
World Urbanization Prospects: The 2001 Revision

ST/ESA/SER.A/216
Sales No. E.02.XIII.16

Available in English only.

Presents the 2001 Revision of the official estimates and projections of the size and growth of urban and rural populations for the 228 countries or areas of the world for the period 1950-2030. Data are presented separately for the world as a whole, the more developed and the less developed regions, the major areas, 20 regions and 228 countries or areas. The urban and rural estimates and projections are consistent with the *2000 Revision of World Population Prospects*. Also presented are estimates and projections of the populations of urban agglomerations with at least 750,000 inhabitants in 2000 for the period 1950-2015. An in-depth analysis of levels, trends and prospects of urbanization and of the dynamics of population growth in cities is included.

World Population Prospects: The 2000 Revision**Volume III: Analytical Report**

ST/ESA/SER.A/200
Sales No. E.01.XIII.20

Available in English only.

Presents an in-depth analysis of the results of the *2000 Revision* of the official population estimates and projections of the United Nations. Includes a discussion of past levels, trends and prospects regarding population growth, fertility, mortality and international migration. The impact of HIV/AIDS is also analysed. Volume III presents a description of the methodology used in preparing the *2000 Revision* as well as of the assumptions underlying the different projection variants. It includes information on the most recent data sources used to estimate current levels of fertility, mortality and international migration for each country or area of the world.

World Population Prospects: The 2002 Revision

Highlights
(ESA/P/WP.180)

Available in English only.

Presents highlights of the results of the *2002 Revision* of the official population estimates and projections of the United Nations prepared by the Population Division. Includes a summary description of the assumptions underlying the projections and 23 annex tables presenting selected population indicators, generally for all countries and areas with 100,000 inhabitants or more in 2000. The text and tables can also be found in:

<http://www.un.org/esa/population/publications/wpp2002/WPP2002-HIGHLIGHTSrev1.PDF>

World Population Prospects: The 2002 Revision**Executive Summary**

(ST/ESA/SER.A/222)

Available in Arabic, Chinese, English, French, Spanish and Russian.

Presents the main findings of the *2002 Revision of World Population Prospects* as well as the assumptions underlying the different variants of the population projections to 2050.

World Population Prospects: The 2002 Revision**Volume I: Comprehensive Tables**

ST/ESA/SER.A/222
Sales No. E.03.XIII.6

Available in English only.

Presents the results of the *2002 Revision* of the official population estimates and projections of the United Nations for the period 1950-2050. Data are presented separately for the world as the whole, the more developed and the less developed regions, the major areas, 20 regions and 192 countries or areas with at least 100,000

inhabitants in 2000. For countries or areas with less than 100,000 inhabitants, only estimates and projections of the total population and the rate of population growth are presented. Part I presents the demographic profiles of each geographic unit, including the results of four projection variants—low, medium, high and constant-fertility—for the period 2000-2050. Part II presents tables displaying the values of specific demographic indicators for all geographical units.

World Population Prospects: The 2002 Revision

Volume II: Sex and Age Distribution of Populations

ST/ESA/SER.A/223

No. E.03.XIII.7

Available in English only.

Presents the results of the *2002 Revision* of the official population estimates and projections of the United Nations for the period 1950-2050. For the world as the whole, the more developed and the less developed regions, the major areas, 20 regions and the 192 countries or areas with at least 100,000 inhabitants in 2000, the distributions of the population by five-year age group and sex are presented for 1950, 1955, 1960....2045, 2050. For the period 2000-2050, the results of three projection variants are displayed, namely, the low, medium and high variants.

World Population Prospects: The 2002 Revision

Volume III: Analytical Report

(In preparation)

Available in English only.

Presents an analysis of the results of the *2002 Revision* of the official population estimates and projections of the United Nations and a set of analytical tables illustrating the main findings.

Includes chapters on population growth and structure, fertility, mortality, the impact of HIV/AIDS and international migration. Volume III also presents a description of the methodology used in preparing the *2002 Revision*, including the new method for the modeling and projection of HIV/AIDS, as well as of the assumptions underlying the different projection variants. It includes information on the most recent data sources used to estimate current levels of fertility, mortality and international migration for each country or area of the world.

WALL CHARTS

Urban and Rural Areas 2001

ST/ESA/SER.A/212

Sales No. E.02.XIII.10

Available in English only.

Presents, for the world as a whole, the more developed and the less developed regions, for the major areas, 20 regions and the 228 countries or areas of the world, estimates of the size of the urban and rural populations and of the proportion urban in 2001 and 2030 as well as estimates of the average annual rate of urban and rural population growth during 2000-2005. Also included is the population of the largest urban agglomeration of each country in 2001.

Urban Agglomerations 2001

ST/ESA/SER.A/213

Sales No. E.02.XIII.9

Available in English only.

Presents the population in 2001 and 2015 of all urban agglomerations with at least one million inhabitants in 2000. Urban agglomerations are listed alphabetically, from Aachen in Germany to Zigong in China. Other indicators displayed for each urban agglomeration are: the rank order in 2001 and 2015; the average annual rate of population growth in 2000-2005 and 2010-2015;

the percentage increase in the population of each agglomeration between 1975 and 2000, and between 2000 and 2015; and the 2001 population of each urban agglomeration as a percentage of the total population of the country and of the urban population.

World Population 2002

ST/ESA/SER.A/224
Sales No. E.03.XIII.9

Available in English only.

Presents selected demographic indicators for the world as a whole, the major areas, regional groups, and the 228 countries or areas of the world. Indicators include the total population in 2003, 2025 and 2050; the percentage urban, the percentage of the population under age 15 and that aged 60 or over in 2003. In addition, for the period 2000-2005, the following indicators are included: the annual population growth rate; the crude birth rate; the crude death rate; total fertility; life expectancy at birth; mortality under age five and the percentage of births to women under age 20.

DATA SETS

World Urbanization Prospects: The 2001 Revision

Urban and Rural Areas
POP/DB/WUP/Rev.2001/1
Excel files on diskette: \$200

Presents in digital form the results of the *2001 Revision of World Urbanization Prospects* relative to the size and growth of the urban and rural populations of the 228 countries or areas of the world. Includes tables showing the percentage urban; the number of persons living in urban areas; the number of persons living in rural areas; the growth rate of the urban population; the growth rate of the rural population; and the rate of urbanization. The data are presented at five-year intervals and cover the period 1950-2030. The urban and rural

populations are consistent with the results of the *2001 Revision of World Population Prospects*.

World Urbanization Prospects: The 2001 Revision

Urban Agglomeration
POP/DB/WUP/Rev.2001/2

Excel files on diskette: \$200

Presents in digital form the results of the *2001 Revision of World Urbanization Prospects* relative to the size and growth of urban agglomerations with 750,000 inhabitants or more in 2000. Includes tables showing the population of those urban agglomerations; the growth rate of the population in urban agglomerations; the population of urban agglomerations as a proportion of the population of the whole country and as a proportion of the urban population; the 30 most populous agglomerations at different dates; the population of capital cities in 2001 (whether or not those cities had a population larger than 750,000); and the distribution of the urban population by city-size class. Most the data are presented at five-year intervals and cover the period 1950-2015. The data are consistent with the results of the *2000 Revision of World Population Prospects*.

Long-Range World Population Projections: Based on the 1998 Revision

POP/DB/LRP/Rev.1998
Excel files on diskette: \$300

Contains Excel files with the results of the long-range projections covering the period 1950-2150. Results are presented for thirteen scenarios and for each of nine geographical units (World; Africa; Asia excluding China and India; Europe; Latin America and the Caribbean; Northern America; Oceania; China, and India). The files include data on 11 demographic indicators for five-year periods from 1950-1955 through 2145-2150; the total mid-year population at five-year intervals from 1950 to 2150; and the population by five-year age group and sex at five-year intervals from 1950 to 2150.

World Population Prospects: The 2002 Revision

ST/ESA/SER.A/225

Sales No. E.01.XIII.8

Excel and PDF files on CD-Rom: \$800

The CD-Rom contains a comprehensive set of demographic indicators for the 1950-2050 period. Includes all the data published in volumes I and II of *World Population Prospects: The 2002 Revision* plus a number of data sets displaying results of the *2002 Revision* that are available only in digital form. Most data sets present the results of the four traditional projection variants, namely, the low, medium, high and constant-fertility variants. Selected indicators are presented for an additional three variants: the zero-migration, constant-mortality and instant-replacement fertility variants. To permit an assessment of the impact of HIV/AIDS, a No-AIDS variant is also presented. It is calculated assuming that AIDS has never existed. All data sets contain, in addition to data for individual countries and areas, data on 33 country aggregates, including the world as a whole, the more and the less developed regions and the major world areas. The CD contains 80 files in Microsoft Excel 2000. In addition, the images of the data printed in volumes I and II of *World Population Prospects: The 2002 Revision* are included in PDF format.

World Population Prospects: The 2002 Revision, Interpolated Population by Sex, Single Years of Age and Single Calendar Years, 1950-2050

Supplementary Tabulations

POP/DB/WPP/Rev.2002/1

Access database on CD-Rom: \$1,000

This CD-Rom contains estimates and projections of the populations of 192 countries with 100,000 inhabitants or more in 2000 and 33 country aggregates, including the world as a whole, the more and the less developed regions for the period 1950-2050. Population data are presented by single-year of age and single calendar year for each sex. The single-year data were derived from the results of the *2002 Revision of World Population Prospects* by interpolation. Only the results of the medium variant are presented.

World Population Prospects: The 2002 Revision, Interpolated Indicators 1970-2010

Supplementary Tabulations

POP/DB/WPP/Rev.2002/2

Excel files on CD-Rom: \$200

This CD-Rom contains estimates and projections of selected indicators for the 192 countries with 100,000 inhabitants or more in 2000 and 33 country aggregates, including the world as a whole as well as the more and the less developed regions. Data are presented for each year of the period 1970-2010. The indicators included are: the annual number of births and deaths; the annual crude birth rate and the crude death rate; the annual number of infant deaths and the infant mortality rate; the annual number of survivors to age 1; and the mid-year populations under ages 1, 5, 15 and 18. These indicators were derived from the results of the *2002 Revision of World Population Prospects* by interpolation. Only past estimates and the medium variant are presented.
