Well Being?

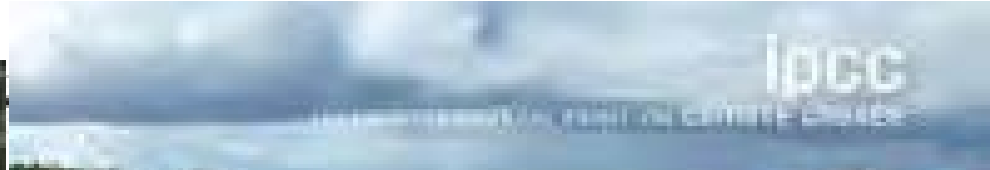

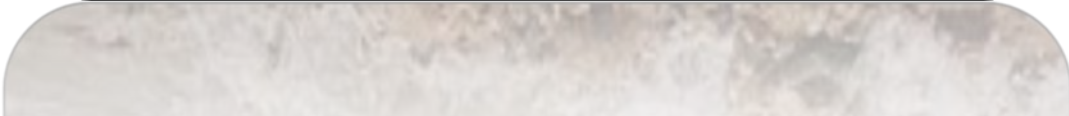

Science reports are confirming what we already know

.....Homes flooded

.....Extreme weather events

.....Extreme coastal erosion and Receding shore lines

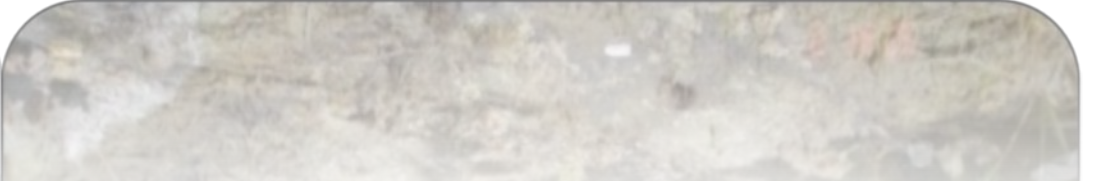

.....Contaminated water lens

- Increasing contamination of groundwater.
- Increasing water-borne illnesses and high infant mortality rates
- Increasing socio-economic costs of water-borne illnesses
- increasing tensions and conflicts between affected communities and the Government leading to costly ongoing disputes and vandalism of water infrastructure

.....Food crops are affected

What does the future hold for our children,
and for their children?
