I. Background

1. In keeping with guidance received from the General Assembly, the longer-term objectives of the Organization set out in the present document reflect the legislative mandates of Member States in all areas of the activities of the United Nations. Mandates are referenced in parts II and III of each programme budget section. They collectively form the basis for the preparation of the proposed programme budget, which translates legislative mandates into long-term priorities and objectives and work programmes. The plan outline (part I) and programme plan (part II) are the principal policy directives of the United Nations and serve as the basis for programme planning, budgeting, evaluation and monitoring (General Assembly resolution 72/266 A).

II. Longer-term objectives of the Organization

2. The longer-term objectives of the Organization continue to be grounded in the Charter of the United Nations and its Articles and revolve around the mandates established by Member States, including, most recently, General Assembly resolution 79/1, entitled "The Pact for the Future". On the promotion of sustained economic growth and sustainable development, climate change and environmental issues, these include the 2030 Agenda for Sustainable Development (General Assembly resolution 70/1), the decade of action and delivery for sustainable development (resolution 74/4), the Addis Ababa Action Agenda of the Third International Conference on Financing for Development (resolutions 69/313 and 75/322), Agenda 21: Programme of Action for Sustainable Development (resolution 73/227), the Beijing Declaration and Platform for Action (resolutions 50/42 and 78/182), the Doha Programme of Action for the Least Developed Countries (resolutions 76/258 and 79/218), the Mauritius Declaration and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States (resolution 59/311), the Monterrey Consensus (resolution 56/210 B), the New Urban Agenda (resolution 71/256), Our ocean, our future: call for action (resolution 71/312), the Paris Agreement (FCCC/CP/2015/10/Add.1, as referenced in resolution 71/228), the protection of global climate for present and future generations of humankind (resolution 73/232), the SIDS Accelerated Modalities of Action (SAMOA) Pathway (resolutions 69/15 and 79/203), the Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity (resolution 78/317), the Programme of Action for Landlocked Developing Countries for the Decade 2024–2034 (resolution 79/233), the repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review (resolutions 72/279, 79/226 and 79/258 (sect. XVIII)), and the importance of the full, effective, meaningful, constructive and inclusive participation of youth in society, including engagement in policymaking and decision-making processes (resolutions 76/306 and 78/179). On the maintenance of international peace and security, they include the Security Council resolution on developing a comprehensive and integrated performance policy framework for United Nations peacekeeping operations (resolution 2436 (2018)), peacebuilding and sustaining peace (Assembly resolutions 70/262, 72/276 and 75/201 and Council resolution 2282 (2016)), the review of the United Nations peacebuilding architecture (Assembly resolutions 70/262 and 75/201), women and peace and security (Council resolution 1325 (2000)) and youth and peace and security (Council resolution 2535 (2020)). On the development of Africa, they include Agenda 2063: The Africa We Want of the African Union (as recognized in Assembly resolution 71/254), the New Partnership for Africa's Development: progress in implementation and international support (resolution 79/263), the Framework for a Renewed United Nations-African Union

Partnership on Africa's Integration and Development Agenda 2017–2027 (resolution 71/254) and the promotion of durable peace and sustainable development in Africa (resolutions 75/327 and 79/264). On the promotion of human rights, they include the Vienna Declaration and Programme of Action, including its principles and recommendations, adopted by the World Conference on Human Rights and subsequently endorsed by the Assembly in resolution 48/121. On the effective coordination of humanitarian assistance, they include strengthening the coordination of emergency humanitarian assistance of the United Nations and international cooperation on humanitarian assistance in the field of natural disasters (resolutions 46/182, 79/139 and 79/140), the Sendai Framework for Disaster Risk Reduction 2015–2030 and the political declaration of the high-level meeting on the midterm review of the Sendai Framework for Disaster Risk Reduction 2015–2030 (resolutions 69/283, 77/289 and 79/205), the Global Compact on Refugees (resolutions 73/151 and 79/156) and the Global Compact for Safe, Orderly and Regular Migration (resolution 73/195). On the development of international justice and international law, they include Articles 13, 98, 102, 104, 105 and other relevant provisions of the Charter. On disarmament, they include preventing the proliferation of weapons of mass destruction, combating the illicit trade in small arms and light weapons and analysis of emerging issues, including new technologies (resolution S-10/2). On drugs control, crime prevention and combating international terrorism in all its forms and manifestations, they include the outcome document entitled "Our joint commitment to effectively addressing and countering the world drug problem" (resolution S-30/1), the Kyoto Declaration on Advancing Crime Prevention, Criminal Justice and the Rule of Law: Towards the Achievement of the 2030 Agenda for Sustainable Development (resolution 76/181), the United Nations Global Counter-Terrorism Strategy (resolution 77/298) and the United Nations Convention against Cybercrime (resolution 79/243). On the effective functioning of the Organization, they include shifting the management paradigm in the United Nations (resolution 72/266 B) and promoting a culture of effectiveness and cost-efficiency (resolution 79/257). Finally, in its delivery of the mandates given by Member States, the Organization will strive to carry out these long-term objectives efficiently.

Promotion of sustained economic growth and sustainable development

3. The 2030 Agenda remains the plan of action for Member States to "promote higher standards of living, full employment, and conditions of economic and social progress and development" (Article 55 of the Charter). Following their call to action at the high-level political forum on sustainable development in 2023 (General Assembly resolution 78/1), Member States reaffirmed their enduring commitment to the 2030 Agenda and recognized that sustainable development in all its dimensions is a central goal in itself (resolution 79/1). While Member States are progressing towards many of the 17 Sustainable Development Goals (E/2018/64), they have placed the eradication of poverty at the centre of their efforts to achieve the 2030 Agenda. The Organization will continue to support Member States to take comprehensive and targeted measures to address the root causes and challenges of poverty in all its forms and dimensions (resolution 79/221).

4. The Organization will continue to focus on repositioning the United Nations development system to better support Member States in the implementation of the 2030 Agenda (General Assembly resolutions 72/279 and 79/258 (sect. XVIII)). Building on guidance from the quadrennial comprehensive policy review (resolution 79/226) and the review of the resident coordinator system (resolutions 76/4 and 79/258 (sect. XVIII)), the United Nations development system, with the reinvigorated resident coordinator system at its centre, will help countries to accelerate progress towards the 2030 Agenda, in alignment with national priorities, as set out in the

United Nations Sustainable Development Cooperation Frameworks (resolution 72/279). This will continue to be realized through the provision of evidence-based and integrated policy advice and programmatic support to national Governments, and the contribution of the expertise, tools and platforms of the United Nations country teams in consultation and coordination with national Governments.

5. The Organization will complement support in realizing the 2030 Agenda with follow-up to the Paris Agreement, the Sendai Framework, the Addis Ababa Action Agenda, Agenda 21, the Beijing Declaration and Platform for Action (General Assembly resolution S-23/2) and the New Urban Agenda. Furthermore, it will continue its assistance to countries with the highest needs and support the implementation and mainstreaming of the Doha Programme of Action for the Least Developed Countries, the Programme of Action for Landlocked Developing Countries for the Decade 2024–2034 (resolution 79/233), the SIDS Accelerated Modalities of Action (SAMOA) Pathway (resolutions 69/15 and 79/203) and the Antigua and Barbuda Agenda (resolution 78/317).

6. The Organization will continue to bolster its efforts to assist Member States in leaving no one behind and reaching the furthest behind first (General Assembly resolution 79/221). It will support Member States in giving due consideration to the issue of agriculture development, food security and nutrition (resolutions 72/239 and 79/227). It will continue to assist Member States in addressing the challenges and opportunities arising from international trade, finance, technology and investment to ensure that their benefits are widely shared (resolution 79/195).

7. The Organization will support Member States in addressing the threat posed by climate change and environmental degradation, recognizing that the global nature of climate change calls for the widest possible international cooperation to accelerate the reduction of global greenhouse gas emissions, address adaptation to the adverse impacts of climate change and close the gap between the aggregate effect of Parties' mitigation pledges and aggregate emission pathways (General Assembly resolution 79/206 and FCCC/CP/2015/10/Add.1).

8. The Organization will continue to assist Member States in advancing the global environmental agenda, strengthen coherence within the United Nations system and serve as an authoritative advocate for the global environment (General Assembly resolution 73/260). It will also support Member States in adopting innovative pathways to achieve sustainable consumption and production (United Nations Environment Assembly resolution 4/1) through, inter alia, the environmental dimension of a sustainable, resilient and inclusive post-pandemic recovery, innovative technology (Environment Assembly resolution 5/10) and circular economy approaches (Environment Assembly resolution 5/11). The Organization will support efforts to implement immediate actions towards the sound management of chemicals and waste (Environment Assembly resolutions 5/7 and 6/9), the long-term elimination of plastic pollution in marine and other environments (Environment Assembly resolution 5/14) and the conservation and sustainable use of biological diversity and the fair and equitable sharing of benefits arising from the use of genetic resources (General Assembly resolution 57/260).

9. Recognizing that gender equality and the empowerment of all women and girls are crucial to progress across all the Sustainable Development Goals and targets, the Organization will support Member States in ensuring women's full and effective participation and equal opportunities for leadership at all levels of decision-making in political, economic and public life (General Assembly resolutions 78/150 and 78/182) and addressing all forms of discrimination and violence against women and girls, in particular by improving strategies for prevention (resolutions 69/147 and 79/152).

10. The Organization will continue to ensure a more coherent, comprehensive and integrated approach to youth development, and to support local, national, regional and international efforts in addressing challenges hindering youth development and involvement, by working closely with Member States, civil society, youth organizations, academia and the media (General Assembly resolutions 76/306 and 78/179). It will support Member States in strengthening meaningful youth participation at the national and international levels.

11. The Organization will continue to work closely with Member States in promoting international cooperation to address the impact of demographic trends in the context of sustainable development, including changes in population growth or decline, age structures, urbanization and international migration (General Assembly resolutions 49/128, S-21/2, 65/234 and 73/195). The Organization will also assist Member States in addressing the way in which cities and human settlements are planned, designed, financed, developed, governed and managed (resolution 71/256).

12. Capitalizing on the repositioning of the United Nations development system, the Organization will continue to support countries, upon their request, in the acceleration of the implementation, follow-up and review of the 2030 Agenda, including by focusing on addressing the gaps and challenges, including those identified by voluntary national reviews. In application of the principle of common but differentiated responsibilities, the Organization will do so bearing in mind that the Sustainable Development Goals and targets are integrated and indivisible, global in nature and universally applicable, taking into account the different national realities, capacities and levels of development and respecting national policies and priorities (General Assembly resolution 79/226). Multi-stakeholder platforms, regional road maps for the implementation of the 2030 Agenda, rapid response facilities to assist Member States and innovative policy tools to strengthen planning and economic governance will continue to play a critical role in this context (resolution 72/279).

Maintenance of international peace and security

13. The prevention and peaceful settlement of disputes are among the purposes of the United Nations (Article 1 of the Charter), and the Organization arose from conflict to "save succeeding generations from the scourge of war" (Preamble to the Charter). Its Member States have been determined to establish a just and lasting peace all over the world in accordance with the purposes and principles of the Charter (General Assembly resolution 60/1). Armed conflict continues to have a high human cost and cause suffering, and the world is facing a significant number of simultaneous security and humanitarian crises (resolutions 70/262 and 75/201). Member States recognize that a whole range of threats require urgent, collective and more determined responses (resolutions 60/1, 70/262 and 75/201).

14. In the pursuit by Member States of the 2030 Agenda, a key focus of the United Nations will be to better serve nations in sustaining peace (General Assembly resolution 70/262 and Security Council resolution 2282 (2016)). As national Governments and authorities exercise their primary responsibility in this regard, the United Nations will support and complement their efforts to prevent the outbreak, escalation, continuation and recurrence of conflict, addressing root causes of conflict, assisting parties to conflict to end hostilities and ensuring national reconciliation (Council resolution 2594 (2021)). In this context, the Organization will also work with Member States to strengthen the peacebuilding architecture and its partnership with international financial institutions in crisis-affected situations, in line with Assembly resolution 70/262 and Council resolution 2282 (2016) and subsequent requests (Assembly resolutions 72/276 and 75/201 and Council resolution 2558

(2020)). The Organization will also continue to advance international cooperation in the peaceful uses of outer space (Assembly resolutions 1472 (XIV) and 78/72).

15. The primacy of politics will be the hallmark of the United Nations approach to conflict resolution, including through mediation, good offices, the monitoring of ceasefires and assistance in the implementation of peace accords (S/PRST/2018/10). Recognizing the important role that special political missions play as a flexible tool for the maintenance of international peace and security, the Organization will continue to work to strengthen the role of these missions in mediation, conflict prevention, conflict resolution and peacebuilding and sustaining peace, in partnership with regional and subregional organizations and other relevant stakeholders (General Assembly resolutions 76/83 and 78/257).

16. The Organization will continue to focus on improving its peacekeeping capabilities and enhancing the effective and efficient deployment of its peacekeeping operations (General Assembly resolutions 72/304, 76/274 and 78/291). Recognizing that peacekeeping benefits from collective engagement, the Organization will work with all partners and stakeholders to adapt peacekeeping operations to today's complex and high-risk environments (S/PRST/2018/10 and Council resolution 2436 (2018)), in particular by strengthening safety and security (resolution 2518 (2020)), the performance of uniformed personnel in United Nations peacekeeping operations (resolutions 2382 (2017) and 2436 (2018)), security sector governance (resolution 2553 (2020)), system-wide coherence in justice and rule of law support (resolution 2447 (2018)), regional and subregional partnerships (resolutions 2457 (2019) and 2719 (2023)) and proper conduct with zero tolerance for all forms of sexual exploitation and abuse (Assembly resolution 78/331 and Council resolution 2272 (2016)), as well as to strengthen the planning and management of transition processes and to further enhance organizational learning and guidance on transitions (Council resolutions 2594 (2021) and 2686 (2023)).

17. In all its efforts to support the maintenance of international peace and security, the United Nations will continue to promote the protection of civilians in armed conflicts, in particular of children (Security Council resolutions 2417 (2018) and 2427 (2018)), the protection and rights of women and their participation in conflict prevention, resolution of armed conflict, peacebuilding and post-conflict situations (resolution 2242 (2015)) and action against conflict-related sexual violence (Council resolutions 1820 (2008) and 2467 (2019) and General Assembly resolution 78/331). It will support the important role of young people (Council resolutions 2419 (2018) and 2535 (2020)).

18. In support of the achievement of Member State objectives, the Organization will continue to sustain its focus on prevention efforts and sustaining peace, on enhancing the effectiveness and coherence of peacekeeping operations and special political missions, on consolidating the integration of political and operational responsibilities in a "whole-of-pillar" approach and on aligning the peace and security pillar more closely with the Organization's development and human rights work (General Assembly resolutions 72/199 and 72/262 C).

Development of Africa

19. The development of Africa will continue to be a priority for the United Nations. In the coming years, efforts will be centred on digitalization and improving data and statistics, enhancing economic transformation and diversification, harnessing the demographic dividend, strengthening quality education and health systems, leveraging new technologies for inclusive development, achieving universal access to affordable, reliable, sustainable and modern energy for all, promoting investment in climate action, and strengthening and financing climate change mitigation and

adaptation in Africa (General Assembly resolutions 76/205, 76/210, 76/213 and 79/226). The Organization will also continue to support Member States to reduce disaster risk (resolutions 69/283 and 79/205) and the industrialization of Africa (resolution 79/222), including by advancing the African Continental Free Trade Area, promoting strong and efficient institutions and ensuring the sustainability of development financing through enhanced national resource mobilization and the implementation of the Addis Ababa Action Agenda (resolutions 69/313 and 79/263) to accelerate implementation of the Goals (resolutions 74/4 and 78/1).

20. The United Nations will continue to support the implementation of Agenda 2063, through the joint African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and the joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security (General Assembly resolution 72/311, S/2021/763 and Security Council resolution 2719 (2023)). The Organization will continue to promote a coherent and integrated approach to the international community's support for Africa with the aim of achieving sustainable development and durable peace in the continent (Assembly resolutions 75/327 and 79/264). It will support the promotion of young people and ensuring their inclusion in the strategies of implementation of the 2030 Agenda and Agenda 2063 (resolution 79/264). The Organization will also continue its efforts to assist Member States in the strengthening of State institutions and governance systems, including through fellowships for young Africans at United Nations Headquarters in New York to strengthen institutional capacities in policy analysis, design and monitoring (resolution 79/264).

Promotion of human rights

21. Promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language or religion is a purpose of the United Nations set out in its Charter and anchored in the Universal Declaration of Human Rights (General Assembly resolution 217 (III)). The responsibility of all Member States to respect, protect and promote human rights is reaffirmed in the 2030 Agenda and in the Pact for the Future. The Organization will continue to support Member States and treaty bodies in advancing these objectives, including promoting the right to development, advancing knowledge, awareness and understanding of human rights, combating discrimination and inequalities and strengthening the rule of law and democratic institutions (Assembly resolutions 48/141, 67/1, 70/1, 70/155, 76/1, 77/223, 78/213 and 79/160 and Human Rights Council resolution 47/21).

22. In support of Member States, the Organization will continue to help to rationalize, adapt, strengthen and streamline the United Nations human rights machinery, with a view to improving its efficiency and effectiveness (General Assembly resolution 48/141). In this context, the Organization will support Member States in building the capacity to implement their treaty obligations and will provide, in this regard, advisory services, technical assistance and capacity-building (resolution 68/268). The Organization will also continue to facilitate and support the Human Rights Council, including during the undertaking of universal periodic reviews (resolutions 60/251 and 65/281). In this context, the Organization will, on the basis of consultations, continue to inform the Council on a regular basis of the practical applications of prevention in the promotion and protection of human rights (Council resolutions 42/6 and 51/14).

Effective coordination of humanitarian assistance efforts

23. Over the past years, an unprecedented number of people have been affected by humanitarian emergencies. Member States have recognized that complex trends –

including armed conflicts, natural hazards, climate change, epidemics, environmental degradation, financial and economic crises, food and energy insecurity, food crises and risk of famine, water scarcity, unplanned urbanization, gender-based violence, violence against children and acts of terrorism – are increasing the vulnerability of people while reducing their ability to cope with humanitarian crises (General Assembly resolutions 78/205 and 79/140).

24. Given the number of people affected by humanitarian emergencies, the effective coordination of humanitarian assistance is a long-term priority of the United Nations, as is early, rapid, predictable and flexible humanitarian financing through the Central Emergency Response Fund and humanitarian country-based and regional pooled funds (General Assembly resolutions 46/182, 79/139 and 79/140). The Organization will continue to enhance the coordination, effectiveness and efficiency of humanitarian assistance and strengthen preparedness and response efforts, including in support of national and regional capacities, in line with humanitarian principles (Assembly resolutions 79/139 and 79/140 and Economic and Social Council resolution 2024/18).

25. The Organization will continue to strengthen efforts to integrate disaster risk reduction into its work (General Assembly resolutions 79/139 and 79/226). It will support Member States in developing and implementing national and local disaster risk reduction strategies supported by comprehensive disaster risk reduction financing strategies, in line with the midterm review of the Sendai Framework (resolutions 77/289 and 79/205), and will support Member States in strengthening early warning mechanisms (E/HLS/2024/1).

26. The Organization will also promote closer cooperation and collaboration between humanitarian, development and other actors to enable complementary responses that meet urgent humanitarian needs and tackle the root causes of need, risk and vulnerability (General Assembly resolution 79/140). This contributes to the 2030 Agenda and to leaving no one behind, including internally displaced persons and refugees (resolutions 70/1, 76/78, 78/185, 78/205 and 79/156).

27. Challenges for humanitarian efforts are expected to continue, including disregard for international humanitarian law, violence and attacks and threats against humanitarian and medical personnel, which underscore the importance of ensuring their safe and unhindered access and of respecting and protecting them (General Assembly resolutions 79/138 and 79/140). The Organization will thus strengthen efforts to enhance its security management system and the stay-and-deliver strategy and mobilize partners to support the effective and principled delivery of humanitarian assistance and to finance humanitarian response (resolutions 79/138 and 79/140).

Promotion of justice and international law

28. The Organization will continue to act in conformity with the principles of justice and international law and assist in the settlement of international disputes by peaceful means, including through judicial settlement. It will also continue to support Member States in the progressive development of international law and its codification.

29. The Organization will continue to support Member States in maintaining, administering and strengthening international legal frameworks in such areas as international peace and security, international trade, human rights, international humanitarian law, counter-terrorism and international crimes. In this context, the Organization will also assist Member States in strengthening and promoting the international treaty framework, including by improving the effective dissemination of and access to treaties (General Assembly resolutions 73/210 and 78/236) through the use of electronic resources.

30. The Organization will continue to provide support to intergovernmental processes on oceans and the law of the sea and sustainable fisheries (General Assembly resolutions 79/144 and 79/145), such as the intergovernmental conference on the development of an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction (resolution 72/249).

31. In support of the peaceful settlement of disputes, the Organization will continue to cooperate with international courts and tribunals and accountability mechanisms, in line with General Assembly and Security Council resolutions.

Disarmament

32. The Organization will continue its long-standing support for multilateral efforts dedicated to disarmament, non-proliferation and arms control (General Assembly resolution S-10/2), including for weapons of mass destruction. In a context where nuclear weapons, in particular, continue to be a source of primary concern, given their destructive power and existential threat to humanity, the United Nations will continue to support the multilateral nuclear disarmament and non-proliferation regime, including new mandates (resolutions 79/238, 79/240 and 79/241). The Organization will also continue to support Member States in addressing the use of biological weapons (resolution 79/78) and chemical weapons (resolutions 79/56 and 79/134), the regulation and limitation of conventional weapons, including small arms and light weapons (resolution 79/40), and the humanitarian consequences of various categories of conventional weapons (resolutions 79/34, 79/58 and 79/75), as well as reporting on current developments in science and technology and their potential impact on international security and disarmament efforts (resolution 79/23).

33. The United Nations will also continue to promote the universalization and implementation of multilateral disarmament, non-proliferation and arms control instruments and support regional approaches to disarmament, non-proliferation and arms control through dialogue and confidence-building (General Assembly resolutions 79/25, 79/27 and 79/59). The Organization will facilitate increased opportunities for youth participation in disarmament (resolution 78/31) and enhance the awareness, understanding and knowledge of a wide range of audiences (resolutions 79/28 and 79/69). Through these tasks, Securing Our Common Future: An Agenda for Disarmament will continue to facilitate the internal integration of disarmament issues into the Organization’s work, especially in the area of prevention, thereby laying the groundwork for new partnerships and greater collaboration and effectiveness.

Drug control, crime prevention and combating international terrorism in all its forms and manifestations

34. Trade in illicit drugs, trafficking in persons, corruption, transnational organized crime and related illicit financial flows, and terrorism (General Assembly resolutions 60/288, 76/188, 77/298, 78/229 and 79/234 and Security Council resolution 2617 (2021)) continue to pose a serious threat to peace and security, human rights and sustainable development by undermining the security, stability, governance and social, economic and cultural development of affected States. The United Nations will continue to support Member States in addressing these threats by providing comprehensive, innovative and tailored initiatives to challenges posed by drugs, crime, corruption and terrorism.

35. The Organization will continue to provide coordinated and evidence-based assistance to Member States, at their request, in support of a comprehensive, integrated and balanced approach to addressing and countering the world drug problem (General Assembly resolution 76/188). It will sustain its support for

preventing and countering transnational organized crime, including trafficking in persons (resolution 78/228), and crimes that affect the environment and have a negative impact on economies, public health, human safety, food security, livelihoods and habitats, including illicit trafficking in wildlife (resolution 77/325), as well as corruption and money-laundering related to such crimes (resolution 76/185). The Organization will also promote international and multisectoral cooperation in preventing and countering corruption (Assembly resolutions S-32/1 and 58/4, Conference of the States Parties to the United Nations Convention against Corruption resolution 9/2 and Economic and Social Council resolution 2006/24) and in combating illicit financial flows and strengthening good practices on asset recovery (Assembly resolution 79/190). With the adoption of the United Nations Convention against Cybercrime, the first comprehensive global treaty on this matter, in December 2024, the Organization will support Member States in strengthening international cooperation for combating crimes committed by means of information and communications technology systems (resolution 79/243).

36. The Organization will continue, at the request of Member States, to assist justice, law enforcement and corrections institutions in promoting and reinforcing the rule of law, crime prevention and reform efforts for accessible, effective, fair, humane, transparent and accountable criminal justice systems that contribute to the promotion of peaceful and inclusive societies that empower women and young people for sustainable development (General Assembly resolution 78/229 and Security Council resolution 2447 (2018)).

37. The Organization will support Member States in pursuing a future free from terrorism. It will continue to assist Member States, at their request, in implementing the United Nations Global Counter-Terrorism Strategy by, inter alia, enhancing coordination and coherence among stakeholders to support the counter-terrorism efforts of Member States, countering terrorist use of weapons and enhancing national counter-terrorism capabilities (General Assembly resolutions 77/64 and 77/298 and Security Council resolutions 2462 (2019), 2482 (2019) and 2617 (2021)). The United Nations Global Counter-Terrorism Coordination Compact will continue to strengthen a common-action approach to coordination and coherence in the work of the United Nations system to prevent and counter terrorism and to strengthen support to Member States, at their request and in cooperation with relevant stakeholders (Assembly resolution 77/298).

Effective functioning of the Organization

38. With support of Member States for ongoing reforms (General Assembly resolution 75/1), including the request to continue the programme budget submission according to an annual cycle (resolution 77/267), the Secretary-General will continue to improve the ability of the Organization to deliver on its mandates (resolution 72/266 B), notably by fostering a culture of efficiency and achieving a more agile, responsive and resilient United Nations, in particular by enhancing the Organization's capabilities (resolution 79/1). The Organization will continue to improve the implementation of results-based budgeting and management, strengthen internal controls and promote a culture of effectiveness, cost-efficiency and accountability (resolution 79/257). It will leverage strategic communications to support Organizational objectives (resolutions 79/93 A–B). The Secretary-General will continue to make efforts to ensure a workplace where discrimination, harassment, including sexual harassment, and abuse of authority are not tolerated, perpetrators are held accountable and staff feel safe to report misconduct (resolution 77/280) and will continue to refine and implement the strategic action plan for addressing racism and promoting dignity for all in the United Nations Secretariat (resolution 77/278) and the United Nations Disability Inclusion Strategy (resolution 79/149). The

Organization will ensure respect for data protection and privacy in the use and processing of personal data by Secretariat entities (resolutions 77/211 and 78/265).

39. Reaffirming that the staff is an invaluable asset (General Assembly resolution 78/275), the Secretary-General will improve overall human resources management, intensify strategic workforce planning and nurture a culture of staff mobility (resolutions 73/281 and 77/278). The Organization will accelerate progress towards the goals of reaching a 50/50 gender balance throughout the United Nations system by 2028 (resolution 78/182), rejuvenating the Organization and achieving geographical diversity through recruiting staff on as wide a geographical basis as possible at all levels (resolutions 76/240, 77/278 and 79/252 A–B).

40. Through integrated end-to-end supply chain management, more agile, responsive, efficient and effective client-oriented services will be provided within the Organization (General Assembly resolution 72/266 B), giving due consideration to best value for money; fairness, integrity and transparency; effective international competition, including intensifying efforts to promote procurement from developing countries and countries with economies in transition (resolution 69/273); and the interest of the United Nations (resolution 67/246).

41. The Organization will continue to pursue multilingualism as a means of promoting, protecting and preserving the diverse character of the United Nations workforce in terms of languages and cultures globally, as well as of improving the efficiency, performance and transparency of the Organization (General Assembly resolution 78/330).

42. Across its conferencing support functions, the Organization will further optimize the utilization of conference service resources, enhance their integrated global management and continue to leverage technology to preserve and enhance the quality and scope of conference services (General Assembly resolution 79/248).

III. Priorities

43. The plan outlines for the periods 1998–2001, 2002–2005, 2006–2007, 2008–2009, 2010–2011, 2012–2013, 2014–2015, 2016–2017, 2018–2019, 2020–2022 and 2023–2025 identified eight priority areas that covered the bulk of the substantive activities of the Organization. Given that the conditions that led to those priorities persist, the Assembly may wish to consider reaffirming or amending, as appropriate, the following priorities:

(a) Promotion of sustained economic growth and sustainable development in accordance with the relevant resolutions of the General Assembly and recent United Nations conferences;

(b) Maintenance of international peace and security;

(c) Development of Africa;

(d) Promotion of human rights;

(e) Effective coordination of humanitarian assistance efforts;

(f) Promotion of justice and international law;

(g) Disarmament;

(h) Drug control, crime prevention and combating international terrorism in all its forms and manifestations.

Overview of resources for the regular budget

1.1 The proposed regular budget resources for 2026 for all policymaking organs and entities under section 1, including the breakdown of resource changes, as applicable, are reflected in tables 1.1 to 1.3, and the summary of resources by component and funding source is contained in annex III. Detailed information on the proposed programme budget for 2026 is provided under each policymaking organ and entity. The proposed resource level under section 1 provides for the full, efficient and effective implementation of mandates of all relevant entities and offices.

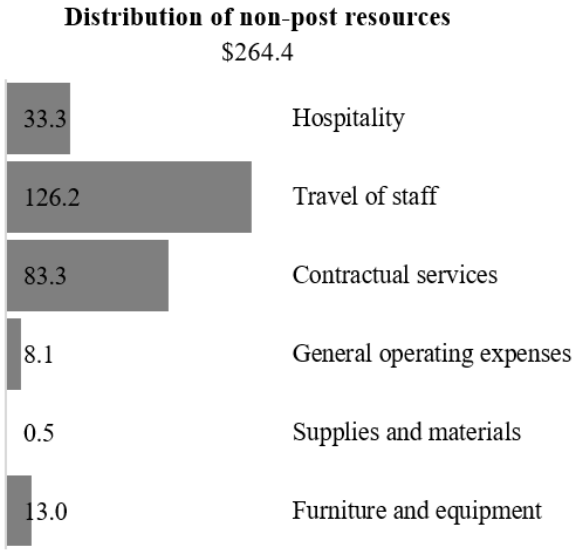
Figure 1.I
Distribution of proposed resources for 2026
(Thousands of United States dollars)



Extrabudgetary resources

1.9 As reflected in table 1.8 (2), extrabudgetary resources amount to $2,867,800. The non-post resources would complement regular budget resources and would be used mainly to complement the programme of work and facilitate funding for a broad range of projects and activities implemented by the Office, at the discretion of the Presidents of the General Assembly.

1.10 The extrabudgetary resources under the present section are subject to the oversight of the Department for General Assembly and Conference Management, which has delegated authority from the Secretary-General.

1.11 Information on the advance booking for air travel is reflected in table 1.9. The office will critically reassess its efforts to ensure the advance booking of tickets in line with the air travel policy and improve its compliance rate.

1.15 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.14 to 1.16 and figure 1.II.

1.16 As shown in tables 1.14 (1) and 1.15 (1), the overall resources proposed for 2026 amount to $7,725,500, reflecting no change compared with the approved budget for 2025. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

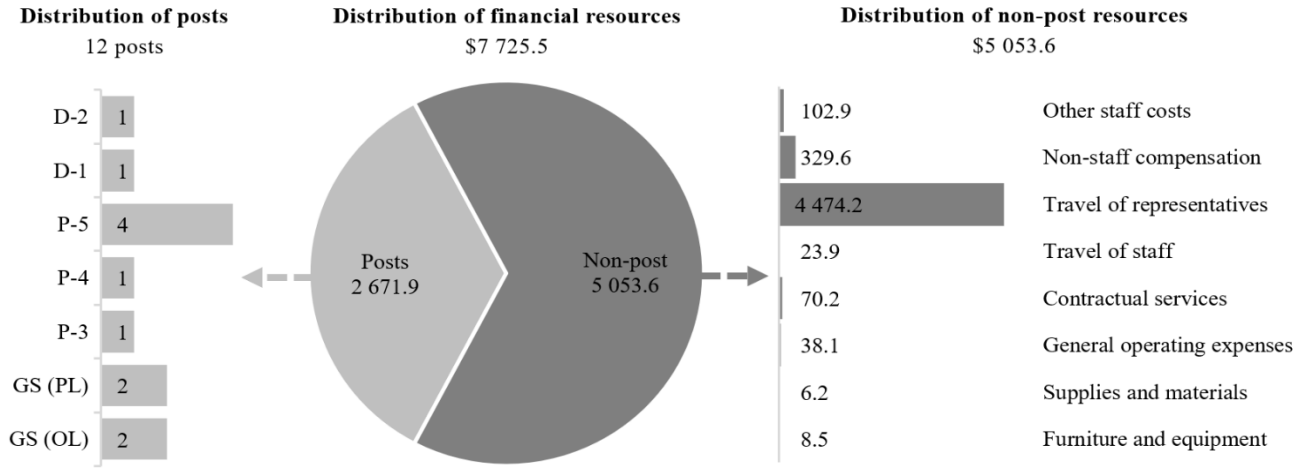
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Other assessed resources

1.17 As reflected in tables 1.14 (2) and 1.15 (2), other assessed resources amount to $938,600. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

1.18 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.17.

1.19 The compliance rate for travel of the members of the Advisory Committee to their countries of origin is affected by national policies and route changes, which can affect advance travel planning undertaken by the secretariat of the Committee to make travel arrangements within the specified notice period. Despite a 23 per cent improvement in compliance compared with the 2023 budget period, delays in ticketing for the Committee's annual field trip and complications in the onboarding of new members continued to affect the processing of travel arrangements. The Secretariat continues to review all relevant factors as it continues to optimize its support to the work of the Committee with a view to achieving the target compliance rate.

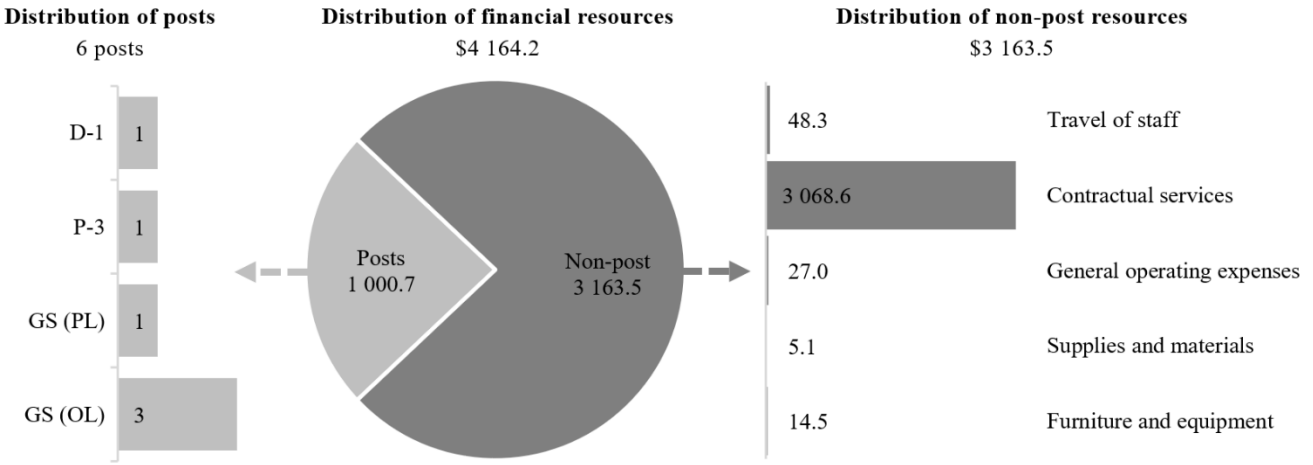
Figure 1.III
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

1.26 As shown in tables 1.23 (1) and 1.24 (1), resource changes reflect a net decrease of $142,100, comprising decreases of $11,300 under other staff costs, $117,600 under contractual services, and $27,300 under general operating expenses, in line with recent expenditure patterns, offset in part by an increase of $14,100 under travel of staff related to an orientation programme for a new Board of Auditors member.

Other assessed resources

1.27 As reflected in table 1.23 (2), other assessed resources amount to $3,671,800. The resources would complement regular budget resources and provide for the requirements indicated in the report of the

Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.28 As reflected in tables 1.23 (3) and 1.24 (2), extrabudgetary resources amount to $6,965,800. The resources would complement regular budget resources and would be used mainly to provide for one post (General Service (Other level)) and non-post resources that would be used to support the audit of technical cooperation projects undertaken by the Department of Economic and Social Affairs, the regional commissions and the Office of the United Nations High Commissioner for Human Rights (OHCHR), as well as trust fund-related audits included in United Nations entities and the full range of activities, entities and programmes falling under the auspices of the Secretariat (see A/79/5 (Vol. I)).

1.29 The extrabudgetary resources under the present section are subject to the oversight of the Board.

1.30 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.26. The Board secretariat will continue its 100 per cent compliance with the advance booking of air travel policy.

5. Secretariat of the United Nations Staff Pension Committee (including reimbursement from the United Nations for services provided by the United Nations Joint Staff Pension Fund)

B. Proposed post and non-post resource requirements for 2026

Overview

1.31 The United Nations Joint Staff Pension Fund was established by the General Assembly in 1949 to provide retirement, death, disability and related benefits to the staff of the United Nations and such other organizations as might be admitted to its membership. In accordance with the regulations adopted by the Assembly, the Pension Fund is administered by the United Nations Joint Staff Pension Board, a staff pension committee for each member organization and a secretariat of the Pension Board and each such committee.

1.32 The expenses incurred by the staff pension committee in the administration of the regulations of a member organization are met by the general budget of that organization. However, given that the central secretariat of the Pension Fund grew out of the secretariat of the United Nations Staff Pension Committee, it continued to handle pension administration for the United Nations by special arrangement with the Pension Board. For those services, the United Nations reimburses the Pension Fund in accordance with the cost-sharing arrangement, as approved by the General Assembly in its resolution 75/246.

1.33 At the time that the present report was being prepared, the proposed budget of the Pension Fund for 2026 had not been finalized. The estimates will be subject to further revision in accordance with the administrative budget of the Pension Fund for 2026 and action taken by the General Assembly at its eightieth session on the basis of the recommendations that the Pension Board may make in 2025 with respect to that budget. A statement of administrative and budgetary implications will be

submitted to the Assembly at its eightieth session should the Pension Board's recommendations involve resources different from those estimated in the present report.

1.34 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in table 1.27.

Table 1.27

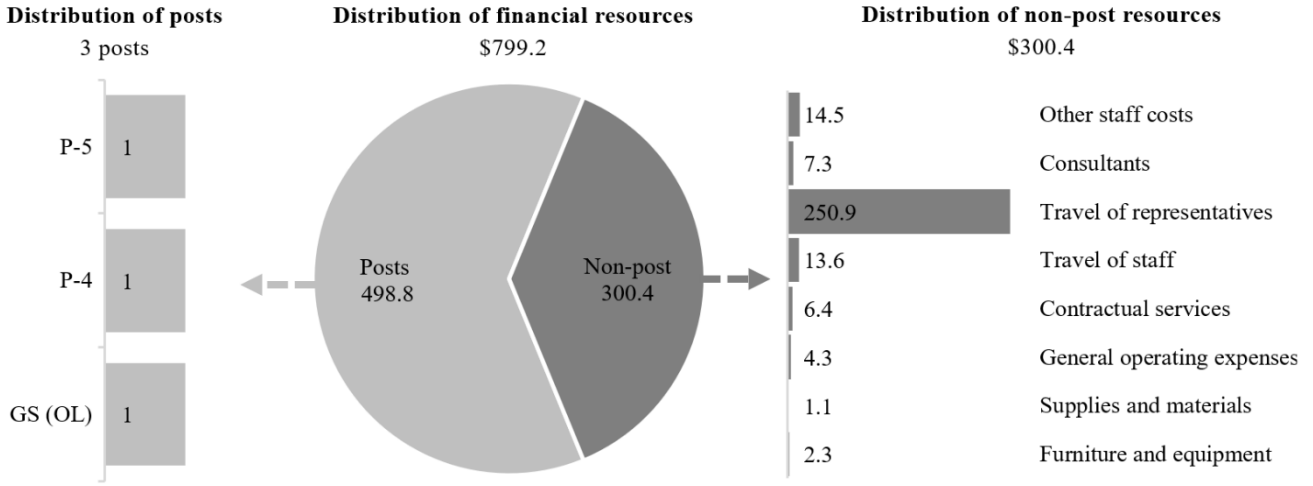
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

1.44 As shown in table 1.32, resource changes reflect an increase of $127,300 under posts owing to the proposed establishment of one post of Administrative Officer (P-4) (see annex II to the present report) and an increase of $4,400 under non-post resources associated with the proposed establishment of the post, under contractual services ($1,900), general operating expenses ($400), supplies and materials ($200), and furniture and equipment ($1,900).

1.45 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.36. The secretariat of the Committee will continue to implement measures to maintain the rate of compliance regarding the advance purchase of air tickets by raising the awareness of travellers and requesting them to finalize travel arrangements as soon as possible.

II. Secretary-General

B. Proposed post and non-post resource requirements for 2026

Overview

1.46 In accordance with Article 97 of the Charter of the United Nations, the Secretary-General, who is appointed by the General Assembly on the recommendation of the Security Council and who, in turn, appoints the staff, is the Chief Administrative Officer of the Organization. The Secretary-General also has an important political function by virtue of Article 99 of the Charter and a role in all United Nations meetings and such other functions as are entrusted to him by other principal organs of the Organization, as provided for in Article 98.

1.47 As the Chief Administrative Officer of the Organization, the Secretary-General is entrusted with a broad range of responsibilities under the Charter. Within the sphere of competence of the office, the Secretary-General takes action, on his own initiative, on a wide range of political, economic, social and humanitarian questions, reporting to and requesting guidance from the General Assembly and the Security Council, as appropriate. He uses his best efforts to assist in settling disputes between States and may bring to the attention of the Council any matter that may threaten the maintenance of international peace and security. Moreover, the Secretary-General plays a key role in efforts to ensure the observance of human rights. He provides policy direction to the departments, offices and other organizational units of the Secretariat in the execution of their functions and guidance and coordination to the programmes and other elements of the Organization. In addition, as Chair of the United Nations System Chief Executives Board for Coordination (CEB), the Secretary-General has a coordinating function in relation to the entire United Nations system of organizations. The activities of the Secretary-General in 2026 will be directed towards the achievement of the priorities of the Organization.

1.48 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.37 to 1.39.

(Thousands of United States dollars)

III. Executive direction and management

1.51 The proposed resources under executive direction and management would provide for the Executive Office of the Secretary-General and the offices of the Directors-General of the United Nations Offices at Geneva, Vienna and Nairobi. Those offices provide support to the Secretary-General in his capacity as Chief Administrative Officer of the United Nations under Article 97 of the Charter of the United Nations by assisting in: (a) the establishment of general policy and in the exercise of executive direction in relation to the work of the Secretariat, the United Nations funds and programmes and other entities within the Organization; (b) the supervision and coordination of the work of the Organization pursuant to the decisions of the Secretary-General and to the relevant directives of the intergovernmental bodies concerned; (c) relations with the press and the public; (d) inter-agency coordination functions in relation to the United Nations system of organizations, regional organizations and non-governmental organizations (NGOs); (e) relations with the principal organs of the United Nations and host Governments; and (f) contacts with Governments and delegations pursuant to Articles 98 and 99 of the Charter. Further details are provided under the relevant components. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

1. Executive Office of the Secretary-General

B. Proposed post and non-post resource requirements for 2026

Overview

1.52 The Executive Office of the Secretary-General provides assistance to the Secretary-General in the establishment of general policy, in the executive direction, coordination and expeditious performance of the work of the Secretariat and of the programmes and other elements of the Organization, and in contacts with Governments, delegations, the press and the public. It provides further assistance to the Secretary-General in strategic planning, the preparation of the annual report of the Organization and the annual report on the rule of law, political, economic and inter-agency affairs, liaison and representation functions and the fulfilment of the priorities and mandates set out by the General Assembly. The resources for the Office also provide for the post of Deputy Secretary-General, whose functions and responsibilities are defined in paragraph 1 of Assembly resolution 52/12 B.

1.53 The Executive Office functions as an integrated office, with reporting lines through the Deputy Secretary-General, Chef de Cabinet and the Under-Secretary-General for Policy to the Secretary-General. The Assistant Secretary-General will undertake assignments and perform functions in support of the Secretary-General's mandate. The units within the Executive Office work as a team to support the Secretary-General and the activities of the principals regardless of their direct reporting lines. The resources for the Office provide for post and non-post resources in support of the activities of the Secretary-General. The overall number of posts proposed for 2026 remains unchanged compared with the number of posts approved for 2025.

1.54 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Executive Office has continued to integrate environmental management practices into its operations to ensure resource efficiencies, waste reduction and system-wide behavioural changes across the United Nations. In 2024, the Office continued to implement changes to lower its carbon and resource footprint, by further streamlining correspondence and document processing workflows, and incentivizing a more limited use of print material as a good office practice. The recycling of event content and media branding was also promoted. Following Assembly resolution 77/161 on promoting zero-waste initiatives to advance the 2030 Agenda, the Office has helped to raise awareness of waste reduction measures across daily processes, while advocating for more circularity and resource efficiency in Office initiatives and procurement of services.

1.55 The Executive Office strives to make the reports of the Secretary-General issued by the Office accessible to persons with disabilities. For example, the report of the Secretary-General on the work

of the Organization was published in accessible formats, including ePub and Easy Read. In addition to being published in those formats, the report of the Secretary-General on disability inclusion in the United Nations system also included an executive summary in International Sign. In 2026, the Office will continue its efforts to facilitate the issuance of reports and communications of the Secretary-General in accessible formats where feasible. In 2024, the Office enhanced the accessibility of the Summit of the Future and the associated Action Days by providing International Sign interpretation and live captioning. The Office is also taking active steps to ensure the provision of reasonable accommodation to staff members with disabilities and will continue such efforts in 2026.

Deputy Secretary-General

1.56 The Deputy Secretary-General, whose functions and responsibilities are defined in paragraph 1 of General Assembly resolution 52/12 B, will place special focus on sustainable development, including the 2030 Agenda and the Sustainable Development Goals, the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, the Paris Agreement on climate change and other intergovernmentally agreed sustainable development commitments. In this regard, specific attention will be paid to financing for development, the energy transition and food systems transformation, digital for development, education, jobs and social protection, addressing the triple planetary crisis of climate change, biodiversity loss and pollution, and global health, in diverse country contexts. The inclusion agenda – gender equality, young people, persons with disabilities, among others – and partnerships for acceleration of the Goals will receive priority attention across all streams of work to ensure that no one is left behind. Collaboration across humanitarian and development action, and the links to peacebuilding, as well as transitions from crisis and conflict to sustainable development, migration and development, will also be critical areas of work. The Deputy Secretary-General will chair the United Nations Sustainable Development Group, including the oversight of the Development Coordination Office, and lead implementation of the repositioning of the United Nations development system. The Deputy Secretary-General directly oversees the work of the Sustainable Development Unit and chairs the Rule of Law Coordination and Resource Group.

Chef de Cabinet

1.57 The Chef de Cabinet supports the Secretary-General in the execution of his political role and engagements. The Chef de Cabinet acts as an interface with Member States and, on behalf of the Secretary-General, primarily with the General Assembly and the Security Council. In addition, the Chef de Cabinet oversees the administrative and management portfolio, senior leadership appointments and the implementation of management reforms, peace and security reforms, and other reforms as requested by the Secretary-General, as well as the alignment of the various reform streams. The Chef de Cabinet also oversees the efforts of the Organization to advance equitable geographical distribution and gender parity, to prevent sexual exploitation and abuse and to address racism within the Organization. The Chef de Cabinet chairs the Management Committee, the Management Performance Board, the High-level Steering Group on preventing sexual exploitation and abuse and the Senior Emergency Policy Team. The Chef de Cabinet also oversees the work of, and substantive support provided to, those bodies and the Standing Principals' Group. The Chef de Cabinet provides direction and oversees the overall management of the Executive Office and directly oversees the Political, Peacekeeping, Humanitarian and Human Rights Unit, the Strategic Communication and Speechwriting Unit, the Office of the Spokesperson and the Management and Administrative Unit.

Under-Secretary-General for Policy

1.58 The Under-Secretary-General for Policy supports the Secretary-General in maintaining a holistic overview and strategic oversight of policy matters across all pillars of the work of the United Nations, including leading and coordinating the follow-up to the Summit of the Future and the implementation of the Pact for the Future and its annexes. He also oversees the Secretary-General's call to action for human rights. The Under-Secretary-General initiates and leads horizontal and vertical integration for system-wide coherence on conflict prevention policies, tools and operations; monitors emerging global issues and brewing crises and advises the Secretary-General on appropriate options and responses; and ensures that fresh thinking and outside perspectives are introduced. The Under-

Secretary-General is the Secretary of the Senior Management Group and the Executive Committee and chairs the Deputies Committee and coordinates closely on matters related to CEB. The Under-Secretary-General also directly oversees the Strategic Planning and Monitoring Unit, the Rule of Law Unit and the Pact for the Future implementation team (which has been placed in the Under-Secretary-General's office), and ensures strategic coordination and coherence in the work of the Strategic Planning and Monitoring Unit, the Rule of Law Unit, the Pact for the Future Implementation Team, the Political, Peacekeeping, Humanitarian and Human Rights Unit, which reports to the Chef de Cabinet, and the Sustainable Development Unit, which reports to the Deputy Secretary-General.

Office of the Secretary-General

1.59 The Office of the Secretary-General provides support and assistance to the Secretary-General. The Office liaises with the Deputy Secretary-General, the Chef de Cabinet and the Under-Secretary-General for Policy, and conveys the Secretary General's guidance. It reviews and clears documentation, correspondence, notes, letters, reports and statements. The Office oversees the scheduling of meetings and events, the preparation of scenarios and the travel of the Secretary-General, and is responsible for preparation for scheduled activities, including consolidating background notes, key messages, remarks and speeches, and liaising with permanent missions.

Management and Administrative Unit

1.60 The Management and Administrative Unit provides support to the Secretary-General and the Executive Office in the areas of human resources, financial and budgetary management and general administration. In addition, the Unit carries out advisory and liaison functions with regard to matters relating to management, oversight, conference support, safety and security, legal affairs, ethics, and conduct and discipline. The Unit, which includes the Central Records Unit, also ensures the effective management of correspondence for the Secretary-General and the Executive Office.

Office of the Spokesperson

1.61 The Office of the Spokesperson for the Secretary-General provides information to the media on the work of the Secretary-General and the United Nations system as a whole through daily briefings, direct responses to media enquiries, press conferences, background briefings and interviews with the Secretary-General, the Deputy Secretary-General and other senior officials. The Office provides advice on media relations to the Secretary-General, the Deputy Secretary-General and United Nations officials. Personnel of the Office travel with the Secretary-General, keep him abreast of breaking news, interact with media to ensure coverage of the activities of the Secretary-General, and ensure that all statements made are placed on record.

Political, Peacekeeping, Humanitarian and Human Rights Unit

1.62 The responsibilities of the Political, Peacekeeping, Humanitarian and Human Rights Unit include working closely with the relevant line departments to provide situational awareness, trend analysis and advice on emerging and ongoing issues of interest and concern across the political, peacekeeping, humanitarian and human rights portfolios; supporting senior management decision-making on country situations and relevant thematic files; ensuring effective and coordinated United Nations system analysis, reporting and response on situations of interest and concern; ensuring policy oversight and quality assurance of various communications and reports of the Secretary-General on political, peacekeeping, humanitarian or human rights issues; providing high-quality and well-coordinated input to public and private communications; and ensuring that human rights concerns are adequately reflected in the above-mentioned work. The Unit also plays a critical role in supporting the Secretary-General in the implementation of the relevant actions in the Pact for the Future relating to peace and security.

Rule of Law Unit

1.63 The Rule of Law Unit acts as a catalyst of action in strengthening United Nations activities to promote the rule of law. The Unit serves as the focal point in the Executive Office for legal questions, the rule of law, counter-terrorism and the prevention of violent extremism, international justice and

accountability, organized crime and drugs, transitional justice and anti-corruption, and provides support for the system-wide coordination, coherence and quality of rule of law activities of the United Nations. It develops system-wide strategies, policy direction, best practice materials and guidance for the Organization in promoting the fundamental importance of the rule of law. Moreover, the Unit provides support to the Rule of Law Coordination and Resource Group in carrying out the tasks set out in the related report of the Secretary-General (A/61/636-S/2006/980) and implementing the New Vision of the Secretary-General for the Rule of Law and leads the preparation of the Secretary-General's annual report on the rule of law.

Scheduling and Travel Unit

1.64 The Scheduling and Travel Unit oversees the scheduling of meetings, events and travel of the Secretary-General, handling requests for invitations and individual meetings in consultation with departments, offices and units. The responsibilities of the Unit include preparation for scheduled activities (meetings, events and travel), including the consolidation of briefing materials, the preparation of scenarios and the organization of the travel of the Secretary-General.

Strategic Communication and Speechwriting Unit

1.65 The Strategic Communication and Speechwriting Unit provides communications advice and support to the Secretary-General. The Unit drafts speeches, video messages, op-ed articles and other materials for delivery by the Secretary-General. The Unit also works with communications colleagues and others across the United Nations system on strategic planning and crisis communications; helps to formulate key messaging; ensures that the Secretary-General's speeches and messages are disseminated as widely as possible; and provides speech support to the Deputy Secretary-General and other senior officials in the Executive Office.

Strategic Planning and Monitoring Unit

1.66 The Strategic Planning and Monitoring Unit provides support for strategic decision-making, priority-setting, forward planning, analysis and risk management, and ensuring strategic direction and coherence in planning frameworks; and supports analyses, reviews, assessments and plans for integrated United Nations response efforts, with a focus on crisis-affected and fragile settings, including the preparation of strategic options for engagement based on information from the United Nations system. The Unit translates the guidance of the Secretary-General into strategic directives and supports his efforts to develop new capabilities that promote agility, integration and cohesion across the United Nations system and to offer solutions to the challenges of the twenty-first century.

Sustainable Development Unit

1.67 The Sustainable Development Unit supports strategic engagement on sustainable development, guided by the Sustainable Development Goals, the Addis Ababa Action Agenda, the Paris Agreement and other intergovernmentally agreed sustainable development commitments, as well as the reform of the United Nations development system. The Unit supports the Secretary-General and the Deputy Secretary-General in mobilizing ambition and action to achieve policy breakthroughs aligned with acceleration of the Goals. At a time when the global development agenda needs to be given significant political impetus to fully implement the 2030 Agenda, the Unit has helped to sharpen the focus of the United Nations system on catalytic Sustainable Development Goal transitions at all levels to unlock transformative policy changes through a repositioned United Nations development system. The Unit's work has also contributed to expanded multi-stakeholder engagement and partnerships. Financing for development, climate action and environmental sustainability, digitalization, energy and food security, jobs and social protection, global health, water and sanitation, education, migration and development, cross-pillar collaboration and transitions from crisis and conflict to sustainable development are priority areas under the responsibility of the Unit. The inclusion agenda – gender equality, youth engagement and inclusion of persons with disabilities, Indigenous Peoples and local communities, among others – receives priority attention to ensure that no one is left behind. The Unit provides substantive input on sustainable development for decision-making and contributes to the follow-up and implementation of the Pact for the Future.

1.68 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.41 to 1.43.

1.69 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.44 to 1.46 and figure 1.VII.

1.70 As shown in table 1.44 (1), the overall resources proposed for 2026 amount to $18,793,500, reflecting a decrease of $48,100 (or 0.3 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

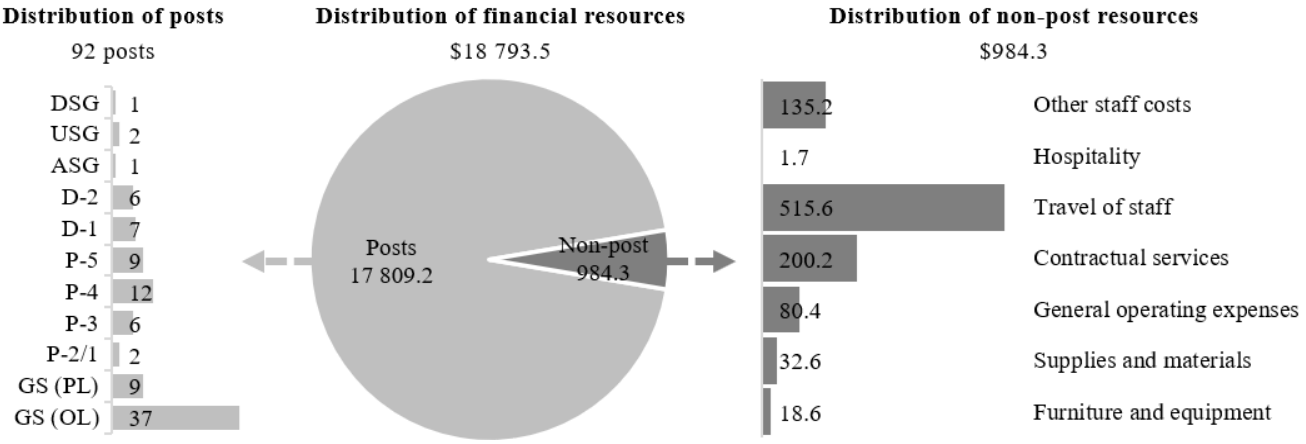
Figure 1.VII
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Technical adjustments

1.71 As shown in table 1.44 (1), resource changes reflect a decrease of $35,100, which relates to the removal of non-recurrent provisions under contractual services associated with development costs relating to the integration of an external software application with Inspira for reference checks.

Other changes

1.72 As shown in table 1.44 (1), resource changes reflect a net decrease of $13,000, as follows:

(a) An increase of $10,800 under contractual services relates to maintenance costs for two websites managed by the Executive Office to ensure compliance with technology, security, branding, multilingualism and accessibility requirements, which is offset in part by lower provisions for central data processing services relating to the adjustment of standard information and communications technology (ICT) rates for personnel at Headquarters;

(b) A decrease of $23,800 under general operating expenses relates to lower provisions for communications costs following the migration from the legacy telecommunications infrastructure.

Other assessed resources

1.73 As reflected in tables 1.44 (2) and 1.45 (2), other assessed resources amount to $1,425,100. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.74 As reflected in tables 1.44 (3) and 1.45 (3), extrabudgetary resources amount to $35,424,100. The resources would complement regular budget resources and would be used to provide for 39 posts (1 D-2, 1 D-1, 12 P-5, 6 P-4, 9 P-3, 1 P-2/1, 2 General Service (Principal level) and 7 General Service (Other level)), whose functions span the various areas of work of the Executive Office as explained in paragraphs 1.52 to 1.67, and non-post resources that would be used to support the Secretary-General in his responsibilities and the Office's activities in all regions of the world, providing support for the financing of activities relating to the maintenance of international peace and security, and providing for special projects to be undertaken by the Office.

1.75 The extrabudgetary resources under the present section are subject to the oversight of the Executive Office, which has delegated authority from the Secretary-General.

1.76 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.47. The vast majority of the travel undertaken in the Executive Office is in connection with the formal delegations of the Secretary-General and of the Deputy Secretary-General. The official visits of the Secretary-General and of the Deputy Secretary-General involve complex preparation and logistical arrangements with respect to the agenda and scheduling with numerous high-level government officials. Therefore, such preparations are, in many cases, finalized close to the departure date and are subject to last-minute changes. Furthermore, the official visits, in most cases, involve multiple consecutive meetings in various countries and regions in order to save financial resources that would have been otherwise incurred had the travel been to a single destination with a round trip to New York. Hence, the coordination of these multiple-leg trips with numerous high-level participants is more complex and involves additional extensive preparations with unforeseen circumstances. It should be noted that the Executive Office often works directly with the Travel Unit and reserves the tickets on the basis of a preliminary itinerary to secure the tickets at a low price, before the formal actions are recorded in Umoja, which are then completed at a later stage, once final information is confirmed. The Executive Office is mindful of and takes the utmost efforts to achieve improved compliance with the advance booking of air travel policy.

B. Proposed post and non-post resource requirements for 2026

Overview

1.77 The Office of the Director-General of the United Nations Office at Geneva provides executive support to the Director-General in her functions as the representative of the Secretary-General in Switzerland, as executive head of the United Nations Office at Geneva and as the designated official for security for Switzerland, as mandated and described in the Secretary-General's bulletin on the organization of the United Nations Office at Geneva (ST/SGB/2000/4). The functions of the Office of the Director-General are to:

(a) Provide executive support to the Director-General and assist the Director-General in the overall direction and management of the United Nations Office at Geneva and the coordination of the activities of its units;

(b) Liaise with the Executive Office of the Secretary-General and other Secretariat units at Headquarters and other duty stations;

(c) Maintain contact with permanent and observer missions and with permanent observer offices, including coordinating information to them;

(d) Provide advice and support to the Director-General in relation to communications, public relations and outreach activities;

(e) Provide advice and support to the Director-General in the discharge of political and representational functions with Member States and regional and other intergovernmental organizations, and liaise with relevant Headquarters departments in this area;

(f) Organize the observance of mandated and selected international days;

(g) Maintain and develop cooperation with Geneva-based United Nations entities, including arranging consultations between the Director-General and the heads of the funds, programmes and specialized agencies at Geneva, and facilitating inter-agency cooperation;

(h) Support the Director-General by fostering partnerships and cooperation with civil society, academia, think tanks and the private sector to advance the Organization's objectives, including by building and maintaining relationships, organizing joint events and facilitating the participation of NGOs in United Nations activities, especially those with consultative status with the Economic and Social Council, while liaising with relevant Headquarters departments to enhance support for these initiatives;

(i) Promote reformed, inclusive and networked multilateralism to bolster global cooperation among diverse stakeholders, thereby reinforcing and advancing the overarching goals and objectives of the Organization;

(j) Represent the United Nations Legal Counsel at Geneva, assist the Director-General in all legal matters, provide legal advice to substantive departments and services at the United Nations Office at Geneva and to funds and programmes at Geneva, and liaise with the host country and other authorities concerning privileges and immunities, the implementation of Headquarters agreements and other questions affecting United Nations agreements;

(k) Carry out protocol and diplomatic liaison functions with permanent and observer missions and authorities of the host country, provide protocol advice to United Nations entities at Geneva and advise the Geneva Diplomatic Committee in its work;

(l) Support the implementation of the 2030 Agenda and the Pact for the Future through communication and outreach activities, capitalizing on the presence in Geneva of a diversity of stakeholders directly involved in the achievement of the Sustainable Development Goals, by acting as convenor, facilitator and connector among actors in Geneva and other duty stations;

(m) Lead the United Nations Office at Geneva as it adapts to new realities and challenges, ensuring business continuity at the Palais des Nations during the strategic heritage plan project, while promoting a culture of efficiency, environmental responsibility and agile work practices to meet the evolving needs of the international community.

1.78 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.48 to 1.50.

1.79 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.51 to 1.53 and figure 1.VIII.

1.80 As shown in tables 1.51 (1) and 1.52 (1), the overall resources proposed for 2026 amount to $3,893,400, reflecting an increase of $700 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

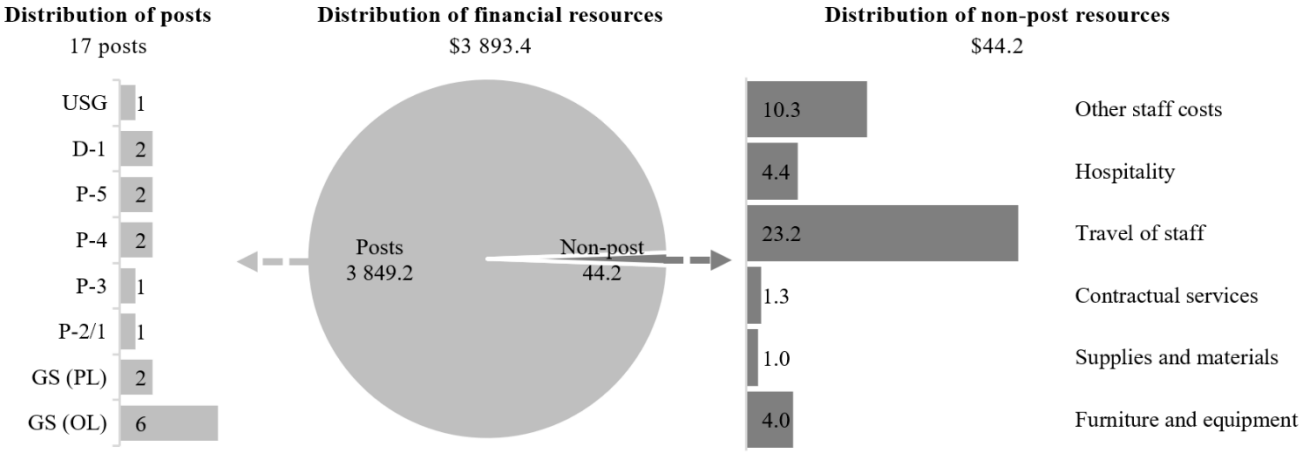
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

1.81 As shown in table 1.51 (1), resource changes reflect an increase of $700, which relates to the higher standard price of ICT charges for non-field personnel outside of Headquarters.

Extrabudgetary resources

1.82 As reflected in tables 1.51 (2) and 1.52 (2), extrabudgetary resources amount to $1,266,400. The resources would complement regular budget resources and would provide for three posts (General Service (Other level)) to support coordination functions, as well as for two posts (1 P-5 and 1 P-2/1) and non-post resources to support efforts to promote the Sustainable Development Goals.

1.83 The extrabudgetary resources under the present section are subject to the oversight of the Office of the Director-General, which has delegated authority from the Secretary-General.

1.84 Information on the advance booking for air travel is reflected in table 1.54. The Office of the Director-General will continue to plan its travel in order to reach 100 per cent compliance with the advance booking of air travel policy.

3. Office of the Director-General, United Nations Office at Vienna

B. Proposed post and non-post resource requirements for 2026

Overview

1.85 The Office of the Director-General of the United Nations Office at Vienna provides executive support to the Director-General in her functions as the representative of the Secretary-General in Austria, as executive head of the United Nations Office at Vienna, including the United Nations Information Service, and as the designated official for security for Austria. The Office of the Director-General also maintains liaison with the host Government and other Governments and intergovernmental organizations and NGOs in Vienna. The responsibilities of the Director-General are combined with those of the Executive Director of the United Nations Office on Drugs and Crime (UNODC). The Office of the Executive Director is integrated with that of the Director-General and is supported by UNODC resources. The functions of the Office of the Director-General, as outlined in the Secretary-General's bulletin on the organization of the United Nations Office at Vienna (ST/SGB/2004/5), are to:

(a) Provide assistance to the Director-General in the executive direction and management of the United Nations Office at Vienna and in the coordination of the activities of its units;

(b) Cooperate with the host Government and provide protocol services to the United Nations offices in Vienna, including processing letters of credentials for the heads of permanent missions in Vienna and maintaining liaison with NGOs in consultative status with the Economic and Social Council;

(c) Represent the United Nations Legal Counsel in Vienna and provide assistance to the Director-General on all legal matters and legal services for entities of the Secretariat in Vienna;

(d) Arrange for representation of the United Nations at meetings and conferences held in Vienna;

(e) Coordinate with the United Nations Industrial Development Organization, the International Atomic Energy Agency and the Preparatory Commission of the Comprehensive Nuclear-Test-Ban Treaty Organization on common policy matters affecting the entities based in Vienna;

(f) Maintain liaison with the Executive Office of the Secretary-General and other Secretariat units at Headquarters.

1.86 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.55 to 1.57.

1.87 Additional details on the distribution of the proposed resources for 2026 are reflected in table 1.58 and figure 1.IX.

1.88 As shown in table 1.58, the overall resources proposed for 2026 amount to $1,406,500, reflecting an increase of $300 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

4. Office of the Director-General, United Nations Office at Nairobi

B. Proposed post and non-post resource requirements for 2026

Overview

1.91 The functions of the Office of the Director-General of the United Nations Office at Nairobi are outlined in the Secretary-General's bulletin on the organization of the United Nations Office at Nairobi (ST/SGB/2009/3). The Director-General is responsible for all activities of the Office, serves as the representative of the Secretary-General and performs representation and liaison functions with the host Government, permanent missions and intergovernmental organizations and NGOs based in Nairobi. Her responsibilities also include the executive direction and management of the United Nations Office at Nairobi, including the programmes of administration and conference services, other support and common back-office services, and the United Nations Information Service in Nairobi. The functions of the Office of the Director-General are to:

(a) Provide assistance to the Director-General in all functions, including ad hoc responsibilities assigned by the Secretary-General;

(b) Cooperate with the host Government and provide protocol services for the United Nations Office at Nairobi, including receiving letters of credentials of the heads of permanent missions in Nairobi;

(c) Provide legal advisory services for the United Nations Office at Nairobi;

(d) Maintain liaison with the Executive Office of the Secretary-General and Headquarters-based Secretariat units.

1.92 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.60 to 1.62.

Explanation of variances by factor

Overall resource changes

Other changes

1.95 As shown in table 1.63 (1), resource changes reflect an increase of $400, which relates to the higher standard price of ICT charges for non-field personnel outside of Headquarters.

Extrabudgetary resources

1.96 As reflected in tables 1.63 (2) and 1.64 (2), extrabudgetary resources amount to $321,500. The resources would complement regular budget resources and would be used mainly to provide for one post (General Service (Other level)) and non-post resources that would be used to support the implementation of activities of the Office of the Director-General, including serving as the representative of the Secretary-General and performing representation and liaison functions with the host Government, permanent missions and intergovernmental organizations and NGOs based in Nairobi.

1.97 The extrabudgetary resources under the present section are subject to the oversight of the Office of the Director-General, which has delegated authority from the Secretary-General.

1.98 Information on the advance booking for air travel is reflected in table 1.66. The Office of the Director-General continues to plan and monitor travel activities in close collaboration with processing offices, including the Travel Unit, to improve compliance with the advance booking of air travel policy.

IV. Office of the Special Representative of the Secretary-General for Children and Armed Conflict

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.99 The Special Representative of the Secretary-General for Children and Armed Conflict is responsible for the protection of children affected by armed conflict and for advocating to prevent the six grave violations against children identified by the Security Council from occurring in the first place. The six grave violations are the denial of humanitarian access for children (resolution 1261 (1999)); the recruitment and use of children (resolution 1379 (2001)); the killing and maiming of children (resolution 1882 (2009)); rape and other forms of sexual violence against children (ibid.); attacks on schools and hospitals (resolution 1998 (2011)); and the abduction of children (resolution 2225 (2015)). The Office of the Special Representative works primarily in the situations of armed conflict or of concern identified in the annual report of the Secretary-General on children and armed conflict. The Office covers 25 situations in 5 geographical regions and promotes enhanced monitoring and reporting at the subregional level in the Lake Chad basin and central Sahel regions, in accordance with the report of the Secretary-General on children and armed conflict in 2024 (A/78/842-S/2024/384).

1.100 The mandate was established by the General Assembly in its resolution 51/77, in which the Assembly outlined key priorities of the mandate of the Special Representative, which were further formulated and shaped in subsequent Assembly resolutions and decisions, including resolution 58/245, as well as Security Council resolution 1261 (1999) and subsequent Council resolutions. The key elements of the mandate of the Special Representative are therefore to: (a) provide political leadership and high-level advocacy for the improved protection of children affected by armed conflict; (b) lead the collection of information and reporting on the plight of these children; (c) advocate, build awareness of and give prominence to ending and preventing grave violations; (d) work with United Nations partners, Member States, civil society and pertinent intergovernmental bodies to propose ideas, undertake research and facilitate discussions on the best approaches to enhance the protection response for children in situations of armed conflict, including through improved accountability processes; (e) undertake diplomatic engagement with parties to armed conflict and affected Member States in order to secure commitments to end and prevent violations against children; and (f) facilitate the work of operational child protection actors on the ground through the development and promotion of best practices, such as ensuring that child protection issues are included in peace processes, appropriate release procedures are in place, reintegration programmes are strengthened to avoid re-recruitment opportunities, child protection expertise and capacity are reinforced, and regional and national prevention plans and policies against the six grave violations are promoted.

1.101 By its resolution 76/147, the General Assembly recommended that the Secretary-General extend the mandate of the Special Representative for an additional period of four years, until 2025.

Programme of work

Objective

1.102 The objective, to which the Office contributes, is to eradicate the six grave violations committed against children in situations of armed conflict through strengthened mechanisms for the protection of children used and abused in, for and by armed conflict, prevent these violations from occurring in the first place, and improve measures to better protect children in situations of armed conflict, including by ensuring that children are placed at the centre of peace negotiations and securing optimal conditions for the release and reintegration of children, thereby avoiding re-recruitment.

Strategy and external factors for 2026

1.103 To contribute to the objective, the Office will strengthen mechanisms for the protection of children used and abused in, for and by armed conflict, prevent these violations from occurring in the first place, and improve measures to better protect conflict-affected children. Specifically, the Office will:

(a) Monitor and report on violations against children in situations of armed conflict through the reinforcement of existing child protection capacities on the ground and facilitate information exchanges to identify and mitigate trends in the use and abuse of children in, for and by armed conflict, including during transition phases of relevant United Nations peace operations, in line with Security Council resolution 2764 (2024), the most recent Council resolution on children and armed conflict;

(b) Enhance its diplomatic engagement, including through direct dialogue and/or country visits by the Special Representative, with parties to armed conflict to promote ending and preventing the use and abuse of children, and continue to advocate the protection of children affected by conflict and the prevention of grave violations against them through analysis, public outreach and targeted support, as well as the development of groups of friends of the mandate in affected States and regions;

(c) Develop community, national, subregional and regional prevention plans, as well as other preventive measures, guided by Security Council resolutions 2427 (2018) and 2601 (2021), while promoting the adoption of international norms and standards for the protection of children by Member States;

(d) Analyse the best practices emerging from ongoing activities to stop grave violations committed against children and promote the continued roll-out of specific public awareness campaigns in all countries and regions where there is active armed conflict and, whenever possible, in all official languages of the United Nations;

(e) Develop curricula with partners, conduct training for defence and security personnel and assist in capacity-building for governing structures, United Nations partners, academics and civil society;

(f) Undertake research into the six grave violations, provide guidelines, as relevant, to assist in their monitoring, promote the comprehensive discussion of reintegration needs and promote the inclusion of child protection issues into peace processes;

(g) Organize and participate in seminars, workshops, conferences and other relevant meetings, including with regard to the implementation of the Pact for the Future and the working group on peace and security, to raise awareness of child protection and prevention best practices and proposed best international standards on the protection and release of children who are victims of the six grave violations;

(h) Enhance data analysis and information management capacity to better capture the differentiated protection needs of children, including on the basis of age, gender and disability, and whether they are on the move, internally displaced, refugees or victims of cross-border trafficking, and the factors that can exacerbate their vulnerability, such as climate change, poverty and inequality, the proliferation of and illicit trafficking in arms, the impact of landmines, explosive remnants of war and improvised explosive devices, and the impact of new technologies.

(i) Support Member States in making progress towards the achievement of the Sustainable Development Goals, including Goals 3, 4, 5 and 8, in particular target 8.7 on the eradication of child labour, including the recruitment and use of child soldiers; Goals 10 and 16, in particular target 16.2 on ending abuse, exploitation, trafficking and all forms of violence against and torture of children; and Goal 17, in particular target 17.18 on enhancing capacity-building support to increase significantly the availability of high-quality, timely and reliable data disaggregated by income, gender, age, race, ethnicity, migratory status, disability, geographical location and other characteristics.

1.104 The above-mentioned work is expected to result in:

(a) A decrease in the number of violations committed against children in armed conflict and an increase in the number of children released by armed forces and groups and reintegrated, including through repatriation and removal from situations of armed conflict, in line with the commitments agreed to in action plans, handover and release protocols, other commitments and mutually agreed practices;

(b) Stronger national and regional protection and prevention systems and accountability mechanisms through justice, remediation and reparation processes, involving Member States, to address gaps in knowledge, common standards and procedures for dealing with children under threat;

(c) Strengthened efforts to protect children, including those threatened by intercommunal violence and the emergence of new parties to armed conflict, and specific groups of children at risk;

(d) Increased mitigation capacity of Governments to prevent violations and ensure equal access to and the continuation of education in conflict;

(e) An international political consensus that tailored, systematic and sustainable reintegration support should be provided to all released children, including those repatriated or removed from armed conflict zones, and that child protection issues should be included in all peace processes, in order to break the cycle of violence;

(f) Enhanced capacity of Member States and United Nations country task forces on monitoring and reporting, and their equivalents in countries where there is no monitoring and reporting mechanism in place, to support children and vulnerable communities on the ground and to ensure the continuity, effectiveness and sustainability of child protection activities, including during mission transitions or withdrawals;

(g) Increased participation of children in decision-making processes relating to issues that have an impact on them, including their protection and reintegration needs, in accordance with the Convention on the Rights of the Child.

1.105 With regard to external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The political environment would be supportive for the improved measures put in place to end and prevent violations committed against children in situations of armed conflict in all situations of the children and armed conflict agenda;

(b) The dynamics of contemporary armed conflict in which children are normally victimized allow for access to monitor and assist in the implementation of these measures.

1.106 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to garner support for the protection of children in armed conflict, including through engagement with Member States and groups of friends on children and armed conflict, to keep the plight of conflict-affected children high on the global political agenda and to advocate the ratification and implementation of the Convention on the Rights of the Child and its Optional Protocol on the involvement of children in armed conflict, and the endorsement of political commitments. The Office will reinforce partnerships with regional and subregional actors for the adoption of measures to prevent grave violations before they occur and engage with mediation actors to encourage the inclusion of child protection issues in mediation and peace processes. The Office will also work closely with civil society organizations, communities, academia and research institutes to build expertise and raise awareness of the protection of children in armed conflict.

1.107 With regard to inter-agency coordination and liaison, the Office will continue to support country task forces on monitoring and reporting on grave violations against children and engage with parties to conflict to strengthen advocacy for the adoption of measures to end and prevent these violations, including through capacity-building initiatives. The Office will support the development of technical guidelines within the Monitoring and Reporting Mechanism Technical Reference Group, an

inter-agency group bringing together the Office, the United Nations Children's Fund (UNICEF), the Department of Peace Operations and the Department of Political and Peacebuilding Affairs to provide guidance to United Nations partners implementing the mandate in the field. The Office will also support the exchange of information within the Task Force on Children and Armed Conflict at United Nations Headquarters. In addition, the Office will strengthen its cooperation with the Offices of the Special Representative of the Secretary-General on Violence against Children and the Special Representative of the Secretary-General on Sexual Violence in Conflict, through information exchange, common messaging and joint events and initiatives, for a more effective and coordinated advocacy to ensure that the plight of conflict-affected children is visible on the international agenda.

1.108 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. In 2026, the Office will continue to mainstream a gender perspective into the Monitoring and Reporting Mechanism to strengthen its gender-sensitive analyses of grave violations against children in armed conflict, including through enhanced data analysis and support for the capacity-building activities of its field partners. The Office will follow up on the outcomes of a specialized workshop delivered to country task forces on monitoring and reporting in 2023 through a review of the draft tipsheet for strengthening gender analysis in monitoring and reporting and examine the operationalization of the workshop's report and recommendations within the Monitoring and Reporting Mechanism Technical Reference Group, which provides guidance to field-based United Nations monitors of grave violations committed against children in armed conflict. The Special Representative will continue advocacy for the protection of girls' education from attacks, including within the framework of the endorsement and implementation of the Safe Schools Declaration. The Office will also ensure that the platforms that it creates, alongside partners, will allow for the voices of children to be heard in relevant forums and for the differentiated experience between girls and boys to be highlighted. Wherever possible, the Office will mainstream a gender perspective and examine the intersection between gender and other factors in the research that it conducts and the lessons learned and best practices that it collects and disseminates on the protection of conflict-affected children. The Office will also initiate the development of a policy aimed at more systematically integrating a gender perspective into its work.

1.109 In line with the United Nations Disability Inclusion Strategy, the Office will strengthen its efforts to address the protection requirements of children with disabilities in armed conflict. The Office will build on the discussion paper on the protection of children with disabilities in armed conflict published in 2023 by disseminating its conclusions and advocating with partners for the implementation of its recommendations, including the strengthening of data collection on children with disabilities in armed conflict; the consultation of persons with disabilities, including children, and the organizations that represent them; and the provision of awareness-raising and capacity-building initiatives on disability inclusion. The Office will continue its advocacy efforts to raise awareness of the plight of children with disabilities in armed conflict, and mainstream disability inclusion and its intersection with other diversity factors.

Programme performance in 2024

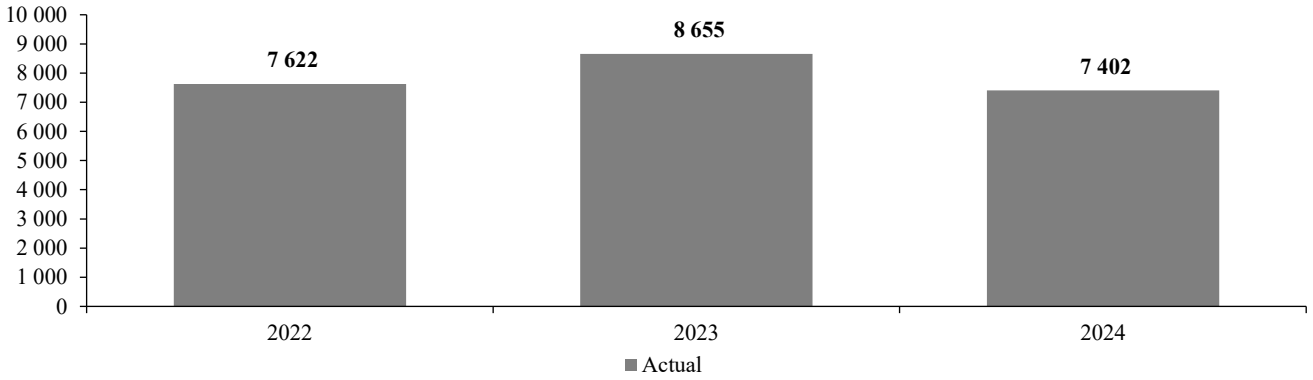
Decrease in the number of verified incidents of recruitment and use of children by armed forces and groups in situations of armed conflict

1.110 The recruitment and use of children by armed forces and groups is prohibited under international law and has been identified by the Security Council as one of the six grave violations against children in armed conflict. The Optional Protocol to the Convention on the Rights of the Child on the involvement of children in armed conflict is specifically aimed at protecting children, meaning every person below the age of 18 years, from being recruited or used in hostilities. Children recruited or used by parties to conflict suffer dramatic forms of exploitation and abuse; once they are released, their recovery requires sustained, tailored and child-centred reintegration programmes. The Office consistently advocates with parties to conflict, both armed forces and armed groups, to end and prevent the recruitment and use of children. After a continuous increase in verified incidents since

2021 due to the emergence of new conflicts and the intensification of existing conflict situations, the recruitment and use of children decreased by 14 per cent in 2024. This reflects the critical role that the Office played through its sustained engagement with partners, Member States and parties to conflict to adopt measures to end and prevent the recruitment and use of children, including handover protocols or action plans and advocacy at the international, regional and national levels to secure commitments such as the ratification and implementation of international instruments including the Optional Protocol or the endorsement of political commitments such as the Principles and Guidelines on Children Associated with Armed Forces or Armed Groups (the Paris Principles).

1.111 Progress towards the objective is presented in the performance measure below (see figure 1.XI).

Figure 1.XI
Performance measure: number of children recruited or used by parties to conflict in armed conflict



Planned results for 2026

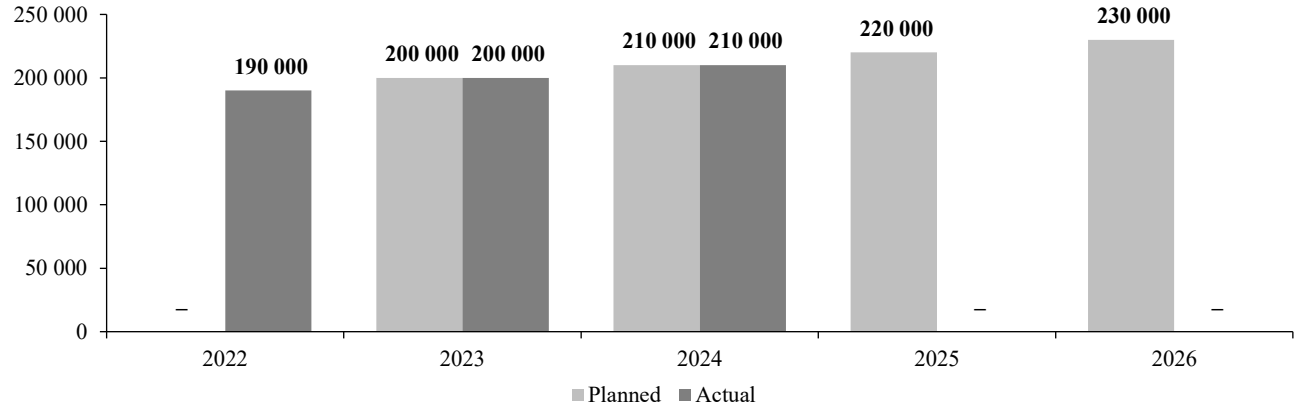
Result 1: more children released from armed forces and armed groups

Programme performance in 2024 and target for 2026

1.112 The Office's work contributed to the release of an estimated 10,000 children from armed forces and armed groups in 2024, which met the planned target of 210,000 released children since 2000.

1.113 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XII).

Figure 1.XII
Performance measure: number of released children from armed forces and armed groups since 2000 (cumulative)



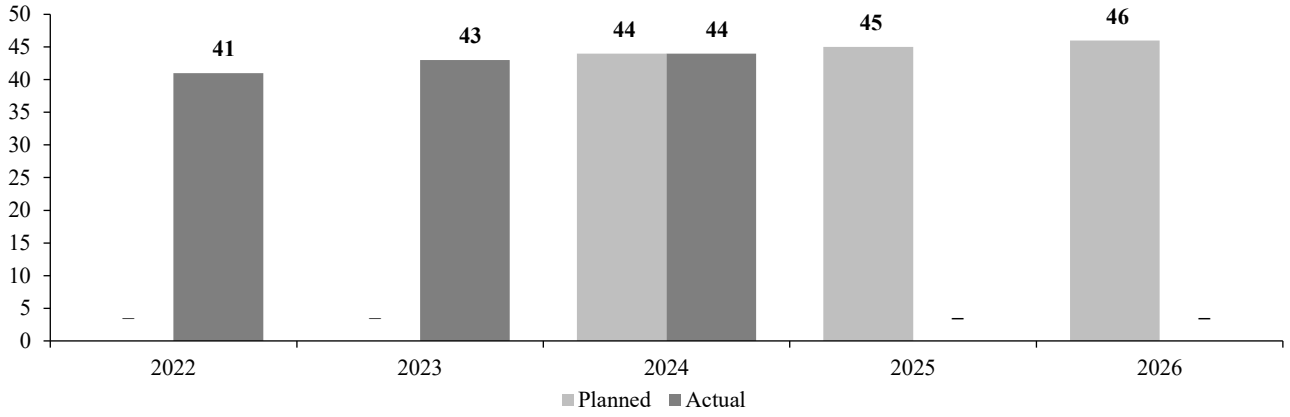
Result 2: increase in the signature of action plans, handover protocols and other commitments between the United Nations and parties to conflict to end and prevent grave violations against children

Programme performance in 2024 and target for 2026

1.114 The Office's work contributed to the signature of one additional action plan in 2024, which met the planned target of 44 joint action plans, handover protocols and other commitments between the United Nations and parties to conflict to end and prevent grave violations against children.

1.115 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XIII).

Figure 1.XIII
Performance measure: number of joint action plans, handover protocols and other commitments between the United Nations and parties to conflict to end and prevent grave violations against children (cumulative)



Result 3: decrease in the number of children recruited and used by parties to conflict in situations of armed conflict

Proposed programme plan for 2026

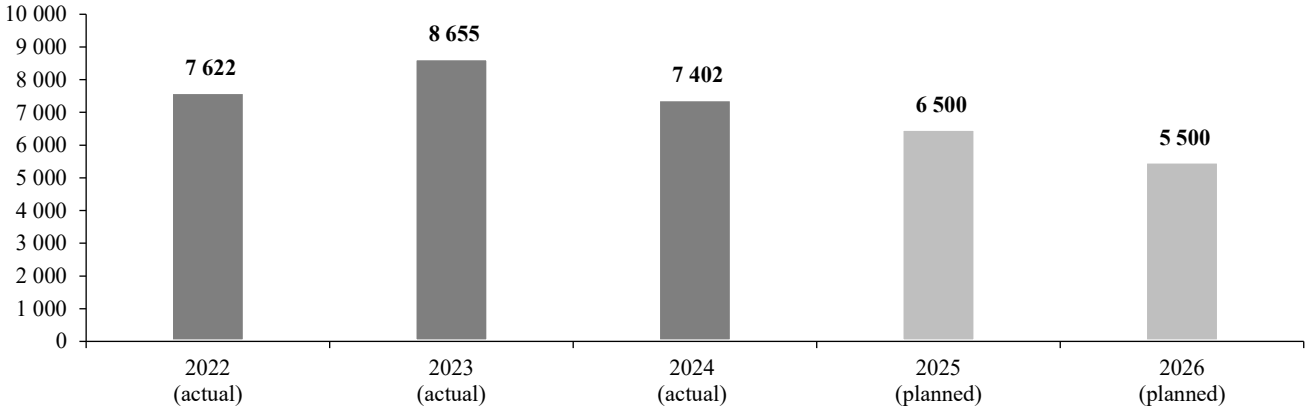
1.116 The Office monitors, verifies and reports on the recruitment and use of children in armed conflict, engaging with parties to conflict to end and prevent this grave violation and facilitate the release of children, leading to reintegration opportunities. Ongoing efforts by the Office include advocating for the ratification and implementation of the Convention on the Rights of the Child and its Optional Protocol on the involvement of children in armed conflict. These efforts also include advocating for the signing of action plans and commitments with parties to conflict to end and prevent the recruitment and use of children in armed conflict, as well as for the signing of prevention plans with Governments on the children and armed conflict agenda. The Office is also providing support for the development of new guidance notes, including the *Practical Guidance for Mediators to Protect Children in Situations of Armed Conflict*. These efforts contributed to a 14 per cent decrease in the number of children recruited and used by parties to conflict in 2024, compared with 2023.

Lessons learned and planned change

1.117 The lesson for the Office was that a decrease in the number of children recruited or used by parties to conflict requires long-term engagement, continuous focus and targeted advocacy with a wide range of actors, from parties to conflict to Member States and mediators. In applying the lesson, the Office will use sustained, enhanced and targeted engagement, as well as strategic partnerships, including advocacy campaigns focused on ending and preventing the recruitment and use of children by parties to conflict, to secure lasting commitments that lead to a reduction in the number of children recruited or used by parties to conflict.

1.118 Expected progress towards the objective is presented in the performance measure below (see figure 1.XIV).

Figure 1.XIV
Performance measure: number of children recruited or used by parties to conflict in situations of armed conflict



Legislative mandates

1.119 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

51/77	The rights of the child	78/187	Rights of the child
58/245	Office of the Special Representative of the Secretary-General for Children and Armed Conflict		

Security Council resolutions

1261 (1999)	2068 (2012)
1314 (2000)	2143 (2014)
1379 (2001)	2225 (2015)
1460 (2003)	2427 (2018)
1539 (2004)	2467 (2019)
1612 (2005)	2601 (2021)
1882 (2009)	2764 (2024)
1998 (2011)	

Deliverables

1.120 Table 1.67 lists all deliverables of the programme.

Table 1.67

Office of the Special Representative of the Secretary-General for Children and Armed Conflict: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**15**	**14**	**15**	**11**
1. Annual report to the General Assembly	1	1	1	1
2. Annual report to the Security Council	1	1	1	1
3. Annual report to the Human Rights Council	1	1	1	1
4. Global horizontal notes to the Security Council Working Group on Children and Armed Conflict	4	4	4	4
5. Reports to the Security Council Working Group on Children and Armed Conflict in specific situations	8	7	8	4
Substantive services for meetings (number of three-hour meetings)	**5**	**5**	**5**	**5**
Meetings of:				
6. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
7. The Fifth Committee	1	1	1	1
8. The General Assembly	1	1	1	1
9. The Security Council	1	1	1	1
10. The Human Rights Council	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**12**	**12**	**12**	**12**
11. Training for child protection actors and country task forces on monitoring and reporting mechanisms	12	12	12	12
Publications (number of publications)	**2**	**2**	**2**	**2**
12. Studies, reports and other publications relating to children and armed conflict	2	2	2	2
Technical materials (number of materials)	**1**	**1**	**1**	**1**
13. Technical guidelines on the six grave violations against children	1	1	1	1
Fact-finding, monitoring and investigation missions (number of missions)	**9**	**9**	**9**	**8**
14. Field missions to situations on the children and armed conflict agenda	9	9	9	8

C. Substantive deliverables

Consultation, advice and advocacy: briefings and consultations with Security Council Member States and some 20 other Member States; briefings and consultations with regional and subregional organizations that play a role in the prevention of grave violations against children; expert advice on policy matters to national government and regional officials dealing with child protection issues; and advocacy missions in 7 locations.

D. Communication deliverables

Outreach programmes, special events and information materials: keynote speaker or presenter at an annual average of 30 high-level events, NGO and civil society events, retreats, symposiums, round tables and forums on issues relating to children and armed conflict; and multimedia communications materials, including informational brochures, targeting national government and regional officials, as well as the general public, at the global, regional and national levels.

External and media relations: 15 press releases and press conferences; interviews; and recorded statements.

Digital platforms and multimedia content: content for websites and social media accounts.

B. Proposed post and non-post resource requirements for 2026

Overview

1.121 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.68 to 1.70.

Table 1.68

1.122 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.71 to 1.73 and figure 1.XV.

1.123 As shown in tables 1.71 (1) and 1.72 (1), the overall resources proposed for 2026 amount to $3,201,800, reflecting an increase of $113,800 (or 3.7 per cent) compared with the approved budget for 2025. Resource changes result from new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

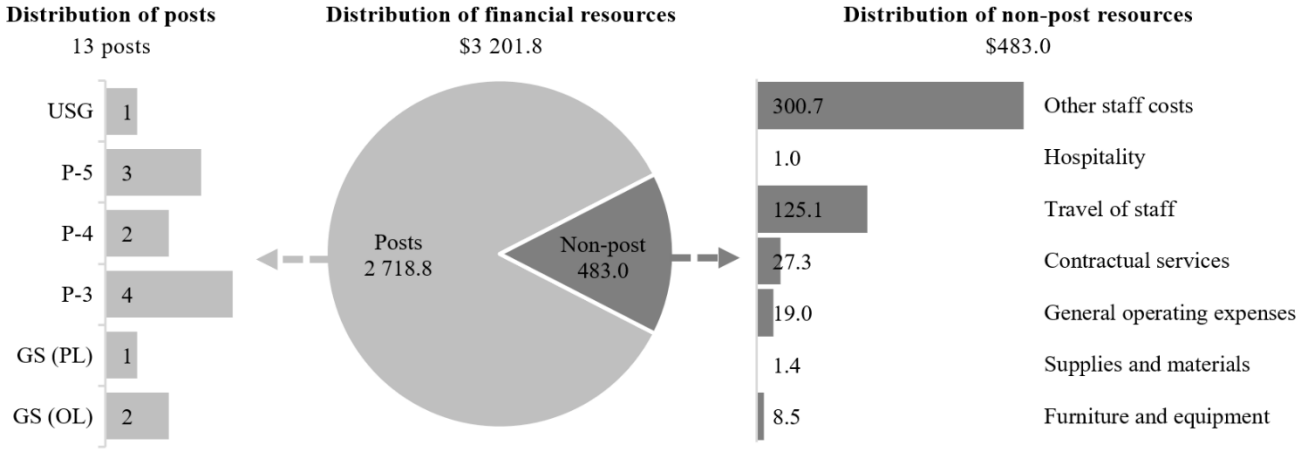
Figure 1.XV
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

New and expanded mandates

1.124 As shown in tables 1.71 (1) and 1.72 (1), resource changes reflect an increase of $108,800 under posts relating to the proposed establishment of one post of Data Specialist (P-3), in accordance with General Assembly resolution 79/257 (see annex II to the present report), and an increase of $5,000 under non-post resources associated with the proposed establishment of the post, under contractual services ($2,000), general operating expenses ($1,000) and furniture and equipment ($2,000).

Extrabudgetary resources

1.125 As reflected in tables 1.71 (2) and 1.72 (2), extrabudgetary resources amount to $2,605,600. The resources would complement regular budget resources and would be used mainly to provide for four posts (2 P-4 and 2 General Service (Other level)) and non-post resources that would be used to support various activities of the Office, including the enhancement of its capacity and expertise; support for public outreach and the launch of advocacy campaigns; and the enhancement of analysis, assessment and responses to new and emerging trends in violations against children in armed conflict.

1.126 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.127 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.74. While the Office makes every effort to follow the advance booking of air travel policy, it is not always possible to comply owing to unforeseen circumstances, such as receiving invitations to high-level events hosted by Member States or regional organizations less than three weeks before the event. In addition, owing to the nature of the mandate, political opportunities and openings arise unexpectedly that require staff to travel at short notice to seize such opportunities and advance the implementation of the mandate. The Office will continue to strive to improve the planning of its travel to improve its compliance with the advance booking of air travel policy.

V. Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.128 The Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict is responsible, in line with Security Council resolution 1888 (2009), for providing coherent and strategic leadership and promoting the coordination of efforts among relevant stakeholders, through primarily the United Nations Action against Sexual Violence in Conflict, on preventing and addressing sexual violence as a weapon of war and tactic of terrorism and for engaging with justice and security sectors, all parties to armed conflict, civil society and the survivors of such crimes.

1.129 The mandate derives from the priorities established in relevant General Assembly resolutions and/or decisions, including resolution 65/259, by which the Assembly established the Office, following the establishment of the mandate of the Special Representative pursuant to Security Council resolution 1888 (2009). In accordance with resolution 1888 (2009) and subsequent related resolutions and recognizing that conflict-related sexual violence remains underreported and insufficiently addressed, the role of the Special Representative and that of the Office is, among others: (a) to give victims and affected communities a voice; (b) to mobilize the political will and action of the international community, in particular to address the impunity of perpetrators of violations; (c) to foster collaboration and partnerships and broaden the circle of stakeholders on the issue; (d) to coordinate advocacy and programmatic responses, in particular in the United Nations system; (e) to ensure more reliable and comprehensive data on sexual violence in conflict as a basis for action at all levels; and (f) to disseminate information/knowledge on approaches and best practices to address sexual violence in conflict.

1.130 The mandate derives from the priorities established in relevant Security Council resolutions, including 1820 (2008), 1888 (2009), 1960 (2010), 2106 (2013) and 2467 (2019), as well as relevant country-specific and sanctions resolutions that make explicit reference to sexual violence in conflict and the mandate of the Special Representative. Furthermore, the adoption of Council resolutions 2331 (2016) and 2388 (2017) extends the scope of work of the Office to the areas of counter-terrorism, anti-trafficking efforts and related security and justice sector engagement.

Programme of work

Objective

1.131 The objective, to which the Office contributes, is to prevent and eradicate sexual violence as a tactic of war and terrorism and improve the provision of multisectoral services for survivors and the delivery of justice and accountability for such crimes.

Strategy and external factors for 2026

1.132 To contribute to the objective, the Office will continue to:

(a) Engage with parties to conflict and other relevant stakeholders on addressing conflict-related sexual violence, with a priority focus on justice and accountability for such crimes as a key element of deterrence and prevention, including through engagement with justice and security actors in countries of concern;

(b) Engage with Member States at the global level, including in the Security Council and the General Assembly, and foster national ownership, leadership and responsibility in addressing conflict-related sexual violence in situations of concern;

(c) Adopt a survivor-centred approach in the implementation of all aspects of the mandate, in line with Security Council resolution 2467 (2019) and in coordination with survivors of sexual violence, survivors' networks, civil society, regional organizations and relevant United Nations entities, in particular at the country level;

(d) Strive to expand the circle of stakeholders and encourage concerted and coordinated action among a broad range of actors at the international, regional and national levels, including through the United Nations Action against Sexual Violence in Conflict network consisting of 26 United Nations entities and the Team of Experts on the Rule of Law and Sexual Violence, which work under the strategic direction of the Special Representative;

(e) Focus its advocacy efforts on advancing the achievement of Sustainable Development Goals 5 and 16 and on ensuring the implementation of prevention strategies, multisectoral services for survivors, reparations and redress measures.

1.133 The above-mentioned work is expected to result in:

(a) Adoption of concrete and time-bound commitments to prevent and address incidents, patterns and trends of conflict-related sexual violence, and accelerated implementation of existing political and operational agreements with affected States, to ensure an enhanced security and justice sector response;

(b) Improved access to appropriate and good-quality services, including healthcare, psychosocial support, legal services, reparations and livelihood support for all survivors, as well as for children born of conflict-related sexual violence.

1.134 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Continued high level of political will on the part of all stakeholders, in particular Member States, to work towards preventing sexual violence and ending the impunity of persistent perpetrators in situations of armed conflict and other situations of concern;

(b) Member States and other key stakeholders see a convergence between their strategic interests and priorities and upholding the international protection framework that has been established to prevent conflict-related sexual violence.

1.135 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will deepen its engagement with regional and subregional actors and multilateral institutions, including the African Union, the League of Arab States, the European Union, the Economic Community of West African States, the International Conference on the Great Lakes Region, the International Organization of la Francophonie, the Inter-Parliamentary Union and the African Development Bank, including through formal frameworks of cooperation, to outline advocacy and operational prevention and response strategies to conflict-related sexual violence.

1.136 With regard to inter-agency coordination and liaison, the Office will continue to work through the United Nations Action against Sexual Violence in Conflict inter-agency network, which is chaired by the Special Representative. The network will continue to provide strategic advocacy, knowledge generation, coordination, and catalytic country-level support, including through the finalization of the review of monitoring, analysis and reporting arrangements through system-wide strategic reflections; the formulation and dissemination of joint advocacy products to call upon the international community to provide political and financial support for survivors in situations of conflict; and the development of new resources and technical guidance on emerging issues. Coordination on justice and accountability dimensions of the mandate will be conducted through the Team of Experts on the Rule of Law and Sexual Violence in Conflict, which operates under the strategic direction of the Special Representative, and comprises the Office, OHCHR, the United

Nations Development Programme and the Department of Peace Operations as the co-lead entities. In addition, the Office will continue to strengthen its cooperation with the Office of the Special Representative of the Secretary-General on Children and Armed Conflict and the Office of the Special Representative of the Secretary-General on Violence against Children, through periodic coordination meetings and information-sharing, to inform joint advocacy and operational strategies related to the prevention of and response to conflict-related sexual violence against civilians, in particular girls and boys.

1.137 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. Given the nature of the Office's mandate, which is closely linked to the women and peace and security agenda, all its activities are ultimately aimed at promoting gender equality and women's empowerment, as well as at addressing discrimination and harmful social norms that constitute invisible drivers of conflict-related sexual violence in times of war and peace. For example, political commitments negotiated with parties to conflict (e.g., joint communiqués, frameworks of cooperation and implementation plans) will continue to integrate the views of women's civil society organizations and will continue to promote the meaningful participation of women and girls in countries where they are often absent in political and decision-making processes, including peace processes. Prevention strategies and response programming will reflect a tailored approach to address sexual violence against all survivors. Information, including on incidents of conflict-related sexual violence, continue to be systematically disaggregated by sex in order to offer a gender-sensitive analysis for the Security Council.

1.138 In line with the United Nations Disability Inclusion Strategy, the Office will continue to incorporate issues relating to disability inclusion into policy, advocacy and key substantive aspects of its work, including programming, monitoring and reporting in priority situations. The NGO-civil society advisory group of the Office includes entities representing individuals with disabilities and, through this modality, the Office will continue to engage with individuals with disabilities and with relevant organizations during the course of field missions in priority countries. The Office's staff includes individuals with explicit human rights expertise relating to the rights of persons with disabilities, including those targeted with sexual violence in situations of armed conflict.

Programme performance in 2024

Strengthened national ownership to prevent conflict-related sexual violence and deliver justice for survivors: the case of South Sudan

1.139 In a context marked by marginal progress in the implementation of the Revitalized Agreement on the Resolution of the Conflict in the Republic of South Sudan (2018), abductions of women and girls for the purpose of sexual slavery persisted in 2024 as a feature of intercommunal incidents and incidents committed by parties to the conflict, including armed groups. Survivors often opt not to lodge official complaints due to fear of reprisals and the remoteness of their locations, which limits their access to health facilities and justice. The United Nations Mission in South Sudan (UNMISS), the United Nations country team and the Office have provided sustained support to the authorities to hold perpetrators of sexual violence accountable and deliver justice to survivors. For instance, the United Nations supported the deployment of mobile courts to address criminal cases, including on sexual and gender-based violence, and conducted training sessions for legal professionals to strengthen capacity for administration of justice, access for women to legal support and protection of human rights. In addition, the Team of Experts on the Rule of Law and Sexual Violence in Conflict provided training to police investigators and prosecutors, thereby strengthening their capacity to investigate and prosecute sexual and gender-based violence offences effectively with a view to promoting accountability, combating impunity and deterring the occurrence of further crimes. Furthermore, the Military Justice Department of the South Sudan People's Defence Forces received support to deploy 13 general courts martial to nine locations across South Sudan to adjudicate serious cases, including on sexual violence crimes committed by members of the armed forces against civilians.

1.140 Progress towards the objective is presented in the performance measure below (see table 1.75).

Table 1.75
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
National authorities establish a team focused on investigating and prosecuting conflict-related sexual violence within the South Sudan People's Defence Forces	Action plans for the South Sudan National Police Service and the armed forces on preventing and addressing conflict-related sexual violence are extended by the national authorities until 2025 and 2026, respectively	The national authorities ensure accountability for conflict-related sexual violence crimes through mobile courts and general courts martial as a deterrence strategy

Planned results for 2026

Result 1: enhanced compliance with international norms on preventing and addressing conflict-related sexual violence by parties to conflict

Programme performance in 2024 and target for 2026

1.141 The Office's work contributed to the Security Council's extension of the mandate of the Analytical Support and Sanctions Monitoring Team for a period of 36 months, as outlined in Council resolution 2734 (2024), which met the planned target. For the first time, sexual and gender-based violence were explicitly referred to as sanctionable acts under the regime in the resolution.

1.142 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.76).

Table 1.76
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Increased engagement by United Nations sanctions regimes on trends and patterns of conflict-related sexual violence	Unilateral communiqué issued by a non-State armed group outlining commitments to addressing conflict-related sexual violence	Enhanced monitoring and reporting of patterns and trends of conflict-related sexual violence through the extension, by the Security Council, of the mandate of the Analytical Support and Sanctions Monitoring Team (Council resolution 2734 (2024))	Member States, United Nations entities, civil society and academia exchange lessons and best practices for strengthening engagement of non-State armed groups in addressing conflict-related sexual violence	Enhanced capacities of United Nations Panels of Experts to monitor, investigate and report on conflict-related sexual violence

Result 2: strengthened service provision and justice response on conflict-related sexual violence by national authorities

Programme performance in 2024 and target for 2026

1.143 The Office's work contributed to addressing critical protection risks and enhancing access to essential services, including emergency medical relief and safe shelter, for displaced civilians and survivors of conflict-related sexual violence in Darfur, Sudan, which met the planned target.

1.144 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.77).

Table 1.77
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Increased understanding of regional dimensions of conflict-related sexual violence in one subregion (Horn of Africa)	Strengthened response in one country to meet the needs of survivors of conflict-related sexual violence and to deliver justice and accountability	Member States in one subregion develop justice and security sector strategies aimed at addressing conflict-related sexual violence	National authorities develop a plan to prevent and address conflict-related sexual violence in one country

Result 3: strengthened judicial response from national authorities to bolster survivor-centred justice and accountability for conflict-related sexual violence

Proposed programme plan for 2026

1.145 The absence of political will to promote accountability for conflict-related sexual violence crimes at the national and international levels undermines survivors' prospects for justice and redress and perpetuates cycles of violence and impunity. Moreover, gaps in technical and operational capacities of national rule of law institutions hamper the delivery of justice for conflict-related sexual violence crimes. The Office has supported justice efforts in priority settings for survivors of conflict-related sexual violence by supporting legal reform through technical legal advice and tailored support to relevant authorities to enhance the investigation and prosecution of conflict-related sexual violence cases.

Lessons learned and planned change

1.146 The lesson for the Office was that limited political will to advance accountability for conflict-related sexual violence crimes in priority settings has a direct impact on the efforts of relevant institutions to provide holistic responses to survivors and to investigate and prosecute such crimes in line with international standards, thereby reducing the prospects of justice and redress for survivors. In applying the lesson, the Office will enhance its advocacy and operational impact at the national, regional and international levels to garner stronger political and financial support from national and international partners to strengthen justice and accountability for sexual violence crimes, build on the progress achieved and ensure its sustainability.

1.147 Expected progress towards the objective is presented in the performance measure below (see table 1.78).

Table 1.78
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Strengthened capacity for investigation and prosecution of conflict-related sexual violence in two countries	Implementation of technical guidance on investigations of conflict-related sexual violence in one country	Investigations on conflict-related sexual violence conducted by national specialized investigation units in two countries

Legislative mandates

1.148 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolution

65/259 Questions relating to the programme budget for the biennium 2010–2011 (sect. V)

Security Council resolutions

1820 (2008)
1888 (2009)
1960 (2010)
2106 (2013)
2331 (2016)
2388 (2017)
2467 (2019)

Deliverables

1.149 Table 1.79 lists all deliverables of the programme.

Table 1.79

Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
1. Report of the Secretary-General on conflict-related sexual violence to the Security Council, including listing of parties to the conflict	1	1	1	1
2. Country-specific and/or thematic report on conflict-related sexual violence	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**7**	**6**	**7**	**7**
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
4. Meetings of the Fifth Committee	1	1	1	1
5. Briefings to the Security Council	2	2	2	2
6. Briefings to human rights treaty bodies	2	1	2	2
7. Briefings to the Special Committee on Peacekeeping Operations	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**31**	**26**	**16**	**25**
8. Training of national police and/or military forces on prevention of and response to conflict-related sexual violence	15	12	7	12
9. Training of national justice sector (prosecutors and judges) on investigation into and prosecution of conflict-related sexual violence	15	13	7	12
10. Workshop with women’s protection advisers on emerging threats and challenges of conflict-related sexual violence	1	1	2	1
C. Substantive deliverables				
Good offices: engagement and dialogue with parties to conflict listed in the annex to the report of the Secretary-General, including as it relates to the adoption and implementation of prevention and response measures.				
Consultation, advice and advocacy: consultations and reporting on conflict-related sexual violence trends and patterns in 21 countries.				
Databases and substantive digital materials: digital library serving as a knowledge hub of academic, think tank and civil society publications on conflict-related sexual violence (over 400 publications).				
D. Communication deliverables				
Outreach programmes, special events and information materials: 20 online and in-person events on conflict-related sexual violence that include survivors, Member States, activists, academia, experts and practitioners; and outreach activities in coordination with the United Nations Action against Sexual Violence in Conflict network and its “Stop Rape Now” campaign and with the Team of Experts on the Rule of Law and Sexual Violence in Conflict.				
External and media relations: annual press statement and news media content, including approximately 10 press statements or releases and 10 television and newspaper interviews.				
Digital platforms and multimedia content: timely website updates and social media content to advocate for political commitment and behavioural change in the priority countries; amplify victims’ and survivors’ voices, needs and perspectives; and mobilize resources for the elimination of conflict-related sexual violence.				

B. Proposed post and non-post resource requirements for 2026

Overview

1.150 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.80 to 1.82.

Table 1.80

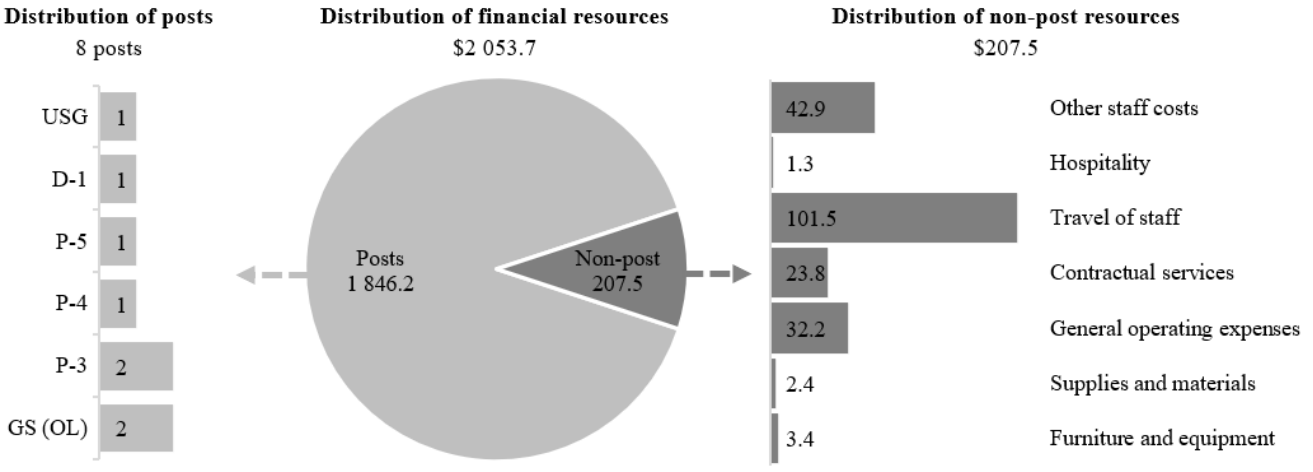
(Number of posts/thousands of United States dollars)



Extrabudgetary resources

1.153 As reflected in tables 1.83 (2) and 1.84 (2), extrabudgetary resources amount to $6,518,200. The resources would complement regular budget resources and would be used mainly to provide for 19 posts (1 D-1, 1 P-5, 6 P-4, 5 P-3, 2 P-2 or P-1 and 4 General Service (Other level)) and non-post

resources that would be used to support the delivery of its mandates, including the engagement of the Team of Experts on the Rule of Law and Sexual Violence in Conflict, mandated pursuant to Security Council resolution 2467 (2019), and support for the secretariat of the United Nations Action against Sexual Violence in Conflict network chaired by the Special Representative.

1.154 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.155 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.86. The majority of travel for the Office is related to the high-level engagements of the Special Representative with priority countries and technical missions to follow up on the formal agreements reached between the Special Representative and national authorities. While every effort is made to ensure advance planning for all official travel, the finalization of travel requests for such missions depends on visa approvals and confirmations of missions and meetings with government interlocutors by the national authorities.

VI. Office of the Special Representative of the Secretary-General on Violence against Children

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.156 The Special Representative of the Secretary-General on Violence against Children is responsible for mobilizing action and political support to prevent and eliminate all forms of violence against children. The mandate of the Office of the Special Representative derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions 62/141, 67/152, 73/155 and 78/187. While noting substantial progress achieved since establishing the mandate of the Special Representative, the Assembly has recognized the urgency of pursuing further action to ensure the protection of children from violence.

Programme of work

Objective

1.157 The objective, to which the Office contributes, is to accelerate action to end all forms of violence against children by 2030.

Strategy and external factors for 2026

1.158 To contribute to the objective, the Office will:

(a) Promote the acceleration of efforts towards the achievement of the Sustainable Development Goals relating to addressing all forms and drivers of violence against children and gender-based violence by undertaking high-level advocacy at the global, regional and national levels in collaboration with key stakeholders;

(b) Support Member States in the implementation of their pledges and the call to action adopted at the first Global Ministerial Conference on Ending Violence against Children, and support member States of the Pathfinding Global Alliance on Ending Violence against Children in the development, implementation and monitoring of context-specific road maps to accelerate progress in ending violence against children, including by facilitating peer learning and knowledge-sharing among States;

(c) Engage and support political, legislative, programmatic and monitoring processes at the global, regional, national and local levels to strengthen investment in child protection and well-being; conduct country visits in close cooperation with United Nations resident coordinators and regional or country teams; provide technical cooperation and practical guidance to Member States, including with respect to strengthening the collection of data on violence against children; share context-specific promising practices; enhance demand-driven bilateral and multilateral partnerships; and use social media and other communications tools to support its advocacy;

(d) Increase the attention given to violence against children in the United Nations system, including through leading the Inter-Agency Working Group on Violence against Children and through advocacy for the system-wide mainstreaming of child rights, including the integration of child protection into United Nations programmatic tools, such as the United Nations Sustainable Development Cooperation Frameworks;

(e) Advocate, as Chair of the United Nations task force on children deprived of liberty, for the use of the detention of children to be only a measure of last resort; work towards prevention, rehabilitation and community-based alternatives to deprivation of liberty; and gather and report on promising practices regarding alternatives to detention and institutionalization;

(f) Promote the role of children as agents of change through inclusive child participation in decision-making processes and the documentation and dissemination of child-led and peer-to-peer initiatives;

(g) Promote investment in integrated, cross-sectoral child- and gender-sensitive protection and violence prevention;

(h) Promote child protection as a cross-cutting theme in global, regional and national action to address trafficking in children, building on the Special Representative's tenure as co-Chair of the Inter-Agency Coordination Group against Trafficking in Persons.

1.159 The above-mentioned work is expected to result in:

(a) Action to prevent and respond to violence against children mainstreamed into law, policy and programmes through costed intersectoral action plans supported by strong monitoring, coordination and information management systems;

(b) Increased awareness of and action on key thematic and frontier issues requiring specific attention;

(c) Sustained investment in cross-sectoral services for children and their caregivers to prevent and respond to violence against children and gender-based violence;

(d) Adoption and effective implementation of prevention measures, rehabilitation and community-based alternatives to the deprivation of liberty of children;

(e) More effective and systematic involvement of children in decision-making processes, including through an increase in safe and empowering pathways provided by States.

1.160 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Governments have the political commitment and dedicate resources to accelerate action to prevent and end violence against children, in the framework of the Sustainable Development Goals;

(b) Civil society, faith-based organizations, local communities, the donor community and the private sector are committed to working together for and with children.

1.161 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to strengthen cooperation with intergovernmental regional and subregional bodies. The Office will continue to forge regular engagement with United Nations entities, State partners and others, including regional organizations, based in cities such as Geneva, Paris, Vienna and Brussels, building on the strong liaison that it has established. The Office will pursue strong collaboration with civil society and faith-based organizations and the private sector.

1.162 With regard to inter-agency coordination and liaison, the Office continues to promote and strengthen collaboration within the United Nations system on ending violence against children, including with the members of the Inter-Agency Working Group on Violence against Children, the members of the United Nations task force on children deprived of liberty, the Special Representative of the Secretary-General for Children and Armed Conflict, the Special Representative of the Secretary-General on Sexual Violence in Conflict, the special procedures of the Human Rights Council, the human rights treaty bodies, the Special Adviser to the Secretary-General on the Prevention of Genocide, the Special Adviser to the Secretary-General on Africa, the United Nations Youth Office, the Office for Digital and Emerging Technologies, the Department of Economic and Social Affairs and United Nations regional commissions, United Nations resident coordinators and country team

members, the United Nations Global Counter-Terrorism Coordination Compact, the Inter-Agency Coordination Group against Trafficking in Persons, the United Nations Network on Migration, the Working Group on Hate Speech and the United Nations Action Against Sexual Violence in Conflict network.

1.163 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate, including in its advocacy to highlight how various forms of violence affect boys and girls differently and how this must inform and shape responses. Addressing gender discrimination and harmful social norms, as well as connections between violence against women and violence against children, is crucial to preventing and responding to violence against children and will continue to constitute an integral part of the Office's work.

1.164 In line with the United Nations Disability Inclusion Strategy and the principle of leaving no child behind, the Office places an emphasis on addressing some of the most vulnerable and neglected children, among whom are children with disabilities. Promoting policies and strategies for alternative means of care will continue to be at the core of the Office's advocacy. The Office will continue to pay particular attention to the inclusion of children with disabilities in all its consultations.

Evaluation activities

1.165 The Office will consider the results of evaluations in its work going forward. An evaluation to be conducted by the Office is planned for 2026.

Programme performance in 2024

First Global Ministerial Conference on Ending Violence against Children generated high-level political commitments

1.166 The Office co-hosted the first Global Ministerial Conference on Ending Violence against Children on 7 and 8 November 2024 in Bogotá, along with the Governments of Colombia and Sweden, the World Health Organization (WHO) and UNICEF. As part of the 15-month preparation for the Conference, the Special Representative, with the support of UNICEF, engaged with more than 50 State-led national preparatory processes. These processes were opportunities to define concrete, context-specific actions to tackle violence and its drivers at the national and local levels and explore ways to scale up such actions and overcome remaining challenges.

1.167 Progress towards the objective is presented in the performance measure below (see table 1.87).

Table 1.87
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	High-level delegations from 119 countries, including 63 ministers, participated in the Conference, leading to the adoption of over 400 pledges from more than 100 Member States to accelerate action to end violence against children by 2030, with 59 States also adopting the call to action launched at the Conference

Planned results for 2026

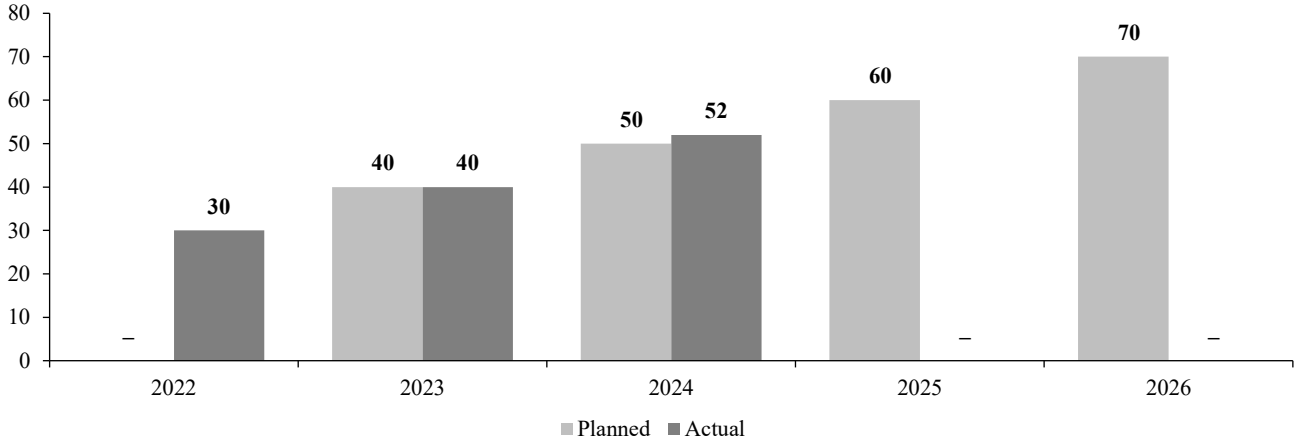
Result 1: national human rights institutions include child protection and well-being in their monitoring activities

Programme performance in 2024 and target for 2026

1.168 The Office's work contributed to 12 additional national human rights institutions including child protection and well-being in their monitoring activities, for a total of 52, which exceeded the planned target of 50.

1.169 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XVII).

Figure 1.XVII
Performance measure: number of national human rights institutions that have included child protection and well-being as a key dimension of their monitoring activities (cumulative)



Result 2: revitalized pathfinding country initiative (Pathfinding Global Alliance on Ending Violence against Children) to end violence against children by 2030

Programme performance in 2024 and target for 2026

1.170 The Office's work contributed to the agreement of a road map for accelerating and monitoring action for the Pathfinding Global Alliance on Ending Violence against Children (formerly known as the pathfinding 2.0 initiative) with Member States, which met the planned target.

1.171 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.88).

Table 1.88
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Road map for accelerating and monitoring action for the Pathfinding Global Alliance and the associated institutional and accountability framework are agreed by Member States	Five additional Member States join the Pathfinding Global Alliance	Five additional Member States join the Pathfinding Global Alliance

Result 3: Member States adopt strategic road maps to accelerate action to end violence against children by 2030

Proposed programme plan for 2026

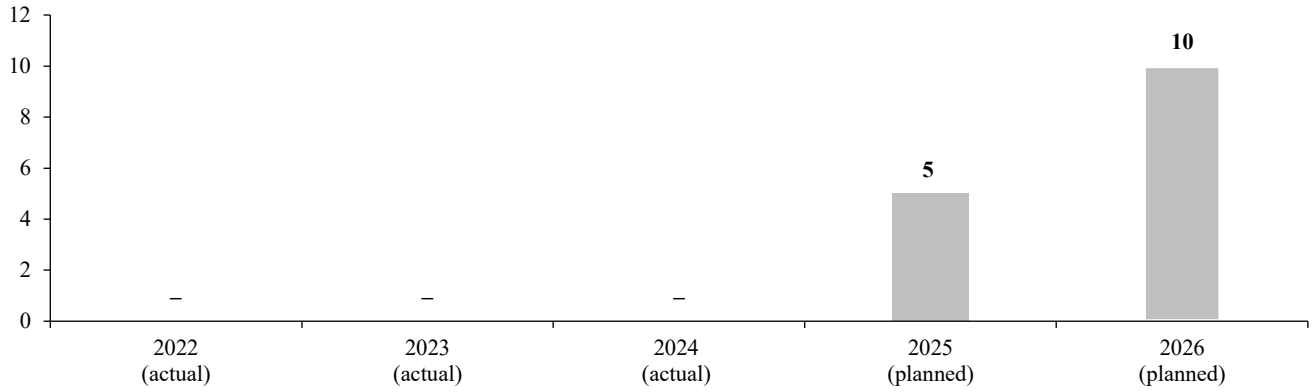
1.172 With less than five years remaining to achieve the 2030 Agenda, the world is not on track to end violence against children in line with the Sustainable Development Goals. To address this issue, the Office will support the member States of the Pathfinding Global Alliance in developing costed road maps that serve to identify key actions, responsibilities, timelines and resources to accelerate efforts to end violence against children. The Office will support this process through high-level political advocacy, the facilitation of peer learning and the mobilization of all key stakeholders, as well as through the provision of context-specific technical support, in close cooperation with United Nations country teams.

Lessons learned and planned change

1.173 The lesson for the Office was the need for support to Member States to be more context-specific, demand-driven and based on a bottom-up approach. In applying the lesson, the Office will support the development of road maps through participatory multi-stakeholder processes that include community engagement and build on Member States' existing frameworks for action, with particular emphasis on members of the Global Alliance. In the road maps, the specific integrated services needed at the local level to prevent and respond to violence against children will be identified.

1.174 Expected progress towards the objective is presented in the performance measure below (see figure 1.XVIII).

Figure 1.XVIII
Performance measure: number of Pathfinding Global Alliance countries that have adopted road maps to accelerate action to end violence against children (cumulative)



Legislative mandates

1.175 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

62/141; 67/152; 69/157; 70/137; 72/245; 73/155; 76/147; 78/187	Rights of the child
71/176; 75/166; 77/201	Protecting children from bullying
75/185; 77/219; 79/172	Human rights in the administration of justice

Deliverables

1.176 Table 1.89 lists all deliverables of the programme.

Table 1.89
Office of the Special Representative of the Secretary-General on Violence against Children: deliverables for the period 2024–2026, by category and subcategory

2. Annual reports to the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**4**	**4**	**4**	**4**
Meetings of:				
3. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
4. The Fifth Committee	1	1	1	1
5. The Third Committee	1	1	1	1
6. The Human Rights Council	1	1	1	1

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Publications (number of publications)	**5**	**5**	**4**	**4**
7. Voluntary national reviews: analytical review	1	1	1	1
8. Children as agents of positive change: a mapping of children's initiatives	1	1	1	–
9. Advocacy brief on ending immigration detention of children	1	1	–	–
10. Publications on priority issues related to violence against children	2	2	2	3

C. Substantive deliverables

Consultation, advice and advocacy: high-level advocacy with Member States and other key stakeholders, including country missions to at least 10 Member States and 10 high-level events; the sharing of promising practices and provision of expert advice; and consultations with approximately 1,000 children.

Databases and substantive digital materials: marketplace for knowledge-sharing and peer learning for States.

D. Communication deliverables

Outreach programmes, special events and information materials: communication products and information materials for targeted audiences and goals to raise awareness of the work of the mandate; provide updated information on trends and topical issues and highlight progress achieved.

External and media relations: joint advocacy papers; opinion pieces; briefings and press conferences; child-friendly materials; and expert articles.

Digital platforms and multimedia content: social media campaign to raise awareness and mobilize action on the protection of children from violence; multimedia material produced and uploaded in the six official United Nations languages on the Office's website.

B. Proposed post and non-post resource requirements for 2026

Overview

1.177 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.90 to 1.92.

Table 1.90
Evolution of financial resources by object of expenditure

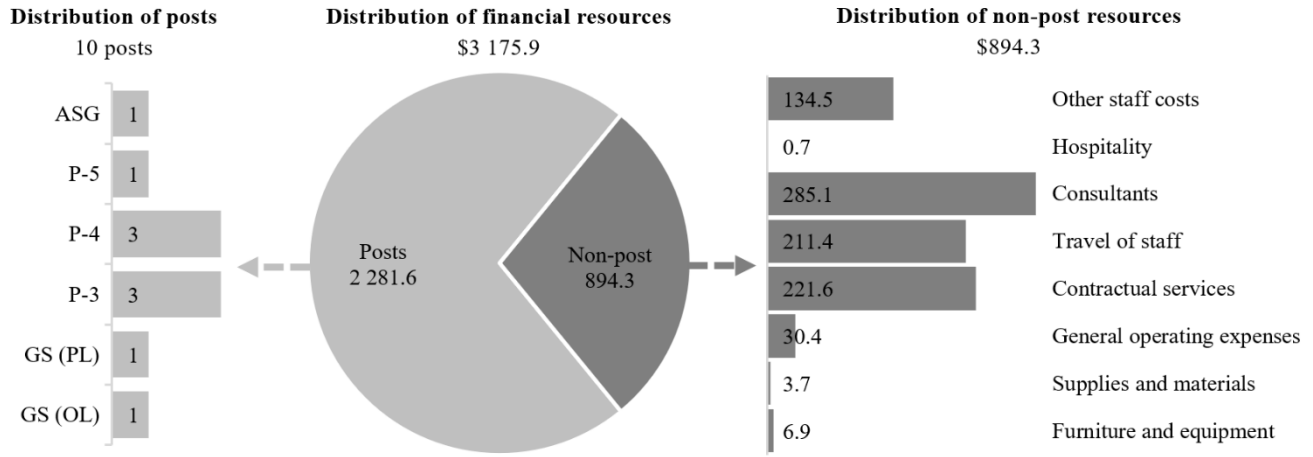
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Extrabudgetary resources

1.180 As reflected in tables 1.93 (2) and 1.94 (2), extrabudgetary resources amount to $719,700. The resources would complement regular budget resources and would be used mainly to provide for two posts (P-4 and P-3) and non-post resources that would be used to support the delivery of the Office's

mandates through the implementation of various outreach activities and the provision of technical advice and support to Member States, regional organizations and other partners.

1.181 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.182 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.96. The Office will strive to improve the planning of its travel in order to improve its compliance with the advance booking of air travel policy.

VII. Office of the Victims' Rights Advocate

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.183 The mandate of the Victims' Rights Advocate was created as part of the strategy set out in the 2017 report of the Secretary-General entitled "Special measures on protection from sexual exploitation and abuse: a new approach" (A/71/818). The mandate derives from the priorities established in General Assembly resolutions and/or decisions, including resolutions 62/214, 71/278, 71/297, 75/321, 76/274, 77/333 and 78/331. The centrepiece of the strategy is to put the rights and dignity of victims at the centre of the work to prevent and respond to sexual exploitation and abuse across the United Nations system. The Victims' Rights Advocate has a system-wide role, with her advocacy and action extending to peacekeeping, humanitarian and development settings. At Headquarters, she is supported by the Office of the Victims' Rights Advocate. In the field, her mandate is operationalized through Senior Victims' Rights Officers in the Central African Republic, the Democratic Republic of the Congo, Haiti and South Sudan.

Programme of work

Objective

1.184 The objective, to which the Victims' Rights Advocate contributes, is to ensure that the rights and dignity of victims of sexual exploitation and abuse are prioritized in all efforts of the United Nations system to prevent and respond to sexual exploitation and abuse by its personnel, uniformed or civilian, in peacekeeping, humanitarian and development settings and by non-United Nations troops serving under a Security Council mandate.

Strategy and external factors for 2026

1.185 To contribute to the objective, the Victims' Rights Advocate will:

(a) Engage in sustained advocacy with Member States, United Nations entities, agencies, funds and programmes, other intergovernmental bodies, Governments and State structures, civil society and others to amplify the voices of victims to ensure that their needs and wishes are heard and respected and that their perspectives inform and shape United Nations efforts to prevent and respond to sexual exploitation and abuse, increase awareness of the negative impact that sexual exploitation and abuse has on victims and the work of all parts of the United Nations system, and foster an integrated response with regard to victims' rights to assistance, in line with the annex to General Assembly resolution 62/214;

(b) Operationalize the imperative of placing the rights and dignity of victims at the centre on the ground through support for a network of Senior Victims' Rights Officers and focal points for victims' rights, who serve as the main point of contact for all victims of sexual exploitation and abuse, and ensure that they receive assistance and support from all relevant United Nations system actors, accompanying them through investigation and consideration of their complaints and providing them with follow-up information, including on the progress of paternity and child support claims;

(c) Support Member States' implementation of the 2030 Agenda, in particular the achievement of Sustainable Development Goal 5 in the public and private spheres, including in relation to

trafficking and sexual and other types of exploitation, and Goal 16, which is intended, among others, to end the abuse and exploitation of, trafficking in, all forms of violence against and torture of children;

(d) Engage with United Nations actors across the system to implement a coordinated, system-wide and long-term vision for assistance to victims, and provide guidance to the Senior Victims' Rights Officers, the victims' rights focal points and other actors in the field;

(e) Advocate with Member States to enforce accountability and facilitate access to remedies and resolution of paternity and child support claims, seek to strengthen complaint mechanisms and contribute to creating an environment that encourages victims to come forward, in order to counter constraints that have a negative effect on victims' capacity to report misconduct and gain access to assistance and services.

1.186 The above-mentioned work is expected to result in:

(a) Victims assisted in accordance with their individual needs;

(b) A deepened understanding of how to prioritize the rights and dignity of victims across the United Nations system, implementing partners and beyond;

(c) Creation and maintenance of an environment of trust between victims and the United Nations on the ground, encouraging them to come forward with complaints of misconduct, confident that they will be respected and receive support, assistance and protection;

(d) Stronger system-wide collaboration and cooperation between Member States and the United Nations on accountability processes, restorative measures for victims, including the resolution of paternity and child support claims, and access to services for victims.

1.187 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) New cases of sexual abuse and exploitation perpetrated by United Nations and related personnel will become known to the Victims' Rights Advocate, the Office and the Senior Victims' Rights Officers;

(b) Cases reported earlier might not be resolved;

(c) Measures to prevent sexual exploitation and abuse integrate a system-wide victims' rights approach;

(d) Victims of sexual abuse and exploitation will require ongoing support and assistance to rebuild their lives;

(e) The urgency of establishing strong partnerships focusing on a victims' rights approach will be acknowledged more extensively inside and outside the United Nations system.

1.188 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to work with the Development Assistance Committee of the Organisation for Economic Co-operation and Development. It will continue to support the Multilateral Organisation Performance Assessment Network in implementing its indicators that measure progress in the prevention of sexual exploitation, sexual abuse and sexual harassment in multilateral organizations. The Office will sustain its engagement with the Global Alliance of National Human Rights Institutions in advocacy and capacity-building for national actors and the provision of support for victims across States and national jurisdictions.

1.189 With regard to inter-agency coordination and liaison, the Office will continue to collaborate with the Inter-Agency Standing Committee and its Champion on protection from sexual exploitation and abuse and sexual harassment to integrate a strong victims' rights focus into the implementation of its plan to accelerate protection from sexual exploitation and abuse in humanitarian response. The Victims' Rights Advocate will enhance collaboration with the United Nations Executive Group to Prevent and Respond to Sexual Harassment in the United Nations System on the development and

implementation of a victim-centred approach to this misconduct, so that this work is aligned with that on sexual exploitation and abuse.

1.190 The Office will continue its cooperation with the Office of the Special Coordinator on Improving the United Nations Response to Sexual Exploitation and Abuse. It will collaborate with the Department of Management Strategy, Policy and Compliance and the Office of Legal Affairs to facilitate the more timely and effective resolution of outstanding paternity/child support claims arising from sexual exploitation and abuse, including through the possible development of a harmonized procedure for handling such claims. The Office will coordinate with the Department of Political and Peacebuilding Affairs and the Department of Peace Operations on matters related to peace operations. The Office will strengthen its collaboration with the Development Coordination Office and resident coordinators on their roles and responsibilities with respect to victims' rights and assistance in line with the management and accountability framework of the United Nations development and resident coordinator system, including by continuing to brief newly appointed resident coordinators and provide them with advice at their request. The Victims' Rights Advocate will also continue to engage with other entities, including the internal justice system, on her mandate and the importance of the victims' rights approach.

1.191 The Office integrates a gender perspective into its policy and operational activities, deliverables and results, as appropriate. The majority of victims of sexual exploitation and abuse are women and girls, and most perpetrators are men. The Victims' Rights Advocate acknowledges that entrenched discrimination against women and girls, manifested in laws and policies, power imbalance, gender inequality and harmful practices, underpins such misconduct. The Victims' Rights Advocate understands that men and boys, especially in vulnerable situations, may be victims of sexual exploitation and abuse and face barriers to reporting. The Victims' Rights Advocate emphasizes that victims may experience hurt, harm, fear, reprisals, abandonment, exclusion from their community and stigma. She urges that interventions and responses be conceptualized, designed and implemented to promote the empowerment of victims and their inclusion in all issues that concern them.

1.192 The Victims' Rights Advocate promotes tailored responses, given that each victim is different and may be affected by intersecting, interconnected and multiple forms of discrimination, including on the basis of race, sex, gender, sexual orientation, age, minority and/or migration status or disability, in line with the United Nations Disability Inclusion Strategy and the strategic action plan of the Secretary-General's Task Force on Addressing Racism and Promoting Dignity for All in the United Nations. The Office seeks to make its core policy documents and training as accessible as possible. The Senior Victims' Rights Officers will continue to serve as the main contact for all victims and take steps to ensure that a victims' rights, gender- and child-sensitive and non-discriminatory approach is integrated into all activities to support and assist victims.

Evaluation activities

1.193 An evaluation of the Office to be conducted by the Office of Internal Oversight Services (OIOS) is planned for 2026.

Programme performance in 2024

Strengthened victim-centred approach within the United Nations justice system

1.194 In June 2024, the Victims' Rights Advocate accompanied the judges of the United Nations Dispute Tribunal during an official visit to South Sudan with the aim of providing the judges an opportunity to witness first-hand the challenges faced by victims of sexual exploitation and abuse perpetrated by United Nations and related personnel. The visits enhanced the judges' awareness and understanding of the circumstances and needs of victims of sexual exploitation and abuse.

1.195 Progress towards the objective is presented in the performance measure below (see table 1.97).

Table 1.97
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Legal officers, registrars of the United Nations Dispute Tribunal and United Nations Appeals Tribunal, and the judges of the United Nations Dispute Tribunal received briefings on the victim-centred approach	Newly appointed judges of the United Nations Dispute Tribunal and the United Nations Appeals Tribunal received briefings on the victim-centred approach as part of their induction programmes	Judges of the United Nations Dispute Tribunal have enhanced awareness and understanding of the circumstances and needs of victims of sexual exploitation and abuse

Planned results for 2026

Result 1: adoption of a victims' rights approach among all personnel assisting and investigating allegations of sexual exploitation and abuse

Programme performance in 2024 and target for 2026

1.196 The Office's work contributed to raising awareness system-wide on the victims' rights approach among personnel who assist victims or investigate allegations of sexual exploitation and abuse, including representatives of United Nations investigatory bodies, which met the planned target.

1.197 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.98).

Table 1.98
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
United Nations internal justice system personnel handling allegations of sexual exploitation and abuse are briefed on the victims' rights approach	Increased number of personnel who assist victims or investigate allegations of sexual exploitation and abuse received briefings on the victims' rights approach	All new personnel who assist victims or investigate allegations of sexual exploitation and abuse received briefings on the victims' rights approach	All new personnel who assist victims or investigate allegations of sexual exploitation and abuse complete/ participate in training on the victims' rights approach to sexual exploitation, sexual abuse as part of their induction and ongoing training	All personnel who assist victims or investigate allegations of sexual exploitation and abuse will have access to training on the victims' rights approach

Result 2: strengthened system-wide implementation of the Secretary-General's strategy of placing the rights and dignity of victims at the centre of prevention and response from sexual exploitation and abuse

Programme performance in 2024 and target for 2026

1.198 The Office's work contributed to the issuance and dissemination of the victims' rights statement and to online training module materials on a victim-centred approach being made available in all six official languages of the United Nations, which met the planned target.

1.199 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.99).

Table 1.99
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Endorsement of the victims' rights statement and launch of a training module on a victim-centred approach	The victims' rights statement was issued and disseminated, and online training module materials on a victim-centred approach were made available in all six official languages of the United Nations	The victims' rights statement is made available in accessible, simplified and child-friendly versions	A system-wide campaign is conducted to consolidate the victims' rights approach

Result 3: enhanced support for victims through the leveraging of the diverse experiences and knowledge of Victims' Rights Officers in peacekeeping, humanitarian and development contexts

Proposed programme plan for 2026

1.200 Victims of sexual exploitation and abuse committed by United Nations and related personnel benefit from improved assistance, protection and support through the work of Senior Victims' Rights Officers and victims' rights focal points, who serve as their main point of contact and who perform a wide range of critical tasks to support victims, including ensuring that victims receive timely assistance and support, accompanying them during the reporting process, keeping them updated on case progress and facilitating the collection of DNA to support the resolution of paternity/child support claims. To carry out these tasks, Senior Victims' Rights Officers and victims' rights focal points need to keep their expertise up-to-date and reinforce their ability to adequately respond to the individual needs of victims on a case-by-case basis and to uphold their rights, through regular exchanges of best practices and lessons learned, retreats, workshops and training. These initiatives will also represent the main capacity-building activities aimed at strengthening the expertise of newly appointed Senior Victims' Rights Officers and victims' rights focal points.

Lessons learned and planned change

1.201 The lesson for the Office was that due to the critical role that Senior Victims' Rights Officers and victims' rights focal points have in responding to the diverse needs of victims, it is essential to create opportunities for knowledge-sharing to ensure that victims receive the best possible support. In applying the lesson, the Office will ensure that Senior Victims' Rights Officers and victims' rights focal points are well-equipped to support victims and adapt to the specific circumstances of each case through regular exchanges of best practices, application of lessons learned and participation in capacity-building initiatives.

1.202 Expected progress towards the objective is presented in the performance measure below (see table 1.100).

Table 1.100
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Best practices and common challenges identified through regular meetings between the Victims' Rights Advocate, the Senior Victims' Rights Officers and victims' rights focal points	Victims of sexual exploitation and abuse receive improved assistance and support through the enhanced skills and capacity-building of newly appointed Senior Victims' Rights Officers and victims' rights focal points	A standard operating procedure is developed based on the exchanges with and enhanced skills of Senior Victims' Rights Officers and victims' rights focal points

Legislative mandates

1.203 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

62/214	United Nations Comprehensive Strategy on Assistance and Support to Victims of Sexual Exploitation and Abuse by United Nations Staff and Related Personnel (annex)	71/278; 75/321; 76/303; 78/331	United Nations action on sexual exploitation and abuse
		71/297	Special measures for protection from sexual exploitation and abuse
		76/274	Cross-cutting issues

Deliverables

1.204 Table 1.101 lists all deliverables of the programme.

Table 1.101

C. Substantive deliverables

Consultation, advice and advocacy: Five briefings to Member States, five briefings to United Nations system entities and webinars with universities and academic institutions.

Sustained advocacy by the Victims' Rights Advocate, including through her (a) cooperation with the Inter-Agency Standing Committee; (b) briefings to Member States and Member State groupings, to senior mission leaders, to the global meeting of resident coordinators and induction of resident coordinators and other United Nations leaders; and (c) cooperation with United Nations country teams and humanitarian country teams.

Regular engagement with Special Representatives of the Secretary-General, resident coordinators, and national and regional protection from sexual exploitation and abuse networks, including through the Victims' Rights Advocate's country visits.

Databases and substantive digital materials: training module for United Nations staff, non-staff personnel and implementing partners and the victims' rights first web page.

D. Communication deliverables

Outreach programmes, special events and information materials: awareness-raising and educational materials on victims' rights.

External and media relations: media interviews and articles.

Digital platforms and multimedia content: website, social media content on areas of work, intranet stories and expansion of the victims' rights first thematic web page.

B. Proposed post and non-post resource requirements for 2026

Overview

1.205 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.102 to 1.104.

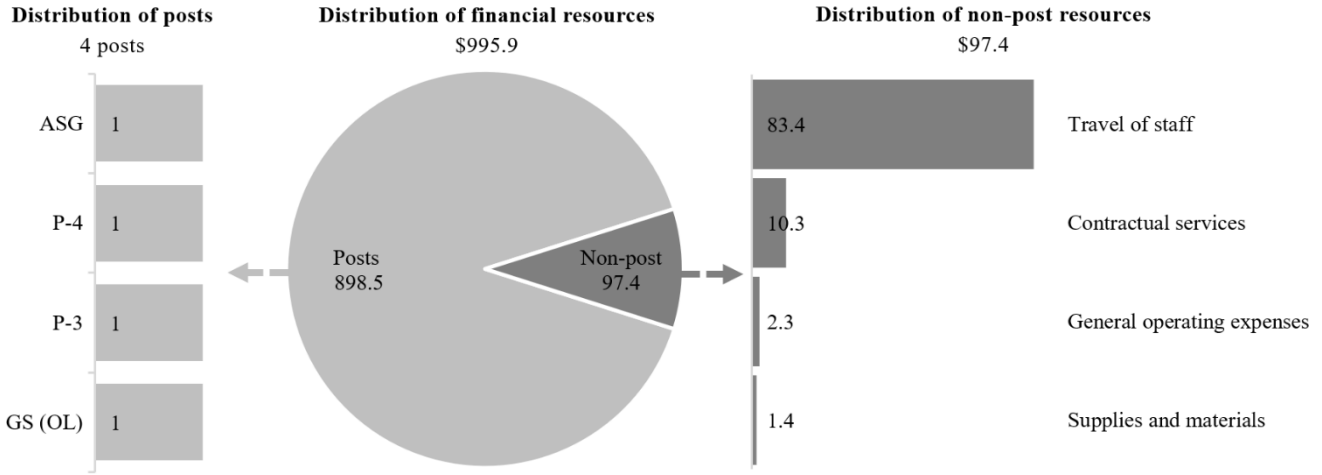
Figure 1.XX
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Other assessed resources

1.208 As reflected in table 1.105 (2), other assessed resources amount to $48,200. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.209 As reflected in table 1.105 (3), extrabudgetary resources amount to $765,500. The non-post resources would complement regular budget resources and support the delivery of the mandate, including the resolution of paternity and child support claims. They will also support the coordination of activities related to budget, as well as resource mobilization and project management.

1.210 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.211 Information on the advance booking for air travel is reflected in table 1.108. The Office will strive to continue to improve the planning of its travel in order to improve its compliance with the advance booking of air travel policy.

VIII. Office of the United Nations Special Coordinator on Improving the United Nations Response to Sexual Exploitation and Abuse

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.212 The Office was established in February 2016, when the Secretary-General appointed the Special Coordinator with a reporting line through the Chef de Cabinet to the Secretary-General to work across the United Nations system's offices, departments and agencies to strengthen the United Nations response to sexual exploitation and abuse, wherever it might occur, from headquarters locations to the most remote field bases. The General Assembly, in its resolution 70/286, and the Security Council, by its resolution 2272 (2016), welcomed the appointment of the Special Coordinator and the Secretary-General's continued efforts to implement and reinforce the United Nations zero-tolerance policy on sexual exploitation and abuse, in particular to strengthen the Organization's prevention, reporting, enforcement and remedial action in order to promote greater accountability. In its resolution 71/278, the Assembly welcomed the continued efforts of the Secretary-General to combat sexual exploitation and abuse, including the appointment of a Special Coordinator on improving the United Nations response to sexual exploitation and abuse and the establishment of a high-level task force to develop, as a matter of urgency, a clear, game-changing strategy to achieve visible and measurable improvements in the Organization's approach to preventing and responding to sexual exploitation and abuse. The Assembly also expressed its support to the Secretary-General, the Office and all relevant departments in their efforts to implement the zero-tolerance policy and, in particular, to strengthen the Organization's prevention, reporting, enforcement and response mechanisms in order to promote greater accountability, and in that regard requested the Secretary-General to continue to work in close consultation with Member States for the effective implementation of the policy.

1.213 The Special Coordinator drives and oversees United Nations efforts to prevent and respond to sexual exploitation and abuse across the United Nations system. Through the development of procedures, protocols, standardized tools and support for United Nations entities at Headquarters and in the field, the Special Coordinator continues efforts to align approaches and enhance coordination, cooperation and system-wide coherence.

Programme of work

Objective

1.214 The objective, to which the Office contributes, is to advance the United Nations response to sexual exploitation and abuse and to ensure a continuous focus on and sustained high-level attention to the prevention and response to sexual exploitation and abuse through a victim-centred approach.

Strategy and external factors for 2026

1.215 To contribute to the objective, the Office will:

(a) Coordinate with United Nations entities, departments and offices to ensure the alignment and institutionalization of strategies to prevent and respond to sexual exploitation and abuse by developing initiatives to mitigate the risks of sexual exploitation and abuse across the United Nations system;

(b) Promote the implementation of the Secretary-General's strategy to combat sexual exploitation and abuse across the system's more than 30 affiliated funds, programmes and specialized agencies and act as the secretariat of the Secretary-General's institutionalized standing bodies for protection against sexual exploitation and abuse, such as the High-level Steering Group on preventing sexual exploitation and abuse, convened by the Chef de Cabinet, which oversees the implementation of the Secretary-General's strategy;

(c) Review and address the policy and operational gaps in the United Nations handling of sexual exploitation and abuse by all categories of United Nations personnel, both uniformed and civilian, and by non-United Nations actors;

(d) Consult with international, regional and subregional organizations, Member States, United Nations independent human rights experts, civil society organizations, national human rights institutions, academic institutions and think tanks, as appropriate, to ensure that policies and operational efforts across the United Nations system reflect best practice;

(e) Monitor and enhance the Secretary-General's public reporting mechanism for allegations of sexual exploitation and abuse;

(f) Promote enhanced accountability efforts through a multifaceted approach which engages leadership both within Member States and within the United Nations system, strengthen commitment, processes and engagement at the national level, foster collaboration with Member States, increase investigative capacity, strengthen legislative frameworks and ensure a victim-centred, trauma-informed approach;

(g) Work closely with leadership across the United Nations system to provide strategic support and guidance to assist in designing and developing comprehensive strategies, system-wide policies and initiatives to combat sexual exploitation and abuse and strengthen joint United Nations programming on prevention initiatives.

1.216 The above-mentioned work is expected to result in:

(a) Strengthened prevention of and responses to sexual exploitation and abuse in a cohesive and coordinated manner, including improved data collection, evidence-based programming, monitoring and analysis of performance by the United Nations system;

(b) Institutionalization of an organizational culture of zero tolerance for inaction with respect to sexual exploitation and abuse, with a robust and consistent understanding among United Nations personnel of standards of conduct and the purpose of mission of the United Nations, to advance cultural change and address the underpinnings of sexual exploitation and abuse, including gender imbalances and the abuse of authority due to power differentials.

1.217 With regard to external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Personnel, at all levels, prioritize combating sexual exploitation and abuse within United Nations operations;

(b) Adequate, qualified, victim-centred investigation capacity and appropriate organizational structures are in place to respond;

(c) The United Nations system supports the alignment and institutionalization of measures to prevent and respond to sexual exploitation and abuse, including through sustained, predictable funding.

1.218 With regard to inter-agency coordination, the Office will continue to seek cooperation with all United Nations partners, including agencies, funds and programmes, and the Inter-Agency Standing Committee and its Champion on protection from sexual exploitation and abuse and sexual harassment, to ensure coordination with relevant mandates and a coherent and consistent response. The Office will also continue to collaborate with the Office of the Victims' Rights Advocate, the Department of Management Strategy, Policy and Compliance and the Department of Global

Communications, among other entities within the Organization, to ensure alignment of messages relating to the prevention of and response to sexual exploitation and abuse in internal and external communications. Furthermore, the Office will work closely with the Development Coordination Office and resident coordinators, globally, to support their roles and responsibilities in accordance with the management and accountability framework of the United Nations development and resident coordinator system. The Office continues to serve as the secretariat of the Secretary-General's circle of leadership on the prevention of and response to sexual exploitation and abuse in United Nations operations, which comprises global leaders who actively support the agenda of combating sexual exploitation and abuse.

1.219 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The Special Coordinator will advocate for comprehensive reforms in policy, culture and systems to mitigate discrimination, rectify power imbalances, alleviate disparities and promote equality. Addressing the foundational factors contributing to sexual exploitation and abuse is paramount, with a specific emphasis on promoting equality, respect and dignity. Recognizing that these issues affect all individuals, the Office remains committed to fostering a safe and rights-based environment that focuses its work on impact and best serves the core purposes for which the United Nations was founded.

1.220 In line with the United Nations Disability Inclusion Strategy, the Office will identify ways to ensure the integration of disability inclusion across all projects. This involves mainstreaming disability inclusion through training and outreach material on preventing and responding to sexual exploitation and abuse, including on victim support, that is tailored to address the distinct needs and challenges of individuals with disabilities.

Programme performance in 2024

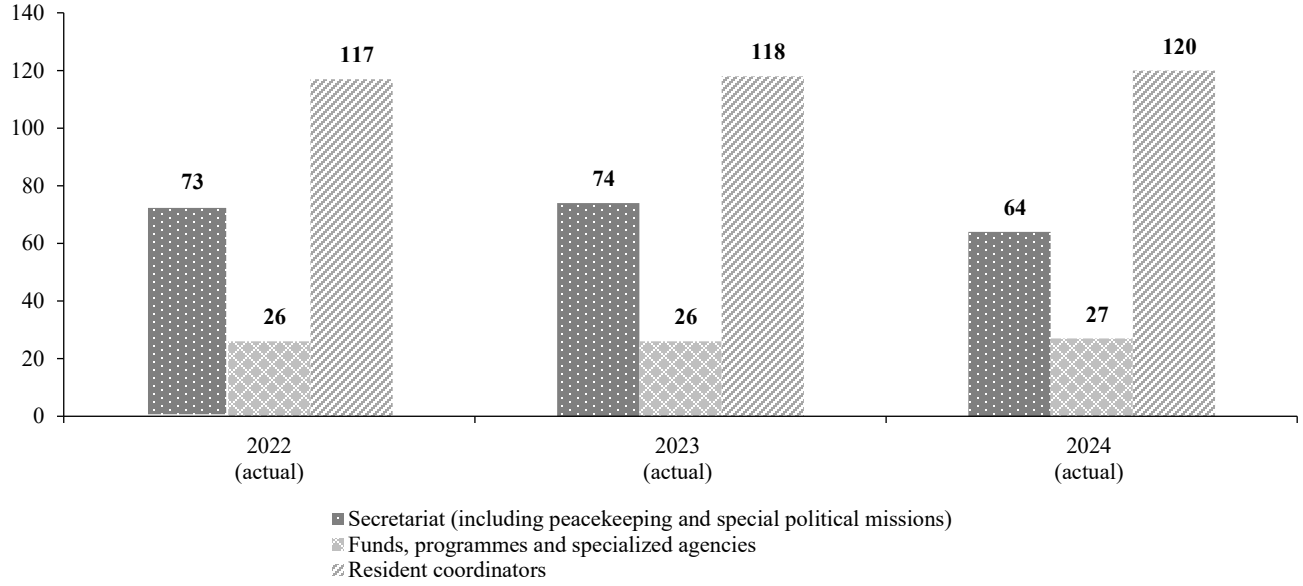
Strengthened system-wide approach to protection from sexual exploitation and abuse at both the strategic and the operational levels

1.221 The Office remained steadfast in driving a strengthened and coordinated system-wide approach to protection from sexual exploitation and abuse at both the strategic and the operational levels. The Special Coordinator and the Office coordinated and advocated for the operationalization of the Secretary-General's strategy for the prevention of and response to sexual exploitation and abuse across the United Nations system. This included providing strategic and operational guidance and support, strengthening monitoring and risk assessment processes and renewing the focus on enhancing partnerships and communication.

1.222 Visits were conducted by the Special Coordinator to United Nations offices and field locations, including development, humanitarian and peace operations. Those official visits helped to raise awareness of the necessary standards of conduct, the need to have robust mechanisms in place for detecting and responding to allegations, and the importance of visible leadership and dedicated capacity for protection from sexual exploitation and abuse in-country. Moreover, the Office continuously engaged in global dialogues at the leadership, operational and technical levels to enhance the effectiveness of mechanisms for preventing and responding to sexual exploitation and abuse, including data collection and resourcing for efforts related to protection from sexual exploitation and abuse.

1.223 Progress towards the objective is presented in the performance measure below (see figure 1.XXI).

Figure 1.XXI
Performance measure: number of heads of entities and resident coordinators with strategic and action plans on the prevention of and response to sexual exploitation and abuse (annual)



Planned results for 2026

Result 1: a reduction in operational and policy and procedural gaps in the United Nations handling of sexual exploitation and abuse perpetrated by all categories of United Nations personnel system-wide

Programme performance in 2024 and target for 2026

1.224 The Office's work contributed to policy and operational gaps being addressed, including through the initiation of workstreams for the update of the Secretary-General's bulletin on special measures for protection from sexual exploitation and sexual abuse (ST/SGB/2003/13); the organization of efforts to strengthen protection from sexual exploitation and abuse in mission transitions and post-mission environments; and the facilitation of efforts to obtain critical feedback from United Nations system entities for the development of revised guidance and tools, which met the planned target of an increased number of entities addressing policy and operational gaps. However, while progress has been made, the target of an increased number of United Nations system organizations systematically sharing data to fulfil reporting requirements was not met mainly because organizations guard their independence and fear the "transparency penalty".

1.225 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.109).

Table 1.109
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Entities addressed policy and operational gaps, including alignment of the minimum standards on protection from and the response to sexual exploitation and abuse, and entities improve data-sharing and reporting	An increased number of entities addressed policy and operational gaps, including alignment of the minimum standards on protection from and the response to sexual exploitation and abuse	An increased number of entities address policy and operational gaps, including through alignment of existing policies with best practices	An increased number of entities address policy and operational gaps, including alignment of the minimum standards on protection from and the response to sexual exploitation and abuse

Result 2: one UN coordinated approach to more effectively address sexual exploitation and abuse

Programme performance in 2024 and target for 2026

1.226 The Office's work contributed to senior leaders in the United Nations system having access to a tailored toolkit for the prevention of sexual exploitation and abuse, *Protection from Sexual Exploitation and Abuse: A Practical Toolkit for United Nations Senior Leaders in-Country*, which met the planned target.

1.227 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.110).

Table 1.110
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Senior leaders in the United Nations system have access to a tailored toolkit for the prevention of sexual exploitation and abuse	Senior leaders have access to additional resources and communications, which lead to the adoption and use of a toolkit to fulfil their protection from sexual exploitation and abuse roles and responsibilities	Senior leaders across all pillars of the United Nations system and at NGOs have access to streamlined, practical resources, which empowers leaders to effectively fulfil their protection from sexual exploitation and abuse obligations

Result 3: effective prevention and response efforts through the institutionalization of protection from sexual exploitation and abuse across the United Nations system

Proposed programme plan for 2026

1.228 The Office continues to advance the institutionalization of measures to prevent and respond to sexual exploitation and abuse by ensuring the operationalization of protection from sexual exploitation and abuse through strengthened coordination, policy alignment and systematic implementation at the field level. Given the complexity of the United Nations system – which includes over 30 affiliated programmes, funds and specialized agencies with distinct leadership, membership, and budgetary structures – achieving a unified and coordinated approach remains a priority.

Lessons learned and planned change

1.229 The lesson for the Office was that the institutionalization of protection from sexual exploitation and abuse requires predictable and sustained resources. In field visits and stakeholder engagement, it has been consistently highlighted that funding gaps and high turnover among coordinators, particularly in high-risk locations, hinder consistent implementation and effective victim support. In applying the lesson, the Office will prioritize strategic resource planning and advocate for sustained financial commitments and mechanisms. Efforts will also be focused on embedding protection from sexual exploitation and abuse into governance structures, leadership frameworks and accountability mechanisms, moving beyond current ad hoc programming and initiatives. Strengthening coordination, policy alignment, committed leadership and systematic implementation will be central to this shift.

1.230 Expected progress towards the objective is presented in the performance measure below (see table 1.111).

Table 1.111
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	Increased coordination, policy alignment and more systematic implementation of protection from sexual exploitation and abuse at both the headquarters and country levels	Coordination, policy alignment and more systematic implementation of protection from sexual exploitation and abuse at both the headquarters and country levels

Legislative mandates

1.231 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

59/300; 61/267 B	Comprehensive review of a strategy to eliminate future sexual exploitation and abuse in United Nations peacekeeping operations	62/214	United Nations Comprehensive Strategy on Assistance and Support to Victims of Sexual Exploitation and Abuse by United Nations Staff and Related Personnel
62/63; 79/116	Criminal accountability of United Nations officials and experts on mission	70/286; 76/274	Cross-cutting issues

71/278; 72/312; 73/302; 75/321; 76/303; 77/333; 78/331	United Nations action on sexual exploitation and abuse	71/297	Special measures for protection from sexual exploitation and abuse

Security Council resolutions

2272 (2016)	2436 (2018)

Deliverables

1.232 Table 1.112 lists all deliverables of the programme.

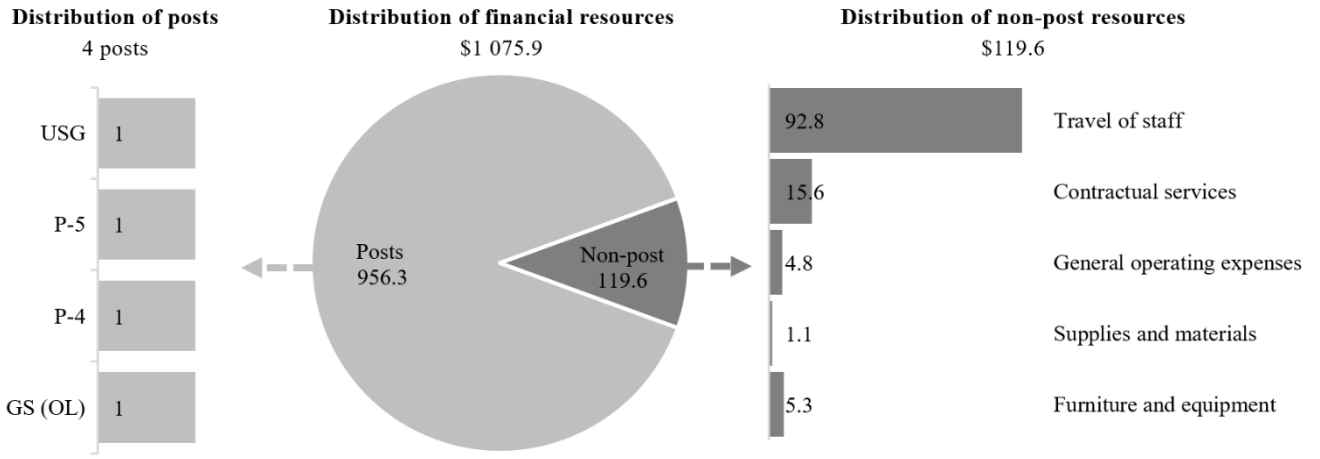
Figure 1.XXII
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Other assessed resources

1.236 As reflected in table 1.116 (2), other assessed resources amount to $53,300. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.237 As reflected in table 1.116 (3), extrabudgetary resources amount to $1,500,000. The resources would complement the regular budget resources and would be used mainly to provide for four posts (1 P-4, 2 P-3 and 1 General Service (Other level)) and non-post resources to support the delivery of the Office's mandate, including through specific activities such as communication and technical support on protection from sexual exploitation and abuse, travel of staff (i.e., to the field operations) and contractual services and general operating expenses for gratis personnel.

1.238 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.239 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.119. While the Office makes every effort to follow the advance booking of air travel policy, it is not always possible to comply owing to unforeseen circumstances, including the need to travel to the field on short notice. The Office will continue to strive to improve the planning of its travel to improve its compliance with the advance booking of air travel policy.

IX. Office of the United Nations Ombudsman and Mediation Services

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.240 The Office of the United Nations Ombudsman and Mediation Services is responsible for providing confidential, impartial and independent conflict resolution services to address work-related issues of staff members and non-staff personnel, upon request. In doing so, the United Nations Ombudsman makes an essential contribution to making the Organization a productive, healthy and enabling workplace.

1.241 The mandate of the Office derives from the priorities established in relevant General Assembly resolutions and/or decisions, including resolutions 55/258 and 56/253. The Office was further strengthened by the Assembly, pursuant to its resolutions 61/261 and 62/228, to create an integrated and geographically decentralized Office. By its resolution 73/276, the Assembly requested the Secretary-General to establish, within existing resources, a pilot project to offer access to informal dispute resolution services to non-staff personnel. By its resolution 78/248, the Assembly decided to regularize the pilot project for access by non-staff personnel to the services of the Office, within existing resources.

Programme of work

Objective

1.242 The objective, to which this Office contributes, is to ensure the effective functioning of the Organization by enhancing harmony in the workplace through an efficient and effective option for staff and non-staff personnel to seek redress to grievances.

Strategy and external factors for 2026

1.243 To contribute to the objective, the Office will:

(a) Provide the full range of conflict resolution services to United Nations staff and non-staff personnel in three core areas: addressing workplace grievances from staff and non-staff personnel through case intervention; engaging with relevant stakeholders to provide systemic feedback for improvements in the workplace; and strengthening, through capacity-building initiatives, the ability of staff and non-staff personnel to address workplace conflict effectively;

(b) Ensure that staff and non-staff personnel, irrespective of location, have access to the informal pillar of the administration of justice and to informal conflict resolution services, including by providing services in all six official languages of the United Nations;

(c) Conduct outreach efforts to raise awareness of the importance of informal dispute resolution as a preferred first step in the Organization;

(d) Promote and facilitate healthy dialogue among colleagues through the delivery of its workshops on “civility, communication and community”.

1.244 The above-mentioned work is expected to result in:

(a) A more harmonious and collaborative work environment for United Nations staff and non-staff personnel;

(b) More productive and more effective functioning of the Organization;

(c) Improved understanding by staff and non-staff personnel and managers of the importance of resilience and flexibility in promoting a harmonious workplace.

1.245 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) All staff and non-staff personnel, including those in supervisory functions, avail themselves of opportunities to resolve workplace issues through established informal mechanisms;

(b) All staff and non-staff personnel observe applicable United Nations regulations and rules regarding the terms and conditions of employment and apply lessons learned from decisions of the United Nations Dispute Tribunal and the United Nations Appeals Tribunal;

(c) Caseload trends remain stable.

1.246 With regard to cooperation with other entities and inter-agency coordination and liaison, the Office will continue to cooperate with the network of ombudsmen and mediators of the United Nations system so as to contribute to improved system-wide cohesion and impact in the area of conflict resolution in the workplace. The Office will also focus on building stronger collaboration with the formal system of administration of justice to explore opportunities for more referrals from the formal to the informal pillar.

1.247 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, the Office will continue to integrate a gender perspective into the provision of conflict resolution services and the identification of systemic issues to provide feedback on gender inequities, as observed in cases brought forward. The Office will continue to support the implementation of the strategy included in the system-wide policy on gender equality and the empowerment of women. The Office also compiles gender-disaggregated data.

1.248 In line with the United Nations Disability Inclusion Strategy, the Office will work to ensure that it takes into account the needs of persons with disabilities, facilitating their full and effective participation in the activities of the Office, and that relevant content, such as information conveyed through its online platforms, is accessible to persons with disabilities. The Office will maintain accessibility features on the website that benefit users with temporary or long-term disabilities, in collaboration with the Department of Global Communications.

Evaluation activities

1.249 An evaluation of client satisfaction, conducted by the Office and completed in 2024, has guided the proposed programme plan for 2026.

1.250 In response to the results of the evaluation referenced above, the Office will work closely with stakeholders, staff and non-staff personnel to raise awareness of the “informal first” approach as an important first step to resolve workplace disputes effectively. There are numerous benefits to this approach, which is, among other qualities, amicable, confidential, cost-effective and time-efficient. The Office will continue to deliver information sessions, including through targeted outreach, to increase awareness of informal conflict resolution mechanisms and build conflict competence skills by engaging staff and non-staff personnel in dialogue and promoting action to improve workplace behaviour, thereby creating an environment where everyone can thrive in dignity and mutual respect.

1.251 An evaluation of client satisfaction, to be conducted by the Office, is planned for 2026.

Programme performance in 2024

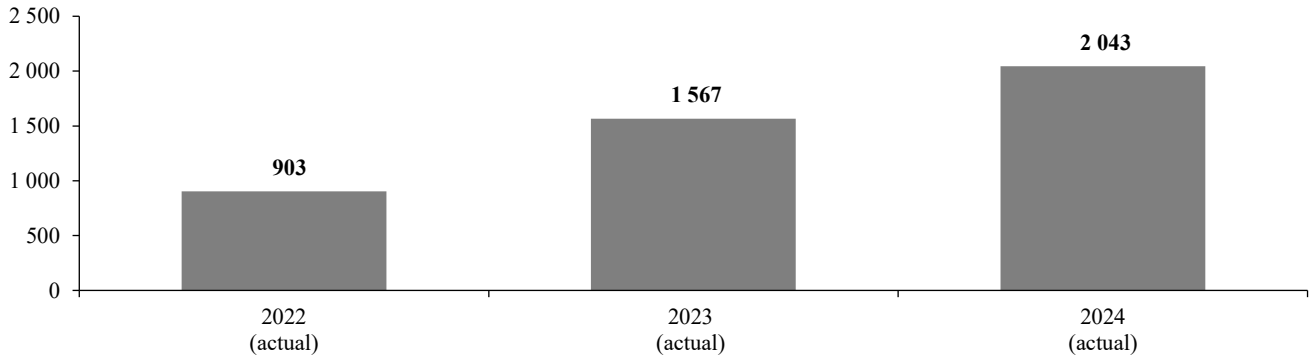
Managing workplace conflict better through capacity- and skill-building activities

1.252 The principle of dignity is a cornerstone of the Organization, as reaffirmed in the Staff Regulations and Rules of the United Nations, in which it is stated that “staff members shall uphold and respect the principles set out in the Charter, including faith in fundamental human rights, in the dignity and worth of the human person and in the equal rights of men and women”. In its systemic observations, the Office has consistently highlighted concerns related to issues of dignity and respect and has

pointed out the impact of such issues on team climate and morale, stressing the need to foster an inclusive and respectful work environment. In 2024, the Office organized a workshop on dignity, focusing on the connection between dignity and civility in the workplace, which allows participants to reflect on how communication has the potential to enhance or undermine dignity.

1.253 Progress towards the objective is presented in the performance measure below (see figure 1.XXIII).

Figure 1.XXIII
Performance measure: number of personnel equipped to manage workplace conflict



Planned results for 2026

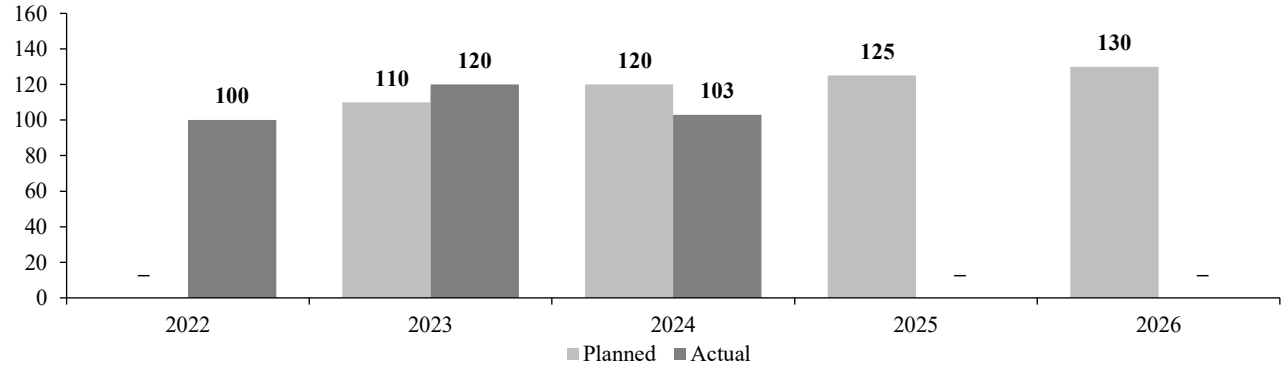
Result 1: improved access to mediation services

Programme performance in 2024 and target for 2026

1.254 The Office's work contributed to 103 mediation services conducted through a decentralized approach, which did not meet the planned target of 120 mediations. The target was not met primarily due to the underutilization of referrals from the formal system.

1.255 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XXIV).

Figure 1.XXIV
Performance measure: number of mediation services conducted through a decentralization of services (annual)



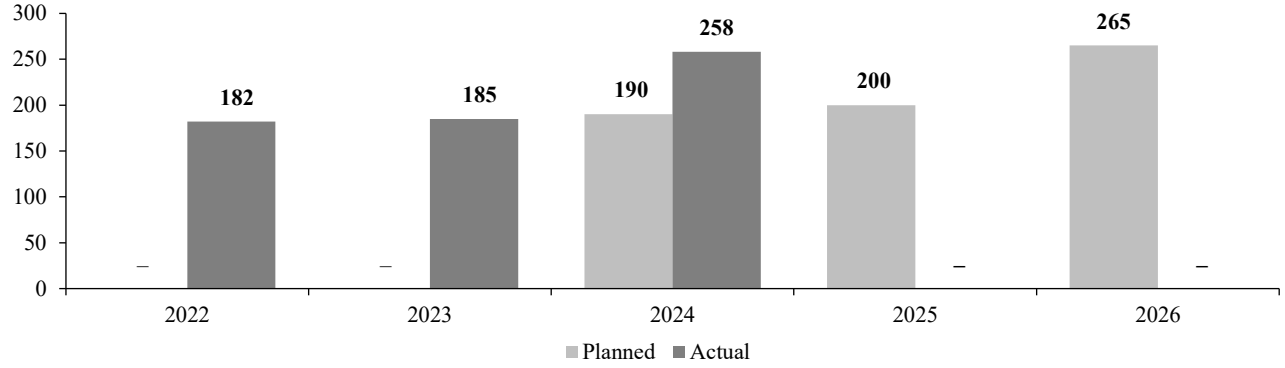
Result 2: United Nations non-staff personnel have access to informal conflict resolution services

Programme performance in 2024 and target for 2026

1.256 The Office's work contributed to 258 non-staff personnel using informal conflict resolution services, which exceeded the planned target of 190.

1.257 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XXV).

Figure 1.XXV
Performance measure: number of non-staff personnel using informal conflict resolution services (annual)



Result 3: increased access of services for staff in the field

Proposed programme plan for 2026

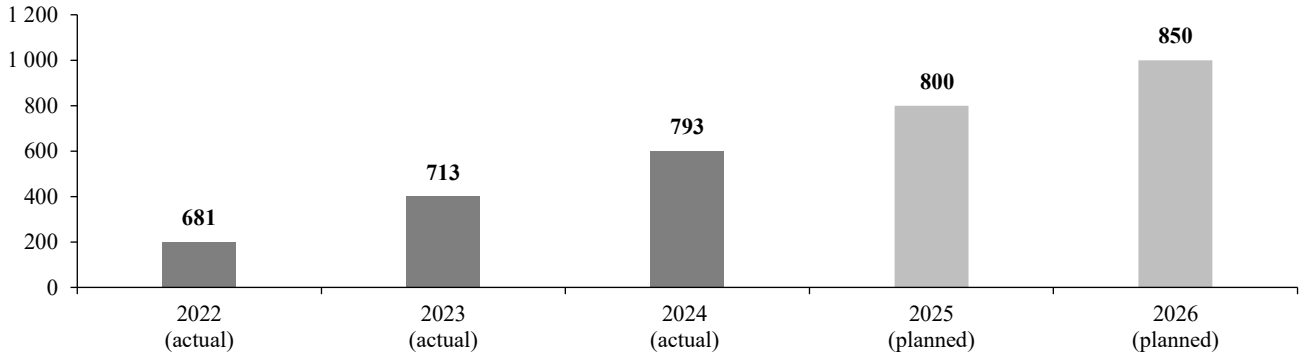
1.258 The Office continues to mainstream lessons learned and best practices by adjusting and adapting its processes to include, where appropriate, the use of virtual platforms to meet with personnel to discuss their concerns. While virtual platforms and activities enabled the Office to continue to deliver its services, they were found to be an inadequate replacement for in-person interaction. Given the sensitive and confidential nature of conflict resolution, personnel are often reluctant to use virtual platforms to discuss their concerns. Moreover, technical difficulties, including bandwidth, network and connectivity issues, impeded access to the Office's support for many staff, in particular those in remote duty stations. The Office will use virtual modes as a complement to in-person interaction.

Lessons learned and planned change

1.259 The lesson for the Office was that the closer that the Office can deliver its services to staff, particularly to those in deep field locations and hardship duty stations, the more effective it can be. In applying the lesson, the Office will deliver its services through a combination of an initial virtual interaction followed by in-person meetings as needed, in order to maximize benefits for staff in deep field locations and hardship duty stations.

1.260 Expected progress towards the objective is presented in the performance measure below (see figure 1.XXVI).

Figure 1.XXVI
Performance measure: number of informal conflict services accessed by staff in the field



Legislative mandates

1.261 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

55/258	Human resources management	65/290	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations
56/253	Questions relating to the proposed programme budget for the biennium 2002–2003		
62/228; 76/242; 77/260; 78/248; 79/254	Administration of justice at the United Nations		

Deliverables

1.262 Table 1.120 lists all deliverables of the programme.

Internal justice and oversight: in-person and remote informal dispute resolution services for staff and non-staff personnel; analysis of the root causes of conflict and the provision of upward feedback on systemic issues for an improvement in workplace conditions; awareness-raising and conflict competence-building activities, including information sessions, thematic and interactive panel discussions and workshops; and maintenance of a website in all United Nations official languages and the distribution of printed resource materials on conflict resolution.				

B. Proposed post and non-post resource requirements for 2026

Overview

1.263 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.121 to 1.123.

Table 1.121

1.264 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.124 to 1.126 and figure 1.XXVII.

1.265 As reflected in tables 1.124 (1) and 1.125 (1), the overall resources proposed for 2026 amount to $4,388,100, reflecting an increase of $500 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

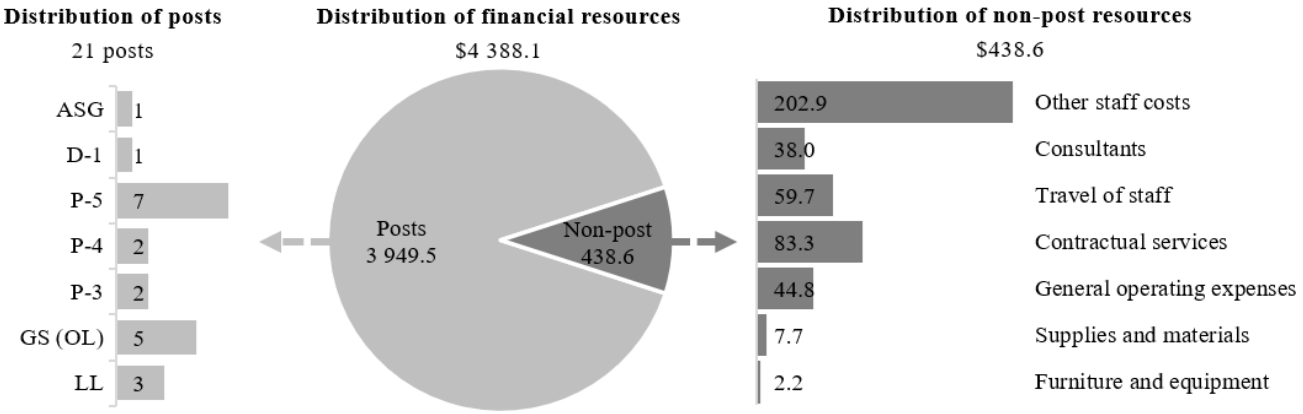
Figure 1.XXVII
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

1.266 As shown in table 1.124 (1), resource changes reflect an increase of $500, which relates to the higher standard price of ICT charges for non-field personnel outside of Headquarters.

Other assessed resources

1.267 As reflected in tables 1.124 (2) and 1.125 (2), other assessed resources amount to $2,946,000. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.268 As reflected in table 1.124 (3), extrabudgetary resources amount to $110,000. The non-post resources would complement regular budget resources and would be used mainly to support the delivery of the Office's mandates, including the provision of conflict resolution services to the International Court of Justice, the World Meteorological Organization and the International Trade Centre in accordance with the memorandum of understanding.

1.269 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.270 Information on the timely submission of documentation and advance booking of air travel is reflected in table 1.127. The Office will strengthen its efforts to ensure the advance booking of tickets in line with the advance booking of air travel policy and improve its compliance rate.

X. Office of Administration of Justice

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.271 The Office of Administration of Justice is responsible for the overall coordination of the system of administration of justice and contributing to its functioning in a fair, transparent and efficient manner. The mandate of the Office derives from relevant General Assembly resolutions, including resolutions 61/261, 62/228 and 63/253, by which the Assembly established a new, independent, transparent, professionalized, adequately resourced and decentralized system of administration of justice and placed emphasis on the need to ensure the fair and just treatment of United Nations staff and the accountability of managers and staff alike.

Programme of work

Objective

1.272 The objective, to which the Office contributes, is to ensure access to justice, in particular to jurisprudence, and respect for the rights and obligations of staff members and the accountability of managers and staff members alike through the efficient and effective functioning of the system of administration of justice.

Strategy and external factors for 2026

1.273 To contribute to the objective, the Office will:

(a) Provide easy access to jurisprudence through the website of the United Nations system of administration of justice, the fully searchable jurisprudence database accessible via the case law portal, and outreach means;

(b) Provide legal advice and assistance and, where appropriate, legal representation to staff;

(c) Enhance the case management systems and provide substantive, technical and administrative support to the United Nations Dispute Tribunal and the United Nations Appeals Tribunal;

(d) Raise awareness of and increase access to workplace dispute resolution mechanisms, with a focus on field missions and offices.

1.274 The above-mentioned work is expected to result in:

(a) Improved decision-making by managers;

(b) Increased access to information on when and how to pursue a claim before the Tribunals;

(c) Effective dispute resolution;

(d) More expedient processing of cases.

1.275 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Staff members avail themselves of opportunities to resolve workplace disputes through established informal mechanisms;

(b) Staff members observe applicable United Nations regulations and rules regarding the terms and conditions of employment and apply lessons learned from decisions of the Tribunals prior to filing applications;

(c) Caseload and disposal of cases remain stable;

(d) Staff members in remote locations have Internet connectivity to file electronically.

1.276 With regard to inter-agency coordination and liaison, the Office will continue to implement its comprehensive outreach strategy to provide staff with improved access to information and resources to resolve workplace grievances. To continue to implement this strategy and reach out to the largest number of staff members possible, in particular in locations away from Headquarters, the Office intends to work collaboratively with several entities and the separately administered funds and programmes. In 2026, the Office will continue to invest in promoting outreach activities to raise awareness of the case law portal, including in cooperation with other agencies. The Office will also continue to coordinate the preparation of the report of the Secretary-General on the functioning of the system of administration of justice and report on trends and observations.

1.277 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The Office will continue to identify any systemic issues concerning gender inequality in the access to the system of administration of justice and recommend remedial action. The Office's gender team will continue to support the implementation of the system-wide policy on gender equality and the empowerment of women.

1.278 In line with the United Nations Disability Inclusion Strategy, the Office will maintain accessibility features on the website of the Office that benefit users with temporary or long-term disabilities, in collaboration with the Department of Global Communications.

Evaluation activities

1.279 An evaluation conducted by the Office of Staff Legal Assistance on the impact of including legal clinics in its outreach events, completed in 2024, has guided the proposed programme plan for 2026.

1.280 In response to the results of the evaluation, the Office of Staff Legal Assistance will tailor its outreach programme to include legal clinics in outreach events, where appropriate and possible, to maximize the impact of resources. It will closely monitor post-visit results and continue to fine-tune its outreach programme to reach more staff members and make each outreach visit more impactful.

Programme performance in 2024

Increased transparency and accountability on referred cases

1.281 Pursuant to the statutes of the United Nations Dispute Tribunal and the United Nations Appeals Tribunal, the Tribunals may refer appropriate cases to the Secretary-General of the United Nations or the executive heads of separately administered United Nations funds and programmes for possible action to enforce accountability. In 2024, the Office developed standard operating procedures for notifying the Secretary-General or executive heads of accountability referrals and for ensuring that such referrals by a Tribunal were explicitly referenced in case law portal digests.

1.282 Progress towards the objective is presented in the performance measure below (see table 1.128).

Table 1.128
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Improved access to and tracking of information on accountability referrals

Planned results for 2026

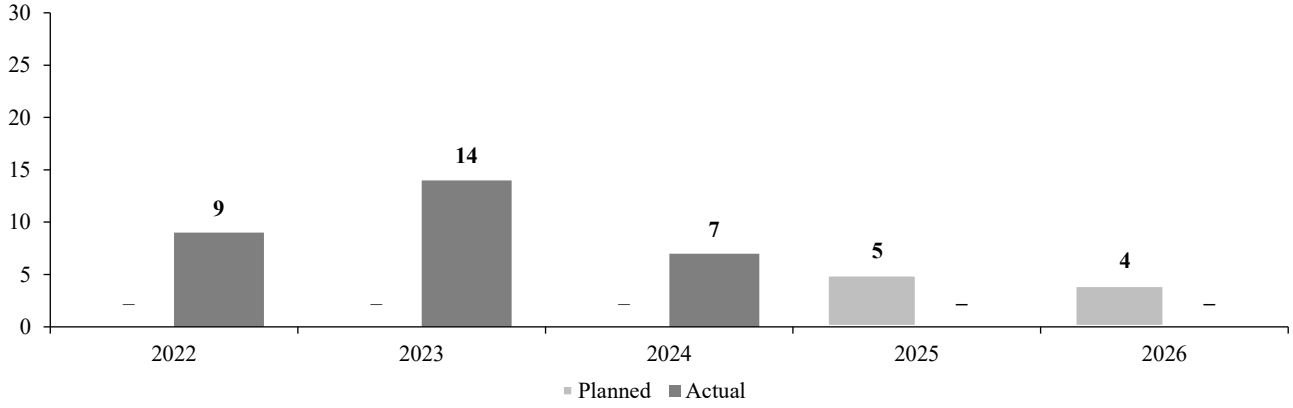
Result 1: reduction in the timelines for the resolution of cases before the United Nations Dispute Tribunal

Programme performance in 2024 and target for 2026

1.283 The Office's work contributed to the reduction of cases before the United Nations Dispute Tribunal that were not resolved within the prescribed timeline of 400 days to only seven, which did not meet the planned target of zero such cases. The target was not met owing to various reasons, including pending interlocutory appeals, the unavailability of applicants for a prolonged period and the prolonged time needed to dispose of cases owing to extensive litigation. The Office has managed to significantly reduce the number of cases not resolved within the prescribed timeline from 28 in 2021 to 7 in 2024.

1.284 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XXVIII).

Figure 1.XXVIII
Performance measure: number of cases before the United Nations Dispute Tribunal that are not resolved within prescribed timelines



Result 2: improved transparency of the system of administration of justice through the use of business intelligence and reporting on trend analysis

Programme performance in 2024 and target for 2026

1.285 The Office's work contributed to the development of a new, enhanced dashboard for United Nations Appeals Tribunal cases, with additional statistical components and visualization tools, which did not meet the planned target of public availability of a new dashboard for United Nations Appeals Tribunal cases and improvements to the dashboard of United Nations Dispute Tribunal cases. The target was not met because additional data verification exercises were required for the real-time data drawn from the Court Case Management System.

1.286 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.129).

Table 1.129
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	New dashboard for United Nations Appeals Tribunal cases under development, with features including real-time data on pending, received and closed appeals, and improvements to the dashboard of United Nations Dispute Tribunal cases, including the addition of real-time information features	Increased transparency of the system of administration of justice through publicly available enhancements to dashboards, including reporting and trend analysis	Improved monitoring of the system of administration of justice through the addition of new reporting components, data categorization and metrics to support trend analysis by the Office of Staff Legal Assistance

Result 3: increased use of legal advice from the Office of Staff Legal Assistance

Proposed programme plan for 2026

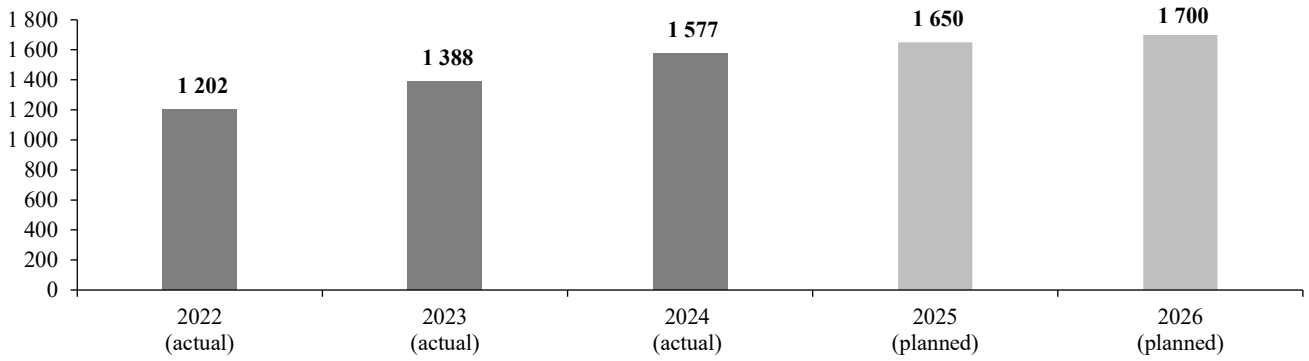
1.287 The Office of Staff Legal Assistance provides legal advice and representation to current and former staff of the United Nations and many United Nations system entities and to their dependants. An evaluation conducted in 2024 by the Office of Staff Legal Assistance found that outreach events that included legal clinics resulted in a higher number of legal assistance requests from staff members.

Lessons learned and planned change

1.288 The lesson for the Office was that continued enhancements to outreach efforts are essential to ensuring that staff are aware of the services available to them. In applying the lesson, the Office of Staff Legal Assistance will refine its outreach events to increase staff members' awareness of its services, including through targeted engagement in specific regions, entities and duty stations based on the number of staff served. It will also actively consult with staff members to ensure that outreach events are effective and aligned with available resources.

1.289 Expected progress towards the objective is presented in the performance measure below (see figure 1.XXIX).

Figure 1.XXIX
Performance measure: number of legal assistance requests from staff members received by the Office of Staff Legal Assistance (annual)



Legislative mandates

1.290 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

59/283; 61/261; 62/228; 63/253; 73/276; 74/258; 75/248; 76/242; 77/260; 78/248; 79/254	Administration of justice at the United Nations	66/106	Code of conduct for the judges of the United Nations Dispute Tribunal and the United Nations Appeals Tribunal

Deliverables

1.291 Table 1.130 lists all programme deliverables.

Office of Administration of Justice: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
1. Report of the Secretary-General to the General Assembly	1	1	1	1
2. Report of the Internal Justice Council to the General Assembly	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**26**	**31**	**23**	**24**
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	4	3	4	3
4. Meetings of the Fifth Committee	7	3	4	3
5. Meetings of the Sixth Committee	3	6	5	5
6. Meetings of the Internal Justice Council	10	19	10	15
C. Substantive deliverables				
Databases and substantive digital materials: electronic court case management system, Office of Staff Legal Assistance database and the jurisprudential search engine.				
D. Communication deliverables				
Outreach programmes, special events and information materials: campaigns to raise awareness of the system of administration of justice and disseminate information about the system.				
Digital platforms and multimedia content: United Nations system of administration of justice website.				
E. Enabling deliverables				
Legal services: legal assistance and, in cases with a reasonable chance of success, representation to staff members through the Office of Staff Legal Assistance.				
Internal justice and oversight: applications and appeals, including motions, received by the United Nations Dispute Tribunal and the United Nations Appeals Tribunal for processing; substantive, technical and administrative support to the Tribunals in issuing decisions; and assistance to the Internal Justice Council.				

B. Proposed post and non-post resource requirements for 2026

Overview

1.292 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.131 to 1.133.

Table 1.131

1.293 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.134 to 1.136 and figure 1.XXX.

1.294 As reflected in tables 1.134 (1) and 1.135 (1), the overall resources proposed for 2026 amount to $11,637,400, reflecting an increase of $800 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

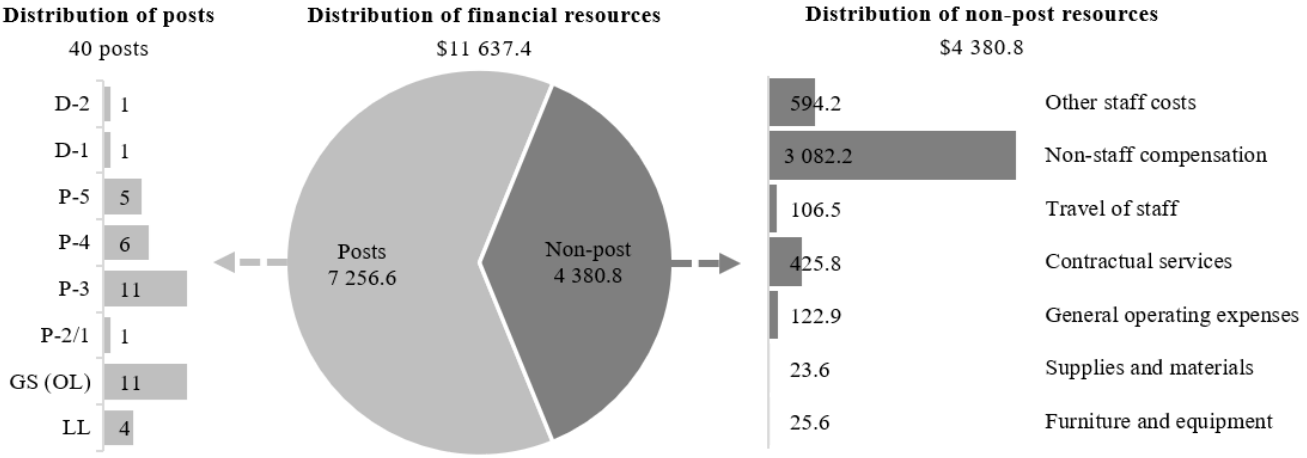
Figure 1.XXX
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

1.295 As shown in table 1.134 (1), resource changes reflect an increase of $800, which relates to the higher standard price of ICT charges for non-field personnel outside of Headquarters.

Other assessed resources

1.296 As reflected in tables 1.134 (2) and 1.135 (2), other assessed resources amount to $257,900. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.297 As reflected in table 1.134 (3), extrabudgetary resources amount to $2,112,500. The non-post resources would complement regular budget resources and would be used mainly to support the delivery of the Office's mandates, as well as to support the Office in the provision of legal assistance to staff.

1.298 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.299 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.137. The Office will strive to continue to improve the planning of its travel in order to improve its compliance with the advance booking of air travel policy.

Table 1.137

XI. Ethics Office

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.300 The Ethics Office was established as an independent Secretariat office and is responsible for assisting the Secretary-General in ensuring that all staff members perform their functions consistent with the highest standards of integrity, as required under the Charter of the United Nations. The mandate of the Office derives from the priorities established in relevant General Assembly resolutions and/or decisions, including resolutions 60/1 and 60/248. The Office also assists the Secretary-General in reporting annually to the Assembly on the implementation of ethics policies in response to Assembly resolution 60/254 and on the activities of the Ethics Panel of the United Nations pursuant to Assembly resolution 63/250. Pursuant to Assembly resolution 77/278, the Office directly presents an annual report to the Assembly. Further to Assembly resolution 70/305, the Office has been mandated to participate in providing an induction briefing to all Presidents of the General Assembly and their offices, to review the financial disclosures of those Presidents and to vet all private contributions to the Office of the President of the General Assembly. As provided for in Assembly resolution 71/263, the Office aims to do its part in the swift and effective implementation of the revised policy on protection against retaliation and to cultivate an organizational culture in which staff feel free to speak up.

Programme of work

Objective

1.301 The objective, to which the Office contributes, is to achieve and sustain an organizational culture of integrity, accountability and transparency, wherein all staff members observe and perform their functions consistent with the highest standards of integrity required under the Charter of the United Nations.

Strategy and external factors for 2026

1.302 To contribute to the objective, the Office will:

(a) Provide independent and preventive ethics advice, guidance and briefings to staff and management to ensure that ethical standards are well understood, support ethics standard-setting and promote policy coherence within the Secretariat and among the Organization's separately administered organs and programmes;

(b) Deliver its services in line with its terms of reference outlined in the relevant Secretary-General's bulletins (ST/SGB/2005/22, ST/SGB/2007/11 and ST/SGB/2007/11/Amend.1), through the administration of the annual financial disclosure programme, the provision of guidance and confidential ethics advice (including pre-appointment disclosure reviews for senior appointments and through the ethics helpline), the conduct of ethics briefings and outreach, and the fulfilment of the Office's responsibilities regarding the protection against retaliation policy, and by ensuring policy support and coherence of ethical standards;

(c) Identify risks in staff engagement in outside activities, in particular in terms of potential conflicts of interest and their impact on the Organization;

(d) Foster a shared understanding of the standards of conduct for the international civil service through the Ethics Network of Multilateral Organizations member entities affiliated with CEB;

(e) Support the Organization's overall strategy on risk management, including identifying and mitigating personal and organizational conflicts of interest through the financial disclosure programme and the provision of advice, and, upon request, work with the various owners of the risks identified in the enterprise risk registry in updating and implementing their response plans;

(f) Communicate and demonstrate the availability of measures for protection against retaliation, by continuously working within the Secretariat (with the Department of Global Communications, OIOS and the Department of Management Strategy, Policy and Compliance) and throughout the United Nations system through outreach activities.

1.303 The above-mentioned work is expected to result in:

(a) Greater public trust in the integrity of the Organization through the financial disclosure exercise, retaining the foundational defence for the Organization from personal conflicts of interest and potential reputational damage;

(b) Awareness among a greater number of staff of ethical standards and practices and of provisions for protection against retaliation;

(c) Enhanced organizational culture of integrity, transparency and accountability.

1.304 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Staff continue to avail themselves of the services provided by the Office;

(b) Financial disclosure statements from staff are submitted to the Office in a timely manner;

(c) All necessary documentation is provided by staff when seeking protection against retaliation;

(d) The security and public health situations in duty stations will allow for in-person outreach missions, when required.

1.305 With regard to cooperation with other entities at the global, regional, national and local levels, the Office expects to participate in the 2026 annual meeting of the Ethics Network of Multilateral Organizations.

1.306 With regard to inter-agency coordination and liaison, the Director of the Office will continue to chair and provide functional leadership to the Ethics Panel to increase coherence in the work of member ethics offices, as reflected in Secretary-General's bulletins ST/SGB/2007/11 and ST/SGB/2007/11/Amend.1. The Office will continue to engage with the Ethics Network of Multilateral Organizations member entities affiliated with CEB in the interest of ethics policy coherence and to promote protection against retaliation in the United Nations system. It will also continue to administer the financial disclosure requirements of those system entities that have opted to outsource this requirement to the Secretariat's Ethics Office. It will further continue to review contested matters by the staff of the separately administered organs and programmes of the Ethics Panel.

1.307 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It disaggregates its service data by gender, where possible. The Office has received more enquiries from women consistently over the years and has responded to them. As a practice, and when funds allow, outreach mission teams of the Office will continue to be in pairs and gender-balanced. Subject to demand from requesting entities, the Office will provide gender-disaggregated information.

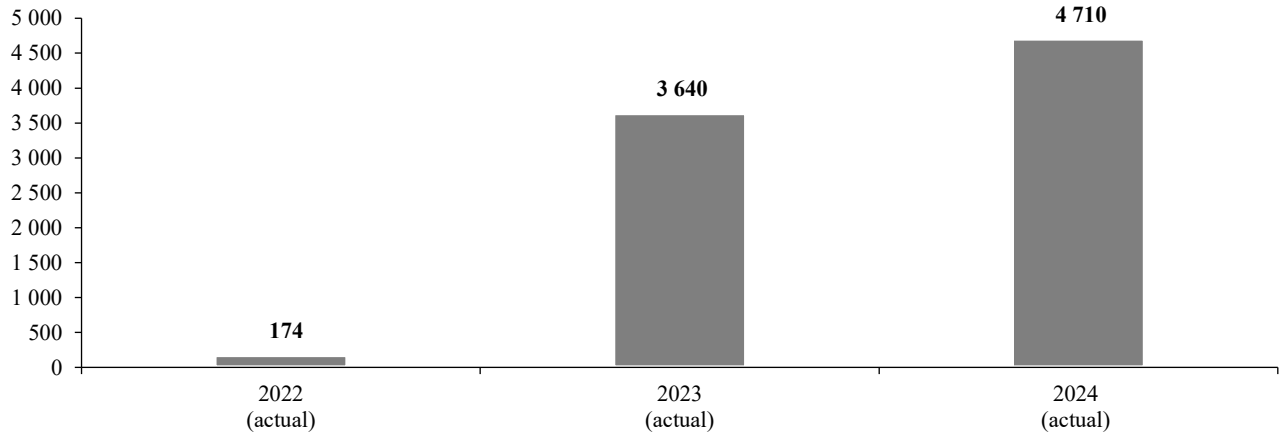
Programme performance in 2024

Enhanced access for staff to ethics-related guidance and materials

1.308 The Ethics Office launched its own intranet site through iSeek in 2022, making ethics-related guidance and interactive resources available to staff regardless of their duty station. In every outreach session and guidance delivered, the Office referred staff to the site so that they could access relevant materials at their disposal. In parallel, the Office made additional efforts to raise awareness of the relevance of ethics standards in the day-to-day work of staff, including through the annual Leadership Dialogue and the periodic distribution of articles on iSeek. The publication of those articles led to increased interest in ethics guidance among staff members and a sharp increase in the number of visitors to the Office's intranet site. In 2024, in response to an increase in queries related to the financial disclosure programme, the Office created a dedicated site on the Knowledge Gateway portal where staff members can access information and guidance on the programme's scope and objectives. Through these resources, the Office will continue efforts to improve access to ethics-related guidance for staff members around the world.

1.309 Progress towards the objective is presented in the performance measure below (see figure 1.XXXI).

Figure 1.XXXI
Performance measure: number of visits to the Ethics Office intranet site on iSeek (annual)



Planned results for 2026

Result 1: reduced ethical risks arising from the conduct of outside activities

Programme performance in 2024 and target for 2026

1.310 The Office's work contributed to the establishment of a working group of the Ethics Panel, which developed common guidance on outside activities and gifts and honours, which met the planned target.

1.311 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.138).

Table 1.138
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
United Nations personnel request and receive advice on outside activities (414 queries)	Engagement by United Nations leadership and personnel on the personal use of social media, with 34,189 participants in the 2023 Leadership Dialogue	The working group of the Ethics Panel developed common guidance on outside activities and gifts and honours	The Ethics Panel and the Ethics Network of Multilateral Organizations member entities affiliated with CEB develop common guidance on outside activities	Increased staff awareness of ethical and conflict-of-interest risks associated with outside activities

Result 2: enhanced ethical awareness and access to ethics services by field personnel

Programme performance in 2024 and target for 2026

1.312 The Office's work contributed to field personnel having access to more tailored services, including 37 on-demand, customized briefings and town hall sessions for offices in the field and entities with extensive field presence, which met the planned target.

1.313 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.139).

Table 1.139
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Field personnel have access to ethics-related standards through the intranet page of the Office launched on iSeek	Field personnel have access to more interactive media materials on topics relating to ethical standards	Field personnel have access to more tailored services through customized guidance, workshops, town halls and other outreach activities, taking into account the local context and specific circumstances of field operations	Improved access of field personnel to ethics services and support through enhanced field presence of the Office	Field personnel have access to knowledge products in the area of ethical risks and measures to address them

Result 3: increased transparency and accountability through enhanced advice and guidance provided through the financial disclosure programme

Proposed programme plan for 2026

1.314 As the Organization accelerates its efforts to rejuvenate the United Nations system so that it can address global challenges with forward-thinking culture and cutting-edge skills, it is increasingly important to ensure that potential conflicts of interest are avoided, identified and managed proactively. Maintaining high standards of integrity and accountability is essential not only for the

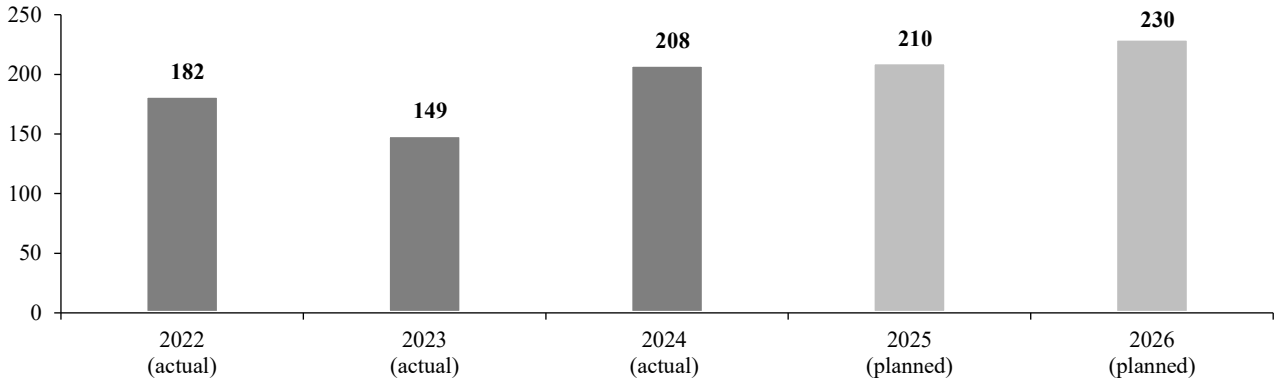
effective performance of United Nations operations, but also for preserving the reputation of the Organization among Member States, donors, civil society stakeholders and the wider public.

Lessons learned and planned change

1.315 The lesson for the Office was the need to provide staff members with ongoing, consistent and timely advice and guidance to assist them in avoiding and, where necessary, identifying, mitigating and managing conflict-of-interest risks arising from their financial interests, personal affiliations or outside activities, given the increasingly complex environment within which the United Nations operates globally. Lack of awareness and understanding can give rise to the risks of failure to detect conflict of interest and misinterpretation of regulations and rules, and the resulting conflicts of interest are significantly more severe. In applying the lesson, the Office will enhance its engagement with management and staff participating in the financial disclosure programme to ensure that staff fully comply with the programme's requirements by providing them with proactive advice to mitigate and prevent actual and potential conflicts of interest captured through the programme.

1.316 Expected progress towards the objective is presented in the performance measure below (see figure 1.XXXII).

Figure 1.XXXII
Performance measure: number of filers in the financial disclosure programme who received advice and recommendations on mitigation of conflict of interest (annual)



Legislative mandates

1.317 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

60/1	2005 World Summit Outcome (para. 61 (d))	63/250; 71/263; 77/278	Human resources management
60/248	Special subjects relating to the proposed programme budget for the biennium 2006–2007	70/305; 77/335	Revitalization of the work of the General Assembly
60/254	Review of the efficiency of the administrative and financial functioning of the United Nations		

Deliverables

1.318 Table 1.140 lists all deliverables of the Ethics Office.

Table 1.140
Ethics Office: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

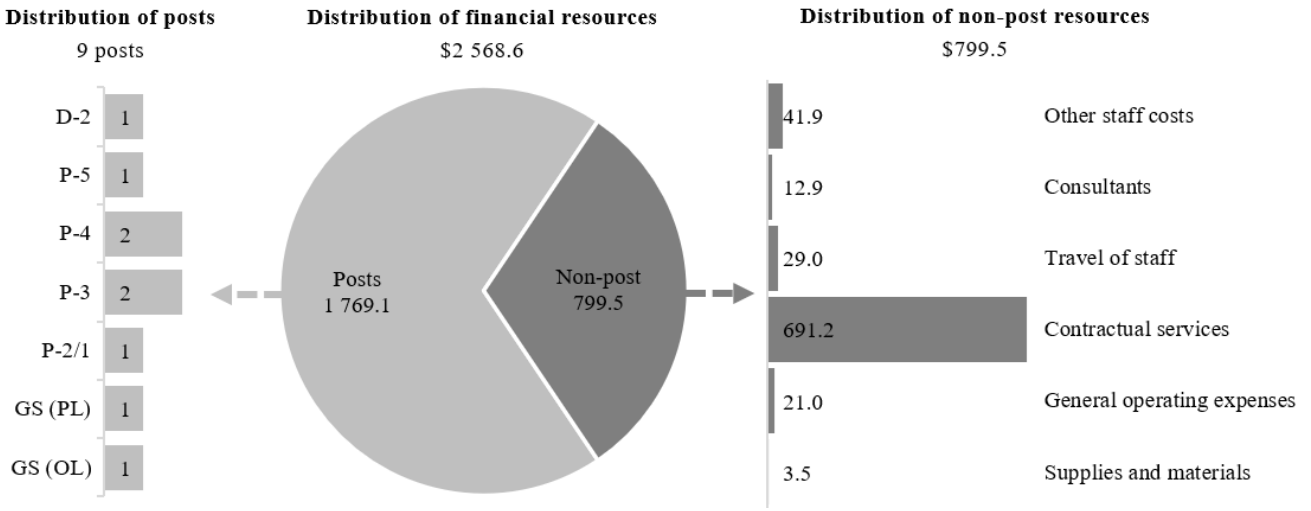
Figure 1.XXXIII
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Other assessed resources

1.322 As reflected in tables 1.144 (2) and 1.145 (2), other assessed resources amount to $1,145,600. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

1.323 As reflected in table 1.144 (3), extrabudgetary resources amount to $1,390,800. The non-post resources would complement regular budget resources and would be used mainly to support the delivery of the Office's mandates and cover the administration of the financial disclosure programme.

1.324 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.325 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.147. The Office will continue its 100 per cent compliance with the advance booking of air travel policy.

Table 1.147
Compliance rate
(Percentage)

Air tickets purchased at least two weeks before the commencement of travel	100	100	100	100	100

XII. Investigation into the conditions and circumstances resulting in the tragic death of Dag Hammarskjöld and of the members of the party accompanying him

B. Proposed post and non-post resource requirements for 2026

Overview

1.326 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in table 1.148.

Table 1.148
Evolution of financial resources by object of expenditure
(Thousands of United States dollars)

			Changes					
Object of expenditure	*2024 expenditure*	*2025 approved*	*Technical adjustments*	*New/expanded mandates*	*Other*	*Total*	*Percentage*	*2026 estimate*
Consultants	84.4	69.8	–	73.9	–	73.9	105.9	143.7
Contractual services	1.6	–	–	1.2	–	1.2	–	1.2
Total	**86.0**	**69.8**	–	**75.1**	**–**	**75.1**	**107.6**	**144.9**

1.327 As shown in table 1.148, the overall resources proposed for 2026 amount to $144,900, reflecting an increase of $75,100 (or 107.6 per cent) compared with the approved budget for 2025. Resource changes result from new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor

Overall resource changes

New and expanded mandates

1.328 As shown in table 1.148, resource changes reflect an increase of $75,100 under consultants and contractual services, which would provide for the continuation of the planned scope of the investigation into the conditions and circumstances resulting in the tragic death of Dag Hammarskjöld and of the members of the party accompanying him, in accordance with General Assembly resolution 79/244.

XIII. Resident coordinator system

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.329 General Assembly resolution 72/279 on the repositioning of the United Nations development system and the Economic and Social Council segment on operational activities for development guide the scope and implementation of the activities of the resident coordinator system. In line with resolutions 72/279, 75/233, 79/226 and other relevant Assembly resolutions, the substantive mandates of the resident coordinator system are oriented around supporting countries in the implementation of the 2030 Agenda. The management of the resident coordinator system rests with the Development Coordination Office, with resident coordinators reporting directly to the Secretary-General. Resident coordinators are the designated representatives of the Secretary-General for development coordination at the country level. At the heart of the resident coordinator system are 130 resident coordinators leading 130 United Nations country teams operating in over 160 countries and territories.

Programme of work

Objective

1.330 The objective, to which the resident coordinator system contributes, is to accelerate Member States' progress towards achieving the Sustainable Development Goals through strengthened United Nations development leadership, robust coordination mechanisms, tools and frameworks, the effective management of joint resources and improved transparency of results to improve the impact, efficiency and effectiveness of operational activities for development at the country, regional and global levels.

Strategy and external factors for 2026

1.331 To contribute to the objective, the resident coordinator system will scale up partnerships-driven development support to national Governments in order to implement the 2030 Agenda, including by strengthening the design and implementation of United Nations Sustainable Development Cooperation Frameworks. Specifically, the resident coordinator system will:

(a) Ensure diverse and effective resident coordinator profiles and skill sets tailored to the needs of countries;

(b) Provide effective support, through the Development Coordination Office, at the global and regional levels, to United Nations country teams in delivering individual and collective results;

(c) Act as the secretariat for the United Nations Sustainable Development Group;

(d) Ensure accountable and transparent results of the resident coordinator system and United Nations development system in support of the 2030 Agenda at the global, regional and national levels;

(e) Support high-quality Sustainable Development Goal analysis and tailored programming responses at the country level, by leveraging data-driven solutions, information technology and digital innovation;

(f) Facilitate the achievement of system-wide efficiencies of the United Nations Sustainable Development Group through the following workstreams: business operations strategies, common back offices, global shared services and common premises;

(g) Continue to leverage catalytic funding provided by the Joint Sustainable Development Goals Fund to help countries to accelerate the achievement of the Goals by propelling key transitions in areas such as digitalization, food systems, energy, and social protection and jobs, with an emphasis on the localization of and synergies to be achieved across multiple Goals and fostering systems-level change for the 2030 Agenda;

(h) In line with intergovernmental mandates, support Member States in addressing and proactively managing risks and in taking preventive action vis-à-vis increasing and compounding actual, anticipated and unforeseen crises, including cost-of-living pressures and the impact of other global crises. This approach will be anchored firmly within the United Nations Sustainable Development Cooperation Frameworks.

1.332 The above-mentioned work is expected to result in:

(a) A stronger convening role for the broad system of development stakeholders to offer countries interdisciplinary, coherent and future-informed policy solutions to advance the achievement of the Sustainable Development Goals;

(b) A coherent and transparent approach to United Nations sustainable development operations at the national, regional and global levels, including consistent implementation of system-wide priorities, policies and approaches across United Nations Sustainable Development Group entities;

(c) Strengthened partnerships to accelerate the progress made by Member States in the attainment of the Sustainable Development Goals, including by attracting and leveraging public and private financing for the Goals;

(d) Increased financial resources and effectiveness for United Nations programme implementation through reduced costs and the increased agility of United Nations development activities;

(e) The safeguarding of lives and livelihoods by continuing to address the socioeconomic and long-term impacts of multiple and interlocking crises, with attention given to those hit hardest.

1.333 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Adequate funding for the resident coordinator system, as well as for the Joint Sustainable Development Goals Fund and other key pooled funds;

(b) Continued and renewed engagement by Member States on the funding compact and the implementation of related commitments to ensure that the quality and quantity of funding allows the United Nations development system to maximize its comparative advantages and further incentivize United Nations coherence and unity of purpose.

1.334 With regard to inter-agency coordination and liaison, the resident coordinator system will continue to actively coordinate member United Nations entities at the principal, director and technical levels. The resident coordinator system will also work closely with United Nations development entities and Secretariat entities, including peacekeeping and special political missions. The resident coordinators will continue to lead United Nations country teams in supporting national plans and priorities.

1.335 With regard to cooperation with other entities at the global, regional, national and local levels, the resident coordinator system will continue to work closely with Member States, international financial institutions and civil society partners to advance the Sustainable Development Goals and the 2030 Agenda.

1.336 The resident coordinator system integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The resident coordinator system will continue to enhance implementation of and reporting on the United Nations accountability framework on gender equality. For example, through the United Nations System-wide Gender Equality Acceleration Plan, the system will ensure the application of the United Nations country team gender equality marker to track planned investment by the country teams for gender equality and the empowerment of women and to advance gender-responsive realization of the Sustainable Development Goals.

1.337 In line with the United Nations Disability Inclusion Strategy, the resident coordinator system will focus on the implementation of the Strategy and support United Nations country teams in implementing and reporting on the Strategy; in parallel, the system will continue supporting programme country Governments to implement the Convention on the Rights of Persons with Disabilities.

Evaluation activities

1.338 The following evaluations completed in 2024 have guided the proposed programme plan for 2026:

(a) Evaluation of the resident coordinator system in complex settings (OIOS);

(b) Review of the implementation of the principle of mutual recognition within the United Nations system (Joint Inspection Unit);

(c) Eight evaluations conducted on United Nations Sustainable Development Cooperation Frameworks (two in the Africa region, one in the Asia and the Pacific region, four in the Eastern Europe and Central Asia region, and one in the Latin America and the Caribbean region).

1.339 In response to the results of the evaluations, the Development Coordination Office will collect and share good practices on sustainable development funding and financing, as well as on joined-up risk analysis and risk-informed planning in complex settings, in close collaboration with relevant United Nations entities, to promote a system-wide approach.

1.340 The following evaluations are planned for 2026:

(a) A total of 31 United Nations Sustainable Development Cooperation Framework evaluations, namely, 13 in the Africa region, 3 in the Arab States region, 7 in the Asia and the Pacific region, 3 in the Europe and Central Asia region, and 5 in the Latin America and the Caribbean region;

(b) OIOS evaluation of the resident coordinator system on a topic to be determined.

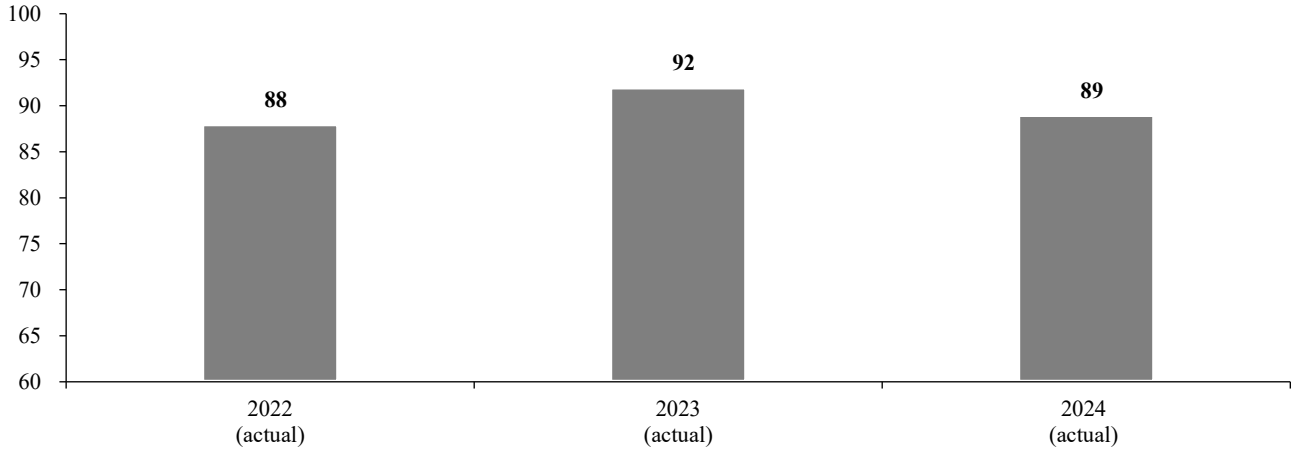
Programme performance in 2024

National Governments engaged in global priorities towards Sustainable Development Goal acceleration

1.341 Resident coordinators play a crucial role in supporting their host countries in translating global priorities related to sustainable development into country-level initiatives. In 2024, resident coordinators worked with host Governments at the highest level to support their engagement with the Pact for the Future. Ahead of the Summit of the Future, resident coordinators supported host Governments in organizing over 100 country-level initiatives. Resident coordinators led United Nations country teams to support host Governments in addressing key policy issues outlined in the Pact for the Future, in line with national needs and priorities and within the context of their cooperation frameworks.

1.342 Progress towards the objective is presented in the performance measure below (see figure 1.XXXIV).

Figure 1.XXXIV
Performance measure: percentage of host country Governments that indicated that the resident coordinator effectively leads the United Nations country team's strategic support for national plans and priorities
(Percentage)



Planned results for 2026

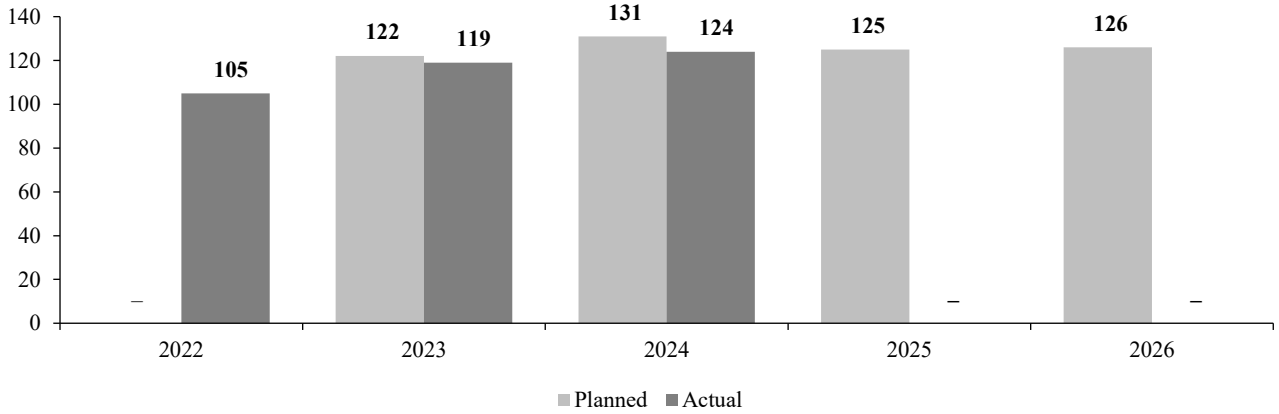
Result 1: improved transparency and accountability of United Nations country teams' joint programmatic work on the ground

Programme performance in 2024 and target for 2026

1.343 The programme's work contributed to 124 United Nations country team workplans being showcased through UN-Info, which did not meet the planned target of 131. The target was not met owing to challenges in collecting data for joint workplans from all members of United Nations country teams.

1.344 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XXXV).

Figure 1.XXXV
Performance measure: number of United Nations country team joint workplans showcased through UN-Info (annual)



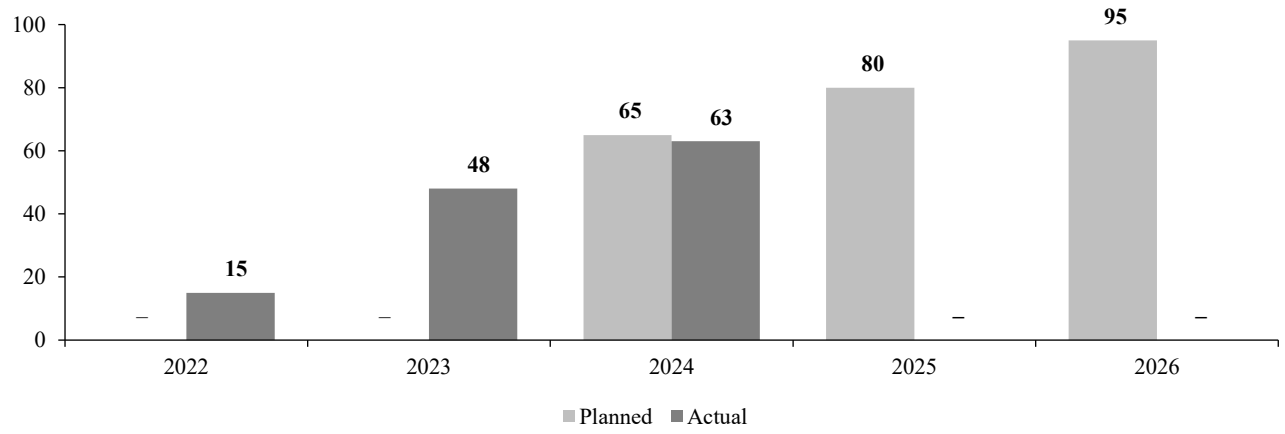
Result 2: increased transparency and accountability for United Nations results and the contribution to the Sustainable Development Goals through standard United Nations Sustainable Development Cooperation Framework indicators

Programme performance in 2024 and target for 2026

1.345 The programme's work contributed to 63 United Nations country teams providing data against agreed common indicators on the United Nations development system's contribution to advancing the Sustainable Development Goals, which did not meet the planned target of 65. The target was not met due to inconsistent agency participation in system-wide reporting at the country level.

1.346 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XXXVI).

Figure 1.XXXVI
Performance measure: United Nations country teams providing data against agreed common indicators on the United Nations development system's contribution to advancing the Sustainable Development Goals (annual)
(Percentage)



Result 3: enhanced effectiveness of United Nations support in achieving the Sustainable Development Goals through data-driven solutions and digital innovation

Proposed programme plan for 2026

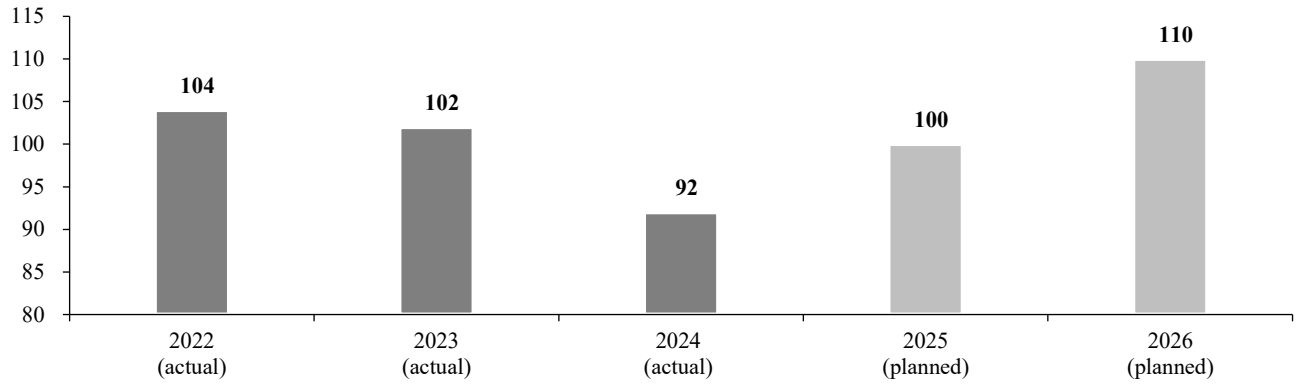
1.347 The programme is aimed at prioritizing data-driven solutions and digital innovation in supporting programme countries to achieve the Sustainable Development Goals. The programme is aligned with the commitments outlined in the Global Digital Compact, adopted in 2024 (General Assembly resolution 79/1, annex I), which is focused on fostering digital cooperation, ensuring digital inclusion and promoting a secure, human-centred digital future.

Lessons learned and planned change

1.348 The lesson for the programme, building on the analysis of the opportunities presented by emerging and fast-changing digital innovation, was the need to strengthen support for data-driven policies and programmes for sustainable development, as well as mitigating the associated risks. In applying the lesson, the programme plans to prioritize data-driven solutions and digital innovation in supporting programme countries to achieve the Sustainable Development Goals. The programme will strengthen technical support, knowledge and data for digital leadership in order to create a foundation for stronger United Nations Sustainable Development Cooperation Frameworks, which will further support programme countries to advance digital transformation and accelerate the achievement of the Goals, in line with national needs and priorities.

1.349 Expected progress towards the objective is presented in the performance measure below (see figure 1.XXXVII).

Figure 1.XXXVII
Performance measure: number of United Nations country teams providing support to host country Governments on the use of new technologies and innovation to achieve the Sustainable Development Goals (annual)



Legislative mandates

1.350 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

70/1	Transforming our world: the 2030 Agenda for Sustainable Development	73/248; 74/238; 76/220; 77/184; 78/166	Operational activities for development of the United Nations system
71/243; 75/233; 79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	76/4	Review of the functioning of the reinvigorated resident coordinator system, including its funding arrangement
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	79/258 A	Special subjects relating to the proposed programme budget for 2025

Economic and Social Council resolutions

2019/15; 2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system	2022/25; 2023/31; 2024/19	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system

Deliverables

1.351 Table 1.149 lists all deliverables of the programme.

Table 1.149
Resident coordinator system: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**1**	**1**
1. Report of the Chair of the United Nations Sustainable Development Group on the Development Coordination Office, including on the contribution of the United Nations Sustainable Development Group to the Sustainable Development Goals	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**2**	**4**	**2**	**4**
2. Meetings of the Fifth Committee	1	2	1	2
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	2	1	2
B. Generation and transfer of knowledge				
Technical materials (number of materials)	**336**	**258**	**329**	**296**
4. Common country analyses (new or annual update) to inform United Nations planning, programming and contribution to country-level implementation of the 2030 Agenda for Sustainable Development	132	117	132	132
5. United Nations country team reports to the universal periodic review	38	–	42	–
6. Evaluations of United Nations Sustainable Development Cooperation Frameworks	33	8	22	31
7. Annual reports on joint United Nations country team results	132	132	132	132
8. Annual consolidated progress report on the Joint Sustainable Development Goals Fund	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: consultation with Member States, regional organizations and the private sector on common action in support of development cooperation frameworks; and 18 substantive briefings to Member States.

D. Communication deliverables

Digital platforms and multimedia content: UN-Info.

Outreach programmes, special events and information materials: at least two thematic windows to finance and promote Sustainable Development Goal transitions.

E. Enabling deliverables

Administration: occupational health and safety for United Nations personnel and dependants; support for the design and implementation of the business operations strategies, common back offices, global shared services and common premises; timely issuance of Secretary-General's delegation of authority to newly appointed resident coordinators and monitoring of accountability key performance indicators.

Legal services: negotiation on and conclusion of the legal framework to create an authorizing environment for the reinvigorated resident coordinator system with host countries.

B. Proposed post and non-post resource requirements for 2026

Overview

1.352 The proposed programme budget resources for 2026 (regular budget), including the breakdown of resource changes, as applicable, are reflected in table 1.150.

Table 1.150
Evolution of financial resources by object of expenditure
(Thousands of United States dollars)

			Changes					
Object of expenditure	*2024 expenditure*	*2025 approved*[a]	*Technical adjustments*	*New/expanded mandates*	*Other*	*Total*	*Percentage*	*2026 estimate*
Grants and contributions	13 442.5	13 842.3	–	471.3	–	471.3	3.4	14 313.6
Total	**13 442.5**	**13 842.3**	**–**	**471.3**	**–**	**471.3**	**3.4**	**14 313.6**

[a] In addition to the appropriation of $13,842,300 approved for 2025, the General Assembly, in its resolution 79/258 A, authorized the Secretary-General, exceptionally and without creating a precedent, to enter into commitments with assessment not exceeding $53 million for the period from 1 January to 31 December 2025. The Secretary-General proposes the continuation of that arrangement in 2026, as reflected in paragraph 1.352 below.

1.353 Pursuant to General Assembly resolution 72/279, the resident coordinator system is funded through a 1 per cent coordination levy on tightly earmarked non-core contributions to United Nations system development-related activities, a cost-sharing arrangement among the entities of the United Nations Sustainable Development Group and voluntary contributions. In section XVIII of its resolution 79/258 A, the Assembly noted that the current funding model was expected to generate $215 million from the levy, cost-sharing and the projected voluntary contribution in 2025, and decided to authorize the Secretary-General, exceptionally and without creating a precedent, to enter into commitments with assessment not exceeding $53 million for the period from 1 January to 31 December 2025, in accordance with United Nations financial regulations and rules, to support the funding of the resident coordinator system. The Assembly requested the Secretary-General to report on the use of the commitment authority and its continuation in the context of his performance and budget reports. It also requested the Secretary-General to submit a refined comprehensive and detailed report on the financing of and governance over the resident coordinator system to the Assembly at its eighty-first session. Pending the submission of that report, the Secretary-General requests the Assembly's approval to continue the commitment authority with assessment not exceeding $53 million for the period from 1 January to 31 December 2026.

1.354 As shown in table 1.150, the proposed programme budget for 2026 reflects an increase of $471,300 under new and expanded mandates, compared with the approved appropriation for 2025, to cover the Secretariat's share of the cost-sharing arrangement among the entities of the United Nations Sustainable Development Group. The increase of $471,300 under grants and contributions reflects the General Assembly's decision in its resolution 79/258 A to adjust the cost-sharing amount for annual inflation, starting from 1 January 2025, pending an agreement on the funding arrangement.

Overview of overall resources for the resident coordinator system

1.355 For 2026, the overall resources for the resident coordinator system include the special purpose trust fund and locally mobilized resources. Under the special purpose trust fund, although the resident coordinator system intends to generate up to $281.8 million of pooled funding, comprising voluntary contributions, United Nations Sustainable Development Group cost-sharing and the 1 per cent coordination levy, historical funding patterns suggest potential shortfalls, especially in the area of voluntary contributions. A continuation of the commitment authority with assessment would supplement any funding gaps in the special purpose trust fund. The distribution of the resources is reflected in tables 1.151 and 1.152. Under the locally mobilized resources, the resident coordinator system

anticipates $8 million of earmarked contributions to be received at the country level for activities financed by third parties that are mobilized locally for activities that go beyond the core focus of the special purpose trust fund (reflected in table 1.151 below under country coordination component).

Table 1.151

Supplies and materials	1 437.7	1 172.3	–	–	1 172.3
Furniture and equipment	979.5	1 993.5	–	–	1 993.5
Total	**214 926.3**	**281 826.4**	**–**	**–**	**281 826.4**

1.356 The overall resource requirements for 2026 include $281.8 million for the special purpose trust fund for the resident coordinator system (see table 1.152). A comprehensive and detailed report on the financing of and governance over the resident coordinator system, to be submitted to the General Assembly at its eighty-first session, as requested by the Assembly in paragraph 4 of section XVIII of its resolution 79/258 A, is expected to include a detailed analysis of structural and resource requirements, addressing both post and non-post requirements, while moving beyond a one-size-fits-all approach to better reflect country-specific contexts. Accordingly, the extrabudgetary estimates for 2026 remain largely consistent with the 2025 estimates, which will provide operational stability while the Development Coordination Office conducts the review.

1.357 Resource requirements of $281.8 million under the special purpose trust fund for 2026 include cost-neutral changes compared with the estimates for 2025. The increase of $164,900 under posts reflects the provision for the United Nations Resident and Humanitarian Coordinator post in Iraq (previously cost-shared with the United Nations Assistance Mission for Iraq) effective June 2026, the provision for the Resident and Humanitarian Coordinator post at the Assistant Secretary-General level in Somalia effective November 2026 (previously cost-shared with the United Nations Transitional Assistance Mission in Somalia) and the upward reclassification of the Resident Coordinator/Humanitarian Coordinator post in Nigeria from D-2 to Assistant Secretary-General level. The increase is offset by corresponding decreases under non-post resources. The net decrease of $164,900 under non-post resources comprises: (a) a redeployment of $43,600 from other staff costs to posts for the Resident and Humanitarian Coordinator post in Nigeria (representing the cost differential between D-2 and Assistant Secretary-General levels previously budgeted as general temporary assistance); and (b) a reduction of $128,700 under general operating expenses, due to lower operational requirements across country offices; and (c) an increase of $7,400 under contractual services to accommodate anticipated increases in information technology service costs.

1.358 The estimated number of posts for the special purpose trust fund in 2026 is reflected in table 1.153. The proposed staffing for 2026 reflects an increase of two posts compared with 2025, as explained in paragraph 1.356 above.

Table 1.153

Executive direction and management

1.359 The proposed resources under executive direction and management would provide for the Office of the Assistant Secretary-General for Development Coordination. This Office provides strategic planning for the resident coordinator system, supports the Chair, Vice-Chair, principals and working mechanisms of the United Nations Sustainable Development Group and monitors strategic aspects of implementation and progress-tracking of the quadrennial comprehensive policy review. The Office is responsible for managing the engagement with Member States and ensuring their oversight of the resident coordinator system for increased accountability, including by the General Assembly and the Economic and Social Council, and forging strategic partnerships for the mobilization of extrabudgetary resources for the system. The Office also provides substantive engagement and liaison with the highest bodies of decision-making of the United Nations and other departments to ensure greater operational coherence in delivering on the mandate of the resident coordinator system. The Assistant Secretary-General is responsible for the management and oversight of the resident coordinator system, including the resident coordinators. There is no change in the number and level of posts in 2026 compared with 2025. The distribution of resources is reflected in tables 1.155 and 1.156.

1.360 The extrabudgetary resources under the present component are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

Global coordination

1.362 Under global coordination, branches and sections of the Development Coordination Office at Headquarters work with entities and mechanisms of the United Nations Sustainable Development Group and the broader United Nations system to improve the strategic and operational coherence of operational activities for development. This is achieved by fostering system-wide approaches for integrated policy priorities that accelerate the implementation of the 2030 Agenda. The branches and sections also provide strategic guidance to United Nations country teams for joint analysis, planning, programming, monitoring and assessment of United Nations Sustainable Development Cooperation Frameworks, as well as guidance for joint communications and advocacy on the Sustainable Development Goals and the advancement of system-wide operational efficiencies. Responsibilities under global coordination are implemented by two branches and two sections: the Policy and Programming Branch, the Resident Coordinator System Leadership Branch, the Country Business Strategies Section and the Communications and Results Reporting Section. There is no change in number and level of posts in 2026 compared with 2025.

1.363 The distribution of resources for global coordination is reflected in tables 1.159 and 1.160.

Regional coordination

1.364 The regional teams of the resident coordinator system provide support for country-level coordination. They focus on day-to-day management and support for coherent and effective delivery of operational activities for development by resident coordinators and United Nations country teams through integrated policy programming and operational support, together with the regional teams of the United Nations Sustainable Development Group and the United Nations regional economic and social commissions. The regional offices of the Development Coordination Office are strategically

positioned to provide tailored and dedicated support to various regions around the world, due to their close proximity to the point of delivery and their direct oversight of a select number of country contexts. There is no change in number and level of posts in 2026 compared with 2025.

1.365 The distribution of resources for regional coordination is reflected in tables 1.161 and 1.162.

Country coordination

1.366 Country coordination consists of the work that resident coordinators undertake with the support of resident coordinator offices in leading a new generation of United Nations country teams and development system support for the implementation of the 2030 Agenda at the country level. This independent, impartial and empowered coordination function operates in full alignment with national priorities, needs and planning frameworks under the ownership and leadership of programme countries, for a coherent, effective, efficient and accountable response to country-specific needs, to maximize the impact of the United Nations support and the sustainability of development results. The proposed staffing for 2026 includes an upward reclassification of the Resident Coordinator/Humanitarian Coordinator post in Nigeria from D-2 to Assistant Secretary-General level; an increase of one post at the Assistant Secretary-General level in Somalia for the Resident and Humanitarian Coordinator function from November 2026, following the anticipated closure of the United Nations Transitional Assistance Mission in Somalia; and an increase of one post at the D-2 level for the Resident and Humanitarian Coordinator function in Iraq from June 2026, following the closure of the United Nations Assistance Mission for Iraq. Previously, the Resident and Humanitarian Coordinator posts in Iraq and Somalia were reflected as cost-shared triple-hatted Deputy Special Representative of the Secretary-General (Resident Coordinator/Humanitarian Coordinator) posts.

1.367 The distribution of resources for country coordination is reflected in tables 1.163 and 1.164 (a) for resources under the special purpose trust fund and in table 1.164 (b) for resources under locally mobilized resources.

Programme support

1.368 Programme support services are provided by the Resident Coordinator System Business Management Branch in the Development Coordination Office, with the overall objective of managing the operations of the resident coordinator system to ensure full accountability for and oversight of the system. The Branch serves as the Executive Office of the Development Coordination Office and provides daily business services and administrative support to the Office at the global level, including on human resources, information technology, finance, travel, procurement and systems platform management. It is responsible for the development and oversight of and reporting on the Office's headquarters budget. The Branch manages the operational relationship with the service providers of the resident coordinator system. It advises and provides backstopping support on business services to the Office's regional desks and resident coordinator offices. It coordinates and oversees resident coordinator system results-based budgeting and regular reporting, including to the General Assembly. It is responsible for financial management and financial reporting on all sources of funds for the resident coordinator system. The Branch is also responsible for policy guidance on management accountability and oversight support for the Office in coordination with other offices within the Secretariat. There is no change in number and level of posts in 2026 compared with 2025.

1.369 The distribution of resources for programme support is reflected in tables 1.165 and 1.166.

XIV. United Nations Youth Office

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.370 The United Nations has long recognized that the imagination, ideals and energy of young people are vital for the continuing development of the societies in which they live. In 1965, in its resolution 2037 (XX), the General Assembly acknowledged the Declaration on the Promotion among Youth of the Ideals of Peace, Mutual Respect and Understanding between Peoples. In 1995, the Assembly adopted the World Programme of Action for Youth to the Year 2000 and Beyond in its resolution 50/81, which provided a policy framework and practical guidelines to improve the situation of young people. In 2007, the Assembly adopted the Supplement to the Word Programme of Action for Youth to the Year 2000 and Beyond in its resolution 62/126, which provided further guidance on promoting the participation of young people in social and economic development. Since 2015, the Security Council, in its resolutions 2250 (2015), 2419 (2018) and 2535 (2020), has called upon all relevant actors to increase the inclusive representation of young people in the prevention and resolution of conflict, including when negotiating and implementing peace agreements.

1.371 In 2013, the Secretary-General appointed the first Envoy on Youth. In 2018, to strengthen the coordination and accountability of the United Nations system with regard to its work on young people, the Secretary-General launched the United Nations Youth Strategy. The General Assembly, in its resolution 76/306, decided to establish the United Nations Youth Office as a dedicated office for youth affairs in the Secretariat, integrating the Office of the Secretary-General's Envoy on Youth. On 27 October 2023, the Secretary-General appointed the first-ever Assistant Secretary-General for Youth Affairs to lead the Office, representing the youngest serving Assistant Secretary-General in the history of the Organization. The mandate derives from the priorities established in relevant resolutions and decisions of the Assembly and the Security Council, including Assembly resolutions 50/81, 62/126, 76/306, 77/336 and 78/179 and Council resolutions 2250 (2015), 2419 (2018) and 2535 (2020).

Programme of work

Objective

1.372 The objective, to which the Office contributes, is to ensure the meaningful engagement and leadership of young people in the work of the United Nations and accelerated action at the global, regional and country levels to empower young people, promote their rights and address their needs.

Strategy and external factors for 2026

1.373 To contribute to the objective, the Office will:

(a) Lead engagement and advocacy for the advancement of youth issues across the United Nations in the areas of peace and security, sustainable development and human rights, through engagement with Member State representatives, principals of United Nations organs and senior management of United Nations entities, and in close consultation with young people;

(b) Promote meaningful, inclusive and effective engagement of young people and of youth-led and youth-focused organizations in the work of the United Nations, in close collaboration with United Nations system entities;

(c) Encourage greater United Nations system-wide collaboration, coordination and accountability on the advancement of youth issues, including United Nations support to Member States, as appropriate and upon request, in promoting the effective and meaningful engagement, participation and empowerment of young people;

(d) Engage with youth-focused envoys, representatives and offices of regional organizations on advancing youth issues;

(e) Propose innovative approaches to advance multi-stakeholder initiatives on the engagement and empowerment of young people, for the consideration of Member States, including on quality and inclusive education, decent jobs, skills development, digital transformation and youth-led innovation and solutions;

(f) Promote and facilitate intergenerational and intercultural dialogue, collaboration and solidarity by creating opportunities for young people to not only share and collaborate among one other, but also engage with Member States, the private sector, academia and the United Nations, including through intergovernmental policy forums;

(g) Support efforts to enhance youth representation at the United Nations, including through increasing and improving the conditions of internships and employment opportunities for young people, especially for those from developing countries and with due regard to gender balance;

(h) Support efforts towards the mobilization of financial and technical support and investment to promote and upscale quality and inclusive education and training, skills development, capacity-building and bridging the digital divide, in tandem with job creation, for young people and creating an enabling environment for harnessing their talents and abilities to contribute to their societies;

(i) Conduct outreach to young people and to youth-led and youth-focused organizations, through innovative means, including the use of social media, narrative storytelling and audiovisual content, with an emphasis on the creation of multilingual assets and templates, where possible, for global dissemination through United Nations country teams and United Nations information centres.

1.374 The above-mentioned work is expected to result in:

(a) Meaningful youth engagement being systematically integrated into governance structures, policymaking and decision-making processes at the intergovernmental, regional and national, levels;

(b) Strengthened coherence, accountability and collaboration on youth issues across the United Nations system;

(c) Enhanced mechanisms and increased investments being made available to support socioeconomic opportunities for young people, across social, economic and environmental priorities at the global, regional and national levels.

1.375 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States continue to support the advancement of the situation of young people, including in the implementation of relevant international frameworks and agreements;

(b) Sustained recognition by the global community of the important role that young people play in the promotion of peace and security, sustainable development and human rights;

(c) There is adequate allocation of resources for action on young people and meaningful youth engagement across the United Nations system and national, regional and global institutions.

1.376 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will collaborate with regional and national youth envoys and regional organizations. It will also prioritize the forging of new relationships and the strengthening of existing ones with relevant youth organizations, civil society organizations, academia and the private sector.

1.377 With regard to inter-agency coordination and liaison, the Office will continue to mobilize United Nations entities and United Nations country teams for improved coordination, collaboration and accountability on youth work across the United Nations system. It will collaborate with the Department of Global Communications and other United Nations entities through the management of a dedicated youth-focused communications group. It will also work with the Department of Management Strategy, Policy and Compliance, the Department of Operational Support and other members of the United Nations Youth Strategy task team to improve internships and employment opportunities across the United Nations system. It will partner with relevant United Nations entities, as mandated, on meaningful youth participation in major intergovernmental meetings, to promote socioeconomic opportunities for young people and to reduce the digital divide. As part of the efforts to strengthen the youth, peace and security agenda, the Office will continue its collaboration with the Department of Political and Peacebuilding Affairs and the United Nations Population Fund, as well as with OHCHR and other relevant entities on young people's political participation and protection issues. The Office will also contribute regularly to the work of various inter-agency working groups and will provide secretariat support to the inter-agency High-level Steering Committee and joint working group responsible for advancing coherent action by the United Nations system on youth-related matters.

1.378 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate, by ensuring the meaningful participation of girls and young women in United Nations processes and intergovernmental decision-making, facilitating intergenerational discussions on women's leadership, promoting the integration of a gender perspective into youth inclusion and youth-led action and by promoting discussions on sexual and reproductive health and rights as an integral part of the youth agenda.

1.379 In line with the United Nations Disability Inclusion Strategy and guided by the Office's research findings and recommendations on young people with disabilities, the Office will advocate for meaningful participation of young persons with disabilities in the work of the United Nations and beyond. In consultation with young people with disabilities and their networks and organizations, the Office will mainstream disability inclusion into all aspects of its work, with the aim of ensuring accessibility to opportunities, information and events, to the greatest extent possible.

Evaluation activities

1.380 The first interim review of the United Nations Youth Strategy, conducted by the Office and completed in 2024, has guided the proposed programme plan for 2026.

1.381 In response to the results of the evaluation referenced above, the Office coordinated, together with the Youth2030 Joint Working Group, the development of strategic priorities for the second phase of the Strategy (2025–2030).

Programme performance in 2024

Progress in youth engagement at the Summit of the Future

1.382 On 20 September 2024, the Youth Action Day, held during the Summit of the Future, highlighted young people's leadership in driving global commitments and translating the Pact for the Future into action. Convened by the Office in collaboration with United Nations entities, civil society and youth networks, the event engaged 2,447 registered participants under the age of 30, making it the largest youth gathering in United Nations history. Anchored in chapter IV of the Pact for the Future and in the Declaration on Future Generations, the event served to amplify youth voices, fostered intergenerational dialogue and strengthened accountability for commitments. It culminated in an outcome document in which over 20 recommendations across three principles were outlined, namely, inclusion, equity and trust, and six key themes: gender equality, technology and digital infrastructure, intergenerational solidarity and equity, climate and environmental sustainability, governance, and

humanitarian action. Through those efforts, young people were positioned as co-creators in shaping global policy and the future.

1.383 Progress towards the objective is presented in the performance measure below (see table 1.167).

Table 1.167
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Significant advancement towards mainstreaming meaningful youth participation in policymaking and decision-making spaces at all levels, as reflected in the Pact for the Future

Planned results for 2026

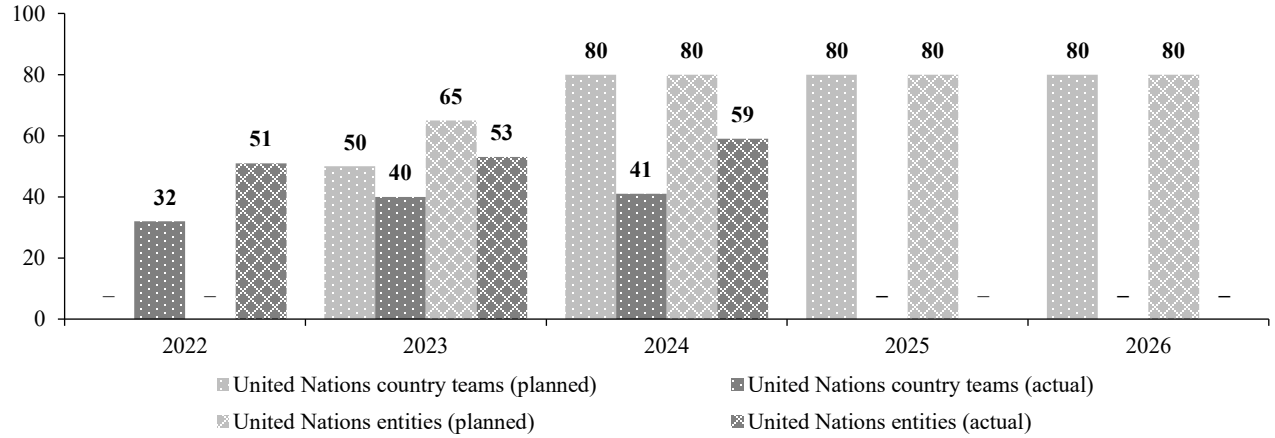
Result 1: strengthened system-wide action for and with young people to address their needs, amplify their voices and advance their meaningful engagement

Programme performance in 2024 and target for 2026

1.384 The Office's work contributed to 41 per cent of United Nations country teams and 59 per cent of United Nations entities achieving a "green" performance rating for at least 80 per cent of all key performance indicators in the United Nations Youth Strategy scorecard in 2024, which did not meet the planned targets of 80 per cent. The targets were not met owing to gaps in integrating the youth agenda into United Nations strategic frameworks and a lack of institutional mechanisms for tracking youth-related investments.

1.385 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 1.XXXVIII).

Figure 1.XXXVIII
Performance measure: percentage of United Nations country teams and United Nations entities that achieved a "green" performance rating for at least 80 per cent of all key performance indicators in the United Nations Youth Strategy scorecard[a]



[a] The scorecard covers 18 key performance indicators for United Nations entities and 19 for United Nations country teams relating to United Nations Youth Strategy priority areas. A "green" performance rating for a key performance indicator indicates achievement of the established milestone.

Result 2: youth engagement at all levels: moving from quantity to quality

Programme performance in 2024 and target for 2026

1.386 The Office's work contributed to the participation of young people, United Nations entities and Member States in consultations on key principles for meaningful youth engagement in the context of the Summit of the Future, which met the planned target.

1.387 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.168).

Table 1.168
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	United Nations entities and country teams tracked indicators on meaningful youth engagement in their accountability scorecards on an annual basis	Young people, Member States and United Nations system entities participated in consultations on the key principles for meaningful youth engagement	Member States consider a global standard for meaningful youth engagement	Principles for meaningful youth participation widely adopted by Member States, United Nations entities and other stakeholders when engaging young people in intergovernmental processes

Result 3: towards a global youth investment platform to scale up youth-related programming

Proposed programme plan for 2026

1.388 In the Pact for the Future, Member States stressed the importance of investing in, and ensuring equitable access to, essential services for all children and young people to advance their social and economic development. To fulfil their full potential and secure decent, productive work and quality employment, young people must have access to safe, inclusive, equitable and quality education opportunities, including in emergencies, throughout their lives that equip them with the knowledge, skills and capabilities they need to thrive in a rapidly changing world.

Lessons learned and planned change

1.389 The lesson for the Office was the need to strengthen access to sustainable and coordinated financing for youth-focused and youth-led initiatives. In applying the lesson, the Office will work towards the establishment of a global youth investment platform to attract and better finance youth-related programming at the country level, in line with paragraph 60 (a) of the Pact for the Future. The platform will be aimed at addressing funding gaps, strengthening coordination and ensuring that investments are inclusive, equitable and aligned with the needs of young people. The Office will engage in system-wide consultations to develop the concept for the platform and the options for its operationalization for the consideration of Member States.

1.390 Expected progress towards the objective is presented in the performance measure below (see table 1.169).

Table 1.169
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	The need to invest in the social and economic development of children and young people was highlighted in the Pact for the Future (action 34)	Youth networks and United Nations entities collaborate to develop a proposal for a global youth investment platform	Member States consider the Secretary-General's proposal for the establishment of a global youth investment platform

Legislative mandates

1.391 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

50/81	World Programme of Action for Youth to the Year 2000 and Beyond	76/306	Establishment of the United Nations Youth Office
62/126	Policies and programmes involving youth: youth in the global economy – promoting youth participation in social and economic development	77/336	Model United Nations
		78/179	Policies and programmes involving youth
		79/1	The Pact for the Future

Security Council resolutions

2250 (2015)	2535 (2020)
2419 (2018)	

Deliverables

1.392 Table 1.170 lists all deliverables of the programme.

Table 1.170
United Nations Youth Office: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**16**	**4**	**18**	**21**
9. Training events for young people (including the Young Leaders for the Sustainable Development Goals)	1	1	1	6
10. Training events and workshops for United Nations entities on the United Nations Youth Strategy	15	3	15	5
11. Training sessions for young people on meaningful youth participation in peace and security-related processes	–	–	2	2
12. Training sessions for young people on meaningful youth engagement in United Nations intergovernmental processes	–	–	–	8
Publications (number of publications)	**2**	**2**	**2**	**2**
13. Progress report on the implementation of the United Nations Youth Strategy	1	1	1	1
14. Research report on young people with disabilities	1	1	–	–
15. Research report on the meaningful participation of young people	–	–	1	1
Technical materials (number of materials)	**4**	**3**	–	**4**
16. Guidance on scorecards for United Nations country teams and United Nations entities on the United Nations Youth Strategy	1	1	–	1
17. Action guide for implementation of the United Nations Youth Strategy	1	1	–	1
18. Guidance for monitoring system-wide efforts on young people	1	1	–	1
19. Toolkit for young people briefers on engagement with United Nations bodies and mechanisms on peace and security	1	–	–	1

C. Substantive deliverables

Consultation, advice and advocacy: Regular briefings with Member States, including country visits and bilateral meetings with ministers responsible for young people and other high-level government officials; consultations with national and regional youth envoys; annual strategic meeting of the high-level steering committee of the United Nations Youth Strategy; and advocacy and policy round tables on enhancing youth representation at the United Nations.

Databases and substantive digital materials: United Nations Youth Strategy scorecard reporting system and dashboard; and United Nations Youth Strategy online toolkit platform.

D. Communication deliverables

Outreach programmes, special events and information materials: Commemoration of International Youth Day, including support for partner advocacy campaigns, World Youth Skills Day and other relevant international days and observances; communications relating to the Young Leaders for the Sustainable Development Goals; publications and reports of the United Nations Youth Office; and advocacy and communications campaigns on meaningful youth engagement, system-wide coordination and accountability, socioeconomic opportunities for young people and other flagship initiatives of the Youth Office.

Digital platforms and multimedia content: United Nations Youth Office website, social media accounts and the Youth2030 Pulse newsletter, with regular updates on issues relevant to young people; and social media takeover campaigns and collaborative campaigns with youth and youth-led networks.

B. Proposed post and non-post resource requirements for 2026

Overview

1.393 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.171 to 1.173.

Table 1.171
Evolution of financial resources by object of expenditure
(Thousands of United States dollars)

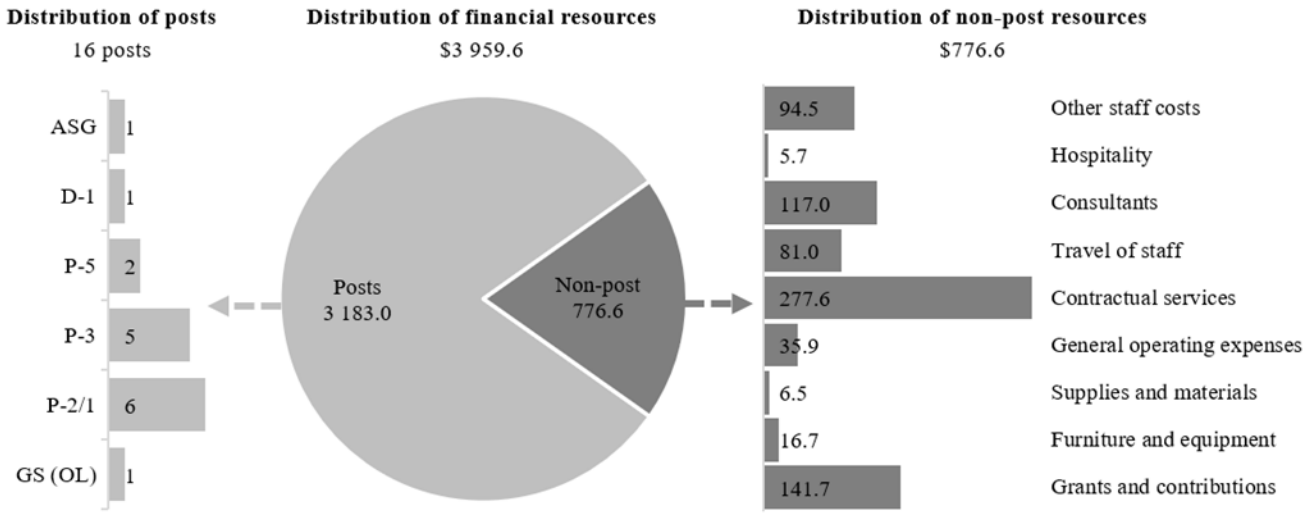
Figure 1.XXXIX
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Extrabudgetary resources

1.396 As reflected in tables 1.174 (2) and 1.175 (2), extrabudgetary resources amount to $576,300. The non-post resources would complement regular budget resources and support the delivery of

mandates, including supporting meaningful youth engagement and enhancing meaningful youth participation in decision-making processes.

1.397 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.398 Information on the timely submission of documentation and advance booking of air travel is reflected in table 1.177. The Office will strengthen its efforts to ensure the advance booking of tickets in line with the advance booking of air travel policy and to improve its compliance rate.

XV. Office of Data Protection and Privacy

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.399 The Office of Data Protection and Privacy was established pursuant to General Assembly resolution 78/252 as an independent office responsible for assisting the Secretariat in ensuring respect for data protection and privacy in the use and processing of personal data by Secretariat entities, consistent with United Nations mandates. The right to privacy in contemporary international law is enshrined in multiple international frameworks, including article 12 of the Universal Declaration of Human Rights and article 17 of the International Covenant on Civil and Political Rights. The Assembly has continued to consider this issue actively, including through its resolution 77/211 and preceding resolutions, by which it reaffirmed the right to privacy in the digital age, and its resolution 78/265, in which it advocated for the safeguard of privacy and the protection of personal data as part of promoting safe, secure and trustworthy artificial intelligence systems.

1.400 In furtherance of relevant resolutions and decisions of the General Assembly, the Secretary-General promulgated a bulletin by which he established a data protection and privacy policy for the Secretariat (ST/SGB/2024/3). The Office contributes to the effective implementation of data protection and privacy standards, in line with that policy, and to fostering a culture of data protection and privacy awareness across the Secretariat.

Programme of work

Objective

1.401 The objective, to which the Office contributes, is to ensure that, when personal data are processed by United Nations Secretariat entities, such processing is consistent with United Nations mandates and in a manner that respects the rights of individuals and groups.

Strategy and external factors for 2026

1.402 To contribute to the objective, the Office will:

(a) Provide independent and impartial advice and support to the Secretary-General and United Nations Secretariat entities on the measures to be taken to ensure compliance with the data protection and privacy rules, regulations, processes and policies of the Secretariat;

(b) Provide assistance to entities, for example, to fulfil requests made by individuals about their personal data to ensure implementation and compliance with relevant data protection and privacy rules, regulations, processes and policies in relation to personal data that are shared across entities, including through Secretariat-wide enterprise systems, or that otherwise relate to several entities;

(c) Establish and maintain a reporting mechanism for receiving and disseminating requests made by individuals about their personal data;

(d) Monitor and report to the Secretary-General on compliance with data protection and privacy rules, regulations, processes and policies of the Secretariat;

(e) Foster a culture of data protection and privacy awareness across the Organization.

1.403 The above-mentioned work is expected to result in:

(a) A workplace culture that recognizes the importance of data protection and privacy across the Secretariat;

(b) Effective prevention, identification and mitigation of data protection and privacy risks across the Organization;

(c) Increased transparency and accountability in the Organization's data protection and privacy practices.

1.404 With regard to the external factors, the overall plan for 2026 is based on the following assumptions:

(a) United Nations Secretariat entities adopt data protection and privacy standards, in line with the data protection and privacy policy;

(b) United Nations Secretariat entities build dedicated capacity to ensure that personal data are processed appropriately and respect the rights of individuals and groups.

1.405 With regard to inter-agency coordination and liaison, the Office will participate in inter-agency networks, as appropriate, to share best practices and advance common practices for data protection and privacy system-wide.

1.406 The Office integrates a gender perspective into its operational activities, deliverables and results. The Office will identify any systemic issues concerning gender inequality in the Organization's operations as regards data protection and privacy aspects. The Office will also provide gender statistics, where relevant and appropriate.

1.407 In line with the United Nations Disability Inclusion Strategy, the Office will ensure that it takes into account the needs of persons with disabilities, both in the accessibility of its services and in its support for the implementation of the data protection and privacy requirements within the Organization. The Office will, in particular, work to ensure that any relevant content, including information conveyed online such as through privacy notices and forms, contains accessibility features that benefit persons with disabilities.

Programme performance in 2024

Progress in the protection of personal data and privacy at the Secretariat through the promulgation of an overarching data protection and privacy policy

1.408 Ensuring the responsible use of personal data within the Organization is a priority of the Secretary-General. In March 2024, following the establishment of the Office of Data Protection and Privacy pursuant to General Assembly resolution 78/252, the Secretary-General promulgated a bulletin in which he established an overarching data protection and privacy policy for the Secretariat (ST/SGB/2024/3). The policy represents a significant milestone in data protection and privacy at the Secretariat, as it strengthens the Organization's approaches in that area by aligning them with international best practices while addressing the recommendation of the Board of Auditors, issued in 2021, to expedite the development of a comprehensive data protection and privacy policy (A/77/5 (Vol. I), chap. II, para. 587). The promulgation of the policy is also integral to the Organization's broader efforts to achieve a more agile, responsive and resilient United Nations, as referenced in paragraph 73 (a) of the Pact for the Future.

1.409 Progress towards the objective is presented in the performance measure below (see table 1.178).

Table 1.178
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Promulgation of the Secretary-General's bulletin on a data protection and privacy policy for the Secretariat (ST/SGB/2024/3)

Planned results for 2026

Result 1: increased data protection and privacy across the Secretariat

Programme performance in 2024 and target for 2026

1.410 The Office's work contributed to the promulgation of ST/SGB/2024/3, which met the planned target.

1.411 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 1.179).

Table 1.179
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Promulgation of the bulletin of the Secretary-General on a data protection and privacy policy for the Secretariat (ST/SGB/2024/3)	Personnel have access to additional information and resources regarding data protection and privacy in the Organization	Strengthened coherence and consistency in the application of data protection and privacy standards across the Organization

Result 2: optimized business processes to integrate and ensure compliance with the data protection and privacy policy across the Organization

Proposed programme plan for 2026

1.412 While the promulgation of the data protection and privacy policy was a critical first step in strengthening the Organization's approaches in that regard, ensuring effective compliance with data protection and privacy standards remains a multidimensional endeavour, with implications across not only policy, but also business processes.

Lessons learned and planned change

1.413 The lesson for the Office was that the effective implementation of the policy requires dedicated mechanisms to integrate data protection and privacy compliance considerations into the Organization's structure and business processes. In applying the lesson, the Office will establish strategic partnerships with key internal stakeholders, such as the Office of Information and Communications Technology, the Office of Legal Affairs, the Department of Management, Strategy, Policy and Compliance, and the Department of Operational Support, and oversee the revision of existing business processes and the development of dedicated mechanisms to ensure effective and sustained compliance in relation to data protection and privacy across the Organization.

1.414 Expected progress towards the objective is presented in the performance measure below (see table 1.180).

Table 1.180
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	Support mechanisms are established and operationalized in the Secretariat in order to facilitate timely and effective assistance by the Office to entities and individuals	Key business processes that are essential for integrating data protection and privacy compliance considerations across the Organization are identified

Legislative mandates

1.415 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

77/211; 79/175	The right to privacy in the digital age	78/265	Seizing the opportunities for safe, secure and trustworthy artificial intelligence systems for sustainable development
78/252	Questions relating to the proposed programme budget for 2024		

Deliverables

1.416 Table 1.181 lists all deliverables of the programme.

Table 1.181
Office of Data Protection and Privacy: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

XVI. Office for Digital and Emerging Technologies

A. Proposed programme plan for 2026

Overall orientation

Mandates and background

1.421 In an age of increasing digital interdependence, the General Assembly has long recognized that effective cooperation on technology issues is an indispensable component of addressing the new challenges and opportunities posed by an increasingly digitalized world, inter alia, in resolutions 56/183, 70/1, 70/125, 75/1, 78/132 and 78/160, including as a key driver for the implementation of the 2030 Agenda. The position of Envoy of the Secretary-General on Technology was established in 2021 to advise the senior leadership of the United Nations on key trends in technology, so as to guide the strategic approach taken by the Organization on such issues, to serve as an advocate and focal point for digital cooperation so that Member States, the technology industry, civil society and other stakeholders would have a first port of call for the broader United Nations system, and to facilitate multi-stakeholder policy dialogue on emerging technologies (see A/74/821). The establishment of the Office of the Envoy of the Secretary-General on Technology was noted by the Assembly in its resolution 75/316.

1.422 Through the adoption of the Global Digital Compact (resolution 79/1, annex I), the General Assembly requested the Secretary-General, following consultations with Member States, to submit a proposal to the Assembly for the establishment of an office, building on and incorporating the existing activities and resources of the existing Office of the Envoy of the Secretary-General on Technology, to facilitate system-wide coordination, working closely with existing mechanisms. In its resolution 79/258 A, the Assembly approved the establishment of the Office for Digital and Emerging Technologies and its operational functions.

Programme of work

Objective

1.423 The objective, to which the Office contributes, is to ensure that cooperation on technology governance is advanced for a better future.

Strategy and external factors for 2026

1.424 To contribute to the objective, the Office will:

(a) Advise the senior leadership of the United Nations on key trends in technology, so as to guide the strategic approach taken by the Organization on such issues;

(b) Serve as an advocate and focal point for digital cooperation, through engagement with Member States, the technology industry, civil society and other stakeholders;

(c) Facilitate multi-stakeholder policy dialogue on digital and emerging technology issues;

(d) Strengthen system-wide coordination within and across the United Nations system on digital and emerging technology issues;

(e) Support the follow-up and implementation of the Global Digital Compact.

1.425 The above-mentioned work is expected to result in:

(a) More inclusive and effective cooperation at all levels on digital and emerging technology issues;

(b) Strengthened coherence within and across the United Nations system on digital and emerging technology issues;

(c) Enhanced implementation of the Global Digital Compact.

1.426 With regard to the external factors, the overall plan for 2026 is based on the following assumptions:

(a) Member States continue to engage in constructive dialogue and cooperation on digital and emerging technology issues at the global and regional levels;

(b) Adequate extrabudgetary resources are available to ensure meaningful engagement across the United Nations system, and with national, regional and global institutions and organizations.

1.427 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will collaborate with global and regional organizations, such as the World Bank, the African Union, the European Union and the Organisation for Economic Co-operation and Development. The Office will also prioritize the forging of new relationships and the strengthening of existing ones with relevant civil society organizations, academia and the private sector.

1.428 With regard to inter-agency coordination and liaison, the Office will strengthen system-wide coordination within and across the United Nations system on digital and emerging technology issues, with the aim of promoting collective synergies and messaging on such issues and more effective use of resources across the United Nations system. Such activities include serving as Co-Chair of the Working Group on Digital Technologies with the International Telecommunication Union; and facilitating more frequent, intensive engagement and systematic follow-up on joint efforts, and strengthening coordination within and between the processes for the implementation of the Global Digital Compact and for the 20-year review of the World Summit on the Information Society, as well as other United Nations processes, such as the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals, and coordination with the Technology Bank for the Least Developed Countries. The Office will continue to partner with and connect other United Nations system and non-United Nations entities through joint programming towards the Office's objective. It will also step up engagement with the regional economic commissions, the Development Coordination Office and the resident coordinator system to provide guidance on best practices regarding digital transformation for use by Member States, and for connecting to regional, national and local networks in support of implementation of the Global Digital Compact.

1.429 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate, including by advocating for the meaningful participation of girls and young women in relevant United Nations processes, and by incorporating a gender perspective on digital and emerging technology issues in multi-stakeholder policy dialogues facilitated by the Office.

1.430 In line with the United Nations Disability Inclusion Strategy, the Office will advocate for the meaningful participation of persons with disabilities in relevant United Nations processes and incorporate the perspectives of persons with disabilities on digital and emerging technology issues in multi-stakeholder policy dialogues facilitated by the Office. The Office will aim to ensure accessibility for persons with disabilities to information produced and events organized by the Office, to the greatest extent possible.

Result 1: strengthened multi-stakeholder commitment to the Global Digital Compact

Proposed programme plan for 2026

1.431 At the Summit of the Future in 2024, the General Assembly adopted the Global Digital Compact, which serves as a comprehensive global framework for digital cooperation with the goal of an inclusive, open, sustainable, fair, safe and secure digital future for all. The Office has encouraged and enabled international and regional organizations, the private sector, academia, the technical community and civil society groups to engage actively in the Compact's implementation. These actions will broaden and deepen efforts to realize the Compact's objectives, with voluntary endorsements serving as an indicator of the extent of stakeholder alignment with the Compact's

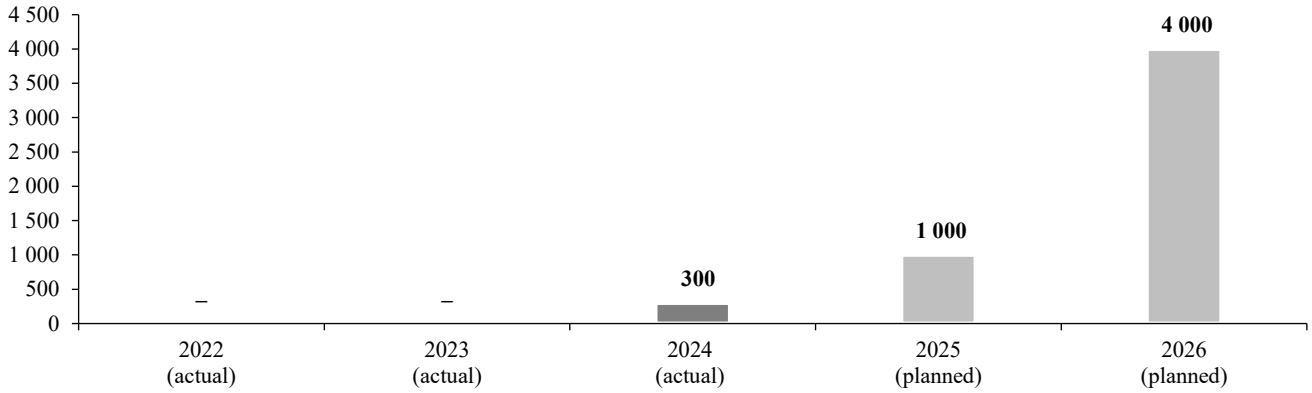
vision and commitments through the high-level review of the Global Digital Compact to be held during the eighty-second session of the Assembly.

Lessons learned and planned change

1.432 The lesson for the Office was that endorsement modalities require continuous stakeholder engagement and thorough vetting, which can be resource-intensive. Following the Summit of the Future and the adoption of the Global Digital Compact, the Office swiftly established an endorsement modality in accordance with paragraph 66 of the Global Digital Compact. Through open calls to international and regional organizations, the private sector, academia, the technical community and civil society groups, the modality quickly gained significant traction. However, due to the open nature of the modality, each submission requires careful vetting, which places a considerable demand on available resources. In applying the lesson, the Office will adapt the endorsement modality to reduce the burden, such as through semi-automated filtering and improved internal processes and workflows.

1.433 Expected progress towards the objective is presented in the performance measure below (see figure 1.XLI).

Figure 1.XLI
Performance measure: number of endorsements of the Global Digital Compact (cumulative)



Legislative mandates

1.434 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

75/316; 77/320	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets	79/1, annex I	Global Digital Compact
		79/258 A	Special subjects relating to the proposed programme budget for 2025
78/311	Enhancing international cooperation on capacity-building of artificial intelligence		

Deliverables

1.435 Table 1.189 lists all deliverables of the programme.

Table 1.189
Office for Digital and Emerging Technologies: deliverables for the period 2024–2026, by category and subcategory

Publications (number of publications)	–	–	**2**	**2**
8. Update of the digital public infrastructure safeguards framework	–	–	1	1
9. Publication on the implications of emerging technologies, such as in the areas of energy and labour markets, and the interface with digital public infrastructure	–	–	1	1
Technical materials (number of materials)	–	–	**8**	**16**
10. Guidance on digital transformation for United Nations senior leadership, including resident coordinators and the regional economic commissions	–	–	2	10
11. Implementation mapping of the Global Digital Compact	–	–	1	1
12. Technical materials required as part of support to United Nations intergovernmental and multi-stakeholder processes on digital and emerging technologies	–	–	5	5

C. Substantive deliverables

Consultation, advice and advocacy: 50 substantive meetings with United Nations senior leadership to provide advice on key trends in technology; three briefings for all Member States on topics related to digital and emerging technology issues; five country visits and bilateral meetings with ministers responsible for information technology and digital cooperation; 40 substantive meetings with technology industry stakeholders and leaders; 20 substantive meetings with civil society; 20 substantive meetings with academia; working groups on digital public infrastructure safeguards; co-chairing the Working Group on Digital Technologies; and advice to United Nations intergovernmental and multi-stakeholder processes on digital and emerging technologies, as required.

Databases and substantive digital materials: endorsement modality for the Global Digital Compact; interactive knowledge resource on the digital public infrastructure safeguards framework.

D. Communication deliverables

Outreach programmes, special events and information materials: Open Source Programme Offices for Good Conference; special events on topics related to digital and emerging technology issues at the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the Internet Governance Forum, and at the high-level political forum on sustainable development and during the high-level week of the General Assembly.

Digital platforms and multimedia content: websites and social media accounts maintained by the Office.

B. Proposed post and non-post resource requirements for 2026

Overview

1.436 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.190 to 1.192.

1.437 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.193 to 1.195 and figure 1.XLII.

1.438 As shown in tables 1.193 (1) and 1.194 (1), the overall resources proposed for 2026 amount to $1,898,500, reflecting an increase of $275,300 (or 17.0 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments and from new or expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

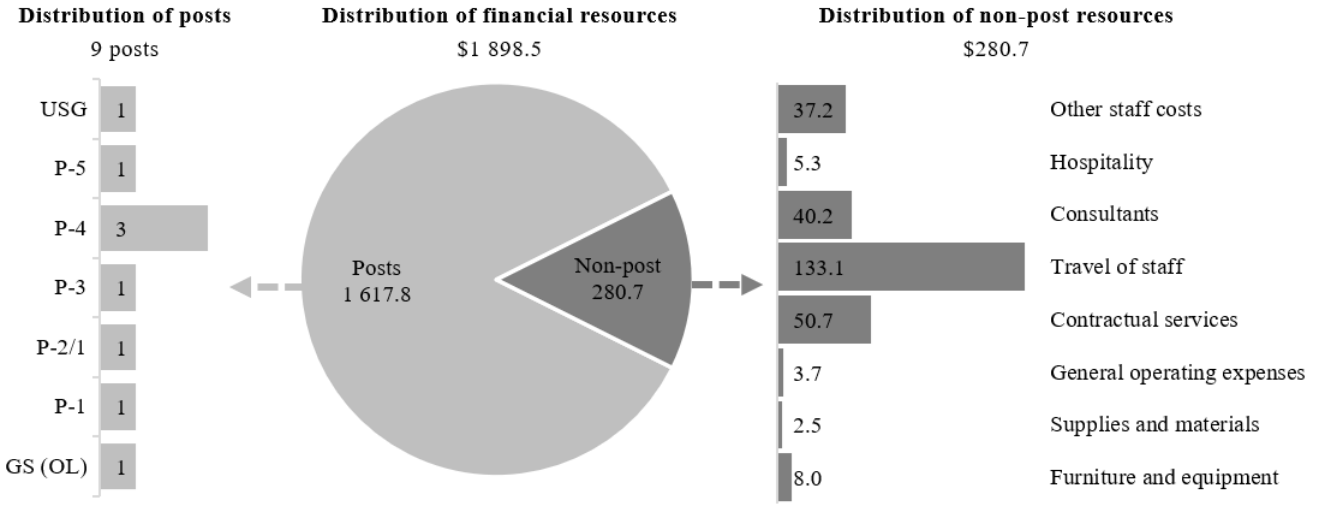
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Technical adjustments

1.439 As shown in table 1.193 (1), resource changes reflect a decrease of $65,700, relating to the removal of non-recurrent provisions under consultants associated with time-bound specialized projects in 2025.

New and expanded mandates

1.440 As shown in tables 1.193 (1) and 1.194 (1), resource changes reflect an increase of $341,000, owing to the proposed establishment of three Programme Management Officer posts (2 P-4 and 1 P-3), in accordance with General Assembly resolutions 79/1 and 79/258 A (see annex II to the present report).

Extrabudgetary resources

1.441 As reflected in tables 1.193 (2) and 1.194 (2), extrabudgetary resources amount to $526,100. The resources would complement regular budget resources and would be used mainly to provide for two posts (1 P-4 and 1 P-2/1) and non-post resources that would be used to support the delivery of mandates, including advancing cooperation on technology governance.

1.442 The extrabudgetary resources under the present section are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

1.443 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.196.

XVII. United Nations Alliance of Civilizations

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1.444 The United Nations Alliance of Civilizations was established in 2005, as an initiative of the Secretary-General, to explore the root causes of polarization within and between societies and to recommend a programme of action, including through the promotion of intercultural and interreligious dialogue to build bridges of understanding. The Alliance aims to foster understanding and cooperation across cultures and religions and to counter polarization and extremism.

1.445 The General Assembly, through its resolutions 64/14 and 69/312, expressed its support for the work of the Alliance and reiterated its valuable role in promoting greater understanding and respect among civilizations, cultures, religions and beliefs.

1.446 In its resolution 78/264, the General Assembly requested the Secretary-General to appoint a United Nations Special Envoy to combat Islamophobia. Subsequently, in its resolution 79/258 B, the Assembly approved the conversion of the post of High Representative for the United Nations Alliance of Civilizations (Under-Secretary-General), previously funded from extrabudgetary resources, to regular budget funding under the Alliance under section 1. The post would serve a dual role as High Representative for the United Nations Alliance of Civilizations and the United Nations Special Envoy to combat Islamophobia.

Programme of work

Objective

1.447 The objective, to which the Alliance contributes, is to improve understanding and cooperation among nations and peoples across cultures and religions and to reduce polarization at the local and global levels.

Strategy and external factors for 2026

1.448 To contribute to the objective, the Alliance will:

(a) Promote interreligious and intercultural dialogue, including dialogue among civilizations;

(b) Design and implement peace education initiatives aimed at equipping young people with the critical thinking skills and competencies needed to play an active and positive role in issues of peace and security and in preventing violent extremism and radicalization;

(c) Provide a grant funding mechanism, capacity-building support and mentorship for young people and for civil society organizations that implement projects related to intercultural and interfaith dialogue, particularly in areas affected by identity-based conflict, with a view to combating intolerance and stereotyping on the grounds of religion or belief;

(d) Facilitate dialogues to build stronger partnerships and promote the voices of young people and of civil society at large, including faith actors and grass-roots organizations, thereby fostering mutual understanding and collaboration across divides;

(e) Reinforce synergies with international organizations that work for the integration of migrant communities and promote the role of municipalities and cities in building inclusive and resilient societies;

(f) Develop initiatives that serve to train young people in multimedia storytelling and video production and facilitate collaborative media projects that unite young creators from different cultural and religious backgrounds, with an emphasis on the creation of content that changes the narrative around migrants and promotes tolerance, respect, dialogue and cooperation;

(g) Promote the role and contribution of women as peace mediators, including through the Women's Alliance for Peace initiative and through intercultural and interreligious mediation training aimed at women leaders in conflict contexts;

(h) Identify, showcase and promote the role of religious leaders and faith-based organizations engaged in interreligious mediation;

(i) Develop, support and participate in global communication, advocacy and programming initiatives aimed at amplifying the message of inclusion and peace through sports;

(j) Collaborate with arts institutions, cultural organizations and educational institutions to integrate arts into broader advocacy efforts aimed at promoting tolerance, respect, dialogue and cooperation;

(k) Engage with United Nations entities for a comprehensive and coordinated approach to addressing and responding to Islamophobia, antisemitism and other forms of intolerance on the basis of religion and belief;

(l) Conduct briefings for Member States to highlight the nexus between religious intolerance and human rights, and to contribute to efforts towards the effective development of system-wide responses to all forms of religious intolerance;

(m) Organize tailored institutional events focused on trends in Islamophobia to provide a platform for a multi-stakeholder approach, including Member States, relevant United Nations entities, media providers, civil society and faith actors, in combating Islamophobia;

(n) Engage in dialogue on Islamophobia with State and non-State actors, in order to address the root causes and explore possible solutions and good practices to address Islamophobia;

(o) Engage with Member States and relevant stakeholders to assist, as appropriate, in the implementation of the recommendations contained in the United Nations Plan of Action to Safeguard Religious Sites, including carrying out the "#forSafeWorship" communication campaign; raising the awareness of the international community and the general public about the universality of religious sites; and issuing press statements in condemnation of attacks on worshippers, acts of violence, and attacks on and destruction of religious places, sites and shrines, which are in violation of international law, in both conflict and non-conflict situations;

(p) Engage with relevant United Nations entities and agencies on the implementation of the recommendations contained in the United Nations action plan to enhance the monitoring of and response to antisemitism, including the convening of relevant stakeholders (Member States, regional and international organizations, and Jewish organizations and communities) to explore good practices to respond to antisemitism.

1.449 The above-mentioned work is expected to result in:

(a) Enhanced social stability and an environment conducive to peace and mutual understanding;

(b) Advancement of intercultural and interreligious dialogue, and a culture of peace and mutual respect;

(c) Improved action by Member States and non-State actors in addressing the root causes of all forms of religious intolerance, xenophobia and discrimination on the basis of religion, belief or ethnicity.

1.450 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Governments have the political commitment and dedicate resources to accelerate action to prevent conflicts and address the root causes of all forms of religious intolerance;

(b) Civil society, faith-based organizations, local communities, the private sector and media are committed to working together to advance intercultural and interreligious dialogue;

(c) Personnel, at all levels, prioritize addressing all forms of religious intolerance within United Nations operations.

1.451 With regard to cooperation with other entities at the global, regional, national and local levels, the Alliance of Civilizations will continue to garner the support of Member States for the advancement of intercultural and interreligious dialogue, a culture of peace and mutual respect, and for the reinforcement of partnerships with regional and subregional actors for the practical implementation of its activities, including with the European Union, the League of Arab States, the Organization of Islamic Cooperation, the Organization of American States, the Council of Europe, the Black Sea Economic Cooperation Organization, the Organization for Security and Cooperation in Europe, the International Organization of Turkic Culture and the Union for the Mediterranean. In addition, the Alliance will continue to work closely with non-State actors, namely civil society, young people, local communities, faith actors, academic institutions, the media, research institutes and the private sector, to build capacity and raise awareness of the role of intercultural and interreligious dialogue in conflict prevention and addressing the root causes of all forms of religious intolerance, xenophobia and discrimination on the basis of religion, belief or ethnicity.

1.452 With regard to inter-agency coordination and liaison, the Alliance will continue to co-chair the United Nations Inter-Agency Task Force on Religion and Sustainable Development and engage its multi-faith advisory council; act as Vice-Chair of the Working Group on Preventing and Countering Violent Extremism Conducive to Terrorism; and lead the establishment and the activities of a United Nations working group to monitor, evaluate and assess the impact of policies and measures to address antisemitism on a regular basis. In addition, the Alliance will continue to strengthen its cooperation with the Department of Global Communications, the Department of Political and Peacebuilding Affairs, the International Organization for Migration, the United Nations Population Fund, the Office of Counter-Terrorism, the United Nations Educational, Scientific and Cultural Organization, the office of the Special Adviser to the Secretary-General on the Prevention of Genocide, OHCHR, the United Nations Youth Office and the Special Rapporteur on freedom of religion or belief through information exchange, joint events and initiatives, for more effective advocacy and coordinated actions to ensure that the prevention agenda remains prominent on the international agenda and to address all forms of religious intolerance in a coherent manner within the United Nations system.

1.453 The Alliance integrates a gender perspective into its operational activities, deliverables and results, as appropriate. In 2026, it will continue to support the Women's Alliance for Peace and promote the inclusion of women peace mediators in conflict mediation and conflict resolution initiatives. It will also continue its advocacy to ensure that the voices of young women and men that support peace processes at the local level are more actively represented at global events organized by the Alliance and other relevant forums. Information on the beneficiaries of the Alliance's programmes will continue to be systematically disaggregated by sex in order to present a gender-sensitive analysis of the impact of the Alliance's programme.

1.454 In line with the United Nations Disability Inclusion Strategy, the Alliance will seek to increase the accessibility of its core documents and capacity-building training materials for persons with disabilities, to the extent possible.

Programme performance in 2024

Enhanced ownership of Member States towards the promotion of a culture of peace, and interreligious and intercultural dialogue for mutual understanding

1.455 In November 2024, the Government of Portugal and the Alliance delivered the tenth Global Forum of the United Nations Alliance of Civilizations in Cascais, Portugal, with the in-person participation of 118 official delegations of Member States and international organizations and over 1,200 partners from civil society, academia, the private sector and the media, as well as religious leaders, faith actors and members of the general public. The event featured a youth forum, with the participation of over 128 young leaders from more than 70 countries; two plenary sessions and nine thematic panels; and special segments, such as the Intercultural Innovation Hub and the PLURAL+ youth video festival ceremonies. A special side event entitled “One humanity match for peace and inclusion” brought together celebrated athletes, global leaders and young people to highlight the transformative power of sports as a platform for promoting peace, tolerance, respect, dialogue and cooperation among different cultures, civilizations and peoples. At the Global Forum, the Group of Friends of the Alliance adopted by consensus the Cascais political declaration, marking the achievements of the Alliance over the past 20 years. In the declaration, Member States emphasized the need to combat all forms of religious intolerance and acknowledged the central role of inclusive, quality and transformative education in promoting dialogue, peace and human rights.

1.456 In 2024, the Alliance also commemorated the International Day of Human Fraternity in partnership with the Permanent Missions of Egypt and the United Arab Emirates to the United Nations. It was also one of the leading substantive partners and co-organizers of the sixth World Forum on Intercultural Dialogue, hosted by Azerbaijan, during which it convened a plenary session on interfaith dialogue as a confidence-building measure.

1.457 Progress towards the objective is presented in the performance measure below (see table 1.197).

Table 1.197
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Four Member States hosted international forums to promote a culture of peace 118 Member States and international organizations adopted a political declaration in support of the Alliance of Civilizations and its values and principles

Planned results for 2026

Result 1: increased awareness about contemporary trends in Islamophobia among State and non-State actors

Proposed programme plan for 2026

1.458 In its resolution 78/264, the General Assembly expressed concern at the growing manifestations of intolerance based on religion or belief and emphasized the importance of respect for religious and cultural diversity, as well as interreligious, interfaith and intercultural dialogue aimed at promoting a culture of tolerance and respect among individuals, societies and nations. In the same resolution, the Assembly requested the Secretary-General to appoint a United Nations Special Envoy to combat Islamophobia. In line with Assembly resolution 79/258 B, the post of High Representative for the

United Nations Alliance of Civilizations will serve a dual role as High Representative for the Alliance and as the United Nations Special Envoy to combat Islamophobia.

Lessons learned and planned change

1.459 The lesson for the Alliance was the need for a strategic framework to guide the work of the United Nations on combating Islamophobia. In applying the lesson, the High Representative for the Alliance and United Nations Special Envoy to combat Islamophobia will develop a United Nations action plan to combat Islamophobia, which will contain recommendations and a call for action for Member States, civil society and the general public. The Alliance will establish a consultative process on the root causes of, and good practices in combating, contemporary forms of Islamophobia, and will engage with a wide range of stakeholders, including relevant United Nations entities and coordinators, Member States, regional organizations and civil society actors, with a view to developing the action plan. The action plan and its implementation will enable coordinated, system-wide efforts towards combating Islamophobia and promoting a culture of tolerance and respect.

1.460 Expected progress towards the objective is presented in the performance measure below (see table 1.198).

Table 1.198
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	Member States, United Nations entities, and civil society and academic institutions exchange information on the root causes of, and good practices in combating, contemporary forms of Islamophobia	Member States, United Nations entities, and civil society and academic institutions contribute to the development and finalization of the United Nations action plan to combat Islamophobia

Legislative mandates

1.461 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

64/14	The Alliance of Civilizations	78/264	Measures to combat Islamophobia
69/312	United Nations Alliance of Civilizations	78/277	Follow-up to the Declaration and Programme of Action on a Culture of Peace
75/258	Promoting a culture of peace and tolerance to safeguard religious sites	78/286	International Day for Dialogue among Civilizations
77/221	Freedom of religion or belief	79/180	Combating intolerance, negative stereotyping, stigmatization, discrimination, incitement to violence and violence against persons, based on religion or belief
77/318	Promoting interreligious and intercultural dialogue and tolerance in countering hate speech	79/258 B	Special subjects relating to the programme budget for 2025
78/129	Promotion of interreligious and intercultural dialogue, understanding and cooperation for peace		

Deliverables

1.462 Table 1.199 lists all deliverables of the programme.

Table 1.199
United Nations Alliance of Civilizations: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	–	–	**1**	–
1. Report of the Secretary-General on the implementation of General Assembly resolution 78/264	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	–	–	**2**	**2**
2. Meetings of the General Assembly	–	–	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	–	1	1
B. Generation and transfer of knowledge

4. Capacity-building training and workshops for civil society and other non-State partners	60	120	80	80
Publications (number of publications)	–	–	**1**	**1**
5. Studies, reports, policy papers and other publications on interreligious and intercultural dialogue and addressing religious intolerance	–	–	1	1
Technical materials (number of materials)	**4**	**4**	**5**	**5**
6. Technical guidelines and courses on intercultural and interreligious dialogue	4	4	5	5

C. Substantive deliverables

Consultation, advice and advocacy: briefings and consultations with some 100 Member States; briefings and consultations with approximately five regional and subregional organizations that support the Alliance's mandate and promote interreligious and intercultural dialogue, and related meetings at the national and regional levels.

Databases and other substantive digital materials: e-learning module on antisemitism, aimed at all United Nations personnel.

D. Communication deliverables

Outreach programmes, special events and information materials: keynote speeches at approximately 50 high-level events with the participation of Member States and non-governmental and civil society organizations, including symposiums, expert round tables and forums, on issues related to dialogue, peace and security, conflict prevention and a culture of peace, hate speech and addressing the root causes of violent extremism as and when conducive to terrorism, and religious intolerance across all faiths; 10 high-level events; commemoration of four United Nations international days; multimedia presentations, brochures and other materials, targeting national Governments, regional officials and the general public, at the global, regional and national levels.

External and media relations 35 press releases and press statements; one press conference; 25 op-eds, interviews and recorded statements; 10 newsletters.

Digital platforms and multimedia content: content for websites and social media accounts, including social media campaigns such as the "#forSafeWorship" and "#OneHumanity" campaigns.

B. Proposed post and non-post resource requirements for 2026

Overview

1.463 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.200 to 1.202.

1.464 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.203 to 1.205 and figure 1.XLIII.

1.465 As shown in tables 1.203 (1) and 1.204 (1), the overall resources proposed for 2026 amount to $1,026,300, reflecting an increase of $282,900 compared with the approved budget for 2025.

Resource changes result from technical adjustments. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

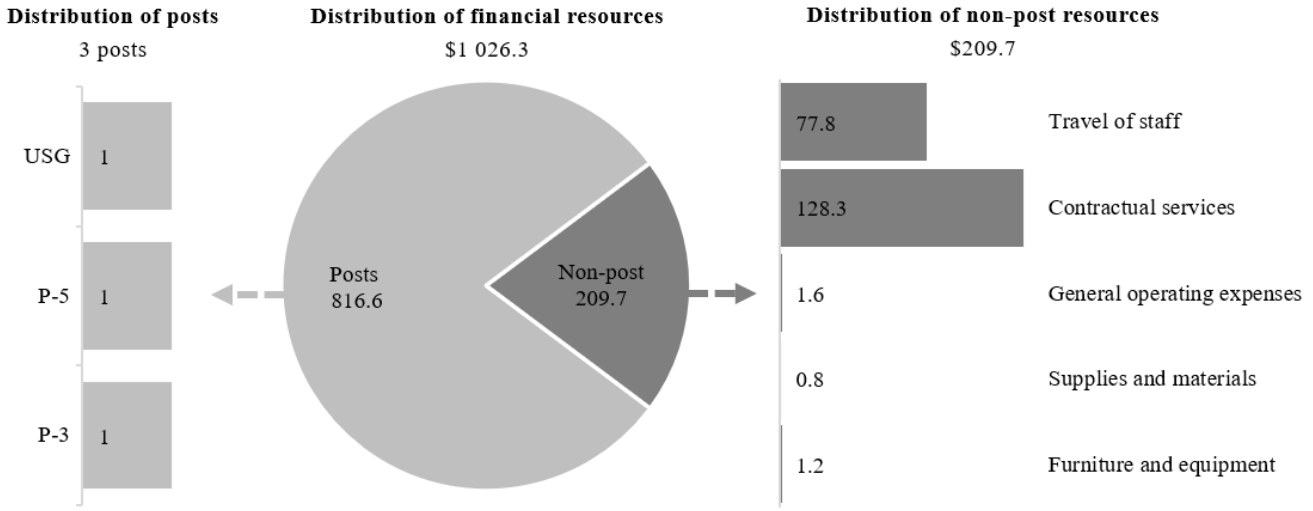
Figure 1.XLIII
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Technical adjustments

1.466 As shown in tables 1.203 (1) and 1.204 (1), the resource changes reflect an increase of $288,900 under posts, relating to the delayed impact of the conversion of one post effective 1 April 2025 and the establishment of two posts with a vacancy rate of 50 per cent in 2025, pursuant to General Assembly resolution 78/264. The increase is offset in part by a decrease of $6,000 under non-post resources, relating to the removal of non-recurrent provisions under furniture and equipment associated with the acquisition of office automation equipment for the newly established posts.

Extrabudgetary resources

1.467 As reflected in tables 1.203 (2) and 1.204 (2), extrabudgetary resources amount to $4,347,200. The resources would complement regular budget resources and would be used to provide for six posts (1 D-2, 2 P-4, 2 P-3 and 1 General Service (Other level)) and non-post resources that would be used to support the delivery of mandates, including promoting interreligious and intercultural dialogue, addressing religious intolerance and discrimination, designing and implementing peace education initiatives for the empowerment of young people, and advancing the role and contributions of women as peace mediators.

1.468 The extrabudgetary resources under the present section are subject to the oversight of the Alliance, which has delegated authority from the Secretary-General.

1.469 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.206.

XVIII. Office of the Special Envoy of the Secretary-General for Future Generations

A. Proposed programme plan for 2026

Overall orientation

Mandates and background

1.470 The Special Envoy of the Secretary-General for Future Generations would provide leadership and coordination across the United Nations system on the capacities, activities and programmes required to support Member States in their efforts to implement the Declaration on Future Generations, which was adopted by the General Assembly on 22 September 2024 (resolution 79/1, annex II).

1.471 In the Declaration, Heads of State and Government reaffirmed their earlier commitments to the purposes and principles of the Charter of the United Nations, the Universal Declaration of Human Rights, the 2030 Agenda for Sustainable Development, the political declaration of the Sustainable Development Goals Summit of 2023 and the Rio Declaration on Environment and Development.

1.472 In the Declaration, the foundations to safeguard the needs and interests of future generations through concrete measures and follow-up mechanisms are set out. Future generations are defined as all those generations that do not yet exist, and who will inherit this planet. It includes a commitment by Heads of State and Government to equip the multilateral system, including the United Nations, to support States, upon their request, in their efforts to implement the Declaration and embed the needs and interests of future generations and long-term thinking in policymaking processes by fostering cooperation and facilitating greater use of anticipatory planning and foresight, based on science, data and statistics, and raising awareness of and advising on the likely intergenerational or future impacts of policies and programmes (para. 30); and to foster an organizational culture that is future-oriented and mainstreamed across the United Nations system in order to facilitate science- and evidence-based decision-making by developing diverse capabilities, including anticipatory planning, foresight and futures literacy, and systematically promoting long-term and intergenerational thinking at all levels (para. 31). It also contains a decision to convene an inclusive high-level plenary meeting of the General Assembly on future generations that will review the implementation of the Declaration during the eighty-third session of the General Assembly and provide updates on the actions taken to safeguard the needs and interests of future generations, and a request to the Secretary-General to present a report on the implementation of the Declaration for consideration at the high-level plenary meeting to be held during the eighty-third session of the General Assembly (para. 32).

1.473 The Special Envoy of the Secretary-General for Future Generations would provide leadership and coordination across the United Nations system in order to meet the demands on the United Nations system deriving from the Declaration.

1.474 The Special Envoy would serve as a voice for long-term thinking and future generations at the global level, and would advocate, including in intergovernmental processes, high-level events and other forums, for present generations to act responsibly to safeguard the needs and interests of future generations.

1.475 The Special Envoy would be responsible for developing a vision to fulfil the commitments of the Declaration on Future Generations and set strategic goals and objectives for its implementation. Doing so would involve offering support and advice to Member States and providing leadership and policy guidance to the United Nations system on activities intended to accelerate the implementation of the Declaration, including through better use of science, data, anticipatory planning, strategic foresight and futures literacy. The Special Envoy would also lead the preparations of the report of the Secretary-General on the implementation of the Declaration for consideration at the high-level plenary meeting to be held during the eighty-third session of the General Assembly in September 2028 and support Member States with the preparatory work, organization and execution of that meeting.

B. Proposed post and non-post resource requirements for 2026

Overview

1.476 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 1.207 to 1.209.

1.477 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 1.210 to 1.212 and figure 1.XLIV.

1.478 As shown in tables 1.210 and 1.211, the overall resources proposed for 2026 amount to $1,062,800, reflecting an increase of $1,062,800 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

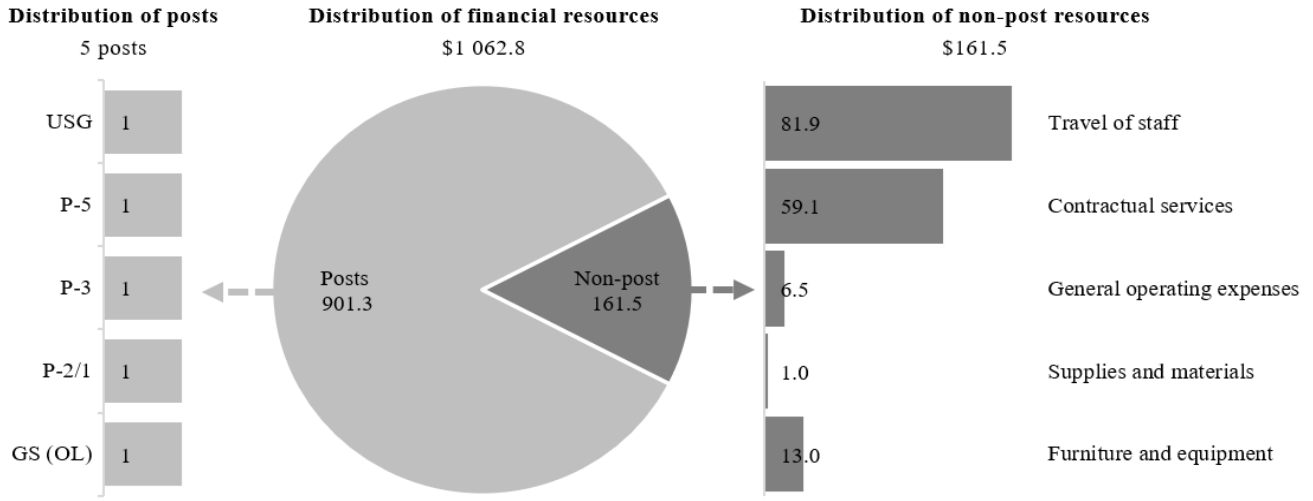
Figure 1.XLIV
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

1.479 As shown in tables 1.210 and 1.211, resource changes reflect an increase of $1,062,800 owing to the proposed conversion of three posts (1 Under-Secretary-General, 1 P-3 and General Service (Other level)) funded from extrabudgetary resources and the establishment of two posts (1 P-5 and 1 P-2/1) as part of the efforts to meet the demands on the United Nations system deriving from the Declaration on Future Generations.

1.480 The functions of the Special Envoy would include the following:

(a) Developing a shared vision to fulfil the commitments of the Declaration on Future Generations and set strategic goals and objectives for its implementation;

(b) Offering support to Member States, upon their request, in their efforts to develop long-term thinking in their policymaking processes;

(c) Advising Member States, as appropriate and with the support of other United Nations entities, on mainstreaming future-oriented considerations in United Nations documents under deliberation;

(d) Providing leadership and policy guidance to the United Nations system on activities intended to accelerate the implementation of the Declaration on Future Generations, including by adopting a system-wide approach for the assessment, development, implementation and evaluation of policies and programmes that safeguard the needs and interests of future generations;

(e) Promoting a future-oriented culture across the United Nations system, including by supporting better use of science, data, anticipatory planning, strategic foresight and futures literacy;

(f) Leading the preparations of the report of the Secretary-General on the implementation of the Declaration for consideration at the high-level plenary meeting to be held during the eighty-third session of the General Assembly in September 2028;

(g) Supporting Member States with the preparatory work, organization and execution of the high-level plenary meeting.

1.481 The increase of $1,062,800 includes an increase of $901,300 under posts, for the proposed conversion of three posts, comprising 1 Under-Secretary-General (Special Envoy of the Secretary-General for Future Generations), 1 P-3 (Programme Management Officer) and 1 General Service (Other level) (Administrative Assistant), and for the establishment of two posts, comprising 1 P-5 (Senior Programme Management Officer) and 1 P-2/1 (Associate Programme Management Officer) (see annex II to the present report).

1.482 The increase of $161,500 under non-post resources reflects provisions of $81,900 under travel of staff for the participation of the Special Envoy and his or her team in meetings of United Nations bodies and consultations with organizations, institutions, specialized agencies and other stakeholders to discuss the assessment, development, implementation and evaluation of policies and programmes aimed at safeguarding the needs and interests of future generations; $59,100 under contractual services to cover the organization of a workshop and the development of a website; and $20,500 for related non-post resources to support the proposed conversion and establishment of posts.

1.483 Information on the timely submission of documentation and advance booking for air travel is reflected in table 1.213.

Annex II

Summary of proposed changes in established and temporary posts, by component

Component	*Posts*	*Grade*	*Description*	*Reason for change*
Independent Audit Advisory Committee	1	P-4	**Establishment** of 1 post of Administrative Officer	The Independent Audit Advisory Committee plays a critical role in promoting transparency, accountability and efficiency within the United Nations system. As the scope and complexity of its work have expanded, including additional reporting on the budget of the Office of Internal Oversight Services and broader oversight responsibilities, the Committee, at its sixty-eighth session, held from 3 to 6 December 2024, endorsed the establishment of an Administrative Officer post to strengthen its operational capacity. The Administrative Officer would provide essential support to manage the growing workload, while ensuring the timely and diligent completion of tasks and safeguarding the high standards of the Committee's work. The incumbent would also enhance the continuity of operations by providing senior-level support and oversight in the absence of the Executive Secretary, thereby ensuring the stability and effectiveness of the Office in fulfilling its increasing mandates.
Office of the Special Representative of the Secretary-General for Children and Armed Conflict	1	P-3	**Establishment** of 1 post of Data Specialist	In its resolution 79/257, the General Assembly reaffirmed that the Office of the Special Representative of the Secretary-General for Children and Armed Conflict should be provided with the necessary resources to effectively implement the mandate, including to ensure that the monitoring and reporting mechanism collects and communicates accurate, objective, reliable and verifiable information. The mechanism increasingly relies on robust data analysis to identify patterns, trends and gaps in the six grave violations against children. From 2019 to 2024, the number of cases of grave violations against children rose by 35 per cent (from over 24,000 to 32,990 cases), with data now monitored and reported in 26 situations. In this context, it is proposed that one post of Data Specialist (P-3) be established to enhance the mechanism's capacity to provide actionable insights and ensure the collection and communication of accurate, objective, reliable and verifiable information. The incumbent would complement the qualitative reporting by field teams through quantitative analysis to drive evidence-based advocacy, United Nations strategic decision-making and engagement aimed at enhancing child protection. In addition, the incumbent would ensure coherence in data collection and reporting across United Nations entities in the field and provide guidance to entities such as the United Nations Educational, Scientific and Cultural Organization and the World Health Organization as they increase their mandate-specific monitoring.

Component	*Posts*	*Grade*	*Description*	*Reason for change*
Office for Digital and Emerging Technologies	1	P-4	**Establishment** of 1 post of Programme Management Officer	The proposed establishment would provide a regional presence of the Office within the regional economic commissions and serve as a vital interface with the Economic Commission for Africa and the regional presence of the Development Coordination Office. The incumbent, based in Addis Ababa, would source regional expertise for global digital cooperation processes, engage in relevant regional initiatives and advise resident coordinators on their support to Governments, as well as other entities supported by the resident coordinator, in the area of digital and emerging technologies. The role is critical for supporting the implementation of the Global Digital Compact.
	1	P-4	**Establishment** of 1 post of Programme Management Officer	The proposed establishment would provide a regional presence of the Office within the regional economic commissions and serve as a vital interface with the Economic Commission for Latin America and the Caribbean. The incumbent, based in Santiago, would source regional expertise for global digital cooperation processes, engage in relevant regional initiatives and advise resident coordinators on their support to Governments, as well as other entities supported by the resident coordinator, in the area of digital and emerging technologies. The role is critical for supporting the implementation of the Global Digital Compact.
	1	P-3	**Establishment** of 1 post of Programme Management Officer	The incumbent would contribute to United Nations system coordination on digital cooperation and emerging technologies and further strengthen the cooperation between the Geneva-based and New York-based processes. The functions of the incumbent, based in Geneva, would include supporting United Nations system-wide coordination arrangements on digital and emerging technologies, including preparing for, organizing and following up on coordination exercises, drafting and synthesizing language inputs in order to develop common messaging and positions regarding technology issues, and contributing to United Nations system-wide information-sharing and reporting on the implementation of technology-related work.
Office of the Special Envoy of the Secretary-General for Future Generations	1	USG	**Conversion** of 1 post of Special Envoy of the Secretary-General for Future Generations	The Special Envoy for Future Generations would serve as the senior adviser of the Secretary-General on issues related to the implementation of the Declaration on Future Generations (General Assembly resolution 79/1, annex II). The Special Envoy would fulfil leadership and coordination functions within the United Nations system in order to ensure the readiness of the Organization to implement the Declaration, as mandated in paragraphs 30 to 32 thereof. The Special Envoy would take the lead in positioning the future generations agenda at the highest levels and offer support to Member States, upon their request, in their efforts to develop long-term thinking in policymaking processes and raise awareness of and advise on the likely intergenerational or future impacts of policies and programmes. The incumbent would advise

Component	*Posts*	*Grade*	*Description*	*Reason for change*
				Member States, as appropriate and with the support of other United Nations entities, on safeguarding the needs and interests of future generations, including through intergovernmental processes. The Special Envoy would also foster the cooperation of Member States and the United Nations system with stakeholders, including civil society, young people, academic institutions, the scientific community and the private sector, and encourage intergenerational partnerships and whole-of-society approaches to develop innovative, long-term and forward-thinking policies and programmes. The Special Envoy would lead the preparation of the report on the implementation of the Declaration for consideration at the high-level plenary meeting to be held during the eighty-third session of the General Assembly in September 2028, and support Member States with the preparatory work, organization and execution of the meeting.
	1	P-5	**Establishment** of 1 post of Senior Programme Management Officer	The Senior Programme Management Officer would lead the development and implementation of the programme of work of the Office of the Special Envoy of the Secretary-General for Future Generations, providing leadership and coordination for the efforts of the United Nations system in contributing to the implementation of the Declaration on Future Generations. The incumbent would lead the development of analytical tools and policy recommendations on the likely intergenerational or future impacts of policies and programmes, and on safeguarding the needs and interests of future generations, including through intergovernmental processes; provide substantive advice for the engagements of the Special Envoy with Member States and stakeholders, and represent the Special Envoy, as needed; guide and coordinate the drafting process related to the preparation of the report on the implementation of the Declaration for consideration at the high-level plenary meeting to be held during the eighty-third session of the General Assembly in September 2028; and coordinate the preparatory work, organization and execution of that meeting. The responsibilities of the Senior Programme Management Officer would also include the coordination of United Nations outreach to Member States and stakeholders on matters related to the implementation of the Declaration. The incumbent would provide overall team leadership for the day-to-day management of the Office, clarify expectations and desired results, monitor and oversee progress of each team member’s work, provide guidance and take timely action to ensure delivery and achievement of the team’s objectives.
	1	P-3	**Conversion** of 1 post of Programme Management Officer	The Programme Management Officer would directly support the Special Envoy’s work and function as the Envoy’s Special Assistant. Under the supervision of a Senior Programme Management Officer, and with the support of relevant United Nations entities, the incumbent would support the development and

Component	*Posts*	*Grade*	*Description*	*Reason for change*
				refinement of analytical tools and policy recommendations on the likely intergenerational or future impacts of policies and programmes, and on mainstreaming future-oriented language in documents being negotiated and adopted in intergovernmental forums, for the consideration of Member States. The incumbent would also provide support for the engagements of the Special Envoy with Member States and stakeholders, including civil society, young people, academic institutions, the scientific community and the private sector; assist in drafting and coordinating inputs from the United Nations system for the report on the implementation of the Declaration for consideration at the high-level plenary meeting to be held during the eighty-third session of the General Assembly in September 2028; and support the preparatory work, organization and execution of the meeting.
	1	P-2	**Establishment** of 1 post of Associate Programme Management Officer	The Associate Programme Management Officer would directly support the Special Envoy's work on the implementation of the Declaration on Future Generations, as mandated in paragraphs 30 to 32 thereof. Under the supervision of a Senior Programme Management Officer, and with the support of relevant United Nations entities, the incumbent would contribute, through research and analysis, to the development of analytical tools and policy recommendations on the likely intergenerational or future impacts of policies and programmes, and on mainstreaming future-oriented language in documents being negotiated and adopted in intergovernmental forums, for the consideration of Member States. The incumbent would also provide logistical support for the engagements of the Special Envoy with Member States and stakeholders, including civil society, academic institutions, the scientific community and the private sector, and support the Special Envoy in the preparatory work, organization and execution of the high-level plenary meeting to be held during the eighty-third session of the General Assembly in September 2028 and perform logistical and administrative tasks, as required.
	1	GS (OL)	**Conversion** of 1 post of Administrative Assistant	The incumbent would provide administrative support to the Special Envoy and to other members of the Office in the discharge of their work in support of the United Nations system implementation of the Declaration on Future Generations, in relation to actions 30, 31 and 32 thereof. The incumbent would be responsible, inter alia, for drafting routine correspondence, providing protocol support for meetings and conferences, arranging travel and performing other administrative duties, as required.

Abbreviation: USG, Under-Secretary-General; GS (OL), General Service (Other level).

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

2.1 The mandates of the Department for General Assembly and Conference Management derive from the relevant rules of procedure and resolutions of the principal organs of the United Nations, including General Assembly resolutions 43/222 A–E, 50/11, 73/346, 74/303 and 79/248. The Department is responsible for:

(a) The facilitation, through the provision of procedural and technical secretariat support and authoritative advice, of the orderly and effective conduct of the deliberations and follow-up actions of the General Assembly, its General, First, Special Political and Decolonization (Fourth), Second and Third Committees and various subsidiary organs, the Economic and Social Council and most of its subsidiary bodies, and special United Nations conferences;

(b) Assistance in the revitalization efforts of the Assembly and other United Nations bodies, including through the substantive servicing of meetings of the Ad Hoc Working Group on the Revitalization of the Work of the General Assembly and the intergovernmental negotiations on the question of equitable representation on and increase in the membership of the Security Council and other matters relating to the Council;

(c) Substantive and technical secretariat support to the Committee on Conferences and high-quality conference-servicing support, including multilingual meeting and documentation services, to all intergovernmental and expert bodies meeting at Headquarters and at the United Nations Offices at Geneva, Vienna and Nairobi, and other conferences and meetings held under the auspices of the United Nations at other locations, under shared responsibility with the Directors-General of the United Nations Offices at Geneva, Vienna and Nairobi, taking into account the principle of equal treatment to be applied to all official languages in each organ of the Organization;

(d) Protocol services for the Secretary-General, the Deputy Secretary-General and visiting high-level dignitaries, as well as host country liaison services for Member States and Permanent Observers and the provision, upon request, of protocol services to the President of the General Assembly.

2.2 In accordance with General Assembly resolution 57/283 B, the Under-Secretary-General for General Assembly and Conference Management sets the policies, formulates standards and guidelines, manages resources under section 2 of the programme budget and oversees operations at Headquarters, while the Directors-General of the United Nations Offices at Geneva, Vienna and Nairobi are responsible for ensuring the implementation of those policies, standards and guidelines and for managing day-to-day operations at their duty stations. Furthermore, the Secretary-General has promulgated the establishment of a framework for delegation of authority (see ST/SGB/2019/2). The Secretary-General's bulletin on the organization of the Department (ST/SGB/2021/3) reflects the intergovernmental mandates confirming the division of responsibilities among the Under-Secretary-General and the Directors-General at Geneva, Vienna and Nairobi for delivering conference services in a standardized and integrated manner.

2.3 In addition, pursuant to General Assembly resolution 69/250, the Under-Secretary-General for General Assembly and Conference Management is responsible for the Secretariat-wide coordination of multilingualism, a core value of the United Nations, and serves as system-wide lead entity on this matter in collaboration with the secretariat of the United Nations System Chief Executives Board for Coordination. With reference to Assembly resolution 78/330, the Office of the Coordinator for Multilingualism will continue to facilitate, from within existing capacity, a coordinated, consistent and coherent approach to multilingualism across the Secretariat.

Strategy and external factors for 2026

2.4 The 2026 programme plan is guided by the Department's long-standing strategy of continuous modernization and improvement in all areas. In line with paragraph 73 (a) of the Pact for the Future, under action 45 (see General Assembly resolution 79/1), the Department will continue to cultivate an organizational culture that advances agility, creativity, learning and adaptability and further develop a quintet of cutting-edge skills in the areas of innovation, data analytics, digital transformation, strategic foresight and behavioural science that will enable it to harness new technological capabilities even as the landscape of how services are delivered evolves.

2.5 New technologies, including artificial intelligence, offer potential efficiencies and improvements to services in multiple aspects of multilingual conference-servicing, from improved automation of workflows to increased accessibility of products and services for persons with disabilities. The Department will continue to invest, utilizing available resources and to the extent possible, in systems that enhance integrated global management and the efficiency, effectiveness, continuity, sustainability and accessibility of the services it provides, in line with the priorities outlined in the Secretary-General's information and communications technology strategy.

2.6 Specifically, the functionality and user-friendliness of e-deleGATE will be further improved with the incorporation of new features, and artificial intelligence-based tools will be used to increase the accessibility of publishing products. Job profiles will be revised in the light of evolving working methods and staff recruited with the new skill sets required. Cross-functional training, in addition to technical and subject-matter training, will be introduced to increase the versatility of staff and the agility of the Department as a whole.

2.7 The effective and efficient utilization of available resources and programme delivery will be ensured through clearly defined results-based performance indicators and benchmarks outlined under the respective subprogrammes in the present document. To manage surges in demand for multilingual meetings and documentation services, the Department will leverage temporary assistance to complement its in-house teams of interpreters, editors, translators, précis-writers, verbatim reporters and production editors. Competitive recruitment examinations for both core and temporary staff will be conducted as required.

2.8 The proactive analysis of client needs and client feedback, including through a revised single global survey, will continue to guide the Department's activities in developing its services in support of the work of the intergovernmental and expert bodies.

2.9 The Department will coordinate measures to enhance multilingualism in the Organization in accordance with the terms of reference of the Coordinator for Multilingualism (A/71/757, annex II).

2.10 With regard to inter-agency coordination and liaison, the Department will continue to provide substantive and technical secretariat support and serve as the permanent Chair of the International Annual Meeting on Language Arrangements, Documentation and Publications.

2.11 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Information on changes to the calendar of conferences and meetings, as well as to the programmes of work of intergovernmental and expert bodies, is made available in a timely manner and in conformity with the applicable rules of procedure;

(b) The number of non-calendar meetings does not exceed that of 2024;

(c) Extraordinary meetings, including special and emergency special sessions, will be scheduled with sufficient notice;

(d) Unforeseen high-priority documentation will be manageable;

(e) Stakeholders will fulfil their responsibilities and obligations in accordance with established rules for the submission of documentation and meeting requests in a predictable manner;

(f) Global supply chains enable the timely sourcing of high-quality goods, capacity and services.

2.12 The programme integrates a gender perspective into its operational activities, deliverables and results, as appropriate.

2.13 In line with the United Nations Disability Inclusion Strategy, the Department will continue to adjust and refine its systems, platforms, workflows and requirements for conference services, including seating arrangements, with a view to ensuring equal participation by delegates and participants with disabilities in the work of the United Nations.

Legislative mandates

2.14 The list below, which was reviewed in the preparation of the proposed programme budget, provides the mandates entrusted to the programme.

General Assembly resolutions

43/222 A–E; 69/250; 79/248	Pattern of conferences	74/303	Revitalization of the work of the General Assembly
50/11; 76/268; 78/330	Multilingualism	79/257	Questions relating to the proposed programme budget for 2025

Conference management, New York

General Assembly mandate

A/520/Rev.20	Rules of procedure of the General Assembly (rule 56)

Economic and Social Council mandate

E/5715/Rev.2	Rules of procedure of the Economic and Social Council (rule 32)

Security Council mandate

S/96/Rev.7	Provisional rules of procedure of the Security Council (rule 41)

Conference management, Geneva

General Assembly resolutions

174 (II)	Establishment of an International Law Commission	63/160	Report of the Human Rights Council
1166 (XII)	International assistance to refugees within the mandate of the United Nations High Commissioner for Refugees	68/268	Strengthening and enhancing the effective functioning of the human rights treaty body system
48/189	United Nations Framework Convention on Climate Change	79/258, sect. IX	Special subjects relating to the proposed programme budget for 2025: revised estimates resulting from resolutions and decisions adopted by the Human Rights Council at its fifty-fifth, fifty-sixth and fifty-seventh regular sessions
60/184	International trade and development		
60/251	Human Rights Council		
62/193; 66/201	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa		

Conference on Disarmament mandate

CD/8/Rev.10	Rules of procedure of the Conference on Disarmament (sect. X)

Economic and Social Council resolution

36 (IV)	Economic Commission for Europe

Conference management, Vienna

General Assembly resolutions

913 (X)	Effects of atomic radiation
1145 (XII)	Agreement governing the relationship between the United Nations and the International Atomic Energy Agency
1472 (XIV) A; 69/85	International cooperation in the peaceful uses of outer space
2152 (XXI)	United Nations Industrial Development Organization
2205 (XXI)	Establishment of the United Nations Commission on International Trade Law
50/245	Comprehensive Nuclear-Test-Ban Treaty
55/25	United Nations Convention against Transnational Organized Crime
55/255	Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
58/4	United Nations Convention against Corruption
68/1	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council
78/223	Follow-up to the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice
79/117	Report of the United Nations Commission on International Trade Law on the work of its fifty-seventh session
79/243	United Nations Convention against Cybercrime; Strengthening International Cooperation for Combating Certain Crimes Committed by Means of Information and Communications Technology Systems and for the Sharing of Evidence in Electronic Form of Serious Crimes

Economic and Social Council resolutions

9 (I)	Commission on Narcotic Drugs
1992/1	Establishment of the Commission on Crime Prevention and Criminal Justice

International Narcotics Control Board

Single Convention on Narcotic Drugs of 1961, article 11

Convention on Psychotropic Substances of 1971

United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988

Rules of Procedure of the Board

Conference management, Nairobi

General Assembly resolutions

71/231; 74/222; 76/208; 77/168; 79/209	Report of the United Nations Environment Assembly of the United Nations Environment Programme
73/239; 77/173; 79/214	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)

Deliverables

2.15 Table 2.1 lists all cross-cutting deliverables of the programme.

Table 2.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**1**	**2**
1. Report of the Secretary-General on the pattern of conferences	1	1	1	1
2. Report of the Secretary-General on multilingualism	1	1	–	1
Substantive services for meetings (number of three-hour meetings)	**23**	**10**	**22**	**23**
Meetings of:				
3. The General Assembly related to multilingualism	1	1	–	1
4. The Committee on Conferences, the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee on the item on the pattern of conferences	16	5	16	16
5. The Committee for Programme and Coordination, the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee related to programme planning and the budgetary process	6	4	6	6
C. Substantive deliverables				
Consultation, advice and advocacy: International Annual Meeting on Language Arrangements, Documentation and Publications, with an estimated 60 entities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: 6 language days, 2 internationally recognized language celebrations and other related observances on multilingualism in accordance with General Assembly guidance.				
External and media relations: meetings with language groupings or other relevant international organizations, upon request and in line with the role of the Coordinator for Multilingualism.				
Digital platforms and multimedia content: multilingual content for websites and social media accounts of the Department for General Assembly and Conference Management, including on outreach to universities and on multilingualism.				
E. Enabling deliverables				
Correspondence and documentation services: documentation services (110 non-parliamentary documents); and correspondence services, including notes verbales and official correspondence of the Secretary-General and departments with Member States.				

Evaluation activities

2.16 A global evaluation on publishing and distribution in the digital age, conducted by the Department and completed in 2024, has guided the proposed programme plan for 2026.

2.17 In response to the results of the evaluation referenced above, the Department will continue using the digital platforms that have enabled the more efficient and timely distribution of parliamentary documentation at all duty stations and will explore options to enhance the quality and accessibility of digital products and services, as described in subprogramme 4.

2.18 A global evaluation of translation workload forecasting to be conducted by the Department is planned for 2026.

Programme of work

Subprogramme 1
General Assembly and Economic and Social Council affairs

Objective

2.19 The objective, to which this subprogramme contributes, is to ensure efficient and effective deliberation and decision-making processes of intergovernmental and relevant expert bodies and United Nations conferences.

Strategy

2.20 To contribute to the objective, the subprogramme will:

(a) Provide technical secretariat services to, and coordinate substantive support for, intergovernmental bodies, including the General Assembly, its General, First, Special Political and Decolonization (Fourth), Second and Third Committees and its various subsidiary and ad hoc bodies; the Economic and Social Council and its forums and subsidiary and ad hoc bodies; the Trusteeship Council; and conferences and other ad hoc and extraordinary meetings held under the auspices of the United Nations;

(b) Provide procedural advice and substantive, analytical and historical information;

(c) In response to requests from Member States, strengthen its core software tools, including e-deleGATE, which is available in the official languages of the United Nations and is able to capture interaction among various intergovernmental bodies, and which, along with existing e-deleGATE modules, the General Assembly, in its resolution 77/335, called upon its subsidiary organs to use, as much as possible.

2.21 The above-mentioned work is expected to result in:

(a) The smooth conduct of meetings of the intergovernmental bodies serviced;

(b) Expanded availability and accessibility of secretariat support to the delegations;

(c) Improved user experience for delegations on the e-deleGATE portal.

Programme performance in 2024

Delegates and the public have direct access to intergovernmental data through the new iGov portal

2.22 In its resolution 77/335, the General Assembly called upon its subsidiary organs to use, as much as possible, existing e-deleGATE modules and requested the Secretariat to consolidate e-services provided to delegates under the e-deleGATE platform. The subprogramme launched the iGov portal[1] in February 2024 to delegates and the public. The iGov portal provides a window to intergovernmental data and allows users to cross-reference meetings, documents and agenda items and to obtain comprehensive information across different search criteria. It provides a "snapshot" overview of future and past meetings, with links to the list of speakers, voting results and other relevant material, such as informal documents and letters, as well as access to the latest information on the schedule of meetings, lists of proposals, lists of adopted resolutions and decisions, and documentation. The portal is part of the e-deleGATE environment and links the enhancements in digital service delivery and technical integration with a consolidated knowledge hub.

2.23 Progress towards the objective is presented in table 2.2.

[1] See https://igov.un.org/.

Table 2.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Unstructured data on meeting proceedings available on diverse sites	Unstructured data on meeting proceedings available on diverse sites	Delegates and the public have direct access to structured intergovernmental data on the iGov portal

Planned results for 2026

Result 1: delegates and the public have access to new services that are unlocked by the intergovernmental data model for meeting proceedings

Programme performance in 2024 and target for 2026

2.24 The subprogramme's work contributed to the schedule and programme of work of the Main Committees of the General Assembly being available to delegates in multiple places and in different formats, which met the planned target.

2.25 Progress towards the objective and the target for 2026 are presented in table 2.3.

Table 2.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Delegates and the public have access to data-driven reports for all bodies that the subprogramme services	Delegates and the public have access to 2 versions of the schedule of the General Assembly, unlocked by the intergovernmental data model	Delegates and the public have access to the schedule and programme of work of the Main Committees in multiple places and in different formats	Delegates and the public have access to additional reporting services that are unlocked by the intergovernmental data model	Delegates and the public have access to additional services that are unlocked by the intergovernmental data model

Result 2: standardized information on the proceedings of various intergovernmental bodies available to delegates

Programme performance in 2024 and target for 2026

2.26 The subprogramme's work contributed to a new module providing live information on proposals, amendments, and resolutions and decisions being available to delegates and the public, which exceeded the planned target of a new module being under development but not yet available in 2024.

2.27 Progress towards the objective and the target for 2026 are presented in table 2.4.

Table 2.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States have access to information on intergovernmental decision-making, but this varies in content and form from one body to another	New module providing information on proposals, amendments, and resolutions and decisions available in e-deleGATE	Member States have access to new module in e-deleGATE providing information on proposals, amendments, and resolutions and decisions	Member States have access to new module in e-deleGATE providing information on proposals, amendments, and resolutions and decisions, with automated quality assurance of key elements (logical progression, naming conventions, etc.)

Result 3: simpler, more intuitive interaction between delegations and the Secretariat using the e-deleGATE platform

Proposed programme plan for 2026

2.28 The working methods of intergovernmental bodies supported by the subprogramme leverage information technology at different stages of their deliberation and decision-making processes. The subprogramme has a role in supporting these working methods using tools such as the e-deleGATE platform.

Lessons learned and planned change

2.29 The lesson for the subprogramme was that, while many of the new e-deleGATE modules were well received by delegates, more could be done to simplify the interaction between delegates and the Secretariat using the e-deleGATE platform. In applying this lesson, the subprogramme will centralize functions of the e-deleGATE platform, so that requesting specific services, whether for a reasonable accommodation request (in line with resolution 77/335), an inscription on a list of speakers, a request for a vote or voting intention, or a nameplate, becomes simpler and more intuitive.

2.30 Expected progress towards the objective is presented in table 2.5.

Table 2.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Member States make requests through specific modules on the e-deleGATE platform or by email	Member States make requests through specific modules on the e-deleGATE platform or by email	Member States make requests through specific modules on the e-deleGATE platform or by email	Member States make requests through specific modules on the e-deleGATE platform or by email while a centralized module is developed	Member States make requests and receive responses from the Secretariat through a centralized module

Deliverables

2.31 Table 2.6 lists all deliverables of the subprogramme.

Table 2.6
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**217**	**160**	**181**	**207**
Documents of:

18. Delegates' Handbook	1	1	1	1
C. Substantive deliverables				
Databases and substantive digital materials: online portals, including e-deleGATE, for approximately 35 intergovernmental bodies.				

Conference management, New York

Subprogramme 2
Planning and coordination of conference services

Objective

2.32 The objective, to which this subprogramme contributes, is to ensure efficient, effective and multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in New York.

Strategy

2.33 To contribute to the objective, the subprogramme will, in coordination with the other duty stations:

(a) Plan and manage meetings and documentation services in a globally coordinated manner by leveraging technologies, including gMeets, gDoc and gData, and optimizing workflows;

(b) Lead global innovation projects in areas related to planning and coordination, including gMeets and the *Journal of the United Nations*;

(c) Centrally coordinate evaluation activities and risk management, including business continuity within existing mandates, and provide high-quality and reliable data to facilitate informed managerial decision-making and performance monitoring;

(d) Engage in regular consultations with Member States and substantive and technical secretariats to address conference-servicing needs;

(e) Provide technical and substantive support to the Committee on Conferences through expanded use of the e-deleGATE portal.

2.34 The above-mentioned work is expected to result in:

(a) The addressing of Member States' needs with more responsive, timely, efficient and user-friendly conference services;

(b) Smooth deliberations in the intergovernmental process;

(c) Well-established and mature standard operating procedures complemented by information technology systems applied to all services for Member States;

(d) The timely and simultaneous issuance of parliamentary documents in all six official languages.

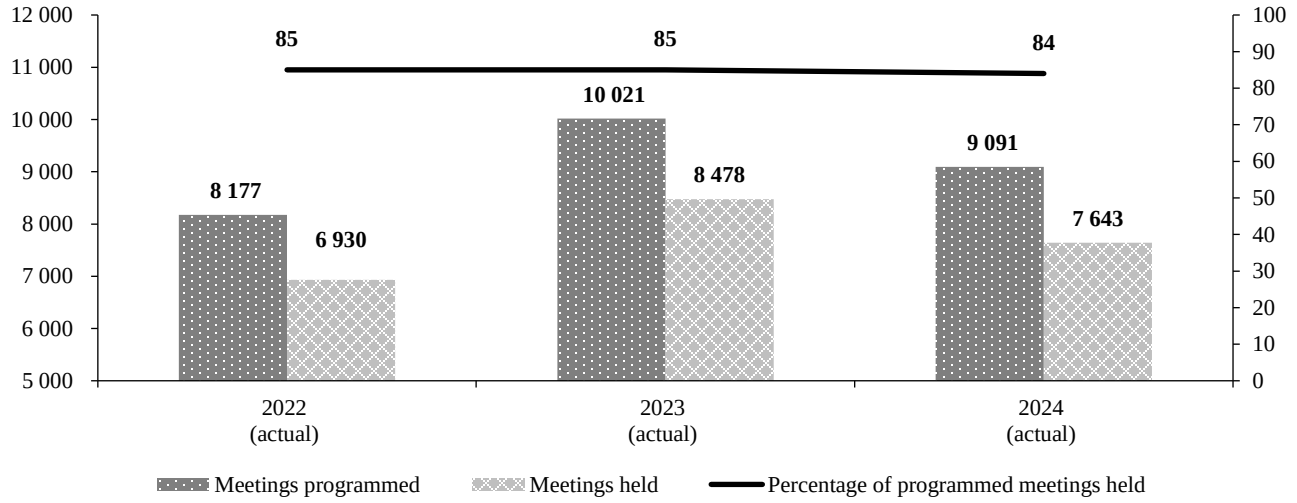
Programme performance in 2024

Efficient delivery of meetings and documents

2.35 In 2024, the subprogramme continued to support the intergovernmental process and ensure that Member States could hold meetings as planned, despite liquidity constraints, through effective service planning that involved a combination of the continuous reprioritization of requests and the implementation of various measures, such as holding meetings on weekdays only and during the official meeting hours of 10 a.m. to 6 p.m. and strictly enforcing agreed word counts in document processing. The proactive decision by the Department to implement these measures meant that Member States continued to receive high-quality conference services, despite the limited resources.

2.36 Progress towards the objective is presented in figure 2.I.

Figure 2.I
Performance measure: meetings programmed and held in New York



Planned results for 2026

Result 1: timely and reliable reporting of key performance indicators across duty stations made available to Member States

Programme performance in 2024 and target for 2026

2.37 The subprogramme's work contributed to all indicators subject to mandated reporting to Member States being calculated using globally harmonized methodologies, which met the planned target.

2.38 Progress towards the objective and the target for 2026 are presented in table 2.7.

Table 2.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Availability of some indicators and reports for mandated reporting to Member States	All indicators available in new gData dashboards, with globally harmonized methodologies for some indicators	All indicators subject to mandated reporting are calculated using globally harmonized methodologies	Mandated reporting of all indicators to Member States based on gData reports	More report types are readily available through the integration of gData with other enterprise applications

Result 2: global gateway for servicing conferences and meetings

Programme performance in 2024 and target for 2026

2.39 The subprogramme's work contributed to all clients being able to request meeting services in Vienna through One-Stop Shop, which met the planned target. The subprogramme's work also contributed to the preparations for the deployment of One-Stop Shop in Geneva, which did not meet the planned target of "a subset of clients can request meeting services in Geneva". The target was not met because deployment in Geneva had to be postponed due to the liquidity situation.

2.40 Progress towards the objective and the target for 2026 are presented in table 2.8.

Table 2.8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
A subset of clients can request meeting services in Nairobi through One-Stop Shop	All clients can request meeting services in Nairobi through One-Stop Shop A subset of clients can request meeting services in Vienna through One-Stop Shop	All clients can request meeting services in Vienna through One-Stop Shop	All clients at all duty stations can request meeting services, obtain cost estimates and receive a single bill through One-Stop Shop	All clients at all duty stations use One-Stop Shop to request meeting services and receive a single bill

Result 3: increased feedback from Member States through the global survey

Proposed programme plan for 2026

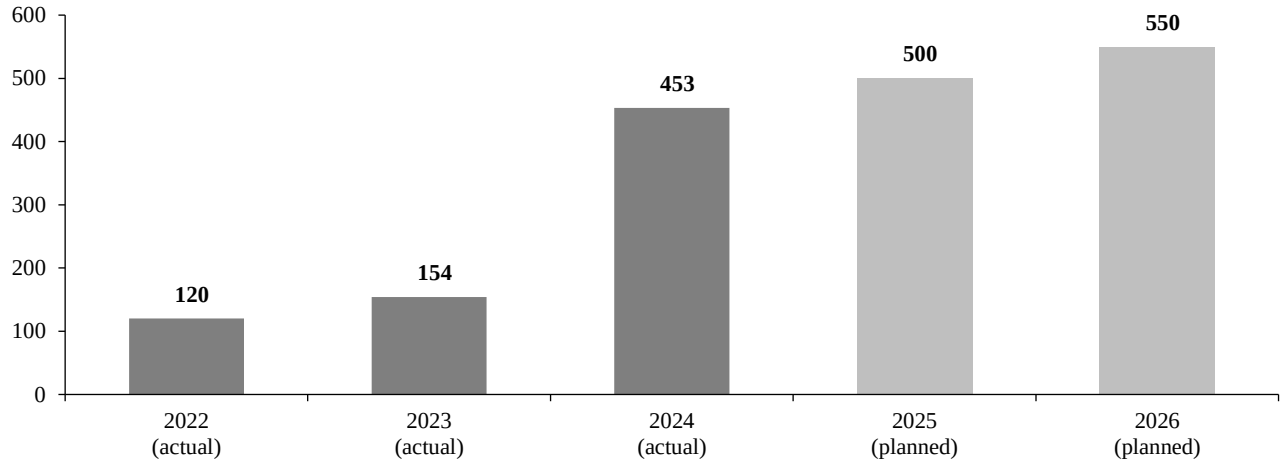
2.41 As reiterated by the General Assembly in its resolution 79/248, the satisfaction of Member States is a key performance indicator in conference management and conference services, and the Department is mandated to continue to explore best practices and techniques in client satisfaction evaluations, to seek a larger rate of response to surveys on quality of service and to report regularly to the Assembly on the results achieved. Currently both a global survey and several local surveys are used to gather feedback from conference participants.

Lessons learned and planned change

2.42 The lesson for the subprogramme was that the growing harmonization of tools, systems and processes has rendered the questions in the local surveys almost indistinguishable from those in the global survey. A single integrated survey would produce more results and hence more valuable and actionable feedback. In applying the lesson, the subprogramme will lead the incorporation of local survey questions into the global survey in such a way as to obtain globally relevant results while paying due attention to local matters. The subprogramme will also take measures to increase the response rate by discontinuing local surveys; publishing links to the global survey on the conference management platforms available to delegates; and promoting the survey through methods that have already proved to yield high response rates at some duty stations, such as making the survey available by means of Quick Response (QR) codes and on tablets in conference rooms.

2.43 Expected progress towards the objective is presented in figure 2.II.

Figure 2.II
Performance measure: number of responses to the global survey (annual)



Deliverables

2.44 Table 2.9 lists all deliverables of the subprogramme.

Table 2.9
New York, subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**11**	**11**	**12**	**11**
1. Report of the Committee on Conferences	1	1	1	1
2. Report of the Secretary-General on the pattern of conferences	1	1	1	1
3. Note by the Secretariat on the calendar of conferences and meetings	2	2	2	2
4. Documents for the Committee on Conferences	6	6	7	6
5. Revitalization of the work of the General Assembly: status of documentation for the General Assembly	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**11**	**3**	**11**	**11**
6. Meetings of the Committee on Conferences	11	3	11	11
Conference and secretariat services for meetings (number of three-hour meetings)	**12 700**	**7 644**	**12 700**	**11 000**
7. Meetings of the Security Council and its sanctions committees and subsidiary working groups	750	694	750	750
8. Meetings of the General Assembly and its Main Committees and subsidiary bodies	3 200	3 553	3 200	4 000
9. Meetings of the Economic and Social Council and its subsidiary bodies and functional commissions	750	505	750	750
10. Meetings of the permanent and observer missions to the United Nations	3 130	858	3 130	2 250
11. Other meetings	4 870	2 034	4 870	3 250
B. Generation and transfer of knowledge				
Technical materials (number of materials)	**252**	**252**	**251**	**251**
12. *Journal of the United Nations*	252	252	251	251

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: consultations with five Bureau members on issues relating to the Committee on Conferences; Bureau meetings and briefing for the 18 members of the Committee on Conferences; and consultations and coordination with Committees and expert bodies and other Secretariat entities to ensure the timely submission of 1,700 parliamentary documents and thereby facilitate timely issuance.

Databases and substantive digital materials: One-Stop Shop platform for meetings and conference service requests.

D. Communication deliverables

Digital platforms and multimedia content: website of the *Journal of the United Nations* (daily *Journal* provided for 251 working days) and calendar of conferences and meetings website, available in all six official languages and accessible from mobile devices.

Subprogramme 3
Documentation services

Objective

2.45 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in New York.

Strategy

2.46 To contribute to the objective, the subprogramme will, in coordination with the other duty stations:

(a) Deliver multilingual documentation services, including translation, editing, précis-writing, desktop publishing and correspondence services, while improving quality and timeliness by leveraging technologies, optimizing workflows, matching capacity with workload and developing staff skills through training;

(b) Promote the versatility of language professionals with regard to processing highly complex legal and technical documents by providing continuous subject-matter training, including by leading projects on knowledge management and training tools and by organizing briefings with substantive secretariats;

(c) Implement new technological solutions and maintain existing systems to manage its workload and workforce;

(d) Strengthen performance management and quality assurance mechanisms and manage the quality of internally and externally processed documents by applying rigorous quality-control standards;

(e) Enhance outreach to universities;

(f) Improve recruitment methods, including through remote competitive examinations and testing of skills in post-editing of machine translation;

(g) Lead global innovation projects and programmes in areas relating to documentation, including gText and gDoc, to improve the ability of the subprogramme to plan and process multilingual documentation within established time frames and to support the skills of linguists to satisfy the mandate on quality;

(h) Maintain and enhance the UNTERM portal, which contains official terminology and is publicly accessible online;

(i) Convert categories of documents into machine-readable format to develop further information services that will leverage the wealth of the Organization’s knowledge.

2.47 The above-mentioned work is expected to result in:

(a) The timely availability of high-quality documents, issued simultaneously in the official languages, in compliance with existing mandates;

(b) The consistent use of official terminology in the official languages;

(c) Improved access to knowledge resources through the provision of machine-readable documents.

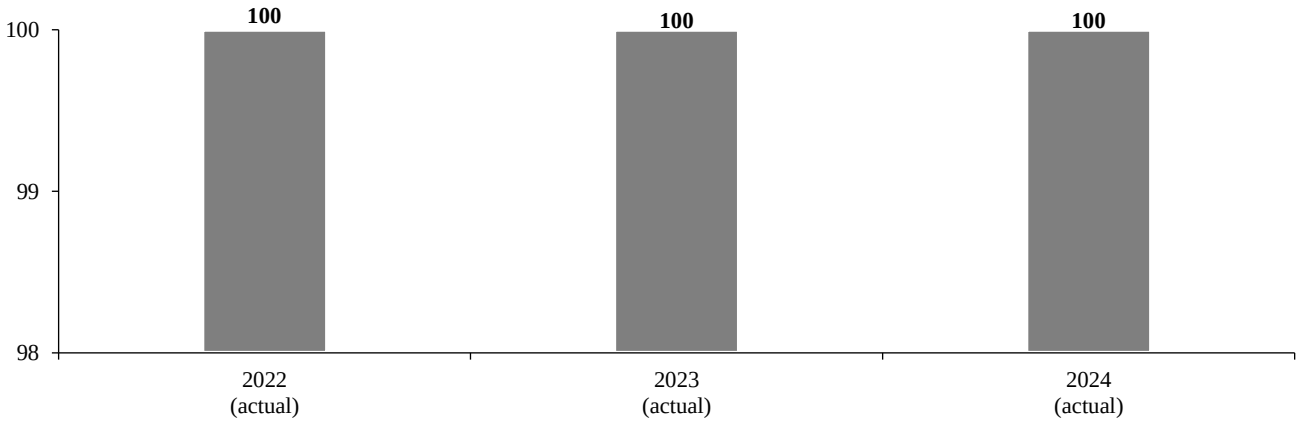
Programme performance in 2024

Simultaneous and timely delivery of high-quality documentation to Member States ensured through new working methods

2.48 The work done by the desktop publishing teams (formerly known as text-processing units) is the final step in the processing chain and essential to the simultaneous and timely delivery of high-quality documentation. A self-evaluation on text-processing conducted in 2022 found that practices varied by language and duty station and that desktop publishing and translation workflow management practices should be more aligned, with the goal of ensuring delivery on the Department's timeliness and simultaneous-issuance mandates, especially with new technologies available to desktop publishing. This goal was made possible with the implementation of the Department's new global management system, gDoc 2.0, which concluded in December 2023. In 2024, the subprogramme began to consolidate the separate front desks of the translation and desktop publishing teams so as to create a single team per language and thereby increase the ability to ensure timeliness and simultaneous issuance. Also in line with the recommendations of the self-evaluation, the subprogramme began to explore, with the other three duty stations, ways to enhance workload-sharing and improve the consistency and comparability of the statistical data related to desktop publishing.

2.49 Progress towards the objective is presented in figure 2.III.

Figure 2.III
Performance measure: simultaneous issuance of parliamentary documentation (annual)
(Percentage)



Note: Although subprogramme 3 issued all documentation simultaneously in 2024, the different language versions of 56 documents were issued on the Official Document System in a non-simultaneous manner as a result of a technological glitch.

Planned results for 2026

Result 1: innovation in action: leveraging machine-readable documents

Programme performance in 2024 and target for 2026

2.50 The subprogramme's work contributed to the availability of a collection of Security Council draft resolutions in publicly accessible portals, as well as the automated generation of General Assembly resolution files in the six official languages, which met the planned target.

2.51 Progress towards the objective and the target for 2026 are presented in table 2.10.

Table 2.10
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Decisions of the General Assembly available in machine-readable format and displayed in multilingual reports with visualizations Automated compilation of volume II of the resolutions and decisions of the General Assembly, containing the decisions adopted by the Assembly, and of the resolutions and decisions adopted by the Economic and Social Council, available in machine-readable format	Availability of additional resolutions in enriched machine-readable format with visualizations and data extracts	Availability of a collection of Security Council draft resolutions in publicly accessible portals and automated generation of General Assembly resolution files	Availability of further refinements, including through master data, to facilitate information retrieval by Member States	Information retrieval by Member States is further facilitated by leveraging metadata contained in gDoc to further automate the generation of machine-readable documentation

Result 2: high-quality multilingual documentation through translation quality management framework

Programme performance in 2024 and target for 2026

2.52 The subprogramme's work contributed to Member States providing feedback in the global survey by responding to questions aligned with the new translation quality framework, whereby they indicated that translation quality met their needs and expectations, which met the planned target.

2.53 Progress towards the objective and the target for 2026 are presented in table 2.11.

Table 2.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States provide feedback on their satisfaction with the linguistic quality of translated documents through the annual survey on conference services	Member States provide feedback through the global survey by responding to questions aligned with the new translation quality framework	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2024	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2025
	Responses received in 2023 indicate satisfaction with translation quality	Responses received in 2024 indicate satisfaction with translation quality		

Result 3: timely availability of documentation for meetings

Proposed programme plan for 2026

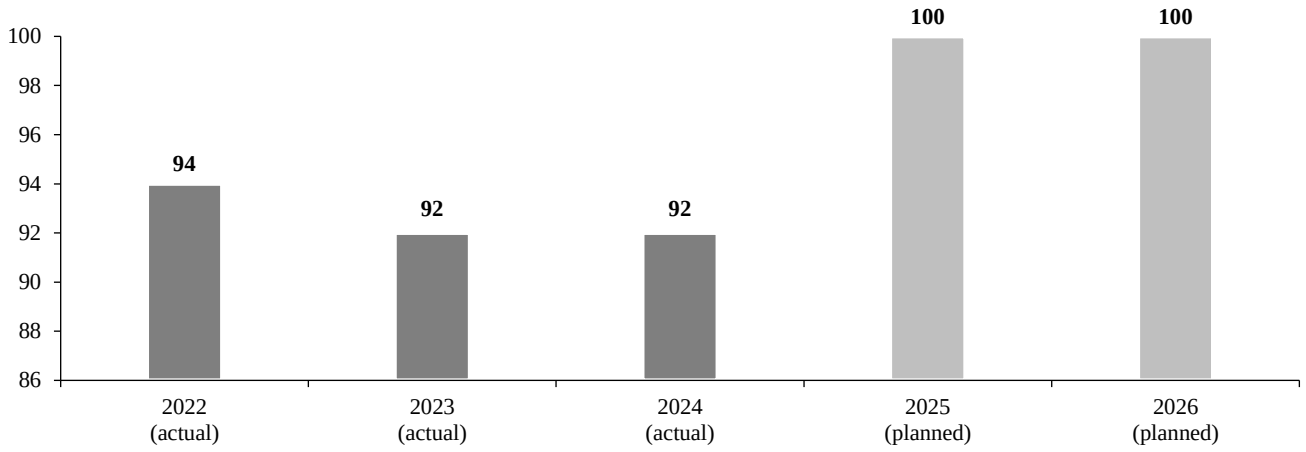
2.54 In its resolution 79/248, the General Assembly requested the Secretary-General to continue to take action on providing the timely and simultaneous issuance of documents in all six official languages. In an environment of rapid technological change stemming from the progress of artificial intelligence, including neural networks and large language models, linguists with subject matter expertise are key to providing high-quality documentation in a timely manner. In the same resolution, the Assembly also requested the Secretary-General to continue to improve and strengthen his initiatives related to training and replenishing the language capacity of the Organization. To meet the training expectations of Member States, the subprogramme established a learning and knowledge management programme aimed at facilitating access to learning and training opportunities for documentation staff. This effort is consistent with the approach of the subprogramme for constant optimization of the services provided to Member States in the six official languages.

Lessons learned and planned change

2.55 The lesson for the subprogramme was the need to continue to develop the capacity of documentation staff in the context of increased workload standards and technological advances. In applying the lesson, the subprogramme will target learning and training in key areas of work in New York, such as budgeting and auditing, which account for a significant proportion of the documentation processed by the subprogramme, as well as maintaining a dedicated SharePoint site that serves as a repository of training information. These efforts will enhance the expertise and hence efficiency of staff, contributing to the timely availability of documentation.

2.56 Expected progress towards the objective is presented in figure 2.IV.

Figure 2.IV
Performance measure: global timely issuance of parliamentary documentation (annual)
(Percentage)



Deliverables

2.57 Table 2.12 lists all deliverables of the subprogramme.

Table 2.12
New York, subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**223**	**308**	**223**	**223**
Summary records of:				
1. Meetings of Security Council subsidiary bodies	18	18	18	18
2. Meetings of the General Assembly	150	243	150	150
3. Meetings of the Economic and Social Council	35	38	35	35
4. Other meetings	20	9	20	20
Documentation services for meetings (thousands of words)	**116 000**[a]	**108 012**[a]	**116 000**[a]	**116 000**[a]
Editing, translation and desktop publishing of:				
5. Documents for the Security Council	19 200	15 445	19 200	19 200
6. Documents for the General Assembly	79 300	75 833	79 300	79 300
7. Documents for the Economic and Social Council	16 400	14 062	16 400	16 400
8. Other documents	1 100	2 672	1 100	1 100
C. Substantive deliverables				
Databases and substantive digital materials: UNTERM, comprising some 680,000 records.				
E. Enabling deliverables				
Correspondence and documentation services: documentation services for some 36 clients (processing more than 5 million words); and correspondence services, including notes verbales and official correspondence of the Secretary-General and departments with all Member States.				

[a] Excludes editorial corrections generated by parallel processing, which is necessary to ensure timeliness.

Subprogramme 4
Meetings and publishing services

Objective

2.58 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in New York.

Strategy

2.59 To contribute to the objective, the subprogramme will, in coordination with the other duty stations:

(a) Provide multilingual verbatim reporting, interpretation, meeting support and publishing services at Headquarters and for conferences and meetings held away from Headquarters;

(b) Utilize data-driven methodologies to project, plan and obtain the staff and temporary workforce capacity necessary to sustain peak periods of demand at Headquarters and for meetings held away from Headquarters, including by leading global innovation projects in areas related to interpretation, such as the interpreters assignment programme (eAPG);

(c) Develop and implement good practices relating to conference support and the sustainability and accessibility of meetings and publishing services.

2.60 The above-mentioned work is expected to result in:

(a) Better matching of servicing capacity with expected increases in meeting demand during peak periods;

(b) Continued sustainability of conference support and publishing services.

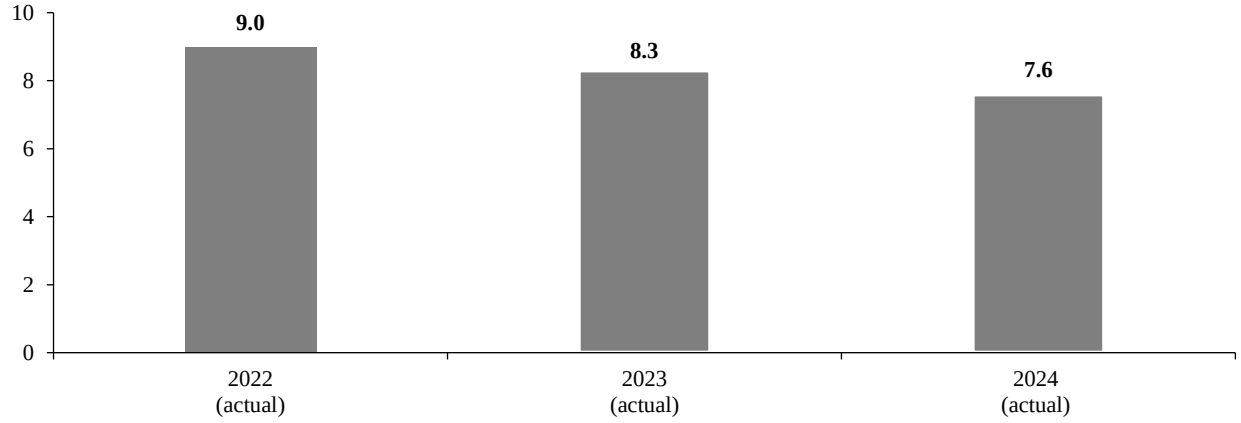
Programme performance in 2024

Reduced environmental impact through digital solutions

2.61 Significant reductions in page impressions have been achieved through the development of digital solutions, such as the eSubscription portal, investments in on-demand printing systems and the promotion of online distribution tools since the General Assembly, in its resolution 67/297, encouraged Member States to make full use of the e-services provided by the Secretariat, taking into account the cost savings and the reduced environmental impact that might accrue from that exercise, in order to improve the quality and distribution of documents. In 2024, 7.6 million pages were printed – the lowest figure since the implementation of these new working methods. With the shift to an on-demand system, by which Member States can request hard copies of documents, the subprogramme is aligned with the Secretary-General's bulletin on the environmental policy for the United Nations Secretariat (ST/SGB/2019/7) with regard to the environmental sustainability of operations.

2.62 Progress towards the objective is presented in figure 2.V.

Figure 2.V
Performance measure: number of pages printed (annual)
(Millions of pages)



Planned results for 2026

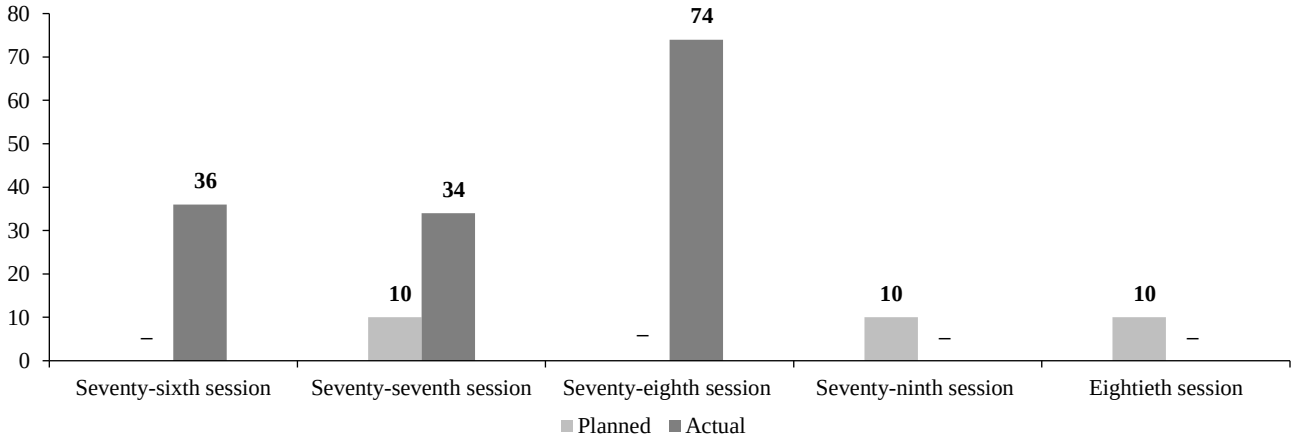
Result 1: timely processing of verbatim records of the General Assembly through the use of fit-for-purpose technologies

Programme performance in 2024 and target for 2026

2.63 The subprogramme's work contributed to the processing of verbatim records, with 74 unprocessed verbatim records remaining from previous sessions of the General Assembly as of the first day of the new session, which did not meet the planned target of zero unprocessed verbatim records. The target was not met due to liquidity constraints that prevented the hiring of the same number of freelance staff normally hired to process verbatim records.

2.64 Progress towards the objective and the target for 2026 are presented in figure 2.VI.

Figure 2.VI
Performance measure: number of unprocessed verbatim records remaining from previous sessions of the General Assembly as of the first day of the new session



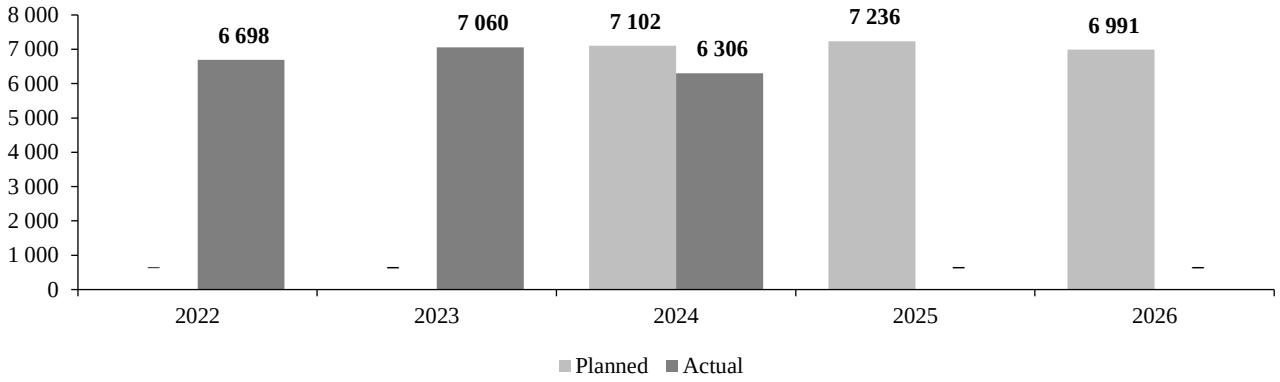
Result 2: increased interpretation services available to meet the growing demand of Member States for meetings with interpretation

Programme performance in 2024 and target for 2026

2.65 The subprogramme's work contributed to the use of interpretation resources being optimized through close coordination and loans between duty stations. While refinements in the forecasting function of the eAPG application contributed to efficient capacity planning, only 6,306 meetings were held with interpretation globally, which did not meet the planned target of 7,102 meetings being serviced. The target was not met due to the liquidity constraints in 2024.

2.66 Progress towards the objective and the target for 2026 are presented in figure 2.VII.

Figure 2.VII
Performance measure: global number of meetings held with interpretation (annual)



Result 3: enhanced publishing products for Member States and the public

Proposed programme plan for 2026

2.67 The subprogramme has a long-standing commitment to utilize the electronic distribution of documents and publications, as called for in successive General Assembly resolutions. Through the subprogramme's investments in technology and the expanded use of digital tools, such as the eSubscription platform, the availability of digital documents and publications has steadily grown. To continue expanding the production of digital documents and publications, the subprogramme has implemented workflows and production systems that can make documentation available in digital and accessible formats. These initiatives are consistent with the overall approach in the subprogramme's publishing operations to shift to a fully digital environment.

Lessons learned and planned change

2.68 The lesson for the subprogramme was the need to equip staff with the technical skills to take full advantage of existing and new tools to produce digital and accessible content. In applying the lesson, the subprogramme designed a tailored training programme to bring colleagues to the required level of proficiency to leverage technology and produce digital publications. The subprogramme will roll out this training and also continue to invest in production technology that allows for the flexible output of documents and publications.

2.69 Expected progress towards the objective is presented in table 2.13.

Table 2.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Postcards are distributed to delegates with Quick Response (QR) codes for direct access to the website and PDF versions of publications in the six official languages	Improved timeliness in the issuance of publications through the fine-tuning of the gDoc 2.0 workload management system	Accessibility enhanced by embedding alternative text into publications, such as the Secretary-General's annual report on the work of the Organization, in the six official languages	Availability of metadata-enriched digital and accessible content, including in Extensible Markup Language (XML) format, which enhances searchability and facilitates research	Timeliness, accessibility and quality of publications improved through the use of artificial intelligence tools

Deliverables

2.70 Table 2.14 lists all deliverables of the subprogramme.

Table 2.14
New York, subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2 580**	**2 863**	**2 880**	**2 880**
1. Verbatim records of the General Assembly	700	445	700	700

7. Verbatim records of the special sessions of the General Assembly	6	109	6	6
8. Verbatim records of the Trusteeship Council	6	–	6	6
Conference and secretariat services for meetings (number of three-hour meetings)	**12 700**	**7 643**	**12 700**	**11 000**
Meetings with interpretation for:	**2 850**	**2 569**	**2 850**	**2 650**
9. The Security Council and its sanctions committees and subsidiary working groups	650	648	650	700
10. The General Assembly and its Main Committees and subsidiary bodies	1 400	1 348	1 400	1 350
11. The Economic and Social Council and its subsidiary bodies and functional commissions	300	223	300	250
12. Permanent and observer missions to the United Nations	30	41	30	50
13. Other requesters	470	309	470	300
Meetings without interpretation for:	**9 850**	**5 074**	**9 850**	**8 350**
14. The Security Council and its sanctions committees and subsidiary working groups	100	46	100	50
15. The General Assembly and its Main Committees and subsidiary bodies	1 800	2 204	1 800	2 650
16. The Economic and Social Council and its subsidiary bodies and functional commissions	450	282	450	500

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned
17. Permanent and observer missions to the United Nations	3 100	817	3 100	2 200
18. Other requesters	4 400	1 725	4 400	2 950
E. Enabling deliverables				
Publishing services: publications, official records (approximately 2,800 verbatim records annually) and other materials in all official languages for hard copy and digital distribution; 21,000 parliamentary documents printed, bound and distributed; 211 publications and other materials in hard copy; and materials available in digital format.				

Conference management, Geneva

Subprogramme 2
Planning and coordination of conference services

Objective

2.71 The objective, to which this subprogramme contributes, is to ensure efficient, effective and multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Geneva.

Strategy

2.72 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities indicated in paragraph 2.33 above:

(a) Participate in the global innovation projects of the Department;

(b) Provide digital documentation to delegates in a structured and integrated way.

2.73 The above-mentioned work is expected to result in:

(a) More effective utilization and expanded provision of the Organization’s meetings and publishing services;

(b) Greater access for meeting participants and end users of publishing services to United Nations products to maximize their engagement with the intergovernmental process.

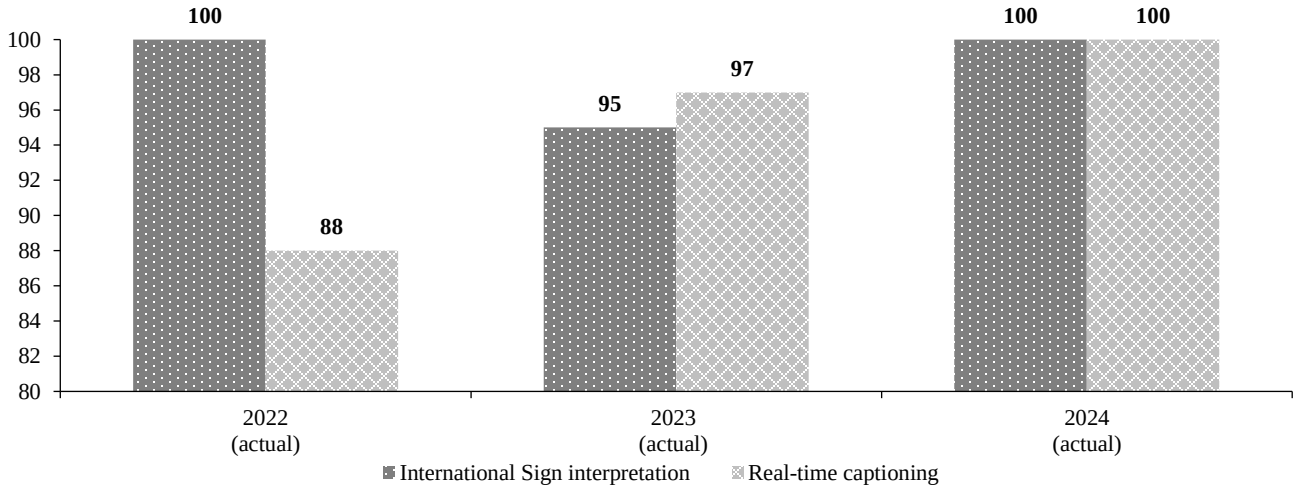
Programme performance in 2024

Increased satisfaction of conference participants with accessibility services at conferences amid constraints

2.74 The subprogramme faced a series of operational and financial challenges in 2024, including liquidity constraints and disruptions due to ongoing conference room renovations and closures. Despite these obstacles, the subprogramme successfully managed to plan the provision of all requests for sign language interpretation and captioning services, demonstrating resilience and adaptability. Meetings management staff maintained proactive communication with conference organizers regarding scheduling and space limitations. Positive feedback received from conference participants through a survey on accessibility reinforced the importance of maintaining high standards of service even during periods of uncertainty and heightened operational complexity.

2.75 Progress towards the objective is presented in figure 2.VIII.

Figure 2.VIII
Performance measure: conference participants' satisfaction with International Sign interpretation and captioning services, as reported in the satisfaction survey (annual)
(Percentage of survey respondents)



Planned results for 2026

Result 1: timely and reliable reporting of key performance indicators across duty stations made available to Member States

Programme performance in 2024 and target for 2026

2.76 The subprogramme's work contributed to all indicators subject to mandated reporting to Member States being calculated using globally harmonized methodologies, which met the planned target.

2.77 Progress towards the objective and the target for 2026 are presented in table 2.15.

Table 2.15
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Availability of some indicators and reports for mandated reporting to Member States	All indicators available in new gData dashboards, with globally harmonized methodologies for some indicators	All indicators subject to mandated reporting are calculated using globally harmonized methodologies	Mandated reporting of all indicators to Member States based on gData reports	More report types are readily available through the integration of gData with other enterprise applications

Result 2: global gateway for servicing conferences and meetings

Programme performance in 2024 and target for 2026

2.78 The subprogramme's work contributed to the preparations for the deployment of One-Stop Shop in Geneva, which did not meet the planned target of a subset of Geneva-based clients being able to request meeting services in Geneva through One-Stop Shop. The target was not met because the deployment in Geneva had to be postponed due to the lack of financial resources.

2.79 Progress towards the objective and the target for 2026 are presented in table 2.16.

Table 2.16
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	All clients at all duty stations can request meeting services, obtain cost estimates and receive a single bill through One-Stop Shop	All clients at all duty stations use One-Stop Shop to request meeting services and receive a single bill

Result 3: increased feedback from Member States through the global survey

Proposed programme plan for 2026

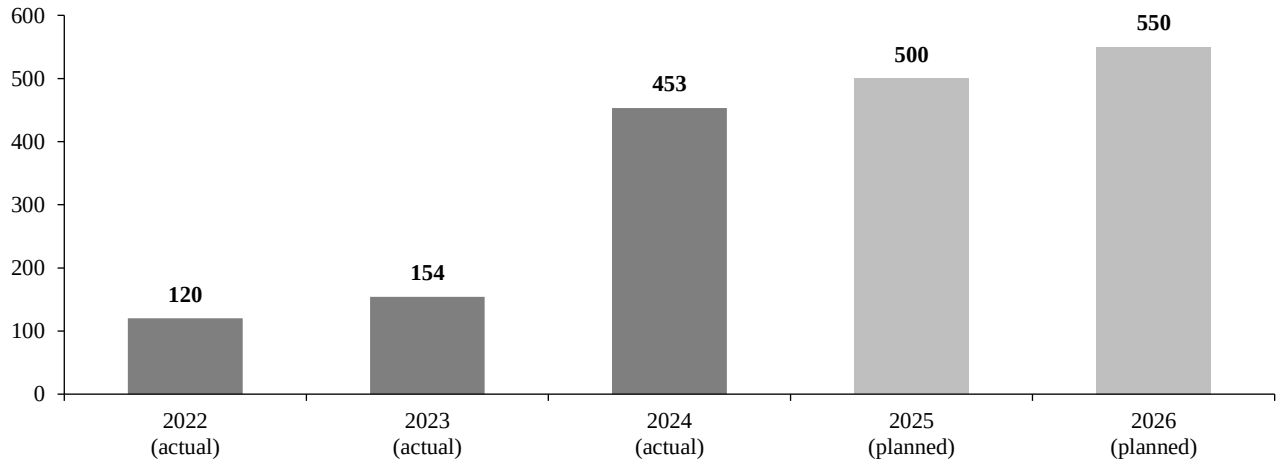
2.80 The subprogramme, in cooperation with the other duty stations, will revamp and implement the global survey, as described in paragraph 2.41 above.

Lessons learned and planned change

2.81 In line with the lesson learned, the subprogramme will implement measures to enhance the response rate for the global survey, as described in paragraph 2.42 above. To streamline efforts and avoid duplication, local surveys will be discontinued.

2.82 Expected progress towards the objective is presented in figure 2.IX.

Figure 2.IX
Performance measure: number of responses to the global survey (annual)



Deliverables

2.83 Table 2.17 lists all deliverables of the subprogramme.

Table 2.17
Geneva, subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	**12 000**	**8 505**	**9 000**	**8 800**
1. Meetings of intergovernmental and expert bodies on human rights, including the Human Rights Council and the treaty bodies	3 750	3 083	3 750	3 550
2. Meetings of intergovernmental and expert bodies on the environment, including the Conference of the Parties to the United Nations Framework Convention on Climate Change	2 000	1 838	1 600	1 600
3. Meetings of intergovernmental and expert bodies on cooperation for development, including the United Nations Conference on Trade and Development and the Economic Commission for Europe	1 950	1 154	1 250	1 250
4. Meetings of intergovernmental and expert bodies on disarmament, including the Conference on Disarmament	700	579	500	500
5. Other	3 600	1 851	1 900	1 900
B. Generation and transfer of knowledge				
Technical materials (number of materials)	**1**	**1**	**1**	**1**
6. Annual calendar of conferences and meetings in Geneva	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: informational session for permanent missions.				
D. Communication deliverables				
Outreach programmes, special events and information materials: notes verbales for permanent missions.				
Digital platforms and multimedia content: multilingual content for websites of the Department for General Assembly and Conference Management and the United Nations Office at Geneva, including on outreach to universities and on multilingualism.				

Subprogramme 3
Documentation services

Objective

2.84 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Geneva.

Strategy

2.85 To contribute to the objective, the subprogramme will continue, in coordination with the other main conference-servicing duty stations and in addition to the activities indicated in paragraph 2.46 above, to:

(a) Participate in the global innovation projects of the Department, including gDoc and gText, leverage information technology tools, including eLUNa, provide input to UNTERM and maintain its repository of Geneva-specific reference material for in-house and external language professionals;

(b) Reinforce communication to ensure that terminology creation standards remain aligned in UNTERM, in collaboration with New York;

(c) Continuously improve recruitment methods for temporary language staff and individual language contractors.

2.86 The above-mentioned work is expected to result in:

(a) The timely availability of high-quality documents, issued simultaneously in the official languages, in compliance with existing mandates;

(b) The consistent use of official terminology in the official languages;

(c) Improved access to knowledge resources through the provision of machine-readable documents.

Programme performance in 2024

Yearbooks of the International Law Commission are available sooner with the highest editorial standards maintained

2.87 In its resolution 79/248, the General Assembly emphasized that one of the Department's major goals was to provide high-quality documents in a timely manner in all official languages as efficiently and cost-effectively as possible. Within the subprogramme, it has been a challenge to process the *Yearbooks of the International Law Commission* in the six official languages given the length and complexity of these technical legal publications, which are used by Member States' national authorities and legal experts.

2.88 In 2024, the subprogramme streamlined the workflow for the *Yearbooks* by leveraging information technology tools, avoiding duplication and reducing the number of days required for proofreading, so as to deliver the *Yearbooks* faster. This new, rigorous process relied on close cooperation among editors, proofreaders and desktop publishing units in Geneva and succeeded in ensuring the highest editorial standards of publication.

2.89 Progress towards the objective is presented in table 2.18.

Table 2.18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	*Yearbooks of the International Law Commission* available sooner due in part to the number of days required for proofreading being on average 14 per cent lower

Planned results for 2026

Result 1: innovation in action: leveraging machine-readable documents

Programme performance in 2024 and target for 2026

2.90 The subprogramme's work contributed to the availability of resolutions adopted by the Human Rights Council in machine-readable format in line with the Akoma Ntoso standard, with visualizations, which met the planned target.

2.91 Progress towards the objective and the target for 2026 are presented in table 2.19.

Table 2.19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
User requirements validated and standardized markup available for Human Rights Council resolutions in machine-readable format in line with the Akoma Ntoso standard	Human Rights Council resolutions and decisions automatically generated in machine-readable format on a pilot basis in line with the Akoma Ntoso standard	Availability of resolutions adopted by the Human Rights Council in machine-readable format in line with the Akoma Ntoso standard, with visualizations	Availability of further refinements, including through master data, to facilitate information retrieval by Member States	Information retrieval by Member States is further facilitated by leveraging metadata contained in gDoc to further automate the generation of machine-readable documentation

Result 2: high-quality multilingual documentation through a translation quality management framework

Programme performance in 2024 and target for 2026

2.92 The subprogramme's work contributed to Member States providing feedback in the global survey by responding to questions aligned with the new translation quality framework, whereby they indicated that translation quality met their needs and expectations, which met the planned target.

2.93 Progress towards the objective and the target for 2026 are presented in table 2.20.

Table 2.20
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States provide feedback on their satisfaction with the linguistic quality of translated documents through the annual survey on conference services	Member States provide feedback through the global survey by responding to questions aligned with the new translation quality framework	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2024	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2025
	Responses received in 2023 indicate satisfaction with translation quality	Responses received in 2024 indicate satisfaction with translation quality		

Result 3: timely availability of documentation for meetings

Proposed programme plan for 2026

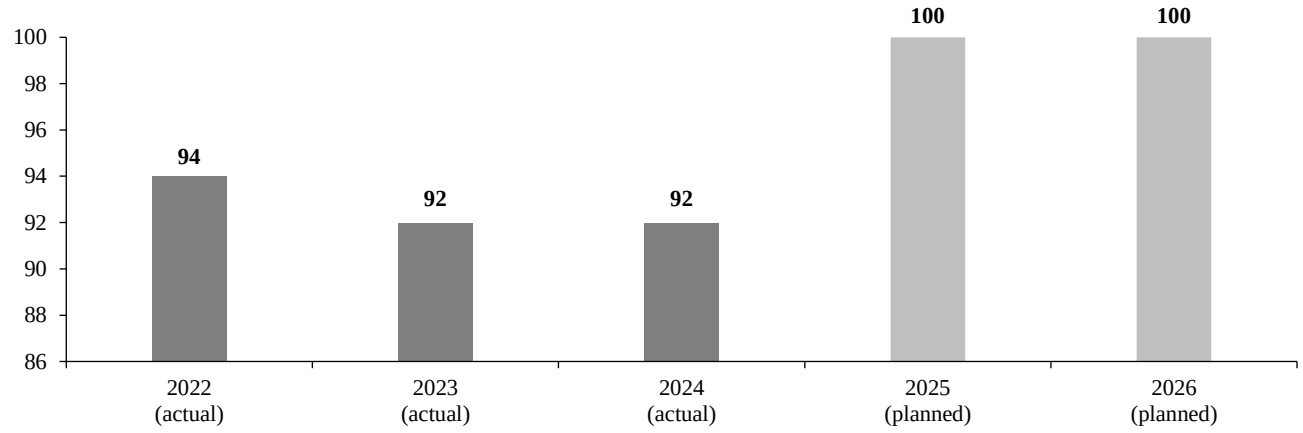
2.94 The subprogramme, in coordination with the other duty stations, will implement a learning and knowledge management programme, as described in paragraph 2.54 above.

Lessons learned and planned change

2.95 In line with the lesson described in paragraph 2.55 above, the subprogramme will target learning and training in key areas of work in Geneva, such as the International Law Commission, the Office for Disarmament Affairs and the United Nations Framework Convention on Climate Change, as well as maintaining a dedicated SharePoint site that serves as a repository of training information.

2.96 Expected progress towards the objective is presented in figure 2.X.

Figure 2.X
Performance measure: global timely issuance of parliamentary documentation (annual)
(Percentage)



Deliverables

2.97 Table 2.21 lists all deliverables of the subprogramme.

Table 2.21
Geneva, subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**550**	**458**	**580**	**500**
Summary records of:				
1. Meetings of intergovernmental and expert bodies on human rights	490	401	520	430
2. Meetings of intergovernmental and expert bodies on legal affairs	35	44	50	50
3. Other meetings	25	13	10	20
Documentation services for meetings (thousands of words)	**73 000**	**84 134**	**83 000**	**84 000**
4. Editing, translation and desktop publishing of documents for intergovernmental and expert bodies on human rights, including the Human Rights Council and the treaty bodies	42 250	48 614	51 500	51 500
5. Translation and desktop publishing of documents for intergovernmental and expert bodies on cooperation for development, including the United Nations Conference on Trade and Development and the Economic Commission for Europe	16 000	17 590	18 500	18 500
6. Editing, translation and desktop publishing of documents for intergovernmental and expert bodies on legal affairs, including the International Law Commission	4 850	2 526	2 500	3 000
7. Translation and desktop publishing of documents for intergovernmental and expert bodies on disarmament, including the Conference on Disarmament	3 500	6 510	3 500	4 000

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
8. Translation and desktop publishing of documents for intergovernmental and expert bodies on the environment, including the Conference of the Parties to the United Nations Framework Convention on Climate Change and the Conference of the Parties to the United Nations Convention to Combat Desertification	2 400	4 049	3 200	3 200
9. Editing, translation and desktop publishing of documents for other intergovernmental and expert bodies	4 000	4 845	3 800	3 800
C. Substantive deliverables				
Databases and substantive digital materials: UNTERM, comprising some 680,000 records.				
E. Enabling deliverables				
Correspondence and documentation services: documentation services; approximately 300 non-parliamentary documents provided to 30 clients; and mandated publications for the International Law Commission in the six official languages.				

Subprogramme 4
Meetings and publishing services

Objective

2.98 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Geneva.

Strategy

2.99 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities, except for verbatim reporting, indicated in paragraph 2.59 above:

(a) Lead innovation projects, including Indico.UN and fully automated speech-to-text (FAST) technology, and participate in full in the global innovation projects of the Department, including eAPG;

(b) Provide digital documentation to delegates in a structured and integrated way.

2.100 The above-mentioned work is expected to result in:

(a) More effective utilization and expanded provision of the Organization's meetings and publishing services;

(b) Greater access for meeting participants and end users of publishing services to United Nations products to maximize their engagement with the intergovernmental process.

Programme performance in 2024

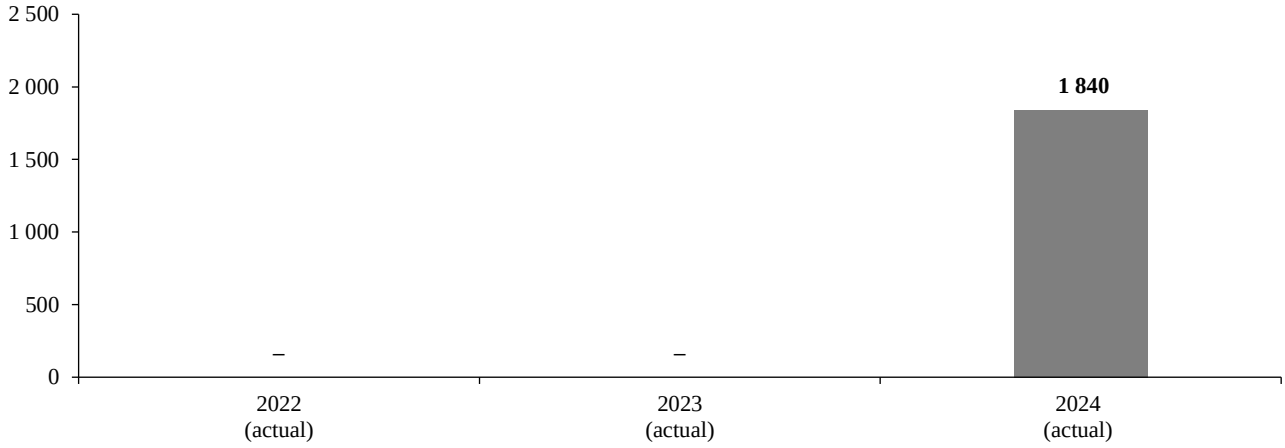
The *Journal of the United Nations* for Geneva: a new official digital platform for the provision of conference-related information

2.101 Before 2024, there was no official centralized platform for meeting and conference participants to access meeting-related content. To support integrated global management and building on successful launches in Vienna and Nairobi, the subprogramme leveraged existing technical expertise to expand the *Journal of the United Nations* to Geneva. In April 2024, the platform was officially launched in Geneva, providing users with easy access to essential meeting-related information, including documentation through a link to the "Documents and Services" web page supported by Indico.UN, webcasting and meeting room details. Since its launch, the *Journal of the United Nations* in Geneva

has announced over 2,000 meetings and supported more than 75 intergovernmental bodies, offering webcasting capabilities where available.

2.102 Progress towards the objective is presented in figure 2.XI.

Figure 2.XI
Performance measure: number of users of the *Journal of the United Nations* in Geneva



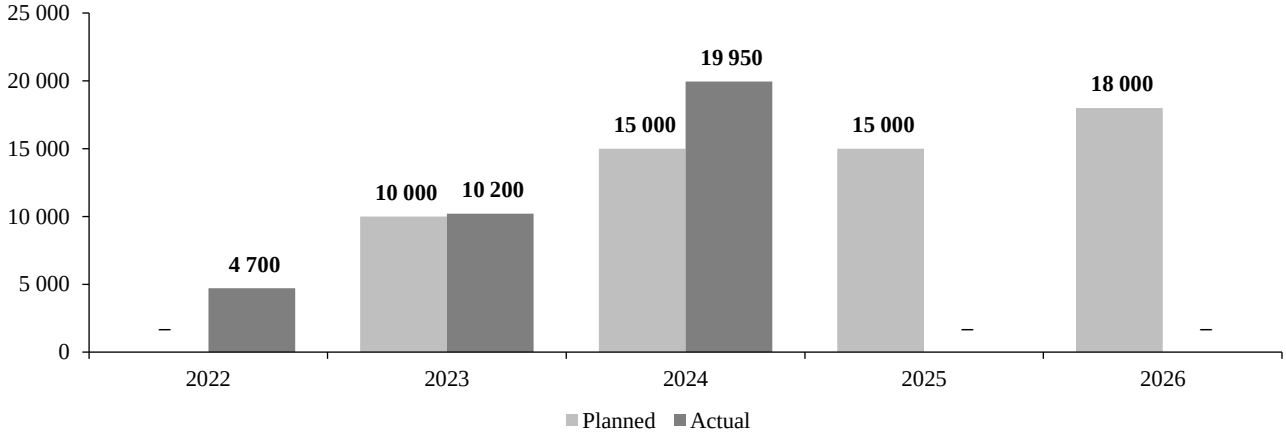
Result 1: automatic transcription in all languages through the use of fit-for-purpose technologies

Programme performance in 2024 and target for 2026

2.103 The subprogramme's work contributed to 19,950 hours of meeting recordings transcribed in 2024, which exceeded the planned target of 15,000 hours.

2.104 Progress towards the objective and the target for 2026 are presented in figure 2.XII.

Figure 2.XII
Performance measure: number of hours of meeting recordings transcribed (annual)



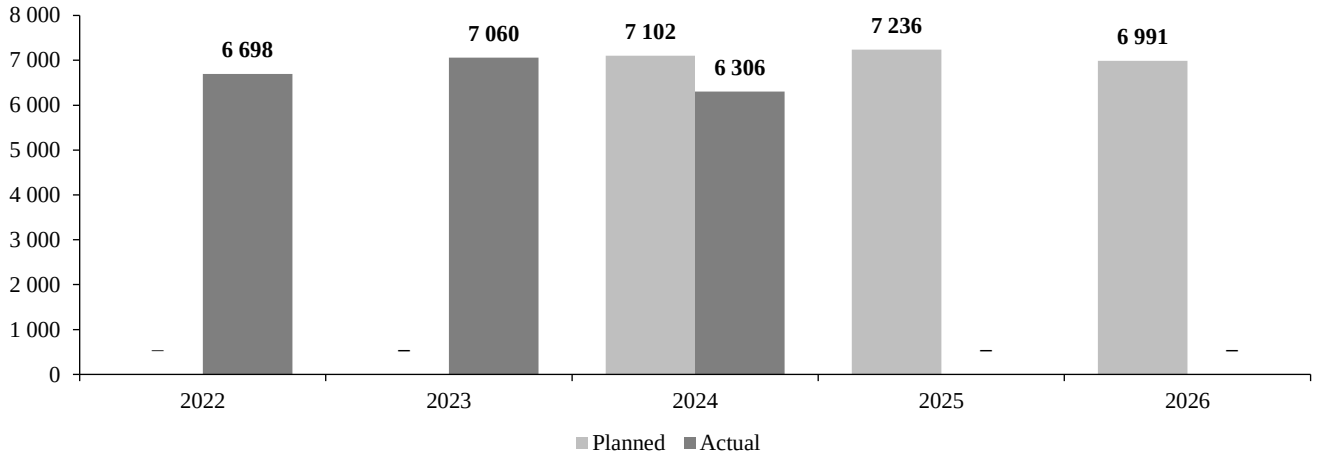
Result 2: increased interpretation services available to meet the growing demand of Member States for meetings with interpretation

Programme performance in 2024 and target for 2026

2.105 As described in paragraph 2.65 above, the subprogramme's work contributed to 6,306 meetings held with interpretation globally, which did not meet the planned target of 7,102 meetings. The target was not met due to liquidity constraints in 2024.

2.106 Progress towards the objective and the target for 2026 are presented in figure 2.XIII.

Figure 2.XIII
Performance measure: global number of meetings held with interpretation (annual)



Result 3: enhanced publishing products for Member States and the public

Proposed programme plan for 2026

2.107 The subprogramme has a long-standing commitment to enhancing the production and distribution of documents and publications, as mandated by successive General Assembly resolutions, and is pursuing a shift to a fully digital environment, as described in paragraph 2.67 above.

Lessons learned and planned change

2.108 Building on the lesson outlined in paragraph 2.68 above, the subprogramme will focus on enhancing staff skills through peer-to-peer training, resulting in the improved quality of digital products and services.

2.109 Expected progress towards the objective is presented in table 2.22.

Table 2.22
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Increased availability of documents in electronic format through the Indico.UN platform	Increased availability of publications in digital format to enable the author department to disseminate effectively	Provision of the *Journal of the United Nations* for Geneva. Availability of Quick Response (QR) codes for broader reach to official documents and publications	Availability of metadata-enriched digital and accessible content, including in Extensible Markup Language (XML) format, which enhances searchability and facilitates research	Timeliness, accessibility and quality of publications improved through the use of artificial intelligence tools

Deliverables

2.110 Table 2.23 lists all deliverables of the subprogramme.

Table 2.23
Geneva, subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	**3 200**	**2 756**	**3 200**	**3 000**
Meetings with interpretation for:				
1. Intergovernmental and expert bodies on human rights, including the Human Rights Council and the treaty bodies	1 530	1 477	1 850	1 550
2. Intergovernmental and expert bodies on the environment, including the Conference of the Parties to the United Nations Framework Convention on Climate Change	50	81	50	80
3. Intergovernmental and expert bodies on cooperation for development, including the United Nations Conference on Trade and Development and the Economic Commission for Europe	860	767	800	770
4. Intergovernmental and expert bodies on disarmament	240	214	250	250
5. Other meetings	520	217	250	350
E. Enabling deliverables				
Publishing services: design and layout of publications, multimedia products, web pages, outreach materials and other products, formatted for hard-copy and digital distribution to clients based in Geneva and at the request of entities outside Geneva.				

Conference management, Vienna

Subprogramme 2
Planning and coordination of conference services

Objective

2.111 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Vienna.

Strategy

2.112 To contribute to the objective, the subprogramme will, in coordination with the other duty stations, and in addition to the activities indicated in paragraph 2.33 above:

(a) Optimize capacity for meetings and documentation services in a globally coordinated manner;

(b) Engage in continuous dialogue and regular consultations with Member States and substantive and technical secretariats to respond early to any changing conference-servicing and documentation needs of all Vienna-based international organizations;

(c) Continue to develop innovative processes and best practices to meet the evolving needs of global conference servicing and leverage new technologies, including for business continuity within existing mandates.

2.113 The above-mentioned work is expected to result in:

(a) The cost-effective use of conference-servicing resources in the context of the mandated meetings of the client bodies;

(b) Responsive conference services that provide a broader range of client service modalities;

(c) The timely and simultaneous issuance of parliamentary documents in all six official languages.

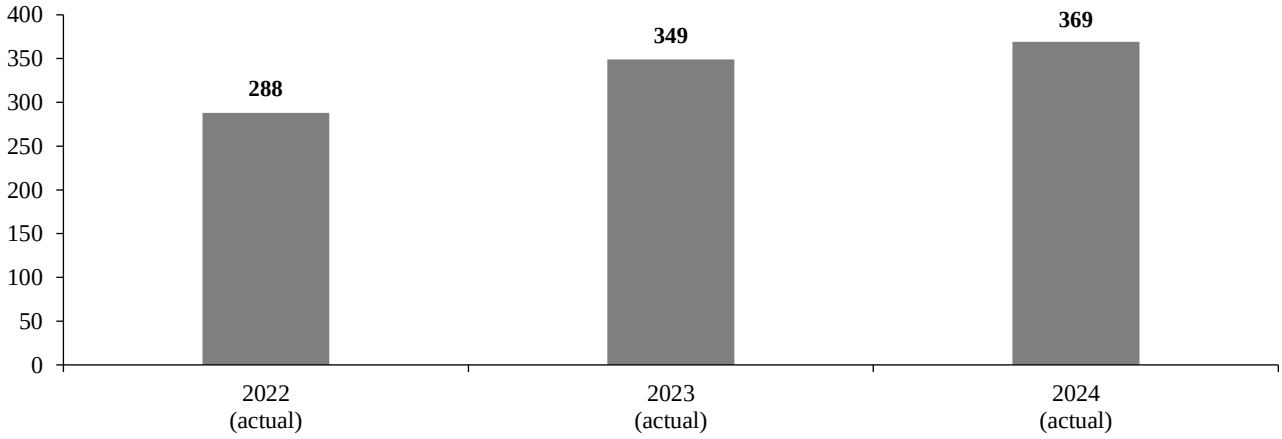
Programme performance in 2024

Self-serviced meetings address increased demand for non-calendar meetings

2.114 In 2024, to support the increased demand for non-calendar meetings, the subprogramme promoted self-serviced meetings and provided clients with guidance for operating the meeting room equipment and with troubleshooting support to hold non-calendar meetings autonomously. In this way, meeting organizers, including secretariats and Member States, benefited from more flexibility and were able to increase the number of non-calendar meetings despite imposed limits on resources.

2.115 Progress towards the objective is presented in figure 2.XIV.

Figure 2.XIV
Performance measure: number of non-calendar meetings held in Vienna



Planned results for 2026

Result 1: timely and reliable reporting of key performance indicators across duty stations made available to Member States

Programme performance in 2024 and target for 2026

2.116 The subprogramme's work contributed to all indicators subject to mandated reporting to Member States being calculated using globally harmonized methodologies, which met the planned target.

2.117 Progress towards the objective and the target for 2026 are presented in table 2.24.

Table 2.24
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Availability of some indicators and reports for mandated reporting to Member States	All indicators available in new gData dashboards, with globally harmonized methodologies for some indicators	All indicators subject to mandated reporting are calculated using globally harmonized methodologies	Mandated reporting of all indicators to Member States based on gData reports	More report types are readily available through the integration of gData with other enterprise applications

Result 2: global gateway for servicing conferences and meetings

Programme performance in 2024 and target for 2026

2.118 The subprogramme's work contributed to all clients being able to request meeting services in Vienna through One-Stop Shop, which met the planned target.

2.119 Progress towards the objective and the target for 2026 are presented in table 2.25.

Table 2.25
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	A subset of clients can request meeting services in Vienna through One-Stop Shop	All clients can request meeting services in Vienna through One-Stop Shop	All clients at all duty stations can request meeting services, obtain cost estimates and receive a single bill through One-Stop Shop	All clients at all duty stations use One-Stop Shop to request meeting services and receive a single bill

Result 3: increased feedback from Member States through the global survey

Proposed programme plan for 2026

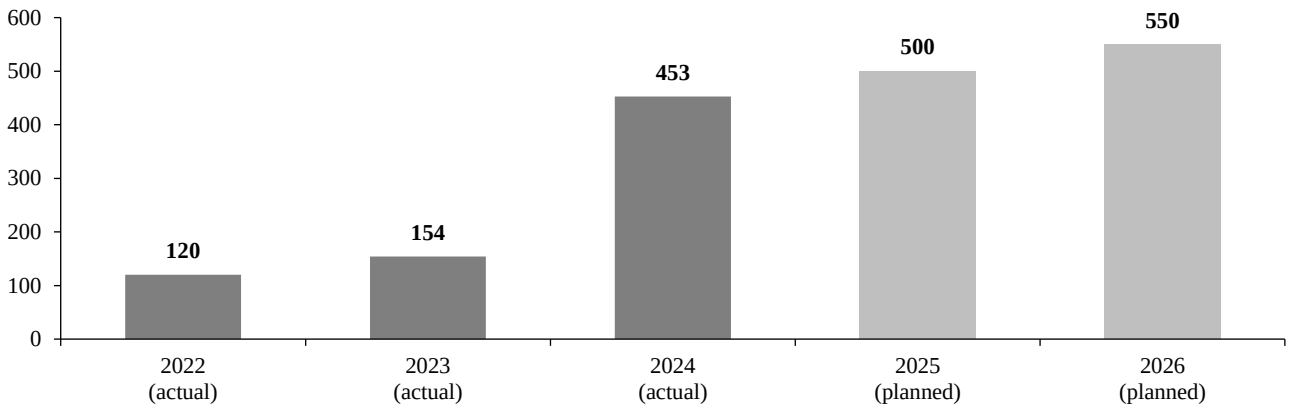
2.120 The subprogramme, in cooperation with the other duty stations, will revamp and implement the global survey, as described in paragraph 2.41 above.

Lessons learned and planned change

2.121 In line with the lesson learned, the subprogramme will take measures to increase the response rate, as described in paragraph 2.42 above. To streamline efforts and avoid duplication, local surveys will be discontinued.

2.122 Expected progress towards the objective is presented in figure 2.XV.

Figure 2.XV
Performance measure: number of responses to global survey (annual)



Deliverables

2.123 Table 2.26 lists all deliverables of the subprogramme.

Table 2.26
Vienna, subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	**5 890**	**6 034**	**4 900**	**5 151**
1. Meetings of the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice, the Conference of the States Parties to the United Nations Convention against Corruption and the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, as well as meetings related to the United Nations Convention against Cybercrime and other subsidiary bodies (United Nations Office on Drugs and Crime)	3 060	2 855	2 250	2 546
2. Meetings of the International Narcotics Control Board	110	155	160	160
3. Meetings of the Committee on the Peaceful Uses of Outer Space and its subcommittees	560	554	560	615
4. Meetings of the United Nations Commission on International Trade Law (UNCITRAL) and its working groups	130	127	160	140
5. Meetings of the United Nations Scientific Committee on the Effects of Atomic Radiation	90	40	110	90
6. Meetings of the United Nations Industrial Development Organization	380	349	390	330
7. Meetings of the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization, Working Groups A and B	1 060	779	770	770
8. Other meetings	500	1 175	500	500
B. Generation and transfer of knowledge				
Technical materials (number of materials)	**252**	**245**	**252**	**252**
9. Annual calendar of conferences and meetings in Vienna	1	1	1	1
10. Daily “master final” programme of meetings of intergovernmental bodies	251	244	251	251
C. Substantive deliverables				
Consultation, advice and advocacy: informational session for 152 permanent missions in Vienna.				
D. Communication deliverables				
Outreach programmes, special events and information materials: language day celebrations of the six official languages.				

Subprogramme 3
Documentation services

Objective

2.124 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Vienna.

Strategy

2.125 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities indicated in paragraph 2.46 above:

(a) Participate in the Department's global innovation projects, including gDoc and gText, leverage information technology tools, including eLUNa, provide input to UNTERM and maintain its repository of Vienna-specific reference material for in-house and external language professionals;

(b) Provide guidance to producers and users of terminology to ensure that terminology creation standards remain aligned in UNTERM;

(c) Pursue dialogue with substantive secretariats and Member States to respond to their needs, requirements and priorities, and rigorously plan and coordinate documentation workflows and capacity.

2.126 The above-mentioned work is expected to result in:

(a) The timely availability of high-quality documents, issued simultaneously in the official languages, in compliance with existing mandates;

(b) The consistent use of official terminology in the official languages;

(c) Improved access to knowledge resources through the provision of machine-readable documents.

Programme performance in 2024

Linguistic consistency ensured for the United Nations Convention against Cybercrime in the six official languages

2.127 After four years of intergovernmental negotiations, the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes held its concluding session in 2024 to finalize the text of the Convention. At that final stage, it was important that the sensitive legal and technical concepts contained in the text be understood in the same way in all six official languages to facilitate adoption. To that end, a language consistency group composed of Member State delegates representing the six official languages was convened by the Ad Hoc Committee.

2.128 In 2024, the subprogramme provided its linguistic expertise to the consistency group, working closely with delegates to answer queries and clarify critical issues regarding editorial standards, terminology and phraseology. As a result, the text of the instrument was further improved, as acknowledged and appreciated by the consistency group, and was aligned in the six official languages.

2.129 Progress towards the objective is presented in table 2.27.

Table 2.27
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Timely provision of documents, including draft resolutions, which facilitated the negotiation process	Convention drafting proceeded with the support of dedicated linguistic expertise, translation guidelines and harmonized terminology in the six official languages	Adoption of the Convention was facilitated through the sharing of expertise with the language consistency group

Planned results for 2026

Result 1: innovation in action: leveraging machine-readable documents

Programme performance in 2024 and target for 2026

2.130 The subprogramme's work contributed to the United Nations Convention on Contracts for the International Sale of Goods being automatically generated in a machine-readable format in line with the Akoma Ntoso standard, which met the planned target.

2.131 Progress towards the objective and the target for 2026 are presented in table 2.28.

Table 2.28
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
User requirements validated through an assessment of the feasibility of converting certain UNCITRAL document types into machine-readable format	UNCITRAL summary records automatically generated in machine-readable format on a pilot basis in line with the Akoma Ntoso standard	Availability of UNCITRAL model laws and conventions in machine-readable format in line with the Akoma Ntoso standard, with visualizations	Availability of further refinements, including through master data, to facilitate information retrieval by Member States	Information retrieval by Member States is further facilitated by leveraging metadata contained in gDoc to further automate the generation of machine-readable documentation

Result 2: high-quality multilingual documentation through a translation quality management framework

Programme performance in 2024 and target for 2026

2.132 The subprogramme's work contributed to Member States providing feedback in the global survey by responding to questions aligned with the new translation quality framework, whereby they indicated that translation quality met their needs and expectations, which met the planned target.

2.133 Progress towards the objective and the target for 2026 are presented in table 2.29.

Table 2.29
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States provide feedback on their satisfaction with the linguistic quality of translated documents through the annual survey on conference services Responses received in 2023 indicate satisfaction with translation quality	Member States provide feedback through the global survey by responding to questions aligned with the new translation quality framework Responses received in 2024 indicate satisfaction with translation quality	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2024	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2025

Result 3: timely availability of documentation for meetings

Proposed programme plan for 2026

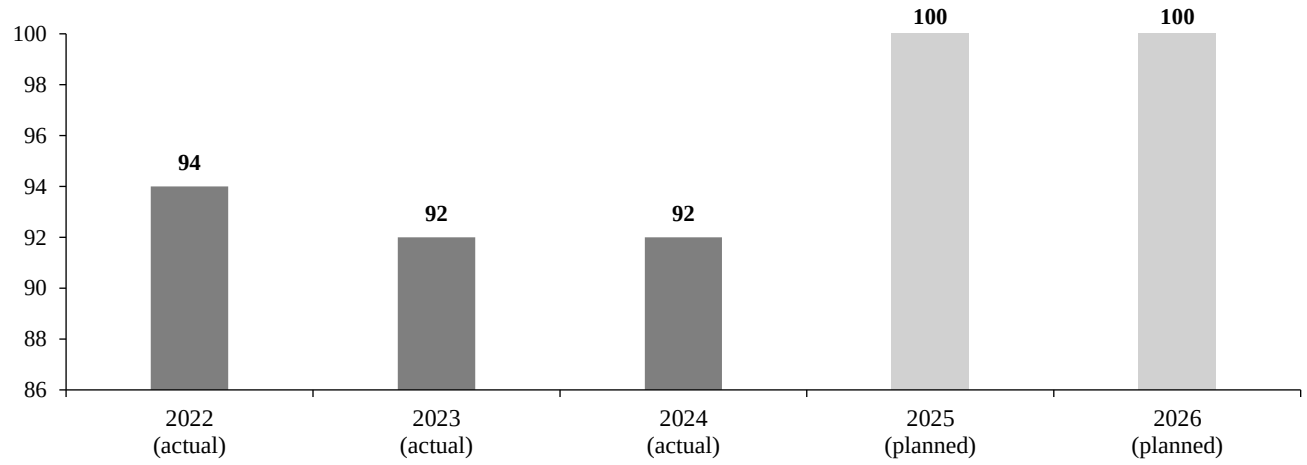
2.134 The subprogramme, in coordination with the other duty stations, will implement a learning and knowledge management programme, as described in paragraph 2.54 above.

Lessons learned and planned change

2.135 In line with the lesson described in paragraph 2.55 above, the subprogramme will engage with the substantive secretariats of client entities in Vienna to organize presentations for language staff about emerging and specialized concepts and developments in key areas of work, such as international trade law, outer space, and drugs and crime. It will also maintain a dedicated SharePoint site that serves as a repository of training information.

2.136 Expected progress towards the objective is presented in figure 2.XVI.

Figure 2.XVI
Performance measure: global timely issuance of parliamentary documentation (annual)
(Percentage)



Deliverables

2.137 Table 2.30 lists all deliverables of the subprogramme.

Table 2.30
Vienna, subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Documentation services for meetings (thousands of words)	**26 400**	**23 053**	**25 180**	**26 870**
1. Editing, translation and desktop publishing of documents for the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice, the Conference of the States Parties to the United Nations Convention against Corruption and the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, as well as meetings related to the United Nations Convention against Cybercrime and other subsidiary bodies (United Nations Office on Drugs and Crime)	11 300	9 050	10 300	12 000
2. Editing, translation and desktop publishing of documents for the International Narcotics Control Board	4 200	3 296	3 150	3 000
3. Editing, translation and desktop publishing of documents for the Committee on the Peaceful Uses of Outer Space and its subcommittees	2 800	2 312	2 550	2 500
4. Editing, translation and desktop publishing of documents for UNCITRAL and its working groups	6 030	5 611	6 575	6 500
5. Editing, translation and desktop publishing of documents for the United Nations Scientific Committee on the Effects of Atomic Radiation	70	48	105	70
6. Translation and desktop publishing of documents for the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization, Working Groups A and B	1 000	893	1 000	1 000
7. Translation and desktop publishing of documents for the United Nations Industrial Development Organization	1 000	1 032	1 500	1 000
8. Editing, translation and desktop publishing of documents for other United Nations entities	–	811	–	800
C. Substantive deliverables				
Databases and substantive digital materials: UNTERM, comprising some 680,000 records.				
E. Enabling deliverables				
Correspondence and documentation services: documentation services of more than 5 million words of non-parliamentary documents and publications in all official languages.				

Subprogramme 4
Meetings and publishing services

Objective

2.138 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Vienna.

Strategy

2.139 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities, except for verbatim reporting, indicated in paragraph 2.59 above:

(a) Provide interpretation and publishing services in the official languages for United Nations entities and governing bodies operating from Vienna, as well as for other Vienna-based organizations;

(b) Utilize data-driven methodologies to ensure maximum responsiveness to client needs, including by increasing the pool of freelance interpreters;

(c) Ensure the sustainability and accessibility of publishing services, including by expanding the array of e-publishing products.

2.140 The above-mentioned work is expected to result in:

(a) Optimized interpretation services that are responsive to new and emerging conference services needs;

(b) Member States receiving visually informative content that is processed and distributed with minimal environmental impact.

Programme performance in 2024

Strengthened multilingualism through updated website in seven languages

2.141 The subprogramme continued to take concrete measures to implement multilingualism in publishing services. This was achieved through the modernization, redesign and innovation of the United Nations Office at Vienna public website in the six official languages, as well as the host country language, German. The design was brought into line with both the latest United Nations guidelines on website design and website creation/management tools, which allow for the creation of a modern "mobile-responsive" website and support interactive features (e.g. a sortable meetings calendar).

2.142 Progress towards the objective is presented in table 2.31.

Table 2.31
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Public website content is outdated and non-compliant with United Nations design guidelines	Public website is compliant with United Nations design guidelines and provides up-to-date content, including in mobile-responsive formats, with interactive features such as a sortable meetings calendar

Planned results for 2026

Result 1: improved discoverability and accessibility of publications through the use of fit-for-purpose technologies

Programme performance in 2024 and target for 2026

2.143 The subprogramme's work contributed to improving the accessibility and discoverability of publications through the inclusion of improved accessibility elements, such as alternative text descriptions for tables and figures for key publications, such as the annual reports of the United Nations Industrial Development Organization and of the Office for Outer Space Affairs, which met the planned target.

2.144 Progress towards the objective and the target for 2026 are presented in table 2.32.

Table 2.32
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Vienna-based organizations have metadata included in their publications to improve discoverability, along with a social media product to support the online promotion of their publications	Alternative text descriptions for tables and figures for some publications available to support accessibility and updated metadata guidelines to improve discoverability	Improved accessibility and discoverability of publications, including through the incorporation of accessibility elements, such as alternative text, in all six official languages	Improved digital publications and metadata with higher levels of accessibility and discoverability	Improved digital publications and metadata with higher levels of accessibility and discoverability

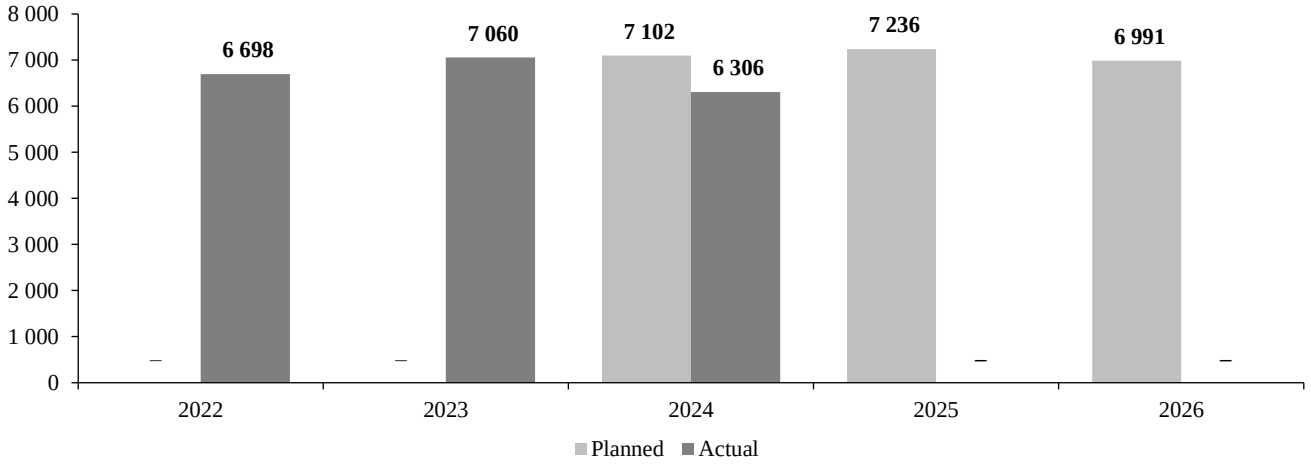
Result 2: increased interpretation services available to meet the growing demand of Member States for meetings with interpretation

Programme performance in 2024 and target for 2026

2.145 As described in paragraph 2.65 above, the subprogramme's work contributed to 6,306 meetings held with interpretation globally, which did not meet the planned target of 7,102 meetings. The target was not met due to liquidity constraints in 2024.

2.146 Progress towards the objective and the target for 2026 are presented in figure 2.XVII.

Figure 2.XVII
Performance measure: global number of meetings held with interpretation (annual)



Result 3: enhanced publishing products for Member States and the public

Proposed programme plan for 2026

2.147 The subprogramme has a long-standing commitment to take advantage of the electronic distribution of documents and publications and is pursuing a shift to a fully digital environment, as described in paragraph 2.67 above.

Lessons learned and planned change

2.148 Building on the lesson outlined in paragraph 2.68 above, the subprogramme will focus on enhancing staff skills through peer-to-peer training, resulting in the improved quality of digital products and services.

2.149 Expected progress towards the objective is presented in table 2.33.

Table 2.33
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Improved timeliness in the issuance of publications through the fine-tuning of the gDoc 2.0 workload management system	Availability of publications enhanced with accessibility features, such as image descriptions and the setting of the correct reading order for headings, text and images in read-aloud mode	Availability of metadata-enriched digital and accessible content, including in Extensible Markup Language (XML) format, which enhances searchability and facilitates research	Timeliness, accessibility and quality of publications improved through the use of artificial intelligence tools

Deliverables

2.150 Table 2.34 lists all deliverables of the subprogramme.

Table 2.34
Vienna, subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

E. Enabling deliverables				
Publishing services: correspondence for 7 United Nations entities; and layout and design of publications, multimedia products, web pages, outreach materials and other products in the 6 official languages for hard-copy and digital distribution to the Vienna client group, and at the request of entities outside Vienna.				

Conference management, Nairobi

Subprogramme 2
Planning and coordination of conference services

Objective

2.151 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Nairobi.

Strategy

2.152 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities indicated in paragraph 2.33 above:

(a) Provide substantive and organizational support to the main intergovernmental bodies headquartered in Nairobi and to other non-calendar intergovernmental bodies, such as those under the substantive coordination of the United Nations Environment Programme (UNEP) and the United Nations Human Settlements Programme (UN-Habitat);

(b) Optimize capacity for meetings and documentation services in a globally coordinated manner;

(c) Engage in regular consultations with Member States and substantive and technical secretariats to respond immediately to any changing conference-servicing and documentation needs of the Nairobi-based clients;

(d) Contribute to innovative processes and best practices to meet the evolving needs of global conference servicing and leverage new technologies, including for business continuity within existing mandates;

(e) Streamline workflows relating to conference service requests.

2.153 The above-mentioned work is expected to result in:

(a) An increased number of meetings of intergovernmental bodies provided with adequate conference services;

(b) An enhanced user experience, in particular with regard to the advance planning of events, including better budgeting, resulting in improved deliberations and decision-making processes of the bodies and organs serviced;

(c) The timely and simultaneous availability of parliamentary documents in all six official languages.

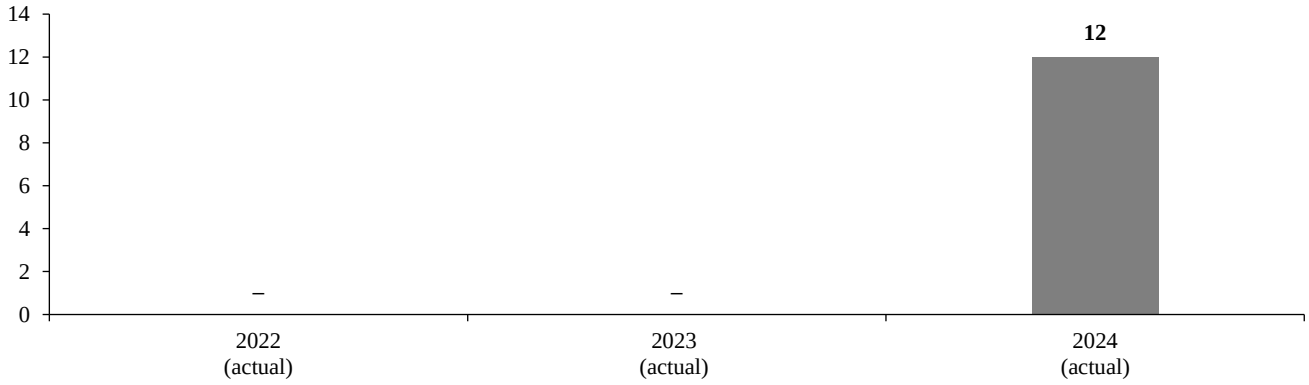
Programme performance in 2024

Meeting service requests for newly established open-ended intergovernmental expert working group fulfilled

2.154 In 2024, the subprogramme provided organizational and conference-servicing support for the newly established open-ended intergovernmental expert working group on adequate housing for all, an intergovernmental process mandated by the UN-Habitat Assembly at its second session. Since the meetings of the working group were an unexpected addition to the calendar of meetings in Nairobi, the Department engaged and coordinated closely with UN-Habitat on scheduling and the programme of work, which ensured the efficient fulfilment of the associated conference-servicing needs.

2.155 Progress towards the objective is presented in figure 2.XVIII.

Figure 2.XVIII
Performance measure: number of meetings serviced for the open-ended intergovernmental expert working group on adequate housing for all



Planned results for 2026

Result 1: timely and reliable reporting of key performance indicators across duty stations made available to Member States

Programme performance in 2024 and target for 2026

2.156 The subprogramme's work contributed to all indicators subject to mandated reporting to Member States being calculated using globally harmonized methodologies, which met the planned target.

2.157 Progress towards the objective and the target for 2026 are presented in table 2.35.

Table 2.35
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Availability of some indicators and reports for mandated reporting to Member States	All indicators available in new gData dashboards, with globally harmonized methodologies for some indicators	All indicators subject to mandated reporting are calculated using globally harmonized methodologies	Mandated reporting of all indicators to Member States based on gData reports	More report types are readily available through the integration of gData with other enterprise applications

Result 2: global gateway for servicing conferences and meetings

Programme performance in 2024 and target for 2026

2.158 The subprogramme's work contributed to all clients being able to obtain cost estimates for meeting services in Nairobi through local applications, which met the planned target.

2.159 Progress towards the objective and the target for 2026 are presented in table 2.36.

Table 2.36
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
A subset of clients can request meeting services in Nairobi through One-Stop Shop	All clients can request meeting services in Nairobi through One-Stop Shop	All clients can obtain cost estimates for meeting services in Nairobi through local applications	All clients at all duty stations can request meeting services, obtain cost estimates and receive a single bill through One-Stop Shop	All clients at all duty stations use One-Stop Shop to request meeting services and receive a single bill

Result 3: increased feedback from Member States through the global survey

Proposed programme plan for 2026

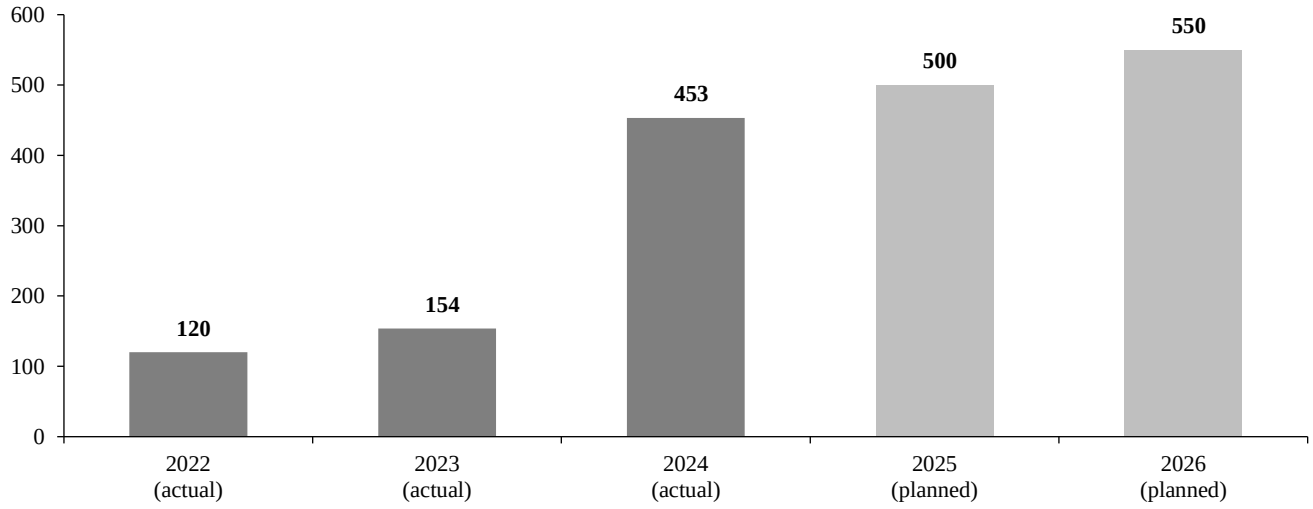
2.160 The subprogramme, in cooperation with the other duty stations, will revamp and implement the global survey, as described in paragraph 2.41 above.

Lessons learned and planned change

2.161 The lesson for the subprogramme was as described in paragraph 2.42 above, and the subprogramme will take measures to increase the response rate, as described in paragraph 2.42 above. To streamline efforts and avoid duplication, local surveys will be discontinued.

2.162 Expected progress towards the objective is presented in figure 2.XIX.

Figure 2.XIX
Performance measure: number of responses to the global survey (annual)



Deliverables

2.163 Table 2.37 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: informational services and advice to the Bureau of the UN-Habitat Executive Board, the Committee of Permanent Representatives to UNEP and the United Nations Environment Assembly; and orientation sessions for new members of the Committee of Permanent Representatives to UNEP and of the Committee of Permanent Representatives to UN-Habitat.				

Subprogramme 3
Documentation services

Objective

2.164 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Nairobi.

Strategy

2.165 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities indicated in paragraph 2.46 above:

(a) Participate in the global innovation projects of the Department, including gDoc and gText, leverage information technology tools, including eLUNa, provide input to UNTERM and maintain its repository of Nairobi-specific reference material for in-house and external language professionals;

(b) Pursue dialogue with substantive secretariats and Member States to respond to their needs, requirements and priorities, and rigorously plan and coordinate documentation workflows and capacity;

(c) Provide report-writing services for substantive secretariats of various multilateral environmental agreements.

2.166 The above-mentioned work is expected to result in:

(a) The timely availability of high-quality documents, issued simultaneously in the official languages, in compliance with existing mandates;

(b) The consistent use of official terminology in the official languages;

(c) Improved access to knowledge resources through the provision of machine-readable documents for the United Nations.

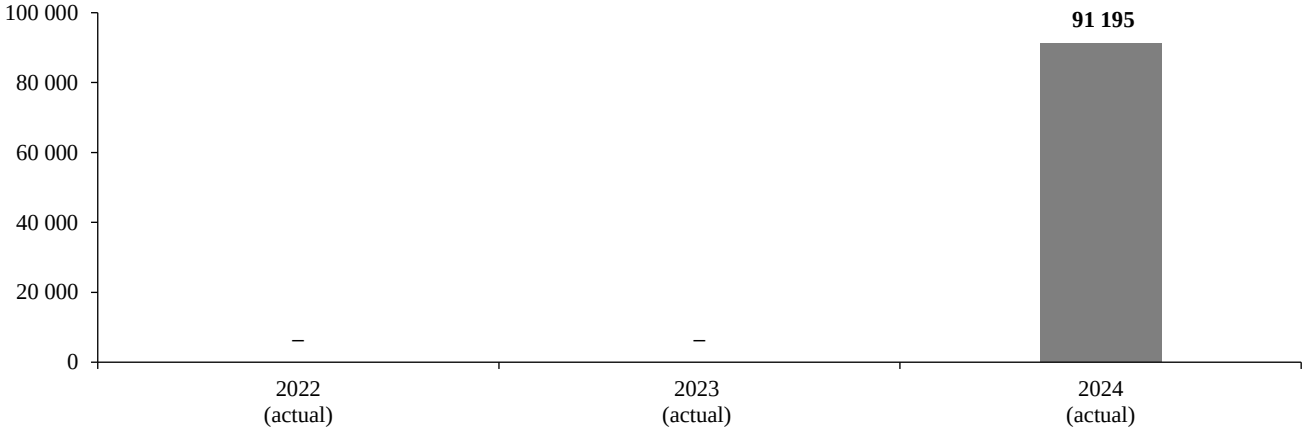
Programme performance in 2024

New intergovernmental body receives high-quality documentation services

2.167 In 2024, the subprogramme began to service the newly established open-ended intergovernmental expert working group on adequate housing for all, as noted in paragraph 2.154 above. The subprogramme successfully readjusted its priorities, despite the liquidity constraints, and provided high-quality multilingual documentation services, ensuring an efficient and effective multilingual deliberation and decision-making process.

2.168 Progress towards the objective is presented in figure 2.XX.

Figure 2.XX
Performance measure: words processed for the open-ended intergovernmental expert working group on adequate housing for all



Planned results for 2026

Result 1: innovation in action: leveraging machine-readable documents

Programme performance in 2024 and target for 2026

2.169 The subprogramme's work contributed to the availability of United Nations Environment Assembly resolutions generated in machine-readable format in line with the Akoma Ntoso standard, with visualizations, which met the planned target.

2.170 Progress towards the objective and the target for 2026 are presented in table 2.38.

Table 2.38
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
User requirements validated through a feasibility assessment consisting of converting United Nations Environment Assembly resolutions into a machine-readable format	United Nations Environment Assembly resolutions automatically generated in machine-readable format on a pilot basis in line with the Akoma Ntoso standard	Availability of United Nations Environment Assembly resolutions generated in machine-readable format in line with the Akoma Ntoso standard, with visualizations	Availability of further refinements, including through master data, to facilitate information retrieval by Member States	Information retrieval by Member States is further facilitated by leveraging metadata contained in gDoc to further automate machine-readable documentation

Result 2: high-quality multilingual documentation through a translation quality management framework

Programme performance in 2024 and target for 2026

2.171 The subprogramme's work contributed to Member States providing feedback in the global survey by responding to questions aligned with the new translation quality framework, whereby they indicated that translation quality met their needs and expectations, which met the planned target.

2.172 Progress towards the objective and the target for 2026 are presented in table 2.39.

Table 2.39
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States provide feedback on their satisfaction with the linguistic quality of translated documents through the annual survey on conference services	Member States provide feedback through the global survey by responding to questions aligned with the new translation quality framework	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2024	Member States indicate that translation quality meets their needs and expectations to the same extent as in 2025
	Responses received in 2023 responses indicate satisfaction with translation quality	Responses received in 2024 indicate satisfaction with translation quality		

Result 3: timely availability of documentation for meetings

Proposed programme plan for 2026

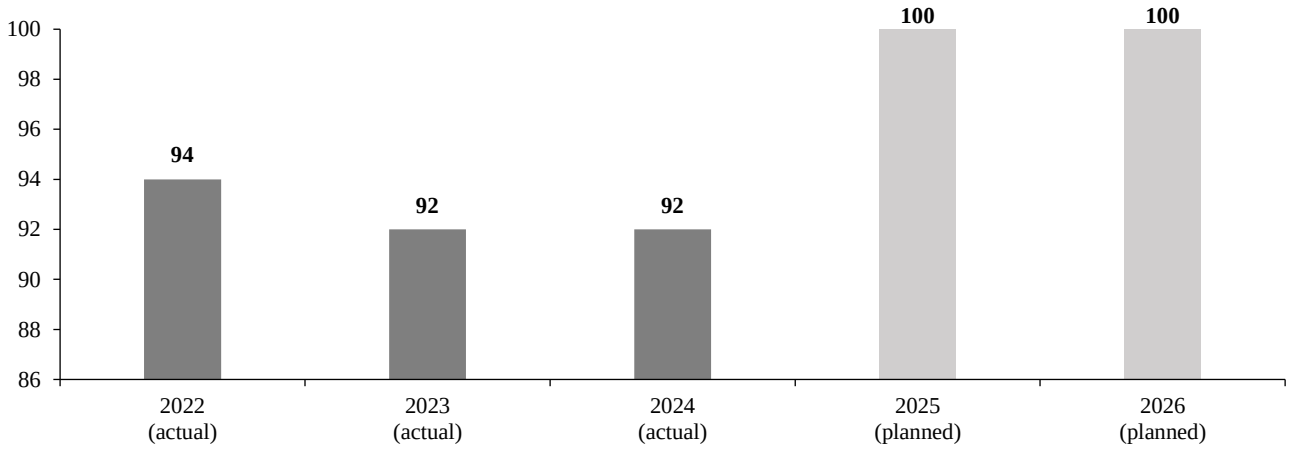
2.173 The subprogramme, in coordination with the other duty stations, will implement a learning and knowledge management programme, as described in paragraph 2.54 above.

Lesson learned and planned change

2.174 In line with the lesson described in paragraph 2.55 above, the subprogramme will target learning and training activities in the key areas of work in Nairobi, such as the Minamata Convention on Mercury, the Stockholm Convention on Persistent Organic Pollutants, the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal and other areas that require highly technical knowledge. The subprogramme will also maintain a dedicated SharePoint site that serves as a repository of training material.

2.175 Expected progress towards the objective is presented in figure 2.XXI.

Figure 2.XXI
Performance measure: global timely issuance of parliamentary documentation (annual)
(Percentage)



Deliverables

2.176 Table 2.40 lists all deliverables of the subprogramme.

Table 2.40
Nairobi, subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Documentation services for meetings (thousands of words)	**9 000**	**8 105**	**9 250**	**8 000**
Editing, translation and desktop publishing of documents for:

8. The intergovernmental negotiating committee on plastic pollution to develop an international legally binding instrument on plastic pollution, including in the marine environment	600	950	–	950
9. The ad hoc open-ended working group on a science-policy panel to contribute further to the sound management of chemicals and waste and to prevent pollution	600	620	–	600
10. Other intergovernmental bodies	2 850	1 489	3 300	1 500
C. Substantive deliverables				
Databases and substantive digital materials: UNTERM, comprising some 680,000 records.				

Subprogramme 4
Meetings and publishing services

Objective

2.177 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences serviced by the United Nations in Nairobi.

Strategy

2.178 To contribute to the objective, the subprogramme will, in coordination with the other duty stations and in addition to the activities, except for verbatim reporting, indicated in paragraph 2.59 above, provide meetings and publishing services to the main intergovernmental bodies headquartered in Nairobi and to other non-calendar intergovernmental bodies or secretariats requesting interpretation and publishing services.

2.179 The above-mentioned work is expected to result in:

(a) Servicing capacity aligned with expected increases in meeting demand;

(b) Enhanced accessibility and continued sustainability of publishing services and of conference support services for meetings participants.

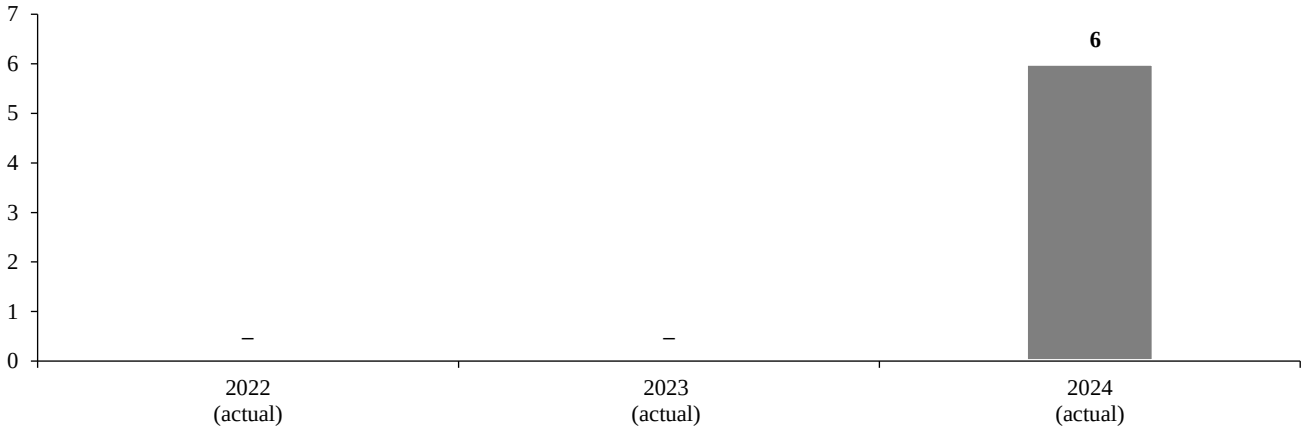
Programme performance in 2024

A new intergovernmental body receives high-quality interpretation services

2.180 In 2024, the subprogramme began to service the newly established open-ended intergovernmental expert working group on adequate housing for all, as noted in paragraph 2.154 above. The subprogramme successfully readjusted its priorities despite the liquidity constraints and provided high-quality interpretation services in the six official languages, ensuring efficient and effective multilingual deliberation and decision-making processes.

2.181 Progress towards the objective is presented in figure 2.XXII.

Figure 2.XXII
Performance measure: number of additional sessions serviced for the new open-ended intergovernmental expert working group on adequate housing for all



Planned results for 2026

Result 1: enhanced accessibility and usability of publications through the use of defined best practices and fit-for-purpose digital technologies

Programme performance in 2024 and target for 2026

2.182 The subprogramme's work contributed, through the application of accessibility guidelines, to enhancing the discoverability and accessibility of a subset of 120 publications for UN-Habitat, which met the planned target.

2.183 Progress towards the objective and the target for 2026 are presented in table 2.41.

Table 2.41
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	A small subset of publications updated that apply the guidelines to enhance their discoverability and usability	Improved discoverability and usability of 120 publications for UN-Habitat in all official languages	Improved digital publications and metadata with higher levels of accessibility and discoverability	200 additional UN-Habitat publications with enhanced level of accessibility and discoverability

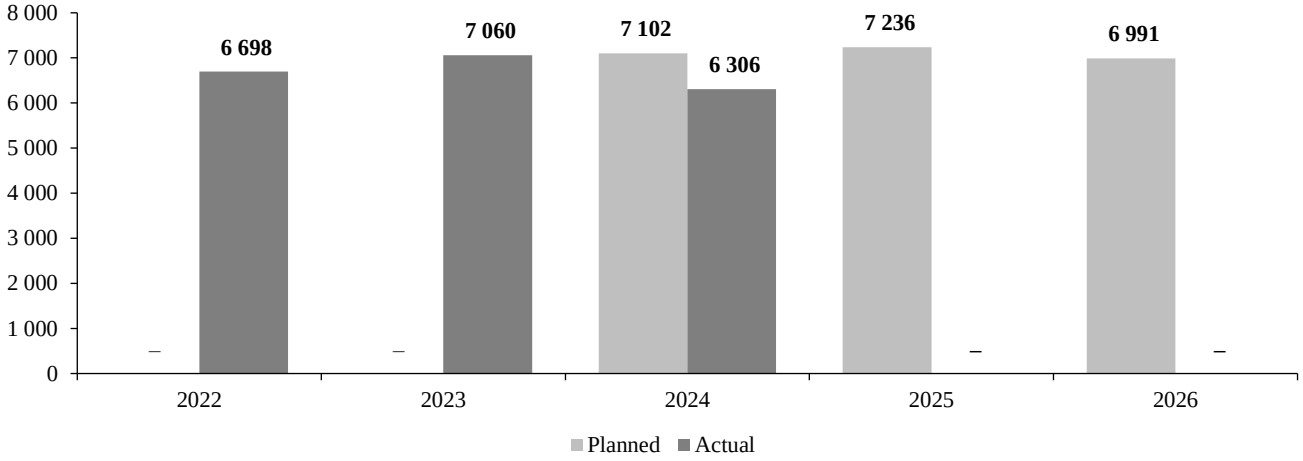
Result 2: increased interpretation services available to meet the growing demand of Member States for meetings with interpretation

Programme performance in 2024 and target for 2026

2.184 As described in paragraph 2.65 above, the subprogramme's work contributed to 6,306 meetings held with interpretation globally, which did not meet the planned target of 7,102 meetings. The target was not met due to liquidity constraints in 2024.

2.185 Progress towards the objective and the target for 2026 are presented in figure 2.XXIII.

Figure 2.XXIII
Performance measure: global number of meetings held with interpretation (annual)



Result 3: enhanced publishing products for Member States and the public

Proposed programme plan for 2026

2.186 The subprogramme has a long-standing commitment to take advantage of the electronic distribution of documents and publications and is pursuing a shift to a fully digital environment, as described in paragraph 2.67 above.

Lessons learned and planned change

2.187 Building on the lesson outlined in paragraph 2.68 above, the subprogramme will focus on enhancing staff skills through peer-to-peer training, resulting in the improved quality of digital products and services.

2.188 Expected progress towards the objective is presented in table 2.42.

Table 2.42
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Improved timeliness in the issuance of publications through the fine-tuning of the gDoc 2.0 workload management system	Extension of the *Journal of the United Nations* to include more events, such as non-calendar UNEP meetings held outside the established headquarters	Availability of metadata-enriched digital and accessible content, including in Extensible Markup Language (XML) format, which enhances searchability and facilitates research	Timeliness, accessibility and quality of publications improved through the use of artificial intelligence tools

Deliverables

2.189 Table 2.43 lists all deliverables of the subprogramme.

Table 2.43
Nairobi, subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	**350**	**378**	**400**	**380**
Meetings with interpretation for:				
1. The United Nations Environment Assembly and subsidiary bodies	27	27	4	30
2. The UN-Habitat Assembly and its subsidiary bodies	12	18	20	20
3. The Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services	20	20	20	20

2.191 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 2.47 to 2.49 and figure 2.XXIV.

2.192 As shown in tables 2.47 (1) and 2.48 (1), the overall resources proposed for 2026 amount to $397,216,200, reflecting a decrease of $3,805,300 (or 0.9 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

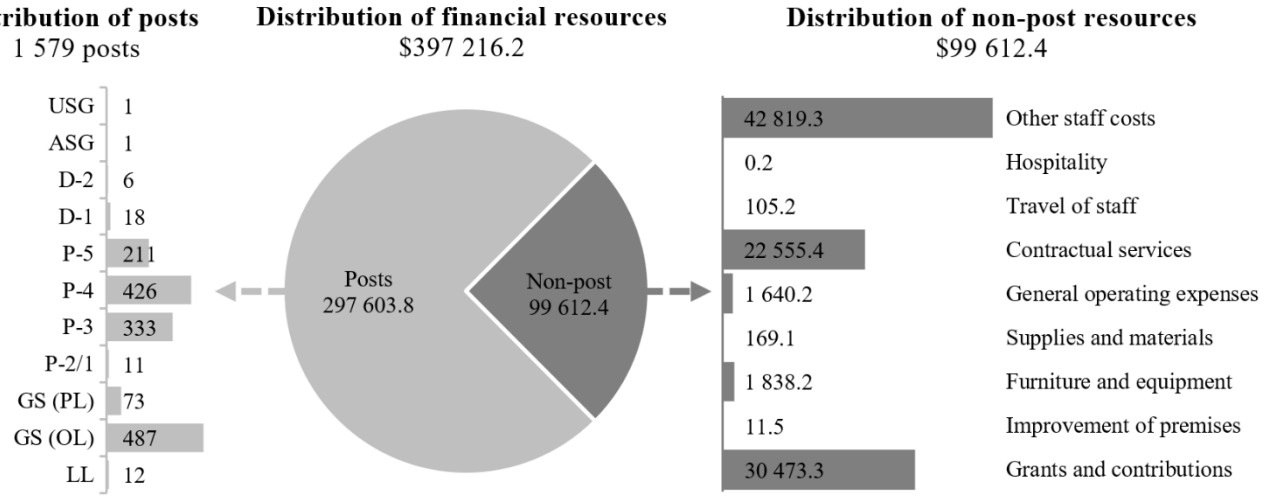
Figure 2.XXIV
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

2.193 As shown in table 2.47 (1), resource changes reflect a decrease of $7,382,700 under other staff costs ($6,044,400) and grants and contributions ($1,338,300), comprising the following: $256,500 under subprogramme 1, New York; $2,235,800 under subprogramme 3, New York; $1,438,100 under subprogramme 4, New York; $1,379,400 under subprogramme 2, Geneva; $1,338,300 under conference management, Vienna; and $734,600 under subprogramme 2, Nairobi, relating to the removal of non-recurrent provisions in support of new and expanded mandates from the General Assembly, including resolutions and decisions adopted by the Human Rights Council.

New and expanded mandates

2.194 As shown in table 2.47 (1), resource changes reflect an increase of $4,163,400, as follows:

(a) **New York, subprogramme 3, Documentation services**. The increase of $975,800 under other staff costs relates to additional documentation requirements in support of mandates from the General Assembly on:

(i) Multidimensional vulnerability index ($31,800; resolution 78/322);

(ii) Nuclear war effects and scientific research ($44,600; resolution 79/238);

(iii) Comprehensive study of the question of nuclear-weapon-free zones in all its aspects ($89,000; resolution 79/241);

(iv) Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development ($25,300; resolution 79/234);

(v) A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action ($25,300; resolution 78/234);

(vi) Addressing the legacy of nuclear weapons: providing victim assistance and environmental remediation to Member States affected by the use or testing of nuclear weapons ($89,100; resolution 79/60);

(vii) Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments" ($50,500; resolution 79/145);

(viii) Follow-up to the Fifth United Nations Conference on the Least Developed Countries ($25,300; resolution 79/218);

(ix) Investigation into the conditions and circumstances resulting in the tragic death of Dag Hammarskjöld and of the members of the party accompanying him ($103,900; resolution 79/244);

(x) Promotion of inclusive and effective international tax cooperation at the United Nations ($245,200; resolution 79/235);

(xi) Protection of persons in the event of disasters ($102,000; resolution 79/128);

(xii) The illicit trade in small arms and light weapons in all its aspects ($108,800; resolution 79/40);

(xiii) United Nations Conference of Plenipotentiaries on Prevention and Punishment of Crimes against Humanity ($35,000; resolution 79/122).

(b) **New York, subprogramme 4, Meetings and publishing services**. The increase of $433,200 under other staff costs relates to additional meeting service requirements in support of mandates from the General Assembly on:

(i) Comprehensive study of the question of nuclear-weapon-free zones in all its aspects ($82,000; resolution 79/241);

(ii) Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments" ($23,100; resolution 79/145);

(iii) Protection of persons in the event of disasters ($82,000; resolution 79/128);

(iv) The illicit trade in small arms and light weapons in all its aspects ($82,000; resolution 79/40);

(v) United Nations Conference of Plenipotentiaries on Prevention and Punishment of Crimes against Humanity ($164,100; resolution 79/122).

(c) **Geneva, subprogramme 2, Planning and coordination of conference services**. The increase of $1,066,900) under other staff costs relates to additional conference service requirements of $7,100 in support of the Permanent Forum of People of African Descent (General Assembly resolution 75/314), and requirements of $1,059,800 pursuant to resolutions adopted by the Human Rights Council as follows:

Human Rights Council resolutions before 2024 ($133,400)

(i) Human rights, democracy and the rule of law ($69,200; resolutions 28/14 and 34/41);

(ii) The right to development ($40,100; resolution 42/23);

(iii) Business and human rights ($24,100; resolution 53/3);

Human Rights Council resolutions and decisions from the fifty-fifth to fifty-seventh regular sessions and eighteenth organizational session ($926,400)

(i) Support systems to ensure community inclusion of persons with disabilities ($12,900; resolution 55/8);

(ii) Role of States in countering the negative impact of disinformation on the enjoyment and realization of human rights ($24,100; resolution 55/10);

(iii) Prevention of genocide ($24,100; resolution 55/13);

(iv) Human rights and a culture of peace ($37,000; resolution 55/17);

(v) Postponement of the implementation of certain activities mandated by the Human Rights Council ($56,000; decision 55/115);

(vi) Enhancing the support capabilities of the open-ended intergovernmental working group on transnational corporations and other business enterprises with respect to human rights, established by Human Rights Council resolution 26/9 ($138,600; decision 56/116);

(vii) Open-ended intergovernmental working group on an optional protocol to the Convention on the Rights of the Child on the rights to early childhood education, free pre-primary education and free secondary education ($60,800; resolution 56/5);

(viii) Safety of the child in the digital environment ($110,900; resolution 56/6);

(ix) Freedom of opinion and expression ($24,100; resolution 56/7);

(x) Human rights and climate change ($24,100; resolution 56/8);

(xi) Menstrual hygiene management, human rights and gender equality ($24,100; resolution 56/11);

(xii) Accelerating progress towards preventing adolescent girls' pregnancy ($48,200; resolution 56/21);

(xiii) Elimination of all forms of discrimination against women ($24,100; resolution 56/22);

(xiv) Countering cyberbullying ($24,100; resolution 57/6);

(xv) World Programme for Human Rights Education: the plan of action for the fifth phase ($12,900; resolution 57/10);

(xvi) Local government and human rights ($24,100; resolution 57/12);

(xvii) The human rights to safe drinking water and sanitation ($24,100; resolution 57/13);

(xviii) Human rights of migrants ($51,200; resolution 57/14);

(xix) Human rights and Indigenous Peoples ($24,100; resolution 57/15);

(xx) Equal participation in political and public affairs ($24,100; resolution 57/17);

(xxi) Elimination of domestic violence ($24,100; resolution 57/18);

(xxii) Education as a tool to prevent racism, racial discrimination, xenophobia and related intolerance ($24,100; resolution 57/24);

(xxiii) Biodiversity and human rights ($24,100; resolution 57/28);

(xxiv) Promotion, protection and enjoyment of human rights on the Internet ($24,100; resolution 57/29);

(xxv) Youth and human rights ($36,400; resolution 57/30).

(d) **Vienna, conference management**. The increase of $1,687,500 under grants and contributions relates to additional conference services requirements in support of mandates from the General Assembly on:

(i) Strengthening international cooperation for combating certain crimes committed by means of information and communications technology systems and for the sharing of evidence in electronic form of serious crimes ($835,200; resolution 79/243);

(ii) Follow-up to the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice ($827,700; resolution 79/186);

(iii) Strengthening and promoting effective measures and international cooperation on organ donation and transplantation to prevent and combat trafficking in persons for the purpose of organ removal and trafficking in human organs ($24,600; resolution 77/236).

Other changes

2.195 As shown in table 2.47 (1), resource changes reflect a net decrease of $586,000, as follows:

(a) **Policymaking organs**. A net increase of $47,300 comprises mainly an increase of $46,200 under other staff costs, reflecting requirements to provide administrative, technical, logistical and protocol-related support for the General Assembly;

(b) **Executive direction and management**. A net increase of $240,300 comprises mainly an increase of $285,700 under posts reflecting the proposed inward redeployment of the D-1 post of Chief of Conference Services from programme support, as explained in annex II, as well as an increase of $27,600 under general operating expenses to ensure further enhancement of the integrated global management of conference services, offset in part by a decrease of $63,800 under grants and contributions related to the discontinuation of the Umoja business support resources;

(c) **New York, subprogramme 1, General Assembly and Economic and Social Council affairs**. A net decrease of $45,900 comprises mainly a decrease of $105,600 under other staff costs, on the basis of expenditure patterns, offset in part by an increase of $48,600 under contractual services resulting from the redistribution of information and communication technology user costs across subprogrammes;

(d) **New York, subprogramme 2, Planning and coordination of conference services**. A net decrease of $170,800 comprises mainly decrease of $266,500 under other staff cost based on expenditure patterns, offset in part by increase of $95,400 under contractual services mainly resulting from the redistribution of information and communication technology user costs across subprogrammes;

(e) **New York, subprogramme 3, Documentation Services**. A net decrease of $2,495,600 comprises mainly decreases of, on the one hand, $228,000 under posts, reflecting the proposed abolishment of one post of Senior Language Reference Assistant (General Service (Principal level)) and the outward redeployment of one post of Senior Language Reference Assistant (General Service (Principal level)) to programme support and its reassignment as Senior Human Resources Assistant, as explained in annex II, and on the other hand $4,052,500 under other staff costs, offset in part by increases of $1,714,000 under contractual services and $55,800 under general operating expenses. The decrease under other staff costs reflects the reallocation of resources from temporary assistance for meeting to contractual capacities in the subprogramme to utilize commercial translation services and deliver documentation processing services in the most effective and cost-efficient manner, as well as to programme support to prioritize funding for technological and other innovations in support of the integrated global management of conference services in line with General Assembly resolution 79/248;

(f) **New York, subprogramme 4, Meetings and publishing services**. A net decrease of $366,200 comprises mainly decreases of $396,400 under posts, reflecting the proposed abolishment of four General Service (Other level) posts of two Publishing Assistants, one Language Service Assistant and one Administrative Assistant, as explained in annex II; of $2,179,300 under other staff costs; and of $156,500 under general operating expenses, on the basis of expenditure patterns, offset in part by an increase of $2,364,500 under contractual services. The internal realignment of resources for language capacities under posts, other staff costs and contractual services is made on the basis of expenditure patterns and reflects the optimal distribution of resources for interpretation services by temporary assistance for meetings and verbatim reporting by contractual services to complement the subprogramme's core staff capacity;

(g) **Geneva, subprogramme 2, Planning and coordination of conference services**. A decrease of $22,285,400 comprises decreases of $17,688,000 under other staff costs and $4,597,400 under contractual services. The decrease under other staff costs reflects the cost-neutral redeployment of funds to subprogrammes 3 and 4 in Geneva ($10,428,000 and $7,260,000, respectively) to align with the planned programme of work and outputs for documentation and interpretation services on the basis of past implementation patterns. Similarly, the decrease under contractual services reflects the cost-neutral redeployment of funds to subprogramme 3 for documentation services;

(h) **Geneva, subprogramme 3, Documentation services**. A net increase of $15,174,200 comprises increases of $10,428,000 under other staff costs and $4,895,000 under contractual services, offset in part by a decrease of $148,800 under posts, reflecting the proposed abolishment of one post of Editorial and Desktop Publishing Assistant (General Service (Other level)), as explained in annex II. As explained in paragraph 2.195 (g) above, the increase under other staff costs reflects the cost-neutral redeployment of funds from subprogramme 2. The increase under contractual services reflects, on a cost-neutral basis, the redeployment of funds from subprogramme 2 and resources made available through the abolishment of the posts under subprogrammes 3 and 4;

(i) **Geneva, subprogramme 4, Meetings and publishing services**. A net increase of $7,111,200 comprises an increase of $7,260,000 under other staff costs, offset in part by a decrease of $148,800 under posts, reflecting the proposed abolishment of one Administrative Assistant post (General Service (Other level)), as explained in annex II. As explained in paragraph 2.195 (g) above, the increase under other staff costs reflects the cost-neutral redeployment of funds from subprogramme 2;

(j) **Vienna, conference management**. A decrease of $10,000 under grants and contributions, reflecting the United Nations share of jointly financed activities for conference services in Vienna, reflects the redistribution of resources within the Department on the basis of the prioritization of travel requirements between the duty stations;

(k) **Nairobi, subprogramme 2, Planning and coordination of conference services**. A net decrease of $976,300 comprises mainly decreases of $749,000 under other staff costs and $230,300 under contractual services. Those decreases reflect the cost-neutral redeployment of funds to subprogrammes 3 and 4 in Nairobi under the respective budget class to align with the planned programme of work and with outputs for documentation and interpretation services, on the basis of past implementation patterns. Similar to the redistribution of resources in other duty stations, this approach harmonizes and streamlines the planning and utilization of resources for language capacities to achieve efficient and cost-effective delivery of conference service. Core staff capacity will continue to be complemented with temporary assistance for meetings and contractual personnel during high workload periods;

(l) **Nairobi, subprogramme 3, Documentation services**. An increase of $765,800 comprises increases of $364,000 under other staff costs and $201,000 under contractual services, as explained in paragraph 2.195 (k) above, as well as an increase of $200,800 under posts, to reflect

the proposed redeployment of one P-3 post of Editor from subprogramme 4, as explained in annex II;

(m) **Nairobi, subprogramme 4, Meetings and publishing services**. A net increase of $213,500 comprises increases of $385,000 under other staff costs and $29,300 under contractual services, offset in part by a decrease of $200,800 under posts, to reflect the proposed redeployment of one P-3 post of Publishing Officer to subprogramme 3, as explained in annex II;

(n) **Programme support**. A net increase of $2,211,900 comprises mainly increases of $1,839,100 under contractual services, $214,200 under other staff costs, and $545,600 under furniture and equipment, offset in part by decreases of $171,700 under posts and $219,200 under general operating expenses. The Department aims to prioritize resources for innovation, the advancement of technology and the further advancement of user experience, through the cost-neutral redeployment of funds from subprogrammes in New York to the Global Innovation and Data Analytics Service under programme support. The increase under contractual services reflects higher requirements for technology services for functions not available in the Organization but critical for the continuity and sustainability of conference management systems ($1,817,900), as well as increased provisions for personal computing services in Geneva ($19,300) and Nairobi ($1,900). Similar increase in provisions for Vienna is reflected under grants and contributions. The increases under other staff costs, as well as furniture and equipment, would also facilitate the continuous effort by the Service to design, develop, deploy and maintain innovative information technology solutions for delegates and clients in New York, Geneva, Vienna and Nairobi and to ensure timely responses to the needs of Member States by maintaining broadly used technology platforms. The decrease under posts reflects the proposed outward redeployment of one D-1 post to executive direction and management ($285,700), offset in part by the proposed inward reassignment of a General Service (Principal level) post from subprogramme 3 in New York ($114,000), as explained in annex II.

Extrabudgetary resources

2.196 As reflected in tables 2.47 (2) and 2.48 (2), extrabudgetary resources amount to $25,550,900, including provisions for 78 posts, inclusive of 10 posts funded from the trust fund for German language translation. The expected decrease of $595,000 compared with the estimated requirements for 2025 is attributable to the lower number of intergovernmental meetings expected in 2026 in Nairobi.

2.197 The Department receives voluntary contributions to the trust fund for German language translation, established in 1974 to provide resources to issue in German the resolutions and decisions of the General Assembly, as well as the other supplements to its official records, and the resolutions and decisions of the Security Council and the Economic and Social Council; and to the trust fund in support of General Assembly and conference management activities established by the Secretary General in 2013. Other extrabudgetary resources include: (a) a share of programme support costs allocated to the Department; and (b) a fund to backstop operations funded from cost recoveries. The extrabudgetary resources under the present section are subject to the oversight of the Department for General Assembly and Conference Management, in accordance with the delegation of authority by the Secretary-General.

2.198 The extrabudgetary resources in the four duty stations supplement training funds to ensure service delivery of the highest quality and to support the implementation of the United Nations Secretariat Learning Strategy by the Department in all four duty stations.

Policymaking organs

2.199 The resources proposed under this component would provide for the policymaking organs as shown in table 2.50. With regard to the Economic and Social Council, resources for technical secretariat support and conference services for meetings are provided for under conference management, New York.

Table 2.50
Policymaking organs
(Thousands of United States dollars)

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
General Assembly	Mandate: Articles 10 to 17 of the Charter of the United Nations	175.4	222.7

Economic and Social Council	Mandate: Articles 62 to 66 of the Charter of the United Nations	–	–
Total		**175.4**	**222.7**

2.200 The proposed regular budget resources for 2026 amount to $222,700 and reflect an increase of $47,300 compared with the approved budget for 2025. The proposed change is explained in paragraph 2.195 (a) above. Additional details on the distribution of the proposed resources for 2026 are reflected in table 2.51 and figure 2.XXV.

(Thousands of United States dollars)

Executive direction and management

2.201 The executive direction and management component comprises the Office of the Under-Secretary-General and the Protocol and Liaison Service. The Under-Secretary-General for General Assembly and Conference Management is responsible for all the activities of the Department, as well as its administration, and represents the Secretary-General in meetings relating to the functions of the Department and in intergovernmental organs and expert bodies, as required. The Under-Secretary-General is also responsible for guiding integrated global conference management involving Headquarters and the United Nations Offices at Geneva, Vienna and Nairobi, which includes managing the conference-servicing resources at Headquarters and providing policy guidance with regard to the utilization of the conference-servicing resources, the authority for which has been subdelegated to the Directors-General of the United Nations Offices at Geneva, Vienna and Nairobi, with a view to achieving the highest possible level of cohesion, synergy and efficiency. The Under-Secretary-General also chairs the International Annual Meeting on Language Arrangements, Documentation and Publications.

2.202 The Protocol and Liaison Service provides protocol support to the Secretary-General, the Deputy Secretary-General and, upon request, the President of the General Assembly. It also supports the protocol requirements of high-level dignitaries participating in United Nations meetings and conferences, whether at United Nations Headquarters or at conferences away from Headquarters. The Service ensures the timely registration of both mission personnel and conference participants, liaises with the host country and permanent missions and observer offices and provides protocol guidance on the United Nations system.

2.203 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. In 2019, the Department maintained International Organization for Standardization (ISO) 14001 certification for its publishing operations in Geneva, Nairobi and Vienna. The Department continued the ISO certification process at Headquarters in 2023 and finalized the first part of the procurement process. Owing to the liquidity constraints beginning in the second half of 2023, the Department has paused the process.

2.204 Information on the timely submission of documentation and advance booking for air travel is reflected in table 2.52. The Department will continue to implement measures to improve the compliance rate through the advance purchasing of air tickets, the advance planning and nomination of travellers, advance planning for the onboarding of staff with contingencies in place and communicating with staff and managers to raise awareness of the policy framework and requirements.

Table 2.52

Air tickets purchased at least two weeks before the commencement of travel	58	73	87	100	100

2.205 The proposed regular budget resources for 2026 amount to $4,558,800 and reflect a net increase of $240,300 compared with the approved budget for 2025. The proposed change is explained in paragraph 2.195 (b) above. Additional details on the distribution of the proposed resources for 2026 are reflected in table 2.53 and figure 2.XXVI.

Conference management, Vienna

2.213 The General Assembly, in its resolution 49/237, requested the Secretary-General to establish a unified conference-servicing facility at the Vienna International Centre under the management of the United Nations. Accordingly, the Conference Management Service in Vienna provides services not only to the United Nations Office at Vienna and the United Nations Office on Drugs and Crime, but also to the International Atomic Energy Agency, the United Nations Industrial Development Organization and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.

2.214 In 2026, the servicing of the above-mentioned non-Secretariat client organizations is estimated to account for approximately 36 per cent of the interpretation workload, 21 per cent of the meeting-servicing workload and 7 per cent of the documentation-servicing workload, including translation, editing and desktop publishing.

United Nations share (net budget)

2.215 The requirements of the conference services at Vienna are budgeted on a net basis, whereby the appropriation under the United Nations programme budget is made for the United Nations share of relevant activities. The gross budget, for which the United Nations has responsibility under the arrangements for unified conference services, is also presented for consideration and approval by the General Assembly. Thus, the estimates that follow are presented on both a gross basis, which includes reimbursements by non-Secretariat organizations, and a net basis, as summarized in table 2.61.

Table 2.61
Vienna, programme of work: evolution of requirements on a gross and net basis
(Thousands of United States dollars)

	2024	*2025*	*2026 estimate (before recosting)*
Conference services, Vienna (gross budget)	33 287.5	34 765.9	35 105.1
Reimbursement by IAEA, UNIDO and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization	5 659.0	5 851.0	5 851.0
United Nations (net budget)	**27 628.5**	**28 914.9**	**29 254.1**

Abbreviations: IAEA, International Atomic Energy Agency; UNIDO, United Nations Industrial Development Organization.

2.16 As shown in table 2.61, the regular budget resource requirements for 2026 are estimated at $29,254,100 which represents 83.3 per cent of the gross requirements.

Conference services, Vienna (gross budget)

Overall resource changes, Vienna (gross budget)

Technical adjustments

2.217 As shown in table 2.62, resource changes reflect a decrease of $1,338,300 under other staff costs, comprising the following: $84,600 under subprogramme 2, Vienna; $921,500 under subprogramme 3, Vienna; and $332,200 under subprogramme 4, Vienna, relating to the removal of non-recurrent provisions in support of new and expanded mandates from the General Assembly.

New and expanded mandates

2.218 As shown in table 2.62, resource changes reflect an increase of $1,687,500, as follows:

(a) **Vienna, subprogramme 3, Documentation services**. The increase of $1,255,500 under other staff costs relates to additional documentation requirements in support of mandates from the General Assembly on:

(i) Strengthening international cooperation for combating certain crimes committed by means of information and communications technology systems and for the sharing of evidence in electronic form of serious crimes ($752,100; resolution 79/243);

(ii) Follow-up to the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice ($478,800; resolution 79/186);

(iii) Strengthening and promoting effective measures and international cooperation on organ donation and transplantation to prevent and combat trafficking in persons for the purpose of organ removal and trafficking in human organs ($24,600; resolution 77/236);

(b) **Vienna, subprogramme 4, Meetings and publishing services**. The increase of $432,000 under other staff costs relates to additional meeting service requirements in support of mandates from the General Assembly on:

(i) Strengthening international cooperation for combating certain crimes committed by means of information and communications technology systems and for the sharing of evidence in electronic form of serious crimes ($83,100; resolution 79/243);

(ii) Follow-up to the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice ($348,900; resolution 79/186).

Other changes

2.219 As shown in table 2.62, resource changes reflect a decrease of $10,000, under Vienna, subprogramme 2, Planning and coordination of conference services. The decrease of $10,000 under travel of staff reflects the redistribution of resources within the Department on the basis of the prioritization of travel requirements between the duty stations.

Subprogramme 2
Planning and coordination of conference services

2.220 The proposed regular budget resources for 2026 amount to $6,415,900 and reflect a decrease of $94,600 compared with the approved budget for 2025. The proposed changes are explained in paragraphs 2.217 and 2.219. Additional details on the distribution of the proposed resources for 2026 are reflected in table 2.63 and figure 2.XXXIV.

Subprogramme 4: distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)

Programme support

2.226 The programme support component comprises the Executive Office in New York, as well as the Global Innovation and Data Analytics Service. In 2026, the Global Innovation and Data Analytics Service will continue to provide enterprise conference management solutions to all conference management operations in the four duty stations and United Nations common system entities. The systems and applications developed and maintained in-house by the Service enable planning and delivery of the integrated global conference services. The functionalities of eAPG, gMeets, consolidated gText and gDoc systems, e-deleGATE and eJournal would be further enhanced and maintained by the Service on the basis of requirements formulated by business users – substantive offices of the Department. Together, the products comprise the conference and events management suite of applications implemented in alignment with the enterprise priorities of the United Nations. The above applications facilitate efficient conference planning, document processing, language capacity management and meeting services.

2.227 The Service will continue to focus on rationalizing and streamlining operational support activities and coordinate the work of the Service with the Office of Information and Communications Technology and the Enterprise Resource Planning Solution Division to ensure integration of the conference and events management suite of applications developed in-house by the Department with the United Nations enterprise systems such as Umoja and Inspira. To enhance technology service delivery efficiency within the Department, in 2025, the Global Innovation and Data Analytics Service completed the consolidation of the Business Analysis Section in New York and the Global Technical Team in Vienna.

2.228 The Information Technology and Business Analysis Unit and the Evaluation, Analysis and Monitoring Section, based in Geneva, and the Information Technology Unit, based in Nairobi, also receive guidance through the Global Innovation and Data Analytics Service. Both Units are responsible for maintaining, enhancing, supporting and advancing enterprise technology solutions and local information technology support that are critical to the delivery of effective and cost-efficient conference services to clients.

2.229 The Executive Office provides central administrative services and policy advice to the Department in the areas of resource planning, human resources management, financial management, contracts, trust fund management and general administration. As the functional experts in these areas, the Executive Office develops user requirements for modules in relation to administrative services and ensures that solutions developed and rolled out by the Global Innovation and Data Analytics Service

comply with the policy framework of the Organization and are developed in the context of the enterprise environment. In the context of the integrated global management of conference services, the Executive Office is responsible for standardizing and harmonizing the administrative, budgetary and cost-recovery methodologies of the conference-servicing components at all four conference servicing duty stations and for coordinating workforce and succession planning, staff development and performance management, harmonization and standardization of a notional cost, and the implementation of audit recommendations. The Executive Office also advises senior managers on implementation of the delegation of authority framework and ensures that effective controls are in place for the areas identified in the annual statement of internal controls.

2.230 The Executive Office works closely with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support to ensure that the human resources policies and guidelines take into account specifics of the language services and language staff, and ensures their equal treatment in line with relevant General Assembly resolutions. The Executive Office also provides administrative support and policy guidance to the Office of the President of the General Assembly and ensures that staff and other personnel of the Office are recruited annually before a new Assembly session begins it work.

2.231 The proposed regular budget resources for 2026 amount to $22,857,200 and reflect a net increase of $2,211,900 compared with the approved budget for 2025. The proposed change is explained in paragraph 2.195 (n). Additional details on the distribution of the proposed resources for 2026 are reflected in table 2.69 and figure 2.XL.

United Nations share (net budget): information technology support, Vienna

2.232 The requirements relating to information technology support for conference services in Vienna are budgeted on a net basis, whereby the appropriation under the programme budget is made for the United Nations share of those activities. The gross budget, for which the United Nations has responsibility under the arrangements for unified conference services, is also presented for the consideration and approval of the General Assembly. Thus, the estimates for information technology that follow are presented on both a gross basis, which includes reimbursements by non-Secretariat organizations, and a net basis, as summarized in table 2.70.

Table 2.70

[a] Redeployment.

Annex II

Summary of proposed post changes, by component and subprogramme

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Executive direction and management	1	D-1	**Redeployment** of Chief, Conference Services	The proposed redeployment reflects the strategic and cross-cutting nature of the function, which has evolved since its establishment in 2023. The Chief of the Global Innovation and Data Analytics Service assumed the global resource planning role and oversees the development and maintenance of the global conference management systems facilitating the delivery of conference services by all four duty stations in line with paragraphs 40, 42, 44 and 45 of General Assembly resolution 79/248 on the pattern of conferences. The Chief leads the efforts of the Department to consolidate the information technology and business analysis functions previously maintained locally, to harmonize and streamline analytical and data management initiatives. The Chief supports the Under-Secretary-General and Assistant Secretary-General in ensuring good governance over innovative solutions proposed for implementation by the Department.
Programme support	(1)	D-1		
New York: Subprogramme 3, Documentation services	(1)	GS (PL)	**Abolishment** of Senior Language Reference Assistant	Owing to the continuous modernization of the working methods in the Translation Service, one post is proposed for abolishment, and one post for reassignment as Senior Human Resources Assistant under programme support to support the Department's workforce and succession planning efforts, as well as capacity management and related activities.
Programme support	(1)	GS (PL)	**Reassignment/ redeployment** of Senior Language Reference Assistant as Senior Human Resources Assistant	
	1	GS (PL)		
New York: subprogramme 4, Meetings and publishing services	(1)	GS (OL)	**Abolishment** of Administrative Assistant	The proposed abolishment in the Office of the Director results from synergies and the distribution of tasks across the front offices in the services and sections, as well as increased use of technology.
	(2)	GS (OL)	**Abolishment** of two Publishing Assistants	The proposed abolishment in the Meeting Services Unit is the result of a significant decrease in requests by delegates and meeting participants for hard copies of official documents and publications, as well as increased reliance on digital formats.
	(1)	GS (OL)	**Abolishment** of Language Service Assistant	The proposed abolishment is due to the consolidation of the copy preparation and proofreading functions with the desktop publishing functions, resulting in synergies across the six language subdivisions.
Geneva: subprogramme 2, Planning and coordination of conference services	–	GS (OL)	**Reassignment** of Staff Assistant as Programme Management Assistant	The proposed reassignment reflects a transition of responsibilities from general administrative support to tasks focused on innovation and the use of data-driven insights to support conference-related activities.
Geneva: subprogramme 3, Documentation services	–	GS (OL)	**Reassignment** of Staff Assistant as Language Service Assistant	The proposed reassignment reflects a shift from general administrative duties to supporting language services, integrating innovative approaches and data-driven solutions to enhance service effectiveness.
Geneva: subprogramme 3, Documentation services	(1)	GS (OL)	**Abolishment** of Editorial and Desktop Publishing Assistant	The proposed abolishment is in line with the continued enhancements of language technologies and improvements in working methods. The related resources would be reallocated to contractual services to allow for flexibility and to supplement the core staff capacity during peaks in the meetings and conferences calendar.

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Geneva: subprogramme 4, Meetings and publishing services	(1)	GS (OL)	**Abolishment** of Administrative Assistant	The proposed abolishment is a result of improved operational efficiencies and the consolidation of responsibilities. The related resources would be reallocated to contractual services to allow for flexibility and to supplement the core staff capacity during peaks in the meetings and conferences calendar.
Nairobi: subprogramme 3, Documentation services	1	P-3	**Redeployment** of Publishing Officer as Editor	The proposed redeployment to subprogramme 3, enabled through the streamlining of capacities under subprogramme 4, would enhance the editing and report-writing capacity by ensuring documents are properly edited before translation, while also reflecting evolving publishing requirements.
Nairobi: subprogramme 4, Meetings and publishing services	(1)	P-3		

Abbreviation: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

I. Department of Political and Peacebuilding Affairs

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

3.I.1 The Department of Political and Peacebuilding Affairs is responsible for all Secretariat matters related to the prevention, management and resolution of conflicts at the global level. The Department is the lead entity of the United Nations for good offices, political analysis, mediation, electoral assistance, peacebuilding support and political guidance as they relate to the Organization's efforts towards, inter alia, preventive diplomacy, peacemaking, peacebuilding and sustaining peace. The Department oversees the work of missions under its responsibility, including special envoys and regional offices. It also provides support to peacekeeping operations in the areas of mediation, electoral assistance and peacebuilding, as well as to resident coordinators. It provides substantive support and secretariat services to the Security Council and its subsidiary bodies, as well as to relevant subsidiary organs of the General Assembly, including the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples and the Committee on the Exercise of the Inalienable Rights of the Palestinian People. The Department also provides strategic, substantive and technical support to the work of the Peacebuilding Commission, manages the Peacebuilding Fund on behalf of the Secretary-General and draws together the expertise of the United Nations system to facilitate coherent system-wide action in support of peacebuilding and sustaining peace and to build on linkages to the 2030 Agenda for Sustainable Development.

3.I.2 The mandate of the Department derives from the Charter of the United Nations and the priorities established in relevant General Assembly resolutions and decisions, including resolution 46/232, in which the Assembly established the Department of Political Affairs, and, more recently, resolution 72/262 C, in which the Assembly established the Department of Political and Peacebuilding Affairs. The proliferation of the number and intensity of conflicts over the past few years and their immense human and material cost confirms the importance of conflict prevention and resolution through inclusive political solutions, peacebuilding and sustaining peace. In view of its comprehensive mandate, the Department of Political and Peacebuilding Affairs plays a central role in the implementation of several actions set out by Member States in the Pact for the Future (Assembly resolution 79/1), including in relation to: (a) the pacific settlement of disputes (action 16), in particular, urging the Secretary-General to actively use his good offices and ensure that the United Nations is adequately equipped to lead and support mediation and preventive diplomacy; (b) building and sustaining peace (action 18), including provision of assistance to States, upon their request, in full conformity with national ownership and needs, to build national capacity to promote, develop and implement their nationally owned prevention efforts and address the root causes of violence and conflict in their countries; (c) accelerating the implementation of commitments on women and peace and security (action 19); (d) accelerating the implementation of commitments on youth and peace and security (action 20); and (e) adapting peace operations to better respond to existing challenges and new realities (action 21).

Strategy and external factors for 2026

3.I.3 The Department has global responsibility for political and peacebuilding issues and manages a spectrum of tools and engagements across the conflict continuum to ensure a coherent and effective approach to conflict prevention and resolution, electoral assistance, peacebuilding and sustaining peace. Given its global mandate for conflict prevention and peacemaking, the Department will play

a lead role within the United Nations in formulating and implementing comprehensive regional strategies that address cross-boundary issues, in cooperation with regional and subregional organizations.

3.I.4 In order to achieve these goals, the Department will rely on its expertise at Headquarters, including the single regional political-operational structure shared with the Department of Peace Operations, and its network of field presences, in particular, special political missions, regional offices and liaison presences with regional and other organizations, and the capacities of the United Nations peace and security pillar, which was restructured since 2019.

3.I.5 The Department will continue to provide advice and substantive services to the Security Council, its subsidiary organs and the Military Staff Committee; assist and support the Peacebuilding Commission; provide advice and substantive support to the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples, as well as to other relevant intergovernmental bodies; and continue to provide support to the Committee on the Exercise of the Inalienable Rights of the Palestinian People.

3.I.6 With regard to cooperation with other entities at the global, regional, national and local levels, under Chapter VIII of the Charter, the Department, through its special political missions and its liaison offices, will continue to strengthen partnerships with regional and other organizations in the field of peace and security, including with a view to supporting their role in diplomacy, mediation and the pacific settlement of disputes, in line with action 16 of the Pact for the Future. The Department is also expanding its partnerships with other relevant actors, including civil society and local communities, in particular in support of women and young people.

3.I.7 With regard to inter-agency coordination and liaison, the Department will continue to participate in the Executive Committee established by the Secretary-General and chair a number of inter-agency task forces to coordinate and increase the coherence of United Nations system engagement in specific countries or regions, in accordance with entities' mandates, as well as various thematic inter-agency mechanisms. The Peacebuilding Fund, by nature a cross-pillar tool of financial support, will continue to work with and through agencies, funds and programmes in-country and at Headquarters. Under the United Nations-World Bank Partnership Framework for Crisis-Affected Situations, the Department will continue to work to strengthen partnerships with the World Bank and other international financial institutions to make international engagement in crisis-affected situations more coherent, effective and sustainable, in line with action 18 of the Pact for the Future. The Department will maintain the Partnership Facility to support field teams' joint data, analysis and operational collaboration with the World Bank Group.

3.I.8 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Unity among Member States, in particular the Security Council, including in critical situations in which the United Nations is engaged;

(b) Existence of entry points for United Nations engagement to mitigate tensions and prevent conflict;

(c) Commitment of the parties to a conflict to engaging in a process towards the peaceful settlement of disputes.

3.I.9 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. Its policy on women and peace and security includes a set of indicators measuring progress towards its objectives and new focus areas, such as the impact of climate change and new technologies. The policy builds on good practices across the Department and special political missions and is intended to ensure that priorities are integrated into the daily work of the Department and special political missions. These priorities, in line with the mandates entrusted to the Organization in the area of women and peace and security, including action 19 of the Pact for the Future, encompass gender-sensitive analysis, promoting the inclusion of women in peacemaking, peace-sustaining and peacebuilding efforts, and their participation in electoral and political

processes. The policy also addresses such issues as preventing and assessing conflict-related sexual violence and post-conflict planning and financing. In addition, the Department supports the efforts of the Peacebuilding Commission to mainstream a gender perspective in all aspects of its work, including through the implementation of the Commission's gender strategy and by keeping track of progress through the submission of annual reports. The strategy of the Peacebuilding Fund also prioritizes women's engagement.

3.I.10 In line with the United Nations Disability Inclusion Strategy, the Department will implement a joint Department of Political and Peacebuilding Affairs-Department of Peace Operations action plan for disability inclusion with a view to reinforcing an organizational culture that supports the inclusion of persons with disabilities and further advancing disability inclusion in strategic planning and management, knowledge and information management. The Department will also foster engagement with government counterparts and civil society organizations to promote the inclusivity of political processes, including in addressing the needs of persons with disabilities.

Legislative mandates

3.I.11 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

Charter of the United Nations

Articles 33 and 99

General Assembly resolutions

46/232	Revitalization of the United Nations Secretariat
57/296	Causes of conflict and the promotion of durable peace and sustainable development in Africa

Deliverables

3.I.12 Table 3.I.1 lists all cross-cutting deliverables of the programme.

Table 3.I.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**3**	**3**	**3**	**3**
Meetings of the:				
1. Fifth Committee	1	1	1	1
2. Committee for Programme and Coordination	1	1	1	1
3. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
C. Substantive deliverables				
Good offices: good offices and preventive diplomacy; high-level diplomatic missions and meetings, including jointly with 24 regional and subregional organizations; and support for special political missions, including provision of mediation support.				
Consultation, advice and advocacy: consultations with representatives of Member States, regional and subregional organizations and civil society organizations; and strategic coordination meetings with relevant partners.				
Databases and substantive digital materials: databases and data sets on international peace and security issues, including manuals and guides on issues related to international peace and security.				
D. Communication deliverables				
Outreach programmes, special events and information materials: exhibits and other communications products about the work of the Department.				
External and media relations: statements on behalf of the Secretary-General; notes to correspondents; and press releases, communiqués and other communications products on issues related to international peace and security.				

Evaluation activities

3.I.13 The following evaluations completed in 2024 have guided the proposed programme plan for 2026:

(a) Two evaluations conducted by the Department on its mediation support and on its innovation initiatives;

(b) Two Peacebuilding Fund portfolio evaluations (Mauritania and Democratic Republic of the Congo);

(c) A thematic review by the Peacebuilding Fund on synergies between human rights and peacebuilding.

3.I.14 In response to the results of the evaluations referenced above, the Department has started to implement the recommendations and incorporate the lessons learned into the proposed programme plan for 2026. To better identify priority mediation needs, the Department supported various forms of strategy sessions on mediation process design for the Special Representatives and Envoys of the Secretary-General. The Department is reviewing its framework for innovation, with a view to prioritizing and maximizing opportunities for innovation and mitigating risks associated with new technologies and their impact on peace and security. In response to the evaluations relating to peacebuilding, the Department will continue to employ participatory design and implementation processes to further strengthen national ownership.

3.I.15 The following evaluations, to be conducted by the Department, are planned for 2026:

(a) Evaluation of the Department's project on enhancing national youth and peace and security capacities in West Africa;

(b) Peacebuilding Fund portfolio evaluations for up to five countries.

Programme of work

Subprogramme 1
Prevention, management and resolution of conflicts

Objective

3.I.16 The objective, to which this subprogramme contributes, is to advance the prevention, management and resolution of conflicts by peaceful means.

Strategy

3.I.17 To contribute to the objective, the subprogramme will:

(a) Support the pacific settlement of disputes, under Chapter VI of the Charter, through the use of the tools of preventive diplomacy, peacemaking, peacebuilding and sustaining peace, and utilizing the single regional political-operational structure shared with the Department of Peace Operations as an entry point for connection with the field;

(b) Work in close cooperation with a wide array of actors, in particular regional and subregional organizations, including under Chapter VIII of the Charter;

(c) Promote a more effective and cohesive response to help to prevent, mitigate, manage and resolve conflicts by:

(i) Responding in a timely manner to conflict situations;

(ii) Providing timely and accurate information, analysis and policy recommendations;

(iii) Making available and providing substantive and technical support to the good offices of the Secretary-General, including through formal mediation, where appropriate, in support of the active use of his good offices, in line with action 16 of the Pact for the Future;

(iv) Providing substantive, political and technical support to the Secretary-General in the discharge of his functions and in his relationships with Member States;

(v) Supporting the role of regional and subregional organizations in diplomacy, mediation and the pacific settlement of disputes, in line with action 16 of the Pact for the Future;

(vi) Providing substantive support and guidance to special political missions;

(vii) Strengthening the Department's capacity, expertise and partnerships with other United Nations and subregional, regional and international organizations in order to address peace and security challenges more effectively;

(viii) Monitoring and evaluating the impact and the cost-effectiveness of key conflict prevention and mitigation initiatives;

(ix) Developing coherent strategies for crisis prevention and peacebuilding, linking diplomatic, security, humanitarian and development efforts by the United Nations system, including United Nations country teams, and other international and regional actors;

(x) Enhancing political and operational links with the wider United Nations system, in particular with United Nations country teams, to support nationally led prevention and peacebuilding efforts, in line with action 18 of the Pact for the Future;

(xi) Operationalizing the women and peace and security and the youth and peace and security agendas to promote the full, equal and meaningful participation of women, as well as the constructive engagement of young people, in political and peacebuilding processes, in line with actions 19 and 20 of the Pact for the Future.

3.I.18 The above-mentioned work is expected to result in the improved capacity and capability of Member States to identify, prevent and address conflict situations.

Programme performance in 2024

In the Pact for the Future, the commitment to preventive diplomacy, the peaceful settlement of disputes and the importance of dialogue between States is reaffirmed

3.I.19 By its resolution 79/1, the General Assembly adopted the Pact for the Future, reaffirming the commitment of Member States to preventive diplomacy, the peaceful settlement of disputes and the importance of dialogue between States. The Secretary-General was urged to actively use his good offices and ensure that the United Nations is adequately equipped to lead and support mediation and preventive diplomacy. Building on this request, the subprogramme intensified its efforts to help the United Nations to engage closely with Member States, as well as regional and subregional organizations, in preventive diplomacy and mediation. The subprogramme continued to ensure that the use of the good offices of the Secretary-General is underpinned by adequate policy frameworks that are rooted in the Charter of the United Nations, legislative decisions and planning capacities, draws on good practices and can confront emerging challenges such as hate speech, disinformation and misinformation, the impact of new technologies, and the role of non-State actors.

3.I.20 Progress towards the objective is presented in the performance measure below (see table 3.I.2).

Table 3.I.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Engagements in preventive diplomacy and mediation led or supported by the United Nations continued in line with the relevant actions of the Pact for the Future

Planned results for 2026

Result 1: Member States have access to broadened and strengthened political analysis to inform the prevention, management and resolution of armed conflicts

Programme performance in 2024 and target for 2026

3.I.21 The subprogramme's work contributed to more comprehensive analysis on various topics, including the integration of a political economy lens into analysis, the incorporation of a gender perspective and the views of young women and men, as relevant, and the reflection of varied perspectives on threats to peace and security, in reports to the General Assembly and the Security Council, which met the planned target.

3.I.22 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.I.3).

Table 3.I.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Reports to the General Assembly and the Security Council included more comprehensive analysis on topics, including socioeconomic development and gender equality, as relevant	Reports to the General Assembly and the Security Council included more comprehensive analysis on topics, including socioeconomic development, gender equality and youth engagement, as relevant	Reports to the General Assembly and the Security Council included more comprehensive analysis on topics, including the integration of a political economy lens into analysis, the incorporation of a gender perspective and the views of young women and men, as relevant, and the reflection of varied perspectives on threats to peace and security	Reports to the General Assembly and the Security Council include more comprehensive analysis on topics, including socioeconomic development, gender equality, youth and climate change, as relevant	Reports to the General Assembly and the Security Council include more comprehensive analysis on topics, including socioeconomic development, gender equality, youth and climate change, as relevant, and a reflection of different perspectives on the sources of threats to peace and security

Result 2: reduced threats to international peace and security

Programme performance in 2024 and target for 2026

3.I.23 The subprogramme's work contributed to ongoing engagement with Member States and regional and subregional organizations to provide increased support for peacemaking efforts, including political analysis and operational and technical support for political processes, when requested, which met the planned target.

3.I.24 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.I.4).

Table 3.I.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
United Nations-brokered nationwide truce in Yemen between April and October 2022	Nationwide bilateral and temporary ceasefire took effect on 3 August 2023 in Colombia	Proximity talks convened with the participation of two parties in the Sudan conflict	Member States have greater access to tools and expertise to prevent, manage and resolve conflicts	Member States have greater access to tools and expertise to prevent, manage and resolve conflicts
Progress in the implementation of the 5+5 Joint Military Commission action plan in Libya	Advances made in the peace process in Mozambique, including the completion of the first two phases of the disarmament, demobilization and reintegration strategy			

Result 3: regional and subregional organizations have access to support on mediation, preventive diplomacy and good offices

Proposed programme plan for 2026

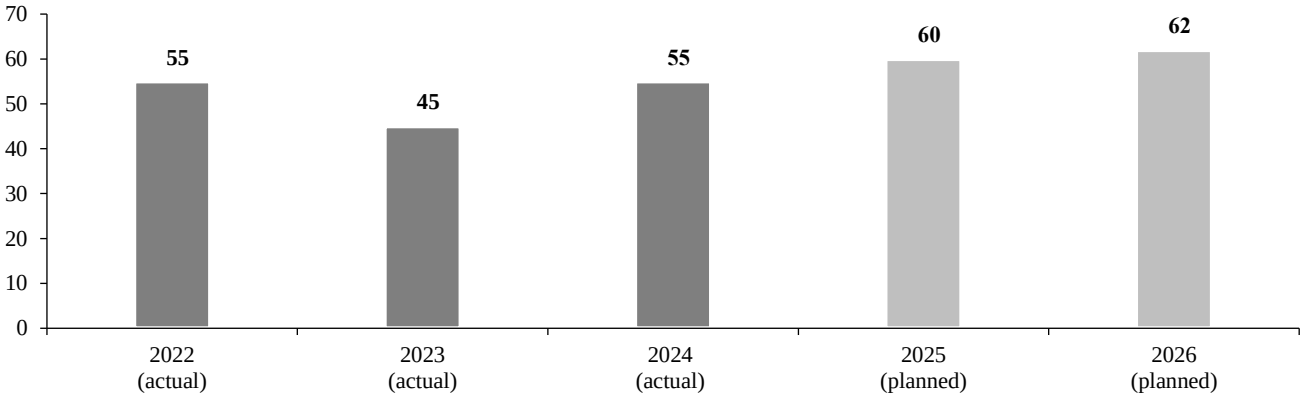
3.I.25 As outlined in action 16 of the Pact for the Future, Member States decided to support the role of regional and subregional organizations in diplomacy, mediation and the pacific settlement of dispute, and to strengthen the coordination and cooperation between these organizations and the United Nations in that regard. The subprogramme has been engaging with a wide range of regional and subregional organizations from all regions, upon request, with a view to supporting their role in diplomacy, mediation and the pacific settlement of disputes, helping to strengthen their capacity and strengthening coordination at the strategic and operational levels.

Lessons learned and planned change

3.I.26 The lesson for the subprogramme was that improved cooperation between the United Nations, regional and subregional partners enhances the effectiveness of peacemaking and mediation efforts, and that support that is tailored to each specific context results in a stronger basis for cooperation. In applying the lesson, the subprogramme will design, develop and implement context-specific, tailored responses to the needs of regional and subregional organizations in mediation and preventive diplomacy.

3.I.27 Expected progress towards the objective is presented in the performance measure below (see figure 3.I.I).

Figure 3.I.I
Performance measure: number of initiatives undertaken by regional and subregional organizations to strengthen coordination with the United Nations and other regional organizations (annual)



Deliverables

3.I.28 Table 3.I.5 lists all deliverables of the subprogramme.

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Good offices: good offices and preventive diplomacy; high-level diplomatic missions and meetings, including jointly with more than 24 regional organizations; and strategic assessment missions and support for an estimated 22 special political missions with a good offices role, including mediation support.

Consultation, advice and advocacy: consultations with representatives of Member States from all regions, international and regional organizations and civil society organizations; and strategic coordination meetings with relevant partners.

Databases and substantive digital materials: databases such as the Peace and Security Data Hub, United Nations Peacemaker and Diplomatic Pulse.

D. Communication deliverables

External and media relations: communications products about the work of the Department, such as *Politically Speaking*, Diplomacy for Peace and accounts on relevant social media platforms.

Subprogramme 2
Electoral assistance

Objective

3.I.29 The objective, to which this subprogramme contributes, is to strengthen the existing capacity of requesting Member States to organize and conduct inclusive, transparent and peaceful elections that enjoy public confidence and that contribute to stability and security, especially in transitional and post-conflict situations.

Strategy

3.I.30 To contribute to the objective, the subprogramme will continue to provide timely electoral support to Member States upon their request or pursuant to a mandate from the General Assembly or the Security Council, in close coordination with other relevant United Nations entities under the leadership of the United Nations focal point for electoral assistance matters. Specifically, the subprogramme will:

(a) Deploy technical experts and various types of electoral missions in support of requesting Member States, including on designing and establishing election management bodies, designing or reforming electoral frameworks and systems, addressing political and technical issues that arise in the conduct of electoral processes, developing voter education and voter registration activities, and promoting the participation of women, young people and persons with disabilities in electoral and political processes;

(b) Develop and strengthen partnerships and provide capacity development support to requesting regional organizations, including by co-organizing, with regional organizations and other relevant United Nations entities, training events for Member States in various regions, including on gender equality and elections, enhancing the credibility, inclusivity and integrity of electoral processes and preventing election-related violence;

(c) Develop or update internal policies on electoral assistance, in close cooperation with other relevant United Nations entities, and review and provide input to initiatives and documents of other United Nations entities that intersect with elections;

(d) Maintain and manage the United Nations single roster of electoral experts and the United Nations electoral institutional memory;

(e) Assist Member States, upon request, in assessing the impact of digital and emerging technologies, including social media, in the context of electoral processes.

3.I.31 The above-mentioned work is expected to result in:

(a) More inclusive, peaceful and transparent electoral processes;

(b) Strengthened election management bodies;

(c) More effective electoral frameworks and systems;

(d) Enhanced voter education and voter registration activities;

(e) Increased participation of women, young people, persons with disabilities and those who are underrepresented and/or marginalized, including people in rural areas lacking infrastructure, in electoral and political processes;

(f) Strengthened electoral capacity of regional organizations;

(g) Consistent, coherent and coordinated electoral assistance to Member States.

Programme performance in 2024

Increased number of networks of women in electoral management bodies

3.I.32 In 2024, the subprogramme continued its efforts to promote gender equality in electoral management bodies by supporting initiatives aimed at increasing the representation of women in leadership roles. This included providing technical assistance and capacity-building programmes tailored to address the barriers that women face in obtaining decision-making positions within such bodies. The subprogramme collaborated with Member States, civil society and international partners to establish and support networks of women leaders in electoral management bodies, encouraging mentorship, peer support and knowledge-sharing. The subprogramme worked to ensure that women's voices are viewed as integral to the administration and governance of electoral processes worldwide.

3.I.33 Progress towards the objective is presented in the performance measure below (see table 3.I.6).

Table 3.I.6
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Activities undertaken by the Arab Network for Women in Elections	The Arab Network for Women in Elections continued their activities, including support at national levels	Establishment of a network for women chairpersons of election management bodies in Africa

Planned results for 2026

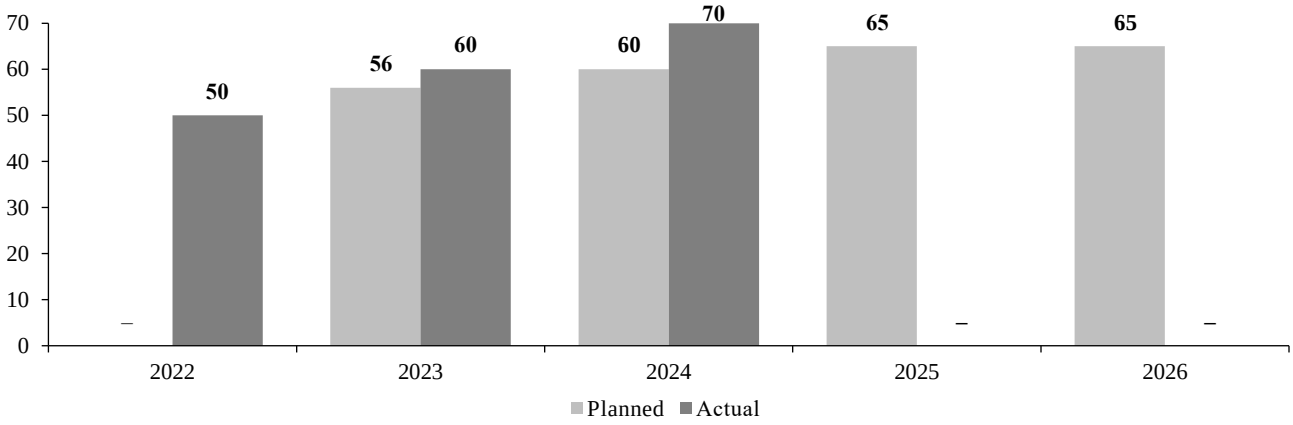
Result 1: increased regional training opportunities for Member State electoral officials

Programme performance in 2024 and target for 2026

3.I.34 The subprogramme's work contributed to the participation of 70 representatives from Member States in regional electoral training sessions organized or supported by the United Nations, which exceeded the planned target of 60 representatives.

3.I.35 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.II).

Figure 3.I.II
Performance measure: number of participants from Member States attending regional electoral training sessions organized or supported by the United Nations in partnership with regional and subregional organizations (annual)



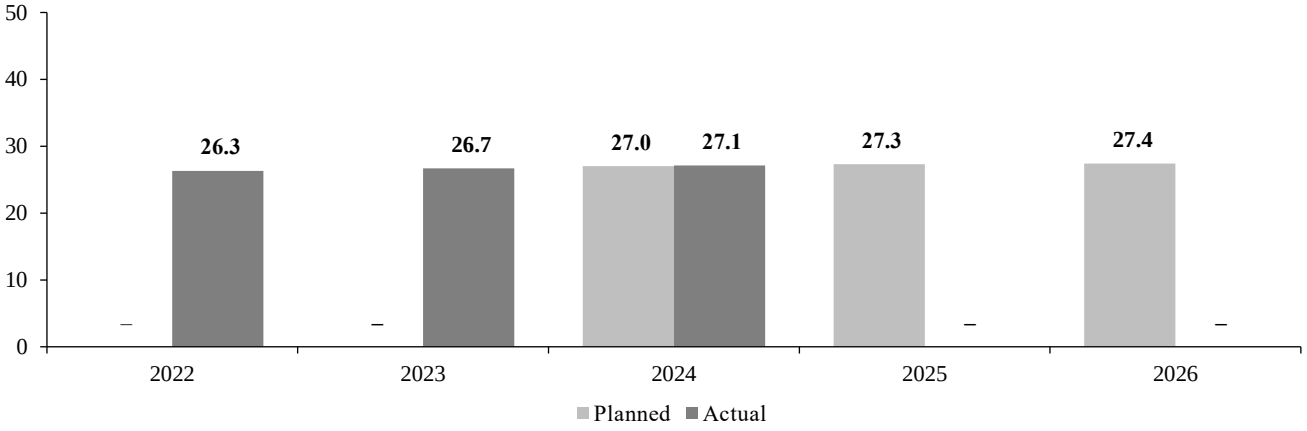
Result 2: increased representation of women in electoral and political processes

Programme performance in 2024 and target for 2026

3.I.36 The subprogramme's work contributed to an average of 27.1 per cent of women in parliaments in countries receiving United Nations electoral assistance, which exceeded the planned target of 27 per cent.

3.I.37 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.III).

Figure 3.I.III
Performance measure: percentage of women in parliaments in countries receiving United Nations electoral assistance (annual)



Result 3: strengthened capacity of Member States receiving United Nations electoral assistance through joint initiatives with regional and subregional organizations

Proposed programme plan for 2026

3.I.38 Coordinating electoral assistance presents significant challenges, as it requires ensuring consistency and coherence among diverse international, regional, national and local stakeholders while addressing complex political, logistical and technical dynamics to ensure credible and peaceful elections. In this connection, the subprogramme has dedicated efforts in recent years to coordinating

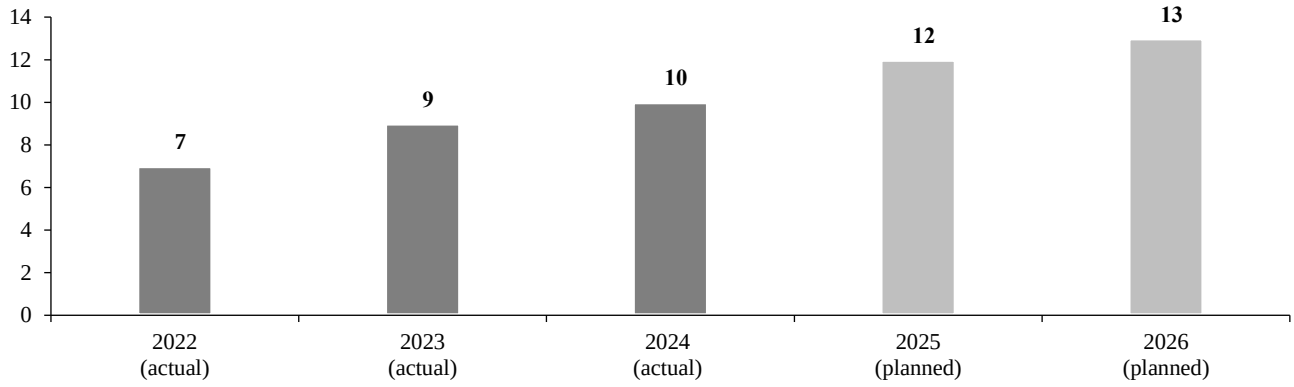
and enhancing the capacities of regional and subregional bodies to support their member States' efforts to hold credible and peaceful elections.

Lessons learned and planned change

3.I.39 The lesson for the subprogramme was that increased cooperation with regional and subregional organizations has proved effective in helping Member States and international organizations alike to address the challenge of coordination and foster peer-to-peer learning and electoral capacity development. In applying the lesson, the subprogramme will support regional and subregional organizations through capacity development initiatives to foster peer-to-peer learning and harmonization, as necessary.

3.I.40 Expected progress towards the objective is presented in the performance measure below (see figure 3.I.IV).

Figure 3.I.IV
Performance measure: number of regional and subregional organizations participating in electoral capacity development initiatives (annual)



Deliverables

3.I.41 Table 3.I.7 lists all deliverables of the subprogramme.

Table 3.I.7
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Electoral missions (number of missions)	**32**	**34**	**34**	**34**
7. Technical, advisory and review missions for electoral processes	32	34	34	34
C. Substantive deliverables				
Consultation, advice and advocacy: technical advice for electoral processes to an estimated 50 Member States, particularly in the areas of electoral systems and frameworks, mainstreaming a gender perspective, voter registration and electoral operations; consultations, including with Governments, United Nations entities and civil society organizations, including women's organizations.				
Databases and substantive digital materials: United Nations single electoral roster of experts; records on the provision of electoral assistance for preserving United Nations electoral institutional memory.				

Subprogramme 3
Security Council affairs

Objective

3.I.42 The objective, to which this subprogramme contributes, is to ensure the effective discharge by the Security Council of its responsibility for the maintenance of international peace and security.

Strategy

3.I.43 To contribute to the objective, the subprogramme will facilitate the full, complete and timely execution of the work of the Security Council and its subsidiary bodies, including by:

(a) Assisting the monthly presidency of the Council in carrying out its official functions, particularly the preparation and conduct of the Council's monthly programme of work, and providing procedural and substantive advice to the monthly presidency, Council members and other Member States regarding the conduct of meetings and Council activities;

(b) Coordinating the timely and accurate issuance of the official documentation of the Council, including its outcomes and other documents, as well as other correspondence from the Secretariat, Member States and entities;

(c) Supporting the work of the subsidiary bodies of the Council, including sanctions committees, other committees and working groups, as well as their associated monitoring teams, groups and panels, including by providing procedural and substantive advice to Chairs and other Council members;

(d) Supporting missions of the Council and Chairs of its subsidiary bodies to countries and regions in connection with matters on the Council's agenda;

(e) Supporting the design and implementation of the Council's sanctions regimes, including by conducting assessments of regimes upon the Council's request;

(f) Organizing training sessions for incoming members of the Council, and Chairs and members of sanctions committees, and engaging with the broader United Nations system and Member States to enhance the effective functioning of sanctions committees as well as to promote deeper understanding and implementation of Council sanctions;

(g) Disseminating the United Nations Security Council Consolidated List to Member States, the United Nations system, other regional and international organizations and the private sector immediately following the adoption of Council and Sanctions Committees listing and delisting decisions;

(h) Providing to Member States specialized research and analyses regarding the practice and procedures of the Council, through publications such as the *Repertoire of the Practice of the Security Council*, the *Highlights of Security Council Practice* and other information and data resources on specific areas of practice of the Council;

(i) Responding to specific requests for research and advice from Member States and convening dedicated information sessions, upon request; and contributing to the publicly available joint Peace and Security Data Hub of the Departments of Political and Peacebuilding Affairs and Peace Operations.

3.I.44 The above-mentioned work is expected to result in:

(a) The Security Council being able to fulfil its responsibilities under the Charter of the United Nations;

(b) The Council and its Sanctions Committees being able to implement targeted sanctions;

(c) Member States being able to rely on up-to-date and comprehensive information concerning the practice and procedures of the Council, allowing them to be better equipped to participate in the work of the Council and to actively contribute to its effective functioning.

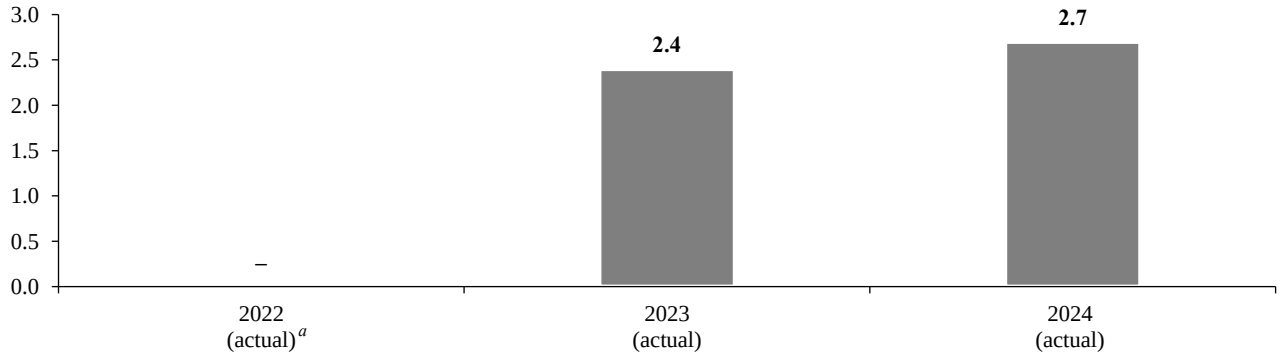
Programme performance in 2024

Enhanced access to information on the Security Council for Member States and the public

3.I.45 The Security Council public website is the authoritative source of information on the work of the Council and its subsidiary bodies for the membership of the United Nations and the wider public. In response to feedback from Member States and with a view to improving accessibility, in July 2024, the subprogramme launched an enhanced version of the Council's website, which features an interactive display of the Council's programme of work; an improved search function that connects to all Security Council documents in the United Nations Digital Library; and increased accessibility for persons with disabilities. The improved features have garnered positive feedback from users, and the website is better addressing the needs of Security Council members and other users, as evidenced by the 12.5 per cent increase in the number of active users in the period from July to December 2024, compared with the same period in 2023.

3.I.46 Progress towards the objective is presented in the performance measure below (see figure 3.I.V).

Figure 3.I.V
Performance measure: number of active users of the Security Council website in the period from July to December (millions)



[a] Data for 2022 not available.

Planned results for 2026

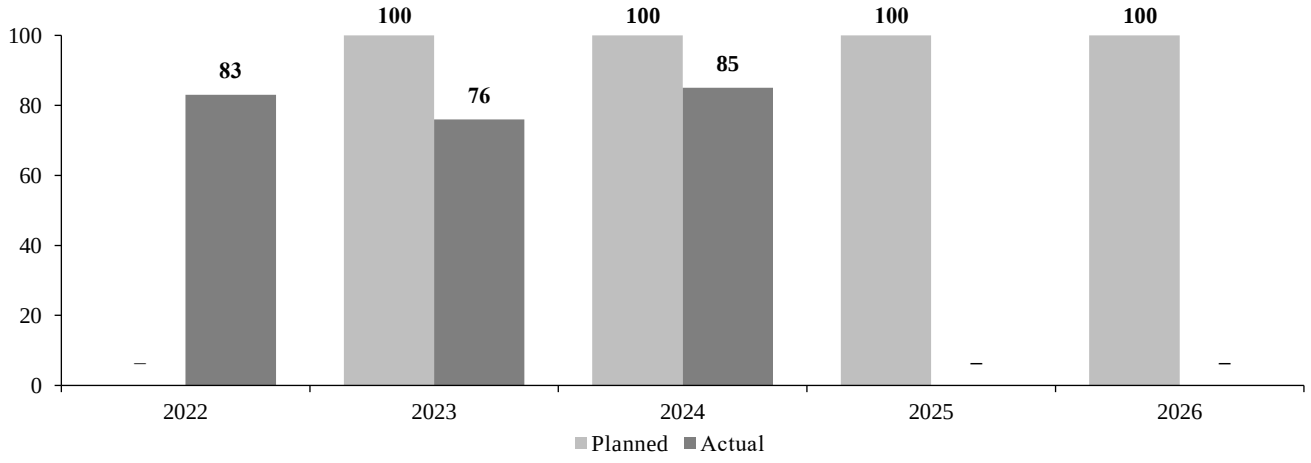
Result 1: Security Council members receive timely information on the implementation of sanctions measures

Programme performance in 2024 and target for 2026

3.I.47 The subprogramme's work contributed to the receipt by sanctions committees of expert panel proposals within two weeks of the renewal of a mandate, or within six weeks of the establishment of a new mandate, in 85 per cent of cases, which did not meet the planned target of 100 per cent. The target was not met owing to continued challenges in identifying qualified candidates, particularly in specialized areas of expertise, such as arms, armed groups or natural resources.

3.I.48 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.VI).

Figure 3.I.VI
Performance measure: percentage of expert panel proposals received by sanctions committees within two weeks of the renewal of a mandate or within six weeks of the establishment of a new mandate



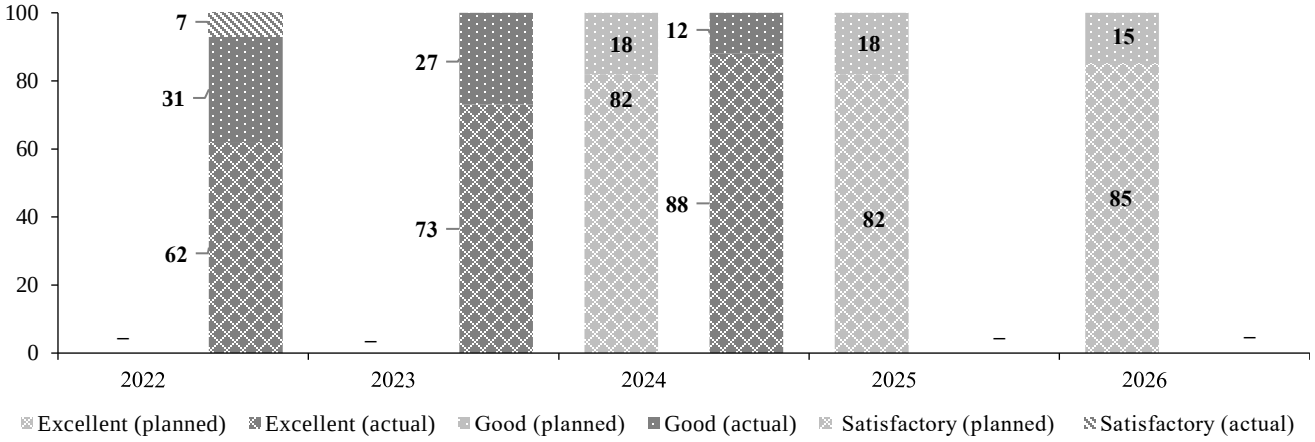
Result 2: enhanced engagement with Member States on the Security Council's work

Programme performance in 2024 and target for 2026

3.I.49 The subprogramme's work contributed to 88 per cent of participants in the induction workshops for incoming Security Council members expressing an "excellent" degree of satisfaction and 12 per cent expressing a "good" degree of satisfaction, which exceeded the planned target of 82 per cent of participants expressing an "excellent" degree of satisfaction and 18 per cent expressing a "good" degree of satisfaction.

3.I.50 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.VII).

Figure 3.I.VII
Performance measure: percentage of participants in the induction workshops for incoming Security Council members expressing a “satisfactory”, “good” or “excellent” degree of satisfaction



Result 3: improved access for Member States and the public to up-to-date, contemporaneous analytical information on the practice and work of the Security Council

Proposed programme plan for 2026

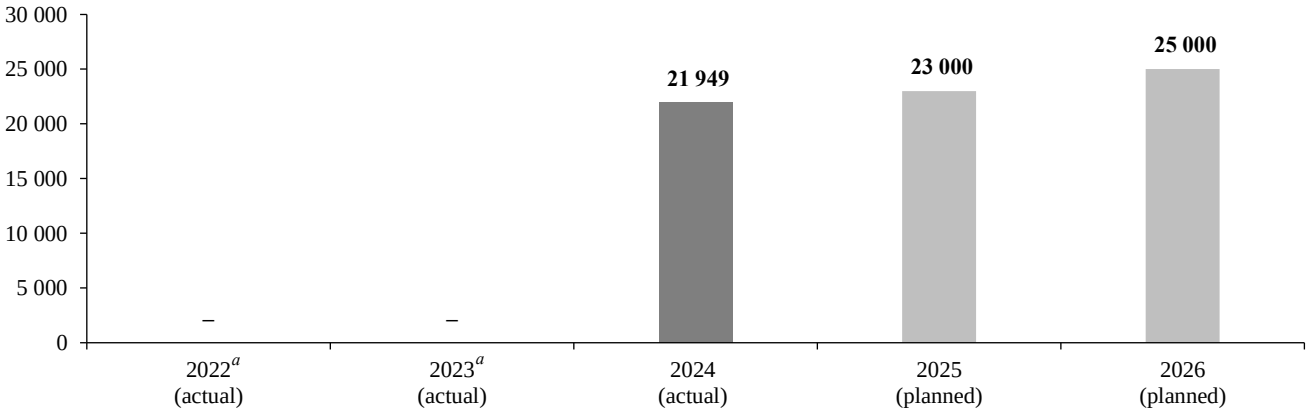
3.I.51 The subprogramme provides information, through databases and dashboards, on the practice and work of the Security Council in order to enable better information access among and decision-making by Council members and Member States.

Lessons learned and planned change

3.I.52 The lesson for the subprogramme was the need to enhance databases and information to show relevant trends and analysis and foster a better understanding of the Security Council’s practice and work. In applying the lesson, the subprogramme will improve existing data sets by expanding their scope and capturing more real-time data, and develop new databases, including one on Council voting records, based on feedback received from Council members and Member States.

3.I.53 Expected progress towards the objective is presented in the performance measure below (see figure 3.I.VIII).

Figure 3.I.VIII
Performance measure: number of views of databases on the Security Council website



[a] Data for 2022 and 2023 not available.

Deliverables

3.I.54 Table 3.I.8 lists all deliverables of the subprogramme.

Table 3.I.8
Subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

7. Volume of *Resolutions and Decisions of the Security Council*	1	1	1	1
Technical materials (number of materials)	**29**	**29**	**29**	**29**
8. Compendium of mandates relating to active peacekeeping and special political missions authorized by the Security Council	1	1	1	1
9. Compendium of Security Council mandates and reports to the Council	12	12	12	12
10. Compendium of mandates relating to cross-cutting issues; women and peace and security; children in armed conflict; and protection of civilians in armed conflict	3	3	3	3
11. *Highlights of Security Council Practice*	1	1	1	1
12. Statistics of Security Council deliberations	12	12	12	12
C. Substantive deliverables				
Consultation, advice and advocacy: consultation, advice and advocacy to the Security Council in the preparation of the report of the Security Council for the General Assembly; tailored research for Member States on Security Council practice and procedure, current and historic.				
Databases and substantive digital materials: database of Council procedures, practices and working methods, including data on over 200 public meetings convened annually, covering approximately 50 agenda items; roster of experts for Council subsidiary bodies, and the United Nations Security Council Consolidated List of sanctions in all official languages provided to Member States, the private sector and other stakeholders; interactive dashboards on representation of women at the Council, membership of the Council, Chairs and Vice-Chairs of its subsidiary organs and Arria-formula meetings; data sets related to the work of the Council published on the Peace and Security Data Hub.				
D. Communication deliverables				
Digital platforms and multimedia content: website of the Security Council and its subsidiary bodies in the six official languages of the United Nations for Member States and the wider public; social media posts and articles linking the activities of the Council to relevant constitutional and procedural aspects captured in the *Repertoire of the Practice of the Security Council*.				

Subprogramme 4
Decolonization

Objective

3.I.55 The objective, to which this subprogramme contributes, is to promote the decolonization process in accordance with the Charter and relevant resolutions of the General Assembly of the 17 Non-Self-Governing Territories so as to bring about the complete eradication of colonialism.

Strategy

3.I.56 To contribute to the objective, the subprogramme will:

(a) Provide substantive support to the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples and the Fourth Committee, including the preparation of Secretariat working papers and mandated reports of the Secretary-General, and inputs for the annual report of the President of the Economic and Social Council on the implementation of the Declaration by the specialized agencies and the international institutions associated with the United Nations;

(b) Provide advice, briefing materials and substantive support to the meetings, annual regional seminars and visiting missions of the Special Committee, and meetings of the Fourth Committee and the Economic and Social Council, in close coordination with the Department for General Assembly and Conference Management;

(c) Maintain contact with the representatives of the Non-Self-Governing Territories and United Nations agencies, funds and programmes and work with the Department of Global Communications, the Department for General Assembly and Conference Management and the Office of Information and Communications Technology in disseminating information on decolonization, including through the enhancement of the United Nations and decolonization website, and in supporting the implementation of an outreach programme to mobilize educational institutions and civil society to expand their activities in the field of remembering colonialism, its root causes and consequences.

3.I.57 The above-mentioned work is expected to result in:

(a) Advancement of specific proposals to bring about an end to colonialism;

(b) Programmes of work developed on a case-by-case basis for the decolonization of the Non-Self-Governing Territories;

(c) Timely and informed decision-making by the Special Committee when considering the situation in the Non-Self-Governing Territories.

Programme performance in 2024

The Special Committee undertook a visiting mission to the British Virgin Islands

3.I.58 The General Assembly, most recently in its resolution 79/114, has reaffirmed that the United Nations visiting missions to the Non-Self-Governing Territories, where applicable, are an effective means of ascertaining the situation of the peoples of the Territories, in accordance with relevant United Nations resolutions on specific Territories. The Assembly has also requested the Special Committee to undertake at least one such mission a year. The subprogramme contributed to the planning and conduct of a visiting mission to the British Virgin Islands in August 2024. In December 2024, the subprogramme conducted a client survey with members of the visiting mission to assess client satisfaction with the support provided, with members expressing 100 per cent satisfaction.

3.I.59 Progress towards the objective is presented in the performance measure below (see table 3.I.9).

Table 3.I.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	The Special Committee undertook a visiting mission to the British Virgin Islands and issued a report (A/AC.109/2025/20)

Planned results for 2026

Result 1: the Special Committee has access to information on the status of implementation of the 2030 Agenda in the Non-Self-Governing Territories

Programme performance in 2024 and target for 2026

3.I.60 The subprogramme's work contributed to the inclusion of updated and timely information in the working papers on the implementation of the Sustainable Development Goals in the Non-Self-Governing Territories, on a case-by-case basis, and based on available data from official sources, which met the planned target.

3.I.61 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.I.10).

Table 3.I.10
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The Special Committee had access to information on the economic, social and environmental conditions in the Non-Self-Governing Territories	The Special Committee had access to information, on a case-by-case basis, related to the status of implementation of the Sustainable Development Goals in the Non-Self-Governing Territories	The Special Committee had access, on a case-by-case basis, to updated and timely information on the status of implementation of the Sustainable Development Goals in the Non-Self-Governing Territories	The Special Committee has access to updated and timely information on the status of implementation of the Sustainable Development Goals in the Non-Self-Governing Territories	The Special Committee has access to updated and timely information on the status of implementation of the Sustainable Development Goals in the Non-Self-Governing Territories

Result 2: the Special Committee has access to an up-to-date list of qualified experts on decolonization

Programme performance in 2024 and target for 2026

3.I.62 The subprogramme's work contributed to the Special Committee having access to a gender-balanced list of qualified experts on decolonization, which met the planned target.

3.I.63 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.I.11).

Table 3.I.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	The Special Committee had access to a list of experts on decolonization from which the Bureau selected the experts invited to the Pacific regional seminar	The Special Committee continued to have access to a list of experts on decolonization Gender parity was achieved with respect to the shortlist of experts proposed for selection	The Special Committee has access to a list with an increased number of qualified experts, which contributes to the list of qualified experts on decolonization having improved gender balance, geographical representation and area of expertise representation	The Special Committee has access to a list with an increased number of qualified experts, which contributes to the list of qualified experts on decolonization having improved geographical representation and area of expertise representation

Result 3: increased dissemination of information on decolonization

Proposed programme plan for 2026

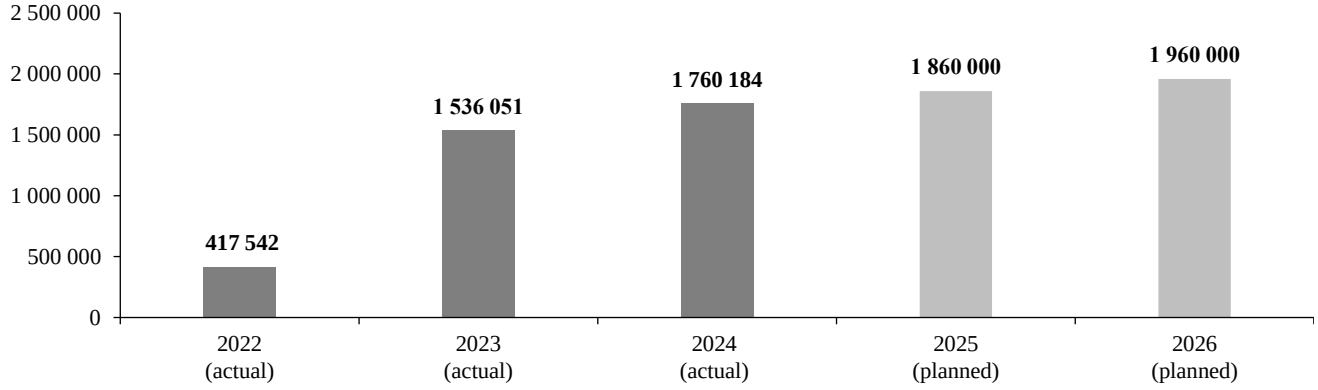
3.I.64 In its resolution 79/113, the General Assembly considered it important to continue and expand its efforts to disseminate information on decolonization, requested the Secretary-General to further enhance the information on the United Nations decolonization website, and to use all of the media available to give publicity to the work of the United Nations in the field of decolonization. The subprogramme regularly updates the United Nations and Decolonization website to add new content related to decolonization and the Non-Self Governing Territories.

Lessons learned and planned change

3.I.65 The lesson for the subprogramme was the need to enhance the information provided on the website by producing interactive, visual and thematic content in all official languages to make it more engaging. In applying the lesson, the subprogramme will improve the website, including by updating and expanding its content to ensure it is current, relevant and informative, enhancing its visual appeal and improving its search functionality.

3.I.66 Expected progress towards the objective is presented in the performance measure below (see figure 3.I.IX).

Figure 3.I.IX
Performance measure: number of page views of the United Nations and Decolonization website



Deliverables

3.I.67 Table 3.I.12 lists all deliverables of the subprogramme.

Subprogramme 5
Question of Palestine

Objective

3.I.68 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of the programme of work of the Committee on the Exercise of the Inalienable Rights of the Palestinian People to promote the realization of the inalienable rights of the Palestinian people.

Strategy

3.I.69 To contribute to the objective, the subprogramme will:

(a) Organize Committee and Bureau meetings, conduct observances globally of the International Day of Solidarity with the Palestinian People, including a high-level event in New York; commemorate the anniversary of the Nakbah, including by organizing annual events and through the dissemination of relevant archives and testimonies, in line with General Assembly resolution 79/82; organize outreach for the Bureau with United Nations entities and Member States on the question of Palestine; and hold other advocacy and awareness-raising activities, events and international conferences;

(b) Develop and expand the digital advocacy of the Committee, including its website and social media channels supported by the subprogramme, and the online United Nations Information System on the Question of Palestine and publications;

(c) Liaise and cooperate with civil society and parliamentarians on the question of Palestine;

(d) Implement the Committee's capacity-building activities for Palestinian officials, with a focus on strategic communications and diplomatic protocol.

3.I.70 The above-mentioned work is expected to result in:

(a) Mobilization of the diplomatic community, through the work of the Committee, in support of the realization of the two-State solution, the inalienable rights of the Palestinian people and a just, comprehensive and lasting solution to the question of Palestine;

(b) The general public, civil society and the media being informed about the question of Palestine and the work of the Committee;

(c) Stronger institutional capacity of the Government of the State of Palestine in areas such as strategic communications and diplomatic protocol.

Programme performance in 2024

Increased recognition of the State of Palestine

3.I.71 The subprogramme's work supported the Committee in conducting outreach to an increased number of Member States and regional and subregional organizations. Since 2022, the Committee has undertaken visits to 16 regional and subregional organizations to engage in advocacy and awareness-raising. In 2024, this work led to the Caribbean Community (CARICOM) becoming the first subregional organization whose entire membership has recognized the State of Palestine, thus further mobilizing the international community in support of the realization of the two-State solution, the inalienable rights of the Palestinian people and a just, comprehensive and lasting solution to the question of Palestine.

3.I.72 Progress towards the objective is presented in the performance measure below (see table 3.I.13).

Table 3.I.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	CARICOM became the first subregional organization whose entire membership recognizes the State of Palestine

Planned results for 2026

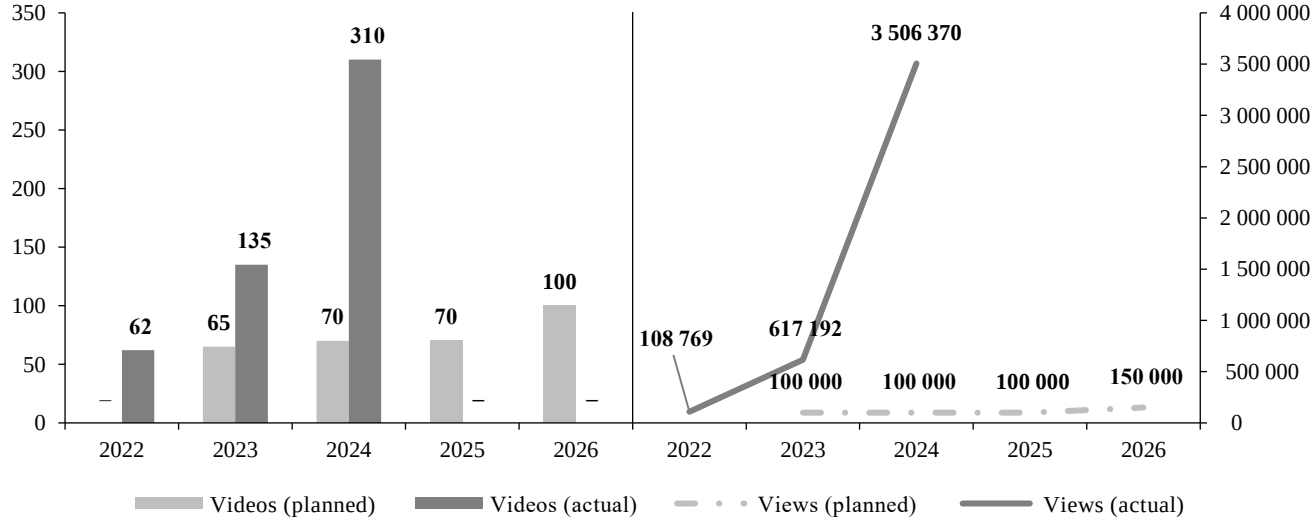
Result 1: increased digital advocacy and public engagement by the Committee on the question of Palestine

Programme performance in 2024 and target for 2026

3.I.73 The subprogramme's work contributed to heightened public engagement by the Committee on the question of Palestine, with 310 videos published and over 3.5 million website views, which exceeded the planned target of 70 videos and 100,000 views.

3.I.74 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.X).

Figure 3.I.X
Performance measure: access to videos published on the question of Palestine
(Number of views and number of videos)



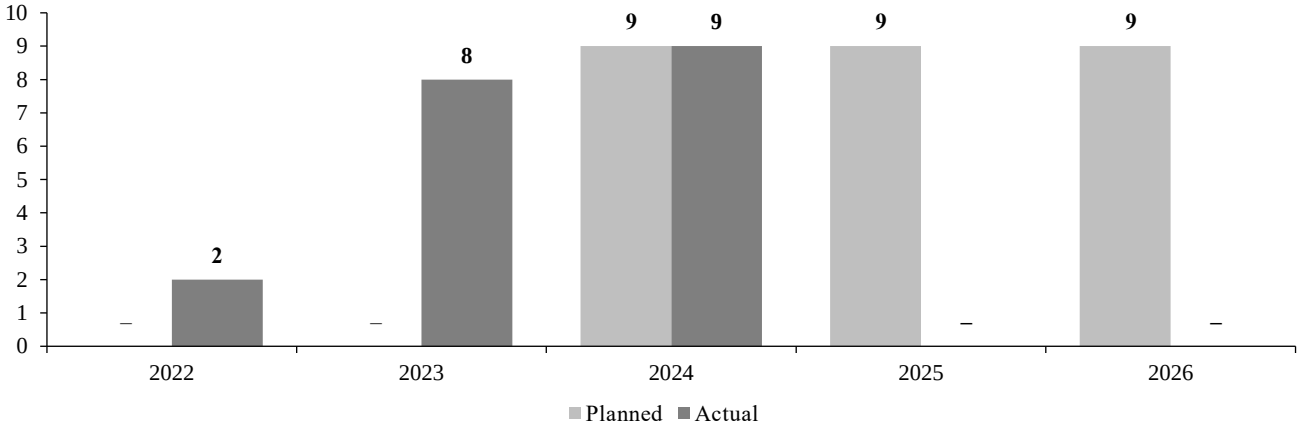
Result 2: enhanced public outreach by the Committee on the question of Palestine

Programme performance in 2024 and target for 2026

3.I.75 The subprogramme's work contributed to nine press statements of the Bureau of the Committee on the Exercise of the Inalienable Rights of the Palestinian People, which met the planned target.

3.I.76 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.XI).

Figure 3.I.XI
Performance measure: number of press statements of the Bureau of the Committee on the Exercise of the Inalienable Rights of the Palestinian People



Result 3: enhanced Committee briefings and engagement with the Security Council

Proposed programme plan for 2026

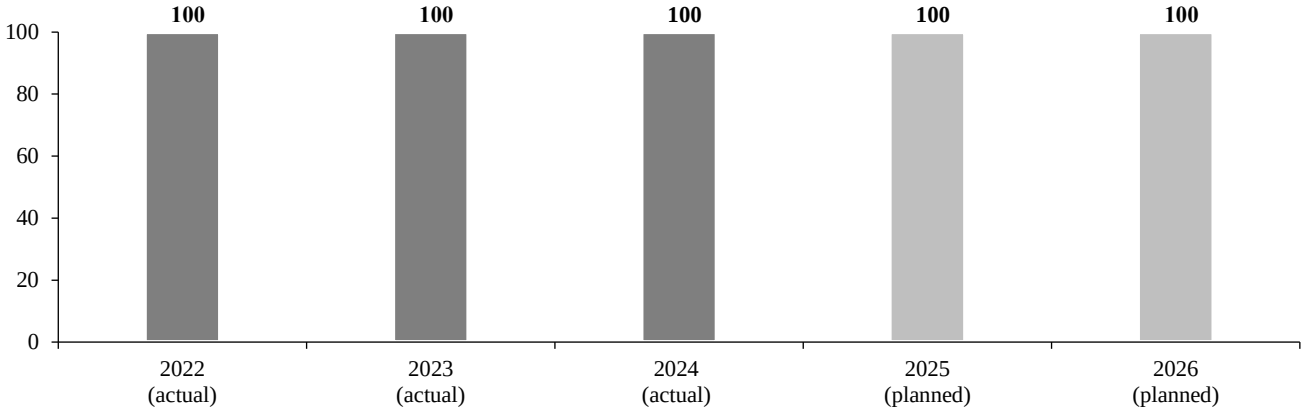
3.I.77 The subprogramme contributes to the promotion of the realization of the inalienable rights of the Palestinian people, including through substantive briefings at Committee meetings and outreach to the elected members of the Security Council.

Lessons learned and planned change

3.I.78 The lesson for the subprogramme was the need to address the feedback from Committee members who had expressed the opinion that Committee meetings had often been too procedural and that there could be more outreach to the elected members of the Security Council. In applying the lesson, the subprogramme will increase the number of briefings by experts, such as Special Rapporteurs and representatives of civil society organizations, and witness testimonials at Committee meetings, and further engage with the Security Council.

3.I.79 Expected progress towards the objective is presented in the performance measure below (see figure 3.I.XII).

Figure 3.I.XII
Performance measure: percentage of Committee members and observers expressing satisfaction with the subprogramme's support for outreach to Member States



Deliverables

3.I.80 Table 3.I.14 lists all deliverables of the subprogramme.

Table 3.I.14
Subprogramme 5: deliverables for the period 2024–2026, by category and subcategory

10. “NGO Action News” newsletter on recent and upcoming activities of civil society organizations affiliated with the Committee	51	51	48	48
11. Bulletin on action by the United Nations system and intergovernmental organizations relevant to the question of Palestine	12	12	12	12
12. Studies, information notes and newsletters on the Committee and the work of the subprogramme, and selected aspects of the question of Palestine	4	4	4	4
C. Substantive deliverables				
Databases and substantive digital materials: database of over 2,000 experts and some 1,500 non-governmental organizations working on the question of Palestine.				
D. Communication deliverables				
Outreach programmes, special events and information materials: International Day of Solidarity with the Palestinian People and other special events at the discretion of the Committee reaching all Member States and the public at large; annual Palestinian exhibit or cultural event in connection with the International Day of Solidarity at United Nations Headquarters reaching all Member States and the public at large; briefings for United Nations officials, visitors, non-governmental organizations and others; information-sharing, outreach efforts and participation in meetings of civil society.				
External and media relations: communiqués, press statements, press conferences and other communication materials for the media and other external entities before, during and after the Committee’s activities.				
Digital platforms and multimedia content: website of the subprogramme/Committee and its social media accounts.				
Library services: United Nations Information System on the Question of Palestine.				

Subprogramme 6
Peacebuilding Support Office

Objective

3.I.81 The objective, to which this subprogramme contributes, is to strengthen the effective role of the Peacebuilding Commission in bringing attention to peacebuilding needs, convening key actors and proposing peacebuilding strategies; and to strengthen country- and region-owned and -led peacebuilding efforts and United Nations system-wide coherence on the ground through the Peacebuilding Fund, and strengthen partnerships with international financial institutions in support of efforts to build and sustain peace.

Strategy

3.I.82 To contribute to the objective, the subprogramme will:

(a) Organize visits of the Peacebuilding Commission, provide technical and substantive advice regarding the Commission meetings and advance partnerships between the Commission and international financial institutions and regional and subregional organizations, civil society and the private sector;

(b) Through the Peacebuilding Fund, support nationally-led peacebuilding programmes, prioritizing transition contexts, subregional and cross-border contexts and the empowerment of women and young people, in particular those in vulnerable situations and situations of armed conflict;

(c) Spearhead policy development related to peacebuilding, lead relevant coordination and integration mechanisms within the United Nations system and with the World Bank and other international financial institutions, including regional multilateral development banks, and advocate for the participation of women, youth and civil society organizations in peacebuilding.

3.I.83 The above-mentioned work is expected to result in:

(a) A deeper commitment to sustaining peace by Member States and regional and international partners, including international financial institutions;

(b) Synergistic, coordinated and effective national peacebuilding actions;

(c) Improved alignment of policy responses for peacebuilding needs, with increased involvement of regional and international partners, including international financial institutions;

(d) Improved coordination among Member States and regional and international partners to prioritize transition contexts, subregional and cross-border contexts and the empowerment of women and young people.

Programme performance in 2024

The Peacebuilding Commission exchanged best practices on nationally-owned and -led peacebuilding efforts

3.I.84 The General Assembly, in its resolution 79/1, on the Pact for the Future, commits Member States to strengthen national prevention strategies and approaches to sustain peace, and provide assistance to States, upon request, including through the Peacebuilding Commission, to build national capacity to promote, develop and implement their nationally owned prevention efforts and address the root causes of violence and conflict in their countries, including by sharing best practice and lessons learned. In 2024, the subprogramme's work contributed to the organization by the Peacebuilding Commission of an ambassadorial-level meeting on national efforts for prevention and peacebuilding focusing on lessons learned from Kenya, Norway and Timor Leste. Member States commended these efforts in addressing the root causes and drivers of violence, instability and conflict and in enhancing approaches and strategies to that end.

3.I.85 Progress towards the objective is presented in the performance measure below (see table 3.I.15).

Table 3.I.15
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	The Peacebuilding Commission exchanged best practices and lessons learned from 3 national peacebuilding approaches and commended the efforts in addressing the root causes and drivers of violence, instability and conflict, and in enhancing approaches and strategies to that end

Planned results for 2026

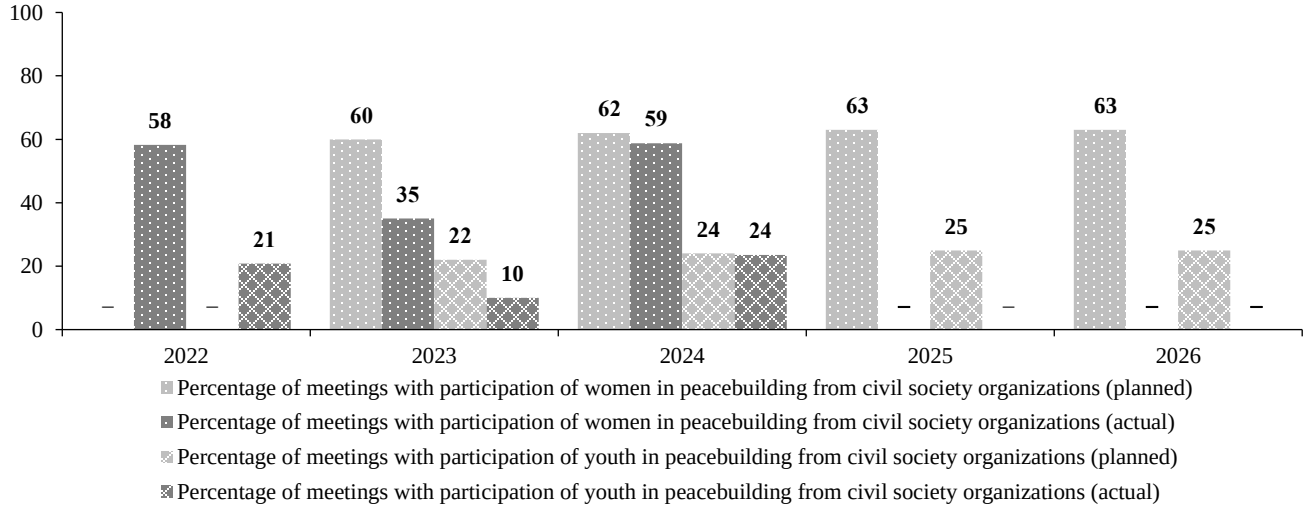
Result 1: increased participation of women and youth in peacebuilding in meetings of the Peacebuilding Commission

Programme performance in 2024 and target for 2026

3.I.86 The subprogramme's work contributed to 59 per cent of meetings with participation of women in peacebuilding from civil society organizations, which did not meet the target of 62 per cent. The target was not met due to a decrease in the number of meetings and the type of meetings convened; however, the Peacebuilding Commission also met with women peacebuilders during its field visits, including to Liberia and Sao Tome and Principe. The subprogramme's work also contributed to 24 per cent of meetings with participation of youth in peacebuilding from civil society organizations, which met the target.

3.I.87 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.XIII).

Figure 3.I.XIII
Performance measure: increased rate of participation of women and youth in peacebuilding in meetings of the Peacebuilding Commission



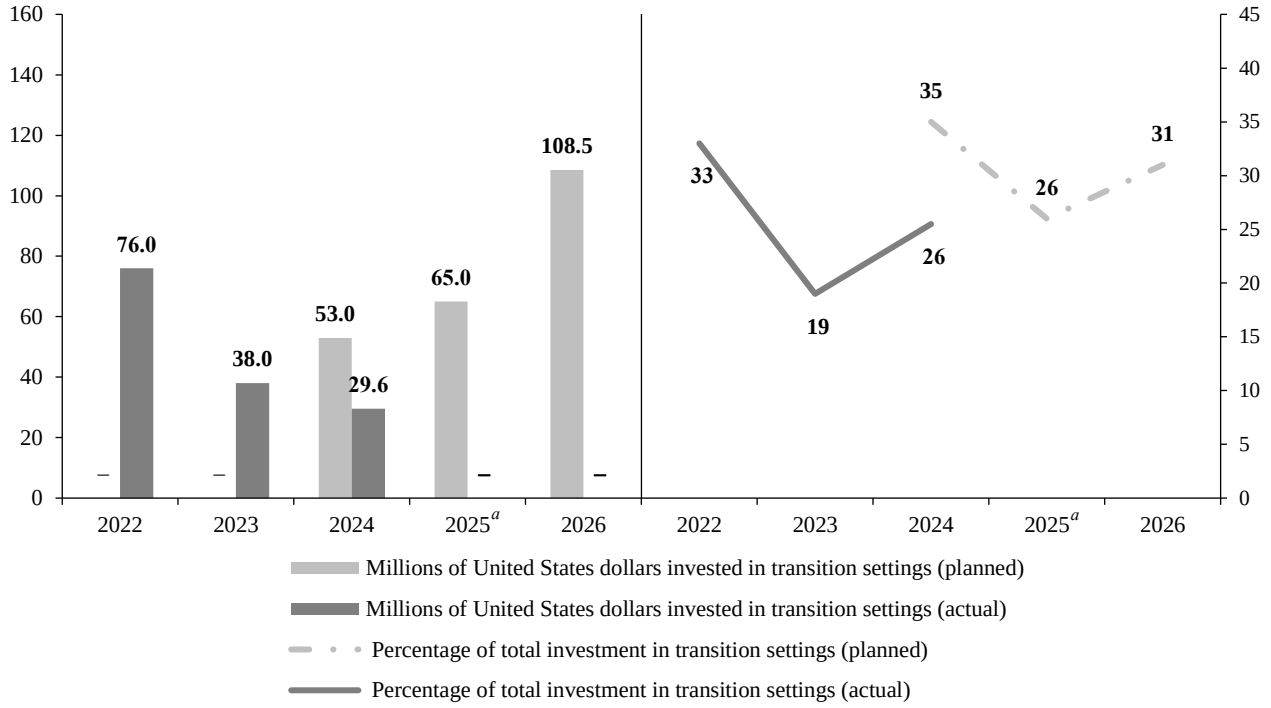
Result 2: increased focus on mission transitions

Programme performance in 2024 and target for 2026

3.I.88 The subprogramme's work contributed to 26 per cent of financing by the Peacebuilding Fund ($29.6 million) of initiatives in transition settings, which did not meet the planned target of 35 per cent ($53 million). The target was not met due, inter alia, to fluctuations in requests for funding.

3.I.89 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.I.XIV).

Figure 3.I.XIV
Performance measure: financing by the Peacebuilding Fund of initiatives in transition settings



[a] The targets for 2025 and 2026 reflect updated targets for the priority window for transitions, in line with the Peacebuilding Fund performance framework.

Result 3: strengthened partnership with International Financial Institutions for nationally-owned peacebuilding and prevention strategies

Proposed programme plan for 2026

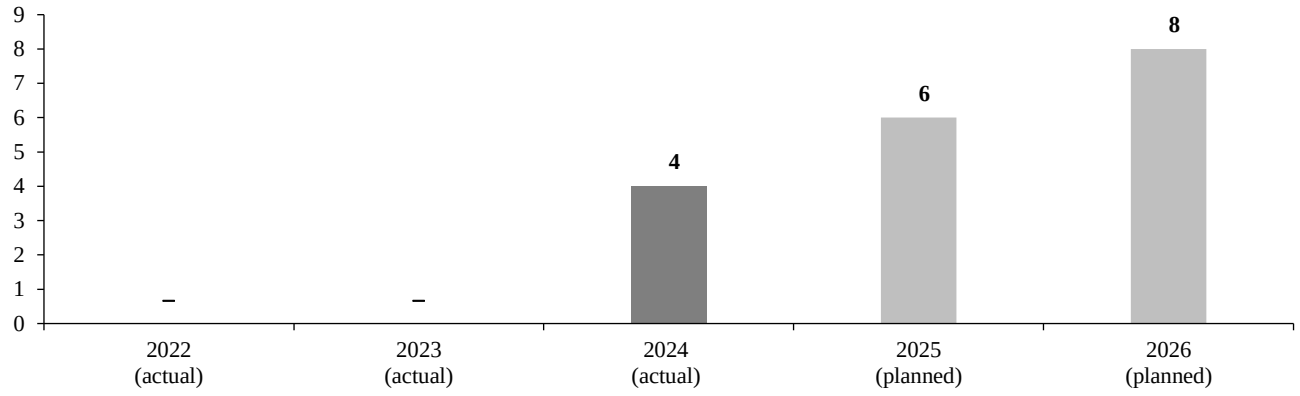
3.I.90 In its resolution 76/305, on financing for peacebuilding, the General Assembly recognized the important role of international and regional financial institutions in peacebuilding and sustaining peace and encouraged continued efforts towards strengthened partnership and strategic cooperation between the United Nations and such financial institutions, in line with national priorities. In 2024, the subprogramme continued to facilitate regular policy dialogue and country-specific initiatives with the World Bank and initiated new joint workplans with three regional multilateral development banks. In 2024, the United Nations-International Financial Institutions Partnership Facility continued to provide liaison and advisory support to United Nations field presences in around 20 contexts, including enabling joint country analysis and strategic alignment initiatives with international financial institutions and multilateral development banks in support of national prevention and peacebuilding efforts, and piloting joint United Nations-World Bank reviews.

Lessons learned and planned change

3.I.91 The lesson for the subprogramme was that engagements with several regional multilateral development banks enables the identification of potential areas for greater cooperation, leveraging the partner institutions' tailored strategies to address fragility, conflict and criminal violence. In applying the lesson, the subprogramme will continue to broaden and deepen its collaboration with regional multilateral development banks, targeting those with relevant existing strategies for addressing fragility, conflict and violence.

3.I.92 Expected progress towards the objective is presented in the performance measure below (see figure 3.I.XV).

Figure 3.I.XV
Performance measure: number of joint initiatives undertaken by international or regional financial institutions to strengthen strategic cooperation on peacebuilding (annual)



Deliverables

3.I.93 Table 3.I.16 lists all deliverables of the subprogramme.

Table 3.I.16
Subprogramme 6: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**3**	**3**	**2**	**3**
Reports of the:				
1. Peacebuilding Commission for the General Assembly and the Security Council	1	1	1	1
2. Secretary-General on the Peacebuilding Fund for the General Assembly	1	1	1	1
3. Secretary-General on peacebuilding and sustaining peace	1	1	–	1

4. Meetings of the Peacebuilding Commission	35	17	37	18
5. Joint meetings of the Peacebuilding Commission with the General Assembly, the Security Council and the Economic and Social Council	3	1	3	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**–**	**–**	**14**	**14**
6. On peacebuilding projects pursuant to General Assembly resolution 78/257	–	–	14	14

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Seminars, workshops and training events (number of days)	**2**	**2**	**3**	**2**
7. Induction training of new members of the Peacebuilding Commission	1	–	2	1
8. Regional training for prospective recipients, including ministries and other United Nations stakeholders, on the Peacebuilding Fund as a tool for peacebuilding	1	2	1	1

C. Substantive deliverables

Consultation, advice and advocacy: guidance and advice to country-level and regional recipients of funding from the Peacebuilding Fund on priority-setting and programming; promotion of partnerships in the form of regular dialogue, operational and strategic consultation between the United Nations and the World Bank, the International Monetary Fund and other international and regional financial institutions in seven countries and/or subregions; consultation, advice and advocacy with regional and subregional organizations (including through the annual informal consultation between the Peacebuilding Commission and the Peace and Security Council of the African Union), civil society organizations, think tanks, academia and the private sector on peacebuilding issues; strategic guidance and advice in support of the delivery of the mandate of the Peacebuilding Commission and the formulation and delivery of the priorities and the workplan of the Peacebuilding Commission; support, including advice, for approximately 21 submissions by the Peacebuilding Commission to other intergovernmental bodies and peacebuilding forums; information-sharing, guidance and strategic advice to Member States, the United Nations system and key stakeholders on policy issues related to the implementation of the sustaining peace framework, including the 2025 review of the peacebuilding architecture; policy support and advice to all members of the Peacebuilding Commission and Peacebuilding Fund donors and all recipient Governments on peacebuilding and sustaining peace and on women and young people in peacebuilding.

D. Communication deliverables

External and media relations: press statements of the Peacebuilding Commission; four newsletters on peacebuilding.

Digital platforms and multimedia content: United Nations Peacebuilding website and social media platforms; multimedia content, including short videos highlighting the results and impact on the ground.

Subprogramme 7
Cooperation between the United Nations and the League of Arab States

Objective

3.I.94 The objective, to which this subprogramme contributes, is to strengthen cooperation between the United Nations and the League of Arab States (LAS).

Strategy

3.I.95 To contribute to the objective, the subprogramme will:

(a) Identify areas of work of joint interest and strengthen relationships with LAS through the pursuit of the common goals and objectives of the League and the United Nations;

(b) Contribute to efforts by LAS and its member States to make progress on achieving Sustainable Development Goal 16 and their commitments to building effective, accountable and inclusive institutions at all levels;

(c) Promote the Charter of the United Nations, in particular Chapter VIII;

(d) Deliver capacity-building exercises and staff exchanges and increase channels of communication, upon request.

3.I.96 The above-mentioned work is expected to result in:

(a) Enhanced partnership and expanded outreach with LAS in the area of international peace and security, including conflict prevention, peacemaking and peacebuilding;

(b) Improved capacity of LAS on issues such as conflict prevention, peacemaking and peacebuilding;

(c) Improved coordination with LAS on cooperation activities.

Programme performance in 2024

Enhanced strategic dialogue between the League of Arab States and the United Nations

3.I.97 The biennial United Nations-League of Arab States general cooperation meetings present a platform for ongoing development of inter-organizational relations. The subprogramme organized the 16th such meeting in July 2024. Around 40 representatives of 10 LAS entities and 50 representatives of 30 United Nations entities came together to take stock of cooperation across all pillars, discuss new avenues for engagement and find ways to enhance the United Nations-LAS partnership strategically in an increasingly challenging global financial environment. Participants identified potential synergies and developed tools to help structure their cooperation for the coming two-year period. The meeting was also an opportunity for senior officials to discuss critical political developments in the Arab region and possible opportunities for future cooperation in the context of the Summit of the Future and its outcomes.

3.I.98 Progress towards the objective is presented in the performance measure below (see table 3.I.17).

Table 3.I.17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Representatives of LAS and United Nations entities in the general cooperation meeting identified key partnership areas and potential synergies and opportunities to structure their cooperation for the coming two-year period	Representatives of LAS and United Nations entities in the sectoral meeting identified potential synergies and opportunities to structure their cooperation on addressing climate change	Representatives of LAS and United Nations entities in the general cooperation meeting identified key partnership areas and potential synergies and opportunities to structure their cooperation for the coming two-year period

Planned results for 2026

Result 1: strengthened United Nations-League of Arab States partnership in advancing conflict prevention and sustaining peace in the Arab region

Programme performance in 2024 and target for 2026

3.I.99 The subprogramme's work contributed to strengthening the partnership between the United Nations and LAS on conflict prevention and sustaining peace by supporting LAS in drafting an action plan for the Arab Strategy for Youth, Peace and Security, which met the planned target.

3.I.100 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.I.18).

Table 3.I.18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Agreement by LAS and the United Nations during their biennial general cooperation meeting to collaborate in the areas of conflict prevention and sustaining peace through jointly identifying strategies and programmes	Strengthened partnership between the United Nations and LAS on conflict prevention and sustaining peace	Strengthened partnership between the United Nations and LAS on conflict prevention and sustaining peace through supporting LAS in drafting an action plan for the Arab Strategy for Youth, Peace and Security	Strengthened engagement between the United Nations, LAS and its member States on conflict prevention and sustaining peace through initiatives to implement the regional strategy on youth, peace and security, among others	Strengthened engagement between the United Nations and LAS, in particular with respect to action 16 of the Pact for the Future by identifying joint activities to support the promotion of conflict prevention and sustaining peace in the Arab region

Result 2: progress on preventive diplomacy, mediation and analysis by the League of Arab States

Programme performance in 2024 and target for 2026

3.I.101 The subprogramme's work contributed to enhanced capacity of LAS officials in preventive diplomacy, mediation and analysis, including in the area of disarmament, demobilization and reintegration, and the identification of additional capacity-building needs of LAS officials, which met the planned target.

3.I.102 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.I.19).

Table 3.I.19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Progress on the operationalization of the Arab Women Mediators Network by the League	Enhanced capacity of LAS officials in preventive diplomacy, mediation and analysis, including in the area of disarmament, demobilization and reintegration, and the identification of additional capacity-building needs of LAS officials	Further progress related to preventive diplomacy, mediation and analysis by LAS	Further progress related to preventive diplomacy, mediation and analysis by LAS

Result 3: strengthened engagement with the General Secretariat of the League of Arab States and the League's member States

Proposed programme plan for 2026

3.I.103 The subprogramme contributes to enhancing mutual understanding and analysis, as well as improved political coordination and strengthened cooperation, by facilitating meetings of Special Envoys and Special Representatives of the Secretary-General with LAS senior officials, as well as regular meetings with LAS officials and representatives of the diplomatic community, United Nations entities and other partners.

Lessons learned and planned change

3.I.104 The lesson for the subprogramme was the need to emphasize the linkages between peace and security, and humanitarian and development efforts in engaging with interlocutors to draw a comprehensive analysis of the political developments in the Arab region. In applying the lesson, the subprogramme will work with interlocutors across departments at the LAS secretariat and other partners to foster a broader understanding of the regional developments.

3.I.105 Expected progress towards the objective is presented in the performance measure below (see table 3.I.20).

Table 3.I.20
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced mutual understanding of and analysis on political developments in the Arab region and improved political coordination on issues of mutual concern Improved cooperation on good offices and peace efforts in the Arab region through meetings of Special Envoys and Special Representatives of the Secretary-General with LAS senior officials	Enhanced mutual understanding of and analysis on political developments in the Arab region and improved political coordination on issues of mutual concern Improved cooperation on good offices and peace efforts in the Arab region through meetings of Special Envoys and Special Representatives of the Secretary-General with LAS senior officials	Enhanced mutual understanding of and analysis on political developments in the Arab region, including the Occupied Palestinian Territory, the Syrian Arab Republic, Lebanon, Libya and the Sudan, as well as other issues of mutual concern Improved cooperation on good offices and peace efforts in the Arab region through meetings of Special Envoys and Special Representatives of the Secretary-General with LAS senior officials	Enhanced mutual understanding of and analysis on political developments in the Arab region and improved political coordination on issues of mutual concern Improved cooperation through the biennial United Nations-LAS sectoral meeting	Enhanced mutual understanding of and analysis on political developments in the Arab region and improved political coordination on issues of mutual concern Improved cooperation through the biennial United Nations-LAS general cooperation meeting

Deliverables

3.I.106 Table 3.I.21 lists all deliverables of the subprogramme.

Table 3.I.21
Subprogramme 7: deliverables for the period 2024–2026, by category and subcategory

3.I.108 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 3.I.25 to 3.I.27 and figure 3.I.XVI.

3.I.109 As reflected in tables 3.I.25 (1) and 3.I.26 (1), the overall resources proposed for 2026 amount to $109,320,500, reflecting a net increase of $1,211,500 compared with the appropriation for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

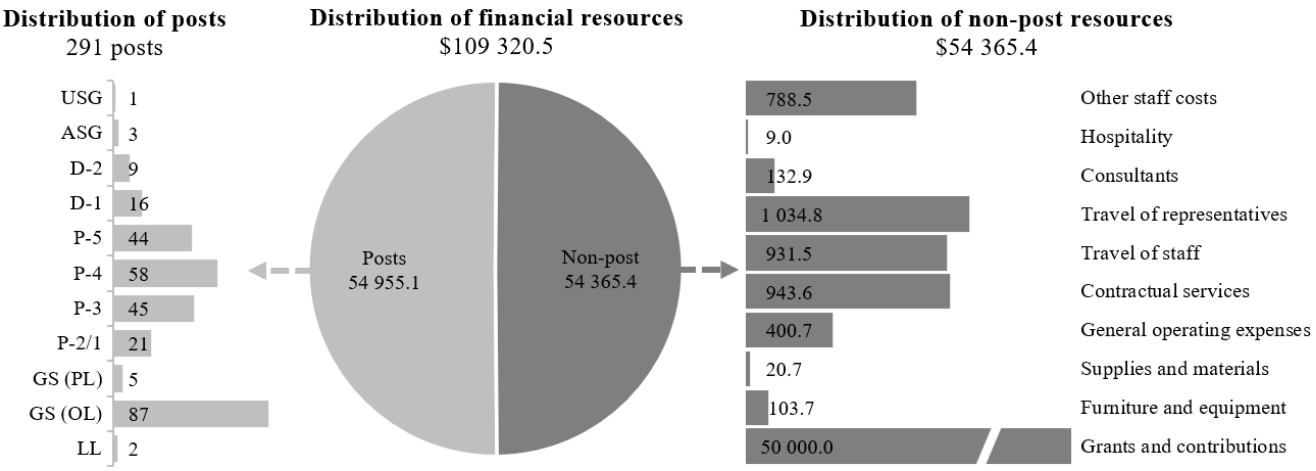
Figure 3.I.XVI
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustment

3.I.110 As shown in table 3.I.25 (1), resource changes reflect a net increase of $320,500, as follows:

(a) **Subprogramme 1: prevention, management and resolution of conflicts** (increase of $599,100)

The increase of $599,100 under posts relates to the higher provision, at continuing vacancy rates, for six posts (2 P-5, 2 P-4 and 2 P-3) established in 2025 pursuant to the General Assembly resolutions 79/1 and 79/258, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

(b) **Subprogramme 6: Peacebuilding Support Office** (net decrease of $261,800)

The net decrease of $261,800 comprises a decrease of $363,900 under consultants ($52,900), contractual services ($54,300) and grants and contributions ($256,700) related to the removal of non-recurrent provisions that were approved for 2025 and are no longer required in 2026, offset in part by the increase of $102,100 related to the higher provision, at continuing vacancy rates, for one post (1 P-4) established in 2025 pursuant to the General Assembly resolutions 79/1 and 79/258, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

(c) **Programme support** (decrease $16,800)

The decrease of $16,800 under furniture and equipment relates to the removal of non-recurrent provisions approved for 2025 and are no longer required in 2026.

New and expanded mandates

3.I.111 As shown in table 3.I.25 (1), resource changes reflect a net increase of $1,074,900, as follows:

(a) **Executive direction and management** (increase of $214,000)

The proposed increase of $214,000 would provide for the establishment of one Senior Political Affairs Officer (P-5) post ($146,500) (see annex II) and requirements for travel of staff ($67,500) to conduct consultations on mediation processes and meetings with regional organizations in support of the mandates contained in General Assembly resolution 79/1 on the Pact for the Future.

(b) **Subprogramme 1: prevention, management and resolution of conflicts** (increase of $828,900)

The proposed increase of $828,900 would provide for the establishment of six Political Affairs Officer posts (3 P-4 and 3 P-3) and one Programme Management Assistant post (GS (OL)) ($761,100) (see annex II) and requirements for travel of staff ($67,800) to conduct consultations on mediation processes and meetings with regional organizations in support of the mandates contained in General Assembly resolution 79/1 on the Pact for the Future.

(c) **Programme support** (increase of $32,000)

The proposed increase of $32,000 would provide for contractual service ($12,900), supplies and materials ($1,800) and furniture and equipment ($17,300).

Other changes

3.I.112 As shown in table 3.I.25 (1), resource changes under Programme support reflect a net decrease of $183,900 under contractual services relating to the adjustment of standard information, communication and technology (ICT) rates for Headquarters personnel, and non-field personnel outside of Headquarters. Resource changes also reflect a cost-neutral redeployment of $50,300 from general operating expenses to furniture and equipment.

Extrabudgetary resources

3.I.113 As reflected in tables 3.I.25 (2) and 3.I.26 (2), extrabudgetary resources are estimated at $33,888,600. The resources would complement regular budget resources and would provide for 76 posts (3 D-1, 10 P-5, 20 P-4, 20 P-3, 1 P-2/1, 2 National Professional Officer, 5 General Service (Principal level) and 15 General Service (Other level)) to perform mainly the functions of preventive diplomacy, conflict resolution, mediation, peacemaking, electoral assistance and political analysis in support of the good offices of the Secretary-General, and the overall management of the Peacebuilding Fund. Non-post resources would be used to support the multi-year appeal programme, the annual regional seminar on decolonization, visiting missions to the Non-Self-Governing Territories and other activities in support of the mandate of the Department of Political and Peacebuilding Affairs.

3.I.114 The authority to oversee the use of extrabudgetary resources rests with the Department of Political and Peacebuilding Affairs, in accordance with the delegation of authority from the Secretary-General.

Policymaking organs

3.I.115 The resources proposed under this component would provide for the policymaking organs as shown in table 3.I.28.

(Thousands of United States dollars)

Executive direction and management

3.I.117 The executive direction and management component comprises the Office of the Under-Secretary-General for Political and Peacebuilding Affairs, Chief of Office, and focal points for regional and thematic divisions, the coordination and oversight of planning and budgets for special political missions, the coordination of briefing materials for the leadership of the Organization, and monitoring and evaluation.

3.I.118 The overall responsibilities of the component include the following functions:

(a) Provide the overall direction, supervision and management of the Department in the implementation of its mandates and its approved programme of work;

(b) Provide the Secretary-General with advice and support on all political matters in coordination with the Under-Secretary-General for Peace Operations, as necessary;

(c) Oversee and provide political guidance and instructions to special political missions under the Department's purview, including special and personal envoys and representatives of the Secretary-General;

(d) Direct and manage, on behalf of the Secretary-General, diplomatic activities relating to the prevention, control and resolution of conflicts and disputes, including preventive diplomacy, political mediation, peacemaking, peacebuilding and sustaining peace;

(e) Act as the United Nations focal point for all matters related to electoral assistance and direct the provision of substantive support and secretariat services to the Security Council (including on special political missions in thematic cluster II, which includes sanctions monitoring teams, groups and panels, and other entities and mechanisms), the General Assembly and relevant subsidiary organs;

(f) In close consultation with the Under-Secretary-General for Peace Operations, the Under-Secretary-General for Political and Peacebuilding Affairs provides direction and strategic guidance to the Assistant Secretaries-General with regional responsibilities on matters under the purview of the Department.

3.I.119 The component also includes small teams that handle strategic communications and donor relations. In line with requests from the United Nations system, the component provides direction to ensure close cooperation and coordination with Secretariat entities, agencies, funds and programmes in the area of peace and security.

3.I.120 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. In 2026, the Department will continue to reduce its greenhouse gas emissions by delivering capacity-building activities for field personnel in their immediate region, relying more systematically on electronic records and communications to reduce printing and photocopy paper and more frequently on videoconferences as a possible replacement for travel. The Department also plans to improve e-waste management to facilitate the environmentally friendly disposal of expendable e-waste.

3.I.121 Information on the timely submission of documentation and advance booking for air travel is reflected in table 3.I.30. The Department continues to sensitize all staff to various forms of communications on the importance of early planning for travel. Managers are required to implement preventive and corrective measures. The travel certification process has been standardized and streamlined with the certification of travel decentralized to the divisions. With respect to executive direction and management, owing to the nature of senior leadership travel, which is linked closely to conflict prevention, good offices and crisis response, the planning for such travel often takes place shortly before departure or requires last-minute cancellations or changes of itinerary or destination.

Table 3.I.30

3.I.122 The proposed regular budget resources for 2026 amount to $2,091,400 and reflect an increase of $214,000 compared with the appropriation for 2025. The proposed change is explained in paragraph 3.I.111 (a). Additional details on the distribution of the proposed resources for 2026 are reflected in table 3.I.31 and figure 3.I.XVIII.

Programme support

3.I.130 The programme support component comprises the Executive Office of the Department. The Executive Office provides the central administrative and programme support functions necessary for the implementation of the mandated activities of the Department. It assists the Under-Secretary-General in the preparation of the programme plans, the preparation and monitoring of the implementation of the programme budget, the management of trust funds and extrabudgetary resources, relevant support services for the efficient utilization of human resources and the planning, control and coordination of requirements related to general office administration. In addition, it provides administrative and logistical support to a number of special representatives and envoys of the Secretary-General, including some special political missions grouped under thematic clusters I and II. The Executive Office also provides logistical support to the Department, including property management, office space management and user applications.

3.I.131 The proposed regular budget resources for 2026 amount to $3,194,300 and reflect a decrease of $168,700 compared with the appropriation for 2025. The proposed change is explained in paragraphs 3.I.110 (c), 3.I.111 (c) and 3.I.112. Additional details on the distribution of the proposed resources for 2026 are reflected in table 3.I.39 and figure 3.I.XXVI.

II. Office of the United Nations Special Coordinator for the Middle East Peace Process

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

3.II.1 The Office of the United Nations Special Coordinator for the Middle East Peace Process is responsible for serving as the Organization's focal point for the Middle East peace process, for ensuring the coordinated work of the United Nations system to adequately respond to the needs of the Palestinian people and for mobilizing financial, technical and economic assistance. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including Assembly resolutions 48/213 and 49/88, as well as Security Council resolutions 1860 (2009) and 2334 (2016). The Israeli-Palestinian conflict remains at the core of the instability prevailing in the Middle East and continues to threaten international peace and security. As violence and tensions persist across the Occupied Palestinian Territory, including East Jerusalem, the Office continues to engage to mitigate and prevent armed conflict, address humanitarian and development challenges, including recovery and reconstruction efforts in Gaza, and engage the parties and the international community with a view to making political progress towards a two-State solution.

Programme of work

Objective

3.II.2 The objective, to which the Office contributes, is to achieve a comprehensive, just and lasting resolution to the Israeli-Palestinian conflict based on the two-State solution and to improve the socioeconomic conditions of the Palestinian people.

Strategy and external factors for 2026

3.II.3 To contribute to the objective, the Office will:

(a) Intensify engagement with regional and international actors, including with members of the Middle East Quartet, to work towards ending the occupation and resolving the Israeli-Palestinian conflict;

(b) Increase engagement with the parties and relevant partners to reduce violence and tensions in Gaza, the occupied West Bank, including East Jerusalem, and the region;

(c) Strengthen the Palestinian Authority, including by supporting the parties to update their economic and administrative relationships and to enact policy reforms;

(d) Continue to work with the parties to uphold their obligations under United Nations resolutions and international law, including reporting to the Security Council on resolution 2334 (2016);

(e) Support efforts, including as part of the recovery and reconstruction of Gaza, with Gaza and the occupied West Bank, including East Jerusalem, unified politically, economically and administratively, which is critical to achieving the two-State solution;

(f) Support the Palestinian Authority in advancing its State-building agenda and strengthening its institutions, including the preparation and conduct of local council, legislative, presidential and Palestinian National Council elections;

(g) In collaboration with the United Nations country team, continue to coordinate United Nations support to recovery and reconstruction efforts in the Occupied Palestinian Territory, including East Jerusalem.

3.II.4 The above-mentioned work is expected to result in:

(a) Movement towards meaningful negotiations aimed at ending the occupation and resolving the Israeli-Palestinian conflict on the basis of the two-State solution and internationally recognized parameters;

(b) Reduced tensions and violence, the cessation of hostilities and the prevention of renewed escalation;

(c) Increased institutional stability and governance capacity of the Palestinian Authority and tangible steps towards improving the fiscal situation;

(d) Mobilization of political, financial and technical support for the Occupied Palestinian Territory, including for recovery and reconstruction efforts in Gaza;

(e) Provision and distribution of assistance to meet the needs of the Palestinian people, across the Occupied Palestinian Territory, including East Jerusalem;

(f) Advancement of a single, democratic, national Palestinian governing authority administering the entire Occupied Palestinian Territory;

(g) The parties identifying tangible steps to improve the situation on the ground, as outlined in the recommendations of the Quartet report of 1 July 2016 (S/2016/595, annex).

3.II.5 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The two-State solution remains viable, in line with relevant United Nations resolutions and bilateral agreements;

(b) A cessation of hostilities is in place and relevant parties support de-escalation efforts;

(c) Governance arrangements, security arrangements and other enabling conditions are in place that allow humanitarian, recovery and reconstruction activities in Gaza;

(d) The security situation in the Occupied Palestinian Territory, including East Jerusalem, allows for the implementation of humanitarian and development programmes;

(e) Israeli and Palestinian interlocutors and regional and international stakeholders engage in meaningful dialogue and cooperation with the Office and the United Nations country team in the performance of their functions, including on access and movement;

(f) There is adequate political support from Member States and financial support from donors;

3.II.6 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue its active engagement, including promoting de-escalation, conducting preventive diplomacy, halting and reversing negative trends, including settlement expansion, and enhancing coordination efforts to advance concrete steps towards a two-State solution to the Israeli-Palestinian conflict. The Office will remain an active contributor to the Ad Hoc Liaison Committee for the Coordination of the International Assistance to Palestinians and will continue to coordinate with other Committee members to promote actionable recommendations to both parties. The Office will strengthen engagement with other forums and partners, such as the Development Partners Group, Arab and Gulf donors, and European Union-led support to Palestinian Authority reforms. The Office will advocate with the parties, Member States, humanitarian and development partners, regional actors, the private sector, civil society and other stakeholders to facilitate humanitarian relief, recovery, reconstruction, and economic and social development.

3.II.7 With regard to inter-agency coordination and liaison, the Office will continue to lead the coordination of more than 20 United Nations resident and non-resident agencies, funds and

programmes in responding to the development and humanitarian needs of the Palestinian people. The Office will promote policies to improve movement and access for people and goods throughout the Occupied Palestinian Territory. The Office will continue to foster inter-agency collaboration by identifying opportunities for improving the socioeconomic conditions in the occupied West Bank, advocating for the necessary conditions for humanitarian, recovery and reconstruction efforts in Gaza, and implementing the United Nations Sustainable Development Cooperation Framework. The Office will also coordinate with regional United Nations entities, such as the regional Development Coordination Office, the regional offices of United Nations agencies, funds and programmes and the Economic and Social Commission for Western Asia, to leverage expertise and identify opportunities. The Office will work with the United Nations Office for Project Services, which will continue to manage the day-to-day operations of the United Nations mechanism established pursuant to Security Council resolution 2720 (2023), reporting directly to the Deputy Special Coordinator/Resident Coordinator/Humanitarian Coordinator, and through them to the Special Coordinator for the Middle East Peace Process.

3.II.8 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through more systematic engagement with women's and youth groups in support of the implementation of Security Council resolution 1325 (2000). The Office will continue to promote women's participation in political processes, conflict prevention and peacebuilding, and participate in high-level dialogues on women and peace and security with civil society organizations, Member States and United Nations agencies. The Office will also encourage and support the increased participation of women in Palestinian institutions and as candidates in elections.

3.II.9 In line with the United Nations Disability Inclusion Strategy, the Office will advocate for the full inclusion of individuals with disabilities in all aspects of United Nations programmes in the Occupied Palestinian Territory. Programmatic efforts will prioritize disability inclusion in recovery and reconstruction efforts in Gaza including by advocating for inclusive planning and facilitating access to specialized services.

Evaluation activities

3.II.10 An evaluation conducted by the Office on the effectiveness and relevance of its engagement with the relevant parties to improve Palestinian economic activity in Area C, including associated management controls, was completed in 2024 and has guided the proposed programme plan for 2026.

3.II.11 In response to the results of that evaluation, the Office will further enhance and intensify its political engagement in the occupied West Bank as part of its overall efforts to prevent tensions and violence, discourage unilateral steps that undermine the two-State solution and promote the restoration of a political process towards ending the occupation and resolving the conflict.

3.II.12 An evaluation of coordination with humanitarian and development partners, regional and international stakeholders and civil society to promote a coherent, effective and inclusive recovery and reconstruction process in Gaza, with the Palestinian Authority at its centre, is planned for 2026.

Programme performance in 2024

A principled approach for recovery and reconstruction planning for Gaza

3.II.13 While the release of all hostages and ending the armed conflict in Gaza remained a priority, the Office also focused on good offices and programmatic efforts to support preparation and planning for the future of Gaza, in order to improve Palestinian lives, rights and dignity, ensure security for Israelis and Palestinians and advance the two-State solution. The Special Coordinator outlined principles based in United Nations resolutions and international law to guide post-conflict arrangements for Gaza and re-establish the political, economic and administrative linkages between Gaza and the occupied West Bank, including East Jerusalem. The Office facilitated cross-pillar interagency planning exercises, notably through tripartite work between the World Bank, the

European Union and the United Nations. These exercises led to the launch of a draft early recovery strategy for Gaza as a report to the Ad Hoc Liaison Committee, which situated early recovery planning and implementation with respect to the ongoing humanitarian response, future humanitarian planning and the joint work for the interim rapid damage and needs assessment and Gaza recovery framework.

3.II.14 Progress towards the objective is presented in the performance measure below (see table 3.II.1).

Table 3.II.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Improved coordination and forward planning for recovery and reconstruction efforts in Gaza

Planned results for 2026

Result 1: improved Palestinian access to and development across the Occupied Palestinian Territory, including in Area C

3.II.15 The Office's work contributed to regular engagement with Member States regarding the importance of Area C, settlement-related activity and dynamics in the occupied West Bank, including East Jerusalem, for the preservation of the two-State solution, which did not meet the planned target of constructive engagement with both parties to address the development needs in the Occupied Palestinian Territory, including Area C. The target was not met because of intensified movement and access restrictions in Area C, as well as settlement expansion.

3.II.16 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.II.2).

Table 3.II.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Strengthened engagement to address the development needs in the Occupied Palestinian Territory, including Area C	Regular engagement with Member States regarding the importance of Area C, settlement-related activity and dynamics in the occupied West Bank for the preservation of the two-State solution	Stakeholders formulate plans and promote positive steps in Area C, including easing of movement and access restrictions, with a view to improving Palestinian use of productive resources in Area C	Concrete steps advanced by both parties with a view to improving Palestinian access to and development across the Occupied Palestinian Territory, including in Area C

Result 2: progress towards a single Palestinian Government administering both Gaza and the occupied West Bank, within the framework of a negotiated two-State solution

Programme performance in 2024 and target for 2026

3.II.17 The Office's work contributed to establishing broad consensus among key stakeholders, including through advocacy with the parties and within the Security Council, on the criticality of unifying Gaza and the occupied West Bank, including East Jerusalem, politically, economically and administratively, which did not meet the planned target of tangible political and administrative steps taken to ensure that a single Palestinian Government administers the entire Occupied Palestinian Territory. The target was not met because of limited political will to take the necessary concrete measures to advance this process.

3.II.18 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.II.3).

Table 3.II.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Broad consensus among key stakeholders on the criticality of unifying Gaza and the occupied West Bank, including East Jerusalem, politically, economically and administratively	A single Palestinian Government administers the entire Occupied Palestinian Territory	A single Palestinian Government takes steps to assume governance authority of the entire Occupied Palestinian Territory politically, administratively and economically

Result 3: towards a political framework to resolve the Israeli-Palestinian conflict

Proposed programme plan for 2026

3.II.19 The steadily deteriorating dynamics across the Occupied Palestinian Territory have reinforced the urgency of taking concrete steps towards resolving the Israeli-Palestinian conflict. To reverse the current negative trajectory and build a peaceful future for Palestinians and Israelis, a political framework must be established that will provide a pathway to resolve the conflict, end the occupation and realize a two-State solution based on international law, United Nations resolutions and bilateral agreements.

Lessons learned and planned change

3.II.20 The lesson for the Office was the need to strengthen engagement with Palestinians and Israelis to advance the common goal of establishing a political process and expand the Office's international and regional outreach. In applying the lesson, the Office will focus on expanding its dialogue with the parties to promote concrete steps, including supporting the establishment of governance arrangements that pave the way for the re-unification of the entire Occupied Palestinian Territory under a single Palestinian Government. The Office will also strengthen its role in fostering regional consensus for a political process towards a two-State solution and expand engagement with key partners on the future of Gaza.

3.II.21 Expected progress towards the objective is presented in the performance measure below (see table 3.II.4).

Table 3.II.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	Stakeholders' engagement on the establishment of a political framework to resolve the Israeli-Palestinian conflict, end the occupation and achieve a two-State solution	Concrete steps towards the establishment of a political framework to resolve the Israeli-Palestinian conflict, end the occupation and achieve a two-State solution

Legislative mandates

3.II.22 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

48/213; 79/141	Assistance to the Palestinian people	79/90	The occupied Syrian Golan
49/88	Middle East peace process	79/91	Israeli settlements in the Occupied Palestinian Territory, including East Jerusalem, and the occupied Syrian Golan
79/81	Peaceful settlement of the question of Palestine		
79/83	The Syrian Golan		

Security Council resolutions

1860 (2009)	2720 (2023)
2334 (2016)	

Deliverables

C. Substantive deliverables

Good offices: good offices visits to countries in the region and internationally, as well as regular engagement on regional de-escalation efforts, enabling of provision and distribution of humanitarian assistance, and recovery and reconstruction efforts in Gaza, and renewed political initiatives to find a durable political solution to the conflict.

Consultation, advice and advocacy: consultations with and advocacy to Governments, relevant parties, civil society organizations and other stakeholders to identify and implement strategies to address the deteriorating political, security and economic situation in the occupied West Bank, including East Jerusalem; consultations with the parties and other relevant actors to de-escalate tensions and enable humanitarian assistance at scale in Gaza; engagement with the parties and other relevant actors, including key regional actors and members of the Middle East Quartet, to mobilize assistance, advance a political process to return to meaningful negotiations and promote the administration of the entire Occupied Palestinian Territory by a single Palestinian Government and advance a two-State solution; advice to Israeli and Palestinian interlocutors on the easing of movement and access constraints in Gaza and the occupied West Bank, including East Jerusalem; and advice to the Palestinian Central Elections Commission.

D. Communication deliverables

Outreach programmes, special events and information materials: exchange of information and partnerships with some 80 civil society organizations, academic institutions and non-governmental organizations, to promote the activities of the mission as well as to enhance its visibility.

External and media relations: daily press reviews, press conferences in the presence of some 35 international media outlets (television, radio and print); and interviews and publications with target audiences and networks, as well as public statements and press releases for more than 1,500 stakeholders, including diplomatic missions, civil society organizations, think tanks and media personnel.

Digital platforms and multimedia content: the Office's website and social media accounts.

B. Proposed post and non-post resource requirements for 2026

Overview

3.II.24 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 3.II.6 to 3.II.8.

3.II.25 Additional details on the distribution of the proposed resources for 2026 are reflected in table 3.II.9 and figure 3.II.I.

3.II.26 As shown in tables 3.II.9, the overall resources proposed for 2026 amount to $12,037,100, reflecting a net increase of $697,400 compared with the approved budget for 2025. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

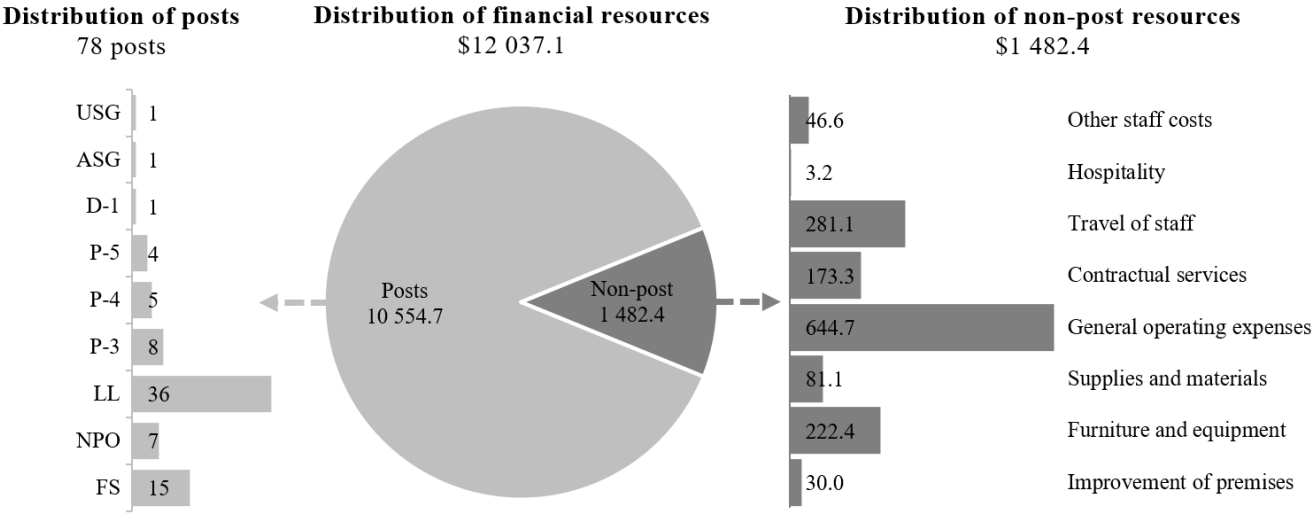
Figure 3.II.I
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Technical adjustments

3.II.27 As shown in table 3.II.6, resource changes reflect an increase of $591,000 related to the higher provision, at continuing vacancy rates, for 10 posts (2 P-3, 2 NPO, 2 FS, and 4 LL) established in 2025 pursuant to the General Assembly resolution 79/257, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

Other changes

3.II.28 As shown in table 3.II.6, resource changes reflect a net increase of $106,400, as follows:

(a) An increase of $31,200 under posts would provide for the proposed upward reclassification of one Security Coordination Officer post (P-3) to a Chief Security Officer post (P-4), as detailed in annex II;

(b) An increase of $30,100 under travel of staff would cover increased travel requirements within the region aimed at developing strategic partnerships to support the mandate for the Office;

(c) The net increase of $1,600 under contractual services comprises an increase of $4,200 relating mainly to the adjustment of standard ICT rates for non-field personnel outside of Headquarters for 2026, offset in part by a decrease in maintenance costs for Office vehicles as a result of reducing the fleet by nine vehicles ($2,600);

(d) The net increase of $78,100 under general operating expenses comprises an increase of $84,500 relating to the contribution of the Office for services provided by the Department of Safety and Security field office and at Government House through the United Nations Truce Supervision Organization; an increase in the malicious acts insurance policy derived by the situation in Gaza and the West Bank; the planned upgrade of vehicle tracking system; and an increase in freight costs. The increase is offset in part by the discontinuation of the service agreement for network equipment ($6,400);

(e) The decrease of $10,200 under supplies and materials is mainly due to the projected decrease in fuel utilization as a result of the Office's reduced vehicle fleet;

(f) The net decrease of $54,400 under furniture and equipment mainly reflects the Office's efforts to prioritize critical requirements and seek more efficient options for the acquisition of equipment from downsizing missions where possible;

(g) An increase of $30,000 under improvement of premises would provide for the replacement of two obsolete and damaged prefabs in the Gaza office during the hostilities.

Other information

3.II.29 The United Nations mechanism that was established in 2024 pursuant to Security Council resolution 2720 (2023) and funded from extrabudgetary resources will continue its operations on accelerating the provision of humanitarian relief consignments to Gaza through States that are not party to the conflict, consulting all relevant parties, with the goal of expediting, streamlining and accelerating the process of providing assistance while continuing to help ensure that aid reaches its civilian destination. The mechanism was initially established by the Office of the Senior Humanitarian and Reconstruction Coordinator through a hybrid model with the United Nations Office for Project Services; following completion of the mandate for the former, the latter would continue to manage the operations of the mechanism, and report to the Deputy Special Coordinator for the Middle East Peace Process, United Nations Resident Coordinator and Humanitarian Coordinator for the Occupied Palestinian Territory and through him to the Special Coordinator for the Middle East Peace Process. The Office of the United Nations Special Coordinator for the Middle East Peace Process would support the work of the mechanism, including engagement at the political level by the Deputy Special Coordinator and the Special Coordinator. The reporting requirements on the operations of the mechanism will form part of the Office's regular reporting to the Security Council. These functions will be undertaken by the Office within existing resources funded under the regular budget.

3.II.30 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office remains committed to reducing its environmental footprint and integrating environmental management practices into its operations. Once the situation permits, the mission will focus its efforts on utilizing photovoltaic solar energy to reduce dependency on fossil fuel-powered generators, reduce demand on the overburdened local grid and reduce greenhouse gas emissions; improving building efficiency in terms of energy and water usage through the upgrading of wall insulation and installation of environmentally friendly fixtures; and continuing to raise environmental awareness among staff members.

3.II.31 Information on advance booking for air travel is reflected in table 3.II.10. The low actual rate in 2024 reflects the need for urgent travel on short notice for meetings with international and regional interlocutors on the rapidly deteriorated situation in Gaza and the West Bank following the outbreak of hostilities. The Office will continue its effort to improve the compliance rate by asking managers to implement preventive measures where possible.

III. United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

3.III.1 The United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory is responsible for recording, in documentary form, the damage caused to all natural and legal persons concerned as a result of the construction of the wall by Israel in the Occupied Palestinian Territory, including in and around East Jerusalem. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution ES-10/17. The Assembly, in its resolution ES-10/17, called for the Register of Damage to remain open for registration for the duration of existence of the wall in the Occupied Palestinian Territory, including in and around East Jerusalem.

Programme of work

Objective

3.III.2 The objective, to which the Office of the Register of Damage contributes, is to establish and maintain a Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory, thus contributing to the protection of the legal rights of the Palestinian natural and legal persons affected by the construction of the wall.

Strategy and external factors for 2026

3.III.3 To contribute to the objective, the Office will:

(a) Process and review the previously collected but not processed claims and present them to the Board of the Register of Damage for its decision;

(b) Undertake outreach and claim intake activities in the Occupied Palestinian Territory in relation to public claims and claims of natural persons, by maintaining a presence in the area of operation;

(c) Work on promoting the rule of law at the national and international levels, helping Member States to ensure equal access to justice for all claimants in the Occupied Palestinian Territory and make progress towards achieving Sustainable Development Goal 16.

3.III.4 The above-mentioned work is expected to result in:

(a) An increased number of efficiently processed claims, leading to a reduction in the gap between collected and unprocessed claims;

(b) Submission of new claims from Palestinian institutions and individuals;

(c) Processed claims decided upon by the Board and included in the Register.

3.III.5 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) There is political will and cooperation on the part of all parties concerned;

(b) Extrabudgetary resources are available for maintaining a needed presence on the ground;

(c) The overall security situation on the ground and in the region allows for the mandate of the Register of Damage to be carried out.

3.III.6 With regard to inter-agency coordination and liaison, the Office will continue to cooperate closely with the United Nations Office for Project Services, which is the key provider of logistical, human and financial resources services in the implementation of outreach and claims collection activities funded by extrabudgetary resources. In addition, the Office will continue its close cooperation with the Department of Political and Peacebuilding Affairs, the United Nations Truce Supervision Organization and the Office for the Coordination of Humanitarian Affairs.

3.III.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, consultations will be conducted with local women's committees in all communities in which outreach and claim intake activities are planned. The Office will continue to pay special attention to informing potential female claimants of the possibility of and requirements for submitting claim forms and will provide them with support in the preparation of their claims, noting that 38 per cent of all claimants are female.

3.III.8 In line with the United Nations Disability Inclusion Strategy, the Office will continue to make special arrangements for the intake of claims from claimants with disabilities. These arrangements include on-site support of claimants, which enables the filing of claims without having to travel.

Evaluation activities

3.III.9 The Office has adopted an evaluation policy, and an evaluation on a topic to be determined is planned for 2026.

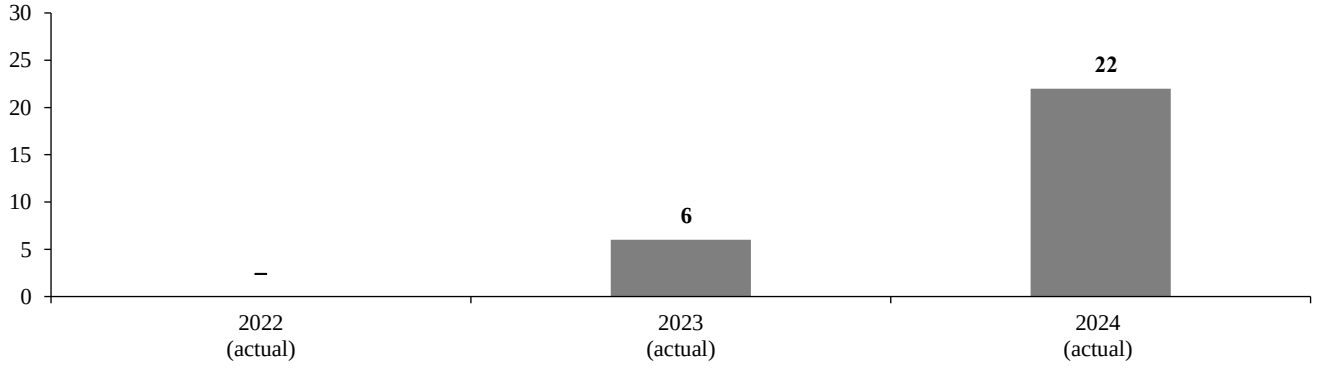
Programme performance in 2024

Increased awareness of Palestinian mayors and other officials about public claims

3.III.10 In 2024, the Office continued to develop and deliver online and hybrid training sessions on public claims for mayors and other officials of communities affected by the construction of the Wall. These training sessions were conducted by the Office's staff in Vienna with local substantive support by Office personnel in the Occupied Palestinian Territory and logistical support from the Palestinian National Committee for the Register of Damage. This approach allowed the Office to train and communicate with relevant Palestinian officials, taking into account security risks and movement restrictions on the ground. In total, 10 complex public claims were collected as a direct result of these training sessions. While it is not envisaged that such online training sessions will replace in-person training in the future, they have proven to be an effective alternative during times when movement in the Occupied Palestinian Territory is restricted or the security situation would not allow for in-person training.

3.III.11 Progress towards the objective is presented in the performance measure below (see figure 3.III.I).

Figure 3.III.I
Performance measure: number of Palestinian mayors and other officials with increased awareness about public claims through online and/or hybrid training



Planned results for 2026

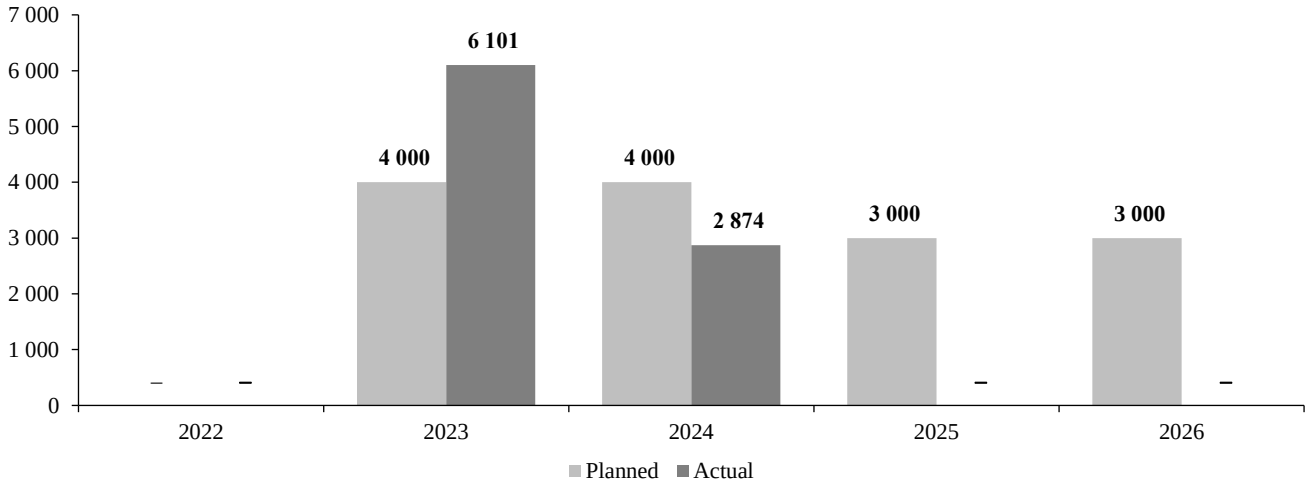
Result 1: decision-making by the Board strengthened by a harmonized submission process

Programme performance in 2024 and target for 2026

3.III.12 The Office's work contributed to 2,874 claims having been decided by the Board, which did not meet the planned target of 4,000 claims. The target was not met since, in 2024, the Board commenced reviewing newly introduced claim categories, including public claims, which required more time for the review of each claim and its supporting documentation. In addition, while five sessions were planned for 2024, the Board could only convene for four sessions in the light of the liquidity situation.

3.III.13 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.III.II).

Figure 3.III.II
Performance measure: number of claims decided by the Board of the Register of Damage



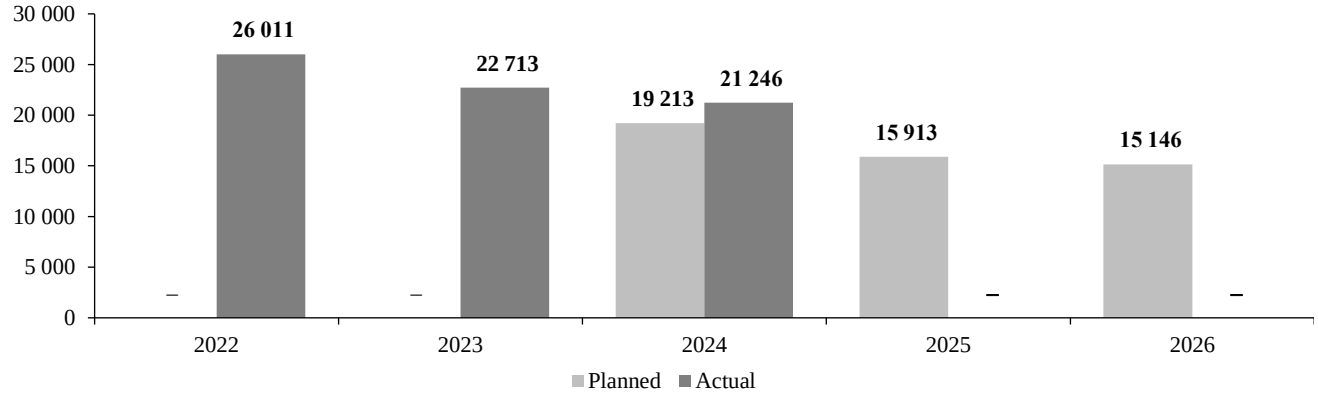
Result 2: reduced number of unprocessed claims

Programme performance in 2024 and target for 2026

3.III.14 The Office's work contributed to 21,246 unprocessed claims outstanding for the decision of the Board, which did not meet the planned target of 19,213 unprocessed claims. The target was not met due to the increased complexity of collected and unprocessed claims, including public claims, which require a lengthy intake process as well as an extensive legal review. In addition, the Board of the Register of Damage, which took office in January 2023, requested the re-opening of 4,885 previously decided claims to review them against revised and updated criteria.

3.III.15 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.III.III).

Figure 3.III.III
Performance measure: reduced number of unprocessed claims outstanding for the decision of the Board (annual)



Result 3: enhanced rectification process to complete deficient collected claims

Proposed programme plan for 2026

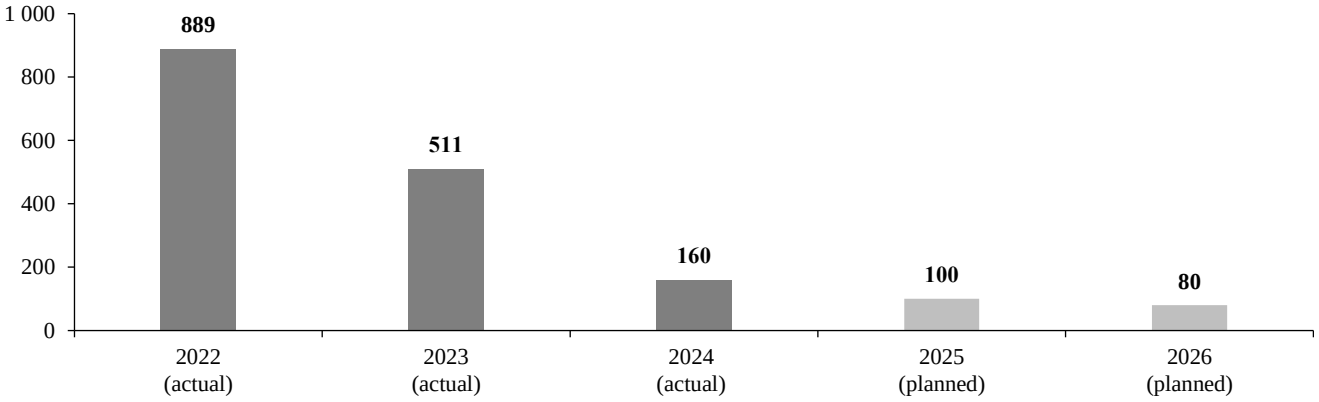
3.III.16 The Office supports the rectification of deficient or incomplete claims in order to ensure a fair and comprehensive review of received claims. This process includes contacting claimants or local authorities in person, or by telephone or encrypted email, and advising on and collecting missing information and outstanding documentation and data, and the shipment of completed documentation to the Office in Vienna for further processing.

Lessons learned and planned change

3.III.17 The lesson for the Office was the need to ensure the collection of comprehensive information and documentation at the time of initial submission of claims. The sustained training of those responsible for the intake of claims, as well as mayors or other officials of affected entities in the Occupied Palestinian Territory, on the requirements for the submission of claims has been shown to reduce the number of deficient claims submitted. In applying the lesson, the Office will review and revise the training materials accordingly and provide regular training to those responsible for the intake of claims and officials of affected entities.

3.III.18 Expected progress towards the objective is presented in the performance measure below (see figure 3.III.IV).

Figure 3.III.IV
Performance measure: number of claims rectified (annual)



Legislative mandates

3.III.19 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolution

ES-10/17 Establishment of the United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory

Deliverables

3.III.20 Table 3.III.1 lists all deliverables of the programme.

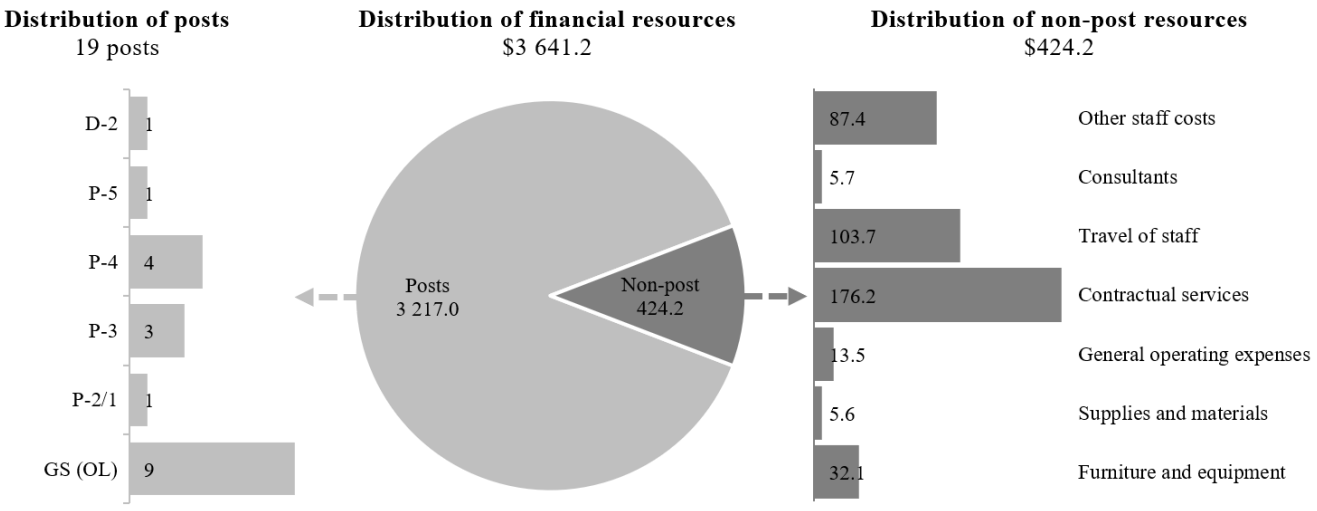
Figure 3.III.V
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

3.III.24 As shown in table 3.III.5 resource changes reflect an increase of $800 under contractual services due to the adjustment of standard ICT rates for non-field personnel outside of Headquarters for 2026.

Extrabudgetary resources

3.III.25 As reflected in tables 3.III.5 (2), extrabudgetary resources amount to $200,000. The resources would complement regular budget resources and would enable the Office to perform claim intake, outreach and rectification activities. Two staff members responsible for the intake of claims would provide assistance to claimants with the completion of claims forms, as well as outreach by informing potential claimants of the possibility of and requirements for filing a claim, and follow-up with existing claimants if and when additional information is required.

3.III.26 The authority to oversee the use of extrabudgetary resources rests with the Office, in accordance with the delegation of authority from the Secretary-General.

Other information

3.III.27 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office will continue to create awareness among staff and encourage the reuse of office stationery, such as binders, when feasible, and the creation of a paperless office environment.

3.III.28 Information on advance booking for air travel is reflected in table 3.III.8. The Office ensures a high rate of compliance by planning air travel carefully and setting realistic schedules and timelines. In addition, the Office cooperates constructively with its service provider, the United Nations Office at Vienna, thus ensuring an efficient workflow in relation to official travel.

IV. United Nations Office to the African Union

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

3.IV.1 The United Nations Office to the African Union was established on 1 July 2010 pursuant to General Assembly resolution 64/288. The mandate of the Office is to enhance the partnership between the United Nations and the African Union in the area of peace and security; provide coordinated and consistent United Nations advice to the African Union on long-term capacity-building and short-term operational support matters; and enhance coherence and efficiency in delivering United Nations assistance to the African Union. In its resolutions 2033 (2012), 2167 (2014), 2320 (2016), 2378 (2017) and 2457 (2019), the Security Council called upon the United Nations to strengthen the cooperation between the United Nations and the African Union, including in the areas of mediation, capacity-building and, in particular, the operationalization of the African Peace and Security Architecture and implementation of the Silencing the Guns initiative.

3.IV.2 The Office provides a mechanism for cooperation at the regional level, primarily with the African Union and subregional organizations throughout Africa. It seeks to build a common United Nations-African Union understanding of the causes and drivers of armed conflicts and potential armed conflicts, from which collaborative initiatives to prevent, manage and resolve armed conflicts can be developed.

Programme of work

Objective

3.IV.3 The objective, to which the Office contributes, is to strengthen the United Nations-African Union partnership for peace and security in Africa.

Strategy and external factors for 2026

3.IV.4 To contribute to the objective, the Office will:

(a) Support the implementation of the priorities of the African Peace and Security Architecture and the African Governance Architecture, and their operationalization, through conflict prevention, crisis/conflict management, post-conflict reconstruction and peacebuilding, a focus on strategic security issues, and coordination and partnership;

(b) Support regular, formal and informal engagements between the policy organs of the African Union, including the Peace and Security Council and the Permanent Representatives Committee, with the United Nations, including the Security Council and the Peacebuilding Commission;

(c) Engage with the African Union at senior and operational levels on political and operational priorities through the United Nations-African Union annual conference, the United Nations-African Union Joint Task Force on Peace and Security, and the annual United Nations-African Union consultative meeting on prevention and management of conflicts;

(d) Conduct good offices missions to address peace and security challenges, including with regard to dispute resolution and elections, upon request by the African Union;

(e) Maintain regular interaction between the United Nations and the African Union, regional economic communities and regional mechanisms, as well as with Member States, on thematic and country-specific situations, including in support of the African Union early warning mechanism;

(f) Build institutional capacities of the African Union Commission to prevent, manage and respond to armed conflicts and address root causes of conflict in Africa, including by strengthening the capabilities of the African Union with regard to early warning and mediation;

(g) Support African Union efforts to advance implementation of Security Council resolution 1325 (2000) on women and peace and security, including by supporting efforts in addressing conflict-related sexual violence and enhancing the participation of women in peace and security processes;

(h) Support the implementation of the African Union Continental Framework for Youth, Peace and Security, including its Ten-Year Implementation Plan for 2020–2029;

(i) Support African Union efforts in advocating for the effective operationalization of relevant accountability frameworks for parties involved in armed conflict;

(j) Collaborate with the African Union to implement Security Council resolution 2719 (2023).

3.IV.5 The above-mentioned work is expected to result in:

(a) Strengthened strategic coherence and collaboration between the African Union, the United Nations and other partners in addressing Africa's peace and security challenges, including the root causes of conflicts;

(b) Strengthened ability of the African Union, the African Union Commission, the regional economic communities and the regional mechanisms with regard to conflict prevention, management and resolution, including the capacity of the African Union to plan and manage its peace operations.

3.IV.6 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) There is continued political will and commitment by the United Nations and the African Union in promoting cooperation with regional and subregional organizations in peace and security;

(b) The African Union will continue to develop the human and financial capacity necessary to effectively deliver on mandates to address peace and security challenges in Africa;

(c) Extrabudgetary funding is available.

3.IV.7 With regard to cooperation with other entities at the global, regional and national levels, the Office will maintain relationships with external partners and stakeholders, taking into consideration priorities expressed in Agenda 2063: The Africa We Want and relevant policy documents, the 2030 Agenda and the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security. The Office will further maintain regular interaction on thematic and country-specific issues and advance common United Nations and African Union positions, while enhancing coordination and synergies between key partners, such as the European Union, regional economic communities and regional mechanisms.

3.IV.8 With regard to inter-agency coordination and liaison, the Office will continue to lead or support coordination mechanisms with United Nations entities to ensure coherence in delivering assistance to the African Union. The Office will also engage with relevant opportunities and issue-based coalitions of the Regional Collaborative Platform for Africa.

3.IV.9 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. A key focus will be on strengthening cooperation with the United Nations and the African Union to institutionalize gender-sensitive policymaking and programming. The Office will continue to support the full, equal and meaningful participation of women in preventive diplomacy,

mediation, elections and early warning systems, and the deployment of women in peace support operations. This includes further mainstreaming the women and peace and security agenda in joint initiatives with the African Union Commission and subregional organizations.

3.IV.10 In line with the United Nations Disability Inclusion Strategy, the Office will provide support to the African Union, as relevant, to enhance the inclusion of persons with disabilities in peace and security initiatives.

Evaluation activities

3.IV.11 An evaluation on support to the implementation of the United Nations-African Union Partnership in Peace and Security (2020–2024), conducted by the Office and completed in 2024, has guided the proposed programme plan for 2026.

3.IV.12 In response to the results of that evaluation, the Office will enhance engagement with a wide range of partners to mobilize political, technical and voluntary financial support for the United Nations-African Union Partnership. The Office will also continue to integrate a gender perspective in the implementation of partnerships with the African Union to contribute to the women and peace and security agenda.

3.IV.13 An evaluation to be conducted by the Office on a topic to be determined is planned for 2026.

Programme performance in 2024

Advancing peace and governance in Somalia through joint United Nations-African Union support to the security transition of Somalia

3.IV.14 The United Nations and the African Union, in their joint efforts supporting the African Union Transition Mission in Somalia (ATMIS), have made strides in advancing peace and strengthening governance in Somalia. These collaborative efforts have enabled the Federal Government of Somalia to maintain stability and ensure the functioning of its institutions. The Office provided support for the planning and management of ATMIS through joint assessments and the development and review of operational documents. The Office also participated with the African Union, as well as other United Nations entities, in developing a transition plan for ATMIS to the African Union Support and Stabilization Mission in Somalia (AUSSOM) and its implementation, including the pre-deployment assessment of uniformed personnel and enabling capabilities.

3.IV.15 Progress towards the objective is presented in the performance measure below (see table 3.IV.1).

Table 3.IV.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Election security is maintained and Government elected, with post-election security maintained	Enhanced security environment enabling the elected Federal Government in Somalia to function	Downsizing of ATMIS and the corresponding progressive takeover of security responsibilities by Somali security forces in line with Security Council resolution 2628 (2022) The Security Council, by its resolution 2767 (2024) endorsed the African Union Peace and Security Council's decision to replace ATMIS with AUSSOM

Planned results for 2026

Result 1: progress towards predictable and sustainable funding for African Union peace support operations

Programme performance in 2024 and target for 2026

3.IV.16 The Office's work contributed to the endorsement by the Chairperson of the African Union Commission and the Secretary-General of the joint African Union-United Nations road map for the operationalization of resolution 2719 (2023), which met the planned target.

3.IV.17 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.IV.2).

Table 3.IV.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The Security Council requested[a] an update on progress made so far by the United Nations and the African Union to fulfil the commitments as set out in Security Council resolutions 2320 (2016) and 2378 (2017), and recommendations on moving forward that reflect good practices and lessons learned, with a view to securing predictable, sustainable and flexible resources	Consideration by the Security Council of issues on the financing of African Union peace support operations (see S/2023/303), and adoption of Security Council resolution 2719 (2023) Development of draft joint African Union-United Nations planning guidelines Adoption by the African Union of a consensus paper on predictable, adequate and sustainable financing for African Union peace and security activities	The Chairperson of the African Union Commission and the Secretary-General endorsed the joint African Union-United Nations road map for the operationalization of resolution 2719 (2023)	Establishment of a joint United Nations-African Union operational framework for the implementation of Security Council resolution 2719 (2023)	The United Nations and the African Union implement the operational framework for the implementation of Security Council resolution 2719 (2023)

[a] S/PRST/2022/6.

Result 2: advanced youth involvement in peace and security initiatives in Africa

Programme performance in 2024 and target for 2026

3.IV.18 The Office's work contributed to the completion by the African Union of the induction and training of the second cohort of the African Youth Ambassadors for Peace, strengthening youth leadership capacity and promoting inclusive, youth-led solutions to conflict across the continent through the Youth for Peace programme, which met the planned target.

3.IV.19 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.IV.3).

Table 3.IV.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The African Union adopted the Bujumbura Declaration on youth, peace and security in Africa	The African Union supported its member States to integrate the Continental Framework for Youth, Peace and Security into national policies and processes	The African Union completed the induction and training of the second cohort of African Youth ambassadors for Peace	10 African Union member States develop national actional plans on youth, peace and security	5 additional African Union member States develop national actional plans on youth, peace and security

Result 3: enhancing joint United Nations-African Union efforts in preventing and mediating conflict, sustaining peace and addressing the root causes of conflict

Proposed programme plan for 2026

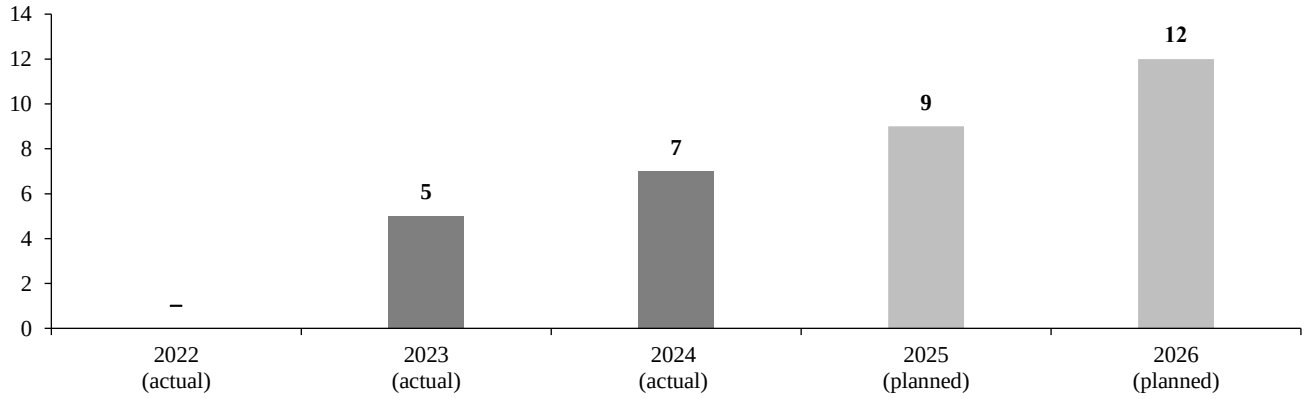
3.IV.20 The African Peace and Security Architecture remains central to fostering peace and stability across Africa. In 2024, the Office supported the Architecture, including by commencing the review of the African Standby Force, and in various thematic areas, including disarmament, demobilization and reintegration, security sector reform and addressing the impact of climate change on peace and security, through capacity-building and policy development.

Lessons learned and planned change

3.IV.21 The lesson for the Office was the need to further deepen United Nations-African Union coordination in implementation of efforts on disarmament, demobilization and reintegration activities, security sector reform and addressing the impact of climate change on peace and security. In applying the lesson, the Office will develop strategies across these thematic areas to strengthen United Nations support for African Union-led peace and security processes. The Office will implement these strategies through strengthened policy support, analysis, knowledge-sharing and capacity-building, with a view to enhancing coordination between the African Union and United Nations in these thematic areas.

3.IV.22 Expected progress towards the objective is presented in the performance measure below (see figure 3.IV.I).

Figure 3.IV.I
Performance measure: number of joint African Union–United Nations initiatives in support of security sector reform; disarmament, demobilization and reintegration; and addressing impact of climate change on peace and security



Legislative mandates

3.IV.23 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

52/220	Questions relating to the proposed programme budget for the biennium 1998–1999	65/274; 67/302	Cooperation between the United Nations and the African Union
60/268	Support account for peacekeeping operations	71/270	Review of the United Nations Office to the African Union
64/288	Financing of the United Nations Office to the African Union	79/1	The Pact for the Future

Security Council resolutions

1325 (2000)	2378 (2017)
2033 (2012)	2457 (2019)
2167 (2014)	2710 (2023)
2250 (2015)	2719 (2023)
2320 (2016)	

Deliverables

3.IV.24 Table 3.IV.4 lists all deliverables of the Office.

Table 3.IV.4
United Nations Office to the African Union: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**1**	**1**
1. Report of the Secretary-General to the Security Council on strengthening the partnership between the United Nations and the African Union on issues of peace and security in Africa, including the work of the United Nations Office to the African Union	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**10**	**16**	**11**	**15**
2. Annual joint consultative meetings of the Security Council and the African Union Peace and Security Council	2	2	2	2
3. Annual joint consultative meetings between the United Nations Peacebuilding Commission and the African Union Peace and Security Council	–	1	–	1
4. Coordination meetings of the Security Council and the African Union Peace and Security Council	5	10	6	9
5. Meetings of the Fifth Committee	1	1	1	1
6. Meetings of the Committee for Programme and Coordination	1	1	1	1
7. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**100**	**101**	**100**	**103**
8. Training events for the African Union Mediation Support Unit on current methods and trends in mediation	10	2	10	6

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
9. Training events for the secretariat of the African Union Peace and Security Council on current issues and trends in peace and security	10	11	10	10
10. Training events for the African Union on military, police and civilian aspects of peace support operations	60	68	60	65
11. Seminars and workshops for experts and officials of African Union member States on topics related to conflict prevention, management and resolution	20	20	20	22
Technical materials (number of materials)	**8**	**20**	**13**	**17**
12. Joint United Nations-African Union technical review of and assessment reports on African Union peace support operations	1	7	6	10
13. Policies and guidance documents in support of the African-led peace support operations	5	9	5	5
14. Peace and security-related policies and guidelines in support of the implementation of the African Peace and Security Architecture and conflict prevention, management and resolution	2	4	2	2

C. Substantive deliverables

Good offices: support for the African Union in mediation and conflict prevention efforts; and one joint regional visit by the representatives of the African Union, the United Nations and regional economic communities for conflict analysis and early intervention.

Consultation, advice and advocacy: advice, in collaboration with the African Union Commission, to five regional economic communities and regional mechanisms on the development and harmonization of the African Peace and Security Architecture; advisory services and support to advance the implementation of the youth, peace and security and the women and peace and security agendas; 20 briefings to the African Union Peace and Security Council on peace and security issues; advice to the African Union and relevant stakeholders on processes to support the financing of African Union peace support operations, including the implementation of Security Council resolution 2719 (2023); advice and advocacy to the Open-ended Group of Friends of the United Nations-African Union partnership; and substantive and technical advice to the Peace Fund.

D. Communication deliverables

Outreach programmes, special events and information materials: International Women's Day, International Youth Day, Africa Day, International Day of United Nations Peacekeepers and International Day of Peace; information materials, flyers, banners and infographic documents; quarterly public newsletter of the Office; and information circular submitted every two weeks to the African Union Peace and Security Council on relevant Security Council resolutions and decisions.

Digital platforms and multimedia content: website and social media accounts; and online platform showcasing United Nations-African Union partnership activities.

B. Proposed post and non-post resource requirements for 2026

Overview

3.IV.25 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 3.IV.5 to 3.IV.7.

Table 3.IV.5

3.IV.26 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 3.IV.8 to 3.IV.10 and figure 3.IV.II.

3.IV.27 As shown in tables 3.IV.8 (1) and 3.IV.9 (1), the overall resources proposed for 2026 amount to $1,200,500, reflecting an increase of $200 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

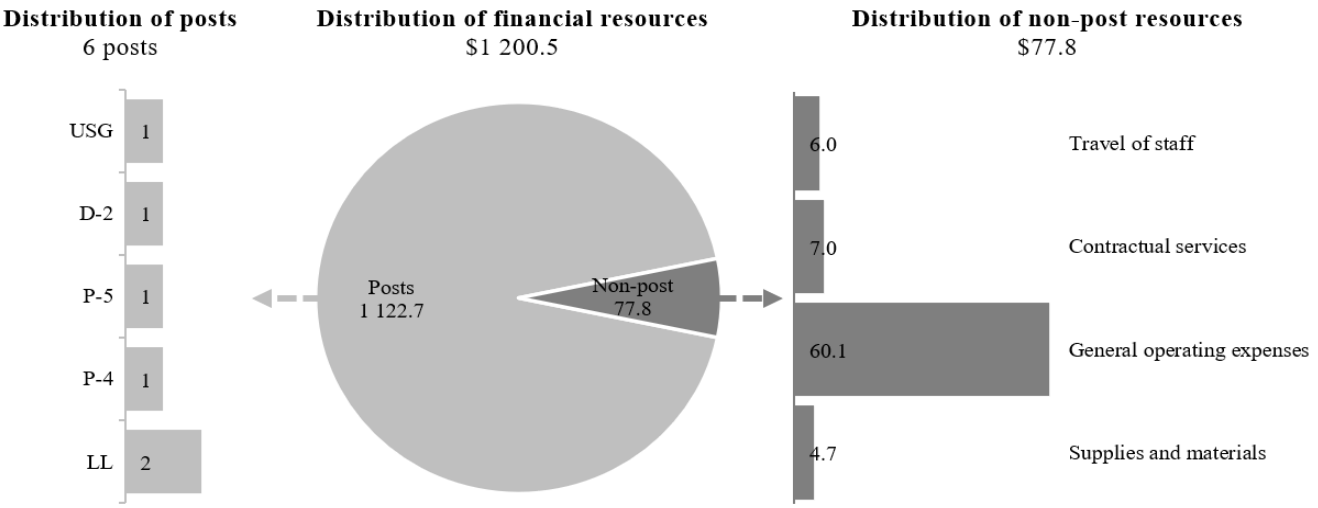
Figure 3.IV.II
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor and component

Overall resource changes

Other changes

3.IV.28 As shown in table 3.IV.8 (1), resource changes reflect an increase of $200 under contractual services due to the adjustment of standard ICT rates for non-field personnel outside of Headquarters for 2026.

Other assessed resources

3.IV.29 As reflected in tables 3.IV.8 (2) and 3.IV.9 (2), other assessed resources amount to $10,342,700. The resources would complement regular budget resources and provide for the requirements indicated in report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/83).

Extrabudgetary resources

3.IV.30 As reflected in tables 3.IV.8 (3) and 3.IV.9 (3), no extrabudgetary resources are expected in 2026 due to the discontinuation of donor funding.

Other information

3.IV.31 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office will continue to deploy printers with energy-efficient technological capacity and levels, thus providing a low-energy footprint; install software on printers to monitor printing levels; and use electrical vehicles for an environmentally sustainable fleet solution, in line with a new policy put in place by the Government of Ethiopia banning the use of fossil fuel vehicles in the country.

3.IV.32 Information on advance booking for air travel is reflected in table 3.IV.11. The majority of official travel by the Office is in support of joint initiatives with the African Union, the regional economic communities and other partners. Notification or approval of such travel is often not received within time frames that would comply with the United Nations stipulations on travel. The Office will continue to ensure that notification or approval of travel is received within timelines that would enable compliance with the stipulated requirements and raise awareness of this obligation among its strategic partners.

V. Office of Counter-Terrorism

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

3.V.1 Pursuant to General Assembly resolution 71/291, and as reaffirmed by the Assembly in its resolution 77/298, on the eighth review of the United Nations Global Counter-Terrorism Strategy, the Office of Counter-Terrorism is responsible for five main functions: providing leadership on the General Assembly counter-terrorism mandates entrusted to the Secretary-General; enhancing coordination and coherence across the United Nations system to ensure the balanced implementation of the four pillars of the United Nations Global Counter-Terrorism Strategy; strengthening delivery of United Nations counter-terrorism capacity-building assistance to Member States; improving the visibility of, and advocacy and resource mobilization for, United Nations counter-terrorism efforts; and ensuring that due priority is given to counter-terrorism across the United Nations system and that work on preventing violent extremism as and when conducive to terrorism is firmly rooted in the Strategy.

3.V.2 United Nations Global Counter-Terrorism Strategy (General Assembly resolution 60/288) is composed of four pillars, in the form of measures to: address the conditions conducive to the spread of terrorism; prevent and combat terrorism; build States' capacity to prevent and combat terrorism and to strengthen the role of the United Nations system in this regard; and ensure respect for human rights for all and the rule of law as the fundamental basis of the fight against terrorism. The mandate of the Office derives from the priorities established in the Strategy and subsequent review resolutions adopted by the General Assembly, including resolution 75/291, and other relevant General Assembly and Security Council resolutions, including Security Council resolution 2617 (2021).

3.V.3 The Office acts as secretariat for the United Nations Global Counter-Terrorism Coordination Compact, which promotes action-oriented collaboration within the United Nations system and serves as a platform for joint programming, coherent monitoring and evaluation, and facilitation of joint resource mobilization and outreach to donors.

Programme of work

Objective

3.V.4 The objective, to which the Office contributes, is to prevent and counter terrorism in all its forms and manifestations, as well as violent extremism as and when conducive to terrorism, in compliance with international law.

Strategy and external factors for 2026

3.V.5 To contribute to the objective, the Office, will:

(a) Provide leadership for the General Assembly counter-terrorism mandates entrusted to the Secretary-General and convene high-level international and regional conferences and outreach events for Member States, international and regional organizations, and civil society to exchange information, expertise and resources, develop partnerships and collectively address a range of counter-terrorism issues;

(b) Enhance coordination and coherence across the Compact entities to support the counter-terrorism efforts of Member States, including by strengthening the response to technical assistance needs identified by the Counter-Terrorism Committee Executive Directorate and to requests from various Member States;

(c) Provide technical and capacity-building assistance to requesting Member States, including through its presences away from Headquarters, in a focused, integrated and coordinated manner, and reinforce resource mobilization activities with donors;

(d) Conduct research, identify and disseminate new and innovative programme management methodologies, best practices and lessons learned, and embed evidence-informed delivery as a foundation for its technical assistance work;

(e) Strengthen the capacity of Member States to ensure respect for human rights and the rule of law while countering terrorism, in accordance with the fourth pillar of the United Nations Global Counter-Terrorism Strategy;

(f) Support parliamentarians and strengthen outreach to civil society organizations, including youth and women's organizations, in preventing and countering terrorism and violent extremism conducive to terrorism.

3.V.6 The above-mentioned work is expected to result in:

(a) Multilateral cooperation against terrorism, and strengthened partnerships with and among Member States, international and regional organizations, civil society, the private sector and academia for a whole-of-society approach to counter-terrorism and the prevention of violent extremism conducive to terrorism;

(b) Implementation by Member States of relevant General Assembly and Security Council resolutions related to countering terrorism and preventing violent extremism conducive to terrorism, including by building greater resilience and reinforcing responses to terrorist threats and attacks;

(c) Enriched international and multisectoral policy discourse in support of greater prioritization and coherence on counter-terrorism and the prevention of violent extremism conducive to terrorism;

(d) Integration of human rights norms and standards in relevant measures taken in the context of preventing and countering terrorism and violent extremism conducive to terrorism, in requesting Member States.

3.V.7 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States will continue to request support from the United Nations in preventing and countering terrorism and violent extremism conducive to terrorism;

(b) Extrabudgetary resources for capacity-building support for Member States will be available;

(c) Member States will grant the necessary official approvals and access to enable implementation and delivery of this support.

3.V.8 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to cooperate with the Global Counterterrorism Forum and specialized international and regional organizations, such as the African Union, the Association of Southeast Asian Nations, the Caribbean Community, the Collective Security Treaty Organization, the Anti Terrorism Centre of the Commonwealth of Independent States, the European Union, the League of Arab States, the North Atlantic Treaty Organization, the Organization of American States, the Organization for Security and Cooperation in Europe, the Organization of Islamic Cooperation and the Regional Anti-Terrorist Structure of the Shanghai Cooperation Organization. The Office will continue to implement existing and develop new partnership frameworks to support joint approaches to promote the implementation of the United Nations Global Counter-Terrorism Strategy and regional counter-terrorism strategies.

3.V.9 With regard to inter-agency coordination and liaison, the Office leads the United Nations Global Counter-Terrorism Coordination Compact, which includes 46 entities, including 42 United Nations entities and the International Criminal Police Organization, the Financial Action Task Force, the Inter-Parliamentary Union and the World Customs Organization, as member or observer entities. The Compact comprises eight thematic working groups specialized in priority areas relating to

preventing and countering terrorism and violent extremism conducive to terrorism, aligned with the four pillars of the United Nations Global Counter-Terrorism Strategy. The Office will continue to strengthen the coordination of counter-terrorism efforts through consultative inter-agency efforts with the United Nations country teams and resident coordinators, in cooperation with respective host countries, and use its coordination role to strengthen existing partnerships and initiate new ones for multi-stakeholder collaboration at the national, regional and global levels. The Office will continue to advocate an approach that prioritizes joint programming with other United Nations partners to maximize the use of resources and deliver more coherent and expert capacity-building activities.

3.V.10 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, through the implementation of its policy and action plan for gender mainstreaming. The Office will provide technical assistance in line with the women and peace and security agenda and the United Nations Global Counter-Terrorism Strategy and its reviews, and informed by gender analysis.

3.V.11 In line with the United Nations Disability Inclusion Strategy, the Office will integrate disability inclusion within its programmatic and policy functions, including modalities to reflect disability considerations in programme design and the implementation of evaluations.

Evaluation activities

3.V.12 The following evaluations conducted by the Office and completed in 2024 have guided the proposed programme plan in 2026:

(a) Three evaluations conducted on programmes related to prosecution, rehabilitation and reintegration; border security and management; and security of major sporting events and promotion of sport values to prevent violent extremism conducive to terrorism;

(b) Four evaluations conducted on projects related to the reintegration of men and women formerly associated with non-State armed groups in Somalia (jointly with the International Organization for Migration (IOM)); building the capacities of young leaders for the prevention of violent extremism conducive to terrorism in South-East Asia; the prevention of radicalization to violence in prisons (jointly with the United Nations Office on Drugs and Crime (UNODC)); and the Counter-Terrorism Early Warning Network for Central Asia.

3.V.13 In response to the results of the above evaluations, the Office will enhance its focus on incorporating robust monitoring and evaluation approaches and systems, and will further integrate considerations related to human rights, gender equality, disability inclusion and leaving no one behind in the design and delivery of its programmes and projects.

3.V.14 Final evaluations of three projects in the Africa and Central Asia regions and one global programme on parliamentary engagement in preventing and countering terrorism, to be conducted by the Office, are planned for 2026.

Programme performance in 2024

Member States strengthen coordination to enhance border security

3.V.15 In accordance with the United Nations Global Counter-Terrorism Strategy and relevant Security Council resolutions, including 2178 (2014), 2309 (2016), 2396 (2017) and 2482 (2019), the Office supports strengthened counter-terrorism efforts through enhanced cooperation and advanced border management measures. In 2023 and 2024, the Office, in coordination with IOM and UNODC, supported the establishment of the Integrated Border Stability Mechanism in Dakar. During 2024, the Mechanism conducted technical consultations in its seven focus countries – Benin, Burkina Faso, Côte d'Ivoire, Ghana, Mali, Niger and Togo – engaging national stakeholders to assess border security and governance gaps, needs and priorities. The Office also held technical trainings and workshops at the global and regional levels throughout 2024. This helped to shape the development of the Global Counterterrorism Forum training-of-trainers curriculum, set to be rolled out through regional and national trainings in

2025. The Office also co-led the production of a good practices addendum on border security and management, complemented by a practical train-the-trainer manual, with a view to equipping border officials with the knowledge and skills to operationalize these good practices globally.

3.V.16 Progress towards the objective is presented in the performance measure below (see table 3.V.1).

Table 3.V.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Member States reached a political agreement to launch an Integrated Border Stability Mechanism to enhance coordination among West African Governments, donors, regional organizations and implementing partners, for strengthened integrated border governance and security	National stakeholders in seven countries utilize the Mechanism to strengthen integrated border governance and security, and assess gaps, needs and priorities

Planned results for 2026

Result 1: enhanced coordination and coherence among United Nations Global Counter-Terrorism Coordination Compact entities, regional organizations and other partners to support the counter-terrorism efforts of Member States

Programme performance in 2024 and target for 2026

3.V.17 The Office's work contributed to strengthened engagement by civil society organizations and regional organizations in the eight United Nations Global Counter-Terrorism Coordination Compact working groups, with the participation of representatives from 23 civil society organizations and nine regional organizations in meetings of the working groups, which met the planned target.

3.V.18 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 3.V.2).

Table 3.V.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced engagement between United Nations Global Counter-Terrorism Coordination Compact entities and Member States, with information exchange between over 1,000 focal points from 45 Compact entities, 136 Member States and 13 regional organizations	Strengthened cooperation between the Global Counterterrorism Forum and the Compact, as evidenced by direct interaction between respective working groups	Strengthened engagement by civil society organizations and regional organizations in the eight United Nations Global Counter-Terrorism Coordination Compact working groups	Strengthened engagement by regional and subregional organizations on issues covered by the Compact working groups	Strengthened engagement by Member States, as well as partners in the field, on issues covered by the Compact working groups

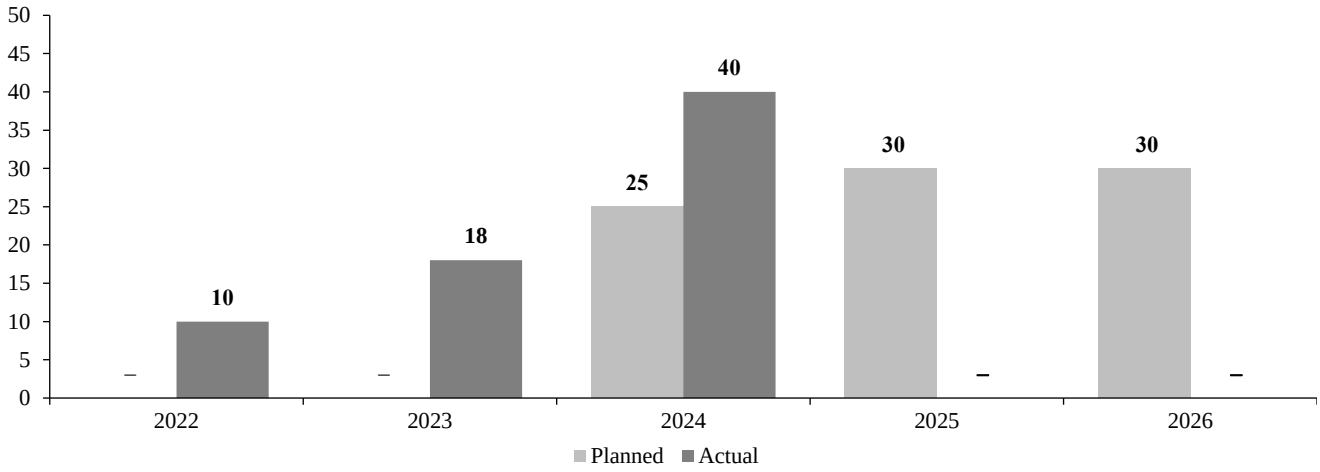
Result 2: Member States advance their efforts in countering terrorist use of weapons

Programme performance in 2024 and target for 2026

3.V.19 The Office's work contributed to 40 Member States reporting increased capacities to prevent, prepare for and respond to terrorist use of conventional and non-conventional weapons, which exceeded the planned target of 25 Member States.

3.V.20 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 3.V.I).

Figure 3.V.I
Performance measure: number of Member States reporting increased capacities to prevent, prepare for and respond to terrorist use of conventional and non-conventional weapons (annual)



Result 3: enhanced national counterterrorism capabilities through strengthened interagency coordination and intelligence analyst skills to prevent and counter terrorism

Proposed programme plan for 2026

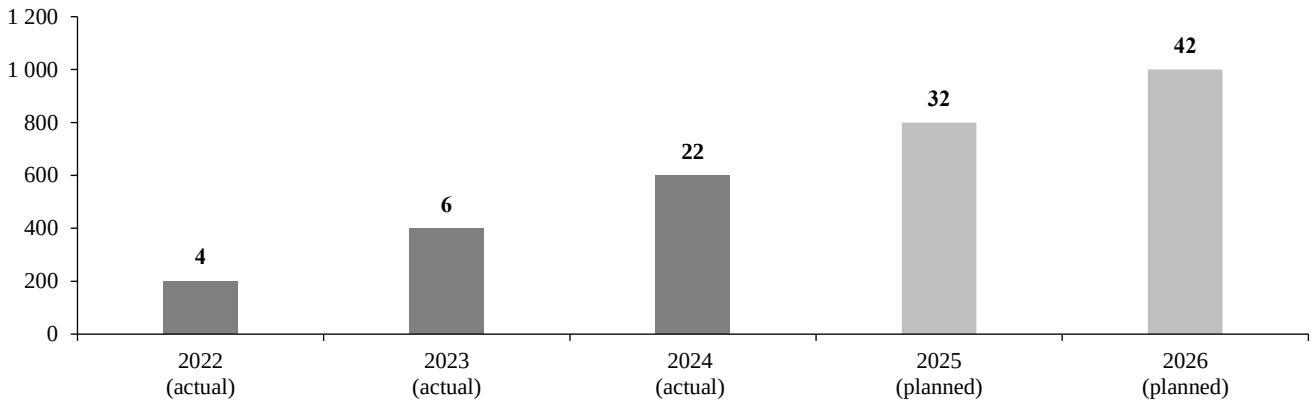
3.V.21 The Office supports counter-terrorism capabilities across Africa, strengthening national inter-agency coordination and intelligence-sharing mechanisms to address evolving security threats. In 2020, in line with relevant Security Council resolutions, including 2462 (2019) and 2482 (2019), and responding to Member States' requests, the Office launched a multi-year global programme to support intra- and inter-agency coordination mechanisms on intelligence, analysis and investigations. In 2023, the programme developed a compendium of good practices and related guidelines on establishing and operating a national inter-agency coordination mechanism, including seven study guides, and a 13-week modular training portfolio offering 12 courses to Member State analysts. Since 2020, the programme has trained over 1,400 participants from 32 African intelligence and law enforcement agencies. On the basis of post-training assessments, 100 per cent of trainees' managers indicated that their trained staff were performing better as a direct result of the programme.

Lessons learned and planned change

3.V.22 The lesson for the Office was the need to expand its reach to meet the high demand for assistance from Member States. In applying the lesson, the Office will prioritize a train-the-trainer model, equipping academy instructors with advanced skills to institutionalize analytical training within national academies. Furthermore, the Office will pursue formal accreditation to integrate its training methodologies into national law enforcement frameworks, ensuring long-term sustainability and impact. These efforts will contribute to strengthening the capacities of intelligence and law enforcement agencies, with a view to establishing national coordination mechanisms to counter terrorism.

3.V.23 Expected progress towards the objective is presented in the performance measure below (see figure 3.V.II).

Figure 3.V.II
Performance measure: number of Member States with enhanced national inter-agency coordination mechanisms in support of counter-terrorism (cumulative)



Legislative mandates

3.V.24 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the Office.

General Assembly resolutions

60/288; 62/272; 64/297	United Nations Global Counter-Terrorism Strategy
66/10	United Nations Counter-Terrorism Centre
66/282; 68/276; 70/291; 72/284	The United Nations Global Counter-Terrorism Strategy Review
70/254	Secretary-General's Plan of Action to Prevent Violent Extremism
71/291	Strengthening the capability of the United Nations system to assist Member States in implementing the United Nations Global Counter-Terrorism Strategy
72/165	International Day of Remembrance of and Tribute to the Victims of Terrorism
73/305	Enhancement of international cooperation to assist victims of terrorism
75/291	The United Nations Global Counter-Terrorism Strategy: seventh review
77/243	International Day for the Prevention of Violent Extremism as and when Conducive to Terrorism
77/298	The United Nations Global Counter-Terrorism Strategy: eighth review
79/1	The Pact for the Future
79/53	Countering the threat posed by improvised explosive devices
79/129	Measures to eliminate international terrorism

Security Council resolutions

1373 (2001)	2395 (2017)
1540 (2004)	2396 (2017)
2322 (2016)	2462 (2019)
2341 (2017)	2482 (2019)
2368 (2017)	2617 (2021)
2370 (2017)	

Deliverables

3.V.25 Table 3.V.3 lists all deliverables of the Office.

Table 3.V.3
Office of Counter-Terrorism: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**3**
Report of the Secretary-General to:				
1. The General Assembly on the implementation of the United Nations Global Counter-Terrorism Strategy by the United Nations system	–	–	–	1
2. The Security Council on the threat posed by Islamic State in Iraq and the Levant (ISIL, also known as Da'esh)	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	**17**	**12**	**17**	**42**
3. Meeting of the General Assembly on the review of the United Nations Global Counter-Terrorism Strategy	–	–	–	26
4. Briefings to the General Assembly on the work of the Office of Counter-Terrorism	4	–	4	4
5. Briefings to the Security Council	2	3	2	2
6. Briefings to the Security Council Committee established pursuant to resolution 1373 (2001) concerning counter-terrorism (Counter-Terrorism Committee)	4	3	4	4
7. Briefings to the Advisory Board of the United Nations Counter-Terrorism Centre	4	3	4	3
8. Meetings of the Fifth Committee	1	1	1	1
9. Meetings of the Committee for Programme and Coordination	1	1	1	1
10. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**833**	**464**	**520**	**463**
11. High-level conference on issues relating to counter-terrorism	9	18	3	18
12. Regional conferences on technical issues relating to counter-terrorism	23	20	15	20
13. Capacity-building training and workshops on technical thematic issues	801	426	502	425
Technical materials (number of materials)	**34**	**10**	**14**	**10**
14. On lessons learned, best practices and thematic topics in implementing the United Nations Global Counter-Terrorism Strategy	34	10	14	10

C. Substantive deliverables

Consultation, advice and advocacy: advocacy initiatives; consultations with an estimated 110 Member States on global, regional and national priorities and strategies; quarterly briefings to Member States; Counter-Terrorism Week.

Databases and substantive digital materials: United Nations Global Counter-Terrorism Coordination Platform, connecting focal points of 46 United Nations Global Counter-Terrorism Coordination Compact entities (United Nations and non-United Nations entities), 137 Member States and 14 regional organizations; "Connect & Learn" platform, with online training and communities of practice for approximately 4,300 members.

D. Communication deliverables

Outreach programmes, special events and information materials: three regional conferences, as well as special commemorative events including international days, launch events, side events and exhibitions; monthly newsletters on the work of the Office, bimonthly newsletters and annual newsletter and report on the United Nations Global Counter-Terrorism Coordination Compact, and other promotional materials and reports.

External and media relations: approximately 50 press releases, media interviews and other engagement with media.

Digital platforms and multimedia content: content for the Office's website and social media accounts, including approximately 80 web stories and 10 videos.

B. Proposed post and non-post resource requirements for 2026

Overview

3.V.26 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 3.V.4 to 3.V.6.

Table 3.V.4

3.V.27 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 3.V.7 to 3.V.9 and figure 3.V.III.

3.V.28 As shown in tables 3.V.7 (1) and 3.V.8 (1), the overall resources proposed for 2026 amount to $12,040,800, reflecting an increase of $400 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

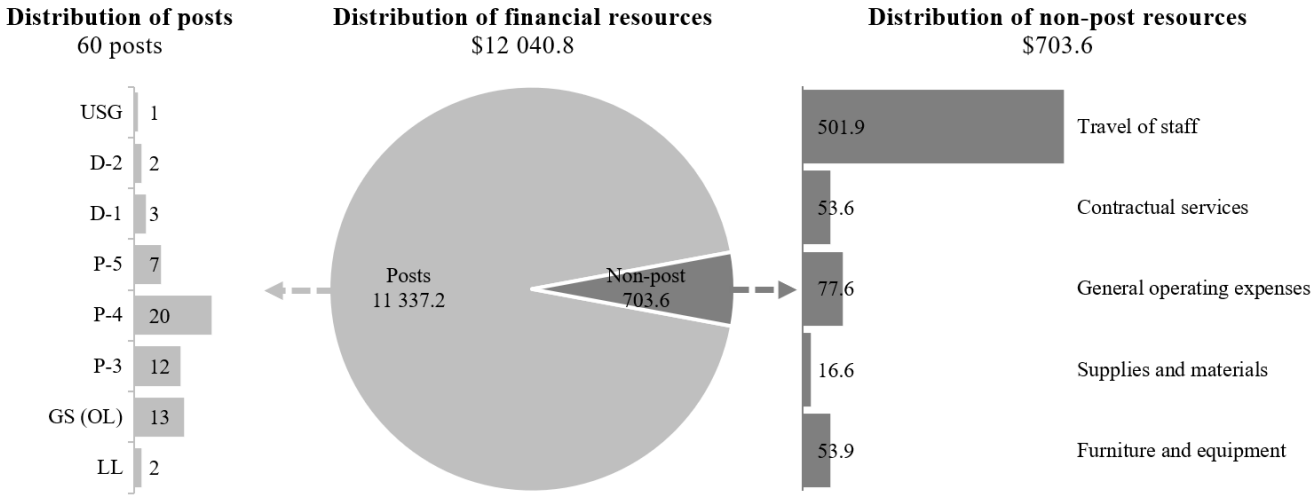
Figure 3.V.III
Programme support: distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

3.V.29 As shown in table 3.V.7, resource changes reflect an increase of $400 under contractual services due to the adjustment of standard ICT rates for non-field personnel outside of Headquarters for 2026.

Extrabudgetary resources

3.V.30 As reflected in table 3.V.7 (2), extrabudgetary resources amount to $34,687,600. The resources would complement regular budget resources and would provide for 137 posts (1 D-1, 13 P-5, 39 P-4, 40 P-3, 8 P-2/1, 6 National Professional Officer, and 30 General Service (Other level)), mainly to perform the functions of supporting Member States, strengthen field capacities and develop innovative ways to deliver capacity-building assistance to Member States. Non-post resources would be used cover operational requirements and activities in support of the Office's mandate.

3.V.31 The Office also receives in-kind voluntary contributions, including for office space, furniture and equipment, parking and operational services, with an approximate value of $520,500.

3.V.32 The authority to oversee the use of extrabudgetary resources rests with the Office, in accordance with the delegation of authority from the Secretary-General.

VI. Special political missions

Resource requirements: $639 831,500

3.VI.1 The proposed resource requirements for the 37 special political missions for 2026 amount to $639,831,500, which would be supplemented by extrabudgetary resources, estimated at $37,700,100. These resources would provide for the full, efficient and effective implementation of the mandates for the special political missions. Further details on the proposed resources for 2026 are contained in the relevant reports of the Secretary-General on the special political missions (A/80/6 (Sect. 3)/Add.1-6).

Annex I

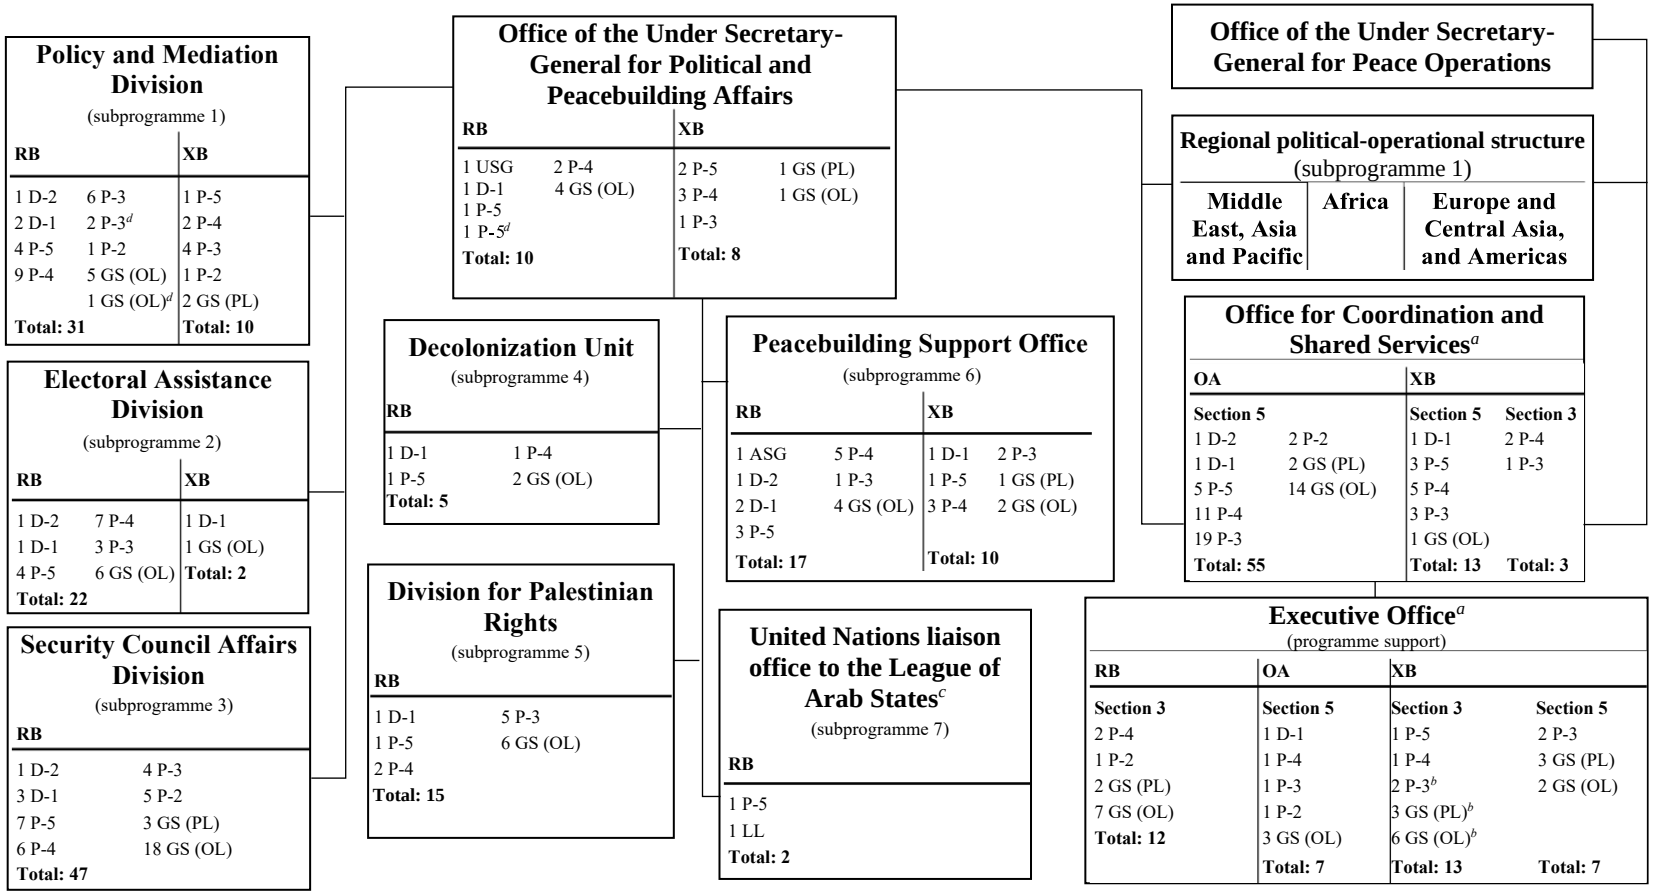
Organizational structure and post distribution for 2026

Seven charts showing the organization structure of section 3, Political affairs, are presented below. Charts A to E present the proposed structure for 2026, chart F reproduces the approved structure as contained in A/79/6 (Sect. 3) for the Office of Counter-Terrorism and chart G presents the proposed structure for 2026 for the Office.

Justification for the proposed changes

The Office of Internal Oversight Services recommended that the Office of Counter-Terrorism organigram be streamlined to provide clarity and operational efficiencies in the areas of policy, capacity-building and operations. The proposed restructuring provides this clear delineation. Furthermore, the Project Management Unit, which has been reporting to the Director of the United Nations Counter-Terrorism Centre, will now be within the former Strategic Planning and Programme Support Section, since renamed the Programme Support and Administration Section, and will focus on providing programme and project management expertise across all areas of the Office. Lastly, the pillar structure within the Office is now replaced by thematic areas, the focus of which are illustrative of the work of the Office.

A. Department of Political and Peacebuilding Affairs



[a] Pursuant to General Assembly resolution 72/262 C, in which the Assembly stressed that the actions to restructure the United Nations peace and security pillar should be implemented with full respect for the relevant mandates, decisions and resolutions of the Assembly and the Security Council, without changing established mandates, functions or funding sources of the peace and security pillar, information on post resources under section 5 is provided for information purposes.

[b] Two P-3, one General Service (Principal level) and two General Service (Other level) posts funded from extrabudgetary resources of the Office of Counter-Terrorism are located in the joint Executive Office of the Department of Political and Peacebuilding Affairs and the Department of Peace Operations to support the Office of Counter-Terrorism.

[c] The office is located in Cairo and reports to the Under Secretary-General for Political and Peacebuilding Affairs through the Director of the Middle East Division.

[d] New posts requested as part of the new mandate.

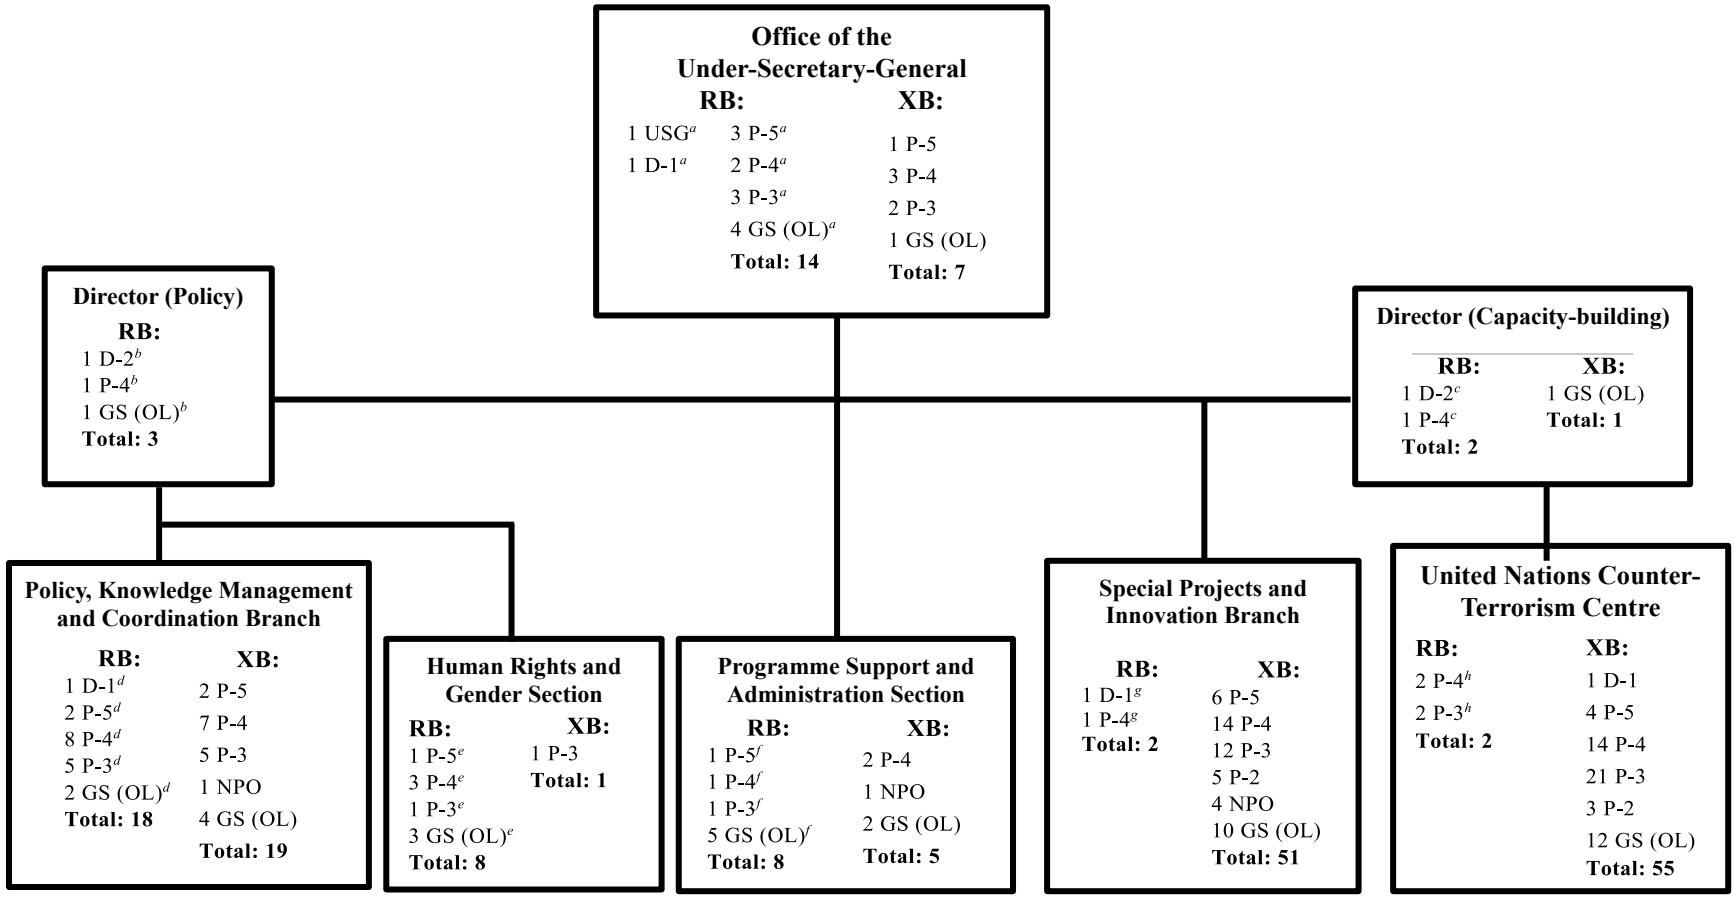
G. Office of Counter-Terrorism: proposed organizational structure and post distribution for 2026



Abbreviations: ASG; Assistant Secretary-General; FS; Field Service; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); GTA, general temporary assistance; LL, Local level; NPO, National Professional Officer; RB, regular budget; UNTSO, United Nations Truce Supervision Organization; USG, Under-Secretary-General; WAE, when actually employed; XB, extrabudgetary.

[a] Regular budget posts located in New York.

[b] Regular budget posts of D-2, P-4 and General Service (Other level) located in New York.

[c] Regular budget posts located in New York.

[d] Regular budget posts located in New York.

[e] Regular budget posts located in New York.

[f] Regular budget posts of P-5, P-3 and 2 General Service (Other level) located in Budapest and of P-4 and three General Service (Other level) in New York.

[g] Regular budget posts of D-1 is located in New York and of P-4 in Madrid.

[h] Regular budget posts of 1 P-4 and 1 P-3 located in Ashgabat and of 1 P-3 and 1 P-4 located in Madrid.

Annex II

Summary of proposed post changes, by component and subprogramme

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Department of Political and Peacebuilding Affairs				
Office of the Under-Secretary-General	1	P-5	**Establishment** of Senior Political Affairs Officer (P-5)	The proposed post of Senior Political Affairs Officer (P-5) would provide expert advice to the Under-Secretary-General and other senior officials on strategic matters, including messaging related to the implementation of General Assembly resolution 79/1 on the Pact for the Future (action 16) and its implications for international peace and security. The incumbent would support the Under-Secretary-General in navigating complex political challenges and enhance the effectiveness of the Organization's messaging on critical global issues. The incumbent would act as a focal point in cross-departmental efforts related to the Pact of the Future, ensuring policy coherence across various United Nations initiatives. The incumbent would lead and coordinate the Department's communications and outreach strategy, ensuring a consistent and impactful narrative that highlights the Organization's work in early warning, conflict prevention, mediation, peacemaking, peacebuilding and preventive diplomacy. The incumbent would also provide input to the Organization's crisis communications strategies, in particular in response to emerging or escalating conflict situations, ensuring timely and coordinated responses. The incumbent would work closely with the Office of the Spokesperson of the Secretary-General to develop public statements that reflect the Organization's strategic priorities in peace and security. The Office of the Under-Secretary-General has nine regular budget posts (1 Under-Secretary-General, 1 D-1, 1 P-5, 2 P-4 and 4 General Service (Other level)). The current staff cannot undertake the aforementioned functions owing to capacity constraints and the high volume of demands placed on the existing personnel. The current P-5 post is dedicated to thematic and regional files that require sustained attention, limiting availability to take on the additional strategic, cross-cutting and public-facing responsibilities envisioned under the Pact for the Future. Given that the Department's role in supporting the Secretary-General's prevention agenda and multilateral diplomacy continues to expand, the establishment of a second P-5 post is critical to ensuring that the Office of the Under-Secretary-General can meet the growing demand for timely political advice, coordinated messaging and effective outreach. The proposed post would fill a key gap in the Department's capacity to deliver high-level strategic guidance and ensure coherence in policy messaging, in line with the vision of a reinvigorated multilateral system articulated in the Pact for the Future.
Subprogramme 1 Policy and Mediation Division	1	P-3	**Establishment** of Political Affairs Officer (P-3) in the Policy and Mediation Division	The proposed post of Political Affairs Officer (P-3) would directly support the objectives of the Pact for the Future (action 16), with a strong emphasis on advancing the Secretary-General's good offices role and advancing partnerships with regional and subregional organizations in preventive diplomacy, mediation and multilateral engagement. The incumbent would enhance preparedness and policy planning, including through stronger analysis and research, with a specific focus on new domains and issues that are increasingly central to the pacific settlement of disputes, to inform the discharge of the Secretary-General's good offices and diplomatic engagements in close coordination with regional organizations. Key responsibilities include broadening engagement

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				with regional and subregional organizations on United Nations engagements in preventive diplomacy and mediation to identify potential areas for support; liaising closely with various cross-regional groupings of Member States that are playing a more active role on issues related to diplomacy and multilateral action for peace, in order to promote an active exchange of policy perspectives; and systematically analysing and reviewing United Nations engagements in this area to capture good practices and measure impact better. The responsibilities would include developing and maintaining partnerships with regional organizations to identify areas in which common policy development is required; strengthening joint planning for specific operational engagements in preventive diplomacy; and preparing the report of the Secretary-General on cooperation with regional and subregional organizations. The policy planning functions in the Policy and Mediation Division are covered by six posts (1 P-5, 4 P-4 and 1 P-3), including two P-4 posts approved in 2025, and supported by one General Service (Other level) post. The current staffing complement dedicated to policy planning is insufficient to undertake the aforementioned functions owing to the growing scope and complexity of demands related to preventive diplomacy, the Secretary-General's good offices, and engagement with regional and subregional organizations, as called for in the Pact for the Future. Existing staff are dedicated fully to ongoing policy development and United Nations system coordination, leaving limited capacity to proactively engage with the new and emerging dimensions of multilateral preventive efforts outlined in the Pact for the Future. The proposed P-3 post would fill a critical gap by enabling more systematic outreach to regional and subregional organizations, strengthening policy coherence and enhancing the Department's ability to respond to early signs of conflict through informed, forward-looking policy planning. Without this additional capacity, the Department risks falling short of the ambitious objectives under action 16 of the Pact for the Future and may be unable to seize opportunities for more joined-up and effective preventive diplomacy with key regional actors.
Subprogramme 1 Policy and Mediation Division	1	P-3	**Establishment** of Political Affairs Officer (P-3) in the Policy and Mediation Division	The proposed post of Political Affairs Officer (P-3) would strengthen the Department's capacity for preventive diplomacy and mediation by analysing opportunities and risks associated with emerging technologies, including in the areas of information and communications and artificial intelligence. The incumbent would identify ways to leverage emerging technologies, behavioural science and strategic foresight to make good offices, preventive diplomacy and peace processes more effective and inclusive, with a focus on the inclusion of women and young people. This capacity does not exist within the Department. The incumbent would also work on applying new technologies, behavioural science and strategic foresight to enable real-time early warning systems and early action to prevent conflict escalation and sustain peace, in line with the commitments contained in the Pact for the Future (General Assembly resolution 79/1, para. 37). This role would fill a critical capacity gap and serve as a step forward in ensuring that the United Nations remains adaptable and inclusive in addressing modern conflicts. Emerging technologies, such as artificial intelligence and digital platforms, offer transformative potential for real-time analysis, early warning systems and rapid conflict de-escalation. By applying behavioural science, the incumbent would support more inclusive and effective peace processes, while strategic foresight would enable anticipatory planning to address emerging risks and

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				opportunities proactively. The policy planning functions in the Policy and Mediation Division is covered by six posts (1 P-5, 4 P-4 and 1 P-3), including two P-4 posts that were approved in 2025, and supported by one General Service (Other level) post. The current staffing complement is engaged fully in supporting core functions, leaving limited capacity to cover the impact of new and emerging technologies on international peace and security. There are no dedicated capacities within the Division to explore how technological innovation, behavioural insights and anticipatory methodologies can be used to support the Secretary-General's good offices and preventive diplomacy efforts. The post would fill a critical institutional gap by embedding future-oriented capabilities in the Department's core work, enabling it to better anticipate, understand and respond to evolving conflict drivers. The incumbent would also ensure a sustainable foundation for the Organization to remain at the forefront of innovation in peace and security, in line with the Pact for the Future's vision for a more agile, inclusive and forward-looking multilateral system. Without this dedicated capacity, the Department risks falling behind in addressing the complex and rapidly shifting dynamics of modern conflict and missing opportunities to harness innovation for peace, also in accordance with the Secretary-General's vision of a United Nations 2.0.
Subprogramme 1 Europe and Central Asia Division	1	P-4	**Establishment** of Political Affairs Officer (P-4) in the Europe and Central Asia Division (located in China)	The proposed post of Political Affairs Officer (P-4) would develop and implement activities aimed at strengthening cooperation and liaison with the secretariat of the Shanghai Cooperation Organization on matters related to preventive diplomacy and conduct research and analysis on current trends and approaches to peace and security matters in the region. The responsibilities would include coordination of United Nations efforts in enhancing the partnership with the secretariat of the Shanghai Cooperation Organization on related matters, and the incumbent would play a crucial role in maintaining regional stability and addressing differences through dialogue and diplomacy. Following on from the establishment of a P-5-level capacity dedicated to liaison with the Association of Southeast Asian Nations in 2025, the creation of the post in 2026 would enable the Department to systematically develop and operationalize engagement with the Shanghai Cooperation Organization, including through regular liaison with its secretariat, the development of joint initiatives and the identification of opportunities for strengthened multilateral preventive diplomacy in the region. The post would contribute directly to the implementation of action 16 of the Pact for the Future, by fostering stronger partnerships between the United Nations and regional and subregional organizations in support of peace and prevention efforts. The Europe and Central Asia Division has 11 posts (1 D-1, 2 P-5, 2 P-4, 2 P-3, 1 P-2 and 3 General Service (Other level)), which are fully dedicated to covering the region, limiting any capacity for a dedicated function in this area. The post would enable the Department to better understand and respond to the evolving dynamics in the wider Eurasian region and its subregions, including trends related to peace and security, connectivity and governance, and to identify potential areas for early engagement to prevent the escalation of tensions. Without this additional capacity, the Department would be constrained in its ability to advance a coherent, proactive approach to preventive diplomacy in the region and to fully leverage its cooperation with the Shanghai Cooperation Organization to support regional stability in line with the Charter of the United Nations and the goals of the Pact for the Future.

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Subprogramme 1 Middle East Division	1	P-4	**Establishment** of Political Affairs Officer (P-4) in the Middle East Division	The proposed post of Political Affairs Officer (P-4) would develop innovative approaches and targeted initiatives that respond to the complex regional dynamics in the Middle East. The incumbent would promote greater regional cohesion in the wider regional context through comprehensive, high-quality analysis of the situation, synthetizing diverse research perspectives and preparing cross-regional analytical updates. The incumbent would contribute to shared situational analysis focused on early warning and conflict drivers and facilitate greater coherence among various United Nations operations and other presences by fostering inter-mission coordination and collaboration, also taking into account the transition in Iraq after the closure of the United Nations Assistance Mission for Iraq (UNAMI). The post is critical to enhancing the Organization's ability to address complex dynamics in the wider region, in line with the Pact for the Future's focus on regional cohesion and conflict prevention. The incumbent would provide high-quality analysis of cross-regional trends, synthesize diverse perspectives and produce actionable insights for early warning and conflict prevention. By fostering inter-mission coordination and liaising with United Nations entities, Security Council members and regional organizations, the incumbent would ensure coherence across United Nations operations and regional efforts to navigate evolving dynamics and facilitate effective transitions. The Middle East Division has 14 posts (1 D-2, 1 D-1, 3 P-5, 3 P-4, 2 P-3, 1 P-2 and 3 General Service (Other level)), including an approved P-4 post in 2025. The Division also has 1 P-4 and 2 P-3-level posts dedicated to Iraq and funded as backstopping posts under UNAMI, which will be abolished with the closure of the Mission when it liquidates in January 2026. The current staffing complement is insufficient to undertake the aforementioned functions owing to the already high volume of demands on existing staff, who are engaged fully in managing country-specific files, supporting special political missions and addressing pressing political developments across the region. The current staffing structure, especially with the abolishment of the UNAMI backstopping posts, lacks dedicated capacity to focus on cross-regional analytical work, forward-looking policy planning and inter-mission coherence, in particular in the light of complex regional transitions such as the closure of UNAMI and the need for continued political engagement on Iraq and with regard to its neighbouring region. Without this post, the Department's ability to generate timely, strategic and integrated responses to emerging dynamics in the Middle East will remain constrained, potentially affecting United Nations capacity to support durable peace and security in the region.
Subprogramme 1 Eastern Africa Division	1	P-4	**Establishment** of Political Affairs Officer (P-4) in the Eastern Africa Division	The establishment of a post of Political Affairs Officer (P-4) is essential to strengthening United Nations capacity to address the complex and evolving dynamics in Somalia and the Horn of Africa, in particular in the light of the planned closure of the United Nations Transitional Assistance Mission in Somalia in 2026. This incumbent would develop innovative approaches and targeted initiatives to enhance regional cohesion, conflict prevention and early warning mechanisms through high-quality, cross-regional analysis. By synthesizing diverse research perspectives and producing actionable insights, the incumbent would contribute to a shared situational understanding of conflict drivers, emerging risks and opportunities for preventive diplomacy. Given the interlinked security, political and humanitarian challenges in the Horn of Africa, the incumbent would play a key

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				role in fostering coherence across various United Nations operations and engagements. It would enhance inter-mission coordination, ensuring a more integrated United Nations response to ongoing and emerging crises, considering the transition in Somalia. The incumbent would maintain close liaison with United Nations entities in the region, Security Council members, Member States and regional and subregional organizations to align efforts and promote coordinated policy responses. In line with action 16 of the Pact for the Future, the post is critical to advancing the Pact's emphasis on regional cohesion and conflict prevention, equipping the United Nations with the analytical capacity and strategic engagement needed to navigate the region's evolving landscape and support smooth transition processes. The Eastern Africa Division has 19 posts (1 D-2, 2 P-5, 4 P-4, 4 P-3, 2 P-2, 5 General Service (Other level) and 1 Local level). The current staffing complement is dedicated fully to managing country-specific files, supporting special political missions and responding to immediate political developments across Eastern Africa, leaving little to no capacity for sustained cross-regional analysis or transition-focused planning.
Subprogramme 1 Americas Division	1	P-3	**Establishment** of Political Affairs Officer (P-3) in the Americas Division	The proposed post of Political Affairs Officer (P-3) is essential to strengthening United Nations capacity to address the complex and evolving dynamics in Haiti. A dedicated Political Affairs Officer is essential in ensuring sustained analytical and policy support for Haiti, given the depth and urgency of the country's interlinked crises and the political and operational challenges. Unlike other regional files that may be covered by broader portfolios, the situation in Haiti warrants dedicated attention owing to the ongoing peace process, the deteriorating security and humanitarian conditions and the increasing level of multilateral engagement, including from regional organizations such as the Caribbean Community (CARICOM) and the Organization of American States (OAS). The incumbent would have primary responsibility for engaging with CARICOM and the OAS and develop innovative approaches and targeted initiatives to enhance the monitoring and analysis of political developments in Haiti, including analysis of the ongoing peace process. By synthesizing diverse perspectives from across the region and producing actionable insights, the incumbent would contribute to a shared situational understanding of conflict drivers, emerging risks and opportunities for preventive diplomacy, including in concert with the regional and subregional actors. Given the interlinked security, political and humanitarian challenges, the incumbent would play a key role in fostering coherence across various United Nations operations and engagements to ensure support for mediation and peace processes. The incumbent would directly support the implementation of action 16 of the Pact for the Future by strengthening the Organization's capacity for preventive diplomacy, supporting political processes and fostering coherence and alignment with regional actors. The Americas Division has 16 staff (1 D-2, 1 D-1, 4 P-5, 3 P-4, 1 P-3, 2 P-2 and 4 General Service (Other level)).The current staff is engaged fully in managing the existing political portfolios in the Americas, including support for special political missions and country-specific engagements across the region. The current staffing level does not provide sufficient capacity to focus on the complex and rapidly evolving situation in Haiti and on the engagement of regional and subregional organizations such as CARICOM and OAS. The creation of a dedicated post would help to ensure that the United Nations can provide timely, informed and coordinated

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				support to efforts aimed at advancing dialogue, stability and inclusive peace in Haiti, one of the most pressing political and security challenges in the Americas today.
Subprogramme 1 Policy and Mediation Division	1	GS (OL)	**Establishment** of Programme Management Assistant (GS (OL)) in the Policy and Mediation Division	The Programme Management Assistant post (General Service (Other level)) would provide programmatic support to the above-listed new capacities in the discharge of the work in support of the policy planning functions to help to strengthen policy engagement on preventive diplomacy and good offices, pursuant to General Assembly resolution 79/1 on the Pact for the Future. The policy planning functions in the Policy and Mediation Division, which comprises six posts, is supported by one General Service (Other level) staff. The current staffing cannot undertake the aforementioned functions owing to the already significant workload required to support core responsibilities in mediation support, knowledge management, policy development and strategic engagement. The current General Service (Other level) post provides administrative and coordination support to multiple teams. The post is essential in enabling the effective functioning of the various teams. The incumbent would provide vital logistical, administrative and operational support to ensure the smooth implementation of activities, the timely delivery of outputs and efficient coordination across policy planning initiatives, including assisting in the preparation of substantive materials, organizing internal consultations and workshops, coordinating travel and mission arrangements, maintaining databases, and supporting budget and procurement processes.
Office of the United Nations Special Coordinator for the Middle East Peace Process				
Office of the United Nations Special Coordinator for the Middle East Peace Process	1	P-4	**Reclassification** of Security Coordination Officer (P-3) to Chief Security Officer (P-4)	The proposed upward reclassification reflects the need to strengthen workforce planning and management in the Security Section, given the significant increase in operational demands, derived by the escalating security crisis in the West Bank, the unprecedented scale of the hostilities in Gaza and a dynamic, unstable security environment across the region. The Section comprises 30 security personnel, including the proposed post for reclassification, based in Jerusalem, Ramallah and Gaza. This includes 12 international staff at the Field Service level and 18 local level staff. Given the Section's size and the challenging, high-risk operational environment, and with the endorsement of the Department of Safety and Security, the urgent need to reclassify the Security Coordination Officer (P-3) – who is already serving as the acting Chief Security Officer – to the P-4 level is recognized. Reclassifying the post to P-4 is essential to provide the leadership, strategic foresight and accountability required to manage security operations across the three duty stations. The Chief Security Officer (P-4) would bring the professional expertise necessary to lead security risk management in accordance with United Nations security management system standards, make rapid decisions under pressure, and analyse and interpret security data to support mission-critical decisions. The reclassification would also enhance inter-agency coordination, support the effective deployment of field teams in complex operational contexts and provide direct strategic guidance to the head of mission and senior leadership. The significantly increased level of responsibilities and accountability associated with the post, which is responsible for the safety and security of Office staff and assets across the three duty stations of Gaza, Ramallah and Jerusalem, requires a person at a more senior level with the commensurate experience to address the adverse security environment and challenges.

Annex III

Projects proposed for funding from the Peacebuilding fund

Proposed projects, objectives and budget

Central African Republic – $5,000,000

2026 resources will be allocated as follow-on funding to programmes initiated in 2025 and additionally for the project(s) listed below.

A. Enhancing border security and strengthening local capacities for conflict prevention and management in the Moyenne-Sido border area

Objective: The Moyenne-Sido border area, historically affected by insecurity, trafficking and farmer-herder tensions, now presents an opportunity for stabilization following the reopening of the border with Chad. This project is intended to enhance border governance through improved coordination among security actors, strengthened institutional capacities and meaningful community engagement. It will also promote peaceful coexistence, combat illicit trafficking and support State-led mechanisms to manage transhumance-related and broader security challenges.

Time frame: 2026–2028 (30 months)

B. The Peacebuilding Fund-African Development Bank joint initiative on agricultural transformation and support for durable solutions for returnees, displaced persons and host communities, including young people, in Mambéré-Kadéi and Nana-Mambéré Prefectures

Objective: This project is intended to support peace and stability in the Nana-Mambéré and Mambéré-Kadéï regions by addressing the root causes of conflict linked to displacement, land pressures and agricultural vulnerability. It complements an African Development Bank-led agricultural development initiative by integrating a peacebuilding approach focused on durable solutions for returnees, displaced persons and host communities, especially women and young people. Through community dialogue, conflict prevention and improved access to land, housing and livelihoods, the project is intended to create a stable and inclusive environment for sustainable reintegration and recovery.

Time frame: 2026–2028 (30 months)

Democratic Republic of the Congo – $5,000,000

A. Supporting local governance of natural resources

Objective: The project is intended to strengthen regulatory and traceability mechanisms for natural resources, ensuring that local communities, in particular Indigenous Peoples, benefit from the economic and social outcomes of mining activities. The intervention will build on local infrastructure, including peace-related structures, and will integrate a protection component.

Time frame: 2026–2028 (30 months)

B. Strengthening provincial capacities to curb illicit financial flows and promote peace

Objective: This initiative is intended to establish regulatory mechanisms to combat illicit financial flows and strengthen accountability within territorial and provincial administrations, with the ultimate goal of reducing the proliferation of armed conflict. It will focus on enhancing the technical and operational capacities of both government institutions and non-governmental actors. The initiative is also intended to promote inclusive, innovative, accountable and effective governance of natural resources, while ensuring the protection of local populations and biodiversity.

Time frame: 2026–2028 (30 months)

Guatemala – $7,500,000

A. Strengthening the meaningful participation of young people in peacebuilding and development at the national and local levels

Objective: Building on earlier Peacebuilding Fund-supported activities, the project will advance youth empowerment involving leadership, networking and civil and political participation, including through support for the development and implementation of a national action plan on young people, peace and security. The initiative will focus on increasing safe civic spaces, the exercise of human rights and formal representation in decision-making at the community and municipal levels.

Time frame: 2026–2027 (24 months)

B. Promotion and defence of the rights of women and girls to a life free from violence

Objective: The intention is to strengthen the development and implementation of pillar 3 of the 1325 national action plan on women and peace and security with respect to the prevention, attention, investigation and sanction of violence against women and girls, including sexual violence. This initiative will build on the current Peacebuilding Fund-supported initiative in support of the plan, which focusses on women's participation in local, municipal and departmental development councils and dialogue mechanisms for conflict prevention and resolution, and will be in line with the global Spotlight Initiative on ending violence against women and girls.

Time frame: 2026–2027 (24 months)

C. Prevention of electoral violence and conflict

Objective: The project is intended to institutionalize inclusive multi-actor conflict prevention and mitigation mechanisms at the national, departmental and municipal levels before, during and after the national elections cycle in 2026 and 2027; and ensuring a focus of advocacy and information activities on women, young people and human rights and including strategies to promote the transparency of and trust in the electoral process and address misinformation, disinformation and hate speech.

Time frame: 2026–2027 (24 months)

Haiti – $5,000,000

2026 resources will be allocated as follow-on funding to programmes initiated in 2025 and additionally for the project(s) listed below.

A. Turning the tide: outreach, protection and reintegration for at-risk young people and survivors of violence in Haiti

Objective: The intention is to prevent the recruitment and re-recruitment of children and adolescents by criminal gangs and self-protection brigades and to support the sustainable reintegration and recovery of both young people and women and girl survivors of sexual violence. This will be achieved through a holistic, community-anchored model that fosters trust, restores dignity and reinforces positive engagement between citizens and institutions, while demonstrating the possibility of scaling up such activities in alignment with Haiti's evolving stabilization and peacebuilding context.

Time frame: 2026–2027 (24 months)

Mali – $5,000,000

A. Youth talk: Strengthening the role of young people in peacebuilding and community resilience in southern Mali

Objective: The project is intended to harness the potential of young people for conflict management and sustainable socioeconomic development in the regions of Sikasso, Kayes, Koulikoro and Bamako, promoting their engagement in community mechanisms and their contribution to community resilience to violence.

Time frame: 2026–2028 (36 months)

B. Rural youth self-employment opportunities driving peace and social cohesion in the Niger river interior delta of Mali

Objective: The intention is to promote sustainable self-employment and rural entrepreneurship for young people and to enhance their role in local conflict resolution mechanisms, thus reducing the vulnerability of young people to violence in central Mali.

Time frame: 2026–2028 (36 months)

Papua New Guinea – $7,500,000

A. Catalysing government leadership in conflict prevention: advancing the national prevention strategy to achieve lasting peace and durable solutions in Papua New Guinea in partnership with the World Bank and civil society

Objective: The project is intended to catalyse the implementation of Papua New Guinea's recently endorsed national prevention strategy by strengthening national and subnational capacities to address the root causes of conflict and violence. Building on previous peacebuilding gains and working towards durable solutions, the project will be intended to support national and provincial governments in the roll-out of prioritized initiatives and promote inclusive, locally led solutions that reduce vulnerabilities and foster subnational social cohesion, with a focus on the protection and empowerment of women, young people and children.

Time frame: 2026–2028 (30 months)

B. The way ahead: securing a peaceful and sustainable future for the people of Bougainville following outcomes of the 2025 independent moderator process

Objective: Following final proposals by the independent moderator and 2025 elections, the project is intended to: (a) support Bougainvilleans in engaging in informed, inclusive and peaceful community deliberations, including conflict hotspots and outlier groups, and, subsequently, in enhanced dialogue with the Government; (b) assist in informed and productive intergovernmental negotiations on proposals for the future political status of Bougainville; and (c) implement conflict-sensitive development interventions, ensuring equitable peace dividends for a sustainable future for Bougainville.

Time frame: 2026–2028 (30 months)

Somalia – $10,000,000

Objective: In order to foster sustained peacebuilding with a diverse range of groups and perspectives, the initiative is intended to build on previous State-building and reconciliation efforts, with a renewed focus on building consensus around State-building priorities. It promotes inclusive governance, institutional accountability and citizen participation. By providing a pathway towards enhanced consensus, this initiative is also intended to act as a catalyst towards progress on achieving the goals of the inclusive politics window of the Somalia Joint Fund.

Time frame: 2026–2028 (30 months)

B. Establishment and operationalization of the national human rights institute in Somalia

Objective: As the United Nations Transitional Assistance Mission in Somalia (UNTMIS) makes a transition into the United Nations country team, a functional national human rights institute will step in to bridge the gap in human rights monitoring, promote access to justice and strengthen institutional credibility, contributing to Somalia's long-term stability. The initiative aligns with Federal Government of Somalia's request for a continued United Nations human rights presence in the country, which would support and mentor the institute. This initiative also aligns with Peacebuilding Fund's focus on transition contexts, ensuring that human rights remain central in Somalia's governance framework beyond 2025.

Time frame: 2026–2028 (30 months)

Proposed projects, objectives and budget

C. Transferring and embedding analytical tools in national institutions

Objective: With the departure of UNTMIS, Somalia faces a significant gap in advisory and analytical capacity, in particular in the areas of peacebuilding, political engagement and security analysis. This initiative is intended to address this challenge by enhancing the analytical capacities of national institutions. It will support government counterparts in designing, implementing and adjusting evidence-based policies and programmes aligned with national peacebuilding priorities. The initiative will build on and institutionalize analytical tools developed under UNTMIS, including the security and conflict analysis framework and the Fragility Index and Maturity Model, with a view to fully transferring knowledge and tools to national partners. Where feasible, technical experts will work side by side with government institutions, with a gradual transition into national structures as capacity and fiscal space allow.

Time frame: 2026–2028 (30 months)

South Sudan – $5,000,000

2026 resources will be allocated as follow-on funding to programmes initiated in 2025, and additionally for the project(s) listed below.

A. Pathways to peace: fostering national reconciliation in South Sudan

Objective: In response to the political context, the project is intended to promote national reconciliation by addressing deep-seated grievances and ethnocentric politics to facilitate a conducive environment for political transition, durable solutions and sustained peace. It will facilitate bottom-up, people-to-people peacebuilding to address the structural causes of conflict rooted in social, economic and regional marginalization and exclusion. The project is intended to transform relationships and foster national accountability.

Time frame: 2026–2027 (24 months)

Eightieth session
Item 137 of the preliminary list*
Proposed programme budget for 2026

Proposed programme budget for 2026

Part II
Political affairs

Section 3
Political affairs

Special political missions

Estimates in respect of special political missions

Summary

The present report is the first addendum to the report of the Secretary-General on the proposed programme budget for 2026 under section 3, Political affairs, and contains information on the overall resource requirements of 37 special political missions authorized by the General Assembly and/or the Security Council. Detailed information in respect of each special political mission is contained in five addenda to section 3, Political affairs (A/80/6 (Sect. 3)/Add.2, A/80/6 (Sect. 3)/Add.3, A/80/6 (Sect. 3)/Add.4, A/80/6 (Sect. 3)/Add.5 and A/80/6 (Sect. 3)/Add.6).

The overall proposed resource requirements of special political missions amount to $639,831,500 (net of staff assessment). The requirements include $2,332,000 to provide for the share of special political missions for the financing of the budget of the Regional Service Centre in Entebbe, Uganda, for the period from 1 July 2025 to 30 June 2026.

I. Introduction

1. The present report contains the overall proposed resource requirements for 37 special political missions for 2026, in connection with the actions taken or expected to be taken by the General Assembly and/or the Security Council on the basis of requests from Member States and/or recommendations of the Secretary-General.

2. Pursuant to General Assembly resolution 77/267 and established practice, the budget requirements of special political missions are presented in thematic clusters, while the requirements of the United Nations Assistance Mission in Afghanistan (UNAMA) and for the liquidation of the United Nations Assistance Mission for Iraq (UNAMI) are presented individually in separate reports. In addition to the present report, further details on the resource requirements of the individual missions are presented in the following reports, each of which constitutes an addendum to section 3, Political affairs, of the proposed programme budget for 2026:

   (a) Thematic cluster I: special and personal envoys, advisers and representatives of the Secretary-General (A/80/6 (Sect. 3)/Add.2);

   (b) Thematic cluster II: sanctions monitoring teams, groups and panels, and other entities and mechanisms (A/80/6 (Sect. 3)/Add.3);

   (c) Thematic cluster III: regional offices, offices in support of political processes and other missions (A/80/6 (Sect. 3)/Add.4);

   (d) UNAMA (A/80/6 (Sect. 3)/Add.5);

   (e) UNAMI (A/80/6 (Sect. 3)/Add.6).

3. Pursuant to paragraph 7 of General Assembly resolution 77/267, in which the Assembly reaffirmed the established budgetary procedures and practices, the reports on the proposed resource requirements for special political missions comprise two parts: (a) the proposed programme plan for 2026 and programme performance in 2024, submitted for consideration by the Assembly; and (b) the proposed post and non-post resource requirements, submitted through the Advisory Committee on Administrative and Budgetary Questions for consideration by the Assembly.

4. The overall proposed resource requirements of the 37 special political missions for 2026 amount to $639,831,500. These resources would be supplemented by projected extrabudgetary resources amounting to $37,700,100, comprising $13,311,400 from voluntary contributions and $24,388,700 from cost-recovery resources.

5. Any adjustments to the resource requirements emanating from additional mandates or changes in mandates will be presented to the General Assembly as additional reports of the Secretary-General on estimates resulting from such mandates or changes of mandates.

6. Given the volatility of the security and operating environments of special political missions, should any changes from such environments significantly alter the planning assumptions and costing parameters applied in the current budget, and if such changes cannot be absorbed from existing resources, the consequent changes to either resource or staffing requirements will be brought to the attention of the General Assembly, as appropriate, in accordance with established practices and procedures, and pursuant to the financial regulations and rules of the United Nations.

A. Status of the extension or renewal of mandates

7. Of the 37 special political missions for which resource requirements are requested by the Secretary-General for 2026, 15 have open-ended mandates, 9 have mandates extended into 2026 or later, 1 has a mandate ending in 2025, 1 has a mandate ending in 2026 and 11 have mandates expiring in 2025 that are expected to be renewed or extended into 2026 or later by the General Assembly or the Security Council, as detailed below:

(a) Special political missions with open-ended mandates:

(i) Office of the Special Adviser to the Secretary-General on Cyprus;

(ii) Office of the Special Adviser to the Secretary-General on the Prevention of Genocide;

(iii) Personal Envoy of the Secretary-General for Western Sahara;

(iv) Office of the Special Envoy of the Secretary-General for the implementation of Security Council resolution 1559 (2004);

(v) United Nations Representative to the Geneva International Discussions;

(vi) Office of the Special Envoy of the Secretary-General for Syria;

(vii) Office of the Special Envoy of the Secretary-General for the Horn of Africa;

(viii) Office of the Special Envoy of the Secretary-General for the Great Lakes Region;

(ix) Office of the Special Envoy of the Secretary-General for Yemen;

(x) Office of the Personal Envoy of the Secretary-General for the Sudan;

(xi) Support to the Security Council Committee established pursuant to resolution 1718 (2006);

(xii) United Nations Regional Centre for Preventive Diplomacy for Central Asia;

(xiii) Office of the Focal Point for Delisting;

(xiv) United Nations support for the Cameroon-Nigeria Mixed Commission;

(xv) Office of the United Nations Special Coordinator for Lebanon;

(b) Special political missions with mandates renewed or extended into 2026 or later:

(i) Panel of Experts on the Sudan;

(ii) Panel of Experts on Libya;

(iii) Analytical Support and Sanctions Monitoring Team pursuant to resolutions 1526 (2004) and 2253 (2015) concerning Islamic State in Iraq and the Levant (ISIL) (Da'esh), Al-Qaida and the Taliban and associated individuals and entities;

(iv) Office of the Ombudsperson established pursuant to Security Council resolution 1904 (2009);

(v) Panel of Experts pursuant to resolution 2713 (2023);

(vi) Support to the Security Council Committee established pursuant to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction;

(vii) United Nations Office for West Africa and the Sahel (UNOWAS);

(viii) United Nations Regional Office for Central Africa (UNOCA);

(ix) UNAMA;

(c) Special political mission with a mandate ending in 2025:

UNAMI;

(d) Special political mission with a mandate ending in 2026:

United Nations Transitional Assistance Mission in Somalia (UNTMIS);

(e) Special political missions with mandates expiring in 2025 that are expected to be renewed or extended into 2026 or later:

(i) Office of the Special Envoy of the Secretary-General on Myanmar;

(ii) Group of Experts on the Democratic Republic of the Congo;

(iii) Panel of Experts pursuant to resolution 2745 (2024);

(iv) Panel of Experts on Yemen;

(v) Panel of Experts on South Sudan;

(vi) Panel of Experts on Haiti;

(vii) Counter-Terrorism Committee Executive Directorate;

(viii) United Nations Support Mission in Libya (UNSMIL);

(ix) United Nations Verification Mission in Colombia;

(x) United Nations Mission to Support the Hudaydah Agreement (UNMHA);

(xi) United Nations Integrated Office in Haiti (BINUH).

B. Discontinuing or discontinued missions

8. The mandate of the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) was terminated effective 3 December 2023 pursuant to Security Council resolution 2715 (2023). UNITAMS completed its drawdown and transition planning in coordination with the United Nations country team during the period from 1 January to 29 February 2024. The administrative liquidation, including the disposal of assets, was carried out from 1 March to 31 December 2024, considering the deteriorating security situation in the Sudan and the challenges posed by an active conflict.

9. The mandate of the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD) expired on 17 September 2024 pursuant to Security Council resolution 2697 (2023). The administrative liquidation of UNITAD, including the disposal of assets, was carried out from 18 September to 31 December 2024.

10. The mandate of the mission for the implementation of Security Council resolution 2231 (2015) will expire on 18 October 2025. The last of the restrictive measures (nuclear-related transfers and activities (through the procurement channel)) established in annex B to resolution 2231 (2015) will expire in October 2025. The phased drawdown will be completed by 1 November 2025. No resource requirements were identified beyond 2025.

11. The mandate of UNAMI will expire on 31 December 2025 pursuant to Security Council resolution 2732 (2024). UNAMI will complete its phased drawdown and the transfer of its mandated activities in accordance with the Secretary-General's transition and liquidation plan (S/2024/966, annex) by 31 December 2025. The administrative liquidation will be completed by the end of September 2026, under the purview of the Department of Operational Support in New York.

12. For the mandate of UNTMIS, the Security Council, in its resolution 2753 (2024), expressed its intention, informed by conditions on the ground, to terminate the mandate at the end of the anticipated two-phased transition by 31 October 2026.

C. Performance information

13. In 2024, special political missions continued to play a vital role in the maintenance of international peace and security by contributing to the prevention and resolution of violent conflict and to peacebuilding in some of the world's most complex contexts. Special political missions undertake a wide spectrum of critical functions, from engaging in preventive diplomacy and supporting the implementation of peace agreements, to assisting Member States in the promotion of human rights, enhancing the meaningful participation of women, and advancing the engagement of youth and other marginalized constituencies in political and peace processes. They also play a key role in

strengthening the partnerships between the United Nations and regional and subregional organizations. Across all these areas, special political missions cooperate closely with United Nations development, human rights and humanitarian entities to implement integrated and effective responses.

14. The various special envoys and advisers appointed by the Secretary-General, presented under thematic cluster I, continued to offer good offices and to facilitate negotiations with a view to brokering peace agreements. Since December 2024, the Special Envoy of the Secretary-General for Syria has concentrated on establishing stable and inclusive transitional arrangements aimed at empowering the Syrian people to begin shaping a path towards restoring a unified Syrian Arab Republic that upholds its sovereignty, independence and territorial integrity and can garner broad international support and engagement. The Special Envoy of the Secretary-General for Yemen engaged with a range of Yemeni stakeholders, with the aim of achieving de-escalation and maintaining the prospects for an inclusive, multitrack political process to end the conflict amid a significantly escalating situation. The Office of the Special Envoy for the Great Lakes Region supported the implementation of the Peace, Security and Cooperation Framework for the Democratic Republic of the Congo and the Region, including through shuttle diplomacy and by providing support to the Regional Oversight Mechanism.

15. The various sanctions monitoring teams, groups and panels, the Ombudsperson and the Focal Point presented under thematic cluster II continued to provide substantive support to the Security Council in the implementation of its respective sanctions regimes. The Panel of Experts established pursuant to Security Council resolution 1874 (2009) ended its work on 30 April 2024, but the Security Council Committee established pursuant to resolution 1718 (2006) continued to oversee the implementation of the sanctions regime concerning the Democratic People's Republic of Korea. By resolution 2769 (2025), the mandate of the Panel of Experts on Libya was renewed until 15 May 2026. In its resolution 2733 (2024), the Council requested the Secretary-General to report on the implementation of the arms embargo on the high seas off the coast of Libya within 6 months and 11 months of the adoption of the resolution. The Secretary-General submitted his first report on 26 November 2024 (S/2024/858) and the second on 25 April 2025 (S/2025/257). By its resolution 2745 (2024), the Council changed the name of the Panel of Experts on the Central African Republic to the Panel of Experts pursuant to resolution 2745 (2024) and decided to lift the arms embargo on the Government of Central African Republic and to continue to apply the arms embargo to armed groups and associated individuals operating in the Central African Republic. In its resolution 2744 (2024), the Council replaced the delisting procedure set out in resolution 1730 (2006) and requested the Secretary-General, in consultation with the Informal Working Group of the Security Council on General Issues of Sanctions, to appoint the Focal Point within three months of the adoption of the resolution, to implement all of the mandates of the original Focal Point established pursuant to resolution 1730 (2006). The Council also expanded the mandate of the original Focal Point to deal with cases of false or mistaken identity or confusion with individuals included on Committee sanctions lists. Included under thematic cluster III, the United Nations Verification Mission in Colombia continued to support the parties that signed the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace to implement that agreement. The Mission accompanied the Government in the formulation of the rapid response plan adopted in October 2024 to accelerate the implementation of the Final Agreement, which includes the establishment of pacts between national and local authorities to accelerate the implementation of the development programmes with a territorial focus and to enhance their transformative potential in conflict-affected regions, as well as actions related to the comprehensive rural reform and security guarantees, among other things. The Mission continued to support the transitional justice system to put innovative measures in place to attain peace, reconciliation and the truth and to protect the lives of former combatants and communities.

16. In Libya, UNSMIL continued efforts to reach an agreement on a constitutional framework that is in accordance with international standards. UNSMIL addressed electoral and governance challenges by facilitating the resolution of the Central Bank of Libya leadership crisis, restoring stability and public confidence and launching a United Nations-facilitated and Libyan-owned multitrack political process. The Mission also continued its engagement with key military and security actors across Libya through a series of dialogues with the 5+5 Joint Military Commission. UNSMIL supported

security sector reform and the ceasefire agreement, including facilitating a code of conduct session to enhance accountability and professionalism in the armed forces. The Mission provided technical assistance to the Presidential Council to finalize a draft law on national reconciliation that would form the basis of a comprehensive and victim-centred transitional justice process.

17. In West Africa and the Sahel, UNOWAS led or supported several initiatives to prevent conflict, defuse election- and transition-related tensions, sustain peace and consolidate peacebuilding efforts. It also used its good offices in support of the conduct of peaceful and inclusive elections in Ghana, Mauritania and Senegal. The Office worked closely with regional and subregional organizations to strengthen peace and security in the region and to safeguard regional integration. Through the signing of memorandums of understanding with the Economic Community of West African States and the Mano River Union, the Office solidified its existing partnerships and supported the evaluation of the Yaoundé Architecture for maritime safety and security in the Gulf of Guinea. In addition, the Office fostered cooperation between coastal States and Sahelian countries, enhancing collaborative efforts to counter the southward spread of terrorism and violent extremism conducive to terrorism.

18. In Haiti, BINUH continued to encourage Haitian political, civil society and economic actors to unite to address the country's political and security crises, and engaged with key stakeholders, underscoring the importance of holding an inclusive and participative constitutional reform process as a critical step to holding general elections. BINUH continued to mentor and advise senior national police commanders on effectively addressing criminal networks and gangs, especially on anti-gang operations and intelligence-gathering. The Office supported the Haitian National Police in developing a road map for the elaboration of a multi-year strategic development plan aimed at strengthening institutional and operational capacities, promoting the rule of law and enhancing security.

19. In Afghanistan, UNAMA continued to maintain regular engagement with the de facto authorities, other national stakeholders and the international community on human rights, rule of law, governance and inclusion issues. Given ongoing restrictions on women's and girls' enjoyment of their rights and amid shrinking civic space, UNAMA continued advocacy with the de facto authorities to reverse their restrictions on women, civil society and media, as well as to engage other national and subnational stakeholders. The Mission supported the second and third United Nations-convened meetings of Special Envoys for Afghanistan in Doha in February and in June–July 2024, with the de facto authorities participating in the latter meeting, and Afghan civil society representatives in dedicated sessions at both meetings. UNAMA subsequently supported the establishment of working groups on the private sector and counter-narcotics as part of confidence-building measures.

D. Operational environment and key policy issues related to special political missions

1. Women and peace and security

20. In line with the commitment of the Secretary-General to advocate for a minimum of one-third participation for women in mediation and peace processes, special political missions continued to advance the full, equal and meaningful participation of women in peace and political processes and support gender-responsive conflict prevention, peacemaking and peacebuilding efforts. Gender advisers and gender focal points working in special political missions provided critical advice and support to the special representatives and special envoys of the Secretary-General in ensuring that a gender perspective that addresses multidimensional risks is incorporated into the political work of the United Nations.

21. On 24 October 2024, the Secretary-General launched "Common Pledge for Women's Full, Equal and Meaningful Participation in Peace Processes" to galvanize mediation actors in overcoming barriers to women's participation in mediation and peace processes. As of March 2025, the Common Pledge has been adopted by 30 Member States, regional and subregional organizations and mediation

actors, which have committed to joining the United Nations in taking concrete steps on women's full, equal and meaningful participation in all peace processes of which they are a part. Special political missions continued efforts to identify opportunities to push forward women's participation in mediation and peace processes. In January 2025, the Office of the Personal Envoy of the Secretary-General for the Sudan conducted a virtual consultation meeting that brought together Sudanese civilians, including women's groups and youth organizations. These consultations were aimed at gathering insights, concerns and recommendations from Sudanese citizens regarding the ongoing crisis, specifically focusing on the protection of civilians, humanitarian aid and the cessation of hostilities. By fostering dialogue among diverse stakeholders, the initiative contributed to shaping a more inclusive peace process led by the Personal Envoy that genuinely reflects the needs and aspirations of women and affected communities in the Sudan.

22. In Gabon, ahead of the constitutional referendum in November 2024, UNOCA supported a project on women's political participation. The project resulted in a road map calling for revisions of Gabonese association laws, the institutionalization of parity over existing quota laws and the inclusion of vulnerable groups in all public policies. In September 2024, the Office of the Special Envoy of the Secretary-General on Myanmar, together with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), supported a mission of 12 Myanmar women representatives to United Nations Headquarters during the high-level general debate of the General Assembly. The visit enabled them to share their priorities and concerns and their advocacy with United Nations bodies and the international community. As a result of the support, the women leaders, who represented various ethnic groups in Myanmar, were able to agree on common advocacy messages.

23. In Yemen, UNMHA leveraged quick-impact projects to enhance its engagement with the parties to the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif, and Ra's Isa and focused, among other things, on thematic areas relating to women and income generation. The projects provide an invaluable tool to strengthen local participation in the implementation of the Hudaydah Agreement, inclusivity and women's empowerment.

2. Youth and peace and security

24. On the tenth anniversary of the adoption of Security Council resolution 2250 (2015), the meaningful participation of young people in peace and security initiatives remains challenging despite progress in the institutionalization of the youth and peace and security agenda. In April and May 2024, the Council held two meetings on the maintenance of international peace and security with a focus on the role of young people. Council members reiterated that violence and conflict continued to disproportionately affect young people, and they highlighted that young people remained agents of positive change and stressed that their needs, aspirations and voices must be included in decision-making.

25. Special political missions continued to support the meaningful participation of young people in political and peace processes and to strengthen their engagement with young women and men to harness their potential as agents of peaceful change. In Colombia, the Verification Mission provided training on gender-responsive conflict resolution to young people and security forces, promoting youth-inclusive territorial development. Similarly, UNSMIL organized the Ra'idat programme, which provided training in communication, leadership and teamwork to 30 young women to facilitate their participation in political initiatives. In addition, the Mission launched its new youth strategy, YouEngage, and held 22 workshops with 587 young people (295 female and 292 male) from across the country.

26. Special political missions are increasingly supporting youth engagement in environmental peacebuilding initiatives. In Cyprus, the Office of the Special Adviser to the Secretary-General convened working groups on environmental peacebuilding and on business, innovation and entrepreneurship. In addition, the Office supported the 2024 Local Conference of Youth in Nicosia in August 2024 to prepare youth contributions to the twenty-ninth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change. In Iraq, UNAMI fostered

collaboration between young people and the Government through consultations, resulting in policy papers addressing climate change as well as key social and political issues affecting young people.

3. Safety and security

27. Most special political missions continue to operate in complex, highly volatile and unpredictable security environments. These missions carry out their mandates while managing risks linked to high-intensity military conflicts with significant activity, terrorism, insurgencies and social unrest, among other things. Even in countries where the overall security situation appears stable, specific areas where special political missions operate or deploy may still pose serious safety and security threats.

28. Mission personnel are at considerable risk of becoming collateral targets, while assets and premises remain vulnerable to security threats. For instance, personnel of UNMHA and the Office of the Special Envoy of the Secretary-General for Yemen are present in areas with high kinetic military activity, whereas BINUH operates in an extremely volatile environment marked by rampant armed gang violence, which often overwhelms local security forces. The missions currently in a transition process, UNAMI and UNTMIS, need to carefully consider the safety and security of their personnel and operations throughout these processes.

29. The factors listed above directly test the ability of special political missions to remain operational and fulfil their mandates. To function effectively in such highly insecure environments, special political missions have adopted robust security measures, refined through ongoing risk management processes. Continuous risk assessment, along with proactive mitigation measures, is essential, including through deploying United Nations-armed civilian security personnel, guard units contributed by Member States and, where necessary, engaging armed private security companies as well as a continuous assessment of the footprint.

30. While host Governments bear primary responsibility for the security of mission personnel, some lack the capacity to provide adequate protection. To address this, the Department of Political and Peacebuilding Affairs and the missions' leadership work closely with the Department of Safety and Security and other entities to refine risk management strategies, ensuring minimal disruption to mandate implementation, including for expert panels supporting Security Council committees during their field visits.

4. Electoral assistance

31. During the reporting period, special political missions continued to provide electoral assistance to Member States, where mandated or requested to do so. In her capacity as the focal point mandated by the General Assembly for electoral assistance matters, the Under-Secretary-General for Political and Peacebuilding Affairs receives requests for electoral assistance aimed at supporting and strengthening the existing capacities of national electoral institutions. United Nations technical assistance and capacity-building activities were provided in an integrated manner and, in many cases, alongside preventive diplomacy and other conflict prevention activities, to foster consensus in establishing electoral legal frameworks, focusing on inclusion and non-discrimination, and encouraging broad participation. Special political missions that have electoral mandates continued to ensure that all electoral assistance policies, projects and activities take into consideration the key guiding principles of respect for sovereignty, national ownership and sustainability and promote the political participation of women, young people, persons with disabilities and other marginalized groups.

32. In Somalia, UNTMIS provided technical advice on the electoral legal framework, including the National Independent Electoral and Boundaries Commission Bill, the National Electoral Bill and the Political Associations and Parties Bill, to the Ministry of the Interior, Federal Affairs and Reconciliation and the Federal Parliament in preparation for the 2026 federal parliamentary elections and the 2025 local district and federal member State presidential and parliamentary elections. The Mission conducted a series of training sessions in the federal member States on temporary special measures and electoral systems for civil society organization leaders. UNTMIS started to provide

technical assistance to the newly established National Independent Electoral and Boundaries Commission.

33. In Libya, UNSMIL provided technical advice and assistance to the High National Elections Commission in preparing for national and local elections. This support, provided in close collaboration with the United Nations Development Programme, included support in the areas of institutional capacity-building, legal advice on the electoral framework, the development of national voter registers, public outreach, electoral operations (including electoral procurement and logistics), the participation of women, young people and persons with disabilities, civic and voter education, and the coordination of international electoral assistance.

34. In Iraq, the Independent High Electoral Commission, with the support of UNAMI, prepared for and organized the sixth Kurdistan Region parliamentary election, held on 20 October 2024. The vote, originally due in 2022, had been postponed several times due to political disagreements over the electoral system. UNAMI provided high-level policy advice and technical assistance to the Commission in developing the operational, logistics and security plan, finalizing the electoral regulations and procedures, recruiting and training staff and enhancing systems for the voter registry and election results management. UNAMI also supported the Commission in launching an outreach campaign, using both traditional and social media channels, to educate and motivate voters to exercise their right to vote. Following the elections, UNAMI worked with the Commission to review the processes and harness lessons and recommendations for future elections. UNAMI continued to provide support to the Commission in preparing for the federal legislative elections, including in the areas of overall election management, planning, operations and logistics, information technology, training and procedures, legal frameworks, election security, the political participation of women, public outreach and communications. In line with Security Council resolution 2732 (2024), an electoral needs assessment mission was deployed to Baghdad and Erbil in September 2024. The assessment focused on the electoral environment and the capacity and needs of the various election stakeholders, with a view to informing the UNAMI transition plan and recommending the parameters and modalities of the provision of United Nations electoral assistance for the Council of Representatives election, expected in November 2025.

E. Evaluation activities

35. The Department of Political and Peacebuilding Affairs continued to support evaluations and audits by oversight entities such as the Office of Internal Oversight Services (OIOS), while also conducting its own evaluations. When relevant, the key findings and lessons learned from these evaluations are communicated to special political missions to inform their mandate implementation.

36. The Department is also supporting the biennial assessment by OIOS, initiated in 2024 and expected to be completed in mid-2025, on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives. In 2024, the Department supported the evaluation by OIOS of cluster I country-specific special political missions (special and personal envoys, advisers and representatives of the Secretary-General), which is currently being finalized. Mission-specific evaluation activities are described, as applicable, under the specific missions in the relevant reports.

F. Lessons learned from the closure of missions and transition planning

37. In 2024, lessons learned from closed operations were integrated into the closure and transition planning processes of special political missions in Iraq (UNAMI and UNITAD), Somalia (UNSOM/UNTMIS) and the Sudan (UNITAMS).

38. By its resolution 2732 (2024), the Security Council decided to extend the mandate of UNAMI for a final 19-month period until 31 December 2025 and requested the Secretary-General to prepare, in consultation with the Government of Iraq, a transition and liquidation plan to be completed by

31 December 2024, for UNAMI to start the transfer of its tasks, as well as the orderly and safe drawdown and withdrawal of its personnel and assets, including identification of an end date for liquidation activities in Iraq.

39. In line with resolution 2732 (2024), the Department of Political and Peacebuilding Affairs led an integrated working group to provide coherent and strategic direction and coordinate with UNAMI on the transition planning process. In parallel, the Mission established an integrated task force enabling the United Nations country team and the Mission to work closely on transition planning. UNAMI undertook a mapping exercise of its activities to plan for their gradual transfer, where applicable, to other United Nations entities and partners, and supported three integrated assessments on key transition issues. In the context of the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA), the Deputy Special Representative of the Secretary-General (Resident Coordinator/Humanitarian Coordinator) served as the Head of Entity from 1 January to 19 August 2024, as a key liaison officer with the Transition Government of Mali, the United Nations country team and regional organizations. Learning from the importance of supporting effective transitions from the closing mission to the resident coordinator, the Resident Coordinator/Humanitarian Coordinator (Assistant Secretary-General) will become the highest-ranking United Nations representative in Iraq and will assume the functions of the Head of Entity. As Head of the Entity for the period 1 January to 31 May 2026 the Resident Coordinator/Humanitarian Coordinator will lead the overall governance, coordination and maintenance of communication with the relevant authorities. Concurrently, the country team has taken steps to enable the integration of relevant mandated UNAMI tasks into the forthcoming United Nations Sustainable Development Cooperation Framework for Iraq for 2025–2029, a key step of continued support for sustaining peace priorities.

40. These efforts informed the United Nations consultations with the Government of Iraq, including meetings between UNAMI and the Government's committee on transition issues, throughout the development of the transition and liquidation plan. In a letter to the Security Council dated 24 December 2024 (S/2024/966), the Secretary-General presented the transition and liquidation plan for UNAMI, which was prepared in consultation with the Government of Iraq.

41. The plan detailed three strategic priorities to guide efforts by the United Nations in 2025 as it phases out UNAMI by 31 December 2025 and reconfigures the United Nations presence after the departure of the Mission. The first focused on the implementation of the Mission's streamlined substantive mandate, concurrently with the transition and drawdown, in the areas of electoral assistance, including support for the participation of women, facilitation of progress on outstanding issues between Iraq and Kuwait, facilitation of development and humanitarian tasks and the promotion of accountability and protection of human rights. Second, the plan described efforts to preserve gains and sustain continued United Nations support for the Government of Iraq. Finally, it mapped out key considerations to ensure the safe and gradual drawdown of UNAMI by 31 December 2025. These individual elements are based on best practices from past transitions to make continued progress during the Mission's final year and ensure that the United Nations country team is best positioned to continue to support the Government and people of Iraq in building a peaceful, democratic and prosperous State.

42. The Department of Operational Support commenced its engagement for the closure of UNAMI, and experts from the Department visited UNAMI to review initial planning and provide a briefing on support for mission closures. This was followed by a visit from a team from the United Nations Logistics Base at Brindisi, Italy (UNLB), to review property management issues and to conclude a service level agreement governing UNLB support for UNAMI. The regular engagement aimed at ensuring support is maintained throughout the process. This practice enables the Department to both provide advice and support to the closing mission and ensure familiarity with the issues and plans for liquidation prior to the Department's assumption of oversight of the liquidation entity with effect from 1 January 2026. The engagement with UNAMI will continue throughout the drawdown process and intensify once the Mission approaches the end of its mandate and enters the liquidation period. Based on lessons learned from previous closures, the Department will need to provide temporary surge capacity to support the closure process and make preparations for the transfer of residual

liquidation issues not completed by 30 September 2026 to Headquarters, UNLB and the Regional Service Centre in Entebbe, Uganda (RSCE). The Department of Management Strategy, Policy and Compliance will coordinate the preparation and finalization of financial and budget performance reporting.

43. Following the adoption of resolution 2753 (2024), the United Nations and the Federal Government of Somalia discussed the UNSOM/UNTMIS transition in a Joint Technical Committee comprising the Federal Government and United Nations representatives at the senior level – a best practice from past transitions. The Joint Technical Committee met on several occasions to advance the transition planning process and oversee the development of a transition road map. In January 2025, the Committee organized a workshop in Mogadishu, bringing together stakeholders representing the Federal Government of Somalia, UNTMIS and the United Nations country team to discuss modalities for implementing the first phase of the transition process. Based on the Committee's discussions and the contributions made through the workshop, the United Nations and the Federal Government of Somalia jointly developed a transition road map (see S/2025/194, annex). The United Nations also conducted a country team capacity mapping exercise and an operational dependencies analysis to inform planning for the post-UNTMIS configuration of the United Nations presence in Somalia, ensuring alignment with the country's national transformation plan.

44. The road map details specific actions and the desired end-state for the first phase of the transition, from November 2024 to October 2025, focusing on supporting Somali national priorities. It sets out key principles to be followed based on lessons from past transitions, as indicated in resolution 2594 (2021). Implementation of the UNSOM/UNTMIS transition will be based on a One United Nations approach, emphasizing partnerships, capacity-building and complementarity, supporting progress towards the 2030 Agenda for Sustainable Development and the Sustainable Development Goals. Joint programming has also been instrumental in bringing various United Nations actors and resourcing together behind Somali national priorities and will continue to be utilized to foster focus and collaboration in United Nations support to Somalia. Furthermore, joint resource mobilization opportunities for the United Nations and the Federal Government of Somalia will be explored to engage donors and partners.

45. According to the road map, the transition will also be implemented in a human-rights, gender-inclusive and gender-responsive manner, ensuring that human rights are promoted and protected through the transition of UNTMIS tasks and that the role of women in Somali peace, security, socioeconomic and development discussions is mainstreamed into transition planning. The transition will also be informed by a risk analysis of its impact and consequences.

46. Given the unique circumstances surrounding the closure of UNITAMS, which included the rapidly deteriorating security situation in the Sudan and the challenges posed by an active conflict, the process of property disposal within UNITAMS had to be adapted to address the region's complex operational realities. The Mission collaborated extensively with Headquarters to ensure consistency and alignment with United Nations policies and practices on the disposal of assets, including in addressing the remote handover of leased properties, and disposal methods for looted and inaccessible property. The Mission also engaged with the Government of the Sudan on key issues such as adherence to the status-of-mission agreement, security concerns across various locations in the Sudan and the inability to guarantee environmental clean-up in some operational areas due to the ongoing instability. These challenges significantly influenced the approach adopted for the disposal of property.

47. The disposal of United Nations-owned equipment in the Sudan was particularly affected by the region's distinct operational constraints. Shipping the equipment to UNLB or other missions was hindered by difficulties in obtaining export clearances, the prohibitive costs associated with shipment for certain items and the lengthy export procedure, which was not commensurate with the Mission's drawdown timeline. In areas where physical access for verification was blocked due to conflict or where property had been looted, items were written off as losses due to hostile action.

48. In the case of UNITAD, asset disposal was facilitated by UNAMI, which played a crucial role in facilitating a smooth drawdown and closure process, including facilities management, logistics and property disposal. UNAMI support to close UNITAD was critical given that the Government of Iraq had requested that the UNITAD headquarters in Baghdad be vacated within two weeks of the end of its mandate. Much of the Investigative Team's property was transferred and absorbed into the UNAMI operational pool due to the Team's close operational relationship with UNAMI throughout its mandate. This collaboration supported the transfer of property, records and evidence, while maintaining accountability, preserving institutional memory and minimizing waste.

G. Reporting requirements related to special political missions emanating from the General Assembly and from the recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

1. Contribution of extrabudgetary resources to mandate implementation in special political missions

49. Extrabudgetary resources, in particular voluntary contributions, continue to be used for bolstering backstopping, surge requirements for good offices, crisis situations and other activities related to the mandates of special political missions. Such resources have also been critical for support for inter-mission activities and for visits by desk officers and senior officials to missions.

50. Voluntary contributions have been important in enabling special political missions to implement targeted projects in pursuit of the implementation of their mandates. In the Great Lakes region, the Office of the Special Envoy of the Secretary-General utilizes extrabudgetary resources to support the implementation of the Peace, Security and Cooperation Framework through various projects under different thematic areas, including the reduction of small arms circulation in the region. The Office of the Special Envoy of the Secretary-General for Yemen utilizes extrabudgetary resources to support the Special Envoy's efforts to reach sustainable and inclusive agreements to end the conflict in the country. UNOWAS utilizes extrabudgetary resources to support activities to promote peace and stability in West Africa, including to build synergies around climate security and exploit opportunities for dialogue. The United Nations Regional Centre for Preventive Diplomacy in Central Asia utilizes extrabudgetary resources to support the Central Asian Women Leaders' Caucus in providing influential leadership on women's engagement in the countries of the region, as well as activities under the Preventive Diplomacy Academy project, and the Centre's strategy in support of water, energy and environmental and climate cooperation in the region for the period 2026–2030. United Nations support for the Cameroon-Nigeria Mixed Commission continues to utilize extrabudgetary resources to support land boundary demarcation and to implement socioeconomic projects for the benefit of populations in the vicinity of the demarcation exercise.

51. In addition, voluntary contributions fund specific mission initiatives. The Office of the Special Envoy of the Secretary-General for Syria utilized extrabudgetary resources in its role of facilitating the Constitutional Committee through the provision of substantive, logistical, security and support arrangements, including liaison with interlocutors of the Government of the Syrian Arab Republic and the opposition and with civil society, including women's groups and regional and international stakeholders. The mission in support of the Security Council Committee established pursuant to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction has used funds to facilitate the participation of Member States in events relating to the resolution and country-specific activities. Furthermore, the Counter-Terrorism Committee Executive Directorate uses funds to organize meetings in accordance with the programme of work approved by the Committee and support international cooperation in counter-terrorism, particularly a project on forensics and biometrics in Africa.

52. Voluntary contributions also bolster backstopping capacity at Headquarters, including by funding regular visits to the field, thereby enabling the development of closer collaboration with missions.

Such visits have facilitated a better understanding and analysis of the context in which missions are operating and how they can be better supported to implement their mandates.

53. In addition, cost-recovery revenue in some missions, such as UNAMA, enabled them to provide shared common services to other agencies, funds and programmes in the same location, to benefit from economies of scale. This is in line with the direction to consolidate support services at the country level and the requirement for integrated support across the United Nations system for the 2030 Agenda. Cost recovery is governed by rule 105.11 of the Financial Regulations and Rules of the United Nations, in addition to policy guidance issued by the Controller.

54. Extrabudgetary resources (including both voluntary contributions and cost-recovery revenue) are estimated at $37.7 million for 2026, compared with an estimated $50.7 million in 2025. The projected decrease of $13.0 million is attributable to the phased drawdown and liquidation of UNAMI, the anticipated conclusion or non-extension of some projects or activities in other missions and lower contributions for 2026 based on current projections. Extrabudgetary resources have been important in enabling special political missions to implement targeted projects in pursuit of their mandates. However, while missions continue to engage actively in fundraising activities, it remains a challenge to secure funding or pledges for 2026 sufficiently in advance to enable projections to be made with greater certainty.

2. Regional Service Centre in Entebbe, Uganda

55. Established in July 2010, RSCE currently supports five peacekeeping missions[1] and the United Nations Support Office in Somalia (UNSOS), nine special political missions and the United Nations Office to the African Union, as well as itself. The nine Africa-based special political missions that will receive support from RSCE in 2026 are: the Office of the Special Envoy of the Secretary-General for the Horn of Africa, the Office of the Special Envoy of the Secretary-General for the Great Lakes Region, the Panel of Experts pursuant to resolution 2713 (2023), UNOWAS, UNTMIS, United Nations support for the Cameroon-Nigeria Mixed Commission, UNOCA, UNSMIL and the Office of the Personal Envoy of the Secretary-General for the Sudan.

56. The 16 clients of the Centre receive the full range of non-location-dependent services, such as invoice processing, financial services for year-end closing, payroll processing, education grant processing, human resources transactional services and travel management and processing, as well as functions such as the primary regional solution for supply chain management and information and communications technology (ICT) services. These 16 clients manage annual budgets amounting to a total of approximately $4.5 billion, making the services of the Centre an essential part of their support operations. RSCE will also carry out residual liquidation functions, such as those for UNITAMS, the United Nations Integrated Peacebuilding Office in Guinea-Bissau (UNIOGBIS), the Office of the Special Envoy of the Secretary-General for Burundi and MINUSMA, the mandates of which expired in prior periods, with some administrative support requirements remaining.

57. The proposed budget for RSCE for the 2025/26 period (see A/79/751) is currently under consideration by the General Assembly at the second part of its resumed seventy-ninth session. In that budget, resources in the amount of $46,333,500 are proposed by the Secretary-General for the maintenance of the Centre for the period from 1 July 2025 to 30 June 2026, to be apportioned on a pro rata basis among the budgets of the Centre's active client peacekeeping operations, as well as special political missions financed under section 3, Political affairs, of the regular budget. Towards this end, an amount of $2,332,000 has been included in the proposed programme budget for 2026, representing the share of special political missions. This provision will be subject to a final adjustment to be made in accordance with the decision to be taken by the Assembly in the context of the budget of RSCE for the 2025/26 period, which is expected by the end of June 2025.

[1] United Nations Mission for the Referendum in Western Sahara, United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, United Nations Organization Stabilization Mission in the Democratic Republic of the Congo, United Nations Interim Security Force for Abyei and United Nations Mission in South Sudan.

58. In view of the evolving landscape of peacekeeping operations, the Advisory Committee on Administrative and Budgetary Questions emphasized the need to review the role of RSCE within the comprehensive context of the global support architecture, with a view to potentially providing additional services to other entities, as well as developing broader cooperation with regional organizations, such as the African Union (see A/78/744/Add.6, para. 12). The recommendation was endorsed by the General Assembly in its resolution 78/294.

59. To this end, to fully utilize, as needed or upon request, all RSCE capabilities to provide more efficient and effective services, as further detailed in paragraph 68 below, it is the intention of the Secretariat to propose the transfer of the current client missions of the Kuwait Joint Support Office to the Centre. This transition will be completed by the end of the UNAMI liquidation process at the end of September 2026. The transfer of functions to RSCE will align with the mandate of the Department of Operational Support in line with General Assembly resolution 72/266 B and provide the ability to provide the full suite of transactional services to peace operations on a global basis.

60. Resources deemed necessary to accommodate the expanded client base of RSCE will be presented to the General Assembly in the context of the proposed budget for 2026/27 for consideration and approval by Member States. In line with current budgetary practice, financing will continue to be provided through proportional cost-sharing among the missions served.

3. Kuwait Joint Support Office

61. In its resolution 65/259, the General Assembly noted the intention of the Secretary-General to establish a support office in Kuwait for UNAMA and requested him to explore possibilities for cost-sharing between UNAMA and UNAMI. Following a period of assessment, in October 2012 the Secretary-General informed the Assembly that the Kuwait Office would include a Kuwait Joint Support Office, which would integrate UNAMA and UNAMI functions in the areas of finance and human resources (see A/67/346/Add.4). The Kuwait Joint Support Office was launched in December 2012 as the back office to provide mission support services on a shared basis to UNAMA and UNAMI.

62. The client base of the Kuwait Joint Support Office has gradually increased over time. It currently supports 7 field missions[2] with transactional services related to finance and human resources, while 10 other field missions[3] receive more limited dedicated support only for education grant and payroll processing requirements.

63. The Kuwait Joint Support Office functions without an independent staffing structure or annual budget. Currently, funding for its staffing costs comes from 7 of its 17 client missions, comprising peacekeeping and special political missions, with UNAMA and UNAMI providing 87 per cent of the Office's staffing resources. These posts remain on the staffing table of the respective client missions, while operationally they are deployed to the Office and work under the supervision of the chief of the Office.

64. Since its establishment as an inter-mission cooperation arrangement, the Kuwait Joint Support Office has evolved to become a service provider to peace operations, ensuring cost efficiency, effectiveness in service provision as well as operational continuity in support of peace operations. The Office generates significant cost avoidance, estimated at $4.2 million annually, and approximately $40.7 million since its establishment in 2012.

[2] UNAMA, UNAMI, BINUH, Office of the Special Envoy of the Secretary-General for Syria, Office of the Special Envoy of the Secretary-General for Yemen, United Nations Regional Centre for Preventive Diplomacy for Central Asia and UNMHA.

[3] United Nations Interim Force in Lebanon, United Nations Disengagement Observer Force, UNLB, United Nations Interim Administration Mission in Kosovo, United Nations Peacekeeping Force in Cyprus, United Nations Truce Supervision Organization, United Nations Military Observer Group in India and Pakistan, Office of the United Nations Special Coordinator for the Middle East Peace Process, Office of the United Nations Special Coordinator for Lebanon and United Nations Verification Mission in Colombia.

65. As a back office for the various clients, due to economies of scale, the Kuwait Joint Support Office supported mandated peace operations outside Africa, thereby filling a critical operational gap in the service provision architecture. In this context, the Office currently supports 17 missions outside Africa. It offers a service model tailored to the needs of its client missions and enjoys high client satisfaction rates for its services.

66. Over its lifetime, the Kuwait Joint Support Office has successfully demonstrated the efficiency, effectiveness, emergency response capacities and operational resilience of a shared services model. It has generated a critical knowledge base and talent pool that will be valuable as the Secretariat continues to refine its global operational support architecture.

67. In view of the drawdown and liquidation of UNAMI, the Department of Operational Support conducted a review of the Kuwait Joint Support Office that focused on ensuring that the 16 peace operations (excluding UNAMI) that are currently supported by the Office could continue to receive shared services with efficiency, interoperability, responsiveness and operational continuity with the termination of the mandate of UNAMI at the end of 2025.

68. In line with the recommendation of the Advisory Committee on Administrative and Budgetary Questions, endorsed by the General Assembly in its resolution 78/294, to review the role of RSCE within the comprehensive context of the global support architecture, the Secretariat intends to transfer the 16 client missions currently supported by the Kuwait Joint Support Office to RSCE.

69. Upon review by the Advisory Committee and approval by Member States, the transfer would establish a more integrated support model, consolidating the provision of transactional services for peacekeeping and special political missions within a single service provider, in line with the global mandate of the Department of Operational Support and RSCE. If approved, the formal transition would become effective from 1 July 2026, with a transition period up to 30 September 2026.

70. The transition of the Kuwait Joint Support Office's 16 client missions to a new service provider is a complex, multifaceted process requiring extensive planning, coordination and execution involving several stakeholders. To enable a seamless and fully supported transition, it is essential to maintain the full scope of the Office's operations to ensure sufficient capacity to prepare for and implement the transition, aligned with the projected timeline for the complete liquidation of UNAMI.

71. Accordingly, it is proposed that funding for the 64 posts currently contributed by UNAMI, UNAMA and BINUH, along with operational costs jointly contributed by 10 special political missions,[4] will be maintained until 30 September 2026 in the proposed budget for 2026. The proposed budgets for these three entities for 2026 reflect the proposed abolishment of the 64 posts as from 1 October 2026.

72. As mentioned in paragraph 60 above, the related resources for RSCE will be included in the proposed budget for the Centre for 2026/27. Adjustments will also be proposed for the five peacekeeping entities[5] that currently provide staff resources to the Kuwait Joint Support Office, to reflect the discontinuation of such resources in the proposed budgets for the respective entities for 2026/27.

4. Promoting national capacities

73. Encouraging the use of national capacities has been a core area of focus in human resources management in special political missions. In line with the request of the General Assembly in its resolutions 61/276 and 66/264 for greater utilization of national staff, and through the guidance

[4] UNAMI, UNAMA, BINUH, United Nations Regional Centre for Preventive Diplomacy for Central Asia, UNMHA, Office of the Special Envoy of the Secretary-General for Syria, Office of the Special Envoy of the Secretary-General for Yemen, Office of the United Nations Special Coordinator for the Middle East Peace Process, Office of the United Nations Special Coordinator for Lebanon and United Nations Verification Mission in Colombia.

[5] United Nations Interim Force in Lebanon, United Nations Disengagement Observer Force, UNLB, United Nations Interim Administration Mission in Kosovo and United Nations Peacekeeping Force in Cyprus.

provided in the workforce planning nationalization guide[6] issued in December 2021, special political missions reviewed their staffing requirements prior to the submission of the budget to determine the feasibility of nationalization, commensurate with the requirements of the missions and their respective mandates.

74. According to the workforce planning nationalization guide, when identifying opportunities for nationalization, special political missions use the following criteria: (a) identification of vacant international posts and positions, including United Nations Volunteer positions, which could be considered for conversion to national posts or positions; (b) in the case of any changes in mandate, determination of whether the function remains necessary to meet the objectives of the mission and maintain the international character of the operation; (c) assessment of whether there might be a perception of conflict of interest for the function; (d) determination of whether the function requires regular movement across international borders or lines of conflict; (e) determination of whether the function has security-related requirements that prohibit specific categories of staff; and (f) determination of the availability of talent in the local labour market, including the required knowledge and skills. The rate of nationalization is therefore dynamic and can be affected if there is a lack of qualifications in the local labour market, which tends to occur in conflict-affected areas where the local education system and pool of qualified candidates may have been disrupted.

75. The conditions and criteria for nationalization outlined above are further assessed against each mission's operational context. Missions were encouraged to ensure that national staff are empowered and skilled to carry out the implementation of the mandate while ensuring that the international character of the mission is maintained.

76. In recent years, special political missions have made steady progress in the nationalization of posts.[7] For 2026, it is proposed that one post be nationalized in the Office of the Special Envoy of the Secretary-General for Yemen, two additional national posts be established in the Office of the United Nations Special Coordinator for Lebanon and nine national United Nations Volunteers be converted from extrabudgetary resources in UNAMA, as indicated in table 1.

Table 1
Proposed nationalization of functions and additional national posts for 2026

Mission	*Number*	*Original functional title of post*	*Proposed functional title of post*
Office of the Special Envoy of the Secretary-General for Yemen	1	Procurement Assistant (Field Service)	Procurement Assistant (Local level)
Office of the United Nations Special Coordinator for Lebanon	1	–	Field Language Assistant (Local level) (new)
Office of the United Nations Special Coordinator for Lebanon	1	–	Public Information Assistant (Local level) (new)
UNAMA	9	National United Nations Volunteer positions (from extrabudgetary resources)	National United Nations Volunteer positions (conversion to regular budget funding)

5. Gender parity and geographical representation

77. The Organization remains committed to achieving gender parity, guided by the principles of merit and fairness in all selection processes. Efforts are ongoing to advance gender parity, with a renewed focus on strengthening recruitment, particularly through a proactive outreach, among other efforts.

[6] In December 2021, the Department of Operational Support issued a guide on planning for the nationalization of the workforce. The guide provides practical information for conducting nationalization in the context of operational workforce planning at the entity level and is aimed at setting consistent standards and approaches on nationalization across entities.

[7] A total of 12 posts were nationalized in 2016, 1 in 2017, 2 in 2018, 5 in 2019, 7 in 2020, 4 in 2021, 19 in 2022, 9 in 2023, 5 in 2024 and 7 in 2025.

While financial constraints have led to temporary freezes on recruitment, the Organization remains committed to continuing existing efforts and expanding targeted engagement, especially for field-based roles in special political missions. Outreach strategies are being refined to maintain momentum and ensure a steady pipeline of diverse talent.

78. Improving living and working conditions in field duty stations continues to be a critical priority for the recruitment and retention of women. The Organization remains committed to applying the six thematic areas of the Field-specific Enabling Environment Guidelines for the United Nations System to further strengthen recruitment and retention in these settings. Addressing the organizational culture is crucial to achieving lasting progress. The results of the 2024 staff engagement survey present an opportunity to deliberately identify and address persistent gaps. These insights will guide continued efforts to build respectful and supportive workplaces across all duty stations. Also critical are ongoing efforts to address the mental health and well-being of all staff, with particular attention to those serving in hardship duty stations, who often face heightened stressors and unique challenges.

79. Missions also seek to integrate a gender perspective into their operational activities, deliverables and results. To diversify the geographical and gender composition of sanctions monitoring teams, groups and panels, the Department of Political and Peacebuilding Affairs participated, in October 2024, alongside other Secretariat entities, in the Impactpool virtual career fair for women in senior roles, hosted by a career web platform specializing in humanitarian and international jobs. A total of 2,343 women registered for the career fair, of whom 459 (from countries across all regional groups) visited the Secretariat's virtual booth containing presentations, fact sheets, videos and information on job openings for sanctions experts. In addition, in May and June 2024, the Department gave briefings to representatives of the Group of African States, the Group of Arab States, the Group of Eastern European States and the Group of Latin American and the Caribbean States on the recruitment process for members of sanctions monitoring teams, groups and panels.

80. In its engagement with the de facto authorities and political stakeholders in Afghanistan, UNAMA promotes gender mainstreaming into programmes and structures to strengthen the representation of women. The Mission supports the implementation of Security Council resolutions 1325 (2000) and 2493 (2019), in particular with regard to gender equality, the empowerment of women and girls and their human rights. In view of the low percentage of female national staff within the Mission, UNAMA is continuously making efforts to address challenges that prevent the attainment of gender parity through capacity-building for women. National United Nations Volunteers play a critical role in the Mission's activities in both substantive and mission-support sections and are essential for achieving and maintaining the UNAMA mandate, including by integrating Afghan women's perspectives into all areas of work and enhancing the Mission's capacity to reach local communities and the most vulnerable groups. In line with efforts to continue to improve the gender balance in the Mission's staffing, and taking into account the prospects of shrinking extrabudgetary resources, it is proposed that the existing nine female national United Nations Volunteer positions currently funded from extrabudgetary resources be converted to regular budget funding in 2026, to continue to support programmes of work of components across the Mission. The conversion provides some element of assured continuity in this flagship initiative, which supports the advancement of women's involvement in society as well as UNAMA gender parity efforts to employ and empower young professional Afghan women who would otherwise be struggling to find a professional purpose in their lives after graduation.

81. The Secretariat remains committed to accelerating progress towards equitable geographical distribution in posts subject to geographical distribution and to promoting as wide a geographical basis as possible in the recruitment of staff for non-geographical posts, including those in special political missions and peacekeeping operations. Achieving equitable geographical distribution and greater geographical representation requires sustained and deliberate action, particularly in light of systemic challenges and legacy recruitment patterns. As highlighted in the report of the Secretary-General on ways forward in the implementation of human resources management reforms for the period 2023–2026 (A/77/590), financial constraints and structural issues in the staff selection system continue to hinder faster progress towards the equitable geographical distribution goal.

82. In response, the Secretariat is reforming its staff selection framework. The implementation of the staff selection 2.0 initiative is well under way, aimed at fostering a fair, efficient, effective and agile recruitment system. The initiative is expected to significantly enhance the Secretariat's ability to attract and select staff from a wide geographical base. Concurrently, the Secretariat has recalibrated its talent attraction approaches, including through the development of purposeful partnerships with Member States. These efforts are aimed at positioning the United Nations as an employer of choice and at cultivating diverse talent pipelines to meet both current and future workforce needs. This forward-looking approach is designed to ensure a continuous flow of qualified candidates and to strengthen workforce readiness. While substantive change will require time, incremental progress is anticipated in the short to medium term. The Secretariat underscores the importance of adequate resources to sustain and scale talent outreach initiatives. Additional investments would enhance the Secretariat's capacity to engage meaningfully with Member States and to implement outreach activities in support of equitable geographical distribution.

83. To deliver the mandates of special political missions in changing operational environments, including by leveraging data, technology and innovation, a set of workforce capabilities will be reinforced over the coming years. For example, building data expertise, innovation capacity, digital dexterity and strategic foresight and leveraging behavioural science are priorities, along with strengthening capabilities in strategic communications. New generic job profiles covering these capabilities have been developed or are under development. Proposals for reclassification and reassignment of existing functions in missions using these new profiles, especially when leveraging opportunities from upcoming retirements to create more junior-level posts to rejuvenate the workforce, are vital elements in advancing a workforce transformation.

84. Efforts continue to ensure that human resources policies are responsive to the needs of entities with a field presence. Specifically, the Office of Human Resources develops and revises administrative issuances, streamlined policies and procedures to respond to the needs of field entities and provides authoritative policy interpretation and advice on all human resources policies applicable to field entities, including in emergency and crisis situations, as well as during downsizing and reduction-of-staff exercises. The Office remains actively engaged in the work of the Human Resources Network Standing Committee on Field Duty Stations and the tripartite Working Group for the Review of Conditions of Life and Work in Field Duty Stations of the International Civil Service Commission (ICSC), which monitor matters related to the conditions of service of staff in the field, including rest and recuperation, danger pay, hardship classification and non-family designation of duty stations. As part of the Office's participation in ICSC discussions, ongoing reviews are carried out for key field entitlements, including hardship allowance, non-family service allowance, mobility incentive, relocation package, danger pay and security evacuation allowance, as well as the methodology for setting post adjustment in field duty stations. The Office is actively engaged in the comprehensive review of the United Nations common system compensation package being conducted by ICSC pursuant to General Assembly resolution 77/256 B, which includes a full review of the compensation package for staff in field locations. The Office also conducts periodic salary surveys to establish and update salary scales for staff in locally recruited categories in field duty stations.

6. Strengthening coherence and collaboration between pillars in special political missions

85. Depending on the context of the country and mission, the Deputy Special Representatives of the Secretary-General may have triple functions to perform, also serving as resident coordinators and humanitarian coordinators. The staffing complements of six special political missions, namely UNTMIS, the Office of the United Nations Special Coordinator for Lebanon, UNSMIL, BINUH, UNAMA and UNAMI, include Deputy Special Representatives of the Secretary-General, or Deputy Special Coordinators, who have the triple functions and serve also as resident coordinators and humanitarian coordinators in complex, multidimensional contexts. These deputies constitute the link between the political work of the special political mission and the United Nations entities implementing development and humanitarian activities in coordination with the mission. As Resident Coordinator, the incumbent is responsible for coordinating operations and activities

relating to the United Nations country team and United Nations development activities, for ensuring that the activities of the United Nations country team are aligned with national priorities, as captured in United Nations cooperation frameworks, for providing oversight and transparency on joint activities of the United Nations country team and for mobilizing partnerships and financing in support of country efforts towards the achievement of the Sustainable Development Goals. The office of the resident coordinator supports those functions. As Humanitarian Coordinator, the incumbent is responsible for coordinating humanitarian plans and operations and for maintaining links with Governments and other parties, donors and the broader humanitarian community. The salaries and common staff costs related to the posts of Deputy Special Representative of the Secretary-General, Resident Coordinator and Humanitarian Coordinator are budgeted at 50 per cent of the total cost in the 2026 budgets of the respective special political missions, pursuant to General Assembly resolutions 59/296 and 72/279, with the other 50 per cent funded through the Development Coordination Office. In line with Security Council resolution 2594 (2021), the Secretariat continues to strengthen coherence and collaboration between the respective pillars in mission settings.

86. Appropriately sized and dedicated capacity in the mission structure is required to support the Deputy Special Representatives, Resident Coordinators and Humanitarian Coordinators in carrying out their cross-pillar function within the respective mission and to provide sufficient support for their role in coordinating the work of the various units reporting to them. Where needed, the Secretariat will apply the two criteria of its policy in ascertaining the level of support capacity for the Deputy Special Representatives of the Secretary-General, Resident Coordinators and Humanitarian Coordinators: (a) the number of units reporting to them; and (b) the number of substantive mandate points assigned to the office (see A/79/6 (Sect. 3)/Add.1, para. 79).

7. Mine action activities

87. Pursuant to recommendations of the Board of Auditors (see A/75/5 (Vol. II) and A/76/5 (Vol. II)), the Secretariat initiated the phased review and redesign of its mine action programmes in peacekeeping missions and special political missions to improve effectiveness, governance, transparency and cost efficiency by reviewing and redesigning the delivery of mine action mandates in UNAMA and UNSMIL. The redesign shifted delivery from implementation in partnership with the United Nations Office for Project Services (UNOPS) to direct delivery by the Secretariat. This shift improves governance by providing a direct reporting line from the mine action personnel to the Chief of the Mine Action Programme and empowering the Secretariat to fulfil its responsibilities to undertake programme design, operational planning, implementation, reporting and representation.

88. The first phase of the review concluded with the transition of the mine action programmes from delivery in partnership with UNOPS to direct delivery by the Secretariat in the United Nations Interim Force in Lebanon and the United Nations Interim Security Force for Abyei as from 1 July 2024, and in UNAMA and UNSMIL from 1 January 2025. Given that this process has been completed for special political missions, no more proposals are made in the proposed budget for 2026. While UNOPS will no longer be involved in the delivery of mine action programmes in special political missions, the Secretariat will continue to perform the core functions of programme design, operational planning, contract requisitioning, implementation, oversight, reporting and representation for mine action programmes.

8. Backstopping support at Headquarters

89. Special political missions rely on Headquarters for backstopping support for a wide range of functions. The Department of Political and Peacebuilding Affairs is leading and providing substantive backstopping to 34 of the 37 continuing special political missions by ensuring regular and effective communication between the missions and United Nations entities in New York and regular liaison with Member States through their permanent missions to the United Nations and preparing a wide range of substantive material, including briefing material for the Security Council and regular reports of the Secretary-General, among other functions. Administrative support is being

provided by the joint Executive Office of the Department of Political and Peacebuilding Affairs and the Department of Peace Operations to 15 of those missions.

90. Special political missions also benefit from operational support and advisory services in the areas of human resources and supply chain management provided by the Department of Operational Support; budgetary and financial services, asset and property management policy support and assistance with accountability systems provided by the Department of Management Strategy, Policy and Compliance; and information technology support delivered by the Office of Information and Communications Technology. Special political missions also rely on support from Headquarters in thematic and operational areas such as constitution-making, electoral assistance, mediation, best practices, military and police planning/force generation, rule of law and security institutions.

91. As outlined in detail in the report of the Secretary-General on the review of arrangements for funding and backstopping special political missions (A/66/340), which remained pending before the General Assembly, there is no dedicated mechanism to ensure relevant capacities for backstopping special political missions at Headquarters, in contrast to peacekeeping operations, which can draw on the support account for peacekeeping operations.

92. In 2025, a total of 45 posts (1 D-1, 8 P-5, 19 P-4, 7 P-3, 1 P-2 and 9 General Service (Other level)) are being funded from special political missions. In 2026, a total of 40 such posts (1 D-1, 8 P-5, 17 P-4, 5 P-3 and 9 General Service (Other level)) are proposed, reflecting the abolishment of 4 posts as from 1 January 2026 due to the end of the UNAMI mandate and the proposed abolishment of 1 post for UNMHA. In addition, due to the expected end of the UNTMIS mandate, it is proposed that three posts be abolished as from 31 October 2026.

93. While the resources included in the budgets of special political missions for backstopping support are fundamental for the Secretariat to provide support to special political missions, the regular budget and extrabudgetary resources of the Department of Political and Peacebuilding Affairs are often also required to ensure adequate support. Similarly, the regular budget and extrabudgetary resources of the Office for Disarmament Affairs are used to provide administrative support to the mission in support of the Security Council Committee established pursuant to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction.

9. Ratios for vehicles and information technology equipment

94. In its resolution 79/258 A, the General Assembly requested the Secretary-General to update the vehicle holding ratio and related guidance, as well as the computing device allocation ratio, to enable the missions to improve the transparency and accuracy of the relevant budgets. The standard ratio for light passenger vehicles is promulgated to provide guidance in the determination of the ceiling holdings for operational purposes to support missions in ensuring effective and efficient fleet management considering the relevance to operations in any given Secretariat entity. As ratios are not mandatory, the actual holdings are determined by missions based on local conditions and their unique operational requirements, which for vehicles should be prioritized on the basis of supporting mileage, frequency of use and usage patterns. The missions continue to monitor excess holdings of vehicles and expect to dispose of vehicles when they meet the criteria in terms of life expectancy or write-off or to recommend inter-mission transfers where feasible and cost-efficient.

95. Within the context of vehicle fleet transformation into the more cost-efficient and environmentally friendly UN Fleet, the Secretariat remains responsible for establishing sourcing solutions for cost-efficient vehicles available under Headquarters global systems contracts established through competitive bidding exercises.

96. In the above context, the holdings of vehicles and information technology equipment are proposed on the basis of the anticipated personnel incumbency levels planned for 2026, as opposed to the full authorized level of personnel. Table 2 provides the ratios for vehicles for all special political missions that have vehicle holdings, while table 3 provides the ratios for information technology equipment for all special political missions.

UNAMA					
UNAMA	456	413	112	147	31.3
Total	**2 408**	**1 944**	**509**	**565**	**11.0**

[a] Includes United Nations international staff, National Professional Officers, international United Nations Volunteers, military and police personnel (military observers, military police and civilian police officers), government-provided personnel and contractors.
[b] Includes armoured vehicles except those earmarked or required for the exclusive use of close protection and certain security tasks. Excludes guard-forces-carrying and utility vehicles, buses and electric carts.
[c] Based on standard equipment as outlined in the Standard Cost and Ratio Manual issued by the Department of Operational Support.

97. The total proposed vehicle holdings for special political missions are 11.0 per cent above the standard allocation based on the Standard Cost and Ratio Manual. Provisions of new or replacement vehicles to missions take into consideration the operational circumstances, including the terrain and infrastructure in the area of operations, security considerations and the supply and availability of spare parts. Explanations for vehicle holdings that are higher than the standard allocation in specific missions are as follows:

(a) The vehicle holdings for the United Nations Representative to the Geneva International Discussions are 33.3 per cent, or one vehicle, higher than the standard allocation, and reflect the operational needs in both Tbilisi and Zugdidi, Georgia;

(b) The vehicle holdings for UNOWAS are 6.7 per cent, or one vehicle, higher than the standard allocation and reflect the operational needs for a vehicle in Abuja to support visits by the Special Representative of the Secretary-General for West Africa and the Sahel;

(c) The vehicle holdings for United Nations support for the Cameroon-Nigeria Mixed Commission are higher than the standard allocation by 60.0 per cent, which reflects the need for dedicated transportation to support the movement of the joint technical teams and their security personnel along with all their logistics equipment while in the field. The presence of these vehicles allows for flexibility and the ability to move freely within the areas of operations, many of which are isolated and hard to reach and have limited infrastructure and unsafe conditions;

(d) The vehicle holdings for the Office of the United Nations Special Coordinator for Lebanon are higher than the standard allocation by 22.2 per cent, or two vehicles, and reflect the operational need to support official meetings and engagement across Lebanon;

(e) The vehicle holdings for UNOCA are higher than the standard allocation by 10.0 per cent, or one vehicle, and reflect operational needs;

(f) The vehicle holdings for UNSMIL are 10.9 per cent higher than the standard allocation, which is attributable to: (i) an operational requirement for a pool of vehicles to support the United Nations Guard Unit; and (ii) reserves to support movements in Tunis and Benghazi. UNSMIL operates in two countries (Libya and Tunisia) and in five official locations (Tripoli, Benghazi, Sabha, Sirte and Tunis). The security risk assessment for each location governs the vehicles' usage at each location;

(g) The vehicle holdings for UNMHA are higher than the standard allocation by 122.7 per cent, which reflects the operational requirement for a pool of vehicles to support convoy movements between Hudaydah and Sana'a and between Aden and southern districts;

(h) The vehicle holdings for BINUH are 14.0 per cent higher than the standard allocation, which is attributable to: (i) the operational requirement to have a pool of duty vehicles for medical, security, information technology and engineering personnel to enable them to quickly respond to emergencies; (ii) the need for frequent maintenance and repair caused by poor road conditions and the extensive time needed for repairs at outsourced workshops; and (iii) the need for vehicles to conduct driver testing;

(i) The vehicle holdings for UNAMA are 59.8 per cent higher than the standard allocation, which is attributable to: (i) the operational requirement for a pool of vehicles for Kabul to provide dispatch transportation for all staff in the Mission; (ii) provision of airport shuttle services; and (iii) vehicles to conduct driver testing.

Total	**3 956**	**3 306**	**3 301**	**3 656**	**3 943**	**7.9**

[a] Includes desktop computers, laptops and netbook computers.
[b] Includes international and national staff, United Nations Volunteers, United Nations police, United Nations military observers, government-provided personnel, military staff officers, international contractors and duty station-based experts.
[c] Based on standard requirements as outlined in the Standard Cost and Ratio Manual.

98. Similarly, the guidelines issued by the Office of Information and Communications Technology reinforced the "one computing device per user" policy as a best-practice reference to improve budget discipline, cost-effectiveness and alignment with Secretariat-wide ICT governance. Individual missions may deviate from the guidelines on the basis of operational requirements. The total proposed computing device holdings for special political missions are 7.9 per cent higher than the standard allocation. Explanations for computing device holdings that are higher than the standard allocation in specific missions are as follows:

(a) The computing device holdings at the Office of the Special Envoy of the Secretary-General for Yemen are 6.3 per cent higher than the standard allocation, which is attributable to requirements for conference and meeting rooms, security monitoring systems and servers;

(b) The computing device holdings at UNOWAS are 9.2 per cent higher than the standard allocation, which is attributable to additional holdings required to provide for training purposes, conference and meeting rooms and the CarLog system;

(c) The computing device holdings for United Nations support for the Cameroon-Nigeria Mixed Commission are 20.0 per cent higher than the standard allocation, which is attributable to additional holdings required to provide for training and meeting rooms;

(d) The computing device holdings for UNSMIL are 13.2 per cent higher than the standard allocation, which is attributable to requirements for the CarLog system, data transmission and connectivity and servers;

(e) The computing device holdings at the United Nations Verification Mission in Colombia are 8.7 per cent higher than the standard allocation, which is attributable to requirements for training purposes, Internet booths and servers;

(f) The computing device holdings at UNMHA are 8.7 per cent higher than the standard allocation, which is attributable to requirements for training purposes, the CarLog system and servers;

(g) The computing device holdings at BINUH are 3.3 per cent higher than the standard allocation, which is attributable to requirements for training purposes and servers;

(h) The computing device holdings at UNAMA are 11.5 per cent higher than the standard allocation, which is attributable to additional holdings required to provide for training purposes, the CarLog system and servers, as well as provision for other personnel, including contractors.

99. The holdings are influenced by factors such as the need to provide for consultants and individual contractors, training facilities, Internet booths, information technology maintenance services, CarLog systems, programming of radios and fieldwork. Furthermore, based on the lessons learned during the coronavirus disease (COVID-19) pandemic, which saw a substantial increase in the use of virtual communications and remote working, it is critical to ensure the reliability of information technology equipment and infrastructure and their accessibility to all personnel, both staff and non-staff, to enable business continuity, mandate delivery and the safety and security of staff members, especially in the harsh environments where many special political missions operate.

10. Air operations

100. The Secretariat has taken measures to seek efficiencies, as detailed further in paragraph 120 below, and enhance the utilization of air fleets, with guidance provided to guide staff in field missions with the requisite technical and operational oversight. The portfolio of standby air solutions, which include standby charter agreements, standby air ambulance services, standby aircraft services under letters of assist and other short-term agreements, is aimed at increasing the Secretariat's agility and responsiveness by addressing, among other things, urgent requests for ad hoc requirements, and at providing improved, efficient and timely support. In addition, arrangements for the inter-mission sharing of aircraft provide a sustainable and cost-effective way of doing business, based on a "pay for utilization" modality, when feasible, and exclude fixed costs that are otherwise payable under the dedicated aircraft service agreement.

101. In 2025, the total resources approved for air operations for the continuing missions amount to $35.7 million, with planned utilization of approximately 5,759 flight hours (4,174 for fixed-wing aircraft and 1,585 for rotary-wing aircraft). In 2026, an amount of $33.4 million is proposed for a total of 4,485 flight hours (3,154 for fixed-wing aircraft and 1,331 for rotary-wing aircraft). Resource requirements for air operations in seven missions (UNOWAS, UNTMIS, UNSMIL, the United Nations Verification Mission in Colombia, UNMHA and UNAMA) represent 97.3 per cent of the overall air operation resource requirements for 2026.

102. In 2026, the proposed resources for air operations represent a decrease of $2.4 million, or 6.6 per cent, compared with 2025, while the flight hours proposed for 2025 represent a reduction of 1,274 hours, or 22.1 per cent, compared with 2025. The decrease reflects an estimated efficiency of $0.7 million based on the new budgetary policy in line with historical flight hour utilization rates mostly for UNOWAS, UNOCA, UNMHA and UNSMIL. In addition, the decrease is the result of: (a) the non-provision of resources for air operations in the liquidation of UNAMI as the current aircraft contract will be discontinued in 2025; and (b) reduced requirements in UNAMA due to a lower fuel consumption rate, reflecting a lower estimated volume of 411,500 litres of fuel for the replacement aircraft at an average price of $1.318 per litre, compared with 904,000 litres at an average price of $1.291 per litre in the approved budget for 2025, offset by higher rental and operational costs, in connection with the proposed replacement of the B-1900D fixed-wing aircraft with a SAAB-340B aircraft at a higher contractual price. The decrease is offset in part by increased requirements for the United Nations Verification Mission in Colombia based on the latest contractual prices for helicopters with increased guaranteed fleet costs, and to additional flight hours for fixed-wing and rotary-wing aircraft and related aviation fuel necessary to support broader mandate implementation in locations outside Bogotá and ensure connectivity between locations.

11. Travel

103. The total resources proposed for official travel amount to $11.4 million, reflecting a decrease of $1.0 million, or 7.7 per cent, compared with the approved budget of $12.4 million for 2025.

104. For 2026, the travel plans are based on the principle that official travel will be undertaken only where it cannot be substituted by other means of communication, including videoconferencing. For the sanctions monitoring teams, groups and panels, the proposed budget for official travel of staff for 2026 takes into account the frequency of travel by the Chairs of relevant sanctions committees to countries and regions relevant to their respective sanctions regime, which requires support from Secretariat staff. The proposed budget for all sanctions expert groups or panels not based in New York provides for one trip by one Secretariat staff member to the relevant region to assist the Chair and/or the group or panel, as well as two trips by one staff member to assist the group or panel during the drafting of interim or midterm and final reports. In addition, the proposed budget for three of the groups or panels that are not based in New York includes one more trip by two Secretariat staff to a country relevant to the sanctions regime to conduct Security Council-mandated sanctions assessment missions.

105. The programme plans of the special political missions, as presented in the proposed programme budget under the thematic clusters, provide further information on how special political missions have incorporated good practices and increased the use of technology in their work, while also reflecting upon the challenges experienced where technology meets its limits and in-person travel is needed to meet demand and fill coverage gaps. Travel to provide good offices and mediation, conduct fact-finding and monitoring activities, verify compliance and conduct outreach, as well as provide training or capacity-building to national and local partners, remains an indispensable tool in carrying out the work of the special political missions in 2026.

106. With respect to the performance of special political missions against the 16-day advance purchase policy, the missions are fully aware of the observations and recommendations of the Advisory Committee on Administrative and Budgetary Questions with respect to the need to put measures in place to enhance performance. The overall performance of all special political missions improved from 28 per cent in 2023 to 39 per cent in 2024. This improvement reflected efforts across the Secretariat, including regular reminders to missions of their responsibility to monitor real-time performance against the advance purchase policy using corporate dashboards and to investigate performance drivers and solutions. As noted in the most recent report of the Secretary-General on standards of accommodation for air travel (A/79/628), key performance drivers across the Secretariat are: late submission of travel requests; travel requests that were not “right the first time” and require rework, adding to the processing time; travel by “external” travellers such as meeting participants and external experts over whom the Secretariat has less administrative control; and circumstances outside the entities’ control such as travel document delays or operational issues, including emergencies or exigencies of service.

107. Full compliance with the policy also depends on external factors specific to special political missions. Such factors encompass: frequent shifts in mission security and political environments; the necessity to respond to sudden or escalating crises; interruptions arising from distinct logistical arrangements for travel that require special flights or escorts, leading to last-minute bookings for commercial travel; last-minute requests for revisions to meeting schedules and participant lists with multiple stakeholders, such as regional governments, intergovernmental partners and civil society organizations, outside the control of missions and often at short notice; and late notifications from the organizers of training and learning activities.

108. While further efforts are still needed, there was a continued improvement in 2024. The overall performance for all special political missions increased from 18 per cent in 2019, 22 per cent in 2020, 21 per cent in 2021, 27 per cent in 2022 and 28 per cent in 2023 to 39 per cent in 2024. For the 37 continuing special political missions, 22 (59 per cent) have shown improved performance rates in 2024 compared with 2023.

12. Expert panels for recruitment for generic job openings

109. Recruitment from rosters enables timely recruitment while giving due consideration to organizational imperatives on gender parity and geographical diversity in the interest of having qualified and diverse candidates available to deploy quickly to achieve field mission mandates. Expert panels established pursuant to the administrative instruction on the staff assessment system (ST/AI/2010/3/Rev.3) are an integral part of the roster-based recruitment system. The expert panels assess and recommend candidates

who have applied for generic job openings for posts in field missions in order to reduce the administrative burden on individual hiring managers and enhance the quality, consistency and integrity of the recruitment process by centralizing the assessment. They also assist the Human Resources Services Division in the Department of Operational Support in undertaking the assessment of applicants for generic job openings. Expert panels are similar in constitution to an assessment panel and will continue to convene in 2026 to assess and recommend candidates who have applied for generic job openings for positions in the field. As outlined in the administrative instruction on the staff selection system, the expert panels are normally comprised of at least three members, two being subject matter experts at the same or higher level of the job opening, and at least one being a woman and one being from outside the work unit where the job opening is located, who will undertake the assessment of applicants for a job opening. Roster selections are a proven tool to reduce recruitment timelines and frontload a fair assessment process. In 2024, 76 per cent of selections for international positions (Field Service level 4 to D-1) in field missions (special political missions and peacekeeping operations) were from rosters, compared with 50 per cent in the global Secretariat for roster selections.

110. In 2026, the Department of Operational Support will continue to enable roster-based recruitment and manage generic job openings with a view to establishing new rosters that reflect gender balance, geographical diversity and multilingualism. With the upcoming amendment to the staff selection policy, the Department will support the transition to a new global rostering approach and will work with the various departments in the global Secretariat and their experts to replenish rosters according to workforce planning requirements, with a view to supporting the development of rosters that will enable entities to meet their human resources strategic imperatives.

II. Analysis of resource requirements for special political missions

A. Budget formulation: efforts, methodology and presentation

1. Building and strengthening a culture of efficiency

111. Special political missions constitute a major part of the programme budget and expenditure, previously accounting for approximately 20 to 22 per cent of the entire regular budget since 2010. With the termination of the mandates of UNITAMS and UNITAD and the upcoming drawdown of UNAMI and UNTMIS, the proposed budget for special political missions for 2026 accounts for approximately 17 per cent of the regular budget.

112. The Secretariat continues its efforts to deepen its commitment to cost-efficiency and cost-effectiveness in the request for and utilization of budgetary resources. In January 2025, the Secretariat officially launched its strategic approach to building and strengthening its culture of efficiency in the management of support entities and mission resources, with the aim of transforming the current system of discrete efficiency initiatives into a global, coherent, systematic and consistent approach. This initiative was inaugurated at a Secretary-General's seminar with all the Special Representatives of the Secretary-General for peacekeeping and special political missions, as well as the Personal and Special Envoys of the Secretary-General, with the Under-Secretaries-General for Operational Support, Management Strategy, Policy and Compliance, Peace Operations and Political and Peacebuilding Affairs also in attendance.

113. This strategic approach is intended to ensure that: (a) efficiency considerations (and quantitative benchmarks) are included in relevant mission and Headquarters strategies, policies, assessments, budgets and plans; (b) every staff member in every mission is imbued with a deep commitment to being an effective mandate implementer and custodian of the resources provided by Member States; (c) nurturing such sensitivity in people and programmes is reinforced by those in leadership positions, supported by well-developed systems and processes in place to promote adherence to a culture of efficiency; and (d) cost-efficiencies are realized for Member States on a yearly basis in all budget proposals.

114. To this end, in formulating the 2026 budget, the Field Operations Finance Division of the Department of Management Strategy, Policy and Compliance enhanced its policy guidance to assist missions in identifying opportunities for efficiency in operations and resource optimization. A list of good

practices and potential areas that could generate further efficiency was shared with missions to encourage them to review and broaden the scope of efficiency measures to the various groups of expenditure. This includes considering repurposing vacant or long vacant posts with the same mandate delivery or output. Missions were also requested to identify cost avoidance and cost reductions, which will involve taking proactive action to avoid future expenses, such as the inter-mission transfer of assets.

115. The quantifiable savings and costs avoided amount to approximately $9.3 million in 2025, representing 1.3 per cent of the 2024 appropriation. At the time of formulating the budget, as missions gained experience in strengthening the culture of efficiency, the collective ambition for 2026 was to improve on this performance and aim for 2 per cent in efficiency savings against 2025 appropriations for the continuing missions, excluding UNAMI, representing $11.9 million.

116. The quantifiable savings and costs avoided amount to approximately $12.7 million in 2026, representing 2.1 per cent of the 2025 appropriation for the continuing missions (additional information is provided in table 4). The major management improvements and efficiency measures applied and efforts to achieve sustained cost reductions and cost avoidance are reflected in the following areas: (a) the proposed closure of two field offices, the centralization of the country security radio room and the downward reclassification of some posts in UNAMA; (b) cost avoidance related to the non-acquisition of vehicles or equipment owing to the transfer of assets from closing missions in BINUH, the Office of the United Nations Special Coordinator for Lebanon and UNOWAS; (c) the repurposing of long vacant posts in various missions; (d) the use of safe, efficient and sustainable fleet services through the UN Fleet lease contract for the soft-skin fleet for the United Nations Verification Mission in Colombia; (e) the renegotiation of various contracts at a lower cost in UNMHA; and (f) optimization of the utilization of aircraft, resulting in a reduction in flight hours without affecting the implementation of the mandate.

117. Most missions are also reducing the proposed resources for official travel and are instead encouraging the use of virtual meetings where feasible, optimizing travel schedules, coordinating with partners to maximize impact while minimizing costs and prioritizing the use of online training options. The number of external consultants has also been reduced to promote the use of in-house capacity to perform core activities. The budgets also reflect economies of scale vis-à-vis the provision of materials and services and substantive support as part of mandated activities in the context of various cost-sharing arrangements.

Table 4
Savings achieved and costs avoided in the proposed budget for 2026
(Thousands of United States dollars)

Mission	*Category*	*Initiative*	*Amount*
Cross-cutting	Air operations	New policy based on flight hour utilization patterns	644.2
Office of the Special Envoy of the Secretary-General for Yemen	Facilities and Infrastructure	Renegotiated reduced contractual terms for rental of premises, security services and fuel reserves of generators	138.0
Office of the Special Envoy of the Secretary-General for Yemen	Ground transportation	More efficient management of repair and maintenance of the Office's fleet and fuel	129.7
Cluster II	Experts	Streamlining of expert work while improving output, resulting in more efficient working time	226.9
Analytical Support and Sanctions Monitoring Team pursuant to resolutions 1526 (2004) and 2253 (2015) concerning ISIL (Da'esh), Al-Qaida and the Taliban and associated individuals and entities	National General Service staff	Leveraging of digital tools and redistribution of functions to avoid duplication, enabling the abolishment of 2 posts	203.3
CNMC	Transfer of assets from UNLB	Cost avoidance by requesting a vehicle from UNLB for field operations during visit to remote locations	27.0

Mission	*Category*	*Initiative*	*Amount*
Office of the United Nations Special Coordinator for Lebanon	MINUSMA assets transfer	Cost avoidance related to the non-acquisition of 1 armoured vehicle owing to the transfer of items from MINUSMA	310.0
UNSMIL	Civilian personnel	Application of 100 per cent vacancy rate to 19 additional long-vacant ceasefire monitoring component-related posts and 3 posts vacant for 3 years and more for which no post action was recommended by the staffing review	818.9
United Nations Verification Mission in Colombia	Ground transportation	Full move to UN Fleet lease contract for soft-skin fleet, in collaboration with the Office of the United Nations High Commissioner for Refugees and the World Food Programme (this initiative commenced in 2025 with projected savings of $1,406,500)	2 937.6
UNMHA	National Professional Officer	Abolishment of 2 posts (1 with coordination and liaison functions to be provided by the Resident Coordinator's office in Saudi Arabia; and 1 vacant post with functions to be carried out at the Local level)	197.2
UNMHA	International staff	Abolishment of 1 vacant backstopping post	129.7
UNMHA	Facilities and infrastructure	Reduction in fuel reserves of generators and rental of premises with move from the Mukha' camp to a new camp in Khawkhah.	449.1
BINUH	International staff	Abolishment of 1 vacant P-4 post, with functions to be replaced by locally recruited engineers by the United Nations Development Programme for basket fund's construction initiatives	192.3
BINUH	UNAMI assets transfer	Cost avoidance related to the non-acquisition of armoured and light passenger vehicles owing to the transfer of items from UNAMI	1 450.0
UNAMA	Civilian personnel	Abolishment of 19 posts resulting from the streamlining of the Field Office configuration in the northern region	785.4
UNAMA	Civilian personnel	Abolishment of 21 posts owing to the restructuring of field security operations centres	710.6
UNAMA	Civilian personnel	Abolishment of 10 National Professional Officer posts whose functions can be carried out at the Local level	542.0
UNAMA	Civilian personnel	Abolishment of 27 posts whose functions can be absorbed by remaining capacities	2 107.3
UNAMA	Communications and information technology	Cost avoidance on software and user-based fees owing to the net reduction of 87 posts (abolishment of 117 posts offset by establishment of 30 positions)	80.0
UNAMA	Facilities and infrastructure	Cost avoidance owing to the closure of the Maymana and Pul-e Khumri provincial offices	562.6
UNAMA	Facilities and infrastructure	Reduction of fuel consumption by generators resulting from project upgrades	78.6
Total			**12 720.4**
Approved budget for 2025, excluding UNAMI and discontinuing missions			**597 286.7**
Efficiencies as a percentage of the approved budget for 2025			**2.1**

118. To achieve cost-efficiency and accommodate reduced editorial, translation and text-processing time, as well to enhance readability, the Field Operations Finance Division continued its effort to streamline all budget reports for 2026, achieving a reduction of 14 per cent in the overall document length of the six addendums for special political missions, including reducing the length of the present report by 30 per cent (while additional tables and annexes are included in the supplementary information packages for legislative bodies).

2. Improved budgeting methodologies

119. The formulation stage of budget proposals provides an important opportunity to focus attention on issues of cost-efficiency and resource requirements for effective mandate delivery. With the Controller's budget instructions, the Field Operations Finance Division of the Department of Management Strategy, Policy and Compliance is enhancing its policy guidance to assist missions in appropriately budgeting for their requirements. Where necessary, further assistance was provided to missions in fine-tuning their proposals.

120. In 2025, a new comprehensive aviation budgeting policy was developed, as was done for the peacekeeping missions, which includes a data-driven approach for budgeting flight hours. Missions were requested to carefully review the requirements for their air assets and to maximize opportunities for the sharing of air assets across missions, with the support of the Department of Operational Support. In terms of flight hours, missions that utilized 90 per cent or more of the number of flight hours approved for the most recent performance period (2024) can propose maintaining the same number of flight hours approved for that performance period in the relevant categories (rotary-wing or fixed-wing). For missions that utilized less than 90 per cent of the approved flight hours, the proposed flight hours are based on the higher of the average utilization percentage of the three most recent performance periods (2022, 2023 and 2024) and the utilization percentage of the most recent performance period (2024). The higher of those two percentages is then applied to the number of flight hours approved for the most recent performance period (2024) to obtain the proposed flight hours. Limited exceptions to this guidance may be considered on a case-by-case basis, should compelling justifications be provided. To provide missions with flexibility for their operating environment, total flight hours according to the policy may be distributed between the categories as required by the mission. A delayed deployment of 50 per cent is applied for new aircraft, with exceptions considered for the significant reconfiguration of an aviation fleet.

121. To strengthen oversight of ICT projects and activities and related resource requirements, the budget proposals from the special political missions underwent review and technical clearance by the Office of Information and Communications Technology. The process is aimed at ensuring strategic planning, aligning the demand plan with budget proposals and implementation, avoiding duplication of efforts and maximizing efficiencies.

122. To engender more realistic budget proposals, a review was also undertaken to reflect relevant historical consumption and utilization patterns based on a data-driven approach in the context of the current financial situation. Missions are requested not only to consider their stock levels and pattern of expenditures but also to carefully analyse cancellations of prior-year obligations, which provide another useful indicator of a mission's implementation capacity.

123. To strengthen coherence, the proposed post actions adhere consistently to definitions pertaining to changes in staffing, and the proposals are fully justified in terms of changes in mandates or operational circumstances and workload.

124. In addition, the Secretariat has ensured that all general temporary assistance positions are fully justified under each mission, providing the reasons for the proposed retention in 2026. In addition, no proposals have been made to convert these positions to regular posts. Should future assessment lead to a determination that such capacities should be regularized, proper proposals will be made in future budgets.

125. The practice of presenting New York-based and Geneva-based General Service staff as "international staff", which differentiated between staff in the General Service categories primarily based at Headquarters in New York and Geneva and those recruited locally in field missions, has been discontinued. To ensure consistency in reporting for peace operations, the presentation of New York-based and Geneva-based General Service staff has been realigned, to be reflected under national staff. The application of this standardized categorization would allow all General Service staff resources to be captured under the same budget class, rather than being split across international and national staff, which has required a manual process in the past.

3. Consistent application of the latest standard rates

126. With regard to international staff costs in field locations, the budgetary rates for net salary and staff assessment for 2026 were determined for each grade level and for each special political mission according to the following methodology:

(a) With regard to international staff, the most recent salary scale, effective 1 January 2025, as approved by the General Assembly in its resolution 79/252, was used for net salary and staff assessment for each level in the Professional and higher categories. Similarly, the net base salary scale for staff in the Field Service category is adjusted, effective 1 January 2025 (in accordance with standing practice in line with the ICSC decision contained in A/45/30, para. 270 (e));

(b) The step levels selected for each grade are based on the actual average step levels for each mission as at 31 December 2024, using actual incumbency data for international staff;

(c) The post adjustment multiplier for each duty station as of April 2025 was applied to the net base salary rates.

127. With regard to national staff, the most recent salary scales as of April 2025 were used for net salary and staff assessment, with common staff costs as a percentage of net salaries, based on actual expenditure for the period from 1 January to 31 December 2024, applied to the average grade and step of national staff.

128. With regard to common staff costs, the actual expenditure from 1 January to 31 December 2024 was used to calculate common staff costs as a percentage of net salaries (inclusive of post adjustment but net of staff assessment) to determine the percentage of common staff costs for 2026.

129. For United Nations Headquarters, offices away from Headquarters and the regional commission duty stations (New York, Geneva, Nairobi, Addis Ababa, Bangkok and Beirut), the standard costs for salaries and common staff costs for the programme budget were used, which were adjusted to reflect the post adjustment multiplier as of April 2025 for those locations.

130. With regard to military contingents (United Nations Guard Units), the latest single rate of reimbursement to countries contributing contingent personnel to United Nations field operations in the amount of $1,448 per person per month effective 1 July 2022, and the recreation leave allowance of $11.50 per day for up to 15 days of leave taken during each six-month period, as approved by the General Assembly in its resolutions 76/274 and 76/276, were applied. Reimbursement related to contingent-owned equipment is based on the rates adopted by the Assembly in its resolution 77/303.

131. With regard to military advisers, observers, United Nations police and government-provided personnel, the latest applicable mission subsistence allowance rates for each country and mission area effective from 1 January 2025 were applied, as per the rates promulgated by the Office of Human Resources in December 2024.

132. With regard to experts, the estimates considered the latest fee ranges issued by the Office of Human Resources. The cost-of-living allowance for non-home-based experts in the Security Council sanctions committee panels and other support mechanisms, the latest monthly rates of $6,600 (New York) and $4,800 (Nairobi) as approved by the Office of Human Resources, which took effect from 1 March 2023, have been applied to the four missions[8] that have such requirements.

133. With regard to rental of premises in New York, the latest unit rate of $15,000 per person per year, effective 1 January 2025, has been applied to those missions accommodated on the Headquarters premises in New York.

[8] Analytical Support and Sanctions Monitoring Team pursuant to resolutions 1526 (2004) and 2253 (2015) concerning ISIL (Da'esh), Al-Qaida and the Taliban and associated individuals and entities; Office of the Ombudsperson established pursuant to Security Council resolution 1904 (2009); Panel of Experts pursuant to resolution 2713 (2023); and support to the Security Council Committee established pursuant to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction.

134. With respect to fuel costs, the average price per litre for the different types of fuel in the six-month period from October 2024 to March 2025 have been used as the basis for calculating the provisions for fuel costs under the respective budget classes for 2026.

135. For ICT, the budget proposals also reflect the latest standard rates and service charges issued by the Office of Information and Communications Technology.

4. Standardized methodology of budgeted vacancy rates

136. The Field Operations Finance Division provided guidance to all special political missions to improve the accuracy and consistency of the vacancy rate factors applied in the proposed budgets for 2026, to ensure that the proposed vacancy rates are based, as much as possible, on actual rates.

137. The proposed vacancy rates applied in the budget for 2026, for all types of personnel, have taken into account the experience to date. The assumptions considered for the proposed vacancy rates include the 12-month average vacancy rate in 2024 and the actual vacancy rate as at 31 March 2025. The lower of the two was used as the budgeted vacancy rate.

138. For proposed establishment of new posts or positions, or posts or positions proposed for reassignment, a vacancy rate of 50 per cent has been applied in the calculation of costs of such posts. In addition, a vacancy rate of 50 per cent has been used for posts proposed for conversion.

139. In addition, all special political missions were requested to take into full consideration the recommendations of the Advisory Committee on Administrative and Budgetary Questions and requests from the General Assembly that vacant posts and positions should be filled expeditiously. While efforts continue to fill vacant posts as expeditiously as possible, the current liquidity situation also requires careful planning of recruitment and onboarding to minimize the financial impacts.

140. The Field Operations Finance Division provided guidance to all special political missions to take the opportunity offered during the preparation of the 2026 budget to critically review long-vacant posts with a view to abolishing vacant posts that can be covered by existing capacities, or to propose reassignment or abolishment with the aim of facilitating the establishment of another function to address a more critical need, or to propose conversion to a national post.

141. Information on all posts vacant for more than two years and posts encumbered through special post allowances for more than one year is included in the supplementary information under each thematic cluster, which details the vacancy or special post allowance start dates, level and functional title of the posts, organizational unit and current status of recruitment, and provides justification for the retention of long-vacant posts.

5. Improved presentation of financial performance

142. In response to the recommendations of the Advisory Committee on Administrative and Budgetary Questions (see A/79/7/Add.1, para. 10) and the request of the General Assembly in it resolution 79/258 A, the Secretariat is continuing its efforts to enhance the financial performance reporting of the special political missions in the context of the present report, the financial performance report of the programme budget and the supplementary information provided for the special political missions. To this end, more comprehensive and detailed information on the financial performance is being provided, by mission and by budget class, including information on unliquidated obligations and the cancellation of prior-period obligations, as provided in table 6 below. In addition, for air operations, mine actions and construction projects for field-based special political missions under thematic cluster III, UNAMA and UNAMI information has been included in the supplementary information for those missions, as is done for peacekeeping operations, in response to the recommendations of the Advisory Committee (see A/78/7/Add.1, para. 56).

143. Additional information on the evolution of financial resources by mission over the most recent five years is provided in table 11 of the present report. Additional information on the evolution of financial resources for each mission, broken down by budget class, over that period, including both appropriation and expenditure, is provided in the supplementary information for each thematic cluster (including

UNAMA and UNAMI), similar to the rest of the regular budget, in response to the recommendations of the Advisory Committee on Administrative and Budgetary Questions (see A/78/7, para. 7).

144. In response to the recommendation of the Advisory Committee on Administrative and Budgetary Questions (see A/79/7/Add.1, para. 13), endorsed by the General Assembly in its resolution 79/258 A, additional information on the liquidation activities for UNITAD and UNITAMS has been included in the reports of the Secretary-General for the missions grouped under cluster II and cluster III, with more detailed information included in the supplementary information packages.

B. Financial resources

Analysis of financial performance of special political missions

145. The General Assembly approved an overall appropriation of $742.0 million for the special political missions (resolutions 78/254 A–C and 78/274). The expenditure for 2024 amounted to $682.5 million, resulting in an overall unencumbered balance of $59.5 million, or 8.0 per cent. The overall implementation rate in 2024 was lower than in previous years owing to the spending restrictions imposed due to the liquidity constraints and the efforts to curtail expenditures across special political missions, with underexpenditure representing 8.0 per cent of the appropriation, compared with 2.3 per cent in 2023. An analysis of the main factors affecting budget performance is provided in table 5. Performance reporting has been enhanced through the inclusion of information for field-based missions in the financial performance report for 2024 (A/80/89), in line with the recommendation of the Advisory Committee on Administrative and Budgetary Questions (see A/79/7/Add.1, para. 10). Further details are also included in the supplementary information under each thematic cluster.

Table 5
Main factors affecting budget performance in 2024

Group of expenditure	*Main factors for variance*
Military and police personnel (underexpenditure of $1.4 million)	The variance was attributable primarily to: (a) lower-than-planned deployment of United Nations police officers in BINUH; (b) lower costs for rations due to the use of existing stock reserve and lower-than-estimated costs for the rotation of the United Nations Guard Unit in UNSOM/UNTMIS; (c) lower-than-estimated costs for the rotation of military contingent personnel and lower requirements for rations in UNAMI; and (d) lower-than-estimated requirements for claims for death and disability compensation. The underexpenditure was offset in part by additional expenditure for military observers in the United Nations Verification Mission in Colombia attributable to the higher-than-planned deployment of observers and an increase in mission subsistence allowance rates.
Civilian personnel (overexpenditure of $11.5 million)	The variance was attributable primarily to higher-than-budgeted common staff costs and higher-than-budgeted salaries due to higher-than-estimated post adjustment multipliers for international staff, updated salary scales for national staff and updated living allowances for United Nations Volunteers, which was offset in part by the higher-than-budgeted average vacancy rates as a result of hiring restrictions.
Operational costs (underexpenditure of $69.7 million)	The variance reflects the austerity measures implemented to contain expenditures as well as lower-than-budgeted consumption in certain areas, attributable primarily to: (a) lower requirements for facilities and infrastructure in UNSOM/UNTMIS, UNAMA, UNAMI, the United Nations Verification Mission in Colombia and BINUH; (b) reduced requirements for air operations in UNMHA, UNSMIL, UNAMI, UNAMA and UNOWAS; (c) reduced requirements for communications and information technology owing to curtailed maintenance and support services, and the suspension of public information and publication services for planned outreach events: (d) postponed acquisition of equipment, supplies and spare parts with the related reduction in freight costs; (e) cancellation of

Group of expenditure	*Main factors for variance*
	planned official travel; (f) suspension of planned workshops and retreats; and (g) reduced requirements for experts due to vacancies in some panels of experts and mechanisms supporting sanctions and the expiration of the mandate of the Panel of Experts in support of the Security Council Committee established pursuant to resolution 1718 (2006).

146. Table 6 provides an analysis of the overall financial performance for special political missions for the period from 2022 to 2024.

Table 6
Synopsis of financial performance for special political missions, 2022–2024
(Thousands of United States dollars)

Category	*2022*	*2023*	*2024*
Appropriation	736 542.6	768 335.0	742 016.9
Expenditure	728 097.8	750 575.9	682 454.9
Unencumbered balance	8 444.8	17 759.1	59 562.0
Unencumbered balance as a percentage of appropriation	1.1	2.3	8.01
Unliquidated obligations	56 641.0	45 438.2	23 422.5
Unliquidated obligations as a percentage of appropriation	7.7	5.9	3.2
Cancelled prior-period obligations	14 672.9	10 292.3	11 224.1

147. Cancelled prior-period commitments in 2024 amounting to $11.2 million in special political missions were due primarily to: (a) the cancellation of the renovation project of the office building in Kuwait under UNAMI given the significant delays and uncertainty of obtaining the necessary approval; (b) lower-than-estimated actual costs for claims to compensate staff members for loss of their personal effects and for the rental of premises due to the conflict in the Sudan in UNITAMS; (c) lower-than-estimated costs for maintenance due to the exchange rate and the non-delivery of safety equipment in UNAMA; (d) the cancellation of commitments for rental of additional lease space and related cleaning services costs due to the inability of the vendor to deliver in UNSMIL; and (e) reduced commitments for air operations owing to the non-availability of dedicated air assets during six months in UNOWAS.

Proposed resources for 2026

148. The total proposed resource requirements for 2026 relating to the 37 special political missions covered in the present report amount to $639.8 million net of staff assessment and are inclusive of the provision for the share of special political missions in the budget of RSCE. Overall, the resource level for 2026 reflects a decrease of $53.2 million, including the impact of closing missions (with a decrease of 495 posts and positions) compared with the appropriation for 2025. Details of the financial resource requirements by cluster, by mission and by category of expenditure are presented in tables 7 to 9, while the evolution of resources over the most recent five years is provided in table 11.

Table 7
Overview of financial resources by cluster
(Thousands of United States dollars)

	2025 appropriation[a]	*2026 requirements*	*Variance*	
			Amount	*Percentage*
	(1)	*(2)*	*(3)=(2)-(1)*	*(4)=(3)/(1)*
Cluster I	47 037.2	52 138.8	5 101.6	10.8
Cluster II	37 232.6	37 950.6	718.0	1.9
Cluster III	386 023.1	384 906.0	(1 117.1)	(0.3)
UNAMA	124 695.0	124 463.1	(231.9)	(0.2)
UNAMI	95 399.1	38 041.0	(57 358.1)	(60.1)
Subtotal (net of staff assessment)	**690 387.0**	**637 499.5**	**(52 887.5)**	**(7.7)**
Discontinuing and discontinued missions[b]	355.4	–	(355.4)	(100.0)
Provision for the share of special political missions for the Regional Service Centre	2 298.8	2 332.0	33.2	1.4
Total (net of staff assessment)	**693 041.2**	**639 831.5**	**(53 209.7)**	**(7.7)**

[a] The 2025 appropriation of $693,041,200 includes an amount of $595,211,500 for the 37 continuing special political missions and an amount of $2,128,800 for the share of special political missions in the budget of RSCE, approved by the General Assembly in resolution 79/258 A, as well as an amount of $95,399,100 approved by the Assembly for UNAMI in resolution 79/258 B.
[b] The 2025 appropriation for these missions relates to the implementation of Security Council resolution 2231 (2015), the mandate of which is set to expire in October 2025.

Table 8
Summary of resource changes between 2025 and 2026, by major factor
(Thousands of United States dollars)

	Amount	*Comments*
Appropriation for 2025	**693 041.2**	
Technical adjustments[a]	2 548.0	Provisions at continuing rates for posts and general temporary assistance positions established in 2025, with a 50 per cent vacancy rate.
New and expanded mandates	(60 274.4)	UNAMI, pursuant to Security Council resolution 2732 (2024); UNTMIS, pursuant to Council resolution 2753 (2024); and the mission to support the implementation of Security Council resolution 2231 (2015).
Other changes	4 516.7	Includes recosting adjustments to reflect the latest salary rates ($4.8 million), updated mission subsistence allowance rates ($2.3 million), the latest contractual rates and the latest standard rates, as well as a provision for termination costs ($1.6 million) for UNAMA and BINUH, offset by the net impact of the application of the latest vacancy rates (reduction of $1.9 million) and the abolishment of posts mostly in UNAMA (reduction of $4.6 million).
Total changes	(53 209.7)	
Proposed programme budget for 2026	**639 831.5**	

[a] As defined in the foreword and introduction to the report (A/80/6 (Introduction)).

[a] The mission providing support to the Security Council Committee established pursuant to resolution 1718 (2006) was called the Panel of Experts for the Democratic People's Republic of Korea until April 2024. The data shown in tables throughout the present report reflect the data for the Panel of Experts up to the end of its mandate on 30 April 2024, and the data thereafter relate to the remaining component providing support to the Security Council Committee.

[b] The Office of the Special Envoy of the Secretary-General for Burundi and UNIOGBIS closed in 2021, the United Nations Mission in Colombia closed in 2017, the United Nations Electoral Observation Mission in Burundi closed in 2015 and the OPCW-United Nations joint mission in the Syrian Arab Republic closed in 2014. Some payroll adjustments for separated staff were posted in 2024.

Variance analysis

Cluster I

149. The proposed resource requirements for the 11 missions under cluster I for 2026 amount to $52.1 million, representing a net increase of $5.1 million (10.8 per cent) compared with 2025. The overall increase is attributable primarily to: (a) increased requirements for civilian personnel owing to the application of updated vacancy rates and revised salary rates; and (b) increased requirements under facilities and infrastructure for rental of premises for the Office of the Special Envoy of the Secretary-General for Syria for new office space in Damascus in compliance with the minimum operating security standards. The increase was offset in part by: (a) the removal of provisions for rental of a passenger charter plane and for services provided by the United Nations Office at Geneva for meetings of the International Syria Support Group and sessions of the Constitutional Committee for the Office of the Special Envoy for Syria; (b) reduced requirements for official travel in several missions; and (c) and reduced requirements for ground transportation for the Office of the Special Envoy of the Secretary-General for Yemen owing to the discontinuation of fuel reserves in Aden and Sana'a.

Cluster II

150. The proposed resource requirements for the 14 continuing missions under cluster II for 2026 amount to $38.0 million, representing a net increase of $0.7 million (1.9 per cent) compared with 2025. The overall increase is attributable primarily to: (a) increased requirements for expert fees owing to the issuance of new fee ranges by the Office of Human Resources; (b) higher estimates for common staff costs based on recent expenditure experience for staff entitlements; and (c) the application of lower vacancy rates for civilian personnel. The increase was offset in part by: (a) reduced requirements for telecommunications and network services owing to the reduced provision of a subscription to the emergency satellite communicator service and the removal of the provision for satellite telephone data and videoconference services based on utilization patterns; (b) the application of the latest reduced standard rate for communications and information technology for New York; and (c) the proposed abolishment of two posts as part of the effort of the Security Council Subsidiary Organs Branch of the Security Council Affairs Division to find efficiencies within its staffing levels by levering technology and consolidating functions. The resources reflect the expiration in October 2025 of the mandate of the mission supporting the implementation of Security Council resolution 2231 (2015), for which provision was made for 10 months in 2025.

Cluster III

151. The proposed resource requirements for the 10 missions under cluster III for 2026 amount to $384.9 million, representing a net decrease of $1.1 million (0.3 per cent) compared with 2025. The overall decrease is attributed to: (a) the planned drawdown of UNTMIS and the adjustment made to mission activities and services to cover only a 10-month period up to 31 October 2026, in accordance with the second phase of the mission transition as outlined in Security Council resolution 2753 (2024), and the proposed abolishment of 11 posts as from 1 January 2026; (b) reduced requirements for National Professional Officers due to the application of higher vacancy rates and the abolishment of two posts in UNMHA; (c) the application of higher vacancy rates for United Nations police officers in BINUH; (d) lower requirements for ground transportation due to reduced rental costs in the United Nations Verification Mission in Colombia with the implementation of the UN Fleet lease contract for the soft-skin fleet; (e) reduced requirements for communications and information technology equipment and its maintenance; and (f) reduced requirements for consultants owing to the higher reliance on in-mission expertise in UNOWAS and the United Nations Verification Mission in Colombia, as well lower estimates for travel and scope for civilian observers for the Cameroon-Nigeria Mixed Commission. The decrease was offset in part by additional requirements for: (a) military observers owing to an increase in mission subsistence allowance rates and the application of lower vacancy rates in UNMHA and the Verification Mission in Colombia; (b) air operations in the Verification Mission in Colombia to support broader mandate implementation in locations outside Bogotá and ensure connectivity between locations; and (c) facilities and

infrastructure for the construction of a new road and parking area, fuel station, infrastructure networks and other security enhancements in UNSMIL.

United Nations Assistance Mission in Afghanistan

152. The proposed resource requirements for UNAMA for 2026 amount to $124.5 million, representing a net decrease of $0.2 million (0.2 per cent) compared with the 2025 appropriation. The overall decrease is attributable to reduced requirements for civilian personnel, owing mainly to the abolishment of 117 posts and the application of a higher vacancy rate for international staff, offset by higher requirements for United Nations Volunteer costs owing to a lower vacancy rate and higher entitlement costs, as well as the proposed establishment of 18 new posts. The decrease in requirements is offset in part by increased requirements for operational costs, attributable primarily to additional requirements for: (a) construction of a central warehouse for more efficient space management and for the improvement of the wastewater treatment plant and compound facilities, including for security upgrades; and (b) acquisition of safety and security equipment as well as the replacement of prefabricated accommodation and equipment and engineering supplies required for the general maintenance of the compounds and to support planned minor projects.

Liquidation of the United Nations Assistance Mission for Iraq

153. The proposed resource requirements for the liquidation of UNAMI for 2026 amount to $38 million for the orderly liquidation of the Mission, representing a net decrease of $57.4 million (60.1 per cent) compared with the 2025 appropriation. The budget provides for the phased separation of the liquidation team of 135 existing posts to be retained into 2026, with the majority of the staff separating on 30 September 2026. In addition, provision is made for surge capacity from the Department of Operational Support and UNLB to assist with the liquidation activities.

Share of the cost of the Regional Service Centre in Entebbe

154. The special political missions' share of the cost of RSCE reflects an increase of $33,200, attributable mainly to an increase of the share of special political missions in the cost of the Centre, from 4.99 per cent in the 2024/25 period to 5.10 cent in the 2025/26 period. This reflects the addition of the Office of the Personal Envoy of the Secretary-General for the Sudan as a client and the decrease in peacekeeping missions' pro-rated share due to the closure of MINUSMA.

155. The estimated resource requirements of $46.3 million for the maintenance of the Centre for the 2025/26 financial period represent a decrease of $1.7 million, or 3.5 per cent, compared with the approved resources of $48.0 million for the 2024/25 period. The proposed budget reflects reduced requirements due primarily to the transfer of 42 posts (40 from current tenant units reporting to the Department of Operational Support and 2 seconded military planning officer posts reporting to the Department of Peace Operations) to the budgets of their parent offices in the support account. The reduced requirements are offset in part by: (a) the application of lower vacancy rates for international, national Professional and national General Service staff compared with the vacancy rates applied in the approved budget for the 2024/25 period; (b) the application of higher salary rates for national staff; (c) the application of an updated exchange rate for the Ugandan shilling to the United States dollar; and (d) an increase in operational costs mainly for safety and security unit requirements, and higher rates for new systems contracts.

156. The variance analysis of each mission is further provided in table 12.

Table 12
Variance analysis, by mission
(Thousands of United States dollars)

Mission	2025 appropriation	2026 requirements	Variance		Main contributing factors
			Amount	Percentage	
	(1)	(2)	(3)=(2)-(1)	(4)=(3)/(1)	
Cluster I					
1. Office of the Special Adviser to the Secretary-General on Cyprus	2 979.4	3 198.9	219.5	7.4	The increase is attributable mainly to the application of a lower vacancy rate for national staff compared with the rate of 20 per cent applied in 2025 and updated rates for salaries and common staff costs. The increase is offset in part by reduced requirements for the non-recurring acquisition of engineering supplies, prefabricated facilities, office furniture, printers and notebook computers and the related lower freight costs.
2. Office of the Special Adviser to the Secretary-General on the Prevention of Genocide	3 386.7	3 857.5	470.8	13.9	The increase is attributable mainly to the application of lower vacancy rates of 5.8 per cent and zero per cent for international staff (including for 3 posts established with a vacancy rate of 50 per cent) and national staff, respectively, compared with 10.9 per cent applied in 2025, as well as the application of the continuing rate for 3 national United Nations Volunteers positions established with a vacancy rate of 50 per cent in 2025. The increase is offset in part by the absence of a provision for consultants, the cancellation of 2 subscriptions for public information and reduced requirements for conference and translation services based on utilization patterns.
3. Personal Envoy of the Secretary-General for Western Sahara	502.7	560.0	57.3	11.4	The increase is attributable mainly to the application of a zero per cent vacancy rate compared with the rate of 12.5 per cent applied in 2025, which is offset in part by the reduced requirements for utilities and the application of the latest ICT standard rate.
4. Office of the Special Envoy of the Secretary-General for the implementation of Security Council resolution 1559 (2004)	359.6	430.9	71.3	19.8	The increase is attributable mainly to the application of a lower vacancy rate of zero per cent compared with the vacancy rate of 16.7 per cent applied in 2025, which is offset in part by the application of the updated ICT standard rate and the removal of long-distance telephone service.
5. United Nations Representative to the Geneva International Discussions	1 930.5	1 803.5	(127.0)	(6.6)	The decrease is attributable mainly to the application of a higher vacancy rate of 16.7 per cent for international staff, compared with the rate of 3.6 per cent applied in 2025, offset in part by the increased requirements for national staff due to the application of a zero per cent vacancy rate, compared with the rate of 3.6 per cent applied in 2025.
6. Office of the Special Envoy of the Secretary-General for Syria	12 551.7	15 027.7	2 476.0	19.7	The increase is attributable mainly to: (a) the application of a lower vacancy rate of 27.5 per cent compared with the rate of 32.7 per cent applied in 2025 for international staff, and the application of the latest salary rates; and (b) higher requirements for facilities and infrastructure owing to the need for additional office space in compliance with minimum operating security standards in Damascus. The increase is offset in part by the reduced requirements for air operations due to the removal of provisions for the rental cost of a passenger charter plane and for services provided by the United Nations Office at Geneva for meetings of the International Syria Support Group and sessions of the Constitutional Committee.

Mission	2025 appropriation	2026 requirements	Variance		Main contributing factors
			Amount	Percentage	
	(1)	(2)	(3)=(2)-(1)	(4)=(3)/(1)	
7. Office of the Special Envoy of the Secretary-General for the Horn of Africa	2 056.1	1 918.4	(137.7)	(6.7)	The decrease in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) the application of a 5 per cent vacancy rate for international staff compared with the budgeted vacancy rate of zero per cent in 2025; (b) the revised salary rate for National Professional Officers; (c) reduced requirements for official travel and training fees; (d) non-recurring acquisition of computers; and (e) lower estimated costs for Intelsat transponder charges. The decrease is offset in part by the increased requirements for the lease of electric vehicles through UN Fleet to replace 1 of the 4 ageing vehicles, which is more than 17 years old.
8. Office of the Special Envoy of the Secretary-General for the Great Lakes Region	4 941.7	5 623.8	682.1	13.8	The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to increased requirements for civilian personnel, resulting from the application of a lower vacancy rate of 12.7 per cent compared with the rate of 19.3 per cent applied in 2025 for international staff, and the application of the latest salary rates. The increase is offset in part by: (a) the non-recurring acquisition of furniture and information technology equipment; (b) reduced requirements for air operations in line with historical flight hour utilization rates; (c) reduced requirements for individual contractors; and (d) lower requirements for other services with respect to financial administrative services under other supplies, services and equipment class.
9. Office of the Special Envoy of the Secretary-General for Yemen	16 096.5	16 657.8	561.3	3.5	The increase in requirements proposed for 2026 compared with the appropriation for 2025 is attributable to higher requirements for civilian personnel, resulting from the application of the latest salary rates, higher common staff costs and the application of lower vacancy rates of 21.1 per cent and 30.8 per cent, respectively, for international staff and National Professional Officers, compared with the rates of 23.6 per cent and 42.9 per cent, respectively, applied in 2025. The increased requirements are offset in part by the reduced requirements, for: (a) facilities and infrastructure due to the application of lower cost-share percentages for the Office of the Special Envoy, reduced from 67 per cent to 58 per cent for the Sana'a and Aden offices, the parking lot lease and security services; (b) ground transportation owing to the discontinuation of fuel reserves in Aden and Sana'a; and (c) air operations due to the realignment of aviation fuel and rental costs for fixed-wing aircraft in line with historical flight hour utilization rates.
10. Office of the Special Envoy of the Secretary-General on Myanmar	949.9	995.6	45.7	4.8	The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to the application of revised salary rates.
11. Office of the Personal Envoy of the Secretary-General on the Sudan	1 282.4	2 064.7	782.3	61.0	The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to increased requirements for civilian personnel, resulting from the application of a vacancy rate of zero per cent compared with the rate of 50 per cent applied in 2025 for international staff, and the application of the latest salary rates. The increase is offset in part by reduced requirements for official travel due to less travel to New York proposed for 2026, and the non-recurrent acquisition of computers.

Mission	2025 appropriation (1)	2026 requirements (2)	Variance Amount (3)=(2)-(1)	Variance Percentage (4)=(3)/(1)	Main contributing factors
Cluster II					
12. Group of Experts on the Democratic Republic of the Congo	1 549.7	1 471.5	(78.2)	(5.0)	The decrease is attributable primarily to lower requirements for civilian personnel owing to the application of a higher vacancy rate compared with the rate of 16.7 per cent applied in 2025, which is offset in part by increased requirements for expert fees.
13. Panel of Experts on the Sudan	1 132.6	1 170.3	37.7	3.3	The increase is attributable primarily to increased requirements for expert fees, which are offset in part by lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
14. Support to the Security Council Committee established pursuant to resolution 1718 (2006)	591.3	675.9	84.6	14.3	The increase is attributable primarily to the application of a lower vacancy rate compared with the rate of 13.9 per cent applied in 2025, which is offset in part by the termination of software licences for the analysis of complex and large volumes of data, the termination of the NK News subscription, reduced requirements for official travel based on planned activities to implement the mandate, and the application of the latest ICT standard rates.
15. Panel of Experts on Libya	1 376.4	1 549.7	173.3	12.6	The increase is attributable primarily to the application of a lower vacancy rate for international staff compared with the rate of 45.8 per cent applied in 2025 and higher estimates for common staff costs, as well as increased requirements for expert fees. The increase is offset in part by lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
16. Panel of Experts pursuant to resolution 2745 (2024)	1 300.7	1 356.7	56.0	4.3	The increase is attributable primarily to increased requirements for expert fees and higher estimates for common staff costs. The increase is offset in part by the reduced provision for the rental of vehicles, lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
17. Panel of Experts on Yemen	2 389.0	2 660.7	271.7	11.4	The increase is attributable primarily to: (a) higher requirements for international staff owing to the application of a lower vacancy rate compared with the rate of 13.9 per cent applied in 2025 and higher estimates for common staff costs; and (b) increased requirements for expert fees. The increase is offset in part by lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
18. Panel of Experts on South Sudan	1 435.4	1 524.1	88.7	6.2	The increase is attributable primarily to higher estimates for common staff costs and increased requirements for expert fees, which is offset in part by lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
19. Analytical Support and Sanctions Monitoring Team pursuant to resolutions 1526 (2004) and 2253 (2015) concerning ISIL (Da'esh), Al-Qaida and the Taliban and associated individuals and entities	6 158.1	6 003.3	(154.8)	(2.5)	The decrease is attributable primarily to: (a) the abolishment of 2 General Service posts and the associated operational provisions; (b) the application of a higher vacancy rate for national staff compared with 2025; (c) lower requirements for telecommunications and network services; (d) the application of the latest ICT standard rates; and (e) the discontinuation of the subscription to the BBC Monitoring service as cost avoidance, as comparable content is accessible through an alternative subscription already available to the Monitoring Team. The decrease is offset in part by increased requirements for expert fees and the application of a lower vacancy rate for international staff compared with the rate of 17.5 per cent applied in 2025.

Mission	2025 appropriation (1)	2026 requirements (2)	Variance Amount (3)=(2)-(1)	Variance Percentage (4)=(3)/(1)	Main contributing factors
20. Office of the Ombudsperson established pursuant to Security Council resolution 1904 (2009)	729.8	770.3	40.5	5.5	The increase is attributable primarily to higher estimates for common staff costs and increased requirements for expert fees, which is offset in part by lower requirements in the telecommunications and network services and the application of the latest ICT standard rates.
21. Panel of Experts pursuant to resolution 2713 (2023)	1 960.2	2 101.0	140.8	7.2	The increase is attributable primarily to higher estimates for common staff costs and increased requirements for expert fees, which is offset in part by the reduced provisions for support services for experts at the United Nations Office at Nairobi, lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
22. Panel of Experts on Haiti	1 553.0	1 794.3	241.3	15.5	The increase is attributable primarily to the application of a lower vacancy rate compared with the rate of 33.3 per cent applied in 2025 and increased requirements for expert fees. The increase is offset in part by lower requirements for telecommunications and network services and the application of the latest ICT standard rates.
23. Office of the Focal Point for Delisting	774.8	680.7	(94.1)	(12.1)	The decrease is attributable primarily to lower requirements for civilian personnel costs owing to the application of an overall higher vacancy rate compared with the rate of 50 per cent applied for the 2 newly established posts and the rate of 8.5 per cent approved in 2025 for 1 post redeployed from the proposed programme budget for the Department of Political and Peacebuilding Affairs for 2025 to the Office, the removal of non-recurrent requirements for ICT approved in 2025 and the application of the latest ICT standard rates. The decrease is offset in part by the increased requirements for expert fees.
24. Support to the Security Council Committee established pursuant to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction	3 465.9	3 532.0	66.1	1.9	The increase is attributable primarily to the increased requirements for expert fees, the lower vacancy rate for international staff compared with the rate of 6.7 per cent applied in 2025 and a new requirement for conference costs related to the Committee's open consultations. The increase is offset in part by the application of a higher vacancy rate for national staff compared with the rate of 6.7 per cent applied in 2025 and the application of the latest ICT standard rates.
25. Counter-Terrorism Committee Executive Directorate	12 815.7	12 660.1	(155.6)	(1.2)	The decrease is attributable primarily to lower requirements for civilian personnel due to the application of a higher vacancy rate for international staff compared with the rate of 9.6 per cent applied for 2025 and the application of the latest ICT standard rates.
Subtotal, cluster II	**37 232.6**	**37 950.6**	**718.0**	**1.9**	
Cluster III					
26. UNOWAS	15 702.1	15 960.2	258.1	1.6	The increase is attributable mainly to the application of the latest salary rates for international staff and the application of a lower vacancy rate of zero per cent compared with the rate of 8.3 per cent applied in 2025 for National Professional Officers. The increase is offset in part by: (a) the non-provisioning of resources for consultants and consulting services in 2026 with the use of in-house capacity; (b) reduced requirements for air operations in line with historical flight hour utilization rates; (c) reduced requirements for official travel; (d) reduced requirements

Mission	2025 appropriation	2026 requirements	Variance		Main contributing factors
			Amount	Percentage	
	(1)	(2)	(3)=(2)-(1)	(4)=(3)/(1)	
					for other services for meeting and workshop facilitation services; and (e) lower requirements for communications and information technology due to lower estimated costs of software licences and fees, as well as less printing and fewer reproductions and magazine subscriptions for public information and publication services.
27. UNTMIS	100 177.3	97 616.4	(2 560.9)	(2.6)	The decrease is attributable mainly to the planned drawdown of UNTMIS and the adjustment made to mission activities and services to cover only a 10-month period up to 31 October 2026, in accordance with second phase of the mission transition as outlined in Security Council resolution 2753 (2024), and the proposed abolishment of 11 posts as from 1 January 2026.
28. United Nations Regional Centre for Preventive Diplomacy for Central Asia	3 555.7	3 458.8	(96.9)	(2.7)	The decrease is attributable mainly to: (a) the application of a lower percentage of common staff costs of 42.0 per cent compared with 51.5 per cent in the 2025 budget for international staff; (b) lower acquisition of safety and security equipment; and (c) lower acquisition of communications and information technology equipment. The decrease is offset in part by higher estimated common staff costs for Local level staff (estimated common staff costs as a percentage of salary costs of 37.0 per cent compared with 32.7 per cent in the 2025 budget) and increased requirements for individual contractual services to support mandated priorities in the area of youth and peace and security.
29. United Nations support for the Cameroon-Nigeria Mixed Commission	3 719.4	3 706.4	(13.0)	(0.3)	The decrease is attributable mainly to: (a) decreased requirements for consultants and consulting services due to reduced travel estimates and scope for civilian observers for observation of the withdrawal and transfer of authority in the Lake Chad area, along the boundary and in the Bakassi Peninsula, addressing the situation of affected populations; (b) lower acquisition of spare parts and communications and information technology equipment, as well as reduced requirements for the maintenance of equipment; and (c) reduced requirements for air operations in line with historical flight hour utilization rates and lower estimated aviation fuel costs. The decrease is offset in part by: (a) the application of revised salary rates and higher estimated common staff costs (common staff costs as a percentage of salary costs of 56.9 per cent compared with 50.4 per cent in the 2025 budget) based on past expenditure for international staff; (b) the application of a lower vacancy rate of zero per cent compared with the rate of 12.5 per cent approved for 2025 for national staff; and (c) higher estimated costs for the rental of premises and utilities for the office co-located with UNOWAS in Abuja.
30. Office of the United Nations Special Coordinator for Lebanon	11 122.4	11 604.3	481.9	4.3	The increase is attributable mainly to: (a) the proposed establishment of 5 posts; (b) the application of a lower vacancy rate of 5.0 per cent compared with the rate of 6.7 per cent approved for 2025 for national staff; (c) the replacement of prefabricated facilities and security equipment beyond its useful life, and increased requirements for rental costs and small alternation and renovation projects to meet the growing operational demands and enhance the working environment; (d) increased requirements for communications and information technology to replace critical, obsolete equipment and assets that have exceeded their life expectancy, as well as additional resources for public information services as part of a broader strategy to promote the implementation of Security Council resolution 1701 (2006); and (e) higher estimated freight costs for

Mission	2025 appropriation	2026 requirements	Variance		Main contributing factors
			Amount	Percentage	
	(1)	(2)	(3)=(2)-(1)	(4)=(3)/(1)	
					the equipment to be acquired. The increase is offset in part by lower requirements for international staff due to the application of the revised salary rates and the non-provisioning of resources for consultants and consulting services.
31. UNOCA	7 868.1	8 329.2	461.1	5.9	The increase is attributable mainly to: (a) the application of a lower vacancy rate of 12.1 per cent compared with the rate of 20.2 per cent in the approved budget for 2025 for international staff; and (b) the application of the most recent salary scale for Local level staff, The increase is offset in part by reduced requirements for air operations in line with historical flight hour utilization rates and the non-provisioning of resources for individual contractual services.
32. UNSMIL	90 588.7	90 432.2	(156.5)	(0.2)	The decrease in requirements is attributable mainly to: (a) reduced requirements for civilian personnel owing to the application of a 100 per cent vacancy rate to 35 posts vacant for more than 3 years, offset by the application of lower vacancy rates and the application of lower continuing vacancy rates for the 8 positions approved for establishment in 2025 and budgeted with a vacancy rate of 50 per cent; (b) reduced requirements for air operations in line with historical flight hour utilization rates; and (c) reduced requirements for United Nations Guard Unit personnel owing to the non-requirement for rations due to anticipated stock availability from prior-period procurement, as well as the removal of a provision for death and disability compensation following a review of historical expenditure patterns. The decrease is offset in part by increased requirements under: (a) facilities and infrastructure due to additional requirements for the construction of a new road and parking area, fuel station, infrastructure networks and other security enhancements in connection with phase 2 of the planned security enhancement works in the Mission's compound; and (b) new requirements for quick-impact projects.
33. United Nations Verification Mission in Colombia	86 582.3	86 953.1	370.8	0.4	The increase is attributable mainly to: (a) increased requirements for military observers due to the increase in mission subsistence allowance rates and the application of lower vacancy rates; (b) additional requirements for international United Nations Volunteers due to the increased monthly living allowance; (c) increased requirements for air operations due to a change in contractual arrangements and to additional flight hours to support broader mandate implementation in locations outside Bogotá and ensure connectivity between locations; and (d) additional riverine activities to cover an enlarged mission area, especially in locations that are not accessible by ground or air transportation. The increase is offset in part by: (a) lower estimated common staff costs (estimated common staff costs as a percentage of salary costs of 51.7 per cent compared with 56.8 per cent in the 2025 budget) for international staff; (b) the application of higher vacancy rates for National Professional Officers and national General Service staff; (c) reduced requirements for consultants owing to the higher reliance on in-mission expertise; (d) lower estimated costs for the rental of premises and non-acquisition of furniture; (e) lower estimated costs for the rental of vehicles; (f) lower acquisition of communications and information technology equipment; (g) lower requirements for medical services; and (h) lower requirements for freight due to fewer acquisitions.

Mission	2025 appropriation	2026 requirements	Variance		Main contributing factors
			Amount	Percentage	
	(1)	(2)	(3)=(2)-(1)	(4)=(3)/(1)	
34. UNMHA	31 002.1	30 040.5	(961.6)	(3.1)	The decrease is attributable mainly to: (a) the application of a higher vacancy rate of 27.5 per cent for the proposed budget for 2026 compared with 25.4 per cent applied during 2025 for international staff; (b) the application of a higher vacancy rate of 50.0 per cent for the proposed budget for 2026 compared with 25.8 per cent applied in 2025 for National Professional Officers, as well as the proposed abolishment of 2 National Professional Officers posts; and (c) reduced rental of premises, including for the Mission's locations in Sana'a and Hudaydah, lower acquisition of furniture and reduced requirements for generator fuel due to the discontinuation of the reserves. The decrease is offset in part by: (a) an increase in the mission subsistence allowance rate and a lower vacancy rate for United Nations monitors; (b) the establishment of additional Local level posts and revised salary scales in Amman; (c) increased repairs and maintenance of the ground fleet; and (d) increased requirements for aviation fuel and airport charges.
35. BINUH	35 705.0	36 804.9	1 099.9	3.1	The increase is attributable mainly to: (a) the application of lower vacancy rates and revised salary scales for both international and national staff; (b) increased requirements for facilities and infrastructure due to increased demand for security services; (c) increased requirements under other supplies, services and equipment due to increased demand for United Nations Humanitarian Air Service flights due lo logistical challenges and the cancellation of civil aviation flights; and (d) increased freight due to the expected receipt of assets from the United Nations reserve. The increase is offset in part by the application of higher vacancy rates for United Nations police officers, government-provided personnel and international United Nations Volunteers.

UNAMA and UNAMI					
36. UNAMA	124 695.0	124 463.1	(231.9)	(0.2)	The decrease is attributable to the net reduction of 87 posts and the application of a higher vacancy rate for international staff, which was offset in part by additional requirements for: (a) the construction of a central warehouse for more efficient space management and to upgrade the wastewater treatment plant and compound facilities, including for security enhancements; and (b) the acquisition of safety and security equipment as well as the replacement of prefabricated accommodation and equipment, and engineering supplies required for the general maintenance of the compounds and to support the planned minor projects.
37. UNAMI	95 399.1	38 041.0	(57 358.1)	(60.1)	The decrease is attributable to the phased drawdown and liquidation of the Mission, in line with Security Council resolution 2732 (2024).

Mission for the implementation of Security Council resolution 2231 (2015)	355.4	–	(355.4)	(100.0)	The mission's mandate is set to expire in October 2025. Provision was made for 10 months in 2025.
Provision for the share of special political missions for RSCE	2 298.8	2 332.0	33.2	1.4	The increase is attributable mainly to an increase of the share of special political missions in the cost of the Centre, from 4.99 per cent in the 2024/25 period to 5.10 per cent in 2025/26, due the addition of the Office of the Personal Envoy of the Secretary-General for the Sudan as an RSCE client and the decrease in peacekeeping missions' pro-rated share due to the closure of MINUSMA.

C. Human resources

157. The number of civilian personnel proposed for 2026, including international and national staff, United National Volunteers and general temporary assistance positions, reflects an overall decrease of 591 posts and positions, from 4,086 to 3,495. Details of the human resources requirements by cluster, by mission and by category of personnel are presented in tables 13 to 16.

Abbreviations: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; LL, Local level; NPO, National Professional Officer; USG, Under-Secretary-General.
Note: Posts indicated in table 16 are those funded or projected to be funded from extrabudgetary resources in the current and forthcoming year, based on the latest information available and projections made at the time of reporting. In keeping with established practice, the table does not include extrabudgetary general temporary assistance positions, positions that are billed to a third party or project posts that are not expected to be funded continuously for more than one year.

Annex I

Definitions

A. Terminology related to proposed changes in human resources

1. The following terms have been applied with respect to proposed changes in human resources:

- **Post establishment**: a new post is proposed to be established when additional resources are necessary and when it is not possible to redeploy resources from other offices or otherwise accommodate specific activities from within existing resources.
- **Post reassignment**: an approved post that was intended to cover a certain function is proposed to implement other priority mandated activities unrelated to the original function. While a post reassignment may involve a change of location or office, it does not change the category or level of the post.
- **Post redeployment**: an approved post is proposed to be redeployed to cover comparable or related functions in another office.
- **Post reclassification**: an approved post is proposed to be reclassified (upgraded or downgraded) when the duties and responsibilities of the post have changed substantially.
- **Post abolishment**: an approved post is proposed to be abolished if it is no longer needed to implement the activities for which it was approved or to implement other priority mandated activities within the mission.
- **Post conversion**: three possible options for post conversion are as follows:
  - Conversion of general temporary assistance positions to posts: approved positions financed under general temporary assistance are proposed for conversion to posts if the functions being performed are of a continuing nature.
  - Conversion of international staff posts to national staff posts: approved international staff posts are proposed for conversion to national staff posts.
  - Conversion of the approved source of funding: positions funded under extrabudgetary resources are proposed for conversion to be funded under the regular budget. Other attributes of the positions would remain unchanged.

B. Terminology related to variance analysis

2. The contributing factors for the resource variance according to specific standard options encompass the following categories listed below:

- **New and expanded mandates**: variances caused by changes in the scale or scope of the mandate.
- **Technical adjustments**: variances caused by adjustments due to increased provisions for posts approved for the preceding budget proposals with a 50 per cent vacancy rate that are subject to the proposed vacancy rate for continuing posts in the current proposed budget period. Other adjustments of a technical nature include changes in salary rates, vacancy rates, contractual rates or other changes in cost parameters as a result of United Nations regulations, rules and policies.

- **Management initiatives and efficiencies**: variances caused by management actions to achieve planned results more effectively (e.g. by reprioritizing or adding certain outputs) or efficiently (e.g. by taking measures to reduce personnel or operational inputs while maintaining the same level of outputs).
- **Other changes**: variances caused by resource changes that do not fall under the above factors.

Annex II

Summary of follow-up action taken to implement decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

A. General Assembly

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
Resolution 79/258 A	
Recalls paragraph 10 of the report of the Advisory Committee, and requests the Secretary-General to improve the overall presentation of the financial performance of the special political missions (sect. VIII, para. 3).	Information on the efforts of the Secretariat to improve the presentation of financial performance is provided is paragraphs 142–147.
Notes with appreciation the initiative to build a culture of efficiency in special political missions which generates accountability, saving and cost avoidance, and reiterates that Member State resources should be managed with utmost efficiency, and requests the Secretary-General to continue to improve the culture of efficiency in both headquarters and field missions, and use a data-driven approach in formulating budgetary requirements, based on mandated activities, and continue to report thereon in future budget submissions (sect. VIII, para. 4).	In response to the request of the General Assembly, budget proposals reflect increased efficiencies of 12.7 million (2.1 per cent) for 2026 compared with 9.3 million (1.3 per cent) for 2025, while not affecting the full and effective implementation of mandates, as further detailed in the section on building and strengthening a culture of efficiency and improved budgetary methodologies (paras. 111–118). A strategic approach to a culture of efficiency was also officially launched with all Special Representatives and Envoys of the Secretary-General in January 2025.
Requests the Secretary-General to continue to monitor the use of financial resources and to avoid unnecessary rushing expenditure of surplus funds before the end of the fiscal year, while acknowledging that spending progress could be impacted by liquidity management measures (sect. VIII, para. 5).	As the Organization continues to face liquidity challenges, the effectiveness of programme delivery and the use of financial resources depend on the availability of cash. Unless the liquidity reserves are replenished in full, cash conservation measures will likely constrain budget implementation, notwithstanding the efforts of programme managers to mitigate the negative impact of such measures and to commit funds to meet critical needs before the end of the fiscal year. In accordance with the Financial Regulations and Rules of the United Nations, missions were requested to refrain from redeploying unused funds for certain uses within the financial period for last-minute purchases or commitments aimed at achieving full budget implementation.
Recognizes that patterns of underexpenditure across various budget lines under the ongoing liquidity challenges of the Organization can be linked to limited released allotments, and stresses that this specific type of underexpenditure should not be used to achieve budgetary savings (sect. VIII, para. 6).	In accordance with existing practice, the budget proposals in the reports of the Secretary-General for all entities under the regular budget continue to assume that the full budget will be available to implement the mandated activities, i.e. that the proposed budgets are not constrained by liquidity. This does not preclude the

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	efforts of the Secretariat to present realistic budget proposals that reflect relevant historical consumption and utilization patterns based on a data-driven approach in the context of the current financial situation.
Recalls paragraph 13 of the report of the Advisory Committee, and requests the Secretary-General to provide information on liquidation within existing reports in a separate section, as appropriate (sect. VIII, para. 7).	Information of the liquidation activities of the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD) and the United Nations Integrated Transition Assistance Mission in the Sudan has been included in the reports of the Secretary-General for the missions grouped under cluster II and cluster III, with more detailed information included in the supplementary information packages.
Also recalls paragraph 36 of the report of the Advisory Committee, notes the progress in the nationalization of international positions in special political missions, and reiterates its request to the Secretary-General to continue his efforts to promote the nationalization of positions, whenever appropriate, as well as to build local capacity within the special political missions and to report thereon in the context of future budget submissions (sect. VIII, para. 8).	The section on promoting national capacities (paras. 73–76) contains information on the continued efforts by the special political missions to promote the nationalization of posts in response to the request of the General Assembly. The United Nations Integrated Office in Haiti (BINUH) is facing significant turnover among national staff, with the exodus of professionals from Haiti due to the prevailing security situation. The United Nations Assistance Mission in Afghanistan (UNAMA) continues to evaluate posts for nationalization, taking into consideration the restrictions imposed by the de facto authorities specifically targeting females, which may create obstacles to certain tasks. The United Nations Support Mission in Libya (UNSMIL) continues to engage in initiatives that enhance skills development and capacity-building efforts for national staff, contributing to long-term sustainability beyond the Mission's presence. Moving forward, missions will continue to explore further opportunities for nationalization, taking into account operational needs, security considerations and the availability of skilled local talent. By fostering national expertise and ownership, missions not only enhance their effectiveness but also contribute to the long-term stability and development of the regions they serve.
Notes the role of in-person engagement for the implementation of the mandates of special political missions, and requests the Secretary-General to make judicious use of resources for official travel (sect. VIII, para. 9).	While recognizing the significance of in-person engagement for the effective implementation of mandates, missions are implementing measures to minimize their requirements under official travel, including prioritizing the appropriate use of technology to attend virtual meetings and online training and minimizing travel requirements to attend workshops, conferences and meetings. Virtual engagements continue to complement in-person interactions when appropriate, helping to reduce travel frequency without compromising mission

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	effectiveness. In addition, in UNAMA, travel to field offices is restricted to single-day travel to reduce the payment for daily subsistence allowance. Efforts have been made by the Counter-Terrorism Committee Executive Directorate to consolidate travel itineraries, review the size of delegations, promote regional coordination, where feasible, and leverage opportunities for multi-organizational collaboration.
Reiterates its concern about the high number of vacancies, and requests the Secretary-General to fill vacant positions expeditiously, and to conduct a review on how to effectively utilize existing posts, including those that have been vacant for 24 months or longer, and to report the results of the review by proposing either their retention, with clear justification of need, changing of post or proposing their abolishment, as appropriate, in his future reports (sect. VIII, para. 10).	The Secretary-General imposed temporary restrictions on hiring to manage the evolving liquidity crisis, which prevented missions from executing hiring plans. Missions continue to engage in extensive reviews to include proposals to abolish long-vacant posts and positions in their budget submissions, when appropriate, demonstrating proactive measures to optimize staffing resources. Information on the status of recruitment of long-vacant posts is presented in the supplementary information for each thematic cluster.
Recalls its stipulation that the use of external consultants should be kept to an absolute minimum and that the Organization should utilize its in-house capacity to perform core activities or to fulfil functions that are recurrent over the long term (sect. VIII, para. 11).	The use of external consultants has been limited to an absolute minimum in the proposed budgets for 2026. The missions will prioritize the use of in-house capacity to perform core activities and to perform functions in the long term in support of successful mandate implementation. In the United Nations Transitional Assistance Mission in Somalia (UNTMIS) the proposed resources for consultants are dedicated to national staff capacity-building to facilitate job seeking and career transitioning for its staff. In the United Nations Regional Office for Central Africa, the use of internal expertise is prioritized to ensure cost-effectiveness, sustainability and the retention of institutional knowledge, strengthening the organization’s long-term capacity.
Also recalls the provisions of section XVIII of its resolution 61/276 of 29 June 2007, recognizes the important role played by quick-impact projects in establishing and building confidence in missions, also recognizes the importance of conducting assessments of the quick-impact projects regularly, on their needs and impact as required in resolution 61/276, requests the Secretary-General to include the conducted assessments in his next reports, and also requests the Secretary-General to enhance their impact (sect. VIII, para. 12).	The use of quick-impact projects has been limited in most special political missions, which focus on their primary mandate of political engagement, mediation and support for governance and the rule of law, often relying on partnerships with other entities to address immediate community needs. The United Nations Mission to Support the Hudaydah Agreement (UNMHA) has leveraged quick-impact projects in enhancing its engagement with the parties to the Agreement and focused on the thematic areas of women, income generation, education and health in designing quick-impact projects with the intended impact of confidence- and trust-building. An impact assessment of the 2023 projects is being conducted in 2025 to review the contributions that quick-impact

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	projects have made to advancing the mandate and the tangible benefits they have brought to beneficiaries. The findings and lessons learned from the impact assessment will be used to inform future design and implementation of the Mission's projects. In addition, for 2026, a provision of $50,000 is being proposed for UNSMIL for quick-impact projects to enhance confidence in the Mission's mandate to support the political process, reconciliation and the prevention of intra- and inter-community violence.
Further recalls paragraph 56 of the report of the Advisory Committee, and requests the Secretary-General to review the services provided to the existing clients of the Kuwait Joint Support Office and to report thereon in the context of his next report (sect. VIII, para. 13).	Information on the review undertaken by the Secretariat is provided in paragraphs 67–70.
Reaffirms its commitment to considering the review of the arrangements on the funding and backstopping of the special political missions and the recommendations of the Advisory Committee, and expresses its commitment to considering this matter, with a view to making a decision, without prejudging the outcome, at the main part of its eightieth session (sect. VIII, para. 14).	In accordance with General Assembly resolution 65/259 (sect. XIII, para. 7), the Secretary-General submitted a proposal to the Assembly in 2011 to review the funding and backstopping arrangements for special political missions (A/66/340). Pending a decision by the Assembly on the matter, as an ad hoc arrangement, resources for backstopping support are included in the budgets of the special political missions. At present, this remains the only sustainable way of providing backstopping support funded from assessed contributions in the absence of a dedicated mechanism to ensure relevant capacities for backstopping special political missions at Headquarters, in contrast to peacekeeping operations, which can draw on the support account for peacekeeping operations.
Expresses concern about the significant variance between the actual vehicle and computing device holdings and standard allocations in special political missions, and in this regard requests the Secretary-General to update the vehicle holding ratio and related guidance, as well as the computing device allocation ratio, to enable the missions to improve the transparency and accuracy of the relevant budgets (sect. VIII, para. 17).	The Standard Cost and Ratio Manual provides guidance to entities related to planning and estimating operational support resource requirements. In reviewing the vehicle holding ratios, the Secretariat found that a singular ratio for each category that was applicable to all entities was not practicable. The standard ratio for light passenger vehicles for field missions is to be used as a guide when assessing ground transportation needs, subject to the relevance to operations in any given Secretariat entity. In response to the request of the General Assembly to improve transparency and accuracy in computing device allocations in special political missions, the guidelines issued by the Office on Information and Communications Technology reinforced the "one computing device per user" policy as a best-practice reference to improve budget discipline, cost-effectiveness and alignment with Secretariat-wide information and communications technology (ICT)

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	governance. Individual missions may deviate from the guidelines on the basis of operational requirements. Any requests exceeding standard allocations must be accompanied by clear operational justification approved by the head of entity.
Welcomes the early issuance of reports, and requests the Secretary-General to continue to present future budget proposals for special political missions, including revised estimates when applicable, at the beginning of the Fifth Committee session in order to allow sufficient time for consideration by the General Assembly (sect. VIII, para. 18).	The Secretariat will continue its efforts to set and adhere to submission deadlines for reports to the General Assembly to ensure that the budget proposals are presented at the beginning of the Fifth Committee session to allow sufficient time for consideration by the Assembly.
Requests the Secretary-General to also include in the Umoja budget portal budget data for special political missions in line with how information is presented in Umoja for peacekeeping operations, and also requests the Secretary-General to strengthen his efforts to provide accurate and precise information in Umoja (sect. VIII, para. 19).	In response to the request of the General Assembly, the Secretariat will enhance the use of the budget information portal to provide more disaggregated data and statistics from the reports.
Emphasizes the importance of adequate energy and waste management in order to minimize risk to people, societies and ecosystems, and requests the Secretary-General to intensify the efforts aimed at reducing the overall environmental footprint of missions, including through the implementation of environmentally responsible waste management and power generation systems, also working towards a potential positive legacy for host communities, in full compliance with the relevant regulations and rules (sect. VIII, para. 20).	Field-based special political missions are included in the scope of The Way Forward: Environment Strategy for Peace Operations 2023–2030 and the environmental policy for peacekeeping missions and field-based special political missions (Department of Operational Support, 2021). As such, missions are implementing measures to improve energy, solid waste and wastewater management with technical assistance from the Department and are reporting environmental performance data on the common environmental action planning and performance platform, culminating in the issuance of annual mission environmental scorecards available for Member States. In the United Nations Verification Mission in Colombia, the solar power system planned to be installed during 2025 will generate increased efficiencies in electrical power generation and reduce energy costs and the carbon footprint. In BINUH, the installation of a solar power system has, since January 2023, made it possible to offset 17.2 tons of carbon dioxide emissions into the atmosphere. The mission started a campaign to prohibit the use of single-use plastics on mission grounds and continued the implementation of vehicle idling policies to save fuel and reduce pollution. To save fuel in Hudaydah, UNMHA has installed a photovoltaic-diesel hybrid system that combines solar power from a photovoltaic system with the generators, saving 19 per cent of power consumption and approximately 3,500 litres of fuel per month. The Unite field remote infrastructure monitoring system makes it possible to detect potential

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	leakages and monitor water and fuel consumption. Other measures implemented by UNMHA and the Office of the Special Envoy of the Secretary-General for Yemen include the usage of energy-saving efficient light emitting diode lights, inverter-type air conditioning units and motion sensors. UNAMA has wastewater treatment plants to minimize the risk of contaminated water and recycles treated wastewater for gardening purposes, and has also installed solar power systems and conserves power through improved management and an awareness campaign to minimize the use of fossil fuels, resulting in a reduction of carbon emissions. The Office of the United Nations Special Coordinator for Lebanon is working collaboratively with the United Nations Interim Force in Lebanon (UNIFIL) on the environmentally responsible disposal of decommissioned equipment and is prioritizing resource efficiency, including paper recycling and the installation of light emitting diode lighting. UNSMIL completed the installation of solar street lights in the compound in Tripoli, with yearly consumption of 12,300 kWh, and will implement solar power projects for prefabricated offices with a capacity of 100 kW in 2025. It will also continue the solar power project for offices in 2026 to reduce its environmental footprint. A quarterly beach-cleaning campaign is conducted to reduce the environmental footprint of waste management. Initiatives implemented by UNTMIS included the expansion of the renewable energy base from 9 per cent to 23 per cent following the expansion of solar panels at the mission site in Mogadishu, the connection of the site at Baidoa to the Kube Energy solar power plant, the use of light emitting diode lights, efficient air conditioners, light motion sensors and diesel generator synchronization, resulting in environmental performance of 86 per cent.
Stresses that special political missions and other United Nations entities should identify areas of complementarity and avoid duplication of resources, while carrying out their distinct mandates, including in cooperation with host countries, and encourages the Secretary-General to inform the General Assembly on the efficiencies achieved as a result of this coordination in the context of his next report (sect. VIII, para. 21).	Owing to the variety and diversity of special political missions, their cooperation with peacekeeping operations will differ according to the type of mandates they are requested to perform. Since the reform of the peace and security pillar in 2019, the ability of the Secretariat to ensure close collaboration between all missions operating in a similar region has been significantly strengthened, as they are now backstopped by the shared regional structure of the Department of Political and Peacebuilding Affairs and the Department of Peace Operations at Headquarters. Sanctions panels and monitoring groups are mandated to support targeted Security Council sanctions regimes that might pertain to situations in which peacekeeping operations are deployed, such as the Central African

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	Republic, the Democratic Republic of the Congo and South Sudan. In certain cases, special political missions (including sanctions panels and monitoring groups) with regional mandates may work closely with a country-based special political mission and/or peacekeeping operation to address regional issues that might have an impact on their area of operation. In these cases, ad hoc operational support and the recovery or sharing of costs is provided on an as-needed basis, ensuring coordination for transportation, security and other administrative matters. By fostering cooperation across the United Nations system, the Office of the Special Envoy of the Secretary-General for the Great Lakes Region seeks to maximize the impact of its work and contribute to greater organizational efficiency. In BINUH, the efforts in place to strengthen integration include joint participation by the mission and the United Nations country team in the key policymaking and strategy forums, and collaboration through joint programmes and teams in areas including community violence reduction, justice, elections and police reform. The Counter-Terrorism Committee Executive Directorate has continued to coordinate closely with The Office of Counter-Terrorism and the United Nations Office of Drugs and Crime to ensure distinct but mutually reinforcing roles in supporting Member States' efforts to counter terrorism. Regular inter-agency consultations and information-sharing mechanisms have been institutionalized to align technical assistance, avoid overlapping activities and maximize the impact of field engagements. The Office of the United Nations Special Coordinator for Lebanon remains committed to identifying, where feasible, measures and strategies to increase efficiencies and strengthen synergy and coordination practices, with UNIFIL specifically and with other United Nations entities in Lebanon, and receives technical and transactional support from UNIFIL in the areas of finance, procurement, engineering, ICT, medical service, contingency planning and other logistics, as required. UNSMIL and other United Nations entities conduct joint programmes (on electoral assistance and the young female training programme (Ra'idat)), joint coordination activities with government officials through the United Nations Sustainable Development Cooperation Framework and joint analysis through an economic hub of United Nations staff economists.

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
Requests the Secretary-General to conduct a review on flexible working arrangements in special political missions and report thereon to the General Assembly in the context of his next budget submission (sect. VIII, para. 22).	Missions are requested to comply with the provisions outlined in the Secretary-General's bulletin (ST/SGB/2019/3) and the information circular (ST/IC/2019/15) on flexible working arrangements. In December 2024, additional policy information was issued by the Office of Human Resources to clarify the flexible working arrangements and alternate working arrangements. In January 2025, UNSMIL issued a standard operating procedure to all Mission personnel on the use of flexible working arrangements and is closely monitoring the use of the benefit in order to ensure consistency with the relevant policy. In the United Nations Verification Mission in Colombia, due to space limitations in Bogotá resulting from the merging of two locations into the main building in an effort to control costs, some units must resort to alternate working arrangements, with staff requested to work from home a maximum of two days per week.
Calls upon the Secretary-General to continue his efforts to advance the implementation of the zero-tolerance policy on sexual exploitation and abuse throughout the United Nations system, including the agencies, funds and programmes, peacekeeping missions and non-United Nations forces authorized by the Security Council (sect. VIII, para. 23).	The Secretariat continues to engage with Member States on prioritizing collective efforts to prevent misconduct, applying enforcement measures and supporting and assisting victims affected by acts of misconduct. Updates on action taken by the Secretariat to strengthen the prevention of and response to sexual exploitation and abuse are provided in the report of the Secretary-General on special measures for protection from sexual exploitation and abuse (A/79/789).
Stresses and re-emphasizes that best value for money; fairness, integrity and transparency; effective international competition; and the interest of the United Nations remain the four general principles of United Nations procurement, and requests the Secretary-General to ensure that those principles are adhered to in all United Nations procurement activities (sect. VIII, para. 24).	The Secretary-General confirms that the Secretariat remains guided by the four general principles of United Nations procurement in accordance with regulation 5.12 of the United Nations Financial Regulations and Rules.
Reiterates the importance of thorough, responsive and advance planning for any mission transition process based on operational drawdown and transition plans that draw on lessons learned and take account of specific circumstances (sect. VIII, para. 25).	The Secretariat continues to refine its approach to all aspects of mission transition and closure, taking account of specific circumstances. The Department of Political and Peacebuilding Affairs, the Department of Operational Support, the Department of Management Strategy, Policy and Compliance, special political missions and United Nations country teams have worked closely with host Governments and partners to ensure that United Nations activities in each country are planned in a more integrated and forward-looking manner, including for drawdown and transition plans, as further detailed in paragraphs 37–48.

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	The Department of Operational Support has recently completed a lessons learned process following the closure of the United Nations Multidimensional Integrated Stabilization Mission in Mali and will shortly commence the process of rewriting the liquidation manual based on lessons learned from all mission closures since 2019.

B. Advisory Committee on Administrative and Budgetary Questions

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.1), as endorsed by the General Assembly in its resolution 79/258 A	
The Advisory Committee is of the view that, as part of the programme budget, the financial performance reporting of the special political missions should be enhanced in future financial performance reports of the programme budget, including more comprehensive and detailed information on the budget implementation against provisions by mission and by budget class, with information on unliquidated obligations and the cancellation of prior-period obligations, other staff costs, among others, in particular for those missions operational in the field under thematic cluster III (para. 10).	Information on the efforts of the Secretariat to improve the presentation of financial performance is provided is paragraphs 142–147.
The Advisory Committee is of the view that, for bigger and more complex special pollical missions, such as UNITAD, there is a need to report liquidation activities, in a separate report or separate section, to improve transparency, regardless of whether a budget report is required. The Committee trusts that the Secretariat will report on the liquidation activities of UNITAD in a comprehensive and detailed manner in 2025 (para. 13).	In response to the recommendation of the Advisory Committee, the reports of the Secretary-General for thematic clusters II and III (A/80/6 (Sect. 3)/Add.3 and A/80/6 (Sect. 3)/Add.4) contain information on the liquidation activities of UNITAD and the United Nations Integrated Transition Assistance Mission in the Sudan.
The Advisory Committee acknowledges the efforts made to identify efficiency gains in the budgetary preparation process for the special political missions for 2025. The Committee trusts that the Secretariat will make additional efforts in all future budget submissions for both the programme budget and peacekeeping operations (para. 20).	In response to the recommendation of the Advisory Committee, the budget proposals for special political missions reflect efficiencies of $12.7 million, as further detailed under the section on building and strengthening a culture of efficiency.
The Advisory Committee trusts that more detailed information on the new framework memorandum of understanding signed with the United Nations Office for Project Services (UNOPS) will … be included in the next overview report of the peacekeeping operations (para. 31).	As indicated in the most recent report of the Secretary-General on the overview of the financing of the United Nations peacekeeping operations (A/79/788, para. 114), where programmes are implemented in partnership with UNOPS, such functions will be performed in line with the

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	memorandum of understanding between the Secretariat and UNOPS, revised in May 2024.
The Advisory Committee recalls that, further to its resolutions 61/276 and 66/264, the General Assembly, in its resolution 74/263, requested the Secretary-General to continue his efforts to promote the nationalization of positions, whenever appropriate, as well as to build local capacity within the special political missions and to report thereon in the context of future budget submissions (para. 36).	Special political missions continue to make efforts to ensure that the Advisory Committee's recommendations regarding the nationalization of posts are addressed, as illustrated above and in paragraphs 73–76.
The Advisory Committee reiterates that all vacant posts should be filled as soon as possible and trusts that updated information on the recruitment status of all vacant posts will be provided … in the next budget submission (para. 40).	Information on the status of recruitment of long-vacant posts is presented in the supplementary information for each thematic cluster.
The Advisory Committee, while noting the improvement made in the overall compliance rates during 2023 by 27 missions, with 17 missions reaching compliance rates of 50 per cent or higher, recalls that the General Assembly, in its resolution 77/263 B, reiterated its serious concern at the low compliance with the advance purchase policy directive in all travel categories and requested the Secretary-General to take more effective measures to improve the situation in order to reduce air travel costs, given that most official travel is not carried out for the purpose of emergency situations or unforeseen requirements (resolution 77/263 B, para. 8) (para. 44).	Missions continue their efforts to comply with the advance purchase policy and monitor closely compliance to ensure full adherence to policy requirements. BINUH adheres to the advance purchase policy for travel to benefit from competitive ticket costs and ensures that only economy class tickets are issued for all travel to attend approved training sessions. The Counter-Terrorism Committee Executive Directorate has been proactively coordinating with relevant Member States and organizations to ensure that planning is done well in advance, thereby ensuring compliance with the policy directive. The Office of the Special Adviser to the Secretary-General on Cyprus issued a circular to all staff reminding them of the need to comply with the advance purchase policy on official travel. In the Great Lakes region, the volatile and unpredictable political context often necessitates last-minute travel. Despite these challenges, the Office of the Special Envoy of the Secretary-General for the Great Lakes Region remains committed to identifying and pursuing opportunities to improve compliance wherever feasible. On 3 March 2024, UNAMA, through the bimonthly bulletin of the Chief of Mission Support, informed all staff that they should enter their trips (in Umoja) 21 days in advance of the travel date and introduced preparation for quarterly travel plans that facilitate advance follow-up by travel focal points with staff members to ensure timely action in Umoja for budgeted travel. UNTMIS monitors and reports on progress on compliance quarterly through a comprehensive review, enabling the Mission to undertake targeted action to streamline operations and mitigate factors contributing

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	to non-compliance. Improved coordination and communication between departments have been prioritized, particularly for routine business-as-usual meetings, to synchronize travel plans effectively. The United Nations Verification Mission in Colombia has made a conscious effort to reduce exceptions to the 21-day policy, having established a portal dedicated to submitting such requests and subdelegating internally to properly monitor requests. Special political missions in cluster II supported by the Department of Political and Peacebuilding Affairs have improved their compliance with the 16-day advance booking policy due to better planning for travel missions and better communication with experts, committees and Member States on the importance of compliance with the policy. In 2023 and 2024, the average compliance rate was 71 per cent.
The Advisory Committee acknowledges the efforts made by the Secretariat to achieve cost efficiency, including by strengthening a data-driven approach in formulating budgetary requirements for 2025 for special political missions. The Committee trusts that efforts will be continued to ensure that the air fleets in the missions are used in the most effective and efficient manner and that consideration is given to any possibility of inter-mission cooperation, including with peacekeeping missions (para. 48).	The Secretariat has taken measures to seek efficiencies and enhance the utilization of air fleets, as further detailed in paragraphs 100 and 120. Missions continue to make efforts to ensure that their air operation requirements are fulfilled in the most effective and efficient manner, including through inter-mission cooperation with other special political missions or peacekeeping missions, when possible. In March 2024, BINUH benefited from airlift capacity by utilizing the on-call contract maintained by the Department of Operational Support during the first evacuation and support from the United Nations Verification Mission in Colombia during the second evacuation in November 2024. UNAMA has established a memorandum of understanding with the United Nations Humanitarian Air Service on cooperation in air operations. The efforts include maximizing seat utilization on every flight leg through the frequent use of the Service’s flights to transport the Mission’s passengers when their numbers do not justify the activation of the Mission aircraft. It leads to the reduction of flight hours and fuel consumption used by the Mission. Because of its geographic location, the Mission has limited opportunities for inter-mission cooperation, including with peacekeeping missions. Such support would entail long and empty positioning and depositioning flights. UNSMIL implemented a quarterly data-driven review of flight schedules, smart planning and dynamic retasking, and ensures coordination with the Strategic Air Operations Centre at the United Nations Logistics

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	Base at Brindisi, Italy, to explore potential inter-mission cooperation. UNTMIS shares with the United Nations Support Office in Somalia three fixed-wing and two rotary-wing aircraft at a ratio of 30:70. In light of the expected mandate termination of UNTMIS, the United Nations Support Office in Somalia will review the overall air fleet to determine the correct fleet numbers to maintain the mandated support to UNTMIS.
The Advisory Committee acknowledges the importance of quick-impact projects and trusts that continued efforts will be made to implement more impactful projects, where relevant, and updated information included in the next budget (para. 51).	In 2026, UNSMIL will work through quick-impact projects to enhance confidence in its mandate to support the political process, reconciliation and the prevention of intra- and inter-community violence.
The Advisory Committee notes the impending review of the services provided to the existing clients of the Kuwait Joint Support Office for UNAMA and the United Nations Assistance Mission for Iraq (UNAMI) pending the drawdown of UNAMI pursuant to Security Council resolution 2732 (2024) (para. 56).	In late 2024, the Department of Operational Support conducted a review of the Kuwait Joint Support Office, as detailed in paragraphs 67–70.
The Advisory Committee reiterates that the Kuwait Joint Support Office is not a shared service centre approved by the General Assembly. Furthermore, in accordance with Assembly resolution 70/248 A, any changes to the existing and future service delivery model must be approved by the Assembly (para. 57).	Subject to the endorsement of Member States, it is the intention of the Secretariat to transfer the 16 client missions of the Kuwait Joint Support Office to the Regional Service Centre in Entebbe, Uganda (RSCE). This transition will be completed by the end of the UNAMI liquidation process, which is projected to be at the end of September 2026.
The Advisory Committee notes the continued lack of clear criteria in the designation of service providers to peacekeeping and special political missions by the Secretariat (para. 58).	As detailed in the sections on RSCE and the Kuwait Joint Support Office, the Secretariat expressed its intention to propose the transfer of the 16 client missions currently supported by the Office to RSCE. Upon review by the Advisory Committee and approval by Member States, this measure will bring the designation of service providers for peacekeeping and special political missions more closely in line with the global mandate of the Department of Operational Support and RSCE.
The Advisory Committee trusts that an update on a comprehensive analysis of the root causes for the substantial variances between actual vehicle and computing devices holdings and standard allocations, as well as potential update to the Standard Cost and Ratio Manual, will be provided in the next budget submission for special political missions (para. 66).	In reviewing the vehicle holding ratios, the Secretariat found that a singular ratio for each category that was applicable to all entities was not practicable. Following consultation with client entities, it transpired that actual requirements and standards should factor in the entities' operational requirements as well as the functions performed by different types of personnel. As an example, functions that require night shifts or the ability to respond to unforeseen circumstances, allowing for a 24/7 response, should be weighted in. As such, the Secretariat will need to conduct a full assessment of client entities' needs to

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	ensure that the ratios are geared towards enabling the implementation of the entities' mandates. The Office of Information and Communications Technology issues budget guidelines to provide detailed instructions on the planning, justification and distribution of ICT resources, including updated equipment allocation ratios, life cycle guidance and distribution of shared and personal computing devices. It is important to note that individual missions may deviate from the guidelines on the basis of operational requirements.
The Advisory Committee notes the continued efforts to improve the formulation and presentation of the budget submissions for special political missions for 2025, including the identification of efficiency gains, enhanced performance reporting for air operations, mine action and construction projects for field-based special political missions, under thematic cluster III, UNAMA and UNAMI. The Committee trusts that further efforts will be made in future budget submissions, such as the inclusion of the total amounts in annexes XI, XII, XIII, and XIV to the report of the Secretary-General (para. 68).	In response to the recommendations made by the Advisory Committee, the presentation of reports of the Secretary-General and supplementary information packages have been improved to include additional information on performance reporting for air operations, mine action and construction projects for field-based special political missions, under thematic cluster III, UNAMA and UNAMI.
The Advisory Committee trusts that information on annual appointments to geographical posts by mission, level, nationality and representation status will be provided in future budget submissions for the special political missions, starting with the information from 1 January to 31 December 2024 in the proposed budget for 2026 (para. 72).	Attaining equitable geographical distribution is a high priority of the Secretary-General, and concerted efforts have been made over the years to accelerate progress. Information about progress in achieving equitable geographical distribution and related actions is provided in the reports of the Secretary-General on human resources management, including the report on the composition of the Secretariat (staff demographics) and the report on the overview of human resources management reform for the period 2023–2024, submitted to the General Assembly at the first part of its resumed seventy-ninth session.
The Advisory Committee recalls that the General Assembly, in its resolution 75/253 A (sect. XVIII), requested the Secretary-General to make stronger efforts to improve geographical representation and gender balance in special political missions. Furthermore, the Assembly, in its resolution 76/246 A (sect. X), also requested the Secretary-General to take measures, including through the recruitment of new staff and by strengthening the accountability framework of the managers, to improve geographical representation and gender balance in all the special political missions and provide an update in future budget submissions, including on geographical representation by nationality (para. 76).	Missions have taken measures to strengthen efforts to achieve equitable geographical representation in their workforce. Hiring managers are required to demonstrate, using current data on geographical representation, the impact of such recommendations. The revised template for selection memorandums now allows hiring managers to review, before a candidate is selected, whether the proposed selection improves the geographical representation of the mission. Data are also monitored quarterly through the management dashboard to guide the course of recruitment actions. The geographical representation, by country, of international staff posts in all special political missions is provided in the supplementary information.

Brief description of the recommendation or request	*Action taken to implement the recommendation or request*
	BINUH reaches out to rostered candidates from unrepresented and underrepresented countries, especially female candidates, and encourages them to apply, and has widened outreach by publishing vacancy announcements in the local media as well as on online platforms such as LinkedIn and ReliefWeb. The Mission has implemented measures to increase the pool of female candidates applying for positions by waiving the French language requirement for jobs for which a working knowledge rather than fluency may be sufficient. In the Office of the Special Envoy of the Secretary-General for the Great Lakes Region, geographical representation is also monitored on a quarterly basis through the management dashboard to guide the course of recruitment actions. In July 2024, UNSMIL issued an inter-office memorandum on the implementation of special measures for recruitment, in which it was stated that, effective immediately, all ongoing and future recruitment processes must ensure that female candidates are given priority. This measure includes integrating gender perspectives into all aspects of the Mission's work, from the development of workplans and goals, to implementation and evaluation. This is also applicable for geographical representation.

Special political missions

Thematic cluster I: special and personal envoys, advisers and representatives of the Secretary-General

Summary

The present report contains the proposed resource requirements for 2026 for 11 special political missions grouped under the thematic cluster of special and personal envoys, advisers and representatives of the Secretary-General.

The proposed resource requirements for 2026 for special political missions grouped under this cluster amount to $52,138,800 (net of staff assessment).

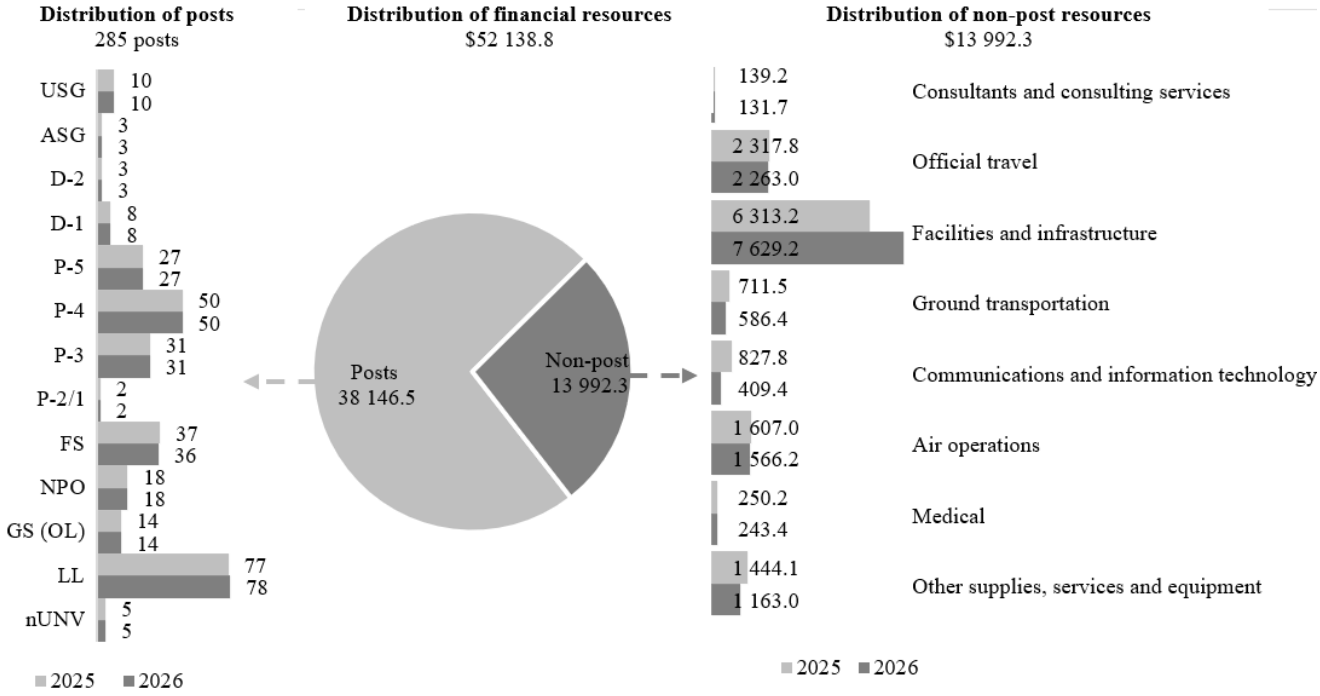
Figure I
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



2. The overall increase of $5.1 million is attributable primarily to: (a) increased requirements for civilian personnel, owing to the application of updated vacancy rates and revised salary rates; and (b) increased requirements under facilities and infrastructure for rental of premises for the Office of the Special Envoy of the Secretary-General for Syria for new office space in Damascus in compliance with the minimum operating security standards. The increase was offset in part by: (a) the removal of provisions for rental of a passenger charter plane and services provided by the United Nations Office at Geneva for meetings of the International Syria Support Group and sessions of the Constitutional Committee for the Office of the Special Envoy of the Secretary-General for Syria; (b) reduced requirements for official travel in several missions; and (c) reduced requirements for ground transportation for the Office of the Special Envoy of the Secretary-General for Yemen owing to the discontinuation of its maintenance of fuel reserves in Aden and Sana'a.

3. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy factors include the 12-month average vacancy rate in 2024 and the actual vacancy rate as at 31 March 2025. The lower of the two was used as the budgeted vacancy rate. This is in line with the policy guidance to improve the accuracy and consistency of the vacancy factors applied in the proposed budgets for 2026 and to ensure that the proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the posts proposed for reassignment or conversion.

4. For the sake of brevity, the present document will include a section on extrabudgetary resources only for those missions that have projected extrabudgetary resources in 2025 or 2026.

II. Cross-cutting information

Gender perspective

5. Special political missions are guided by the relevant Security Council resolutions[1] on the women and peace and security agenda, which mandate the incorporation of a gender perspective into the political work of the United Nations, including in special political missions. The missions are also guided by General Assembly resolution 75/100 on the comprehensive review of special political missions, in which the Assembly reaffirmed the important role of women in the prevention and resolution of conflicts and in peacebuilding and recognized the importance of the equal and effective participation and the full involvement of women at all levels, at all stages and in all aspects of the peaceful settlement of disputes, conflict prevention and conflict resolution.

6. Specific examples of how special political missions integrate a gender perspective into their operational activities, deliverables and results are given under the individual missions in the present report.

Disability inclusion

7. In line with the United Nations Disability Inclusion Strategy, special political missions review the Strategy with a view to further advancing disability inclusion through inclusive messaging, awareness-raising and promoting the Strategy through their work, including in political and peace processes. The missions also support mitigating measures to overcome accessibility challenges, in addition to the efforts by relevant United Nations entities to ensure the accessibility of facilities, platforms, security and other infrastructure to facilitate easy access and use by persons with disabilities.

Evaluation activities

8. The Department of Political and Peacebuilding Affairs of the Secretariat is supporting the biennial assessment by the Office of Internal Oversight Services, initiated in 2024 and expected to be completed in mid-2025, on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives. The results of the evaluation will guide proposed programme plans for missions grouped under thematic cluster I. In addition, the Office of Internal Oversight Services has conducted an evaluation of conflict-specific special political missions under thematic cluster I, which is currently being finalized. Mission-specific evaluation activities are described, as applicable, under the specific missions in the present report.

[1] Resolutions 1325 (2000), 1820 (2008), 1888 (2009), 1889 (2009), 1960 (2010), 2106 (2013), 2122 (2013), 2242 (2015), 2467 (2019) and 2493 (2019).

III. Special political missions

1. Office of the Special Adviser to the Secretary-General on Cyprus

($3,198,900)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

9. The mandate of the mission derives from the priorities established in relevant Security Council resolutions and decisions and an exchange of letters between the Secretary-General and the President of the Security Council (S/2008/456 and S/2008/457). In resolution 1818 (2008), the Council welcomed the intention of the Secretary-General to appoint a Special Adviser, and, in a letter addressed to the President of the Security Council (S/2008/456), the Secretary-General announced his intention to appoint his Special Adviser on Cyprus as from 14 July 2008. Relevant Security Council resolutions from which the mandate derives include resolution 186 (1964) and various subsequent Council resolutions, the latest being resolution 2771 (2025).

10. In its resolution 2771 (2025), the Security Council fully supported the Secretary-General's ongoing engagement and welcomed the agreed constructive next steps. The Council welcomed the Secretary-General's plans to convene an informal broader meeting with the two sides and the guarantor powers to discuss the way forward, encouraged further informal talks, emphasized the importance of negotiating a mutually acceptable settlement under United Nations auspices and called urgently on the sides to engage with the Secretary-General and his team to that end.

Programme of work

Objective

11. The objective, to which this mission contributes, is to achieve a comprehensive settlement of the Cyprus issue.

Strategy and external factors for 2026

12. To contribute to the objective, the mission will:

(a) Support the two leaders and guarantor powers to promote a peaceful solution and to assist them, should they jointly agree, in the conduct of full-fledged negotiations;

(b) Regularly conduct bilateral meetings and facilitate joint meetings between the leaders and their representatives, emphasizing the importance of effective communication for conflict prevention and trust-building;

(c) Support the implementation of confidence- and trust-building measures and initiatives and the work of the technical committees.

13. The above-mentioned work is expected to result in:

(a) Dialogue among the parties resulting in further rounds of informal talks towards a comprehensive and just settlement in Cyprus;

(b) Meetings and the expansion of bicommunal contacts;

(c) Empowerment and facilitation of the work of the technical committees, resulting in concrete measures and the implementation of confidence-building measures and initiatives.

14. With regard to cooperation with other entities, the mission will coordinate the engagement of international financial institutions in support of the peace process and cooperate with the European Commission, when requested.

15. With regard to inter-agency coordination and liaison, the mission, the United Nations Peacekeeping Force in Cyprus and the United Nations country team will maximize synergies and ensure coherent and effective support for peace efforts.

16. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Continued and sustained political commitment of the parties to the peace process and the technical committees;

(b) Continued and sustained international support for the peace process.

17. The mission integrates a gender perspective into its activities, advocates for gender equality across the work of all technical committees and supports women's civil society platforms. It also advocates for greater civic inclusion and the involvement of youth and underrepresented groups.

18. In line with the United Nations Disability Inclusion Strategy, the mission will further mainstream disability inclusion into its work, advocate for the inclusion of persons with disabilities in engagement with the sides and the technical committees and ensure accessibility and employment opportunities for qualified candidates with disabilities.

Programme performance in 2024

Engagement with the parties, decision to work on crossings, improved dialogue and chances for movement ahead, lowered tensions and raised hope among Cypriots, improving their situation vis-à-vis prospects for peace talks

19. On 5 January 2024, the Secretary-General appointed Ms. María Ángela Holguín Cuéllar as his Personal Envoy on Cyprus for a six-month period. Building on her work that concluded in July 2024, the Secretary-General engaged with the Cypriot leaders on 15 October 2024, which led to an informal meeting in a broader format with the guarantor powers on 17 and 18 March 2025. There, the parties agreed on the appointment of a Personal Envoy, six trust-building initiatives and another broader format meeting in July 2025. Ms. Holguín Cuéllar was named as Personal Envoy on 2 May 2025 to follow up on next steps.

20. While the number of meetings dropped in 2024, the outputs of the technical committees increased in quality, with project delivery that improved the daily lives of Cypriots. Examples include a vector-borne diseases project that mapped invasive disease-carrying species and increased public awareness on prevention; and the renovation of cultural heritage sites, increasing interactions, mutual understanding and the number of visitors and tourists, thereby benefiting the local economy. Addressing obstacles in intra-island trade benefited businesses, while environmental concerns were addressed across the island, with projects to combat pests and to clear drinking water sources for endangered species. The decision in 2024 to continue dialogue on crossings and to meet with the Secretary-General benefited the parties directly by providing effective communication for risk mitigation and trust-building among the sides.

21. Progress towards the objective is presented in the performance measure below (see table 3).

Table 3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Engagement with the two leaders and their teams and support for senior-level engagement, including separate meetings between the Greek Cypriot and Turkish Cypriot leaders with the Secretary-General, three visits of the Assistant Secretary-General for Europe, Central Asia and the Americas to Cyprus and one to each of the guarantor powers, and two meetings of the leaders in Cyprus	Engagement with the two leaders and their teams, including separate meetings between the Greek Cypriot and Turkish Cypriot leaders, as well as of the guarantor powers with the Secretary-General, the Under-Secretary-General for Political and Peacebuilding Affairs and the Assistant Secretary-General for Europe, Central Asia and the Americas, respectively; and three meetings of the leaders in Cyprus	Agreement to explore the opening of new crossing points and to hold an informal broader format meeting with the guarantor powers Increased activity of civil society organizations and women's groups Delivery by the technical committees of important projects, improving the daily lives of Cypriots

Planned result for 2026

Furthering dialogue as a conflict management tool and an inclusive and sustainable peace process towards a negotiated settlement

Programme performance in 2024 and target for 2026

22. In 2024, the mission's work contributed to the holding of and support to 70 bilateral and joint meetings with the leaders and their representatives and 285 meetings of the technical committees, which did not meet the planned target of 140 and 410 meetings, respectively. The target was not met owing primarily to the absence of active negotiations and the shift to planning for the high-level meetings with the two sides and guarantor powers in 2025. As a result, the planned performance target for 2026 reflects this shift.

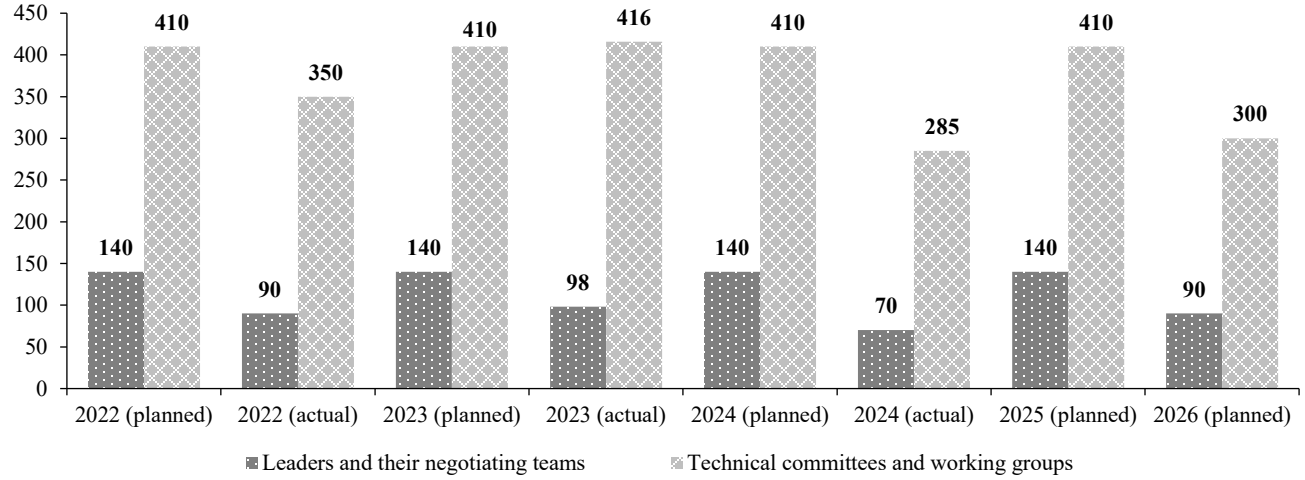
23. In 2026, with the regional landscape expected to remain challenging, the mission will focus on the support to high-level meetings, trust-building activities, the work of the technical committees and the use of dialogue as an effective early warning and conflict prevention tool.

Lessons learned and planned change

24. The lesson learned was that when meetings are convened at the highest level, focus shifts away from technical-level meetings on the island. At the same time, there is more space for progress in the higher-level dialogue, agreed initiatives and the work of the technical committees, including the new Technical Committee on Youth. The planned change would be to focus on the delivery of initiatives, including by the technical committees, as they remain critical to building trust and reducing tensions across the island.

25. Expected progress towards the objective is presented in the performance measure below (see figure II).

Figure II
Performance measure: number of bilateral and joint meetings with the leaders and their negotiating teams and number of meetings of working groups and technical committees



Deliverables

26. Table 4 lists all deliverables of the mission.

Table 4
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
1. Reports of the Secretary-General to the Security Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	**2**	**2**	**2**	**2**
2. Meetings of the Security Council	2	2	2	2
C. Substantive deliverables				
Good offices: provision of good offices through the facilitation of bilateral and joint meetings with the leaders, the guarantor powers and other stakeholders towards a settlement of the Cyprus issue; facilitation and support to technical committees and trust-building initiatives.				
Consultation, advice and advocacy: provision of advice on procedural, legal and substantive issues related to the Cyprus issue; coordination and facilitation of advisory meetings, advocacy for gender equality, disability inclusion and participation of youth, and public support for the peace process.				
D. Communication deliverables				
External and media relations: interviews, social media posts and press releases to inform the public about the peace process and the activities of the mission.

[a] The Under-Secretary-General is on a when-actually-employed contract.
[b] Other level, unless otherwise stated.

27. The proposed resource requirements for 2026 for the Office amount to $3,198,900 (net of staff assessment) and would provide for salaries and common staff costs ($2,919,500) for the continuation of 21 posts (1 Under-Secretary-General, 1 D-1, 3 P-5, 5 P-4, 1 P-3, 4 Field Service, 1 General Service (Other level) and 5 Local level), as well as operational costs ($279,400), comprising costs for consultants and consulting services ($18,200), official travel ($63,000), facilities and infrastructure ($72,800), ground transportation ($47,400), communications and information technology ($57,800), medical ($300) and other supplies, services and equipment ($19,900).

28. In 2026, no change is proposed to the number and levels of the posts.

29. Vacancy rates of 12.8 per cent and 16.7 per cent have been applied to the estimates for international and national staff costs, respectively, on the basis of the actual average vacancy rates in 2024.

30. The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable to increased requirements for civilian personnel, owing mainly to the application of a lower vacancy rate for national staff compared with the rate of 20 per cent applied in 2025, and updated rates for salaries and common staff costs. The increase is offset in part by the reduced requirements for the non-recurring acquisition of engineering supplies, prefabricated facilities, office furniture, printers and notebook computers and the related lower freight costs.

Extrabudgetary resources

31. In 2025, extrabudgetary resources in the amount of $100,000 were obtained for a three-year project to conduct public opinion polling in order to enhance evidence-based political analysis and strategic support to the Cyprus peace process.

32. In 2026, no extrabudgetary resources are anticipated.

2. Office of the Special Adviser to the Secretary-General on the Prevention of Genocide

($3,857,500)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

33. The mission is mandated to collect information on massive and serious violations of human rights and international humanitarian law of ethnic and racial origin that, if not prevented or halted, may lead to genocide; to act as a mechanism of early warning to the Secretary-General and, through him, to the Security Council, by bringing to their attention situations that could potentially result in genocide; to make recommendations to the Council, through the Secretary-General, on action to prevent or halt genocide; and to liaise with the United Nations system on activities for the prevention of genocide and on work to enhance the capacity of the United Nations to analyse and manage information regarding genocide or related crimes.

34. The mandate derives from the invitation of the Security Council to the Secretary-General in its resolution 1366 (2001) to refer to the Council information and analysis from within the United Nations system on cases of serious violations of international law, including international humanitarian law and human rights law. The Special Adviser on the Prevention of Genocide was appointed through an exchange of letters between the Secretary-General and the President of the Security Council (S/2004/567 and S/2004/568). The responsibilities of the Special Adviser were listed in the letter of the Secretary-General (S/2004/567). The mandate has been reaffirmed through various resolutions of the Security Council,[2] the General Assembly[3] and the Human Rights Council.[4] In its resolution 77/318, the General Assembly noted the role of the Special Adviser in the launch of the United Nations Strategy and Plan of Action on Hate Speech and as part of efforts to address and counter hate speech.

35. With regard to the responsibility to protect, the General Assembly, in paragraphs 138 and 139 of its resolution 60/1 on the 2005 World Summit Outcome, addressed the responsibility of Member States and the international community to protect populations from genocide, war crimes, ethnic cleansing and crimes against humanity. The Security Council reaffirmed the provisions of paragraphs 138 and 139 of that resolution in its resolutions 1674 (2006) and 1706 (2006). Through an exchange of letters (S/2007/721 and S/2007/722), the Special Adviser to the Secretary-General on the Responsibility to Protect was appointed and charged with the conceptual, institutional and operational development of the principle and with continuing a political dialogue with Member States on its implementation. The Assembly, in resolution 75/277, included an item on the responsibility to protect in its agenda and requested the Secretary-General to report annually on that item.

36. In its resolutions 2150 (2014) and 2171 (2014), the Security Council recalled the important role of the Special Advisers on the Prevention of Genocide and on the Responsibility to Protect, whose functions included acting as an early warning mechanism to prevent situations that could result in genocide, crimes against humanity, war crimes and ethnic cleansing.

37. Designated by the Secretary-General as the United Nations focal point for the implementation of the United Nations Strategy and Plan of Action on Hate Speech, launched in 2019, the Office recognizes hate speech as a risk factor and indicator for genocide. The importance of addressing hate speech,

[2] Resolutions 2150 (2014), 2171 (2014) and 2686 (2023).
[3] Resolutions 73/328, 75/309, 77/318 and 78/282.
[4] Resolutions 43/29 and 55/13.

and the Special Adviser's role, has been underscored in numerous United Nations resolutions, including General Assembly resolutions 75/309 and 77/318 and Security Council resolution 2686 (2023). Furthermore, the General Assembly, in its resolution 78/282, requested the Secretary-General to establish an outreach programme entitled "The Srebrenica Genocide and the United Nations", starting its activities with preparations for the commemoration of the thirtieth anniversary of the genocide in 2025, and to bring the resolution to the attention of all Member States, organizations of the United Nations system and civil society organizations for appropriate observance.

Programme of work

Objective

38. The objective, to which this mission contributes, is to advance national, regional and international efforts to protect populations from genocide, war crimes, ethnic cleansing and crimes against humanity and their incitement.

Strategy and external factors for 2026

39. To contribute to the objective, the mission will:

(a) Raise awareness of the causes and dynamics of genocide through predictive and action-oriented analysis, enhanced by the collection and sharing of information from field missions and regional offices in accordance with its early warning mandate;

(b) Alert relevant actors with respect to the risk of genocide, through the implementation of the United Nations Strategy and Plan of Action on Hate Speech, capacity-building and advocacy;

(c) Advocate and mobilize for appropriate action to prevent the risk of genocide through engagement within the United Nations and with external partners;

(d) Strengthen community-level efforts for prevention, including by assisting locally led initiatives aimed at bringing communities together;

(e) Harness technology to enhance prevention and counter its negative impacts, as outlined in Human Rights Council resolution 49/9;

(f) Increase female participation in decision-making roles and support implementation of the plan of action for women in communities to counter hate speech and prevent incitement to violence that could lead to genocide and related crimes;

(g) Prioritize action against Holocaust and genocide denial and the glorification of war crimes and criminals;

(h) Support the universal ratification of the Convention on the Prevention and Punishment of the Crime of Genocide and support efforts towards its implementation at the national level through legislation and implementation mechanisms.

40. The above-mentioned work is expected to result in increased capacity and action by United Nations intergovernmental bodies, Member States and regional and subregional organizations to prevent and mitigate the risk of genocide, war crimes, ethnic cleansing and crimes against humanity, including their incitement.

41. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Continued commitment of Member States, the Security Council and other intergovernmental bodies to engage with the mission to advance the prevention of genocide, war crimes, ethnic

cleansing and crimes against humanity, including through conceptual development and consensus-building on the nature of the responsibility to protect;

(b) Active engagement of Member States and regional and other organizations to develop preventive capacity and take appropriate action for the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity, including their incitement.

42. With regard to cooperation with other entities, the mission will continue to work and partner with regional organizations, including the African Union, the International Conference on the Great Lakes Region, the Economic Community of West African States, the Association of Southeast Asian Nations (ASEAN), the Organization of American States, the Organization for Security and Cooperation in Europe (OSCE) and the European Union, among others, as well as with civil society, including religious leaders, traditional leaders, academia and traditional media, on developing capacity and taking appropriate action for the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity, including their incitement, at the national and regional levels. In 2026, the Office will prioritize continuing and strengthening cooperation.

43. With regard to inter-agency coordination and liaison, the mission works closely with and supports United Nations country teams on the implementation of the United Nations Strategy and Plan of Action on Hate Speech.

44. The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. This includes reflecting the gender dynamics in its monitoring and analysis and striving for the equal participation of women in its capacity-building events and workshops.

45. In line with the United Nations Disability Inclusion Strategy, the mission has developed a guidance note on integrating disability inclusion into its programmes and activities, and, in November 2024, launched a guidance note on persons with disabilities and the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity and on addressing hate speech to support mental health.

Programme performance in 2024

Collection of information for early warning on and prevention of the risk of genocide and related crimes

46. In March 2024, following the adoption by Zambia of the Convention on the Prevention and Punishment of the Crime of Genocide in 2022, and with support from the mission, the Zambian National Committee on the Prevention and Punishment of Genocide, War Crimes, Crimes against Humanity and All Forms of Discrimination was launched and its members were trained in Lusaka.

47. In addition, four major policy documents aimed at addressing hate speech and advancing genocide prevention were adopted in 2024, providing communities with additional tools to address and respond to assessed risks. Those advancements, coupled with the increased advocacy for prevention within the mission's mandate following the adoption of General Assembly resolution 78/282 on the International Day of Reflection and Commemoration of the 1995 Genocide in Srebrenica, contributed to global prevention efforts and fostering healing for affected communities.

48. Progress towards the objective is presented in the performance measure below (see table 7).

Table 7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
No comprehensive analysis of risk of genocide, war crimes, crimes against humanity and ethnic cleansing	Consultations with civil society representatives, community leaders, government representatives and other relevant national actors are held; and an analysis of the risk of genocide, war crimes, crimes against humanity and ethnic cleansing is developed, with relevant recommendations shared with the Secretary-General, the Government and civil society	Contribution to global efforts protecting populations from genocide, war crimes and crimes against humanity Year-long commemoration of the thirtieth anniversary of the 1994 genocide against the Tutsi, culminating in the holding of a series of high-level events in Kigali Leaders and experts brought together to strengthen global genocide prevention initiatives Discussions and dialogues generated four key policy documents focused on bolstering prevention strategies

Planned result for 2026

Enhanced protection from atrocity crimes through improved awareness and prevention mechanisms and better risk identification capabilities for Member States and regional organizations

Programme performance in 2024 and target for 2026

49. In 2024, the mission's work advanced national, regional and international efforts to protect populations from genocide, war crimes and crimes against humanity and met the planned target by having 20 follow-up actions taken by Member States and regional organizations to mitigate the risk of such crimes. In 2024, the Special Adviser undertook 14 official visits, issued 28 public statements and sent eight internal notes to the Secretary-General. The mission conducted 17 workshops and eight technical assistance initiatives, supported the development of context-specific action plans on countering and addressing hate speech for six United Nations country teams and two subregions, and highlighted the voices of community-level actors through dedicated initiatives in specific situations of concern, including women in communities in respect of the situation in the Sudan. The mission also continued to implement its "Champions of prevention" initiative, aimed at providing visibility to community-level prevention work undertaken by civil society actors from Bangladesh, Bosnia and Herzegovina, Cambodia, Iraq and Rwanda, and advocacy campaigns were tied either to relevant international days or to the Special Adviser's missions on countering and addressing hate speech.

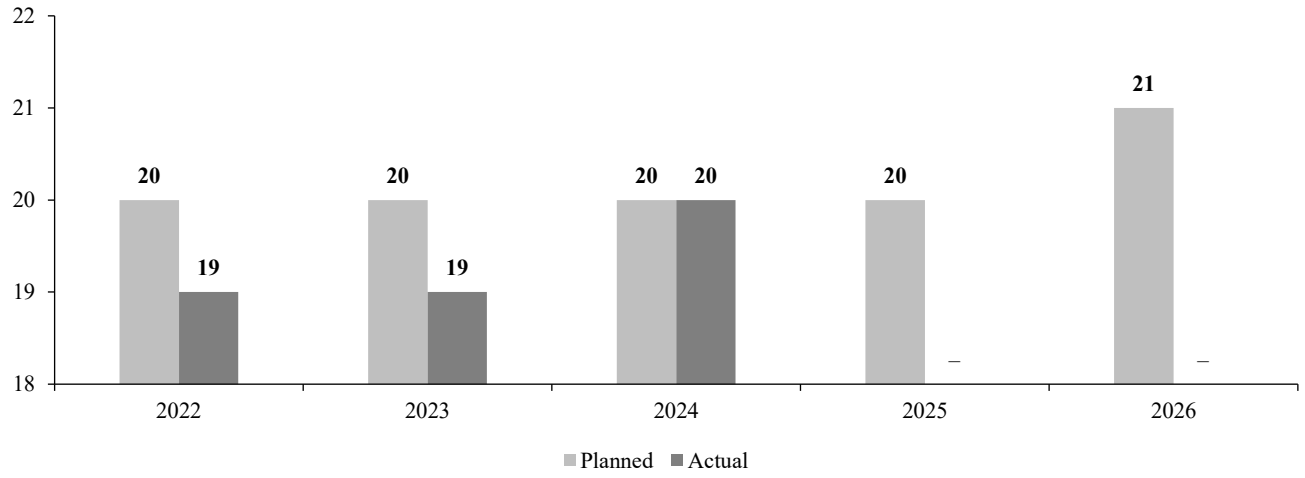
Lessons learned and planned change

50. The lesson for the mission was that collaborating with United Nations field entities, the International Residual Mechanism for Criminal Tribunals and active non-governmental organizations (NGOs) and civil society organizations proved essential for expanding the Office's outreach and risk assessment capabilities. For instance, context-specific plans of action developed by many United Nations entities with the support of the Office resulted in the increased capacity of colleagues in criminal tribunals to identify and respond to trends of hate speech, a main risk and trigger of genocide and

other atrocity crimes. In addition, several memorandums of understanding were developed with civil society organizations, with the aim of increasing collaboration around information monitoring and analysis and risk assessments for genocide. In applying the lesson, the mission will prioritize strengthening these partnerships, particularly with NGOs and civil society organizations on the ground, to further build capacity in areas crucial for preventing genocide and related crimes.

51. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see figure III).

Figure III
Performance measure: number of follow-up actions taken by Member States and other actors as a result of early warning and recommendations provided by the mission



Deliverables

52. Table 8 lists all deliverables of the Office.

Table 8
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
1. Report of the Secretary-General on the responsibility to protect	1	1	1	1
2. Report of the Secretary-General on the prevention of genocide to the Human Rights Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**5**	**6**	**5**	**5**
3. Meetings of the General Assembly on the responsibility to protect	3	3	3	3
4. Meetings of the Human Rights Council on the prevention of genocide	2	3	2	2

6. Workshops on the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity, including their incitement, and on the establishment and review of national and regional early warning mechanisms, including coordinated participation with the International Residual Mechanism for Criminal Tribunals in conferences, expert meetings, memorial events and meetings of victims	45	41	48	48
Publications (number of publications)	**2**	**2**	**2**	**2**
7. Publications, including media and on electronic platforms, on the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity	2	2	2	2
Technical materials (number of materials)	**4**	**4**	**4**	**4**
8. Guidance notes and awareness materials on countering and addressing hate speech	2	2	2	2
9. Guidance notes on genocide denial and the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity	2	2	2	2
Fact-finding, monitoring and investigation missions (number of missions)	**10**	**11**	**10**	**10**
10. High-level and country-specific assessment missions	10	11	10	10

C. Substantive deliverables

Consultation, advice and advocacy: advice on the risk of genocide, war crimes, ethnic cleansing and crimes against humanity and on preventive measures; advocacy and consultations on the prevention of genocide, war crimes, ethnic cleansing and crimes against humanity; briefings on country situations and thematic areas relevant to prevention.

D. Communication deliverables

Outreach programmes, special events and information materials: commemoration of the International Day of Commemoration and Dignity of the Victims of the Crime of Genocide and of the Prevention of This Crime; anniversary of the adoption of the Convention on the Prevention and Punishment of the Crime of Genocide; commemoration of the International Day for Countering Hate Speech; the outreach programme entitled “The Srebrenica Genocide and the United Nations”.

External and media relations: public statements by the Special Adviser on situations of concern, on commemorative events and upon the conclusion of high-level missions; media briefings; editorial opinions (op-eds).

Evaluation activities

53. The Office underwent an independent communication evaluation in 2024, with data from 12 missions during the period from January 2022 to August 2024 being analysed. The evaluation examined various communication outputs, finding that statements, speeches and social media were the most effective advocacy tools, with potential for expansion. On the basis of the findings of the evaluation, the Office will improve its communication of work and achievements by embedding a strong communications culture within its operations. In this regard, the Office has already restructured its website as its main communication platform. The website now serves as the repository of all public information produced by the Office. The Office also identified strategic opportunities during the year to increase its outreach on various social media platforms, for instance around international days that are relevant to the implementation of its mandate.

54. For 2026, the Office plans to evaluate the impact of its plans of action and policy documents for 2023 and 2024, collaborating with the funds, programmes and specialized agencies of the United Nations system, NGOs, civil society organizations and Member States to determine efficient implementation methods.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 9
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*
Category of expenditure	*(1)*	*(2)*	*(3)*	*(4)*	*(5)=(4)-(3)*
Military and police personnel	–	–	–	–	–
Civilian personnel	2 260.8	2 485.5	2 819.8	3 317.9	498.1
Operational costs	554.9	411.4	566.9	539.6	(27.3)
Total (net of staff assessment)	**2 815.7**	**2 896.9**	**3 386.7**	**3 857.5**	**470.8**

Table 10
Human resources

	International staff										*National staff*				*United Nations Volunteers*

Approved 2025	1	1[a]	–	–	2	4[b]	3	3[b]	–	14	–	2[c]	–	2	–	5	5	21
Proposed 2026	1	1[a]	–	–	2	4[b]	3	3[b]	–	14	–	2[c]	–	2	–	5	5	21
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] The Assistant Secretary-General is on a $1-per-year contract.
[b] Includes one P-4 position and one P-2 position approved as general temporary assistance.
[c] Other level, unless otherwise stated.

55. The proposed resources for 2026 for the mission amount to $3,857,500 (net of staff assessment) and would provide for salaries and common staff costs ($3,317,900) for 21 posts and positions (1 Under-Secretary-General, 1 Assistant Secretary-General, 2 P-5, 4 P-4, 3 P-3, 3 P-2 and 2 General Service (Other level) posts and 5 national United Nations Volunteer positions), as well as operational costs ($539,600), comprising costs for official travel ($233,100), facilities and infrastructure ($228,200), ground transportation ($3,600), communications and information technology ($31,000) and other supplies, services and equipment ($43,700).

56. For 2026, no change is proposed to the number and levels of the posts.

57. It is proposed that two existing general temporary assistance positions be continued in 2026, as follows:

(a) One Political Affairs Officer (P-4) to enable the Office to continue its support to the implementation of the United Nations Strategy and Plan of Action on Hate Speech in a context where the global rise and spread of hate speech continue to pose a challenge worldwide. The continuation of this position would allow the Office to continue to provide sustained assistance in response to requests from Member States, regional organizations and United Nations field presences for technical assistance and capacity-building in the development and implementation of context-specific action plans to address and counter hate speech;

(b) One Associate Political Affairs Officer (P-2) to strengthen the analysis capacity of the mission and support campaigns of the Office on Holocaust denial, countering hate speech and ratification of the Convention on the Prevention and Punishment of the Crime of Genocide. The position would continue to focus on data analytics and use new technologies to research and gather information, including online trends of hate speech, as a key indicator of risk and potential trigger of genocide, war crimes, ethnic cleansing and crimes against humanity, which would enable the Office to respond to these new challenges and trends in the prevention of these crimes.

58. A vacancy rate of 5.8 per cent has been applied to the estimates for international staff on the basis of the actual average vacancy rate in 2024; a vacancy rate of 25 per cent has been applied for United Nations Volunteers on the basis of the expected recruitment timeline; and a vacancy rate of zero per cent has been applied to national staff costs on the basis of the actual vacancy rate in March 2025.

59. The increase in requirements for 2026 compared with the appropriation for 2025 is mainly attributable to increased requirements for civilian personnel as a result of the application of lower vacancy rates of 5.8 per cent and zero per cent for international staff (including for three posts established with a vacancy rate of 50 per cent) and national staff, respectively, compared with 10.9 per cent applied in 2025, as well as the application of the continuing rate for three national United Nations Volunteer positions established with a vacancy rate of 50 per cent in 2025. The increase is offset in part by the absence of a provision for consultants, the cancellation of two subscriptions for public information and reduced requirements for conference and translation services on the basis of utilization patterns.

Extrabudgetary resources

60. In 2025, extrabudgetary resources amounting to approximately $697,000 are to be utilized mainly for the staff costs of one post (P-4), the capacity-building and technical assistance programme and the preparation of the 2025 report of the Secretary-General on the responsibility to protect.

61. For 2026, extrabudgetary resources in the estimated amount of $492,000 would continue to provide for one post (P-4) as well as the capacity-building and technical assistance programme and the preparation of the 2026 report of the Secretary-General on the responsibility to protect.

62. The decrease in the estimated extrabudgetary resources to be utilized in 2026 compared with 2025 is due mainly to the completion of some projects supporting capacity-building and technical assistance work, as well as decreased unearmarked contributions.

3. Personal Envoy of the Secretary-General for Western Sahara

($560,000)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

63. The Personal Envoy of the Secretary-General for Western Sahara is responsible for assisting the parties, Morocco and the Frente Popular para la Liberación de Saguía el-Hamra y de Río de Oro (Frente POLISARIO), in finding a just, lasting and mutually acceptable political solution, which will provide for the self-determination of the people of Western Sahara in the context of arrangements consistent with the principles and purposes of the Charter of the United Nations.

64. The mandate derives from the communications between the Secretary-General and the President of the Security Council dated 17 March 1997 (S/1997/236), 1 October 2021 (S/2021/851) and 5 October 2021 (S/2021/852), as well as from the priorities established through Security Council resolutions. Most recently, in its resolution 2756 (2024), the Council expressed its full support for the Personal Envoy to facilitate the negotiations process in order to achieve a solution to the Western Sahara question. The Council again called upon the parties to resume negotiations under the auspices of the Secretary-General without preconditions and in good faith, and to demonstrate political will and work in an atmosphere propitious for dialogue.

Programme of work

Objective

65. The objective, to which this mission contributes, is to advance the parties' efforts to achieve a just, lasting and mutually acceptable political solution, which will provide for the self-determination of the people of Western Sahara.

Strategy and external factors for 2026

66. To contribute to the objective, the mission will:

(a) Encourage the parties to continue the discussion on the question of Western Sahara in order to identify elements of convergence, through bilateral consultations, including with the neighbouring countries of Algeria and Mauritania, conduct visits to the region to meet with key interlocutors and engage in shuttle diplomacy and other activities deemed useful in that regard;

(b) Consult with members of the Security Council and the Group of Friends on Western Sahara, both in their capitals and in New York, as well as with regional organizations, towards a solution;

(c) Work towards organizing two international meetings to bring together all concerned on Western Sahara.

67. The above-mentioned work is expected to result in:

(a) Additional trust built and strengthened involvement by the parties in the political process;

(b) Maintained support by the international community for the political process.

68. With regard to cooperation with other entities, the mission regularly meets with regional organizations and other relevant stakeholders to exchange views on the United Nations-led political process.

69. With regard to inter-agency coordination and liaison, the mission receives support for visits and information on developments in Western Sahara from the United Nations Mission for the Referendum in Western Sahara. It also coordinates and liaises with the Office of the United Nations High Commissioner for Refugees on visits to the refugee camps and on confidence-building measures and maintains contact with the Office of the United Nations High Commissioner for Human Rights in Geneva on issues related to the human rights situation.

70. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) All concerned show willingness to meet for direct negotiations;

(b) The security situation remains conducive to the mission's objective for the region.

71. The mission integrates a gender perspective into its activities. It ensures that women and representatives of women's organizations are included in meetings with civil society and will encourage delegations to include women in political meetings.

72. In line with the United Nations Disability Inclusion Strategy, the mission will include consultations with persons with disabilities on their inclusion in meetings.

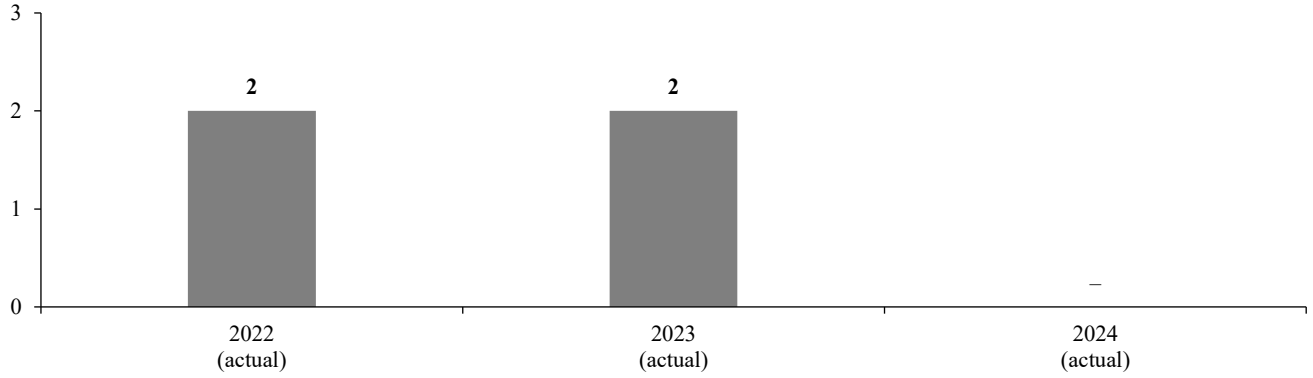
Programme performance in 2024

Readiness for engagement with all concerned

73. In 2024, the Personal Envoy continued his efforts to engage all concerned and undertook broadened consultations on the issue of Western Sahara with a view to constructively advancing the political process. The consultations focused on exploring creative ideas for the people of Western Sahara to attain a just, lasting and mutually acceptable political solution that provides for their self-determination. The Personal Envoy called for flexibility and creativity in his April 2024 briefing to the Security Council, and discussed options with all concerned in the course of his bilateral engagements. The Personal Envoy expressed his readiness to meet with all concerned. He reported on those efforts to the Security Council in October 2024 and highlighted the need for urgency.

74. Progress towards the objective is presented in the performance measure below (see figure IV).

Figure IV
Performance measure: number of rounds of engagement with all concerned



Planned result for 2026

Advancing the process on Western Sahara

Programme performance in 2024 and target for 2026

75. In 2024, the mission's work contributed to meeting the target of continued engagement between the parties and neighbours and towards advancing the political process. It was not possible to hold the two international meetings in 2024 due to lack of agreement among all concerned.

76. In 2026, the mission will continue to advance the political process through consultations with all concerned, visits to the region to meet key interlocutors, including representatives of civil society and women's organizations, and other measures deemed useful in this regard. It will also continue to hold consultations with Member States in their capitals and in New York. In addition, the mission will continue to liaise with relevant United Nations entities in Geneva and other locations. The mission will also meet regularly with representatives of relevant regional organizations to exchange views on the United Nations-led process. The mission will seek to convene two international meetings, with the agreement of all concerned.

Lessons learned and planned change

77. The lesson for the mission was that political will is required from all concerned to seize the window of opportunity afforded by the United Nations-facilitated process. The mission will continue to engage regularly with all concerned in order to identify elements of convergence and propose a potential way forward, with a view to achieving a mutually acceptable political solution.

78. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 11).

Table 11
Performance measure

[a] The Under-Secretary-General is on a when-actually-employed contract.

80. The proposed resource requirements for 2026 amount to $560,000 (net of staff assessment) and would provide for salaries and common staff costs ($402,400) for the continuation of the two posts (1 Under-Secretary-General, on a when-actually-employed contract, and 1 P-3), as well as operational costs ($157,600), comprising costs for consultants and consulting services ($6,500), official travel ($74,700), facilities and infrastructure ($47,900), communications and information technology ($9,600) and other supplies, services and equipment ($18,900).

81. For 2026, no change is proposed to the number and levels of the posts. A vacancy rate of zero per cent has been applied to the posts on the basis of the actual vacancy rate in March 2025.

82. The increase in the requirements proposed for 2026 is attributable mainly to the higher requirements for civilian personnel due to the application of a zero per cent vacancy rate compared with the rate of 12.5 per cent applied in 2025. The increase is offset in part by the reduced requirements for utilities and by the application of the latest standard rate for information and communications technology (ICT).

4. Office of the Special Envoy of the Secretary-General for the implementation of Security Council resolution 1559 (2004)

($430,900)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

83. On 14 December 2004, the Secretary-General appointed his Special Envoy for the implementation of Security Council resolution 1559 (2004) to enable him to report to the Council every six months on the implementation of the resolution, as requested by the Council in its presidential statement of 19 October 2004 (S/PRST/2004/36).

84. In its resolution 1680 (2006), the Council reiterated its call for the full implementation of the provisions of resolution 1559 (2004), and strongly encouraged the Government of the Syrian Arab Republic to respond positively to the request made by the Government of Lebanon, in line with the agreements of the Lebanese national dialogue, to delineate their common border, especially in those areas where the border was uncertain or disputed.

85. In its resolution 1701 (2006), the Council emphasized the importance of the extension of the control of the Government of Lebanon over all Lebanese territory in accordance with the provisions of resolutions 1559 (2004) and 1680 (2006), and of the relevant provisions of the Taif Accords. The Council requested the Secretary-General to develop, in liaison with relevant international actors and the parties concerned, proposals to implement the relevant provisions of the Taif Accords and resolutions 1559 (2004) and 1680 (2006), including disarmament, and for delineation of the international borders of Lebanon.

86. In subsequent resolutions on Lebanon, the Council continued to urge all parties to make tangible progress towards all outstanding issues in the implementation of relevant Council resolutions.

87. In a statement by the President of the Security Council of 16 January 2025 (S/PRST/2025/1), the Council welcomed the cessation of hostilities arrangement between Israel and Lebanon of 26 November 2024 (S/2024/870). The Council called upon the parties to faithfully implement the provisions of the arrangement and for the full implementation of resolution 1701 (2006) and the Security Council's previous relevant resolutions by all parties.

88. In 2016, the Under-Secretary-General for Political Affairs was tasked by the Secretary-General with assuming the responsibility of reporting on the implementation of resolution 1559 (2004), an arrangement that has been maintained to date.

Programme of work

Objective

89. The objective, to which this mission contributes, is to ensure full implementation of Security Council resolution 1559 (2004) and all subsequent related resolutions of the Council.

Strategy and external factors for 2026

90. To contribute to the objective, the mission will seek to support efforts to foster consensus on a Lebanese-led and Lebanese-owned national dialogue, which is expected to result in progress on addressing the maintenance of weapons outside State authority.

91. The above-mentioned work is expected to result in informed Security Council deliberations on possible opportunities for Lebanon to make progress on the outstanding provisions of Council resolution 1559 (2004).

92. With regard to inter-agency coordination and liaison, the mission coordinates with the Office of the United Nations Special Coordinator for Lebanon, in particular in the process of developing the reports of the Secretary-General.

93. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The regional environment continues to affect Lebanon's stability and security;

(b) Following the 2025 presidential election and government formation, the ability of the Lebanese leadership to deliver reforms and tangible benefits for the population continues as they face reconstruction challenges;

(c) There are greater opportunities for the Lebanese parties to address the disbanding and disarmament of Lebanese and non-Lebanese militias and some efforts are made towards that goal, even though constraints persist;

(d) Member States within and outside the region remain engaged in advancing the disbanding and disarmament of Lebanese and non-Lebanese militias;

(e) Violations of Lebanese sovereignty and territorial integrity persist.

94. The mission integrates a gender perspective into its operational activities by ensuring appropriate consultations with all stakeholders, including women leaders, and the inclusion of gender-disaggregated data, as appropriate.

95. In line with the United Nations Disability Inclusion Strategy, the mission will support mitigating measures to overcome accessibility challenges, in addition to the efforts undertaken by relevant United Nations entities to ensure the accessibility of facilities, platforms, security and other infrastructure to facilitate easy access and use by persons with disabilities.

Programme performance in 2024

Enhanced understanding of Security Council members on developments of relevance to the implementation of resolution 1559 (2004)

96. The mission undertook one trip to Lebanon in March 2024, which informed the drafting of the April 2024 report of the Secretary-General on the implementation of resolution 1559 (2004). However, a trip to Lebanon planned for September 2024 did not transpire due to a vacancy in the core capacity of the mission; nevertheless, the mission was able to deliver on planned results.

97. Progress towards the objective is presented in the performance measure below (see table 15).

Table 15
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Understanding of Security Council members on developments of relevance to the implementation of the outstanding provisions of Council resolution 1559 (2004)	Understanding of Security Council members on developments of relevance to the implementation of the outstanding provisions of Council resolution 1559 (2004)	Understanding of Security Council members on developments of relevance to the implementation of the outstanding provisions of Council resolution 1559 (2004)

Planned result for 2026

Informed Security Council deliberations through analytical reports of the Secretary-General

Programme performance in 2024 and target for 2026

98. The mission's work contributed to informing Security Council deliberations on developments relevant to the implementation of the outstanding provisions of Council resolution 1559 (2004). It met the planned target of Council discussions on the two semi-annual reports to reflect the outcome of consultations on the positions of Lebanese actors vis-à-vis the maintenance of weapons outside State authority.

99. In 2026, the mission will continue to report to the Security Council semi-annually on progress in the implementation of the resolution, in particular the disbanding and disarmament of Lebanese and non-Lebanese militias. The changed context in the Syrian Arab Republic may offer greater opportunities for progress in the implementation of resolution 1680 (2006).

Lessons learned and planned change

100. The lesson for the mission was that in-person consultations are necessary to identify opportunities for progress. In applying the lesson, the mission will further leverage engagement with United Nations entities both at Headquarters and in Lebanon, in addition to maintaining its network of interlocutors in the country.

101. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16).

Table 16
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Discussions on the two semi-annual reports partially reflected the outcome of consultations on the positions of Lebanese actors, which were only partially articulated, vis-à-vis the maintenance of weapons outside State authority	Discussions on the two semi-annual reports partially reflected the outcome of systemic consultations surveying the positions of Lebanese actors vis-à-vis the maintenance of weapons outside State authority	Discussions on the two semi-annual reports partially reflected the outcome of systemic consultations on the positions of Lebanese actors vis-à-vis the maintenance of weapons outside State authority	Discussions on the two semi-annual reports, which reflect fully the outcome of consultations on the positions of Lebanese actors vis-à-vis the maintenance of weapons outside State authority	Security Council consultations account for the positions of Lebanese actors vis-à-vis the maintenance of weapons outside State authority

Deliverables

102. Table 17 lists all deliverables of the mission.

Table 17
Deliverables for the period 2024–2026, by category and subcategory

Proposed 2026	1[a]	–	–	–	–	1	–	–	–	2	–	1[b]	–	1	–	–	–	3
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] The Under-Secretary-General is on a $1-per-year contract.
[b] Other level, unless otherwise stated.

103. The proposed resource requirements for 2026 for the mission amount to $430,900 (net of staff assessment) and would provide for salaries and common staff costs ($372,700) for the continuation of three posts (1 Under-Secretary-General, 1 P-4 and 1 General Service (Other level)), as well as operational costs ($58,200), comprising costs for official travel ($22,600), facilities and infrastructure ($30,500) and communications and information technology ($5,100).

104. For 2026, no change is proposed to the number and levels of the posts. A vacancy rate of zero per cent has been applied to the estimates for international and national staff on the basis of the actual vacancy rates in March 2025.

105. The increase in requirements proposed for 2026 compared with the appropriation for 2025 is attributable to the higher requirements for civilian personnel due to the application of a lower vacancy rate of zero per cent compared with the vacancy rate of 16.7 per cent applied in 2025. The increase is offset in part by the application of the updated ICT standard rate and the removal of the long-distance telephone service.

5. Office of the United Nations Representative to the Geneva International Discussions

($1,803,500)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

106. The mission is mandated to support the Geneva International Discussions and the Incident Prevention and Response Mechanism under United Nations auspices in Gali, Georgia, by facilitating the participation of the United Nations in the international discussions in Geneva and the Gali Incident Prevention and Response Mechanism, and by liaising and coordinating with the relevant actors. The mission is also responsible for preparing, convening and facilitating, in consultation with the other Co-Chairs, the European Union and OSCE, the sessions of the Geneva International Discussions as well as the periodic meetings of the Gali Incident Prevention and Response Mechanism.

107. The United Nations has continued to support the Geneva International Discussions on security and stability and the return of internally displaced persons and refugees, which commenced on 15 October 2008 in Geneva in accordance with the six-point agreement of 12 August 2008 and the implementing measures of 8 September 2008, mediated by the French presidency of the European Union, following the hostilities of August 2008 (S/2009/254). In its resolution 1866 (2009), the Security Council welcomed the beginning of the discussions and requested the Secretary-General, through his Special Representative, to continue to fully support the process. The Secretary-General addressed a letter on the matter to the Minister for Foreign Affairs of Georgia on 29 September 2009, and the Minister replied to the Secretary-General on 28 October 2009.

108. Against the background of the "Proposals for joint incident prevention and response mechanisms", agreed to in Geneva on 18 February 2009, the Secretary-General, on 28 September 2009, addressed a letter to the President of the Security Council in which he stated that the United Nations would continue to support the Geneva International Discussions and the Mechanism through a limited number of personnel with the task of facilitating the United Nations participation in the international discussions in Geneva and in the Mechanism, and liaising and coordinating with the relevant actors.

109. In a letter dated 28 December 2009 addressed to the President of the Security Council, the Secretary-General noted that the United Nations would continue to provide support for the Geneva International Discussions and the work of the Mechanism. In a letter dated 25 February 2010 addressed to the President of the Security Council (S/2010/103), the Secretary-General conveyed his intention to appoint a United Nations Representative responsible for United Nations support for the Geneva International Discussions and the Mechanism. In a letter dated 2 May 2011 (S/2011/279), the President of the Security Council informed the Secretary-General that the members of the Security Council had taken note of his intention and of the information contained in his letter of 25 February 2010. In 2018, there was an additional exchange of letters between the Secretary-General and the President of the Security Council regarding the appointment of a United Nations Representative.

Programme of work

Objective

110. The objective, to which this mission contributes, is to advance the main agenda items of the Geneva International Discussions, including the non-use of force/international security arrangements and addressing the issue of internally displaced persons and refugees, in the context of the Discussions and the Gali Incident Prevention and Response Mechanism.

Strategy and external factors for 2026

111. To contribute to the objective, the mission, in close partnership with the other Co-Chairs, will continue efforts to facilitate progress on key agenda items of the Discussions, and ensure that the regular meetings of the Gali Incident Prevention and Response Mechanism serve as results-oriented platforms for dialogue and conflict prevention.

112. The above-mentioned work is expected to result in:

(a) Contributing to the objective of transitioning the Discussions from a conflict management to a conflict transformation and resolution process;

(b) Addressing and making progress on central issues, including the non-use of force/international security arrangements and internally displaced persons and refugees.

113. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) All stakeholders will continue to support the Discussions and the Gali Incident Prevention and Response Mechanism and the engagement of the United Nations;

(b) All stakeholders will support efforts to enhance the effectiveness of the Discussions;

(c) The Co-Chairs will continue to collaborate closely to fulfil the mandate of the Discussions.

114. With regard to cooperation with other entities, the mission coordinates with the European Union and OSCE Co-Chairs. It maintains contact with the European Union Monitoring Mission in Georgia and OSCE, which jointly facilitate the work of the Incident Prevention and Response Mechanism in Ergneti and other relevant actors.

115. With regard to inter-agency coordination and liaison, the mission cooperates closely with entities within the United Nations system and other actors so as to coordinate and strengthen the role and contribution of the United Nations within the framework of the Discussions and the Gali Incident Prevention and Response Mechanism, especially in addressing humanitarian issues.

116. The mission integrates a gender perspective into its activities, including engaging in advocacy for gender equality and promoting the role of women in conflict resolution and peacebuilding, including within the framework of the Co-Chairs' joint strategy and action plan on women and peace and security.

117. The mission will closely cooperate with the United Nations Office at Geneva in the implementation of the United Nations Disability Inclusion Strategy.

Programme performance in 2024

Continuation of efforts to achieve concrete results on key issues on the agenda of the Geneva International Discussions

118. Three rounds of the Discussions took place in 2024, on 4 and 5 April, 25 and 26 June and 5 and 6 November, respectively. The Co-Chairs organized three visits to Tbilisi, Moscow, Sukhumi and Tskhinvali, as well as a visit to Washington, D.C., and New York. The Co-Chairs also briefed the

OSCE Permanent Council in Vienna on 24 October 2024. The mission undertook visits to Tbilisi, Zugdidi, Gali and Sukhumi to engage with relevant actors. Despite the mission's efforts, no meetings of the Gali Incident Prevention and Response Mechanism took place due to persisting differences among key participants on the modalities. The mission will continue its efforts aimed at resumption of the Mechanism.

119. Progress towards the objective is presented in the performance measure below (see table 20).

Table 20
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
One round of the Geneva International Discussions	Three rounds of the Geneva International Discussions	Three rounds of the Geneva International Discussions
No information sessions	No information sessions	No information sessions

Planned result for 2026

Advancing progress on the main agenda items of the Geneva International Discussions

Programme performance in 2024 and target for 2026

120. In 2024, the mission contributed to ensuring the engagement of all participants in the Discussions and helped to prevent the resumption of hostilities. The target of progress on the agenda of the Discussions could not be achieved, owing primarily to persistent differences in positions among the participants.

121. In 2026, the mission, in cooperation with the other Co-Chairs, will continue efforts to advance progress on substantive agenda items and ensure the regular functioning of the Gali Incident Prevention and Response Mechanism on the basis of the established principles and practices.

Lessons learned and planned change

122. The lesson for the mission was the importance of continuous engagement with all stakeholders, including utilizing virtual and other means, as appropriate. In applying the lesson, such efforts will continue.

123. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 21).

Table 21
Performance measure

Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**

[a] Other level, unless otherwise stated.

125. The proposed resource requirements for 2026 for the mission amount to $1,803,500 (net of staff assessment) and would provide for salaries and common staff costs ($1,478,900) for the continuation of six posts based in Geneva (1 Assistant Secretary-General, 1 P-5, 2 P-4, 1 P-3 and 1 General Service (Other level)) and one post based in Zugdidi, Georgia (P-3), as well as for operational costs ($324,600), comprising costs for consultants and consulting services ($3,300), official travel ($125,400), facilities and infrastructure ($134,700), ground transportation ($23,400), communications and information technology ($21,300) and other supplies, services and equipment ($16,500).

126. For 2026, no change is proposed to the number and levels of the posts. Vacancy rates of 16.7 per cent and zero per cent have been applied to the estimates for international and national staff, respectively, on the basis of the actual average vacancy rates in 2024.

127. The decrease in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to reduced requirements for civilian personnel, resulting from the application of a higher vacancy rate of 16.7 per cent for international staff, compared with the rate of 3.6 per cent applied in 2025, offset in part by the increased requirements for national staff due to the application of a vacancy rate of zero per cent, compared with the rate of 3.6 per cent applied in 2025.

6. Office of the Special Envoy of the Secretary-General for Syria

($15,027,700)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

128. The mission is responsible for promoting a solution to the conflict in the Syrian Arab Republic and facilitating an inclusive, comprehensive and credible Syrian-owned and -led political solution that will meet the legitimate aspirations of the Syrian people for dignity, freedom and justice based on the principles of equality and non-discrimination. The mandate derives from the priorities established by the Security Council in resolutions 2118 (2013), 2254 (2015), 2268 (2016) and 2336 (2016), as well as by the General Assembly in resolution 66/253 A, pursuant to which a special envoy was appointed.

129. The ousting of the former President and his Government in December 2024 has brought new opportunities and challenges. In a statement by the President of the Security Council of 14 March 2025 (S/PRST/2025/4), the Council underlined the need for a lasting political solution in line with the principles of resolution 2254 (2015). It is critical to focus on an orderly, credible and inclusive Syrian-owned and -led political transition fully supported by the United Nations and based on a solid legal framework, leading towards a new constitution and free and fair elections in line with the principles of resolution 2254 (2015).

Programme of work

Objective

130. The objective of this mission is to advance the full implementation of all the relevant General Assembly and Security Council resolutions towards an inclusive, credible, comprehensive Syrian-owned and -led political solution to the conflict in the Syrian Arab Republic that meets the legitimate aspirations of the Syrian people for dignity, freedom and justice, based on the principles of equality and non-discrimination and with the full and meaningful participation of women.

Strategy and external factors for 2026

131. To contribute to the objective, the mission will:

(a) Engage with the Syrian interim authorities, all Syrian parties and the broadest possible spectrum of Syrian society as well as all key regional and international stakeholders on a Syrian-led and -owned inclusive and credible political transition;

(b) Support the Syrian interim authorities and all Syrian parties to put in place stable, credible and inclusive transitional arrangements for the medium term that inspire public trust and confidence and that provide a path to long-term, inclusive governance, based on a new constitution and free and fair elections, that unfolds in a safe, calm and neutral environment, includes all Syrians and is in accordance with international standards, in line with the principles of Security Council resolution 2254 (2015);

(c) Coordinate international action and support to achieve those goals, through the Special Envoy's good offices to advise, support and convene international and Syrian stakeholders, as and when deemed helpful;

(d) Advocate for de-escalation and the prevention of violence in the country and work towards a nationwide ceasefire;

(e) Advocate for the respect, protection and fulfilment of human rights of all Syrians, and promote accountability for serious violations and the preservation of documentation and evidence to safeguard the right of victims and their families and survivors to both truth and justice;

(f) Engage the Task Force on Humanitarian Access of the International Syria Support Group to address urgent needs and advocate for international support, including steps towards lifting sanctions in line with economic recovery;

(g) Promote women's meaningful participation in the political transition by engaging relevant actors and forums, including Syrian-Syrian dialogues, the Syrian Women's Advisory Board and the Syrian Civil Society Support Room, and advocate for the direct inclusion of women leaders and experts and women's organizations in all transition processes.

132. The above-mentioned work is expected to result in:

(a) Sustained, regular and substantive dialogue among relevant stakeholders on all issues outlined in Security Council resolution 2254 (2015);

(b) A political transition that reflects Syrian women's meaningful participation and rights, by integrating their perspectives into decision-making and governance structures;

(c) Increased trust in the political transition among Syrians and key regional and international stakeholders, supported by strong international consensus and a transitional justice framework;

(d) The release of essential financial and technical assistance from the international community, coordinated by the United Nations, for reconstruction, gradual economic recovery across all regions of the Syrian Arab Republic and reintegration into the global economy.

133. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Most national, regional and international stakeholders will cooperate with the Special Envoy;

(b) Governance in the country will remain challenging but will move towards a more inclusive, balanced and stable framework of power-sharing;

(c) The security situation will likely remain volatile in 2026, with internal conflicts and external interventions posing serious challenges and with the potential to negatively affect civilians, especially women and children, risking more civilian casualties, renewed displacement and further destruction of civilian infrastructure, as well as human rights violations;

(d) Legitimate processes for accountability and transitional justice are coupled with genuine efforts for social peace and reconciliation among Syrians;

(e) The Syrian economy will remain fragile, requiring sustained international financial and technical support throughout 2026 and beyond, along with significant adjustments to address imposed sanctions.

134. With regard to cooperation with other entities, the mission partners with the international community and international NGOs to facilitate and support its work, including the Syrian Civil Society Support Room and the Syrian Women's Advisory Board. With regard to detention and missing persons, it coordinates with specialized Syrian and international bodies, including the International Committee of the Red Cross and the Independent Institution on Missing Persons in the Syrian Arab Republic.

135. With regard to inter-agency coordination and liaison, the mission cooperates with the United Nations country team and the Inter-Agency Task Force for the Syrian Crisis, which ensures the coordination and coherence of United Nations political, humanitarian, human rights and other efforts in the country.

136. The mission integrates gender, disability and anti-racism perspectives across its operations, including by renewing its gender strategy for the period 2025–2026 to address the political transition, promoting the United Nations Disability Inclusion Strategy through staff training and communication and advancing the strategic action plan for addressing racism and promoting dignity for all in the United Nations Secretariat in coordination with the Anti-Racism Office.

Programme performance in 2024

Opportunities emerge to support a credible and inclusive Syrian-owned and -led political transition based on the principles of Security Council resolution 2254 (2015)

137. Throughout the year, until the ouster of the former President and his Government in early December 2024, the Special Envoy continued to carry out the Secretary-General's good offices, prioritizing engagement with the Government of the Syrian Arab Republic and the opposition Syrian Negotiation Commission. The Special Envoy also continued to consult broadly with regional and international stakeholders to seek to maximize coherence and coordination among diplomatic efforts and to foster a constructive multilateral approach in line with resolution 2254 (2015).

138. Following the ouster of the former President and Government, efforts focused on stabilizing the situation, protecting civilians and preserving Syrian institutions, while supporting a Syrian-owned and -led political transition towards an inclusive, credible, non-sectarian Government in line with resolution 2254 (2015). Extensive consultations were held with Syrian and international stakeholders, including the de facto leadership in Damascus, to encourage concrete international steps. These efforts helped to create space for dialogue with Syrian interim authorities.

139. Progress towards the objective is presented in the performance measure below (see table 25).

Table 25
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Constitutional Committee discussed draft constitutional texts. The Office shared ideas with the Committee's Co-Chairs on ways to expedite the work and produce results and continued progress. Opportunities to advance a step-for-step confidence-building process in line with Security Council resolution 2254 (2015) were explored with national, regional and international stakeholders	No consensus was found on a venue for resuming the Constitutional Committee or on ways to address substantive challenges facing the Committee. Proposals by the Special Envoy to advance step-for-step confidence-building measures in line with Security Council resolution 2254 (2015) were put forward	No progress was made in advancing mediation between the former Government and opposition. After 8 December, national, regional and international stakeholders were brought in and benefited from systematic consultations with the mission with a view to supporting an orderly, credible and inclusive transitional process

Planned result for 2026

Promoting a comprehensive, inclusive and sustainable political solution in line with Security Council resolution 2254 (2015), through a coherent multilateral approach, a new constitution and free and fair elections, with broad Syrian support and in line with international principles and standards

Programme performance in 2024 and target for 2026

140. In 2024, efforts to advance the Constitutional Committee and step-for-step confidence-building measures stalled. While these tracks did not yield the intended progress, detailed discussions were held with Syrian and international actors on a new, comprehensive approach to implement Security Council resolution 2254 (2015). Following the ouster of the former President, focus shifted to supporting an orderly, credible and inclusive Syrian-owned transition. Looking ahead to 2026, the mission will prioritize advancing a renewed political transition road map grounded in resolution 2254 (2015).

141. In 2026, the mission intends to gradually shift its focus from immediately advocating for and supporting an orderly, credible and inclusive Syrian-owned and -led political transition to promoting long-term transformative political arrangements, based on a new constitution and free and fair elections, inclusive of all Syrians and in accordance with international standards, in line with the principles of Security Council resolution 2254 (2015).

Lessons learned and planned change

142. The lesson for the mission was the need to promote with key stakeholders a new, comprehensive approach that would address the full range of issues. Events have obviously superseded the notion of talks between the former Government and the Syrian Negotiation Commission. The mission will therefore need to continuously work in a nimble fashion, adapt and increase the pace of its response and provide proactive advice to the Syrian authorities as changes unfold. A key priority for the mission in this new phase is to engage with the broadest possible spectrum of Syrian society and Syrian parties, as well as regional and international stakeholders, in order to help to ensure that the Syrian-owned and -led political transition will be orderly, credible and inclusive and will be based on the principles of Security Council resolution 2254 (2015).

143. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 26).

Table 26

Deliverables

144. Table 27 lists all deliverables of the mission.

Table 27
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**140**	**30**	**142**	**28**
1. Meetings of the Security Council	12	14	12	12
2. Meetings of the Task Force on the Ceasefire of the International Syria Support Group	4	4	6	4
3. Meetings of the Task Force on Humanitarian Access of the International Syria Support Group	12	12	12	12
4. Meetings of the large body of the Constitutional Committee	12	–	12	–
5. Meetings of the small body of the Constitutional Committee	100	–	100	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**8**	**27**	**28**	**28**
6. Workshops for all Syrian stakeholders on topics relating to the peace talks, such as governance, constitution, elections, security governance/counter-terrorism and confidence-building measures	8	27	28	28
C. Substantive deliverables				
Good offices: provision of good offices to facilitate an inclusive Syrian-led and -owned political solution to the Syrian conflict, in line with Security Council resolution 2254 (2015).				
Consultation, advice and advocacy: consultation, advice and advocacy in support of the political process with Member States and regional and international organizations; consultations and advice in support of the activities of specialized United Nations bodies focused on the country, such as the Independent Institution on Missing Persons in the Syrian Arab Republic; consultations in support of the political process, including on various process proposals and sanctions, with experts and representatives of civil society and women's organizations.				
D. Communication deliverables				
External and media relations: monitoring of media developments in the country, including media analysis and translation, to provide timely insights and recommendations; press statements, interviews, video messages, briefings and social media and web posts stressing the importance of a credible and inclusive political transition, the end of violence, accountability for serious human rights violations, resolving the fate of missing persons, adequate humanitarian and recovery funding, and the role of women in the peace process.				

B. Proposed post and non-post resource requirements for 2026

Approved 2025	1	1	1	3	7	11	8	–	8	40	2	7[a]	32	41	–	–	–	81
Proposed 2026	1	1	1	3	7	11	8	–	8	40	2	7[a]	32	41	–	–	–	81
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

145. The proposed resource requirements for 2026 for the mission amount to $15,027,700 (net of staff assessment) and would provide for salaries and common staff costs ($9,126,300) for 81 posts (1 Under-Secretary-General, 1 Assistant Secretary-General, 1 D-2, 3 D-1, 7 P-5, 11 P-4, 8 P-3, 8 Field Service, 2 National Professional Officer, 7 General Service (Other level) and 32 Local level), as well as operational costs ($5,901,400), comprising costs for consultants and consulting services ($81,700), official travel ($742,000), facilities and infrastructure ($4,028,200), ground transportation ($223,600), communications and information technology ($396,400), medical ($18,000) and other supplies, services and equipment ($411,500).

146. For 2026, no change is proposed to the number and levels of the posts.

147. Vacancy rates of 27.5 per cent and 15.4 per cent have been applied to the estimates for international staff and for General Service and Local level staff, respectively, on the basis of the actual vacancy rates in March 2025. A vacancy rate of zero per cent has been applied to the estimates for National Professional Officers on the basis of the actual average vacancy rate in 2024.

148. The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) increased requirements for civilian personnel, resulting from the application of a lower vacancy rate of 27.5 per cent compared with the rate of 32.7 per cent applied in 2025 for international staff, and the application of the latest salary rates; and (b) higher requirements for facilities and infrastructure, owing to the need for additional office space in compliance with the minimum operating security standards in Damascus. The increase is offset in part by the reduced requirements for air operations due to the removal of provisions for the rental

cost of a passenger charter plane and for services provided by the United Nations Office at Geneva for meetings of the International Syria Support Group and sessions of the Constitutional Committee.

Extrabudgetary resources

149. In 2025, extrabudgetary resources in the amount of $279,000 are projected to fund a Senior Human Rights Officer (P-5) and support the mission in the provision of substantive, logistical, security and support arrangements, including liaison with interlocutors of the Government of the Syrian Arab Republic and the opposition, civil society, including women's groups, and regional and international stakeholders, as well as other activities.

150. For 2026, extrabudgetary resources in the amount of $279,000 are projected to fund a Senior Human Rights Officer (P-5) and continue to support the assigned activities mentioned above.

7. Office of the Special Envoy of the Secretary-General for the Horn of Africa

($1,918,400)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

151. The mandate of the mission derives from an exchange of letters between the Secretary-General and the President of the Security Council (S/2018/955 and S/2018/979), when the remit of the mandate of the former Special Envoy of the Secretary-General for the Sudan and South Sudan was expanded to cover the entire Horn of Africa region, following previous exchanges of letters (including S/2016/258 and S/2016/259). In line with the letters of 2018, the mission also continues to carry out the functions previously performed by the Special Envoy for the Sudan and South Sudan relating to the maintenance of good and peaceful neighbourly relations between the Sudan and South Sudan, established pursuant to the exchange of letters between the Secretary-General and the President of the Security Council in 2011 (S/2011/474 and S/2011/475). The mandate includes cooperation with the African Union High-level Implementation Panel in efforts to implement Security Council resolution 2046 (2012), in which the Council called upon the Sudan and South Sudan to reach an agreement on critical issues, including: (a) the full and urgent advancement of all outstanding issues from the Comprehensive Peace Agreement; and (b) the easing of tensions and the facilitation of the resumption of negotiations on post-secession relations and the normalization of their relations. Furthermore, the mission works closely with and supports member States of the Intergovernmental Authority on Development (IGAD), in line with the Joint Framework for Cooperation between the United Nations and IGAD signed in Djibouti on 17 November 2015, and other regional organizations in promoting peace and security across the Horn of Africa.

Programme of work

Objective

152. The objective, to which this mission contributes, is to establish and maintain good and peaceful neighbourly relations between the countries of the Horn of Africa region, encompassing Djibouti, Eritrea, Ethiopia, Kenya, Somalia, South Sudan, the Sudan and Uganda, to consolidate and sustain gains in peace and security and enhance regional conflict prevention.

Strategy and external factors for 2026

153. To contribute to the objective, the mission will:

(a) Promote regional peace and security, socioeconomic development and integration, inclusive and responsive governance, and awareness of linkages between climate and peace and security. This will be done in line with the Pact for the Future, and by providing political leadership for the engagement of the United Nations in these areas and ensuring joined-up action through the comprehensive regional prevention and integration strategy for the Horn of Africa for the period 2024–2029;

(b) Support IGAD in strengthening the link between early warning and early response, thereby increasing its capacity to respond to and resolve conflicts, and in improving information-sharing and knowledge management. This will be done by deploying the Secretary-General's

good offices and leveraging the collective influence of IGAD member States to support dialogue and joint initiatives among the countries;

(c) Work closely with and support the African Union and other relevant regional organizations in addressing recent and emerging security threats in the Horn of Africa. This will be done through information-sharing, regular meetings with relevant partners and other special envoys in the Horn of Africa and the development of appropriate messages and approaches for supporting regional peace and security.

154. The above-mentioned work is expected to result in:

(a) Subregional capacities being strengthened and relations and mutual trust and confidence between countries of the region to address the root causes of conflicts being improved;

(b) Synergies between partners in the region and the alignment of interventions and responses with the respective strategic frameworks of the United Nations, IGAD and the African Union being strengthened;

(c) The implementation plan of the regional prevention and integration strategy being reviewed and operationalized.

155. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) IGAD and the African Union continue to be fully engaged in the maintenance of peace and security in the region, paying particular attention to Ethiopia, Somalia, the Sudan and South Sudan;

(b) States in the region continue to engage constructively with the Special Envoy and continue to work with the United Nations in the area of capacity-building, in particular in the area of mediation and conflict prevention and resolution;

(c) South Sudanese parties, with support from the region, progressively show commitment to the implementation of the Revitalized Agreement on the Resolution of the Conflict in the Republic of South Sudan and are prepared to consolidate gains;

(d) The relationship between the Sudan and South Sudan remains constructive despite the war in the Sudan, enabling direct negotiations between the two countries on outstanding bilateral issues, including the situation of Abyei and its final status;

(e) The relationship between Somalia and Ethiopia continues on a path of de-escalation.

156. With regard to cooperation with other entities, the mission works closely with IGAD and its member States, as well as other organizations such as the African Union and the European Union, to address the regional dimensions of crises and conflicts in the Horn of Africa, focusing on their cross-border and regional implications and supporting political cooperation and regional integration. The mission cooperates with the African Union to support the bilateral negotiations between the Sudan and South Sudan to resolve outstanding issues, including finding a settlement to the issue of the final status of Abyei. The mission works with other United Nations entities to provide technical and advisory support to the IGAD secretariat.

157. With regard to inter-agency coordination and liaison, the mission engages with special representatives of the Secretary-General, resident coordinators and peace and development advisers in the countries of the region, and with United Nations agencies, funds and programmes that are active in the areas identified as collective priorities by the United Nations system, to ensure a more coherent approach to prevention strategies and approaches.

158. The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate, in its good offices and planned missions, including seminars and workshops, by including gender-sensitive and focused activities. The mission works with relevant stakeholders to promote inclusive messaging to enhance the participation of women in all political and peace

processes, and actively engages in regional and global meetings to lobby for accelerating the implementation of the women and peace and security agenda.

159. In line with the United Nations Disability Inclusion Strategy, the Office will provide support to IGAD and the African Union, as relevant, to enhance the inclusion of persons with disabilities in political, peace and security initiatives.

Programme performance in 2024

Enhanced collective action in implementing the prevention agenda in the Horn of Africa and deepened partnership in the region through collaboration with the Intergovernmental Authority on Development

160. In 2024, to enhance regional prevention and following a review of the comprehensive regional prevention strategy, the mission launched a new prevention and integration strategy informed by the priorities of IGAD and reflecting current challenges. The mission continued to coordinate the implementation of the strategy, including the publication of three joint regional analysis reports, the operationalization of a climate, peace and security hub and the launch of a policy on countering hate speech. The Special Envoy carried out good offices, including continuing to focus on the peace process in Ethiopia, the relationship of Ethiopia with its neighbours, engaging with stakeholders on the crisis in the Sudan and engaging with relevant officials on relations between the Sudan and South Sudan.

161. Progress towards the objective is presented in the performance measure below (see table 30).

Table 30
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
IGAD-United Nations partnership strengthened and IGAD capacity to address issues related to climate, peace and security and women and peace and security enhanced through the development of the regional action plan for women and peace and security and a regional climate security coordination mechanism	Revision of regional prevention and integration strategy completed and endorsed, leading to more focused priorities for engagement of the United Nations system in the Horn of Africa	Launch and implementation of the new regional prevention and integration strategy, contributing to increased collaboration among United Nations entities and their partners in the region and more impactful engagement of the United Nations system to address conflict and its root causes in the region

Planned result for 2026

Enhanced collective action in implementing the prevention agenda in the Horn of Africa

Programme performance in 2024 and target for 2026

162. In 2024, the mission's work contributed to deepened collaboration in addressing peace and security issues between IGAD, the African Union and the United Nations, for example on issues related to inter-State tensions, such as between Ethiopia and its neighbours, and thematic issues, such as the role of women and youth in peace and security, as well as the impact of climate change on peace and security. Work also included implementing the new regional prevention and integration strategy, which met the planned target.

163. In 2026, the mission will continue to carry out good offices, including supporting ongoing peace processes and political transitions within the region, by working with the African Union, IGAD and

respective member States, and regional actors. This will result in improved regional approaches to preventing crises and conflict. The mission will continue to coordinate the implementation of the revised regional prevention and integration strategy.

Lessons learned and planned change

164. The lesson for the mission was the need to continually review and adjust the implementation plan of the regional prevention and integration strategy, bearing in mind available resources and capacities. In applying the lesson, the mission will continue to engage stakeholders to ensure that identified priorities are still relevant in the current context to engage with actors in the region, including other special envoys, to identify entry points for intervention.

165. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 31).

Table 31
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Implementation of the action plan through partnerships and collaboration with other United Nations entities, as well as IGAD and the African Union	Revision and implementation of the prevention and integration strategy through partnerships and collaboration with other United Nations entities, as well as IGAD and the African Union	Improved collaboration with United Nations entities and other stakeholders through implementation of the prevention and integration strategy, which led to more focused and coordinated interventions and activities	Coordination of the prevention strategy, focusing on outcomes and impact on the ground, through closer collaboration with United Nations entities, IGAD and other relevant stakeholders	Coordination of the prevention strategy and review of priority activities, while carrying out good offices on behalf of the Secretary-General to support Member States and subregional organizations in addressing conflicts in the region

Deliverables

Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

167. The proposed resource requirements for 2026 for the mission amount to $1,918,400 (net of staff assessment) and would provide for salaries and common staff costs ($1,757,400) for the continuation of nine posts (1 Under-Secretary-General, 1 D-1, 2 P-4, 1 P-3, 2 National Professional Officer and 2 Local level), as well as operational costs ($161,000), comprising costs for official travel ($68,300), facilities and infrastructure ($32,000), ground transportation ($22,200), communications and information technology ($30,200), medical ($3,800) and other supplies, services and equipment ($4,500).

168. For 2026, no change is proposed to the number and levels of the posts.

169. A vacancy rate of 5 per cent has been applied to the estimates for international staff, and a vacancy rate of zero per cent has been applied to the estimates for national staff, on the basis of the actual average vacancy rates in 2024.

170. The decrease in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) the application of a 5 per cent vacancy rate for international staff compared with the budgeted vacancy rate of zero per cent in 2025; (b) the revised salary rate for National

Professional Officers; (c) reduced requirements for official travel and training fees; (d) the non-recurring acquisition of computers; and (e) lower estimated costs for Intelsat transponder charges. The decrease is offset in part by the increased requirements for the lease of electric vehicles through UN Fleet to replace one of the four ageing vehicles, which is more than 17 years old.

Extrabudgetary resources

171. In 2025, extrabudgetary resources amounting to approximately $846,200 are being utilized to provide for three posts (1 P-5, 1 P-2 and 1 Local level), one United Nations Volunteer and operational costs and programmatic activities.

172. In 2026, extrabudgetary resources in the estimated amount of $846,200 will continue to provide for the continuation of three posts (1 P-5, 1 P-2 and 1 Local level), one United Nations Volunteer and operational costs and programmatic activities.

8. Office of the Special Envoy of the Secretary-General for the Great Lakes Region

($5,623,800)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

173. The mandate of the mission derives from Security Council resolution 2098 (2013) and various subsequent Council resolutions, the latest being resolution 2773 (2025). Established in 2013, the mission is responsible for supporting the implementation of the Peace, Security and Cooperation Framework for the Democratic Republic of the Congo and the Region, which was signed on 24 February 2013 by Angola, Burundi, the Central African Republic, the Congo, the Democratic Republic of the Congo, Rwanda, South Africa, South Sudan, Uganda, the United Republic of Tanzania and Zambia, as well as representatives of the United Nations, the African Union, the International Conference on the Great Lakes Region and the Southern African Development Community, acting as guarantor institutions. On 31 January 2014, Kenya and the Sudan also signed the Framework. The Framework outlines national, regional and international commitments required to end the recurring cycles of violence in eastern Democratic Republic of the Congo and address the root causes of conflict in the region.

174. In relevant resolutions, the Council emphasized the importance of commitments undertaken by the region under the Peace, Security and Cooperation Framework and reiterated its support for the regional efforts under way with regard to the East African Community-led Nairobi process and the African Union-mandated Luanda process. In resolutions 2765 (2024) and 2773 (2025), the Council called upon the Special Envoy to intensify his engagement to support the full implementation of the Framework, as well as to support regional peace processes and strengthen regional diplomatic mediation efforts.

Programme of work

Objective

175. The objective, to which this mission contributes, is to advance the effective implementation of the Peace, Security and Cooperation Framework by supporting and facilitating political, security and economic engagements between the signatory countries, while ensuring coherent and coordinated support from regional and international organizations and other partners, in line with the United Nations Strategy for Peace Consolidation, Conflict Prevention and Conflict Resolution in the Great Lakes Region and its action plan.

Strategy and external factors for 2026

176. To contribute to the objective, the mission will:

(a) Support signatory countries in efforts to implement the revitalized Peace, Security and Cooperation Framework;

(b) Provide the Secretary-General's good offices and enhance support to regional peace processes, including through assistance to mediation efforts and the implementation of respective agreements;

(c) Support the implementation of regional non-military approaches against armed groups, and help to strengthen existing security cooperation mechanisms;

(d) Support the effective participation of civil society, women and youth in political and peacebuilding processes, and promote the economic empowerment of youth;

(e) Promote regional economic integration, including the implementation of the recommendations of the high-level regional workshop on natural resources held in 2021 in Khartoum;

(f) Promote regional judicial cooperation and monitoring of human rights, including by supporting the implementation of the 2019 Nairobi Declaration on Justice and Good Governance and the 2022 Kinshasa Declaration on Enhancing Judicial Cooperation in the Great Lakes Region;

(g) Support the implementation of the United Nations Strategy for Peace Consolidation, Conflict Prevention and Conflict Resolution in the Great Lakes Region and its plan of action for the period 2025–2027, through effective coordination and the provision of secretariat support to the senior policy group and the implementation support mechanism.

177. The above-mentioned work is expected to result in:

(a) Signatory countries of the Peace, Security and Cooperation Framework implementing recommendations from the revitalization process towards addressing root causes of conflict;

(b) Signatory countries engaging faithfully in regional peace processes and implementing political agreements reached, contributing to the de-escalation of bilateral tensions and improving the security and humanitarian situation in eastern Democratic Republic of the Congo;

(c) Concerned countries enhancing cooperation to address the threat posed by armed groups and coordinating regional disarmament, repatriation and reintegration initiatives through the Contact and Coordination Group on non-military measures and its operational cell;

(d) An increased number of civil society organizations, including women and youth, contributing to regional peace processes and cross-border peacebuilding initiatives;

(e) Signatory countries strengthening regional judicial cooperation through the Great Lakes Judicial Cooperation Network, leading to an increased number of joint investigations, legal assistance requests and extradition requests, as well as prosecutions of cross-border crime;

(f) Signatory countries increasing economic cooperation and implementing initiatives to curb the illicit exploitation of and trade in natural resources, with a focus on artisanal gold and coltan;

(g) United Nations entities enhancing coordination and ensuring greater alignment between national strategic cooperation frameworks and the objectives of the United Nations Strategy for Peace Consolidation, Conflict Prevention and Conflict Resolution in the Great Lakes Region.

178. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Despite some progress as a result of diplomatic efforts, relations between some countries in the region will remain tense. The situation in eastern Democratic Republic of the Congo will continue to face persisting insecurity and the proliferation of armed groups;

(b) Regional and international diplomatic efforts will lead to the signing in 2025 of an agreement to end the current crisis in eastern Democratic Republic of the Congo, which will require implementation support;

(c) Regional political processes will continue, requiring sustained support from the United Nations and regional and international partners to ensure the full implementation of agreements reached;

(d) Continued support will be required for the participation and contribution of women and youth in peace processes and community peacebuilding;

(e) Signatory countries of the revitalized Peace, Security and Cooperation Framework will demonstrate renewed political will to implement commitments made under the Framework;

(f) International partners will continue to support efforts towards a political settlement of the conflict in the Great Lakes region.

179. With regard to cooperation with other entities, the mission will enhance coordination with the International Conference on the Great Lakes Region to support complementary approaches under the revitalized Peace, Security and Cooperation Framework and the Pact on Security, Stability and Development in the Great Lakes Region. To further align approaches with international partners, the Special Envoy will continue to participate in the International Contact Group.

180. With regard to inter-agency coordination and liaison, the mission will continue to work closely with the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO). Support to regional peace efforts will be coordinated through a dedicated mechanism, involving MONUSCO, the United Nations Regional Office for Central Africa and the United Nations Office to the African Union. The senior policy group, chaired by the Special Envoy, along with its implementation support mechanism and the integrated secretariat, will continue to ensure alignment among United Nations entities in the region, leveraging expertise and information-sharing across offices, thereby enhancing resource efficiencies, while maintaining the distinct mandates of each entity.

181. The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. In addition to high-level advocacy initiatives, the mission supports the Advisory Board for Women, Peace and Security in the Great Lakes Region in its efforts to promote women's participation in peacebuilding, political and electoral processes and to strengthen the monitoring and evaluation capacities of the mechanisms on sexual and gender-based violence of the International Conference on the Great Lakes Region.

Programme performance in 2024

Advancement of the women and peace and security agenda for the effective revitalization of the Peace, Security and Cooperation Framework

182. In 2024, the mission advanced the women and peace and security agenda and advocated for women's inclusion in regional political processes. The mission, together with the International Conference on the Great Lakes Region and partners, launched the regional gender barometer, a tool to enhance data and analysis on women and peace and security and advance gender equality across member States of the Conference. The first report of the gender barometer was validated in October 2024 and endorsed by the ministers in charge of gender in member States of the Conference in November 2024.

183. To amplify the voices of women in regional peace efforts, the mission organized a regional women's forum in cooperation with the Government of Burundi, as Chair of the Regional Oversight Mechanism of the Peace, Security and Cooperation Framework. The forum recommended the appointment of a goodwill ambassador to champion the aspirations of women in the region. An additional regional forum was organized in Luanda under the leadership of the President of Angola, João Lourenço. The forum proposed the mobilization of existing mechanisms comprising women leaders to support the mediation efforts under the Luanda process and the establishment of a trust fund for women working on peace and security. The mission also enhanced partnerships with the African Union and the International Conference on the Great Lakes Region to promote women's inclusion in dialogue and peace processes.

184. Progress towards the objective is presented in the performance measure below (see table 35).

Table 35
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
High-level advocacy by the Special Envoy on the need for stronger participation of women in peace and political processes	The Special Envoy and the African Union facilitated a women-led mission to the Democratic Republic of the Congo to promote women's participation in regional political processes and assess the deteriorating security and humanitarian conditions in internally displaced persons camps	Increased awareness of progress in the women and pace and security agenda and challenges in the region through the development of the regional gender barometer and the validation of its first report

Planned result for 2026

A revitalized Peace, Security and Cooperation Framework better addresses the root causes of recurrent crises in the Great Lakes region

Programme performance in 2024 and target for 2026

185. In 2024, the mission provided technical support to the development of a draft action plan for the revitalization of the Peace, Security and Cooperation Framework, aiming at ensuring enhanced implementation of the commitments made by the signatory countries. The Special Envoy undertook good offices efforts to address the ongoing security and humanitarian crisis in eastern Democratic Republic of the Congo and to promote a de-escalation of bilateral tensions. The mission provided technical support to the Nairobi and Luanda processes and promoted a convergence of views among the signatory countries on issues driving conflict dynamics. The mission also supported efforts to identify foreign ex-combatants willing to repatriate and facilitated the adoption of a draft common policy on cross-border crime.

186. However, due to the deteriorating security and humanitarian situation in eastern Democratic Republic of the Congo and increased tensions between the Democratic Republic of the Congo and Rwanda, some engagements were postponed, notably a project on economic cooperation, land and conflict, missions of the Contact and Coordination Group and a meeting of the Advisory Board for Women, Peace and Security in the Great Lakes Region.

187. In 2026, the mission will continue to support the implementation of the recommendations developed for the revitalization of the Framework to ensure enhanced coordination and complementarity among regional peace initiatives, as well as more concerted international support thereto. This support includes the disarmament, repatriation and reintegration of foreign armed combatants operating in eastern Democratic Republic of the Congo, the transparent management of natural resources and renewed cooperation on criminal conflict-related cross-border cases, among other things. The Office will integrate women and peace and security and gender perspectives to enhance capacities and opportunities for women to participate in conflict prevention and regional peace processes, and to promote social cohesion in the Great Lakes region.

Lessons learned and planned change

188. The escalating crisis in the region has highlighted the need for closely aligned efforts at the regional and international levels to support dialogue and confidence-building, as well as the continued political will of the parties concerned to commit to a political settlement of the conflict, and for enhanced support to efforts to address the root causes of recurrent conflict in the region. In response, the Special Envoy will further step up the Secretary-General's good offices efforts, supported by enhanced technical support from the mission to the ongoing regional peace processes, including to

the implementation of agreements reached. As part of the revitalization of the Peace, Security and Cooperation Framework, the mission's support will focus on priority areas of addressing root causes of conflict.

189. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 36).

Table 36
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced consultations, coordination and joint action among the guarantor institutions in support of the Peace, Security and Cooperation Framework Initiatives taken by regional and subregional organizations and signatory countries of the Peace, Security and Cooperation Framework to support peaceful, inclusive and credible political and electoral processes	Initiatives under the second and third phases of the action plan of the United Nations Strategy for Peace Consolidation, Conflict Prevention and Conflict Resolution in the Great Lakes Region were implemented, including flagship initiative 2, providing an assessment of the impact and future path of the Peace, Security and Cooperation Framework	Initiatives under the second and third phases of the action plan of the United Nations Strategy for Peace Consolidation, Conflict Prevention and Conflict Resolution in the Great Lakes Region were implemented, including flagship initiative 2, providing an assessment of the impact and future path of the Peace, Security and Cooperation Framework, and flagship initiative 3, on strengthening the role of civil society organizations, women and youth in political processes and peacebuilding structures	Implementation of the road map for the revitalization of the Peace, Security and Cooperation Framework A revitalized Peace, Security and Cooperation Framework effectively supports well-coordinated regional political and diplomatic engagement towards a durable political settlement of tensions and instability in the Great Lakes region	Continued implementation of the action plan for the revitalization of the Peace, Security and Cooperation Framework A revitalized Peace, Security and Cooperation Framework effectively supports well-coordinated and inclusive regional approaches and measures to address the root causes of conflict Sustained engagement of the Democratic Republic of the Congo and neighbouring countries in political dialogue results in the implementation of a regional peace agreement, supported by the United Nations Regional confidence-building measures are progressively implemented, incrementally re-establishing trust and leading to a reduction of violent conflict

Deliverables

190. Table 37 lists all deliverables of the mission.

Table 37
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
1. Reports of the Secretary-General to the Security Council	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	**5**	**2**	**5**	**3**
2. Meetings of the Security Council and the Peacebuilding Commission	5	2	5	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	3	2	3	3
3. Projects on economic cooperation, land and conflict	2	1	2	2
4. Projects to promote cross-border trade and investment	1	1	1	1
Seminars, workshops and training events (number of days)	**8**	**9**	**11**	**12**
5. Workshop on exchange of lessons learned from elections and political processes	1	4	4	4
6. Workshop on economic cooperation, natural resources and conflict	2	1	2	2
7. Workshops on resolving existing challenges in the implementation of the Peace, Security and Cooperation Framework	2	2	2	2
8. Workshop on youth engagement on peace and security	1	–	1	1
9. Advisory Board for Women, Peace and Security in the Great Lakes Region meetings	2	2	2	2
10. Annual meeting of the Great Lakes Judicial Cooperation Network in support of regional judicial cooperation	–	–	–	1
Fact-finding, monitoring and investigation missions (number of missions)	**8**	**5**	**5**	**5**
11. Missions of the operational cell of the Contact and Coordination Group on non-military measures	8	5	5	5
C. Substantive deliverables				
Good offices: high-level engagement, including shuttle and discreet diplomacy, as well as facilitation of direct exchanges among regional representatives; support to regional peace efforts; support to the Contact and Coordination Group on non-military measures for the repatriation of foreign armed groups operating in the eastern Democratic Republic of the Congo; good offices to sustain international support for the United Nations Strategy for Peace Consolidation, Conflict Prevention and Conflict Resolution in the Great Lakes Region.				
Consultation, advice and advocacy: consultations on the situation in the region; consultations and advice on human rights and humanitarian developments; consultation and advice on delinking armed groups from natural resources revenues; advocacy to facilitate political exchanges and agreement on regional integration with natural resources; advocacy to advance gender equality as well as judicial cooperation in the region.				
D. Communication deliverables				
External and media relations: press conferences, statements, interviews and the development of an audiovisual database.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

	International staff										*National staff*				*United Nations Volunteers*			
	USG	*ASG*	*D-2*	*D-1*	*P-5*	*P-4*	*P-3*	*P-2*	*FS*	*Subtotal*	*NPO*	*GS*	*LL*	*Subtotal*	*Inter-national*	*National*	*Subtotal*	*Total*
Approved 2025	1	–	1	1	5	7	5	–	1	21	1	1[a]	7	9	–	–	–	30
Proposed 2026	1	–	1	1	5	7	5	–	1	21	1	1[a]	7	9	–	–	–	30
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

191. The proposed resource requirements for 2026 for the mission amount to $5,623,800 (net of staff assessment) and would provide for salaries and common staff costs ($4,884,200) for the continuation of 30 posts (1 Under-Secretary-General, 1 D-2, 1 D-1, 5 P-5, 7 P-4, 5 P-3, 1 Field Service, 1 National Professional Officer, 1 General Service (Other level) and 7 Local level), as well as operational costs ($739,600), comprising costs for consultants and consulting services ($22,000), official travel ($296,000), facilities and infrastructure ($23,500), ground transportation ($19,600), air operations ($15,600), communications and information technology ($122,300), medical ($12,900) and other supplies, services and equipment ($227,700).

192. For 2026, no change is proposed to the number and levels of the posts.

193. Vacancy rates of 12.7 per cent and 12.5 per cent have been applied to the estimates for international staff and for General Service and Local level staff, respectively, on the basis of the actual average vacancy rates in 2024. A vacancy rate of 50 per cent has been applied to the estimates for the National Professional Officer on the basis of the expected recruitment timeline for the post.

194. The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to increased requirements for civilian personnel, resulting from the application of a lower vacancy rate of 12.7 per cent compared with the rate of 19.3 per cent applied in 2025 for international staff, and the application of the latest salary rates. The increase is offset in part by: (a) the non-recurring acquisition of furniture and information technology equipment; (b) reduced requirements for air operations in line with historical flight hour utilization rates; (c) reduced

requirements for individual contractors; and (d) lower requirements for other services with respect to financial administrative services under other supplies, services and equipment.

Extrabudgetary resources

195. In 2025, extrabudgetary resources in the amount of $1,800,000 are estimated to support the implementation of the Peace, Security and Cooperation Framework through various projects under different thematic areas.

196. In 2026, extrabudgetary resources in the amount of $1,500,000 are estimated to support the implementation of the project for the reduction of small arms circulation in the Great Lakes region.

197. The decrease in the estimated extrabudgetary resources to be utilized in 2026 as compared with 2025 is due to lower projected contributions pending renewed agreements with partners.

9. Office of the Special Envoy of the Secretary-General for Yemen

($16,657,800)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

198. The mission is responsible for exercising the good offices of the Secretary-General to enable the resumption of a peaceful, inclusive, orderly and Yemeni-led political transition process that meets the legitimate demands and aspirations of the Yemeni people, including women and youth, for peaceful change and meaningful reform, as set out in the Initiative of the Gulf Cooperation Council and its implementation mechanism and the outcomes of the comprehensive National Dialogue Conference. The mandate derives from Security Council resolution 2014 (2011) and from subsequent Council resolutions, the latest being resolution 2742 (2024).

199. To ensure the implementation of Security Council resolutions 2014 (2011) and 2051 (2012), together with the political transition agreed in November 2011 under the Initiative of the Gulf Cooperation Council and its implementation mechanism for the political transition process in Yemen, the Secretary-General established the Office of the Special Adviser to the Secretary-General on Yemen, in accordance with an exchange of letters with the President of the Security Council in June 2012, which was then subsumed into the Office of the Special Envoy (S/2012/469 and S/2012/470).

200. In line with Council resolution 2216 (2015), as well as other Council resolutions on Yemen, including resolutions 2014 (2011), 2051 (2012), 2140 (2014), 2201 (2015), 2451 (2018), 2452 (2019), 2722 (2024) and 2742 (2024), and the letter from the Secretary-General addressed to the President of the Security Council (S/2016/488), the Special Envoy of the Secretary-General for Yemen will continue to mediate between the parties to end the conflict. The mission will provide facilitation and technical advice on the negotiation and design of interim political, economic and security arrangements, including towards the resumption of an inclusive, intra-Yemeni political process, under United Nations auspices, and enable the resumption of a peaceful, inclusive, orderly and Yemeni-led political transition process.

Programme of work

Objective

201. The objective, to which this mission contributes, is to achieve a negotiated political settlement between the parties to end the conflict in Yemen and enable the resumption of a peaceful, inclusive, orderly and Yemeni-led political transition that will lead Yemenis towards a path of sustainable peace.

Strategy and external factors for 2026

202. To contribute to the objective, the mission will:

(a) Utilize negotiations, consultations and shuttle diplomacy to achieve an agreement between the parties to end the conflict in Yemen and resume the political transition;

(b) Support the Yemen peace process in political and technical areas, including in helping the parties to identify long-term measures and immediate priorities for political, security and economic issues to resume the political process, implement the Stockholm Agreement and de-escalate the conflict locally, nationally and regionally;

(c) Develop a consultative process involving women, civil society and youth that assesses and integrates their views and recommendations in the mission's multitrack diplomacy and negotiations on the peace agreement and post-transition process;

(d) Foster continued regional and international support for resolving the conflict in Yemen;

(e) Continue to adapt to the evolving political context and operational environment to strengthen mandate implementation.

203. The above-mentioned work is expected to result in:

(a) A peace agreement, or set of agreements, between the parties on political, economic and military/security measures that will improve the living conditions in Yemen and usher in a sustainable, peaceful and inclusive transitional period;

(b) Enhanced engagement with diverse Yemeni political and social stakeholders, including women, youth, media entities and the broader public, to inform the United Nations-facilitated political process and strengthen two-way communication;

(c) Refined security governance options and effective implementation of transitional security arrangements;

(d) Development of an inclusive transitional agenda informed by women's and gender perspectives, ensuring that these perspectives inform relevant substantive agreements, arrangements and implementation mechanisms and bodies;

(e) Continued implementation of the Stockholm Agreement, including the uninterrupted flow of commercial imports into the Hudaydah ports, and further exchanges of conflict-related detainees.

204. With regard to cooperation with other entities, the mission also engages closely with international and regional organizations, including the League of Arab States (LAS), the Gulf Cooperation Council, the European Union and the International Committee of the Red Cross, and other international partners, including international financial institutions.

205. With regard to inter-agency coordination and liaison, the mission cooperates with the Resident/Humanitarian Coordinator and the United Nations country team in Yemen. The mission consults and coordinates closely with the Department of Political and Peacebuilding Affairs and special political missions in the region. In line with Security Council resolution 2452 (2019), the mission closely coordinates with the United Nations Mission to Support the Hudaydah Agreement (UNMHA), which reports to the Secretary-General through the Special Envoy and the Under-Secretary-General for Political and Peacebuilding Affairs, and shares an integrated support structure with UNMHA.

206. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Despite a complex mediation environment due to regional dynamics, sanctions regimes and limitations on staff movement in Houthi-controlled areas, the parties to the conflict will continue to engage in discussions with the Special Envoy, with the aim of reaching a comprehensive political settlement;

(b) The mission will maintain its presence in Yemen and continue to have access to key Yemeni stakeholders, including through digital means, albeit with restrictions imposed by the parties and the security situation on the ground.

207. The mission integrates a gender perspective into its operations and engages with national and local initiatives that promote women's political participation and representation, citizenship rights and the incorporation of women's human rights and security needs in transition, early recovery, conflict resolution and peacebuilding processes.

208. In line with the United Nations Disability Inclusion Strategy, the mission will enhance physical access to its office in Yemen, following similar upgrades in Amman in 2024. The mission will also continue its staff awareness-building activities on disability inclusion.

Programme performance in 2024

Longest period of low level of hostilities since start of conflict continues without a formal truce

209. The period of relative stability along the Yemeni front lines continued throughout 2024 due to the United Nations-mediated truce, upon which Yemenis continue to place much significance. The mission focused on establishing a road map to operationalize and implement commitments agreed upon in December 2023, which included a set of measures to improve the lives of Yemenis, while dialogue and planning continued on de-escalation and a nationwide ceasefire. Meetings were held with political, economic and military representatives, as well as the media, civil society, women and youth, across multiple governorates in Yemen and in the region to gather their feedback on political, economic and security issues. These activities occurred amid growing regional and economic tensions, affecting essential financial services. On 23 July 2024, the mission announced that the parties had agreed to measures to de-escalate tensions in the banking and air transport sectors. Additional complexities arose from the Houthis' arbitrary detention of various United Nations, diplomatic and civil society personnel, leading to a severe restriction on civic space. The mission is working with all stakeholders to secure the immediate and unconditional release of those personnel.

210. Progress towards the objective is presented in the performance measure below (see table 40).

Table 40
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
The United Nations-mediated truce lasted from 2 April to 2 October 2022, and represented the longest period of calm in the eight-year conflict. The truce contributed to a significant reduction of violence and civilian casualties. It started providing relief to Yemenis as a result of regular commercial flights between Amman and Sana'a and an increase in fuel imports through Hudaydah port	Despite the formal expiry of the 2022 truce, hostilities remained limited. Throughout 2023, flights between Sana'a and Amman continued, and the continued opening of Sana'a airport facilitated the mobility of Yemenis, including for humanitarian and medical reasons. Fuel shipments and deliveries of non-food/non-medicine cargo and construction materials into the ports of Hudaydah also continued after the expiry of the truce	The main provisions of the 2022 truce largely held, despite occasional flare-ups. Hostilities across Yemeni front lines remained limited and contained. Flights between Sana'a and Amman resumed quickly after a brief halt, with the continued opening of Sana'a airport significantly enhancing the mobility of Yemenis for humanitarian and medical purposes. Fuel shipments and deliveries of essential non-food and construction materials to Hudaydah ports persisted

Planned results for 2026

Result 1: international community mobilized in support of implementing a Yemeni-led, inclusive peace process

Programme performance in 2024 and target for 2026

211. In 2024, the mission updated the international community on its efforts and interactions with Yemeni interlocutors. Consultations fostered exchanges on supporting a Yemeni-led political process. Intensified track 2 dialogues broadened outreach among Yemeni civil society.

212. In 2026, the mission will enhance collaboration with the international community to bolster engagement with the parties. In addition, the mission will continue to engage with international NGOs to support peacebuilding activities.

213. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 41).

Table 41
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Expansion of the mission's political engagement and consultations to better include diverse Yemeni perspectives and enhance impetus towards a Yemeni-owned and sustainable peace	Mobilization of the international community to identify ways to engage with Yemenis and move towards a sustainable peace process	Increased focus on diverse Yemeni perspectives throughout Yemen and the diaspora through intensified engagement with the international community	Continued engagement of the international community to ensure consistent support and accompaniment of the Yemeni peace process. Regular consultations with a diverse range of Yemeni stakeholders to ensure the inclusion of their priorities in the peace process	Creation of strategic and inclusive initiatives and fostering of partnerships to transform international support into actionable and sustainable solutions for a Yemeni-led peace process

Result 2: expanded political engagement and consultations to better include diverse Yemeni perspectives and enhanced impetus towards a Yemeni-owned and sustainable peace

Programme performance in 2024 and target for 2026

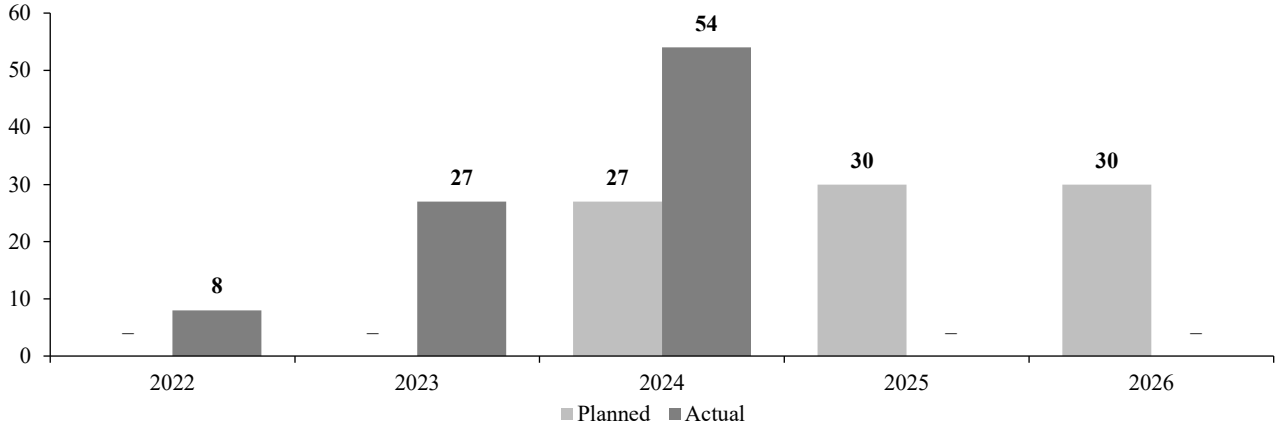
214. In 2024, the mission exceeded its target of 27 formal consultations with Yemeni interlocutors, with 54 consultations conducted. Efforts will focus on broadening inclusion through the mission's presence in Yemen and Jordan, as well as engagement with Yemeni stakeholders both locally and regionally, including through field visits.

Lessons learned and planned change

215. The lesson learned is the importance of interdisciplinary approaches to achieve a more inclusive peace process and enhance mediation efforts. In applying the lesson, engagements will address cross-cutting issues and emphasize Yemeni voices, including through digital means.

216. Expected progress towards the objective is presented in the performance measure below (see figure V).

Figure V
Performance measure: number of formal consultations with Yemeni interlocutors



Deliverables

217. Table 42 lists all deliverables of the mission.

Table 42
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

[a] Other level, unless otherwise stated.

218. The proposed resource requirements for 2026 for the mission amount to $16,657,800 (net of staff assessment) and would provide for salaries and common staff costs ($11,393,900) for 101 posts (1 Under-Secretary-General, 1 D-2, 1 D-1, 6 P-5, 15 P-4, 10 P-3, 23 Field Service, 13 National Professional Officer, 1 General Service (Other level) and 30 Local level), including the proposed staff changes below, as well as operational costs ($5,263,900), comprising costs for official travel ($360,200), facilities and infrastructure ($2,946,800), ground transportation ($229,600), air operations ($393,800), communications and information technology ($831,900), medical ($203,300) and other supplies, services and equipment ($298,300).

219. In 2026, the following changes are proposed for staffing:

(a) Reassignment of a post of Medical Officer (National Professional Officer) in Aden as Associate Engineer in the Engineering and Facilities Management Unit, given the growing operational requirements to manage engineering and facilities management activities in Aden, including those currently outsourced to contractors in support of the Chief of the Engineering Unit based in Hudaydah. The post is needed to maintain facilities, ensure uninterrupted power and water supply, manage waste and resolve issues raised by staff;

(b) Conversion of a Procurement Assistant (Field Service) post to a Procurement Assistant (Local level) post in Amman, to improve the structure of the Procurement Unit and to nationalize and build capacity;

(c) Redeployment of an Information Systems Assistant (Field Service) post from Amman to Sana'a to ensure uninterrupted ICT support in Sana'a as a critical business continuity measure, particularly in situations of unexpected movement restrictions;

(d) Redeployment of a Telecommunications Technician (Field Service) post from Sana'a to Aden to align it with the increased staff presence in Aden and ensure required telecommunications technical expertise;

(e) Reassignment of a Security Officer (Field Service) based in Sana'a as Administrative Assistant within the Office of the Special Envoy of the Secretary-General for Yemen in Amman, to meet the growing workload of the Office.

220. Vacancy rates of 21.1 per cent and 27.9 per cent have been applied to the estimates for international and General Service posts, respectively, on the basis of the actual average vacancy rates in 2024, and a vacancy rate of 30.8 per cent has been applied to the estimates for National Professional Officer posts on the basis of the actual vacancy rate in March 2025.

221. The increase in requirements proposed for 2026 compared with the appropriation for 2025 is attributable to higher requirements for civilian personnel, resulting from the application of the latest salary rates, higher common staff costs and the application of lower vacancy rates of 21.1 per cent and 30.8 per cent, respectively, for international staff and National Professional Officers, compared with the rates of 23.6 per cent and 42.9 per cent, respectively, applied in 2025. The increased requirements are offset in part by the reduced requirements for: (a) facilities and infrastructure, due to the application of lower cost-share percentages for the Office of the Special Envoy, from 67 per cent in 2025 to 58 per cent in 2026, for the Sana'a and Aden offices, parking lot leases and security services; (b) ground transportation, owing to the discontinuation of its maintenance of fuel reserves in Aden and Sana'a; and (c) air operations, due to the realignment of aviation fuel and rental costs of the fixed-wing aircraft in line with historical flight hour utilization rates.

Extrabudgetary resources

222. In 2025, extrabudgetary resources in the estimated amount of $4 million will support the Special Envoy's efforts to reach sustainable and inclusive agreements to end the conflict in Yemen.

223. In 2026, extrabudgetary resources in the estimated amount of $4 million are projected to support the same activities as in 2025.

10. Office of the Special Envoy of the Secretary-General on Myanmar

($995,600)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

224. The mission is responsible for the provision of the Secretary-General's good offices through discussions involving all relevant stakeholders and assistance to Myanmar. The mandate was defined by the General Assembly in its resolution 72/248 and has been renewed on a yearly basis since, most recently in resolution 79/182. In its first resolution on Myanmar, resolution 2669 (2022), the Security Council reinforced the urgent need to end the human suffering, and provided further guidance on the scope of work of the Special Envoy of the Secretary-General, including by encouraging close coordination with the Special Envoy of the ASEAN Chair on Myanmar. The situation in Myanmar continues to deteriorate following the military takeover of February 2021, with serious implications for the human rights of the Rohingya Muslims and other groups. Fighting between the Myanmar armed forces and ethnic armed organizations and other resistance forces has continued to intensify and has severely affected civilians.

Programme of work

Objective

225. The objective, to which the mission contributes, is to support a Myanmar-led democratic and peaceful nation-building process and the creation of conditions that are conducive to the voluntary, safe, dignified and sustainable return and reintegration of Rohingya in Myanmar.

Strategy and external factors for 2026

226. To contribute to the objective and address the deteriorating situation in Myanmar, the mission will:

(a) Implement a multitrack approach, in accordance with paragraph 37 (g) of the Pact for the Future, under action 16, including strengthening cooperation between the United Nations and ASEAN. In close coordination with the Special Envoy of the ASEAN Chair and United Nations partners, the Special Envoy of the Secretary-General will seek to support Myanmar-led processes for the resolution of the crisis. The Special Envoy will complement regional efforts to support the effective implementation of the ASEAN five-point consensus, aligned with the needs of the people of Myanmar, and will support the coordinated humanitarian and development engagement of the United Nations system;

(b) Advocate for a Myanmar-led process towards a peaceful, democratic and inclusive future in line with the Pact for the Future actions. In support of this, the Special Envoy will help to promote a coherent international and regional approach. The mission will continue to initiate inclusive and participatory approaches with minorities, youth and women, whose voices are critical to fostering social cohesion and developing a way out of the current political crisis in line with the will of the people;

(c) Continue efforts to create an environment that is conducive to the voluntary, safe, dignified and sustainable return to Rakhine State of the forcibly displaced Rohingya in the region, including from Bangladesh. The Special Envoy will continue to promote a political solution that addresses the underlying issues in consultation with the Rohingya, and to advocate for the

improvement of the conditions of Rohingya on the ground, in line with the recommendations of the Advisory Commission on Rakhine State and, as appropriate, any decision from the planned High-level Conference on the Situation of Rohingya Muslims and Other Minorities in Myanmar, to be held in 2025.

227. The above-mentioned work is expected to result in:

(a) Improved conditions for the safe, voluntary, dignified and sustainable return of forcibly displaced populations;

(b) The creation of conditions that are conducive to a de-escalation of violence and an increase in trust among communities;

(c) Greater international and regional political support towards Myanmar-led processes for the resolution of the crisis;

(d) Key stakeholders advancing discussions towards the establishment of a Myanmar-led process on restoring democratic and human rights norms, and continued engagement with all stakeholders to identify potential for common ground.

228. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The impact on civilians across Myanmar from the continued violence since the military takeover, serious human rights violations and the need for civilian protection will remain a significant challenge in restoring peace in the country;

(b) The situation will continue to require concrete actions to contribute towards improved conditions to allow for the safe, dignified, voluntary and sustainable return of the Rohingya and their reintegration in Myanmar. The rights and security of the Rohingya people need to be guaranteed and embedded in Myanmar-led solutions towards a peaceful, democratic and inclusive future;

(c) Illicit activities and related financial flows, closely linked to the conflict in Myanmar and the downfall of the formal economy, will continue to hamper conflict resolution and impede socioeconomic and development efforts.

229. With regard to cooperation with other entities, the mission works in partnership with ASEAN, especially the Special Envoy of the ASEAN Chair, other key regional organizations, such as the Organization of Islamic Cooperation (OIC) and the European Union, neighbouring countries and international donors to mobilize support to Myanmar-led processes for the resolution of the crisis.

230. With regard to inter-agency coordination, the mission coordinates closely with the United Nations system through established channels, in close consultation with the Resident Coordinators in Myanmar and Bangladesh. The Special Envoy of the Secretary-General continues to carry out the good offices mandate in close cooperation with the United Nations country team, regional offices and Headquarters, as well as human rights mechanisms on Myanmar mandated by the Human Rights Council. The mission also works in partnership with relevant United Nations entities to foster inclusion of diverse and vulnerable groups, such as women and youth, in dialogue processes.

231. The mission integrates gender perspectives into its operational activities, deliverables and results, as appropriate, and supports efforts to strengthen the capacity of Myanmar women to participate regionally and globally in women and peace and security engagements and to amplify the voices of the most marginalized women.

232. In line with the United Nations Disability Inclusion Strategy, the mission will foster the inclusion of persons with disabilities in its political strategy and its efforts on building inclusion.

Programme performance in 2024

Strengthened international and regional partnerships, including on creating conditions for the safe, dignified and voluntary repatriation of displaced persons

233. Since onboarding in May 2024, the Special Envoy has focused on strengthening relations with ASEAN, meeting with the ASEAN Secretary-General, the Special Envoy of the ASEAN Chair on Myanmar and Heads of State and Government and ministers for foreign affairs, including during her regional tour to ASEAN member States and to other neighbouring countries, such as China. The Special Envoy outlined to the Third Committee of the General Assembly that she placed an emphasis on urging neighbouring countries to leverage their influence on stakeholders in Myanmar to end the conflict.

234. In 2024, the Special Envoy established contact with all key stakeholders, including local communities in Rakhine State, displaced populations and their host countries in the region. The Special Envoy regularly engaged with conflict parties, civil society, community leaders, women's groups, human rights activists and other key stakeholders from Myanmar, including Rakhine, with a view to de-escalating the violence and promoting inclusive Myanmar-led processes. The Special Envoy actively advocated for protection and assistance to refugees and displaced persons.

235. Progress towards the objective is presented in the performance measure below (see table 45).

Table 45
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Repatriation was further delayed by the escalating violence throughout Myanmar, including in Rakhine State	Repatriation was further delayed due to the devastation caused by Cyclone Mocha in May 2023 and the escalating violence throughout Myanmar, including in Rakhine State, where fighting between the Arakan Army and the Myanmar armed forces resumed in November 2023	Repatriation was further delayed due to the escalating violence throughout Myanmar, including in Rakhine State, where fighting between the Arakan Army and the Myanmar armed forces intensified throughout 2024, leading to further displacement and civilian casualties

Planned result for 2026

Progress towards improved humanitarian conditions and a Myanmar-led inclusive, democratic and peaceful nation-building process

Programme performance in 2024 and target for 2026

236. In 2024, the mission's work aimed to contribute towards sustainable solutions for the Rohingya, which did not meet the planned target of facilitating local initiatives in support of social cohesion. The target was not met due to the deterioration of security conditions in Myanmar, including in Rakhine State, where fighting between the Arakan Army and the Myanmar armed forces continued. The mission continues to engage key stakeholders to advocate for improved conditions in Rakhine that would allow for the safe, dignified and sustainable return of refugees. In 2026, the mission, in cooperation with ASEAN, will concentrate efforts on supporting Myanmar-led processes to resolve the crisis in line with the elements set out in the ASEAN five-point consensus.

Lessons learned and planned change

237. A lesson learned for the mission was the importance of partnerships and coordination with key regional organizations, as stipulated in the Pact for the Future, namely ASEAN and OIC, and also with international financial institutions and across the United Nations system. To this end, the

Special Envoy will continue to strengthen cooperation with ASEAN and the Special Envoy of the ASEAN Chair to garner regional support for concrete initiatives that support Myanmar-led solutions towards a peaceful, democratic and inclusive future for the country.

238. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 46).

Table 46
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The Special Envoy elevated international engagement on the Rohingya through a visit to Bangladesh and by reinforcing cooperation with OIC	The Special Envoy deepened coordination with ASEAN and OIC, including on addressing the situation of the Rohingya, and engaged neighbouring States during visits to India and China	The Special Envoy engaged key actors, advocating for the cessation of violence and improved humanitarian access and conditions, including in Rakhine State, and implemented a women and peace and security initiative	The Special Envoy engages key actors, advocating for a cessation of violence and resolution of the crisis in Myanmar, including in Rakhine State, to support conditions for sustainable and inclusive peace that are conducive to the return of refugees	In coordination with ASEAN, the Special Envoy supports a Myanmar-led process to find a political solution, advocate for the rights of the Rohingya as part of an inclusive future and address systemic inequalities affecting marginalized groups

Deliverables

239. Table 47 lists all deliverables of the mission.

Table 47
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**1**	**1**

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Good offices: good offices engagements with Myanmar stakeholders, civil society, ethnic armed organizations and countries in the region in support of: a return to democratic reforms, peace and stability at the national, subnational and local levels, and humanitarian access and the voluntary, safe, dignified and sustainable repatriation of the Rohingya and durable solutions and reintegration of forcibly displaced persons.

Consultation, advice and advocacy: consultations with Myanmar stakeholders, civil society, key regional organizations, including ASEAN and OIC, and the international community, on political and peace-related issues; accountability for serious human rights violations and cooperation with international accountability mechanisms; good governance and strengthening of the rule of law; human rights issues, including fundamental freedoms, civilian protection, child rights, the elimination of discrimination and violence against minorities; the promotion of gender equality; and the involvement of women and youth in peace initiatives.

D. Communication deliverables

Outreach programmes, special events and information materials: outreach activities with local communities, government partners, opinion leaders, the media, civil society and other agents of change to support the implementation of the Office's mandate.

External and media relations: press conferences, statements, advisories, backgrounders, interviews and other media engagements related to the Office's objective, and the development of additional communication capacities, including a dedicated website.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 48

Proposed 2026	1[a]	–	–	1	1	1	–	–	–	4	–	–	1[b]	1	–	–	–	5
Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**

[a] The Under-Secretary-General is on a when-actually-employed contract.
[b] One Local level position approved for establishment as a general temporary assistance position in 2025.

240. The proposed resource requirements for 2026 for the mission amount to $995,600 (net of staff assessment) and would provide for salaries and common staff costs ($739,500) for the continuation of four posts (1 Under-Secretary-General, 1 D-1, 1 P-5 and 1 P-4) and one Local level general temporary assistance position, as well as operational costs ($256,100), comprising costs for official travel ($115,100), facilities and infrastructure ($20,700), ground transportation ($7,000), communications and information technology ($25,500), medical ($600) and other supplies, services and equipment ($87,200).

241. After a security assessment conducted by the Department of Safety and Security of the Secretariat in early 2022, all international staff were temporarily relocated from Nay Pyi Taw to Bangkok and are hosted in the compound of the Economic and Social Commission for Asia and the Pacific.

242. For 2026, no change is proposed to the number and levels of the posts.

243. It is proposed that the general temporary assistance position of an Administrative Assistant (Local level) in Bangkok be continued. The continuation of the general temporary assistance position in Bangkok would provide necessary administrative support to the mission's international staff who have been temporarily relocated to Bangkok.

244. A vacancy rate of 25 per cent has been applied to the estimates for international posts on the basis of the actual average vacancy rates in 2024. A vacancy rate of 50 per cent has been applied to the estimates for the Local level general temporary assistance position on the basis of the expected recruitment timeline for the position.

245. The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to the application of revised salary rates.

Extrabudgetary resources

246. In 2025, extrabudgetary resources in the amount of $547,600 will be used to support activities and relevant initiatives aimed at promoting the implementation of General Assembly resolution 79/182 and would provide for one P-5 post and one P-3 post for part of the year, and one P-2 post for the full year.

247. In 2026, extrabudgetary resources in the estimated amount of $180,000 are projected to support the continuation of activities.

248. The decrease in extrabudgetary resources in 2026 is due to donor agreements that are due for renewal in the fourth quarter of 2025, in line with the mission's single-year donor agreements practice.

11. Office of the Personal Envoy of the Secretary-General for the Sudan

($2,064,700)

A. Proposed programme plan for 2026

Overall orientation

Mandates and background

249. The mandate of the Office of the Personal Envoy of the Secretary-General for the Sudan derives from Security Council resolution 2715 (2023), in which the Council, expressing alarm at the continued violence and humanitarian situation, in particular violations of international humanitarian law and grave human rights violations and abuses, welcomed the appointment of the Personal Envoy to use his good offices with the parties and the neighbouring States, complementing regional peace efforts, including those of the African Union and IGAD, and called on all parties to extend their cooperation in furtherance of his tasks. This was reiterated by the Council in its resolution 2724 (2024), in which it encouraged the Personal Envoy to use his good offices with the parties and the neighbouring States, complementing and coordinating regional peace efforts. In its resolution 2736 (2024), the Council called on the parties to the conflict to seek an immediate cessation of hostilities, leading to a sustainable resolution to the conflict, through dialogue, with the continued support of the Personal Envoy and the African Union High-level Implementation Panel. The Council encouraged the coordinated engagement of the Personal Envoy with the African Union, LAS and other key regional actors, to help to advance peace and an inclusive and comprehensive Sudanese-led political process, with the full, equal, meaningful and safe participation of women, that reflected the aspirations of the Sudanese people.

Programme of work

Objective

250. The objective, to which this mission contributes, is to seek an immediate cessation of hostilities, leading to a sustainable resolution to the Sudan conflict, and to advance a lasting peace through dialogue and an inclusive and comprehensive Sudanese-led political process that reflects the aspirations of the Sudanese people.

Strategy and external factors for 2026

251. To contribute to the objective, the mission will:

(a) Through good offices, consultations and shuttle diplomacy, support dialogue between the parties towards a cessation of hostilities, enhanced protection of civilians and the launch of an inclusive Sudanese-led political process, with the full, equal, meaningful and safe participation of women, in close collaboration with national, regional and international stakeholders;

(b) Support the coordination of international mediation initiatives by bringing together key regional and international stakeholders to enhance the overall effectiveness, coherence and integration of these initiatives and maximize their comparative advantages;

(c) Foster continued regional and international support for resolving the conflict in the Sudan, notably through advocacy, frequent dialogue and information exchange. Efforts will be aimed at harmonizing tracks of multilateral engagement, maximizing impact and leveraging peacemaking efforts, and advancing strategies on ensuring an inclusive process;

(d) Sustain and support consultations with a broad range of Sudanese civilian forces, including women and youth, to contribute to the United Nations initiatives aimed at advancing a cessation of hostilities, improving civilian protection in the Sudan and supporting an inclusive Sudanese-led political process.

252. The above-mentioned work is expected to result in:

(a) Parties making progress towards a negotiated cessation of hostilities, including through localized or issue-specific agreements, including those relating to transitional security arrangements, the protection of civilians and the advancement of humanitarian access;

(b) Peace efforts being better coordinated, with enhanced clarity on the roles and respective responsibilities of stakeholders, on the basis of comparative advantage and taking account of capacities, leverage and any prior engagement on the issues, while giving effect to the principle of partnership and ensuring effective coordination of facilitation and other engagements;

(c) Mediation or facilitation frameworks being established and possible outcomes of the peace and political processes being agreed. Specifically, options for formal and informal mechanisms for collaboration and coordination are to be considered as accompanying architecture for aligning initiatives and strategy, harnessing leverage, mobilizing support and implementing agreements, including short-term arrangements;

(d) Civilian stakeholders being effectively engaged and informed on United Nations peacebuilding and peacemaking initiatives.

253. With regard to cooperation and coordination with other entities, the mission will liaise closely with all international and regional stakeholders involved in support of peace efforts in the Sudan, in particular the African Union, IGAD and LAS, as well as neighbouring States. In doing so, it will work through established regional and Member State mechanisms to deepen strategic and operational engagements in carrying out good offices and mediation. It will also liaise closely with civilian actors through the various established civilian peacemaking platforms.

254. With regard to inter-agency coordination and liaison, the mission will work closely with the Resident Coordinator/Humanitarian Coordinator and the agencies, funds and programmes of the United Nations operating in the Sudan and the region, and will coordinate closely with the Department of Political and Peacebuilding Affairs and special political missions and peacekeeping operations in the region, as appropriate.

255. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The situation in the Sudan is likely to remain volatile, with the possibility of further fragmentation of political and military dynamics. While a nationwide agreement on a cessation of hostilities may take time, there could be temporary, localized ceasefires;

(b) The international community will remain actively engaged in support of peace efforts in the Sudan, and the parties to the conflict will continue to engage in discussions with the Personal Envoy to advance a Sudanese-led political process.

256. The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The mission supports activities to advance gender-related issues and provides support for greater civic engagement towards more inclusive peace and political processes.

257. In line with the United Nations Disability Inclusion Strategy, the mission will seek to promote disability inclusion internally by creating space for employment opportunities for qualified candidates. At the political level, it will advocate for inclusion of the views of persons with disabilities in decision-making platforms, as change agents for peace, security and sustainable development.

Programme performance in 2024

Increased sensitization of warring parties to protection of civilians issues

258. The Personal Envoy initiated dialogue with the parties on critical issues aimed at alleviating the impact of the war on the civilian population, notably strengthening the protection of civilians and improving humanitarian access. Further to the adoption by the Security Council of resolution 2736 (2024), the Personal Envoy convened an initial round of proximity talks in Switzerland in July focused on these issues, which were attended by representatives of both parties, establishing a format for future discussions. The talks provided an opportunity for engagement on concrete measures to improve the lives of civilians in the Sudan. The discussions also contributed to the development of options contained in the report of the Secretary-General on recommendations for the protection of civilians in the Sudan (S/2024/759). To strengthen the mission's outreach to and partnership with Sudanese civil society, in December the mission undertook a series of virtual consultations with representatives of Sudanese youth movements, women's groups and other civil society actors on the protection of civilians to inform future discussions with the warring parties and ensure that their outcome benefits local populations in the Sudan.

259. Progress towards the objective is presented in the performance measure below (see table 50).

Table 50
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Commitment by both warring parties to enhance the protection of civilians, including the implementation of the Jeddah Declaration of Commitment to Protect the Civilians of Sudan

Planned result for 2026

Increased coherence of mediation initiatives in support of peace and of the launch of an inclusive political process

Programme performance in 2024 and target for 2026

260. In 2024, the mission set up mechanisms to enhance the coordination of mediation initiatives on the Sudan. It encouraged information-sharing among partners and built support for collective efforts in favour of peace in the Sudan through the establishment of the Sudan Consultative Group, which brought together leading multilateral organizations and Member States involved in mediation efforts on three occasions. In addition to providing support to the meetings of the Group, the Personal Envoy convened a mediators' planning retreat in Djibouti on 25 and 26 July to further strengthen the coherence of international peace efforts.

261. In 2026, the mission will continue to engage with national, regional and international stakeholders to enhance the coherence and integration of mediation initiatives in support of the peace process and the launch of a political process, ensuring close linkages between peace and political efforts. The mission will engage with the parties to build confidence in mediation efforts and encourage them to engage in the peace process. The mission will also support inclusive and cohesive efforts to bring civilian stakeholders together to engage in a credible political process charting a way towards a negotiated political settlement.

262. Expected progress towards the objective is presented in the performance measure below (see table 51).

Table 51
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Establishment of the Sudan Consultative Group to coordinate mediation efforts and organization of the mediators' planning retreat	Enhanced coherence among stakeholders to advance harmonized mediation initiatives, leading to more impactful and inclusive peace and political processes	Enhanced coherence and harmonization of mediation initiatives, leading to an actionable road map for an inclusive peace and political process that reflects the aspirations of the Sudanese people Enhanced actions by the parties to support the protection of civilians and unhindered humanitarian access

Deliverables

263. Table 52 lists all deliverables of the mission.

Table 52
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**–**	**3**	**3**	**3**
1. Meetings of the Security Council	–	3	3	3
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**–**	**20**	**30**	**30**
2. Workshops and consultations on subjects relating to peace agreements and the political process	–	20	30	30
C. Substantive deliverables				
Good offices: provision of good offices with key stakeholders to support peace efforts and efforts to relaunch a political process.				
Consultation, advice and advocacy: consultation, advice and advocacy with national, regional and international stakeholders to enhance the coordination of mediation efforts and in support of international engagement to end the conflict in the Sudan; consultation and advice in support of advancing peace and dialogue; consultations in support of seeking an immediate cessation of hostilities as part of a negotiated solution leading to a sustainable resolution to the conflict; consultations, in close collaboration with the Resident Coordinator/Humanitarian Coordinator, to advocate for related key humanitarian and protection of civilians concerns; consultations in support of the political process with representatives of civil society organizations; consultations in support of the political process with women and youth representatives and women's and youth organizations.				
D. Communication deliverables				
External and media relations: press statements, interviews, video messages and briefings stressing the importance of political dialogue, the end of violence and human rights violations, humanitarian access and the role of women in the peace process; strategic plan to cover key activities of the mission; media monitoring and analysis of media trends, actions to address misinformation and disinformation, risks and opportunities and crisis communications management.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

264. The proposed resources for 2026 for the Office of the Personal Envoy of the Secretary-General for the Sudan amount to $2,064,700 (net of staff assessment) and would provide for the salaries and common staff costs ($1,753,800) for the continuation of eight posts (1 Under-Secretary-General, 2 P-5, 3 P-4 and 2 Local level), as well as operational costs ($310,900) comprising the provision for official travel ($162,600), facilities and infrastructure ($63,900), ground transportation ($10,000), communications and information technology ($35,100), medical ($4,500) and other supplies, services and equipment ($34,800).

265. For 2026, no change is proposed to the number and levels of the posts.

266. A vacancy rate of zero per cent has been applied to the estimates for international posts on the basis of the actual vacancy rate in March 2025 and confirmed onboarding status, and a vacancy rate of 50 per cent has been applied to the estimates for national staff on the basis of the expected recruitment timeline for the posts.

267. The increase in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable mainly to increased requirements for civilian personnel, resulting from the application of a vacancy rate of zero per cent compared with the rate of 50 per cent applied in 2025 for international staff, and the application of the latest salary rates. The increase is offset in part by reduced requirements for official travel due to less travel to New York proposed for 2026, and the non-recurrent acquisition of computers.

Extrabudgetary resources

268. In 2025, extrabudgetary resources in the amount of $1,644,400 are currently projected, which will include a provision for five positions (1 D-1, 1 P-5, 1 P-4, 1 P-3 and 1 Field Service) supporting overall management in the office of the Personal Envoy in Addis Ababa, critical expertise on developing political and mediation strategies for the Personal Envoy, developing communication strategies and media encounters for the Personal Envoy, and developing strategies for women's participation in the various activities undertaken by the Office of the Personal Envoy. The resources will also cover expenses related to the mediation efforts of the Personal Envoy and operational costs.

269. For 2026, extrabudgetary resources in the estimated amount of $898,300 would continue to provide for three positions (1 D-1, 1 P-3 and 1 Field Service), in the light of the unpredictability of voluntary contributions. The mission will aim to maintain personnel capacity and operational costs at levels comparable to the previous year.

Annex I

Summary of follow-up action taken to implement the decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation	*Action taken to implement the recommendation*
Advisory Committee on Administrative and Budgetary Questions **A/79/7/Add.2**	
The Advisory Committee trusts that updated information on the regional work of the Office will be provided in the next budget submission (para. 10 (a)).	The Office of the Special Adviser to the Secretary-General on the Prevention of Genocide maintains active collaboration with various regional organizations. In 2024, it concluded several memorandums of understanding, including in Africa with the East African Community and a number of prevention partners. In addition, the deployment of new Political Affairs Officers (United Nations Volunteers) across regional United Nations presences has significantly enhanced the mission's participation in regional activities and improved communication channels with these organizations.
The Advisory Committee trusts that the vacant posts, including the long-vacant ones and the local posts, will be filled as soon as possible and that an update on the recruitment status will be provided to the General Assembly at the time of its consideration of the present report and in the next budget submission. The Committee also trusts that the Secretary-General will propose appropriate budgetary actions in the next budget submission for any long-vacant posts that have not been recruited (para. 11).	Information on the status of recruitment of long-vacant posts is presented in annex I of the supplementary information for each thematic cluster. The missions under cluster I make strong efforts to recruit and fill vacant posts in accordance with staff selection policy. Recruitment exercises, however, may be affected and inadvertently delayed due to external factors, including visa restrictions; the availability of qualified candidates in the duty stations; and temporary restrictions on hiring in efforts to mitigate financial challenges facing the Organization (i.e. liquidity pressure), which adversely impacts the missions' ability to fill vacant posts. Despite these challenges, missions will continue to make every effort to fill all current and future vacancies as expeditiously as possible.
The Advisory Committee trusts that more information on the complementarity and coordination among entities working on tackling hate speech across the United Nations, along with related resource implications, will be provided in the context of future budget proposals (para. 20).	The Office of the Special Adviser to the Secretary-General on the Prevention of Genocide is the United Nations system-wide focal point on hate speech and coordinates the implementation of the United Nations Strategy and Plan of Action on Hate Speech across the United Nations system. In this capacity, the Office coordinates and chairs the Working Group on Hate Speech, which comprises 19 United Nations entities that work on tackling hate speech from the perspective of their specific mandates. The Strategy and the Working Group enable the United Nations system to bring together its efforts under a common vision and strategic objectives, as outlined in the Strategy, and to ensure maximum impact across the United Nations system.

Brief description of the recommendation	*Action taken to implement the recommendation*
The Advisory Committee trusts that information on support services provided by other entities to the special political missions under cluster I, along with related amounts and any efficiency gains, will be provided in the context of the next budget report (para. 21).	Building on best practices and maximum efficiency gains, the United Nations Peacekeeping Force in Cyprus (UNFICYP) provides administrative and logistical support (as part of its delegation of authority) to the Office of the Special Adviser to the Secretary-General on Cyprus at no charge in the areas of finance/budget, human resources management and logistics, including communications and information technology, and, also at no charge, the support of the UNFICYP spokesperson and gender adviser, and the security sections of both entities work in an integrated manner. Support services for the Office of the United Nations Representative to the Geneva International Discussions are provided by the United Nations Office at Geneva. The Office of the Special Envoy of the Secretary-General for Yemen continues to receive administrative support from the Kuwait Joint Support Office. The Economic and Social Commission for Asia and the Pacific (ESCAP) continues to be the primary service provider for the Office of the Special Envoy of the Secretary-General on Myanmar. With ESCAP being the main service provider, the mission benefits from the economy of scale from ESCAP, which provides services for entities in the Asia-Pacific region.
The Advisory Committee again trusts that special political missions under cluster I will take into consideration lessons learned and best practices from proven fundraising strategies, with a view to strengthening their efforts to obtain sufficient, predictable and sustained levels of voluntary contributions, including unearmarked funding, as necessary. The Committee trusts that an update will be provided in the next budget submission (see also A/78/7/Add.2, para. 25) (para. 22).	The missions under cluster I engage in different fundraising efforts to encourage donors to finance flagship initiatives to accelerate the implementation of their respective mandates. Despite these efforts, achieving significant success in this regard remains a challenge. For example, the Office of the Special Adviser to the Secretary-General on Cyprus successfully engaged in fundraising and obtained $100,000 from an external donor for a period of three years (2025–2027) to conduct island-wide opinion polls, enhancing its ability to deliver fact-based in-depth political analysis, with a special focus on the women and peace and security aspect of the Cyprus issue. The Office of the Special Adviser to the Secretary-General on the Prevention of Genocide has over the past several years issued regular global appeals for voluntary contributions, outlining its priorities and needs. The most recent global appeal was published in January 2024. The Office will continue this practice and continue its regular engagement with Member States on priorities and needs related to voluntary contributions. However, given the current global financial climate, the Office is encountering challenges in mobilizing additional resources to fully support its core activities.

Brief description of the recommendation	*Action taken to implement the recommendation*
	The Office of the Special Envoy of the Secretary-General for the Great Lakes Region diligently engages with its primary donors to secure voluntary contributions in support of the implementation of the Peace, Security and Cooperation Framework for the Democratic Republic of the Congo and the Region. In addition to its ongoing efforts to enhance fundraising strategies, the Office will engage with other similar special political missions and other United Nations entities to exchange lessons learned and best practices. This collaboration will help to strengthen the Office's approach to obtaining sufficient, predictable and sustained levels of voluntary contributions, including unearmarked funding, as necessary. By leveraging insights from proven fundraising strategies, the Office aims to improve its approach and increase the level of voluntary contributions from current levels. The Office of the Special Envoy of the Secretary-General for Yemen has aligned its resource mobilization efforts. In addition, the Office has put in place improved internal reporting on resources management that takes into consideration all extrabudgetary funding portals.
The Advisory Committee again trusts that efforts will be intensified to achieve a more equitable geographical representation of Member States among the staff of the special political missions under thematic cluster I and that an update will be provided in future programme budget submissions (see also A/78/7/Add.2, para. 26) (para. 23).	Special political missions have taken measures to strengthen efforts to achieve equitable geographical representation in their workforce. In many missions, hiring managers are required to demonstrate, using the current data on geographical representation, the impact of such recommendations. The revised template of the selection memorandums now allows hiring managers to review, before a candidate is selected, whether the proposed selection improves the geographical representation of the mission. The data are also monitored on a quarterly basis through the management dashboard to guide the course of recruitment actions. The geographical representation, by country, of the international staff posts in all special political missions is provided centrally in annex XVIII to the report on estimates in respect of special political missions (A/80/6 (Sect. 3)/Add.1).
The Advisory Committee again trusts that efforts will be intensified to achieve gender balance among the staff of the special political missions under thematic cluster I and that an update will be provided in future programme budget submissions (see also A/78/7/Add.2, para. 26) (para. 24).	Special political missions have taken measures to strengthen efforts to achieve gender balance in their workforce. In many missions, hiring managers are required to demonstrate the impact of their hiring recommendation, using the current data on gender representation. The revised template of the selection memorandum allows hiring managers to review, before a candidate is selected, whether the proposed selection improves the gender representation of the mission. The data are also monitored on a quarterly basis through the management dashboard to guide the course of recruitment actions.

Brief description of the recommendation	*Action taken to implement the recommendation*
	For example, the Office of the Special Adviser to the Secretary-General on Cyprus is dedicated to promoting diversity and achieving gender parity within its international workforce. The Office of the Special Envoy of the Secretary-General for the Horn of Africa takes into consideration gender balance in all its recruitment processes. The mission will endeavour to continue advancing gender balance and will provide updates in future programme budget submissions. The Office of the Special Envoy of the Secretary-General for the Great Lakes Region is fully committed to advancing gender parity, prioritizes fostering an enabling environment that attracts women, promotes work/life balance policies and ensures that gender parity is a key consideration in recruitment and talent management. The Office of the Special Envoy of the Secretary-General for Yemen strives to achieve gender balance with its international recruitments, and all hiring managers are required to take this into consideration before making recommendations for selection.
A/79/7/Add.19	
The Advisory Committee trusts that updated information on the provision of operational and administrative support by the United Nations Office to the African Union to the Office of the Personal Envoy will be included in the next report of the Secretary-General (para. 17).	As from 1 January 2025, all administrative and operational support for the Office of the Personal Envoy of the Secretary-General for the Sudan is being provided by United Nations Office to the African Union, including human resources, financial and logistical support. The United Nations Office to the African Union continues to provide local administrative and logistical support services to the staff of the Office of the Personal Envoy, including office space, computer equipment, connectivity and associated technical support, local transportation support, security services, medical access to the United Nations Health Care Centre of the Economic Commission for Africa, host country support services and the requisitioning of low-value procurement goods and services. A memorandum between the United Nations Office to the African Union and the Office of the Personal Envoy is under consideration.

Special political missions

Thematic cluster II: sanctions monitoring teams, groups and panels, and other entities and mechanisms

Summary

The present report contains the proposed resource requirements for 2026 for 14 special political missions grouped under the thematic cluster of sanctions monitoring teams, groups and panels, and other entities and mechanisms.

The proposed resource requirements for 2026 for special political missions grouped under this cluster amount to $37,950,600 (net of staff assessment).

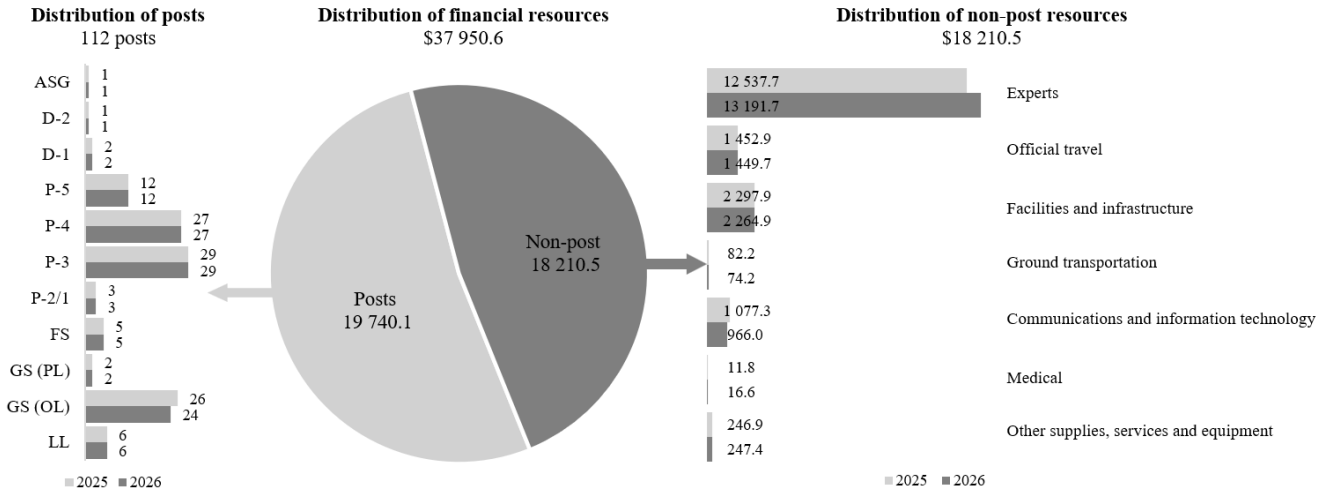
[b] Includes National Professional Officers, General Service staff in New York and Local level staff.
[c] Includes international and national United Nations Volunteers.

Figure I
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



2. The overall increase of $0.7 million for the 14 continuing special political missions is attributable primarily to: (a) increased requirements for expert fees due to the issuance of new fee ranges by the Office of Human Resources; (b) higher estimates for common staff costs based on recent expenditure experience of staff entitlements; and (c) the application of lower vacancy rates for civilian personnel. The increase was offset in part by: (a) reduced requirements for telecommunications and network services due to a reduced provision for subscriptions to the emergency satellite communicator service[1] and the removal of the provision for satellite telephone data and videoconference services based on utilization patterns; (b) the application of the most recent reduced standard rate for information and communications technology (ICT) for New York; and (c) the proposed abolishment of two posts as part of the effort of the Security Council Subsidiary Organs Branch of the Security Council Affairs Division to find efficiencies within its staffing levels. The resources reflect the expiration of the mandate, in October 2025, of the mission for the implementation of Security Council resolution 2231 (2015), for which provision was made for 10 months in 2025.

[1] The emergency satellite communicators are used by sanctions experts in the field to determine their location, enable communication in emergency situations and provide necessary assistance. The Department of Political and Peacebuilding Affairs decided to reduce the number of active subscriptions, employ the devices on an as-needed basis and allocate them more efficiently among experts.

3. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy factors include the 12-month average vacancy rate in 2024 and the actual vacancy rate as at 31 March 2025. The lower of the two was used as the budgeted vacancy rate. This is in line with the policy guidance to improve the accuracy and consistency of the vacancy factors applied in the proposed budgets for 2026 and to ensure that the proposed vacancy rates are based, as much as possible, on actual rates.

4. For the sake of brevity, the present document will include a section on extrabudgetary resources only for those missions that have projected extrabudgetary resources in 2025 or 2026.

II. Cross-cutting information

Cooperation

5. To improve the effectiveness of sanctions imposed by the Security Council, the missions supporting sanctions committees will, as requested, engage with the Informal Working Group of the Security Council on General United Nations Security Council Sanctions Issues established pursuant to resolution 2744 (2024).

Gender perspective

6. Special political missions are guided by the relevant Security Council resolutions[2] on the women and peace and security agenda, by which the Council mandates the incorporation of a gender perspective into the political work of the United Nations, including in special political missions. The missions are also guided by General Assembly resolution 75/100 on the comprehensive review of special political missions, in which the Assembly reaffirmed the important role of women in the prevention and resolution of conflicts and in peacebuilding and recognized the importance of the equal and effective participation and the full involvement of women at all levels, at all stages and in all aspects of the peaceful settlement of disputes, conflict prevention and conflict resolution.

7. The sanctions monitoring teams, groups and panels, along with the mission supporting the Security Council Committee established pursuant to resolution 1718 (2006), integrate a gender perspective into their operational activities, deliverables and results, as appropriate, and as guided by the relevant Council resolutions. Gender balance is taken into consideration in the recruitment and rostering of experts, the Focal Point for Delisting and the Ombudsperson, as well in the recruitment of related staff. It is indicated in the terms of reference for experts in sanctions monitoring teams, groups and panels that experts are to incorporate gender perspectives into their substantive areas of responsibility. In addition, the Focal Point for Delisting will be examining delisting petitions in relation to relevant designation criteria, which may refer to sexual and gender-based violence. These missions are also guided by the gender strategy of the Department of Political and Peacebuilding Affairs, including in the provision of available gender training to staff and sanctions-specific gender training to all experts. To further diversify the geographical and gender composition of sanctions monitoring teams, groups and panels, the Department participated, in October 2024, alongside other Secretariat entities, in the Impactpool virtual career fair for women in senior roles, hosted by a career web platform specializing in humanitarian and international jobs. A total of 2,343 women registered for the career fair, of whom 459 (from countries across all regional groups) visited the Secretariat's virtual booth containing presentations, fact sheets, videos and information on job openings for sanctions experts. In addition, in May and June 2024, the Department briefed representatives of the Group of African States, the Group of Arab States, the Group of Eastern European States and the Group of Latin America and the Caribbean States on the recruitment process of members of sanctions monitoring teams, groups and panels.

[2] 1325 (2000), 1820 (2008), 1888 (2009), 1889 (2009), 1960 (2010), 2106 (2013), 2122 (2013), 2242 (2015), 2467 (2019) and 2493 (2019).

Disability inclusion

8. In line with the United Nations Disability Inclusion Strategy, special political missions review the Strategy with a view to further advancing disability inclusion through inclusive messaging, awareness-raising and promoting the Strategy through their work, including in political and peace processes. The missions also support mitigating measures to overcome accessibility challenges, in addition to the efforts by relevant United Nations entities to ensure the accessibility of facilities, platforms, security and other infrastructure to facilitate easy access and use by persons with disabilities.

Evaluation activities

9. The Department of Political and Peacebuilding Affairs will support the biennial assessment by the Office of Internal Oversight Services on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives. Mission-specific evaluation activities are described, as applicable, under the specific missions in the present report.

III. Special political missions

1. Group of Experts on the Democratic Republic of the Congo

($1,471,500)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

10. The Group of Experts on the Democratic Republic of the Congo is responsible for monitoring the implementation of the arms embargo, asset freeze, travel ban and transport and customs measures, as well as for providing information relevant to the potential designation of individuals and entities. The mandate derives from the priorities established in relevant Security Council resolutions, including resolution 1533 (2004), and renewed in its subsequent resolutions, including, most recently, 2738 (2024). The sanctions regime is aimed at preventing individuals and entities from undermining the peace, stability or security of the Democratic Republic of the Congo.

Programme of work

Objective

11. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning the Democratic Republic of the Congo, which includes an arms embargo on all non-governmental entities and individuals operating in the territory of the Democratic Republic of the Congo, an asset freeze and a travel ban.

Strategy and external factors for 2026

12. To contribute to the objective, the Group of Experts will provide updated information to the Security Council and the Security Council Committee established pursuant to resolution 1533 (2004) concerning the Democratic Republic of the Congo.

13. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime.

14. With regard to cooperation with other entities, the mission cooperates with, among others, Member States and the International Conference on the Great Lakes Region to request information relevant to its investigations into the implementation and/or violations of the sanctions regime concerning the Democratic Republic of the Congo.

15. With regard to inter-agency coordination and liaison, the Group of Experts cooperates with, among others, the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo, the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list, the Office of the Special Representative of the Secretary-General for Children and Armed Conflict, the Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict and other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety, security and logistics, the Group of Experts cooperates with the Mission, the Department of Safety and Security and the United Nations Development Programme (UNDP).

16. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Group of Experts;

(b) The security situation allows the Group of Experts to conduct missions, as needed.

Programme performance in 2024

Enhanced understanding by the Security Council and the Committee of the illegal exploitation of natural resources and the activities of armed groups in the Democratic Republic of the Congo

17. The Group of Experts reported on the activities of armed groups and criminal networks in destabilizing the Democratic Republic of the Congo through the illegal exploitation of or trade in natural resources. The Group of Experts recommended that neighbouring States investigate and prosecute individuals and criminal networks involved in the smuggling of minerals and that Member States raise awareness among relevant actors of the need to enforce mineral supply chain due diligence guidelines.

18. The above-mentioned work contributed to the Security Council and the Committee receiving updated information on the involvement of armed groups and criminal networks in the illicit exploitation of and trade in natural resources.

19. Progress towards the objective is presented in the performance measure below (see table 3).

Table 3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committee continued to receive updated information on the illicit exploitation of or trafficking in natural resources and considered adjusting the designations of individuals and/or entities	Security Council and the Committee received updated information on the illicit exploitation of or trafficking in natural resources and considered amendments to the list entries, and new designations	Security Council and the Committee continued to receive updated information on the illicit exploitation of or trafficking in natural resources and approved new designations

Planned result for 2026

Enhanced understanding by the Security Council and the Committee of the illegal activities of armed groups in the Democratic Republic of the Congo

Programme performance in 2024 and target for 2026

20. In 2024, the work of the Group of Experts contributed to the full implementation of the sanctions regime, which met the planned target. The Group of Experts reported on the involvement of individuals and entities in destabilizing activities in the Democratic Republic of the Congo through the illicit exploitation of and trafficking in natural resources. The Committee added six individuals to its sanctions list for having engaged in or provided support for acts that undermined the peace, stability or security of the Democratic Republic of the Congo.

Lessons learned and planned change

21. In view of the limited awareness by relevant stakeholders of the sanctions measures, the lesson for the Group of Experts was the need to strengthen consultations and outreach activities with Member

States and relevant stakeholders. In applying the lesson, the mission will continue to engage with regional Member States and support the Committee's outreach efforts.

22. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4).

Table 4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee considered information on individuals who had supported armed groups or criminal networks involved in destabilizing activities in the Democratic Republic of the Congo through the illicit exploitation of or trafficking in natural resources	Committee considered adjusting list entries of individuals and/or entities in connection with illicit exploitation of or trafficking in natural resources	Committee added new entries to its sanctions list and considered adjusting the designations of individuals and/or entities in connection with human rights violations and other illegal activities committed by armed groups	Committee considers new designations and adjusts designations of individuals and/or entities in connection with human rights violations and illegal activities committed by armed groups	Committee considers new designations and adjusts list entries of individuals and/or entities in connection with human rights violations and illegal activities committed by armed groups

Deliverables

23. Table 5 lists all deliverables of the mission.

Table 5
Deliverables for the period 2024–2026, by category and subcategory

Proposed 2026	–	–	–	–	–	–	2	–	–	2	–	–	–	–	–	–	–	2
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

24. The proposed resource requirements for the Group of Experts for 2026 amount to $1,417,500 (net of staff assessment) and would provide for the salaries and common staff costs ($239,900) for the continuation of two posts (P-3) to provide substantive, administrative and security support in relation to the sanctions regime, and operational costs ($1,231,600) comprising expert fees ($802,900) and travel ($264,600) of the six experts, official travel of staff ($24,000) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology services and other supplies, services and equipment ($140,100).

25. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of 50 per cent has been applied to the staff costs on the basis of the average vacancy rate in 2024.

26. The decrease in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to lower requirements for civilian personnel owing to the application of a higher vacancy rate compared with the rate of 16.7 per cent applied in 2025. The decrease is offset in part by increased requirements for expert fees.

2. Panel of Experts on the Sudan

($1,170,300)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

27. The Panel of Experts on the Sudan is responsible for monitoring the implementation of the arms embargo, asset freeze and travel ban, as well as for providing information relevant to the potential designation of individuals and entities. The mandate is defined in Security Council resolution 1591 (2005) and was renewed in its subsequent resolutions, including, most recently, 2772 (2025). The sanctions regime is one of the tools used by the Council to address the conflict in Darfur and is aimed at preventing threats to the stability in Darfur and the region, towards a peaceful settlement of the conflict in Darfur. In its resolution 2772 (2025), the Council extended the mandate of the mission until 12 March 2026.

Programme of work

Objective

28. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning the Sudan, which includes an arms embargo, an asset freeze and a travel ban, as well as to report on the possible threats to the peace and stability of Darfur, including the current conflict.

Strategy and external factors for 2026

29. To contribute to the objective, the Panel of Experts will provide updated information to the Security Council and the Security Council Committee established pursuant to resolution 1591 (2005) concerning the Sudan.

30. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the Sudan sanctions regime.

31. With regard to cooperation with other entities, the Panel of Experts cooperates with, among others, Member States and the African Union.

32. With regard to inter-agency coordination and liaison, the Panel of Experts cooperates with, among others, the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list, the Office for the Coordination of Humanitarian Affairs, the United Nations Children's Fund and other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety, security and logistics, the Panel cooperates with the Department of Safety and Security, UNDP and the World Food Programme (WFP).

33. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions, as needed.

Programme performance in 2024

Committee received updated information on Darfuri armed groups in Darfur and Libya and on the impact of the wider conflict in the Sudan on Darfur

34. In 2024, the Panel of Experts reported on the strategies employed by the Rapid Support Forces to consolidate its control over Darfur, which included targeted attacks on internally displaced persons and widespread acts of conflict-related sexual violence. The Panel also reported on the Sudanese Armed Forces' presence being limited to isolated strongholds such as El Fasher and their reliance on indiscriminate and widespread airstrikes. The Panel observed that cross-border recruitment and the mobilization of transnational communities fuelled insecurity in Chad, Libya and South Sudan.

35. Progress towards the objective is presented in the performance measure below (see table 8).

Table 8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committee received updated information on Darfuri armed groups in Darfur and Libya, their financing and their integration in accordance with the Juba Agreement for Peace in the Sudan	Security Council and the Committee received updated information on Darfuri armed groups in Darfur and Libya, their financing and their integration in accordance with the Juba Agreement	Security Council and the Committee received updated information on Darfuri armed groups in Darfur and Libya, their financing and their integration in accordance with the Juba Agreement

Planned result for 2026

Updated information on the ongoing conflict in Darfur and its impact on the wider region

Programme performance in 2024 and target for 2026

36. In 2024, the work of the Panel contributed to the full implementation of the sanctions regime, which met the planned target. The information provided by the Panel enhanced the Security Council's and the Committee's understanding of the Darfuri armed groups' activities in Darfur and Libya, as well as of possible threats to the peace and stability of Darfur and the impact of the wider conflict in the Sudan on Darfur.

Lessons learned and planned change

37. The lesson for the Panel was the continued need to adapt its investigation methods owing to the security situation in the Sudan. While the Panel has been unable to travel to Darfur since the outbreak of the conflict, it benefited from its two visits to Port Sudan, the Sudan, and met Darfuri refugees in Chad, Kenya and Uganda. In applying the lesson, the Panel will continue to use its contacts to advance investigations and will report on the conflict, on peace initiatives to stop the conflict in Darfur and on its impact on the wider region.

38. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9).

Table 9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee received reporting from the Panel of Experts on activities of Darfuri armed groups in Libya and the Sudan	Security Council and the Committee received updated information on the Darfuri armed groups in Darfur and Libya and their integration	Security Council and the Committee received updated information on the Darfuri armed groups in Darfur and Libya and their integration following the signing of the Juba Agreement for Peace in the Sudan, and information on the impact of the wider conflict in the Sudan on Darfur	Security Council and the Committee receive updated information on the situation in Darfur, on Darfuri armed groups and on implementation of possible peace initiatives to address the current conflict in the Sudan	Security Council and the Committee receive updated information on the situation in Darfur, on Darfuri armed groups and on implementation of possible peace initiatives to address the current conflict in the Sudan

Deliverables

39. Table 10 lists all deliverables of the mission.

40. The proposed resource requirements for the Panel of Experts for 2026 amount to $1,170,300 (net of staff assessment) and would provide for the salaries and common staff costs ($214,100) for the continuation of one post (P-3) to provide substantive, administrative and security support in relation to the sanctions regime, and operational costs ($956,200) comprising expert fees ($626,900) and travel ($235,000) of the five experts, official travel of staff ($15,900) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology services and other supplies, services and equipment ($78,400).

41. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs on the basis of the average vacancy rate in 2024.

42. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to the increased requirements for expert fees. The increase is offset in part by lower requirements for telecommunications and network services and the application of the most recent ICT standard rates.

3. Support to the Security Council Committee established pursuant to resolution 1718 (2006)

($675,900)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

43. The Security Council Committee established pursuant to resolution 1718 (2006) oversees the implementation of the sanctions regime concerning the Democratic People's Republic of Korea. The sanctions regime is the most comprehensive and complex of all United Nations sanctions regimes in effect and is intended to ensure that the Democratic People's Republic of Korea abandons all nuclear weapons and its existing nuclear programme, as well as any other existing weapons of mass destruction and ballistic missile programmes, in a complete, verifiable and irreversible manner. The regime includes 26 sanctions measures. In addition to an arms embargo and an embargo relating to nuclear, ballistic missile and other weapons of mass destruction programmes, a travel ban and/or asset freeze on designated individuals and entities, it includes a range of maritime provisions for designating vessels for involvement in prohibited activities and restrictions on various commodity transfers, such as refined petroleum products, minerals, metals, heavy machinery, transportation vehicles, luxury goods, seafood, textiles and more. It also includes restrictions on transportation and on financial services, as well as on overseas workers. Furthermore, to ensure that the measures that it imposed do not have adverse humanitarian consequences for the civilian population, the Security Council adopted a wide range of humanitarian and other exemptions.

44. The support of the Secretariat is required in all areas of the Committee's mandate, including in specific areas in which the Secretariat has been mandated by the Security Council. Member States and other actors liaise directly with the Committee and the Secretariat for guidance on or assistance in implementing provisions of relevant resolutions. The Committee and the Secretariat receive a high volume of information on alleged violations of the sanctions measures, which were previously handled by the Panel of Experts. In addition, the Chair and the Committee may undertake increased outreach activities to promote better understanding and implementation of the relevant resolutions, including of the various exemptions processes. Moreover, the reopening of the borders of the Democratic People's Republic of Korea resulting in the ongoing and anticipated return of the international community and of the United Nations country team into the country is expected to lead to an increase in humanitarian and other exemptions and guidance requests to and from the Committee.

45. Furthermore, the Secretariat assists in responding to guidance and information requests from Member States, relevant international organizations and other entities on the various sanctions measures and their exemptions, which had previously been handled by the Panel.

Programme of work

Objective

46. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning the Democratic People's Republic of Korea, which includes an arms embargo, an embargo relating to nuclear, ballistic missile and other weapons of mass destruction programmes, an asset freeze, a travel ban, maritime and financial measures, a ban on petroleum products and crude oil, a coal ban and sanctions measures in other sectoral areas.

Strategy and external factors for 2026

47. To contribute to the objective, the mission will continue to support the work of the Security Council and the Committee in relation to the implementation of the sanctions regime with regard to the Democratic People's Republic of Korea.

48. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee conducive to overseeing and promoting the full implementation of the Council sanctions measures.

49. With regard to inter-agency coordination and liaison, the mission will continue to cooperate with the resident coordinator's office and the Office for the Coordination of Humanitarian Affairs and other United Nations agencies carrying out humanitarian assistance and relief activities in the Democratic People's Republic of Korea, including the Food and Agriculture Organization of the United Nations, UNDP, the United Nations Population Fund, the United Nations Children's Fund, WFP and the World Health Organization, as well as other non-United Nations agencies carrying out related activities. The mission will continue to facilitate the work of the United Nations agencies through regular and ad hoc briefings to the United Nations country team in the Democratic People's Republic of Korea. The mission will also continue to cooperate with other United Nations and non-United Nations entities carrying out activities involving the Democratic People's Republic of Korea in guiding them through the intricate sanctions measures and exemption procedures to ensure sanctions compliance. In the context of safety and security, information technology security and logistics, the mission cooperates with the Department of Safety and Security and the Office of Information and Communications Technology.

50. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States will comply with the resolutions of the Security Council and continue to cooperate with the sanctions committee;

(b) The Chair and the Committee are adequately supported to perform their functions as mandated by the Security Council.

Programme performance in 2024

Committee continues to carry out its work on overseeing sanctions implementation

51. In 2024, the mission supported the Committee as it continued to oversee sanctions implementation and ensured that the Committee continued to receive relevant information. The mission organized additional briefings to facilitate the exchange of views with relevant actors, including the Office for Disarmament Affairs, United Nations Office on Drugs and Crime (UNODC) and the Financial Action Task Force.

52. The above-mentioned work contributed to the Security Council's and the Committee's ability to oversee the implementation of sanctions as the Democratic People's Republic of Korea persisted in carrying out prohibited activities, including ballistic missile launches.

53. Progress towards the objective is presented in the performance measure below (see table 13).

Table 13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council, the Committee and Member States received from the mission administrative, procedural and substantial support for sanctions implementation through the mission's guidance, Committee meetings, the Chair's periodic reports to the Council and the Committee's open briefings to Member States	Security Council, the Committee and Member States received from the mission administrative, procedural and substantial support for sanctions implementation, including exemption and notification procedures, through the mission's guidance, Committee meetings, the Chair's periodic reports to the Council and the Committee's open briefings to Member States	Security Council, the Committee and Member States received from the mission administrative, procedural and substantial support for sanctions implementation, including exemption and notification procedures, through the mission's guidance, Committee meetings, the Chair's periodic reports to the Council and the Committee's open briefings to Member States

Planned result for 2026

Maintaining the continuous support to the Security Council Committee established pursuant to resolution 1718 (2006)

Programme performance in 2024 and target for 2026

54. In 2024, the mission's work contributed to the promotion of an understanding of the complex sanctions regime and the Committee's work, which met the planned target. The mission assisted the Security Council, the Committee, Member States and other stakeholders and facilitated the oversight of the implementation of the sanctions measures.

Lessons learned and planned change

55. The lesson for the mission was the need to ensure that the Committee had continued access to adequate information to enhance its understanding of sanctions implementation in the absence of a monitoring mechanism, especially given the breadth of the sanctions measures and the scope of potential actors. It was also important to raise awareness of the sanctions measures and promote compliance by encouraging Member States to report on their national implementation of the sanctions measures and responding to requests for guidance from various sanctions implementation partners, including Member States, and the United Nations and other humanitarian actors. In applying the lesson, the mission will strengthen its outreach activities by engaging Member States and other stakeholders. This will be achieved, among others, through open and regional group briefings, special meetings on important thematic and regional topics and implementation challenges faced by Member States.

56. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 14).

Table 14
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced understanding of the complex sanctions regime and improved implementation at the international and other levels	Enhanced understanding of the complex sanctions regime and improved implementation at the international and other levels	Security Council and the Committee received support for carrying out their mandates in overseeing the implementation of sanctions by providing guidance to Member States and other relevant actors within and outside United Nations system	Continuous support provided to the Security Council and the Committee to oversee the implementation of resolution 1718 (2006) and subsequent resolutions, through the provision of guidance to Member States and other relevant actors within and outside United Nations system	Continuous support provided to the Security Council and the Committee to oversee the implementation of resolution 1718 (2006) and subsequent resolutions, through the provision of guidance to Member States and other relevant actors within and outside United Nations system

Deliverables

57. Table 15 lists all deliverables of the mission.

Table 15
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: consideration of individuals, entities and vessels to be listed; consultations with and advice to Member States on the implementation of the sanctions regime; and consultations and advice to broaden engagement with the sanctions regime with international, regional, subregional and other organizations.

Databases and substantive digital materials: archives of documents collected by the sanctions committee, including official correspondence from Member States, United Nations agencies and other governmental and non-governmental actors.

D. Communication deliverables

Outreach programmes, special events and information materials: outreach programmes to report on the work of the sanctions committee; fact sheets on the work and mandate of the special political mission; and notes verbales on the activities of the sanctions committee.

External and media relations: press releases on the activities of the sanctions committee.

Digital platforms and multimedia content: dissemination of information on the activities and mandate of the sanctions committee through its website.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 16
Financial resources
(Thousands of United States dollars)

[a] Principal level.

58. The proposed resource requirements for the mission for 2026 amount to $675,900 (net of staff assessment) and would provide for salaries and common staff costs ($604,400) for the continuation of three posts (1 P-4, 1 P-3 and 1 General Service (Principal level)) to provide substantive and administrative support to the sanctions committee in relation to the sanctions regime, and operational

costs ($71,500) comprising official travel of staff ($14,100) and other operational and logistical support requirements, including the rental of premises, communications and information technology services and other supplies, services and equipment ($57,400).

59. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for both international and national staff on the basis of the actual vacancy rate in March 2025.

60. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to higher requirements for civilian personnel, owing to the application of a lower vacancy rate compared with the rate of 13.9 per cent applied in 2025. The increase is offset in part by the termination of software licences for the analysis of complex and large volumes of data, the termination of the NK News subscription, reduced requirements for official travel based on planned activities to implement the mandate and the application of the most recent ICT standard rates.

4. Panel of Experts on Libya

($1,549,700)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

61. The Panel of Experts on Libya is responsible for monitoring the implementation of the arms embargo, asset freeze, travel ban and measures in relation to attempts to illicitly export petroleum, and for providing information relevant to the potential designation of individuals and entities. The mandate derives from the priorities established in relevant Security Council resolutions, including resolutions 1973 (2011), 2009 (2011) and 2017 (2011), and renewed in its subsequent resolutions, including, most recently, 2769 (2025). The sanctions regime is aimed at preventing and containing threats to the peace, security and stability of Libya, including obstructing or undermining the successful completion of the political transition. In its resolution 2733 (2024), the Council requested the Secretary-General to report on the implementation of the arms embargo on the high seas off the coast of Libya within 6 months and 11 months of the adoption of the resolution. The Secretary-General submitted his first report on 26 November 2024 (S/2024/858), while the second report was submitted on 25 April 2025 (S/2025/257).

62. In its resolution 2769 (2025), the Security Council decided to allow the frozen cash reserves of the Libyan Investment Authority to be invested in low-risk time deposits and in fixed financial instruments, subject to a notification and approval procedure by the sanctions committee concerning Libya, and requested the Panel of Experts to assess the effect and performance of those investments in their annual final reports.

Programme of work

Objective

63. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning Libya, which includes an arms embargo, an asset freeze, a travel ban and measures in relation to attempts to illicitly export petroleum.

Strategy and external factors for 2026

64. To contribute to the objective, the Panel of Experts will provide updated information to the Security Council and to the Security Council Committee established pursuant to resolution 1970 (2011) concerning Libya, including an assessment of the performance of reinvestment of the Libyan Investment Authority's frozen cash reserves.

65. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime.

66. With regard to cooperation with other entities, in the context of information-sharing, the Panel of Experts cooperates with, among others, Member States and the European Union, in particular its military operation in the Mediterranean.

67. With regard to inter-agency coordination and liaison, the Panel of Experts cooperates with the United Nations Support Mission in Libya, the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list, and other sanctions monitoring teams,

groups and panels, as appropriate. In the context of safety, security and logistics, the Panel cooperates with the Department of Safety and Security and UNDP.

68. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions in the field;

(c) Proposals for investment and reinvestment of the Libyan Investment Authority frozen cash reserves are submitted.

Programme performance in 2024

Enhanced capacity of the Security Council and the Committee to address violations of the arms embargo

69. In its final report (S/2024/914), the Panel of Experts highlighted the unprecedented influence of armed groups over State institutions in western and eastern Libya. The Panel further recommended possible action that could enable the reinvestment of the Libyan Investment Authority's frozen assets as requested by the Council. The Panel also reported on continued violations of the arms embargo, on illicit fuel smuggling by armed groups and on human trafficking and migrant smuggling through Libyan territory involving Libyan armed actors. The Panel recommended clarification of the scope of the arms embargo and that additional individuals who met the sanctions designation criteria be considered for listing.

70. Progress towards the objective is presented in the performance measure below (see table 18).

Table 18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committee continued to receive information on instances of non-compliance with the arms embargo and considered follow-up action to address violations of the arms embargo	Security Council and the Committee received information on instances of non-compliance with the arms embargo and considered follow-up action on reported arms embargo violations, and possible listings of individuals and entities	Security Council and the Committee received information on instances of non-compliance with the assets freeze and the arms embargo, and on the possibility of reinvestment of the Libyan Investment Authority's frozen assets, and considered follow-up action

Planned result for 2026

Enhanced capacity of the Security Council and the Committee to address non-compliance with the asset freeze and the arms embargo

Programme performance in 2024 and target for 2026

71. In 2024, the work of the Panel of Experts contributed to the implementation of this sanctions regime, which met the planned target. The Panel reported on unprecedented levels of influence over State institutions exercised by armed groups in Libya, international human trafficking and smuggling networks, which utilized Libyan territory as a transit hub, on the violations of international humanitarian and human rights law, on terrorist elements active in southern Libya and on possible reinvestment of the Libyan Investment Authority's frozen assets. This enabled the Security Council and the Committee to consider follow-up action.

Lessons learned and planned change

72. The lesson for the Panel of Experts was the need for improved coordination and information-sharing with the Government of Libya, relevant international bodies and regional actors. In applying the lesson, the Panel will continue to enhance information exchange and improve cooperation among relevant stakeholders.

73. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 19).

Table 19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee received information on instances of non-compliance with the arms embargo from the Panel of Experts and considered follow-up action	On the basis of information provided by the Panel of Experts, the Security Council and the Committee took follow-up action on reported arms embargo violations, including considering listings	On the basis of information provided by the Panel of Experts, the Security Council and the Committee took follow-up action on reported on non-compliance with the asset freeze and the arms embargo, and allowed for the possibility of reinvestment of some Libyan Investment Authority frozen assets	On the basis of information provided by the Panel of Experts, the Security Council and the Committee take follow-up action on reported violations of the arms embargo, international humanitarian and human rights laws, and human rights abuses, including considering listings	On the basis of information provided by the Panel of Experts, the Security Council and the Committee take follow-up action on non-compliance with the asset freeze and the arms embargo, violations of international humanitarian and human rights laws, and human rights abuses, including considering listings, and on possible reinvestment of the Libyan Investment Authority's frozen assets

Deliverables

74. Table 20 lists all deliverables of the mission.

Table 20
Deliverables for the period 2024–2026, by category and subcategory

Proposed 2026	–	–	–	–	–	–	1	–	–	1	–	1[a]	–	1	–	–	–	2
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

75. The proposed resource requirements for the Panel of Experts for 2026 amount to $1,549,700 (net of staff assessment) and would provide for salaries and common staff costs ($275,400) for the continuation of two posts (1 P-3 and 1 General Service (Other level)) to provide substantive, administrative and security support in relation to the sanctions regime, and operational costs ($1,274,300) comprising expert fees ($796,700) and travel ($333,800) of the six experts, official travel of staff ($16,800) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology services and other supplies, services and equipment ($127,000).

76. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for international staff, while a rate of 50 per cent has been applied for national staff, on the basis of the actual vacancy rate in March 2025 and the average vacancy rate in 2024, respectively.

77. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to higher requirements for civilian personnel, owing to the application of a lower vacancy rate for international staff compared with the rate of 45.8 per cent applied in 2025 and higher estimates for common staff costs, as well as increased requirements for expert fees. The increase is offset in part by lower requirements for telecommunications and network services and the application of the most recent ICT standard rates.

5. Panel of Experts pursuant to resolution 2745 (2024)

($1,356,700)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

78. The Panel of Experts pursuant to resolution 2745 (2024) is responsible for monitoring the implementation of the targeted arms embargo, asset freeze and travel ban, as well as for providing information relevant to the potential designation of individuals and entities. The mandate derives from the priorities established in relevant Security Council resolutions, including resolution 2127 (2013), and renewed in its subsequent resolutions, including, most recently, 2745 (2024), by which the Council changed the name of the Panel of Experts on the Central African Republic to the Panel of Experts pursuant to resolution 2745 (2024) and decided to lift the arms embargo on the Government of Central African Republic and to continue to apply the arms embargo to armed groups and associated individuals operating in the Central African Republic. The sanctions regime is aimed at preventing individuals and entities from undermining the peace, stability or security of the Central African Republic.

Programme of work

Objective

79. The objective, to which this mission contributes, is to ensure the full implementation of the 2745 sanctions regime, which includes a targeted arms embargo that no longer applies to the Government of the Central African Republic, as well as an asset freeze and a travel ban.

Strategy and external factors for 2026

80. To contribute to the objective, the Panel of Experts will continue to provide updated information to the Security Council and the Security Council Committee established pursuant to resolution 2745 (2024).

81. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime, in particular by non-governmental entities and individuals providing support to armed groups or criminal networks through the illicit exploitation of or trade in natural resources, including diamonds, gold, wildlife and wildlife products in or from the Central African Republic.

82. With regard to cooperation with other entities, in the context of information-sharing, the Panel of Experts cooperates with, among others, Member States, the African Union, the European Union Common Security and Defence Policy Advisory Mission in the Central African Republic, the Economic Community of Central African States, the International Conference on the Great Lakes Region and the Central African Economic and Monetary Community.

83. With regard to inter-agency coordination and liaison, the Panel of Experts cooperates with, among others, the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list, the United Nations Institute for Disarmament Research, the Office of the Special Representative of the Secretary-General for Children and Armed Conflict, the Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict and

other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety, security and logistics, the Panel cooperates with the Department of Safety and Security and UNDP.

84. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions, as needed.

Programme performance in 2024

Enhanced understanding by the Security Council and the Committee of the illicit activities of armed groups

85. The Panel of Experts reported on the increased involvement of armed group elements in mercenary activities in the Sudan, which has become their significant source of financing. In particular, the leaders of those armed groups active in the eastern Central African Republic have been instrumental in coordinating and leasing their personnel as mercenaries. In addition, the Panel reported on an increase in the use of advanced improvised explosive devices in targeted attacks on bases of the Armed Forces of the Central African Republic and of foreign forces.

86. Progress towards the objective is presented in the performance measure below (see table 23).

Table 23
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committee had relevant information on the illicit exploitation of and trafficking in natural resources and arms embargo violations, and acted on Panel of Experts recommendations	Security Council and the Committee had relevant information on the illicit exploitation of and trafficking in natural resources and arms embargo violations	Security Council and the Committee had relevant information on the illicit exploitation of and trafficking in natural resources and arms embargo violations

Planned result for 2026

Better understanding by the Security Council and the Committee of the illicit exploitation of and trafficking in natural resources and sexual violence in conflict

Programme performance in 2024 and target for 2026

87. The work of the Panel of Experts contributed to the full implementation of the sanctions regime, which met the planned target. The Panel recommended that the Committee designate individuals involved in sexual and gender-based violence, arms trafficking and incitement to violence based on previous statements of case provided by the Panel. The Panel also documented arms embargo violations involving the use of advanced improvised explosive devices in targeted attacks by armed groups.

Lessons learned and planned change

88. The lesson for the Panel of Experts was to continue to enhance the collection and validation of information for its reports, given the limited access to some individuals, facilities and areas in the Central African Republic. In applying the lesson, the Panel will continue to use information, databases and subscriptions procured by the United Nations, including the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic.

89. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 24).

Table 24
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee received comprehensive information on the illicit exploitation of and trafficking in natural resources, with recommendations for action	Security Council and the Committee had relevant information on the illicit exploitation of and trafficking in natural resources and acted on the Panel's recommendations	Security Council and the Committee received further updated relevant information on the illicit exploitation of and trafficking in natural resources and sexual violence in conflict and considered designating individuals and entities	Security Council and the Committee receive further updated relevant information on the illicit exploitation of and trafficking in natural resources and sexual violence in conflict, and consider designating individuals and entities	Security Council and the Committee receive further relevant information on the illicit activities of the armed groups, including arms trafficking

Deliverables

90. Table 25 lists all deliverables of the mission.

Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**

[a] Other level, unless otherwise stated.

91. The proposed resource requirements for the Panel of Experts for 2026 amount to $1,356,700 (net of staff assessment) and would provide for salaries and common staff costs ($336,600) for the continuation of two posts (1 P-3 and 1 General Service (Other level)) to provide substantive, administrative and security support in relation to the sanctions regime, and operational costs ($1,020,100) comprising expert fees ($642,800) and travel ($248,500) of the five experts, official

travel of staff ($33,200) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology services and other supplies, services and equipment ($95,600).

92. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for both international and national staff on the basis of the actual vacancy rate in March 2025 and the average vacancy rate in 2024, respectively.

93. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to increased requirements for expert fees and higher estimates for common staff costs. The increase is offset in part by the reduced provision for the rental of vehicles, lower requirements for telecommunications and network services and the application of the most recent ICT standard rates.

6. Panel of Experts on Yemen

($2,660,700)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

94. The Panel of Experts on Yemen is responsible for monitoring the implementation of the asset freeze, travel ban and targeted arms embargo on designated individuals and entities, as well as for providing information relevant to the potential designation of such individuals and entities. The mandate is defined in Security Council resolution 2140 (2014), as modified in resolution 2216 (2015) and extended, most recently, in resolution 2758 (2024). The sanctions regime is aimed at preventing and containing threats to the peace, security and stability of Yemen.

Programme of work

Objective

95. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning Yemen, which includes a targeted arms embargo, an asset freeze and a travel ban.

Strategy and external factors for 2026

96. To contribute to the objective, the Panel of Experts will provide updated information to the Security Council and the Security Council Committee established pursuant to resolution 2140 (2014).

97. The above-mentioned work is expected to result in the enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime.

98. With regard to cooperation with other entities, in the context of information-sharing, the Panel of Experts cooperates with, among others, Member States, the Combined Maritime Forces and the International Criminal Police Organization (INTERPOL).

99. With regard to inter-agency coordination and liaison, the Panel of Experts cooperates with, among others, the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list, the World Bank, the International Monetary Fund, WFP, the United Nations Verification and Inspection Mechanism for Yemen and other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety, security and logistics, the Panel cooperates with the Office of the Special Envoy of the Secretary-General for Yemen, the Department of Safety and Security and UNDP.

100. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions, as needed.

Programme performance in 2024

Further enhanced awareness of the trafficking in arms and materiel for use in some military applications

101. In 2024, the Panel of Experts reported that the Houthis had received weapons, training, technical assistance and financial support from various actors, including a regional country, and from armed groups active in several regional countries. The Panel provided detailed information on the diverse military materiel and technology acquired by the Houthis by way of illegal transfers by land and sea, including components of complex weapons and electro-optical surveillance systems, and small arms and light weapons.

102. Progress towards the objective is presented in the performance measure below (see table 28).

Table 28
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and Committee awareness of the use of commercially available civilian components in some military applications in Yemen resulted in enhanced vigilance with regard to the export of such items	Security Council and the Committee received comprehensive information from the Panel of Experts on the trafficking in arms and related materiel	Security Council and the Committee received comprehensive information from the Panel of Experts on the trafficking in arms and related materiel, including sources, types and scale of violations of the arms embargo

Planned result for 2026

Further enhanced awareness of the trafficking in arms and commercial components for use in certain military applications

Programme performance in 2024 and target for 2026

103. In 2024, the work of the Panel of Experts contributed to the full implementation of the sanctions regime, which met the planned target. The Panel reported on potential smuggling activities between the Houthis and Al-Shabaab in Somalia. The Panel will continue to provide information on the trafficking in arms and dual-use materiel that could be adapted for military application.

Lessons learned and planned change

104. The lesson for the Panel of Experts was the need to further enhance information collection on arms and related material used by the Houthis and their potential cooperation with Al-Shabaab. In applying the lesson, the Panel will continue to engage with Member States and relevant stakeholders to conduct inspections, collect data and use databases and subscriptions procured by the United Nations to strengthen its analysis.

105. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 29).

Table 29
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee awareness of the use of commercially available civilian components in certain military applications in Yemen resulted in enhanced vigilance with regard to the export of such items	Security Council and the Committee received comprehensive information from the Panel of Experts on the trafficking in arms and related materiel	Security Council and the Committee received comprehensive information from the Panel of Experts on the trafficking in arms and related materiel	Security Council and the Committee receive comprehensive information from the Panel of Experts on the trafficking in arms and related materiel	Security Council and the Committee continue to receive comprehensive information from the Panel of Experts on the trafficking in arms and related materiel

Deliverables

106. Table 30 lists all deliverables of the mission.

Table 30
Deliverables for the period 2024–2026, by category and subcategory

Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**

107. The proposed resource requirements for the Panel of Experts for 2026 amount to $2,660,700 (net of staff assessment) and would provide for the salaries and common staff costs ($1,297,400) for the continuation of eight posts (1 P-3, 5 Field Service and 2 Local level) to provide substantive, administrative and security support in relation to the sanctions regime, and operational costs ($1,363,300) comprising expert fees ($725,000) and travel ($232,500) of the five experts, official travel of staff ($65,300) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology services, medical services and other supplies, services and equipment ($340,500).

108. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for both international and national staff on the basis of the actual vacancy rate in March 2025 and the average vacancy rate in 2024, respectively.

109. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to higher requirements for international staff owing to the application of a lower vacancy rate compared with the rate of 13.9 per cent applied in 2025 and higher estimates for common staff costs. as well as increased requirements for expert fees. The increase is offset in part by lower requirements in the telecommunications and network services and the application of the most recent ICT standard rates.

7. Panel of Experts on South Sudan

($1,524,100)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

110. The Panel of Experts on South Sudan is responsible for monitoring the implementation of the arms embargo, asset freeze and travel ban, as well as for providing information relevant to the potential designation of individuals and entities. The mandate derives from the priorities established in relevant Security Council resolutions, including resolution 2206 (2015), and renewed in its subsequent resolutions, including, most recently, 2731 (2024). The sanctions regime is aimed at, but not limited to, targeting spoilers of the Revitalized Agreement on the Resolution of the Conflict in the Republic of South Sudan, which was signed on 12 September 2018. On 15 April 2025, following a request by the Council in its resolution 2731 (2024), the Secretary-General provided the Council with an assessment of the progress achieved on the key benchmarks established in resolution 2577 (2021) (S/2025/231).

Programme of work

Objective

111. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning South Sudan, which includes a territorial arms embargo, an asset freeze and a travel ban.

Strategy and external factors for 2026

112. To contribute to the objective, the Panel of Experts will provide updated information, including on the potential impacts of elections currently scheduled for December 2026, on the overall situation in South Sudan, to the Security Council and the Security Council Committee established pursuant to resolution 2206 (2015) concerning South Sudan.

113. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime, including actions or policies that have the purpose of impeding the conduct or legitimacy of free and fair elections in South Sudan.

114. With regard to cooperation with other entities, in the context of information-sharing, the Panel of Experts cooperates with, among others, Member States, the African Union and the Intergovernmental Authority on Development.

115. With regard to inter-agency coordination and liaison, the Panel of Experts cooperates with the United Nations Mission in South Sudan, the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list, the Office of the United Nations High Commissioner for Human Rights (OHCHR), the Office of the Special Representative of the Secretary-General for Children and Armed Conflict, the Office of the Special Representative of the Secretary-General on Sexual Violence in Conflict and other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety and security, information technology security and logistics, the Panel cooperates with the Mission, the Department of Safety and Security and UNDP.

116. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions, as needed.

Programme performance in 2024

Committee members receive an update on the implementation of the Revitalized Agreement and on the progress made in the implementation of the key benchmarks of the arms embargo

117. The Panel of Experts provided the Security Council and the Committee with information on the progress, and the lack thereof, made in implementing the Revitalized Agreement, focusing on transitional security arrangements and preparations for South Sudan's first election since its independence, planned for December 2024. That information was timely, given that the elections were meant to mark a significant milestone in the country's transitional period, while the implementation of the transitional security arrangements was seen as crucial for ensuring the successful organization of the elections.

118. Progress towards the objective is presented in the performance measure below (see table 33).

Table 33
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committee received updated information on the progress made in implementation of the Revitalized Agreement and the benchmarks for the adjustment of the arms embargo	Security Council and the Committee received updated information on the progress made in implementation of the Revitalized Agreement and reviewed the arms embargo based on the progress achieved on the key benchmarks	Security Council and the Committee received updated information on the progress made in implementation of the Revitalized Agreement and reviewed the arms embargo based on the progress achieved on the key benchmarks

Planned result for 2026

Update on the implementation of the Revitalized Agreement and on the progress of implementation of the arms embargo key benchmarks

Programme performance in 2024 and target for 2026

119. In 2024, the work of the Panel of Experts contributed to the full implementation of the sanctions regime, which met the planned target. The Panel's reporting deepened the Committee's understanding of progress made and challenges in the implementation of the Revitalized Agreement. It also contributed to the Security Council's decision in its resolution 2731 (2024) to maintain the arms embargo. The Council also reiterated its readiness to review the arms embargo measures on the basis of the progress achieved on the key benchmarks.

Lessons learned and planned change

120. The lesson for the Panel of Experts was the continued need to enhance the collection and validation of information for its reports, given the limited access to some individuals, facilities and areas in South Sudan owing to the security situation. In applying the lesson, the Panel will continue to use relevant communication technologies, databases and subscriptions provided by the United Nations,

and corroborate information with confidential sources in locations accessible to the Panel, including outside of South Sudan.

121. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 34).

Table 34
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee received information on the progress achieved on the established key benchmarks and considered the review of the arms embargo	Security Council and the Committee reviewed the arms embargo on the basis of updated information regarding progress achieved on the established key benchmarks	Security Council and the Committee further reviewed the arms embargo on the basis of updated information regarding progress in implementing the Revitalized Agreement and the established key benchmarks	Security Council and the Committee further review the arms embargo on the basis of updated information regarding progress in implementing the Revitalized Agreement and on the established key benchmarks	Security Council and the Committee further review the arms embargo on the basis of updated information regarding progress in implementing the Revitalized Agreement, including electoral preparations, and on the established key benchmarks

Deliverables

123. The proposed resource requirements for the Panel of Experts for 2026 amount to $1,524,100 (net of staff assessment) and would provide for salaries and common staff costs ($459,100) for the continuation of three posts (1 P-3 and 2 General Service (Other level)) to provide substantive, administrative and security support in relation to the sanctions regime, and operational costs ($1,065,000) comprising expert fees ($646,800) and travel ($267,400) of the five experts, official travel of staff ($40,200) and other operational and logistical support requirements, including the

rental of premises, rental of vehicles, communications and information technology services and other supplies, services and equipment ($110,600).

124. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for both international and national staff on the basis of the average vacancy rate in 2024 and the actual vacancy rate in March 2025, respectively.

125. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to increased requirements for civilian personnel resulting from higher estimates for common staff costs and increased requirements for expert fees. The increase is offset in part by lower requirements for telecommunications and network services and the application of the most recent ICT standard rates.

8. Analytical Support and Sanctions Monitoring Team pursuant to resolutions 1526 (2004) and 2253 (2015) concerning Islamic State in Iraq and the Levant (Da'esh), Al-Qaida and the Taliban and associated individuals and entities

($6,003,300)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

126. The Analytical Support and Sanctions Monitoring Team, which supports the work of both the Security Council Committee pursuant to resolutions 1267 (1999), 1989 (2011) and 2253 (2015) concerning Islamic State in Iraq and the Levant (Da'esh), Al-Qaida and associated individuals, groups, undertakings and entities (ISIL (Da'esh) and Al-Qaida Sanctions Committee), and the Security Council Committee established pursuant to resolution 1988 (2011), is responsible for assisting in and reporting on the implementation of the asset freezes, travel bans and targeted arms embargoes on designated individuals and entities. The mandate is derived from the priorities established in the relevant Council resolutions, including resolution 1267 (1999), which was renewed in its subsequent resolutions, including, most recently, 2734 (2024), 2761 (2024) and 2763 (2024). The sanctions regimes are aimed at strengthening the Council's response to threats to international peace and security caused by terrorist acts and at contributing to the peace, stability and security of Afghanistan.

Programme of work

Objective

127. The objective, to which this mission contributes, is to ensure the full implementation of sanctions regimes concerning Da'esh, Al-Qaida and the Taliban, which include targeted arms embargoes, asset freezes and travel bans.

Strategy and external factors for 2026

128. To contribute to the objective, the Monitoring Team will provide updated information to the Security Council, the ISIL (Da'esh) and Al-Qaida Sanctions Committee and the Security Council Committee established pursuant to resolution 1988 (2011).

129. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committees to take follow-up action on alleged violations of the sanctions regimes.

130. With regard to cooperation with other entities, in the context of information-sharing, the Monitoring Team cooperates with, among others, Member States, the International Air Transport Association, the International Civil Aviation Organization, the World Customs Organization, the Financial Action Task Force and INTERPOL.

131. With regard to inter-agency coordination and liaison, the Monitoring Team cooperates with, among others, the Counter-Terrorism Committee Executive Directorate, the Office of Counter-Terrorism, the mission assisting the Security Council Committee established pursuant to resolution 1540 (2004), the Office of the Ombudsperson established pursuant to Security Council resolution 1904 (2009), the Focal Point for Delisting to support the review of petitioners' exemptions requests, UNODC, the United

Nations Assistance Mission in Afghanistan and other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety and security, information technology security and logistics, the Monitoring Team cooperates with the Department of Safety and Security, the Office of Information and Communications Technology, United Nations field missions and UNDP, as appropriate.

132. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Monitoring Team;

(b) The security situation allows the Monitoring Team to conduct missions, as needed.

Programme performance in 2024

Enhanced analysis to follow an evolving threat

133. To assist in addressing the global terrorism threat posed by Da'esh and Al-Qaida and the threat posed by the Taliban to the peace, stability and security of Afghanistan, and to fully implement sanctions measures, the Monitoring Team submitted nine reports to the Security Council or the Committees in 2024, providing analysis on evolving global terrorism threats, and two reports on the situation in Afghanistan. The Monitoring Team gathered information from Member States, including the de facto authorities in Afghanistan, regional organizations and other stakeholders, and used databases and subscriptions procured by the United Nations to conduct research.

134. Progress towards the objective is presented in the performance measure below (see table 38).

Table 38
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committees had comprehensive information on the terrorist threat and the Taliban, and the Committees considered exemptions, amendments to listings and new designations	Security Council and the Committees had comprehensive information on the terrorist threat and the Taliban, and the Committees considered exemptions, amendments to listings and new designations	Security Council and the Committees had comprehensive information on the terrorist threat and the Taliban, and the Committees considered exemptions, amendments to listings and new designations

Planned result for 2026

Strengthened analysis to follow an evolving threat

Programme performance in 2024 and target for 2026

135. Through its engagement with Member States and with other stakeholders, the Monitoring Team met the planned target. In 2024, the Committees considered new designations and removed one individual from the Da'esh and Al-Qaida sanctions list. The Committee also approved amendments to the entries of six individuals and one entity on the Da'esh and Al-Qaida sanctions list. In 2024, the Committees also approved exemptions from existing sanctions measures.

Lessons learned and planned change

136. The lesson for the Monitoring Team was the continued need to seek efficiencies in planning in-person meetings with Member States, regional organizations and other stakeholders to gather sensitive and confidential information and to provide tailored training to Member States on sanctions implementation. In applying the lesson, the Monitoring Team will continue to optimize its visits,

regional meetings and participation in multilateral meetings to sustain in-person confidential discussions with Member States, regional organizations and other stakeholders. The Monitoring Team will continue to hold virtual meetings using communication technology and benefit from databases and subscriptions procured by the United Nations for research.

137. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 39).

Table 39
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committees had comprehensive information on the terrorist threat and the Taliban; and the Committees considered exemptions, amendments to listings and new designations	Security Council and the Committees had comprehensive information on the terrorist threat and the Taliban; the Committees considered exemptions and amendments to listings; and the Council and Committees considered new designations	Security Council and the Committees had comprehensive information on the terrorist threat and the Taliban; the Committees considered exemptions and amendments to listings; and the Council and Committees considered new designations	Security Council and the Committees have comprehensive information on the terrorist threat and the Taliban; the Committees consider exemptions and amendments to listings; and the Council and Committees consider new designations	Security Council and the Committees have comprehensive information on the terrorist threat, the Taliban and violations of standing humanitarian exemptions; the Committees consider exemptions and amendments to listings; and the Council and Committees consider new designations

Deliverables

138. Table 40 lists all deliverables of the mission.

Table 40
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**12**	**11**	**14**	**12**
1. Reports to the Security Council and updates, monthly reports, country visit reports and/or reports on outreach activities to the sanctions committees	12	11	14	12
Substantive services for meetings (number of three-hour meetings)	**33**	**27**	**25**	**25**
2. Meetings of sanctions committees	20	11	12	12
3. Chair’s briefings to Member States	3	3	3	3
4. Regional meetings for security and intelligence services on the threat posed by Da’esh and Al-Qaida and the implementation of the sanctions regime	10	13	10	10
Conference and secretariat services for meetings (number of three-hour meetings)	**33**	**27**	**25**	**25**
5. Meetings of sanctions committees	20	11	12	12
6. Chair’s briefings to Member States	3	3	3	3
7. Regional meetings for security and intelligence services on the threat posed by Da’esh and Al-Qaida and the implementation of the sanctions regime	10	13	10	10

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**97**	**62**	**95**	**100**
8. Regional workshops on the implementation of relevant resolutions	90	46	90	90
9. Induction seminar for new members of the Monitoring Team and other training sessions	7	16	5	10
Fact-finding and monitoring missions (number of missions)	**35**	**45**	**40**	**40**
10. Missions to gather information relating to compliance with the sanctions regime	35	45	40	40
C. Substantive deliverables				
Consultation, advice and advocacy: recommendations concerning individuals and entities to be listed; consultations with Member States on the implementation of sanctions regimes; consultations and advice to broaden engagement with international, regional, subregional and other organizations; and advice on the implementation of relevant resolutions.				
Databases and substantive digital materials: implementation, dissemination and maintenance of the enhanced data model and archives of documents collected by the Monitoring Team.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach programmes to report on the work of the Monitoring Team; fact sheets on the work and mandate of the special political mission; and notes verbales on the activities of the sanctions committees/Monitoring Team.				
External and media relations: press releases on the activities of the sanctions committees/Monitoring Team.				
Digital platforms and multimedia content: dissemination of information on the activities and mandates of the sanctions committees/Monitoring Team through their websites.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Proposed 2026	–	–	–	–	1	4	6	–	–	11	–	6[a]	–	6	–	–	–	17
Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**(2)**	**–**	**(2)**	**–**	**–**	**–**	**(2)**

[a] Other level, unless otherwise stated.

139. The proposed resource requirements for the Monitoring Team for 2026 amount to $6,003,300 (net of staff assessment) and would provide for salaries and common staff costs ($2,652,400) for the continuation of 17 posts (1 P-5, 4 P-4, 6 P-3 and 6 General Service (Other level)) to provide substantive and administrative support to the sanctions regimes, and operational costs ($3,350,900) comprising expert fees ($2,178,100) and travel of experts ($401,700), official travel of staff ($89,200) and other operational and logistical support requirements, including the rental of premises, communications and information technology services and other supplies, services and equipment ($618,900).

140. For 2026, the following changes are proposed to the number and level of posts for the mission, reflecting efforts to enhance operational efficiency and streamline functions through consolidation and the improved use of technology:

(a) Abolishment of one Administrative Assistant (General Service (Other level)) post in New York, by leveraging digital tools and redistributing functions to avoid duplication;

(b) Abolishment of one Administrative Assistant (General Service (Other Level)) post in New York, by consolidating towards a more integrated and flexible allocation of human resources, while maintaining service delivery standards.

141. A vacancy rate of 14.4 per cent has been applied to the staff costs for international staff, while a rate of 38.5 per cent has been applied for national staff, both on the basis of the average vacancy rate in 2024.

142. The decrease in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to: (a) the abolishment of two General Service (Other Level) posts and the associate operational provisions; (b) the application of a higher vacancy rate for national staff compared with 2025; (c) lower requirements for telecommunications and network services; (d) the application of most recent ICT standard rates; and (e) the discontinuation of the subscription to the British Broadcasting Corporation Monitoring service as cost avoidance because comparable content is accessible through an alternative subscription already available to the Monitoring Team. The decrease is offset in part by increased requirements for expert fees and the application of a lower vacancy rate for international staff compared with the rate of 17.5 per cent applied in 2025.

9. Office of the Ombudsperson established pursuant to Security Council resolution 1904 (2009)

($770,300)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

143. The Office of the Ombudsperson to the Security Council Committee pursuant to resolutions 1267 (1999), 1989 (2011) and 2253 (2015) concerning Islamic State in Iraq and the Levant (Da'esh), Al-Qaida and associated individuals, groups, undertakings and entities is responsible for reviewing delisting requests from individuals or entities inscribed on the related sanctions list. The mandate is defined in Security Council resolution 1904 (2009), and it was renewed in its subsequent resolutions, including, most recently, 2734 (2024).

Programme of work

Objective

144. The objective, to which this mission contributes, is to provide an independent review of delisting requests of individuals, entities and undertakings on the Da'esh and Al-Qaida sanctions list. In doing so, it ensures that listed individuals, entities and undertakings have access to fair and clear procedures for the administration of requests for removal (delisting) from the sanctions list.

Strategy and external factors for 2026

145. To contribute to the objective, the Office will fairly and expeditiously consider and process all requests for delisting and travel to interview each petitioner in person in the petitioner's country of residence, whenever possible.

146. The above-mentioned work is expected to result in informed decision-making by the Committee on the Ombudsperson's analysis and recommendation on the delisting request contained in a comprehensive report on each case.

147. With regard to cooperation with other entities, including in the context of information-sharing, the Office cooperates with, among others, Member States, the European Union, academic institutions, think tanks and international law associations.

148. With regard to inter-agency coordination and liaison, the Office cooperates with, among others, UNDP, OHCHR, the Counter-Terrorism Committee Executive Directorate, the Office of Counter-Terrorism, the Special Rapporteur on the promotion and protection of human rights and fundamental freedoms while countering terrorism, and the Analytical Support and Sanctions Monitoring Team pursuant to resolutions 1526 (2004) and 2253 (2015) concerning ISIL (Da'esh), Al-Qaida and the Taliban and associated individuals and entities. In the context of safety and security, information technology security and logistics, the Office cooperates with the Department of Safety and Security, the Office of Information and Communications Technology and UNDP.

149. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Office;

(b) The security situation allows the Office to conduct missions, as needed.

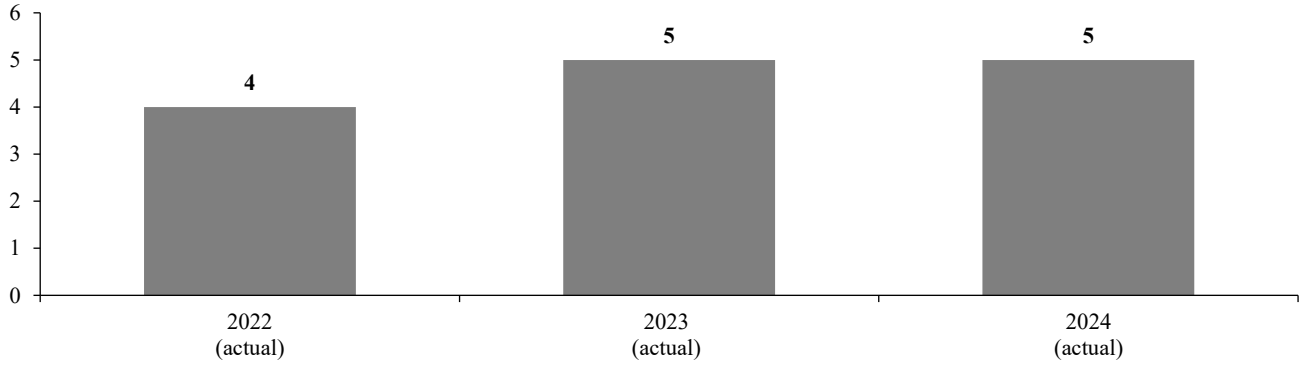
Programme performance in 2024

Fair and expeditious review of delisting requests

150. In 2024, the Ombudsperson advanced consideration of all petitions before the Office, which included the presentation of four cases to the Committee, the submission of five comprehensive reports to the Committee and interviews with three petitioners, and the counsels of two petitioners. The Ombudsperson also undertook extensive inquiries and independent research to gather information on each petition, including from Member States and the Monitoring Team. Two new petitions were accepted by the Office in 2024, bringing the total number of accepted petitions since its inception to 111. The above-mentioned work contributed to the Committee receiving comprehensive reports from the Office on time.

151. Progress towards the objective is presented in the performance measure below (see figure II).

Figure II
Performance measure: number of comprehensive reports received by the ISIL (Da'esh) and Al-Qaida Sanctions Committee



Planned result for 2026

Ensuring fair and expeditious review of delisting requests

Programme performance in 2024 and target for 2026

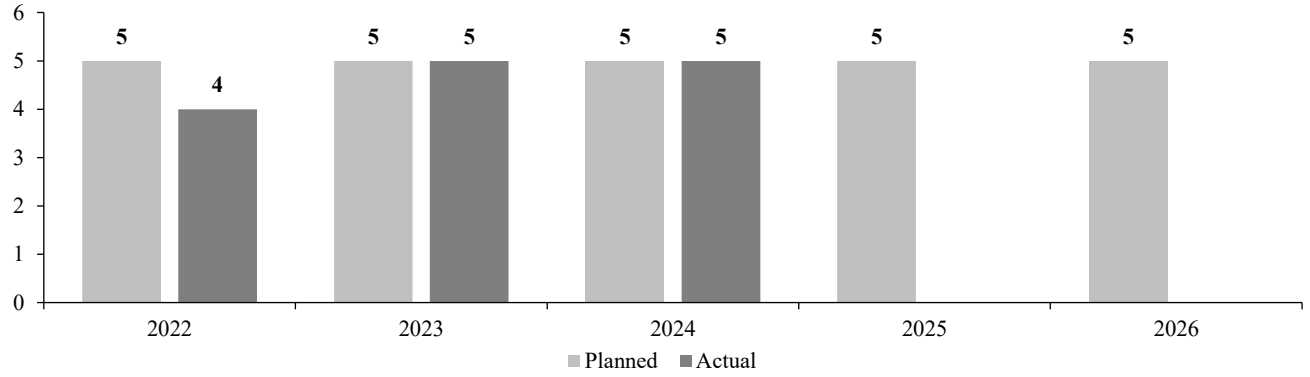
152. In 2024, the Ombudsperson independently reviewed delisting requests of individuals, entities and undertakings on the Da'esh and Al-Qaida sanctions list, which met the planned target. Furthermore, the Office conducted extensive outreach activities to raise awareness of its work through its engagement with Member States, regional organizations, academic institutions, think tanks and international law associations. In July 2024, the Office published a booklet to raise awareness of its work.

Lessons learned and planned change

153. The lesson for the Office was the need to increase awareness of its work and mandate. In applying the lesson, the Office will further strengthen its outreach efforts, including by translating the informational booklet into the five other official languages of the United Nations, distributing it to all relevant stakeholders, and informing all listed individuals and entities of the mandate of the Ombudsperson and of the procedure for submitting a delisting request.

154. Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure III).

Figure III
Performance measure: number of comprehensive reports received by the ISIL (Da'esh) and Al-Qaida Sanctions Committee



Deliverables

[a] Other level, unless otherwise stated.

156. The proposed resource requirements for the Office for 2026 amount to $770,300 (net of staff assessment) and would provide for salaries and common staff costs ($372,700) for the continuation of two posts (1 P-4 and 1 General Service (Other level)) to provide substantive and administrative support to the Ombudsperson, and operational costs ($397,600) comprising fees ($258,800) and travel ($28,400) of the Ombudsperson, official travel of staff ($34,300) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology and other supplies, services and equipment ($76,100).

157. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for both international and national staff on the basis of the average vacancy rate in 2024.

158. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to increased requirements for civilian personnel resulting from higher estimates for common staff costs and increased requirements for expert fees. The increase is offset in part by the lower requirements in the telecommunications and network services and the application of the most recent ICT standard rates.

10. Panel of Experts pursuant to resolution 2713 (2023)

($2,101,000)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

159. The Panel of Experts pursuant to resolution 2713 (2023) is responsible for monitoring the implementation of the asset freeze, the travel ban, the targeted arms embargo and the territorial arms embargo focused on Al-Shabaab, the charcoal ban and the improvised explosive device components restrictions, as well as for providing information relevant to the designation of individuals and entities. Its mandate is referenced in Security Council resolution 2444 (2018), which was renewed in its subsequent resolutions, including, most recently, 2776 (2025). The sanctions regime is aimed at supporting the efforts of the Somali authorities to deliver stability and security in Somalia, to prevent any flows of weapons and ammunition to Al-Shabaab and other actors intent on undermining peace and security in Somalia and the region, and to disrupt the activities of Al-Shabaab, including its finances.

160. On 15 October 2024, following the request by the Security Council in its resolution 2713 (2023), the Secretary-General provided an update (S/2024/751) on the progress made against each indicator set out in the benchmarks contained in the technical assessment report (S/2022/698) and set an additional benchmark related to the safe management of chemical precursors associated with improvised explosive device manufacture and disposal. By its resolution 2776 (2025), the Council requested the Secretary-General to submit by 1 November 2025 a technical assessment regarding the arms embargo targeting Al-Shabaab.

Programme of work

Objective

161. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning Al-Shabaab, which includes an asset freeze, a travel ban, targeted and territorial arms embargoes, a charcoal ban and improvised explosive device components restrictions.

Strategy and external factors for 2026

162. To contribute to the objective, the Panel of Experts will provide updated information to the Security Council and the Security Council Committee pursuant to resolution 2713 (2023) concerning Al-Shabaab.

163. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime.

164. With regard to cooperation with other entities, in the context of information-sharing, the Panel of Experts cooperates with, among others, Member States, INTERPOL, the African Union and the European Union. It also cooperates with the African Union Support and Stabilization Mission in Somalia.

165. With regard to inter-agency coordination and liaison, the Panel of Experts cooperates with, among others, the United Nations Transitional Assistance Mission in Somalia, the United Nations Support Office in Somalia, the United Nations Office at Nairobi, UNODC, other sanctions monitoring teams, groups and panels, as appropriate, and the Focal Point for Delisting to support the review of petitioners' requests to be removed from the Committee's sanctions list. In the context of safety, security and logistics, the Panel cooperates with the Department of Safety and Security and security

teams of the United Nations Office at Nairobi, the United Nations Transitional Assistance Mission in Somalia, the United Nations Support Office in Somalia and UNDP.

166. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions, as needed.

Programme performance in 2024

Enhanced capacity of the Security Council, the Committee and Member States to counter Al-Shabaab financing

167. In 2024, in its final report (S/2024/748), the Panel of Experts assessed that Al-Shabaab continued to sustain a solid financial base through sophisticated business strategies. The Panel reported that Al-Shabaab used both licit and illicit means to generate revenue, including through checkpoints, extortion, forced taxation and the use of third-party businesses.

168. Progress towards the objective is presented in the performance measure below (see table 46).

Table 46
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Security Council and the Committee received information from the Panel of Experts on the finances of Al-Shabaab, as well as recommendations on how to disrupt them	Security Council and the Committee received information from the Panel of Experts on Al-Shabaab's financing and efforts to disrupt it	Security Council and the Committee received information from the Panel of Experts on Al-Shabaab's financing and efforts to disrupt it

Planned result for 2026

Enhanced capacity of the Security Council, the Committee and Member States to degrade the threat posed by Al-Shabaab

Programme performance in 2024 and target for 2026

169. In 2024, the work of the Panel of Experts contributed to the implementation of the sanctions regime concerning Al-Shabaab, which met the planned target. Furthermore, in its final report (S/2024/748), the Panel reported on the threat of Al-Shabaab, the threat posed by Da'esh in Somalia and the reemergence of piracy off the coast of Somalia. The Panel also contributed to an assessment provided to the Security Council and the Committee on weapons and ammunition management by the Government of the Federal Republic of Somalia and by the federal member states. The Panel's work and the assessment of the progress made against the weapons and ammunition management benchmarks are expected to contribute to the full implementation of the sanctions regime concerning Al-Shabaab.

Lessons learned and planned change

170. The lesson for the Panel of Experts was the need to gain access to and document in a timely manner weapons captured from Al-Shabaab and in the possession of the Government of the Federal Republic of Somalia, the federal member states and neighbouring countries. In applying the lesson, the Panel will continue to engage and cooperate with the Government, the federal member states and the relevant national, regional and international stakeholders, and use databases and subscriptions procured by the United Nations.

171. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 47).

Table 47
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Security Council and the Committee received a detailed analysis of Al-Shabaab's revenue sources, as well as specific recommendations on how to reduce the group's finances	Panel of Experts focused on Al-Shabaab's use of the banking system of Somalia and the Security Council or the Committee considered designating individuals involved in the financing of the group	Security Council and the Committee continued to receive from the Panel of Experts information on exploitation by Al-Shabaab of the banking system in Somalia and on violations of the arms embargo and human rights by Al-Shabaab, and the Council and the Committee continued to consider new designations	Security Council and the Committee continue to receive from the Panel of Experts information on exploitation of the banking system of Somalia and on violations of the arms embargo and human rights by Al-Shabaab, and the Council and the Committee continue to consider new designations	Security Council and the Committee continue to receive from the Panel of Experts information on exploitation of the banking system of Somalia and on violations of the arms embargo and human rights by Al-Shabaab, and the Council and the Committee continue to consider new designations

Deliverables

172. Table 48 lists all deliverables of the mission.

Table 48
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

C. Substantive deliverables

Consultation, advice and advocacy: recommendations concerning individuals and entities to be listed; consultations with Member States on the implementation of the sanctions regime; consultations and advice to broaden engagement with international, regional, subregional and other organizations; and advice on the implementation of relevant resolutions.

Databases and substantive digital materials: archives of documents collected by the Panel of Experts.

D. Communication deliverables

Outreach programmes, special events and information materials: outreach programmes to report on the work of the Panel of Experts; fact sheets on the work and mandate of the special political mission; and notes verbales on the activities of the sanctions committee/Panel of Experts.

External and media relations: press releases on the activities of the sanctions committee/Panel of Experts.

Digital platforms and multimedia content: dissemination of information on the activities and mandate of the sanctions committee/Panel of Experts through its website.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**

[a] Other level, unless otherwise stated.

173. The proposed resource requirements for the Panel of Experts for 2026 amount to $2,101,000 (net of staff assessment) and would provide for salaries and common staff costs ($526,900) for the continuation of six posts (1 P-3, 1 General Service (Other level) and 4 Local level) to provide substantive, administrative, security and logistical support in relation to the sanctions regime, and operational costs ($1,574,100) comprising expert fees ($1,134,100) and travel ($208,900) of the six

experts, official travel of staff ($38,500) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology services, medical and other supplies, services and equipment ($192,600).

174. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent and 1.7 per cent has been applied to the staff costs for international staff and national staff, respectively, on the basis of the average vacancy rate in 2024.

175. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to increased requirements for civilian personnel resulting from higher estimates for common staff costs and increased requirements for expert fees. The increase is offset in part by the reduced provisions for United Nations Office at Nairobi support services in Nairobi provided to experts, lower requirements for telecommunications and network services and the application of the most recent ICT standard rates.

11. Panel of Experts on Haiti

($1,794,300)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

176. The Panel of Experts on Haiti is responsible for monitoring the implementation of the travel ban, asset freeze and territorial arms embargo, as well as for providing information relevant to the potential designation of individuals and entities. The mandate is referenced in Security Council resolution 2653 (2022), which was renewed in its subsequent resolutions, including, most recently, 2752 (2024). The sanctions regime is aimed at, but not limited to, supporting the efforts of the Haitian authorities to deliver stability and security in Haiti, counter gang violence and criminal activities and prevent human rights abuses.

177. On 1 October 2024, following a request by the Security Council in its resolution 2700 (2023), the Secretary-General provided the Council with an assessment of the progress achieved on the key benchmarks modified in the same resolution (S/2024/711). By its resolution 2752 (2024), the Council requested the Secretary-General to provide an update by 1 October 2025 on progress made against the key benchmarks.

Programme of work

Objective

178. The objective, to which this mission contributes, is to ensure the full implementation of the sanctions regime concerning Haiti, which includes a travel ban, an asset freeze and a territorial arms embargo.

Strategy and external factors for 2026

179. To contribute to the objective, the Panel of Experts will provide updated information to the Security Council and the Security Council Committee established pursuant to resolution 2653 (2022) concerning Haiti.

180. The above-mentioned work is expected to result in an enhanced capacity of the Security Council and the Committee to take follow-up action on alleged violations of the sanctions regime.

181. With regard to cooperation with other entities, in line with paragraph 22 of resolution 2653 (2022), the Panel of Experts will cooperate with, among others, Member States, in particular neighbouring countries, and regional and subregional organizations, such as the Caribbean Community, including the Eminent Persons Group appointed by the Caribbean Community, the Organization of American States and the multinational security support mission in Haiti.

182. With regard to inter-agency coordination and liaison, the Panel of Experts will cooperate with, among others, the United Nations Integrated Office in Haiti (BINUH), the Multinational Security Support Mission in Haiti, the Focal Point for Delisting to support the review of petitioners' requests to be removed from sanctions list, UNODC and other sanctions monitoring teams, groups and panels, as appropriate. In the context of safety, security and logistics, the Panel will cooperate with the Department of Safety and Security, BINUH and UNDP.

183. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the Panel of Experts;

(b) The security situation allows the Panel of Experts to conduct missions, as needed.

Programme performance in 2024

Committee members receive information on gang dynamics, arms trafficking and the illicit exploitation of natural resources

184. In 2024, the Panel of Experts submitted interim (S/2024/253) and final (S/2024/704) reports to the Security Council with substantive information on the security situation in Haiti, including gang dynamics, their activities and leadership, and individuals who met the designation criteria, including those supporting the gangs. The Panel also provided information on arms trafficking into Haiti and recommended, among others, strengthening the territorial arms embargo. The Panel also recommended an update to the sanctions designation criteria to target individuals or armed groups engaged in activities that destabilized the situation in Haiti through the illicit exploitation of or trade in natural resources.

185. Progress towards the objective is presented in the performance measure below (see table 51).

Table 51
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Establishment of a group of 4 experts to assist the Committee in carrying out its mandate, gather, examine and analyse relevant information, provide an interim and a final report to the Security Council, and assist the Committee in refining and updating information on listed individuals and entities	Security Council and the Committee received the mandated reports and information on individuals and/or entities meeting the designation criteria The Council adjusted the sanctions measures on the basis of the recommendation of the Panel of Experts, and the Committee designated additional individuals	Security Council and the Committee received information on individuals and/or entities meeting the designation criteria The Council adjusted sanctions measures on the basis of the recommendation of the Panel of Experts, and the Committee designated additional individuals

Planned result for 2026

Full implementation of the sanctions regime concerning Haiti

Programme performance in 2024 and target for 2026

186. The Panel of Experts contributed to the full implementation of the sanctions regime, which met the planned target. Following the Panel's recommendations, the Security Council strengthened the territorial arms embargo and included designation criteria in relation to the illicit exploitation of or trade in natural resources. The Panel also provided the Committee with information on individuals who met the designation criteria, following which the Committee added two individuals to its sanctions list.

Lessons learned and planned change

187. The lesson for the Panel of Experts was that, owing to the volatile security environment in Haiti that prevented the Panel from spending substantial time on the ground, it had to adjust the approach in conducting its investigations. In applying the lesson, the Panel will revise its investigative

methodology, while ensuring that it meets the highest investigative standards. The Panel will continue to work with BINUH and the Department of Safety and Security to implement all necessary security risk mitigation measures.

188. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see table 52).

Table 52
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Establishment of a group of four experts, which will assist the Committee in carrying out its mandate, gather, examine and analyse relevant information, provide an interim and a final report to the Security Council, and assist the Committee in refining and updating information on listed individuals and entities	Security Council and the Committee receive the mandated reports and information on individuals and/or entities meeting the designation criteria	Security Council and the Committee received information on individuals and/or entities threatening the peace, security or stability of Haiti and designated additional individuals	Security Council and the Committee continue to receive information on individuals and/or entities threatening the peace, security or stability of Haiti and consider designating additional individuals and entities	Security Council and the Committee continue to receive information on individuals and/or entities threatening the peace, security or stability of Haiti and consider designating additional individuals and entities

Deliverables

189. Table 53 lists all deliverables of the mission.

Table 53
Deliverables for the period 2024–2026, by category and subcategory

Proposed 2026	–	–	–	–	1	–	1	–	–	2	–	1[a]	–	1	–	–	–	3
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

190. The proposed resource requirements for the Panel of Experts for 2026 amount to $1,794,300 (net of staff assessment) and would provide for the salaries and common staff costs ($622,400) for the continuation of three posts (1 P-5, 1 P-3 and 1 General Service (Other level)), and operational costs ($1,171,900) comprising expert fees ($526,800) and travel ($225,200) of the four experts, official travel of staff ($171,700) and travel of Close Protection Officers ($178,700) from various United Nations entities to support the experts while travelling in Haiti, and other operational and logistical

support requirements, including the rental of premises, rental of vehicles, communications and information technology services and other supplies, services and equipment ($248,200).

191. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for both international and national staff on the basis of the average vacancy rate in 2024 and the actual vacancy rate in March 2025, respectively.

192. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to higher requirements for civilian personnel, owing to the application of a lower vacancy rate compared with the rate of 33.3 per cent applied in 2025 and increased requirements for expert fees. The increase is offset in part by the lower requirements for telecommunications and network services and the application of most recent ICT standard rates.

12. Office of the Focal Point for Delisting

($680,700)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

193. The mandate of the Office of the Focal Point for Delisting derives from Security Council resolution 1730 (2006), in which the Council adopted a delisting procedure and requested the Secretary-General to establish a Focal Point. The mandate was extended in its subsequent resolutions 2083 (2012), 2161 (2014) and 2255 (2015) and, most recently, strengthened in resolution 2744 (2024). The Focal Point is mandated to review delisting requests from individuals, groups, undertakings or entities designated on the lists of the sanctions committees established by the Council, excluding the sanctions list of the ISIL (Da'esh) and Al-Qaida Sanctions Committee which falls under the purview of the Office of the Ombudsperson established pursuant to Security Council resolution 1904 (2009). The Focal Point is also mandated to deal with requests for travel ban and asset freeze exemptions, and communications related to cases of false or mistaken identity and post-delisting challenges, from specific listed individuals or entities.

Programme of work

Objective

194. The objective, to which this mission contributes, is to provide an independent review of delisting requests submitted by, or on behalf of, an individual, group, undertaking or entity designated on the lists of the sanctions committees established by the Security Council (the petitioner), excluding the ISIL (Da'esh) and Al-Qaida Sanctions Committee, in accordance with annex I to resolution 2744 (2024).

Strategy and external factors for 2026

195. To contribute to the objective, the Focal Point will carry out the tasks set out in the delisting procedures detailed in annex I to resolution 2744 (2024), which provides an outline of the process for information-gathering, dialogue and committee discussion and decision upon receipt of a delisting request, and in other relevant resolutions.

196. The above-mentioned work is expected to result in strengthened due process of Security Council sanctions, through fair and clear delisting procedures, and the timely processing of requests for delisting, travel ban and asset freeze exemptions, as well as communications related to cases of false or mistaken identity and post-delisting challenges.

197. With regard to cooperation with other entities at the global, regional and local levels, including in the context of information-sharing, the Focal Point will cooperate with Member States, such as members of the Security Council, and the designating State(s) and State(s) of residence and nationality or incorporation of the petitioners.

198. With regard to inter-agency coordination and liaison, the Focal Point will cooperate with any relevant sanctions committee's groups or panels of experts or monitoring teams, as well as any relevant United Nations envoys engaged in negotiations and peace processes relevant to the sanctions. In the context of safety and security, information technology security and logistics, the Focal Point will also cooperate with the Department of Safety and Security, the Office of Information and Communications Technology and UNDP.

199. To improve the effectiveness of sanctions imposed by the Security Council, the Focal Point will, as requested, engage with the Informal Working Group of the Security Council on General United Nations Security Council Sanctions Issues established pursuant to resolution 2744 (2024).

200. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States comply with the resolutions of the Security Council and cooperate with the mission;

(b) The security situation allows the mission to conduct missions, as needed;

(c) Petitioners and other relevant actors are aware of the new delisting procedure outlined in resolution 2744 (2024).

Programme performance in 2024

Strengthen due process by ensuring fairer procedures for petitioners

201. By its resolution 2744 (2024), the Security Council requested the Secretary-General to appoint the Focal Point to implement the strengthened mandate of the mission. The activities in 2024 focused on the recruitment of the Focal Point in coordination with the Office of Legal Affairs and in consultation with the Informal Working Group of the Security Council on General United Nations Security Council Sanctions Issues, on recruitment outreach activities to attract a wide pool of candidates, the review of the sanctions committees' guidelines and the establishment of the Office and its operational readiness.

202. Progress towards the objective is presented in the performance measure below (see table 56).

Table 56
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Informal Working Group of the Security Council on General United Nations Security Council Sanctions Issues received a list of candidates for the position of the Focal Point for its consideration and approval

Planned result for 2026

Strengthened due process through well-informed decision-making on delisting requests

Programme performance in 2024 and target for 2026

203. While the Office of the Focal Point for Delisting has been established, the Focal Point could not be appointed by the due date, which did not meet the planned target. In 2024, the Secretariat undertook the recruitment of the Focal Point and presented candidates to the Informal Working Group of the Security Council on General United Nations Security Council Sanctions Issues for its consideration and approval. The Secretariat also conducted outreach activities to Member States, international organizations and non-governmental organizations, providing briefings on the new delisting procedures and recruitment process of the Focal Point. It also informed current petitioners of procedural changes and their right to elect to withdraw their petitions without prejudice and resubmit them for consideration under the revised delisting procedure.

204. The Focal Point supports sanctions committees in their consideration of delisting requests. Upon receipt of a delisting request, the Focal Point verifies that the petition properly addresses the original designation criteria and engages with petitioners and relevant stakeholders to gather relevant information. The Focal Point then summarizes all relevant information in a confidential comprehensive report articulating the principal arguments in respect of the delisting request. This report assists the relevant committee in its decision-making process, thereby contributing to the strengthening of due process. The Focal Point also submits two biannual reports on the mission's activities to the Informal Working Group of the Security Council on General United Nations Security Council Sanctions Issues and participates in various international and regional forums to raise awareness of the new delisting procedure.

Lessons learned and planned change

205. The lesson for the mission was the need to prepare outreach activities to disseminate information to the petitioners about the new procedure outlined in annex I of resolution 2744 (2024). In applying the lesson, the mission will conduct briefings to Member States on the new delisting procedure and prepare an informational booklet to be posted on the mission's website.

206. Expected progress towards the objective is presented in the performance measure below (see table 57).

Table 57
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Focal Point could not be appointed by the due date	Relevant sanctions committees consider delisting requests as informed by confidential comprehensive reports of the Focal Point	Relevant sanctions committees consider delisting requests as informed by confidential comprehensive reports of the Focal Point, and Member States are briefed on the Focal Point's activities and new delisting procedure

Deliverables

Proposed 2026	–	–	–	–	–	1	1	–	–	2	–	1[a]	–	1	–	–	–	3
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

208. The estimated resource requirements for the Office for 2026 amount to $680,700 (net of staff assessment) and would provide for salaries and common staff costs ($293,500) three posts (1 P-4, 1 P-3 and 1 General Service (Other level)) to provide procedural, substantive and administrative support to the Focal Point, and operational costs ($387,200) comprising fees ($228,000) and travel ($28,400) of the Focal Point, official travel of staff ($39,500) and other operational and logistical support requirements, including the rental of premises, rental of vehicles, communications and information technology, and other supplies, services and equipment ($91,300).

209. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of 50.0 per cent has been applied to the staff costs for both international and national staff on the basis of the actual vacancy rate in March 2025.

210. The decrease in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to lower requirements for civilian personnel costs, owing to the application of an overall higher vacancy rate compared with the 50 per cent applied for the two newly established posts and 8.5 per cent approved in 2025 for one post redeployed from the Department of Political and Peacebuilding Affairs proposed programme budget for 2025 to this special political mission, removal of non-recurrent requirements for ICT approved in 2025 and the application of the most recent ICT standard rates. The decrease is offset in part by the increased requirements for expert fees.

13. Support to the Security Council Committee established pursuant to resolution 1540 (2004) on the non-proliferation of all weapons of mass destruction

($3,532,000)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

211. The mission in support of the Security Council Committee established pursuant to resolution 1540 (2004) is responsible for the provision of substantive, administrative and logistical support to assist the Committee in achieving the aims of the resolution. The mandate derives from Council resolution 1540 (2004) and from its subsequent resolutions, including, most recently, 2663 (2022).

212. In line with resolution 2663 (2022), by which the Security Council extended the Committee's mandate until 30 November 2032, the mission assists interested Member States in their national implementation efforts through country-specific visits and dialogues, national round tables, workshops and peer reviews, with the objective of building capacity, facilitating technical assistance and identifying and disseminating effective practices for the implementation of resolution 1540 (2004). The mission further supports the activities of the Committee through the organization of regional and subregional workshops on the implementation of the resolution and through country-specific missions and activities, cooperation between international and regional bodies, and the facilitation of outreach and effective partnerships with civil society and the private sector.

Programme of work

Objective

213. The objective, to which this mission contributes, is to prevent non-State actors from developing, acquiring, manufacturing, possessing, transporting, transferring or using nuclear, chemical or biological weapons and their means of delivery.

Strategy and external factors for 2026

214. To contribute to the objective, the mission will:

(a) Facilitate assistance to Member States, upon their request, which includes support for national reviews of the status of implementation of resolution 1540 (2004) and the development of national implementation action plans, and capacity-building and awareness-raising activities for the implementation of resolution 1540 (2004);

(b) Promote regional cooperation on the implementation of resolution 1540 (2004) by conducting regional and subregional activities, including training for points of contact for resolution 1540 (2004), peer review and outreach workshops;

(c) Follow up on the 2022 comprehensive review of the status of implementation of resolution 1540 (2004), conduct activities to raise awareness and support implementation of the outcome of the review and mobilize resources to effectively support the renewed mandate of the Committee.

215. The above-mentioned work is expected to result in:

(a) Enhanced national capacity to implement resolution 1540 (2004);

(b) An increased number of reports and national implementation action plans submitted to the Committee;

(c) Increased awareness and visibility of resolution 1540 (2004) and the risks posed by non-State actors acquiring access to weapons of mass destruction and their means of delivery;

(d) Increased cooperation among regional peers in implementing resolution 1540 (2004);

(e) Successful implementation of the outcome of the 2022 comprehensive review of the status of implementation of resolution 1540 (2004).

216. With regard to cooperation with other entities, the mission cooperates with Governments, international, regional and subregional organizations and civil society organizations to raise awareness of the requirements of resolution 1540 (2004) and to facilitate assistance to Member States, upon their request, to build capacity and draft legislation in order to enhance implementation of the resolution.

217. With regard to inter-agency coordination and liaison, the mission works closely with other relevant United Nations entities, such as UNODC, the Office of Counter-Terrorism, the United Nations Interregional Crime and Justice Research Institute and the International Atomic Energy Agency. The mission also cooperates with the Security Council Committee established pursuant to resolution 1373 (2001) concerning counter-terrorism and its Executive Directorate, as well as the Security Council Committee pursuant to resolutions 1267 (1999), 1989 (2011) and 2253 (2015) concerning Islamic State in Iraq and the Levant (Da'esh), Al-Qaida and associated individuals, groups, undertakings and entities, as well as the Analytical Support and Sanctions Monitoring Team supporting that Committee.

218. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The proliferation of weapons of mass destruction and their means of delivery to non-State actors remains a threat to international peace and security;

(b) The political environment in the Security Council continues to enable the Committee to reach consensus on the implementation of planned activities;

(c) Member States continue to cooperate with the Committee;

(d) Member States will have the need for assistance to implement resolution 1540 (2004).

219. The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate, and is guided by the gender policy of the Office for Disarmament Affairs.

220. The mission, in support of the Committee, promotes diversity and inclusion and ensures inclusive programming throughout its work, including the inclusion of disability perspectives and other reinforcing factors, such as gender and age. The mission promotes an inclusive work environment that enables all stakeholders to participate fully and effectively in disarmament forums and processes.

Programme performance in 2024

Strengthened Member State cooperation and engagement in effective assistance collaboration following the open briefing on resolution 1540 (2004)

221. In 2024, the mission successfully convened its first open briefing as mandated in resolution 2663 (2022). The briefing enhanced Member States' awareness of and engagement in the Committee's activities and facilitated cooperation and the sharing of experiences in the implementation of the resolution.

222. Progress towards the objective is presented in the performance measure below (see table 61).

Table 61
Performance measure: enhanced engagement of Member States in implementing resolution 1540 (2004), as demonstrated by increased information exchange and efforts to address identified needs following the open briefing

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	As mandated in resolution 2663 (2022), the open briefing for Member States and international, regional, and subregional organizations was successfully convened

Planned result for 2026

Enhanced regional cooperation on implementing resolution 1540 (2004)

Programme performance in 2024 and target for 2026

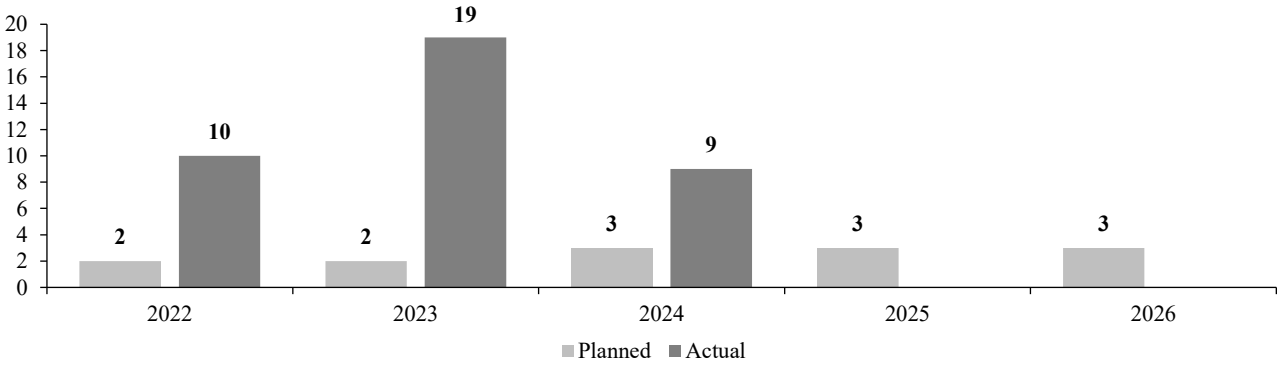
223. In 2024, the mission contributed to providing support to Member States by conducting nine regional workshops that promoted a regional approach towards the full implementation of resolution 1540 (2004), which exceeded the planned target of three workshops. The workshops contributed to the high rate of points of contact appointments and engagement for resolution 1540 (2004) in promoting national implementation efforts.

Lessons learned and planned change

224. The lesson for the mission was that ensuring sustainable implementation required national ownership and active participation at the national and regional levels. In applying the lesson, the mission will ensure an integrated approach to capacity-building efforts that align national priorities with the objectives of resolution 1540 (2004), expand its partnerships with regional organizations and entities to build synergies, and enhance mechanisms for continuous feedback for improvements in activities.

225. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see figure IV).

Figure IV
Performance measure: number of regional workshops that enhance Member States' capacity to implement resolution 1540 (2004)



Deliverables

226. Table 62 below lists all deliverables of the mission.

Table 62
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
Security Council:				
1. Annual programme of work of the Committee	1	1	1	1
2. Annual review of the implementation of resolution 1540 (2004)	1	1	1	1
3. Final document on the comprehensive review of the status of implementation of resolution 1540 (2004)	–	–	–	–
Substantive services for meetings (number of meetings)	**8**	**7**	**8**	**8**
4. Meetings of the Committee	4	7	4	4
5. Meetings of the working groups of the Committee	4	–	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**8**	**28**	**9**	**9**
6. National workshops	5	17	5	5
7. Regional workshops	2	9	3	3
8. Civil society outreach and engagement	1	2	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: full-membership open consultations of the Security Council on resolution 1540 (2004); full-membership open briefings; and advice on the implementation of resolution 1540 (2004) upon request by Member States.				
Databases and substantive digital materials: maintenance of database containing a list of points of contact, assistance requests received by the Committee, submitted national reports, national implementation action plans and other documentation.				
D. Communication deliverables				
Outreach programmes, special events and information materials: organization of and presentations at outreach events on preventing non-State actors from acquiring weapons of mass destruction in the context of resolution 1540 (2004), including addressing civil society, such as academia and industry.				
Digital platforms and multimedia content: updates to and maintenance of the website of the Committee.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 63
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*
Category of expenditure	*(1)*	*(2)*	*(3)*	*(4)*	*(5)=(4)-(3)*
Military and police personnel	–	–	–	–	–
Civilian personnel	865.7	702.2	966.8	959.1	(7.7)
Operational costs	2 549.4	1 739.8	2 499.1	2 572.9	73.8
Total (net of staff assessment)	**3 415.1**	**2 442.1**	**3 465.9**	**3 532.0**	**66.1**

Table 64
Human resources

	International staff										*National staff*				*United Nations Volunteers*			
	USG	*ASG*	*D-2*	*D-1*	*P-5*	*P-4*	*P-3*	*P-2*	*FS*	*Subtotal*	*NPO*	*GS*	*LL*	*Subtotal*	*International*	*National*	*Subtotal*	*Total*
Approved 2025	–	–	–	–	1	–	2	–	–	3	–	3[a]	–	3		–	–	6
Proposed 2026	–	–	–	–	1	–	2	–	–	3	–	3[a]	–	3		–	–	6
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

227. The proposed resource requirements for the mission for 2026 amount to $3,532,000 (net of staff assessment) and would provide for salaries and common staff costs ($959,100) for the continuation of six posts (1 P-5, 2 P-3 and 3 General Service (Other level)), and operational costs ($2,572,900) comprising expert fees ($1,991,800) and travel ($158,600) of the nine experts of the Committee, official travel of the members of the Committee and staff ($124,600), facilities and infrastructure ($228,200), communications and information technology ($55,200), and other supplies, services and equipment ($14,500).

228. For 2026, no change is proposed to the number and level of posts for the mission. A vacancy rate of zero per cent has been applied to the staff costs for international staff and a rate of 33.3 per cent has been applied for national staff, on the basis of the actual vacancy rate in March 2025 and the average vacancy rate in 2024, respectively.

229. The increase in the requirements for 2026 compared with the appropriation for 2025 is attributable primarily to the increased requirements for expert fees, lower vacancy rate for international staff compared with the rate of 6.7 per cent applied in 2025 and a new requirement for conference costs related to the 1540 Committee open consultations. The increase is offset in part by the application of a higher vacancy rate for national staff compared with the rate of 6.7 per cent applied in 2025 and the application of the most recent ICT standard rates.

Extrabudgetary resources

230. In 2025, extrabudgetary resources in the amount of $1,000,000 will be used for activities in support of the implementation of resolution 1540 (2004), including facilitation of the participation of Member States in events relating to the resolution and country-specific activities. The resources will also cover the continuous work of two Regional Coordinators (P-4) stationed in Africa and Asia, along with a Political Affairs Officer (P-3) responsible for project implementation globally.

231. In 2026, extrabudgetary resources in the amount of $1,000,000 are projected to be used to organize or support a number of activities relating to resolution 1540 (2004), including facilitation of the participation of Member States in events relating to the resolution and country-specific activities. The resources will also cover the continuous work of the two Regional Coordinators (P-4) and the Political Affairs Officer (P-3).

14. Counter-Terrorism Committee Executive Directorate

($12,660,100)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

232. The Counter-Terrorism Committee Executive Directorate is mandated to support the Counter-Terrorism Committee in its work to monitor, promote and facilitate the implementation by Member States of the relevant Security Council resolutions on terrorism. The mandate derives from Council resolution 1373 (2001), which was renewed in its subsequent resolutions, including, most recently, 2617 (2021), by which the Council extended the mandate until 31 December 2025. In addition, the United Nations Global Counter-Terrorism Strategy and the 2022 Delhi Declaration on countering the use of new and emerging technologies for terrorist purposes set forth several tasks for the Executive Directorate with respect to facilitating the delivery of technical assistance, assessing the capacities of Member States to counter the use of new and emerging technologies for terrorist purposes, including by developing a set of non-binding guiding principles, compiling good practices, producing a gaps analysis and promoting good counter-terrorism practices.

Programme of work

Objective

233. The objective, to which this mission contributes, is to enhance and consolidate Member States' counter-terrorism legislation and policies, institutions and operations by ensuring the full and effective implementation by Member States of Security Council resolution 1373 (2001) and other relevant Council resolutions, to inform the efforts of United Nations entities and other implementing agencies to provide related capacity-building and technical assistance and to analyse new and emerging terrorism threats, trends and challenges.

Strategy and external factors for 2026

234. To contribute to the objective, the Executive Directorate will:

(a) Assist Member States in identifying and addressing implementation and capacity gaps in accordance with the requirements of Security Council resolution 1373 (2001) and subsequent Council resolutions on terrorism, through assessment visits and stocktaking assessment tools such as the electronic detailed implementation survey and the overview of implementation assessment, and make technical recommendations to Member States on ways to strengthen their implementation of the relevant resolutions;

(b) Strengthen the effectiveness, timeliness and impact, as well as the transparency and inclusivity, of assessments conducted by the Executive Directorate on behalf of the Committee, including relating to countering the financing of terrorism through targeted and focused follow-up visits as complements to its comprehensive assessments, as well as to annual assessments of gaps and areas requiring more action to implement key provisions of Security Council resolutions relating to countering the financing of terrorism for the purpose of designing targeted technical assistance by relevant partners;

(c) Organize follow-up meetings at the Committee level and in other bilateral and multilateral settings to highlight the priority technical assistance needs of visited Member States, and to facilitate the delivery of technical assistance;

(d) Contribute to identifying and assessing emerging issues, trends and developments relating to relevant resolutions and in support of action 23 of the Pact for the Future, the Global Digital Compact and the Declaration on Future Generations. In this respect, it will prepare and publish analytical materials, reference tools and guidelines and promote Security Council and Committee policy papers, international standards, codes and effective practices;

(e) Integrate and promote in the Executive Directorate's work the non-binding guiding principles on threats posed by the use of unmanned aircraft systems for terrorist purposes, preventing, detecting and disrupting the use of new and emerging financial technologies for terrorist purposes and countering the use of ICT for terrorist purposes, which were prepared in accordance with the Delhi Declaration.

235. The above-mentioned work is expected to result in the strengthening of Member States' capacities to:

(a) Combat terrorism and violent extremism conducive to terrorism and achieve the full and effective implementation of resolution 1373 (2001) and other relevant resolutions;

(b) Take action on recommendations in Committee visit reports and other assessments and provide technical assistance and/or share effective practices with other Member States, as appropriate;

(c) Operationalize their obligations pursuant to resolution 1373 (2001) and other relevant resolutions by facilitating acceptance and understanding of the international effective practices, techniques and tools available to combat terrorism.

236. With respect to cooperation with other entities, the Executive Directorate cooperates with a wide range of international, regional and subregional organizations such as the Financial Action Task Force and its regional bodies, the Organization of Islamic Cooperation, the Council of Europe, the European Union and the Regional Anti-Terrorist Structure of the Shanghai Cooperation Organization to raise awareness of international requirements on counter-terrorism at the national and regional levels. It leverages and diversifies its Global Counter-Terrorism Research Network to convene policymakers and researchers and engages and enhances its partnerships with civil society organizations, think tanks, academic organizations and the private sector to assist the Committee in identifying national, regional and thematic challenges and developments.

237. With respect to inter-agency coordination and liaison, the Executive Directorate works closely with other United Nations entities, within the framework of the United Nations Global Counter-Terrorism Coordination Compact. The Executive Directorate enhanced its efficiency by chairing or co-chairing Global Compact working groups and by sharing the Committee's recommendations and consented reports with the Compact. The Executive Directorate will continue to collaborate with the Office of Counter-Terrorism and UNODC on relevant issues. It works closely with other subsidiary bodies of the Security Council and their expert groups to enhance information-sharing. It maintains strong cooperation with OHCHR and the Special Rapporteur on the promotion and protection of human rights and fundamental freedoms while countering terrorism.

238. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Consent of Member States to receive assessment visits and subsequently brief the Committee on progress made in implementing Committee recommendations:

(b) Ability to organize and conduct visits in accordance with United Nations safety and security measures;

(c) Participation of technical experts from international and regional organizations in country visit assessments conducted by the Executive Directorate on behalf of the Committee;

(d) Commitment of implementing partners to deliver technical assistance pursuant to Committee findings;

(e) The Counter-Terrorism Committee adopts the non-binding guiding Principles on countering the use of ICT for terrorist purposes.

239. The Executive Directorate integrates a gender perspective into its operational activities, deliverables and results, as appropriate, and works with the Working Group on Adopting a Gender-Sensitive Approach to Preventing and Countering Terrorism.

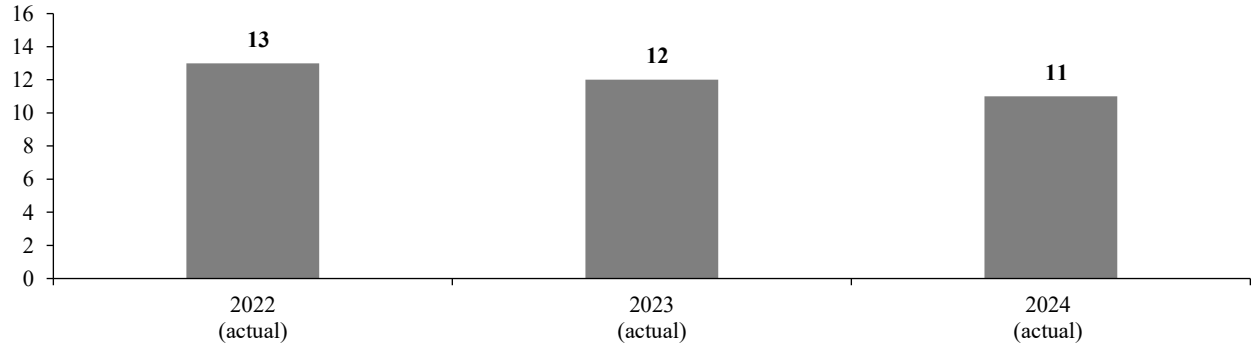
Programme performance in 2024

Road maps to improve the capacity of Member States to counter terrorism and violent extremism conducive to terrorism

240. In 2024, the Committee adopted reports on visits to seven States (Chile, Democratic Republic of the Congo, Latvia, Republic of Korea, Spain, Thailand and Uzbekistan). The Executive Directorate completed 8 overview of implementation assessments and electronic detailed implementation surveys and 26 capacity-building workshops, meetings, consultations and activities. It also facilitated technical assistance and developed 11 road maps for select beneficiaries (Benin, Cambodia, Costa Rica, Côte d'Ivoire, Gabon, Guatemala, Kyrgyzstan, Mauritania and Senegal) as part of several capacity-building programmes spearheaded by the Office of Counter-Terrorism to enhance Member States' compliance with relevant Security Council resolutions and international standards. On the basis of the road maps, beneficiaries developed legislative, operational and technological measures to operationalize Advance Passenger Information and Passenger Name Record systems. Authorities in Senegal utilized a road map developed by the Executive Directorate to better address the threat posed by unmanned aircraft systems for terrorist purposes, including through enhanced data-gathering on the threat, amended legislative and regulatory frameworks relevant to unmanned aircraft systems and enhanced information exchange mechanisms. The road maps also served as blueprints for other partners to tailor future capacity-building assistance.

241. Progress towards the objective is presented in the performance measure below (see figure V).

Figure V
Performance measure: number of Member States adopting national road maps to counter terrorism and violent extremism conducive to terrorism



Planned results for 2026

Result 1: Member States utilize Executive Directorate assessments and analysis to identify and respond to terrorism threats, trends and challenges to better implement Security Council resolution 1373 (2001) and subsequent Council resolutions

Programme performance in 2024 and target for 2026

242. The Executive Directorate contributed to the identification of counter-terrorism trends, including through the production of 5 publications, which did not meet the planned target of 10 publications.

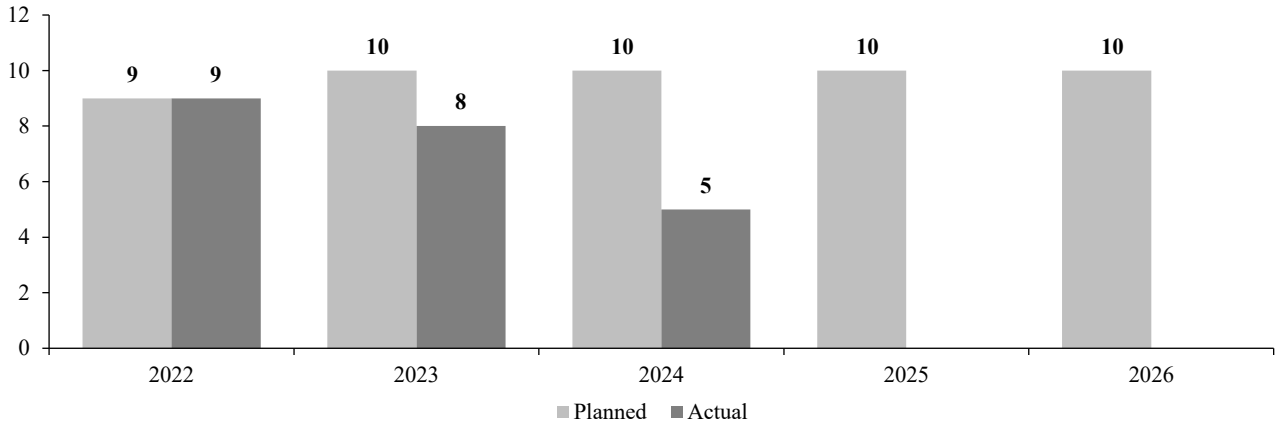
The target was not met owing to a combination of factors, including inadequate staffing. The Executive Directorate did nevertheless provide advice on several thematic areas such as border control and law enforcement, human rights and countering the financing of terrorism, including promotion of the non-binding guiding principles on threats posed by unmanned aircraft systems for terrorist purposes.

243. In 2026, the Executive Directorate intends to develop 10 publications to promote international standards and good practices. It will further enhance the use of its overview of implementation assessment and electronic detailed implementation surveys data to identify emerging trends and issue technical guidance.

244. Expected progress towards the objective and the target for 2026 are presented in the performance measure below (see figure VI).

Figure VI

Performance measure: Member States examine their own national counter-terrorism measures in the light of updated technical materials and guidance on the implementation of relevant Security Council resolutions



Result 2: Member States have access to strengthened assessment reports with action-orientated recommendations

Proposed programme plan for 2026

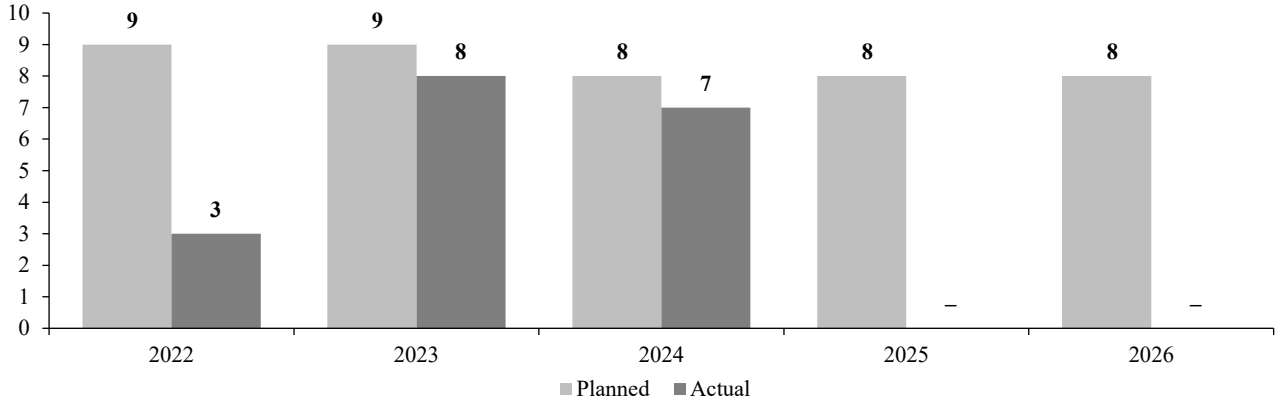
245. In August 2024, the Committee agreed on action to strengthen the assessment process regarding effectiveness, timeliness, inclusivity and transparency. Since then, a greater number of Member States have provided written feedback on steps taken to implement the Committee's recommendations, attended that portion of the Committee session at which its preliminary assessment and observation is presented and provided oral briefings to the Committee at its plenaries.

Lessons learned and planned change

246. The lesson for the Executive Directorate was the need to further improve its methodology to enhance the effectiveness, timeliness and impact of its assessments. In applying the lesson, the Executive Directorate will, among others, frame recommendations in assessments to make them more actionable, share a matrix of technical assistance needs with potential donors and implementing agencies, upon approval by the visited Member State, and request Member State feedback on steps taken to implement recommendations within 12 months of receiving the final report.

247. Expected progress towards the objective is presented in the performance measure below (see figure VII).

Figure VII
Performance measure: number of Member States assessment reports adopted by the Counter-Terrorism Committee



Deliverables

248. Table 65 below lists all deliverables of the mission.

Table 65
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**18**	**12**	**18**	**18**
1. Meetings of the Counter-Terrorism Committee	11	9	11	11
2. Briefings to Member States	7	3	7	7
B. Generation and transfer of knowledge				
Technical materials (number of materials)	**10**	**6**	**10**	**10**
3. Reports on trends and developments relating to the implementation of Security Council resolutions on counter-terrorism	5	5	5	5
4. Guidance, compendiums and good practice documents	5	1	5	5
Fact-finding, monitoring and investigation missions (number of missions)	**15**	**8**	**15**	**15**
5. Assessment visits relating to the implementation of Security Council resolutions on counter-terrorism	15	8	15	15
C. Substantive deliverables				
Consultation, advice and advocacy: facilitation of technical assistance delivery and capacity-building activities (approximately 25 per year) relating to the implementation of all relevant United Nations counter-terrorism resolutions and development of guidelines for Member States to assist them in responding to new and emerging challenges.				
Databases and substantive digital materials: database on stocktaking of Member States' implementation of Security Council resolutions on counter-terrorism.				
D. Communication deliverables				
External and media relations: fact sheets, folders, publications and flash drives to be distributed to Member States, the media, civil society and non-governmental organizations to promote the work of the Committee and the Executive Directorate.				
Digital platforms and multimedia content: maintenance and updating of the Committee's website, newsletter and all social media platforms.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 66
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*

Total (net of staff assessment)	**11 669.1**	**11 173.3**	**12 815.7**	**12 660.1**	**(155.6)**

Table 67
Human resources

	International staff										*National staff*				*United Nations Volunteers*			
	USG	*ASG*	*D-2*	*D-1*	*P-5*	*P-4*	*P-3*	*P-2*	*FS*	*Subtotal*	*NPO*	*GS*	*LL*	*Subtotal*	*International*	*National*	*Subtotal*	*Total*
Approved 2025	–	1	1	2	9	20	10	3	–	46	–	8[a]	–	8	–	–	–	54
Proposed 2026	–	1	1	2	9	20	10	3	–	46	–	8[a]	–	8	–	–	–	54
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Comprising one Principal level and seven Other level.

249. The proposed resource requirements for the Executive Directorate for 2026 amount to $12,660,100 (net of staff assessment) and would provide for salaries and common staff costs ($10,886,200) for the continuation of 54 posts (1 Assistant Secretary-General, 1 D-2, 2 D-1, 9 P-5, 20 P-4, 10 P-3, 3 P-2, 1 General Service (Principal level) and 7 General Service (Other level)) and operational costs ($1,773,900) comprising official travel of mission staff ($742,400), facilities and infrastructure ($830,600), communications and information technology ($189,900) and other supplies, services and equipment ($11,000).

250. For 2026, no change is proposed to the number and levels of the posts for the Executive Directorate. Vacancy rates of 14.0 and 8.3 per cent have been applied, respectively, to the staff costs for international staff and national staff on the basis of the average vacancy rate in 2024.

251. The decrease in the requirements proposed for 2026 compared with the appropriation for 2025 is attributable primarily to lower requirements for civilian personnel due to the application of a higher vacancy rate for international staff compared with the rate of 9.6 per cent applied for 2025 and the application of the most recent ICT standard rates.

Extrabudgetary resources

252. In 2025, extrabudgetary resources in the amount of $719,900 are projected to be used to support the activities and relevant initiatives aimed at promoting the implementation of resolutions 1373 (2001), 1624 (2005), 2178 (2014), 2396 (2017), 2462 (2019), 2482 (2019), 2617 (2021) and 2713 (2023), including projects in the areas of countering terrorist use of ICT, security sector oversight in Asia,

artificial intelligence and human rights in counter-terrorism, and legal cooperation and data protection.

253. In 2026, extrabudgetary resources in the amount of $1,000,000 are projected to be used to organize meetings in accordance with the programme of work approved by the Committee and support international cooperation in counter-terrorism, in particular a project in the area of forensics and biometrics in Africa.

254. The increase in the estimates projected for 2026 compared with the estimates for 2025 is attributable primarily to the anticipated implementation of a new project.

15. United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant

Liquidation activities

255. The mandate of the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant (UNITAD) was defined in Security Council resolution 2379 (2017) and extended in subsequent resolutions of the Council. In its resolution 2697 (2023), the Council, at the request of the Government of Iraq, decided to extend the mandate of UNITAD until 17 September 2024 only.

256. The administrative liquidation of UNITAD, including the disposal of assets, was carried out from 18 September to 31 December 2024 and was facilitated by the United Nations Assistance Mission for Iraq.

257. The General Assembly, by its resolution 78/253, appropriated an amount of $25.7 million for 2024. UNITAD incurred $20.0 million in expenditure for the period, representing a resource utilization rate of 78 per cent, as result of the closure of the mission in September, while provision was made in the budget for a 12-month period.

	2024		
	Appropriation	*Expenditure*	*Variance Surplus/(deficit)*
Category of expenditure	*(1)*	*(2)*	*(4)=(2)-(1)*
Military and police personnel	–	–	–
Civilian personnel	18 925.3	16 882.8	2 042.5
Operational costs	6 747.8	3 113.3	3 634.5
Total (net of staff assessment)	**25 673.1**	**19 996.1**	**5 677.0**

258. The process for the drawdown and liquidation of property of UNITAD was guided by the principles of and policies contained in financial rule 105.23.[3] The assets of UNITAD, with a total capitalized value/acquisition value of $12,304,751 (corresponding net book value/operational value of $5,350,308), were disposed of as at 31 December 2024, of which 96.7 per cent has been transferred to the United Nations Assistance Mission for Iraq, the United Nations Support Office in Somalia and the United Nations Mission in South Sudan, while the rest were written off or sold locally.

[3] According to the rule:
Property, plant and equipment, inventories and intangible assets of the United Nations that are declared surplus, unserviceable or obsolete following a recommendation by a review body shall be disposed of, transferred or sold after competitive bidding, unless the review body:
(a) Estimates that the sales value is less than an amount to be specified by the Under-Secretary-General for Management;
(b) Considers that the exchange of property in partial or full payment for replacement equipment or supplies is in the best interest of the Organization;
(c) Deems it appropriate to transfer surplus property from one project or operation for use in another and determines the fair market value at which the transfer(s) shall be effected;
(d) Determines that the destruction of the surplus or unserviceable material will be more economical or is required by law or by the nature of the property;
(e) Determines that the interests of the United Nations will be served through the disposal of the property by gift or by sale at a nominal price to an intergovernmental organization, a Government or governmental agency or some other non-profit organization.

259. A summary of the final disposition of all assets is reflected in table 69.

Annex I

Summary of follow-up action taken to implement the decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation	*Action taken to implement the recommendation*
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.3)	
The Advisory Committee notes that the sanctions regime pursuant to Security Council resolution 1718 (2006) is supported exclusively by the Security Council Committee established pursuant to resolution 1718 (2006). Taking into consideration the anticipated workload and complexity of the sanctions regime, the Committee recommends that the General Assembly request the Secretary-General to conduct an evaluation of the support arrangements for the Security Council Committee established pursuant to resolution 1718 (2006), including capacities within the Department of Political and Peacebuilding Affairs, and that information thereon be provided in future budget reports (para. 11).	Taking into account the complexity of this sanctions regime, as detailed in paragraphs 43 to 45 above, the significantly increased workload of the mission and upon completion of evaluation of the current support arrangement, the Secretariat assesses that the Department of Political and Peacebuilding Affairs lacked the in-house capacity to provide the support required by the 1718 sanctions committee and its Chair. Consequently, the Secretariat concludes that the existing support arrangement through the established special political mission remains appropriate and adequate.
The Advisory Committee trusts that updated information on the recruitment status of vacant positions will be provided to the General Assembly during the consideration of the present report and in the next budget submission (para. 14).	Missions under cluster II make concerted efforts to recruit and fill vacant posts[a] in accordance with the staff selection policy. Recruitment exercises, however, may be affected and delayed by external factors, including visa restrictions, the availability of qualified candidates in the duty stations and temporary hiring restrictions as a result of efforts to mitigate financial challenges facing the Organization that have an adverse impact on the missions' ability to fill vacant posts. These challenges notwithstanding, missions remain committed to filling all current and future vacancies as expeditiously as possible.
The Advisory Committee trusts that efforts will be made to achieve a more equitable geographical representation of Member States among the civilian staff and experts in thematic cluster II and that updated information thereon will be included in all future budget submissions. (para. 24).	The Secretariat is committed to advancing equitable geographical representation in geographical posts and recruiting staff on as wide a geographical basis as possible for all non-geographical posts in accordance with Article 101.3 of the Charter of the United Nations. The intention going forward is to fill future vacant geographical posts as set forth in the administrative instruction on the staff selection system (ST/AI/2010/3/Rev.3), including making every effort to select candidates from unrepresented and underrepresented Member States, in particular from outside the Organization. In this connection, at an organizational level, the Secretariat continues to take measures to make progress on this important mandate, including targeted talent outreach, purposeful

Brief description of the recommendation	*Action taken to implement the recommendation*
	partnerships with Member States and the resident coordinators and United Nations information centres and overhauling the staff selection process to ensure that it is effective, efficient, fair and inclusive. To this end, the Department of Political and Peacebuilding Affairs nominated a D-1 staff member to join the United Nations advisory board on purposeful partnerships to contribute to the implementation of the "purposeful partnership" arrangement between the Secretariat and Member States and help to build talent pipelines that have become essential in identifying and attracting potential candidates from underrepresented Member States proactively. To achieve a more equitable geographical representation among consultants working as Security Council sanctions experts, the Secretariat organized outreach events (in-person or hybrid format) for Member States and United Nations regional groups to promote applications from those groups.
The Advisory Committee trusts that efforts will continue to be made to improve the gender balance of the civilian staff and experts under thematic cluster II entities and that updated information regarding gender representation and the related recruitment efforts will be provided in the context of all future budget submissions. (para. 25).	To enhance gender balance, missions within cluster II have taken steps to integrate gender perspectives into their operational activities and have actively engaged in virtual career fairs aimed at specific regions and demographic groups for both staff and experts, as detailed in paragraphs 6 and 7 above.
The Advisory Committee takes note of the pending review of the rates for experts and trusts that that updated information will be provided in the next budget report (see also A/78/7/Add.3, para. 18) (para. 26).	The review of experts' rates was finalized in December 2024, with the updated rates applied to all new contracts effective 17 January 2025 and reflected in the 2026 budget submission.
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.20)	
The Advisory Committee, without prejudice to the independence of the Focal Point for Delisting, encourages coordination with the Office of the Ombudsperson established pursuant to resolution 1904 (2009) to seek efficiencies and synergies in the performance of administrative duties and research support and trusts that the Secretary-General will report thereon in the next budget submission (para. 14).	The Secretariat considered that seeking efficiencies and synergies in the performance of administrative duties and research support between the Ombudsperson's and the Focal Point's Offices could blur operational boundaries, thereby increasing the risk of compromising their independence, impartiality and the handling of sensitive or confidential information. To maintain both Offices' independence, impartiality and stringent confidentiality requirements, it is essential that a clear distinction be made between the two, with each supported by its own dedicated staff. These requirements are fundamental to the credibility and effectiveness of both Offices and to upholding the standards for due process.

[a] There was one long-vacant post for missions under cluster II at the time of preparation of the present report, which will be provided in the supplementary information.

Special political missions

Thematic cluster III: regional offices, offices in support of political processes and other missions

Summary

The present report contains the proposed resource requirements for 2026 for 10 special political missions grouped under the thematic cluster of regional offices, offices in support of political processes and other missions.

The proposed resource requirements for 2026 for special political missions grouped under this cluster amount to $384,906,000 (net of staff assessment).

I. Resource overview

1. The proposed resource requirements for 2026 for the 10 special political missions grouped under thematic cluster III amount to $384,906,000 (net of staff assessment). Tables 1 and 2 provide a comparison between the financial and human resources proposed for 2026 and such resources for 2025 as approved by the General Assembly in its resolution 79/258.

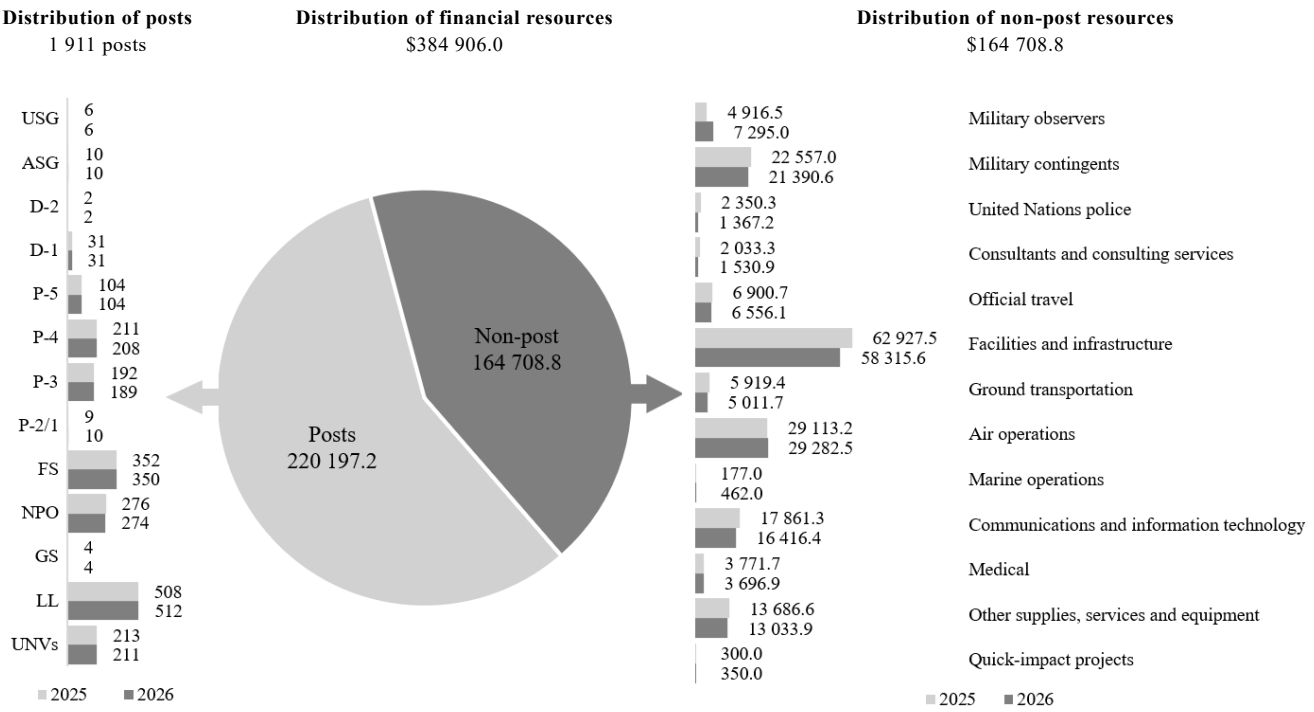
[c] Includes international and national United Nations Volunteers.

Figure I
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



2. The overall decrease of $1.1 million for the 10 special political missions is attributable primarily to: (a) the planned drawdown of the United Nations Transitional Assistance Mission in Somalia (UNTMIS) and adjustments made to mission activities and services to cover only the 10-month period up to 31 October 2026, in accordance with second phase of the mission transition as outlined in Security Council resolution 2753 (2024), and the proposed abolishment of 11 posts as from 1 January 2026; (b) reduced requirements for National Professional Officers in the United Nations Mission to Support the Hudaydah Agreement (UNMHA) due to the application of higher vacancy rates and the abolishment of two National Professional Officer posts and the establishment of two Local level posts instead; (c) the application of higher vacancy rates for United Nations police officers in the United Nations Integrated Office in Haiti (BINUH); (d) reduced requirements for consultants due to the higher reliance on in-house expertise in the United Nations Office for West Africa and the Sahel (UNOWAS) and the United Nations Verification Mission in Colombia, as well as lower estimates for travel for civilian observers relating to the United Nations support to the Cameroon-Nigeria Mixed Commission; (e) lower requirements for ground transportation due to reduced rental costs in the United Nations Verification Mission in Colombia with the implementation of the UN Fleet lease contract for the soft-skin fleet; and (f) reduced requirements for communications and information technology equipment and its maintenance through the deprioritization of non-essential activities in some missions. The decrease was offset in part by

additional requirements for military observers owing to an increase in the mission subsistence allowance rates and the application of lower vacancy rates in UNMHA and the United Nations Verification Mission in Colombia, for air operations in the United Nations Verification Mission in Colombia to support mandate implementation in the locations outside Bogotá and ensure connectivity between locations, and for the construction of a new road and parking area, a fuel station, infrastructure networks and other security enhancements in the United Nations Support Mission in Libya (UNSMIL) complex.

3. The proposed vacancy rates applied in the budget take into account the experience to date. The assumptions considered for the proposed vacancy factors include the 12-month average vacancy rate in 2024 and the actual vacancy rate as at 31 March 2025. The lower of the two was used as the budgeted vacancy rate. This is in line with the policy guidance to improve the accuracy and consistency of the vacancy factors applied in the proposed budgets for 2026 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions, or posts and positions proposed for reassignment.

4. For the sake of brevity, the present document will include a section on extrabudgetary resources only for those missions that have projected extrabudgetary resources in 2025 or 2026.

II. Cross-cutting information

Gender perspective

5. Special political missions are guided by Security Council resolutions[1] on the women and peace and security agenda and mandate the incorporation of a gender perspective into the political work of the United Nations, including in special political missions. The missions are also guided by General Assembly resolution 75/100 on the comprehensive review of special political missions, in which the Assembly reaffirmed the important role of women in the prevention and resolution of conflicts and in peacebuilding and recognized the importance of the equal and effective participation and the full involvement of women at all levels, at all stages and in all aspects of the peaceful settlement of disputes, conflict prevention and conflict resolution.

6. Specific examples of how special political missions integrate a gender perspective into their operational activities, deliverables and results are given under the individual missions in the present report.

Disability inclusion

7. In line with the United Nations Disability Inclusion Strategy, special political missions review the Strategy with a view to further advancing disability inclusion through inclusive messaging, awareness-raising and promoting the Strategy through their work, including in political and peace processes. The missions also support mitigating measures to overcome accessibility challenges, in addition to the efforts undertaken by relevant United Nations entities to ensure the accessibility of facilities, platforms, security and other infrastructure to facilitate easy access and use by persons with disabilities.

Evaluation activities

8. The Department of Political and Peacebuilding Affairs will support the biennial assessment by the Office of Internal Oversight Services on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives. Mission-specific evaluation activities are described, as applicable, under the specific missions in the present report.

[1] Resolutions 1325 (2000), 1820 (2008), 1888 (2009), 1889 (2009), 2122 (2013), 2242 (2015), 1960 (2010), 2106 (2013), 2467 (2019) and 2493 (2019).

III. Special political missions

1. United Nations Office for West Africa and the Sahel

($15,960,200)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

9. The United Nations Office for West Africa and the Sahel (UNOWAS) is responsible for conflict prevention and ensuring sustainable peace and security in West Africa and the Sahel. Its mandate derives from the exchanges of letters between the Secretary-General and the President of the Security Council (S/2016/88 and S/2016/89, S/2016/1128 and S/2016/1129, S/2019/1009 and S/2020/85 and S/2023/70 and S/2023/71), as well as Council resolution 2349 (2017). The mission's current mandate will expire on 31 January 2026.

10. UNOWAS is mandated to monitor political developments in West Africa and the Sahel and carry out good offices to support conflict prevention, peacebuilding, sustaining peace and mediation efforts in the subregion, mindful of the sustainable development context; enhance regional and subregional partnerships to address cross-border and cross-cutting threats to peace and security; support, through political advocacy and playing a convening role, the implementation of the United Nations integrated strategy for the Sahel; and promote good governance, respect for the rule of law, human rights and gender mainstreaming in conflict prevention, management and resolution.

Programme of work

Objective

11. The objective, to which this mission contributes, is to achieve peace and security in West Africa and the Sahel.

Strategy and external factors for 2026

12. To contribute to the objective, the mission will:

(a) Strengthen its early warning and conflict prevention and resolution action with relevant partners, with a focus on West African countries undergoing political transitions and those scheduled to hold elections in 2026; de-escalate crises relating to governance-related challenges; lead regional and international diplomatic engagements to build consensus on regional responses; support regional solutions to cross-cutting threats to peace and security; and monitor and assess political developments in the region;

(b) Enhance partnerships with regional institutions, civil society organizations and United Nations entities to address regional peace and security challenges, focusing on root causes of instability and insecurity in the region, while reinforcing the peace-security-development nexus; and conduct high-level advocacy to facilitate humanitarian assistance and access to critical social services by populations affected by conflict and insecurity;

(c) Accelerate the implementation of the women and peace and security and youth, peace and security agendas through the promotion of involvement of women and young people in political

and decision-making processes and mediation initiatives; and advance the promotion of good governance and respect for human rights and the rule of law;

(d) Intensify its analytical work, including on governance and the adverse implications of climate change.

13. The above-mentioned work is expected to result in:

(a) Prevention and mitigation of conflicts through consensual political processes, including in countries undergoing political transitions;

(b) Strengthened regional and subregional cross-border responses and coherent, comprehensive and integrated approaches to challenges relating to climate change, transnational organized crime, illicit trafficking, farmer and herder dynamics, intercommunal violence, terrorism, violent extremism and humanitarian access;

(c) Mainstreaming of gender and of youth participation into conflict prevention, management and resolution activities;

(d) Strengthened initiatives to address violations of human rights and international humanitarian law and improve security sector governance.

14. With regard to cooperation with other entities, UNOWAS works with the African Union, the Economic Community of West African States (ECOWAS), the Mano River Union, the Lake Chad Basin Commission, the Accra Initiative, the Liptako-Gourma Authority, the Gulf of Guinea Commission, the African Development Bank, national human rights institutions and other civil society groups in the region to strengthen and harmonize regional capacities for conflict prevention and resolution, peacebuilding and sustaining peace; advance good governance and respect for human rights and the rule of law and the participation of women and young people in political and decision-making processes; and support regional responses to address climate change and cross-border threats to peace and security.

15. With regard to inter-agency coordination and liaison, UNOWAS collaborates with the Development Coordination Office and resident coordinators, humanitarian coordinators, United Nations country teams, United Nations agencies, funds and programmes based in Dakar and across the region and other United Nations partners to create political space for humanitarian access and developmental initiatives. Working with the Special Coordinator for Development in the Sahel, UNOWAS promotes the United Nations integrated strategy for the Sahel and supports cost-effective, innovative approaches. It coordinates with the United Nations Regional Office for Central Africa (UNOCA) on transregional issues affecting West and Central Africa, including terrorism in the Lake Chad Basin, farmer-herder conflicts, climate security, piracy and maritime security in the Gulf of Guinea.

16. In relation to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Demand for UNOWAS good offices to facilitate political dialogue and defuse political tensions, and to support countries undergoing political transitions and institutional reforms;

(b) Heads of State and Governments of West Africa, ECOWAS, the Lake Chad Basin Commission, the Mano River Union, the African Union, the Gulf of Guinea Commission and the Accra Initiative demonstrate the political will for sustained support to regional peace and security mechanisms and a commitment to mobilizing the resources required to address challenges to peace and stability;

(c) ECOWAS early warning and response mechanisms and other regional conflict prevention instruments are operational at the national and regional levels;

(d) The international community remains committed to supporting the countries of the region and regional and subregional organizations in addressing governance and security challenges;

(e) Peacebuilding and peace consolidation efforts by regional and subregional organizations and other partners continue;

(f) Political and technical-level engagements with UNOCA in support of the Gulf of Guinea Commission and the Interregional Coordination Centre for Maritime Safety and Security in the Gulf of Guinea continue;

(g) Political commitment on the part of national, regional and international partners to work with the United Nations in the context of the United Nations integrated strategy for the Sahel;

(h) Governments in the region remain willing to engage with UNOWAS and other partners to improve human rights and rule of law.

Programme performance in 2024

Conducive environment for peaceful and inclusive electoral processes in West Africa and the Sahel

17. In 2024, UNOWAS led initiatives to prevent conflict and defuse electoral tensions in Ghana, Mauritania and Senegal, in collaboration with national and regional partners. With regard to the December 2024 elections in Ghana, the mission promoted an inclusive, transparent process through stakeholder engagement and support for the "I Pledge for Peace" campaign led by the National Peace Council. During the March 2024 elections in Senegal, UNOWAS engaged with political and electoral stakeholders to ensure peaceful elections. With respect to the June 2024 presidential election in Mauritania, the mission engaged with political and electoral stakeholders, advocating for dialogue to address challenges, strengthen social cohesion and promote national dialogue and electoral reforms.

18. Progress towards the objective is presented in the performance measure below (see table 3).

Table 3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Return of key stakeholders to the Inter-Party Advisory Committee to create conditions for peaceful and inclusive elections in Ghana	Return of key stakeholders to the Inter-Party Advisory Committee to create conditions for peaceful and inclusive elections in Ghana	"I Pledge for Peace" campaign rolled out and related agreement signed in Ghana ahead of the elections Inclusive and peaceful elections held in Mauritania and results accepted by all parties In the March 2024 elections in Senegal, UNOWAS engaged with political and electoral stakeholders to ensure peaceful elections and the mission's preventive diplomacy contributed to the harmonization of messages and readiness for dialogue by all stakeholders, leading to peaceful elections, the outcome of which was accepted by all

Planned results for 2026

Result 1: enhanced political dialogue throughout West Africa and the Sahel

Programme performance in 2024 and target for 2026

19. In 2024, UNOWAS led 38 high-level engagements to enhance dialogue and facilitate rapprochement between ECOWAS and countries undergoing a political transition, namely, Burkina Faso, Guinea, Mali and the Niger. Those efforts improved bilateral relations and donor engagement, as well as reduced tensions. In response to the announced withdrawal of Burkina Faso, Mali and the Niger from ECOWAS, the mission promoted dialogue to rebuild trust, preserve regional integration and strengthen cooperation on peace and security. This created a conducive environment for dialogue, eased tensions and prevented a further deterioration in the security situation.

20. In 2026, UNOWAS will continue to foster political consensus, stability and social cohesion, supporting inclusive governance, rule of law and human rights throughout West Africa and the Sahel. The mission will advocate for regional security cooperation to address threats to peace and human security, prioritizing nationally led peacebuilding and prevention initiatives, aligned with the Pact for the Future.

21. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4).

Table 4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced bilateral and regional dialogue between ECOWAS and the countries undergoing a political transition	Enhanced bilateral and regional dialogue between ECOWAS and the countries undergoing a political transition	Enhanced bilateral and regional dialogue between ECOWAS and the countries undergoing a political transition	Sustained dialogue and continued diplomatic relations in West Africa and the Sahel	Sustained dialogue and continued diplomatic relations in West Africa and the Sahel

Result 2: enhanced regional and subregional partnerships to respond to cross-border and cross-cutting security challenges

Programme performance in 2024 and target for 2026

22. In 2024, UNOWAS worked with regional and subregional partners to strengthen peace and security in West Africa and the Sahel and to safeguard regional integration. It signed memorandums of understanding with ECOWAS and the Mano River Union, which enhanced existing regional partnerships and supported the evaluation of the Yaoundé Architecture for maritime safety and security in the Gulf of Guinea. In response to the weakening of regional security cooperation mechanisms, the mission advocated for continued support for the Accra Initiative, the preservation of the Multinational Joint Task Force in the Lake Chad Basin and the full implementation of Security Council resolution 2719 (2023). In addition, the mission fostered cooperation and peaceful dialogue between coastal States and Sahelian countries to contain the spread of terrorism and violent extremism.

Lessons learned and planned change

23. The key lesson learned for the mission was the importance of regional ownership in ensuring effective lasting security arrangements. A major challenge was the trust deficit between some member States, hindering cooperation on security matters. UNOWAS promoted various security approaches, with successful models from the Multinational Joint Task Force and the Lake Chad

Basin regional stabilization strategy offering valuable insights. Going forward, the mission will work to bridge trust gaps, promote ownership of security initiatives and encourage integrated multidimensional responses to regional security challenges.

24. Expected progress towards the objective is presented in the performance measure below (see table 5).

Table 5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*

Deliverables

25. Table 6 lists all deliverables of the mission.

Table 6
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**3**	**2**	**3**
1. Reports of the Secretary-General to the Security Council	2	3	2	3
Substantive services for meetings (number of three-hour meetings)	**2**	**2**	**2**	**3**
2. Meetings of the Security Council	2	2	2	3
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**17**	**20**	**17**	**20**
3. Workshops on peace and security, including terrorism, violent extremism conducive to terrorism, transnational organized crime, human rights and the implementation of Security Council resolution 1325 (2000) and subsequent resolutions on women's rights	17	20	17	20
Technical materials (number of materials)	**6**	**8**	**6**	**8**
4. Issue papers on peace and security, human rights, gender and young people	6	8	6	8
Fact-finding, monitoring and investigation missions (number of missions)	**27**	**25**	**27**	**30**
5. Advocacy and support for integrated subregional and cross-border responses on cross-cutting threats to peace and security, in particular election-related instability and challenges related to governance deficits, security sector reform, transnational organized crime, illicit trafficking, terrorism and violent extremism conducive to terrorism; consultations on human rights during political and electoral processes; and advocacy for the effective implementation of the United Nations integrated strategy for the Sahel and advocacy for enhanced strategic cooperation and coordination in the Sahel in fulfilment of the objectives of the integrated strategy	27	25	27	30

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

C. Substantive deliverables

Good offices: provision of good offices, including jointly with ECOWAS and the African Union, on conflict prevention across countries of West Africa and the Sahel, taking into account human rights and gender aspects.

Consultation, advice and advocacy: monitoring missions to West Africa and the Sahelian countries to analyse developments and emerging threats and identify entry points for early warning and conflict prevention activities; monitoring missions to the countries of the region to support United Nations initiatives to sustain peace; and pre- and post-electoral missions to countries conducting elections in West Africa and the Sahel to monitor tensions related to the electoral process.

D. Communication deliverables

Outreach programmes, special events and information materials: digital and print, information campaigns, brochures, flyers, and information notes to promote the good offices and the mission's activities while enhancing visibility of the mission.

External and media relations: media encounters, briefings, press conferences, press releases, statements and op-eds.

Digital platforms and multimedia content: dissemination of information and promotion of the good offices and the activities of the mission through its website and social media.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 7

Proposed 2026	1	1	–	2	9	16	13	1	6	49	9	–	22[a]	31	–	–	–	80
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Includes one general temporary assistance position.

Note: The following abbreviations are used in the tables: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; LL, Local level; NPO, National Professional Officer; USG; Under-Secretary-General.

26. The proposed resource requirements for 2026 for UNOWAS amount to $15,960,200 (net of staff assessment) and would provide for the deployment of one military adviser and one police adviser ($107,000), salaries and common staff costs ($11,153,900) for 49 international posts (1 Under-Secretary-General, 1 Assistant Secretary-General, 2 D-1, 9 P-5, 16 P-4, 13 P-3, 1 P-2 and 6 Field Service) and 31 national posts (9 National Professional Officer and 22 Local level, the latter of which includes 1 general temporary assistance position), and operational costs ($4,699,300), comprising costs for official travel ($788,000), facilities and infrastructure ($209,300), ground transportation ($97,400), air operations ($2,153,200), communications and information technology ($620,000) and other supplies, services and equipment ($831,400).

27. In 2026, no change is proposed to the number and levels of the posts.

28. The mission's approved 2025 staffing table includes one general temporary assistance position. It is proposed that this position, Finance and Budget Assistant (Local level), be continued in 2026 to support and maintain internal control over the financial transactions of the mission.

29. Vacancy rates of 15.6 per cent for international posts and 0.8 per cent for Local level posts and positions, based on the actual average vacancy rates in 2024, and zero per cent for National Professional Officer posts, based on the actual vacancy rate in March 2025, have been applied to the estimates. A vacancy rate of zero per cent has been applied to the estimates for military and police advisers on the basis of the actual vacancy rate in March 2025.

30. The increase in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to increased requirements for civilian personnel, due to: (a) the application of the most recent salary rates for international staff; and (b) the application of a lower vacancy rate of zero per cent compared with the rate of 8.3 per cent applied in 2025 for National Professional Officers. The increase is offset in part by: (a) the non-provisioning of resources for consultants and consulting services in 2026 due to the use of in-house capacity; (b) reduced requirements for air operations in line with historical flight hour utilization rates; (c) reduced requirements for official travel; (d) reduced requirements for other services for meeting and workshop facilitation services; and (e) lower requirements for communications and information technology due to lower estimated costs of software licences and fees, as well as less printing and fewer reproductions and magazine subscriptions for public information and publication services.

Extrabudgetary resources

31. In 2025, extrabudgetary resources amounting to $447,100 are estimated, as follows:

(a) Voluntary contributions of $311,600, are projected to enhance the field capacity of the Department of Political and Peacebuilding Affairs to address climate change-related security risks. The project will boost field offices' abilities to build synergies around climate security and foster opportunities for dialogue;

(b) Cost-recovery resources of $135,500, which are projected to be used to cover the costs of the United Nations Educational, Scientific and Cultural Organization in Dakar for utilities and maintenance services and the United Nations Office on Drugs and Crime (UNODC) for rental and utility services under the office-sharing arrangements with the UNOWAS liaison cell in Nouakchott and the UNOWAS liaison cell office in Abuja.

32. In 2026, extrabudgetary resources amounting to $447,100 (comprising voluntary contributions of $311,600 and cost-recovery resources of $135,500) are projected for the above activities aimed at achieving peace and security in West Africa and the Sahel, as well as activities funded from cost recovery.

2. United Nations Transitional Assistance Mission in Somalia

($97,616,400)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

33. The United Nations Transitional Assistance Mission in Somalia (UNTMIS), formerly the United Nations Assistance Mission in Somalia (UNSOM), is tasked with supporting the Federal Government of Somalia in the attainment of key national priorities while advancing the two-year phased transition of its functions to the Federal Government, the United Nations country team and other stakeholders by 31 October 2026.

34. In its resolution 2753 (2024), the Security Council decided that the United Nations Assistance Mission in Somalia would be called the United Nations Transitional Assistance Mission in Somalia and that UNTMIS would continue to implement the UNSOM mandate and, at the same time, begin the formal transition of its functions to the Federal Government of Somalia, the United Nations country team and other stakeholders from 1 November 2024. The Council expressed its intention, informed by conditions on the ground, to terminate the mandate of UNTMIS at the end of the anticipated two-phased transition, by 31 October 2026.

35. The Security Council further decided that the first phase of the transition, covering seven tasks specified in resolution 2753 (2024), would run from 1 November 2024 to 31 October 2025. During this phase, UNTMIS would continue the tasks mandated to UNSOM by the Council in its resolutions 2158 (2014), 2592 (2021) and, most recently, 2705 (2023). The first phase of the transition would be completed by 31 October 2025. The Council further requested the Secretary-General to prepare, in consultation with the Federal Government of Somalia, a road map (see S/2025/194) for delivering the first phase of the transition of the Mission's tasks to the Federal Government of Somalia, the United Nations country team and other stakeholders, including the practical modalities for the transition, such as the reduction in UNTMIS personnel. The Council also requested the Secretary-General to update it on the situation regarding Somalia and on progress made in the implementation of the transition plan, through two written reports. The first report, together with the aforementioned road map for the first phase of the transition, was submitted on 28 March 2025. The second report is due by 30 September 2025. Informed by the reporting of the Secretary-General, the Council will review the progress of the UNTMIS transition by 31 October 2025 to support decision-making on timelines for the handover of the remaining tasks of UNTMIS during the second phase of its transition.

36. In its resolution 2753 (2024), the Security Council requested UNTMIS to maintain a presence, as appropriate, across Somalia to deliver its transition mandate, in coordination with the Federal Government of Somalia and federal member states, and to ensure strong cooperation with Somalia and the African Union, as the security situation allowed.

Programme of work

Objective

37. The objective, to which UNTMIS contributes, is to the advancement of the Federal Government of Somalia's key national state-building and development priorities, while implementing a phased and gradual transition of its functions to the Federal Government of Somalia, the United Nations country team and other stakeholders through the delivery of its mandate established by the Security Council and in line with the priorities of the Federal Government.

Strategy and external factors for 2026

38. To contribute to the objective, in line with the transition priorities set out in Security Council resolution 2753 (2024), UNTMIS will:

(a) Provide support to state-building, including the constitutional review process and efforts to conduct free and fair elections, through inclusive and transparent one-person, one-vote processes, including through capacity-building, technical assistance and policy guidance and the facilitation of dialogue to promote reconciliation;

(b) Advance the promotion and protection of human rights, including through institutional and human capacity-building, technical assistance and policy guidance;

(c) Provide support to United Nations entities in the country to ensure system-wide implementation of the human rights due diligence policy, where relevant;

(d) Strengthen rule of law, justice and corrections and security sector support, including through capacity-building and technical assistance;

(e) Ensure coordination of international donor support, working with bilateral and multilateral partners, including to assist authorities in delivering basic services and community reconciliation, including in areas newly recovered from Al-Shabaab;

(f) Coordinate United Nations efforts in relevant areas in Somalia;

(g) Coordinate with the African Union Support and Stabilization Mission in Somalia (AUSSOM), with a view to the progressive and phased transfer of these tasks, and complete the handover of any other outstanding tasks by 31 October 2026;

(h) Facilitate and coordinate with the Federal Government of Somalia and the United Nations country team, as well as all relevant stakeholders, on finalization of the transition, including the handover of residual substantive tasks and the closure of the Mission.

39. The above-mentioned work is expected to result in:

(a) Progress on national priorities on inclusive political processes, security, the rule of law, human rights and economic and social development in line with the objectives in the United Nations Sustainable Development Cooperation Framework for the period 2026–2030, aligned to the Somalia national transformation plan and its Centennial Vision 2060;

(b) Successful transition and closure of the Mission through the handover of its remaining tasks to the Federal Government of Somalia, the United Nations country team and other stakeholders, retaining the gains made by the Mission since its establishment.

40. With regard to cooperation with other entities, UNTMIS will continue its close coordination with AUSSOM. It will continue to ensure compliance with the human rights due diligence policy on United Nations support to non-United Nations security forces with regard to United Nations support that may be provided to any non-United Nations entities in Somalia.

41. With regard to inter-agency coordination and liaison, UNTMIS will continue to collaborate with United Nations agencies, funds and programmes in Somalia, in particular as regards preparations for the eventual handover of tasks associated with the second phase of the transition. This includes identified mandated activities undertaken through programmes and advancing implementation of the priorities outlined in the United Nations Sustainable Development Cooperation Framework in support of the national transformation plan and Centennial Vision 2060.

42. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The Federal Government of Somalia and federal member states would have resumed inclusive dialogue and reached political consensus on advancing state-building priorities;

(b) The constitutional review process will have advanced;

(c) The Federal Government of Somalia and federal member states (Puntland and Jubbaland) would have resumed dialogue and reached political agreements on advancing state-building priorities;

(d) Somalia will continue to progressively assume responsibility for security, with the Federal Government of Somalia and federal member states making progress towards building able, accountable, acceptable and affordable security institutions as outlined in the Constitution, the national security architecture and the security sector development plan;

(e) Human rights violations by parties to the conflict will remain a concern;

(f) Al-Shabaab will remain the greatest threat to security and stability in Somalia, followed by clan violence and localized disputes, and young Somalis will remain vulnerable to radicalization and recruitment by extremist groups, in particular Al-Shabaab;

(g) Women and girls will continue to be disproportionately affected by inequality, sexual violence, violations of international humanitarian law and violations and abuses of human rights;

(h) The risk of discrimination and exclusion facing minorities, marginalized communities and internally displaced persons will persist;

(i) Freedom of expression and civic space will face challenges and the risk of human rights violations and protection risks to civilians will persist;

(j) The United Nations presence in Somalia in 2026 will remain dependent on adequate security arrangements acceptable under the established United Nations security management system;

(k) Availability of sufficient resources and capacities within the identified counterparts in the Federal Government of Somalia, the United Nations country team and other stakeholders to enable timely assumption of identified tasks from UNTMIS will remain a concern for the successful transition of the Mission.

43. UNTMIS integrates a gender perspective into its activities, deliverables and results, as appropriate, including support for the increased protection of women and girls, as well as the full, equal, meaningful and safe participation and representation of women in the political sphere, economic life and reconciliation and peacebuilding efforts.

44. In line with the United Nations Disability Inclusion Strategy, UNTMIS, in partnership with the United Nations Support Office in Somalia (UNSOS), developed a joint action plan for the period 2023–2025, which will conclude in December 2025. In 2026, the Mission will continue to undertake activities that are applicable specifically to them, whereas the work that has been led by the Mission will be handed over to the United Nations country team after 31 October 2026.

Programme performance in 2024

Disability inclusion in Somalia

45. On 31 July 2024, the House of the People of the Federal Parliament of Somalia approved the disability rights protection bill, which was later passed by the Upper House of the Federal Parliament of Somalia on 28 October 2024. The bill was signed into law on 2 December 2024.

46. From 2023 and throughout 2024, the Mission supported the Federal Ministry of Women and Human Rights Development and the National Disability Agency in developing the disability rights protection bill. The support included technical and legal advice and capacity-building. During that work, the Mission collaborated closely with the Agency and civil society organizations dedicated to promoting the rights of persons with disabilities. This marked an important milestone in the incorporation into national legislation of the Convention on the Rights of Persons with Disabilities, ratified by Somalia in August 2019.

47. Progress towards the objective is presented in the performance measure below (see table 9).

Table 9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Federal Ministry of Women and Human Rights Development and the National Disability Agency developed the disability rights protection bill, which the Federal Cabinet unanimously approved on 27 July 2023	Somalia made incremental progress towards the adoption of the disability rights protection bill to ensure the incorporation into national legislation of the Convention on the Rights of Persons with Disabilities
	The Agency and organizations of persons with disabilities completed a comprehensive, nationwide disability survey, which informed policymakers about the perceptions and priorities of persons with disabilities and to what extent they participate in public life	The National Disability Agency and related organizations working on disability rights undertook efforts to increase their capacity. For example, the Somali National Association of the Deaf was supported in its Somalia-wide consultation on codification of Somali sign language, which is under review by the Federal Ministry of Education, Culture and Higher Education. With respect to disability inclusion in disaster preparedness, a group of organizations of persons with disabilities participated in a train-the-trainers programme and were supported in training other organizations of persons with disabilities, climate activists and trade unions on disability inclusion in climate justice, resulting in a review of Somalia's nationally determined contributions
	Support extended to a larger number of organizations of persons with disabilities, such as the Somali Youth Organization for the Visually Impaired	

Planned results for 2026

Result 1: resolution of outstanding issues of federalization through Federal Government and federal member state dialogue, enabling progress on the constitutional review and other State building objectives

Programme performance in 2024 and target for 2026

48. In 2024, UNTMIS contributed, through technical assistance, to the constitutional review process and the passing of election-enabling legislation, which met in part the planned target of paving the way for one-person, one-vote district, state and national elections, given that Jubbaland and Puntland States remained outside the process. The Mission supported the convening of three National Consultative Council meetings of the Federal Government of Somalia and federal member states leadership to advance national priorities, including through agreement on aspects of the constitutional review process, the fight against Al-Shabaab and proposals for the electoral calendar at the national and subnational levels. The Mission supported the Office of the Prime Minister in ensuring the integration of a gender perspective and inclusion of women into the Council processes. The Mission also supported the capacity-building of parliamentarians to strengthen their participation in the constitutional review process, including the harmonization of federal and state-level constitutions and rules of procedure for the parliamentary process. In addition, the Mission further increased its support for the development of the security sector, including advancing the implementation of the national security architecture, which is central to the federalization of security.

49. Until 31 October 2026, the Mission will prioritize its support for national partners in creating an enabling environment for consultations and the operationalization of an inclusive Somali-owned constitutional review process. It will also exercise its good offices and provide technical support to foster political agreements on contentious issues relating to the constitutional framework.

50. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 10).

Table 10
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Federal Government of Somalia convened the National Consultative Council three times (without Puntland), covering priority areas, including security/ fight against Al-Shabaab, elections, stabilization, constitutional review and power-sharing Technical work between the Federal Government of Somalia and federal member states in preparation for or follow-up to meetings of the National Consultative Council (or an equivalent platform) progressed and included women	Federal and state-level leaders engaged in dialogue on key issues except for Puntland and Jubbaland (withdrew in October 2024); remaining National Consultative Council members achieved agreement on some federalization and state-building objectives Contentious issues relating to federalization and state-building at the federal and state levels were not resolved, with Jubbaland joining Puntland in rejecting constitutional amendments	Federal and state level leaders agree on progress towards implementation of national state-building priorities Consultations take place as part of the constitutional review process inclusive of diverse perspectives of women, youth and marginalized groups' representatives Agreement on the constitutional review process and a timetable for constitution	Peaceful transition of power takes place through an electoral process that is agreed upon by the Federal Government of Somalia and all federal member state leaders and implemented across the country Inclusive consultations on the constitutional review process undertaken Constitutional review process is advanced significantly, with fewer contentious issues remaining

Result 2: strengthened priority capabilities of Somali rule of law and security institutions at the federal and state levels

Programme performance in 2024 and target for 2026

51. In 2024, the Mission contributed to strengthening Somali's rule of law and security institutions at the federal and state levels through strategic policy advice, capacity-building initiatives, technical support and enhanced coordination. The first phase of the joint police programme highlighted the need for stronger coordination with national and international partners. To ensure a smooth transition, United Nations police will collaborate more closely with the United Nations Development Programme (UNDP) in implementing the second phase.

52. Until 31 October 2026, the Mission will continue to support Somalia's rule of law and security institutions through strategic, policy and technical advice, along with partner coordination. Key priorities include advancing the revised national security architecture, establishing a national security council and implementing the security sector development plan. The Mission will also support legal framework development for the rule of law and security governance, facilitate coordination on force generation, training and accountability, and contribute to a national maritime security strategy. In addition, capacity-building initiatives in 2026 will address barriers to women's professional development in the rule of law sector and promote gender sensitivity among decision makers. Further efforts will focus on having federated policing, justice and corrections models promote judicial independence, civilian oversight and accountability in order to enhance access to justice, in particular in fragile areas. Coordination with AUSSOM and national capacity development

will also be strengthened. These tasks will be handed over progressively to the appropriate national authorities and to the United Nations country team and international partners by 31 October 2026, in line with a transition road map to be agreed with the Federal Government of Somalia.

53. Progress towards the objective and the target for 2026, until 31 October, are presented in the performance measure below (see table 11).

Table 11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Capacities of accountable, affordable and able Somali security forces protecting the civilian population strengthened Strategic coordination between national and international stakeholders in the security sector strengthened Progress made on legislation to improve external civilian oversight over security forces Hirshabelle State Police Act enacted, and four police bills developed and consulted Partners coordination mechanism on maritime security established	Somali security sector development plan adopted and national security architecture revised Joint justice and corrections programme adopted Phase 2 of joint police programme designed Coordination of maritime security stakeholders strengthened National defector rehabilitation programme revised Baseline assessment of national counter-improvised explosive device framework conducted	Workstreams on defence, police, rule of law and public financial management established in part for the implementation of the security sector development plan Capacity-building of national institutions and implementation of the joint justice and corrections programme ongoing Jubbaland adopted the Somalia Police Force Act and the Federal Cabinet endorsed the Somali Police Force bill, pending parliamentary approval Phase 2 of the joint police programme under is implementation National defector rehabilitation programme is being implemented	Strengthened coordination with the AUSSOM successor mission on the security transition Technical support provided to strengthen Somali security institutions towards their full assumption of security responsibilities Support for the implementation of the security sector development plan and the revised national security architecture is coordinated with stakeholders, facilitating progress Independent judicial system is promoted through implementation of the next phase of the joint justice and corrections programme	Somali security sector governance improved through implementation of a federated national security architecture and enhanced capacity and affordability of relevant Federal Government of Somalia and federal member state institutions Legitimate judicial system is promoted through improved trust and service delivery, and greater independence Somali police capacity strengthened through enhanced Federal Government of Somalia and federal member state coordination and capacity-building Federal Government of Somalia and federal member state authorities' tools and capacities to lead the rule of law and security sector governance reform enhanced in line with an agreed transition road map

Result 3: strengthened electoral management and inclusive participation in the transition of Somalia to universal suffrage

Proposed programme plan for 2026

54. In 2026, Somalia will make the transition to universal suffrage elections at both the Federal and federal member state levels, including presidential and parliamentary elections. The success of these elections depends on the capacity of the National Independent Electoral and Boundaries Commission to administer, regulate and oversee the electoral process effectively.

55. A robust electoral legal framework, transparent electoral operations and meaningful stakeholder engagement are preconditions to ensure credible and inclusive elections. As Somalia moves forward in conducting universal suffrage elections, strengthening the National Independent Electoral and Boundaries Commission will be critical for public trust in the electoral process.

Lessons learned and planned change

56. The lesson for the Mission was that early targeted engagement with policymakers significantly enhanced its ability to deliver effective technical assistance. That approach raised awareness and deepened knowledge among key counterparts, resulting in a more informed and internationally aligned legal framework. It also highlighted the importance of coordinated stakeholder engagement in ensuring the alignment and adoption of the electoral legal framework, including temporary special measures and the 30 per cent women's quota.

57. In applying the lesson, the Mission will focus on providing technical support to the National Independent Electoral and Boundaries Commission during electoral operations across all stages of the electoral process, based on the Commission's identified needs. In addition, the Mission will work and coordinate closely with stakeholders to ensure timely resource mobilization and maintain coordinated support for Somalia's transition to direct elections at the federal and federal member state levels.

58. Progress towards the objective and the target for 2026, until 31 October, are presented in the performance measure below (see table 12).

Table 12
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
In May 2022, Somalia successfully conducted its presidential election	In May, the Federal Government of Somalia and member states reached a landmark agreement to implement a one-person, one-vote system, replacing the long-standing 4.5 clan-based formula In June, Puntland conducted district council elections using direct universal suffrage, marking Somalia's first such elections since 1969	In 2024, the National Consultative Council (although without the participation of Puntland) adopted the universal election plans Federal Parliament passed electoral-related constitutional amendments, followed by the adoption of three election-related laws in November Commissioners of the newly established National Independent Electoral and	Capacity-building initiatives tailored to the operational needs of the National Independent Electoral and Boundaries Commission, with a focus on electoral processes The Commission receives technical and advisory support for election management, including planning, legal framework implementation and the conduct of district elections	National Independent Electoral and Boundaries Commission receives technical support for successful election management at the federal and state levels Implementation of electoral laws, including provisions for women's representation; support for enforcing the 30 per cent gender quota in registration and seat allocation

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
		Boundaries Commission appointed in December	Strengthened coordination among international partners and United Nations entities for electoral assistance activities and resource mobilization for Somali elections	Strengthened cooperation among National Independent Electoral and Boundaries Commission, donors and electoral partners UNTMIS support to the Federal Government of Somalia and federal member states related to this result area is successfully completed by 31 October 2026

Deliverables

59. Table 13 lists all deliverables of the Mission. All mandated activities will be implemented in line with the two-phased transition of the Mission's functions to the Federal Government of Somalia, the United Nations country team and other stakeholders by 31 October 2026. Liquidation-related activities will be undertaken by 31 December 2026.

Table 13
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**4**	**3**	**2**	**2**
1. Reports of the Secretary-General for the Security Council	4	3	2	2
Substantive servicing of meetings (number of three-hour meetings)	**4**	**3**	**3**	**2**
2. Meetings of the Security Council	4	3	3	2
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**–**	**4**	**4**	**3**
3. Joint programmes on state-building and reconciliation support, joint justice and corrections, human rights and electoral support programme	–	4	4	3
Seminars, workshops and training events (number of days)	**187**	**243**	**173**	**138**
4. Seminars to support the implementation of laws promoting the rights of children	6	6	6	4
5. Seminars on the coordination and implementation of federated political agreements on rule of law and on rightsizing the Somali security forces, in alignment with the transition of security functions	4	–	1	1
6. Seminars on security and justice-focused public expenditure	2	4	2	2
7. Workshops on addressing conflict-related sexual violence (protection of women)	8	8	8	6

9. Thematic workshops on human rights issues with civil society, such as those dealing with minorities, people with disabilities, women and children, civil society engagement and basic human rights obligations, and on monitoring and reporting on the human rights performance of Somali security forces and their ability to foster trust and confidence in communities	14	14	14	11

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
10. Workshops for the country task force on monitoring and reporting on violations against children, including children and armed conflict	12	12	12	10
11. Workshops on advocating and capacity-building to establish an affordable justice system and the roll-out of the federated justice and corrections model	16	17	15	12
12. Workshops to enhance the capacity of the custodial corps and other prison stakeholders on corrections system development and prison management	16	17	15	12
13. Workshops on civilian oversight of security institutions	5	9	5	4
14. Workshops on implementation of maritime priorities in accordance with the Somali national maritime security strategy and blue economy strategy, strengthening legislation and opportunities for women based on the women in the maritime sector strategy	5	17	8	6
15. Workshops to support institutional capacity-building towards the implementation of the national security architecture and the Somalia security sector development plan	6	16	6	5
16. Workshops, training and capacity-building support for the implementation of the stabilization analytical tools	7	14	5	5
17. Training on protection of civilians	12	12	12	10
18. Workshops on prevention of and response to electoral violence against women leaders	2	–	–	–
19. Workshops/seminars/training activities in journalism, social media and coverage of election campaigns	16	39	20	10
20. Workshops, seminars and capacity-building activities for police personnel from both the Federal Government of Somalia and federal member states on implementing the Somalia security development plan and new policing model, in alignment with the transition of security functions	16	19	14	12
21. Workshops, seminars or capacity-building/training events in support of relevant government institutions at the federal and state levels on inclusive politics	5	4	5	4
22. Workshops, seminars or capacity-building/training events on peacebuilding, mediation and conflict resolution	5	3	5	4
23. Workshops, seminars or capacity-building/training events on the constitutional review process	5	6	5	4
24. Workshops to build the capacity of civil society for monitoring and reporting on the human rights performance of Somali security forces and their ability to foster trust and confidence in communities, including with regard to conflict-related sexual violence	4	4	4	3
25. Consultations with and workshops/working sessions on mediation, reconciliation, negotiation and policy dialogues for women civil society leaders and women members of Parliament and senators	15	16	4	4
26. Workshop in support of national transformation plan coordination architecture	–	–	1	1
27. Workshop with the Federal Government of Somalia and federal member states to enhance awareness and increase women’s participation in the rule of law/justice sector	–	–	–	4
Publications (number of publications)	**1**	**1**	**3**	**1**
28. Human Rights and Protection Group reports on freedom of expression and/or protection of civilians in Somalia’s conflict-related sexual violence and cultural rights in Somalia	1	1	2	1
29. Study on Somali women’s experience and aspirations in peace and politics in the country	–	–	1	–
Fact-finding, monitoring and investigation missions (number of missions)	**9**	**18**	**9**	**7**
30. Human rights monitoring, reporting and investigations, including conflict-related sexual violence and children and armed conflict, monitoring of and follow-up on incidents involving security forces supported by the United Nations, through the human rights due diligence policy	9	18	9	7

C. Substantive deliverables

Good offices: provide support to the Federal Government of Somalia, the federal member states and other stakeholders in advancing the national priorities, including concrete movement towards the conclusion of the constitutional review process, enhanced women's meaningful participation and representation in decision-making processes, elections, peacebuilding, implementation of the national security architecture and political processes towards the 2026 elections; and provide support to Somali stakeholders in addressing clan and localized conflicts, including in recently recovered areas.

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

Consultation, advice and advocacy: consultations with civil society on deepening federalism, the constitutional review process, local conflict management and resolution and the national reconciliation process; advice on drafting the revised constitution; strategic and technical advice on the implementation of the electoral legal framework and operational planning for the 2026 federal and federal member state elections; provision of technical and advisory support to the National Independent Electoral and Boundaries Commission on women's leadership for the planned electoral processes, including registration, results and seat allocation and participation in political leadership roles in other governance institutions; advice on the compliance of national legislation with international human rights law, including policies addressing sexual violence in conflict and children in armed conflict; advice and advocacy to strengthen the national protection framework and institutionalize accountability mechanisms on the implementation of human rights commitments, on recommendations emerging from the human rights universal periodic review process, on human rights due diligence assessments and on addressing violations committed by international, national and government-affiliated forces; advice on security sector legislation and budgetary measures, including the sustainable financial management of the security sector; consultations on the legal framework to implement the national security architecture; advocacy for increased joint planning between security forces and stabilization actors in recovered areas and link to more development-oriented services; strategic advice and advocacy towards the establishment of independent and accountable security and rule of law institutions; and enhancement of the Somali maritime administration and women in the maritime sector.

D. Communication deliverables

Outreach: continuation of two long-term strategic messaging campaigns targeting Somali audiences communicating on the work of UNTMIS in the last phase of ensuring the transition of its functions, tied into the planned one-person, one-vote elections, on the value of democratization processes and importance of electoral participation by the general public; and the Strategic Communications and Public Affairs Group will support efforts of the United Nations Communications Group to harmonize the United Nations joint messaging campaigns, as well as the coordination of United Nations family outreach events with the United Nations agencies, funds and programmes.

External and media relations: reinforcement of working relationships with Somali and international media to help to ensure a better understanding of the work of UNTMIS and the transitional process and, more broadly, the work of the United Nations in Somalia; continued support for the development of the Somali communications sector, through capacity-building programmes for the media and government communications offices, at both the national and subnational levels; and the organization of at least two press conferences for United Nations leadership and arrangement of interviews and other media coverage with United Nations officials, as required.

Digital platforms and multimedia content: four digital platforms (social and digital media) that produce multilingual and multimedia content, with at least 200 items (including cards, infographics and videos) for dissemination on social media and online channels; for traditional platforms, production of Somali-language radio programming, with at least 30 episodes of the "Path to peace" programme and, as required, awareness-raising campaigns aligned with United Nations transition priorities, targeting Somali audiences; a series of radio programmes on high-priority topics on an ad hoc basis; four English-language UNTMIS quarterly updates, aimed at Somali government partners, international partners and donors; and digital newsletters highlighting the work of the United Nations.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

[a] One position is funded at 50 per cent and cost-shared with the Development Coordination Office

60. The proposed resource requirements for 2026 for the Mission amount to $97,616,400 (net of staff assessment) and would provide for: (a) the deployment of 625 United Nations Guard Unit personnel for 10 months and 12 United Nations police personnel for 10 months ($15,009,700); (b) salaries and related costs ($51,714,400) for 157 international posts (1 Under-Secretary-General, 2 Assistant Secretary-General, 7 D-1, 26 P-5, 41 P-4, 30 P-3 and 50 Field Service), 129 national posts (84 National Professional Officer and 45 Local level) and 17 United Nations Volunteers (13 international and 4 national) until 31 October 2026; (c) the deployment of 20 government-provided personnel until 31 October 2026; (d) salaries and related costs for 8 international posts (2 D-1, 1 P-5, 3 P-4 and 2 Field Service), which will compose the Mission's liquidation team for the period from 1 November to 31 December 2026; and (e) operational costs ($30,892,300), comprising the costs for consultants and consulting services ($499,700), official travel ($690,300), facilities and infrastructure ($11,689,300), ground transportation ($1,040,200), air operations ($6,438,900), communications and information technology ($3,628,700), medical ($1,114,200) and other supplies, services and equipment ($5,791,000).

61. The proposed resources under salaries and other costs also include a provision of $17,464,300 for payments due to staff members at the time of separation from service. The provision comprises estimated termination indemnity ($6,586,300), repatriation grants ($5,042,000), relocation grants ($1,778,000), accrued annual leave for international and national staff ($3,692,600) and travel expenses to cover the repatriation of international staff ($365,400).

62. The resources under operational costs also include a provision of $3.8 million as the reimbursement for the logistical support package received from UNSOS, in line with paragraph 5 (a) of Security Council resolution 2741 (2024), in which the Council stipulated that such a support package would be on a cost-recovery basis. On the basis of a comprehensive analysis of workload statistics, specific to various functions in UNSOS, it was estimated that an amount of $3,855,000 (net of staff assessment) should be cost-recovered from UNTMIS in 2026 for the logistical support package. This will be duly taken into account in the upcoming proposed budget for UNSOS for the period from 1 July 2026 to 30 June 2027.

63. Vacancy rates of zero per cent have been applied to the estimates for military contingents and a rate of 41.7 per cent has been applied for United Nations police, 17.0 per cent for international staff, 15.6 per cent for National Professional Officers, 17.8 per cent for Local level posts based on the actual vacancy rates as at 31 March 2025, and 55.0 per cent for government-provided personnel based on the actual average vacancy rate during 2024. Vacancy rates of 27.0 and 75.0 per cent have been applied to the estimates for international United Nations Volunteers and national United Nations Volunteers, respectively, based on the planned deployment.

64. In preparation for the liquidation, it is proposed that nine posts (5 P-4, 2 P-3 and 2 Field Service) and two international United Nations volunteer positions be abolished effective 1 January 2026, as follows:

(a) Corrections Officer (P-4) in the Justice and Corrections Section;

(b) United Nations Police Officer (P-4) in the Police Section;

(c) Electoral Officer (P-4) in the Integrated Electoral Support Group;

(d) Mission Planning (P-4) Officer in the regional liaison offices;

(e) Political Affairs Officer (P-4) in the Political Affairs and Mediation Group;

(f) Political Affairs Officer (P-3) in the Political Affairs and Mediation Group;

(g) Electoral Officer (P-3) in the Integrated Electoral Support Group;

(h) Two posts of Administrative Assistants (Field Service) in the regional liaison offices;

(i) Judicial Affairs Officer (international United Nations Volunteer) in the Justice and Corrections Section;

(j) Security Sector Reform Officer (international United Nations Volunteer) in the Security Sector Reform Section.

65. During 2026, the Mission will progress in its second phase of transition in accordance with the provisions of Security Council resolution 2753 (2024), and it is planned that it will separate the remaining staffing complement, except for eight international posts (2 D-1, 1 P-5, 3 P-4 and 2 Field Service) that will constitute the UNTMIS liquidation team for the period from 1 November to 31 December 2026. During this period, the team will focus on the residual activities related to liaising with the United Nations agencies, funds and programmes on possible challenges and capacity gaps related to the handover of UNTMIS tasks, as well as the closure of open administrative items in finance and budget in coordination with United Nations Headquarters.

66. For military and police personnel and government-provided personnel, it is planned that 20 government-provided personnel and 12 United Nations police officers will be repatriated, and relevant government-provided personnel positions are to be abolished as from 31 October 2026. In addition, the United Nations Guard Unit personnel are also to be repatriated as from 31 October 2026.

67. The decrease in requirements for 2026 compared with the appropriation for 2025 is attributable primarily to the cease of mandated activities and planned repatriation of all the military and police and the majority of the civilian personnel and the closure and handover of the Mission’s locations by 31 October 2026. The reduced requirements are offset in part by estimated payments in the amount of $17,464,300 due to staff members at the time of separation from service.

3. United Nations Regional Centre for Preventive Diplomacy for Central Asia

($3,458,800)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

68. The United Nations Regional Centre for Preventive Diplomacy for Central Asia is responsible for supporting national authorities in identifying and addressing threats to regional peace and security. The open-ended mandate was defined through an exchange of letters between the Secretary-General and the President of the Security Council (S/2007/279 and S/2007/280). The mission plays a central role in preventive diplomacy in Central Asia and provides a platform for regional dialogue on the pressing challenges to security and stability.

69. The main function of the Regional Centre is to strengthen United Nations capacity for conflict prevention in Central Asia through liaison with the Governments and, with their concurrence, engaging with the parties concerned on promoting preventive diplomacy; monitoring and analysing the situation on the ground, providing the Secretary-General with updates relating to conflict prevention; maintaining contact with regional organizations, encouraging their peacemaking efforts and facilitating coordination and information exchange, with due regard to their specific mandates; providing a political framework and leadership for preventive activities of the United Nations country teams and supporting efforts of the resident coordinators and representatives of the United Nations system in promoting an integrated approach to preventive diplomacy and humanitarian assistance; and maintaining close contact with the United Nations Assistance Mission in Afghanistan to ensure a comprehensive analysis of the situation in the wider region.

70. The Regional Centre's current work is guided by a five-year programme of action for the period 2021–2025, which was adopted at the annual meeting of deputy ministers for foreign affairs in December 2020. A new programme of action, for the period 2026–2030, will be adopted at the end of 2025.

Programme of work

Objective

71. The objective, to which this mission contributes, is to enhance regional security and stability in Central Asia.

Strategy and external factors for 2026

72. To contribute to the objective, the mission will:

(a) Carry out good offices functions for preventive diplomacy in Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan, as well as monitor and analyse regional developments, while maintaining contact with regional organizations and other parts of the United Nations system;

(b) Organize an annual meeting of deputy ministers of foreign affairs of Central Asia and convene expert forums to advise the annual consultative meetings of the Central Asian Heads of State. The Regional Centre will also promote political participation of women through the

engagement of senior women political leaders in the Central Asia Women Leaders' Caucus regional platform;

(c) Promote arrangements on transboundary water management in the region, support initiatives and dialogue on water, energy and environmental and climate cooperation, and help to address challenges relating to transboundary water and climate change;

(d) Implement the joint project with the Office of Counter-Terrorism on the basis of the most recent joint plan of action for the implementation of the United Nations Global Counter-Terrorism Strategy in Central Asia. In addition, through the Preventive Diplomacy Academy project, the Regional Centre will continue its efforts to engage young people;

(e) Support the Central Asian States in addressing emerging threats to security and stability, as well as the other external risk factors, including the complex situation in Afghanistan and developments regarding the construction of the Qush Tepa canal.

73. The above-mentioned work is expected to result in:

(a) Improved regional cooperation in addressing transnational threats of terrorism, violent extremism conducive to terrorism, drug trafficking and organized crime, as well as coping with regional challenges concerning the management of water resources and climate change; and

(b) Political will to sustain the progress of the Governments of the Central Asian States regarding deeper engagements in promoting peace and stability through enhanced cooperation and trust-building in the region, including on high-level platforms such as the consultative meeting of Heads of State.

74. With regard to cooperation with other entities, the mission maintains contact with the Commonwealth of Independent States, the European Union, the Organization for Security and Cooperation in Europe and the Shanghai Cooperation Organization, as well as other organizations, such as the International Fund for Saving the Aral Sea. The Regional Centre continues exchanges with the Conference on Interaction and Confidence-building Measures in Asia and the Collective Security Treaty Organization on topics of common interest. It cooperates with relevant actors, including international financial institutions such as the World Bank.

75. With regard to inter-agency coordination, the Regional Centre cooperates closely with the resident coordinators in the five countries, the Development Coordination Office and the entities represented in the United Nations country teams, including UNDP, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), UNODC, the Office of Counter-Terrorism, the United Nations Educational, Scientific and Cultural Organization, the Economic Commission for Europe and the Economic and Social Commission for Asia and the Pacific. The mission regularly shares information and coordinates activities with the United Nations Assistance Mission in Afghanistan.

76. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The continued commitment by five Governments of the region to preventive diplomacy and regional cooperation;

(b) The five countries of the region continue to monitor developments in Afghanistan and enhance preparedness to potential threats and risks of violent extremism and terrorism, drug trafficking and a potential humanitarian crisis. They continue to provide and advocate for humanitarian assistance to Afghanistan.

77. The Regional Centre integrates a gender perspective into operational and programmatic activities, deliverables and results, as appropriate. It encourages the countries to ensure gender balance in their delegations and include gender-related issues in the agendas of regional expert-level workshops on preventive diplomacy and confidence-building for the States' officials.

Programme performance in 2024

Constructive and strengthened relations among the Central Asian States in specific areas

78. The Regional Centre contributed to regional security and stability through continuous engagement with five Member States on issues of shared concern for the region, including the potential impact of the situation in Afghanistan on water and climate in the region. In 2024, the Counter-Terrorism Early Warning Network for Central Asia was operationalized, contributing to improved exchange of information and coordination among various national and regional entities. The Central Asia Regional Expert Council on Rehabilitation and Reintegration of Returnees from Conflict Zones was launched. The Central Asia Women Leaders' Caucus has strengthened its engagement on the situation of women and girls in Afghanistan. The mission continued to promote the youth, peace and security agenda by strengthening the regional alumni network of the Preventive Diplomacy Academy participants and advancing the dialogue between young people and governments.

79. Progress towards the objective is presented in the performance measure below (see table 16).

Table 16
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Enhanced regional security and stability in Central Asia through more inclusive and open discussions and new initiatives of the countries of the region and the Regional Centre	Strengthened regional cooperation in Central Asia, initiatives promoting peace and trust in the region and more inclusive regional platforms to discuss issues of shared concern	Strengthened regional cooperation in Central Asia, with initiatives that promote peace and trust in the region and more inclusive regional platforms to exchange information and best practices, and the development of recommendations on issues of mutual concern

Planned result for 2026

Enhanced regional interaction in Central Asia to address current and emerging risks and threats to peace and security

Programme performance in 2024 and target for 2026

80. In 2024, the mission contributed to enhanced regional security and stability in Central Asia through preventive diplomacy by supporting action to promote trust and cooperation in the region through more inclusive dialogue and partnerships, which met the planned target.

Lessons learned and planned change

81. The in-person exchanges among counterparts gained meaningful outcomes. In applying the lesson, the mission will strive to conduct meetings and support regional platforms such as the International Fund for Saving the Aral Sea, including participation in various regional events.

82. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 17).

Table 17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced regional security and stability in Central Asia by promoting peace and trust in the region through inclusive and open discussions and new initiatives of the States of the region and the Regional Centre	Enhanced regional interaction in Central Asia to address threats to peace and security through initiatives aimed at promoting peace and trust and inclusive regional platforms	Regional Centre contributed to an enhancement of regional interaction in Central Asia to address threats to regional peace and security through initiatives aimed at promoting peace and trust and creating inclusive regional platforms	Strengthened regional peace and security in the Central Asian States through enhanced partnerships, dialogue and trust-building on the basis of the countries' needs and initiatives	Deeper engagement in the Central Asian States through enhanced partnerships, dialogue in promoting peace and stability, and cooperation and trust-building in the region, including on high-level platforms such as the Central Asia Women Leaders' Caucus and meetings of deputy foreign ministers

Deliverables

83. Table 18 lists all deliverables of the mission.

Table 18
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**2**	**2**	**2**	**2**
1. Meetings of the Security Council	2	2	2	2
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**3**	**3**	**3**	**3**
2. Workshops on preventive diplomacy and confidence-building	3	3	3	3
C. Substantive deliverables				
Good offices: provision of good offices on issues relating to preventive diplomacy, such as water, energy, environmental and climate cooperation, drug trafficking and counter-terrorism.				
Consultation, advice and advocacy: consultations on political and security developments in the region and to seek areas for closer cooperation, including the organization of annual meeting of deputy ministers for foreign affairs of the Central Asian States; and consultations and advice on implementing the Joint Plan of Action for the United Nations Global Counter-Terrorism Strategy in Central Asia.				
D. Communication deliverables				
Outreach programmes, special events and information materials: presentations on the Regional Centre's role and activities in the region are given to various audiences, including State officials, academia and the diplomatic community; and brochures and information kits on the activities of the mission are regularly updated.				
External and media relations: lectures, presentations, press conferences and press releases on the activities of the mission.				
Digital platforms and multimedia content: dissemination of information through the mission's website, including matrix of activities on counter-terrorism and preventing extremism.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 19
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*
Category of expenditure	*(1)*	*(2)*	*(3)*	*(4)*	*(5)=(4)-(3)*
Military and police personnel	–	–	–	–	–
Civilian personnel	2 466.2	2 723.2	2 807.7	2 711.2	(96.5)
Operational costs	767.0	499.1	748.0	747.6	(0.4)
Total (net of staff assessment)	**3 233.2**	**3 222.3**	**3 555.7**	**3 458.8**	**(96.9)**

Table 20
Human resources

	International staff										*National staff*				*United Nations Volunteers*			
	USG	*ASG*	*D-2*	*D-1*	*P-5*	*P-4*	*P-3*	*P-2*	*FS*	*Subtotal*	*NPO*	*GS*	*LL*	*Subtotal*	*International*	*National*	*Subtotal*	*Total*
Approved 2025	–	1	–	–	1	2	2	–	2	8	4	–	18	22	–	–	–	30
Proposed 2026	–	1	–	–	1	2	2	–	2	8	4	–	18	22	–	–	–	30
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

84. The proposed resource requirements for 2026 for the Regional Centre amount to $3,458,800 (net of staff assessment) and would provide for salaries and common staff costs $2,711,200 for the continuation of 30 posts (1 Assistant Secretary-General, 1 P-5, 2 P-4, 2 P-3, 2 Field Service, 4 National Professional Officer and 18 Local level), as well as operational costs of $747,600, comprising the costs for consultants and consulting services ($16,800), official travel ($230,100), facilities and infrastructure ($90,800), ground transportation ($29,100), communications and information technology ($211,800), medical supplies ($2,100) and other supplies, services and equipment ($166,900).

85. For 2026, no change is proposed to the number and levels of the posts. A vacancy rate of zero per cent has been applied to the estimates for international staff and National Professional Officers on the basis of the actual average vacancy rates in 2024, and a vacancy rate of zero per cent has been applied to the estimates for Local level staff, taking into account the actual vacancy rates in March 2025.

86. The decrease in requirements for 2026 compared with the appropriation for 2025 is attributable primarily to: (a) decreased requirements for international staff due to lower estimated common staff costs (estimated common staff costs as a percentage of salary costs of 42.0 per cent, compared with 51.5 per cent in the 2025 budget) based on past expenditure; and (b) decreased requirements for facilities and infrastructure and communications and information technology, due to the lower acquisition of furniture and equipment, including communications and information technology equipment. The decreased requirements are offset in part by: (a) increased requirements for national staff due primarily to higher estimated higher common staff costs for Local level staff (estimated common staff costs as a percentage of salary costs of 37.0 per cent, compared with 32.7 per cent in the 2025 budget); and (b) increased requirements under the other supplies, services and equipment

class of expenditure for individual contractual services to support mandated priorities in the area of preventive diplomacy related to young people, peace and security, in particular the Preventive Diplomacy Academy initiative in Central Asia.

Extrabudgetary resources

87. In 2025, extrabudgetary resources in the amount of $248,000 were projected for the project for Central Asian regional cooperation on transboundary water management, with an updated scope of activities, and for support for the Central Asia Women Leaders' Caucus to provide influential leadership on the issues pertaining to gender equality, woman and peace and security and women's empowerment within and among the countries of the region. Many of the meetings were held in a hybrid format.

88. In 2026, extrabudgetary resources in the amount of $185,000 are projected, to continue to support the Central Asia Women Leaders' Caucus in providing influential leadership on women's engagement in the countries of the region, as well as activities under the preventive diplomacy academy project, and the Centre's strategy in support of water, energy and environmental and climate cooperation in the region for the period 2026–2030.

89. The increase in the estimates projected for 2026 compared with the estimates for 2025 is attributable primarily to the increased travel requirements for in-person and hybrid-format meetings.

4. United Nations support for the Cameroon-Nigeria Mixed Commission

($3,706,400)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

90. The Cameroon-Nigeria Mixed Commission is responsible for facilitating the implementation of the judgment of the International Court of Justice of 10 October 2002 on the Cameroon-Nigeria boundary and territorial dispute. Its mandate includes supporting the demarcation of the land boundary and the delineation of the maritime boundary; facilitating the withdrawal of troops and transfer of authority in identified areas along the boundary; addressing the situation of the border populations affected by the demarcation process; and making recommendations on confidence-building measures to support them.

91. The current mandate of the United Nations support team to the Cameroon-Nigeria Mixed Commission derives from the exchange of letters between the Secretary-General and the President of the Security Council (S/2017/78 and S/2017/79) and subsequent exchanges of letters, including, most recently, S/2025/14 and S/2025/15. The mandate is open-ended.

Programme of work

Objective

92. The objective, to which this mission contributes, is to achieve an orderly and peaceful implementation of the judgment of 10 October 2002 of the International Court of Justice delineating the course of the land and maritime boundary between Cameroon and Nigeria.

Strategy and external factors for 2026

93. To contribute to the objective, the mission will:

(a) Support the parties in constructing the remaining boundary pillars along the land boundary;

(b) Produce the final maps of the land boundary;

(c) Organize meetings of the drafting committee to finalize a boundary statement at the conclusion of the final mapping;

(d) Regularly monitor the situation of populations affected by the demarcation and promote cross-border development projects as confidence-building measures, including livelihood support, access to potable water, capacity-building, green energy and security;

(e) Continue fundraising efforts among international donors and multilateral partners to finance the confidence-building projects for populations affected by the demarcation;

(f) Enhance subregional cooperation and good practices in the management of international boundaries by disseminating lessons learned from the Mixed Commission.

94. The above-mentioned work is expected to result in:

(a) Physical demarcation of the land boundary shared by Cameroon and Nigeria through the construction and emplacement of boundary pillars;

(b) Delivery of final maps of the complete land boundary;

(c) Production of a boundary statement recording the field coordinates of the emplaced pillars;

(d) Enhanced support for the demarcation work and improved living conditions of the affected populations;

(e) Consensus on best practices with respect to border management.

95. With regard to cooperation with other entities, the mission works with the national authorities of Cameroon and Nigeria to finalize the demarcation process between the two countries. This includes holding meetings, producing final maps, constructing remaining boundary pillars and preparing a boundary statement.

96. With regard to inter-agency coordination and liaison, the mission collaborates with the United Nations country teams in Cameroon and Nigeria to jointly develop confidence-building measures based on the needs of communities along the land boundary. This supports peace and sustainable cross-border development. The coordination reduces duplication and streamlines efforts, resulting in a more effective, comprehensive approach to peacebuilding, development and cooperation. The Mixed Commission secretariat is hosted within UNOWAS premises in Dakar, which provides administrative and logistical support. The Head of UNOWAS serves as Chair of the Mixed Commission.

97. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The two parties, Cameroon and Nigeria, will continue to adhere to the judgment of the International Court of Justice and the workplan adopted by the Mixed Commission;

(b) Safety, security and climate conditions will permit field operations to continue unimpeded;

(c) Extrabudgetary resources, including additional voluntary contributions, will continue to be made available for border demarcation, pillar construction and confidence-building initiatives.

98. The Mixed Commission integrates a gender perspective into its operations, deliverables and results, as appropriate. Examples include targeting women's and youth groups in community development projects related to potable water, employment capacity-building and access to the electricity network.

Programme performance in 2024

Political commitment to continued dialogue to resolve remaining disagreement areas

99. In 2024, the mission continued its collaboration with the parties to resolve the three long-standing areas of disagreement. Bilateral meetings held by the Chair of the Mixed Commission, along with the extraordinary Mixed Commission session, facilitated focused dialogue. Those meetings enabled Cameroon and Nigeria to address the disputed areas pragmatically, prioritizing mutual interests and working towards a resolution beneficial to both countries. This process led to the adoption of a road map for concluding the demarcation. Consequently, the project steering committee met in Lagos, Nigeria, in December to finalize the planning of the last lot of pillar construction and advance the final mapping process. Furthermore, to address confidence-building initiatives between the two countries, the mission worked with the national authorities and the United Nations country team in both countries to finalize the needs assessment for the populations affected by the demarcation.

100. Progress towards the objective is presented in the performance measure below (see table 21).

Table 21
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Subcommission on Demarcation conducted a field assessment of the four disputed areas, resulting in an agreement on one of the points of contention	Chair of the Cameroon-Nigeria Mixed Commission led consultations to resolve the three remaining boundary disagreements through dialogue, avoiding referral to the International Court of Justice for an interpretation of the text	Bilateral meetings and an extraordinary Mixed Commission session facilitated focused dialogue, leading to the adoption of a road map for completing the demarcation process

Planned result for 2026

Result 1: achievement of consensus between Cameroon and Nigeria

Programme performance in 2024 and target for 2026

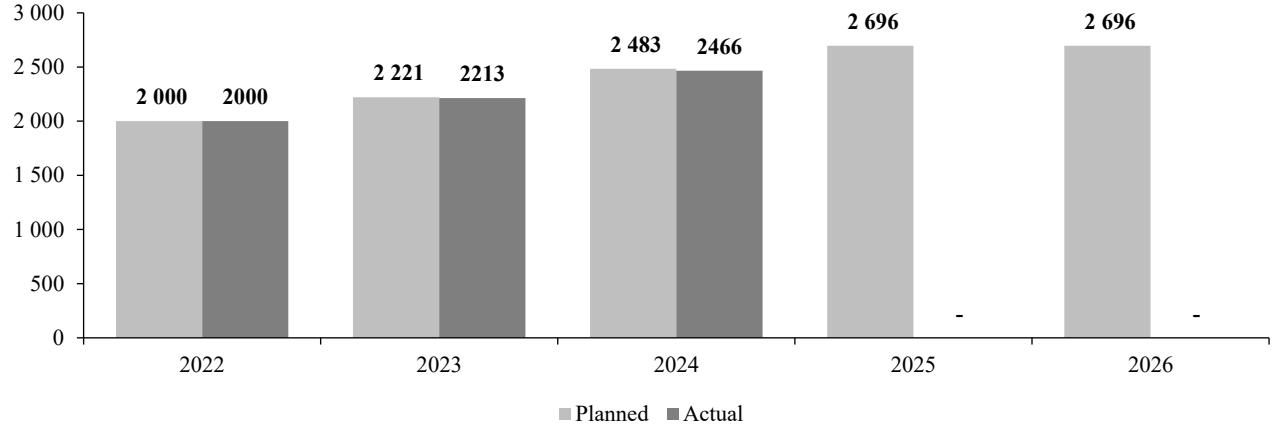
101. In 2024, the mission's work contributed to the construction of 2,466 pillars, covering 91 per cent of the demarcated boundary, falling short of the target of 2,483 pillars, owing to fewer pillars needed in that lot. Security concerns in border areas also prevented field assessments, leading to the cancellation of the Subcommission on Demarcation meeting to resolve the three remaining areas of disagreement.

Lessons learned and planned change

102. The lesson for the mission was that the good offices of the Chair and his engagement with delegation leaders in bilateral meetings facilitated consensus and enabled cooperative resolutions. In applying the lesson, the mission will hold more high-level meetings with the countries' leaders and technical experts to address the three remaining areas of contention. The Mixed Commission will also continue to implement agreed security protocols, including raising awareness among local authorities and communities, to ensure site access and reduce security risks at pillar emplacement areas.

103. Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure II).

Figure II
Performance measure: number of pillars constructed (cumulative)



Deliverables

104. Table 22 lists all deliverables of the mission.

Table 22
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**3**
1. Reports of the Secretary-General to the Security Council	2	2	2	3
Substantive services for meetings (number of three-hour meetings)	**2**	**2**	**2**	**3**
2. Meetings of the Security Council	2	2	2	3
B. Generation and transfer of knowledge				
Technical materials (number of materials)	**7**	**5**	**7**	**6**
3. Communiqué of the Cameroon-Nigeria Mixed Commission	1	1	1	1
4. Report on the Subcommission on Demarcation	2	1	2	2
5. Report of the project steering committee and technical monitoring team	4	3	4	3
Fact-finding, monitoring and investigation missions (number of missions)	**3**	**2**	**3**	**3**
6. Field assessment including data and map validation	1	–	1	1
7. Raising awareness of local population, including monitoring the well-being of affected populations along the land boundary	1	1	1	1
8. Security assessment	1	1	1	1
C. Substantive deliverables				
Good offices: provision of good offices on issues relating to the peaceful implementation of the judgment of the International Court of Justice, including on demarcation and cross-border cooperation; and good offices to build consensus on the border demarcation process.				
Consultation, advice and advocacy: technical advice to experts from Cameroon and Nigeria to support finalization of the demarcation process; advocacy for cross-border cooperation and socioeconomic projects benefiting 177,000 affected people; and awareness-raising among local communities along the Cameroon-Nigeria border.				
Databases and substantive digital materials: production of digital geospatial material on an estimated 4,036 agreed positions depicting the Cameroon-Nigeria boundary.				
D. Communication deliverables				
Outreach programmes, special events and information materials: brochures, flyers, information kits and special events to promote the activities of the mission, notably the demarcation process, as well as to enhance its visibility.				
External and media relations: press conferences, press releases and media interviews on the activities of the mission.				
Digital platforms and multimedia content: dissemination of information relating to the mission on social media platforms.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 23
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*
Category of expenditure	*(1)*	*(2)*	*(3)*	*(4)*	*(5)=(4)-(3)*
Military and police personnel	58.8	45.8	56.5	55.5	(1.0)
Civilian personnel	1 886.1	1 760.7	1 820.9	1 895.8	74.9
Operational costs	1 876.8	1 216.1	1 842.0	1 755.1	(86.9)
Total (net of staff assessment)	**3 821.7**	**3 022.7**	**3 719.4**	**3 706.4**	**(13.0)**

Table 24
Human resources

	International staff										*National staff*				*United Nations Volunteers*			
	USG	*ASG*	*D-2*	*D-1*	*P-5*	*P-4*	*P-3*	*P-2*	*FS*	*Subtotal*	*NPO*	*GS*	*LL*	*Subtotal*	*International*	*National*	*Subtotal*	*Total*
Approved 2025	–	–	–	–	2	6	–	–	1	9	–	–	2	2	–	–	–	11
Proposed 2026	–	–	–	–	2	6	–	–	1	9	–	–	2	2	–	–	–	11
Change	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**	**–**

105. The proposed resource requirements for 2026 for the Mixed Commission amount to $3,706,400 (net of staff assessment) and would provide for the deployment of one military observer ($55,500), salaries and common staff costs ($1,895,800) for nine international posts (2 P-5, 6 P-4 and 1 Field Service) and two national posts (Local level), as well as operational costs ($1,755,100) comprising the costs for consultants and consulting services ($368,900), official travel ($222,700), facilities and infrastructure ($166,600), ground transportation ($55,900), air operations ($157,200), communications and information technology ($406,600) and other supplies, services and equipment ($377,200).

106. In 2026, no change is proposed to the number and levels of the posts.

107. A vacancy rate of 11.1 per cent has been applied to the estimates for international staff posts and a vacancy rate of zero per cent has been applied for the military observer on the basis of the actual average vacancy rate in 2024. A vacancy rate of zero per cent has been applied to the estimates for Local level posts on the basis of the actual vacancy rate in March 2025.

108. The decrease in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) decreased requirements for consultants and consulting services due to reduced travel estimates and scope for civilian observers for observation of the withdrawal and transfer of authority in the Lake Chad Basin area, along the boundary and in the Bakassi peninsula; (b) lower requirement for communications and information technology due to the lower acquisition of spare parts and communications and information technology equipment, as well as reduced requirements for the maintenance of the equipment; and (c) reduced requirements for air operations in line with historical flight hour utilization rates and lower estimated aviation fuel costs. The decrease in requirements is offset in part by: (a) increased requirements for international staff due to the application of the revised salary rates and higher estimated common staff costs (common staff costs as a percentage of

salary costs of 56.9 per cent, compared with 50.4 per cent in the 2025 budget) based on past expenditure; (b) increased requirements for national posts due to the application of a lower vacancy rate of zero per cent compared with the rate of 12.5 per cent approved for 2025; and (c) increased requirements for facilities and infrastructure owing to higher estimated costs for the rental of premises and utilities for the office collocated with UNOWAS in Abuja.

Extrabudgetary resources

109. In 2025, $1,500,000 in extrabudgetary resources are projected to support the construction of 230 pillars along the Cameroon-Nigeria border.

110. In 2026, $394,737 in extrabudgetary resources are projected to finalize the pillar emplacement project, with 85 pillars targeted. The Mixed Commission will continue to fundraise for socioeconomic projects benefiting nearby populations.

111. The reduction in projected 2026 extrabudgetary resources reflects the smaller number of pillars remaining to be constructed.

5. Office of the United Nations Special Coordinator for Lebanon

($11,604,300)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

112. The mandate of the Office of the United Nations Special Coordinator for Lebanon stems from Security Council resolution 1701 (2006), as well as subsequent decisions of the Council, including S/2007/85 and S/2007/86, S/PRST/2015/7, S/PRST/2016/10 and S/PRST/2025/1. The Special Coordinator is the representative of the Secretary-General to the Government of Lebanon, political parties and the diplomatic community based in Lebanon and provides political guidance and promotes coherence across the Organization's activities. The Deputy Special Coordinator leads the United Nations country team and humanitarian country team in his capacity as Resident Coordinator/Humanitarian Coordinator and is responsible for planning and coordinating United Nations humanitarian and development activities in Lebanon.

113. The Security Council, in its resolution 2749 (2024), expressed support for ongoing diplomatic efforts to de-escalate the situation and restore calm along the Blue Line and demanded the full implementation of its resolution 1701 (2006). In a statement by the President of the Security Council dated 16 January 2025 (S/PRST/2025/1), the Council affirmed that the preservation of Lebanon's stability was essential to regional stability and security. The Council welcomed the cessation of hostilities between Israel and Lebanon of 26 November 2024 (see S/2024/870). The Council called upon the parties to fully implement the provisions of the cessation of hostilities with the support of the Office of the United Nations Special Coordinator for Lebanon and the United Nations Interim Force in Lebanon, in line with their mandates. In the context of the Office's mandate, these and other core objectives of resolution 1701 (2006) to be advanced will include support for Lebanese State institutions for effective governance, macroeconomic stabilization, including with respect to the socioeconomic and humanitarian impact of the most recent conflict, disarmament of non-State armed groups, implementation of the arms embargo and delineating Lebanon's international borders, both with Israel and the Syrian Arab Republic.

Programme of work

Objective

114. The objective, to which this mission contributes, is to prevent and mitigate conflict between Israel and Lebanon and work towards an eventual permanent ceasefire and to extend and consolidate State authority in support of the territorial integrity, sovereignty and political independence of Lebanon.

Strategy and external factors for 2026

115. To contribute to the objective, the mission will:

(a) Exercise its good offices between the parties to preserve and facilitate the effective implementation of the November 2024 cessation of hostilities agreement, prevent a relapse into conflict and advance the full implementation of resolution 1701 (2006);

(b) Intensify efforts to resolve outstanding obligations of all parties under resolution 1701 (2006) to secure a permanent ceasefire and long-term solution to the conflict, including through the delineation of Lebanon's international borders;

(c) Advocate for Lebanon's political leadership to ensure the effective functioning of State institutions, the timely conduct of transparent, inclusive and credible elections, the adoption of a macroeconomic stabilization programme and implementation of a comprehensive reform and recovery programme;

(d) Facilitate urgently required recovery and reconstruction imperatives necessitated by the recent conflict and mitigate the impact of the volatility in the Syrian Arab Republic on the security, stability and refugee situation in Lebanon;

(e) Support the accelerated extension of State authority across Lebanese territory, intensify engagement with national political stakeholders and with international partners to promote an inclusive dialogue on the disarmament of non-State armed groups and engagement with Syrian authorities on unresolved border issues, in order to strengthen the State security presence along border points and ensure the effective enforcement of the arms embargo.

116. The above-mentioned work is expected to result in:

(a) An enduring cessation of hostilities and a credible monitoring mechanism with the requisite political support in Lebanon and Israel;

(b) Direct or indirect negotiations between Lebanon and Israel to address outstanding obligations under resolution 1701 (2006) towards an eventual permanent ceasefire, including the full withdrawal of the Israel Defense Forces from Lebanese territory;

(c) Effective Lebanese State institutions in place and comprehensive structural reforms initiated to put the country on the path to recovery, uphold its democratic principles and strengthen good governance;

(d) The State's effective exercise of authority over all Lebanese territory, including through the strengthened deployment of the Lebanese Armed Forces, and steps taken to secure its borders and other entry points;

(e) Lebanon's pursuit of a political framework that establishes a State monopoly over the possession, transfer and production of arms, delinked from regional conflicts;

(f) Engagement on the Lebanon-Israel and Lebanon-Syrian Arab Republic tracks to delineate the international borders of Lebanon in its entirety, including by addressing the issue of the Shab'a Farms.

117. With regard to cooperation with other entities, the mission coordinates with the League of Arab States, the European Union and international financial institutions such as the World Bank and the International Monetary Fund to ensure cohesion in political advocacy. The Special Coordinator engages international and regional stakeholders as part of her good offices mandate, to help to build trust and defuse tensions, mobilize broad support for Lebanon's stability and promote political and diplomatic processes towards the full implementation of resolution 1701 (2006).

118. With regard to inter-agency coordination and liaison, the mission cooperates with the United Nations Interim Force in Lebanon in the implementation of resolution 1701 (2006) to maintain the cessation of hostilities and to strengthen the extension of State authority across all of Lebanon's territory. Leveraging the presence of all United Nations entities, the mission brings all available political, security and development tools to bear in a coordinated and harmonized manner in support of Lebanon's stability. The mission also contributes to the United Nations Sustainable Development Cooperation Framework and leads its peace and governance results group.

119. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) International consensus on Lebanon will continue to be challenged;

(b) Political stalemate may hinder effective decision-making and undermine internal dialogue and economic and governance reforms;

(c) The prolonged socioeconomic crisis, compounded by the impact of the most recent conflict, and its humanitarian repercussions will remain sources of instability and social unrest;

(d) Lebanon's internal stability and security will be increasingly exposed and vulnerable to the volatile regional situation, highlighting the need for bilateral engagement to address potential security concerns;

(e) Internal dynamics in the Syrian Arab Republic and the maturation of Lebanese-Syrian relations are likely to dictate cross-border movements;

(f) The cessation of hostilities between Lebanon and Israel will remain fragile, underlining the imperative for engagement of the parties in a political process to address the underlying causes of the conflict within the framework of resolution 1701 (2006);

(g) Extension of State authority in southern Lebanon and along the borders will continue to be affected by political will, other law-and-order requirements and financial and logistical challenges faced by the State security institutions.

120. The mission integrates a gender perspective, as appropriate, and is working to enhance women's political empowerment through a range of initiatives, including legal reforms, special temporary measures, support for women elected and running for office, the promotion of an enabling environment, and initiatives in coordination with the United Nations entities and other stakeholders. The mission supports networks engaged in reconciliation, conflict prevention, inclusive community dialogue and mediation. To advance the youth, peace and security agenda, the mission engages youth groups to advocate for their empowerment.

Evaluation activities

121. An internal evaluation of the United Nations electoral engagement in Lebanon covering the 2020–2023 period conducted jointly with UNDP and completed in 2024 has guided the proposed programme plan for 2026. The results and lessons of the evaluation will result in strengthening United Nations engagement in electoral reform and promoting women's political participation. Aside from political advocacy, the Office and UNDP are developing ways to intensify engagement with key decision makers to promote electoral reform, including the adoption of temporary special measures.

Programme performance in 2024

Restored cessation of hostilities between Lebanon and Israel

122. In 2024, during the severe escalation of hostilities between Hizbullah and Israel, the Special Coordinator engaged key domestic, regional and international actors to restore the cessation of hostilities. Through high-level engagements with relevant stakeholders in Israel and Lebanon, including Hizbullah, and in coordination with international partners, the Special Coordinator exercised her good offices to build common ground and narrow the gaps between the parties. She participated in and supported initiatives, including the United States of America-France negotiations that eventually secured the cessation of hostilities agreement, and engaged all parties to promote their recommitment to the implementation of resolution 1701 (2006). The Special Coordinator built political support for a strengthened presence of the Lebanese Armed Forces south of the Litani River and helped to mobilize and coordinate international support to bolster capacities and enhance readiness to deploy.

123. Progress towards the objective is presented in the performance measure below (see table 25).

Table 25
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Cessation of hostilities between Lebanon and Israel restored Israel and Lebanon recommit themselves to the implementation of resolution 1701 (2006) Concrete measures to enhance deployment of the Lebanese Armed Forces south of the Litani River and extend State authority across Lebanon Communities affected by the conflict began to receive assistance, including from the United Nations

Planned results for 2026

Result 1: fully functioning State institutions and the exercise of effective State authority throughout Lebanon

Programme performance in 2024 and target for 2026

124. In 2024, the fulfilment of Lebanon's constitutional obligations was hampered by the conflict between Hizbullah and Israel and the deepening political polarization within Lebanon. Following the cessation of hostilities, the Office, using its good offices, contributed to efforts to break the domestic political deadlock, leading to the election of a President and the designation of a Prime Minister in January 2025.

125. For 2026, the mission will advocate for the strengthening of State institutions, including through institutional revival, economic stabilization, governance reforms and the conduct of the 2026 elections. The mission will support political processes towards the disarmament of non-State armed groups and promote the accelerated extension of State authority.

126. Expected progress towards the objective is presented in the performance measure below (see table 26).

Table 26
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Polarized polity perpetuated executive vacuum at the highest institutional levels Parliament extended the tenure of heads of security agencies by one year, ensuring continuity and stability	Multilayered institutional vacuum unresolved owing to prolonged conflict and political polarization Parliament postponed municipal elections and extended the tenure of heads of security agencies for	Fully functioning State institutions promoted Start of planning for the 2026 parliamentary elections Governance and reform agenda is furthered	Empowered, effective and fully functioning State institutions Timely, transparent and fair parliamentary elections take place

Result 2: political and diplomatic efforts to delineate Lebanon's international borders

Proposed programme plan for 2026

127. For 2026, the mission will focus on facilitating negotiations that advance the delineation of Lebanon's borders with Israel and with the Syrian Arab Republic. To advance long-term solutions to the conflict, the mission will engage domestic, regional and international stakeholders to resolve the contentious border areas, including the Shab'a Farms.

Lessons learned and planned change

128. The lesson for the Office was that the incomplete implementation of resolution 1701 (2006) produced a false sense of security. While the November cessation of hostilities agreement restored relative stability, conflict triggers remain, leaving Lebanon at risk of renewed violence. In applying the lesson, the mission will prioritize complementarity of a political process to the military-technical process, as defined by the November agreement, to create the conditions for a permanent ceasefire and a long-term solution, including the delineation of the border between Lebanon and Israel and between Lebanon and the Syrian Arab Republic.

129. Expected progress towards the objective is presented in the performance measure below (see table 27).

Table 27
Performance measure

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)

			on the status of the Shab'a Farms Discussions initiated with the parties on delineation of Lebanon-Syrian Arab Republic borders, including on the status of the Shab'a Farms	demarcation line resolved and ratified as an international border Lebanon and the Syrian Arab Republic launch process for border delineation

Deliverables

130. Table 28 lists all deliverables of the mission.

Table 28
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**3**	**3**	**3**	**3**
1. Report of the Secretary-General on the implementation of Security Council resolution 1701 (2006)	3	3	3	3
Substantive services for meetings (number of three-hour meetings)	**3**	**3**	**4**	**3**
2. Meetings of the Security Council	3	3	4	3

C. Substantive deliverables

Good offices: provision of good offices in support of the prevention of conflict and the extension and consolidation of State authority; good offices on elections, peace and stability, including with respect to economic issues; intensive engagement with the Lebanese Armed Forces and the Internal Security Forces, as well as the donor community, to facilitate continued assistance to the security forces; and confidence-building measures between Israel and Lebanon and between the Syrian Arab Republic and Lebanon, including with respect to the border delineation and the status of the Shab'a Farms.

Consultation, advice and advocacy: consultations with Lebanese and Israeli interlocutors on the implementation of resolution 1701 (2006); consultations with international and regional stakeholders on ensuring Lebanon's stability; consultations on the economic and governance reform agenda and development priorities; advice on government accountability, governance policy formulation and public administration reforms; advocacy with international partners in support of Lebanon's efforts for extension of State authority, including strengthened State security agencies; consultations on border delineation and integrated border management on the Lebanon-Syrian Arab Republic border; advocacy on key human rights standards and protections that could have an impact on long-term security and stability and the strengthening of human rights institutions in Lebanon; advocacy on the political participation and representation of women and young people; and advocacy with international partners in support of Lebanon for continued donor involvement and resources as Lebanon responds to the presence of Palestine and Syrian refugees, taking into account the needs of refugees and host communities.

D. Communication deliverables

Outreach programmes, special events and information materials: outreach activities to support the implementation of resolution 1701 (2006) and other key priorities relating to Lebanon's sustainable peace, development and human rights agenda; activities to strengthen the relationship with key Lebanese partners and stakeholders; engaging with young people, including university students, and supporting women's empowerment and representation, in particular in the parliamentary elections; and outreach activities through special events to communicate more effectively with local stakeholders and to spread broader knowledge of the work being undertaken by the mission, through information materials and joint outreach activities with other United Nations entities for the promotion of United Nations system-wide priorities such as the Sustainable Development Goals.

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

External and media relations: press conferences, press statements, background briefings, interviews, op-eds and other media engagements to communicate strategically on the implementation of resolution 1701 (2006).

Digital platforms and multi-media content: materials to deepen local and national understandings of and support for the mission and its support for the implementation of resolution 1701 (2006) on websites or social media.

B. Proposed post and non-post resource requirements for 2026

[a] Post is funded at 50 per cent and cost-shared with the Development Coordination Office.

131. The proposed resource requirements for 2026 for the mission amount to $11,604,300 (net of staff assessment) and would provide for salaries and common staff costs ($9,924,800) for 21 international posts (1 Under-Secretary-General, 1 Assistant Secretary-General, 1 D-1, 2 P-5, 7 P-4, 1 P-3, 2 P-2 and 6 Field Service) and 67 national posts (5 National Professional Officer and 62 Local level), as well as operational costs ($1,679,500), comprising the costs for official travel ($167,600), facilities and infrastructure ($871,300), ground transportation ($77,900), communications and information technology ($453,300), medical ($6,000) and other supplies, services and equipment ($103,400).

132. In 2026, the proposed staffing complement includes the establishment of five posts, as follows:

Immediate office of the Special Coordinator

(a) Establishment of one post of Field Language Assistant (Local level) to provide essential support during meetings and communications with Arabic-speaking interlocutors in Lebanon, the Syrian Arab Republic and key Arab capitals and for the translation of official documents.

The mission has no capacity for interpretation/simultaneous translation from Arabic to English to support the Special Coordinator in her meetings;

Public Information Unit

(b) Establishment of one post of Chief Public Information Officer and Spokesperson (P-4) to improve awareness of the mandate and role of the Special Coordinator, enhance media communications and monitoring capability and, in general, underpin the Special Coordinator's quiet diplomacy in pursuit of the mandate objectives. The enhanced political and diplomatic engagement in Lebanon and Israel by the Special Coordinator will require effective media communications and outreach in Lebanon and Israel;

(c) Establishment of one post of Public Information Assistant (Local level) to update the mission leadership on critical developments or events in Lebanon, Israel and the region, to monitor and report on hate speech, misinformation and disinformation, including through the processing of regional and local media, and to support the mission's public information campaigns, outreach and other events, as well as multimedia materials;

Political Affairs Section

(d) Establishment of one post of Associate Political Affairs Officer (P-2) to assist the Special Coordinator's efforts in pursuing a multipronged political approach to accelerate the implementation of resolution 1701 (2006). The incumbent will be responsible for strengthening reporting and analytical capacity, supporting the development of mechanisms for data analytics to maintain and manage data sets relevant to the implementation of resolution 1701 (2006), including by way of contributions to the development of road maps and relevant research, as well as the coordination of new political initiatives to advance mandate implementation;

Coordination Unit

(e) Establishment of one post of Associate Coordination Officer (P-2), under the guidance of the Deputy Special Coordinator for Lebanon, to develop concise fact sheets and briefing packages, provide analytical documents, reports on discussions and track progress thereon. The incumbent will also support the development of strategies and initiatives that promote cross-pillar cooperation and strategy coherence with agencies, support information flow between the mission and other stakeholders, most notably the humanitarian pillar in real time within a crisis setting.

133. A vacancy rate of 11.1 per cent has been applied to the estimates for international staff on the basis of the actual average vacancy rates in 2024. A vacancy rate of zero per cent has been applied to the estimates for National Professional Officer posts and a vacancy rate of 5.0 per cent has been applied to the estimates for Local level posts, both on the basis of the actual vacancy rates in March 2025. A vacancy rate of 50 per cent has been applied to the five posts proposed for establishment.

134. The increase in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) the proposed establishment of five posts (1 P-4, 2 P-2 and 2 Local level); (b) increased requirements for national staff due to the application of a lower vacancy rate of 5.0 per cent compared with the rate of 6.7 per cent approved for 2025; (c) increased requirements for facilities and infrastructure for the replacement of prefabricated and security equipment that are beyond their useful life and increased requirements for rental costs and small alternation and renovation projects to meet the growing operational demands and enhanced working environment; (d) increased requirements for communications and information technology to replace critical, obsolete equipment and assets that have exceeded their life expectancy, as well as additional resources for public information services as part of a broader strategy to promote the implementation of resolution 1701 (2006); and (e) increased requirements under other supplies, services and equipment due to higher estimated freight costs for the equipment to be acquired. The increased requirements are offset in part by lower requirements for international staff due to the application of revised salary rates and the non-provisioning of resources for consultants and consulting services.

6. United Nations Regional Office for Central Africa

($8,329,200)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

135. UNOCA is responsible for the prevention of conflicts and the consolidation of peace and security in Central Africa. The mandate derives from an exchange of letters between the Secretary-General and the President of the Security Council (S/2009/697 and S/2010/457). In another exchange of letters (S/2024/648 and S/2024/649), the mandate was extended until 31 August 2027.

136. The mandate for the period 2024–2027 encompasses four objectives, namely: (a) monitor political and security developments in Central Africa and carry out good offices on behalf of the Secretary-General in order to prevent and resolve conflicts, to help to sustain peace and to advise the Secretary-General and United Nations entities in the region on sustaining peace issues in Central Africa; (b) enhance subregional capacities for conflict prevention and mediation in countries of the subregion, with due attention given to the principles of the Charter of the United Nations, including human rights and gender dimensions; (c) support and enhance United Nations efforts in the subregion, as well as regional and subregional initiatives on peace and security, including from human rights and gender perspectives; and (d) enhance coherence and coordination in the work of the United Nations in the subregion on peace and security.

137. The mission serves as the secretariat of the United Nations Standing Advisory Committee on Security Questions in Central Africa.

Programme of work

Objective

138. The objective, to which this mission contributes, is to prevent conflict and consolidate peace and security in the Central Africa subregion.

Strategy and external factors for 2026

139. To contribute to the objective, the mission will:

(a) Engage in good offices activities to help countries to prevent political crises and election-related violence and peacefully resolve conflicts and crises stemming from political processes, including political transitions, and promote inclusive, peaceful and credible elections;

(b) Leverage its partnership with subregional organizations, especially the Economic Community of Central African States (ECCAS) in conflict prevention, mediation and early warning, ensuring the participation of women, young people and other actors in inclusive peacebuilding and sustaining peace efforts, including the implementation of the regional strategy on hate speech, and addressing the adverse effects of climate change on peace and security;

(c) Address cross-regional peace and security challenges, including farmer-herder dynamics, the crisis in the Lake Chad Basin and maritime piracy in the Gulf of Guinea, in close coordination with United Nations entities in Central and West Africa;

(d) Carry out regular early warning analysis to inform preventive diplomacy and good offices efforts for peace and security in Central Africa, and mobilize support for preventive diplomacy, in collaboration with ECCAS and United Nations entities;

(e) Enhance the coherence of the work of the United Nations on peace and security issues in Central Africa through regular consultations with relevant United Nations entities in the subregion, coordinate the efforts of United Nations entities geared towards the implementation of the regional conflict prevention framework and in line with commitments of the Pact for the Future, and support the country teams in adopting and/or rolling out national sustaining peace strategies aligned with the framework;

(f) Support the regular ministerial meetings of United Nations Standing Advisory Committee on Security Questions in Central Africa as a platform for confidence-building between Member States to discuss threats and challenges to regional peace and security, with a view to preventing or addressing conflicts, crises or inter-State tensions.

140. The above-mentioned work is expected to result in:

(a) Peaceful and credible electoral processes in the subregion, with relevant prevention mechanisms in place for potential election-related violence;

(b) Prevention and mitigation of election-related violence, as well as the initiation or continuation of inclusive political dialogue processes, assisted by joint early-warning and good offices by the mission and ECCAS in countries holding elections, facing a political crisis or undergoing a political transition;

(c) Progress made by ECCAS towards the adoption of a regional humanitarian strategy for Central Africa and the set-up of the ECCAS parliament;

(d) The United Nations Standing Advisory Committee on Security Questions in Central Africa is contributing to reinforced cooperation and coordination among ECCAS member States, regional organizations and other key stakeholders of the subregion;

(e) A shared understanding of key peace and security challenges and priorities among United Nations entities in Central Africa, integrating emerging drivers of conflicts, including the impact of climate change and environmental degradation;

(f) Enhanced coordination of United Nations efforts in support of regional and subregional initiatives on peace and security and governance;

(g) Improved interregional coordination of efforts between Central and West Africa on maritime security in the Gulf of Guinea, the impact of climate change on peace and security, farmer-herder dynamics and the crisis in the Lake Chad Basin region.

141. With regard to inter-agency coordination and liaison, the mission works closely with the Office of the Special Envoy of the Secretary-General for the Great Lakes Region, UNOWAS, the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo and other relevant United Nations entities with respect to cross-border and transregional challenges to peace and security, in order to avoid duplication and ensure coherence and enhance synergies. Country-specific early warning and good offices activities are carried out in close coordination with the resident coordinators concerned.

142. With regard to external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) ECCAS institutional reform becomes increasingly more operational, with all peace and security institutions and mechanisms established and provided with adequate resources for their functioning;

(b) UNOCA and ECCAS maintain or strengthen their cooperation and regular consultations and adopt and roll out a joint plan of action, within the framework of a new memorandum of understanding between ECCAS and the United Nations on peace and security issues;

(c) ECCAS member States remain committed to establishing a regional governance framework, work towards the adoption and implementation of regional governance standards and mechanisms and solicit or accept the support of UNOCA and regional and international partners;

(d) The elections scheduled in the countries of the region, including in the countries undergoing political transitions, are held according to the constitutional and legal time frames or agreed-upon transitional timelines and the countries concerned accept the political engagement of UNOCA and ECCAS to defuse tensions, prevent election-related violence and resolve election-related crises;

(e) ECCAS and its member States show a commitment to the involvement of civil society actors, including the regional Coalition of Civil Society Organizations for Peace and Conflict Prevention in Central Africa, the Coalition of Youth, Peace and Security in Central Africa and women's organizations, in the activities of ECCAS in the realm of peace and security, including early warning, conflict prevention and peacebuilding. The Coalition becomes fully operational, with adequate human resources, and is supported by ECCAS member States and partners;

(f) ECCAS member States develop, adopt and begin the implementation of a conflict-sensitive regional strategy on climate change and resilient development and regional regulation on pastoralism and transhumance in Central Africa to address the impacts of climate change on peace and security, while strengthening national and local mechanisms to prevent and peacefully resolve farmer-herder conflicts and promote peaceful cross-border transhumance.

143. The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate, including support for the implementation of the regional action plan on Security Council resolution 1325 (2000) and the adoption and rolling out of national action plans. It continues its advocacy for the reinforcement of the role of women in conflict prevention and sustaining peace, as well as adequate representation of women in decision-making positions at both the national and regional levels. It works with other relevant United Nations entities and external partners to reinforce the capacities of women in decision-making and in mediation. It will continue to support the operationalization and build the capacity of the ECCAS network of women mediators established in December 2021 and endorsed by the Heads of State in January 2022.

144. In line with the United Nations Disability Inclusion Strategy, the mission advocates for political and electoral processes in the region to be disability-sensitive, by encouraging Member States to take appropriate measures to facilitate the participation of persons with disabilities. The mission also encourages and supports experience-sharing between the States of the region on disability inclusion, thus facilitating the adoption of measures that take into consideration the specificities of the regional and national contexts.

Programme performance in 2024

Reduced tensions in electoral contexts

145. In 2024, through the good offices of the Special Representative of the Secretary-General, including the joint mission carried out with the President of the ECCAS Commission and the Special Envoy of the ECCAS facilitator for the transition in Chad, UNOCA encouraged political dialogue in Chad to create conditions for inclusive, peaceful and credible polls. The organization of the presidential election in May 2024 and legislative, provincial and local elections in December 2024 marked important steps towards the restoration of a constitutional order in Chad. Furthermore, UNOCA implemented projects to facilitate the effective participation of women and young people in the national dialogue and the upcoming elections in Gabon in 2025.

146. Progress towards the objective is presented in the performance measure below (see table 31).

Table 31
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Elections in Central Africa are, in general, peaceful, with no or a low level of violence	Political transition in Chad advanced in an environment of relative calm, including through the implementation of the Doha Peace Agreement	Chad peacefully concluded its political transition, with the organizations of legislative, provincial and local elections Gabon's transition advanced in a peaceful and inclusive manner, in line with the defined timeline

Planned result for 2026

Strengthened regional capacities for conflict prevention and mediation in Central Africa

Programme performance in 2024 and target for 2026

147. In 2024, the mission's work contributed to strengthening of the capacities of Member States in Central Africa, including through the implementation of the Kigali Declaration on the prevention and combating of unconstitutional changes in Central Africa and continued engagement with civil society organizations. The regional conference on unconstitutional changes of government in Central Africa, organized by UNOCA and the Government of Sao Tome and Principe, resulted in recommendations on addressing the root causes of unconstitutional changes of government in the region. In addition, joint efforts have been made in partnership with local, regional and international stakeholders, with specific attention given to ensure the full, equal and meaningful participation of women and young people.

Lessons learned and planned change

148. A lesson for the mission was that coordination and cooperation with relevant stakeholders, in particular with regional and subregional organizations, were essential for more effective results. In applying the lesson, UNOCA plans to continue to work with ECCAS and its member States, as well as United Nations presences and country teams in the region and international and national stakeholders, to prevent conflict and consolidate peace through the promotion of good governance, taking into account the role of women and young people.

149. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 32).

Table 32
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Recommendations on strengthening governance are defined in line with the Kigali Declaration adopted by the United Nations Standing Advisory Committee on Security Questions in Central Africa	Progress is achieved towards the development of a regional protocol on good governance	Regional protocol on good governance is developed in close consultation with regional stakeholders

Deliverables

4. Ministerial meeting of the United Nations Standing Advisory Committee on Security Questions in Central Africa	10	10	10	10
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**26**	**22**	**18**	**16**
5. Workshop on conflict prevention, mediation, climate, peace and security, farmer-herder dynamics, human rights and women's empowerment	20	14	15	12
6. Workshop for journalists/media on their role in conflict prevention and protection of civilians	6	8	3	4
Fact-finding, monitoring and investigation missions (number of missions)	**30**	**25**	**30**	**30**
7. Field visits to Member States to gather information, consult stakeholders and coordinate action on issues relating to subregional peace and security, activities monitoring and data collecting	30	25	30	30
C. Substantive deliverables				
Good offices: preventive diplomacy and mediation, high-level diplomatic missions and meetings, including jointly with regional organizations (ECCAS and the African Union), regional and subregional summits, forums and high-level meetings to promote peace and stability, maritime safety and human rights, climate, peace and security and transhumance.				
Consultation, advice and advocacy: strategic coordination meetings and round tables with regional and subregional organizations on regional integration, peace and security, human rights and counterterrorism (including security threats in the Lake Chad Basin).				
D. Communication deliverables				
Outreach: collaboration with civil society (e.g., media associations and women's and youth groups), regulatory bodies, ECCAS and other key stakeholders for events to raise awareness on the UNOCA mandate and activities, including in the framework of the "Football Tournament for Peace" usually organized during the International Day of Peace; collaboration with the media for the public's better understanding of UNOCA good offices and mediation work; and joint activities with the United Nations Communications Groups (Gabon and other countries covered).				
External and media relations: capacity-building programmes for the media and communications stakeholders in the subregion, in the context of national elections and other key political processes (in coordination with other United Nations entities; build, maintain and reinforce working relationships with the media at the national, subregional and international levels on the work of UNOCA; organization of at least two press conferences for UNOCA leadership; and arrangements for interviews with other colleagues from substantive or relevant components of UNOCA.				
Digital platforms and multimedia content: three online platforms (social and digital media) to disseminate multilingual content promoting the mandate and strengthening the visibility of UNOCA activities; production and dissemination of various materials to reflect UNOCA activities for peace and stability in the subregion; production and dissemination of various digital materials (cards, infographics, videos and digital newsletters) and multimedia content to reflect UNOCA activities for peace and stability in the subregion; and production of a podcast programme on high-priority areas of the UNOCA mandate.				
Prevention and fight against hate speech and incitement of violence: continuing support for the endorsement/final adoption, by Heads of States of ECCAS, of the regional strategy to prevent and address the issue, as well as for its implementation; and facilitation of at least one session on disinformation.				

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 34
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*

Approved 2025	1	–	–	2	5	12	6	–	7	33	4	–	12	16	–	1	1	50
Proposed 2026	1	–	–	2	5	12	6	–	7	33	4	–	12	16	–	1	1	50
Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

151. The proposed resource requirements for 2026 for the mission amount to $8,329,200 (net of staff assessment) and would provide for salaries and common staff costs ($6,759,100) for the continuation of 33 international posts (1 Under-Secretary-General, 2 D-1, 5 P-5, 12 P-4, 6 P-3 and 7 Field Service), 16 national posts (4 National Professional Officer and 12 Local level) and one national United Nations Volunteer, as well as operational costs ($1,570,100), comprising the costs for consultants ($9,800), official travel ($535,900), facilities and infrastructure ($198,600), ground transportation ($63,000), air operations ($132,200), communications and information technology ($503,600) and other supplies, services and equipment ($127,000).

152. A vacancy rate of 12.1 per cent has been applied to the estimates for international staff on the basis of the actual vacancy rate as from March 2025. Vacancy rates of 25.0 per cent for National Professional Officer posts, 16.7 per cent for Local level posts and zero per cent for national United Nations Volunteers have been applied to the estimates on the basis of the actual average vacancy rates in 2024.

153. The increase in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) increased requirements under international staff due to the application of a lower vacancy rate of 12.1 per cent compared with the rate of 20.2 per cent in the approved budget for 2025; and (b) increased requirements for Local level staff due primarily to the application of the most recent salary scale. The increased requirements are offset in part by reduced requirements for air operations in line with historical flight hour utilization rates and the non-provisioning of resources for individual contractual services.

Extrabudgetary resources

154. In 2025, extrabudgetary resources in the amount of $713,500 are projected to be used to continue to support regional capacities to prevent, mitigate and resolve election-related crises and violence in the Central Africa subregion, including through the strengthening of electoral governance and support for the adoption of a regional protocol on democratic elections, and the continuation of one post of Political Affairs Officer (P-4) and the establishment of one post of Junior Professional Officer/ Associate Expert in Political Affairs.

155. In 2026, extrabudgetary resources in the amount of $400,000 are projected to be utilized to support the continuation of the above-mentioned projects.

7. United Nations Support Mission in Libya

($90,432,200)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

156. UNSMIL is an integrated special political mission established by the Security Council in its resolution 2009 (2011). The Mission is mandated to support the country's transition and post-conflict efforts, including through an inclusive national dialogue and a constitution-drafting process. Following the signing of a nationwide ceasefire agreement on 23 October 2020 that ended the armed conflict that began in April 2019, the Council, in its resolution 2570 (2021), further mandated UNSMIL to provide support to the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism.

157. On 24 January 2025, the Secretary-General appointed Hanna Serwaa Tetteh of Ghana as his Special Representative for Libya and Head of UNSMIL. The Mission's mandate was extended until 31 October 2025 through Security Council resolution 2755 (2024), in which the Council requested the Secretary-General to submit a strategic review of UNSMIL to the Council no later than 30 September 2025.

158. On 4 February, UNSMIL announced the establishment of an advisory committee of 20 Libyan independent experts (7 women and 13 men) as part of a multi-track initiative in the Libyan-led and Libyan-owned political process facilitated by the United Nations. The role of the committee is to develop technically sound and politically viable proposals for resolving outstanding contentious issues to enable the holding of elections, building on the existing Libyan framework and laws, submitted to UNSMIL for consideration for the subsequent phase of the political process. In response to the violent clashes that erupted in Tripoli on 12 May, the Mission, together with the Presidential Council, launched a truce committee on 18 May to stabilize the situation and advance security arrangements in the capital.

Programme of work

Objective

159. The objective, to which this Mission contributes, is to support an inclusive Libyan-led political process and rights-based national reconciliation, conflict prevention and peacebuilding efforts; strengthen rule of law institutions, transitional justice processes and State-building efforts to optimize readiness for planning and implementing credible, transparent and inclusive elections; advance human rights, gender equality and women's and youth political participation; support the reform of the security sector, disarmament, demobilization and reintegration efforts and the further implementation of the October 2020 ceasefire agreement.

Strategy and external factors for 2026

160. To contribute to the objective, the Mission will:

(a) Provide mediation and good offices to support a Libyan-led, Libyan-owned political process facilitated by the United Nations and supported by international partners, with a focus on addressing contested political issues, enabling inclusive national presidential and

parliamentary elections and fostering good governance. The Mission will continue to engage with a wide spectrum of Libyan stakeholders at all levels, in particular women and young people, to amplify their participation in the democratic transition and reconciliation processes;

(b) Provide technical assistance to the High National Elections Commission in conducting transparent and inclusive national and municipal elections;

(c) Support inclusive, victim-centred and rights-based national reconciliation processes based on transitional justice principles through capacity-building for reconciliation bodies and facilitating dialogue among diverse Libyan actors, including civil society, women and young people;

(d) Strengthen the rule of law and accountability by supporting Libya's judiciary and prosecutorial systems, including their critical role in ensuring justice for all Libyans;

(e) Promote and protect human rights by monitoring, reporting and addressing violations, with a focus on sexual violence in conflict and violations against vulnerable groups, and by ensuring civic space for political participation;

(f) Advance security sector reform by engaging legislative bodies to review national security legislation and supporting trust-building measures for the reunification of security and military institutions under civilian oversight, while establishing enhanced security coordination mechanisms;

(g) Facilitate disarmament, demobilization and reintegration through community violence reduction initiatives, national coordination and civil society engagement, technical training and operational planning, including support for mine action coordination and weapons and ammunition management;

(h) Support the 5+5 Joint Military Commission and its subcommittees in implementing the ceasefire agreement, including the withdrawal of foreign forces, foreign fighters and mercenaries and by engaging women, young people and civil society organizations on sustaining and strengthening the ceasefire agreement;

(i) Support economic policy reform, in close cooperation with Member States and international financial institutions, including reunification and reform of the country's banking system, a decentralization policy and the establishment of an inclusive and unified oversight mechanism that ensures transparent, equitable and accountable management of revenue across the country and the distribution of national resources;

(j) Advance the women and peace and security agenda by expanding existing training programmes to build leadership capacity and promoting their meaningful participation in political and peacebuilding processes;

(k) Engage with neighbouring countries, including sub-Saharan African countries, to ensure that their views and concerns are taken into consideration.

161. The above-mentioned work is expected to result in:

(a) An inclusive Libyan-led and Libyan-owned political process that leads to elected, unified, functional and representative government institutions, including economic institutions, contributing to political and economic stability and rights-based reconciliation;

(b) Enhanced accountability of institutions, promotion of the rule of law throughout the country, and reconciliation and transitional justice processes promoting and protecting human rights;

(c) Unified security sector institutions operating under civilian oversight, including professional, unified and accountable defence and security forces, and full implementation of the provisions of the ceasefire agreement, including the withdrawal of foreign fighters, foreign forces and mercenaries.

162. The Mission cooperates with relevant local, national, regional and international partners and regional organizations, including the African Union, the League of Arab States and the European Union and the United Nations-African Union-European Union-League of Arab States quartet.

163. The Mission and the United Nations country team have taken steps towards enhancing integration, including through the United Nations Sustainable Development Cooperation Framework (2023–2026) and will continue to operationalize the Secretary-General's focus on the humanitarian-development-peace nexus to facilitate long-term peace, security and sustainable development, in order to enhance the impact of United Nations interventions in support of all people in Libya.

164. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The Libyan Political Agreement of December 2015, Security Council resolution 2510 (2020), by which the Council endorsed the conclusions of the Berlin Conference on Libya, the October 2020 ceasefire agreement, relevant provisions of the Libyan Political Dialogue Forum Tunis road map and accompanying outputs and resolutions,[2] as well as the comprehensive approach to enabling elections, will remain the guiding framework for United Nations support in Libya. The Libyan-led multitrack political process, facilitated by the United Nations, will establish the road map for elections and address contested political issues;

(b) The economic sector will continue to suffer from a lack of independent oversight and transparent management of public funds, while efforts to reunify the Central Bank of Libya will continue as part of the implementation of the road map and independent audit recommendations for reunification;

(c) The Libyan ceasefire agreement of October 2020, including the withdrawal of foreign forces, foreign fighters and mercenaries, will continue to be implemented and consensus will be reached among relevant security and political actors in Libya on reforming and unifying security institutions and creating conditions conducive to the launch of a disarmament, demobilization and reintegration process;

(d) The human rights situation in Libya will remain challenging, especially with respect to enhancing the rule of law and protecting and promoting civic space for all people in Libya to exercise their fundamental rights, in particular civil and political rights. Marginalization and underrepresentation of women in political and reconciliation processes will continue to pose a challenge to peacebuilding;

(e) Institutional weaknesses and divisions among the country's security actors will continue to enable violent extremist organizations to benefit from power vacuums and ungoverned spaces, thus inadvertently fostering an environment conducive to terrorism;

(f) The security situation will remain fragile owing to the proliferation of weapons and armed actors, the lack of unified security institutions, competition among armed actors, a predatory economy and the continued presence of smuggling and trafficking networks;

(g) The overall humanitarian situation will continue to improve in line with security stabilization, with a steady decrease in the number of people needing humanitarian assistance and internally displaced persons. Meanwhile, the continued conflict in the Sudan will require increased support for the protection needs of Sudanese refugees, as well as other refugees, asylum-seekers and migrants;

(h) Strategic partnerships will continue among the international community, including regional organizations and the United Nations, in support of a Libyan-led and Libyan-owned political process adhering to the United Nations sanctions regime.

165. The Mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. From 2026 onwards, the Mission will implement a renewed three-year action plan,

[2] Security Council resolutions 2542 (2020), 2570 (2021), 2702 (2023) and 2755 (2024).

"Inclusive mediation and peacebuilding processes in Libya: protection and participation of women (2026–2028)". As part of the plan, the Mission will promote women's participation in political and reconciliation processes and their representation in government institutions. To safeguard equal rights and opportunities for women, the Mission and the United Nations country team jointly promote women's equal enjoyment of political, civil, economic and social rights through technical assistance to national institutions and civil society actors; advocacy for gender-responsive legislation and policies that protect women from violence; and measures to address gaps in basic services, in particular for displaced, migrant and refugee women and girls. The Mission will support prevention and protection efforts in Libya, including through capacity-building for relevant institutions.

Evaluation activities

166. In 2024, the Mission conducted a comprehensive staffing review exercise, providing an assessment of the organizational capacity and mission structures and recommendations to enhance effectiveness and efficiency. During the conduct of the review, the Security Council, in its resolution 2755 (2024), requested the Secretary-General to submit a strategic review no later than 30 September 2025, which includes an assessment and recommendations for increasing the efficiency and effectiveness of the Mission's overall structure, including the objectives of the Mission. In view of the pending strategic review, the results of the concluded staffing review exercise would be reviewed against the outcome of the strategic review and, accordingly, are not reflected in the proposed programme plan for 2026.

167. In 2025, in addition to the strategic review mandated by the Council, UNSMIL plans to conduct a lessons learned exercise for the upcoming municipal council elections.

Programme performance in 2024

Strengthened rule of law institutions and transitional justice process protecting the rights of all people in Libya

168. In 2024, the Mission provided technical assistance to the Presidential Council in finalizing a draft law on national reconciliation, which would lay the basis of a comprehensive and victim-centred transitional justice process. In partnership with the African Union, supported by the Chairs of the Berlin International Humanitarian Law/Human Rights Working Group and in line with the provisions of the Libyan Political Dialogue Forum road map, the Mission enabled consensus on a draft law that protects the independence of future transitional justice mechanisms. The Mission consistently engaged with victims and families of missing persons to document cases for future accountability.

169. Progress towards the objective is presented in the performance measure below (see table 36).

Table 36
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Draft law on combating violence against women to the legislative bodies was agreed Monitoring, analysis and reporting arrangements on conflict-related sexual violence established A high-level committee on arbitrary detention, representing the Attorney General, the military prosecution, the	The signing of a statement in favour of the adoption of the draft law by members of the legislative committee and women's block of the House of Representatives highlighted UNSMIL mobilization of further support; however, the House did not discuss the proposed draft law on the protection of women against violence, nor did it	A draft of the associations law was agreed by civil society organizations in 2024 and was reviewed by the Office of the United Nations High Commissioner for Human Rights and a gender consultant to ensure a comprehensive gender perspective A joint consultation forum was established as part of the monitoring, analysis and reporting

2022 (actual)	*2023 (actual)*	*2024 (actual)*
police and intelligence and judicial institutions, continued its work	adopt a comprehensive law on transitional justice	arrangements on conflict-related sexual violence
Human rights defenders and civil society actors in Libya are increasingly able to operate in a safer and more supportive environment	Members of the prosecutor's office were trained as part of efforts to strengthen the rule of law institutions to investigate, prosecute, adjudicate and prevent abuses and violations of human rights	Women human rights defenders in Libya are gaining stronger safeguards as the zero draft of the protection strategy nears completion
	Members of civil society organizations and women human rights defenders were trained on collecting data on conflict-related sexual violence and the monitoring of human rights violations	A draft law on national reconciliation was formulated by the Presidential Council through extensive consultations with victims' groups, supported by UNSMIL, and through UNSMIL-facilitated consensus with parliament, although the law remains to be adopted

Planned results for 2026

Result 1: unified security institutions promoting progress on security sector reform and the implementation of the ceasefire agreement, including the operationalization of a Libyan ceasefire monitoring mechanism

Programme performance in 2024 and target for 2026

170. In 2024, UNSMIL supported security sector reform and the ceasefire agreement by engaging the 5+5 Joint Military Commission and facilitating workshops, including a code of conduct session to enhance accountability and professionalism in the armed forces.

171. In 2026, UNSMIL will continue its support in planning and overseeing the withdrawal of foreign forces, foreign fighters and mercenaries. UNSMIL will support security sector reform, including Libya's unification of security sector institutions.

172. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 37).

Table 37
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Maintenance of the ceasefire agreement	Maintenance of the ceasefire agreement and development of the code of conduct for all security actors, as led by the Ministry of Defence of Libya	Progress towards unification continued, notwithstanding the continuing fragmentation of security sector institutions	National security/ military institutions unified under civilian oversight	National security/ military institutions unified under civilian oversight
Consensus built among stakeholders for the implementation of the action plan for the withdrawal of foreign forces, foreign fighters and mercenaries, including the establishment of a joint operations room and	Libyan ceasefire monitoring mechanism operationalized	"Bottom-up" initiatives built collaboration on legislation, border	Full implementation of the remaining articles of the ceasefire agreement, including the withdrawal of foreign fighters,	A regional coordination mechanism established for more effective border security
				Advanced implementation of

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
capacity-building programme for the local monitors Endorsement of the terms of reference for the establishment of a disarmament, demobilization and reintegration committee by the 5+5 Joint Military Commission to categorize armed groups Activation of a liaison and communication committee endorsed in meetings held in Cairo in November 2022 with neighbouring countries for the withdrawal of foreign fighters and mercenaries The 5+5 Joint Military Commission agreed on the terms of reference of the joint military force	Engagement and coordination with the Libyan liaison committee and liaison committees from neighbouring countries	security, electoral security, finance and administration Enhanced capacity and coordination of the 5+5 Joint Military Commission and its subcommittees Strengthened collaboration between the Libyan liaison committee and its neighbouring countries through targeted training programmes and capacity-building efforts While a comprehensive disarmament, demobilization and reintegration framework was not established in 2024, pre-disarmament, demobilization and reintegration community violence reduction programmes were initiated	foreign forces and mercenaries National and inclusive security sector reform initiatives established National disarmament, demobilization and reintegration committee set up and operational and a national disarmament, demobilization and reintegration plan developed	the remaining articles of the ceasefire agreement, including the withdrawal of foreign fighters, foreign forces and mercenaries National and inclusive security sector reform initiatives established National disarmament, demobilization and reintegration committee set up and operational and a national disarmament, demobilization and reintegration plan developed Community violence reduction programmes are expanded and led by Libyan authorities and local civil society organizations

Result 2: a comprehensive road map for holding national elections, towards the establishment of unified, elected, legitimate, inclusive and functional government institutions contributing to political stability and reconciliation

Programme performance in 2024 and target for 2026

173. In 2024, UNSMIL facilitated the resolution of the Central Bank of Libya leadership crisis and launched a United Nations-facilitated and Libyan-owned multitrack political process. UNSMIL provided technical assistance to the High Nationals Election Commission in the holding of peaceful elections in 58 municipalities.

174. In 2026, UNSMIL will address unresolved electoral framework issues and propose a viable road map for elections. UNSMIL will continue to advance a structured dialogue to consolidate consensus around a unified national vision for the future of the country. The Mission plans to implement quick-impact projects to enhance confidence in its mandate with respect to supporting the political process, reconciliation and prevention of intracommunal and intercommunal violence, while ensuring tangible benefits for local communities. The projects will focus, among others, on women's empowerment and income generation.

175. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 38).

Table 38
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
United Nations-facilitated talks between the House of Representatives and the High Council of State failed to reach agreement on a constitutional framework for elections Support continued for unification of the Central Bank of Libya, management of national deficits and access to foreign exchange in a manner that maintains currency value and steadies the price of vital commodities	Young people and women are more actively engaged in reconciliation efforts and political processes through increased consultations, ensuring that their voices shape Libya's future Constitutional and legal framework for elections is in place, with United Nations technical support, and assessed technically implementable by the High National Elections Commission Politically contested issues remain outstanding Libyan institutional stakeholders moved closer to resolving politically contested issues through the Mission's elections-enabling initiative to advance consensus	Through UNSMIL-led workshops, 500 young people and women increased their knowledge on key mission mandate issues, enabling them to engage in the political process *Ra'idat* trained 30 young women in leadership and advocacy "You Engage" strategy strengthened youth participation in governance United Nations-facilitated negotiations led to the resolution of the leadership crisis at the Central Bank of Libya in September 2024 and, after more than a decade, the Central Bank's Board of Directors was reinstated on 21 October Preparatory consultations were undertaken throughout the year and a stakeholder-driven political process was launched in December 2024, including a structured dialogue to consolidate consensus around a unified national vision for the future of the country	Enhanced participation and contribution of young people and women in reconciliation efforts and political processes	Increased participation and access and leadership of women and young people in political processes, at a minimum of 30 per cent Economic and financial institutions have increased capacity to provide macroeconomic stability and enact economic reforms Agenda and plan for comprehensive economic reforms are developed to achieve good governance and sustainable economy development Political road map and legal framework for the holding of national elections adopted

Result 3: establishment of a comprehensive legal framework for a victim-centred transitional justice and reconciliation process

Proposed programme plan for 2026

176. In 2026, the Mission will support Libyan stakeholders in developing and implementing a charter of rights, reinforcing existing legal frameworks, integrating human rights into the political agreement and facilitating reconciliation and transitional justice processes, and fostering peace and social cohesion. In collaboration with political actors, civil society organizations, victims' groups and the African Union, UNSMIL will advocate for the adoption of key legislative frameworks, including the draft national reconciliation law and the draft law on the protection of women from violence, as well as a new legislation on the rights of missing persons.

Lessons learned and planned change

177. The lesson learned for the Mission was that inclusive participation of Libya's diverse political, social and geographic components, including women and young people and ethnic minorities, is critical to sustainable peace and stability. In applying this lesson, the Mission will strengthen engagement with underrepresented groups and integrate broader social, economic and regional dynamics into its reconciliation and peacebuilding efforts.

178. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 39).

Table 39
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Effective reparations and accountability mechanisms are in place to address past grievances and promote justice	Drafting of key provisions for transitional justice and missing persons laws	Strengthened institutional capacity for implementation and victim engagement	Establishment of referral and repatriation mechanisms	Implementation of reparations and justice mechanisms with oversight structures
	Pilot mechanisms launched for victim support and referrals	Expansion of referral networks and repatriation pathways		Adoption of a comprehensive law on transitional justice and a related constitutional amendment to secure the transitional justice law
				Adoption of a comprehensive law on missing persons in line with the International Convention for the Protection of All Persons from Enforced Disappearance
				Operationalization of an independent truth and reconciliation

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
				commission mandated to investigate past violations and provide justice and reparations to victims while guaranteeing the non-recurrence of violations

Deliverables

179. Table 40 lists all deliverables of the Mission.

Table 40
Deliverables for the period 2024–2026, by category and subcategory

Substantive services for meetings (number of three-hour meetings)	**6**	**6**	**6**	**6**
2. Meeting of the Security Council	6	6	6	6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**17**	**2**	**17**	**10**
3. Projects relating to arms, ammunition management, counter-proliferation and humanitarian mine action	17	2	17	10
Seminars, workshops and training events (number of days)	**130**	**130**	**130**	**130**
4. Seminars and workshops on the political process, confidence-building, constitution-making, legislative and economic reform, electoral management and campaigns, mediation and conflict resolution, prevention of and response to incitement to violence and hatred, media, young female social media activists, digital Libyan dialogue, unification of the army, and demobilization of armed groups; operationalization of the Libyan ceasefire monitoring mechanism through monthly meetings with the Libyan liaison committees; monthly coordination meetings with mine action implementing partners; 4 mine action-related workshops/training events to build national capacities on weapons and ammunition management and explosive ordnance response management; and organization of a youth training and capacity-building programme for 35 young women for electoral participation and community engagement	130	130	130	130
Fact-finding, monitoring and investigation missions (number of missions)	**40**	**40**	**40**	**40**
5. Monitoring missions of the UNSMIL ceasefire monitoring component in support of the efforts of the Libyan ceasefire monitoring mechanism, to record and report on any alleged violation of the ceasefire, as well as analysis and reporting on the most recent developments in Libya, including periodic threat assessments of the overall situation that could have an impact on the ceasefire monitoring capacity-building programme established for the international monitors, Libyan monitors and the 5+5 Joint Military Commission (3 workshops); missions to support mine action efforts with regard to ammunition management; monitoring missions on the human rights situation, with visits to 6 prisons and detention centres, subject to access guarantees by official counterparts, including makeshift and secret detentions and other types of places where there are deprivations of liberty, such as women's shelters and reformatories; monitoring of and	40	40	40	40

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
reporting on some 60 cases of abuse and violations of human rights and violations of international humanitarian law, including sexual violence in conflict, and monitoring protection issues, with a focus on women and children; and monitoring of protection issues with a victim-centred approach and focus on women, children and migrants, reaching up to 30 beneficiaries who are referred to embassies concerned and/or legal and psychological aid for smooth integration into society				
Electoral missions (number of missions)	**224**	**224**	**224**	**224**
6. Electoral assistance missions to the High National Elections Commission headquarters in Tripoli or its field offices, providing technical advice and capacity-building to the electoral management body and to electoral counterparts	224	224	224	224

C. Substantive deliverables

Good offices: facilitate an inclusive political, security and economic dialogue through engagement with Libyan institutions, political parties and civil society, including women and young people; support for military unification efforts, including on disarmament, demobilization and reintegration and strategic security frameworks (20 beneficiaries); advance ceasefire implementation through monthly meetings of the 5+5 Joint Military Commission and liaison subcommittees (12–15 key actors), maintaining a database on foreign fighters, and conducting four capacity-building workshops for international monitors and Libyan subcommittees in 2025; engage with civil society organizations, women and young people (YouEngage) in four workshops to promote ceasefire implementation; support for transitional justice and accountability through technical advice and capacity-building for 100 lawyers, prosecutors and judges; and efforts to strengthen the judiciary with digital modernization efforts and best practices in post-conflict accountability; and the promotion of women's rights in line with the Convention on the Elimination of All Forms of Discrimination against Women, advocating for institutional protections, access to justice and mechanisms for survivors of violence, and support for women's empowerment units in security institutions and elections bodies.

Consultation, advice and advocacy: support for Libya's political process through electoral assistance, constitution-making advice and coordination with international partners (100 beneficiaries); provision of daily technical guidance to the High National Elections Commission, strengthening electoral management and advising on electoral dispute resolution and security planning; advice for the 5+5 Joint Military Commission and the Libyan-led and Libyan-owned ceasefire monitoring mechanism on legal and security frameworks, including capacity-building; support for the Libyan Mine Action Centre and partners on arms control, clearance of explosives remnants of war and ammunition management; organization of a mine action event with 50 stakeholders; advancement of inclusive, victim-centred and rights-based national reconciliation through workshops and seminars, reaching 50 beneficiaries, and confidence-building sessions with 50 participants from national and local authorities and civil society organizations; promotion of human rights through implementation of due diligence policy, civic space advocacy and coordination with four local justice institutions (30 participants), including the Ministry of Justice, the Ministry of Interior, the prosecutor's office and the High Judicial Council, for the release of individuals detained without a legal basis; support for the Libyan Political Dialogue Forum and House of Representatives women's caucus and civil society and women's groups, reaching approximately 500 women; establishment of an advocacy plan for the law on violence against women; establishment of the national consultation groups as part of the monitoring, analysis and reporting arrangements and on conflict-related sexual violence; support for security sector governance, reform and development, including reintegration of non-State armed groups and supporting the increased presence of women in the police force; advocacy for women's rights by facilitating discussions among institutions and actors working on women's rights and advising on laws and policies that promote gender equality; advice on violence against women and gender-based violence linked to the electoral process; support for reinforcing the capacity of 30 human rights defenders and women human rights defenders on the Monitoring, Analysis and Reporting Arrangements Technical Working Group; advocacy for the rights and protection of migrants and asylum-seekers and their access to justice, accountability and redress mechanisms, regardless of status; and advocacy and capacity-building to amplify the voices of young people and their meaningful participation in reconciliation efforts and political processes.

D. Communication deliverables

Outreach programmes, special events and information materials: multimedia and communications campaigns promoting the United Nations good offices and peace process, and content supporting reconciliation, social cohesion, prevention of hate speech and the respect for humanitarian and human rights law, targeting Libyan and international audiences; targeted meetings, events and leadership visits in the east, south and west, to engage young people and women from across Libya in key mandated areas; implementation of YouEngage to foster youth engagement on the economy (anti-corruption), disarmament, demobilization and reintegration and human rights; support for national and municipal youth bodies through training; delivery of the third year of the *Ra'idat* training programme for 35 young women from across Libya and support for the *Ra'idat* alumni network of women across Libya on advocacy programmes; implementation of the outcomes of misinformation and disinformation awareness-raising, including civic education to improve public understanding of the Mission's mandate; development of training programmes with media and universities on hate speech prevention; support for UNSMIL leadership in international engagements with Member States and diplomatic corps; and continued co-leadership of the United Nations Communication Group to ensure One United Nations messaging and staff training.

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

External and media relations: press conferences, statements and interaction with top-tier international and regional media outlets in Arabic and English, as well as select national media; frequent engagement with local media from all parts of Libya; reporting on the human rights situation and acting as a public resource; and conduct of a large-scale public perception survey across Libya.

Digital platforms and multimedia content: maintenance and development of targeted social media channels for women, young people and United Nations information platforms in Arabic and English to create and share content related to the Mission's mandate and the United Nations country team; and conduct of a public perception survey and analysis of social media trends to inform senior leadership decision-making.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

[a] One post is funded at 50 per cent and cost-shared with the Development Coordination Office.
[b] Includes one general temporary assistance position.
[c] Includes three general temporary assistance positions.
[d] Other level, unless otherwise stated.

180. The proposed resource requirements for 2026 for UNSMIL amount to $90,432,200 (net of staff assessment) and would provide for the deployment of 233 United Nations Guard Unit personnel ($6,609,000), salaries and related costs ($47,390,000) for the deployment of 276 international posts and positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 7 D-1, 18 P-5, 46 P-4, 46 P-3, 2 P-2 and 154 Field Service) and 139 national posts and positions (20 National Professional Officer, 1 General Service and 118 Local level), 6 international United Nations Volunteers and 7 government-provided personnel, as well as operational costs ($36,433,200), comprising the costs for consultants and consulting services ($82,600), official travel ($970,000), facilities and

infrastructure ($26,778,600), ground transportation ($203,200), air operations ($3,937,800), communications and information technology ($2,301,900), medical ($444,200) other supplies, services and equipment ($1,664,900) and quick-impact projects ($50,000).

181. A vacancy rate of 22.9 per cent has been applied to the estimates for international staff on the basis of the actual average vacancy rate in 2024. Vacancy rates of 15.0 and 26.1 per cent have been applied for the National Professional Officer and General Service categories of staff, respectively, on the basis of the actual vacancy rates in March 2025. A vacancy rate of 25.0 per cent has been applied to the estimates for United Nations Volunteer positions and a vacancy rate of 53.6 per cent has been applied to the estimates for government-provided personnel on the basis of the actual vacancy rates in March 2025. The estimates for United Nations Guard Unit personnel are based on the actual deployment in March 2025.

United Nations Support Mission in Libya comprehensive staffing review

182. UNSMIL conducted a comprehensive staffing review from September 2024 to March 2025. It was led by a task force in coordination with United Nations Headquarters and in consultation with the Field Staff Union. The review was designed to align staffing resources with mandate priorities and operational needs and to assess the mission support structure in line with the Department for Operational Support guidelines on mission support structure for small missions. By its resolution 2755 (2024), the Security Council requested the Secretary-General to submit a strategic review of UNSMIL to the Council no later than 30 September 2025, including recommendations for increasing the efficiency and effectiveness of the Mission's overall structure, including its objectives. Given that the strategic review will be finalized after the 2026 proposed programme budget, the outcome of the staffing review is not reflected in the current proposed budget for 2026. The Mission awaits the outcome of the strategic review to ensure alignment with the Mission's long-term strategic direction and future Council decisions.

183. As at 31 March 2025, the Mission had 52 long-vacant posts, of which 32 were posts approved for establishment at the end of March 2022 in the context of the 2022 revised estimates to support the ceasefire monitoring mandate (see A/76/6 (Sect. 3)/Add.8). In view of the pending strategic review, as well as the slow pace of operationalization of the 2020 ceasefire agreement, a vacancy rate of 100 per cent has been applied in the current proposed budget to 35 posts vacant for more than three years. The Mission's approved 2025 staffing complement includes eight general temporary assistance positions. It is proposed that these positions be continued in 2026, as detailed below.

Office of the Deputy Special Representative of the Secretary-General (Political)

184. The UNSMIL Mine Action Unit supports the delivery of the Mission's mine action mandate in line with Security Council resolution 2755 (2024) by providing technical expertise and support to the Libyan security institutions and the ceasefire mechanisms on mine action and weapons and ammunition management, and representing the Mission in relationship with relevant national mine action stakeholders and the United Nations country team. The temporary assistance position of Chief of Section, Programme Management (P-5), was established on 1 January 2022 in response to a recommendation from the Board of Auditors to improve Secretariat leadership of the UNSMIL mine action programme. Seven other temporary assistance positions were established under the that mine action programme as from 1 January 2025 as part of the transition of mine action delivery, from implementation undertaken in partnership with the United Nations Office for Project Services to direct Secretariat delivery. These include three positions of Programme Management Officer (P-4) and one position each of Programme Management Officer (P-3), Associate Programme Management Officer (National Professional Officer), Associate Administrative Officer (National Professional Officer) and Data Analysis Officer (National Professional Officer). Given the continuity of the UNSMIL mine action programme in 2026, it is proposed that the eight total temporary positions be continued to advance the UNSMIL mine action objectives in the most effective, cost-efficient and transparent manner.

185. The decrease in requirements for 2026 compared with the approved resources for 2025 is attributable mainly to: (a) reduced requirements for civilian personnel, due to the application of a 100 per cent vacancy rate to the 35 posts vacant for more than three years (15 international, 1 National Professional Officer and 19 Local level) as described in paragraph 183 above, offset by the application of lower vacancy rates for all categories of personnel, and the application of lower continuing vacancy rates for the seven positions (3 P-4, 1 P-3 and 3 National Professional Officer) that were approved for establishment in 2025 and budgeted with a vacancy rate of 50 per cent; (b) reduced requirements for air operations in line with historical flight hour utilization rates; and (c) reduced requirements under military contingents for the United Nations Guard Unit personnel, owing to the non-requirement for combat ration packs due to anticipated stock availability from prior-period procurement, as well as the removal of the provision for death and disability compensation following a review of historical expenditure pattern. The decrease is offset in part by increased requirements under: (a) facilities and infrastructure, due to additional requirements for the construction of a new road and parking area and a fuel station, construction of the infrastructure networks and other security enhancements in connection with phase two of the planned security enhancements works in the Mission's compound; and (b) new requirements for the quick-impact projects mentioned above.

Extrabudgetary resources

186. In 2025, extrabudgetary resources in the amount of $241,544 are projected to be utilized to support activities focused on facilitating an inclusive intra-Libyan political process, an economic track and capacity-building on human rights.

187. In 2026, extrabudgetary resources in the amount of $157,200 are projected to be used to assist in the implementation of an inclusive multi-track intra-Libyan political dialogue process facilitated by UNSMIL, to unify institutions and take the country to elections.

188. The decrease in the estimated extrabudgetary resources to be utilized in 2026 compared with 2025 is due mainly to the duration of funding in support of the capacity-building on human rights.

189. In 2025, UNSMIL expects to receive $611,905 from United Nations agencies, funds and programmes, as well as other entities, in exchange for services provided, including shared premises and the provision of security services across Libya. These funds will support one Local level post, medical services and the costs associated with maintaining United Nations compounds, including security services, rent, utilities and maintenance services.

190. For 2026, UNSMIL expects to receive $611,905 from United Nations agencies, funds and other programmes through the cost-recovery arrangements. The estimate covers a wide range of services provided by the Mission, comprising air transportation, ground transportation, freight services, medical services, security and security-related training services, communications and information technology services, administrative support, accommodation and office space, personal protective equipment and the maintenance of vehicles and facilities.

8. United Nations Verification Mission in Colombia

($86,953,100)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

191. The United Nations Verification Mission in Colombia is mandated to verify five key aspects of the Final Agreement for Ending the Conflict and Building a Stable and Lasting Peace, adopted in 2016 by the Government of Colombia and the former Revolutionary Armed Forces of Colombia – People's Army (FARC-EP), comprising: (a) the reintegration of FARC-EP members into political, economic and social life (sect. 3.2 of the Agreement); (b) the implementation of personal and collective security and protection measures for ex-combatants, and comprehensive security and protection programmes for the communities and organizations in the territories (sect. 3.4 of the Agreement), since 2021; (c) compliance with and implementation of the restorative sentences issued by the Special Jurisdiction for Peace (sect. 5.1.2 of the Agreement); since 2023 (d) the verification of the comprehensive rural reform (sect. 1 of the Agreement); and (e) the implementation of the ethnic chapter (sect. 6.2 of the Agreement).

192. Moreover, the Security Council, in its resolution 2694 (2023), expanded the Mission's mandate to monitor and verify the implementation of the Bilateral, National and Temporary Ceasefire Agreement between the Government of the Republic of Colombia and the Ejército de Liberación Nacional (ELN).

193. The Mission's mandate is defined in Security Council resolutions 2366 (2017), 2574 (2021), 2673 (2023) and 2694 (2023). By its resolution 2754 (2024), the Council renewed the mandate until 31 October 2025.

Programme of work

Objective

194. The objective, to which the Mission contributes, is to advance the effective implementation of the provisions of the Final Agreement concerning reintegration, security guarantees, restorative sentences, comprehensive rural reform and the ethnic chapter, and to advance the Ceasefire Agreement.

Strategy and external factors for 2026

195. To contribute to the objective, the Mission will:

(a) Apply a proactive and inclusive approach to verification, which includes advocacy, good offices and close engagement with the parties to the Final Agreement and relevant institutions and authorities at the international, national, regional and local levels, as well as communities, women and ethnic peoples;

(b) Conduct independent verification of the implementation of the Final Agreement and participate, jointly with the parties, in key forums and institutions created for the implementation of the Final Agreement;

(c) Promote constructive dialogue and trust-building between the Government and the Comunes party to address pending issues relating to peace implementation and maintain constant coordination and dialogue with key interlocutors, including actors across the political spectrum, civil society, ethnic organizations, the private sector and the international community, to foster support for the implementation of the Final Agreement;

(d) In keeping with commitments of the Pact for the Future, in particular its action 18, provide good offices to support the implementation of the Final Agreement, monitor conflict dynamics at local levels between armed groups, support the role of the Special Representative of the Secretary-General in political peace dialogues and help to build and sustain peace in Colombia.

196. The above-mentioned work is expected to result in:

(a) Increased trust between the parties to the Final Agreement; sustainability of the reintegration process, as well as opportunities for political participation, with a specific focus on security guarantees for former combatants, social leaders and communities; and progress in the implementation of key components of the comprehensive rural reform, including increased government capacity to prevent and address land-related conflict and progress in the implementation of development plans with a territorial focus in prioritized areas, with the active participation of local communities;

(b) Enhanced State capacity, presence and responsiveness to better prevent and investigate attacks against former combatants, social leaders and communities, as well as increased trust and understanding between the parties through tripartite coordination mechanisms, while taking into consideration the specific needs of women, children, former combatants of ethnic origin and other communities at risk;

(c) Enhanced trust in the transitional justice system and the Government providing the conditions necessary for the Special Jurisdiction for Peace to ensure compliance with and implementation of its restorative sentences and to contribute to the realization of victims' rights to truth, justice, reparation and non-repetition and their full inclusion in the restorative system;

(d) Strengthened implementation of the ethnic provisions of the Final Agreement; enhanced coordination between government institutions, ethnic authorities and their organizations, including women-led organizations, and increased engagement of the international community, including the United Nations system;

(e) Increased trust in the peace dialogue efforts, thereby contributing to a reduction in violence and improvements in the humanitarian situation in conflict-affected regions.

197. With regard to cooperation with other entities, the Mission engages extensively with international, national and local actors in support of its mandate. At the international level, the Mission's close engagement with the diplomatic community and regional organizations helps to identify areas of mutual interest and support for peace consolidation. At the national and local levels, the Mission strengthens ties with political, civil society and private sector actors, including community, religious, youth, women and ethnic leaders and persons with disabilities' organizations, as well as transitional justice institutions. The Mission continues to bolster its relationships with departmental and local authorities, in particular as they gain more responsibilities regarding the reintegration process, ensuring security guarantees for communities and supporting society's participation in the peace process.

198. With regard to inter-agency coordination, the Mission continues to work closely with the United Nations country team and the resident coordinator. Through the revised United Nations Sustainable Development Cooperation Framework, the Mission and the country team developed five priorities in establishing links between sustainable peace and the 2030 Agenda for Sustainable Development, promoting coherence across the peace and security and the development pillars.

199. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Continued international support for the close engagement of the Mission and the United Nations system in the peace process, and national and local authorities and relevant parties remain committed to collaborating with the Mission;

(b) The Government and legislature will remain focused on the implementation of the Final Agreement;

(c) National and local authorities remain engaged in increasing State presence; authorities, State entities and mechanisms tasked with preventing, addressing and investigating security incidents will remain committed to the prioritized populations in the Final Agreement in conflict-affected areas;

(d) Continued progress in judicial processes before the Special Jurisdiction for Peace, resulting in the issuance and implementation of restorative sentences;

(e) The Government and ELN resume peace efforts with a view to reducing violence.

200. The Mission integrates a gender perspective into its activities, deliverables and results, as appropriate, and ensures the adequate implementation of its gender parity directives and strategy. The Mission ensures that the specific needs of former FARC-EP women are incorporated in full into programme design, implementation and monitoring, in particular the security guarantees for women leaders and ex-combatants, and referrals to assistance provided by Colombian authorities for victims and survivors of conflict, including from sexual and gender-based violence. The Mission fosters a gender perspective and intersectional analysis in the verification of restorative sentences, in particular concerning case 11 and others relating to sexual and gender-based violence, as well as in rural reform and the ethnic chapter, with a specific focus on the needs of peasant and ethnic women. The Mission, in line with action 19 of the Pact for the Future, provides support to the national action plan on Security Council resolution 1325 (2000) adopted in 2024, which is expected to strengthen the implementation of the gender provisions of the Final Agreement and reinforce the full, equal and meaningful participation of women in peacemaking.

Programme performance in 2024

Enhanced conditions for implementation of the Final Agreement

201. In October 2024, the Government adopted a rapid response plan to accelerate the implementation of the Final Agreement, which includes the establishment of pacts between national and local authorities to accelerate the implementation of the development programmes with a territorial focus and to enhance their transformative potential in conflict-affected regions, as well as action related to the comprehensive rural reform and security guarantees, among others. The Mission, through the good offices of the Special Representative of the Secretary-General and the technical teams, accompanied the Government in the formulation of the plan, including identifying key territorial priorities to be included in the pacts between national and local authorities. The plan underlined the execution of development and infrastructure projects in key regions for the Final Agreement, thus ensuring the mobilization of resources and the engagement of relevant local actors to accelerate implementation of the Agreement.

202. Progress towards the objective is presented in the performance measure below (see table 43).

Table 43
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Rapid response plan launched nationally to accelerate implementation of the Final Agreement Key priorities identified include development programmes with a territorial focus, land distribution and measures to strengthen security guarantees

Planned results for 2026

Result 1: progress in the effective implementation of comprehensive rural reform and ethnic chapters

Programme performance in 2024 and target for 2026

203. In 2024, the Mission focused on institutional coordination and consensus-building for the implementation of the rural reform and ethnic chapter, leading to agreements to boost the implementation of ethnic chapter in Chocó Department, timely land distribution and the delivery of productive assets to relevant actors.

204. In 2026, the Mission will take stock of the Government's goals and promote the continuity of strategies and policies related to the implementation of the comprehensive rural reform and ethnic chapter. Efforts will be aimed at advancing the comprehensive rural reform at the local and departmental levels and fulfilling the commitments outlined in the ethnic chapter.

205. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 44).

Table 44
Performance measure

	acquisition and transfer of tenure Progress made in the planning of the development programme with a territorial focus for a comprehensive and high-impact approach, with civil society participation Implementation of a coordination mechanism between all relevant stakeholders for the ethnic chapter Establishment of priorities and targets for through the signing of the pact for the implementation of the ethnic chapter	progress in designing a funding plan for strategic projects and territorial pacts established under the rapid response plan Enhanced collaboration with the National Commission of Indigenous Territories, incorporating territorial aspects of the ethnic chapter related to comprehensive rural reform Ethnic chapter provisions incorporated into key public policies: demining strategy, victim reparations and land restitution for ethnic peoples prioritized	Strengthened institutions in charge of implementing the ethnic chapter Enhanced collaboration between government entities implementing the ethnic chapter and Afro-Colombian and Indigenous leaders and their organizations, private sector and other stakeholders Progress in the targets set in the pact for the implementation of the ethnic chapter is on track	associated coordination mechanisms Progress made in the implementation of updated development programmes with a territorial focus plans Advances in the implementation of the ethnic chapter based on the pact commitments spelled out by the Government Departmental governments incorporated the provisions of the ethnic chapter into their public policies and developed road maps for departmental implementation

Result 2: strengthened security conditions for communities in conflict-affected areas through advances in the implementation of the Final Agreement and effective implementation of the Ceasefire Agreement between the Government and the Ejército de Liberación Nacional

Programme performance in 2024 and target for 2026

206. In 2024, the Mission was instrumental in advancing security and protection measures for former combatants and communities, including the adoption of the public policy for dismantling illegal armed groups and criminal organizations and strengthening the framework of the strategic security and protection plan. The Mission, through the Monitoring and Verification Mechanism of the Ceasefire Agreement, contributed to violence reduction, while closely monitoring local conflict dynamics. Although the parties did not renew the Agreement, they met twice in efforts to overcome obstacles to a possible resumption of the ceasefire.

207. In 2026, the Mission will continue to advance prevention and protection policies and analyse conflict dynamics. The Special Representative of the Secretary-General will continue his good offices role in peace dialogues.

208. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 45).

Table 45
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Confrontations between the parties prevented and the de-escalation of violence in the regions supported: four fatalities among ELN members and security forces recorded during the ceasefire (August 2023 to August 2024) Enhanced policies and plans on security guarantees for former combatants and affected communities: approval of the public policy on the dismantling of criminal organizations and armed groups; implementation of the emergency evacuation and extraction protocol; and the strengthening of the Special Investigations Unit	Progress in the implementation of the Ceasefire Agreement between the Government and ELN Ceasefire agreements and protocols are enhanced, including through technical support provided by the Mission within its participation in the Monitoring and Verification Mechanism Reduction in violent clashes between public forces and illegal armed groups Improved security conditions for communities in conflict-affected areas as a result of the ceasefire	Implementation of the public policy on the dismantling of criminal organizations and armed groups in 2 pilot areas and acceleration of its implementation in the other 11 prioritized areas Prevention and protection mechanisms and policies implemented Reduced violence through increased access to programmes for former combatants, leaders and organizations in rural areas Reduced violence between armed groups and public forces; improved security in conflict-affected areas Enhanced trust between the parties to the peace dialogues

Result 3: effective implementation of restorative sentences for the restoration of victims' rights and legal certainty for those under the Special Jurisdiction for Peace

Proposed programme plan for 2026

209. In 2025, the Mission anticipates the issuance of the first restorative sentences by the Special Tribunal for Peace of the Special Jurisdiction for Peace, cases 1 and 3, the first since the signing of the Final Agreement. The Mission has engaged with relevant entities, fine-tuning methodology and strengthening the monitoring and verification mechanism and information-sharing mechanisms. The Mission engaged with institutions responsible for ensuring that conditions for the implementation of the restorative sentences are fulfilled.

Lessons learned and planned changes

210. Notwithstanding advances, there has been limited progress towards the issuance of restorative sentences, with four cases in trial phase. To help to remedy the situation, the Mission will increase its advocacy and good offices with relevant entities, disseminating information on the transitional justice system to build trust between the parties and communities, including through the Monitoring and Verification Mechanism of restorative sentences established with the Special Jurisdiction for Peace.

211. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 46).

Table 46
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	–	Monitoring and Verification Mechanism of restorative sentences with the Special Jurisdiction for Peace is fully operational and provides relevant information for verification purposes Mission verifies that the State institutions provide conditions for the effective implementation of the restorative sentences Compliance with the restorative sentences by individuals subject to the Special Jurisdiction for Peace is verified

Deliverables

42. Events with the ethnic authorities and representative organizations and Government bodies on the implementation of the ethnic chapter and peace processes	–	–	15	20

C. Substantive deliverables

Good offices: parties advance implementation of the Final Agreement, including gender provisions; advocacy for increased dialogue between relevant stakeholders; visits from key stakeholders to reintegration areas where former combatants are developing productive projects and community-based initiatives, including reinforcing the role of the technical working group on gender within the National Reintegration Council; implementation of the women and peace and security agenda as part of the implementation of the Final Agreement, including advancing women's participation; support for peace dialogues, to facilitate communication between parties and support the implementation of relevant agreements; and increased participation of society in peace efforts.

Consultation, advice and advocacy: consultations and advice to mitigate challenges in the conditions for increased political participation by the Comunes political party, reintegration of former combatants, and improving security and protection measures and conditions; advice and support to advance implementation of the comprehensive rural reform and ethnic chapter, advocacy for the full implementation of the gender provisions of the Final Agreement, including support for government counterparts and regular consultation with women's organizations and organizations of former combatants; implementation of the national action plan regarding Security Council resolution 1325 (2000) on women and peace and security; strengthened Special Jurisdiction for Peace's information management mechanisms to facilitate information-sharing; and consultations and coordination between the Government and ELN to increase trust and support the resumption of talks.

Databases and substantive digital materials: innovative solutions leveraging artificial intelligence; consolidated regional reporting system; platforms to manage information relating to ceasefires and platform for the verification of restorative sentences to facilitate reporting and analytical tools for trends and patterns of compliance; integrated tools for verification of reintegration and rural land reform; tripartite platform on organizations engaged in economic reintegration and productive projects; increased scope of the *equipos y comunidades de acción por la paz* platform covering incident and cases reporting on the security guarantees challenges for former combatants, social leaders and communities, as well as the violence affecting other aspects of the Final Agreement verified by the Mission; integrated tools for the verification of the ethnic chapter and gender mainstreaming; and tripartite database of transit to legality of former FARC-EP combatants.

D. Communication deliverables

Outreach programmes, special events and information materials: strengthening of the Mission's public image through information materials and activities to highlight progress in the Mission's mandate and its role in sustaining peace.

External and media relations: partnerships with radio and television networks, in local and national media; production of at least 30 multimedia pieces (written articles and multimedia material) about the implementation of the Final Agreement; hosting of regular conferences with key media partners; organization of press conferences with senior leadership; at least two press briefings and nine media field visits; monitoring of media coverage; and preparation of media briefing products to boost the knowledge about the Mission's work in support of the Colombian peace process.

Digital platforms and multimedia content: social media channels and United Nations information platforms to create and disseminate information on the Mission's mandate; efforts to reach at least 145,500 followers on X (formerly Twitter), 78,200 followers on Facebook and 34,700 on Instagram; and implementation of strategies to address misinformation, disinformation and hate speech for early warning and response (socialization workshops on the United Nations Strategy and Plan of Action on Hate Speech).

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 48
Financial resources
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*

Change	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–	–

[a] Other level, unless otherwise stated.

213. The proposed resource requirements for 2026 for the Mission amount to $86,953,100 (net of staff assessment) and would provide for the deployment of 188 military observers ($6,480,800), salaries and common staff costs ($47,383,800) for 181 international posts (1 Under-Secretary-General, 1 Assistant Secretary-General, 6 D-1, 26 P-5, 38 P-4, 58 P-3, 2 P-2 and 49 Field Service), 218 national posts (113 National Professional Officer, 1 General Service and 104 Local level) and 183 United Nations Volunteers (153 international and 30 national), and operational costs ($33,088,500), comprising the costs for consultants and consulting services ($458,800), official travel ($2,106,200), facilities and infrastructure ($8,144,900), ground transportation ($2,274,100), air operations ($12,116,300), marine operations ($462,000), communications and information technology ($5,084,400), medical ($427,800) and other supplies, services and equipment ($2,014,000).

214. A vacancy rate of 7.5 per cent has been applied to military observers on the basis of the actual average vacancy rate during 2024.

215. A vacancy rate of 18.8 per cent has been applied to the estimates for international staff and 30.1 per cent for National Professional Officers on the basis of the actual vacancy rate in March 2025, and 28.1 per cent for the Local level categories staff on the basis of the actual average vacancy rate in 2024. Vacancy rates of 5.0 and 7.0 per cent have been applied to international and national United Nations Volunteers, respectively, on the basis of the actual vacancy rates in March 2025. A vacancy rate of 50 per cent has been applied to the estimates for the posts proposed for reassignment.

216. To ensure effective mandate delivery, a number of changes to the organizational and staffing structure are proposed for 2026, including the redeployment of three posts to increase conflict analysis capacities in key offices, given that the fragmentation of armed groups, the increasingly

localized conflicts and threats to former combatants could affect implementation of the Final Agreement, as well the reassignment of two posts, as detailed below.

Office of the Special Representative of the Secretary-General

(a) Redeployment of one post of Assistant Public Information Officer (National Professional Officer) from the Information Management Unit under the Office of the Deputy Special Representative of the Secretary-General to the Strategic Communications and Public Information Unit within the Office of the Special Representative of the Secretary-General, to assist in promoting public awareness of the Mission's mandate and the peace process. Efforts are needed to enhance strategic communication and reach a larger audience with consistent and balanced information, as well as raise awareness of the Peace Agreement, in particular in anticipation of the first restorative sentences by the Special Jurisdiction for Peace, which are expected in 2026. The incumbent will assist in producing critical graphic and communication materials nationwide and awareness-raising campaigns, boosting trust in the transitional justice system;

Office of the Verification of Security Guarantees

(b) Redeployment of one long-vacant post of Liaison Officer (National Professional Officer) from the regional office in Florencia to the Office of the Verification of Security Guarantees within the Office of the Deputy Special Representative of the Secretary-General in Bogotá. The Liaison Officer will analyse evolving conditions nationwide, including threats, actors and dynamics, for expanded conflict analysis and assessment of potential impact on former combatants and victims of the conflict for preventive recommendations, preparedness, advocacy and engagement at the national level;

Office of the Chief of Staff

(c) Redeployment of one long-vacant post of Liaison Officer (National Professional Officer) from the regional office in Villavicencio to the Office of the Chief of Staff in Bogotá to improve information-gathering situational awareness and analysis for strategic recommendations to the Special Representative of the Secretary-General and mission leadership;

Transport Unit

(d) Reassignment of one vacant post of Field Security Assistant (Local level) from the Security Section's presence in Arauca to the Transport Unit as a Driver (Local level), to provide dedicated capacity to the Deputy Special Representative of the Secretary-General;

Financial Resourcing, Performance and Risk Management Unit

(e) Reassignment of one post of Field Security Assistant (Local level) from the Regional Security Section's presence in Ocaña to the Financial Resourcing, Performance and Risk Management Unit in Bogotá as a Finance and Budget Assistant (Local level), to contribute to better, informed decision-making. This will ensure robust financial management and operational efficiency, especially while the Mission is experiencing liquidity constraints and needs to implement additional management measures.

217. The increase in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) increased requirements for military observers due to the increase in the mission subsistence allowance rates (higher actual daily rate of the "after 30 days" mission subsistence allowances of $94 effective 1 January 2025 compared with the rate of $63 applied in the approved budget for 2025), as well as the application of a lower vacancy rate of 7.5 per cent compared with 10.1 per cent in the 2025 budget; (b) additional requirements for international United Nations Volunteers due to an increased monthly living allowance; (c) increased requirements for air operations due to a change in contractual arrangements, which increased guaranteed fleet costs, and to additional flight hours for fixed-wing and rotary-wing aircraft and related requirements for

aviation fuel necessary to support mandate implementation in the locations outside Bogotá and ensure connectivity between locations; and (d) increased requirements for marine operations to support additional riverine activities to cover an enlarged mission area, especially the locations that are not accessible by ground or air transportation. The increased requirements are offset in part by: (a) reduced requirements for international staff due to lower estimated common staff costs (estimated common staff costs as a percentage of salary costs of 51.7 per cent, compared with 56.8 per cent in the 2025 budget); (b) reduced requirements for national staff due to the application of higher vacancy rates for National Professional Officers and Local level staff; (c) reduced requirements for consultants due to the higher reliance on in-house expertise; (d) reduced requirements under facilities and infrastructure owing to lower estimated costs for the rental of premises and the non-acquisition of furniture; (e) lower estimated costs for the rental of vehicles due to efficiencies gained through the full transfer of the rental of vehicles to the UN Fleet modality; (f) reduced acquisition of communications and information technology equipment; (g) lower requirements for medical services; (h) lower requirements for freight due to fewer acquisitions; and (i) lower requirements under other services due to a planned reduction in meeting facilitation, as a cost-avoidance measure.

9. United Nations Mission to Support the Hudaydah Agreement

($30,040,500)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

218. The United Nations Mission to Support the Hudaydah Agreement (UNMHA) is responsible for supporting the parties to the Stockholm Agreement (S/2018/1134, annex) in implementing the provisions of the Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa (Hudaydah Agreement), and their commitments in accordance with the Hudaydah Agreement. The mandate derives from Security Council resolution 2452 (2019) and was extended in subsequent resolutions, most recently in resolution 2742 (2024).

219. The mandate of the Mission is to: (a) lead and support the functioning of the Redeployment Coordination Committee, assisted by a secretariat staffed with United Nations personnel, to oversee the governorate-wide ceasefire, the redeployment of forces and mine action operations; (b) monitor the compliance of the parties with the ceasefire in Hudaydah Governorate and the mutual redeployment of forces from the city of Hudaydah and the ports of Hudaydah, Salif and Ra's Isa; (c) work with the parties so that local security forces assure the security of the city of Hudaydah and the ports of Hudaydah, Salif and Ra's Isa in accordance with Yemeni law; and (d) facilitate and coordinate United Nations support to assist the parties to fully implement the Hudaydah Agreement.

Programme of work

Objective

220. The objective, to which the Mission contributes, is to support the parties in the implementation of the Hudaydah Agreement on the City of Hudaydah and the Ports of Hudaydah, Salif and Ra's Isa, and their commitments in accordance with the Agreement.

Strategy and external factors for 2026

221. To contribute to the objective, UNMHA will:

(a) Lead and support the sustained operation of the Redeployment Coordination Committee as the key oversight body of the Hudaydah Agreement, while strengthening and realigning the joint structures previously agreed as part of the framework of the Committee to address shifted realities and conflict-affected areas in the evolved environment, including de-escalation, dialogue and liaison mechanisms in a joint format;

(b) Maintain increased monitoring capacity within the authorized ceiling to expand and strengthen monitoring of the ports with regular patrols to all port installations, with a view to monitoring the redeployment of all military forces from such locations, and the removal of military manifestations, in accordance with the mandate. On-the-ground patrolling will also be expanded in the territories held by the parties on either side of the front lines, including conflict-affected areas;

(c) Adapt to the evolving environment across Hudaydah Governorate to ensure that it is best positioned to advance its mandate, which will include establishing and operating a presence in

Khawkhah district under the Government of Yemen south of the current front lines, in conjunction with the operation of its base in Hudaydah city, to ensure equitable representation across the territories of both parties;

(d) Provide technical support, incident data management and advocacy to advance mine action efforts in Hudaydah Governorate, in close coordination with the Resident and Humanitarian Coordinator for Yemen and other partners and in accordance with the priorities identified by both sides, with a focus on locations posing a high risk to civilians;

(e) Advance assessment and coordination to implement community-focused projects in key locations on either side of the front lines, with a focus on vulnerable groups, including conflict-affected groups, women, young people and children, and in coordination with and fully complementary to wider development action that supports the local population, de-escalates tensions between communities, strengthens social cohesion and enhances stability;

(f) Further strengthen monitoring processes and procedures through enhanced real-time situational awareness, data integration and robust watchkeeping, aligning with United Nations-wide priorities such as United Nations 2.0 and the Pact for the Future, while reinforcing crisis management and contingency planning.

222. The above-mentioned work is expected to result in:

(a) Enhanced trust, confidence and dialogue between the parties to strengthen the implementation of the Hudaydah Agreement as a key contribution to the broader peace process;

(b) Equal and sustained access on both sides of the frontline in the relevant territories of the parties in Hudaydah Governorate;

(c) Strengthened ceasefire implementation across the governorate and improved security of the local population, including a reduction in casualties resulting from ceasefire violations;

(d) Maintenance of the security of Hudaydah city and its ports, and assurance that military forces are redeployed from such locations, remaining military manifestations are removed and security responsibilities are assumed by local security forces in accordance with Yemeni law in these locations;

(e) Reduced violence in Hudaydah Governorate due to the de-escalation of tensions between the parties, enhanced stability and strengthened measures to protect the local population;

(f) Advancement of mine action interventions in Hudaydah city, its ports and other priority locations, reducing the risk of civilian casualties caused by mines and explosive remnants of war, including the coordination of mine action efforts, the provision of technical advice to stakeholders, risk awareness sessions and advocacy;

(g) Enhanced process to ensure implementation of the Hudaydah Agreement on the basis of the inclusive and strengthened meaningful participation of women and young people in efforts towards bringing and sustaining peace.

223. With regard to cooperation with other entities, the Mission liaises with the parties to ensure the safety and security of mission personnel and premises, and the unhindered movement of mission personnel and equipment, provisions and essential supplies into and within Yemen. The Mission engages, where possible, with local stakeholders, partners and other bodies within Hudaydah Governorate to ensure a unified approach in supporting the Hudaydah Agreement and its implementation and identifying opportunities to enhance stability and confidence in this process while increasing awareness of its mandate. The Mission maintains its engagements with regional actors that can have a positive influence on progress towards mandate implementation.

224. With regard to inter-agency coordination, the Mission coordinates closely with the Office of the Special Envoy of the Secretary-General for Yemen. The two entities share information and analysis, coordinate movements, cooperate on briefings to the Security Council and align messaging, while sharing a mission support structure and premises in common locations to ensure the prudent use of resources. Operationally, UNMHA continues its partnership with the United Nations country team on

matters related to health facilities, security, premises and casualty evacuations by air using United Nations Humanitarian Air Service and UNMHA flights, whenever required. The Mission maintains close working relationships with the Resident and Humanitarian Coordinator and members of the United Nations country team, in particular the World Food Programme, the United Nations Children's Fund, UNDP and the Office for the Coordination of Humanitarian Affairs, as well as other development and humanitarian actors operating in Hudaydah Governorate as part of its comprehensive approach to mandate implementation. The Mission also consults and coordinates, as necessary, with the Office of the United Nations High Commissioner for Human Rights and UN-Women to this end.

225. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) There is sufficient political will and engagement from domestic, regional and international stakeholders to enable the implementation of the Hudaydah Agreement;

(b) Efforts to attain a nationwide durable ceasefire, led by the Office of the Special Envoy of the Secretary-General for Yemen, will progress;

(c) Major combat operations between the parties will not recommence in Hudaydah Governorate, while the impact of the situation in the region will not exacerbate local conditions;

(d) A political environment exists that facilitates the work of the Redeployment Coordination Committee and its subsidiary joint mechanisms;

(e) The parties resume their full participation in the activities of the Redeployment Coordination Committee and commit themselves to a revived dialogue process and participation in subsidiary joint mechanisms to monitor the ceasefire and foster de-escalation, confidence-building and collaborative demining efforts;

(f) The Government of Yemen continues to support the establishment of a mission presence in the south of the governorate to ensure the Mission's equitable access to both parties and its unimpeded functioning;

(g) A suitably safe, secure and permissive operating environment exists, and sufficient confidence is established between the parties and other partners to generate sustained support for and participation in the activities of the Mission;

(h) The parties facilitate the Mission's full access and freedom of movement to all areas required for the effective observation and monitoring of the ports of Hudaydah, Ra's Isa and Salif to enable daily access to all port installations and to conflict-affected areas across the governorate;

(i) The parties provide the access and cooperation required to advance mine action interventions in Hudaydah city, the ports and areas of priority in other districts to enhance the protection of the local population in the governorate's shifted context.

226. UNMHA integrates gender perspectives and the women and peace and security and youth, peace and security agendas into its operations and activities in line with the Department of Peacebuilding and Political Affairs policy on women and peace and security. The Mission continues to advance the role of women and young people in carrying out its mandate and advocate for a gender-inclusive approach to the implementation of the Hudaydah Agreement. It will expand its work in empowering women leaders to meaningfully contribute to peacebuilding in Hudaydah Governorate, while also fostering a grassroots approach to women's involvement in community-level initiatives in conflict-affected districts. Gender considerations will be mainstreamed across the Mission's conflict and political analysis and through the delivery and monitoring of its quick-impact projects.

227. In line with the United Nations Disability Inclusion Strategy and in furtherance of its mission-specific disability inclusion strategy, UNMHA will continue to promote an inclusive process to implementing the Hudaydah Agreement; amplify the stories of persons with disabilities in Hudaydah, in particular the victims of mine and explosive remnants of war; mainstream disability inclusion into quick-impact project design and implementation; build partnerships with local organizations for persons with disabilities, disability centres and international non-governmental

organizations; and build on the progress made in improving physical access to mission facilities for persons with disabilities.

Programme performance in 2024

Enhanced engagement with the parties resulted in strengthened implementation of key elements of the mandate and the Hudaydah Agreement

228. In 2024, local, national and regional developments, including attacks in and around the Red Sea by the Houthis (who call themselves Ansar Allah) since November 2023 and corresponding airstrikes on multiple targets in Hudaydah Governorate and beyond since January 2024, have demonstrated that local dynamics in Hudaydah and parties' attitudes towards the Hudaydah Agreement are affected significantly by regional dynamics. These developments also continue to have an impact on the Mission's ability to deliver its mandate and affect the safety and security of its personnel.

229. Notwithstanding the extremely challenging political and security situation in its efforts to reinvigorate parties' commitments to the Hudaydah Agreement and the implementation of its mandate, the Mission reinforced its engagement with the parties, focusing on achieving systematic patrolling to the ports of Hudaydah, Ra's Isa and Salif and expanding areas for collaboration in the south of the governorate with the Government of Yemen, through key leadership engagement and separate but regular meetings with the members of the Redeployment Coordination Committee from both sides and by leveraging quick-impact projects. Those efforts resulted in enhanced engagement of the parties in strengthened implementation of key elements of the mandate and the Hudaydah Agreement, including a doubling of the frequency of patrols to the Hudaydah port since March 2024, a 22 per cent increase in overall patrolling compared with 2023, including in other areas in the southern districts of the governorate, and several important breakthroughs between the Mission and the Government of Yemen, in particular on the expansion of Mission's presence in the southern districts of Hudaydah Governorate.

230. Progress towards the objective is presented in the performance measure below (see table 50).

Table 50
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Improved situational awareness and analytical products supported partner planning and programming in Hudaydah Governorate	Increased joint monitoring visits with United Nations country team members enhanced coordination in conflict-affected districts	Strengthened support for the implementation of the Hudaydah Agreement by the parties, demonstrated through increased patrolling and increased collaboration between the Mission and the Government of Yemen in support of the mandate

Planned results for 2026

Result 1: establishment of a physical mission presence in Government of Yemen-controlled territory in Hudaydah Governorate to build confidence of the parties towards the Hudaydah Agreement

Proposed programme plan for 2026

231. In 2024, UNMHA achieved an important milestone in the establishment of a presence in Government of Yemen-controlled territory by securing governmental approval, identifying the site in the Khawkhah district and signing a lease and contract for construction works at the site in December 2024. The construction of the site will commence in 2025. Once an initial mission presence is

established and operational, UNMHA expects to increase the number of monitoring patrols to the frontline and enhanced engagement with the local authorities and communities within the mandate area. A further transition to full operating capability is planned for 2026, which will provide additional opportunities for cooperation with local partners in implementing the Hudaydah Agreement and further strengthen trust towards the Mission.

232. Expected progress towards the objective is presented in the performance measure below (see table 51).

Table 51
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Establishment of the Mukha' hub for operations in southern Hudaydah Governorate	Regular monitoring visits to southern Hudaydah Governorate	Site identified and lease and construction contracts signed	UNMHA installation established in Khawkhah district	Increased confidence and engagement of the parties and local political, military leaders and community towards the Hudaydah Agreement and the Mission following the deployment of core team to Khawkhah

Result 2: re-established dialogue between the parties at the technical level promotes confidence-building and de-escalation

Proposed programme plan for 2026

233. Engaging the parties in regular technical and operational-level discussions is crucial for de-escalating hostilities, building confidence, fostering trust and identifying collaborative opportunities between the parties to mitigate the impact of conflict on civilians in frontline areas of Hudaydah. The engagement will also help to prepare the ground for the re-establishment of a joint Redeployment Coordination Committee. The Mission has routinely approached the parties to re-establish a technical-level forum and has identified a range of issues that can be explored as confidence-building measures. These efforts have been met with initial positivity by the parties, which will be leveraged to provide space and opportunities for further dialogue in 2025 and 2026.

Lessons learned and planned change

234. The lesson for the Mission was that sustained engagement and the identification of varied options for trust-building initiatives could resonate with the parties as the situation on the ground developed, providing windows of opportunity that the Mission must respond to in an agile manner. In applying the lesson, UNMHA will pursue an iterative approach that can bring the parties together on issues of shared concern.

235. Expected progress towards the objective is presented in the performance measure below (see table 52).

Table 52
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Parties demonstrate willingness to engage on technical-level discussions on confidence-building measures	Confidence between the parties develops and topics for discussion and a suitable location for joint meetings are agreed upon	Increased levels of trust lead to the parties agreeing to a regular meeting schedule and the convening of joint meetings

Deliverables

236. Table 53 lists all deliverables of the Mission.

Table 53
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**1**	**1**
1. Letters of the Secretary-General to the Security Council	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**12**	**12**	**12**	**12**
2. Meetings of the Security Council	12	12	12	12
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**8**	**–**	**8**	**4**
3. Workshops with local community representatives on Hudaydah Agreement implementation	4	–	4	2
4. Workshops with political/civil stakeholders on Hudaydah Agreement implementation	4	–	4	2
Fact-finding, monitoring and investigation missions (number of missions)	**108**	**154**	**108**	**168**
5. Monitoring missions and patrols conducted	108	154	108	168

C. Substantive deliverables

Good offices: provision of good offices in the context of the efforts of the parties to fully implement the Hudaydah Agreement, including through the convening of 9 meetings with representatives of the Redeployment Coordination Committee from both parties; 15 meetings with regional and international interlocuters; and other meetings with local political actors in Hudaydah and from both parties in Aden and Sana'a.

Consultation, advice and advocacy: consultations with the relevant Yemeni, regional and international stakeholders to comprehensively understand the challenges at hand and to provide advice to the parties in their efforts to implement the Hudaydah Agreement; advocacy among Yemeni, regional and international stakeholders in support of the implementation of the Agreement and enhancement of the ceasefire in the governorate; provision of technical advice to the parties on mine action, oversight and coordination of mine action initiatives among partners in Hudaydah; and advocacy for international mine action non-governmental organizations to operate in the governorate.

D. Communication deliverables

Outreach programmes, special events and information materials: development and maintenance of strategic relationships with partners, including the United Nations Communications Group, to ensure alignment in United Nations common messaging and cooperation across various levels; development and regular updating of the Mission's key messages transmitted publicly and in response to developments on the ground; and localized sentiment analysis and media monitoring, with special attention given to misinformation and in areas where the Mission seeks to expand its operations.

External and media relations: press releases, messages and audiovisual material on the Mission's activities and key messages; relationships developed with media partners to ensure accurate coverage of the Mission's messaging and activities; timely answers to media enquiries; and strengthened informal interaction and relationships with media partners.

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Digital platforms and multimedia content: website establishment and frequent updates on the Mission's activities and public statements; regular updates through social media channels on the Mission's activities and public statements; and photographs and videos shared promoting the Mission's activities and key messages on all digital platforms.				

Evaluation activities

237. An internal evaluation was completed in 2024 on the logistical and operational support of UNMHA to the floating production, storage and offloading vessel Safer (FSO Safer) salvage operation. On the basis of the findings, conclusions and lessons learned in the final evaluation report, the Mission took action in areas related to operational improvements in crisis preparedness, contingency planning, situational awareness and analysis. The findings also highlighted expanded avenues for cooperation with the United Nations country team that would allow UNMHA to build on its role as a technical resource for the United Nations family in Hudaydah, as appropriate. The application of the findings from the evaluation has supported the Mission's broader mandate implementation through the identification of operational and logistical efficiencies in pursuit of the Mission's objectives.

238. While the scope for an internal evaluation to be carried out in 2026 is yet to be determined, its purpose may include informing operational and strategic planning for the Mission's expanding presence and activities in the south of Hudaydah Governorate.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

[a] Includes one general temporary assistance position.

239. The proposed resource requirements for 2026 for the Mission amount to $30,040,500 (net of staff assessment) and would provide for the deployment of 75 United Nations monitors ($651,700), salaries and common staff costs ($14,568,300) for 71 international staff (1 Assistant Secretary-General, 1 D-2, 1 D-1, 6 P-5, 13 P-4, 18 P-3 and 31 Field Service), 92 national staff (11 National Professional Officer and 81 Local level) and 5 government-provided personnel, and operational costs ($14,820,500), comprising the costs for official travel ($508,800), facilities and infrastructure ($5,778,900), ground transportation ($578,200), air operations ($4,346,900), communications and information technology ($1,467,400), medical ($1,107,600), other supplies, services and equipment ($732,700) and quick-impact projects ($300,000).

240. A vacancy rate of 85.3 per cent has been applied to the estimates for United Nations monitors on the basis of the actual average vacancy rates in 2024. A vacancy rate of 27.5 per cent for international staff posts has been applied on the basis of the actual average vacancy rate in 2024. Vacancy rates of 50.0 per cent for National Professional Officers and 20.6 per cent for Local level posts have been applied on the basis of the actual vacancy rates in March 2025. A vacancy rate of 100.0 per cent has been applied to the estimates for government-provided personnel in view of the lack of incumbency. A vacancy rate of 50.0 per cent has been applied for the posts proposed for establishment and reassignment.

241. With a view to ensuring the effective delivery of its mandate, several staffing changes are proposed for 2026, as follows:

Office of the Chief of Staff

(a) Reassignment of one post of Coordination Officer (P-3) in the Office of the Chief of Mission Support in Djibouti to Data Specialist (P-3) in the Office of the Chief of Staff in Hudaydah to support the Mission in all aspects of its mandate delivery by providing data-related advice and in further enhancing a forward-thinking and data-driven Mission while strengthening its information security and data management processes. Owing to the sensitive nature of the data to be handled and the level of expertise required in data system design, management and analysis, the post is proposed to be established at the P-3 level;

Political Affairs Section

(b) Redeployment of one post of Political Affairs Officer (P-4) from Sana'a to Khawkhah to support political efforts that can bring further stability in Hudaydah Governorate. Following an internal review of the Mission's strategic direction and priorities in July 2024, the Mission identified the imperative for a revised political engagement plan, with a focus on the south of Hudaydah Governorate and those areas that are under the control of the Government of Yemen. Having a dedicated political affairs capacity based in Khawkhah is critical to realizing this aim and to further strengthening political outreach that is responsive to local dynamics;

(c) Redeployment of one post of Associate Political Affairs Officer (National Professional Officer) from Sana'a to Hudaydah to support political efforts to further stability in Hudaydah Governorate. The Mission does not have a dedicated political affairs capacity at the national level in Hudaydah city, where the Mission's headquarters are located. A national Political Affairs Officer in Hudaydah will be integral to the Mission's efforts to strengthen its liaison with the authorities in Hudaydah in support of the implementation of the Hudaydah Agreement and with local actors in conflict-affected districts;

Office of the Chief of Mission Support

(d) Abolishment of one post of Coordination Officer (National Professional Officer) in Riyadh in line with UNMHA efforts to enhance efficiency, optimize resource utilization and leverage support from the existing capacities of the resident coordinator office in Saudi Arabia for the liaison functions;

Operations and Resource Management Section

(e) Establishment of one post of Telecommunication Technician (Field Service) in Khawkhah following the Mission's planned expansion in the southern region of Hudaydah Governorate and to ensure uninterrupted information and communications technology (ICT) support for UNMHA premises in Khawkhah. The incumbent will oversee ICT infrastructure and ensure a smooth communication channel between the Khawkhah and other UNMHA offices;

(f) Abolishment of one post of Finance and Budget Officer (National Professional Officer) in the Finance and Budget Unit in Hudaydah that was approved in 2023 and has been vacant for two years and the establishment of one post of Finance and Budget Assistant (Local level) in Sana'a to support the Unit in the preparation of resource estimates and budget implementation reports, the analysis of detailed expenditure reports with other support and substantive sections, the review of expenditure patterns, the processing of budget transactions, client support and other tasks and data analysis that are performed by available staff within the Unit;

(g) Establishment of one post of Procurement Assistant (Local level) in Sana'a to manage the volume of procurement tasks effectively in the Procurement Unit, which supports both the Office of the Special Envoy for Yemen and the Mission. The proposal to establish the new post in Sana'a is based on the overall number of transactions conducted by the Unit, which is 85 per cent related to operations in Yemen;

Supply Chain and Service Delivery Section

(h) Establishment of one post of Chief of Unit, Engineering and Facilities Management Unit (P-4), given the increased responsibilities of the post in the planning, implementation, maintenance, operation and optimization of facilities of both UNMHA and the Office of the Special Envoy. UNMHA plans to set up a new office in Khawkhah to enhance its operational and monitoring capabilities, while ensuring equitable representation and access on both sides of the conflict;

(i) Abolishment of one post of Engineering Technician (Field Service) in Hudaydah because its original functions and terms of reference no longer cover the scope and complexity of responsibilities, which have increased since the Mission was established. In addition, the workload of the Engineering and Facilities Management Unit has further increased with the planned establishment of new facilities in the south of the governorate. Therefore, it is proposed that this post be abolished and the above-mentioned Chief of Engineering and Facilities Management Unit (P-4) be established to enhance capacity;
