

INVITATION

UNGA High-Level Side Event:

Closing the Investment Gap on Water Infrastructure: How Governments, Utilities, and the Private Sector Can Achieve SDG 6

The Permanent Missions of Denmark and Hungary to the United Nations, MIGA, and UN Water is pleased to invite you to participate in a High-Level Side Event in the margins of the UN General Assembly. We hope to co-host this important side event together with other relevant member states. 2018 marks the beginning of the UN Water Decade, but according to OECD's estimate, total financial needs between 2016 and 2030 for a transformation to a water secure world might require annual investments of USD 500 billion. How do we ensure those investments? And what actions are needed from different stakeholders to break down barriers for investors in water infrastructure?

Join key decision makers in a crucial and interactive discussion about how to unlock the needed investments enabling the realisation of SDG 6.

Wednesday September 20th, 11:30am – 1:00pm
United Nations Headquarters, NYC, Conference Room 5

SPEAKERS

Moderator: H.E. Mr. Mads Nipper, Commissioner in the Business and Sustainable Development Commission and President & CEO of Grundfos
