

Department of Economic and Social Affairs

Commission on Sustainable Development

Ninth Session

16 – 27 April 2001, New York

**ASSESSMENT OF PROGRESS IN THE IMPLEMENTATION
OF AGENDA 21 AT THE NATIONAL LEVEL:
TABLE OF KEY COORDINATION MECHANISMS AND ACTIONS**

BACKGROUND PAPER NO. 17

Prepared by the
Division for Sustainable Development

CONTENTS

1. Albania	1997	38. Dominican Republic	2000	75. Luxembourg	2000	112. Russian Federation	2000
2. Algeria	1999	39. Ecuador	2000	76. Madagascar	1997	113. Samoa	1999

No.	COUNTRY	KEY NATIONAL COORDINATION MECHANISM(S) FOR AGENDA 21	MEMBERSHIP / COMPOSITION	MANDATE / ROLE	SOME KEY POST-RIO ACTIONS
1.	ALBANIA (1997)	<p>∩ There is no coordinating body for sustainable development as such. The following can be considered: a. Department for Economic Development and Foreign Aid Coordination (DEDAC) and, b. the Committee of Environmental Protection (CEP).</p>	<p>∩ When established, the coordinating body is expected to comprise the following institutions: DEDAC: Committee of Environment Protection; Ministries of: Agriculture and Food; Public Affairs, Territory Regulation and Tourism; Labour and Social Affairs; Education and Sports; Health and Environment; the State Secretary of Local Government; Preservation and Protection of Natural Environment Association; the World Bank Resident Mission; the European Union Delegation and the UNDP Resident Mission.</p> <p>∩ Agencies: General Directorate of Forests; National Water Council; Preservation and Protection of Natural Environment Association; Committee of Science and Technology; Institute of Hygiene and Epidemiology; Hydro-Meteorology; Research Institute of Chemical Technology.</p> <p>∩ Others: There are 10-15 active NGOs concerned with trade, economic development and environment.</p>	<p>∩ To coordinate Sustainable Development issues.</p>	<p>∩ In 1993, the first Law on Environmental Protection was approved. A draft by-law on EIA is under consideration.</p> <p>∩ In 1993, the Rural Development Fund was established and in 1994 it was transformed into the Albanian Development Fund. It cooperates with IDA-financed Urban Works and Micro-enterprise Pilot Project. A small-scale credit delivery mechanism has been established.</p> <p>∩ In 1993, a Law on Plant Protection Service was passed and soil contamination through pesticides and fertilisers has decreased since.</p> <p>∩ In 1994, the Committee on Environmental Protection established Regional Environmental Agencies.</p> <p>∩ In 1994, a ministerial decision banned a list of hazardous materials from import.</p> <p>∩ In 1994, the National Environmental Action Plan was approved including plans for sewage treatment, urban waste, deforestation, etc.</p> <p>∩ The Training, Employment and Enterprise Fund has been set up to provide funding for job training and the development of small enterprises.</p> <p>∩ A programme to privatise and consolidate land ownership, promote effective land management and develop an efficient land market is underway.</p> <p>∩ A National Water Strategy is being prepared.</p>
2.	ALGERIA (1999)	<p>∩ High Council on Environment and Sustainable Development.</p>	<p>∩ Ministers in charge of: Environment; National Defence; Foreign Affairs; Local Municipalities; Finance; Agriculture; Industry; Energy; Hydraulic; Public Health; Higher Education and Scientific Research.</p> <p>∩ Six personalities including NGOs representatives; various NGOs are represented in two permanent commissions of the High Council on Environment and Sustainable Development.</p>	<p>∩ To enact national strategies to protect the environment and to promote sustainable development.</p> <p>∩ To monitor the changes in the state of the environment.</p> <p>∩ To assess regularly the implementation of legislation and regulations regarding environmental protection and adopt corresponding measures.</p> <p>∩ To follow-up on the evolution of international policy related to the environment and recommend to the corresponding national entities the study of related international decisions.</p> <p>∩ To decide on the ecological problems as presented by the Minister in charge of the Environment.</p> <p>∩ To present annually to the President a report on the state of the environment and an evaluation regarding the implementation of its decisions.</p>	<p>∩ Since Rio, many activities have taken place in the following areas, among others:</p> <ul style="list-style-type: none"> - To combat poverty. - To control demographic dynamics: significant decrease of the demographic index has been registered. - To ensure the protection and promotion of health. - To improve on human settlement issues by providing the communities with a Land Management Plan. - To integrate environment into decision-making through: <ol style="list-style-type: none"> 1. Creation of a State Secretariat for Environment and a Directorate-General; 2. Inspection of the environment in the 48 Wilayate of the country; 3. Creation of a communal bureau for environment and hygiene; 4. Creation of the High Council for Environment and Sustainable Development, presided by the Chief of the Government; 5. Creation of a consultative National Economic and Social Council which gives recommendations on all economic and social matters; 6. Reinforcement of regulatory mechanisms, effective implementation of EIA; 7. The participation of the National Fund for the Environment and the establishment of certain taxes (taxes on pollution activities, clean up taxes, water treatment taxes) constitute instruments which influence decision-making.

No.	COUNTRY	KEY NATIONAL COORDINATION MECHANISM(S) FOR AGENDA 21	MEMBERSHIP / COMPOSITION	MANDATE / ROLE	SOME KEY POST-RIO ACTIONS
3.	ANTIGUA AND BARBUDA (2001)	<ul style="list-style-type: none"> • Ministry of Tourism and Environment 	<p>• Ministries and Government Agencies, as follows: Central Board of Health; Government Statistics Unit; Antigua Public Utilities Authority; and Development Control Authority.</p>	<p>• To administer a centralized national policy for sustainable development.</p>	<p>• Foreign direct investment projects must be preceded by an environmental impact assessment.</p> <p>• In order to protect and conserve biological resources, the Government has adopted a legal framework for protection of endangered species, as well as the system of public awareness campaigns.</p> <p>• The Development Control Authority (DCA) is responsible for processing and investigating application for land use, and aims at ensuring sustainable approaches to land use.</p> <ul style="list-style-type: none"> • A National Sustainable Development Coordination Body is in the process of being established.
4.	ARGENTINA (2000)	<p>• Ministry of Foreign Affairs, International Trade and Culture.</p> <p>Alternate mechanisms:</p> <ul style="list-style-type: none"> • The Natural Resources and Sustainable Development Secretariat. • The Ministry of Social Development and Environment. 	<p>Ministries of: Social Development and Environment; Economy; Defence; Education; Interior; Justice and Human Rights; Health; Labour, Employment and, Human Resources; Infrastructure and Housing; and Minister' Cabinet.</p> <ul style="list-style-type: none"> • No information. • No information. 	<ul style="list-style-type: none"> • To coordinate and implement Agenda 21 issues. • No information. • No information. 	<p>• UNCED had a direct impact in the reform of the National Constitution of 1994. The National Constitution of 1994, in its art.41, establishes, among others, that: "All inhabitants have the right to a healthy, balanced and adequate environment for human development, and that current production activities should satisfy the needs of present generations without jeopardising those of future generations".</p> <p>• Since 1994, the Federal Council on Environment (COFEMA, coordinated by the SRNyDS) and the Environmental Federal Pact is the coordination instrument which executes decisions taken in this field.</p> <p>• Among the many activities to implement Agenda 21 are:</p> <ul style="list-style-type: none"> - To formulate intersectoral strategies related to alternative strategies for recuperating degraded areas; - To incorporate land management, especially desertification issues, in a national integrated strategy for sustainable development; - To improve the environmental quality of human settlements; - To recuperate, preserve and promote native forests based on the National Forestry Development Plan; - To promote instruments to protect/measure the impact of human activities on the environment, eg. EIAs. <p>• In order to integrate environmental issues with social, economic and institutional issues, the SRNyDS has elaborated a project decree, which creates the National Council on Sustainable Development and in which all ministries and state secretariats participate.</p>

9.	BAHRAIN (1999)	<p>∩ There is no coordinating mechanism as such. The Ministry of Housing, Municipalities and Environmental Affairs is the contact point for Agenda 21 related activities.</p>	<p>∩ Ministries of: Health; Commerce and Agriculture; Water Resources; Central Municipal Council; Finance and National Economy; Development and Industry; Information; Education and the Bahrain Centre for Studies and Research (BCSR). ∩ Major companies; Bahrain University; Arabian Gulf University; Professional Societies; Women Societies and Clubs.</p>	<ul style="list-style-type: none"> • No information. 	<p>∩ In 1993, a National Contingency Plan on oil spillage was enforced. ∩ In 1996, the Amiri decree-law No.21 was enacted with the establishment of an Environmental Affairs Agency (EA), under the Ministry of Housing, Municipalities and Environment. This Law aims to protect the environment from the polluting sources and factors, and put an end to its deterioration by drawing up the required plans and policies to preserve it from harmful effects. ∩ While the EA seriously considers the introduction of the Environmental Management and ISO 14000 as future target, many industries have been awarded ISO 9000 series certification showing their commitments for achieving quality production. ∩ Agricultural development has adopted a policy on the use of agricultural chemicals (fertilizers and pesticides) that is governed by the international regulations on the safe use depending on their chemical, natural and biological properties to curb environmental pollution and control its impact. ∩ There is a joint effort to implement an action plan to reduce car emissions and introduce unleaded petrol. ∩ The EA has initiated a monitoring programme with an ultimate goal to establish sound management of effluent discharge into the marine environment.</p>
10.	BANGLADESH (1997)	<p>∩ National Environment Committee.</p>	<p>∩ Chairperson: Prime Minister; Ministries of: Agriculture; Water Resources; Finance; Industry; Power; Energy and Mineral Resources; Education; Environment and Forest; Planning; Local Government & Rural Development and Planning Commission. ∩ All Universities; Forest Department; Department of Environment; NGO Affairs Bureau; Space Research and Remote Sensing Organization (SPARRSO); Department of Weather. ∩ Association of Development Agencies in Bangladesh (ADAB); Federation for Bangladesh Chamber of Commerce and Industries; Federation of Union of Journalists; Environment Reporters Forum; Medical Association; Engineers Institution of Bangladesh; Economic Association; Bangladesh Botanical Society; Zoological Society; Chemist Association.</p>	<p>∩ Review progress of implementation of the National Environmental Policy & Environment related activities. ∩ Consider and provide guidelines for Government of Bangladesh to fulfil obligations under Agenda 21. ∩ Identify problems impeding implementation of the National Environment policy and provide guidelines for solution of those problems.</p>	<p>∩ National Conservation Strategy (NCS) was prepared in line with the World Conservation Strategy. ∩ National Environment Management Action Plan (NEMAP) was prepared. It outlines the country's Action Plan in regards to addressing national environmental issues. ∩ Developed Draft Environmental Quality Standards (EQS) for water, air, noise, sewage, and industrial pollution. ∩ Prepared a National phase out plan of ozone depleting substances. ∩ Passed Environmental Protection Act (1995), for preservation of the Environment.</p>

No.	COUNTRY	KEY NATIONAL COORDINATION MECHANISM(S) FOR AGENDA 21	MEMBERSHIP / COMPOSITION	MANDATE / ROLE	SOME KEY POST-RIO ACTIONS
11.	BARBADOS (2001)	<p>∫ National Commission on Sustainable Development (NCSD).</p>	<p>∫ Chairman: Professor O.Headley, CERMES, University of the West Indies, Barbados.</p> <p>∫ Ministries of: Foreign Affairs; Finance & Economic Affairs; Education & Youth Affairs; Tourism; Agriculture & Rural Development; Environment.</p> <p>∫ Others: Community Development Officer; Town and Country Development Planning Office; National Council for Science and Technology.</p> <p>∫ Para-statal bodies and institutions: Barbados Investment & Development Corporation; Barbados Chamber of Commerce; University of the West Indies; Coalition of Trade Unions.</p> <p>∫ NGOs: Barbados National Trust; Barbados Environmental Association; National Organization of Women; Barbados Christian Council; Small Business Association of Barbados; Future Centre Trust.</p>	<p>∫ To advise Government on measures required integrating environment and economic considerations in decision-making processes and on global issues of sustainable development.</p> <p>∫ To facilitate national level coordination mechanisms on sustainable development.</p> <p>∫ To promote greater understanding and public awareness of the cultural, social, economic and policy approaches in order to attain sustainable development in Barbados.</p>	<p>∫ Since 1992, there has been progress in introducing unleaded gas for vehicles, and there is a programme for the phase-out of the use of leaded gasoline by the year 2004.</p> <p>∫ For the period 1993-2000, a National Development Plan sets out development policies.</p> <p>∫ Since 1993, Barbados has been executing an Integrated Solid Waste Management Programme.</p> <p>∫ The 1994 solid waste management plan has addressed the issue of consumption and production patterns and identified possibilities of waste reduction at the national level.</p> <p>∫ Steps have been taken to reduce energy consumption. For example, tax rebates are given for the introduction of solar water heaters.</p> <p>∫ Eco-labelling has started but is still rare and has been influenced by export requirements.</p> <p>∫ A formal policy for EIA is being developed.</p> <p>∫ There is a national goal to phase out CFCs and other ozone depleting substances by the year 2005.</p> <p>∫ Currently, issues of legislation and safety guidelines to cover the imputation, transportation, storage, use and disposal of toxic chemicals and their wastes are being drafted. Legislation is to be enacted January 1998 at the earliest.</p> <p>∫ The Environment Division of the Ministry of Health and the Environment, along with the Barbados National Standard Institute (BNSI) are actively promoting the incorporation of the ISO 14000 environment management systems.</p> <p>∫ Barbados is planning a national policy on oceans and an integrated coastal area management programme, which will be integrated into a National Sustainable Development Plan.</p> <p>∫ A “green” approach is being established in the industrial sector through the Code of Conduct.</p> <p>∫ The Government has established a Sewerage and Solid Waste Project Unit.</p> <p>∫ A Draft Coastal Zone Management legislation was developed in 1997.</p> <p>∫ There are several initiatives to encourage the sustainable development of marine living resources, e.g. creation of protected areas and marine reserves, coastal zone management phase I.</p> <p>∫ There is a National Tourism Policy.</p>

16.	BOLIVIA (2000)	<ul style="list-style-type: none"> • National Council on Sustainable Development or NCSD. 	<ul style="list-style-type: none"> • Ministries and agencies: the Executive Committee (EC) of the NCSD is attended by the Minister of Sustainable Development, as chairman of the Council, the Vice-Ministers of: Environment and Natural Resources; Industry and Internal Trade; Rural Development and, a representative of the Vice-Minister of Investment and Foreign Cooperation (usually the Director of Foreign Cooperation). These are representative of most of the remaining ministries at the General Assembly of the NCSD. • Para-statal bodies and institutions: Also, as members of the EC of the NCSD are: the Coordinator of the Environmental Task Group of the cooperation agencies in Bolivia; a representative of the Private Enterprise Confederation; and, a representative of the university system. There are representatives of trade unions, industry and commerce chambers, peasants, women and youth organisations at the General Assembly of the NCSD. • NGO's: There is a representative of the NGOs at the EC and four representatives in the General Assembly of the NCSD. 	<ul style="list-style-type: none"> • The NCSD has, as its main objective, the coordination of strategic positions between the Government, civil society organisations and international cooperation organisms in Bolivia, regarding politic guidelines and programs in sustainable development. 	<ul style="list-style-type: none"> ∩ In 1992, Policy/legislation was reviewed to address Sustainable Mountain Development. ∩ In 1993, the reorganization of the Executive Branch was one of the most important steps to promote the implementation of Agenda 21. The Supreme Decree 23660 of 12 October 1993 consolidated the Law of Ministries of the Executive Branch. The establishment of the Ministry for Sustainable Development and Environment and its integration into governmental structures will enable the Government to implement the decisions made in Rio on a long-term basis. ∩ In 1993, the General Plan for Economic and Social Development (PGDES), and the corresponding Departmental Plans for Social and Economic Development (PDDDES) made up the strategic framework for Bolivia's Agenda 21. ∩ In 1993, the National Strategy for Sustainable Development was finalized. It incorporates social participation at all levels. ∩ In August 1993, the Office of Environment Promotion was founded. It is responsible for formal and informal education to raise awareness among the population on desertification issues. ∩ In 1994, Policy/legislation concerning forestry was revised. ∩ In 1994, the Government elaborated a human development programme providing guidelines for social policies. It focuses on integrated and coordinated action in education, culture, health and nutrition, urban development and housing, employment and production, participation and rural development. ∩ In 1996, Bolivia Agenda 21 was finalized. ∩ In the field of deforestation, the following issues have been addressed since Rio: <ul style="list-style-type: none"> - indigenous knowledge of forests; - analysis of existing forest programmes; - geographic information on forests; - multiple roles/values of forests; - environmental impact assessments; - promotion of small-scale forest-based industries; - forest industry efficiency. ∩ The management of chemical products and hazardous wastes is a priority for the country (The Environment Law, art. 29-32, makes provisions). ∩ NGOs participate in the Technical Council for Inter-Institutional Coordination on issues related to the treatment of toxic chemicals and hazardous waste; Major Groups participate at the national planning level in the forestry sector.

62.	IRAQ (1999)	C Planning Commission.	C Ministries of: Health; Labour and Social Affairs; Interior; Housing and Construction. C Para-statal bodies and institutions: Environmental Protection and Improvement; Regional and Rural Planning Centre; National Human Settlements Commission. C NGOs: General Federation of Iraqi Women; Iraqi Economists Society.	C To plan, co-ordinate and follow up.	C The National Strategy for Sustainable Tourism takes into account eco-tourism and natural-based tourism.
63.	IRELAND (1999)	C Comhar - the National Sustainable Development Partnership. C Environmental Policy Section, Department of the Environment and Local Government.	C In process. C In process.	C To advance the national agenda for sustainable development. C To evaluate progress in this regard. C To assist in devising suitable mechanisms and advising on their implementation. C To contribute to the formation of a national consensus in this regard. C The Department of the Environment (Environment Policy Section) has lead responsibility nationally for the implementation of Agenda 21. Reflecting Ireland's widely based approach towards the promotion and achievement of sustainable development, the Department's role over recent years has been to secure better regulation, monitoring and information systems through the establishment and build-up of the Environmental Protection Agency; to complete a modern environmental legislative code; to improve arrangements for public participation in planning and development control; to encourage the integration of environmental considerations in the policies and work of other Government Departments; and to promote environmental information and develop partnerships with NGOs. C While new structures have not been developed specifically to coordinate Agenda 21 actions, arrangements to monitor and review the implementation of sustainable development policies nationally will be formalised in the context of the National Sustainable Development Strategy.	C In May 1994, integrated pollution control licensing of activities which pose a high risk of pollution was launched. C In October 1994, a Green Network of Government Departments was published. C Ireland has an Environmental Action Programme which at a national level formulates environmental targets and policy objectives. In December 1994, a Government programme was published which included a commitment to adopt both the "precautionary" and the "polluter pays" principles, as well as integrated environmental protection considerations in all policy areas and at all levels of Government. C In May 1993, Ireland put into law, a Directive 90/313/EEC on freedom of access to information held by public authorities in relation to the environment for all persons. C Enacted in 1996 as the Waste Management Act, Ireland drafted a new Waste Bill which is meant to bring consistency between international and national waste management. C In early 1997, the National Sustainable Development Strategy is expected to be published. C In early 1997, a National Sustainable Development Strategy was published, with objective of providing a cross-sectoral framework for all sectoral plans and programmes related to Sustainable Development, and of identifying future objectives. C In 1997, the document "Sustainable Development: A Strategy for Ireland" identifies Marine resources as a strategic section. A draft policy document on Coastal Zone Management was published for further consultation and discussion. National policy is being developed. C 20 pilot "Tourism and the Environment" projects were initiated in 1998 and will be completed in 1999. C The Irish Tourist Board is responsible for Developing Sustainable Tourism (1994-1999). C A parliamentary committee on sustainable development has been established. C Ireland is currently preparing a National Anti-Poverty Strategy (NAPS). C The Environmental Protection Agency has issued guidelines on the content of Environmental Impact Statements prepared for the EIA process.

64.	ISRAEL (2001)	C The Ministry of Environment.	C Ministries: Ministry of the Environment. • Para-statal bodies: The Jerusalem for Israel Studies; the Hebrew University of Jerusalem. • NGOs: The Heschel Center for Environmental Learning and Leadership; Sustainable Jerusalem; and, Sustainable Development for the Negev (R.A.)	• The mandate is only advisory.	C In 1992, the Ministry of Environment was established. C In 1993, a National Scheme for Afforestation was approved in principle by the National Planning and Building Boards. The plan is being implemented by the Jewish National Fund and designates over 15% of Israel's total land area for the conservation of forest land. C In 1993, the Hazardous Substances Law and the Collection and Disposal of Waste for Recycling Law were passed. C Since 1993, environmentally-safe solid waste disposal in regulated landfill sites has started to gradually replace unregulated and illegal waste disposal. C In 1994, a new programme for the control of air quality was completed. Sixty-three air monitoring systems are currently in use and funds have been allocated to the installation of 24 new systems as well as a national centre for data analysis. C In 1996, an agreement relative to the Coastal Areas Management Programme was signed between the UNEP Mediterranean Action Plan and Israel, constituting a three-year intensive program of coastal zone management. C In 1996, an inter-ministerial and inter-disciplinary committee on bio-safety and biotechnology/gene technology was established including representatives from agencies and universities. C In the agricultural sector, Integrated Pest Management and the use of Bio-organic crops are well advanced, both on a scientific and commercial level.

Plans have been created to limit or ban the use of solvent containing Chlorofluorocarbons, and to phase-out polychlorinated biphenyls.</p> <p>☒ Water networks have been expanded. Public education campaigns for the rationalization of water consumption and the education and instruction of farmers in optimal modern agricultural methods have been conducted. Water pricing has been restructured to increase its cost as its consumption increases. Cultivation of certain crops with high water requirements has been limited.</p> <p>☒ A long-term strategy to guide urban planning has been prepared. Interim boundaries of urban expansion have been identified to reduce pressure of demand on utility networks.</p> <p>☒ A Land Resources Management and Investment Study has been completed. A comprehensive geographical information system is being prepared. Several national parks have been established.</p> <p>☒ A plan for management of coastal areas has been prepared. Agencies are implementing a protocol for protection of the marine environment against pollutants.</p>

SLOVAKIA (2001)	<ul style="list-style-type: none"> • According to Government Resolution, No.655 from 16 Sept. 1997, in 1999 the Council of the Government of the Slovak Republic for Sustainable Development was established by Government Resolution, No.78 from 27 January 1999. 	<p>Ā Chairman: Vice-Prime Minister for Human and Minority Rights and Regional Development. Members: Ministers of relevant sectors and statutory representatives of other central state administration bodies, regional offices, statutory representatives of relevant scientific and social organisations and associations of citizens oriented towards sustainable development.</p> <ul style="list-style-type: none"> • Ministries of: Environment; Economy, Health; Education; Construction and Regional Development; Finance; Interior; Transport, Post and Telecommunications; Soil Management; Labour, Social Affairs and Family; Foreign Affairs; Culture; Defense; Office of Nuclear Control; Office of Statistics; and 8 Regional Offices. <p>Ā Para-statal bodies: Slovak Academy of Science; Faculty of Natural Sciences of the Comenius University; Slovak Technical University.</p> <p>Ā NGOs: Association of the Third Sector (EMVO-3); Association of Industrial Ecology in Slovakia; Confederation of Trade Unions; Association of Municipalities of Slovakia; Union of Municipalities of Slovakia.</p>	<p>The Council for Sustainable Development is a subsidiary and coordinating body of the Government of the Slovak Republic for implementation of principles of sustainable development and Agenda 21 on the national level. The role of the Council is:</p> <ul style="list-style-type: none"> Ā To coordinate activities of the ministries, other central state administration bodies and regional office in the implementation Agenda 21, principles of sustainable development and evaluation of indicators of sustainable development. Ā To assess linkages of strategies, Conceptions and sectoral and regional programmes from the social, economic and environmental points of view. Ā To discuss the conclusions of process of environmental assessment of impacts of basic development conceptions, first of all in the area of energy production, mining, industry, transport, agriculture, forestry and water treatment, waste management and tourism, as well as impacts of spatial planning documentation of large territorial units of selected cities and to comment on their assessment. • To discuss submitted proposals of generally binding regulations, which may have adverse impacts on the environment. Ā To assess the evaluation of indicators of sustainable development, in responsibility of individual sectors and to discuss the Report on Implementation of Agenda 21 in the Slovak Republic. Ā To assist the Government to Implement Agenda 21 and the principles of sustainable development in an international context and in such a way create appropriate conditions for integration of the Slovak Republic into the European and world structures. Ā To coordinate activities of the Slovak Republic related to the UN Commission for Sustainable Development and other UN bodies. 	<ul style="list-style-type: none"> Ā Since 1994, some 32 permanent air pollution monitoring stations have been in operation. Ā Two important environmental regulations are: <ul style="list-style-type: none"> - Act No. 287/1994 on Nature and Landscape Protection of the Legal Codes. - Act No. 127/1994 on Environmental Impact Assessment of the Legal Codes. Ā The Government's short-term objectives for pollution control include the introduction of a ban on halon use, effective as of 1994, and a ban on partially halogenated hydrocarbons, effective in 1996. Ā In February 1995, a free-trade zone between the Slovak Republic and the EU was established. Ā In the declaration No 538/1995, the Slovak government accepted restrictions on the illegal transport of radioactive materials into the Slovak Republic. Ā In 1996, the Act on Chemicals and Chemical Preparations was submitted to the government. The Act was projected to be ratified in 1998. Ā In 1997, the Government approved a National Policy of Environmental Education for schools. Ā Based on the Declaration of the Slovak Government Programme, the Ministry of the Environment committed itself in the document entitled "Strategy, Principles and Priorities of the State Environmental Policy", to establish complete school and extra-curricular systems on environmental education by 1997. Ā The Updated Industrial Policy for the 1998-2005 period supports many scientific and technical projects such as research on biotechnologies. Ā The Slovak Center for Cleaner Production has established a programme of regional projects Enviro-city 21 and Enviro-region 21 to promote an integrated development of cities.

C b) Chair: Convenor; Lord Alexander of Weedon; Sir John Houghton; Dr. Anne McClaren. Ministries: Department of Environment, Transport and Regions. C c) Chair: Sir Richard Southwood and 27 members. Ministries: All Government Departments and Representatives of all major sectors. NGO's: Under review; as at March 1998: Country Landowners Association; NEA; English Nature; National Consumer Council; World Wide Fund for Nature; Council for the Protection of Rural England; Friends of the Earth; Royal Society for the Protection of Birds. C d) Chair: Professor Graham Ashworth. C e) Local Agenda 21 is multi-sectoral; Its process is coordinated and driven by Local Government Management Board under the direction of Local Agenda 21 Steering Group. Local Agenda 21 involves all sectors of the community; the Steering Group reflects this multi-sectoral approach. C f) Chair: Lord De Ramsay; Ministries: Environment Agency; and Department of Environment of Transport and the Regions. C g) No information. </p>	<p> C a) To promote sustainable development within Government and beyond. C b) To provide Government with independent advice on sustainable development, both at home and abroad; identify major problems and opportunities, monitor progress, and consider priorities. C c) To bring together representatives of the key sectors to discuss issues of sustainable development. C d) To develop ideas on getting sustainable development across to the general public, and to organize promotional events. C e) In response to Chapter 28 of Agenda 21, to develop local policies for sustainable development and building partnerships between local authorities and other sectors to implement them. C f) In discharging its functions in the area of environmental protection and enhancement, to make the contribution towards sustainable development that Ministers consider appropriate. In December 1995, Government issued consultation draft of Guidance for the Agency on its contribution to sustainable development. C g) No information. </p>	<p> C In 1992, the Government published its strategic plan "The Health for the Nation" which establishes, for the first time, target areas for improving the nation's health and focuses particularly on preventive action and early intervention. C In July 1993, the Government launched a programme targeted for producers. Industries are given direct incentives to find ways of reducing the waste they generate, having a long-term effect on their consumption of raw materials. C In 1993, the Ministry of Agriculture, Fisheries and Food published the Code of Good Agricultural Practice for the Protection of Soil. C In 1994, a national action plan, "Biodiversity: The UK Action Plan" was published. The plan defines 59 broad targets for forward action and provides a strategy for the next 10 to 20 years. C In 1995, the national legislation on protection of the atmosphere has been reviewed and revised in part since UNCED through the Environment Act. C The Government seeks a 30% improvement in residential energy efficiency through implementation of the Home Energy Conservation Act of 1995. C Relevant national legislation covering agriculture and rural development includes the Agriculture Act 1996. C The Government has developed specific policies to address low-income populations through social security benefits which target resources towards the most vulnerable groups in society. Relevant legislation includes the Social Security Contributions and Benefits Act (1992) which is under continual review. C The UK's national policy on oceans is integrated into a National Strategy. An integrated coastal area management programme has also been implemented. C There is extensive collaboration and consultation with NGOs on a variety of environmental issues through mechanisms such as the UK Round Table. </p>
