AIMS
The map of Malawi below shows projects of various DPs, overlaid with sub-national poverty data. This type of map can trigger a dialogue between donors and partner countries, and support an informed decision making process on aid coordination and aid usage. The next generation of GIS dashboards will also be used as a transparency tool for the wider public.
Malawi Aid Management Platform
Active Projects and Poverty Headcount

Project Donor
- AfDB
- AusAid
- BADEA
- CIDA
- CDC
- DfID
- European Union
- FAO
- FICA
- GIZ
- ICEIDA
- IFAD
- IrishAid
- Japan
- JICA
- KFW Bankengruppe
- Kuwait Fund
- NORAD
- OPEC Fund
- People’s Republic of China
- UNDP
- UNHCR
- UNIDO
- UN Programme on HIV & AIDS
- USAID
- WFP
- World Bank

Cumulative Commitment (US$)
- 0 to 25,000,000
- 250,000,001 to 750,000,000
- 75,000,001 to 630,000,000

Poverty Headcount (%)
- 0
- 1 to 56
- 57 to 68
- 69 to 77
- 78 to 84
- missing data

AIMS

• software capabilities and functionality with improved graphical and analytic tools, together with a new user-friendly

• Includes an enhanced public view and desktop homepage, both of which have been overhauled with a new design. The revamped layout of the desktop homepage makes text easier to read and the page easier to navigate.

• Includes new features like a wide array of dashboards for analytical reporting and graphical analysis. Users can find expanded Organization, Sector, and Region dashboards
M&E

• Some challenges in the implementation of M&E systems have been identified:

1. First, the information required for the implementation of such systems is typically not
• delivered in a timely manner, leading to the use of out-of-date information. Effective M&E, however, requires timely and accurate data.

2. Second, countries do not possess the institutional capacity to always carry out their duties, as positions are understaffed and undercompensated. This challenge is only exacerbated by financial constraints, including meagre budgets for M&E activities.

3. Third, political motivations can influence M&E exercises and dilute the accuracy of project/program reports and negotiations.
Results Dashboard

- Tanzania is the pilot country for a new dashboard to assist policymakers in Managing for Results
- Combines financial inputs and outputs, and development outcomes, in a single interactive Results Dashboard
