1. Introduction

1. The Federative Republic of Brazil (hereinafter referred to as Brazil) signed the United Nations Convention on the Law of the Sea (UNCLOS) on December 10, 1982, during the Closing Session of the Third United Nations Conference on the Law of the Sea, and it was ratified on December 22, 1988. The Convention became effective for Brazil on November 16, 1994.
2. On May 17, 2004, after approximately 17 years of studies, Brazil made its Submission to the Commission on the Limits of the Continental Platform (CLCS) seeking the recognition of the extension of its continental shelf as the natural prolongation of its land territory, up to the outer limits of the continental margin, beyond the limit of 200 M, as set out in article 76 (4) and (6) of the United Nations Convention on the Law of the Sea (UNCLOS).
3. In the Brazilian Submission, the continental margin was divided into three large areas: Equatorial Continental Margin, Oriental Continental Margin and Meridional Continental Margin.
4. During the Submission analysis by the CLCS between August 2004 and March 2007, Brazil presented an Addendum to the Executive Summary, which modified the originally submitted outer limit.
5. On April 4, 2007, the CLCS adopted, with amendments, the recommendations made on March 23, 2007 by the Subcommission established to analyse the Brazilian Submission¹.
6. From the date the recommendations made by the CLCS were unveiled, Brazil, after meticulous analysis, decided to prepare revised submissions along its margin, and with this purpose, new bathymetric and geophysical surveys were planned and accomplished.

1. The summary of recommendations received by Brazil is available online at the DOALOS's web site: <http://www.un.org/depts/los/clcs_new/submissions_files/bra04/Summary_Recommendations_Brazil.pdf>. Access on August 5, 2014.

7. With the studies and analyses arising from those new data, denominated LEPLAC PHASE 2, it was possible to perfect and expand the knowledge about the Brazilian continental margin, allowing production of updated technical information. The entire content of preexistent data and information, already submitted to CLCS, will be referred as LEPLAC PHASE 1.
8. In the context of the recommendations received from the CLCS, in 2007, this submission should be considered as a PARTIAL REVISED SUBMISSION in accordance with article 8 of Annex II of the UNCLOS, including only the Continental Meridional Margin portion denominated SOUTHERN REGION, that is delimited to the north by the São Paulo Ridge and to the south by the lateral maritime border with the Oriental Republic of Uruguay (Figure 1).
 - a. This submission will not harm the sovereign and legitimate exercise of Brazil in, opportunely, disagreeing with the recommendations received regarding other components outside the scope of the current submission.
9. When preparing this Partial Revised Submission, Brazil conforms with the Scientific and Technical Guidelines (STG) (CLCS/11) and with the CLCS Rules of Procedure (CLCS/40/Rev.1).

2. Provisions of Article 76 invoked to support the Submission

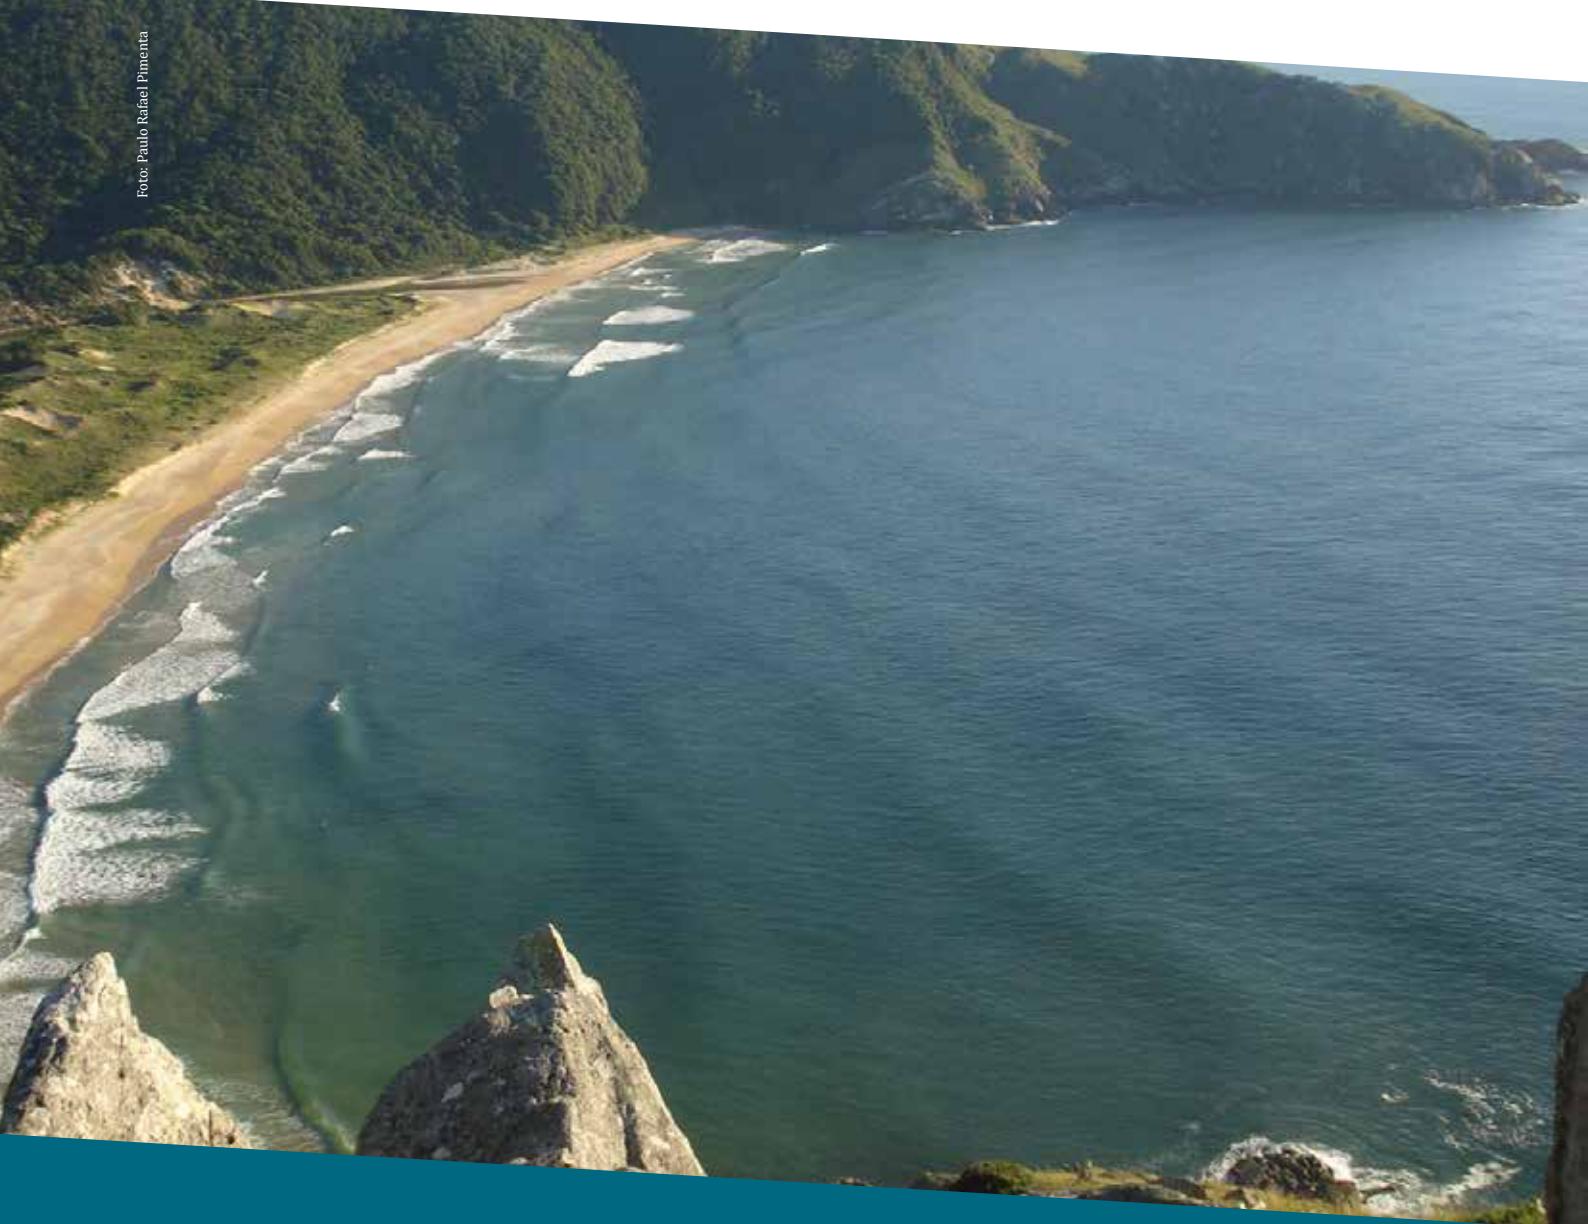

10. Brazil invoked article 76 (1), (3), 4(a) (i) (ii), 4(b), (5) and (7) of the UNCLOS to establish the outer limit of the continental shelf beyond the 200 M, on the area covered by this Partial Revised Submission.

3. Nonexistence of maritime disputes

11. The maritime boundary with the Oriental Republic of Uruguay was promulgated in the Brazilian domestic level through Decree 75,891 of June 23, 1975, and sent to the United Nations Secretary-General to make it public (UNITED NATIONS, 1972²). On July 29, 2005, its text was rectified by Exchange of Reversal Letters and the change was published in the Brazilian Official Gazette on October 29, 2005 (DOU, 2005).
12. Since there are no maritime disputes between Brazil and the Oriental Republic of Uruguay, Rule 46 and Annex I to the Rules of Procedure (CLCS/40/Rev.1) are not applied.

2. The exchange of notes constituting an agreement between the Government of Brazil and the Government of Uruguay on the definitive demarcation of the sea outlet of the River Chui and the lateral maritime border is available online on <<http://www.un.org/Depts/los/LEGISLATIONANDTREATIES/PDFFILES/TREATIES/BRA-URY1972MB.PDF>>. Access on August 16, 2014.

4. Technical advice provided

13. In accordance with Rule 45 (b) of the Rules of Procedure (CLCS/40/Rev.1) issued by the CLCS, Brazil declares that it received technical and scientific advice provided by the expert Jair Alberto Ribas Marques, a member of the CLCS.

5. Form

14. This Partial Revised Submission complies with the formal norms as provided in the Rules of Procedure, especially Rule 47, and paragraphs 9.1.3 to 9.1.6 of the STG, and it is made up of three parts: the Executive Summary (Part I), the Main Body (Part II), and Supporting Scientific and Technical Data (Part III).
15. The Main Body of this Submission contains: an introduction presenting the Revised Submission in the Southern Region, a detailed description of the regional geology, the methodologies applied to the implementation of the provisions of article 76 of the UNCLOS, besides three appendices denominated A, B and C.
16. Appendix A contains the information related with the acquisition and data processing of the LEPLAC PHASE 2 in the Southern Region, as well as information regarding the complementary data presented herein.
17. Appendix B contains the description of the bathymetric profiles and the foot of the continental slope points (FOS) that contributed to the definition of the outer limit.
18. Appendix C contains the description of the seismic sections and the points with 1% of sedimentary thickness used when defining the outer limit.
19. In addition, this Submission also has a tool for interactive visualization, based on the concept of the geographical information system (GIS), which stores several information that contribute to a better understanding of the scientific arguments presented.

6. General description of the continental margin and base of the continental slope

20. The northern limit of the continental margin of the Brazilian Southern Region is the São Paulo Ridge, the southern limit is the lateral maritime border with Uruguay, and the western limit is the onshore continental region. In geologic and geomorphological terms, the continental margin of the Southern Region is a typically volcanic margin, with strong sedimentary influence, what intensely contributed to its development and growth.
21. The margin in the south comprises the marginal sedimentary basins of Santos and Pelotas, and the following morphologic features that are classified as components or natural prolongations of the Brazilian continental margin: São Paulo Ridge, Santa Catarina Plateau, Rio Grande Terrace, Pelotas Sedimentary Drift, Rio Grande Cone, Rio Grande Sedimentary Drift, Chuí Sedimentary Drift and the Chuí Slide represented by a megaslide on the continental slope (Figure 2).
22. The base of the slope comprises a strip with width in the range of 15 km to 120 km and depths between 3,650 m and 4,600 m. The Base of the Slope was identified by means of a combination of bathymetric, geomorphological, geological and geophysical evidences, in accordance with the UNCLOS and paragraphs 5.2.1, 5.2.6, 5.2.9, and 5.4.4 to 5.4.6 of the STG.
23. The base of the slope and the outer limit in this Partial Submission were defined between latitudes 31°59'S and 36°S. The base of the slope and the outer limit in the region between latitudes 31°59'S and 27°S will be opportunely submitted in a subsequent submission.

7. Identification of the points of the foot of the continental slope

24. The FOS points were mathematically ascertained in acquired bathymetric profiles, in accordance with article 76 (4) (b) of the UNCLOS and paragraphs 5.1.3, 5.1.4, 5.2.2, 5.4.1 and 5.4.7 to 5.4.12 of the STG, at the point of maximum change in gradient in the area identified as the base of the slope.

8. Participant bodies

25. This Submission was prepared by LEPLAC, that has the legal responsibility for the surveys and studies dealing with the extension of the Brazilian Continental Shelf beyond 200 M. LEPLAC is a program of the Interministerial Commission for Sea Resources (*CIRM*), coordinated by the Ministry of Foreign Affairs, with participation of representatives of the Brazilian Navy Command, and of the Ministry of Mines and Energy, Ministry of Science, Technology and Innovation and Ministry of Education.
26. All the aforementioned bodies are responsible for the quality and fidelity of the entire material contained in this Partial Revised Submission.

9. Outer limit of the continental shelf

27. The outer limit (OL) of the continental shelf object of this Partial Revised Submission of the Brazilian Southern Region was obtained using the calculation routines of the GEOCAP® (Version 6.5.1) program, in accordance with article 76 (5) (7) of the UNCLOS combined with paragraphs 2.3.3, 2.3.5 and 2.3.10 of the STG.
28. The outer limit of the extended continental shelf beyond the 200 M in the Brazilian Southern Region and the outstanding morphological features are shown in Figure 2. A description of the points that form the outer limit of the Brazilian continental shelf that is the object of this Submission is presented in Table 1.

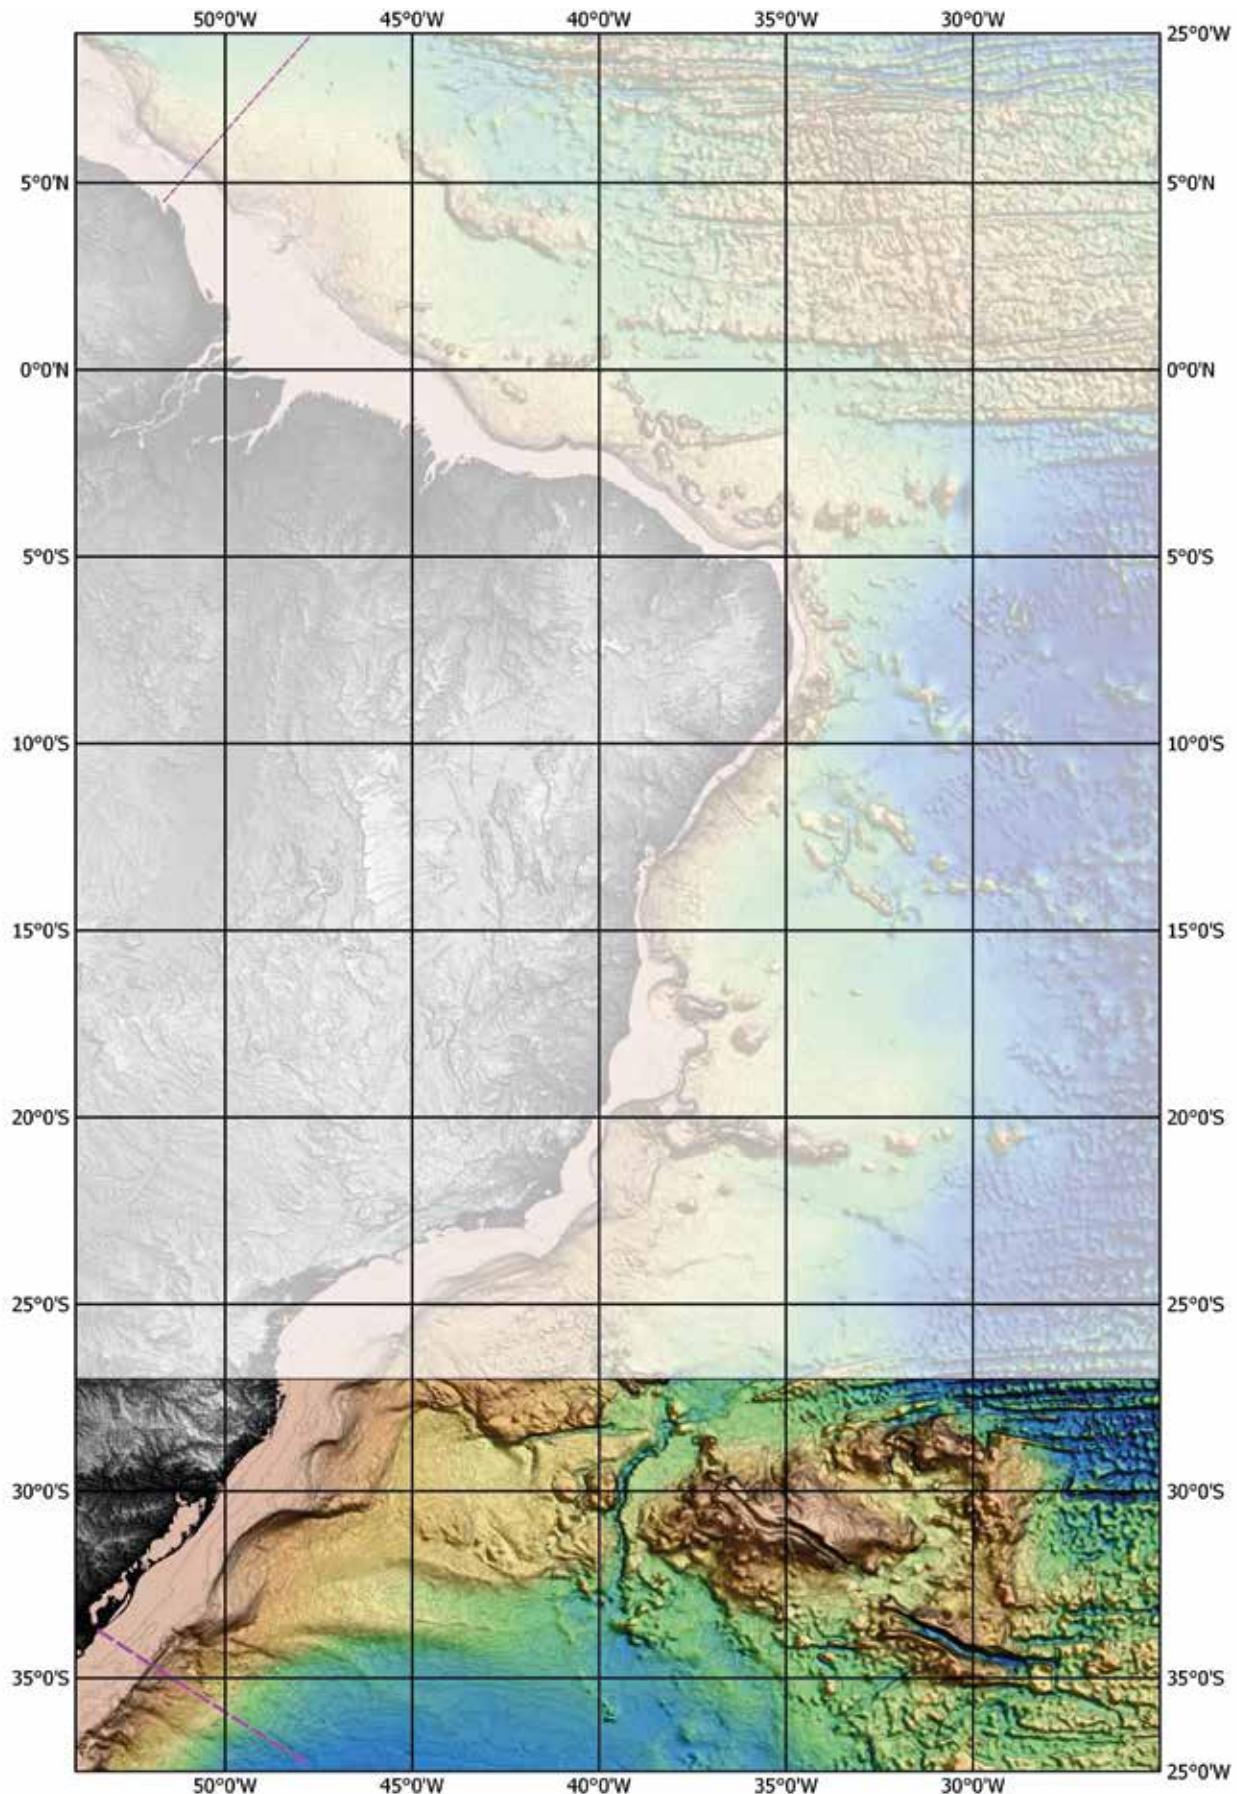

Figure 1 – The highlighted rectangle comprehends the area object of this Partial Revised Submission, delimited between the São Paulo Ridge and the lateral maritime border with the Oriental Republic of Uruguay.

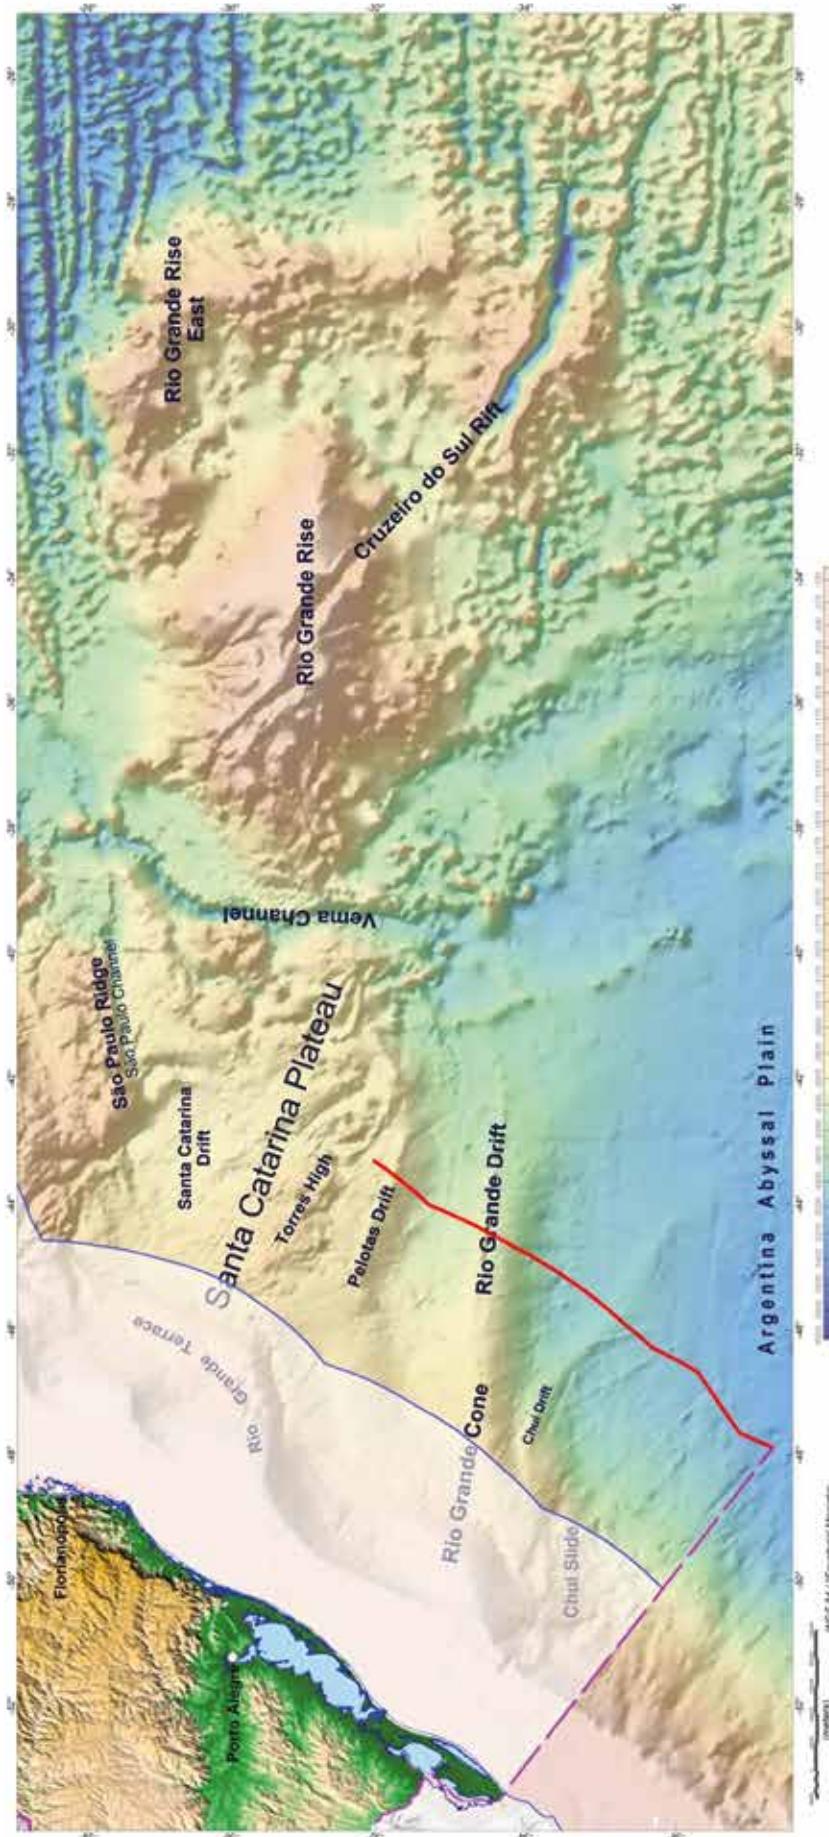

Figure 2 – The outer limit of the extended continental shelf in the Brazilian Southern Region represented by the red line. The blue line represents the Exclusive Economic Zone (EEZ) limit. The magenta line represents the lateral maritime border with the Oriental Republic of Uruguay.

Table 1 – Coordinates (WGS84) of the 313 fixed points that define the outer limit (OL) of the Brazilian extended continental shelf in this Submission.
