

Lessons Learned from the 2010 Round of Census and Planning for the 2020 Round to meet the Post 2015 Agenda:

A Global and Regional Perspective

BENOIT KALASA

DIRECTOR, TECHNICAL DIVISION

UNFPA

NEW YORK, OCTOBER 5TH 2015

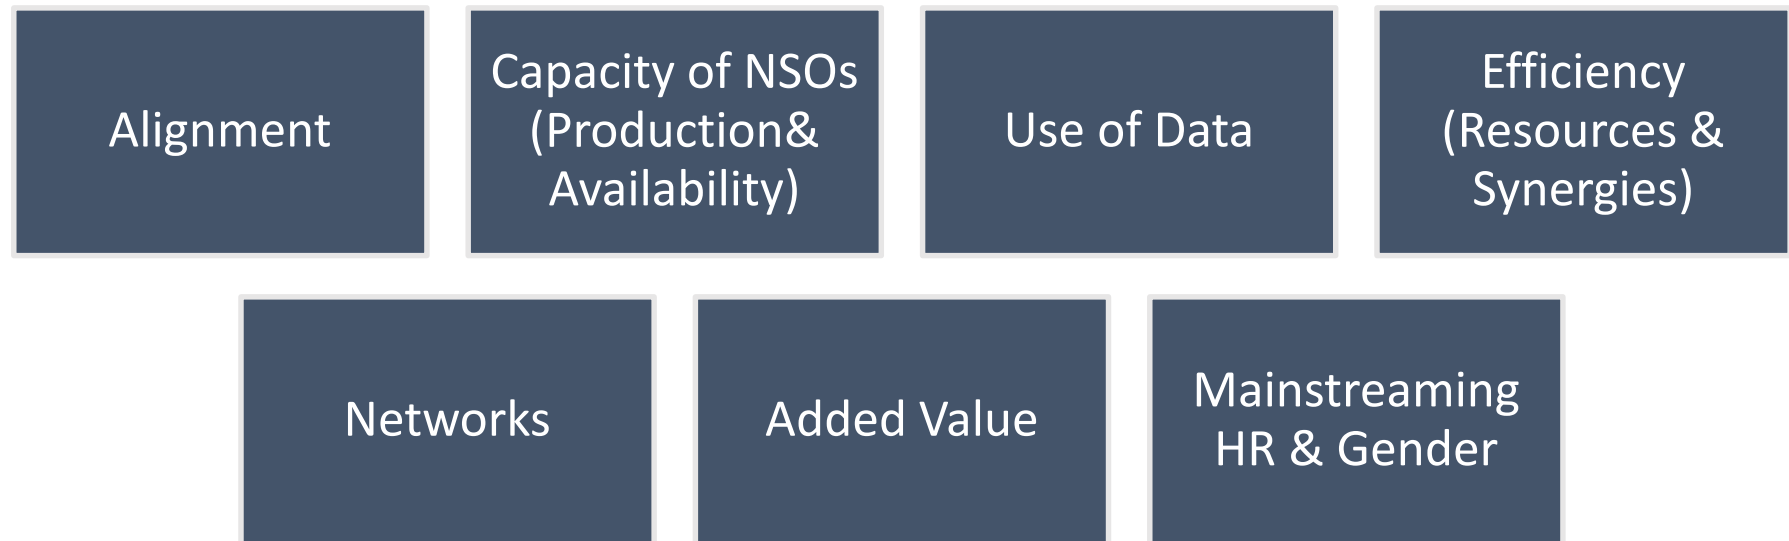

UNFPA STRATEGIC FRAMEWORKS: OUTCOMES LINKED TO CENSUS

Framework	Focus / emphasis
MYFF 2004 -2007	Improve utilization of population data
UNFPA Strategic Plan 2008-2011	Data used at national and sub-national levels to develop and monitor policies and programme implementation.
MTR of the Strategic Plan, 2012-2013	Improve data availability
UNFPA Strategic Plan 2014-2017	Strengthened national policies by means of integrating evidence-based analysis on population dynamics

TYPOLGY OF INTERVENTIONS

Strategic Interventions:

- **Advocacy and policy dialogue**
- **Technical assistance**
- **Capacity Development**
- Service delivery to provide **direct financial support**
- Facilitation of **South-South and triangular cooperation.**

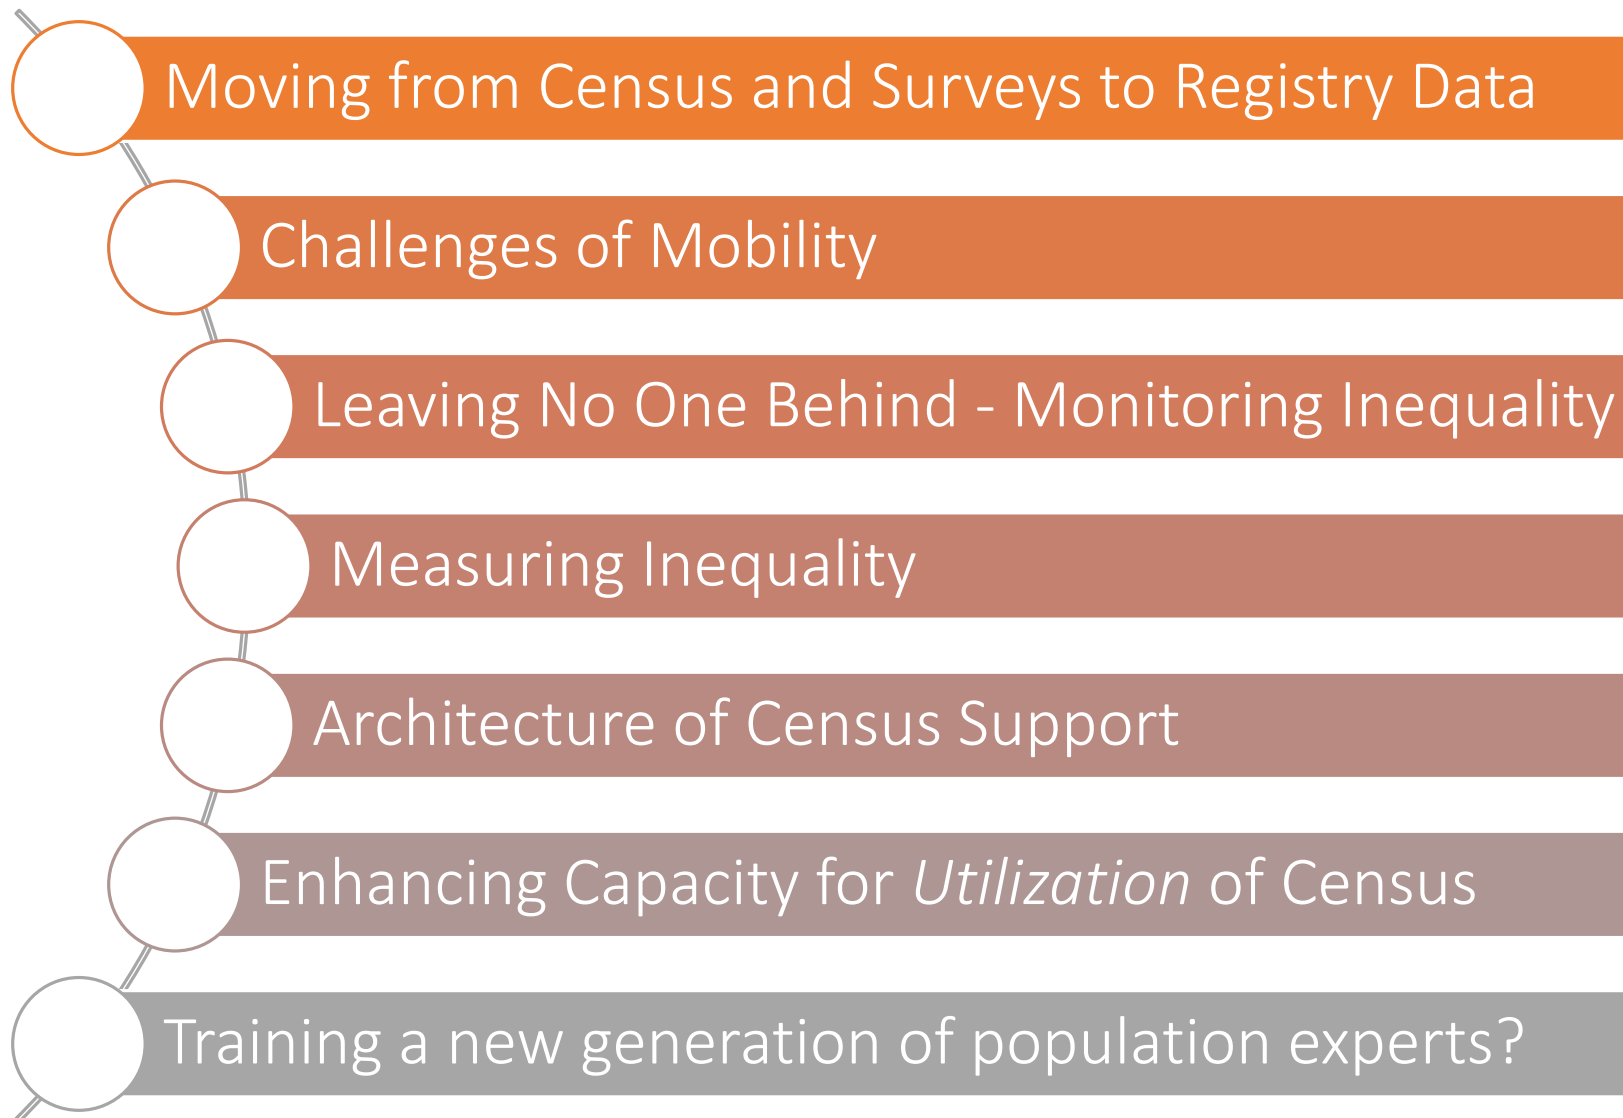

At Three Levels

New Demands New Opportunities

Agenda 2030 demands
that also provide new entry points

The way Ahead

Global Standards

- Dissemination at regional and national levels -quality assurance role
- Informing global discussions with lessons from the field

New Technologies – IT-based innovation

- *to facilitate timely undertaking of census and analysis of census data; and*
- *packaging data in user-friendly formats to enhance data use for policy making, bringing tangible benefits for planning, resource allocation and assessment/evaluation.*

Resource Mobilization

- *innovative approaches to reduce costs, improve efficiency and mobilize support;*

Capacity Building

- Through regional centers of excellence
- At national level – guidelines and methodologies

Data dissemination and use

- Mechanisms to ensure prompt and wide dissemination of results;
- Analysis
- Data informs planning, policy making and evaluation
