

1st Brainstorming (Venice, 18 september 2004)

# ENVIRONMENTAL Actions

## Introduction

Setting an independent Authority to collect and monitoring environmental data (with external certification)

Environmental laws standardization

Environmental management systems for port areas

Environmental communication plan

## 1. Water

Treatment for used water (industrial, civil, etc.)

Eliminazione fonti d'inquinamento della falda

Reuse for used water in agriculture

Separated systems for drinkable/not water

## 2. Biodiversity

Coastal habitat protection (communication, management, fruizione regolamentata)

Monitoring of the environmental management

Monitoring of the fish species in the Adriatic sea (bioindicator)

Fish systems check (kind, species, period, tools)

Protection of others animal species

## 3. Climate change and air quality

Building stocks: insert bioarchitecture standards in the new building and in the rebuild ones

Industry: as previous

Orienting enterprises towards EMAS certification

#### **4. Land use patterns**

- Planification rule's application (in Italy VAS), Regulator Plans
- Stop building waterproof areas
- Reuse/rebuild existing buildings

#### **5. Local mobility system**

- Increasing of bike roads and pedestrian areas
- Public transport more ecologic, economic and efficient (dedicated ways to public transport)
- Goods distribution plan

#### **6. Waste management**

- Reduce the productions of waste and packaging
- Support the separated collection of waste and the home-made composting
- More education and communication
- More control (sanctions too)

#### **7. Availability of local spaces and services**

#### **8. Population, education, safety**

- Communication plan
- Improve the reuse of existing buildings

#### **9. Contacts and relationship**

#### **10. Employment and enterprises**
