

Federated States of Micronesia Maritime Boundaries

Contiguous Zone

In exercise of the authority of the President of the Federated States of Micronesia (FSM) pursuant to 18 F.S.M.C. §107 of the Code of the Federated States of Micronesia (Annotated) to issue regulation establishing the Contiguous Zone (CZ) of the Federated States of Micronesia, the President hereby declares the CZ (24M) of the Federated States of Micronesia referenced to World Geodetic System 1984, as follows:

Ngulu Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Ngulu** is the line commencing at point **FSMCZ4470** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------|---------------|-----------------|
| FSMCZ4470 | 8°17'59.48" N | 136°57'19.53" E |

Yap Contiguous Zone (24M)

1) The outer limit of the contiguous zone of **Yap** is the line commencing at point **FSMCZ5762** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Ulithi, Falalop-Ulithi, Losiep, Gielop, Fais Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Ulithi, Falalop-Ulithi, Losiep, Gielop** and **Fais** is the line commencing at point **FSMCZ0001** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Sorol Contiguous Zone (24M)

1) The outer limit of the contiguous zone of **Sorol** is the line commencing at point **FSMCZ5579** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------|---------------|-----------------|
| FSMCZ5579 | 7°55'36.47" N | 139°59'09.43" E |
| FSMCZ5580 | 7°54'47.43" N | 139°59'44.25" E |

Woleai, Ifalik Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Woleai** and **Ifalik** is the line commencing at point **FSMCZ2734** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ*..., means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------|---------------|-----------------|
| FSMCZ2734 | 7°20'00.26" N | 143°25'01.64" E |

Faraulep Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Faraulep** is the line commencing at point **FSMCZ3331** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
 - 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
-

(1) CZ, as in *FSMCZ*..., means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Gaferut Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Gaferut** is the line commencing at point **FSMCZ3500** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Olimarao, Elato, Lamotrek, West Fayu, Satawal Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Olimarao, Elato, Lamotrek, West Fayu** and **Satawal** is the line commencing at point **FSMCZ0657** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|

Pikelot Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Pikelot** is the line commencing at point **FSMCZ2992** in the following table and running along geodesic sequentially

connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Pulusuk, Puluwat, Pulap Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Pulusuk, Puluwat, and Pulap** is the line commencing at point **FSMCZ0334** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
(1) CZ, as in *FSMCZ....*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|
| FSMCZ0334 | 7°16'28.32" N | 148°46'34.97" E |

Namonuito Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Namonuito** is the line commencing at point **FSMCZ1067** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
 - 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
-

- i) The point identifier (Point ID) is shown in the first column in the table;
 (1) CZ, as in *FSMCZ*..., means Contiguous Zone; and
- ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Losap, Nama, Neoch, Chuuk, East Fayu, Nomwin, Murilo Contiguous Zone (24M)

1) The outer limit of the contiguous zone of **Losap, Nama, Neoch, Chuuk, East Fayu, Nomwin** and **Murilo** is the line commencing at point **FSMCZ2019** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

- a) Lines are generated by reference to points; and
- b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Namoluk, Etal, Satawan, Lukunor Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Namoluk, Etal, Satawan** and **Lukunor** is the line commencing at point **FSMCZ1373** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
 - 2) In the table:
 - a) Lines are generated by reference to points; and
-

- b) The columns in the table set out the following information about the points:
- i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ*..., means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|
| FSMCZ1373 | 5°51'58.62" N | 152°42'51.35" E |

Minto Contiguous Zone (24M)

1) The outer limit of the contiguous zone of **Minto** is the line commencing at point **FSMCZ4093** in the following table and running along geodesic sequentially

connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Oroluk Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Oroluk** is the line commencing at point **FSMCZ4919** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and

- b) The columns in the table set out the following information about the points:
- i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Nukuoro Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Nukuoro** is the line commencing at point **FSMCZ4703** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|

Kapingamarangi Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Kapingamarangi** is the line commencing at point **FSMCZ3666** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|
| FSMCZ3666 | 0°57'42.87" N | 154°19'26.05" E |

Sapwuafik Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Sapwuafik** is the line commencing at point **FSMCZ5357** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ....*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |

Pakin, Ant, Pohnpei Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Pakin, Ant** and **Pohnpei** is the line commencing at point **FSMCZ1712** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|
| FSMCZ1712 | 6°56'45.72" N | 157°23'13.57" E |

Mwoakilloa Contiguous Zone (24M)

- 1) The outer limit of the contiguous zone of **Mwoakilloa** is the line commencing at point **FSMCZ4290** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.
- 2) In the table:
 - a) Lines are generated by reference to points; and
 - b) The columns in the table set out the following information about the points:
 - i) The point identifier (Point ID) is shown in the first column in the table;
 - (1) CZ, as in *FSMCZ...*, means Contiguous Zone; and
 - ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------|---------------|-----------------|

Pingelap Contiguous Zone (24M)

1) The outer limit of the contiguous zone of **Pingelap** is the line commencing at point **FSMCZ5174** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ*..., means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
|-----------------|-----------------|------------------|
| FSMCZ5174 | 6°09'45.08" N | 160°17'22.64" E |

Kosrae Contiguous Zone (24M)

1) The outer limit of the contiguous zone of **Kosrae** is the line commencing at point **FSMCZ3874** in the following table and running along geodesic sequentially connecting each point in the table and ending at the last point mentioned.

2) In the table:

a) Lines are generated by reference to points; and

b) The columns in the table set out the following information about the points:

i) The point identifier (Point ID) is shown in the first column in the table;

(1) CZ, as in *FSMCZ...*, means Contiguous Zone; and

ii) The geographic coordinates for each point are shown in the second and third columns of the table.

| Point ID | Latitude | Longitude |
