

## Liechtenstein's Proposals to the Doha Draft Outcome Document – Section 1 and 2

Proposals as made during meeting of 9 October 2008:

### Introduction

1. We the heads of State and Government, and representatives of member states of the United Nations gathered here in Doha, Qatar, from November 29 to December 2 of 2008, almost seven years after the landmark ~~conference~~ International Conference of Financing for Development held in Monterrey, reiterate our resolve to implement the Monterrey Consensus and to address the challenges of financing for development in the spirit of global partnership and solidarity. We once again commit ourselves to eradicate poverty, achieve sustained economic growth and promote sustainable development as we advance to a fully inclusive and equitable global economic system.

2. We reaffirm the Monterrey Consensus in its entirety and in its integrity and ~~recognize that mobilizing financial resources for development and the effective use of those resources are~~ stress its central importance for a global partnership for development in support of the achievement of the internationally agreed development goals (IADGs), including the Millennium Development Goals (MDGs).

### Mobilizing domestic financial resources for development

5. We will strive to ensure the necessary internal conditions for mobilizing public and private savings and sustaining adequate levels of productive investment. Good governance is essential for effectively mobilizing domestic financial resources and for attracting foreign direct investments. We will enhance our efforts to overcome obstacles to strengthen good governance at all levels while keeping in mind countries' different characteristics and specificities and that national ownership is critical.

6. Human resources are the most precious and valuable asset that countries possess. The realization of decent work for all, including investment in human capital through better designed and better funded health and education policies, coupled with better social protection and active and inclusive labor market policies, is essential. Such policies have begun to show results, but increased efforts are needed.
