

Hecho por Nosotros welcomes you to
#GlobalGoals for a Sustainable Textile Industry
Eradicating Poverty to Advance Sustainable Development for All

 January 30th 2018
 10:00-11:30 AM
 United Nations Headquarters, New York, Conference room CR D

This event portrays possibilities of the textile industry to advance sustainable development within the framework of Agenda 2030 and to create the resilience necessary to respond to the most threatening questions around inequality and poverty of our time.

Hecho por Nosotros is creating an open platform to support leading sustainability innovations creatively tackling social and environmental issues via the textile industry. Its aim is to inspire and co-create ways in which different industries in collaboration with civil society, enterprises and governments can become a transformative force for the improvement of present economic and social systems.

The Agenda 2030 invites all actors in the textile industry to address sustainable development issues and solutions to further contribute in the fight for poverty.

Moderator

Patrick Duffy, Founder of the Global Fashion Exchange platform, Global Partnerships Manager for Common Objective (CO), an intelligent business network for the fashion industry.

"The textile industry involves all of society from local to global - from consumers to producers, artisans, businesses, designers, communicators, among others. It builds dreams and profits, but is also responsible for modern slavery and the second most polluting industry in the world.

For this reason, it's one of the most impactful spaces to work to transform the contemporary world"

Adriana Marina, founder of Hecho por Nosotros (Made By Us), and social enterprise animaná

Open platform that creates and shares content and knowledge on sustainable fashion. Specialized program in the research of camelids and natural fibers and local entrepreneurship for artisans of Latin America as a way to empower communities and alleviate poverty.

animaná

animaná is a clothing, accessories and home accessories brand that gathers ancestral techniques of weaving with contemporary designs using natural fibers from the Andes to create sustainable luxury products.
