| <b>\$1.25/day Optimistic</b>  | 33.1                  | 1.9                     | 21.4                      | 9.1                        | 143.4      | 218.7              | 427.5  |
| <b>\$1.25/day Baseline</b>    | 46.6                  | 3.0                     | 27.8                      | 14.2                       | 228.0      | 304.5              | 624.1  |
| <b>\$1.25/day Pessimistic</b> | 68.3                  | 4.4                     | 35.3                      | 20.3                       | 409.1      | 417.5              | 954.9  |

## Projected poverty headcount in 2030 by country income category

---

## Projected poverty headcount by 2030 in fragile and non-fragile states

---

\$0.70/day baseline

\$1.25/day baseline

 Fragile  
 Non-fragile

## Definitions of poverty dynamics

---

- **Chronic poverty:** extreme poverty that persists over years or a lifetime, and that is often transmitted intergenerationally. The extreme and severe poor are also usually chronically poor.
- **Impoverishment:** descent into extreme poverty.
- **Sustained escapes from extreme poverty:** staying out of poverty and progressing towards a higher threshold (such as \$2 per person per day).

# Poverty transitions - escapes and descents into poverty

# What happens to households which escape extreme poverty?

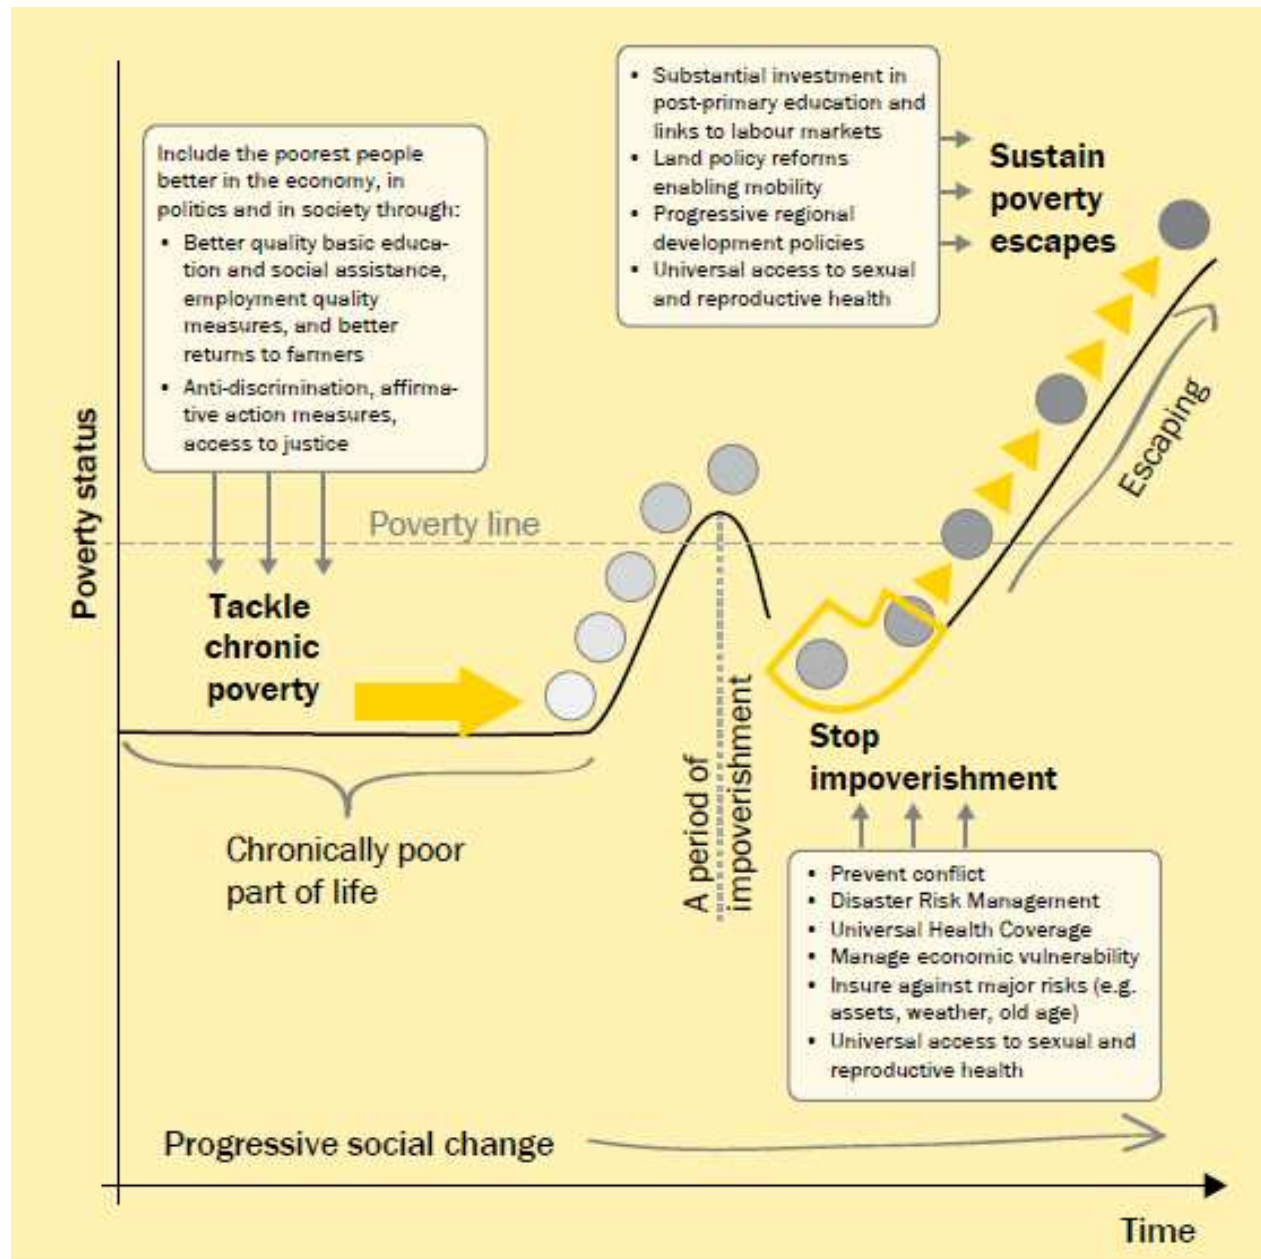

# Challenge 1: thinking in terms of poverty dynamics

---

## Challenge 2: policies to address poverty dynamics

## Policies for all poverty dynamics

---

- Social assistance
- Education
- Universal health coverage
- Pro-poorest growth

## Challenge 3: achieving pro-poorest growth

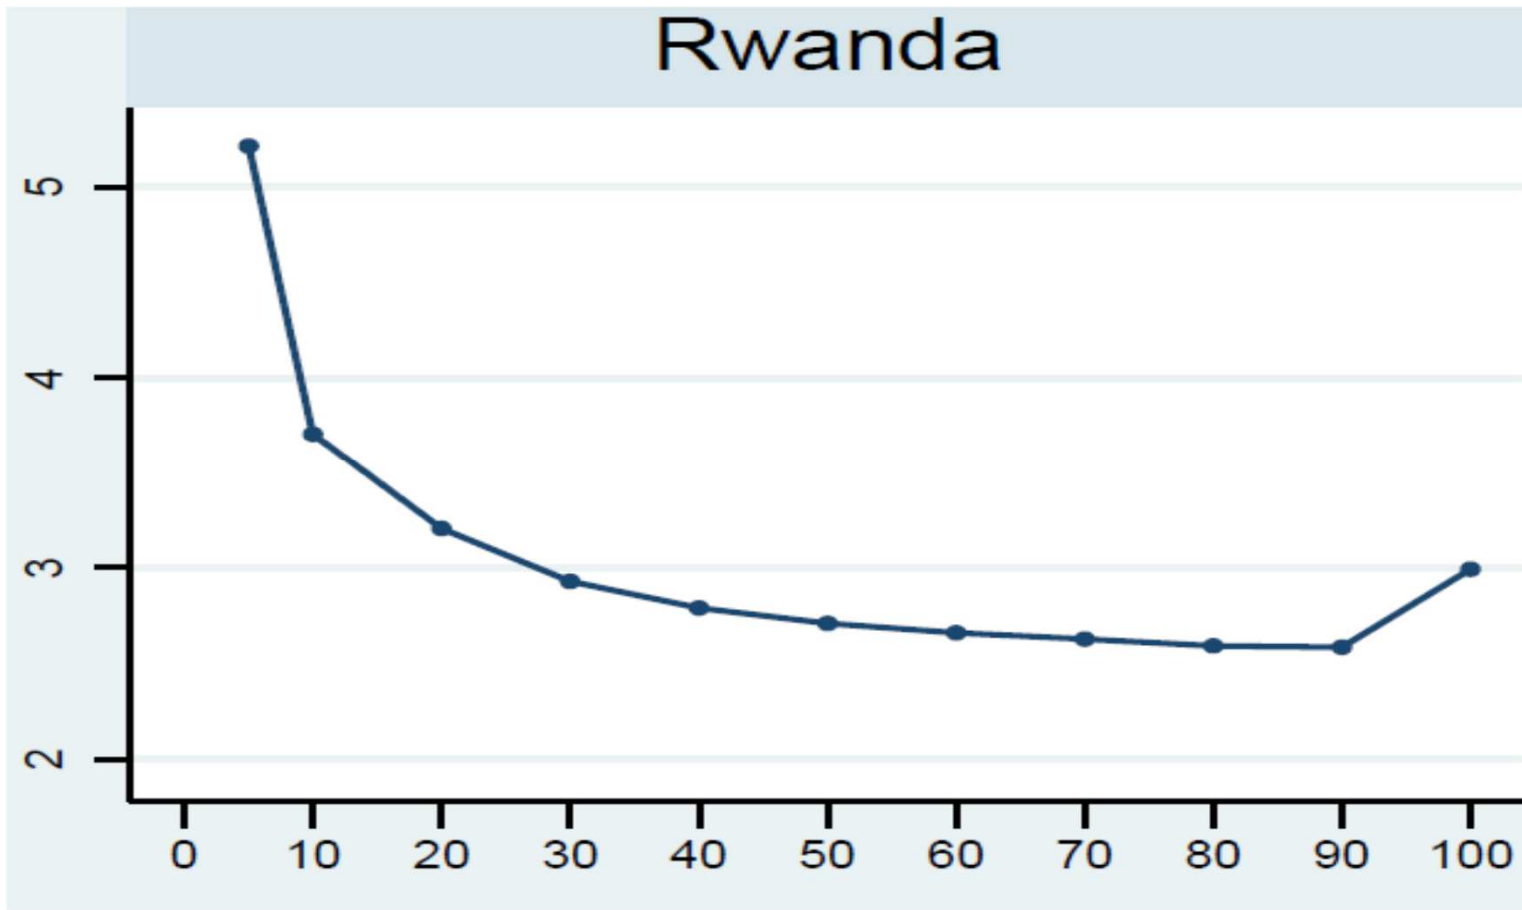

---

- Growth whereby the incomes of the poorest people (bottom 5, 10 and 20% of the distribution) grow more rapidly, or at least as rapidly, than the average income.
- The poorest people have not gained much in absolute terms even in contexts of economic growth and poverty reduction
- Growth Incidence Curves

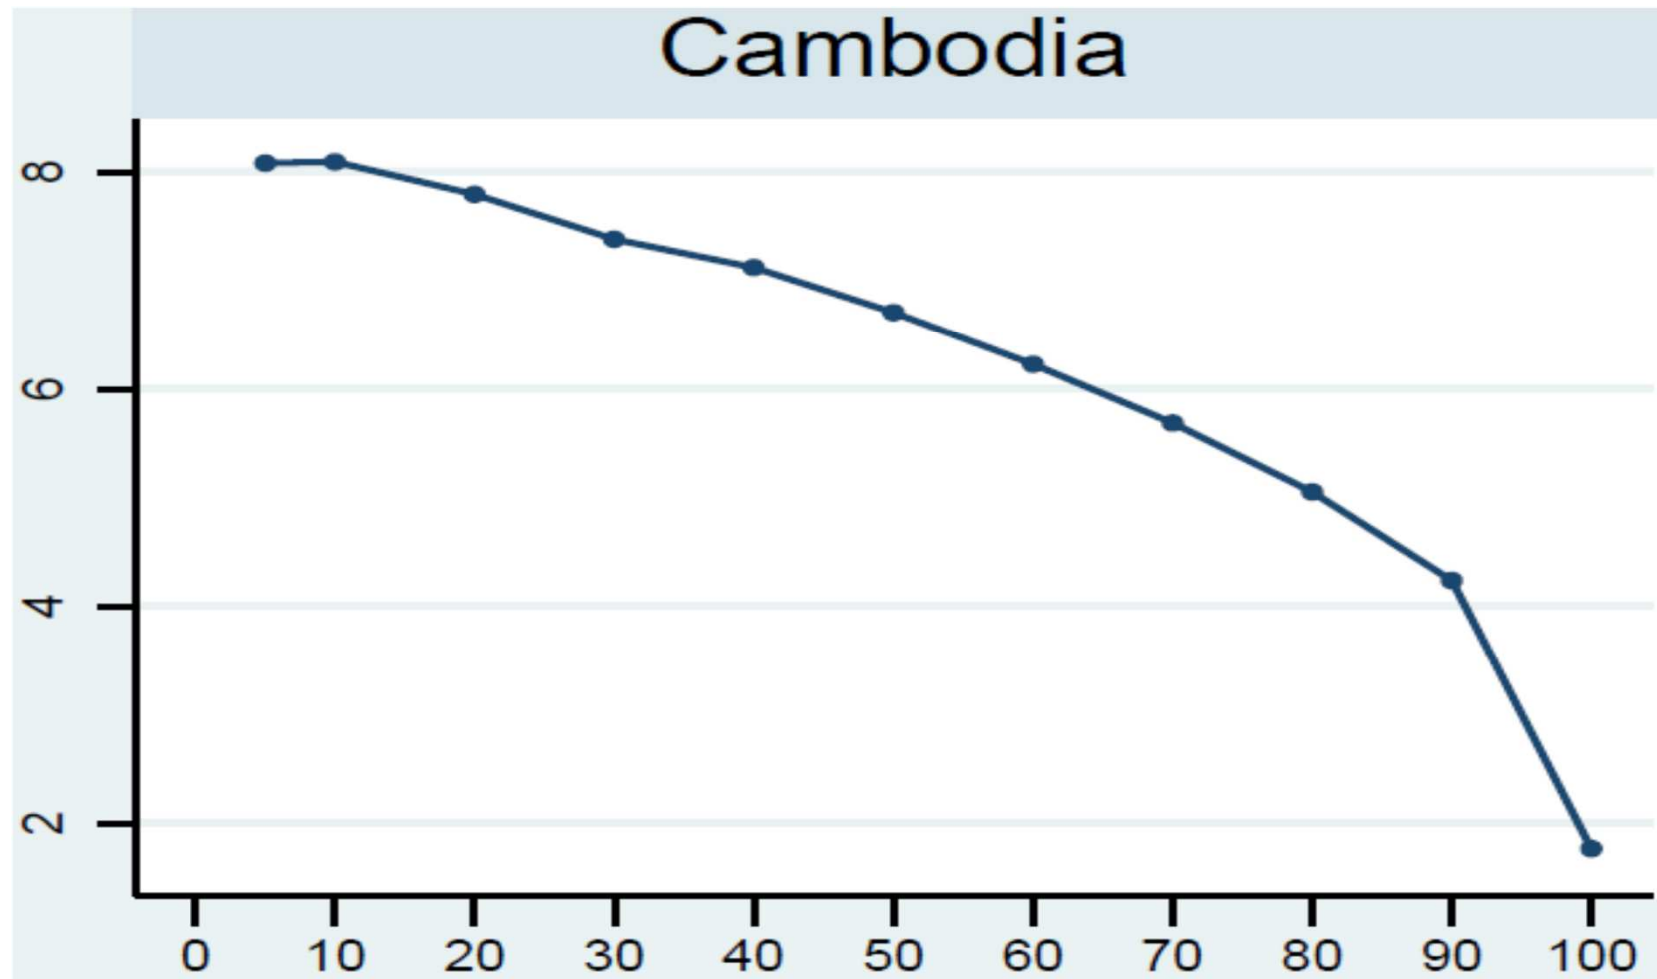

## GIC for Rwanda (2000-2011; rescaled annualised data)

---

## GIC for Cambodia (2004-2009; rescaled annualised data)

## GIC for Lao PDR (2002-2008; rescaled annualised data)

---

## GIC for Mozambique (2003-2009; rescaled annualised data)

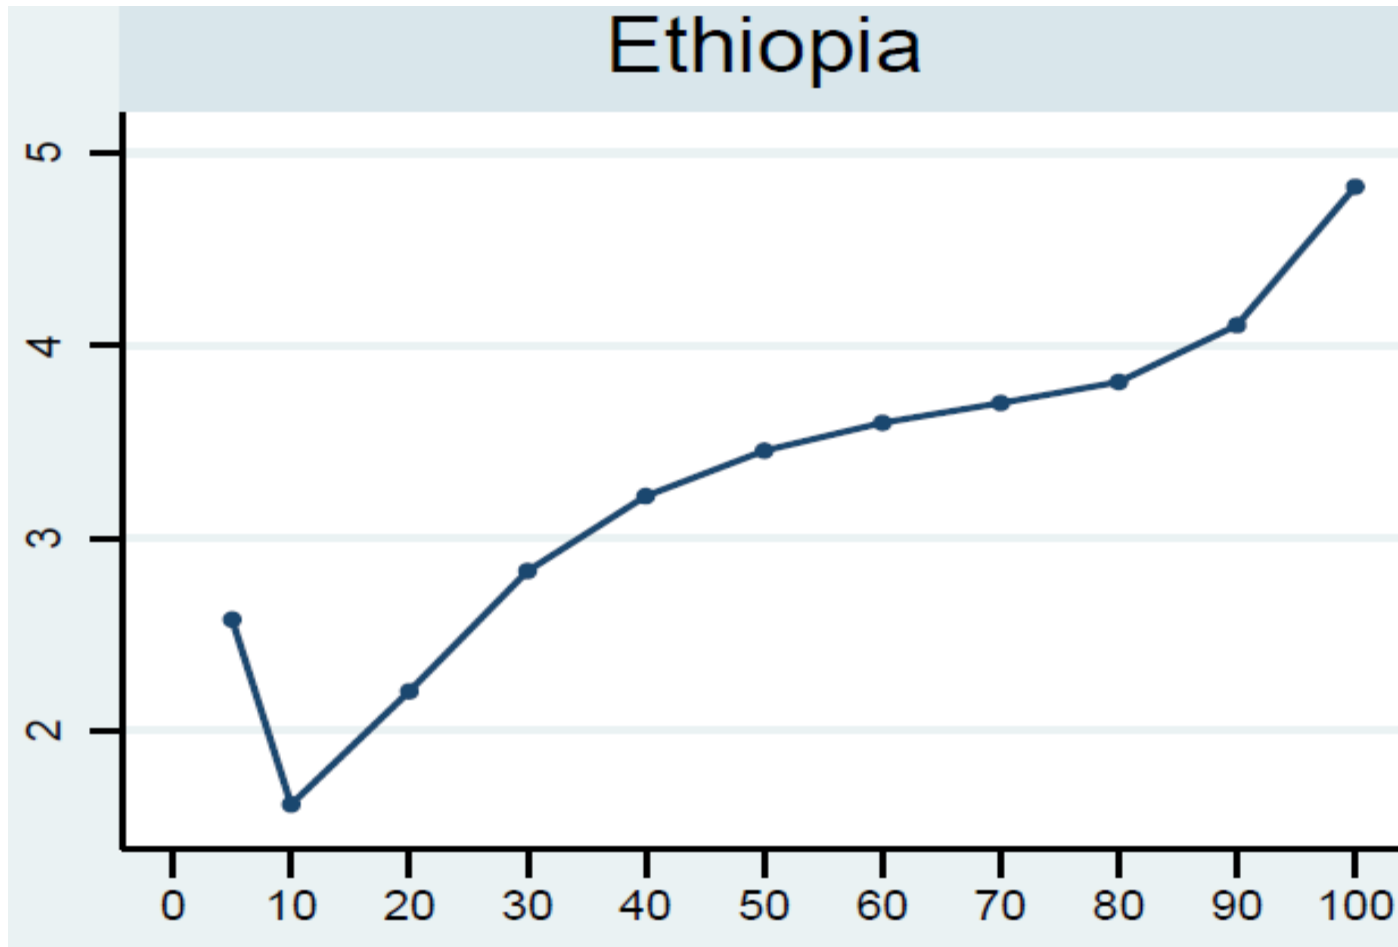

---

## GIC for Ethiopia (2000-2011; rescaled annualised data)

---

## What is inside the ‘black box’ of pro-poorest growth?

---

- Macroeconomic policies
- Sectoral policies to trigger structural transformation
- Investment in agriculture, infrastructure and education
- Creation of decent work
- ....?

## Critical policy areas to create decent work for the poor: lessons from CPAN's policy guide

---

- Include informal sector in policy making and improve data collection on informal wage employment
- Labour market policies that recognise and protect the informal, casual workforce
- Promote the collective representation of chronically poor informal wage workers
- Support to internal work migrants
