

## CASE STUDY OF A SUCCESSFUL NATIONAL ATMOSPHERE/AIR POLLUTION PROGRAMME/STRATEGY

1. The problem or issue addressed:

2. Name of the programme: [Air Quality Monitoring Programme](#)

3. Timeframe: Unlimited years                      Year started: 1986

4. Status:  Ongoing       Completed in year \_\_\_\_\_

5. Main objectives:

- [Monitoring of atmospheric pollutant at different number of geographical locations in Kingdom of Bahrain.](#)
- [Generate daily, weekly, monthly and annually ambient air quality reports](#)
- [To utilize the gathered data in researches, transportation planning, development](#)
- [Evaluation of strategies Evaluation of seasonal and geographical trends in ambient air quality.](#)
- [Distinguish environmental and health aspects of air pollution](#)

6. Lead institution: [Monitoring Section of DEAP](#)

7. Other implementation arrangements and stakeholders involved (public, private, NGOs, CBOs, international support, etc.): [None](#)

8. The results achieved (if possible, please address the social, economic and environmental impacts of the programme): [Issuing of air quality reports and assessing the some Projects](#)

1. The relationship of the programme to internationally agreed goals and targets:

[Meet the goals of most environmental Monitoring Programmes](#)

Note: Kindly provide any appropriate facts, figures or charts that document the problem addressed and the results achieved. Noteworthy case studies may be published and/or summarized in UN publications as a means of sharing information on best practices.

[Air Quality Reports are available on hardcopy, electronic copy and website](#)
