development system.

Introduction of common budgetary frameworks at country level lagging behind

22. Common budgetary frameworks to strengthen the quality of system-wide resource planning and mobilization and to enhance transparency at the country level have been introduced in 28 per cent of the countries, two-and-a-half years after UNDG issued specific guidance in this regard. Much remains to be done to ensure that UN entities provide the necessary information on funding commitments and programme implementation in general.

Burden-sharing among OECD/DAC countries uneven

23. OECD/DAC countries accounted for 83 per cent of total core resources for development-related activities in 2011, with a significant difference in individual contributions if measured as a share of gross national income. If the 2011 median ratio between core development-related funding and gross national income (DEV/GNI) were to be set as a minimum target for a successful system of negotiated pledges, total core contributions would increase by some \$2.4 billion, or 58 per cent, to \$6.7 billion.

Alignment of newly approved cost recovery frameworks with resolution A/67/226 not as yet evident

24. There is a significant difference in the distribution of total programme support and management costs (non-programme costs) between core and non-core funding sources. In its resolution 67/226, the General Assembly reaffirmed that the guiding principle governing the financing of all non-programme costs should be based on full cost recovery, proportionally, from core and non-core funding sources. At this point in time it is not possible to evaluate whether the recently approved cost recovery frameworks of UNDP, UNICEF, UNFPA and UN-Women are aligned with the provisions of the resolution.

Work of the United Nations development system only moderately concentrated

25. The United Nations development system as a whole is moderately concentrated, with 50 programme countries, or 34 per cent of the total, accounting for some 80 per cent of all country-level expenditures in 2011. In 59 programme countries, or 40 per cent of the total, operational activities for development accounted for less than 10 per cent of total ODA in 2011.

26. The entities of the United Nations development system that reported country-level expenditures had a combined total of 1,998 relationships with 147 programme countries in 2011. About half of those relationships were significant in financial terms. In 2011, about one-third of operational activities for development were carried out by entities whose operations can be characterized by a degree of concentration that was above average.

Concept of critical mass remains to be developed

27. General Assembly resolution 67/226 requests the funds and programmes to develop common principles for the concept of critical mass of core resources and to present specific proposals to their respective governing bodies by the end of 2013 with a view to decision by 2014. At the time of finalizing the current report, the issue of critical mass of core resources has not yet been taken up by Executive Board of the funds and programmes.

3. Contribution of United Nations operational activities to national capacity development and development effectiveness

28. Besides the functional area of capacity development, the General Assembly resolution 67/226 provides guidance to the United Nations development system in a number of other cross-cutting areas, namely poverty eradication, South-South cooperation, gender equality and women's empowerment, transition from relief to development, and sustainable development. The UNDG QCPR Action Plan and 2013-2014 work plan envisage that the UNDAF programming principles and practices will be updated to ensure alignment with the new QCPR mandates in these cross-cutting areas.

29. As of next year, the Secretariat, in collaboration with UNDOCO, will annually review new UNDAFs to assess progress in reflecting the normative guidance provided by the General Assembly in the QCPR resolution in these cross-cutting areas. Through other instruments, such as the surveys of programme countries and United Nations country teams (UNCTs), the Secretary-General will also examine how these areas are prioritized in key operational instruments and processes at the country level such as work plans, result groups and budget allocation.

30. The programme country survey of 2012 produced data on how effective the United Nations system is judged to have been in the cross-cutting areas and on the areas in which governments would like to benefit from United Nations cooperation in the future. Changes over time in how effective the United Nations is perceived by governments in programme countries in this regard will be monitored through the annual report of the Secretary-General on the QCPR.

31. In assessing progress in the above cross-cutting areas, it is important to note that at present there is no unified approach within the United Nations system for classifying expenditures according to sectors. The previously used Administrative Committee for Coordination (ACC) system-wide sector classification system is no longer functioning as a harmonized system due to the exponential growth in non-core funding which has led to frequent modifications of the classification system by individual entities. This makes it inherently difficult to accurately present the sector distribution of expenditures for operational activities for development, including in the above cross-cutting areas, owing to the lack of adequate, up-to-date standards and methodologies.

32. Data is available from the resident coordinator survey to indicate the extent of the involvement of the United Nations in each one of the above cross-cutting areas such as the existence or not of a theme group at the country level that addresses the respective topic. Similarly, insights into the extent to which the United Nations functions coherently and efficiently may be gained from the extent to which governments, resident coordinators and country teams have observed competition among entities in such cross-cutting areas.

(a) Capacity-building and development

33. The General Assembly resolution 62/208 on the TCPR called on the Secretary-General to "take measures to ensure a coherent and coordinated approach by the United Nations development system in its support to capacity development efforts of programme countries". The 2013 survey of resident coordinators included several questions designed to establish a baseline that could assist in monitoring

the United Nations system's response to the General Assembly's repeated calls to better support the capacity development efforts of programme countries.

34. The UNDG has made capacity development one of its five "programming principles". It has produced numerous resources to guide a more coherent approach to supporting capacity development, including a position statement on capacity development, guidelines and tools for assessing capacity and designing capacity development strategies³, and a technical note for integrating capacity development into the common country programming process. At the same time, it is widely recognized that a common approach to measuring the impact of capacity development activities would be beneficial to the UN system. Appropriate steps to this effect are included in the UNDG QCPR Action Plan.

35. Notwithstanding the progress made, , governments do not, in general, feel the efforts of the United Nations in capacity development are meeting their expectations according to the programme country survey in 2012. Moreover, in the 2012 survey of civil society organizations, 73 per cent of respondents indicated that it was "very important" that the United Nations system pay more attention to supporting the development of national capacities in programme countries.

36. Based on the 2013 resident coordinator survey, 31 per cent of the respondents reported that a national capacity assessment was conducted at the UNDAF country analysis stage. An additional 28 per cent reported that a comparable assessment was made available to the UNCT at that time. Some 41 per cent of resident coordinators reported that no such assessment was conducted during the UNDAF country analysis stage. Somewhat unexpectedly, these programme countries were evenly spread across income levels. Further research would be needed to understand how the UNCTs in these programme countries ensured that they had a firm basis for providing the most effective support to national capacity development. A systematic coverage of the support of the United Nations development system for national capacity development in UNDAF evaluations is therefore called for.

37. The resident coordinators were also asked whether the UNCT has a joint strategy for supporting national capacity development, besides a general commitment reflected in the UNDAF. Ten resident coordinators reported that the UNCT has such a strategy. 30 resident coordinators reported that the UNCT has a joint training plan to strengthen the financial management capacity of implementing partners. The existence of such strategies and plans can be seen as a sign of commitment by United Nations entities to making progress in this area.

38. Paragraph 63 of General Assembly resolution 67/226 requests the United Nations development system to develop a common approach and frameworks for measuring progress in capacity development in programme countries. The results of the agency headquarters survey confirm that a number of United Nations entities have integrated capacity development in their strategic objectives or strategic plans. In addition, UNDP explained that it has prepared a capacity development measuring tool, and will share its experience with other agencies with a view to developing a common standard. The 2014 report of the Secretary-General on the QCPR will provide further details in this regard.

³ Moreover, a UN Guidance Note for Effective Use and Development of National Capacity in Post-Conflict Contexts has been developed and is under review in the concerned inter-agency fora.

39. Resident coordinators were also asked to indicate the extent to which they agreed that the United Nations system in the country used specified national capacities as much as possible. An identical question was asked of programme country governments in 2012 and the data from both surveys are shown in Table 1.

Table 1 - In order to achieve good results in the country, the UN has used the following approaches as much as possible (% of governments in 2012 and resident coordinators in 2013 that checked each response)

Dimension of capacity	Strongly agree		Somewhat agree		Somewhat disagree		Strongly disagree	
	GOV	RC	GOV	RC	GOV	RC	GOV	RC
Used national experts in the design of programmes and projects	31	67	50	29	12	3	6	1
Used national institutions in the design of programmes and projects	36	54	49	42	11	3	6	1
Used national procurement systems	11	7	33	39	28	30	24	24
Used national financial systems	12	9	37	38	27	31	21	22
Used national monitoring and reporting systems	10	16	42	43	26	29	29	12
Used national evaluation capacities	10	17	43	35	27	36	12	13

40. The remarkable aspect of Table 1 is the close agreement between governments and resident coordinators on the extent to which the United Nations is seen to be using each category of national capacities 'as much as possible', especially in terms of implementation, monitoring, reporting and evaluation. A divergence can be observed with regard to using experts and institutions at the design stage, where resident coordinators feel more strongly than governments that the United Nations is using national capacities to the fullest extent.

41. This data tends to suggest that the measures taken by the United Nations system so far have a long way to go to achieve the desired results. In the supplementary comments, some resident coordinators mentioned the limited capacity of national institutions, and steps being taken to strengthen national capacities, including through the Harmonized Approach to Cash Transfer (HACT) process. While the interests of strengthening national capacities clearly lie in using national institutions to a much greater extent, there are also some opposing factors, in terms of United Nations agencies not wanting to compromise delivery rates or financial accountability. There is also some anecdotal evidence of United Nations agencies, or some of their decentralized units, favouring implementation with their internal capacities as part of operational strategy. Nonetheless, the resident coordinator survey shows that in the majority of programme countries, funds are still largely being managed through agency execution or

implementation. Such United Nations execution or implementation tends to be more prevalent in low-income countries, but it is also quite common at higher income levels. In this regard, an in-depth study of the incentives and disincentives to using national capacities may merit consideration. Such a study could also shed light on why the business models of United Nations entities at the country level have changed significantly in the past 15 years despite the fact that a large number of programme countries have shifted from the low-income to middle-income category.

42. The main reasons for United Nations agency execution or implementation, as seen by the resident coordinators, are set out in Table 2.

Table 2 – Reasons for United Nations agency execution or implementation at the country level

Answer Options	Response Percent
...the rules of some agencies do not allow them to transfer funds to the Government or other national institutions.	16.7%
...the institutions in the country do not have the requisite capacities.	34.3%
...the Government prefers UN agency implementation because the activities are of a small scale (e.g., a short-term international consultant) and it is more efficient that the UN agency does the work.	13.9%
...the Government prefers UN agency implementation in some sensitive areas because it values the UN's neutrality.	23.1%
Other	12.0%

43. In the comment box of the survey, resident coordinators proposed additional reasons for limited government execution and implementation, including the following: existence of regional projects where no national/regional institution covers all eligible programme countries, temporary political or humanitarian circumstances, and the insistence of some donors on United Nations execution.

44. It may be pertinent to highlight the fact that 18 resident coordinators, from all regions, selected the first option: “the rules of some agencies do not allow them to transfer funds to the Government or other national institutions”. This topic could be explored in future surveys.

45. The resident coordinators were also asked specifically about the use of parallel implementation units (PIUs). The majority of respondents, or some 72 per cent, disagreed (either somewhat or strongly) that “the UN system is using PIUs more than necessary”. Amongst the remaining 31 resident coordinators, almost all ‘somewhat agreed’ with the proposition, while only 2 ‘strongly agreed’. While still a matter of concern, PIUs may be less of a problem in the context of United Nations activities, which fall mostly in the realm of technical assistance, than in the context of the activities of some other development partners who provide support for capital projects.

(b) Poverty eradication

46. The QCPR resolution mentions repeatedly the need for the performance of the United Nations development system to be judged in terms of its impact on supporting programme countries in their

efforts to eradicate poverty. Also, for the first time in a legislation of this kind, the 2012 QCPR resolution of the General Assembly treats poverty eradication as a topic with its own sub-heading. Reporting on performance in this area, however, is constrained, as noted at the beginning of this section, by the lack of a common classifications system that would allow trends in regard to funding for poverty eradication or other themes to be regularly monitored. For the purposes of the 2012 survey of programme country governments, a list of 16 such themes was developed by DESA in consultation with UNDG. Governments were asked to select the five most important areas for United Nations assistance to their country in the next four years. The responses are presented in Figure 1, with a breakdown by country income group:

Figure 1 – Most important areas for UN assistance (Programme country government survey, 2012)

47. Poverty reduction was selected by 54 per cent of countries, that is, more often than any other theme except for health (59 per cent) and environment and sustainable development (72 per cent). Insight into the importance that United Nations entities at the country level give to the different themes may be gained from the existence of results groups (also known as outcome groups or theme groups, which enable the United Nations agencies at country level to ensure coherence in their actions) that address the topic. Thus, the 2013 survey of resident coordinators asked which themes were covered by a results group. The responses are shown in Figure 2. To facilitate comparison, Figure 2 includes the same themes as in Figure 1 with the exception of South-South cooperation which was added for the purpose of the resident coordinator survey.

Figure 2 – UN priority areas covered by theme groups at country level (Resident coordinators, 2013)

48. Comparing the results shown in the two charts, one may observe a broad measure of consistency between the areas governments consider important, and the areas to which United Nations country teams are, collectively, devoting significant efforts. Thus, 62 per cent of resident coordinators reported that poverty reduction was covered by a results group, which may be compared with 54 per cent of programme countries stating this topic was an important one for the United Nations to address.

49. A number of areas were covered by a results group more commonly than poverty reduction, including gender (91 per cent), governance (68 per cent), environment and sustainable development (65 per cent), disaster risk reduction (63 per cent) and human rights and equity (63 per cent). The comparatively high numbers in the latter areas should not necessarily be regarded as excessive, given the normative mandates of the United Nations and demand for such linkages, and the fact that these topics are cross-cutting as well as sector-based.

50. In this context, the number of results groups on poverty reduction may seem on the low side. It might be thought that this relatively low number could be explained by fewer results groups on poverty reduction in higher income countries, but when the data is disaggregated according to income level it emerges rather unexpectedly that only 50 per cent of low-income countries have a results group on poverty reduction, while 73 per cent of lower middle-income countries and 61 per cent of upper middle-income have such results groups.

51. In response to a question on poverty eradication in the 2013 survey of resident coordinators, two-thirds of respondents ‘strongly agreed’ that the UNDAF (or equivalent instrument) placed sufficient

emphasis on actions to empower the poor and people in vulnerable situations. Most of the remaining third of the respondents ‘somewhat agreed’ while five resident coordinators ‘somewhat disagreed’, but none ‘strongly disagreed’. This large measure of agreement shows that UNCTs are effectively mandated to do this by the UNDAF guidelines. Nonetheless, the fact that many country teams lack adequate disaggregated data in respect of several disadvantaged or vulnerable groups, as noted in the sub-section on gender equality and women’s empowerment below, may suggest that the United Nations system faces greater challenges in this area than the above responses acknowledge.

52. This is among the several areas where desk reviews and independent evaluations of UNDAFs may produce more useful information than a general-purpose questionnaire. This topic may be added as a standard provision in UNDAF evaluation terms of reference.

(c) South-South cooperation and development of national capacities

53. The 2013 survey of resident coordinators asked whether there is evidence that the host Government provides or intends to provide development cooperation to other developing countries (e.g. South-South cooperation or other peer-to-peer exchange platforms). Table 3 shows that countries in all regions are interested in providing South-South cooperation, particularly in Latin America and the Caribbean, where this percentage was 74 per cent.

Table 3 – Interest in enhancing South-South cooperation (% of responses)

Answer Options	Region					Response Count
	Asia and Pacific	ECIS	LAC	Africa	Arab States	
Yes	13	9	16	21	7	72
No	5	7	6	14	3	37

54. While there is interest in providing South-South cooperation at all levels of development, the proportion of countries interested, increases quite sharply with income, as Table 4 shows.

Table 4 – Interest in enhancing South-South cooperation by income level (% of responses)

Answer Options	Income Level				Response Count
	Low	Low/Mid	High/Mid	High	
Yes	13	23	27	4	72
No	13	15	6	0	37

55. The resident coordinators who responded ‘Yes’ to the above question were asked a follow-up one: To what extent has the Government sought and received UNCT support in providing South-South cooperation? The results are shown in Table 5.

Table 5 – To what extent has the Government sought and received UNCT support in providing South-South cooperation?

Answer Options	Region					Response Count
	Asia and Pacific	ECIS	LAC	Africa	Arab States	
To a large extent	8	3	11	11	3	26
To a moderate extent	10	8	7	13	3	29
To a small extent	1	3	4	3	4	11
Not at all	0	0	1	6	1	6

56. Overall, UNCTs appear to have been active in all regions in supporting South-South cooperation, particularly in Latin America and the Caribbean region. More in-depth analysis would be needed to say whether this is an effect or a cause of the relatively high degree of interest in South-South cooperation in Latin America and the Caribbean.

57. According to the results of the agency headquarters survey, the engagement of United Nations country teams in supporting South-South cooperation is backed by particular initiatives of some agencies that support the exchange of know-how and expertise in this area. A number of agencies offered examples on how they plan to follow up to paragraph 148 of the General Assembly resolution 67/226, which calls for a more collaborative approach in supporting country-level development initiatives, and for improved mechanisms to promote knowledge sharing through South-South cooperation or triangular schemes.

58. For instance, UNFPA Latin America regional office has recently launched a platform for the exchange of know-how and expertise for South-South cooperation among countries in the region. UNDP stated that the model of supplementing regional and sub regional programmes with peer-to-peer knowledge support networks is a key ingredient in the UNDP approach to South-South exchange. In 2012 the ILO governing body adopted a strategy for technical cooperation on South-South and triangular cooperation. FAO further strengthened its commitment to South-South cooperation in 2012 by establishing a team within its South-South and Resource Mobilization Division that assists and develops member countries' capacities in South-South cooperation.

(d) Gender equality and women's empowerment

59. Programming to advance gender equality and women's empowerment depends on the availability of disaggregated data at the earliest stages of programme planning. The resident coordinators were therefore asked about the availability of disaggregated data at the UNDAF country analysis stage. As Table 6 shows, the majority of the resident coordinators considered the availability of gender disaggregated data to be at least somewhat adequate, but there is scope for improvement in that area. In particular, data disaggregated by gender tends to be less adequate than data disaggregated by income or age. This challenge is being addressed by the Inter-agency and Expert Group on Gender

Statistics which supports the work of UNCTs in this area, including by developing standards, methodological guidelines, and training manuals.

Table 6 - Extent to which the UNCT had access to adequate data according to various break-downs (% of responses):

Answer Options	Very adequate data	Somewhat adequate data	Somewhat inadequate data	Very inadequate data	Not applicable in this country
Income level	33	47	12	6	2
Gender	24	60	14	3	0
Age	33	55	8	4	0
Disability	2	37	36	25	1
Minorities ⁴	6	41	20	26	6
Indigenous peoples	3	28	17	13	40

60. According to the survey of resident coordinators, approximately half of all UNCTs have completed the Performance Indicators on Gender Equality and the Empowerment of Women (Gender Scorecard). A further quarter of resident coordinators state that their UNCT intends to complete the exercise in the next two years. Another quarter have no plans to do so. According to UN-Women, only 22 per cent of countries are known to have completed the scorecard. The UNDG Task Team on Gender Equality, led by UN Women, periodically reviews the completed scorecards and the extent to which they contribute to better integrate gender equality in the UNDAF.

61. The UNDG Task Team on Gender Equality recently mapped human resources working on gender equality across the UN system at both headquarters and in the field, including gender focal points staff and gender specialists or advisors. From preliminary findings based on responses from 125 out of 138 UNCTs and the vast majority of UN entities at HQ level, it is estimated that there are over 3,000 professional staff in the UN system performing gender-related functions as part of their job responsibilities, of which approximately 70 per cent are based in the field. Yet, despite this significant number of staff and personnel working on gender equality issues in the UN system, they only constitute 7.9 per cent of total UN staff (professional and higher staff) and personnel. This reflects limited growth since 2003, when they were estimated to constitute 7.4 per cent of Professional and higher staff.

62. Strengthening and sustaining coordination mechanisms is particularly important for gender responsive operational activities. Currently there are 106 theme groups on gender which support both internal UNCT coordination as well as dialogue with national partners and key stakeholders. Interestingly, no other thematic area features as many theme groups as gender equality. Gender

⁴ Ethnic, religious, language, other

equality is also the area in which the most programme countries, or 49, were reported to have one or more United Nations joint programmes.

63. Despite these efforts, gender equality was identified by resident coordinators more often than any other thematic area, with the exception of environment and sustainable development, as one where competition among United Nations agencies is observed. This finding should be of concern given that in the 2012 survey of UNCTs, gender was well down the list of areas where UNCT members had observed competition, after health (including HIV/AIDS), humanitarian interventions, environment, governance and food security. This apparent shift merits more in-depth analysis.

(e) Transition from relief to development

64. Results of the 2013 survey of resident coordinators with respect to the impact of the integration policy of the Secretary-General on United Nations coherence show a positive trend. The percentage of respondents who strongly agreed with the statement that the integration policy has increased United Nations coherence at the country level doubled in 2013 (54 per cent 'strongly agreed' compared to 25 per cent in 2012). These figures should be treated with caution, however, as the number of responses was small: 13 in 2013 and 5 in 2012. The result may indicate that the impact of the policy on United Nations coherence is gradually becoming more visible. A contributing factor may be the increased use of Integrated Strategic Frameworks as a tool for agreeing on integration priorities and the roles/responsibilities of different actors across the UN system; 12 of the respondents in 2013 reported having such frameworks.

65. Within the framework of Transitional Solutions Initiative (TSI), UNDP and UNHCR in collaboration with the World Bank are participating in a joint programme in eastern Sudan, while another programme in Colombia involves UNDP and UNHCR. These two entities are also supporting the resident coordinators in three pilot countries (Kyrgyzstan, Ivory Coast and Afghanistan) to develop durable solution strategies under the Secretary-General's Policy Committee decision 2011/20 on durable solutions in the aftermath of conflict.

66. Results regarding the coherence of support and guidance from headquarters show almost equal percentages stating that they had received coherent support to a 'large/moderate' or 'small' extent, respectively. This is the first time that the question is asked in the survey of resident coordinators and the results will help provide a baseline for future monitoring thereof.

67. The survey of agency headquarters acknowledged the role played by the undg/echa Working Group on Transition in facilitating inter-agency collaboration in transition matters. While this group has institutionalized cooperation between Secretariat entities and the members of the United Nations development system, other groups such as the Integration Steering Group chaired by DPKO handle operational issues. The agency headquarters survey did not show a strong indication that programming instruments or business practices have yet been successfully harmonized to effectively support national efforts in countries in transition from relief to development. Moreover, as noted in section 4 below, humanitarian assistance continues to be a major area where resident coordinators report competition among UN entities. To overcome these challenges, agencies mentioned that it will be important that all UN bodies that play a role in different transition phases and settings contribute their knowledge and

experience on a regular basis to the work of the UNDG/ECHA Working Group to ensure coherence and unity of purpose in these difficult and sensitive settings.

(f) Regional dimensions of transition from relief to development

68. In view of the specific reference in paragraph 111 in General Assembly resolution 67/226 to “spillover effects”, the 2013 survey of resident coordinators asked those working in transition country settings whether the United Nations system should be giving higher priority to preventing spillover effects in the region/sub-region (e.g., sub-regional strategy needed but not in existence). Thirty-seven resident coordinators responded to the question, with 68 per cent answering ‘Yes’, while the others answered ‘No’ or ‘Don’t Know’. The proportion saying ‘Yes’ was highest in Africa and the Arab States regions, where it was 75 per cent. A high proportion (10 out of 13) of the resident coordinators who responded to the questionnaire from the Arab States region considered their countries to be in transition. These results suggest that the United Nations system as a whole may need to consider how to respond better at the regional or sub-regional level to transition situations.

(g) Disaster risk reduction

69. The 2013 survey of resident coordinators also asked whether the host country has a disaster risk reduction strategy. The results are shown in Table 7.

Table 7 - Does your country have an up-to-date disaster risk reduction strategy? (% of responses)

Answer Options	Region					Response Count
	Asia and Pacific	ECIS	LAC	Africa	Arab States	
Yes	15	8	12	17	2	58
Yes, but it is over 3 years old	2	3	6	8	3	24
No	1	6	3	10	6	27

70. The above table indicates that an overwhelming majority of countries in the Asia and the Pacific region, or 16 out of 19, have an up-to-date disaster risk reduction strategy. It is unclear whether specific regional differences could explain the pattern of responses in Table 7. The concerned entities of the UN system could be invited to explore these findings in more depth.

4. Improved functioning of the United Nations development system

(a) United Nations Development Assistance Framework

Country analysis

71. The UNDAF process generally begins with an evaluation of the previous phase (discussed under the heading of evaluation in part (g) below) and an analysis of the country’s needs and priorities. In the 2013 survey of 109 resident coordinators, almost half (51 countries or 47 per cent) used the full

common country assessment process (CCA), while the other country teams arranged for complementary studies or analyses to be carried out. While there are many aspects to a sound situation analysis, for the current report, emphasis was placed on the availability of disaggregated data in view of the focus on this topic in General Assembly resolution 67/226. Such data was not always adequate, as was seen in Table 7 above, in the section on gender equality.

72. Table 7 suggests that a majority of country teams had access to at least somewhat adequate data on age, income level and gender breakdowns, while data was lacking much more often in respect of disability, minorities and indigenous peoples. A not insignificant number of countries also lacked adequate data on the first three categories: for example, data disaggregated by gender was deemed at least somewhat inadequate by 18 resident coordinators. Considering the well-established importance of disaggregated data as a starting point for targeting programmes, there appears to be scope for the United Nations system to increase its support for the strengthening of national capacities in this area, as called for in paragraphs 61 and 90 of General Assembly resolution 67/226. It may also be the case, as noted in the section on capacity development, that more attention should be paid in some countries, as part of the country analysis process, to assessing capacity gaps and considering how to strengthen them.

UNDAF process

73. Among the 109 resident coordinators who responded to the survey, 92 are posted in a country with an UNDAF or a comparable document. A further 13 resident coordinators were posted in a country where the principles of integration apply, using an integrated strategic framework or a similar document; one is a DaO country with a 'One-UN Plan', and three country teams have opted not to prepare an UNDAF since they are located in relatively high-income countries with small core programmes. Another DaO country and two self-starter countries have a 'common operational document of the UNDAF' and nine countries have developed a common country programme document (CCPD). The CCPD countries include three DaO countries, but the remaining six are an eclectic mix of countries from all regions of the world and diverse income levels. The specific request in the QCPR resolution to the Secretary-General to propose options for the review and approval of CCPDs, including recommendations, is addressed later in this section.

Alignment with national needs and priorities

74. A majority of resident coordinators (58 per cent) in the 2013 survey indicated that the United Nations was 'very closely aligned' in terms of alignment with national needs and priorities. In responding to the same question in 2012, only some 23 per cent of programme country governments judged that the United Nations was 'very closely aligned'. Among the DaO pilot countries, however, 38 per cent of governments stated that the United Nations was 'very closely aligned'. While this appears to represent an advance on the average country situation, in most countries there does appear to be a considerable disconnect between the perceptions of governments and the perceptions of resident coordinators in this regard. While the more widespread application of DaO as a result of the QCPR resolution may help to reduce this disconnect, the 2012 survey of programme country governments indicates that they expect UN country teams to engage more intensively with their government counterparts to ensure alignment with national needs and priorities.

75. The topic of the United Nations focusing on achieving the Millennium Development Goals (MDGs) was also covered in both the 2013 survey of resident coordinators and the 2012 survey of programme country governments. In this regard, 60 per cent of governments 'strongly agreed' that the United Nations was focused on assisting the country to achieve the MDGs; this compares with 70 per cent of resident coordinators who 'strongly agreed' to the same statement in the 2013 survey. There is substantially more agreement between the United Nations and the governments on this question than on the previous question, a finding that merits further study.

76. The resident coordinators were also asked whether the UNDAF period is aligned with the Government's medium-term planning cycle (where applicable). The responses showed that there is alignment in 58 countries, but not in another 24 countries. The reasons given by resident coordinators for non-alignment of cycles are varied, but a fairly common theme was that the Government cycle is three or four years, or a period longer than five years, whereas the UNDAF duration is said to be fixed at five years. However, the 2010 UNDAF guidelines (Part I) call for synchronization of this instrument with the Government cycle without referring to a five-year period. The UNDAF guidelines could be amended to emphasize synchronization and clarify that there is no such requirement for five-year duration.

77. Another way of looking at alignment would be through the lens of how effective the United Nations system is at prioritizing its planned areas of intervention when preparing the UNDAF. The evidence suggests that country teams still see some challenges in this area. As was the case last year, the resident coordinators were asked whether they agreed or disagreed that, during UNDAF prioritization, agencies had agreed to refrain from doing things that were important within their individual mandates and priorities, either because the issue was not a national priority or there was no clear United Nations comparative advantage. Only 31 resident coordinators, or 29 per cent, felt they could 'strongly agree' with the statement, and 21 resident coordinators, or some 20 per cent, either somewhat or strongly disagreed. In responding to the same question last year 18 resident coordinators, or 23 per cent, disagreed. The difference is marginal, and not sufficient to establish yet that a real improvement has taken place.

78. The success of prioritization efforts may also be assessed from the extent to which resident coordinators reported that United Nations agencies' country programme outcomes were in line with the UNDAF outcomes. The responses showed that the main specialized agencies tended to have outcomes outside the UNDAF more frequently than the funds and programmes. Moreover, even the major development-oriented funds and programmes had outcomes outside the UNDAF in 10 to 15 per cent of countries. At the other end of the scale, the resident coordinators reported that the major development-oriented funds and programmes had outcomes in their country programme documents (CPDs) that were identical to the outcomes in the UNDAF in from 17 to 30 per cent of countries (the percentage varies from one agency to the other). The latter is a valuable indicator of coherence, and will be tracked over the coming years. UNDP has stated that their policy is now that the UNDAF outcomes will be carried over verbatim into their country programme documents.

National ownership

79. As an indicator of national ownership of United Nations system activities in the country, as well as of system-wide coherence, the resident coordinators were asked to provide information on the existence

of a joint Government-United Nations Steering Committee (or a similar body) on the UNDAF (or equivalent instrument). Some 70 per cent of resident coordinators reported that such a body is in place. Among these about half, or 53 per cent, had conducted an annual review of the UNDAF during the preceding twelve months. Many resident coordinators commented that a joint steering committee was currently being established in the context of a new UNDAF and in keeping with the (DaO) “One Programme” standard operating procedures.

80. The existing 2010 UNDAF guidelines and the new DaO standard operating procedures emphasize the centrality of national ownership by prescribing alignment of United Nations country programming tools with national plans and priorities. These guidelines and procedures will be revised, as needed, to reflect strong emphasis on the need for national ownership of country programming.

UNDAF results groups

81. In the 2013 survey, 23 per cent of resident coordinators stated that the UNDAF was prepared in the first half of the final year of the previous UNDAF, in line with the recent trend to prepare simplified and shorter UNDAF documents. With further simplification through the ongoing processes such as DaO, the UNDAF has the potential to serve for review and approval purposes, according to some agency headquarters comments. A corollary of ‘lighter’ UNDAFs, as the experience in Turkey in 2011 showed, is the need for more attention to ensuring coherence at the implementation stage, through mechanisms such as results groups. Comments by resident coordinators in 2013 suggest that there is a trend towards more rigour in the workings of such groups. Some agencies have indicated that results groups may become more prominent in the future as a basis for effective coordination, and UNDAFs themselves less prominent.

82. The resident coordinators were asked about the existence of results groups, also known as programme coordination groups, outcome groups or theme groups. The results were recorded in the section on poverty eradication above. While different names for such groups have been used at different times and for different purposes, they all aim to enhance coordination at the operational level, and they are widely used by UN country teams, with the average country having about six such groups. The term ‘results group’ has been introduced as part of the ‘One Programme’ standard operating procedures (SOP) for DaO countries. Given the growing importance of such groups, resident coordinators are reporting on the roles being played by such groups, initially to establish a baseline, and over time to understand how the SOPs are being implemented. For example, at present, there is much variation in the extent to which such groups have firm work plans.

Non-resident agencies (NRAs)

83. The resident coordinators were asked whether the UNCT faced any specific challenges regarding participation in the UNDAF (or equivalent instrument) process by non-resident agencies (NRAs). 44 resident coordinators, or 40 per cent, reported that they had faced some challenges. Difficulties in communicating effectively and in a timely manner were quite common, including some instances of lack of sharing of significant information. As participants in the Resident Coordinator system, all UNDG agencies are expected to provide the RC regularly with information on funding commitments and programme implementation in the country. The performance of individual agencies is examined in more detail under the Resident Coordinator system below.

84. All 44 resident coordinators gave specific information to support their responses on the topic of challenges; this information will be published in full, after editing to protect confidentiality, and should be of considerable value to agencies.

85. While this year’s survey has only the resident coordinators’ perspectives on the topic, the survey in 2014 will be addressed to all members of UN country teams, including non-resident members; this will allow a balanced picture to be presented. It is therefore not advisable to draw any conclusions at this stage.

Cooperation with the multilateral development banks (MDBs)

86. On the effectiveness of the overall cooperation between the UNCT and the Bretton Woods Institutions, especially the World Bank, resident coordinators responded as follows (see Table 8).

Table 8 – How effective is the cooperation between the UNCT and the Bretton Woods Institutions, especially the World Bank, at the country level? (% of responses)

Answer Options	Asia and Pacific	ECIS	LAC	Africa	Arab States	Response Count
Very effective	3	6	2	8	4	24
Somewhat effective	7	7	4	15	2	38
Slightly effective	6	3	9	10	3	33
Not at all effective	2	1	6	2	2	14

87. The above data presents a mixed picture, with some very effective cooperation, especially in Africa and the ECIS region, and less effective cooperation in general reported in Latin America and the Caribbean.

88. Overall the above data reflects an improvement in cooperation with the World Bank. In answering a corresponding question in the 2012 survey, only 5 per cent of resident coordinators assessed the cooperation with the World Bank as being “very effective”.

89. The same question was asked in relation to the regional development banks:

Table 9 - How effective is the cooperation between the UNCT and the regional banks at the country level? (% of responses)

Answer Options	Asia and Pacific	ECIS	LAC	Africa	Arab States	Response Count
Very effective	4	0	3	6	1	15
Somewhat effective	5	9	5	15	4	40
Slightly effective	6	6	9	10	4	38
Not at all effective	3	2	5	4	2	16

90. The picture here suggests that cooperation with the regional banks is somewhat weaker than with the World Bank. The same finding: that is, of somewhat less effective cooperation with regional banks than with the World Bank was also made in the 2012 survey of UNCTs.

Simplification of the UNDAF process

91. Paragraph 117 of the General Assembly resolution 67/226 explicitly requests the United Nations development system to simplify the UNDAF process in order to reduce the workload on national Governments and other stakeholders, decrease the time necessary for the preparation of relevant documents and ensure alignment with Government planning cycles, thus improving the focus on results and promoting better division of labour within the United Nations system at the country level.

92. The undg 2013-2014 work plan provides for action to simplify and improve the UNDAF process. This revision of the UNDAF guidelines would be informed by the new processes and tools being developed in the SOPs for delivering-as-one countries. The simplification of the UNDAF process would have the following benefits: (a) reduction in the overall time to complete the UNDAF and (b) reduction in staff resources invested in the UNDAF process (both for the Government and United Nations entities). In delivering-as-one countries, it is envisaged that agency instruments (e.g. country programme documents) will be replaced by UNDAF instruments. In the agency headquarters survey, a number of agencies have stated their intention to follow a coordinated approach for the simplification of the UNDAF process, and specifically highlighted the endorsed standard operating procedures and the undg QCPR Action Plan. Specific action to ensure alignment with Government planning cycles was not mentioned.

93. In the agency headquarters survey, a number of agencies have also confirmed, in response to the request of the General Assembly in paragraph 119 of resolution 67/226, that they are either in the process of simplifying programme and project management policies and processes in support of a further harmonization with the UNDAF and delivering-as-one processes or streamlining policies, procedures and guidelines to make them more in line with undg guidance. In the survey, none of the responding agencies specifically referred to the request of the General Assembly to inform and discuss with their respective governing bodies progress achieved in this regard by the end of 2013.

Possible options for reviewing and approving common country programme documents (CCPDs) in delivering-as-one countries

94. An important element of recent efforts to enhance the coherence of operational activities of the United Nations system while reducing the transaction costs has been the preparation and submission to governing bodies of common country programme documents (CCPDs) that incorporate the planned activities of all United Nations entities, or at least of those entities that are required to submit a country programme document (CPD) to their governing body.

95. The General Assembly, in resolution 64/289 on system-wide coherence called on “those countries presenting a common country programme document on a voluntary basis to prepare it consistent with the United Nations Development Assistance Framework.”

96. As noted earlier, among the countries covered by the UN Resident Coordinators who responded to the 2013 survey, nine had already submitted common country programme documents. The number of governments wishing to use this modality is likely to grow in the coming years. According to the survey; some 75 per cent of all programme countries are considering the delivering-as-one approach to one extent or another.

97. The new UNDG standard operating procedures (SOPs) for countries wishing to adopt the delivering-as-one approach envisage that “the UNDAF is developed and signed with the Government between January and June of the year prior to implementation. It is submitted to UN governing bodies in July for approval in September prior to implementation in January of the following year.” Thus, the UNDAF, or at least the substantive parts of it, would constitute the common country programme document (CCPD) referenced in paragraph 143 of the QCPR resolution (see below). In an annex⁵ to the SOPs, it is suggested that the “common part of the UNDAF” may be complemented “with agency-specific annexes that are extracted from the UNDAF and replace CPDs or other types of instruments.” These annexes would set out the individual agency’s value-added to the “One Programme”, and the Executive Boards/Governing Bodies would “approve the respective agency annexes, including agency results and budgets.”

98. In this regard, the Secretary-General notes that the “One Programme” SOP is a first step and it can be improved further. Such improvements should provide for a review of the UNDAF from the point of view of system-wide coherence. This process should address the existing two main limitations: (a) there is no single governing body that reviews or approves the entirety of the UNDAF to ensure the coherence of the contributions of the respective funds and programmes (as well as contributions of other United Nations entities), and (b) programme countries must submit the UNDAF for review and approval to each Executive Board of the funds and programmes.

99. In paragraph 143, the Secretary-General was requested to include in his annual report options for the review and approval of common country programme documents of the “delivering-as-one” countries and to make appropriate recommendations for the consideration of the Economic and Social Council and the General Assembly by 2013.

⁵ It is understood that agreement within the UNDG about what parts of the annex to take forward has not been reached yet.

100. Table 10 outlines five possible options for reviewing and approving CCPDs. In this regard, the Secretary-General is of the opinion that, prior to reviewing these options in detail, it would be prudent to make a thorough analysis of the experience so far with CCPDs, in particular to learn about the actual impacts in areas such as transaction costs and overall United Nations coherence. There is also a need to observe how the SOPs help in improving the coherence function. Moreover, the Secretary-General recommends that the issue of review and approval of CCPDs will be further explored in the survey of programme country governments early next year.

Table 10 - Possible options for reviewing and approving common country programme documents (CCPDs) in delivering-as-one countries

Options	Selected assessment criteria			
	(A) Reduces transaction costs for Member States	(B) Improves coherence	(C) Requires legal or other significant changes	(D) Increases secretariat costs
(1) Executive Boards (EB) review and approve CCPD including agency-specific annex	No material change from present review and approval system	No material change from present review and approval system	No material change from present review and approval system	No material change from present review and approval system
(2) Joint Meeting of Boards (JMBs) reviews CCPD and EBs approve respective agency-specific annex	Yes, single review process; greater efficiency in agenda-setting and documentation in EBs	Yes, JMBs would review CCPD as a whole; EBs would continue to approve individual entity contributions; potential for JMBs to also review business operations issues	No material change from present review and approval system. ECOSOC could formalize the role of JMBs in the review process through a resolution	No material changes in costs as existing secretariat structures of EBs could be utilized
(3) JMBs reviews and approves CCPD including agency-specific annexes	Yes, single review <i>and</i> approval process; greater efficiency in agenda-setting and documentation	Yes, JMBs would review and approve CCPD as a whole as well as individual entity contributions; potential for JMBs to also review common business operations issues	Yes, ECOSOC resolution required stipulating, inter alia, the functions, reporting lines, composition and decision-making process of JMBs	No material changes in costs as existing secretariat structures of EBs could be utilized
(4) JMBs reviews and ECOSOC approves CCPD including agency-specific annexes	Yes, single review process with formal approval in ECOSOC	Yes, JMBs would review CCPD as a whole as well as individual entity contributions; potential for JMBs to also review common business operations issues; ECOSOC could provide system-wide guidance including recommendations to specialized agencies	Yes, ECOSOC could formalize the role of JMBs in the review process through a resolution; ECOSOC authority to approve CCPDs not provided at present, so legislative changes would be required; such changes could be problematic given voluntary-funded nature of entities; accountability of Heads of entities could be compromised	Yes, although no material changes in costs for JMBs but potentially increased secretariat costs due to ECOSOC involvement in CCPD approval process
(5) ECOSOC reviews and approves CCPD and agency-specific annexes	Yes, single ECOSOC review and approval process; greater efficiency in agenda-setting and documentation	Yes, ECOSOC could provide system-wide guidance including recommendations to specialized agencies	Yes, same as (4)	Yes, same as (4)

(b) Resident coordinator system

101. As part of its 2013-2014 work plan, the UNDG will update the roles and responsibilities of the resident coordinator to reflect decisions in General Assembly resolution 67/226 on the QCPR, including through the full exercise of the responsibility and authority of the resident coordinators already provided by the Assembly under its earlier resolutions.

102. With a view to improving the coherence of United Nations operations at country level, the resident coordinator system envisages that agencies, generally through their local representatives (country team members), will participate in the UNDAF (or equivalent instrument) and, among other actions, provide regular reports on funding commitments and programme implementation of their agency to the resident coordinator.

103. The resident coordinators were asked to indicate in which aspects of the resident coordinator system each agency was participating. The results in the two above-mentioned key performance areas are shown in Table 11, which includes the agencies that participate in the UNDAF in at least 50 countries. The full results will be posted online.

Table 11 – Participation of United Nations entities in key country-level processes

Agency	Agency participates in the UNDAF (or similar programme framework)	Agency provides regular reports on funding commitments	Agency provides regular reports on programme implementation	Indicator
UNDP	106	62	65	1.2
UNAIDS	88	28	41	0.8
UNFPA	104	38	48	0.8
UNICEF	105	35	45	0.8
WFP	68	22	24	0.8
UNHCR	77	23	28	0.7
WHO	99	28	38	0.7
FAO	98	26	32	0.6
ILO	86	20	30	0.6
UN-Habitat	51	15	15	0.6
UN Women	78	22	27	0.6
UNIDO	71	14	19	0.5
UNESCO	85	13	24	0.4
UNEP	58	10	13	0.4

104. A simple indicator of the extent to which agencies are currently providing information as called for in the resident coordinator system is obtained by adding columns 3 and 4 and dividing by column 2. The results, in descending order, are shown above. With the UN resident coordinator also serving as the UNDP resident representative, UNDP is, at present, rated significantly higher than other agencies. The QCPR resolution has made the provision of such information to the Resident Coordinator mandatory for UN funds and programmes in the context of the common budgetary framework (CBF), which should increase the level of compliance. The data in the table above will serve as a baseline.

Management and accountability system (M&A system)

105. To enhance the effectiveness of the resident coordinator system, the undg instituted a 'management and accountability system' (M&A) in 2009. Most elements of the management and accountability system (M&A) have been implemented by members of the undg in the intervening period, though to varying degrees. Some United Nations organizations have yet to implement the action points related to mutual accountability have committed to do so by the first quarter of 2014. Resident coordinators express concern that the performance evaluation process continues to be one-sided: that is, the agency representatives evaluate them, but they do not have an opportunity to evaluate the agency representatives.

106. The agency headquarters survey showed that the majority of responding agencies now have a standard job description of a country representative that includes a specific reference to their role in supporting the resident coordinator system, and that the support to the resident coordinator system is one of the key annual performance targets of the country representatives. Most of the agencies also confirmed that it is the policy of their organization to obtain a formal input from the resident coordinator to the annual performance assessment of the country representative. The responses are presented in the table below in respect of agencies that were members of at least 50 country teams⁶, according to the resident coordinators who answered the RC survey.

⁶ Three specialized agencies that also have over 50 members of UN country teams are not included here because no data was available from them at the time this report was prepared.

Table 12 – Participation of United Nations entities in the management and accountability system and perception of the effectiveness of the “functional firewall” (Agency headquarters reports)

Agency	# of UNCTs of which agency is a member (Out of 109 - RC survey)	Has up-to-date job description reflecting role vis-à-vis the RC	UNCT results are captured in member’s own performance appraisal system	RC asked to provide formal input to UNCT member’s performance appraisal	How effectively the functional firewall is working
UNDP	103	Yes	Yes	Yes	Very effectively
UNFPA	101	Yes	Yes	Yes	Somewhat effectively
UNICEF	101	Yes	Yes	Yes	Somewhat ineffectively
UNAIDS	81	Yes	Yes	Yes	“adequate”
FAO	90	Not yet – being prepared	Will be required from 2014	Will be required from 2014	Somewhat ineffectively
UNHCR	78	Yes	No data	Sometimes	No data
UNESCO	75	Yes	Yes	No	Somewhat effectively
UN Women	64	Yes	Unclear	No	No data
WFP	67	Yes	Yes	Yes	Somewhat ineffectively

107. These answers regarding the established agency policy are only partly reflected in the results of the resident coordinator survey. As outlined below, resident coordinators have indicated that there are still considerable differences between United Nations entities in the application of these policies at the country level. The independent review of the M&A system conducted in 2011 made the same finding.

108. The resident coordinators were asked specifically, in respect of each member of the UNCT if he/she was aware that the member: (a) has a job description that reflects the role in supporting the work of the UNCT, (b) has participation in the work of the UNCT as a key performance area, and (c) has had a formal input from the resident coordinator to their performance appraisal. The resident coordinators were invited to check the boxes wherever they could provide an affirmative answer, and otherwise leave the box blank. The results are shown below in respect of the agencies that were reported to be members of at least 50 UNCTs.

109. An indicator of compliance with the three key performance-related requirements of the M&A system may be arrived at by taking the sum of the numbers in the three applicable columns and dividing it by the number of country teams in which that agency participates. A perfect score would be 3.0, except for UNDP where (in a country with a small programme) the resident coordinator is the UNDP member of the UNCT and does not of course assess his/her own performance. While the third

requirement (providing an input to the agency representative’s performance report) is the key one, all three elements have been included in the indicator because: (a) they are integral parts of the M&A system; and (b) a resident coordinator would have difficulty making a meaningful performance appraisal of an agency representative without knowledge of the pertinent elements of the other two factors.

Table 13 – Participation of United Nations entities in the management and accountability system(Resident Coordinators’ reports)

Agency	# of UNCTs of which agency is a member	Has up-to-date job description reflecting role vis-à-vis the RC	UNCT results are captured in member’s own performance appraisal system	RC provided formal input to UNCT member’s performance appraisal	Indicator
UNDP	103	51	47	55	1.5
UNFPA	101	27	33	41	1
UNICEF	101	26	34	39	1
UNAIDS	81	18	22	25	0.8
WHO	98	15	22	29	0.7
FAO	90	11	22	24	0.6
UNHCR	78	10	15	25	0.6
ILO	72	9	12	16	0.5
UNESCO	75	8	15	15	0.5
UN Women	64	7	11	16	0.5
WFP	67	8	12	16	0.5
UNIDO	52	4	7	11	0.4

110. Interpretation of the above data should take into account that the data is based on the information known to the resident coordinators as of April 2013. It is very possible that an agency representative could have a job description and a key performance area that are compliant with the M&A system, but it would not show up if it was not known to the resident coordinator. It is also emphasized that, due to turnover of staff, including the resident coordinators themselves, the compliance rate in respect of the performance appraisal dimension will always be significantly less than 100 per cent for any agency. The data also need to be treated with some caution because an agency, for example UN-Women, may be a member of a country team where they do not have a full-time physical presence, so an input may have been obtained from one of the resident coordinators in the countries they cover but perhaps not others. An efficient method to obtain an input from all countries covered

would remain important, since countries where a representative is not resident could have different concerns than those where the representative is posted.

111. The overall conclusion to be drawn from the data is that the M&A system is progressively coming into effect. Resident coordinators are now providing an input to the appraisal of the performance of the country representatives of every agency listed above, although not yet in a majority of countries. In view of the agency headquarters reports that they are progressively implementing their commitments under the system, it may be expected that the rating of most if not all agencies will steadily go up in the coming years.

The "functional firewall"

112. UNDP fulfils the role of manager of the resident coordinator system, while being a United Nations programme in its own right, and the resident coordinator also serves as the UNDP resident representative. This arrangement can be helpful to a resident coordinator, as he/she is backed by the funding and operational resources of a major programme. On the other hand, it also requires safeguards to ensure that a resident coordinator does not serve UNDP preferentially over the other agencies in the country.

113. For this reason, as part of the management and accountability system, the resident coordinator is expected to maintain a "functional firewall" between the work he/she does for the system as a whole and the functions of the UNDP resident representative. This means, among other things, that the resident coordinator is expected to delegate as much authority as possible to the next most senior UNDP official, usually a country director or a deputy resident representative, particularly in regard to fund-raising; and also that UNDP headquarters refrains from considering fund-raising on behalf of UNDP when assessing the performance of resident coordinators/resident representatives.

114. In this context, the resident coordinators were asked whether any concerns about the "functional firewall" had been raised by any agency in the country in the last 12 months, and if so, to elaborate. Twenty resident coordinators, or 18 per cent, answered 'Yes', but without concrete explanations. Very few specific issues were mentioned by the respective resident coordinators, with no common pattern. The following comment perhaps sums up the views of a number of resident coordinators: "There is tension and misunderstanding of the firewall concept. Some heads of agency assume that firewall means that the resident coordinator must completely disassociate him/herself from UNDP management. My understanding is that I am held accountable for UNDP and responsible for strategic management of UNDP. I also believe that without line authority over UNDP I would be unable to perform as a resident coordinator due to severely limited resources available to this function. While in general I believe I am perceived first and foremost as a "resident coordinator", many agency heads expect more than I can responsibly give".

115. While only 18 per cent of resident coordinators overall reported concerns about the firewall, the figure was higher, at 28 per cent among the countries with the smallest United Nations programmes. Only three of these countries with small programmes have a UNDP country director.

116. From the survey of all UNCT members conducted in 2012, it is known that, at least at that time, there was a concern to see the firewall working better. Therefore, a question on the firewall will be included when country team members are surveyed in 2014.

117. The concern for an improved functional firewall is supported by the findings of the agency headquarters survey. The agency headquarters perspectives on the firewall are set out in the right-hand column of Table 13 above. Concretely pointing to the concerns of establishing an effective functional firewall, one agency recommended that the number of UNDP country directors needs to be increased in order for the firewall to work better. According to the same agency, it was observed that in countries with UNDP country directors, the firewall is more functional.

UNDP country director positions

118. The existence of a UNDP country director position is generally thought to enable a resident coordinator to devote the great majority of his/her time to performing resident coordinator functions, thereby enabling the “firewall” to work well.

119. Among the resident coordinators who completed the survey, 41 reported that they have a UNDP country director and 71 that they have a UNDP deputy resident representative (DRR). Some countries with large programmes have both. It is understood that UNDP has not been able to appoint more country directors due to additional costs.

120. The resident coordinators in countries where there is also a UNDP country director were specifically asked whether the presence of a country director was important to ensuring that the functional firewall works well: 76 per cent of the resident coordinators said it was very important, 16 per cent ‘somewhat important’, while 10 per cent said it was not important at all.

121. The resident coordinators with a DRR were asked if they would be in favour of UNDP appointing a country director even if that person had to cover more than one country. The resident coordinators in 28 countries said ‘Yes’ and those in the other 39 countries said ‘No’. Among the countries with the smallest United Nations programmes, there was stronger support for the idea. Some 43 per cent of the resident coordinators in these countries favoured a shared country director arrangement. In their comments, some resident coordinators expressed the view that a shared arrangement would be very helpful, while others thought that there was little difference between a CD and a DRR, and felt the distinction should simply be abolished.

122. The specific issue of fund-raising was also probed, with a question about the extent to which responsibility for resource mobilization on behalf of UNDP is delegated to the CD, DRR or senior-most UNDP official. The responses are shown in the table below. 12 resident coordinators reported that the fund-raising function was ‘completely’ delegated, and a further 53 reported that it was delegated ‘to a large extent’. This leaves 43 resident coordinators where delegation of authority was at most ‘moderate’, including from even some countries with large programmes. This data would suggest that further efforts are needed to ensure the “firewall” is working as well as intended, as a number of agencies have stated.

Table 14 - Extent to which responsibility for resource mobilization on behalf of UNDP is delegated (% of responses)

Answer Options	Programme Size			Response Count
	Largest	Middle	Smallest	
Completely	6	3	2	12
To a large extent	18	13	19	53
To a moderate extent	6	10	7	25
To a small extent	1	4	6	11
Not at all	1	0	0	1
Not applicable	0	3	3	6

Code of Conduct

123. In the last few years, UNDG has encouraged country teams to develop a ‘Code of Conduct’ to reflect their commitment to work in a cooperative way, and in particular to implement the provisions of the resident coordinator system and the MAS. Through the 2013 survey, the resident coordinators reported that the UNCTs have a Code of Conduct in 45 countries while they do not have one in 64 countries. In principle, the existence of a Code of Conduct may signal a firmer commitment to work coherently. However, there is no correlation at present between the existence of a Code of Conduct and the extent to which agencies are reported to compete with one another (see the next item). Likewise, the existence of a Code of Conduct seems to have made no difference in terms of the probability of the UNCT having issues with the “functional firewall” (see above). Of course, it cannot be ruled out that the extent of competition or of problems with the “firewall” in the Code of Conduct countries would have been greater in the absence of such an instrument.

124. The existence of a Code of Conduct does, however, correlate with participation in the M&A system. In countries where there is a Code of Conduct, it is considerably more likely that UNCT members will have UNCT results captured in their own performance appraisal system, and that the resident coordinator will have provided a formal input to UNCT member’s performance appraisal. This is not to say that one caused the other, only that they tend to go together.

Competition for donor funds

125. As was done in the programme country government and UNCT surveys in 2012, the resident coordinators were asked to what extent agencies in the country were seen to be competing for donor funding. The results from this year’s survey, broken down according to the country’s income level, are shown in Table 16.

Table 15 - Extent of competition among UN agencies for donor funding (% of responses)

Answer Options	Income Level				Response Count
	Low	Low/Mid	High/Mid	High	
To a large extent	6	7	4	1	20
To a moderate extent	10	17	16	0	46
To a small extent	8	13	11	0	35
Not at all	1	1	3	3	8

126. Table 15 suggests that competition is often considerable, which tends to confirm the results in the surveys in 2012. The results are not strictly comparable, however, because in 2012, there was simply a Yes/No option; the graduated scale of this year's survey is expected to make it easier to monitor progress over time. It can also be seen from the above table that competition tends to decline as the income level of the country rises, perhaps because there are fewer resources to compete for in those countries.

127. On the question of whether competition is judged to have had adverse effects, the following data emerged from this year's survey: (resident coordinators were invited to check all statements that apply; resident coordinators who indicated above that there was no competition in their country did not answer the question).

Table 16 – Views of resident coordinators on competition among agencies for donor funding

Answer Options	% of RCs in 2013	% of RCs in 2012	% of Govts in 2012
Competition among UN agencies is healthy and the Government welcomes it	7	7	16
Competition among UN agencies creates confusion for the Government	80	79	60
Competition among UN agencies increases the workload on Government officials	61	41	56
Competition among UN agencies diverts the agencies' attention from the main tasks of providing support to the country	61	64	62

128. The above table shows that there was no significant change in the perceptions of the resident coordinators on the effects of competition, though significantly more of them judged that agency competition increases the workload on government officials. To this extent, their views became more closely aligned with the views of programme country governments, as reported in 2012, which could

suggest a deterioration rather than an improvement in the overall situation as regards to the impact of competition.

129. The resident coordinators were also invited to mention the thematic areas where they had observed competition. The results are shown in Figure 3 (the thematic areas are those which were selected the most frequently – i.e. by at least 30 resident coordinators; the percentages reflect the percentage of all those who answered the question):

Figure 3 – Areas where resident coordinators observe competition for funding among agencies

130. As was the case in 2012, a notable feature is the frequency with which resident coordinators mention humanitarian assistance and disaster risk reduction, even though these are areas that may not feature prominently among the priorities of most programme countries. Accentuating the challenge is the fact that the volume of funding in these areas can be very large.

Professional competence of resident coordinators

131. In its resolution 67/226, the General Assembly called on the United Nations development system to “improve the way individuals are attracted, selected, trained, appraised and retained within the resident coordinator system”. The resident coordinators were invited to each suggest one measure they believed would most help to improve the situation in this regard. Ninety-three resident coordinators made such a suggestion. Among the more common themes raised were: provide the resident coordinator offices with adequate resources, enhance the authority of resident coordinator, provide resident coordinators with a more reliable career path, ensure family concerns are taken into account, and ensure more consistent implementation of the management and accountability framework.

132. The UNDG has as one of its deliverables for the period 2013-2014 to improve the recruitment, training, appraisal and retention of resident coordinators with a focus to achieve geographical, gender and agency diversity. Several activities will achieve this deliverable as follows:

- ❖ Strengthening the Resident Coordinator Assessment Centre as a tool to develop a pool of qualified candidates with the required skills and profiles;
- ❖ Update the roles and responsibilities of the resident coordinator to reflect QCPR directives with an aim to enhance the planning and coordination function of the resident coordinator, including through the full exercise of the responsibility and authority of the resident coordinators already provided by the General Assembly under its relevant resolutions;
- ❖ Development of a proposal for the creation of non-financial incentive mechanisms for resident coordinators;
- ❖ Development of a comprehensive lifelong, role-based learning programme for resident coordinator/humanitarian coordinator/designated official with an aim to equip them to effectively address all the tasks inherent to their functions;
- ❖ Complete the improvements to the performance appraisal system for resident coordinators and UNCTs. The UNDG has already made improvements to the performance appraisal system of resident coordinators and UNCTs in 2012.

Funding of the resident coordinator system

133. In response to ECOSOC resolution 2011/7 and General Assembly resolution 67/226 the United Nations Development Group (UNDG) has conducted a review of existing funding modalities in support of the resident coordinator system, including options for system-wide cost-sharing. In order to improve the provision of resources and support to the resident coordinator system and as a reflection of the fact that while the management of the RC system is anchored in UNDP, it is owned by the whole United Nations system, it has been recommended that current ad hoc arrangements and requests for funds be replaced with a centralized, predictable funding modality in support of the resident coordinator system at global, regional and country levels starting in 2014.

134. The global funding amount which has been agreed to support the resident coordinator system amounts to \$121 million annually, which is equivalent to 0.7 per cent of development-related activities of the United Nations in 2011. As the manager and founder of the resident coordinator system, UNDP would continue to fund the RC system at the level of some \$88 million annually. The remaining amount would be cost-shared by members of the UNDG, including UNDP. The cost-sharing would be based on a formula taking into account (i) an annual base fee, as a reflection that the resident coordinator system is owned by and benefits all members of the United Nations development system, (ii) agency staff size and expenditures, and (iii) system load as measured by agency participation in UNDAFs. Organizations, which already contribute to co-ordination mechanisms, including humanitarian organizations and UNAIDS, would contribute based on their development portfolio and taking into account their humanitarian-related work”

135. UNDG member entities would be expected to start contributing the amounts agreed by them and their governing bodies or, for those agencies whose next budget cycle starts later, the first budgetary opportunity thereafter. A financial management system will be put in place to ensure the accountability and transparency of the central financial system and to allow for measuring return on

investment. The UNDG will continue to review its business model and seek efficiencies to ensure the resident coordinator system remains as effective as possible.

Joint training arranged by UN country teams

136. The QCPR resolution called for “enhanced emphasis on joint training across agencies” in order “to provide effective capacity development and other support in response to national needs, priorities and challenges”. The resident coordinators were accordingly asked about joint training that had been arranged by the UNCT in the last year. The results are shown in Figure 4 (where the left hand column depicts the number of resident coordinators who selected each response).

Figure 4 – Joint training arranged by United Nations country teams in 2012 (responses from 109 resident coordinators)

137. In the majority of countries (70 and 71 respectively), there were no joint training on capacity development and HACT in the last year. Gender mainstreaming was the area where there had been the most joint training.

138. The resident coordinators were also asked for their assessment of the need for additional joint training. The responses are shown in Figure 5.

Figure 5 – Is there need for more joint training within the United Nations country team?

139. Among the options presented in this question, monitoring and evaluation and results-based management emerge as the areas in which there is the greatest interest on the part of resident coordinators in joint training. As noted in other parts of this report, as well as in the reports on the surveys in 2012, monitoring and evaluation and results-based management are areas where resident coordinators, UNCT members and governments alike believe the United Nations system can do better. Similar remarks apply to capacity development and gender mainstreaming, with governments being particularly focused on the importance for the United Nations system to do better in regard to capacity development.

Support from headquarters

140. The resident coordinators were asked whether they agreed or disagreed that they receive clear strategic guidance from UNDG on issues related to United Nations coherence at the country level. In response, 25 per cent ‘strongly agreed’, 50 per cent ‘somewhat agreed’, 22 per cent ‘somewhat disagreed’, and 3 per cent ‘strongly disagreed’. The same question was asked in the survey of resident coordinators and UNCT members in 2012, and only 12 per cent of resident coordinators ‘strongly agreed’ with the proposition at that time, while the proportion of those who ‘somewhat agreed’ remained roughly the same. Thus, there appears to have been an overall improvement in this area compared with 2012. A resident coordinator in Asia specifically commented that “the speed of response has vastly improved”, although the resident coordinators in Asia and the Pacific are in general among the least satisfied with the support received from headquarters, as the following table shows:

Table 17 - The RC office receives clear strategic guidance from UNDG on issues related to UN coherence at the country level (% of RCs selecting each option)

Answer options	Asia and Pacific	ECIS	LAC	Africa	Arab States	Response Count
Strongly agree	2	6	4	13	1	27
Somewhat agree	8	6	12	17	7	54
Somewhat disagree	6	6	12	17	7	24
Strongly disagree	1	0	2	0	0	3

141. Several resident coordinators note that Heads of Agency at country level were not receiving comparable messages from their own headquarters.

142. The resident coordinators were also asked about the support that the UNCT received from the UNDG regional team in the last year. The findings are shown in Table 18.

Table 18 - How effective was the support that the UNCT received from the UNDG regional team in the last year (% of RCs selecting each option)?

Answer options	Asia and Pacific	ECIS	LAC	Africa	Arab States	Response Count
Very effective	2	3	5	6	2	19
Somewhat effective	6	9	8	15	3	45
Slightly effective	6	4	4	6	5	25
Not at all effective	4	1	5	8	0	19

143. Although no direct comparison is possible, as this question was not structured in the same way as the previous question, the overall assessment of regional teams appears somewhat less favourable than of headquarters.

144. Resident coordinators were also asked to assess the effectiveness of the support they had received from headquarters on the specific topic of DaO. Fifty-five resident coordinators, or 51 per cent, responded to this question. The results are shown in Table 19. On this topic, the headquarters support is judged to have been less effective than the overall support as reported in the two preceding questions, with noticeably fewer resident coordinators (in percentage terms) judging the support to have been very or somewhat effective. This situation is expected to improve in light of the encouragement given by the General Assembly to delivering-as-one.

Table 19 – In regard to DaO, how effective has the support received from headquarters been (number of RCs selecting each response option)?

Answer Options	Asia and Pacific	ECIS	LAC	Africa	Arab States	Response Count
Very effective	4	0	4	2	2	6
Somewhat effective	4	5	5	15	2	17
Slightly effective	9	7	5	20	4	25
Not at all effective	5	0	2	4	2	7

145. Finally, the resident coordinators were invited to comment freely on what they believe is required to ensure “the highest level of coherent, relevant, effective and efficient support from UNDG/DOCO and the UNDG regional team” to the UNCT in their country. Contributions were received from 88 resident coordinators. Many resident coordinators expressed a desire for better communication, through email, phone calls and visits by regional team members. They called for more active support that is tailored to their needs, with more knowledgeable and responsive staff in the regional team and UNDG/DOCO. Such support would include sharing of best practices and support or training in areas that include DaO, strategic analysis, results-based management, monitoring and evaluation, capacity development, and resource mobilization. There is also need to obtain the views of UNDG regional teams and this will be done in the subsequent reports.

146. Another common theme to the comments was the importance of agencies making more progress on simplification and harmonization, including DaO, and sending consistent messages on policy, programme and operational matters from both their headquarters and regional offices. Many resident coordinators also stressed the need for stable funding and staffing of resident coordinator offices. Other issues raised by resident coordinators were ensuring the accountability of senior headquarters staff, empowering the resident coordinator, implementing the management and accountability system, and assigning more staff to UNDG/DOCO. The activities underway in UNDG regarding DaO and the M&A system and the initiative on funding the RC system should help address some of these concerns.

Delegation of authority

147. The resident coordinators in the 2013 survey were asked to provide their assessment of the extent to which each member of the country team enjoyed adequate delegated authority to make decisions on behalf of their agency at country team meetings. The results are shown in Table 20 in respect of the agencies that were reported to be members of at least 30 country teams.

Table 20 - Extent to which RCs consider that UNCT members enjoy adequate delegated authority to allow timely decision-making at UNCT meetings

Agency	Member of the UNCT	Very adequate delegated authority	Somewhat adequate delegated authority	Somewhat inadequate delegated authority	Very inadequate delegated authority	Not applicable or insufficient information	Response Count
FAO	90	30	31	17	9	20	107
ILO	72	21	22	13	19	32	107
OCHA	38	20	18	2	0	66	106
UNAIDS	81	39	33	7	5	22	106
UNDP	103	90	15	0	1	2	108
UNESCO	75	11	32	16	10	38	107
UNFPA	101	60	32	6	3	6	107
UNHCR	78	47	23	6	2	27	105
UN-HABITAT	40	9	21	9	4	61	104
UNICEF	101	78	23	2	1	2	106
UNIDO	52	10	25	9	4	56	104
UN Women	64	30	28	6	6	35	105
WFP	67	46	22	3	0	34	105
WHO	98	47	31	20	5	3	106

148. Comparing the third column with the second column, that is the number of times agency representatives were deemed to have ‘very adequate’ authority with the total number of country teams of which they are a member, one may see that the agencies with the largest field presence, UNDP and UNICEF, are judged to have the most delegated authority. At the same time, it is evidently not possible to explain the great variations among agencies only on the basis of the number of UNCTs of which they are a member.

149. The resident coordinators were invited to indicate the factors they thought could influence the extent of delegation of authority to country representatives in the future. Eighty-one resident coordinators responded, one of the main points being the need for UNDG and/or HLCM to develop clear policies and guidelines on this subject. In some cases it was observed that the local agency representatives might not be senior enough, or were non-resident. In other words, there could be a lack of ‘critical mass’ of senior staff on the part of some agencies at the country level to participate effectively in this regard.

150. In the agency headquarters survey, a number of responding agencies stated that there were concrete instances where greater authority to make decisions on programmatic or financial matters was delegated to the field, either as a general policy or in response to a specific request from a programme country. From the examples mentioned, it appears that the delegation of authority to field representatives is highly agency-specific and depends greatly on the seniority of individual agency representatives, confirming the resident coordinators comments. While individual agencies provided examples of a higher decentralization through increased authorities at the country level, there a harmonized approach needs to be implemented to enable country teams to act on the basis of an equal level of delegated authority to the field representatives.

151. In this regard, the agency headquarters survey asked specific questions related to the authority delegated to field representatives. According to the survey results, agencies still widely differ in the delegation of authority to field representatives. This includes the authority to substitute a multi-entity programme or project work plan, budget or results report for the respective organization's programme or project work plan, budget or results report.

152. Since it is obviously not feasible for every agency to have a critical mass of senior staff in every country, the General Assembly has repeatedly urged the United Nations system to facilitate arrangements whereby a resident agency hosts a non-resident one. Resident coordinators were asked in the 2013 survey whether any such arrangements had been made in the last year in their respective country. Only 15 per cent of resident coordinators answered 'Yes'. Among those who did, most arrangements involved either UNDP (mentioned 15 times) or the resident coordinator office as the host. Single instances of WHO and UNICEF hosting UNAIDS, FAO hosting IFAD, and UNESCO hosting OHCHR were also mentioned. Not all these arrangements had been concluded in the last year, however. Overall, there is room for the UN system to do considerably more in this area.

(c) "Delivering-as-one"

153. As reported by in the Secretary-General's report on the QCPR in 2012, the delivering-as-one approach was subject to an independent evaluation which found that the voluntary adoption of the DaO approach had brought a number of benefits, including enhanced ownership by governments of programme countries, and greater responsiveness of the United Nations system to the specific needs and priorities of the pilot DaO countries, including least developed and middle-income countries.

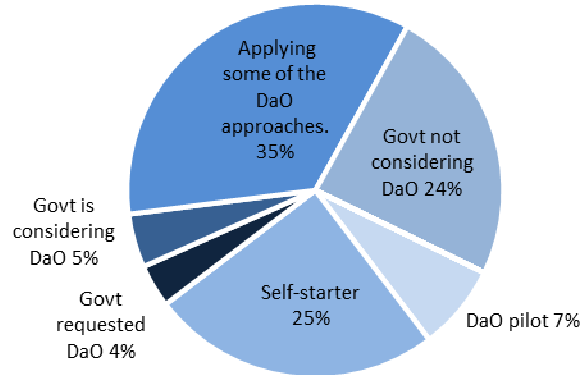

154. It was also reported that while other United Nations reform initiatives have focused on specific aspects of programming, funding, management and accountability, the DaO was unique in that it considered all these aspects in an interlinked package. The package also comprised a variety of other innovations that were potentially useful for the United Nations development system as a whole, for example, new ways of dealing with joint programmes and joint programming, shared monitoring systems, local joint procurement, common communication strategies and UNCT codes of conduct.

155. At the same time, it was noted that the One Programme, One Leader and One Voice approaches have not led to one line of accountability, which had implications for the measurement of performance. Given the fact that each United Nations organization has its own governance structure, mandate and

culture, individual agencies remained the primary unit of account for performance and management. Vertical accountability was seen to prevail over horizontal accountability.

156. In view of the promising aspects of delivering-as-one, many programme countries besides the original eight pilot countries have begun applying some of the good practices inherent in delivering-as-one (see Figure 6). The 2013 resident coordinator survey has revealed that, besides the original 8 DaO countries, 76 other countries are applying this approach to some extent or are considering it. In only 27 countries, or 25 per cent of all United Nations programme countries, was the Government reported not to be considering the DaO approach. The resident coordinators who mentioned that their countries are applying some of the DaO approaches were also asked to identify which aspects. Their responses are shown in Figure 7.

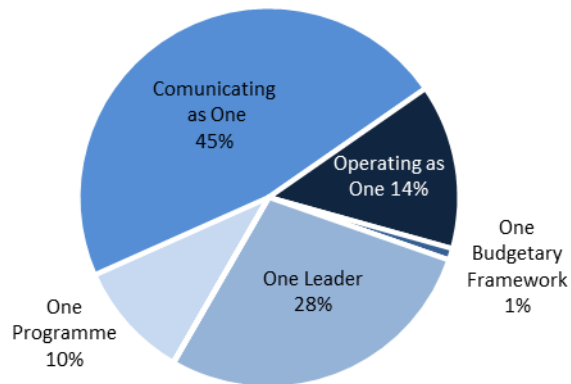

Figure 6: Please indicate the status of the country in regard to Delivering as One (DaO)

157. The standard operating procedures (SOPs) for countries wishing to adopt the DaO approach were approved by UNDG in March 2013 and detailed guidance will be available to entities in the fourth quarter of 2013. The detailed guidance will provide relevant details on the One Programme, Common Budgetary Framework and One Fund; One Leader; Operating as One; and Communicating as One.

158. As part of the detailed guidance, common monitoring, evaluation and reporting mechanisms will also be provided. The guidance will be developed with a view to addressing the bottlenecks and challenges that have been identified in DaO implementation including in the independent DaO evaluation.

Figure 7: DaO approaches being used in countries not fully adopting DaO (38 RCs reporting)

159. The SOPs are intended to ensure a focus on results, strengthened accountability and improved outcomes. Through the SOPs, the UNDG will have a flexible set of guidelines which can be applied in a range of different country situations.

160. The implementation of the SOPs will result in three significant advances: (a) shift the emphasis from the United Nations system planning together to delivering results together, with emphasis on simplification and streamlining of processes and instruments; (b) focus on accelerating business practice reform in support of driving an effective results agenda; and (c) prioritize critical actions, which must be implemented at the level of headquarters across the UN system.

161. A key element in the SOPs is the priority of linking multi-year strategic business plans to support programme delivery. As UNCTs are preparing new UNDAFs, they also develop integrated business strategies to ensure that programmes are delivered in the most effective and efficient manner.

162. In parallel to rolling-out the next generation of DaO at the country level, the SOPs focus on what has to change at the headquarters of United Nations entities in order to achieve the desired results. The three pillars of the CEB have developed a Plan of Action for Headquarters to ensure the SOPs have their intended impact on coherence, joint delivery of results, and simplification at the country level.

163. The agency headquarters survey revealed that the strong emphasis on the recently endorsed SOPs requires efficient and effective follow up at the agency level to review and adapt existing agency-specific policies. For instance, UNDP is ready to revise its country programme procedures and UNFPA confirmed its plan to update its policies and procedures to reflect the SOPs described. This includes a recent revision of UNFPA's evaluation policy.

164. It also emerged from the resident coordinator survey that in 25 countries the UNDAF was prepared in the first half of the final year of the previous UNDAF, as provided for in the DaO SOPs, and this was before the procedures had even come into effect. The increase in the number of such cases may indicate progress towards greater United Nations coherence at country level.

165. Significantly, DaO would not appear to be an all-or-nothing proposition. The SOPs for DaO enshrine in effect what is already 'good practice' in a number of countries. The common country programme document may be an example, and the Common Budgetary Framework (CBF) another. A further example is the concept and practice of results groups being led by a full member of the UNCT. This practice is already widespread: the 2013 resident coordinator survey indicated that while the most common number of results groups is 5 or 6, some 3 are generally headed by a UNCT member.

166. The development and use of joint resource mobilization strategies, as complementary to agency-specific efforts in this area, has also been included as a mandatory element in the SOPs. UNDG is currently initiating the collection of lessons learnt, experiences and relevant documentation on joint resource mobilization at the country level. Following this study, UNDG guidance will be developed, highlighting the key elements and good practices in terms of joint resource mobilization.

(d) Regional dimensions

167. The QCPR resolution in paragraphs 148 and 150 calls on the regional commissions and the UN development system at the regional level to intensify their cooperation and to adopt more collaborative approaches to support country-level development initiatives, at the request of recipient countries, in alignment with the United Nations Development Assistance Framework. It urges the Regional Commissions and their sub-regional offices to prioritize sustainable development initiatives at the country level through, among others, development and implementation of regional agreements and arrangements addressing the regional and sub-regional dimensions of national development goals. It further encourages resident coordinators and United Nations country teams to draw more upon the normative support work and policy expertise that exists within the regional commissions.

168. For the present report, the regional commissions informed that they continue to work closely with UN partners, including United Nations Development Group Regional Teams. This includes the work of Regional Coordination Mechanisms (RCM) in developing, for example, joint strategic policy frameworks and collaborative analytical products to increase the effectiveness of the support provided to UN country teams as well as enhance the linkages between regional and country level work. The Economic Commission for Africa (ECA), for example, is working with partners on establishing sub-regional RCMs in all the five sub-regions in Africa by the end of 2013 in an effort to increase its effectiveness and efficiency in providing support to country initiatives.

169. The survey of programme country governments in 2012 and the surveys of UN country teams and resident coordinators in 2012 and 2013 survey tend to suggest that regional commission support at the country level has been moderately effective. For example, 36 per cent of countries indicated in 2012 that the regional commission had made a ‘very significant’ contribution to the country’s development. As such, they were ranked similarly to ILO and UN-Women. In 2013, the resident coordinators were asked about both recent performance and how they perceived the potential of the regional commissions in relation to the needs of their country or country team. The first question asked how effective was the support received by the UNCT from the regional commissions over the last two years. The results are shown in Table 21.

Table 21 – Support from regional commissions to United Nations country teams (% of responses)

Answer Options	Region					Response Count
	Asia and Pacific	ECIS	LAC	Africa	Arab States	
Very effective	1	1	2	2	0	6
Somewhat effective	1	6	3	10	0	22
Slightly effective	6	2	5	10	5	29
Not effective at all	4	5	6	7	2	26
Don't know or insufficient information available	6	3	6	6	4	26

170. To the extent that regional commissions have, as one of their objectives, to make a substantive contribution to United Nations country level operations, the data in the above table indicates that there is space for improvement. In two regions, namely Africa and the ECIS out of five, a majority of the resident coordinators rate the regional commissions as at least ‘slightly effective’. It may be equally significant that 24 per cent of resident coordinators felt that they did not know enough about the regional commissions to comment on this question.

171. The follow up question, however, yielded a different picture. The question was: “Based on your experience, how much potential does the regional commission have to make a larger contribution to the work of the UNCT?” The results are presented in Table 22.

Table 22 – Potential of regional commissions to contribute to the work of UNCTs (% of responses)

Answer Options	Region					Response Count
	Asia and Pacific	ECIS	LAC	Africa	Arab States	
Great potential	1	6	11	19	2	42
Moderate potential	9	5	7	8	5	37
Small potential	7	6	1	6	4	26
No potential	0	0	1	2	0	3

172. The reasons for the disparity between the reported performance and the potential of the regional commissions as seen by the resident coordinators may merit more in-depth study. For the next report, the regional commissions will also be invited to respond to the surveys.

173. The resident coordinators were also asked about the support that the UNCTs received from the UNDG regional team in the last year. The results were presented earlier in this section along with the assessments of the resident coordinators of the support received from headquarters.

174. In the survey for agency headquarters, entities were requested to mention what new measures were taken in the last year to adopt more collaborative approaches between regional or sub-regional entities to support country-level development initiatives. Most of the answers revealed that there is no overall strategic approach existing at this time between United Nations agencies and regional or sub-regional entities. However, some agencies highlighted with specific examples a considerable degree of collaboration with the regional commissions including through the Regional Coordination Mechanisms (mentioned above) and the regional UNDG. In particular, UNDP has engaged in a close dialogue and cooperation with the regional commissions including at the global level where these organizations are working closely on a number of activities such as regional reporting on the MDGs.

175. Paragraph 147 of the General Assembly resolution 67/226, highlights the importance of aligning regional technical support structures and the regional bureaux to provide support to the United Nations country teams and suggests co-location, where appropriate and consistent with the needs of the programme countries of the regions concerned. The responses to the agency headquarters survey show that none of the agencies have currently a strategy in place to align regional technical support structures and the regional bureaux through co-location. Also, none of the agencies indicated that they had specific plans in place to strengthen collaboration with the regional commission. This supports the above findings that there is much room for improving the effectiveness and organizational efficiency of regional support mechanisms.

(e) Simplification and harmonization of business practices

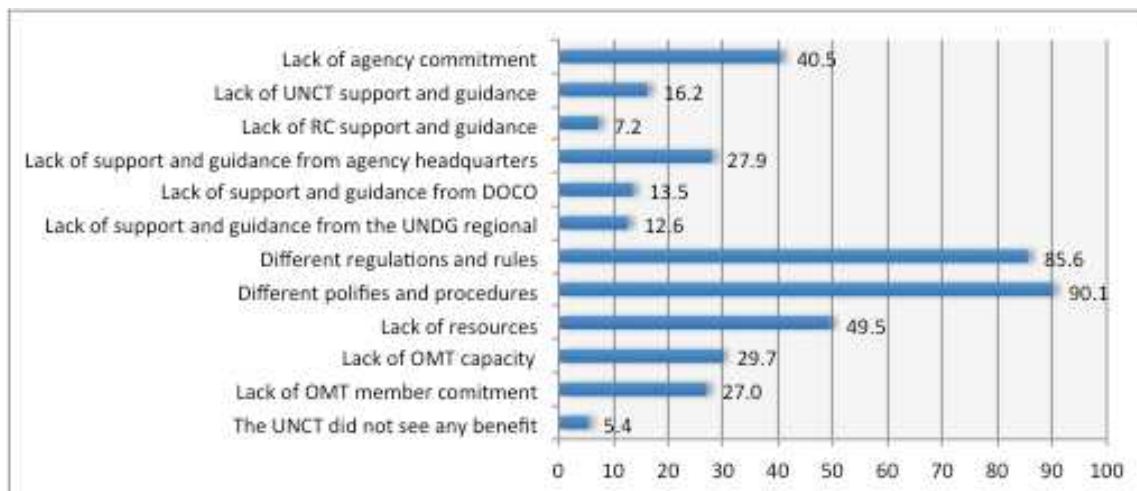

176. In recent years, the United Nations system has worked with considerable success on a number of system-wide initiatives to simplify and harmonize business practices at headquarters and country levels. In particular through the United Nations Development Group (UNDG) and the High-Level Committee on Management (HLCM) working mechanisms, a wide range of reform measures have been introduced that have presented ways to increase system-wide efficiency and effectiveness through the harmonization of business practices. Through several joint initiatives, such as the 2010 joint UNDG-HLCM mission to identify bottlenecks in implementing delivering-as-one, the two bodies have increased their cooperation, ensuring closer coordination and a clearer distribution of work.

Progress has been made, but more needs to be done

177. Progress has been made in the development of business solutions that support system-wide coherence and that lead to higher effectiveness and efficiency in the area of business operations. However, the experience of the delivering-as-one and other selected programme countries have shown the substantial limitations of simplifying and harmonizing business practices at the country level, without effectively addressing the agency-specific differences. In each of the functional areas of business operations, funds and programmes and specialized agencies apply business practices that are based on different policies and procedures and regulations and rules. Accompanied by the significant investment in the development and maintenance of agency-specific enterprise resource planning (ERP) systems, end-to-end business processes are mostly computerized and managed at the corporate level and not compatible with each other.

178. According to the 2013 survey of operations management teams, more than 90 per cent of all country teams stated that different policies and procedures and more than 85 per cent stated that different regulations and rules have impeded the UNCT in their country from further harmonizing business practices. A number of comments from the country teams suggest that the reasons for limited success in harmonizing business practices are interrelated. For instance, the lack of progress also stems from the perception that many reform initiatives at the country level might interfere with agency-specific policies and procedures and that changes towards greater inter-agency harmonization at the country level would not be feasible for individual agencies.

Figure 8 -- Challenges to harmonizing business practices at the country level

The establishment of common services at the country level remains challenging.....

179. Despite the constraints on inter-agency harmonization at the country level, a number of programme countries have shown some success in establishing common services that do not require unified business processes. According to the survey of operations management teams, 85 per cent of all country teams have established the provision of security services as a common service. This is followed by travel services with about 69 per cent, medical services with 61 per cent and cleaning services with 60 per cent.

180. However, the survey also revealed that country teams still do not coordinate the provision of most of the basic support services. The establishment of a common service typically requires a number of steps, including conducting a cost-benefit analysis, ratifying an inter-agency memorandum of understanding and establishing a common long-term agreement with the service provider. These requirements are supported and highlighted by the UNDG standard operating procedures for the countries wishing to adopt delivering-as-one.

181. As shown in the figure below, a significant number of country teams have not based the implementation of common services on the necessary preparatory steps. From a list of 35 potential common services that require the procurement of services, the figure illustrates the number of common services that have been established by country teams, based on the above mentioned steps. The data shows that about 27 per cent of all countries established five or more long-term agreements with external service providers, however only three out of 111 country teams established three or more common services in line with all minimum requirements, none of which was a delivering-as-one pilot country. Only two country teams have systematically followed the recommended approach and established a considerable number of seven or more common services in line with the minimum requirements⁷.

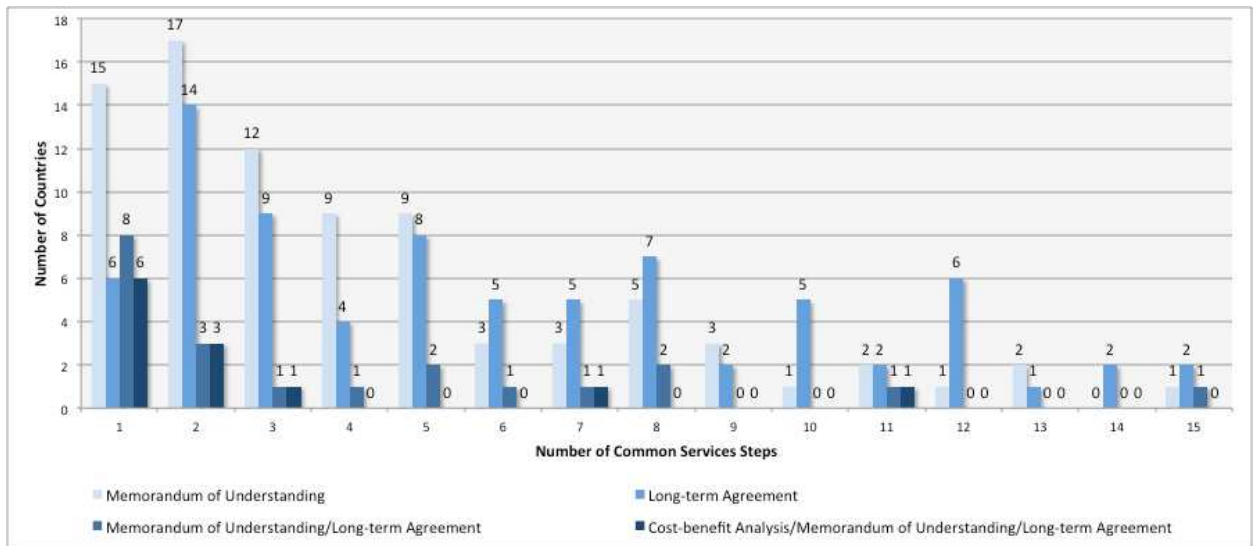

⁷ Please note that the establishment of long-term agreements with service providers is also dependent on a number of external factors, such as the existence of a competitive market environment and service providers that fulfill minimum quality standards. Therefore, the data shown in figure 11 does not indicate that all country teams

..... much stronger guidance from inter-agency bodies at central level needed

182. Overall, it appears that most country teams have established common services only very selectively and, thus, not followed a strategic approach to effectively coordinate business operations at the country level. In addition, the analysis of the data as provided by the operations management teams has shown that in many cases, the separate service provision by the same company to individual agencies has been labeled as a common service. Due to existing monopolies or less developed markets in many programme countries, the majority of United Nations entities may receive specific services from the same company. The low number of inter-agency memoranda of understanding and common long-term agreements shows that country teams have not taken the opportunity to utilize their considerable common negotiating power to reduce costs and achieve higher quality standards.

183. The results of the survey of operations management teams have shown that a systematic approach to the establishment of common services remains an exception. Only a small number of country teams followed a strategic approach to outsource and jointly manage support services and their exercise merits further study.

Figure 9 -- Established common services steps per country team

The consolidation of support services requires a business operations strategy at the country level.....

184. The implementation of the 'One Office' concept has resulted in noteworthy progress in identifying inefficiencies the provision of support services at the country level and finding solutions through the design of a harmonized approach. A number of the 'delivering-as-one' countries have invested considerably in the analysis of business practices in all functional areas of business operations. While some of the initiatives have been recognized as best practices for replication in other countries, there is not yet enough evidence that the planning and design of those business solutions have led to an

would be in the position to establish all 35 common services as listed in the survey. However, the data as reported by the operations management teams provides accurate information on the extremely small number of country teams that have applied a systematic approach to consolidate support services.

actual implementation and sustainable management of harmonized business practices. The investment in additional resources and country-level coordination has not yet been met by any quantifiable cost reductions in the delivery of business operations functions.

185. While a few common services are managed through selected lead agencies, the implementation of service centres to consolidate support services at the country level remains the exception. According to the operations management team survey, one out of 111 country teams reported that they provide support services in more than one functional area through a common United Nations service centre. A number of countries commented that the establishment of common United Nations service centres is closely linked to the implementation of common premises and that the consolidation of support services would require stronger headquarters support.

.....as well as the genuine commitment at agency headquarters level

186. The experience from the delivering-as-one approach has shown that the harmonization of business practices at the country level is limited without a more coherent regulatory framework and management systems compatibility. With the adoption of resolution 67/226 on the QCPR, the General Assembly has recognized the significant challenges to the simplification and harmonization of business operations at the headquarters and country level. By requesting concrete actions and establishing firm timelines, the General Assembly has turned its focus on introducing the critical organizational changes necessary to effectively support system-wide coherence and providing the basis for the consolidation of support services at the country level. The QCPR resolution introduces far-reaching reform measures that impact the organizational structure of the United Nations system.

187. At the core of the measures, the General Assembly, in paragraph 152, requests funds and programmes and encourages specialized agencies to consolidate support services at the country level either by delegating common functions to a lead agency, establishing a common United Nations service centre or, where feasible, outsourcing support services. In addition, the General Assembly, in paragraph 155, has requested the Secretary-General through the HLCM and UNDG to present plans for the establishment of common support services at the country, regional and headquarters levels, based on unified regulations and rules, policies and procedures in all functional areas of business operations with a view of implementation by 2016. With this provision, the General Assembly has made clear that the effective harmonization of business practices are to be based on a unified set of regulations and rules, policies and procedures.

188. Member States continue to place significant importance on the implementation of common premises as one of the main indicators for a coherent United Nations system at the country level and an important driver for the effective consolidation of support services. In paragraph 161 of the QCPR resolution, the General Assembly requests the United Nations development system to develop a strategy by the end of 2013 to support the establishment of common premises in programme countries, with due consideration of security issues and cost effectiveness. The development of this strategy is seen as an opportunity to effectively link the design of common premises with structural changes that are required to harmonize business practices at the country level. More than physical co-location, common premises allow for the consolidation of departments with similar functions, leading to high efficiency gains and cost saving potentials.

Inter-agency bodies have started a coordinated planning process.....

189. The HLCM and UNDG have started to follow up with the provisions of the QCPR resolution. Both inter-agency bodies entered a phase of consultations, aiming at developing strategies for the QCPR implementation and integrating the measures as introduced by the General Assembly into existing work plans. For instance, the Joint Funding and Business Operations Network (JFBON) of the UNDG has developed a two year work plan (2013-14), which has been widely synchronized with the HLCM 2013-16 plan.

190. In April 2013, the CEB endorsed the new HLCM Strategic Plan for 2013-16. Among its primary objectives, the Plan aims to contribute to the commitment of the Member States to enhance the relevance, coherence, effectiveness and efficiency of the United Nations system through the re-design and operationalization of administrative and management functions. The HLCM strategic plan moves from the call by General Assembly resolution 64/289 on System-wide coherence, to modernize procedures leading to significant cost savings and a reduction in the administrative and procedural burden on the organizations of the United Nations development system and national partners. The Strategic Plan sets the framework for a response at the system-wide level to the provisions of the QCPR resolution, such as the request, in paragraph 154, for the development and conclusion of inter-agency framework agreements with a focus on common long-term agreements with external service providers and greater procurement collaboration, in paragraph 156.

191. The QCPR resolution requests the Secretary-General to undertake a study to examine the feasibility of establishing interoperability among existing ERP systems of funds and programmes. With the full support of the Secretary-General, the CEB has endorsed the chair of the ICT network of HLCM, the Secretary-General of the International Telecommunication Union, to lead the study. At its April 2013 meeting, the ICT network agreed that the feasibility study should closely examine the business requirements that would lead to cost reductions at the country level, and the role that ERP systems play in this complex arrangement.

192. The results of the survey of agency headquarters has shown that agencies widely facilitate their commitment to the simplification and harmonization of business practices through their membership and staff time contributions to the work of the HLCM and the UNDG working mechanisms. The majority of agencies outlined their role in these inter-agency forums and referred to the implementation of the recently endorsed UNDG standard operating procedures. A number of agencies pointed out the recent development of the Business Operations Strategy, which includes the establishment of a joint operations centre in 2013 in Brazil.

.....but need to promote comprehensive and clear understanding of the requested actions

193. The follow-up through the United Nations Development Group and the High-level Committee on Management reveal that there is a commitment to answer the far-reaching reform measures as formulated in the QCPR resolution. While it is too early to determine the effectiveness of the UN entities and inter-agency bodies in following up on the related institutional changes, different interpretations of the requested actions might hinder the timely and system-wide implementation.

194. For instance, answering the provisions in paragraph 152 of the resolution, the JFBN work plan includes the establishment of one service centre pilot in a middle-income programme country. In the area of business operations, the provisions of the General Assembly in its resolution 67/226 request the implementation of respective actions system-wide and in all programme countries. The UNDG standard operating procedures, which apply to countries that voluntarily wish to adopt the delivering-as-one approach, show that the potential discrepancy between the interpretation of the United Nations entities and their inter-agency bodies and the requests of the General Assembly in this regard needs to be addressed.

(f) Results-based management

195. In its resolution 67/226, the General Assembly has highlighted the importance of results-based management (RBM) as a critical element of accountability contributing to improved development outcomes and the achievement of the MDGs. While the General Assembly stressed the need to identify, assess and mitigate risks and further improve planning, management and reporting, there has been a significant progress in improving a results culture within agencies since the 2007 triennial comprehensive policy review.

196. The UNDG adopted common principles and a standard format for UNDAF results reporting and implemented a common results-based methodology by mandating the use of the UNDG Results-Based Management Handbook for Country Programming. According to the UNDG 2013-2014 work plan, common results-based management and monitoring tools aiming to strengthen the focus on results will be further developed and implemented. The inter-agency work-plan also calls for UNDG members to invest in developing capacities and competencies for results-based management. The Secretary-General will provide further details on progress in this regard in next year's report on the QCPR.

Implementing a results-based culture across all mandates remains challenging

197. Despite the successful work in adopting common management tools through the UNDG, the implementation of a results-based culture within funds and programmes and specialized agencies remains challenging. While much progress has been made in improving management tools for monitoring and measuring results across the United Nations development system, agencies continue to experience difficulties in establishing systems that define results and measure progress across all mandates. Also, while progress has been made in defining and measuring project-based outputs, it remains challenging to connect the broader and more complex work in advocacy, capacity development and policy advisory services to measurable results. A direct cause-and-effect relationship can often not be established due to the many external factors that influence the impact of the work of the United Nations development system on peoples' lives in programme countries. This includes adapting results to changing country contexts and the heavy reliance on non-core funding, which makes medium- and long-term planning for achieving development results, difficult.

198. Therefore, it is essential for a coherent United Nations development system that joint reporting is based on the implementation of harmonized and effective results-based management systems. This has been confirmed by the results of the resident coordinator survey, where over 88 per cent of respondents answered that, considering the demands of joint reporting, it would be 'very important' for

United Nations agencies to harmonize their results-based management systems. About ten percent of the respondents answered that it would be ‘somewhat important’ and less than two per cent stated that it would be ‘slightly important.’ An agency headquarters added that there is a need to harmonize the levels of results used by different UN organizations, due to the differences in the definitions and practical use, despite having the same names.

199. According to the results of the resident coordinator survey, 80 per cent of all country teams prepared an annual United Nations system results report in 2012. However, there are indications that, in many cases, the quality of the reports and their usefulness to the host government needs to be improved. In the 2012 survey of programme countries, only 17 per cent ‘strongly agreed’ that ‘the United Nations, through current review processes and reports, provides sufficient information for the government to assess the performance of the organization’. The results of the 2013 resident coordinator survey confirm this government perception as only 52 per cent of all respondents confirmed that the United Nations system results report in their programme country was fully linked to national development results (see Figure 10).

Figure 10 -- Implementation of basic criteria of UN system results reports (% of responses)

200. As indicated in the above figure, almost half of all resident coordinators stated that the annual United Nations system results report was ‘not at all’ or only ‘partially’ structured around the UNDAF or linked to national development results. The results of the survey also revealed that a larger portion of programme countries that apply or consider the implementation of delivering-as-one have linked the United Nations system result report to national development results. For instance, 60 per cent of the group of delivering-as-one countries has fully linked their reporting to national development results.

201. With the recently adopted standard operating procedures for delivering-as-one, the UNDG supports a focus on strengthening results-based management through a flexible set of guidelines which can be applied in varying country contexts. According to the UNDG, the standard operating procedures for DaO countries prioritize the linkage of multi-year strategic business plans to support programme delivery with a strong emphasis on joint delivery of results and results reporting.

202. The results of the agency headquarters survey reveals that entities generally support the guidance as presented through the UNDG standard operating procedures. While only one agency reported to have conducted an evaluation or review of its results-based management systems in the last

two years, a number of agencies reported to have considerably invested in their own results-based management systems. This included selected examples for plans to increase investments in capacities for results-based management and a commitment to simplify, streamline and harmonize results-based management systems as requested in paragraph 168 of the General Assembly resolution 67/226. For instance, UNDP pointed out that it is currently advocating for a substantial lightening of requirements for the development of a country-level strategy (UNDAF) and coherence in programming (the One Programme). UNFPA highlighted that it intends to develop guidance on consolidated financing for CPDs for unified budgeting in 2013.

203. The majority of agencies confirmed the application of clear and robust results frameworks to establish expected results at the output, outcome and impact levels and include measurable indicators with baselines, milestones and targets for monitoring as requested by paragraph 170 of the General Assembly resolution 67/226. Most of the agencies also confirmed that their current systems for reporting on country-level results are fully linked to national development results. As shown in Figure 7 above, it seems that this was not successfully translated into the majority of the United Nations system results reports at the country level.

System-wide results reporting needs to be strengthened

204. General Assembly resolution 67/226 requested the United Nations development system to accelerate the work to develop and sustain a results culture at all levels, including establishing incentives for results-based management and periodically reviewing results management systems. This includes the further development of capacities and competencies for results-based management (paragraph 166).

205. On this basis, the General Assembly has mandated the Secretary-General to intensify efforts to strengthen and institutionalize results-based management in the United Nations development system, with the overall aim to improve development results through organizational effectiveness, including simplifying, streamlining and harmonizing results-based management systems (paragraph 168).

206. In this regard, the General Assembly has established ambitious timelines and has requested the Secretary-General to articulate and report to the Economic and Social Council at the operational activities segment of its substantive session of 2013 on a more robust, coherent and harmonized approach to operational activities for development. With a strong focus on results, the approach should improve the planning, monitoring, measurement and reporting on system-wide results. Inviting the Executive Boards of the funds and programmes and the governing bodies of the specialized agencies to have a focused dialogue on how to balance most effectively the requirement for system-wide results reporting with agency-specific reporting requirements, the General Assembly has requested the implementation of a more coherent and harmonized mechanism by 2014 (paragraph 169).

(g) Evaluation of operational activities for development

207. With the development and implementation of more coherent and system-wide results-based management systems, effective monitoring and evaluation as an inherent part of programme delivery is gaining increasing relevance. Evaluation within the United Nations development system is informed by the work of the United Nations Evaluation Group (UNEG), a professional network of experts that brings

together the units responsible for evaluation in the United Nations system. With its current 43 members and three observers, UNEG aims to strengthen the objectivity, effectiveness and visibility of the evaluation function across the United Nations system.

208. The group provides a forum for its members to establish common norms and standards for evaluation, support the evaluation functions through peer review and information exchange and establish partnerships with the wider evaluation community. The UNDG is currently collaborating with UNEG in the development of a strategy for increasing assistance to programme countries for strengthening national evaluation capacity for monitoring and evaluation of UN operational activities for development. The new strategy is expected to be completed and adopted by UNDG and UNEG by end of 2013.

National ownership of evaluations

209. An important function of the evaluation role of the United Nations development system lies in the strengthening of national ownership and leadership in evaluating the assistance provided by the United Nations system. This requires a considerable effort to assist programme countries in strengthening national evaluation capacity to effectively monitor and evaluate the operational activities for development. With the increasing relevance of the UNDAF as a strategic and comprehensive document that integrates most of the activities of the United Nations system at the country level into one coherent framework, strong national ownership for its effective monitoring and evaluation becomes critical. Programme country governments should be in the position to effectively evaluate the alignment of UNDAFs with national development plans and measure their contribution to national development results. In this regard, the General Assembly has requested the United Nations development system to develop and implement guidelines for further strengthening of national evaluation capacities for operational activities for development (paragraph 175).

210. The results of the agency headquarters survey reveal that entities do not have established specific policies on enhancing national evaluation capacities. However, a number of agencies described their efforts in national capacity development and how they would integrate capacity-building measures in results-based management and other areas, which touch on strengthening national systems for analysis, strategy, planning, implementation, monitoring and evaluation. Thus, the development of guidelines as requested by paragraph 175 of resolution 67/226 provides an opportunity for agencies to link their contributions as members of UNEG to strengthening their current efforts in national capacity development.

UNDAF evaluation

211. The need for more consistent evaluation has been reflected in the results of the 2013 resident coordinator survey. According to the survey, only about 52 per cent of all UNDAFs have been evaluated of which less than half (44 per cent) had a management response prepared. This translates to 28 per cent or 31 of 108 countries, where full compliance with these dimensions of sound evaluation were reported. Considering that UNDAF evaluations are now mandatory, it is expected that the number of both evaluations and management responses will considerably increase in the next few years.

Evaluation capacity in United Nations entities

212. The General Assembly resolution 67/226 highlights the importance for the United Nations development system for having independent, credible and useful evaluation functions that are furnished with sufficient resources. The resolution emphasizes the need to promote an evaluation culture within the United Nations organizations that ensures the active use of evaluation findings in recommendations and policy development and improving the functioning of the organizations. Therefore, the Assembly reiterated the need for the members of the United Nations development system to increase their institutional and organizational capacity for the evaluation of operational activities for development, including in training and skills-upgrading in results-based management and monitoring and evaluation.

Independent system-wide evaluation

213. The General Assembly in resolution 67/226 requested the Secretary-General to establish an interim coordination mechanism (ICM) for independent system-wide evaluation of UN-OAD.

214. Composed of the Joint Inspection Unit (JIU), UNEG, the Department of Economic and Social Affairs (DESA), the Office for the Coordination of Humanitarian Assistance (OCHA) and the Office of Internal Oversight Services (OIOS), the ICM was also requested in resolution 67/226 to develop a policy for the independent system-wide evaluation of UN-OAD, including a proposal for pilot system-wide evaluations for consideration of the Economic and Social Council at the operational activities segment of its 2013 substantive session (paragraph 181).

215. The ICM was established in February 2013 and has since consulted extensively with United Nations entities and Member States on a draft policy for independent system-wide evaluation of UN-OAD, which along with a proposal for pilot system-wide evaluations, will be submitted in a separate document for the consideration of the operational activities segment of Economic and Social Council at its 2013 substantive session.

5. Follow-up and monitoring

216. In paragraph 183 of its resolution 67/226, the General Assembly reaffirmed that the governing bodies of the funds, programmes and specialized agencies of the United Nations development system should take appropriate actions for the full implementation of the QCPR legislation. The Assembly also recognized in paragraph 185 the major role that the Economic and Social Council, within its Charter mandate, plays in the overall coordination of the funds, programmes and specialized agencies. In paragraph 121, the Assembly also called upon the funds and programmes, and encouraged the specialized agencies, to carry out any changes required to align their planning and budgeting cycles with the QCPR. The General Assembly, in paragraph 122, also reaffirmed the importance of the implementation of previous resolutions of the Assembly regarding the United Nations presence at the country level.

217. This section examines the current state of alignment of strategic plans of nineteen funds, programmes and specialized agencies with the QCPR cycle (see Table 24). These entities accounted for some 96 per cent of total and development-related contributions to the United Nations development system in 2011.

218. This section also reviews selected lessons from the implementation of previous TCPR resolutions of the General Assembly, an issue that was on the agenda of the May 2013 annual information coordination meeting of the bureaux of ECOSOC and the Executive Boards of the funds and programmes.

(a) [Alignment of strategic planning cycles of key funds, programmes, specialized agencies and other entities with the QCPR cycle](#)

219. General Assembly resolution 63/232 urged United Nations entities to align their planning cycles with the QCPR. The United Nations development system is still striving to fully comply with this mandate almost five years after the adoption of this resolution. Among the 19 entities that accounted for some 96 per cent of UN-OAD in 2011, 7 entities have not been able to align their planning cycles with the QCPR, including 3 entities for which the QCPR is binding⁸ and 4 specialized agencies⁹. Two entities, namely, UNAIDS and UNIDO plan to consider alignment with the QCPR in the upcoming meetings of their respective governing bodies. Furthermore, 7 out of the 19 entities formally report to their governing bodies on QCPR implementation. The FAO Conference and the UNIDO General Conference are the only governing bodies of the specialized agencies that formally requested regular reporting on the implementation of the QCPR.

⁸ UN-Habitat, UNRWA, UNAIDS.

⁹ ILO, IFAD, WHO and UNIDO.

Table 23 - Alignment of strategic planning cycles of key funds, programmes, specialized agencies and other entities with the QCPR cycle

Alignment of strategic planning cycles of key funds, programmes, specialized agencies and other entities with the QCPR cycle ¹⁰						
Entity	Strategic planning document	#Years ¹¹	Planning cycle			Annual QCPR reporting to governing body
			Present	Next	QCPR alignment	
Funds and programmes						
UNDP ¹² (included UNV and UNCDF)	Strategic Plan	4	2008-2013	2014-2017	Yes	Yes
UNFPA	Strategic Plan	4	2008-2013	2014-2017	Yes	Yes
UNICEF ¹³	Medium-Term Strategic Plan	4	2006-2013	2014-2017	Yes	Yes
WFP ¹⁴	Strategic Plan	4	2008-2013	2014-2017	Yes	Yes
UN-Habitat	Medium-Terms Strategic Plan	6	2008-2013	2014-2019	No	No
UNHCR	Biennial Programme ¹⁵	2	2012-2013	2014-2015	Yes	No

¹⁰ These 19 funds, programmes, specialized agencies and other entities accounted for 96 per cent of both total and development-related operational activities for development of the United Nations system in 2011.

¹¹ Years reflected are those of the current programming cycle or those stipulated by the most current decisions of governing bodies and which will be reflected in the next programming cycle.

¹² UNDP Executive Board decision 2009/9 extended the 2008-2011 strategic plan to 2013 in response to GA resolution 63/232 calling for alignment with QCPR cycle.

¹³ UNICEF Executive Board decision 2009/5 extended the 2006-2011 MTSP to 2013 in response to GA resolution 63/232 calling for alignment with QCPR cycle.

¹⁴ WFP Executive Board decision 2009/EB.A/3 extended the 2008-2011 strategic plan to 2013 in response to GA resolution 63/232 calling for alignment with QCPR cycle.

Alignment of strategic planning cycles of key funds, programmes, specialized agencies and other entities with the QCPR cycle ¹⁰						
Entity	Strategic planning document	#Years ¹¹	Planning cycle			Annual QCPR reporting to governing body
			Present	Next	QCPR alignment	
UNRWA	Medium-Term Plan	6	2010-2015	2016-2021	No	No
Specialized Agencies						
ILO ¹⁶	Strategic Policy Framework	6	2010-2015	To be decided	No	No
FAO	Medium-Term Plan	6	2010-2013	2014-2017	Yes	Yes
UNESCO ¹⁷	Medium-Term Strategy	6	2008-2013	2014-2017	Yes	No
WHO	Global Programme of Work	6	2008-2013	2014-2019	No	No
IFAD	Strategic Framework	5	2011-2015	2016-2020	No	No
UNIDO	Medium-Term Programme Framework	4	2010-2013	To be decided ¹⁸	No	Yes

¹⁵ The organs of the United Nations Secretariat operate on biennial programme plans and the vision of their activities is set out in a Strategic Framework, a key policy document that is approved by the UN General Assembly.

¹⁶ The ILO Governing Body will, at its 318th Session (October 2013), begin discussions on the arrangements to be put in place as a follow-up to the current Strategic Policy Framework (2010-2015).

¹⁷ In 36 C/Resolution 105, the General Conference of UNESCO decided to extend the programming cycle of the Medium-Term Strategy from six to eight years, with a four-year programme and budget framework as a mechanism to adjust with the QCPR cycle.

¹⁸ UNIDO General Conference has decided that UNIDO medium-term programme framework (MTPF) should be aligned with the QCPR. It was also decided that the introduction of a new MTPF will be postponed pending the election of the next Director General of UNIDO.

Alignment of strategic planning cycles of key funds, programmes, specialized agencies and other entities with the QCPR cycle¹⁰

Entity	Strategic planning document	#Years ¹¹	Planning cycle			Annual QCPR reporting to governing body
			Present	Next	QCPR alignment

OHCHR	Biennial Programme	2	2012-2013	2014-2015	Yes	No

¹⁹ UN-Women was established by GA resolution 64/289 on 2 July 2010 and its first strategic plan covers the 2011-2013 period in order to align with planning cycles of UN development system

²⁰ UNODC adopts a strategy every four years which guides the development of the biennial strategic framework.

(b) Lessons learned from the implementation of earlier TCPR resolutions

220. In paragraph 183 of its resolution 67/226, the General Assembly reaffirmed that the governing boards of all agencies should take appropriate action for the full implementation of the present resolution in line with paragraphs 91 and 92 of Assembly resolution 56/201, which called for yearly progress reports on the implementation of TCPR decisions as well as a thorough analysis of the problems encountered, including lessons learned, in their implementation.

221. A general catalogue of the requests of the General Assembly in all TCPR, and now QCPR, resolutions back to the first one in 1981 (GA 35/81) shows that the comprehensive policy review legislations have grown significantly in complexity over the years, with a fundamental shift towards system-wide issues. For example, General Assembly resolutions 35/81 (1981) and 67/226 (2012) contained 34 and 189 operative paragraphs respectively. The technical complexity of the comprehensive policy review legislations has also grown significantly during this period.

222. In terms of specific requests for action by Member States and the agencies in previous TCPR resolutions, six major themes dominate, although one or two of them have emerged only more recently. These themes are: (a) the quantity and quality of funding; (b) the importance of full cost recovery of management and programmes support costs of non-core funding flows; (c) measures to improve the efficiency of operations of the United Nations development system; (d) decisions to promote greater system-wide coherence; (e) actions related to the functioning of the resident coordinator system (RCS); and (f) monitoring of the implementation of TCPR decisions with a particular emphasis on the role of the Economic and Social Council.

Achieving system-wide coherence remains a major challenge

223. From the issue of coherence (and its many sub-issues) the most obvious challenges of the United Nations system arise. These issues require extensive inter-agency cooperation to adopt new approaches. Within the broad subject area of coherence, it is noteworthy that requests related to the harmonization of rules and regulations, the simplification of processes and procedures and the much greater use of common services have been present in every TCPR resolution since the first one in 1981. These three requests thus provide a sample for assessing performance on TCPR implementation.

More useful reporting for governance purposes is required

224. The reporting process of TCPR, and now the QCPR, implementation is complex. Three main report sources need to be considered: (1) the reporting done by the Heads of the funds and programmes to their Executive Boards; (2) the roll-up reporting provided by the Secretary-General to ECOSOC; and (3) a variety of other miscellaneous reports that flag issues related to the implementation of various TCPR provisions (such as background reports prepared for the 2012 QCPR).

225. At the risk of over-simplification, one general impression is that reporting tends to be too focused on the activities undertaken for selected components of relevant TCPR provisions by the Heads of the funds and programmes. Long lists of actions taken are not accompanied by sufficient analysis of what the actions represent in terms of meeting the desired objectives and, if progress is deemed

challenging or inadequate, the obstacles that must be overcome. In essence, many of these reports read more as activity score-cards rather than as analysis to aid both governance and management.

226. More useful analysis of the real impact of the results achieved is often found in reports that were not specifically oriented to assessing TCPR implementation. As examples with special relevance to simplification, harmonization and common services, the background documents prepared for the 2012 QCPR in the areas of the functioning of the resident coordinator system, the role of the United Nations in transition countries, the review of system-wide business practices, as well as the delivering-as-one pilot country evaluation, all had various comments on the difficulties being encountered and the implications of limited progress. A key lesson in reporting therefore is to strive for more analytical quality and perhaps less quantity.

227. Two possible measures to improve the analytical quality of QCPR reporting to governing bodies could be to mandate the evaluation units of the funds and programmes to report biennially on the progress achieved in QCPR implementation to the respective Executive Boards, for onward transmittal to ECOSOC, and for the Heads of the entities concerned to merge into a single report the annual reporting they provide to their Executive Boards on the implementation of their strategic plans and the implementation of the QCPR resolution.

Important objectives of TCPR resolutions remain far from completed

228. In the three areas discussed here, what can be said about success in implementing provisions of the earlier TCPR resolutions requiring extensive inter-agency cooperation? A first and obvious conclusion, since these requests have been repeated in every TCPR resolution spanning a period of 31 years, is that at best progress has been limited and slow. This is not to downgrade the many positive accomplishments (often entailing great effort) in a variety of areas, but by and large, progress has been incremental while the larger goals remain to be achieved.

229. In terms of simplification and harmonization, success has been achieved in a number of areas: (a) largely standardized formats for the presentation of Executive Board documents by the funds and programmes; (2) standardized cost recovery rates; (3) IPSAS implementation; (4) increasing use of the HACT; (5) progress on a central repository of information on operational activities of the United Nations; and (6) system-wide guidelines in areas such as procurement and information and communications technology (ICT), with some pilot implementation projects.

230. However, simplification and harmonization of the intellectual base of the system (see also section on harmonization of business practices in this report) – its rules, regulations and procedures – has remained an elusive goal. The primary obstacle to progress is identified as the differing mandates, business models and funding modalities of the various agencies. Little analysis has been provided on how these might be overcome. The lack of a standardized intellectual base for system operations means that in practical areas of potentially great cost savings, such as through a greatly expanded use of common services, progress has been limited, with the progress achieved being mainly at the field level.

231. The lack of implementation of a broad range of TCPR decisions with significant system-wide implications also poses questions about the efficacy of the present system of inter-agency coordination within the United Nations system. For example, how to strengthen the capacity of inter-agency bodies

for collective action in addressing system-wide mandates established by the General Assembly and ECOSOC through the QCPR process?

The shift to a system-wide focus has revealed gaps in the governance structure

232. The General Assembly reviews progress and sets policy directions only on a quadrennial basis. It has a limited capacity to deal with complex operational issues. The Economic and Social Council historically has also tended to leave operational considerations largely in the hands of the governing boards for funds, programmes and agencies. The structure of the United Nations development system does of course present certain inherent limitations. The specialized agencies are independent by statute and even amongst those organizations reporting directly to ECOSOC certain limitations are imposed by the practical implications of a voluntarily-funded system. While these limitations are real, they may not be insurmountable.

233. The review of the implementation of earlier TCPR decisions, particularly those requiring extensive inter-agency cooperation, suggest that governance gaps exist today in the area of system-wide issues. The objective of enhancing system-wide coherence relies heavily on a series of initiatives that generally fall outside of the existing governance structures: (a) the UNDAF process, (b) the resident coordinator system, (c) the delivering-as-one approach to country-level planning and operations and (d) systemic simplification issues including the harmonization of business practices.

234. The individual agency governing boards have a limited capacity to deal with such system-wide issues, except to the extent they impact on their own agency. The Joint Meeting of the Boards (JMBs) have proven useful on a number of issues, but participation and the subjects addressed are limited, while the positions taken reflect primarily the views of the participating agencies rather than the interests of the United Nations development system as a whole. The JMBs, however, if so authorized by the Economic and Social Council, could play an important role in coordinating the implementation of system-wide policies among the funds and programmes aimed at harmonizing business operations.

235. The Economic and Social Council can play an important role in strengthening oversight of the implementation of system-wide policies that go beyond the remit of individual governing bodies of the funds and programmes, by bringing to the totality of the overall governance structure the important element of a system-wide perspective. This raises the question whether it is sufficient for ECOOSOC to only review QCPR implementation once-a-year in the operational activities segment of its substantive session, or if a more hands-on approach is called for.

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
I. Introduction									
A. Relevance of the UN system [OP 4, 6, 9, 12, 20]									
I.A.1	Extent to which governments see impartiality as a UN characteristic that is relevant to their country (rating average)						3.4 out of 4 (2012)		Programme country survey
I.A.2	Extent to which CSOs see impartiality as a UN characteristic that is relevant to the country (rating average)						3.2 out of 4 (2012)		CSO survey
I.A.3	% of RCs who judge UN cooperation with the World Bank to be either 'somewhat' or 'very' effective						39.2 (2012)		RC survey
I.A.4	% of RCs who judge UN cooperation with the regional bank/s to be either 'somewhat' or 'very' effective						35.1 (2012)		RC survey
I.A.5	% of CSOs that 'strongly agree' that UN collaborates 'as much as possible' with civil society						44.1 (2012)		CSO survey
B. Alignment, flexibility and national ownership [OP 4, 5, 7, 12, 21]									
I.B.1	% of countries with a joint Government-UN Steering Committee						69.7 (2013)		RC survey or annual report
I.B.2	% of countries where a joint Steering Committee conducted annual review of UNDAF (or equivalent) in past 12 months						36.7 (2013)		RC survey or annual report
I.B.3	% of governments that see UN activities being 'very closely' aligned with national needs and priorities						22.5 (2012)		Programme country survey
I.B.4	% of governments that agree the UN responds 'very quickly' or 'somewhat quickly' to changes in country needs						65.2 (2012)		Programme country survey
C. Accountability to member states [OP 11]									
I.C.1	Extent to which governments are satisfied with UN reports on its activities (rating average)						2.8 out of 4 (2012)		Programme country survey
D. Mainstreaming of sustainable development [OP 14, 15]									
I.D.1	% of countries having a results group (theme group) on environment and sustainable development						76.3 (2013)		RC survey or annual report
I.D.2	% of governments selecting environment and sustainable development as a priority area for UN support						73.4 (2012)		Programme country survey
I.D.3	Sustainable development better articulated in UNDAF guidelines						No data yet		Agency survey, desk review

III. National Capacity Development and Development Effectiveness									
A. Capacity Building and Development [OP 57-68, 114]									
III.A.1	% of countries where the RC reports that UNCT has an actively monitored strategy for supporting national capacity development						50.6 (2013)		RC survey or annual report
III.A.2	% of UNDAFs that substantively address capacity development						Not yet available		Desk review
III.A.3	% of programme country Governments that 'strongly agree' that UN has 'contributed significantly' to its development						27.3 (2012)		Programme country survey
III.A.4	% of programme country Governments that 'strongly agree'						24.1 (2012)		Programme

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
	that UN has been effective in developing national capacities								country survey
III.A.5	% of programme country Governments that 'strongly' or 'somewhat' agree that UN uses national monitoring and reporting systems 'as much as possible'						52.8 (2012)		Programme country survey
III.A.6	% of countries where RCs estimate that 50% or less of UN programme funds are channeled through national institutions						62.4 (2013)		RC survey or annual report
III.A.7	% of countries that are fully HACT compliant								HACT Advisory Committee
III.A.8	% of RCs who 'strongly' or 'somewhat' agree that the UN system is using parallel implementation units (PIUs) more than necessary						27.6 (2013)		RC survey or annual report
B. Poverty Eradication [OP 69-73, 10, 19, 118]									
III.B.1	% of countries having a results group (theme group) on poverty reduction						61 (2013)		RC survey or annual report
III.B.2	% of governments selecting poverty reduction as a priority area for UN support in future						55 (2012)		Programme country survey
III.B.3	% of programme country Governments that 'strongly agree' that UN efforts are focused on assisting the country to achieve the MDGs						60 (2012)		Programme country survey
III.B.4	% of RCs who 'strongly agree' that the UNDAF 'sufficiently emphasizes' empowerment of the poor and people in vulnerable situations						65.7 (2013)		RC survey, desk review
III.B.5	Key findings from relevant thematic evaluations by UNDP and others						NA		Desk review
III.B.6	% of RCs who cite poverty reduction as an area of competition among UN agencies						32 (2012)		RC survey
C. South-south and triangular cooperation [OP 74-79]									
III.C.1	% of countries where the UNCT has a results group (theme group) that covers south-south cooperation						13.8 (2013)		Programme country survey
III.C.2	% of UNCTs that support the host country 'to a large extent' in providing south-south cooperation						24 (2013)		RC survey
III.C.3	% of UNDAFs that substantively address south-south and triangular cooperation						No data yet		Desk review

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
D. Gender equality and women's empowerment [OP 80-92, 118]									
III.D.1	% of countries having a results group (theme group) on gender						83.5 (2013)		RC survey or annual report
III.D.2	% of countries with one or more joint programmes on gender equality and women's empowerment						45.0 (2013)		RC survey or annual report
III.D.3	% of countries where 'very adequate' data disaggregated by gender was available at country analysis stage						23.9 (2013)		RC survey
III.D.4	% of programme country governments that judge the UN's contribution to gender equality to have been 'especially significant'						69.4 (2012)		Programme country survey
III.D.5	% of UNDAFs that substantively address gender equality and women's empowerment						No data yet		Desk review by UNDG TT
III.D.6	% of countries that have completed the gender scorecard						48.6 (2013)		RC survey
III.D.7	% of RCs who cite gender equality as an area of competition among UN entities						43.1 (2013)		RC survey
E. Transition from relief to development²¹ [OP 93-112]									
III.E.1	# of system wide agreements or arrangement for response to crisis with key partners (including PCNA, PDNA and MOUs)						2 (2013)		UNDG/ECHA working group on transition
III.E.2	% of countries having an up-to-date disaster risk reduction strategy						53.2 (2013)		RC survey or annual report
III.E.3	% of countries in transition where RC judges that UN needs to give higher priority to preventing spillover effects in the region/subregion						68 (2013)		RC survey or annual report
III.E.4	% of RCs in transition countries who cite humanitarian assistance as an area of competition among UN entities						45.7 (2013)		RC survey
IV. Improving the Functioning of the UN Development System									
A. UNDAF and equivalent processes [OP 113-121, 12, 124g, 124i, 130b, 170, 171, 182]									
IV.A.1	% of countries that evaluated the previous UNDAF						53.2 (2013)		RC survey or

²¹ Several topics of interest in the context of transition, such as UN alignment with national priorities, delegation of authority, and pooled funding shares are of interest in all programme countries; the relevant data will thus be collected under the applicable headings.

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
									annual report
IV.A.2	% of countries where two or more agencies have outcomes in CPDs (or equivalent programming document) that are reproduced <i>verbatim</i> from the UNDAF outcomes						21.5 (2013)		RC survey or annual report
IV.A.3	% of countries where over 20% of UN resources relate to joint programmes and are subject to pooled or pass-through fund management arrangements (as against parallel funding)						18.3 (2013)		RC survey or annual report
IV.A.4	% of RCs who 'strongly agree' that the UN could make more use of pooled or pass-through funding mechanisms						43.1 (2013)		RC survey or annual report
IV.A.5	% of countries where UN produces annual results report						79.8 (2013)		RC survey or annual report
IV.A.6	% of countries where annual UN results report is 'fully' structured around UNDAF outcomes						61.1 (2013)		RC survey or annual report
IV.A.7	% of countries where annual UN results report is 'fully' linked to national development results						52.3 (2013)		RC survey or annual report
IV.A.8	% of countries where annual UN results report informs government on the results of the UN country team as a whole						50.9 (2013)		RC survey or annual report
IV.A.9	UNDG efforts to shorten the UNDAF process, and related agency efforts to simplify and harmonize agency-specific programming instruments and processes in alignment with the UNDAF at the country level, reported to governing bodies by end-2013						-	OP119 – S&H of agency-specific programming instruments discussed with governing bodies by end of 2013	Agency update
IV.A.10	% of countries using the shortened, streamlined UNDAF process (review by Gov. Bodies in September, etc.)						22.9 (2013)		RC survey, annual report
IV.A.11	% of programme country governments that 'strongly agree' that UNDAF or another UN planning framework has helped the UN to achieve better results than if each UN agency had planned its support to the country separately						47.7 (2012)		Programme country survey
IV.A.12	% of governments that 'strongly' or 'somewhat' agree that there is a 'significant amount of duplication' among the activities of UN agencies in the country						47.2 (2012)		Programme country survey
IV.A.13	% of RCs who observe that UN agencies in the country						50.5 (2013)		RC survey

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
	compete with each other for donor funding to a 'large' or 'moderate' extent								
IV.A.14	Extent to which programme country governments agree that the UN overall is efficient in providing its support to the country (rating average)						3.1 out of 4 (2012)		Programme country survey
B. Resident Coordinator System [OP 122-143]									
IV.B.1	Index of compliance at country level with the financial and programme reporting provisions of the UN Resident Coordinator system. Agency breakdown also available.						0.7 out of 2.0 (2013)		RC survey
IV.B.2	Index of compliance with the provisions of the management and accountability system (MAS), including implementation of paragraph 37(c) of GA resolution 50/120. Agency breakdown also available.						0.8 out of 3.0 (2013)		RC survey
IV.B.3	% of UNCTs with Code of Conduct						41.3 (2013)		RC survey or annual report
IV.B.4	% of programme countries where UNDP has a Country Director (CD)						38 (2013)		RC survey or annual report
IV.B.5	% of RCs with a UNDP-CD who state that the presence of a CD is 'very important' to ensuring that the functional firewall works well						76.2 (2013)		RC survey or annual report
IV.B.6	% of RCs who have delegated responsibility for fund-raising on behalf of UNDP to the CD, DRR or other senior official, either fully or 'to a large extent'.						60.2 (2013)		RC survey or annual report
IV.B.7	Extent of alignment of RC profiles with the needs, priorities and challenges of the country						No data yet		Programme country survey
IV.B.8	Extent to which UN staff have "the right mix of capacities and skills including for high-quality policy and programme advice, and the highest standards of leadership skills"						No data yet		Programme country survey, UNCT survey
IV.B.9	Status of Secretary-General's proposals on the funding of the resident coordinator system						-	OP128 – Concrete proposals made to ECOSOC and GA in 2013	ECOSOC update
IV.B.10	% of RCO funding from sources other than UNDP/DOCO						No data yet		RC survey or annual report

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
IV.B.11	Overall (global) performance ratings of RCs						No data yet		DOCO update
IV.B.12	# of topics (such as monitoring and evaluation) on which at least 40 RCs see a need for 'substantially more joint training'						6 (2013)		RC survey or annual report
IV.B.13	Index of extent to which RCs judge UNCT members have 'very adequate' delegated authority to make decisions on behalf of their agency						0.5 out of 1 (2013)		RC survey or annual report
IV.B.14	% of RCs who 'strongly agree' that they receive clear strategic guidance from UNDG on issues related to UN coherence at the country level						25 (2013)		RC survey
IV.B.15	% of UNCT members who 'strongly agree' that they receive clear strategic guidance from their HQ on issues related to UN coherence at the country level						No data yet		UNCT survey
C. Delivering as One ²² [OP 135-143]									
IV.C.1	% of countries using DAO (pilots and reported self-starters)						32 (2013)		RC survey or annual report
IV.C.2	% of countries applying some elements of DAO or considering adopting DAO						43 (2013)		RC survey or annual report
IV.C.3	Options for the review and approval of common country programme documents of the "delivering as one" countries presented to ECOSOC in July 2013 and methodology subsequently agreed by Fs, Ps and SAs							OP143 – SG to make recommendations to ECOSOC & GA in 2013	ECOSOC update
IV.C.4	% of countries where a majority of results groups (theme groups) are led by UNCT members						51.4 (2013)		RC survey or annual report
IV.C.5	% of countries where results group work plans replace single agency work plans						No data yet		RC survey or annual report
IV.C.6	% of countries with annual UN results report that replaces individual agency reports						No data yet		RC survey or annual report
IV.C.7	# of RCs who state that in regard to DaO they have received 'very effective' support from headquarters						6 (2013)		RC survey
IV.C.8	UNDG completes analysis of challenges and bottlenecks preventing the "delivering as one" countries from fully utilizing the efficiency gains from the "delivery as one"								UNDG/DOCO

²² On some topics, relevant data for "Delivering as One" countries will be received under other headings; the data will be segregated according to country status.

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
	approach								
D. Regional Dimension [OP 135-143]									
IV.D.1	% of RCs who stated that the UNCT received 'very effective' support from the regional commission over the last two years						6 (2013)		RC survey
IV.D.2	% of programme countries that stated the regional commission had made a 'very significant contribution' to the country's development						36 (2012)		Programme country survey
IV.D.3	% of RCs who stated that the regional commission has 'great' or 'moderate' potential to make a larger contribution to the work of the UNCT						73.2 (2013)		RC survey
IV.D.4	% of UNCT members who stated that, to improve UN coherence at the country-level, it would be 'very effective' to provide the UNDG Regional Team with greater resources						19.5 (2012)		RC/UNCT survey
IV.D.5	% of RCs who stated they received 'very effective' support from the UNDG regional team in the last year						17.6 (2013)		RC survey
E. Simplification and Harmonization of Business Processes [OP 152-163]									
IV.E.1	Strategy with concrete goals and targets to support the establishment of common premises developed						No baseline	OP161 – Strategy developed by end of 2013	OMT survey, UNDG reporting (TTCP)
IV.E.2	% of countries with TTCP reviewed feasibility study for the implementation of common premises						45% of all country teams	75% of all country teams by end of 2014	OMT survey, UNDG reporting (TTCP)
IV.E.3	Joint plan for the implementation of consolidated support service presented by the funds and programmes to their executive boards at their first regular session in 2014						No baseline	OP152 – Fs/Ps to report concrete achievements to governing bodies by end of 2014 OP152 – Fs/Ps to submit joint plan to executive boards at first regular session in 2014	Funds and programmes update
IV.E.4	Plans for the system-wide harmonization of regulations and rules, policies and procedures in all functional areas of business operations presented by the HLCM and UNDG for review by the						No baseline	OP155 – HLCM and UNDG to present plans for common support	Funds and programmes update

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
	Economic and Social Council by the end of 2014							services and harmonization of regulations and rules to ECOSOC by end of 2014	
IV.E.5	Proposal on the common definition of operating cost and a common standardized system of cost control presented by the Secretary-General to the executive boards of the funds and programmes by the end of 2014						No baseline	OP159 – Proposal to be present by end of 2014	Funds and programmes update
IV.E.6	% of countries with 25 or more per cent of the annual UN financed procurement volume done by the government						23% of all countries	50% of all countries by 2016	OMT survey
IV.E.7	Feasibility study for establishing interoperability of ERP systems finalized by end of 2014						No baseline	OP160 – Feasibility study undertaken by the end of 2014	HLCM reporting
IV.E.8	% of countries with ten or more established common services, based on the implementation of an inter-agency memorandum of understanding and long-term agreement with the service provider						1.5% (2 countries)	20% of all countries by end of 2014; 50% of all countries by end of 2016	OMT survey
IV.E.8	% of countries with consolidated support services through a common UN service centre, provision of common functions through a lead agency, or outsourcing of common support functions						1% of all countries	10% of all countries by 2016	OMT survey
IV.E.10	# of funds and programmes that presented plans for intra-agency rationalization of business operations to their governing bodies by the end of 2013						No baseline	OP153 – Plans to governing bodies of at five Fs/Ps presented by end of 2013	Funds and programmes update
IV.E.11	# of funds and programmes and specialized agencies that have ratified inter-agency framework agreements regarding the provision of support services regulating the mutual validity of agreements between UN entities and third parties for the provision of support services at the country level by the end of 2013						No baseline	OP154 - At least ten Fs/Ps/SAs ratified agreements by the end of 2013	Funds and programmes update
IV.E.12	Status of the development and implementation of common definition of operating costs and a common system of cost control						No baseline	OP159 – SG to present proposal to executive boards by the beginning of 2014	HLCM reporting

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
F. Results Based Management [OP 164-172]									
IV.F.1	% of programme country governments that stated it is 'very important for the UN to 'make better use of results-based methods' in order to become more effective in the country						74.8 (2012)		Programme country survey
IV.F.2	% of UNCT members who stated that harmonizing the agencies' results-based management systems would be a 'very effective' way to improve UN coherence at the country-level						49.9 (2012)		RC/UNCT survey
IV.F.3	% of RCs who stated that harmonizing the agencies' results-based management systems was 'very important' considering the demands of joint reporting						88.1 (2013)		RC survey
IV.F.4	Coherent and harmonized approach to UN-OAD developed, focused on results, which would streamline and improve the planning, monitoring, measurement and reporting on system-wide results						No baseline	OP169 – Approach reported to ECOSOC in July 2013 and implemented in 2014	ECOSOC update
IV.F.5	Alignment achieved between results-based management and accountability, including finding ways to strengthen delivery and reporting on UN system-wide contribution to national development results						No baseline	OP171 – Alignment achieved between results-based management and accountability by the end of 2013	
IV.F.6	Results-based management and system-wide results reporting across the UN system reviewed, for consideration by the GA in the next QCPR						No baseline	OP170 – Annual reporting of funds and programmes to Member States on implementation of clear and robust results frameworks by 2014	Desk review
G. Evaluation of Operational Activities for Development [OP 173-182]									
IV.G.1	Status of efforts by UNDG, in cooperation with HLCM and other relevant UN bodies, to identify measures to improve coherence and complementarity in oversight functions, audit and evaluations in the UN development system								Agency survey

Topic	Indicator	Coherence	Relevance	Effectiveness	Efficiency	SG Report Paragraphs	Baseline	Target (as per GA 67/226)	Sources
IV.G.2	Status of efforts by SG to develop a policy for system-wide evaluation for discussion at operational activities, and a proposal for pilot system-wide evaluations						Draft policy for independent SWE will be tabled in ECOSOC along with proposals for pilots	OP181 – Proposal for pilot system-wide evaluations submitted to ECOSOC in July 2013	ECOSOC update
IV.G.3	% of programme country governments that ‘strongly agree’ that the UN has used national evaluation capacities ‘as much as possible’ in order to achieve good results in the country						10.4 (2012)		Programme country survey
IV.G.4	Guidelines developed and implemented for further strengthening of national evaluation capacities for UN-OAD including the responsibilities of different entities						No baseline		UNDG/DOCO
IV.G.5	# of agency evaluation units that meet UNEG standard for independence						To be informed by UNEG		UNEG
IV.G.6	# of agencies that fully adopt UNEG norms and standards						To be informed by UNEG		UNEG
IV.G.7	# of agencies that post evaluation reports along with a timely management response on their website						To be informed by UNEG		UNEG
IV.G.8	% of RCs in countries where the UNDAF (or equivalent instrument) was evaluated who reported that a management response was prepared						43.7 (2013)		RC survey
