REEEP - the Renewable Energy and Energy Efficiency Partnership is an international NGO registered in Austria

1. REEEP currently comprises more than 200 partners representing 35 governments, businesses and NGOs committed to accelerating the uptake of renewable energy and energy efficiency.
2. REEEP is currently funded by the EU and 11 governments: Austria, Australia, Canada, Germany, Ireland, Italy, the Netherlands, Norway, Spain, US, and UK, the major donor of REEEP

REEEP's vision is to make energy systems sustainable

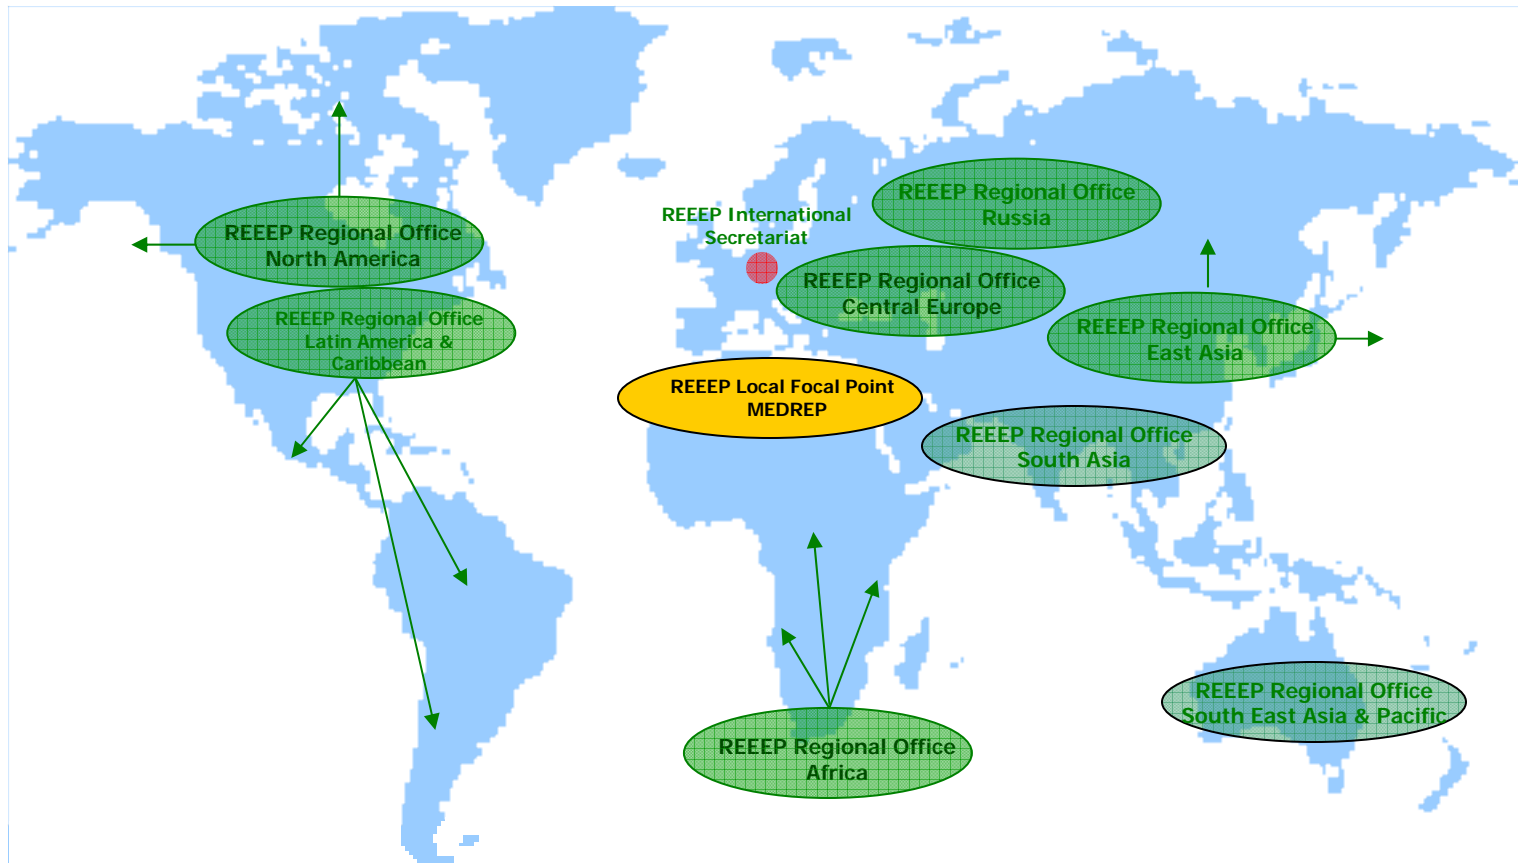

1. REEEP aims to reduce market barriers and financial obstacles for renewables and energy efficiency and so facilitate technology transfer
2. REEEP believes in action on the ground via project activities that are targeted on policy improvements and innovative finance mechanisms
3. REEEP focuses on emerging markets and developing countries and contributes to improving access to reliable energy for the poor

The 50 REEEP projects encourage local initiatives in 40 countries

Currently 50 projects

- Locations – 40 countries
- Some projects – multiple countries

The Sustainable Energy Regulation Network (SERN)

- SERN is an initiative supported by REEEP
- SERN is lead by the Center for Management under Regulation, University of Warwick, UK.
- Network for those involved in energy market and regulation: regulators, government departments, consultants, researchers
- Currently work with associations of regulators in Africa, India and Eastern countries

partnership

SERN aims

Facilitate information exchange between regulators and others in order to:

- Secure greater understanding of the benefits of energy efficiency, renewable energy and distributed generation amongst energy regulators and government departments
- Secure regulatory mechanisms that promote sustainable energy

renewable
energy
& energy
efficiency
partnership

SERN activities

1. Dissemination of good practice guides & case studies
2. Webpage/forum and resource bank of documents for regulators
3. SERN newsletter (interviews of regulator, book reviews...)
4. Country Review of Policies and Regulation
first edition covers 30 countries in 2006
second edition covers 60 countries in 2007
5. Capacity building for regulators (training, workshops,...)
6. Support to REEEP funded projects on Policies and Regulation

Partnership REEEP-UNIDO

- Training Manual “Sustainable Energy Regulation and Policy-making for Africa”
- Based on a training package developed by SERN in 2004.
- 20 modules / CD ROM
- Can be used for a course that last few days or few weeks

renewable
energy
& energy
efficiency
partnership

The training package

- Adaptation to the context of African countries
 - Large majority of the population lack access to modern energy services
 - Industry is often inefficient in terms of energy utilization
- Any comments on this training package can be sent to: Marco.Matteini@reeep.org

Introduction to the SERN course

Introduction

- Regulation and distributed generation
- Support mechanisms for renewable energy
- Energy efficiency and demand side management

- All presentations will be available on the SERN page
