For how many of the 46 LDCs have measures been recorded?

Stringency index

The Stringency index is calculated using nine indicators, combining various measures of government responses, to capture a variation in containment and closure policies only. It records the number and strictness of government policies, not the appropriateness or effectiveness of a country’s response.

Legend:

**Stringency Index**

- Least stringent (0)
- Most stringent (100)

**Stay at home order**
- No measures
- Recommended
- Required with exceptions
- Required without exceptions

**Workplace closure**
- No measures
- Recommended
- Required for some sectors
- Required except essential sectors

**School closure**
- No measures
- Recommended
- Required for some levels
- Required for all levels
