INTRODUCTION - 2002 COUNTRY PROFILES SERIES

Agenda 21, adopted at the United Nations Conference on Environment and Development (UNCED) in Rio de Janeiro in 1992, underscored the important role that States play in the implementation of the Agenda at the national level. It recommended that States consider preparing national reports and communicating the information therein to the Commission on Sustainable Development (CSD) including, activities they undertake to implement Agenda 21, the obstacles and challenges they confront, and other environment and development issues they find relevant.

As a result, in 1993 governments began preparing national reports for submission to the CSD. After two years of following this practice, the CSD decided that a summarized version of national reports submitted thus far would be useful. Subsequently, the CSD Secretariat published the first Country Profiles series in 1997 on the occasion of the five-year review of the Earth Summit (Rio + 5). The series summarized, on a country-by-country basis, all the national reports submitted between 1994 and 1996. Each Profile covered the status of all Agenda 21 chapters.

The purpose of Country Profiles is to:

- Help countries monitor their own progress;
- Share experiences and information with others; and,
- Serve as institutional memory to track and record national actions undertaken to implement Agenda 21.

A second series of Country Profiles is being published on the occasion of the World Summit on Sustainable Development being held in Johannesburg from August 26 to September 4, 2002. Each profile covers all 40 chapters of Agenda 21, as well as those issues that have been separately addressed by the CSD since 1997, including trade, energy, transport, sustainable tourism and industry.

The 2002 Country Profiles series provides the most comprehensive overview to date of the status of implementation of Agenda 21 at the national level. Each Country Profile is based on information updated from that contained in the national reports submitted annually by governments.

Preparing national reports is often a challenging exercise. It can also be a productive and rewarding one in terms of taking stock of what has been achieved and by increasing communication, coordination and cooperation among a range of national agencies, institutions and groups. Hopefully, the information contained in this series of Country Profiles will serve as a useful tool for learning from the experience and knowledge gained by each country in its pursuit of sustainable development.
NOTE TO READERS

The 2002 Country Profiles Series provides information on the implementation of Agenda 21 on a country-by-country and chapter-by-chapter basis (with the exception of chapters 1 and 23, which are preambles). Since Rio 1992, the Commission on Sustainable Development has specifically addressed other topics not included as separate chapters in Agenda 21. These issues of trade, industry, energy, transport and sustainable tourism are, therefore, treated as distinct sections in the Country Profiles. In instances where several Agenda 21 chapters are closely related, for example, chapters 20 to 22 which cover environmentally sound management of hazardous, solid and radioactive wastes, and chapters 24 to 32 which refer to strengthening of major groups, the information appears under a single heading in the Country Profile Series. Lastly, chapters 16 and 34, which deal with environmentally sound management of biotechnology, and transfer of environmentally sound technology, cooperation, capacity-building respectively, are presented together under one heading in those Country Profiles where information is relatively scarce.

At the release of this Country Profile, Iraq had not updated it and therefore any new changes will appear on our web page: [http://www.un.org/esa/agenda21/natinfo](http://www.un.org/esa/agenda21/natinfo)

CHAPTER 17: PROTECTION OF THE OCEANS, ALL KINDS OF SEAS, INCLUDING ENCLOSED AND SEMI-ENCLOSED SEAS, AND COASTAL AREAS AND THE PROTECTION, RATIONAL USE AND DEVELOPMENT OF THEIR LIVING RESOURCES

Programmes and Projects: No information available.

Status: No information available.

Capacity-Building, Education, Training and Awareness-Raising: No information available.

Information: No information available.

Research and Technologies: No information available.

Financing: No information available.

Cooperation: No information available.

* * *
CHAPTER 18: PROTECTION OF THE QUALITY AND SUPPLY OF FRESHWATER RESOURCES:
APPLICATION OF INTEGRATED APPROACHES TO THE DEVELOPMENT,
MANAGEMENT AND USE OF WATER RESOURCES

Decision-Making: The Ministry of Irrigation is responsible for coordinating water resource management and
development. Irrigation Directorates related to the Ministry undertake management and development at the state or
district level. Pricing policies exist for agricultural use in order to manage water distribution and reduce waste. For
household use, the policy is to charge less than the actual cost of water treatment. The Government has set a target
of 100 percent coverage of water supply by the year 2000, and 50 percent sanitation coverage by the same date.

Programmes and Projects: No information available.

Status: Iraq follows both its own and international standards to measure water quality, including contamination of
water by Persistent Organic Pollutants. Iraq has the capacity to treat 4,715,000 P.e. wastewater, but it does not have
the capacity to recycle it. The Government regularly protects the water supply, including in rivers, lakes and dams,
from pollution and contamination. A major constraint, however, is the difficulty in controlling pollution of
freshwater from neighboring countries.

Capacity-Building, Education, Training and Awareness-Raising: No information available.

Information: Information on the use of water by agricultural, household and industrial sectors is the work of the
Central Statistical Organizations within the Planning Commission. Information is distributed through the
Agricultural Planning Directorate, the Construction, Housing and Services Planning Directorate, and the Industrial
Planning Directorate.

Research and Technologies: No information available.

Financing: No information available.

Cooperation: Iraq shares an agreement with Syria and Turkey over the use of international watercourses.
Iraq is not a party to the Ramsar Convention on Wetlands.

*   *   *
CHAPTER 19: ENVIRONMENTALLY SOUND MANAGEMENT OF TOXIC CHEMICALS, INCLUDING PREVENTION OF ILLEGAL INTERNATIONAL TRAFFIC IN TOXIC AND DANGEROUS PRODUCTS

Decision-Making: No information available.

Programmes and Projects: No information available.

CHAPTER: INDUSTRY

Decision-Making: No information available.

Programmes and Projects: No information available.

Status: No information available.

Capacity-Building, Education, Training and Awareness-Raising: No information available.

Information: No information available.

Research and Technologies: No information available.

Financing: No information available.

Cooperation: No information available.

*   *   *
CHAPTER: SUSTAINABLE TOURISM

Decision-Making: Within Iraq, the Republic of Iraq, the Council of Ministers and the Tourism Board are responsible for sustainable tourism at the national level. At the local level, the Association of Travel and Tourism Agents of Iraq and the Hotels and Restaurants Association in Iraq are also responsible. There are many codes of practice, standards and guidelines that are taught in schools, institutions and universities that affect the activities of industry in sustainable tourism. Some of them are mandatory and some are voluntary. The national strategy of Iraq with respect to this issue is to develop tourism places to attract a great number of tourists. Both eco-tourism and nature-based tourism are integral parts of the national strategy. The strategy has also been aimed, in particular, at overcoming the constraints imposed on tourism by the embargo. Among these constraints have been those which have made it impossible to promote tourism through printed matter, guides, cassettes and all other media activities.

Programmes and Projects: No information available.

Status: The embargo left a great impact on the economic situation of the country and the reduction of both local and outbound tourism. The embargo also led to the destruction of the tourism centers, such as monuments and religious places, as well as destruction of the environment. These combined have had a negative impact on tourism activities in the country.

Capacity-Building, Education, Training and Awareness-Raising: No information available.

Information: The management systems applied in hotels and other tourist establishments are the same as those of the international systems. Because of the embargo, the country is deprived from using the Internet and World Wide Web Sites that contain the requisite data.

Research and Technologies: No information available.

Financing: No information available.

Cooperation: The embargo and sanctions have deprived Iraq from participation in international conferences and from exchanging experiences in the tourism sector. This compelled Iraq not to participate and show liability with the international world.

* * *
