

	<p>Summit on Climate Change 22 September 2009</p> <p>Film narration by high-school students (Film produced by Jennifer Pritheeva Samuel)</p> <p>ANIMATION</p>
Noni	You use these words to sound like there's progress but all we see are empty and broken promises.
ALL	LESS TALK. MORE ACTION.
	INTRO
Hochit	Today when we witness the disappearance of islands and glaciers we have never been to
	Of animals we have never seen
	Rich cultures we have never experienced
	I can't help but think what will we see? What will our children see?
Simit	Will we see more natural disasters?
Dayanara	Will we run out of water before we run out of oil?
Noni	Will we have enough clean air to breathe?
Hochit	Will we be able to feed our families?
Simit	Will we see the end of mankind?
Dayanara	Or will we see a beautiful, sustainable world
	Due to the united actions of our nations
Noni	Because when one nation falls to war, poverty or natural disasters we have all failed our neighbors, our families and ourselves.
Hochit	Show us initiative.
Simit	Show us change.
Dayanara	Show us empowerment.
Noni	Show us leadership.
Simit	Are you ready to take the first step?
Hochit	Because WE ARE!

	SOLUTIONS
Dayanara	Youth around the world are taking action - developing new ways to generate energy and adapt.
Noni Hochit Simit Dayanara	You all know the solutions that have existed for decades: floating schools and gardens in floodplains, renewable energy, drip irrigation in drought-prone areas, improved public transportation, rainwater harvesting, recycling.
Dayanara	We thought you had all the answers, but then why do we still have questions?
Noni	You say solutions are expensive, but we are spending on weapons and bombs. Why do we spend so much on defense and neglect the biggest national and global security crisis, climate change?
Hochit	Why can't we spend as much on disaster prevention as we do on disaster relief?
Simit	Every year we build new coal plants that will pollute our air for forty years, when alternative energy technologies already exist. Developing nations are making the same mistakes that the developed ones did. When will you promote innovation the way you've promoted industrialization - so that their future growth won't harm others?
Dayanara	Polluting technologies are still located in the poorest areas. Don't children in the Bronx, in Lagos, in Shanghai and all over the world have the right to clean air and clean water?
Noni	Instead of investing in so many problems, why not invest in solutions? You're investing in our future, and we want to work in a green economy that protects our health, our jobs, and our environment.

Hochit	We are ready to come together and make a difference. Are YOU?
	CONCLUSION
Simit	We are the ones who will inherit your choices, but what will we inherit?
Dayanara	Are you here to just talk, or are you here to take action in Copenhagen?
Noni	Right now, most of you are failing us as global citizens and role models.
Hochit	Will you put your political success on the line for the planet?
Simit	Will you stop prioritizing your nation's needs and start prioritizing our world's needs?
Dayanara	Wouldn't it be better to be known as the first country to change and contribute, Than the last one to compromise and commit?
Hochit	You've been talking since before we were born.
Simit	Now, we need to work together; it's not a choice anymore.
ALL	Time is up
