Seventieth session
Item 134 of the preliminary list*
Proposed programme budget for the biennium 2016-2017

Implementation of projects financed from the Development Account: ninth progress report

Report of the Secretary-General

Summary

The Development Account is a capacity development programme of the United Nations Secretariat aimed at enhancing capacities of developing countries in the priority areas of the United Nations Development Agenda.

The present report is submitted pursuant to General Assembly resolution 56/237, in which the Assembly decided to keep the implementation of the Development Account under review. It provides information on the policy context in which the Development Account operates, the implementation of projects funded from the Account since the submission of the eighth progress report (A/68/92) and an update on the management of the Account.

Since the launch of the Development Account in 1997, 315 projects have been approved, of which 111 projects are currently ongoing (eighth and ninth tranches). In addition, 33 new projects under the tenth tranche, including a project on the programme for statistics and data, are being presented to the General Assembly for its consideration as part of the proposed programme budget for the biennium 2016-2017 (A/70/6 (Sect. 35)).
I. Introduction

1. The purpose of the present report is to inform Member States of the performance and management of the Development Account. The mandate of the report is contained in General Assembly resolution 56/237, in which the Assembly reiterated its decision to continue to keep the implementation of the Account under review. The Advisory Committee on Administrative and Budgetary Questions subsequently recommended that the report be submitted in the context of the presentation of the proposed programme budget for the biennium concerned.

2. The Development Account was established by the General Assembly in its resolution 52/12 B as a mechanism to fund capacity development projects of the economic and social entities of the United Nations Secretariat: Department of Economic and Social Affairs, Economic Commission for Latin America and the Caribbean (ECLAC), Economic and Social Commission for Asia and the Pacific (ESCAP), Economic and Social Commission for Western Asia (ESCWA), Economic Commission for Europe (ECE), Economic Commission for Africa (ECA), United Nations Conference on Trade and Development (UNCTAD), United Nations Environment Programme (UNEP), United Nations Human Settlements Programme (UN-Habitat) and United Nations Office on Drugs and Crime (UNODC).

3. Projects financed from the Development Account support capacity development in developing countries at the national, subregional, regional and interregional levels. The projects seek to ensure effective follow-up to the United Nations intergovernmental processes, most recently the consideration of the post-2015 development agenda, and serve as an operational extension of the normative and analytical work of the implementing entities. The Account serves as an important operational facility for testing new and innovative development approaches. When successful, such approaches can be scaled up and replicated for increased development results. The Account also provides a mechanism for promoting the exchange and transfer of skills, knowledge and good practices among target countries, including in different geographical regions, for example through South-South cooperation and through cooperation with a wider range of partners in the development assistance community.

4. Since the launch of the Development Account in 1997, 315 projects have been approved, of which 111 projects are currently ongoing (eighth and ninth tranches). In December 2014, the total amount approved by the General Assembly for the Development Account reached $181.3 million. The anticipated approval of the tenth tranche will add $28.4 million to the overall total for the financing of the additional 33 new projects, including a project on the programme for statistics and data. Details on individual projects, as well as all previous progress reports, are available on the Development Account website (www.un.org/esa/devaccount/).

5. A summary overview of all Development Account tranches can be found in annex I to the present report, and an update on the implementation status of the projects of the eighth and ninth tranches is provided in annex II.
II. The policy context in which the Development Account operates

6. With the target date for achieving the Millennium Development Goals set for the end of this year, 2015 marks a critical juncture for the international community. Much has been achieved, and much also remains to be done. One of the main outcomes of the United Nations Conference on Sustainable Development (Rio+20 Conference), held in Rio de Janeiro, Brazil, in June 2012, was the agreement by Member States to launch a process to develop a set of sustainable development goals in the follow-up to the Millennium Development Goals. Drawing from the experience of the previous two decades, the Open Working Group of the General Assembly on the Sustainable Development Goals presented to the General Assembly in August 2014 its report (A/68/97 and Corr.1) containing proposals for 17 specific goals with 169 associated targets. The proposals will form the basis for considering the integration of sustainable development goals into the post-2015 development agenda during the intergovernmental negotiation process at the seventieth session of the General Assembly.

7. In his synthesis report on the post-2015 sustainable development agenda, entitled “The road to dignity by 2030: ending poverty, transforming all lives and protecting the planet” (A/69/700), the Secretary-General proposed a universal and transformative agenda for sustainable development. Among the many and complex challenges of implementing the agenda, the report highlighted the need for new development metrics, supported by a modern monitoring system for the achievement of the sustainable development goals, and improved availability of and access to data. The report also pointed to the need for the United Nations development system and its operational activities to respond to changes in the development landscape and for the United Nations system to be “fit for purpose” to deliver on the post-2015 sustainable development agenda.

8. Three important high-level international meetings that will shape the new era of sustainable development are to be held in 2015: (a) the Third International Conference on Financing for Development, to be held in Addis Ababa in July; (b) the United Nations summit for the adoption of the post-2015 development agenda, to be held in New York in September; and (c) the twenty-first session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, to be held in Paris in December.

III. Overview and assessment of the achievements of the seventh tranche projects

9. A total of 66¹ projects were implemented between 2010 and 2013 in accordance with the guidelines established for the seventh tranche of the Development Account. The seventh tranche included four parts: (a) 15 projects funded from the $7.5 million financed from the final budget appropriation for the biennium 2008-2009 (General Assembly resolution 64/242 A); (b) 28 projects

¹ At the time of writing, final evaluation reports were available for 35 projects (34 final reports and 32 evaluation reports). Together with the project documents and progress reports for all the reviewed projects, these reports provide the main source documents for this report.
financed from the programme budget for the biennium 2010-2011 (Assembly resolution 64/244 A); (c) 12 projects financed from the residual balances of the first four tranches of the Account; and (d) 11 projects funded from the additional $5 million that the Assembly approved in its resolutions 64/243 and 64/244 A.

**Responding to the needs and priorities of Member States**

10. The medium- to long-term focus of the projects has allowed the Development Account to become a supportive vehicle for advancing the implementation of internationally agreed development goals and the outcomes of United Nations conferences and summits. The theme of the seventh tranche of the Development Account, “Support to addressing key global development challenges to further the achievement of internationally agreed development goals through collaboration at the global, regional and national levels”, is reflective of this endeavour.

11. In the policy environment of the seventh tranche, as reflected in the intergovernmental debates, there was a greater focus on achieving the Millennium Development Goals, as well as addressing the effects on development of the 2008 global financial crisis. That is evidenced by the key summits and conferences during that period, including the Follow-up International Conference on Financing for Development to Review the Implementation of the Monterrey Consensus (Doha, 2008), the United Nations Conference on the World Financial and Economic Crisis and Its Impact on Development (New York, 2009), the High-level Plenary Meeting of the General Assembly on the Millennium Development Goals (New York, 2010) and the Fourth United Nations Conference on the Least Developed Countries (Istanbul, 2011). The build-up to the Rio+20 Conference provided strong guidance to the seventh tranche projects (see box 1).

<td><strong>Sustainable development projects</strong></td>
</tr>
<tr>
<td>The shift in the international development agenda to focus on sustainable development and climate change became notable through the Rio+20 Conference and its preparatory process. The seventh tranche effectively implemented 13 projects that targeted emissions reduction and sustainable energy. Nearly every implementing entity had a project that addressed sustainability and low-carbon issues.</td>
</tr>
</tbody>
</table>

12. A common concern raised at the Rio+20 Conference was limitations in monitoring progress in achieving Millennium Development Goal. The need to increase efforts in support of statistical capacity-building in developing countries had also been raised at the 2010 High-level Plenary Meeting of the General Assembly on the Millennium Development Goals (see box 2).
Box 2
Statistics

The holding of the 2010 High-level Plenary Meeting of the General Assembly on the Millennium Development Goals and the formulation of the seventh tranche projects were well timed, leading to statistical capacity-building in developing countries being included as an area of focus in the formulation of the seventh tranche projects. Nine projects had a specific focus in this thematic area, and many more had strengthened statistical capacity as a side-effect of the project focus.

General focus of the seventh tranche of the Development Account

13. In line with the theme of the seventh tranche, all projects were implemented in support of one or more of the Millennium Development Goals (see figure 1). Eradicating extreme hunger and poverty (Millennium Development Goal 1) was the most frequently supported goal, followed by ensuring environmental sustainability (Millennium Development Goal 7) and developing a global partnership for development (Millennium Development Goal 8). All three of these Millennium Development Goals were supported by more than half of the seventh tranche projects. The remaining Millennium Development Goals, however, also provided important direction for the projects. Promoting gender equality and empowerment of women (Millennium Development Goal 3), achieving universal primary education (Millennium Development Goal 2), reducing child mortality (Millennium Development Goal 4), improving maternal health (Millennium Development Goal 5) and combating HIV/AIDS, malaria and other diseases (Millennium Development Goal 6) were also supported by the seventh tranche projects.
Figure I
Millennium Development Goals addressed by projects*

![Bar chart showing Millennium Development Goals addressed by projects](image)

* Each project can simultaneously support several of the Millennium Development Goals. The sum of the figures above therefore exceeds the total number of projects.

Regions and types of countries covered in the seventh tranche projects

14. The seventh tranche projects focused on developing capacities of countries in the main developing regions of the world. As illustrated in figure II, the seventh tranche projects were oriented towards building capacity in Asia, Africa and Latin America. More than half of the projects were implemented in at least one country in each of these regions. Moreover, one third of the projects focused on developing capacity in countries in the Middle East and North Africa and in Europe and Central Asia. Particular attention was paid to countries with special needs.

---

2 Figure II shows the five regions covered by the regional commissions of the Economic and Social Council (ESCAP, ECA, ECLAC, ESCWA and ECE).
15. As reflected in figure III, 55 per cent supported landlocked developing countries, 53 per cent provided assistance to least developed countries and 32 per cent sought to contribute to building capacity in small island developing States.

*Projects may simultaneously support countries in several different regions. The sum of the figures provided above therefore exceeds the total number of projects.*

*Projects may simultaneously support countries in several different categories. The sum of the figures provided above therefore exceeds the total number of projects.*
16. In about half of the seventh tranche projects, the focus was on a single geographical region. In general, these projects focused on multiple countries as a means of furthering South-South cooperation and facilitating opportunities for countries to learn from each other’s experiences. This was also true for the projects with an interregional scope, benefiting countries in more than one region, which was the case for approximately a third of the projects. One in six of the projects had a global focus and included at least one beneficiary country from each of the five regions covered by the regional commissions of the Economic and Social Council (ECA, ECLAC, ESCAP, ECE and ESCWA) (see the table).

**Specific focus of the projects**

17. The seventh tranche projects covered a wide range of thematic areas building on the mandates and comparative advantages of the 10 implementing entities. As projects were developed in direct response to requests from Member States, the areas thus reflect the needs and priorities of those States.

18. As shown in figure IV, the most commonly addressed theme was governance (32 projects). Examples of governance projects include the project on strengthening South-South cooperation to increase the affordability of sustainable energy options in Asia and the Pacific (project AQ (2008-2009) ESCAP), the project on strengthening coherence and coordination of development policies (project AK (2008-2009) Department of Economic and Social Affairs) and the project on strengthening regional knowledge networks to promote the effective implementation of the United Nations development agenda and to assess progress (project W (2010-2011) Department of Economic and Social Affairs).

---

3 The thematic areas referenced in this section follow from the thematic clusters of the Executive Committee on Economic and Social Affairs.
19. The second most prevalent theme was sustainable development, human settlements and energy (27 projects). Examples of such projects include the project on building capacity of countries of the United Nations Special Programme for the Economies of Central Asia to adopt and apply innovative clean technologies for climate change adaptation and sustainable knowledge-driven growth (project AN (2008-2009) ECE), the project on capacity development for cities in Asia and the Pacific to increase resilience to climate change impacts (project AN (2010-2011) UN-Habitat) and the project on strengthening national capacities to formulate and implement sustainable energy strategies (project AL (2010-2011) UNEP).

20. Macroeconomics was the third most frequently addressed theme (14 projects), with projects covering issues such as strengthening macroeconomic and social policy coherence through integrated macro-micro modelling (project AG (2008-2009) Department of Economic and Social Affairs) and enhancing the capacities of landlocked developing countries to attract foreign direct investment for development and modernize their productive capacities (project AJ (2010-2011) UNCTAD).

21. The thematic area of international trade was addressed in 12 projects, including a project on strengthening capacities in the ESCWA region to negotiate bilateral investment treaties (project M (2010-2011) ESCWA), a project on facilitating the effective integration of developing countries in the global economy through Aid for Trade schemes (project A (2010-2011) ECA) and a project on the

22. The thematic area of statistics was further addressed in nine projects, including a project on enhancing key statistics and indicators to monitor progress towards the Millennium Development Goals and other internationally agreed development goals (project AB (2010-2011) Department of Economic and Social Affairs), a project on building statistical capacity to monitor the Millennium Development Goal slum target in the context of natural disasters and housing crisis in Africa, Asia, Latin America and the Caribbean (project AU (2008-2009) UN-Habitat) and a project on strengthening national statistical and inter-institutional capacities for monitoring the Millennium Development Goals through interregional cooperation and knowledge-sharing (project H (2010-2011) ECLAC).

23. The thematic area of social development was addressed in eight projects, including the project on strengthening social protection in Asia and the Pacific (project K (2010-2011) ESCAP) and the project on strengthening national capacities of policymakers in the ESCWA region to formulate national youth policies and plans of action: responding to the World Programme of Action for Youth (project AI (2010-2011) ESCWA).

Project partnerships

24. Fostering partnerships throughout a project’s lifespan is at the very core of the Development Account’s strategy. With the involvement of partners, implementing entities are able to build upon the original project framework and expand their project’s reach. Almost all of the projects reviewed (35 projects) were implemented through some type of partnership: 66 per cent of the reviewed projects were implemented through partnerships with United Nations Secretariat entities, 63 per cent were implemented through partnerships with other United Nations entities, 26 per cent were implemented through partnerships with the Bretton Woods institutions or other multilateral financial institutions, about 23 per cent were implemented through partnerships with international non-governmental organizations and 3 per cent were implemented through partnerships with the private (see figure V).
Types of partners in projects

* Many projects engage with several types of partners and are therefore counted under each relevant category.

**Leveraging project funding and initiatives**

25. Partnerships also help ensure continuing support from invested parties beyond the project time frame. The leveraging of funds increases the potential that activities of a project will be continued and replicated with external funding and has multiplier effects. As shown in figure VI, 80 per cent of the seventh tranche projects reviewed were able to leverage resources, including financial leveraging (17 per cent), in-kind leveraging (26 per cent) or a combination of both (37 per cent). These relatively high percentages indicate that Development Account projects were viewed by other organizations as valuable and viable and as worthwhile investments of time and money.
26. As shown in figure VII, the most common source of funds leveraged for the reviewed seventh tranche projects was national Governments of beneficiary countries (19 projects), followed by United Nations entities (15 projects), other international organizations (15 projects) and Governments of non-beneficiary or donor countries (13 projects).
27. An example of a project in which leveraging funds from partners was a key feature include the UNCTAD project “Towards developing a global monitoring system in investment policies” (project AK (2010-2011) UNCTAD). Under this project, most of the costs (71 per cent) in connection with the three regional capacity-building workshops organized in Africa, Asia and Latin America were covered by project partner organizations, allowing UNCTAD to further the capacity development support provided through the project.

28. Many projects were also able to gain support from non-beneficiary donors, as demonstrated by the successful mobilization by ESCAP of funds from two Governments in the region for further implementation of key components of the project on improving disaster risk preparedness in the ESCAP region (project I (2010-2011) ESCAP). Similarly, UNCTAD was able to mobilize funds from the Governments of two Nordic countries to develop a virtual training module for its project on enhancing capacities of developing countries to mainstream gender in trade policy (project Q (2010-2011) UNCTAD).

**Supporting sustainability of project results**

29. Beneficiary countries’ engagement with and contribution to Development Account projects were essential to the sustainability of their results. Development Account projects are developed in response to requests from beneficiary countries.
This means that the projects usually have strong political commitment from the countries. An example of such a project is the project on improving criminal justice responses to trafficking in persons in South-Eastern Europe with specific focus on the Republic of Moldova (project N (2010-2011) UNODC). Assessment of the needs and identification of priorities for this project were conducted in close cooperation with the project beneficiaries, ensuring their commitment to and ownership of the project. Cooperation with relevant national and international entities to counter human trafficking ensured complementarity with ongoing activities and policies and avoided duplication of efforts.

30. Adaptability is another important element in ensuring the sustainability of the achievements of a project. Maintaining a level of flexibility throughout the different implementation stages of a project ensures that beneficiary countries’ interests are kept at the fore and that the project can be adjusted to meet changing needs. ESCAP, for example, succeeded in adapting its project on strengthening capacity in mitigating the impact of the financial crisis and sustaining dynamic and inclusive development in Asia and the Pacific (project AF (2010-2011) ESCAP); though the project had originally focused on strengthening capacity in mitigating the impact of the financial crisis, its scope was expanded in line with the different priorities of each subregion. At the time of completion of the project, the focus had shifted largely to regional cooperation issues critical to the region’s resilience to future crises and sustained dynamism.

IV. Managing the Development Account for results

31. The Under-Secretary-General for Economic and Social Affairs is the Programme Manager of the Development Account and is supported in the day-to-day management of the Account by a team in the Capacity Development Office of the Department of Economic and Social Affairs. In 2012, the team was temporarily strengthened through the recruitment of a Monitoring and Evaluation Officer funded through a two-year Junior Professional Officer position from a donor country. Having a position dedicated to monitoring and evaluation made it possible to track more closely progress in the implementation of projects. It also allowed for good practices and strategies used in project design and implementation to be brought to the fore and for lessons learned to be adopted in the programming of subsequent projects. With the cessation of the Junior Professional Officer position at the end of 2014, new arrangements must be found to sustain the evaluation function.

32. The prompt programming of the ninth tranche projects was a key priority during the reporting period. The Associate Programme Officer (P-2) post approved by the General Assembly in December 2013 substantially helped with this task, as did the new operating methods introduced through the adoption of a new Governance and Management Architecture for the Development Account. By June 2014, six months after the launch of the ninth tranche, 56 per cent of all projects (26 out of 46 projects) had been approved for allotment, and by the end of 2014 the proportion had reached 87 per cent (40 out of 46 projects). This represents a significant improvement compared with previous tranches, as the programming of ninth tranche projects required less than half the time required for the corresponding programming of the seventh and eighth tranches.
In addition to the 46 projects approved for the ninth tranche, 13 additional projects financed from residual balances from the fifth and sixth tranches of the Development Account were programmed during the course of 2014. In accordance with General Assembly resolution 56/237, according to which funds from underperforming projects may be redeployed to deliver better results, two projects of the Department of Economic and Social Affairs were reprogrammed: (a) project I (2014-2015), focusing on enhancing institutional capability in selected developing countries for monitoring and reporting on sustainable development objectives, goals and targets; and (b) project G (2014-2015), focusing on data-collection methodology and tools for supporting the formulation of evidence-based policies in response to the challenge of population ageing in sub-Saharan Africa.

The immediate priority of the Programme Manager in looking ahead will centre on the expeditious programming of the tenth tranche of the Development Account and the timely closing of the ninth tranche. The theme of the tenth tranche (“Supporting Member States in implementing the post-2015 development agenda: strengthening statistics and data, evidence-based policies and accountability”) reflects the priorities of Member States.

The 33 new projects under the tenth tranche include a project on the programme for statistics and data that will help developing countries in building their capacities to measure and monitor the sustainable development goals. The $10 million programme is much larger than the average Development Account project ($650,000). It will be implemented as a unified and structured whole, rather than as an amalgamation of individual projects or proposals, and it will build on the ongoing dialogues, panels, debates and intergovernmental discussions that will shape and finalize the post-2015 development agenda and sustainable development goals. It will be demand-driven and country-owned, and it will be aimed at leveraging other statistical programmes and funding initiatives to achieve a higher multiplier effect. It will actively seek engagement, alignment and coherence with statistical capacity development programmes of other United Nations entities in order for the United Nations system to “Deliver as one”, reflecting the joint responsibility of all United Nations agencies to support countries in establishing an effective and sustainable information infrastructure.

V. Conclusions and recommendations

The Development Account is a unique funding mechanism through which Member States have access to the full range of knowledge and expertise available in the economic and social entities of the United Nations Secretariat — the 10 implementing entities of the Development Account (Department of Economic and Social Affairs, ECLAC, ESCAP, ESCWA, ECE, ECA, UNCTAD, UNEP, UN-Habitat and UNODC). The Development Account projects are developed in direct response to requests from countries with the aim of enhancing capacities in the areas of their priority needs. The theme of the tenth tranche is “Supporting Member States in implementing the post-2015 development agenda: strengthening statistics and data, evidence-based policies and accountability”; the tenth tranche includes a new $10 million project on the programme for statistics and data that represents a major milestone for the Development Account. The programme will provide a new and innovative approach allowing the 10 implementing entities of the Account to work closely together and
capitalize on their individual technical expertise and comparative advantages and to help developing countries face the data challenges of the sustainable development goals by strengthening national statistical systems.

37. The reporting period saw the seventh tranche of the Development Account being successfully brought to a close. The projects were developed in direct response to requests from Member States for assistance in meeting their priority needs and were implemented in all major development regions of the world.

38. The reporting period also saw the launch of the ninth tranche of the Development Account, as well as the programming of 13 projects financed from the residual balances of the fifth and sixth tranches. The approval process for these projects was significantly shortened compared with the approval process for projects of previous tranches, leaving more time to implement the projects on the ground in the beneficiary countries.

39. The programming of the tenth tranche projects drew important inputs and lessons learned from the evaluation of seventh tranche projects. The temporary Monitoring and Evaluation Officer funded through a two-year Junior Professional Officer position was instrumental in this regard. In moving forward, it will be very important to continue and further strengthen this practice through the systematic review of project progress reports, as well as final and external evaluation reports, and the extraction and distillation of lessons learned from the implementation of projects.

40. Looking ahead, important next steps in the management of the Development Account will include the expeditious programming of the tenth tranche projects and the timely closing of the ninth tranche projects. The Secretariat, in this connection, stands ready to continue to provide effective support to the Account for the benefit of developing Member States.

41. The General Assembly may wish to take note of the present report.
