Mr Chair,

At the end of our mandate, the locally elected Council members present, to the sahraoui populations, an assessment report and a statement of account that contains details of projects and expenditure of budget with respect to the full application of good governance and accountability.

One of the major objectives of the Council is to double the local GDP, through creating projects and job opportunities and stimulating financial resources, to allow sahraoui populations to benefit from their own resources.

Mr Chair,

I am here today, as a democratically elected Sahroui, representing the local population of the Sahara region.

Me, and my elected Council, are mandated to legally and democratically represent the local population, listen to them, share their daily concerns, exchange with them, and promote their welfare, which make of us the real and the legitimate representatives of the sahraoui populations.
