3. *Emphasizes* the importance of integrating the goal of universal access to reproductive health by 2015 set at the International Conference on Population and Development into strategies to attain the internationally agreed development goals, including those contained in the Millennium Declaration, in particular those related to improving maternal health, reducing infant and child mortality, promoting gender equality, combating HIV/AIDS, eradicating poverty and achieving universal access to primary education;

4. *Also emphasizes* the need to strengthen policy and programme linkages and coordination between HIV/AIDS and sexual and reproductive health and their inclusion in national development plans, including poverty reduction strategies where they exist and sector-wide approaches where they exist, as a necessary strategy to fight the HIV/AIDS pandemic and to mitigate its impact on populations, which could result in more relevant and cost-effective interventions with greater impact;

5. *Further emphasizes* the importance of closer attention in policy dialogue and policy development to the interrelations between population structure and trends, including population ageing, and poverty and development;

6. *Urges* Member States and the organizations and bodies of the United Nations system to strengthen international cooperation in the area of international migration and development in order to address the root causes of migration, especially those related to poverty, and to maximize the benefit of migration for those concerned;

7. *Stresses* that promoting women's reproductive health, their full enjoyment of all human rights and fundamental freedoms, their empowerment, their equal access to resources and their freedom from gender-based violence is essential to achieving gender equality, addressing the feminization of poverty and halving poverty by 2015;

8. *Welcomes* the increase in both domestic expenditures and international donor assistance for the achievement of the goals of the International Conference on Population and Development;

9. *Recognizes* that the effective implementation of the Programme of Action requires an increased commitment of financial resources, both domestically and externally, and in this context calls upon developed countries to complement the national financial efforts of developing countries related to population and development and to intensify their efforts to transfer new and additional resources to the developing countries, in accordance with the relevant provisions of the Programme of Action, in order to ensure that population and development objectives and goals are met;

10. *Encourages* Governments, international organizations, including those of the United Nations system, international financial institutions and other relevant stakeholders to assist the developing countries and countries with economies in transition in the implementation of the Programme of Action through technical assistance and capacity-building activities in order to accelerate that implementation;

11. *Calls for* the allocation of adequate resources to all areas of the Programme of Action, including the costed package.
