HVAC external unit machines are currently installed on the roof, and the necessary waterproofing works are expected to be carried out without removing them.

Photovoltaic panels will need to be temporarily removed, replaced and connected after the completion of the waterproofing works.

Additionally, the existing metal roof will be replaced with a traditional roof featuring the appropriate slope.

The works shall include:

- Executive design, workplan and submission of declaration to the pertinent authority;

- Dismantling of the metal roof;
- Waterproofing of the existing concrete roof, with appropriate slope;
- Removal and repositioning of photovoltaic panels;
- Roof waterproofing using a liquid waterproofing membrane;

Subcontracting is allowed for all categories of works.

It is anticipated that the resulting Contract will be established for a one-time project for the roof waterproofing and works are to be carried out in 70 working days.
