Why was this Module created?

This Module aims to give a global overview to local authorities representatives and staff members on the issue of the use of ICTs for better integration of migrants and people with migrant background at a local level. The module is covers different aspects in order to have a complete idea on the issue and to be able to follow the next modules of the Course.

What is the objective ?

The objective of this Module is to empower local authorities representatives and staff members with information on different aspects of the complex subject of the use of ICTs for better integration of migrants and people with migrant background in the European Union countries.

The global overview and the general understating of the proposed aspects are important for the development and successful implementation of The Global Strategy on the use of ICTs for better integration of migrants at a local level.
