- Adriatic sensitive area
- To count river diversity
- National park institution
- A marine natural park institution
- Establish a network sea monitoring
- Protection of animals (ex. White eagle)
- Fishing control
- Reduce power of city light for birds protection
- Use of local tv for watching and counting the birds species
- Creation of National parks or protected areas to preserve the rare species of animals

3. Climate change and air quality

- To study the effects of sea water level on the coast line
- 24 hours monitoring
- Save energy
- Financial support for solar energy
- Restrict use of cars
- Reduce the use of energy generators (Albania)

4. Land use patterns

Stop the edification

% for residence

Introduce long term planning

Protection of coastal areas – 7m from the coast line no construction

A common law for coast protection

Reactivate the city ground in different purposes

Mapping of land losses from sea level rising

Open city on spaces for public use

5. Local mobility system

Free public transport

Outside city parking

To improve the maritime traffic (“see highways”)

Study air quality

Safe ways for children

Limiting the number of cars

Low cost for the public transport

Improve the connection between the city centre and the districts

Promote use of bikes and build cycle lanes

6. Waste management

No Italian waste for incinerator in Albania

Special services for hotels

New recycling centre

Sustainable public procurement

PC Recycling

Recycling yards over the city

7. Availability of local spaces and services

Gestione fortificazioni della città di Venezia (Venice City Forts management)

Create walking areas specially connected with a neighbour areas

8. Population, education, safety

Liberalization of migration flow in area (Elimination of existing borders)

Safe streets for children

Crossborder School networks (ex.Uniadrion)

Establish child help services

Life long learning

9. Contacts and relationship

Rapporto tra le regioni adriatiche – transfrontaliero (Cross-border relationships in the Adriatic region)

Public information

Development of different tourist visits

Development of different activities (sport, etc.)

Elimination of border lines

Small speed ship services

10. Employment and enterprises

Piano di bonifica dei siti inquinati

Piano di bonifica delle coste

Tecnical parks, incubators

Use technical solution in logistic

Support SMS growth and women enterprises

Support new technology and services

Creation of video games for children on Aap activities (ex.sea protection, flora, fauna)

Tourist souvenirs to remind about clean water, air..

Development of national products

Support of organic farming in Adriatic Region

Make a fisibility study for sea highways
