Alternative notions of
development/social policy

social

- Integrating sustainability
- Recognising and using the concept of “capitalism” to explain public poverty and private wealth, and planetary destruction
- Replacing the primacy of the profit motif in favour of ecological sustainability and social equity

2) Social *development*

EVOLUTION OF THE SOCIAL DEVELOPMENT NOTION

ONTOLOGY

- mapping of meaning of words = specification of a conceptualisation
- each group associates different meaning

Social development

- Working for a convergence of meanings
- Referring to each other's terminology
- Using social development concept to shape social policy

3) Social *policy*

Social policy traditions

- “Nordic” welfare state tradition

- Intended policy outcomes

World Social Summit's policy spinoffs

4) The scope for - progressive - social policy in the SDG era?

1. **Linking employment/decent work and minimum income guarantees/social protection floor**
2. **Linking employment/decent work and sustainable development**
3. **Linking employment/decent work and the care economy**
4. **Sustainable consumption and production and social policy**

Linking SPF and decent work

Linking employment/decent work and minimum income guarantees/social protection floor

- Minimum income precondition for decent work
- Minimum income - the Keynesian demand argument
- Making the decent work argument equally “palatable”/popular

Changing the normative hierarchy

Linking employment/decent work and sustainable development

Linking employment/decent work and the care economy

Sustainable consumption and production and social policy

- Eco-social rational: economic decisions subordinated to ecological and social justice considerations
 - From production of material goods to creation of services
 - Recognising planetary boundaries
 - Valorising the care economy

Conclusions

- Connect social development concerns, notions and discourses for a progressive and more coherent social policy framework
- Recognise the impact of the capitalist logic
- Radically rethink social policy
