For how many of the 46 LDCs have measures been recorded?

42

Stringency index
The Stringency index is calculated using nine indicators, combining various measures of government responses, to capture a variation in containment and closure policies only. It records the number and strictness of government policies, not the appropriateness or effectiveness of a country’s response.

Stay at home order
No measures
Recommended
Required with exceptions
Required without exceptions

Workplace closure
No measures
Recommended
Required for some sectors
Required except essential sectors

School closure
No measures
Recommended
Required for some levels
Required for all levels

Legend:
Stringency Index
Least stringent (0) Most stringent (100)
