

Closing remarks by Hon. Princess Kasune, MP, the Minister of Central Province, Zambia

The Chairperson

Zambia appreciate the Conesus reached on the political declaration.

We recognize the need for international support on the population and development issues. This does not only mean sexual and reductive health and rights but also development with a full human face.

We affirm our commitment to ensure that the Cairo ICPD programme action is important now and beyond.

We could have been much happier if the issue of rights to development were included.

Further addressing issues of poverty and hunger should be noted for Zambia. You may wish to note that the President of republic Zambia declared drought as the disaster. It is important that will continue to push together for the generation to come, and leave this world better than we found it.

Thank You
