

## **UN IN ACTION**

Release Date: November 2007

Programme No. 1101 Duration: 3'43"

Language: English, French, Spanish, Russian

## **GALAPAGOS: WORLD HERITAGE IN DANGER**

VIDEO	AUDIO

## **NARRATION**

AERIAL SHOT. GALAPAGOS SEA AND ISLAND Galapagos. Forty-eight islands of hardened lava in the Pacific Ocean, 1000 km from the South American continent. (8)

IGUANA ON A ROCK.

Among its rocks and under its waters ...there are plants and animals found nowhere else in the world. Animals like the giant tortoise... and the marine iguana. (11)

YELLOW FISH UNDERWATER

But keeping this precious ecosystem safe is proving a severe challenge. So much so that UNESCO – the UN agency in charge of safeguarding cultural heritage – says it's in danger of permanent ecological damage. (14)

BOAT FULL OF

**ENVIRONMENTALISTS** 

Environmentalists like Godfrey Merlen, a longtime resident of Galapagos working for Wild Aid, say that action must be taken immediately.

(7.5)

GODFREY MERLEN (in ENGLISH) M

GODFREY MERLEN OF WILD AID, ENVIRONMENTALIST, ON	"Galapagos is being pushed to the very limit of its possibility to survive." (4.5)
CAMERA	NARRATION
	Until recently, fishing was seen as the biggest
TUNA FISH BEING BUTCHERED	human threat to the ecosystem. (4)
	Especially illegal fishing for shark fins and for
SHARK'S BELLY BEING CUT.	sea cucumbers destined for the Asian market
	(5)
	But new research shows that well-
TOURISTS TAKINGSHOTS AT	intentioned tourism appears to be the
TORTOISES AND LONGHORN BIRDS	number one threat. (5)
	From 10,000 visitors per year in the early 80's,
AIRPLANE TOUCHING DOWN	the number of tourists has grown 12-foldto
	more than 120,000. (8)
HOUSE CONSTRUCTION	And tourism has brought with it construction, goods and services from the mainland immigration as well as introduced species like dogsrats and insects. (10.20)
DOG BARKING	
TREE PLANT COVERED WITH PLASTIC SHARKS UNDERWATER	All of which are threatening the unique, native species of the islands, says Galapagos National Park Director Raquel Molina. (7)
	RAQUEL MOLINA (in SPANISH) <b>F</b>
	"The increase in tourism, the increase in
RAQUEL MOLINA, DIRECTOR,	introduced species, and the increase in people
GALAPAGOS NAT'L PARK ON	who want to live in Galapagos". (5.70)
CAMERA	
	<u>NARRATION</u>

HELICOPTER TAKING OFF	Fixing these problems will not be easy.  Controlling the spread of invasive species is a constant, and costly, battle. It has taken 18 million dollars so far just to cull the
AERIAL SHOT. GOATS	archipelago's goat population (SOUNDUP) -
RUNNING IN THE JUNGLE.	and keep it from destroying the native plants.
	But if Galapagos is to survive, experts say,
NIGHT SCENE. PATROL BOAT	these efforts must be kept up. (21)
	And controlling tourism, which brings much
CUSTOM POLICE INSPECTING	needed revenue to Ecuador, may be even more
TOURISTS ARRIVING	difficult. (4.75)
	One proposed solution is to cap tourism forever
BOATS AT WHARF.	at around 100,000 people per year, with a huge
	hike in the prices to visit Galapagos. (7.5)
	Raising prices drastically is the only way to limit

**UN LOGO** 

Whatever the outcome of the price-hike debate, many see Galapagos as the ultimate test... for balancing the human footprint with nature's most awesome, but fragile, ecosystems. (10.5)

If it cannot be done here, in an archipelago of some 25,000 people – what hope is there, they wonder, for saving precious species in the rest of the planet? (9.5)

This report was prepared by Michele Zaccheo for the United Nations. (4)
