

## More proposals, more Echos

It's **possible** in a new reality we make, create new circumstances according to the possibility of each country. Defeating abuse, defeating equality. Places where the attack increase, the proposal is reduced and the progress breaking down.

We are in a society where we have young people worried about climate change, we have young people innovating to create those new circumstances **but** we also have depressed young people whom can not find their value end up with suicide and alcohol and drug addictions.

**Fearful** immigrant prank women that are force from authorities to abort when they cross from their country to another.... authorities that are abusing their power.

Immigrants who do not know if they will be able to cross from one country to another without running the risk of being burned in a Migration Center.

**Mexico** is one of them and all we can listen is the silence of authorities and the noise of the victims screaming for help.

We **must** propose Environmental Education on Elementary Schools, adaptate Public Politics for people's access to health, Political Parties sanctions over not participating in elections campaigns for two periods for gender political violence... I've experienced myself for been young and women as running for the Federal Congress of Mexico in 2021.

But that's no reason to stop..... that's another **BIG** reason to continue, that's another reason to never give up and keep on trying building the right spaces for every woman and every young person that are raising their hands.

*We can not let **space** between the nothing and nowhere, we can not let **space** between the **wonder** and the **doubt**. If we don't think in today's generation, it won't there be a "next healthy generation" in mental health, healthy environment, healthy economics, healthy development, **healthy** equality.*

*That's why as a **Women Association in Mexico** we promote and look for politic and decision places where all of us can be **heard**.*

It is my greatest honor not only standing here, at the United Nations, speaking on behalf the Asociacion Nacional Civica Femenina and Mexico, but because standing here means having the opportunity to propose and give echo to Mexican people voices.

Thank you very much.
