DESCRIPTION OF REQUIREMENTS

INTRODUCTION:

The United Nations Office at Nairobi (UNON) on behalf of UN Environment invites qualified firms to participate in a pre-qualification process for the upcoming competitive tender process for Safeguarding, transport and disposal of PCB contaminated oils and equipment containing PCB in Cameroon. This shall result into a Contract for a period of 2 years.

1. BACKGROUND

With the objective of assisting Cameroon to satisfy its obligations set out under the Stockholm Convention, a project is being implemented in Cameroon entailing the safeguarding and disposal of PCB contaminated oil and equipment. Under this part of the project it is intended that electrical equipment items and oils with a concentration of PCB of more than 2000ppm will be exported for disposal. Where equipment items have demonstrated to show PCB content of equal to or more than 50ppm and less than 2000ppm, only the oil will be safeguarded and disposed of.

As part of safeguarding and disposal activities, the eventual Contractor will visit each site where the equipment is stored and conduct safeguarding of PCB contaminated oil and equipment. Following safeguarding the eventual Contractor will then transport the equipment to the Fako Temporary Facility (TSF) close to Douala. Once centralised, the contaminated equipment and oil will be loaded onto shipping containers following which the eventual Contractor will then arrange safe transport and disposal according to the Basel and Stockholm Conventions and other relevant national and international law.

2. ASSIGNMENT OBJECTIVE

The primary objective of this tender is the safeguarding and centralization, loading and transport and international disposal in an environmentally sound method of an approximate total of 573 metric tonnes of PCB contaminated oils and equipment.
