Commission on Sustainable Development
Ninth Session
16 – 27 April 2001, New York

FINANCIAL FLOW STATISTICS

BACKGROUND PAPER NO. 19

Prepared by the
Division for Sustainable Development

FINANCIAL FLOW STATISTICS

CONTENTS

	<i>Paragraphs</i>	<i>Page</i>
I. Introduction.....	1 – 4	1
II. Trends in official finance for sustainable development	5 – 9	1
III. FDI flows to major developing country recipients	10 – 15	9
Annex I: Data tables from the OECD Reporting Systems Division	11	
Annex II: Information about the data.....	29	
Annex III: The Creditor Reporting System (CRS)	30	
Annex IV: Development Assistance Committee sectors included in the aggregates for Agenda 21.....	36	

I. INTRODUCTION

1. The purpose of this background paper is to present information on official development finance flows to assist the ongoing efforts of the Commission on Sustainable Development in monitoring the implementation of Agenda 21. In section II, the analysis focuses on changes in the allocation of development finance assistance among the economic, social and environmental components of sustainable development. In section III, the paper presents information on foreign direct investment (FDI) and the largest recipients of FDI among developing countries.
2. In section II, the data on official development finance are from the Reporting Systems Division of the Organisation for Economic Cooperation and Development (OECD), and have been provided at the request of the United Nations Department of Economic and Social Affairs (DESA). The data have been updated through 1999 for both bilateral and multilateral commitments and are organised into three categories: (i) commitments to developing countries (given in Annex I, Tables A1-A6); (ii) commitments to the least developed countries (Tables A7-A12); and (iii) commitments to small island developing States and territories (Tables A13-A18).
3. The information on official development finance to developing countries and to the least developed countries has been organized according to the categories used in Agenda 21, and are presented in the format used in the Report of the Secretary-General on Financial Flow Statistics (E/CN.17/1997/2/Add.31), prepared for the Fifth Session of the Commission in 1997. The information on financial flows to small island developing States is presented by programme area of the Programme of Action for the Sustainable Development of Small Island Developing States. More detailed information about the OECD data and its classification into Agenda 21 categories can be found in Annexes II - IV.
4. In section III, the data on FDI flows to developing countries are from the UNCTAD *World Investment Report 2000*, and the population data are from the United Nations Population Division. The analysis focuses on the distribution of FDI among the major recipients in terms of both concentration among the leading recipients and flows relative to population.

II. TRENDS IN OFFICIAL DEVELOPMENT FINANCE

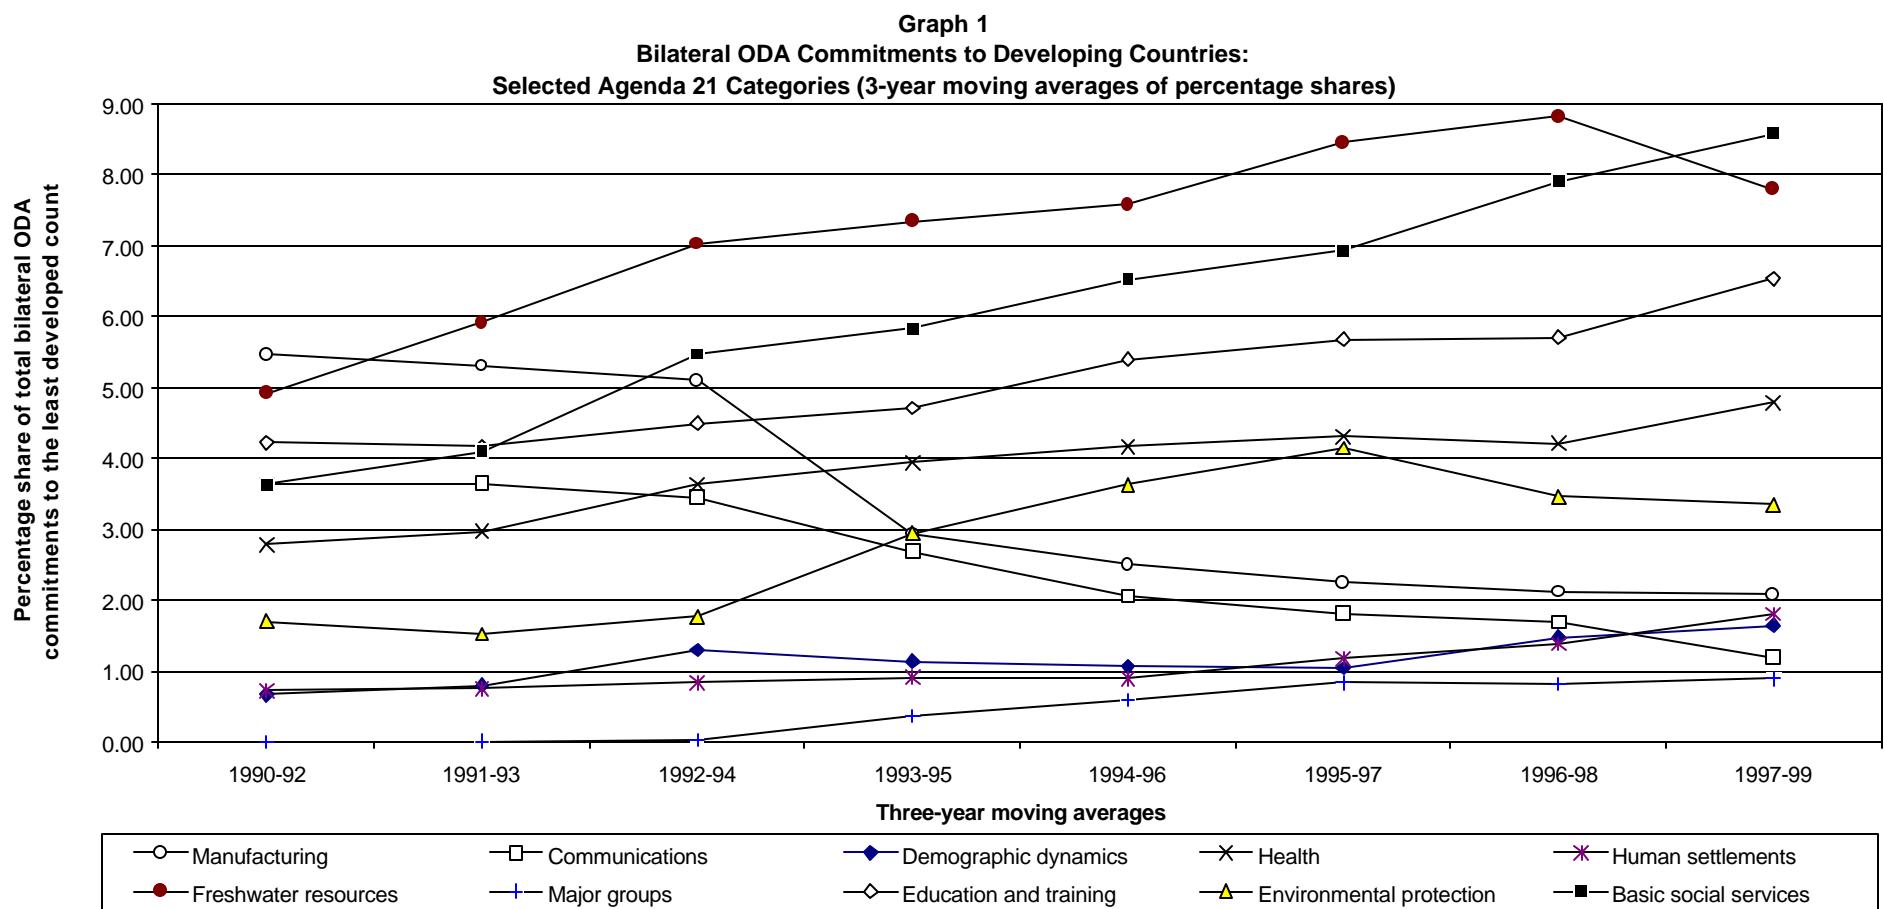

5. As previously noted in the Background Paper on Financial Flow Statistics prepared for the eighth session of the Commission (DESA/DSD/2000/2), there have been some notable changes in the allocation of commitments of official development finance among different categories covered in Agenda 21. These changes have taken place within the context of generally lower levels of Official Development Assistance (ODA) and other official development finance since 1990 and reveal a shifting of priorities in international financial cooperation for development. The shift in priorities can be observed through the changes over time in the percentage share of the total commitments that a particular category receives.
6. Graphs 1-6 show the extent of some of the shifts in priorities based on the data in Tables 1-18, using three-year moving averages to reduce the fluctuations. Graphs 1 and 2 display the trends in percentage shares over the period 1990-1998 of selected Agenda 21 categories for bilateral ODA commitments and multilateral commitments of ODA and loans at non-

concessional terms to all developing countries. Graphs 3 and 4 present the same data for the least developed countries. Graphs 5 and 6 display the percentage shares over time for bilateral and multilateral commitments to small island developing States in terms of selected programme areas of the Programme of Action for the Sustainable Development of Small Island Developing States and for the period 1992-1999.

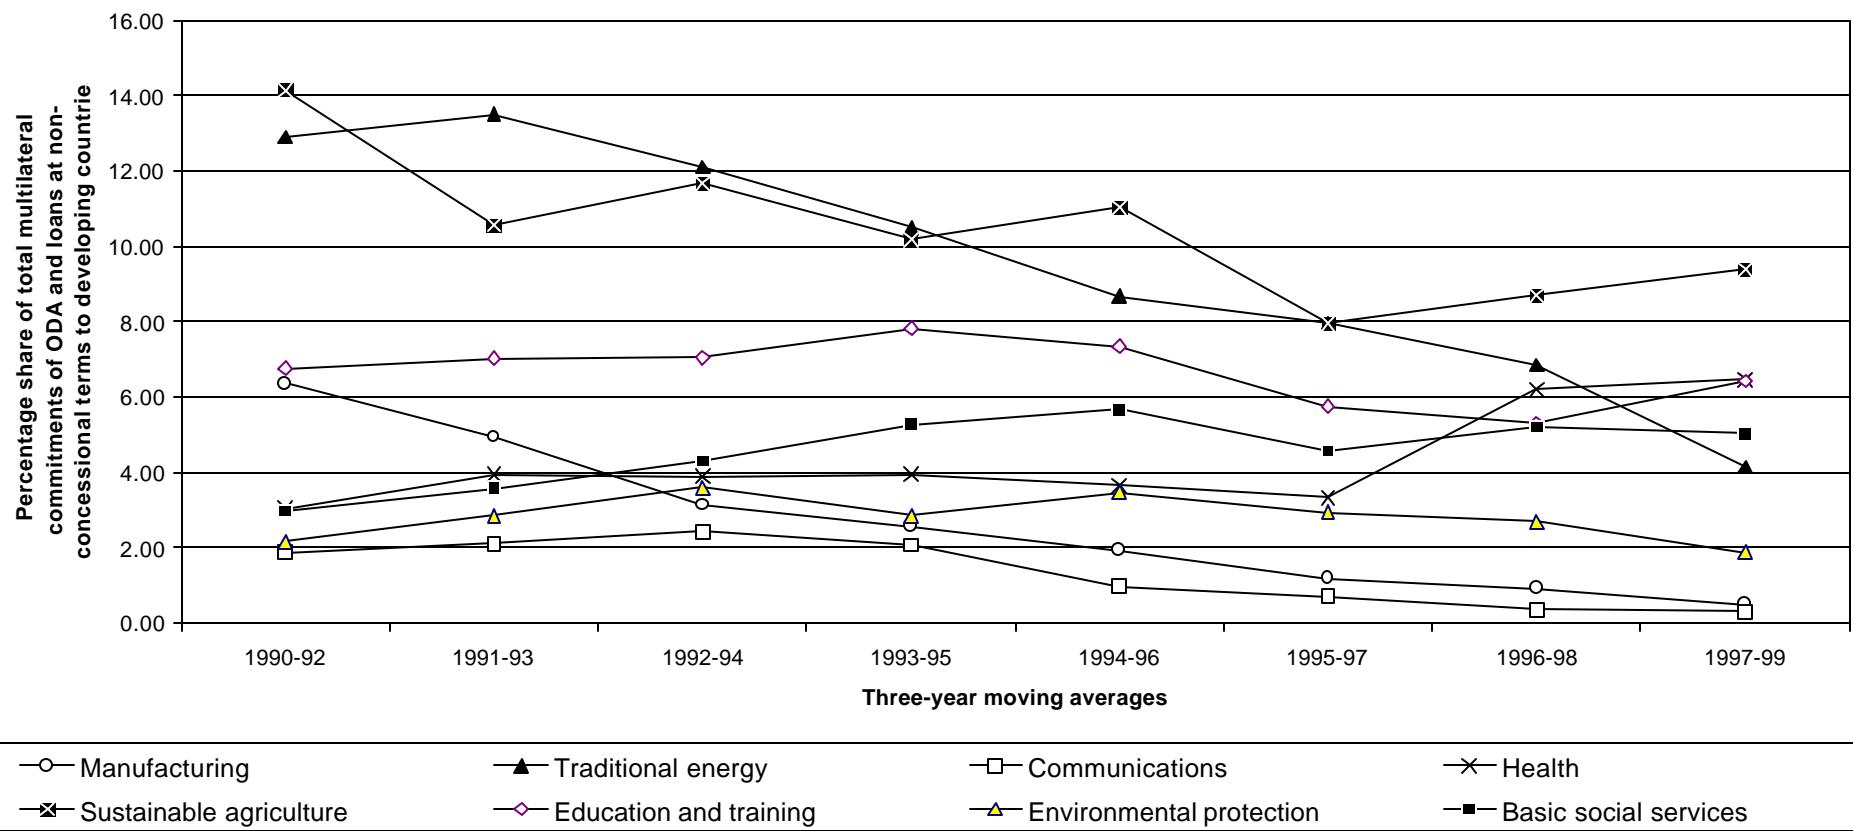

7. Of note are the continued strong increases in the shares of basic social services, education and health in bilateral ODA commitments to developing countries (Graph 1) and to the least developed countries (Graph 3). However, under the category of environmental protection, there is a slight decreasing trend in commitments to developing countries in general and a slight rising trend in commitments to the least developed countries. For multilateral commitments (Graphs 2 and 4) the trends in these areas – basic social services, education, health and environmental protection – appear to be more ambiguous, with the exception of an increasing trend in the shares going to health in developing countries.

8. Two sectors in which there has been a pronounced and continuing decline in shares of bilateral and multilateral commitments to both developing countries and the least developed countries are manufacturing and communications. This is a reflection of the shifting priorities for official development finance to non-market activities and the increasing role of markets and private investment in these two sectors, as reflected in privatizations of previously public sector enterprises in some countries.

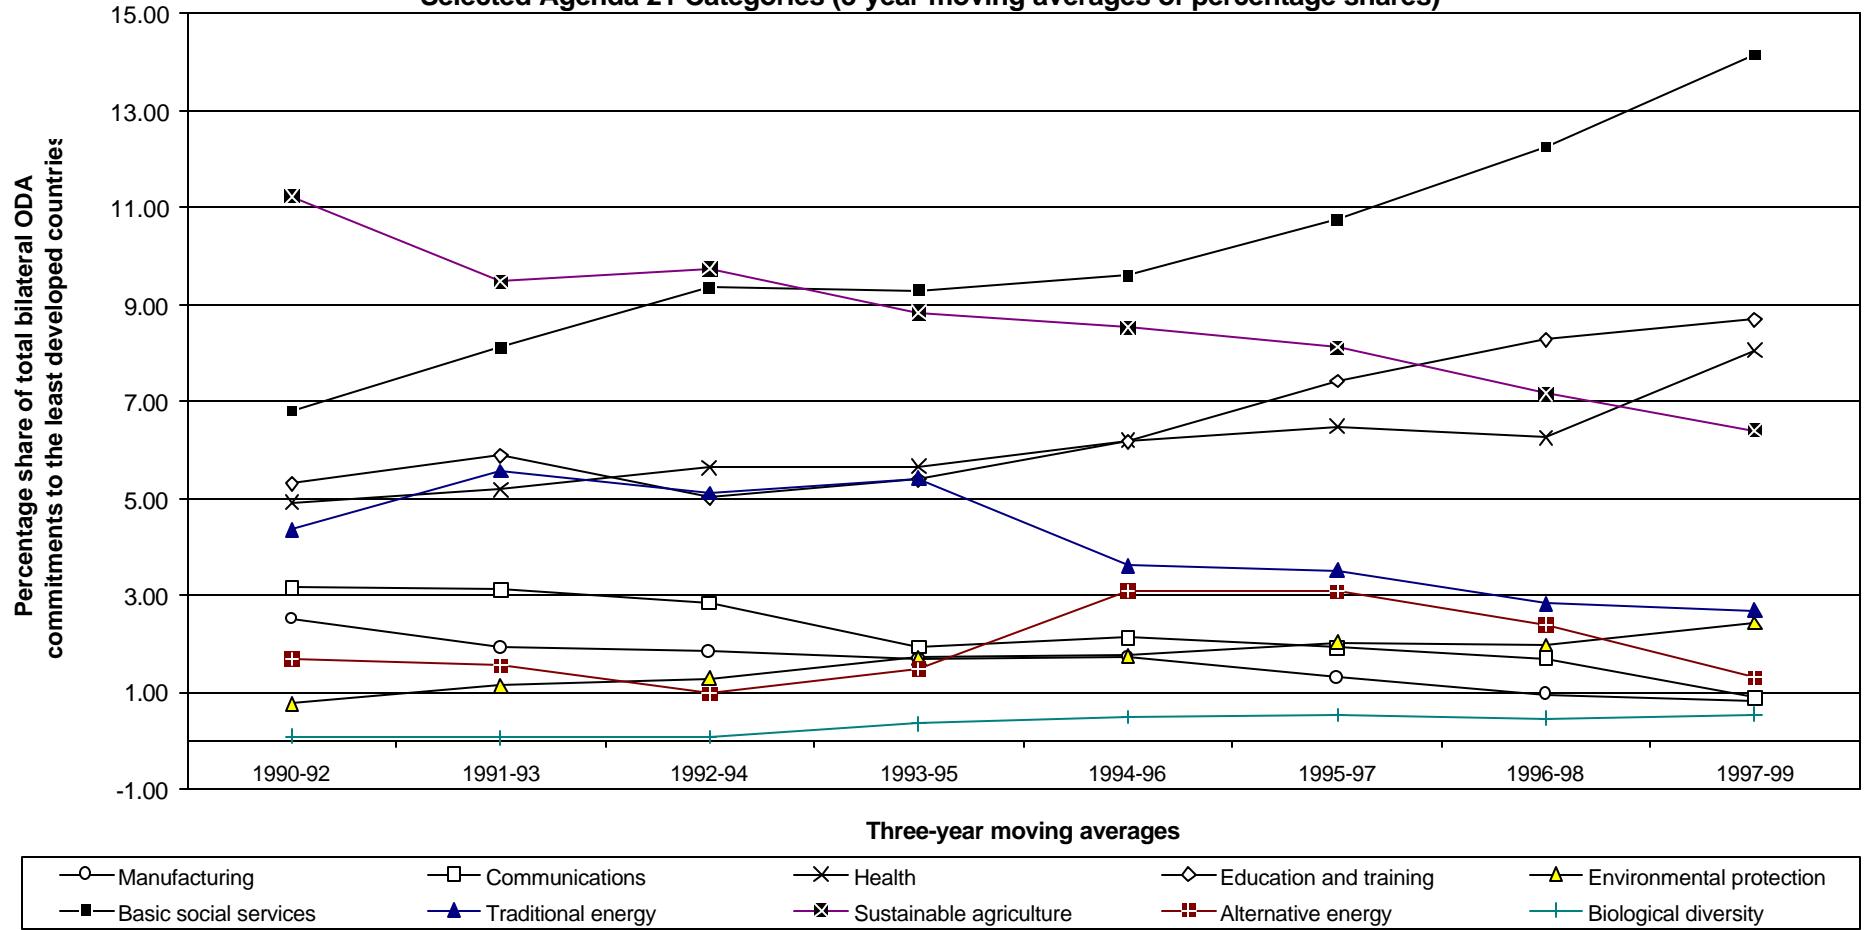

9. With respect to the commitments to small island developing States, bilateral commitments (Graph 5) show continued relatively high shares for general development assistance and human resource development. Multilateral commitments (Graph 6) also show relatively high shares for general development assistance and, after a significant increase earlier in the 1990s, a slight decline in the trend for commitments to transport and communications. Both the bilateral and multilateral shares of commitments to land resources have shown declines during the 1990s.

III. FDI FLOWS TO MAJOR DEVELOPING COUNTRY RECIPIENTS

10. FDI flows to developing countries have increased rapidly during the 1990s. Net FDI flows to developing countries increased from the 1988-93 annual average of \$26 billion to \$137 billion in 1999, a more than five-fold increase in nominal terms.¹ At the same time, total net ODA flows to developing countries declined from \$58 billion in 1990 to \$51 billion in 1999.² As a result, FDI is now a major source of external finance for sustainable development for many developing countries.

11. Table 1, entitled “Largest Net FDI Recipients Among Developing Countries, 1999”, lists the 25 developing countries that received the largest net FDI flows in 1999 in order of the size of the net flows. It also gives the countries’ populations, the net FDI flows per capita, and the cumulative net FDI flows as a percentage of the total net FDI flows for all developing countries

12. As can be seen by the first column, “net FDI flows”, China had by far the largest amount of net flows for 1999, followed by Brazil, Argentina, Mexico and the Republic of Korea. However, when population is taken into account, China had a net FDI flow per capita of \$30, which is below the average net FDI per capita of \$34 for all developing countries. Similarly, while India had the eleventh highest amount of net FDI flows, India had the lowest per capita flows of the twenty-five countries listed. Thus in the case of China and India, there is a concentration of net FDI flows on a country basis but not on a per capita basis.

13. By contrast, Singapore, Argentina and Hong Kong SAR had the highest per capita net flows among the economies listed and were also among the top ten recipients of net FDI flows. This represents a concentration of net FDI flows on both a country and per capita basis.

14. Also of note is a comparison using the two columns on the right of the chart showing cumulative net FDI flows and cumulative population based on the respective net FDI flow and population totals for all developing countries. As can be seen from these columns, 82 per cent of all net FDI flows to developing countries go to the first ten economies listed, which include 37 per cent of the population of all developing countries. In this sense, net FDI flows to developing countries are relatively concentrated – approximately one third of the developing country population received over 80 per cent of net FDI flows.

15. Including the eleventh largest recipient, India, in this analysis reduces the level of concentration. Including India, 83 per cent of net flows go to 58 per cent of the developing country population. This is a more modest concentration of FDI flows.

ANNEX II

INFORMATION ABOUT THE DATA

1. In order to present the commitments to developing countries and to least developed countries according to the Agenda 21 categories, the data was extracted from the purpose codes in the OECD Creditor Reporting System by matching the purpose codes with corresponding chapters of Agenda 21 (see Annex II and III). While every care has been taken to ensure accuracy and consistency during this data extraction process, it is important to recognise that some classifications in this paper do not exactly correspond to the Agenda 21 categories. Moreover, this task has been made more difficult following the revision of the OECD Creditor Reporting System purpose codes in 1996 (see Annex I of *Financial Flow Statistics*, Background Paper No. 17, DESA/DSD/1998/17).
2. A major problem is that several Agenda 21 categories are cross-cutting in nature – that is, activities can take place in more than one, if not all, economic sectors – and a single activity can often address several dimensions of Agenda 21. One such example is the category ‘combating poverty’. Since aid programmes combat poverty in several ways, both directly and indirectly, showing the total of activities in support of ‘social/welfare services’ as the total for combating poverty is meaningless and, taking account of the development partnerships strategy of the Development Assistance Committee (DAC) with its goal for poverty reduction, not advisable. The Agenda 21 category ‘conservation of biological diversity’ is another example: Although the OECD sector classification includes a code titled ‘bio-diversity’, it captures only a small part of aid allocations for that purpose while activities such as sustainable agricultural and farming practices, integrated pest management strategies, combating deforestation or sustainable marine, coastal or inland fishing which contribute to bio-diversity conservation are included in the totals for aid to agriculture, forestry and fishing.
3. Given the data-matching problems outlined above, it seems inappropriate to present data under some of these cross-cutting categories of Agenda 21 and, therefore, no aggregates are provided for the categories ‘combating poverty’, ‘integrating environment and development in decision-making’, ‘promoting women’s role in development’, ‘strengthening the role of NGOs’, ‘technology transfer and capacity building’ and ‘information for decision making’. These dimensions of Agenda 21, however, are addressed within aid activities across all economic sectors. Activities that earlier appeared under the above-mentioned headings are now included under ‘accelerating sustainable development, miscellaneous’ and ‘conservation and management of resources, other’. Aggregate data for the other categories are given as before and, for each category, the list of DAC sectors included in the aggregate is provided in Annex III.
4. As in previous presentations, the OECD data for all years exclude a significant volume of technical co-operation. Since such technical co-operation commitments are not distributed evenly among the different sectors, cross-sectoral comparisons should be made with caution.
5. Similar caution needs to be exercised when trend analysis is being undertaken because the data contains gaps for some years for some countries and allowance also has to be made for changes in the recent assignment of codes and the difficulties in accurately matching OECD purpose codes with Agenda 21 categories. Furthermore, the data is presented in current US\$ values and no adjustment has been made for changes in the purchasing power of the dollar.

23030	Power generation/renewable sources	2,4
23064	Nuclear power plants	2,4
23065	Hydro-electric power plants	2,4
23066	Geothermal energy	2,4
23067	Solar energy	2,4
23068	Wind power	2,4
23069	Ocean power	2,4
23070	Biomass	2,4
	(f) <u>Sea transport</u>	
21040	Water transport	2,4
	(g) <u>Land transport</u>	
21010	Transport policy and administrative management	2,4
21020	Road transport	2,4
21030	Rail transport	2,4
21061	Storage	2,4
	(h) <u>Air transport</u>	
21050	Air transport	2,4
	(i) <u>Communications</u>	
22010	Communications policy and administrative management	2,4
22020	Telecommunications	2,4
22030	Radio/television/print media	2,4
	(j) <u>Miscellaneous</u>	
15010	Economic and development planning	2,4
15020	Public sector financial management	2,4
15030	Legal and judicial development	2,4
15040	Government administration	2,4
15050	Strengthening civil society	2,4
15061	Post-conflict peace-building (UN)	2,4
15062	Elections	2,4
15063	Human rights monitoring and education	2,4
15064	Demobilisation	2,4
15065	Free flow of information	2,4
16110	Employment policy and administrative management	2,4
16310	Social/welfare services	2,4
16320	General government services	2,4
16361	Narcotics control	2,4
24010	Financial policy and administrative management	2,4
24020	Monetary institutions	2,4
24030	Formal sector financial institutions	2,4
24040	Informal/semi-formal financial institutions	2,4
25010	Business services	2,4
25020	Privatisation	2,4
32310	Construction	2,4
42010	Women in development	2,4
43010	Multisector aid (components not available)	2,4
43020	Multisector aid (components available)	2,4
43050	Alternative development	2,4

ANNEX III (continued)

Code	Description	Agenda 21 Chapter(s)
99810	Sectors not specified	2,4
11000	Education	2,4
11400	Post-secondary education	2,4
12000	Health	2,4
12200	Basic health	2,4
14000	Water supply and sanitation	2,4
15000	Government and civil society	2,4
16100	Employment	2,4
16200	Housing	2,4
20000	Economic infrastructure and services	2,4
21000	Transport and storage	2,4
24000	Banking and financial services	2,4
31000	Agriculture, forestry and fishing	2,4
31100	Agriculture	2,4
31200	Forestry	2,4
31300	Fishing	2,4
32000	Industry, mining and construction	2,4
32100	Industry	2,4
33100	Trade	2,4
33200	Tourism	2,4
40000	Multi-sector/cross-cutting	2,4
43000	Other multisector	2,4
52000	Developmental food aid/food security assistance	2,4
60000	Action relating to debt	2,4
70000	Emergency assistance	2,4
71000	Emergency food aid	2,4
72000	Other emergency and distress relief	2,4
99800	Unallocated/unspecified	2,4
30000	Production	2,4
42000	Women in development	2,4
11300	Secondary education	2,4
32300	Construction	2,4
12100	Health, general	2,4
11100	Education, level unspecified	2,4
91000	Administrative costs of donors	2,4
16300	Other social services	2,4
22000	Communications	2,4
11200	Basic education	2,4
13000	Population policies/programmes and reproductive health	2,4
16000	Other social infrastructure and services	2,4
23000	Energy generation and supply	2,4
25000	Business and other services	2,4
32200	Mineral resources and mining	2,4
41000	General environmental protection	2,4
50000	Commodity aid and general programme assistance	2,4
51000	Structural adjustment assistance with World Bank/IMF	2,4
53000	Other general programme and commodity assistance	2,4
92000	Support to non-governmental organisations	2,4
	<u>Demographic dynamics</u>	
13010	Population policy and administrative management	5
13030	Family planning	5

ANNEX III (continued)

Code	Description	Agenda 21 Chapter(s)
	Protecting and promoting human health	
12110	Basic health infrastructure	6
12181	Basic health infrastructure	6
12182	Basic health infrastructure	6
12191	Basic health infrastructure	6
12230	Basic health infrastructure	6
12240	Nutrition	6
12250	Infectious disease control	6
12281	Health education	6

31281	Forestry education/training	11
31282	Forestry research	11
31291	Forestry services	11
	Sustainable agriculture	
31110	Agricultural policy and administrative management	14
31120	Agricultural development	14
31130	Agricultural land resources	14
31140	Agricultural water resources	14
31150	Agricultural inputs	14
31161	Food crop production	14
31162	Industrial crops/export crops	14
31163	Livestock	14
31164	Agrarian reform	14
31181	Agricultural education/training	14
31182	Agricultural extension	14
31183	Agricultural extension	14
31184	Agricultural extension	14
31191	Agricultural services	14
31192	Plant protection and pest control	14
31193	Agricultural credit	14

ANNEX III (continued)

Code	Description	Agenda 21 Chapter(s)
31194	Agricultural co-operatives	14
31195	Livestock/veterinary services	14
	<u>Conservation of biological diversity</u>	
41030	Bio-diversity	15
	<u>Protection of the oceans and seas</u>	
31310	Fishing policy and administrative management	17
31320	Fishery development	17
31381	Fishery education/training	17
31382	Fishery research	17
31391	Fishery services	17
	<u>Protection of freshwater resources</u>	
14010	Water resources policy/administrative management	18
14015	Water resources protection	18
14020	Water and sanitation	18
14030	Low-cost water and sanitation	18
14040	River development	18
	<u>Management of hazardous and solid wastes</u>	
14050	Waste management/disposal	19,20,21
	Conservation and management of resources, other	
41010	Environmental policy and administrative management	9 through 22
41040	Site preservation	9 through 22
41050	Flood prevention/control	9 through 22
41081	Environmental education/training	9 through 22
41082	Environmental research	9 through 22
III. STRENGTHENING THE ROLE OF MAJOR GROUPS		
92010	Support to national NGOs	27
92020	Support to international NGOs	27
92030	Support to local and regional NGOs	27
IV. MEANS OF IMPLEMENTATION		
	Financial resources and mechanisms	
51010	Structural adjustment	33
53020	Budget support	33
53030	Import support (capital goods)	33
53040	Import support (commodities)	33
52010	Food security programmes/food aid	33
60010	Action relating to debt	33
60020	Debt forgiveness	33
60030	Relief of multilateral debt	33
60040	Rescheduling	33
60050	Refinancing	33
60061	Debt for development swap	33
60062	Other debt swap	33
60063	Debt buy-back	33
53010	Balance-of-payments support	33
91010	Administrative costs	33

ANNEX III (continued)

Code	Description	Agenda 21 Chapter(s)
16381	Science for sustainable development Research/scientific institutions	35
	Promoting education and training	
11110	Education policy and administrative management	36
11120	Education facilities and training	36
11130	Teacher training	36
11181	Educational research	36
11220	Primary education	36
11230	Non-formal education	36
11240	Pre-school education	36
11320	Secondary education	36
11330	Vocational training	36
11420	Higher education	36
11430	Advanced technical and managerial training	36
16350	Culture and recreation	36

12230	Basic health infrastructure	
12240	Nutrition	
12250	Infectious disease control	
12281	Health education	
12282	Health personnel development	
13010	Population policy and administrative management	
13020	Reproductive health care	
13030	Family planning	
13040	STD control including HIV/AIDS	

ANNEX IV

DEVELOPMENT ASSISTANCE COMMITTEE SECTORS INCLUDED IN THE AGGREGATES FOR AGENDA 21 CATEGORIES

<i>Agenda 21 Categories</i>	<i>DAC Sector</i>
–	
I. SOCIAL AND ECONOMIC DIMENSIONS	
Accelerating sustainable development	
(a) Manufacturing	Industry
(b) Mining	Mineral resources and mining
(c) Commerce	Trade and tourism
(d) Traditional energy	Energy, excluding renewable sources
(e) Alternative energy	Renewable sources
(f) Sea transport	Water transport
(g) Land transport	Transport, excluding water transport, air transport
(h) Air transport	Air transport
(i) Communications	Communications
(j) Miscellaneous	Government and civil society, employment, other social services
Combating poverty	...
Demographic dynamics	Population, excluding reproductive health
Protecting and promoting human health	Health, including reproductive health
Promoting sustainable human settlements	Housing, including settlement, reconstruction
Integrating environment and development in decision-making	...
II. CONSERVATION AND MANAGEMENT OF RESOURCES	
Protection of the atmosphere	Biosphere protection
Land resources	Rural development
Combating deforestation	Forestry
Sustainable agriculture	Agriculture
Conservation of biological diversity	Bio-diversity
Protection of the oceans and seas	Fishing
Protection of freshwater resources	Water supply and sanitation, excluding waste management
Management of hazardous and solid wastes	Waste management
Conservation and management of resources, other	General environmental protection
III. STRENGTHENING THE ROLE OF MAJOR GROUPS	
Promoting women's role in sustainable development	...
Strengthening the role of NGOs	...
IV. MEANS OF IMPLEMENTATION	
Financial resources and mechanisms	Structural adjustment, general programme assistance
Technology transfer and capacity building	...
Science for sustainable development	Research/scientific institutions, when unspecified
Promoting education and training	Education
Information for decision-making	...
