15 April 2024

English only

---

**Commission on Population and Development****Fifty-seventh session**

29 April – 3 May 2024

Item 4 of the provisional agenda\*

**Programme implementation and future programme  
of work of the Secretariat in the field of population****Programme plan for 2024 and programme performance  
for 2022, and draft proposed programme plan for 2025 and  
programme performance for 2023: subprogramme 5,  
Population, of programme 7, Economic and social affairs****Note by the Secretariat**

1. The draft proposed programme plan of the Secretariat in the field of population for 2025, which is contained in annex 1 to the present note, is submitted for the consideration of the Commission on Population and Development in compliance with the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation (ST/SGB/2018/3). 2. Beginning in 2020, the strategic framework and proposed programme of work were subject to the annual programme budget approved by the General Assembly in its resolution [72/266 A](#), including a results framework. A draft of the results framework was proposed in annex III to the report of the Secretary-General entitled “Shifting the management paradigm in the United Nations: improving and streamlining the programme planning and budgeting process” ([A/72/492/Add.1](#)). In its resolution [77/267](#), the Assembly decided to lift the trial period effective from 2023 and requested the Secretary-General to continue with the submission of the programme budget according to an annual cycle.

3. The draft proposed programme plan presented below includes, in addition to the programme narrative, a list of deliverables formulated within the proposed programme plan and budget of subprogramme 5, Population, of programme 7, Economic and social affairs, for 2025.

4. The programme plan of the Secretariat in the field of population for the year 2024, as published in [A/78/6\(Sect.9\)](#) for subprogramme 5, Population, of programme 7, Economic and social affairs, is contained in annex 2 to the present note, for reference and in line with the practice followed from 2020 to 2023.

\* [E/CN.9/2023/1](#).

4. The Commission is invited to consider and take note of the programme plan narrative and deliverables to be included in the proposed programme plan and budget for 2025. In keeping with paragraph 10 of General Assembly resolution 77/267, the part consisting of the programme plan and programme performance information (part II) is submitted through the Committee for Programme and Coordination for the consideration of the Assembly. The Committee for Programme and Coordination remains the main subsidiary organ of the General Assembly and the Economic and Social Council for planning, programming and coordination, as well as in verifying that the programmes of activities of the Organization are implemented in line with the legislative mandates and that the full implementation of regulations and rules is ensured.

---

## Annex 1

### **Draft proposed programme plan of the Population Division, Department of Economic and Social Affairs, for 2025**

Excerpted from unedited draft of [A/79/6\(Sect.9\)](#), Proposed programme budget for 2024, Part IV, International cooperation for development, Section 9, Economic and social affairs, Programme 7, Economic and social affairs (programme of work from paragraphs 9.71 to 9.83; legislative mandates from paragraph 9.14)

#### **Subprogramme 5 Population**

##### **Objective**

- 9.71 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interactions between population change and sustainable development among policymakers and the public, and strengthen the international community's capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

##### **Strategy**

- 9.72 To contribute to the objective, the subprogramme will:
- (a) Prepare studies on issues related to population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;
  - (b) Produce comprehensive global data sets on selected topics, as well as brief reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;
  - (c) Provide capacity development on population data and analysis to requesting countries and to United Nations country teams;
  - (d) Provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;
  - (e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, with a focus on the global monitoring of Sustainable Development Goal indicators on reproductive health, international migration and child and maternal mortality, often in partnership with other entities of the United Nations system;
  - (f) Improve the United Nations estimates and projections of the global population and study the interaction of COVID-19 with demographic phenomena, including mortality, population ageing, fertility and family planning and international migration, and including these analyses, as appropriate, in publications and technical materials.
- 9.73 The above-mentioned work is expected to result in:
- (a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme's data and findings in the work of stakeholders;

- (b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;
- (c) Advancement in the international community's usage of scientifically grounded information about the demographic impacts of the COVID-19 pandemic, in particular on mortality.

## Programme performance in 2023

### Better informed global analysis of gender equality and women's empowerment, which incorporates key population indicators

- 9.74 Family planning and adolescent birth rate data sets were incorporated into the new Women's Empowerment Index, a composite index created by United Nations Women and United Nations Development Programme to guide national and international policy action, research and advocacy. The subprogramme provided technical advice on the indicators and the construction of the Index.
- 9.75 Progress towards the objective is presented in the performance measure below (see table 9.17).

Table 9.17  
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>
–	–	Member States have access to more targeted population data, integrated with other indicators on gender equality and women's empowerment

## Planned results for 2025

### Result 1: strengthened evidence on population-related data and policies for the further implementation of the Programme of Action of the International Conference on Population and Development

#### Programme performance in 2023 and target for 2025

- 9.76 The subprogramme's work contributed to Member States' access to integrated evidence on population-related programmes and policies, including through the collection of available regional and national reports on the 30-year review of implementation of the Programme of Action of the International Conference on Population and Development on the Commission on Population Development website, which met the planned target.
- 9.77 Progress towards the objective and the target for 2025 are presented in the performance measure below (see table 9.18).

Table 9.18  
Performance measure

2021 (actual)	2022 (actual)	2023 (actual)	2024 (planned)	2025 (planned)
Expert panel stresses the need for strengthened integration of country inputs and outreach to countries	Participation of Member State delegates and civil society representatives in events on topics related to the Programme of Action of the International Conference on Population and Development	Countries benefit from strengthened integration of evidence in their preparations for the 2024 review of the Programme of Action	Review of the implementation of the Programme of Action by the Commission on Population and Development leads to renewed commitment by Member States to its further implementation	Countries implement commitments made at the Commission on Population and Development

**Result 2: enhanced integration of the population dimension into implementation of the 2030 Agenda by Member States**

**Programme performance in 2023 and target for 2025**

- 9.78 The subprogramme's work contributed to a cumulative total of 3 data sets in the Data Portal with 156,000 annual users, which exceeded the planned target of 3 datasets and 75,000 annual users.
- 9.79 Progress towards the objective and the target for 2025 are presented in the performance measure below (see figure 9.VI)

Figure 9.VI

**Performance measure: number of users of the Data Portal (annual) and number of data sets contained in the Data Portal (cumulative)**

### Result 3: Enhanced comparability of estimates and projections of urbanization and spatial distribution for the Sustainable Development Goals

#### Proposed programme plan for 2025

9.80 The *World Urbanization Prospects* is used within the United Nations system and among Member States as a measure of socio-economic development and for disaggregation of Goal indicators by urban classification. Changes in spatial distribution of the global population have implications for managing urbanization in a sustainable and equitable manner, and for achieving the Goals, particularly Goal 11, which calls for making cities and human settlements inclusive, safe, resilient, and sustainable.

#### *Lessons learned and planned change*

9.81 The lesson for the subprogramme was that the *World Urbanization Prospects* data set could be improved to meet the growing demand for geographical detail and enhance comparability between countries which was limited due to varied national definitions of “urban”. In applying the lesson, the subprogramme will build on the collaboration with relevant governments and partners to incorporate the new “degree of urbanization”, a more nuanced and internationally comparable measure of urbanization.

9.82 Expected progress towards the objective is presented in the performance measure below (see figure 9.19)

Table 9.19  
Performance measure

<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (actual)</i>	<i>2024 (planned)</i>	<i>2025 (planned)</i>
Degree of urbanization methodology endorsed by United Nations Statistical Commission	Selected countries piloted new methodology to measure urbanization	Stakeholders and Member States contribute to methodological advancements in estimation and projection of urbanization time series	Stakeholders and Member States contribute to a systematic update of database with census data on urban and rural populations	An increased number of stakeholders and Member States implements the new “degree of urbanization” to enable comparable global urbanization trends

### Deliverables

9.83 Table 9.20 lists all deliverables of the subprogramme.

Table 9.20  
Subprogramme 5: deliverables for the period 2023–2025, by category and subcategory

<i>Category and subcategory</i>	<i>2023 planned</i>	<i>2023 actual</i>	<i>2024 planned</i>	<i>2025 planned</i>

2003/1	Population, education and development	2010/1	Health, morbidity, mortality and development
2004/1	Work programme in the field of population	2011/1	Fertility, reproductive health and development
2004/2	Follow-up to the Programme of Action of the International Conference on Population and Development	2012/1	Adolescents and youth
2005/1	Population, development and HIV/AIDS, with particular emphasis on poverty	2013/1	New trends in migration: demographic aspects
2005/2	Contribution of the implementation of the Programme of Action of the International Conference on Population and Development, in all its aspects, to the achievement of the internationally agreed development goals, including those contained in the United Nations Millennium Declaration	2014/1 2016/1	Assessment of the status of implementation of the Programme of Action of the International Conference on Population and Development Strengthening the demographic evidence base for the 2030 Agenda for Sustainable Development
2006/1	Methods of work of the Commission on Population and Development	2021/1	Population, food security, nutrition and sustainable development
2006/2	International migration and development	2022/1	Population and sustainable development, in particular sustained and inclusive economic growth

## Annex 2

### Programme plan of the Population Division, Department of Economic and Social Affairs, for 2024

Excerpted from [A/78/6\(Sect.9\)](#), Proposed programme budget for 2024, Part IV, International cooperation for development, Section 9, Economic and social affairs, Programme 7, Economic and social affairs (programme of work from paragraphs 9.74 to 9.85; legislative mandates from paragraph 9.17)

#### Programme of work

#### Subprogramme 5 Population

##### Objective

- 9.74 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interactions between population change and sustainable development among policymakers and the public, and strengthen the international community's capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

##### Strategy

- 9.75 To contribute to the objective, the subprogramme will:
- (a) Prepare studies on issues related to population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;
  - (b) Produce comprehensive global data sets on selected topics, as well as brief reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;
  - (c) Provide capacity development on population data and analysis to requesting countries and to United Nations country teams;
  - (d) Provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;
  - (e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, with a focus on the global monitoring of Sustainable Development Goal indicators on reproductive health, international migration and child and maternal mortality, often in partnership with other entities of the United Nations system;
  - (f) Improve the United Nations estimates and projections of the global population and study the interaction of COVID-19 with demographic phenomena, including mortality, population ageing, fertility and family planning and international migration, and including these analyses, as appropriate, in publications and technical materials.
- 9.76 The above-mentioned work is expected to result in:

- (a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme's data and findings in the work of stakeholders;
- (b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;
- (c) Advancement in the international community's usage of scientifically grounded information about the demographic impacts of the COVID-19 pandemic, in particular on mortality.

## Programme performance in 2022

### Eight billion global population milestone heightened global attention to links between population and sustainable development

- 9.77 The updated United Nations population projections in *World Population Prospects 2022*, released in July 2022, indicated that the global population would reach 8 billion in mid-November 2022. That milestone provided an opportunity to increase public knowledge of population trends and the interaction between population change and sustainable development, including social, economic and environmental aspects. The subprogramme capitalized on the "Day of 8 Billion" (15 November) to bring increased attention of stakeholders to the challenges and opportunities of the continued, albeit decelerating, growth of the human population. Materials, which included a press release, a policy brief, an op-ed by the Secretary-General and informational videos, stressed the diverse demographic circumstances of countries around the world and the shared responsibility to protect both people and planet. The campaign, developed in collaboration with the Department of Global Communications and the United Nations Population Fund, drew extensive media coverage.
- 9.78 Progress towards the objective is presented in the performance measure below (see table 9.16).

Table 9.16

#### Performance measure

2020 (actual)	2021 (actual)	2022 (actual)
–	–	Governments, the general public and other stakeholders benefited from access to new population estimates and to information on links between population and sustainable development, evidenced by 4,600 media articles covering <i>World Population Prospects 2022</i>

## Planned results for 2024

### Result 1: improved estimates of the number of international migrants

#### Programme performance in 2022 and target for 2024

- 9.79 The subprogramme's work contributed to the systematic and in-depth review of empirical data on international migrants by age, sex and origin. Estimates did not meet the planned target of member States, policymakers and the public gaining knowledge and having access to updated and improved data on the stock of international migrants. The target was not met because many censuses, which are the main source of data used to estimate the number of international migrants, were postponed in 2020 and 2021 owing to the COVID-19 pandemic.

9.80 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.17).

Table 9.17

**Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Member States benefited from access to an update of the stock of international migrants, produced using pre-existing methods, including an adjustment for the impact of COVID-19	Data reviewed for 183 countries or areas and piloted improvements in the estimation of the stock of international migrants, which would further benefit stakeholders, including Member States	Systematic and in-depth review of empirical data on international migrants by age, sex and origin	Stakeholders, including Member States, have access to additional data for the remainder of the 235 geographical units in the migrant stock database; improvements implemented in the estimation of numbers of international migrants	Increased use of the estimates by stakeholders, as reflected in a 10 per cent increase in citations between 2023 and 2024

**Result 2: strengthened evidence on population-related data and policies for the further implementation of the Programme of Action of the International Conference on Population and Development**

**Programme performance in 2022 and target for 2024**

- 9.81 The subprogramme's work contributed to the participation of Member States and NGOs in briefings, expert group meetings and consultations on topics related to the Programme of Action of the International Conference on Population and Development, which met the planned target.
- 9.82 Progress towards the objective and the target for 2024 are presented in the performance measure below (see table 9.18).

Table 9.18

**Performance measure**

<i>2020 (actual)</i>	<i>2021 (actual)</i>	<i>2022 (actual)</i>	<i>2023 (planned)</i>	<i>2024 (planned)</i>
Shift to virtual events enables broader engagement	Expert panel stresses the need for strengthened integration of country inputs and outreach to countries	Participation of Member State delegates and civil society representatives in events on topics related to the Programme of Action of the International Conference on Population and Development	Countries benefit from strengthened integration of evidence in their preparations for the 2024 review of the Programme of Action	Review of the implementation of the Programme of Action by the Commission on Population and Development leads to renewed commitment by Member States to its further implementation

2020 (actual)	2021 (actual)	2022 (actual)	2023 (planned)	2024 (planned)
---------------	---------------	---------------	----------------	----------------

### Result 3: enhanced integration of the population dimension into implementation of the 2030 Agenda by Member States

#### Proposed programme plan for 2024

- 9.83 Data users and stakeholders at all levels need timely access to data on demographic topics, including on population size and age structure, fertility, family planning, household size and composition, mortality, international migration, and urbanization. In order to improve public access to the information, the subprogramme developed a new web platform: the Data Portal. The initial focus was on incorporating reproductive health indicators into the Data Portal, giving priority to a subset of countries with high levels of unmet need for family planning. Results from the *World Population Prospects 2022* were successfully incorporated into the Data Portal, but other subprogramme data sets have not yet been integrated.

#### *Lessons learned and planned change*

- 9.84 The lesson for the subprogramme was that the fragmented data infrastructure for the various data sets had been challenging to maintain and was inadequate to query indicators from multiple data sets, enable innovative data visualizations or provide advanced users access to the data using an industry-standard open application programming interface. In applying the lesson, the subprogramme will expand and upgrade both the content and functionalities of the Data Portal to provide the unified dissemination of a growing number of global data sets, along with increased data visualization and query options, to enhance Member States' and other stakeholders' analytical capacities to integrate the population dimension into implementation of the 2030 Agenda.
- 9.85 Expected progress towards the objective is presented in the performance measure below (see figure 9.VII)

Figure 9.VII

**Performance measure: number of users of the Data Portal (annual) and number of data sets contained in the Data Portal (cumulative)**

#### Deliverables

- 9.86 Table 9.19 lists all deliverables of the subprogramme.

Table 9.19
