# Cultural backlash

### Structure

- 1. Conceptual and theoretical framework
  - The meaning of 'authoritarian-populism'
  - The cultural backlash theory
- 2. Classifying European parties
- 3. European evidence
- 4. US evidence
- 5. Conclusions and implications

#### Cultural Backlash:

Trump, Brexit, and the Rise of Authoritarian-Populism

Pippa Norris and Ronald Inglehart

New York: Cambridge University Press, 2018

Preface and acknowledgments List of tables and figures

#### I: Introduction

- 1. Understanding populism
- 2. The cultural backlash theory
- 3. Varieties of populism

#### II: Authoritarian-Populist values

- 4. The backlash against the silent revolution
- 5. Economic grievances
- 6. Immigration

#### III: From values to votes

- 7. Classifying parties
- 8. Who votes for authoritarian-populists?
- 9. Party fortunes and electoral rules
- 10.Trump's America
- 11.Brexit

#### **IV: Conclusions**

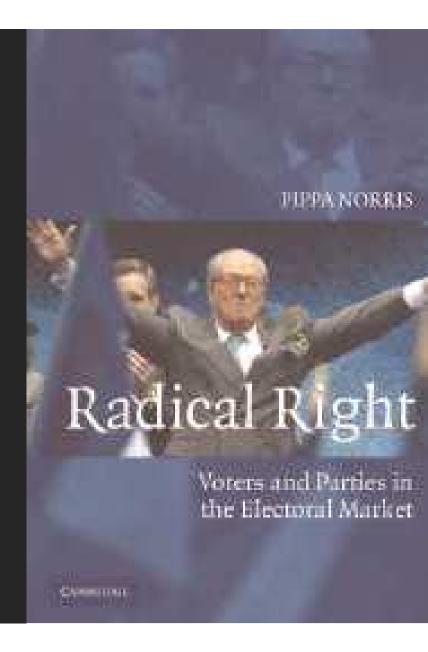

- 12. Eroding the civic culture?
- 13. The populist challenge

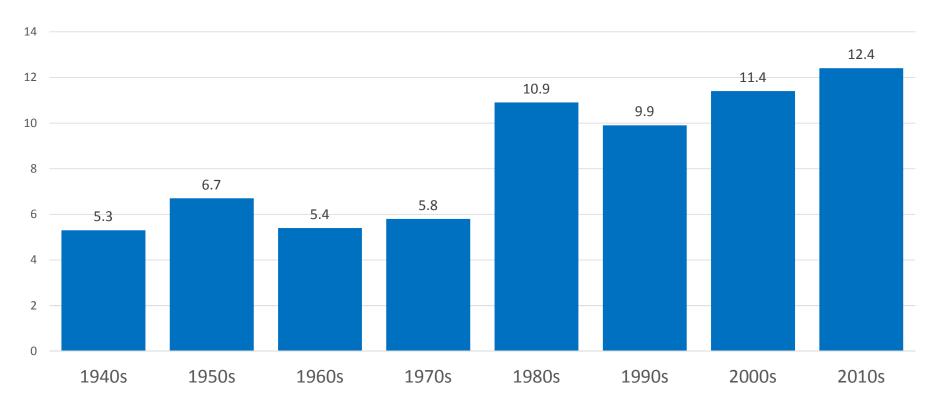

1. Concepts and theory

## I: The populistauthoritarian challenge

- Donald Trump in the US
- UKIP and Brexit
- Part of a broader phenomenon disrupting party competition
  - French National Front,
  - Swiss People's Party,
  - Austrian Freedom Party,
  - Swedish Democrats,
  - Greece's Golden Dawn,
  - Italy's Lega Nord,
  - Dutch Party for Freedom

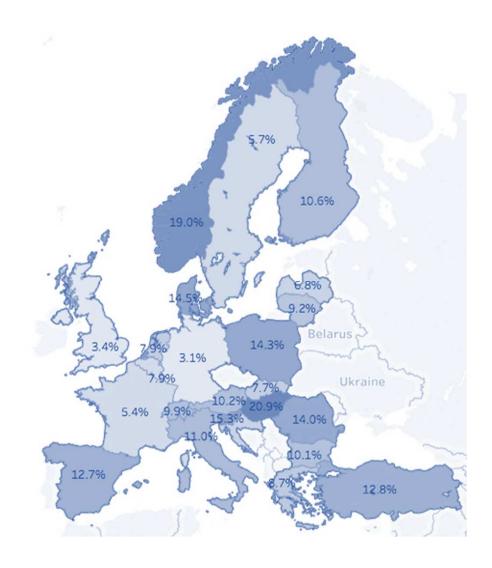

### % Vote for Authoritarian-Populist parties

**Notes:** The mean vote share for populist parties in national elections for the lower (or single) house of parliament from 1945 to 2017 in 32 Western societies containing at least one such party. For the classification of parties, see Chapter 7.

Sources: Holger Döring and Philip Manow. 2016. Parliaments and governments database (ParlGov): http://www.parlgov.org/; IFES Elections Guide. http://www.electionguide.org/

% Vote Authoritarian-Populist parties, Europe 2000-2017

# What is populist rhetoric?

### **Anti-establishment**

- Populism challenges the legitimate authority of the establishment
- Elected politicians, parties, government officials, intellectuals and experts, privileged rich and powerful, multinational corporations, media, judges.

### Vox populi - Popular sovereignty

- Populists emphasize that rightful political authority is based in popular sovereignty and majority rule.
- Favors direct voice of the people through majoritarian elections, polls, referenda, rallies

## What are authoritarian values?

### **Security**

• The importance of tribal protection against perceived risks of instability and disorder

### **Conventionism**

 Hostility to 'outsiders' threats to group norms-- racial/ ethnic minorities, Islamophobia, misogyny, homophobia & anti-Semitism

### Loyalty

Towards leaders protecting the tribe

# Authoritarian values + populist rhetoric

The danger is that populism unlocks the door for strongman leaders to claim sweeping powers unhampered by conventional safeguards in liberal democracy, promoting authoritarian values.

- Not just 'anti-democratic' or 'illiberal'
- Yet...
- Not all populists are authoritarian, also libertarian-populists
- Not all authoritarians are populist

### Comprehensive explanations

### Institutional contexts

e.g. electoral systems and thresholds

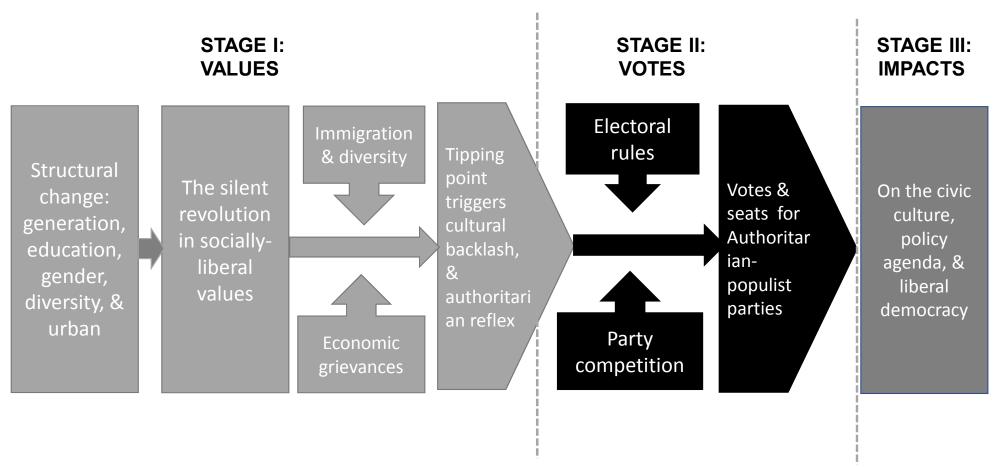

### Demand side

Values and attitudes in the mass electorate

### Supply side

Incentives for elite competition and cooperation

### Cultural backlash framework

Source: Pippa Norris and Ronald Inglehart Cultural Backlash Cambridge University Press, Fall 2018

### The cultural backlash thesis

- Rise of progressive and post-materialist values during the 1970s in Western societies
- Value diverse forms of sexuality and gender identities, LGBT rights, same sex marriage, secular, cosmopolitan, open-mindedness towards diversity of lifestyles and peoples, support for international cooperation but skeptical towards political institutions
- Catalyzes a cultural backlash among social conservatives
- If so, authoritarian populist values and votes should be predicted by generation, college education, urbanization, religiosity, race/ethnicity, and sex – as well as by socially-conservative attitudes and authoritarian values

### Alternative economic insecurity thesis

- 1950s and 1960s Seymour Martin Lipset and Daniel Bell
- Fascism in Weimar Germany, Poujadism in France, McCarthyism in the US
- Authoritarian reaction against modernity by petite bourgeoisie fearing downward mobility squeezed between big business and organized labor
- Today emergence of new under-class in global markets, low-skilled, low-wages, benefit-dependent, poor job security, vulnerable to social risks
- If so, authoritarian-populism should be concentrated among economically marginalized - unskilled workers, those lacking college degrees, unemployed, living in inner cities, welfare dependent, and subjective feelings of economic insecurity and lack of social mobility

2. Classifying parties

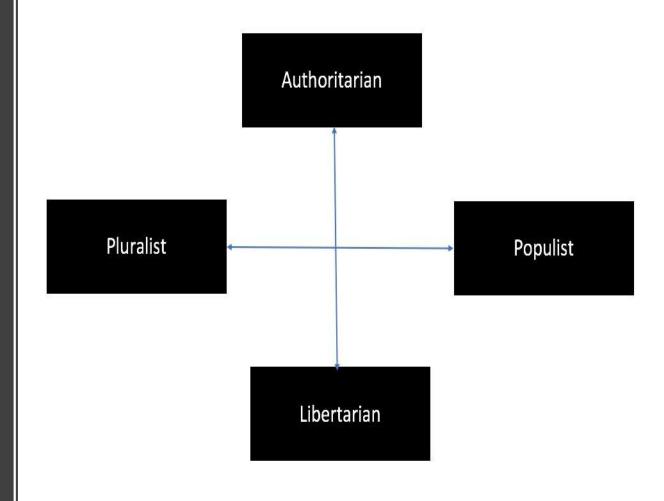

Parties & voters

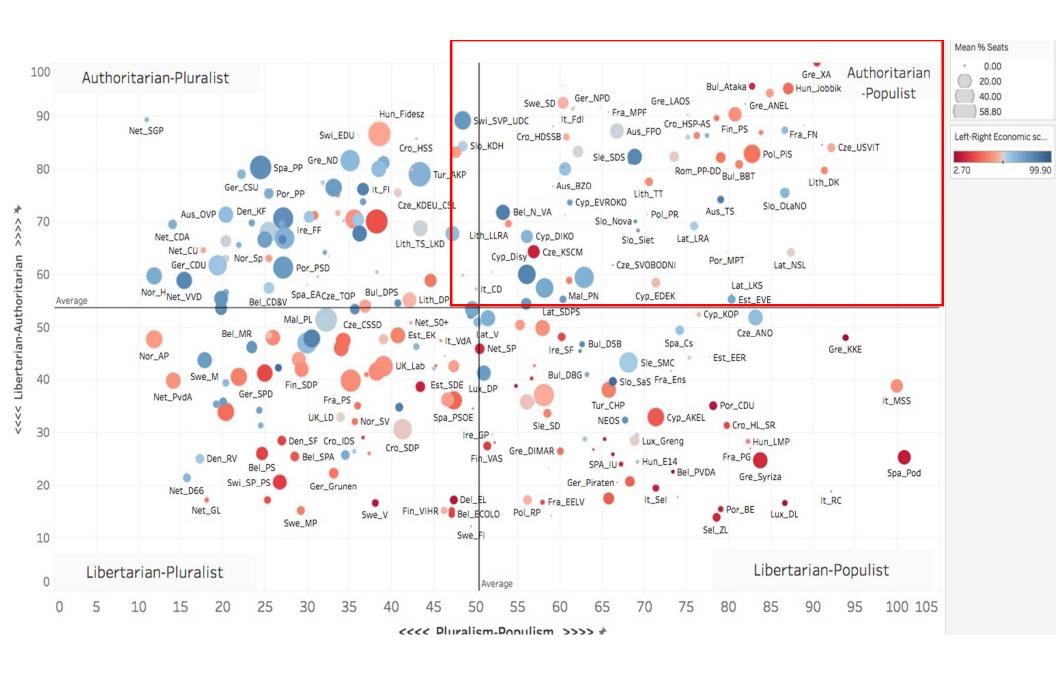

# 3 Dimensions of party competition

| CHES Variable Description                                    |   | Cultural | Populist | Economic |
|--|---|----------|----------|----------|
| name   |   | cleavage | rhetoric | cleavage |
|  | AUTHORITARIAN VALUES  | .935     |          |          |
| Galtan   | Party positions towards democratic<br>freedoms and rights; libertarian parties<br>favor expanding personal freedoms;<br>authoritarian parties value order, tradition,<br>and stability. |          |          |          |
| Nationalism  | Pro-nationalism   | .923     |          |          |
| Civlib_laworder  | Favors tough measures to fight crime rather than the protection of civil liberties  | .921     |          |          |
| Multiculturalism   | turalism Against multiculturalism and the integration<br>of immigrants and asylum seekers   |          |          |          |
| Sociallifestyle  | Opposes liberal social lifestyles (e.g. homosexuality)  | .904     |          |          |
| Immigrate_policy   | Favors restrictive policy on immigration  | .894     |          |          |
| Ethnic_minorities  | Opposes rights for ethnic minorities  | .876     |          |          |
|  | POPULIST RHETORIC   |          |          |          |
| Anti-corrupt salience  | Salience of anti-corruption   |          | .712     |          |
| Anti-elite_salience  | Salience of anti-elite and anti-establishment rhetoric  |          | .932     |          |
|  | LEFT-RIGHT ECONOMIC VALUES  |          |          |          |
| Deregulation   | Favors market regulation or deregulation  |          |          | .965     |
| Econ_interven  | Favors or opposed to state intervention on the economy  |          |          | .954     |
| Redistribution   | Favors or opposed to redistribution of wealth from the rich to the poor   |          |          | .928     |
| Spendytax Favor or opposes cutting taxes and public services |   |          |          | .911     |

Notes: CHES 2014 expert survey of political party positions in 31 countries, including all EU member states plus Norway, Switzerland and Turkey, Dec 2014-Feb 2015. Factor analysis with rotated varimax and Kaiser normalization.

# Cleavages in party competition

### Authoritarian-populist parties, Western Europe, 2000-2015

|                   | Party Name (English)                  | Abr.    | % Vote | N. elec |
|-------------------|---------------------------------------|---------|--------|---------|
| MAJOR (7)         |                                       |         |        |         |
| Switzerland       | Swiss People's Party                  | SVP-UDC | 27.9   | 4       |
| Norway            | Progress Party                        | Fr      | 19.0   | 4       |

## 3. European Evidence

### Generational turnover in the electorate

Source: The European Social Survey, pooled 2002-2016

## But older generations still majority of voters

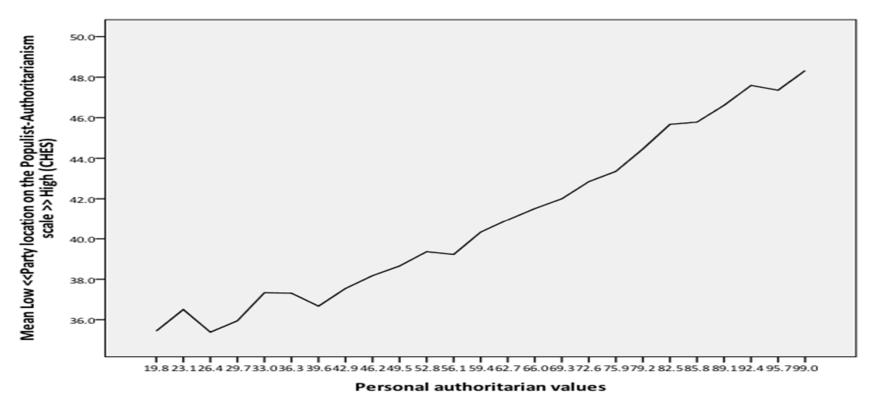

## Measuring voter's authoritarian values

| Description   | Authoritarian values | Libertarian values |
|---|----------------------|--------------------|
| It is important to her/him always to behave properly. She/he wants to avoid doing anything people would say is wrong.   | .728                 |                    |
| It is important to her/him to live in secure surroundings. She/he avoids anything that might endanger her/his safety.   | .711                 |                    |
| It is important to her/him that the government ensures her/his safety against all threats. She/he wants the state to be strong so it can defend its citizens. | .704                 |                    |
| Tradition is important to her/him. She/he tries to follow the customs handed down by her/his religion or her/his family.                                      | .652                 |                    |
| She/he believes that people should do what they're told. She/he thinks people should follow rules at all times, even when no one is watching.                 | .652                 |                    |
|   |                      |                    |
| She/he likes surprises and is always looking for new things to do. She/he thinks it is important to do lots of different things in life."                     |                      | .783               |
| She/he looks for adventures and likes to take risks. She/he wants to have an exciting life.   |                      | .710               |
| Thinking up new ideas and being creative is important to her/him. She/he likes to do things in her/his own original way                                       |                      | .700               |
| It is important to her/him to make her/his own decisions about what she/he does. She/he likes to be free and not depend on others.                            |                      | .601               |
| It is important to her/him to listen to people who are different from her/him. Even when she/he disagrees with them, she/he still wants to understand them.   |                      |                    |

**Note:** The Schwartz value scales in the ESS use the following question: "Now I will briefly describe some people. Please listen to each description and tell me how much each person is or is not like you. Use this card for your answer." Response categories to the above questions in 6-point scales range from 1 'Not very much like me' to 6 'Very much like me at all.' The coefficients in the table are generated by principal component factor analysis with varimax rotation and kaiser normalization. **Source:** European Social Survey 1-7

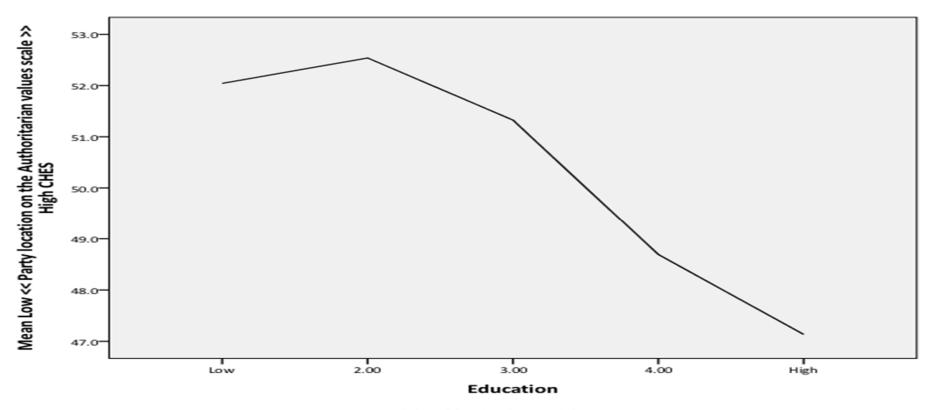

## Authoritarian values among voters predict support for parties with authoritarian policies

Cases weighted by Design weight

## 4. Conclusions & implications

### Conclusions

- 1. Age, education, urbanization & cultural values predict vote for authoritarianpopulist parties in Europe
- 2. Older, non-college educated, rural areas with most authoritarian values drive European voting for populist-authoritarian parties
- 3. Why the change? Tipping point thesis –rising tide of social liberalism in the population (but slower shift in the electorate) threatens socially conservative authoritarian voters identities around faith, family, nation
- 4. Period effects of economic conditions and social diversity reinforces these threats
- Parties and leaders respond by heightening and reinforcing cultural threat perceptions to mobilize support
