

10 REDUCED INEQUALITIES

IOGT International and International Federation for Family Development invite you to a side event

TIME TO DELIVER ON SOCIAL INCLUSION

How Alcohol Taxation Helps Reduce Inequalities and Promote Social Development

February 19, 2019, 03.00 PM - 04.15 PM
Conference room A, GA Building UN
UN Headquarters, New York

The 2018 WHO Global Status Report on Alcohol details unimpeachable scientific evidence about how alcohol frequently fuels inequalities between and within countries, hindering the achievement of SDG 10, which calls for inequalities to be reduced. For example, harms from a given amount of alcohol consumption are higher for people and their families from lower socio-economic groups than for people, families and communities with more resources. This pattern of greater "harm per litre" is found for many different harms caused by alcohol. This side event will explore the evidence-base and the potential of a powerful measure to tackle alcohol as hinder to social inclusion and equality: alcohol taxation.

S P E A K E R S P R O G R A M

Dr. Nata Menabde

WHO Office at the United Nations, New York

Permanent Mission of Estonia (tbc)

Permanent Mission of Philippines

Kristina Sperkova

President, IOGT International
