ECOSOC Operational Activities for
Development Segment - Side Event

DRIVING COHERENCE AND PARTNERSHIP:

MAINSTREAMING THE
SUSTAINABLE DEVELOPMENT
GOALS IN STRATEGIC
PLANNING

The 2030 Agenda for Sustainable Development's commitment to 'leave no one behind and reach those furthest behind first' challenges the international community to move beyond a focus on meeting immediate needs in order to improve the lives of the most vulnerable and at risk populations. Successfully delivering on this collective outcome will depend on contributions from a wide range of humanitarian and development actors based on their comparative strength and capacity to deliver in a given context.

In this vein, the 2016 Quadrennial Comprehensive Policy Review (QCPR) resolution for the years 2017-2020 guides the UN development system towards strengthened coherence and efficiency to deliver on the 2030 Agenda.

By mainstreaming the Sustainable Development Goals into their strategic planning documents and engaging in results-oriented partnerships, UN entities are expected to translate the 2016 QCPR's requirements into integrated support to governments through enhanced coordination of development, humanitarian assistance and peacebuilding efforts.

Building on WFP's experience in formulating its Strategic Plan 2017-2021 the side event will explore avenues of leveraging inclusive and effective partnerships that incorporate the QCPR's key objectives in the context of the 2030 Agenda.

*Formal invitations and a full agenda will be circulated shortly.
