(j) Reclassification of one post of Supply Officer (P-3) in Hudaydah to Chief of Unit (P-4), Central Warehousing and Supply Unit in Hudaydah, due to the increased responsibilities and workload of the post. To facilitate mandate implementation in the challenging operational environment, UNMHA and the Office of the Special Envoy of the Secretary-General for Yemen maintain widely dispersed supply chains and life support routes across all field locations. To ensure uninterrupted services, the incumbent is required to supervise supply officers of sub-units in five geographical areas;

(k) Redeployment of one post of Supply Assistant (Local level) in the Central Warehousing and Supply Unit in Hudaydah to Aden to fill the gap in processing the issuance of goods for both the Aden and Mukha' offices, stock management, the receipt and distribution of supplies and market research for petty cash purchases in support of urgent requirements;

(l) Redeployment of nine posts of Driver (Local level) in the Transport Unit from Hudaydah to Sana'a, Aden and Khawkhah to support regular escorted road convoys between Aden and Mukha', and movements between Sana'a and Hudaydah, and to support the UNMHA expansion to Khawkhah, where the incumbents will be responsible for facilitating movement for ceasefire monitoring teams, supporting mine action activities and ensuring safe and efficient transport for community engagement and the implementation of quick-impact projects;

(m) Reassignment of one post of Driver (Local level) in the Transport Unit from Hudaydah as Team Assistant (Local level) in the Field Technology Unit in Amman, aimed at addressing critical staffing challenges faced by the Unit's staff located in Amman. The Team Assistant will support essential tasks such as telephone billing and ICT asset management and tracking for new and outgoing staff;

(n) Reassignment of one post of Driver (Local level) in the Transport Unit from Hudaydah to Team Assistant (Local level) in the Movement Control Unit in Aden to manage movement control, including logistics, scheduling and coordination among multiple stakeholders in southern Yemen such as liaison with customs, airport, seaport and other local authorities;

(o) Reassignment of one post of Driver (Local level) in the Transport Unit from Hudaydah as Team Assistant (Local level) in the Central Warehousing and Supply Unit in Amman, to support the planning and coordination of life support consumables, write-offs, property disposal and the physical destruction of assets;

(p) Reassignment of two posts of Driver (Local level) in the Transport Unit from Hudaydah as Team Assistants (Local level) in the Aviation Unit in Sana'a and Aden, to cover key air operations and aviation safety functions, which are performed by the Movement Control Unit. This gap is considered a significant risk for safe aviation operations and may expose the Mission to incidents and accidents;

Safety and Security Section

(q) Reassignment of one post of Close Protection Officer (Field Service) in Hudaydah as Administrative Assistant (Field Service) in the Safety and Security Section in Hudaydah, to manage the significant increase in administrative responsibilities. Currently, the administrative workload is being managed by security personnel whose primary role is security operations, leading to the inefficient use of resources and delays in reporting and compliance, affecting timely responses required pursuant to United Nations policies and security protocols;

Department of Operational Support (backstopping support)

(r) Abolishment of one post of Associate Human Resource Officer (P-2) in the Division for Special Activities of the Department of Operational Support at United Nations Headquarters in New York. The functions associated with the post are no longer required. The Mission's existing capacity will perform human resources-related functions.

242. The Mission's approved 2024 staffing table includes two general temporary assistance positions. It is proposed that these positions be continued in 2026, as follows:

(a) Programme Management Officer (P-4) in the Office of the Deputy Head of Mission in Hudaydah, who would be required to continue to provide advice to the Head of Mission and senior leadership on landmine, explosive remnant of war, improvised explosive device and sea mine contamination, the associated risks to the United Nations and civilians and preventive measures in place to ensure the safe mandate implementation by mission staff in Hudaydah Governorate;

Department of Management Strategy, Policy and Compliance (backstopping support)

(b) Finance and Budget Officer (P-3) in the Field Operations Finance Division, which remains essential to perform backstopping support and continue to be essential in ensuring sufficient capacity at Headquarters for the planning and management of financial resources, the preparation of budgets and the provision of services to the legislative bodies during their review of the proposed budgets for special political missions.

243. The decrease in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) decreased requirements for international staff due to the application of a higher

vacancy rate of 27.5 per cent for the 2026 budget proposal compared with 25.4 per cent applied during 2025; (b) decreased requirements for National Professional Officers due to the application of a higher vacancy rate of 50.0 per cent for 2026 budget proposal compared with 25.8 per cent applied for 2025, as well as the proposed abolishment of two National Professional Officer posts; (c) decreased requirements for facilities and infrastructure due to reduced rental of premises, including for the Mission's locations in Sana'a and Hudaydah, reduced provision for construction, alteration, renovation and major maintenance, and fewer acquisitions of spare parts and supplies and reduced requirements for generator fuel due to the discontinuation of the relevant reserve; (d) decreased requirements for medical services due to lower estimates for the cost-sharing of the medical clinic; and (e) decreased requirements under other supplies, services and equipment due to lower planned training fees and lower cost-shared costs of support operations to UNMHA performed by the Kuwait Joint Support Office. The decreased costs are offset in part by: (a) the application of a lower vacancy rate of 85.3 per cent for the United Nations monitors compared with 87.3 per cent in 2025; (b) the establishment of additional international and Local level posts and revised salary scales in Amman; (c) the additional acquisition of prefabricated facilities and accommodation, the acquisition of generators and electric equipment, increased maintenance services for Al-Khawkah camp and an increase in security services; (d) increased repairs to and maintenance of the ground fleet; and (e) increased requirements for aviation fuel and increased air navigation charges.

10. United Nations Integrated Office in Haiti

($36,804,900)

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

244. The United Nations Integrated Office in Haiti (BINUH) is responsible for advising the Government of Haiti in promoting and strengthening political stability and good governance, including the rule of law; preserving and advancing a peaceful and stable environment, including through support for an inclusive inter-Haitian national dialogue; and protecting and promoting human rights. The mandate derives from Security Council resolution 2476 (2019) and subsequent resolutions, including, most recently, 2743 (2024), by which the Council extended the mandate of the Mission until 15 July 2025.

245. The Security Council, in its resolution 2743 (2024) called upon BINUH to develop a strategy in consultation with the Government of Haiti on how it would continue to support a Haitian-led and Haitian-owned political process and to support the Government in developing and implementing a strategic communications plan, including to counter misinformation and disinformation regarding the work of State institutions and the political process. BINUH developed a political strategy addressing six areas of support: (a) facilitating an inclusive national dialogue; (b) supporting electoral and constitutional reforms; (c) enhancing public security; (d) strengthening the rule of law; (e) improving governance and institutional capacity; and (f) fostering United Nations system integration and regional partnerships. Implementation of the strategy and support for strategic communications is reported to the Council through the quarterly reports of the Secretary-General. In a series of public statements issued in January 2025, the transitional authorities reaffirmed their commitment to finalizing the ongoing constitutional reform process and holding credible elections before the end of 2025.

246. BINUH redoubled its advisory efforts to mitigate possible disruptions to the political transition caused by the succession of three Prime Ministers between March and November 2024. Those repeated changes in Haitian leadership coincided with a marked escalation in gang violence, which, in November 2024, led to the closing of the international airport, the suspension of all commercial flights and a flight ban imposed by the United States Federal Aviation Administration over Haitian airspace. The Department of Safety and Security subsequently authorized the evacuation of programme criticality 2 personnel from the capital and the relocation of programme criticality 1 and programme criticality 2 personnel to the regions outside Port-au-Prince. The designated official, in consultation with the security management team, decided to retain a ceiling of 133 United Nations personnel in the capital on the basis of the assessed extraction capacity by air and road. Under this ceiling, BINUH maintains a skeleton team of 17 personnel headed by the Special Representative. Skeleton team personnel are replaced by a pool of 51 international staff rotating on a rest-and-recuperation cycle every four weeks while the remaining international staff work remotely. Following the second evacuation, in November 2024, the Secretary-General launched a strategic assessment and advised the Security Council on the full range of options for continued United Nations efforts in Haiti, which include increasing the robustness of BINUH to stay and deliver and establishing a United Nations logistics support office for the Multinational Security Support Mission that would operate separately from BINUH.

247. The prevailing hostile operating environment is expected to persist, ruling out the return to Haiti of all the international personnel evacuated since November 2024. This situation triggered a review by the Secretariat of the Office's mission concept in April 2025 to update the planning assumptions and

risks, notably the security considerations. The updated mission concept will prioritize BINUH mandated tasks and resources to ensure their cost-effectiveness in the prevailing operating environment. It will include recommendations to rationalize the mission's structure, size and activities to ensure safe and effective mandate implementation. The mission concept review is expected to be completed in large part in June 2025, prior to the Security Council's consultations on the mission's mandate extension in mid-July 2025. The mission concept will be finalized within three weeks after the issuance of the new mandate. The implications of the mission concept review and the new mandate, as approved by the Council, will be assessed and presented in the context of revised estimates.

Programme of work

Objective

248. The objective, to which the mission contributes, is to strengthen political stability and good governance, including accountability and the rule of law; restore a peaceful and stable environment; protect and promote human rights; and strengthen gender equality in Haiti.

Strategy and external factors for 2026

249. To contribute to the objective, BINUH will:

(a) Update its political strategy in support of the national authorities to advance and facilitate a Haitian-led, Haitian-owned political process aimed at reaching an urgent agreement on a road map for constitutional reform and general elections;

(b) Assist the Government in developing a communications plan to counter misinformation;

(c) Reinforce the capacity of the Haitian National Police, including through training on human rights and crowd control, to respond to gang violence and sexual and gender-based violence and to maintain public order;

(d) Improve Directorate of Penitentiary Administration management and oversight of prison facilities to ensure proper treatment of inmates in accordance with international standards;

(e) Develop an inclusive and comprehensive approach with all sectors of society to reduce community violence, in particular gang violence;

(f) Address human rights abuses and violations with dedicated capacity to address sexual and gender-based violence and comply with international human rights obligations;

(g) Work with UNODC and relevant United Nations agencies to support Haitian efforts in combating illicit financial flows, the trafficking in arms and enhancing the management and control of borders and ports;

(h) Strengthen the criminal justice sector, including by promoting key reforms; support government efforts to improve internal oversight and accountability as they relate to corruption; address prolonged pretrial detention; and ensure merit-based judicial appointments and the timely renewal of judicial mandates;

(i) Include available information on cases of gang violence, criminal activities and human rights abuses in Haiti, collected in carrying out the BINUH mandate, as an annex to the report of the Secretary-General to the Security Council;

(j) Cooperate with the Security Council Committee established pursuant to resolution 2653 (2022) concerning Haiti and its Panel of Experts and use the good offices of the Secretary-General to encourage the Government to implement resolution 2653 (2022).

250. The above-mentioned work is expected to result in:

(a) An operational Provisional Electoral Council able to manage and handle multiple electoral functions across all 10 departments of the country;

(b) Adoption of a revised constitution after the holding of a national referendum;

(c) The holding of inclusive and credible general elections and the peaceful transfer of power at all levels;

(d) Installation of all elected officials and appointment of the Government.

251. With regard to cooperation with other entities, BINUH collaborates with the Organization of American States, the Caribbean Community and planners on the ground for the Multinational Security Support Mission in Haiti. The mission also engages closely with the diplomatic community, as appropriate.

252. With regard to inter-agency coordination and liaison, BINUH works with the United Nations country team, the Office for the Coordination of Humanitarian Affairs, UNODC, UNDP and the Office of the United Nations High Commissioner for Human Rights through the United Nations Sustainable Development Cooperation Framework for the period 2023–2027. BINUH also supports the in-country requirements of the Panel of Experts on Haiti.

253. With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Political polarization continues to undermine the parties' ability to achieve the consensus required to advance tangible initiatives to implement political, legal and economic reforms;

(b) The fragile security situation continues to seriously affect both the pace and the sustainability of political, legal and economic reforms;

(c) The Government of Haiti further develops the capacities of the Haitian National Police and its Directorate of Prison Administration, including through the ongoing provision of sufficient budget allocation, complemented by external contributions through a multi-donor basket fund managed by UNDP;

(d) Challenges in the operational capacity of the Multinational Security Support Mission in Haiti curtail political gains significantly;

(e) The impact of hurricanes and earthquakes are not discounted;

(f) The international donor community and national authorities are unable to agree on stronger coordination arrangements to advance the 2030 Agenda.

254. The mission integrates a gender perspective into its planning, operations, deliverables and results, as appropriate, and encourages the meaningful participation of women in political processes, dialogues and negotiations, as well as their representation in decision-making positions. Its reporting includes disaggregated data on the impact of human rights violations and abuses on women and on accountability and justice for crimes of violence against women and girls. In addition, the mission works with civil society actors focusing on gender and human rights in the context of the implementation of recommendations issued by the Committee on the Elimination of Discrimination against Women in 2016 and the second universal periodic review cycle for Haiti, in 2016, on the human rights situation.

Programme performance in 2024

National police authorities improved police performance and enhanced security in Haiti

255. In 2024, crimes in Haiti, including homicide, kidnapping and rape, rose to unprecedented levels. The number of intentional homicides surged from 4,847 in 2023 to more than 7,000 in 2024. BINUH continued to mentor and advise senior national police commanders on effectively addressing criminal networks and gangs, especially on anti-gang operations and intelligence-gathering. The

mission supported the Haitian National Police in developing a road map for the formulation of a multi-year strategic development plan aimed at strengthening institutional and operational capacities, promoting the rule of law and enhancing security. The international community has also been actively engaged in efforts to professionalize the Haitian National Police. Advocacy supported by BINUH, for a UNDP-managed multi-donor basket fund, had disbursed $14.1 million as at 31 December 2024, including commitments and advances, of the initial allocated budget of $25.5 million, corresponding to an implementation rate of 54.4 per cent. In addition, a two-year extension (2024–2026) was granted to the basket fund to allow for the achievement of expected outcomes and the full disbursement of remaining funds. However, the implementation of the planned activities in 2024 faced delays owing primarily to operational constraints resulting from the worsening security situation and the closure of the international airport.

256. Progress towards the objective is presented in the performance measure below (see table 56).

Table 56
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Low satisfaction among the population with public services offered by national institutions	Disruptions in governance due to a political crisis and a lack of responsive, inclusive, participatory and representative decision-making	Basket fund received $25.5 million from donors, and adjustments were devised and implemented to optimally align with Haitian National Police priorities

Planned results for 2026

Result 1: increased non-partisan buy-in and constructive engagement towards the implementation of a revised constitution

Programme performance in 2024 and target for 2026

257. Over the course of 2024, BINUH engaged with key stakeholders, underscoring the importance of holding an inclusive and participative constitutional reform process as a critical step to the holding of general elections. BINUH guided stakeholders through a transition of three successive Prime Ministers within the year, accompanying the reshuffling of three ministerial cabinets, underscoring the need to maintain focus on the transitional process to complete the constitutional reform process and advance to the holding of general elections. The Office's daily advocacy and support of key players, albeit difficult, has proved an important factor in moving the political process forward.

258. Expected progress towards the objective is presented in the performance measure below (see table 57).

Table 57
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Significant civil unrest and increased gang violence led to heightened international concern about the situation in Haiti, a recommendation by the Secretary-General for the deployment of a	High Transitional Council was established and launched a national dialogue on electoral and political reforms Continued divergences among	Advocacy for a sustained and inclusive Haitian-led dialogue on constitutional reforms and elections	Holding of a national referendum on constitutional reform and general elections	Installation of all elected officials at the local, parliamentary and presidential levels

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
non-United Nations rapid action force in response to a request from the Government of Haiti for assistance through an armed international specialized force, and the imposition of sanctions	stakeholders and escalating gang violence hamper wider progress in the political process			

Result 2: general elections held and elected officials installed following a transparent adjudication of electoral contentions

Proposed programme plan for 2026

259. These will be the first elections since the 2016 electoral process and will re-establish all elected positions in government, allowing for a return of functioning, democratic institutions. Key to holding general elections is the restoration of sufficient levels of security and stability, a transparent and efficient Provisional Electoral Council and the holding of a constitutional reform referendum. The nine councillors on the Council, representing nine sectors of society, have been appointed and, in coordination with the Executive Director, have initiated a reactivation of the Council's regional and municipal offices.

Lessons learned and planned change

260. The lesson for the mission was that the 2015–2017 cycle of elections, supported by a peacekeeping operation in the process of withdrawing, devolved much of the logistical coordination and transport tasks to the United Nations country team (UNDP and United Nations Office for Project Services). In applying the lesson, BINUH will provide technical advice and guidance and support the Haitian leadership and the Provisional Electoral Council through the electoral process, while coordinating closely with United Nations country team partners to provide the required programmatic support to the Government through the joint programme of technical electoral assistance.

261. Expected progress towards the objective is presented in the performance measure below (see figure 58).

Table 58
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Establishment of a new Provisional Electoral Council	Reactivation of the Provisional Electoral Council across 10 departments and 145 municipalities	Constitutional referendum and general elections held

Deliverables

262. Table 59 lists all deliverables of the mission.

Table 59
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**4**	**4**	**4**	**4**
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	**4**	**4**	**4**	**4**
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**150**	**112**	**150**	**150**
3. Seminars, workshops and training events on four main areas of work: (a) implementation of and resource mobilization for the strategic plan to further develop and equip the Haitian National Police, sustain police service capable of maintaining public security, reduce gang violence, enhance police oversight and protect human rights; (b) implementation by national authorities and the United Nations country team of programmes on disarmament, demobilization and reintegration, community violence reduction and weapons and ammunition management; (c) management and oversight of prisons and detention centres according to international standards; and (d) promotion of human rights and participation of women as decision makers in State institutions, political parties and initiatives of dialogue and consensus-building	150	112	150	150
Field and technical cooperation projects (number of projects)	**9**	**13**	**9**	**9**
4. Projects in support of operationalizing the Haitian National Police basket fund, including on strategic planning, vetting, intelligence-led operations, anti-gang activities, efforts against illicit financial flows and support for the development of the national police legal framework	6	10	6	6
5. Projects to support strengthened air, land and sea border controls, including the Container Control Programme, the Airport Communication Programme and the Global Maritime Crime Programme	3	3	3	3
Publications (number of publications)	**6**	**7**	**6**	**6**
6. Thematic public reports on human rights, as well as quarterly global horizontal notes on child rights violation	6	7	6	6
Technical materials (number of materials)	**10**	**9**	**10**	**10**
7. Materials conveying advisory support to national interlocutors	10	9	10	10
Fact-finding, monitoring and investigation missions (number of missions)	**50**	**42**	**50**	**50**
8. Fact-finding, monitoring and investigation missions to assess prison facilities, the condition of detainees and administration and security arrangements; to conduct police inspections to assess the status of police stations and police services in each department, as well as the internal administration and quality of police services; to conduct an assessment of police stations and police services to assess the implementation of the basket fund in support of the Haitian National Police; to assess human rights and allegations of violations; to assess implementation of the human rights due diligence policy; and to carry out joint monitoring missions to assess gang violence in seven gang-controlled neighbourhoods of Port-au-Prince and other communities across Haiti	50	42	50	50

C. Substantive deliverables

Good offices: good offices to: (a) foster cooperation and dialogue among the main political and social actors, build consensus and strengthen political stability and good governance; (b) support the efforts of national authorities and international partners to facilitate local peace initiatives, reduce gang and community violence and advance a peaceful and stable environment; and (c) raise awareness of human rights abuses and violations, sexual and gender-based violence and gender discrimination, and strengthen institutional accountability to address these problems and end impunity for perpetrators.

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

Consultation, advice and advocacy: development of initiatives that promote dialogue and consensus-building; advice on the development of effective, accountable and transparent institutions and support for political, legal and economic reforms; development of the institutional framework and the electoral calendar; provision to the Haitian National Police and the Directorate of Prison Administration with expert advice to strengthen the capacity and oversight of the police and corrections service; advice to State institutions and agencies on the implementation of action plans to promote and protect human rights and gender equality; and advice on the development of a regulatory arms control framework, including the effective implementation of a holistic weapons and ammunition interinstitutional mechanism.

D. Communication deliverables

Outreach programmes, special events and information materials: field outreach and advocacy materials (brochures, flyers, flipcharts, infographics and banners) explaining thematic objectives in the mission's mandate; outreach events on key priorities of the mission; traditional and digital media campaigns, inclusive of print, radio and social platforms, to support United Nations electoral, disarmament, demobilization and reintegration/community violence reduction, police, corrections, justice and human rights initiatives and joint programmes.

External and media relations: strategic plan to ensure coverage of key activities of the mission, inclusive of press conferences, editorials on key issues, press briefings, press releases, targeted interviews and publications with target audiences and networks; and daily media and social platform monitoring providing strategic analysis of media and social platform trends, risks and opportunities to provide guidance for crisis communication management.

Digital platforms and multimedia content: creation and management of website and social media; production and dissemination of content for multimedia products and campaigns (with a focus on digital radio) to engage key actors on mission priorities and promote transparency and accountability; and campaigns and products for social media platforms showing the impact of the mission's work.

B. Proposed post and non-post resource requirements for 2026

Resource requirements (regular budget)

Table 60

Change	–	–	–	–	–	**(1)**	–	–	–	**(1)**	–	–	–	–	–	–	–	**(1)**

[a] Other level, unless otherwise stated.
[b] Includes one D-1, one P-5, one P-4 and two General Service positions approved as general temporary assistance positions.
[c] Position is funded at 50 per cent and cost-shared with the Development Coordination Office.
[d] Proposed abolishment of two posts deployed to the Kuwait Joint Support Office from BINUH, effective 1 October 2026.

263. The proposed resources for 2026 for BINUH amount to $36,804,900 (net of staff assessment) and would provide for the deployment of 48 United Nations police personnel ($1,139,100), salaries, common staff costs and danger pay ($26,695,900) for 106 international posts and positions (1 Assistant Secretary-General, 1 D-2, 5 D-1, 10 P-5, 27 P-4, 15 P-3, 3 P-2 and 44 Field Service) and 73 national posts (24 National Professional Officer, 2 General Service and 47 Local level, including 2 Local level up to 30 September 2026), 4 international United Nations Volunteers and 3 government-provided personnel, and operational costs ($8,969,900), comprising costs for consultants and consulting services ($94,300), official travel ($336,500), facilities and infrastructure ($4,387,300), ground transportation ($592,700), communications and information technology ($1,738,700), medical ($595,000) and other supplies, services and equipment ($1,204,400).

264. A vacancy rate of 17.8 per cent has been applied to the estimates for international posts on the basis of the actual vacancy rate in March 2025. A vacancy rate of 33.3 per cent has been applied to the estimates for National Professional Officer posts and a vacancy rate of 12.2 per cent has been applied to the estimates for Local level posts on the basis of the actual vacancy rates in March 2025. A vacancy rate of 50 per cent has been applied to international United Nations Volunteers and a 60.4 per cent to the estimates for United Nations police personnel have been applied on the basis of the actual vacancy rates in March 2025. A vacancy rate of 27.8 per cent has been applied to government-provided personnel on the basis of the average actual vacancy rate during 2024.

265. The following staffing changes are proposed for 2026:

Police and Corrections Service

(a) Abolishment of one post of Engineer (P-4) under the Police and Corrections Service, which will no longer be required because UNDP has been employing locally recruited engineers for the basket fund's construction initiatives for the Haitian National Police;

Kuwait Joint Support Office

(b) The transition of client missions of the Kuwait Joint Support Office to the Regional Service Centre in Entebbe, Uganda. In view of the termination of the mandate of the United Nations Assistance Mission for Iraq on 31 December 2025, it is the intention of the Secretariat to ensure the transition of the peace operations supported by the Office to the Centre by the end of the Mission's liquidation process, in September 2026. In line with this plan, the proposed budget for 2026 contains the proposed abolishment of two posts in the Office, funded from BINUH, effective 1 October 2026.

266. The approved 2025 staffing table for BINUH includes five general temporary assistance positions. It is proposed that the positions be continued in 2026, comprising the following:

(a) One Principal Human Rights Officer (D-1) in the Human Rights Service to respond to and address the human rights requirements set by the Security Council as reflected in the BINUH mandate, adopted in resolution 2476 (2019). Such a dedicated position, with specific human rights expertise, is important to facilitate trusted engagement at a high level with senior Haitian authorities, allowing for the provision of technical assistance and advice to the country's national human rights institutions;

Department of Political and Peacebuilding Affairs (backstopping support)

(b) Three backstopping positions in the Haiti team of the Americas Division of the Department of Political and Peacebuilding Affairs, comprising one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-4) and one Team Assistant (General Service), who have been providing backstopping support to BINUH since 2019 and will remain critical to ensuring ongoing support and strategic advice and analysis to principals at Headquarters for decision-making with regard to BINUH. The core functions that they undertake are required throughout the lifespan of the mission, including its start-up, the duration of the implementation of its mandate and its closing;

Department of Management Strategy, Policy and Compliance

(c) One Finance and Budget Assistant (General Service) backstopping position in the Field Operations Finance Division, where the need remains high for the continued delivery of high-intensity and high-quality support to legislative bodies in their review of the budgets of special political missions. The continuation of this position will also ensure sufficient capacities for budget preparation, budget administration and performance monitoring of all continuing special political missions.

267. The increase in requirements for 2026 compared with the appropriation for 2025 is attributable mainly to: (a) increased requirements for international staff due to the application of a lower vacancy rate of 17.8 per cent compared with the vacancy rate of 20.7 per cent applied during 2025 and revised salary scales for international staff; (b) increased requirements for National Professional Officers and Local level staff due to the revised salary scale and lower vacancy rate for Local level posts of 12.2 per cent compared with the vacancy rate of 13.7 per cent applied in 2025; (c) increased requirements for facilities and infrastructure due to the increased demand for security services; (d) increased requirements for medical services due to the increased costs of medical evacuations due to the degradation of security environment; (e) increased requirements under other supplies, services and equipment, reflecting a higher demand for the United Nations Humanitarian Air Services flights because of logistical challenges and the cancellation of civil aviation flights, as well as increased freight due to the expected receipt of assets from the United Nations reserve. The increased requirements are offset in part by the application of a higher vacancy rate for United Nations police officers, government-provided personnel and international United Nations Volunteers.

Extrabudgetary resources

268. In 2025, extrabudgetary resources in the amount of $263,000 are projected to be used to provide resources for two main initiatives: (a) promoting women-led social community dialogues and local conflict prevention initiatives in vulnerable neighbourhoods of Port-au-Prince; (b) enhancing inclusive political participation in Haiti while creating safe and peaceful space for dialogue; and (c) school support for children born as a result of sexual exploitation and abuse by United Nations personnel in Haiti.

269. In 2026, extrabudgetary resources in the amount of $238,000 are projected to be used to support the continuation of the above-mentioned projects.

11. United Nations Integrated Transition Assistance Mission in the Sudan

Liquidation activities

270. The mandate of the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS) was outlined in successive Security Council resolutions (2524 (2020), 2579 (2021) and 2636 (2022)) and terminated through resolution 2715 (2023). By that resolution, the Council requested the Mission to start, on 4 December 2023, the immediate cessation of its operations and the transfer of its tasks, where appropriate and to the extent feasible, to United Nations agencies, funds and programmes, with the objective of completing this by 29 February 2024. The Council decided that the liquidation of UNITAMS should commence on 1 March 2024.

271. The administrative liquidation of UNITAMS, including the disposal of assets, was carried out from 1 March to 31 December 2024.

272. The General Assembly, by its resolution 78/274, appropriated the amount of $22.2 million for 2024. UNITAMS incurred $17.8 million in expenditure for the period, representing a resource utilization rate of 80.5 per cent owing to the pace of liquidation and lower-than-estimated common staff costs for the separation of staff members, including in connection with termination indemnities.

Table 62
Financial resources
(Thousands of United States dollars)

	2024		
	Appropriation	*Expenditure*	*Variance Surplus/(deficit)*
Category of expenditure	*(1)*	*(2)*	*(4)=(2)-(1)*
Military and police personnel	52.2	64.7	(12.5)
Civilian personnel	20 145.6	15 729.8	4 415.8
Operational costs	1 964.8	2 040.2	(75.4)
Total (net of staff assessment)	**22 162.6**	**17 834.7**	**4 327.9**

273. The process for the drawdown and liquidation of property of UNITAMS was guided by the principles of and policies contained in financial rule 105.23.[3] Given the unique circumstances surrounding the closure of UNITAMS, which included the rapidly deteriorating security situation in the Sudan and the challenges posed by an active conflict, the process of property disposal within UNITAMS had to be adapted to address the region's complex operational realities. The Mission collaborated

[3] Rule 105.23 of the Financial Regulations and Rules of the United Nations provides for the following:

Property, plant and equipment, inventories and intangible assets of the United Nations that are declared surplus, unserviceable or obsolete following a recommendation by a review body shall be disposed of, transferred or sold after competitive bidding, unless the review body:
(a) Estimates that the sales value is less than an amount to be specified by the Under-Secretary-General for Management;
(b) Considers that the exchange of property in partial or full payment for replacement equipment or supplies is in the best interest of the Organization;
(c) Deems it appropriate to transfer surplus property from one project or operation for use in another and determines the fair market value at which the transfer(s) shall be effected;
(d) Determines that the destruction of the surplus or unserviceable material will be more economical or is required by law or by the nature of the property;
(e) Determines that the interests of the United Nations will be served through the disposal of the property by gift or by sale at a nominal price to an intergovernmental organization, a Government or governmental agency or some other non-profit organization.

extensively with United Nations Headquarters throughout that period. The Mission also engaged with the Government of the Sudan on key issues such as adherence to the status of mission agreement, security concerns across various locations across the Sudan and the inability to guarantee environmental cleanup in some operational areas due to the ongoing instability. Those challenges had a significant influence on the approach adopted for the disposal of property.

274. Shipping of the United Nations-owned equipment to the United Nations Logistics Base at Brindisi, Italy, or other missions was hindered owing to the difficulties in obtaining export clearances, the prohibitive costs associated with shipment for some items and the lengthy export procedure, which was not commensurate with the mission's drawdown timeline. In areas in which physical access for verification was blocked owing to conflict, or where property had been looted, items were written off as losses owing to hostile action.

275. The assets of UNITAMS, with a total capitalized value/acquisition value of $13,602,100 (corresponding net book value/operational value of $6,634,400), had been disposed of as at 31 December 2024, of which 37.4 per cent have been transferred to United Nations reserves, with the remaining to recipients, including the Regional Service Centre, the United Nations Interim Security Force for Abyei and UNSOS, while 57.7 per cent was written off.

276. A summary of the final disposition of all assets is reflected in table 63.

Table 63
Summary of the final disposition of the assets
(Thousands of United States dollars)

Disposal method	*Capitalized value/acquisition value*	*Net book value/operational value*	*Percentage*
Commercial sale	145.2	22.3	1.1
Transfer	5 083.8	2 298.9	37.4

Total	**13 602.1**	**6 634.4**	**100.0**

Annex I

Summary of follow-up action taken to implement the decisions and requests made by the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation	*Action taken to implement the recommendation*
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.4)	
Without prejudice, the Committee emphasizes as a matter of general principle that, when a mission is downsizing, it should present a clear exit plan, including with phased abolishments and the reduction of the related non-post resources (para. 18).	The United Nations Transitional Assistance Mission in Somalia (UNTMIS) is committed to a structured, phased and transparent transition process. It has initiated phase one of its two-phased transition process, in line with Security Council resolution 2753 (2024). In January 2025, nine posts were abolished. An additional 15 posts will be abolished by the end of October 2025. The 2026 budget proposal reflects a corresponding reduction in staffing, beginning in January 2026, aligned with the planned closure of substantive operations in October 2026. A residual presence, covering eight critical functions, will be maintained to support liquidation activities until 31 December 2026. Following the issuance of the Secretary-General's planning directive on Somalia on 12 March 2025, which provides strategic guidance for the planning, preparation and implementation of the United Nations transition in Somalia, UNTMIS is taking all necessary steps and action regarding its implementation. The Secretary-General shared a transition road map for phase one of the transition with the Security Council by the end of March 2025. Accordingly, all cost-shared services with UNSOS for the provision of logistical services have been budgeted to cover the budget period until 31 October 2026, the end of phase two of the Mission's transition and the anticipated termination of its mandate.
The Advisory Committee trusts that an update on the UNSMIL staffing review will be provided to the General Assembly at the time of its consideration of the present report, as well as in the next budget submission (para. 20).	The Mission conducted a comprehensive staffing review from September 2024 to March 2025. The review was designed to align staffing resources with mandate priorities and operational needs and to assess the Mission's support structure in line with Department for Operational Support guidelines. By its resolution 2755 (2024), the Security Council requested the Secretary-General to submit a strategic review of UNSMIL to the Council no later than 30 September 2025, including recommendations for increasing the efficiency and effectiveness of the Mission's overall structure, including its objectives.

Brief description of the recommendation	*Action taken to implement the recommendation*
	Given that the strategic review will be finalized after the 2026 proposed programme budget, the outcome of the staffing review is not reflected in the current budget for 2026, because the Mission awaits the outcome of the strategic review to ensure alignment with its long-term strategic direction and future Security Council decisions.
The Committee, however, recognizes the importance of information and data technology expertise and considers that a vacant professional-level post at UNMHA might be repurposed to fulfil that function, as appropriate (see also A/78/7, para. 42) (para. 29).	In preparation for the 2026 budget submission, the United Nations Mission to Support the Hudaydah Agreement (UNMHA) has thoroughly reviewed its staffing complement and identified a vacant post of Coordination Officer (P-3) in Djibouti previously supporting the air medical evacuation services, which is no longer required owing to the change in operational arrangements. As a result, this post is proposed for abolishment and a new post of Data Specialist (P-3) is proposed for establishment, while the overall staffing level remains unchanged. This is fully in line with the recommendation of the Committee to repurpose vacant Professional posts.
The Advisory Committee trusts that UNOWAS will continue to make its aircraft available, on a cost-reimbursable basis, to other United Nations system entities in the region, when possible, and looks forward to an update thereon in the next budget submission (para. 52 (a)).	UNOWAS will continue to make its aircraft available on a cost-recovery basis to other United Nations system entities in the region, when possible.
The Advisory Committee trusts that UNMHA will ensure that quick-impact projects result in tangible benefits for the local communities, with a view to a positive long-term legacy, and trusts that an update will be included in the next budget submission (para. 53).	Quick-impact projects have been integral to UNMHA efforts to build confidence in the Hudaydah Agreement and foster trust among stakeholders. UNMHA has leveraged quick-impact projects in enhancing its engagement with the parties to the Agreement and focused on thematic areas such as women, income generation, education and the health sector in designing its quick-impact projects to have the intended impact of confidence- and trust-building. An impact assessment will be conducted in 2025 that will review the contributions that quick-impact projects have made to advancing the mandate and the tangible benefits that they have brought to beneficiaries. The findings and lessons learned from the impact assessment will be used to inform the future design and implementation of its quick-impact projects and will be shared with other special political missions

Brief description of the recommendation	*Action taken to implement the recommendation*
The Advisory Committee trusts that the special political missions under cluster III will continue their efforts to achieve a more equitable geographical representation of Member States among their staff in all categories and will provide related updates in future budget submissions (para. 55).	Missions under this thematic cluster remain committed to equitable geographical representation and diversity in line with the United Nations objectives. Efforts have been made to ensure an inclusive recruitment process that reflects Member States' representation while upholding competence, efficiency and integrity. Proactive measures, including outreach and targeted vacancy dissemination, have encouraged applications from underrepresented Member States within operational constraints. Some missions (e.g., Office of the United Nations Special Coordinator for Lebanon, United Nations Support Mission in Libya (UNSMIL) and United Nations Integrated Office in Haiti (BINUH)) share the monthly updates on the status of equitable geographical distribution with leadership, and hiring managers are regularly briefed on their responsibilities to give priority to candidates from non-represented and underrepresented Member States. The UNSMIL Human Resources Unit regularly analyses the composition of its staff using various data sets, including fresh data from the management dashboard, to identify gaps in geographical representation. BINUH reaches out to rostered candidates from unrepresented and underrepresented countries and encourages them to apply, especially female candidates.
The Advisory Committee trusts that the special political missions under cluster III will make efforts to achieve gender balance among their staff (para. 56).	Mission under this thematic cluster remain committed to achieving gender balance among their staff in line with United Nations principles. Efforts have been made to ensure an inclusive recruitment process that considers gender balance. while upholding competence, efficiency and integrity. The Office of the United Nations Special Coordinator for Lebanon reached a balance of 56 per cent women and 44 per cent men. Other missions, including the United Nations Regional Office for Central Africa, UNSMIL, the United Nations Verification Mission in Colombia, UNMHA and BINUH, are making further efforts to achieve full gender balance, including through outreach activities and the training of hiring managers. UNTMIS, as an entity in liquidation, is focused on maintaining operational continuity and a responsible drawdown, limiting major shifts in workforce composition.

Brief description of the recommendation	*Action taken to implement the recommendation*
	BINUH is experiencing additional challenges in attracting female national candidates owing to the operational environment.
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.26)	
The Advisory Committee notes that Security Council resolution 2753 (2024) was adopted on 30 October 2024 and trusts that the detailed transition, asset disposal, including fixed assets, and liquidation plans of UNTMIS, as well as the related post and non-post requirements, taking into consideration lessons learned from previous mission closures, will be included in the next budget submission (para. 6).	Detailed transition, asset disposal and liquidation plans for UNTMIS are integrated into its transition and liquidation plan, activities and budget proposals. The preliminary asset disposal plan for UNTMIS provides a structured framework for asset disposal by coordinating with relevant stakeholders to determine ownership and the most appropriate methods for disposition. Current analysis indicates the following data: • 37.54 per cent of assets and equipment will be shipped or redeployed to other peacekeeping missions. • 55.49 per cent of assets and equipment will be disposed of locally through commercial sale, scrapping or destruction. • 6.2 per cent of assets and equipment will be donated to the Federal Government of Somalia, upon request. To expedite the process, UNTMIS established an asset disposal task force, which oversees and facilitates the disposal of United Nations-owned equipment for UNTMIS. Moreover, drawing on lessons learned from previous mission closures, the preliminary asset disposal plan criteria have been refined to focus on ensuring efficient disposal on the basis of asset condition, life expectancy and cost-effectiveness. UNTMIS is confident that these comprehensive measures will address all aspects of the transition and disposal process, as required.
The Committee trusts that the available allotment will be managed efficiently during the final two months of the 2024 budget period and that the future requirements for UNTMIS will be based on realistic budget assumptions (para. 8).	During the budget period, UNTMIS put in place austerity measures such as a freeze on non-critical acquisitions, non-essential travel and training and a review of its scope of logistical support services in order to manage the available allotment for 2024. The 2025 and 2026 budget proposals were based on realistic budget assumptions and cost drivers for implementing the two transition phases of UNTMIS.
The Advisory Committee trusts that detailed information and a breakdown of the separation costs for	The proposed resources under salaries and other costs also include a provision of $17,464,300 for payments due to staff members at the time of separation from

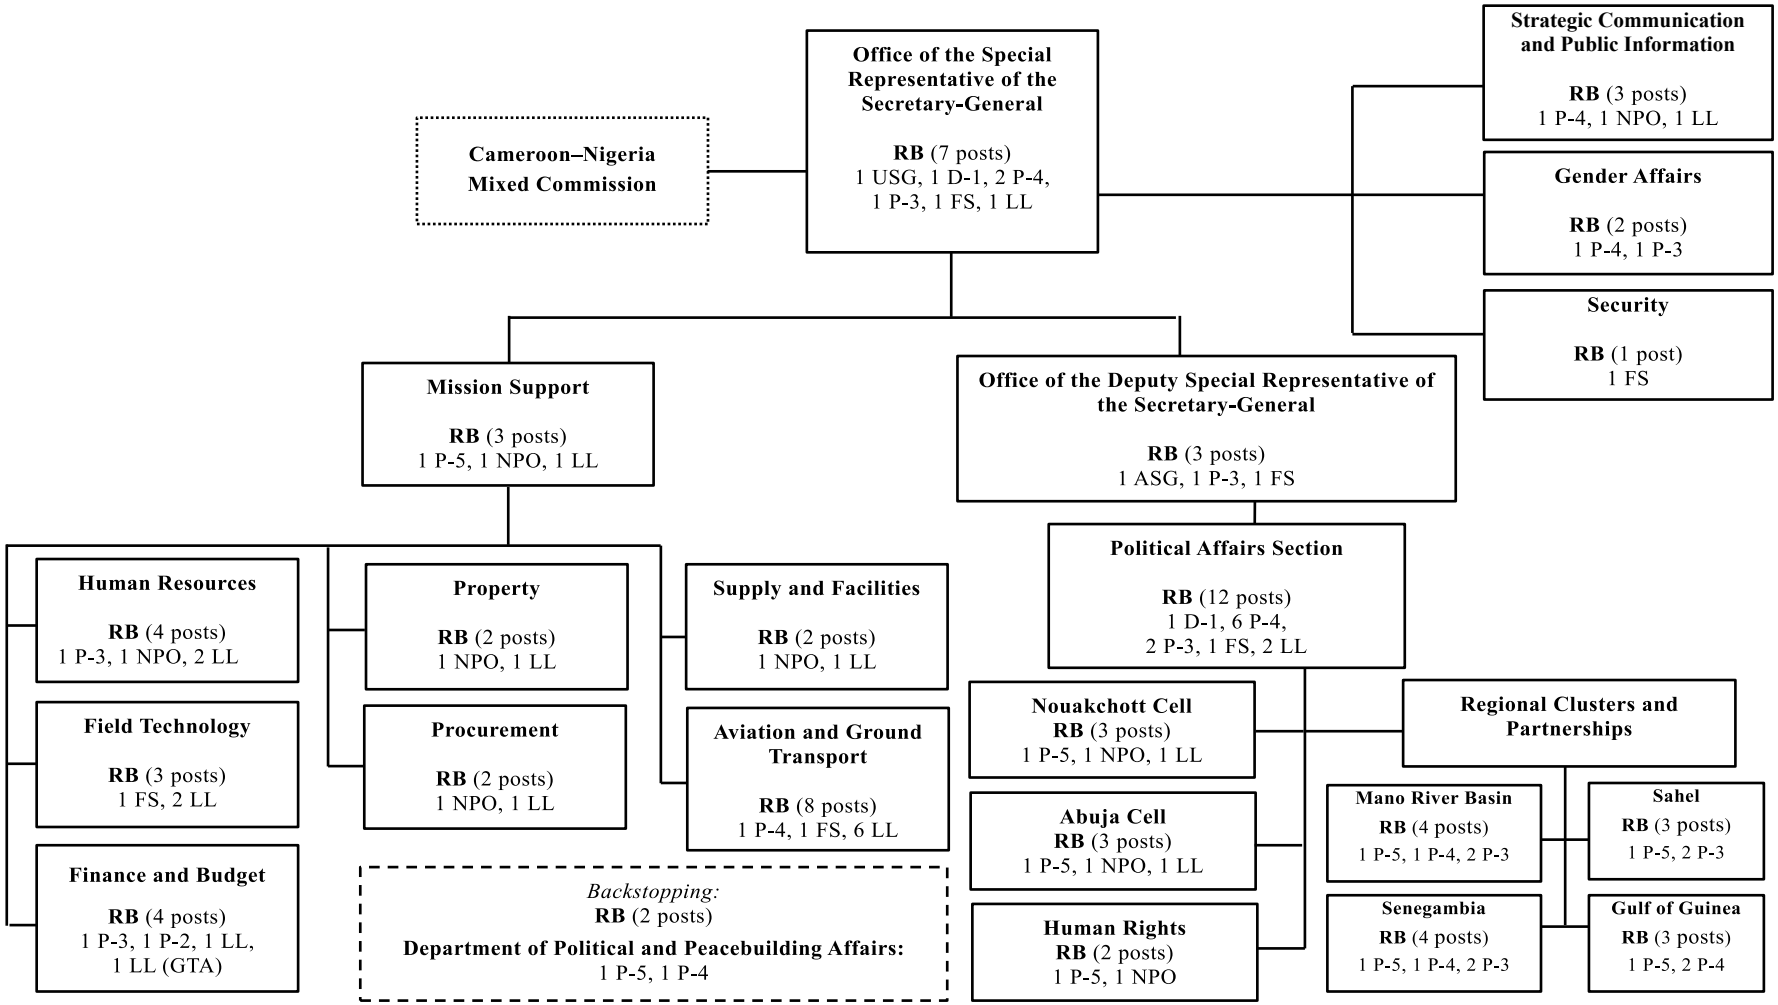
Brief description of the recommendation	*Action taken to implement the recommendation*
all the personnel will be provided in the next budget submission (para. 11).	service. The provision comprises estimated termination indemnity ($6,586,300), repatriation grants ($5,042,000), relocation grants ($1,778,000), accrued annual leave for international and national staff ($3,692,600) and travel expenses to cover repatriation of international staff ($365,400).
The Advisory Committee notes that, during the first and second phases of the transition, some encumbered and vacant posts could be repurposed for other operationally required tasks, as appropriate, and trusts that UNTMIS will review its staffing requirements on a continuous basis, with a view to abolishing, in particular, the vacant posts that are not under recruitment, and submit them for the consideration of the General Assembly in the next UNTMIS budget proposal (para. 21).	The drawdown of UNTMIS staffing is under way. The approved 2025 budget reflects a net reduction of 24 civilian and 5 military and police positions, in accordance with phase one of the transition agreed with the Federal Government of Somalia. Effective 1 January 2025, eight international posts and five military and police positions were abolished. One international D-1 position has been reassigned within the Mission and three international staff posts, along with three United Nations Volunteer positions, were nationalized. Effective 1 July 2025, one general temporary assistance D-1 position will be abolished. Lastly, to conclude phase one of the transition on 1 November 2025, eight international staff posts, six national staff posts and one international general temporary assistance position will be abolished. This phased approach ensures that UNTMIS staffing adjustments align with the agreed modalities while maintaining operational continuity. Transition planning for phase two is progressing in consultation with the Federal Government of Somalia through the established joint technical committee. The Mission's budget proposal for 2026 includes the abolishment of nine posts and two positions effective 1 January 2026. Furthermore, all remaining UNTMIS posts and positions will be abolished by 31 October 2026, except for a small team of eight posts to carry out residual activities. This timeline is subject to the Security Council's decisions and the modalities that it may establish for the second and final phase of the UNTMIS transition.
Notwithstanding the ongoing transition of UNTMIS, the Advisory Committee reiterates the importance of nationalising posts and positions, which will offer new work experiences to staff and build national capacity. The Committee trusts that efforts will be made by UNTMIS to assist national staff at all levels in finding employment opportunities, including by collaborating with the United Nations country team, as well as other international and national agencies present in the country. The Committee looks forward to an update thereon in the next budget submission (para. 22).	UNTMIS, during its closure, will pursue, within available resources, other means of career transition support for national staff, such as an enhanced focus on training and certifications and career fairs with other United Nations entities and similar potential employers. All necessary support as applicable for UNTMIS national staff in accordance with the downsizing policy (ST/AI/2023/1) and resources and liquidity permitting will be provided.

Brief description of the recommendation	*Action taken to implement the recommendation*
The Advisory Committee encourages continuous efforts to build national staff capacity through repurposing of the existing resource requirements (para. 25).	UNTMIS, through the UNSOS Integrated Mission Training Centre, is finalizing its 2025 training and capacity-building plan for national staff, drawing on a training needs assessment, the results of a March 2025 survey targeting UNTMIS national staff and feedback on national staff training needs received from substantive components. Capacity-building initiatives planned for phase one of the UNTMIS transition focus on enhancing essential skills, capacities and capabilities required for the continued delivery of the Mission's mandate and on career development opportunities beyond the life cycle of UNTMIS. Given the liquidity constraints and continued austerity measures, all training initiatives will either be offered in-mission or online, thereby maximizing the number of national staff benefiting from them. An emphasis is placed on certification training. In addition, the Mission will support the cross-training of interested national staff in other UNTMIS substantive sections, in agreement with supervisors, to broaden the professional experience of existing staff and facilitate synergies.
The Advisory Committee considers that, at this stage in the life cycle of UNTMIS, the capitalization of all existing, ongoing and planned investments, including construction, maintenance and rehabilitation, should be carefully considered in view of the forthcoming disposal of assets and the future use of the compound (para. 27).	The Advisory Committee's recommendation has been taken into account in full. Accordingly, no new major construction projects are planned or proposed in the UNTMIS budget. Ongoing construction activities are limited to regular maintenance and minor construction activities to ensure the sustainability of critical infrastructure, including offices, accommodations, bunkers and perimeter fortifications, in order to mitigate the threat of rocket attacks. In addition, only minor repairs and facility upgrades are being undertaken across Mogadishu and other sectors. The Mission remains committed to ensuring that the disposal of assets and decisions regarding the future use of the compound will be conducted in accordance with the established guidelines.
The Advisory Committee trusts that more detailed information, including the related resources for the logistical support package provided by UNSOS on a cost-recovery basis, will be included in the next budget submissions of both UNTMIS and UNSOS (para. 29).	UNTMIS confirms that, as required by the Security Council in line with its resolution 2741 (2024), UNTMIS has included provision for resources reimbursement on a cost-recovery basis for administrative and logistical support packages provided by UNSOS for 2026. The reimbursement includes costs for the provision of human resources, finance, logistics, technical and procurement services. The costs have been determined on the basis of workload statistics specific to various functions.

Annex II

Organizational structure and post distribution for 2026

1. United Nations Office for West Africa and the Sahel



2. United Nations Transitional Assistance Mission in Somalia

** The part consisting of the proposed programme plan for 2026 is submitted for the consideration of the General Assembly in accordance with the established budgetary procedures and practices reaffirmed in paragraph 7 of Assembly resolution 77/267.

*** In keeping with paragraph 10 of General Assembly resolution 77/267, the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1. The mandate of the United Nations Assistance Mission in Afghanistan (UNAMA) is defined in Security Council resolutions 1401 (2002), 1662 (2006) and 2626 (2022), and renewed by its subsequent resolutions, including most recently resolution 2777 (2025), by which the Council extended the mandate of the Mission until 17 March 2026.

2. As mandated by the Security Council, UNAMA will continue to promote peace and stability in Afghanistan, including by coordinating and facilitating enhanced cooperation and coherence in the financial resourcing and delivery of humanitarian and basic human needs assistance that support strengthened resilience; coordinating efforts with donors and other stakeholders to reduce risk and increase accountability, transparency and effectiveness in the use of aid; supporting efforts, including the provision of essential services and economic recovery, to create the conditions for self-reliance and stability for the Afghan population; assessing the explosive ordnance threat and coordinating mitigation measures to enable humanitarian and development initiatives; providing outreach and good offices to promote dialogue between Afghan stakeholders, the region and the international community to promote inclusive and responsive governance, and providing advice on inclusive national and local consultative mechanisms, and confidence-building measures; promoting responsible governance and the rule of law; engaging with all stakeholders on the promotion and protection of human rights, including the rights of women and girls; supporting regional cooperation; and supporting existing mechanisms to improve the overall security situation in Afghanistan, including regional and international efforts to prevent and address the illicit trade in and destabilizing accumulation of small arms and light weapons and their diversion in Afghanistan and the region.

Programme of work

Objective

3. The objective, to which the Mission contributes, is to create the conditions for peace and stability, with foundations established for the promotion of inclusive and responsive governance and functioning and accountable institutions, as well as a coherent and sustainable path towards the economic and social conditions for self-reliance.

Strategy and external factors for 2026

4. To contribute to the objective, the Mission will:

   (a) Coordinate with international donors, organizations and partners in addressing the humanitarian and basic human needs of vulnerable Afghans. The Mission will partner with the United Nations country team to support economic development and increase donor confidence for greater basic human needs support, as emphasized in the independent assessment on Afghanistan requested by the Security Council in its resolution 2679 (2023), and to implement the 2030 Agenda for Sustainable Development, with a focus on the objectives of the Pact for the Future, particularly with regard to climate financing, poverty alleviation and upholding the principles and values of the Charter of the United Nations. To that end, it will support resource mobilization to enable humanitarian efforts, essential services, the restoration of livelihoods, support to the private sector, economic development and mitigation of the dangers of explosive remnants of war. The Mission will engage with the de facto authorities and other stakeholders

to facilitate the support of the United Nations, international financial institutions and other international and national partners to the socioeconomic recovery of Afghanistan from the severe economic contraction;

(b) Provide outreach and good offices, including by facilitating dialogue between Afghan political actors and stakeholders, regional stakeholders and the wider international community. The Mission will use its convening platforms at the national and subnational levels to facilitate engagement and cooperation between the de facto authorities, civil society, young people, communities, women-led organizations and other stakeholders on governance and policy issues, such as inclusion, participation and responsiveness to constituency concerns. It will maintain support for promoting the participation of women and minorities in all spheres. It will also continue to identify further entry points for engagement with the de facto authorities for the benefit of all Afghans, including through the proposed United Nations road map and comprehensive approach for Afghanistan. In addition, the United Nations and international partners will monitor and report on developments related to the rule of law and conduct analysis relating to the political economy. The Mission will provide technical and analytical support to United Nations agencies and humanitarian partners and will continue to engage with civil society, the media, communities and counterpart institutions of the de facto authorities, in compliance with the sanctions set out in relevant Security Council resolutions related to anti-money-laundering and counter-terrorism financing;

(c) Advise stakeholders on and promote respect for civil, political, economic, social and cultural rights, particularly with regard to human rights issues pertaining to children affected by armed conflict; discrimination against women and girls; the treatment of detainees and the prevention of torture and ill-treatment; human rights defenders and civic space; and the promotion of accountability for human rights violations. In addition, UNAMA will continue to integrate human rights and gender mainstreaming as cross-cutting issues in mandate implementation. The Mission will promote and support gender equality, the empowerment of women and girls, and the participation and leadership of women in public life and at all levels and stages of decision-making. It will also partner with the United Nations country team to promote the protection and fulfilment of the rights of women and girls and the implementation of Security Council resolution 1325 (2000) on women and peace and security, and successive resolutions on the matter;

(d) Support peace and stability in Afghanistan through consultations and by utilizing its convening power for dialogues with political stakeholders. The Mission will use existing mechanisms to advance regional cooperation on economic development and security to help to foster a regional environment conducive to sustainable peace and stability. In addition, it will propose and support regional approaches to issues, such as the return and reintegration of refugees and internally displaced persons, combating illicit drugs and trafficking, addressing the illicit accumulation and trafficking of small arms and light weapons in Afghanistan and the region, and reducing the illegal economy and its impact. It will also coordinate explosive ordnance threat mitigation measures to enable the safe delivery of humanitarian and basic human needs initiatives;

(e) Intensify its work to implement the United Nations Strategic Framework for Afghanistan, 2023–2025, which has been extended to 2027, in line with the humanitarian-development-peace nexus, by engaging with the de facto authorities, civil society and the media to facilitate the transition of society from conflict to peace and removing explosive remnants of war. The Mission will contribute to the goal of reduced dependency on aid, prioritizing United Nations assistance in critical sectors, such as banking, trade and economic reform. The Deputy Special Representative of the Secretary-General (Resident Coordinator/Humanitarian Coordinator) will ensure a coherent approach to United Nations humanitarian and basic needs programming for the benefit of the Afghan people. The Mission will streamline the delivery, oversight and reporting of aid provided in Afghanistan, in alignment with the Strategic Framework and in

partnership with the de facto authorities, civil society and international partners. It will also enhance collaboration on aid architecture and risk management practices.

5. The above-mentioned work is expected to result in:

   (a) The advancement of a political process involving the de facto authorities and other national stakeholders within and outside Afghanistan, as well as the international community, to improve the situation of Afghans, including through efforts aimed at improving the inclusiveness and responsiveness of governing entities, and to support the creation of conditions that could eventually lead to the reintegration of Afghanistan into the international community, in accordance with relevant Security Council resolutions;

   (b) Progressive compliance by all parties with international humanitarian law and human rights obligations, with improved accountability for human rights violations and abuses, with a view to building confidence in such mechanisms and between the population and the de facto authorities;

   (c) Ongoing accurate reporting to the international community on the evolving situation in Afghanistan and its implications for international peace and security;

   (d) Sustained local, regional and international support to meet humanitarian and basic human needs and promote economic development, and to create an environment conducive to socioeconomic recovery in Afghanistan.

6. With regard to cooperation with other entities, the Mission cooperates with international and regional entities and supports constructive dialogue between the relevant Afghan stakeholders, regional actors and the international community that is focused on the rights and socioeconomic progress of the Afghan people.

7. With regard to inter-agency coordination and liaison, UNAMA engages with the United Nations country team to strengthen the repositioning of the United Nations development system and to deliver more effectively and efficiently in line with the 2030 Agenda, the Pact for the Future, the Sustainable Development Goals and the humanitarian-development-peace nexus. The Mission and the United Nations country team collaborate closely on issues related to governance, the rule of law, human rights and gender, focusing on policy issues and good offices. With the evolving context in Afghanistan, the Mission's work also supports the delivery of humanitarian response and meeting basic human needs through the restoration of essential services, livelihoods and community systems, in line with Inter-Agency Standing Committee recommendations. The Mission supports the removal of explosive ordnance, the delivery of risk education and the provision of victim assistance to enable humanitarian and basic human needs activities. It collaborates with various stakeholders to explore new aid approaches targeting economic promotion and recovery. It also leads the coordination of an overall risk management approach of the United Nations in Afghanistan, including mitigating the risk of aid diversion, and engages with the United Nations country team to increase efficiency gains and the effectiveness of operations by sharing services and premises. In addition, the Mission coordinates on specific issues with the United Nations Regional Centre for Preventive Diplomacy for Central Asia to provide good offices and expert advice on confidence-building measures in the region that contribute to stability in Afghanistan.

8. With regard to external factors, the overall plan for 2026 is based on the following planning assumptions:

   (a) The de facto authorities will remain in control of the territory of Afghanistan. However, political, security, human rights, legal, socioeconomic and humanitarian uncertainties will continue. The likely continuation and furthering of restrictive policies will present challenges for the full reintegration of Afghanistan into the international community;

   (b) The lack of international recognition, and, to an extent, domestic legitimacy of the de facto authorities due to questions about lack of representation and inclusion, the dissonance between their ideology and international norms and standards, the continued absence of a constitution

and the promulgation of repressive decrees, especially those aimed at women and minority groups, will pose significant challenges in engaging with domestic, regional and international stakeholders on the future of Afghanistan;

(c) The security situation will remain uncertain, with the likelihood of continued attacks by Islamic State in Iraq and the Levant-Khorasan against the de facto authorities and the international presence, activities of anti-Taliban armed opposition groups and dynamics related to the presence of regional and international foreign terrorist fighters and their access to illicitly accumulated small arms and light weapons, with an impact on the Mission, as well as on development and humanitarian actors, in terms of access and physical security;

(d) Relations between Afghanistan and some of its neighbours will remain tense due to unresolved security issues, threats of terrorism, and migration and water management issues;

(e) Civilians, including those working as humanitarians and supporting basic human needs, will continue to face the threats of explosive ordnance, including those from improvised explosive devices and explosive remnants of war;

(f) Enduring threats, such as terrorism, organized crime and illicit trafficking, including in narcotics, small arms and light weapons, and resource competition, will continue, with threats emerging from issues such as land rights and the disenfranchisement of minorities, population outflow, returnees, unemployment and the impact of evolving regional dynamics, as well as vulnerability to the adverse impact of climate change, ecological changes and natural disasters, which may heighten the risk of local conflicts over land, water and other resources;

(g) The economy and human development will remain adversely affected by the continuing impact of non-recognition and donor sensitivities, the severe restrictions by the de facto authorities on female national staff working for the United Nations and non-governmental organizations (NGOs), and the limitations of the de facto authorities to reinvigorate the economy and reduce poverty, with the resumption of development funding depending on the de facto authorities meeting international norms, especially in relation to the protection of human rights, including for women and girls;

(h) In a context where funding is diminishing and mobilizing additional resources is increasingly challenging, the United Nations is expected to demonstrate increased complementarities and efficiencies in humanitarian assistance and recovery support. This includes focusing on meeting basic human needs by maintaining essential services and preserving community systems;

(i) As viable alternatives for large-scale legitimate financial transactions remain unavailable, the United Nations will continue to rely on and incur the costs associated with the cash importation facility of the Secretariat, managed at Headquarters.

9. The Mission integrates a gender perspective in its operational activities, deliverables and results. For example, in its engagement with the de facto authorities and political stakeholders, UNAMA continues its advocacy for the full and meaningful participation of women in political processes at all levels. The Mission continues to support the implementation of Security Council resolutions 1325 (2000) and 2493 (2019), particularly on gender equality, the empowerment of women and girls and their human rights.

10. In line with the United Nations Disability Inclusion Strategy, UNAMA will implement its revised strategy plan, with a focus on: (a) increasing the number of outreach projects and activities with persons with disabilities in communities in order to foster engagement; (b) reinforcing an organizational culture that supports the inclusion of persons with disabilities; (c) advancing disability inclusion in strategic planning and management, knowledge and information management, staff training and career development; and (d) promoting workplace accessibility and enabling the performance of functions.

Evaluation activities

11. The audit by the Office of Internal Oversight Services of the emergency preparedness and management of cost recovery arrangements of UNAMA, and an internal evaluation of the Mission's outreach activities, were completed in 2024 and have guided the proposed programme plan for 2026. In response to the internal evaluation findings, in which the critical role of outreach activities in mandate implementation was highlighted, UNAMA will expand its outreach engagements to foster dialogue between Afghan stakeholders, including the de facto authorities. This expansion will support efforts to achieve rights-based stability and promote the full reintegration of the Afghan State into the international community.

Programme performance in 2024

Creation and maintenance of a space for dialogue among diverse Afghan constituencies, amid increasing restrictions on the Afghan population and the narrowing media and public space

12. A space for women, young people, and ethnic and religious minority groups was created through the Mission's engagement with Afghan stakeholders, with the aim of supporting their agenda for dialogue with the de facto authorities, including with regard to their political and economic participation and empowerment. These efforts were a result of the Mission's continued countrywide consultations, including its engagement with the de facto authorities and other stakeholders on the protection of human rights in Afghanistan, including those of women and girls, to understand their position and advocate for an articulated socioeconomic, political and policy agenda supported by the de facto Cabinet and its leadership in Kandahar; and the facilitation of outreach and community engagements with the de facto authorities, religious leaders, young people, civil society and business actors. The Mission also engaged with the political opposition and former government officials.

13. Based on stakeholder engagements, UNAMA identified areas of common interest for targeted action, such as countering narcotics, combating climate change and enabling the private sector, including through microfinance and women's entrepreneurship. The Mission engaged with a wide range of stakeholders, including through broad consultations with businesspersons – both women and men – and the participation of technical experts in the small group on alternative livelihoods as part of the working groups on counter-narcotics efforts and the private sector under the Doha process. It also fostered dialogue between the international community and the de facto authorities, resulting in enhanced aid coordination. The Afghanistan Coordination Group held key meetings on funding, private sector development and the humanitarian-development-peace nexus, while the high-level coordination forum broadened its focus from humanitarian aid to the coordination of basic human needs assistance.

14. Nevertheless, ongoing restrictions on the media and civic space by the de facto authorities continued to have an impact on, in particular, women media workers and women civil society actors, as well as United Nations female national personnel, which had a significant impact on the Mission's ability to conduct outreach.

15. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Enhanced UNAMA-facilitated dialogues between diverse Afghan constituencies and the de facto authorities to discuss good governance principles and improve community	Despite significant restrictions on women, continuous engagement with Afghan constituencies, as well as the facilitation of outreach meetings,	Some space for diverse voices was created and maintained despite continued restrictions on the Afghan population, especially women, as a result of the Mission's continuous

2022 (actual)	*2023 (actual)*	*2024 (actual)*
relations, as well as to promote international community engagement with the de facto authorities on international norms and principles	contributed to maintaining some space for diverse voices	engagement with the de facto authorities and other Afghan constituencies, and the facilitation of outreach meetings

Planned results for 2026

Result 1: rights-based stability in Afghanistan

Programme performance in 2024 and target for 2026

16. In 2024, the Mission maintained regular engagement with the de facto authorities, other national stakeholders and the international community on issues relating to human rights, the rule of law, governance and inclusion. Given the ongoing restrictions on the enjoyment by women and girls of their rights and amid shrinking civic space, UNAMA continued advocacy with the de facto authorities to reverse their restrictions on women, civil society and media, as well as to engage other national and subnational stakeholders, including through the United Nations-convened meetings of special envoys for Afghanistan and the subsequently established working groups.

17. In 2026, the Mission will maintain engagement with the de facto authorities on overarching priorities, particularly the situation of vulnerable groups, including women and girls, as well as ethnic and religious minorities, and efforts relating to accountability for human rights violations by de facto authorities. This work is expected to contribute to the level of international assistance to meet humanitarian and basic human needs, efforts towards compliance with international human rights and humanitarian law obligations, and a more conducive environment for inclusive governance.

18. Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 2).

Table 2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Regular United Nations engagement with the de facto authorities, other national stakeholders and the international community for sustained support to meet humanitarian and human needs, as well as compliance by relevant de facto authorities with international human rights and humanitarian law obligations Regular United Nations injection of cash for humanitarian	Regular United Nations engagement with the de facto authorities, non-Taliban figures and those from different ethnic groups and geographical regions, to advocate for inclusive governance as well as support for the establishment of mechanisms at the national and subnational levels for inclusive governance	Continued efforts towards inclusive and responsive governance, and pursuit of a political path for confidence-building between Afghan stakeholders and the international community	Continued efforts towards an inclusive, representative, participatory and responsive governance model, including dialogue between diverse Afghan constituencies and the de facto authorities	Identification of a responsive and consultative governance model, including through political consultations among the de facto authorities, other Afghan stakeholders and the international community, facilitated by the Mission

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
assistance, in coordination with the Central Bank and other partners Regular subnational outreach meetings and facilitated community relationship-building and engagement with the de facto authorities	Provision of support to the development of a structured policy dialogue for confidence-building between Afghan stakeholders and the international community			

Result 2: supporting efforts towards the full reintegration of the Afghan State with the international community

Programme performance in 2024 and target for 2026

19. The Mission supported the second and third United Nations-convened meetings of special envoys for Afghanistan in Doha in February and in June–July 2024, with the de facto authorities participating in the latter and Afghan civil society representatives attending dedicated sessions at both meetings. The Mission subsequently supported the establishment of working groups on the private sector and on counter-narcotics efforts as part of confidence-building measures.

20. The Mission will renew its efforts to facilitate dialogue between Afghan stakeholders, including actors from all strata of society in Afghanistan. It will continue to support the United Nations country team and international partners with institutionalizing the monitoring of delivery of principled basic human needs assistance into verifiable reporting mechanisms for the accountability of the United Nations Strategic Framework for Afghanistan.

21. Progress towards the objective is presented in the performance measure below (see table 3).

Table 3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Facilitation of more coherent, coordinated and structured international engagement, including the convening of two meetings of the special envoys for Afghanistan in Doha in February and June–July and the subsequent launch of the working groups on counter-narcotics efforts and the private sector	Continued facilitation of increased coherent, coordinated and structured international engagement aimed at an Afghanistan reintegrated into the international community and meeting international obligations	Increased coherent, coordinated and structured international engagement, with tangible steps towards an Afghanistan reintegrated into the international community and meeting international obligations

Result 3: strengthened economic and social resilience in Afghanistan

Proposed programme plan for 2026

22. The Mission will continue its efforts to strengthen basic human needs programming through the coordination of United Nations agencies and resource mobilization activities with donors, while maintaining advocacy to continue resourcing critical humanitarian needs. It will pursue increased aid dialogue with the de facto authorities in order to promote a conducive regulatory and operational environment for the private sector and aid organizations.

Lessons learned and planned change

23. A lesson for the Mission was the importance of strengthening the private sector and promoting livelihood assistance, as such an approach reduces humanitarian needs, strengthens the resilience of Afghans and paves the way for economic stability. In applying the lesson, the Mission will strengthen its engagement with the private sector, including through the working group on the private sector under the Doha process and regular consultations with private sector representatives. It will further capitalize on the United Nations Strategic Framework for Afghanistan and engage non-donor Member States to align their private sector support with a holistic private sector support strategy that promotes the resilience of Afghan communities and equitable growth.

24. Expected progress towards the objective is presented in the performance measure below (see table 4).

Table 4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	Strengthened resilience of Afghan communities as a result of a strategic shift from a predominantly humanitarian response to increased funding for basic human needs	Strengthened aid dialogue with the de facto authorities, aimed at enabling a more conducive regulatory and operational environment for the private sector and aid organizations

Deliverables

25. Table 5 lists all deliverables of the Mission.

Table 5
Deliverables for the period 2024–2026, by category and subcategory

Deliverables	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**4**	**4**	**4**	**4**
1. Reports of the Secretary-General to the Security Council	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	**4**	**4**	**4**	**4**
2. Meetings of the Security Council	4	4	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**42**	**96**	**50**	**52**
3. Discussion/awareness-raising/sensitization sessions with human rights stakeholders, including local authorities, civil society organizations and human rights defenders, on human rights standards	32	70	30	30
4. Consultations with Afghan women to enable an articulation of their views for engagement with the de facto authorities	10	26	20	22
Technical materials (number of materials)	**1**	**8**	**1**	**1**
5. Thematic or special human rights-related reports	1	8	1	1
C. Substantive deliverables				
Good offices: engagement with the de facto authorities, Afghan political and economic actors, civil society and countries in the region to support inclusive and responsive governance processes, peace and stability at the national and subnational levels and access to humanitarian and basic services; support for dialogue and confidence-building measures between the de facto authorities and other stakeholders to encourage and build consensus on subnational governance, inclusion, civic space, young people and fundamental rights and freedoms; enhanced regional cooperation on security-political matters, economic development, disaster management and people-to-people contacts; and support for a coordinated international response to Afghanistan.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach activities with Afghans, opinion leaders, the media, civil society, young people and other change agents to support the implementation of the UNAMA mandate.				
External and media relations: press conferences, statements, advisories, backgrounders, interviews and other media engagements related to the Mission's objectives.				
Digital platforms and multimedia content: dissemination of the Mission's mandated work through the Mission's website and social media accounts.				

B. Proposed post and non-post resource requirements for 2026

1. Total resource requirements

Resource requirements (regular budget)

Table 6
Financial resources
(Thousands of United States dollars)

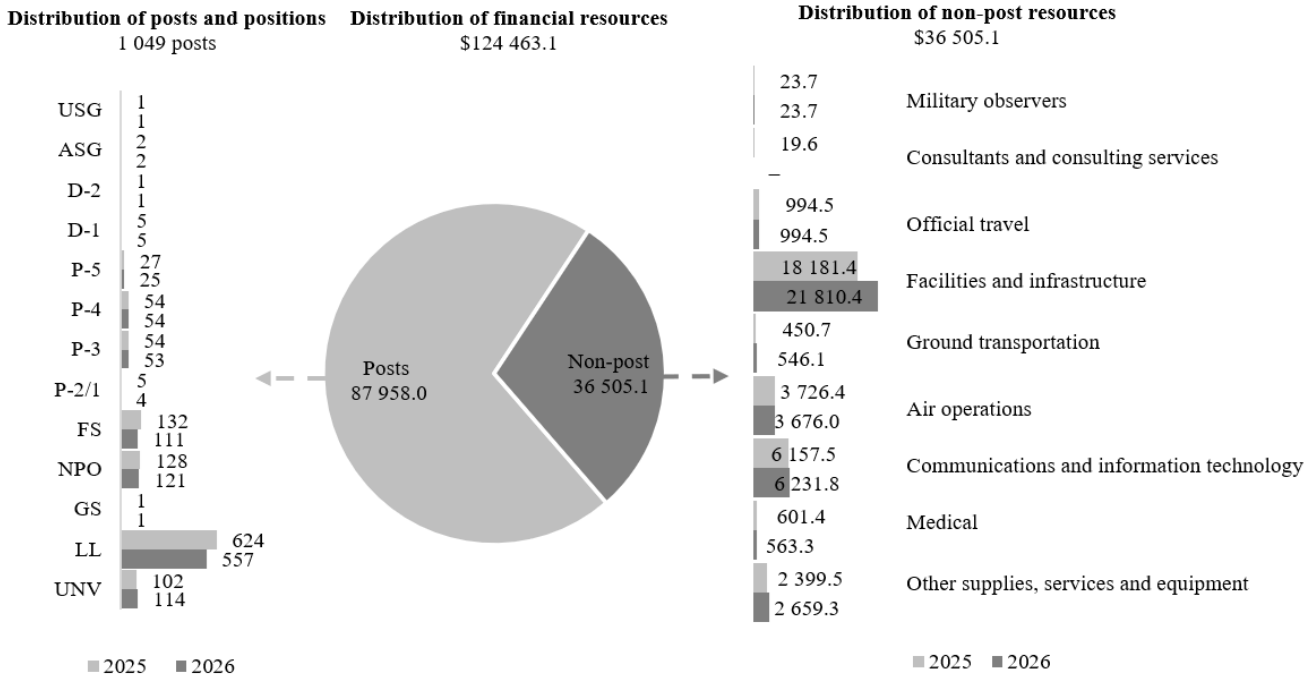
[a] One post is funded at 50 per cent and cost-shared with the Development Coordination Office.
[b] Includes one P-5, one P-4, one NPO and one LL position approved as general temporary assistance.

26. The proposed resource requirements for 2026 for UNAMA amount to $124,463,100 (net of staff assessment) and would provide for civilian personnel costs ($87,958,000) consisting of salaries, common staff costs and danger pay for the deployment of 1,049 posts and positions (1 Under-Secretary-General, 2 Assistant Secretary-General, 1 D-2, 5 D-1, 25 P-5, 54 P-4, 53 P-3, 4 P-2, 111 Field Service, 121 National Professional Officer, 1 National General Service staff, 557 Local level and 114 United Nations Volunteer), inclusive of the abolishment of 117 posts, of which 38 posts in the Kuwait Joint Support Office will be abolished effective 1 October 2026, the proposed establishment of 18 new posts and 3 new international United Nations Volunteer positions, and the proposed conversion of nine national United Nations Volunteer positions from extrabudgetary resources; the cost of one military observer ($23,700); and operational costs in the amount of $36,481,400.

Note: The following abbreviations are used in tables: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; iUNV, international United Nations Volunteer; LL, Local level; NPO, National Professional Officer; nUNV, national United Nations Volunteer; USG, Under-Secretary-General.

27. The decrease in requirements for 2026 compared with the appropriation for 2025 is attributable to reduced requirements for civilian personnel, owing mainly to the abolishment of 117 posts and the application of a higher vacancy rate for international staff, offset by higher requirements for United Nations Volunteer costs owing to a lower vacancy rate and higher entitlement costs, as well as the proposed establishment of 18 new posts. The decrease in requirements is offset in part by increased requirements for operational costs, attributable primarily to additional requirements for: (a) construction of a central warehouse for more efficient space management and for the improvement of the wastewater treatment plant and the compound facilities, including for security upgrades; and (b) acquisition of safety and security equipment, as well as the replacement of prefabricated accommodations and equipment, and engineering supplies required for the general maintenance of the compounds and to support the planned minor projects.

Figure
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Vacancy rates

28. Table 8 outlines the proposed vacancy rates for 2026, which take into account the 2024 average vacancy rate and the actual vacancy rate as at 31 March 2025. This is in line with the policy guidance provided to improve the accuracy and consistency of the vacancy factors applied in the proposed budget for 2026 and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishment of new posts and positions, or posts and positions proposed for reassignment.

Table 8
Vacancy rates
(Percentage)

Category	*Actual average in 2024*	*Approved 2025*	*Actual as at 31 March 2025*	*Proposed 2026*

United Nations Volunteers				
International	4.0	5.3	4.0	4.0
National	5.0	5.0	11.1	5.0

[a] Includes General Service and Local level staff.

2. Staffing requirements

29. For 2026, a number of efficiency-driven reconfigurations and optimizations of the structure and staffing of UNAMA are proposed, resulting from efforts focused on:

(a) Streamlining the field office configuration in the northern region, through the closure of the Maymana and Pul-e Khumri provincial offices, with the mandate delivery in these areas to be the covered by a roving capacity from the Mazar-e Sharif regional office, resulting in the proposed abolishment of 19 posts, the reassignment of 6 posts and positions, and the redeployment of 14 posts to various field offices and the Security Section in Kabul;

(b) Restructuring the security communications architecture for greater operational efficiency: it is proposed to create a Remote Security Operations Centre in Kabul which would enable radio networks to be monitored remotely, reducing the requirement to operate physical security operation centres in the field, leading to the proposed abolishment of 21 Field Radio Operator (Local level) posts. It is proposed that the centre be constituted with 21 Field Security Radio Operators (Local level) through the continuation of the 4 existing posts in Kabul and the redeployment of the remaining 17 posts of Field Radio Operator (Local level) from the field offices;

(c) Transitioning of client missions of the Kuwait Joint Support Office to the Regional Service Centre in Entebbe, Uganda: in view of the termination of the mandate of the United Nations Assistance Mission for Iraq (UNAMI) on 31 December 2025, it is the intention of the Secretariat to transition the peace operations supported by the Office to the Centre by the end of the UNAMI liquidation process in September 2026. In line with this plan, the current budget contains the proposed abolishment of 38 posts in the Office that are funded from UNAMA, effective 1 October 2026;

(d) Further optimization of staffing resources to address capacity gaps in key mandated areas and the repurposing of resources in view of evolving priorities, ensuring that posts and positions are aligned to the functions performed, and that they are retained only after critical review for continuing needs. These gaps and competing priorities were discussed in several senior leadership meetings before and during budget preparation, and also through further consultation with Headquarters.

30. In view of the low percentage of female national staff within the Mission, UNAMA is continuously undertaking efforts to address challenges that prevent the attainment of gender parity, through capacity-building for women. The national United Nations Volunteers play a critical role in the Mission's activities, in both substantive and mission support sections, and are essential for achieving and maintaining the UNAMA mandate, including by integrating the perspectives of Afghan women in all areas of work and enhancing the Mission's capacity to reach local communities and the most vulnerable groups. In line with the efforts to continue to improve the gender balance in the Mission's staffing, and taking into account the prospects of shrinking extrabudgetary resources, it is proposed that the existing nine national United Nations Volunteer positions that are held by women and currently funded from extrabudgetary resources be converted to regular budget funding in 2026, to continue to support programmes of work of components across the Mission. The conversion provides some element of assured continuity in this flagship initiative, which supports the advancement of women's involvement in society and supports the gender parity efforts of UNAMA to employ and empower young professional Afghan women who would otherwise be struggling to find professional purpose in their lives after graduation.

31. The cost efficiencies to be achieved for 2026 are as follows:

Table 9
Efficiency gains
(Thousands of United States dollars)

Category	*Initiative*	*Estimated amount (2026)*
Civilian personnel	Abolishment of 27 posts the functions of which can be absorbed by remaining existing capacities	2 107.3
Civilian personnel	Abolishment of 19 posts resulting from the streamlining of the field office configuration in the northern region	785.4
Facilities and infrastructure	Cost avoidance owing to the closure of the Maymana and Pul-e Khumri provincial offices	562.6
Civilian personnel	Abolishment of 21 posts owing to the restructuring of the field security operations centres	710.6
Civilian personnel	Abolishment of 10 National Professional Officer posts the functions of which can be carried out at the local level	542.0
Communications and information technology	Cost avoidance on software and user-based fees owing to the proposed abolishments	80.0
Facilities and infrastructure	Reduction of fuel consumption by generators resulting from project upgrades	78.6
Total		**4 866.5**
Approved budget for 2025		124 695.0
Efficiencies as a percentage of the approved budget for 2025		3.9

32. For 2026, the proposed staffing complement reflects a net decrease of 87 posts and positions, as a result of the following changes:

- Abolishment of 117 posts (2 P-5, 1 P-4, 2 P-3, 1 P-2, 21 Field Service, 10 National Professional Officer and 80 Local level), inclusive of 38 posts abolished in the Kuwait Joint Support Office effective 1 October 2026;
- Establishment of 21 posts and positions (1 P-4, 1 P-3, 3 National Professional Officer, 13 Local level and 3 international United Nations Volunteer);
- Reassignment of 12 posts and positions;

- Redeployment of 39 posts;
- Conversion of 9 positions from extrabudgetary funding.

33. These changes are detailed by organizational unit in the sections below. Annex II to the present report contains the organizational charts.

34. The Special Representative of the Secretary-General for Afghanistan provides strategic leadership to the political, human rights and development/humanitarian coordination-related work of the United Nations in the country. The Special Representative serves as Head of Mission, is responsible for the executive management of the Mission's resources and administration and is supported by the Front Office.

35. The following changes are proposed for 2026:

(a) **Front Office of the Office of the Special Representative of the Secretary-General for Afghanistan**:

(i) Redeployment of one post of Chief of Section, Conduct and Discipline (P-5), to Kabul from Kuwait, effective 1 January 2026, in view of the closure of the UNAMA Support Office in Kuwait and to enhance oversight and coordination with key stakeholders and client missions, taking into consideration that UNAMA accounts for more than half of the allegations processed by the Unit;

(ii) Establishment of one post of Associate Protocol Officer (National Professional Officer) and one post of Assistant Coordination Officer (National Professional Officer), in combination with the proposed abolishment of the two posts of Administrative Assistant (Local level), to strengthen the protocol capacity of the Office, which requires dedicated protocol and advisory support at a higher degree of expertise and responsibility in order to provide effective engagement support to the head of entity. The Associate Protocol Officer will be responsible for supporting the Office in managing formal engagement with the de facto authorities on United Nations privileges and immunities and host country obligations, coordinating high-level meetings and managing administrative tasks to ensure the timely resolution of sensitive issues and enhanced Mission compliance with host country protocols and procedure. The Assistant Coordination Officer will support the Office's high-level political engagement through liaison, coordination and contextual advisory functions, including the maintenance of working relationships with de facto officials, diplomatic missions and civil society actors; preparation of correspondence and background materials; the provision of general administrative support; and the provision of advice on cultural, religious and political sensitivities to ensure effective engagement in a politically complex environment;

(b) **Human Rights Service**: redeployment of one post of Human Rights Assistant (Local level) from the Kabul field office to support the work of the Service on issues related to detention monitoring and the prevention of torture and ill-treatment in prisons and places of detention;

(c) **Gender Advisory Unit**: reassignment of one position of Facilities Management Assistant (international United Nations Volunteer) as Gender Affairs Officer (international United Nations Volunteer) from the Acquisition Management Unit to enhance the capacity of the Unit to effectively mainstream gender equality as a cross-cutting issue throughout mandate implementation and support the advancement of the implementation of the women and peace and security agenda, in line with Security Council resolution 2727 (2024) and related resolutions;

(d) **Security Section**: changes to the staffing structure in the Security Section are proposed to ensure effective resource management and the efficiency of the day-to-day administrative needs of the Section in the context of the restructuring of the Mission's field security operations centre. UNAMA has reviewed its security communications architecture and, in line with recommendations from assessments undertaken, proposes to create a central Remote Security Operations Centre in Kabul. Currently, the Mission operates a physical security operations centre in each field location, with 46 Field Security Radio Operators providing security communications support nationwide. Under the remote modality, security communication operations will be consolidated in Kabul, from which remote field radio networks will be centrally monitored and operated. With the implementation of the remote centre, the number of physical security operations centres in the regions would be reduced, leading to the abolishment of 25 posts of Field Security Radio Operator (Local level) (inclusive of four posts abolished in the context of the closure of the Maymana and Pul-e Khumri provincial offices) across the various field offices. To that end, it is further proposed that the centre be constituted through the continuation of 4 existing posts in Kabul and the redeployment of 17 posts of Field Security Radio Operator (Local level) from the field offices (10 from the regional offices and 7 from the provincial offices). The following changes in the Section are therefore proposed for 2026:

(i) Reassignment of two posts from the Kabul field office: one post of Security Coordination Officer (P-3) as Administrative Officer (P-3) to reflect adjustments to the roles and responsibilities currently undertaken by the post in view of the need to have dedicated administrative capacity at the appropriate level; and one post of Fire Safety Officer (Field Service) as Security Officer (Field Service) in the Security Investigations Unit to provide critical support to security investigations and incident response;

(ii) Abolishment of one post of Security Officer (Field Service) and establishment of one post of Administrative Assistant (Local level) to strengthen administrative and financial oversight within the Security Section and to promote the nationalization of functions;

(iii) Abolishment of two posts of Security Officer (Field Service) in view of the streamlining of operational functions, as it was determined that the functions could be absorbed by the existing capacity within the Section;

(iv) Abolishment of six posts of Field Security Guard (Local level), based on a review of security requirements at the United Nations air terminal in Kabul, which assessed that the functions of the posts could be discharged by existing staff within the Section;

(v) Abolishment of two National Professional Officer posts of Assistant Security Officer and Associate Training Officer, in combination with the proposed establishment of two Local level posts, one Field Security Assistant and one Training Assistant, as the functions have evolved, and it was determined that the tasks currently being performed could be effectively carried out with a lower-level skill set;

(vi) Establishment of one post of Administrative Assistant (Local level) to support budget execution, procurement processing and contract management;

(vii) Establishment of one position of Security Officer (international United Nations Volunteer) to support the coordination of security-related activities and administrative processes;

(viii) Redeployment of 17 posts of Field Security Radio Operator (Local level) from the field offices to constitute the Remote Security Operations Centre;

(ix) Redeployment of one Field Security Guard (Local level) from the Kabul field office to support operational requirements;

(x) Redeployment of one position of Security Logistics Officer (international United Nations Volunteer) from the Herat field office to support the Section's needs with respect to the coordination of security logistics, inventory management and transportation services;

(xi) Conversion of two positions of Local Security Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 30) to provide effective administrative, logistical and operational support to the Crisis Coordination Centre and to serve as the first security point of contact for all United Nations staff requiring security assistance.

37. The Deputy Special Representative of the Secretary-General (Political Affairs) advises the Special Representative of the Secretary-General on political issues and the dynamics affecting the implementation of the mandate of the Mission and manages the political pillar. The Deputy Special Representative supports the implementation of the mandate through the provision of regular analyses of the political situation in the country and the region by: (a) liaising with the international community, diplomatic community and NGOs in Afghanistan on political issues; (b) coordinating political priorities within the Mission and with United Nations Headquarters; and (c) providing good offices and outreach, particularly in the areas of political stability and regional cooperation.

38. The following changes are proposed for 2026:

(a) **Front Office**: reassignment of one post of Associate Political Affairs Officer (National Professional Officer) as Coordination Officer (National Professional Officer) to the Front Office of the Deputy Special Representative of the Secretary-General (Resident Coordinator/Humanitarian Coordinator) to enhance the coordination role of the Office in engaging with the de facto authorities at the highest levels to ensure coherence, collaboration and efficient resource allocation, and to provide political support for optimal humanitarian and basic human needs outcomes, in line with the responsibilities laid out in the operative paragraph 5 (a) and (b) of Security Council resolution 2626 (2022);

(b) **Political Affairs Service**:

(i) Abolishment of one post of Senior Civil Affairs Officer (P-5) due to the current restrictive operating environment and limited opportunities to support local communities, which are now primarily spearheaded at the local level through UNAMA field offices;

(ii) Redeployment of the three posts from the Strategic Engagement Advisory Unit, comprising of one Senior Political Affairs Officer (P-5), one Political Affairs Officer (P-3) and one Associate Political Affairs Officer (National Professional Officer), as the functions previously undertaken by the Unit can be integrated within the Political Affairs Service. The integration is aimed at reinforcing the Mission's comprehensive approach to engagement with the de facto authorities, providing timely advice on political dynamics and policy directions of the de facto authorities, enhancing strategic and operational engagements with other Afghan political stakeholders and enhancing collaboration with the field offices on subnational political issues;

(iii) Reassignment of one post of Associate Judicial Affairs Officer (National Professional Officer) as Assistant Programme Management Officer (National Professional Officer) in the Kandahar field office, in response to the need to have dedicated capacity support for the mine action programme at the regional level;

(iv) Abolishment of two posts of Political Affairs Assistant (Local level), following a review of current workload arrangements;

(v) Conversion of three positions of Associate Political Affairs Officer (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 30) to monitor, support and report on activities related to political inclusion and security-related activities by the de facto security forces, facilitate engagement with different actors and support data collection and management as the basis for political economy analysis;

(c) **Liaison Office in Islamabad**: abolishment of one post of Protocol Assistant (Local level), following a review of the workload of the Office;

(d) **Strategic Engagement Advisory Unit**: redeployment of the three posts (1 P-5, 1 P-3 and 1 National Professional Officer) to the Political Affairs Service, as described in paragraph 38 (b) (ii);

(e) **Joint Analysis and Reporting Section**: abolishment of one post of Political Affairs Assistant (Local level), as the post has been vacant and the functions can be adequately covered by the existing staff within the Section.

[a] Funded at 50 per cent and cost-shared with the Development Coordination Office.
[b] Includes one P-5, one P-4, one NPO and one LL position approved as general temporary assistance.

39. The Deputy Special Representative of the Secretary-General (Resident Coordinator/Humanitarian Coordinator) is responsible for maintaining links with the United Nations country team as part of the role of Resident Coordinator and Humanitarian Coordinator. The Security Council, in paragraph 5 (a),

(b), (i) and (j) of its resolution 2626 (2022), mandated the Deputy Special Representative to coordinate and facilitate the provision of humanitarian assistance and financial resources to support humanitarian activities; coordinate international donors and organizations in relation to basic human needs; coordinate the overall risk management approach of the United Nations in Afghanistan; and coordinate explosive ordnance threat mitigation measures in support of humanitarian and development initiatives.

Proposed organizational changes

40. The following changes are proposed for 2026:

(a) **Front Office**:

(i) Establishment of one post of Political Affairs Officer (P-3) to strengthen the Mission's capacity on climate, peace and security, and to lead on engagement across UNAMA field offices on climate security risks and environmental peacebuilding, as well as local peace initiatives related to climate change; data collection, reporting and analysis; engagement with NGOs, Afghan academia and civil society to support analysis and outreach, focusing on the inclusion of Afghan women and youth; and support for joint United Nations action and coordination with the United Nations country team in a politically sensitive environment;

(ii) Establishment of one post of Assistant Coordination Officer (National Professional Officer) to support the work of UNAMA on climate, peace and security, particularly in coordinating engagement with the de facto authorities;

(iii) Reassignment of one post of Political Affairs Officer (National Professional Officer) as Coordination Officer (National Professional Officer) from the Office of the Deputy Special Representative of the Secretary-General (Political Affairs) to serve as a key interlocutor between the Office and the de facto authorities on issues such as access, the

operating and regulatory environment of aid operations and related security issues, and advocacy with regard to United Nations privileges and immunities;

(iv) Continuation of three general temporary assistance positions of Senior Programme Management Officer (P-5), Associate Programme Management Officer (National Professional Officer) and Data Analysis Assistant (Local level) established to support the mine action programme in UNAMA. The UNAMA Mine Action Unit supports the implementation of the Mission's mine action programme in line with paragraph 5 (c) of Security Council resolution 2626 (2022) and provides technical expertise and advice to Mission leadership and relevant stakeholders on mine action and engages with national mine action authorities, the United Nations country team and the humanitarian team to advocate for mine action. In this context, it is proposed that the three temporary positions be continued, to advance the mine action objectives of UNAMA in the most effective, cost-efficient and transparent manner possible;

(v) Continuation of one general temporary assistance position of Coordination Officer (P-4) to continue to undertake research and analysis, triangulating information on the delivery of assistance in Afghanistan, and facilitate engagement and negotiation with the de facto institutions around operational challenges in delivering humanitarian and basic human needs assistance to the people of Afghanistan, as well as advocating with the de facto authorities for rights, inclusion, equity, transparency and accountability in aid delivery;

(b) **Risk Management Coordination Section**: establishment of one post of Programme Officer (P-4) to provide specialized expertise in activities related to combating money-laundering and the financing of terrorism. The establishment of the post will enhance the United Nations system's capacity in Afghanistan to address the growing risks associated with money-laundering and terrorism financing activities through the implementation of robust safeguards and compliance with international standards on combating money-laundering and countering the financing of terrorism, maintain donor confidence and protect the integrity and accountability of United Nations programmes.

Subtotal	**-1**			
Total	**-1**			

42. The following changes are proposed for 2026:

(a) **Procurement Unit**: abolishment of one post of Procurement Assistant (Field Service), following an internal review of the Mission's mode of operations, which has shifted towards greater utilization of information and communications technology (ICT) tools in the Mission;

(b) **Field Technology Section**:

(i) Reassignment of one post of Associate Information Systems Officer (National Professional Officer) as Assistant Programme Management Officer (National Professional Officer) in the Kabul regional office in response to the need to have dedicated capacity support for the mine action programme in the central region;

(ii) Abolishment of one post of Information Systems Assistant (Local level), as the functions of the post can be absorbed by existing capacity in the Section;

(iii) Conversion of one position of Associate Information Management Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 30) to support the implementation of the file classification scheme and records management;

(c) **Human Resources and Training Section**: reassignment of two posts of Administrative Assistant (Local level), one from the Maymana field office and one from the Pul-e Khumri field office, as Human Resources Assistant (Local level) to enhance the Section's capacity to address critical staff queries and support recruitment and onboarding activities, data analysis and reporting;

(d) **Acquisition Management Unit**: reassignment of one position of Facilities Management Assistant (international United Nations Volunteer) as Gender Affairs Officer (international United Nations Volunteer) in the Gender Advisory Unit.

Supply Chain and Service Delivery Management

Total	**-7**			

43. The following changes are proposed for 2026:

(a) **Office of the Chief of Supply Chain and Service Delivery Management**: abolishment of one post of Administrative Assistant (Local level) following a review of the workload;

(b) **Aviation and Movement Control Section**:

(i) Abolishment of six posts, comprising four posts of Movement Control Assistant (1 Field Service and three Local level) and two of Air Operations Assistant (Local level) following a review of the workload of the Section;

(ii) Conversion of one position of Air Operations Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 30) to support the work of the Section, including by managing the electronic databases, monitoring agreed periods of aircraft non-availability due to maintenance and/or aircrew sickness, ensuring that valid maintenance/medical release certificates are provided, and monitoring and verifying aviation fuel consumption;

(c) **Transport Unit**:

(i) Abolishment of one post of Vehicle Technician (Local level), as it has been determined that the functions can be effectively covered by the other posts within the Unit;

(ii) Redeployment of one post of Vehicle Technician (Local level) to the Kandahar field office to support operational requirements.

(d) **Property Management Unit**: Abolishment of one post of Administrative Assistant (Local level) following a review of the workload;

(e) **Medical, Staff Counselling and Welfare Section**:

(i) Establishment of two positions of Paramedic (international United Nations Volunteer), costed at 30 per cent cost of the full cost, representing the contribution of UNAMA in line with the current cost-sharing arrangement, to enhance capacity support to the Medical Officer (P-3) and to provide medical coverage, including basic consultations, emergency triage and referrals;

(ii) Redeployment of one position of Paramedic (international United Nations Volunteer) to the Bamyan field office to provide capacity support to the United Nations Medical Emergency Response Team in line with operational requirements;

(f) **General Supply and Fuel Unit**: Conversion of one position of Finance Assistant (national United Nations Volunteer) from extrabudgetary resources to regular budget funding (see para. 30) to support the Unit in financial management.

Field offices in regions and provinces

44. The field offices will continue to drive mandate implementation at the subnational level through the building of effective working relationships with the de facto authorities to facilitate an enabling

environment for mandate and programme implementation and to strengthen the coherence of United Nations activities.

45. The Mission currently maintains six regional offices, located in Balkh (Mazar-e Sharif), Kabul, Kandahar, Herat, Nangarhar (Jalalabad) and Paktiya (Gardez), and five provincial offices, located in Badakhshan (Faizabad), Baghlan (Pul-e Khumri), Bamyan, Faryab (Maymana) and Kunduz.

46. The heads of office have a direct reporting line to the Chief of Staff.

47. For 2026, it is proposed that the number of provincial offices be reduced from five to three, with the closure of the offices in Maymana and Pul-e Khumri.

Total	**-14**			

48. The following changes to the staffing structure of regional and provincial offices are proposed:

(a) The closure of field radio security operations centres, resulting in the abolishment of 21 posts of Field Radio Operator (Local level) and the redeployment of 17 posts of Field Radio Operator (Local level) – two from each of the five regional offices and seven from the provincial offices (Bamyan (2), Maymana (1), Faizabad (1), Pul-e Khumri (1) and Kunduz (2)) – to the Security Section to constitute the Remote Security Operations Centre;

(b) The closure of the Pul-e Khumri and Maymana field offices, resulting in the abolishment of 19 posts, the redeployment of 14 posts and the reassignment of 6 posts. With the closure of these offices, the Mazar-e Sharif regional office will now serve as the hub for the northern region. The redeployed capacities from the two field offices will ensure continuing delivery on the mandate in the areas, through the conduct of daily monitoring of developments, ongoing engagement with interlocutors and stakeholders, and the undertaking of regular field visits and outreach, as required;

(c) A review of mission support capacities in the field offices, which identified that some ICT and security-related functions currently at the National Professional Officer level have evolved and can be effectively carried out with a lower-level skill set. To that end, it is proposed that nine National Professional Officer posts, consisting of five posts of Associate Information Systems Officer and four posts of Assistant Security Officer, be abolished and nine Local level posts, consisting of five posts of Information Systems Assistant and four of Field Security Assistant, be established in their stead;

49. In addition to the above, the following changes in the UNAMA regional offices are also proposed for 2026:

(a) **Kabul**:

(i) Reassignment of two posts to the Security Section, comprising: one post of Security Coordination Officer (P-3) as Administrative Officer (P-3) to reflect adjustments to the roles and responsibilities currently undertaken by the post in view of the need to have dedicated administrative capacity at the appropriate level; and one post of Fire Safety Officer (Field Service) as Security Officer (Field Service) in the Security Investigations Unit to provide critical support to security investigation and incident response;

(ii) Reassignment of one post of Associate Information Systems Officer (National Professional Officer) as Assistant Programme Management Officer (National

Professional Officer) from the Field Technology Section to support the mine action programme in the central region;

(iii) Redeployment of one post of Field Security Guard (Local level) to the Security Section;

(iv) Redeployment of one post of Human Rights Assistant (Local level) to the Human Rights Service;

(b) **Kandahar**:

(i) Abolishment of one post of Information Systems Assistant (Field Service), with the functions to be effectively discharged by existing national staff, with remote technical support from Kabul, as required;

(ii) Reassignment of one post of Associate Judicial Affairs Officer (National Professional Officer) from the Political Affairs Service in Kabul as Assistant Programme Management Officer (National Professional Officer) to support the mine action programme at the regional level;

(iii) Redeployment of one post of Vehicle Technician (Local level) from the Transport Unit to support the increase in road movements;

(iv) Conversion of one position of Associate Political Affairs Officer (national United Nations Volunteer) (see para. 30) to provide political analysis and support in the monitoring of provincial and district level developments;

(c) **Herat**:

(i) Redeployment of one position of Security Logistics Officer (international United Nations Volunteer) to the Security Section;

(d) **Mazar-e Sharif**:

(i) Redeployment of 11 posts, namely one Associate Political Affairs Officer (National Professional Officer), one Assistant Human Rights Officer (National Professional Officer), two Political Affairs Assistants (Local level) and two Drivers (Local level) from the Pul-e Khumri field office, and one Associate Political Affairs Officer (National Professional Officer), one Assistant Human Rights Officer (National Professional Officer), one Human Rights Assistant (Local level) and two Drivers (Local level) from the Maymana field office, to provide for the requisite capacity of the Office, which will now serve as a regional hub for the northern region and continue to service the respective areas following the closure of both field offices;

(ii) Establishment of one post of Public Information Assistant (Local level) to support strategic communications work, including by supporting outreach, good offices and confidence-building measures between the de facto authorities and other stakeholders. This post will support the strategic communications work previously undertaken by the Maymana and Pul-e Khumri field offices;

(e) **Jalalabad**:

(i) Abolishment of one post of Information Systems Assistant (Field Service) following a review of the workload of the Office, with the functions of the position to be effectively discharged by existing national staff, with remote technical support from Kabul, as required;

(ii) Redeployment of one post of Security Officer (Field Service) to the Bamyan field office to enhance security capacity in line with operational requirements;

(iii) Reassignment of one post of Assistant Political Affairs Officer (National Professional Officer) as Assistant Programme Management Officer (National Professional Officer) from the Pul-e Khumri field office to provide critical mine action capacity in the eastern region;

(f) **Gardez**:

Reassignment of one position of Associate Political Affairs Officer (national United Nations Volunteer) from the Maymana field office as Assistant Human Rights Officer (national United Nations Volunteer) to address the gap in human rights expertise in the Office.

50. In addition to those proposed in paragraph 48, the following changes in the UNAMA provincial offices are also proposed for 2026:

(a) **Bamyan**:

(i) Redeployment of one post of Security Officer (Field Service) from Jalalabad;

(ii) Redeployment of one position of Paramedic (international United Nations Volunteer) from the Medical, Staff Counselling and Welfare Section in Kabul;

(b) **Maymana**: closure of the office, resulting in the following:

(i) Redeployment of six posts, namely, one Associate Political Affairs Officer (National Professional Officer), one Assistant Human Rights Officer (National Professional Officer), one Human Rights Assistant (Local level) and two Drivers (Local level) to the Mazar-e Sharif field office, and one Field Security Radio Operator (Local level) to the Security Section;

(ii) Reassignment of three posts, namely, one Assistant Political Affairs Officer (National Professional Officer) as Assistant Programme Management Officer in the Kunduz field office, one Administrative Assistant (Local level) as Human Resources Assistant (Local level) in the Human Resources and Training Section and one Associate Political Affairs Officer (national United Nations Volunteer) as Assistant Human Rights Officer (national United Nations Volunteer) in the Gardez field office;

(iii) Abolishment of six posts, namely, one Field Security Radio Operator (Local level), one Field Security Assistant (Local level), one Field Security Guard (Local level), one Air

Operations Assistant (Local level), one Political Affairs Assistant (Local level) and one Driver (Local level);

(c) **Pul-e Khumri**: closure of the office, resulting in the following:

(i) Redeployment of eight posts, namely, one Assistant Human Rights Officer (National Professional Officer), one Associate Political Affairs Officer (National Professional Officer), two Drivers (Local level) and two Political Affairs Assistants (Local level) to the Mazar-e Sharif field office, one Field Security Radio Operator (Local level) to the Security Section and one Field Security Assistant (Local level) to the Kunduz field office;

(ii) Reassignment of three posts, namely, one Assistant Political Affairs Officer (National Professional Officer) as Assistant Programme Management Officer (National Professional Officer) in the Jalalabad field office, one Administrative Assistant (Local level) as Human Resources Assistant (Local level) in the Human Resources and Training Section and one Associate Political Affairs Officer (national United Nations Volunteer) as Assistant Human Rights Officer (national United Nations Volunteer) in the Kunduz field office;

(iii) Abolishment of 13 posts, namely, eight Field Security Guards (Local level), three Field Security Radio Operators (Local level), one Information Systems Assistant (Local level) and one Driver (Local level);

(d) **Kunduz**:

(i) Reassignment of one post of Assistant Political Affairs Officer (National Professional Officer) as Assistant Programme Management Officer (National Professional Officer) from the Maymana field office to address the gap in technical mine action expertise in the northern region;

(ii) Redeployment of one post of Field Security Assistant (Local level) from the Pul-e Khumri field office to enhance security operations capability to address increasing security challenges in the region;

(iii) Reassignment of one post of Associate Political Affairs Officer (national United Nations Volunteer) from the Pul-e Khumri field office as Assistant Human Rights Officer (national United Nations Volunteer).

Consolidated Kuwait Office

51. The Consolidated Kuwait Office comprises two components:

(a) **UNAMA Support Office in Kuwait**, which includes one mission staff located in Kuwait, undertakes support functions that are not related to the Kuwait Joint Support Office, namely the post of Chief of Section, Conduct and Discipline (P-5), reporting directly to the Chief of Staff. For 2026, in view of the planned closure of Kuwait Joint Support Office, it is proposed to redeploy the post from Kuwait to Kabul;

(b) **Kuwait Joint Support Office**,[1] which provides transactional administrative services related to finance and human resources to UNAMA, UNAMI and other missions in the Middle East, Asia, Europe and the Americas. UNAMA contributes 38 posts (1 P-5, 1 P-4, 2 P-3, 1 P-2, 14 Field Service and 19 Local level) funded directly from the Mission's budget.

52. The UNAMA Support Office in Kuwait and the Kuwait Joint Support Office are co-located within the premises occupied by UNAMI in Kuwait City.

53. In its resolution 79/258, the General Assembly endorsed the recommendation of the Advisory Committee on Administrative and Budgetary Questions to review the role of the Kuwait Joint Support Office in view of the upcoming drawdown of UNAMI. In this context, the Department of Operational Support conducted a review of the Office that focused on ensuring that the 16 peace operations that it currently supports could continue to receive shared services with efficiency, interoperability, responsiveness and operational continuity after the termination of the mandate for UNAMI at the end of 2025. In this regard, the Secretariat intends to transition the peace operations currently supported by the Office to the Regional Service Centre in Entebbe by the end of the UNAMI liquidation process, which is anticipated to be completed in September 2026, leading to the abolishment of the existing 38 posts funded by UNAMA, effective 1 October 2026. The financial resources for these posts are provided for only nine months in the 2026 proposed budget for UNAMA.

Quality/Performance Management																		

[1] In its resolution 65/259, the General Assembly noted the intention of the Secretary-General to establish a support office in Kuwait for UNAMA and requested him to explore possibilities for cost-sharing between UNAMA and UNAMI. Following a period of assessment, in October 2012 the Secretary-General informed the Assembly that the Kuwait Office would include a Kuwait Joint Support Office, which would integrate UNAMA and UNAMI functions in the areas of finance and human resources.

4. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Military observers	28.7	18.0	23.7	23.7	–

54. Resources amounting to $23,700 are proposed to provide for the deployment of one military observer.

Civilian personnel costs

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
International staff	55 059.0	57 845.4	56 928.3	54 481.5	(2 446.8)

55. The reduced requirements are attributable primarily to: (a) the application of a higher vacancy rate of 10.4 per cent, compared with the rate of 8.3 per cent applied in the approved budget for 2025; (b) the abolishment of 27 posts (inclusive of 19 Kuwait Joint Support Office posts proposed for abolishment effective 1 October 2026); and (c) and the application of a lower common staff costs rate based on 2024 actual expenditure, compared with the rate applied in the approved budget for 2025. The decreased requirements are offset in part by the inclusion of a provision for the estimated payments due to Kuwait Joint Support Office staff members at the time of separation from service, and the proposed establishment of two posts (1 P-4 and 1 P-3) with the application of a 50 per cent vacancy rate.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
National Professional Officer	9 504.2	8 262.8	8 942.1	8 568.7	(373.4)

56. The reduced requirements are attributable to the proposed abolishment of 10 posts, as well as the reassignment of five posts with the application of a 50 per cent vacancy rate. The reduced requirements are offset in part by the application of a lower vacancy rate of 14.8 per cent compared with the rate of 15.5 per cent applied in the approved budget for 2025, as well as the proposed establishment of three posts with the application of a 50 per cent vacancy rate.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
National General Service staff	23 391.5	22 021.5	21 542.7	19 527.9	(2 014.8)

57. The reduced requirements are attributable primarily to the proposed abolishment of 80 posts, inclusive of 19 Kuwait Joint Support Office posts proposed for abolishment effective 1 October 2026. The

decreased requirements are offset in part by the inclusion of a provision for the estimated payments due to Office staff members at the time of separation from service, the application of a lower vacancy rate of 10.7 per cent, compared with the rate of 11.2 per cent applied in the approved budget for 2025, and the proposed establishment of 13 posts with the application of a 50 per cent vacancy rate.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
United Nations Volunteers	4 567.4	4 502.5	4 152.9	4 777.2	624.3

58. The increased requirements are attributable primarily to: (a) the application of a lower vacancy rate of 4.0 per cent for international United Nations Volunteers, compared with the rate of 5.3 per cent applied in the approved budget for 2025; (b) the proposed conversion of nine national positions from extrabudgetary funds and the establishment of three international positions; and (c) increased rates of monthly living allowance for both categories of volunteers and higher requirements for exit lump sum payments for international United Nations Volunteers, based on the latest pro forma estimates provided by the United Nations Volunteers Programme.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
General temporary assistance	478.8	456.3	574.3	602.7	28.4

59. The increased requirements are attributable primarily to the application of the continuing vacancy rate of 14.8 per cent for the two National Professional Officer positions that were approved for establishment in 2025 and budgeted with a vacancy rate of 50 per cent, offset in part by the application of a higher vacancy rate of 10.4 per cent for the continuing international positions, compared with the rate of 8.3 per cent applied in the approved budget for in 2025.

Operational costs

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Consultants and consulting services	19.6	6.7	19.6	–	(19.6)

60. No resources are proposed for consultants and consulting services. Resources to provide for services to enhance the language skills of mission personnel, previously budgeted under this budget class, are now being budgeted under individual contractual services to align with the contractual services modality.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Official travel	994.7	464.2	994.5	994.5	–

61. Resources amounting to $994,500 are proposed to provide for official business travel ($820,800), comprising: within-Mission travel to provide essential technical support for field offices and to facilitate regular programme consultations among mission components for the effective

implementation of its mandate; and travel outside the Mission area, including attendance at various high-level conferences on Afghanistan by the Special Representative of the Secretary-General and senior staff, for the implementation of the Mission's mandate, meetings and consultations with political counterparts, and briefings to the Security Council, as well as travel related to training ($173,700).

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Facilities and infrastructure	19 357.4	15 226.0	18 181.4	21 810.4	3 629.0

62. The increased requirements are attributable to: (a) higher requirements for minor construction and renovation works for the construction of a central warehouse for more efficient space management, improvements to the wastewater treatment plant to promote waste segregation and recycling efforts, and improvements to compound facilities, including upgrading security perimeter and air conditioning systems in the field; and (b) the acquisition of safety and security equipment, as well as the replacement of prefabricated accommodations and equipment such as bedding, kitchen appliances needed to replace old equipment for the purposes of staff well-being in offices and accommodations, and consumable engineering supplies required to support general maintenance and proposed minor projects. The increased requirements are offset in part by lower requirements for security services based on the latest contractual rates.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Ground transportation	459.5	220.9	450.7	563.1	95.4

63. The increased requirements are attributable to the acquisition of vehicle workshop equipment in connection with the implementation of the new car log security system, offset in part by lower requirements for petrol, oil and lubricants owing to lower fuel cost.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Air operations	4 422.4	2 492.1	3 726.4	3 676.0	(50.4)

64. The reduced requirements are attributable to a lower estimated volume of 411,500 litres of fuel for replacement aircraft at an average price of $1.318 per litre, compared with 904,000 litres at an average price of $1.291 per litre included in the approved budget for 2025, offset by higher rental and operational costs, in connection with the proposed replacement of the Beechcraft 1900D fixed-wing aircraft with a SAAB 340B at a higher contractual price.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Communications and information technology	5 730.2	3 250.0	6 157.5	6 231.8	74.3

65. The increased requirements are attributable to public information services related to outreach programmes to support expanded engagement with communities, civil society and local authorities, as well as spare parts. The increased requirements are offset in part by reduced costs for centralized services, owing to the proposed decrease in the number of personnel, as well as a lower overall volume of acquisition of communications and information technology equipment.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Medical	802.6	370.3	601.4	563.3	(38.1)

66. The reduced requirements are attributable to realignment of the provision for ICT service costs of the Joint Medical Services and the United Nations Medical Emergency Response Team under the communications and information technology budget class, to better align with the recording of expenditures.

(Thousands of United States dollars)

	Appropriation 2024	*Expenditures 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Other supplies, services and equipment	2 508.7	1 770.1	2 399.5	2 659.3	259.8

67. The increased requirements are attributable to higher requirements for freight costs associated with the increased volume of acquisition (as explained under facilities and infrastructure above), as well as new requirements for inspection fees on imports of communications-related information technology equipment imposed by the authorities in 2024, and higher requirements for individual contractors.

5. Extrabudgetary resources

(a) Voluntary contributions

68. In 2025, voluntary contributions in the amount of $2,959,300 are projected to be utilized, comprising the following funding sources:

(a) A total of $200,700 through the Department of Political and Peacebuilding Affairs to support the national female youth United Nations Volunteers programme. The programme's objective is in line with the Mission's mandate and contributes to advancing mandate implementation, including inclusive governance, respect for human rights, and peacebuilding with reinforced local capacities, and to good practices across the range of mandated activities and operations;

(b) A total of $2,758,600 under the Mission's trust fund to provide for 10 posts (1 P-5, 2 P-4, 6 P-3 and 1 Field Service) and operational costs to support climate change, local peace initiatives and political engagement and meetings with regional governments, and the advancement of international engagement on Afghanistan in a more coherent, coordinated and structured manner in line with the recommendations of the independent assessment on Afghanistan (S/2023/856).

69. In 2026, voluntary contributions in the estimated amount of $1,429,400 are projected to be utilized under the Mission's trust fund to continue to provide for five P-3 posts for 12 months, and another four posts (1 P-5, 1 P-4, 1 P-3 and 1 Field Service) for two months.

70. The decrease in the estimates projected for 2026 compared with the estimates of 2025 reflects the duration of the commitments made by the respective donors under existing agreements. In addition,

the national United Nations Volunteer positions are proposed to be converted to regular budget funding.

(b) Cost recovery

71. In 2025, resources in the amount of $23,500,000 are estimated to be received from United Nations agencies, funds and programmes and other entities through the cost-recovery mechanism, for services provided by the Mission to these entities, including co-location in Mission compounds and medical services throughout Afghanistan. These cost recovery resources will be utilized to provide for the staff costs of five posts (1 P-3 and 4 Field Service) and for medical-related requirements, including medical personnel and supplies, as well as the costs associated with maintaining United Nations compounds, including security services, rent, utilities and maintenance services. Such resources will complement regular budget resources of the Mission.

72. For 2026, resources in the amount of $23,500,000 are estimated to be received from United Nations agencies, funds and programmes. These estimates are based on existing clients and cost-shared allocations and do not take into account any possible substantial reductions in the number, size and funding ability of the entities, which could translate to lower collections and an increase requirements for the cost-shared portion for UNAMA and the other entities that would remain under the existing co-location arrangements.

Annex I

Summary of follow-up action taken to implement the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the General Assembly

Brief description of the recommendation	*Action taken to implement the recommendation*
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.5)	
The Advisory Committee expresses its concern about the high number of vacant posts and trusts that the Mission will fill all vacant posts, including long-vacant ones, as soon as possible and will provide an update on the recruitment status of all vacant posts to the General Assembly at the time of its consideration of the present report and in the next budget submission (para. 24).	As at 30 March 2025, the Mission had 133 vacant posts, including 10 posts which had been vacant for 24 months or longer. The increase in the number of vacant posts is a direct result of the mission-level recruitment freeze implemented in 2024 as part of austerity measures to manage the liquidity challenges, which has necessitated that more posts remain vacant than required for mandate implementation, and for which the Mission has capacity to fill expeditiously. A list of posts vacant for over two years, including information on their recruitment status, is provided in the supplementary information to the present report.
Mindful of the upcoming drawdown of the United Nations Assistance Mission for Iraq (UNAMI), the Advisory Committee trusts that the Secretary-General will conduct the necessary review of the Kuwait Joint Support Office and include his proposals for the consideration of the General Assembly in the context of his next proposed programme budget submission (para. 39).	In 2024, the Department of Operational Support conducted a review of the Kuwait Joint Support Office to determine how the peace operations it currently supports can continue to receive sustainable location-independent support services that deliver the benefits of efficiency, interoperability, responsiveness and operational continuity, through the transition of UNAMI in 2025, its liquidation in 2026 and beyond. In this regard, the Secretariat intends to transition the peace operations supported by the Office to the Regional Service Centre in Entebbe, Uganda, by the end of the UNAMI liquidation process, leading to the abolishment of all posts funded by special political missions. Details on the transition plan are presented in the context of A/80/6 (Sect. 3)/Add.1.
The Advisory Committee, noting the information provided on the cost comparison between flights provided by the United Nations Humanitarian Air Service and those provided by UNAMA, considers that the most effective and economical ways of cooperation should be further explored and trusts that an update on the related impact on requirements under air operations will be provided in the context of the next budget submission (para. 45).	The Aviation and Movement Control Section in UNAMA continues to utilize the services of the United Nations Humanitarian Air Service on a regular basis. The Mission carefully analyses each request for air transportation and takes a decision on whether to task its aircraft or transport passengers and/or cargo with regular flights of the Service. The seat price that the Service offers on its regular flights allows the Mission to use its services as required and to plan for a reduced number of flight hours and corresponding reduced amount of aviation fuel. The Mission actively seeks opportunities for cost-sharing with the Service, for example, from co-located use of United Nations air terminals. The Mission has a memorandum of understanding on cooperation in air operations with the Service and supports its requests for air transportation on a cost-reimbursable basis. Further

Brief description of the recommendation	*Action taken to implement the recommendation*
	opportunities for cooperation are being explored and will be considered in the 2027 aviation budget proposal. It is important to consider, however, that UNAMA has only one aircraft to ensure duty of care and the routine transportation needs of mission personnel deployed in 11 locations around Afghanistan. At the same time, the Air Service, faced with substantially reduced donor funding, recently reduced its fleet of aircraft from seven to three, including the loss of the last remaining helicopter that could operate to locations that cannot be served by fixed-wing aircraft, including in response to critical medical emergencies that might occur in remote locations. In view of the downsizing of the Service's air fleet, higher utilization of the Mission's aircraft is anticipated in 2026, which has been factored into the budgeted flight hours.

II. Organizational structure and post distribution for 2026 . . . 15

** The part consisting of the proposed programme plan for 2026 is submitted for the consideration of the General Assembly in accordance with the established budgetary procedures and practices reaffirmed in paragraph 7 of Assembly resolution 77/267.

*** In keeping with paragraph 10 of General Assembly resolution 77/267, the part consisting of the post and non-post resource requirements is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the General Assembly.

I. Overview of the Mission

A. Planned activities for 2026 and programme performance in 2024

Overall orientation

Mandates and background

1. The mandate of the United Nations Assistance Mission for Iraq (UNAMI) was established by the Security Council in its resolution 1483 (2003) and extended in subsequent resolutions of the Council. In its resolution 2732 (2024), the Council decided to extend the Mission's mandate for a final 19-month period, until 31 December 2025, after which UNAMI would cease all work and operations except with respect to any remaining liquidation of the Mission. In addition, the Council decided to authorize the retention of United Nations Guard Units from within the Mission's existing footprint to protect the Mission's personnel, facilities and assets, including during the liquidation period.

2. The transition and liquidation plan of the Secretary-General for UNAMI, prepared in consultation with the Government of Iraq, submitted to the Security Council on 24 December 2024 (S/2024/966, annex), identified, among the strategic transition priorities, a safe and gradual mission drawdown by 31 December 2025.

3. By the end of its drawdown period, UNAMI is expected to complete the handover of tasks to the United Nations country team and physically close and environmentally clean up two locations (Mosul and Kirkuk). The office in Basra is in a hotel and will be closed by 31 December and returned to its original state and to its owner by the end of January 2026. UNAMI remains on schedule to complete the physical verification of the majority of its assets and the disposal of assets through transfer, gifting and sale, in line with the Financial Regulations and Rules of the United Nations, the repatriation of 215 United Nations Guard Unit personnel and their equipment and the separation of civilian staff in line with the drawdown plan, except those to be retained to support the liquidation activities.

4. The liquidation period will commence on 1 January 2026 and will address all residual matters after the Mission's closure on 31 December 2025. A liquidation team will be required until 30 September 2026 to address residual liquidation activities not completed during the drawdown phase of the Mission and to ensure that due diligence is exercised throughout the liquidation processes. These liquidation activities include, but are not limited to, asset disposal, the repatriation of the remaining contingent-owned equipment, environmental cleanup, engineering the maintenance/refurbishment of the premises in the three locations in Baghdad (Tamimi compound, United Nations Integrated Compound in Baghdad and Forward Support Base) and the compounds in Erbil and Kuwait to be handed over to the Government or the United Nations country team, and the separation or transfer to other United Nations entities of personnel and the movement of United Nations-owned equipment.

5. Emphasis will also be placed on finalizing administrative tasks, such as resolving and closing outstanding claims and payments and completing archiving processes, before the end of the liquidation period. The objective is to minimize the workload to be transferred to the Regional Service Centre in Entebbe, Uganda, and United Nations Headquarters.

Programme of work

Objective

6. The objective, following the closure of the Mission on 31 December 2025, is to ensure the timely conclusion of the field-based liquidation activities by 30 September 2026.

Strategy and external factors for 2026

7. To contribute to the objective, the liquidation team will:

   (a) Implement the liquidation plan (ibid.);

   (b) Complete the handover of premises and assets to the national authorities and the United Nations country team, as appropriate;

   (c) Ensure a structured, efficient and secure liquidation, facilitating the safe departure of civilian and military personnel from Iraq;

   (d) Preserve institutional memory and capture lessons learned by documenting and preserving knowledge gained over the Mission's lifespan through established archiving and record management procedures.

8. The above-mentioned work will result in:

   (a) Meeting the 30 September 2026 deadline for the completion of the field-based liquidation activities;

   (b) Preserving an operational environment for a sustained long-term United Nations presence in Iraq and the region.

9. With regard to the external factors, the liquidation plan is based on the following planning assumptions:

   (a) The security and situation remain sufficiently permissive for the safe movement of staff and removal of United Nations assets as necessary;

   (b) The United Nations country team will have sufficient capacity and access to fully absorb additional assets and premises management;

   (c) The Iraqi authorities will remain supportive of the liquidation activities throughout the agreed field-based liquidation period.

Programme performance in 2024

Inclusive engagement on the transition of the Mission

10. Following the adoption of Security Council resolution 2732 (2024), UNAMI realigned its efforts to focus on the four streamlined areas outlined in the mandate, including the provision of its good offices and technical assistance to the Kurdistan Region parliamentary elections held in October 2024, the promotion and protection of human rights and the facilitation of development tasks. The Mission intensified its facilitation of dialogue and progress towards the final resolution of outstanding issues between Iraq and Kuwait, in preparation to address the Council's request to the Secretary-General to make recommendations for an "appropriate follow-on mechanism". The Mission simultaneously began its work to prepare, in consultation with the Government of Iraq, the Secretary-General's transition and liquidation plan for submission to the Council by 31 December 2024, which took into consideration three strategic transition priorities to guide the work of the United Nations system in Iraq as it phased out UNAMI: (a) effective mandate delivery; (b) the transfer of tasks to ensure the preservation of gains and sustained United Nations support; and (c) the safe and gradual mission drawdown by the end of December 2025.

11. Progress towards the objective is presented in the performance measure below (see table 1).

Table 1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Progress made towards residual mandated tasks, including the coordinated engagement with the Government of Iraq on the transition and the finalization of a transition and liquidation plan

Planned activities during the liquidation period in 2026

12. Major liquidation activities during the period from 1 January to 30 September 2026 will include the following:

(a) Physically close and conduct the environmental remediation and handover of the two liquidation locations (Basra and Kuwait). The Tehran Liaison Office will be closed in February 2026 and, where feasible, its residual activities will be transferred to UNAMA;

(b) Repatriate the remaining 30 United Nations Guard Unit personnel by 30 September 2026, with their contingent-owned equipment;

(c) Administratively separate all remaining civilian personnel associated with the liquidation process by 30 September 2026;

(d) Reconcile and close financial records, as well as the settlement of legal and administrative cases, as applicable;

(e) Transfer and dispose of archived paper records by 30 June 2026;

(f) Dispose of assets (property, plant and equipment, and inventory) in line with the provisions of the Financial Regulations and Rules and the asset disposition plan.

13. UNAMI will establish service-level agreements during 2025 with the Regional Service Centre and the United Nations Logistics Base at Brindisi, Italy, which will govern the range of support services provided during the liquidation and post-field-based liquidation periods. The support will continue throughout the post-field-based liquidation period to reconcile records, prepare a final asset disposition report and provide residual administrative and financial activities. The progress of the provision of support services by the Regional Service Centre and the Logistics Base throughout the field-based liquidation period will be monitored through weekly meetings.

14. The current mission locations in Baghdad, Erbil and Kuwait will become the sole operational facilities for the liquidation team as from 1 January 2026. From these locations, the liquidation team will work in conjunction with other teams in Kuwait and the United Nations Logistics Base to execute liquidation tasks.

Proposed composition of the liquidation team

15. It is proposed that the liquidation team be constituted by the retention of 135 existing posts (detailed in paras. 17 to 21 below).

16. On 1 January 2026, the Resident Coordinator/Humanitarian Coordinator (Assistant Secretary-General) will become the highest-ranking United Nations representative in Iraq and will assume the functions of the head of entity. As head of entity for the period from 1 January to 31 May 2026, he or she will lead the overall governance, coordination and maintenance of communication with the relevant authorities. During this period, this post will continue to be funded at 50 per cent and cost-

shared with the Development Coordination Office, in line with the established arrangement for similar triple-hatted posts.

17. The front office of the head of entity will comprise three posts (P-4, Field Service and National Professional Officer) that will provide support to the Resident Coordinator/Humanitarian Coordinator in his/her capacity as head of entity.

18. Five posts, comprising 2 P-4, 1 P-3 and 2 National Professional Officer, will be responsible for a range of critical functions, including liaising with the Government of Iraq, implementing the conduct and discipline strategies and oversight, providing legal advice and translation services, and providing guidance on the liquidation team's communication strategy in coordination with the front office of the head of entity. Their role will ensure that key legal and public information aspects of the closure are effectively managed.

19. The current post of Chief of Mission Support (D-1) will assist the head of entity from 1 January to 31 May 2026 in managing the liquidation team. From 1 June to 30 September 2026, the Chief of Mission Support will head the liquidation team. The Chief of Mission Support will carry out performance monitoring and reporting and stewardship of human, financial and physical resources in compliance with the Financial Regulations and Rules and the Staff Regulations and Rules of the United Nations. The Chief of Mission Support will be assisted by pillar heads covering service delivery, operation and resource management, and security. It is proposed that the mission support component of the liquidation team be comprised of 87 posts (1 D-1, 2 P-5, 8 P-4, 4 P-3, 22 Field Service, 12 National Professional Officer and 38 Local level).

20. In terms of security, a security team of 15 personnel will be retained to provide protection and carry out activities such as securing mission assets, mission-related investigations, inspections, protection and essential fire-safety services. The team includes two Close Protection Officers and three Field Security Assistants dedicated to providing security for the Resident Coordinator/Humanitarian Coordinator serving as the head of entity, both within and outside United Nations compounds. The security team would be supplemented by the retention of the United Nations Guard Unit composed of 30 personnel responsible for the protection of United Nations personnel, assets and facilities within the internal perimeter of the liquidation's two locations.

21. A team consisting of 24 posts (2 P-4, 1 P-3, 3 Field Services and 18 Local level) in the Kuwait Joint Support Office will continue to provide critical back-office support in travel, finance and human resources. In view of the termination of the mandate of UNAMI on 31 December 2025, it is the intention of the Secretariat to ensure the transition of the peace operations supported by the Office to the Regional Service Centre by the end of the Mission's liquidation on 30 September 2026. The retention of the currently encumbered posts is to ensure that sufficient capacity is available to prepare for and implement the transition, aligned with the projected timeline for the complete liquidation of UNAMI.

22. Temporary surge capacity will be provided by the Department of Operational Support, which will provide support and coordination between United Nations Headquarters and the United Nations Logistics Base, with occasional deployment to Iraq and Kuwait.

23. The selection process for personnel for the liquidation team will consider the existing personnel and the skill sets relevant to the liquidation period. UNAMI (and the liquidation team after the Mission's closure) will continue to support the placement of separating national staff for consideration by other entities within the United Nations in Iraq, through the sharing of the list of national staff with the United Nations country team and by broadcasting to these staff information on job openings posted by other organizations. A national staff capacity-building programme was strategically designed to equip national staff with the skills and support necessary for successful career transitions ahead of mission closure. Key initiatives already implemented in 2024 and 2025 include: (a) the comprehensive assessment of staff skills, which considers the current skills and learning needs of staff and how this aligns to the local market; (b) job search and application training in collaboration with local recruiters and vocational and technical certifications such as the International Computer Driving Licence; and (c) entrepreneurial workshops by Business by Design, personalized career

coaching, mentorship and a training newsletter that provides up-to-date information on job opportunities across United Nations and non-United Nations entities. Other activities planned for 2025 include virtual and in-person career fairs, the launch of a dedicated job platform application tool and expanded vocational training and collaboration with the United Nations country team on vocational training and business start-ups.

24. The size and composition of the team during the liquidation will be progressively reduced through the abolishment of posts. It is proposed that 10 staff members will be separated by 31 May 2026, 22 by 30 June 2026 and 103 by 30 September 2026. This process will continue in parallel with the closure of the liquidation team's office in Erbil by 30 June 2026 and the offices in Baghdad and Kuwait by 30 September 2026, which will mark the end of the field-based liquidation activities.

25. Thereafter, there would still be residual liquidation activities such as asset reconciliation, the completion of the derecognition and deactivation of property records and the preparation of input for the final disposition of assets, which would be undertaken by the United Nations Logistics Base. At the Headquarters level, the Department of Operational Support will lead the overall monitoring and analysis of the progress of the completion of the residual liquidation activities. The Department of Management Strategy, Policy and Compliance will coordinate the preparation and submission of financial and budget performance reporting after the closure of the 2026 financial period, early in 2027. The two Departments will continue to support the liquidation period on aspects related to the liquidation, including coordination with various teams at Headquarters and reporting to senior management stakeholders and legislative bodies.

26. Additional support during liquidation will be provided through the deployment of personnel on temporary duty assignment, general temporary assistance or individual contractors, including at the Regional Service Centre and the United Nations Logistics Base, as necessary.

27. The clinic managed by the United Nations country team will provide medical services to staff operating in Baghdad on a cost-recovery basis until 30 September 2026.

B. Proposed post and non-post resource requirements in 2026

1. Total resource requirements

Resource requirements (regular budget)

Table 2
Financial resources
(Thousands of United States dollars)

	2024		2025	2026	Variance
	Appropriation	Expenditure	Appropriation	Requirements	2026 vs. 2025 Increase/(decrease)
Category of expenditure	(1)	(2)	(3)	(4)	(5)=(4)-(3)
Military and police personnel costs	5 099.8	4 544.3	4 371.7	818.5	(3 553.2)
Civilian personnel costs	76 928.7	77 891.4	80 920.2	32 346.1	(48 574.1)
Operational costs	16 098.0	7 660.1	10 107.2	4 876.4	(5 230.8)
Total (net of staff assessment)	**98 126.5**	**90 095.8**	**95 399.1**	**38 041.0**	**(57 358.1)**

Abbreviations: ASG, Assistant Secretary-General; FS, Field Service; GS, General Service; LL, Local level; NPO, National Professional Officer; USG, Under-Secretary-General.

[a] One position is funded at 50 per cent and cost-shared with the Development Coordination Office.

28. The proposed resource requirements for liquidation activities in 2026 amount to $38,041,000 (net of staff assessment). The proposed requirements would provide for: (a) military and police personnel costs related to the 30 United Nations Guard Unit personnel to be withdrawn by 30 September 2026 ($818,500); (b) staff salaries, common staff costs and danger pay ($32,346,100) for the gradual separation of 135 civilian personnel encumbered as at 1 January 2026 to be retained for the liquidation team, consisting of 55 international staff (1 Assistant Secretary-General, 1 D-1, 2 P-5, 14 P-4, 6 P-3 and 31 Field Service) and 80 national staff (15 National Professional Officer and 65 Local level), including $19 million for estimated payments due to staff members at the time of separation or relocation, inclusive of $11.3 million relating to the remaining estimated payments due

to staff members to be separated in 2025, for which only a partial provision was approved in the 2025 budget, as well as a provision for $882,400 for surge capacity in the Department of Operational Support; and (c) operational costs ($4,817,000).

29. The phased separation of the liquidation team comprising 135 posts is detailed below:

(a) Abolishment, as at 31 May 2026, of 10 posts, comprising the post of the Head of Entity/Resident Coordinator/Humanitarian Coordinator (Assistant Secretary-General), his support team, namely, one Special Assistant (P-4), one Administrative Assistant (Field Service) and one Assistant Coordination Officer (National Professional Officer), as well as two Close Protection Officers (Field Service) and three Field Security Assistants (Local level) who provide dedicated security support to the head of entity. In addition, one Logistics Officer (National Professional Officer) in the Office of the Chief of Mission Support will also be abolished;

(b) Abolishment, as at 30 June 2026, of 22 posts (1 P-4, 1 P-3, 4 Field Service, 5 National Professional Officer and 11 Local level), with functions that cover public communications, protocol, movement and control, property management, procurement and the environment;

(c) Abolishment, as at 30 September 2026, of 103 posts (1 D-1, 2 P-5, 12 P-4, 5 P-3, 24 Field Service, 8 National Professional Officer and 51 Local level). During the field-based liquidation period up to 30 September 2026, these posts will perform legal, conduct and discipline, security, finance and budget, human resources, communications and information technology, property management, travel and administration functions, inclusive of 24 posts in Kuwait Joint Support Office.

30. In addition, provision is made for surge capacity in the Department of Operational Support and the United Nations Logistics Base for five general temporary assistance personnel: one Human Resources Officer and one Programme Management Officer, both at the P-4 level, one Programme Management Officer and one Supply Chain Planning Officer, both at the P-3 level; and one Senior Property Management Assistant (General Service (Principal level)).

Vacancy rates

31. The cost estimates for the United Nations Guard Unit takes into consideration the full deployment during the liquidation period and repatriation by 30 September 2026 of the 30 Guard Unit personnel. For civilian personnel, the cost estimates for the period from 1 January to 30 September 2026 are based on the assumption of full incumbency during the liquidation period and the phased abolishment of posts outlined in paragraph 29 above.

2. Financial resources

Table 4
Financial resources by category of expenditure
(Thousands of United States dollars)

	2024		*2025*	*2026*	*Variance*
	Appropriation	*Expenditure*	*Appropriation*	*Requirements*	*2026 vs. 2025 Increase/(decrease)*
Category of expenditure	*(1)*	*(2)*	*(3)*	*(4)*	*(5)=(4)-(3)*
I. Military and police personnel					
Military contingents	5 099.8	4 544.3	4 371.7	818.5	(3 553.2)
Subtotal, category I	**5 099.8**	**4 544.3**	**4 371.7**	**818.5**	**(3 553.2)**
II. Civilian personnel

Subtotal, category II	**76 928.7**	**77 891.4**	**80 920.2**	**32 405.5**	**(48 514.7)**
III. Operational costs					
Consultants and consulting services	283.7	68.1	158.3	–	(158.3)
Official travel	1 014.6	388.7	728.0	188.9	(539.1)
Facilities and infrastructure	5 580.1	2 708.9	3 557.2	2 888.7	(668.5)
Ground transportation	1 126.3	414.5	736.3	270.8	(465.5)
Air operations	3 734.6	1 620.3	2 069.2	–	(2 069.2)
Communications and information technology	2 927.5	1 879.2	1 589.1	820.3	(768.8)
Medical	345.2	74.5	313.5	14.4	(299.1)
Other supplies, services and equipment	1 086.0	505.7	955.6	633.9	(321.7)
Subtotal, category III	**16 098.0**	**7 660.1**	**10 107.2**	**4 817.0**	**(5 290.2)**
Total	**98 126.5**	**90 095.8**	**95 399.1**	**38 041.0**	**(57 358.1)**

3. Analysis of resource requirements

Military and police personnel costs

(Thousands of United States dollars)

	Appropriation 2024	Expenditure 2024	Appropriation 2025	Requirements 2026	Variance 2026 vs. 2025
Military contingents	5 099.8	4 544.3	4 371.7	818.5	(3 553.2)

32. The reduced requirements are attributable primarily to the gradual withdrawal of United Nations Guard Unit personnel, in accordance with the liquidation plan. The proposed resources include a provision for 30 personnel retained until 30 September 2026 for the field-based liquidation period, a decrease compared with the provision made for 245 personnel until 31 July 2025 and 157 personnel until 31 December 2025 in the approved budget for 2025.

Civilian personnel costs

(Thousands of United States dollars)

	Appropriation 2024	Expenditure 2024	Appropriation 2025	Requirements 2026	Variance 2026 vs. 2025
International staff	50 245.0	48 934.3	52 097.6	24 361.0	(27 736.6)

33. The reduced requirements are attributable to the phased separation of international staff, except for a smaller staffing complement of 55 personnel retained to complete the liquidation by 30 September 2026. The reduced requirements are offset in part by the inclusion of a provision of $16.2 million for payments due to staff members upon separation from service, including $9.2 million for staff members to be separated in 2025, for which only a partial provision was approved in the 2025 budget.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
National Professional Officers	10 452.3	11 436.9	10 583.5	2 700.6	(7 882.9)

34. The reduced requirements are attributable to the phased separation of staff, except for 15 National Professional Officers retained to complete the liquidation by 30 September 2026. The reduced requirements are offset in part by the inclusion of a provision of $1.7 million for payments due to staff members upon separation from service, including $1.5 million for staff members to be separated in 2025, for which only a partial provision was approved in the 2025 budget.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
National General Service	16 168.5	17 067.8	18 205.9	4 461.5	(13 744.4)

35. The reduced requirements are attributable to the phased separation of staff, except for 65 Local level staff retained to complete the liquidation by 30 September 2026. The reduced requirements are offset in part by the inclusion of a provision of $1.2 million for payments due to staff members upon separation from service, including $601,600 for staff members to be separated in 2025, for which only a partial provision was approved in the 2025 budget.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
United Nations Volunteers	62.9	154.1	33.2	–	(33.2)

36. No resources are proposed for United Nations Volunteers because the two positions were downsized in 2025.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
General temporary assistance	–	298.3	–	882.4	882.4

37. Resources amounting to $882,400 are proposed to provide for surge capacity for five general temporary assistance positions (2 P-4, 2 P-3 and 1 General Service (Principal level)) to support the liquidation activities, including after the field-based liquidation activities have ended on 30 September 2026. The capacity requirements have been identified by the Department of Operational Support and will encompass activities related to human resources, data analysis and management and property management.

Operational costs

(Thousands of United States dollars)

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Consultants and consulting services	283.7	68.1	158.3	–	(158.3)

38. No provision is included for consultants and consulting services for the liquidation period.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Official travel	1 014.6	388.7	728.0	188.9	(539.1)

39. The reduced requirements are attributable primarily to a lower volume of travel during the liquidation period, which will be limited to travel to carry out liquidation activities and for the deployment of staff on temporary duty assignment from United Nations Headquarters to ensure the timely finalization of liquidation tasks.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Facilities and infrastructure	5 580.1	2 708.9	3 557.2	2 888.7	(668.5)

40. The reduced requirements are attributable primarily to a smaller scope of activities related to facilities and infrastructure after the closure and handover to relevant authorities of five locations during 2025 and a smaller staffing complement during the liquidation period. Accordingly, the demand for utilities, disposal services, maintenance, security services and construction, as well as the demand for fuel for generators, is expected to decrease.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Ground transportation	1 126.3	414.5	736.3	270.8	(465.5)

41. The reduced requirements are attributable primarily to: (a) the non-requirement of spare parts; (b) lower requirements for petrol, oil and lubricants due to the smaller staffing complement during the liquidation period and the planned reduction in the fleet of United Nations-owned vehicles; and (c) lower requirement for the rental of special purpose vehicles following the completion of closure activities in 2025.

42. The reduced requirements are offset in part by higher requirements for repairs and maintenance in connection with the planned destruction and cannibalization of armoured vehicles that will not be disposed through transfer to other United Nations entities.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Air operations	3 734.6	1 620.3	2 069.2	–	(2 069.2)

43. No provision is included for air operations for the liquidation period because the current aircraft contract will be discontinued in 2025.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Communications and information technology	2 927.5	1 879.2	1 589.1	820.3	(768.8)

44. The reduced requirements are attributable primarily to the smaller staffing complement and phased withdrawal of personnel during the liquidation period, resulting in lower requirements for telecommunications and network services, the maintenance of communications and information technology equipment and support services, software, licences and fees, public information and production services, and spare parts.

45. The reduced requirements are offset in part by the cost of refurbishment of 71 high-value electronic counter-measure equipment items identified for transfer to the strategic deployment stocks for inclusion in the return, refurbishment and reuse programme at the United Nations Logistics Base for storage and potential transfer to other peacekeeping and special political missions.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Medical	345.2	74.5	313.5	14.4	(299.1)

46. The reduced requirements are attributable to the smaller staffing complement and phased withdrawal of personnel during the liquidation period, resulting in reduced requirements for medical services and the non-requirement for supplies due to stock availability.

	Appropriation 2024	*Expenditure 2024*	*Appropriation 2025*	*Requirements 2026*	*Variance 2026 vs. 2025*
Other supplies, services and equipment	1 086.0	505.7	955.6	633.9	(321.7)

47. The reduced requirements are attributable mainly to the smaller staffing complement, which resulted in lower requirements for training fees, supplies and services, welfare and rations, as well as lower requirements for bank charges due to a lower overall anticipated volume of transactions. The reduced requirements are offset in part by higher requirements for freight costs owing to a provision to cover the shipment of assets to the United Nations Logistics Base and for the shipment of archives and records.

Extrabudgetary resources

(a) Voluntary contributions

48. No extrabudgetary resources are projected for 2026 owing to the end of the mandate in 2025.

(b) Cost recovery

49. In 2025, resources in the amount of $9,251,800 are projected to be received from the United Nations country team and will continue to be utilized to provide for the continuation of six positions (2 Field Service and 4 four international United Nations Volunteer) and to continue to support the United Nations Guard Unit, cost-sharing of other security staff costs and services, space management, cleaning services, field technology services, ground transport, medical services, and fuel and other supplies.

50. No resources are projected to be received in 2026 from the United Nations country team owing to the cessation of the Mission’s operations on 31 December 2025.

Annex I

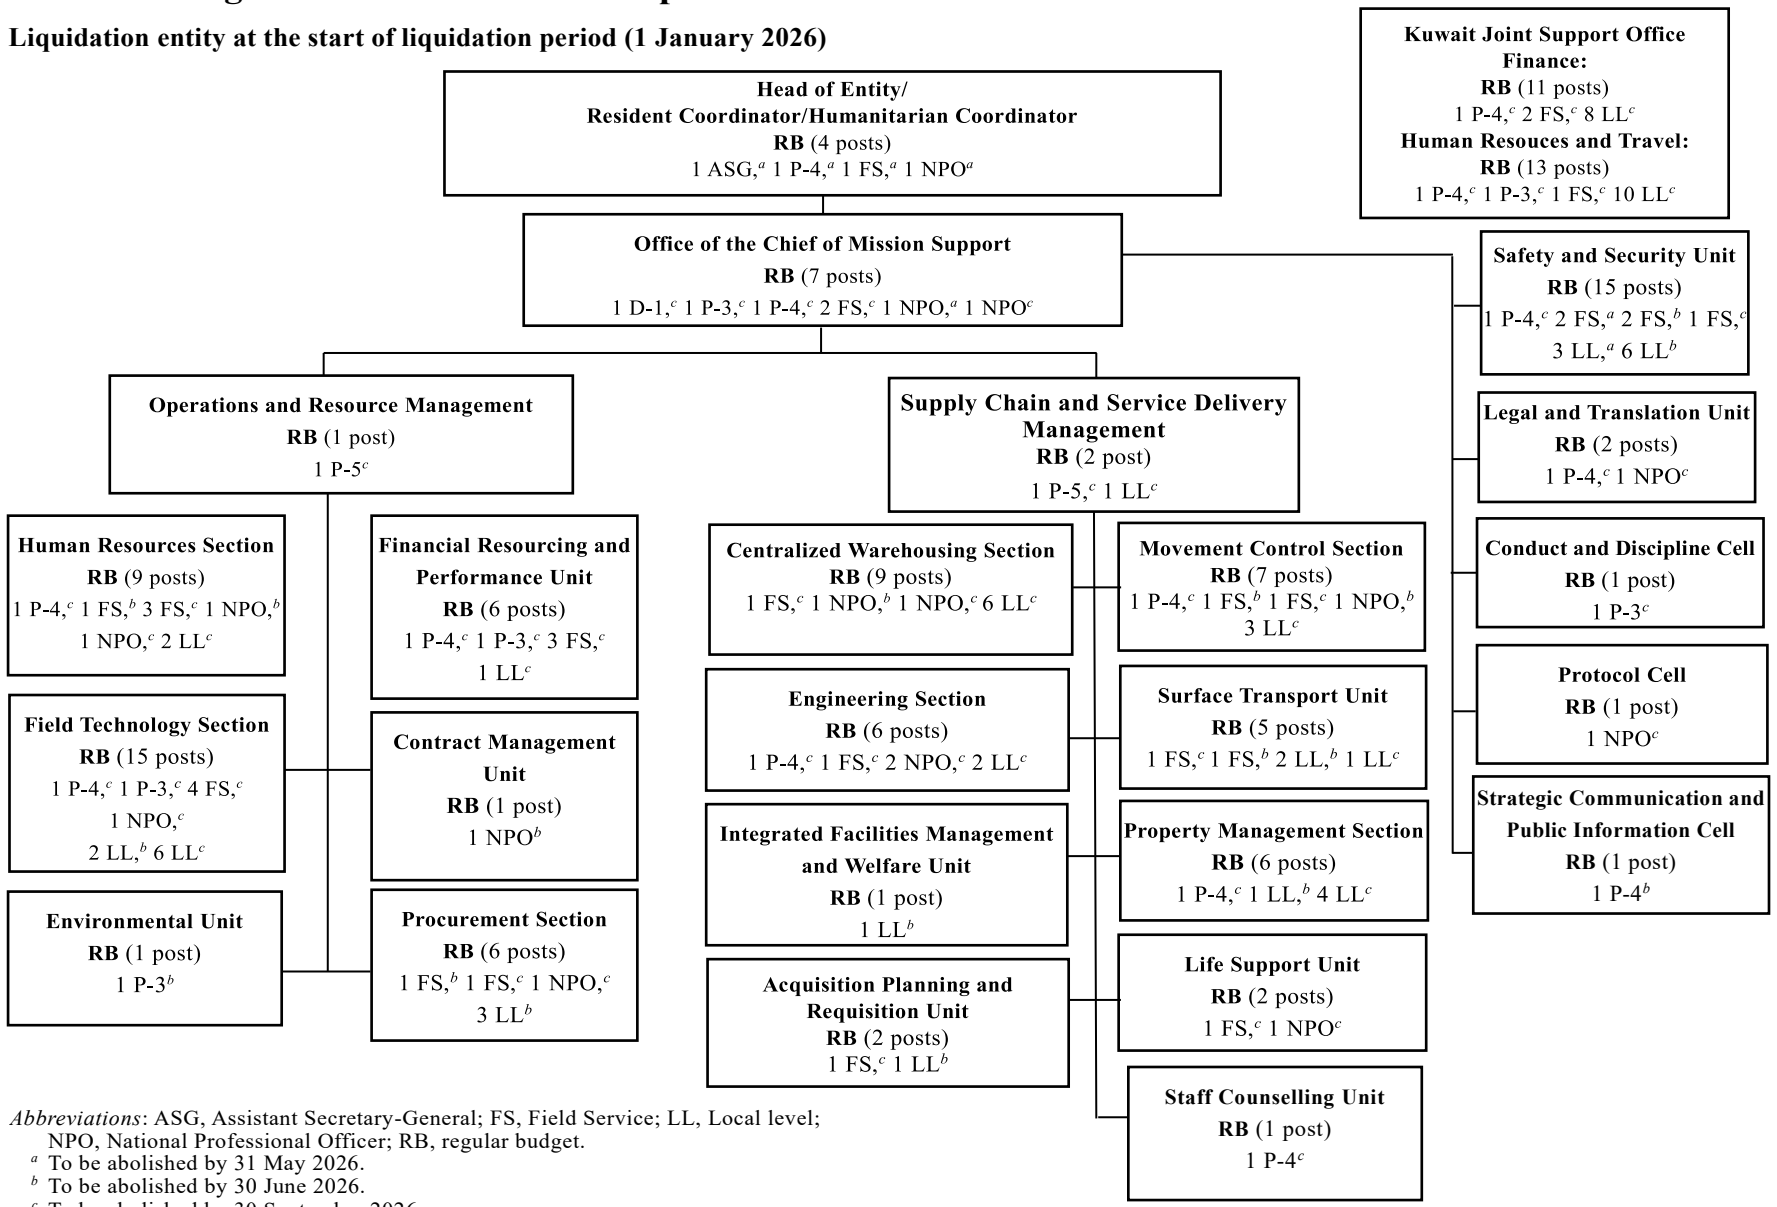
Summary of follow-up action taken to implement decisions and requests of the General Assembly, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

Brief description of the recommendation	*Action taken to implement the recommendation*
Advisory Committee on Administrative and Budgetary Questions (A/79/7/Add.48)	
The Advisory Committee recalls that the General Assembly recognized the importance of capacity-building for national staff in the drawdown phases of missions (see resolutions 69/258 B, 69/259 B and 67/277) and trusts that the Secretary-General will continue his efforts in this regard and will provide an update in the context of his next report on the Mission (para. 27).	UNAMI has developed a comprehensive human resources strategy that encompasses capacity-building for national staff to acquire new skills that can be useful in their future careers, either within or outside the United Nations. The measures already undertaken and the planned initiatives for 2025 are detailed in paragraph 23 of the present report.
The Advisory Committee trusts that additional information related to UNAMI staff who were reinstated or rejoined the Organization less than 12 months after separation, as well as any related recovery of termination indemnities, will be provided in future reports (para. 32).	As at 30 April, 40 staff had separated from UNAMI, including 6 who took up appointment with other United Nations entities. Information on UNAMI staff who will be reinstated or rejoin the Organization less than 12 months after separation, as well as any related recovery of termination indemnities, will be reported on in the context of future chapeau report.
While noting that quantifiable workload information for UNAMI-funded Kuwait Joint Support Office posts would not accurately represent workload solely generated by UNAMI, the Advisory Committee is of the opinion that the service delivery model of the Office should be scalable, in that a reduction in the number of client missions and their associated transaction processing requirements should result in a reduction in the Office's staffing. The Committee further notes that there are seven UNAMI-funded posts in the Office that are vacant. The Committee trusts that the Secretary-General will provide further justification for the retention of the 32 UNAMI-funded posts in the Office to the General Assembly in the context of its review of the present report and in his upcoming report on the liquidation requirements for the Mission (para. 44).	The General Assembly, by its resolution 79/258 B, decided to abolish all vacant posts for UNAMI, including the seven vacant UNAMI-funded posts in the Kuwait Joint Support Office. With regard to the retention of the remaining posts, in 2024 the Department of Operational Support conducted a review of the Kuwait Joint Support Office to determine how the peace operations that the Office supports can continue to receive shared services with efficiency, interoperability, responsiveness and operational continuity, with the termination of the mandate of UNAMI at the end of 2025. In this regard, the Secretariat intends to ensure the transition of the peace operations supported by the Support Office to the Regional Service Centre by the end of the UNAMI liquidation process, leading to the abolishment of all special political mission-funded posts. Details on the transition plan are presented in the context of the chapeau report (A/80/6 (Sect. 3)/Add.1).

Annex II

Organizational structure and post distribution for 2026

Liquidation entity at the start of liquidation period (1 January 2026)



Abbreviations: ASG, Assistant Secretary-General; FS, Field Service; LL, Local level; NPO, National Professional Officer; RB, regular budget.

[a] To be abolished by 31 May 2026.

[b] To be abolished by 30 June 2026.

[c] To be abolished by 30 September 2026.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

4.1 The Office for Disarmament Affairs is responsible for supporting multilateral efforts aimed at achieving the goal of general and complete disarmament under strict and effective international control. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including the final document of the tenth special session of the General Assembly, which was the first special session devoted to disarmament (resolution S-10/2). Weapons of mass destruction, in particular nuclear weapons, remain the primary concern owing to their unparalleled destructive potential. The evolving global strategic environment has heightened the urgency of addressing emerging biosecurity risks, including through improving processes to anticipate, prevent, coordinate and respond to such risks, as well as bolstering the norm against chemical weapons. The Office provides support for national and international efforts to combat, prevent and eradicate the illicit trade in small arms and light weapons, which remain a significant driver of armed violence and conflict, and to reduce safety and security risks in through-life conventional ammunition management. The Office also supports States' efforts to address emerging issues, including developments in science and technology, and their impact on international security.

Strategy and external factors for 2026

4.2 The Office will ensure full implementation of its legislative mandates and adherence to United Nations policies and procedures. It will continue to support multilateral negotiations and deliberations and offer expertise and practical solutions, while fostering confidence and trust among Member States, and will strive to facilitate the reconciliation of disparate positions among Member States resulting from a volatile international security environment. The Office will seek to mitigate the risks that it faces in carrying out its mandate and will implement its next strategic plan, for the period 2026–2030, aligning its work and priorities with global and organizational agendas.

4.3 The Office will continue to be guided by existing frameworks, including relevant elements of the Sustainable Development Goals and the Secretary-General's peace and security and development reforms, in accordance with relevant General Assembly resolutions. The Office will also be informed by *Securing Our Common Future: An Agenda for Disarmament*, in accordance with the mandates of the Office. Furthermore, it will actively support Member States in the implementation of their disarmament obligations and commitments, as outlined in the Pact for the Future (General Assembly resolution 79/1).

4.4 With regard to cooperation with other entities, the Office will continue to enhance collaboration with other international, regional and subregional organizations in the areas of disarmament, arms control and non-proliferation. Through its three regional centres and its liaison office in Vienna, the Office will foster greater regional cooperation, facilitating dialogue and cooperation among States and regional and subregional organizations and arrangements. The Office will further enhance its partnerships with various stakeholders, such as civil society, academia, the private sector and young people. Through such partnerships, it will be able to meet regional and national disarmament and arms control priorities effectively, while building greater local disarmament capacity and enhancing the viability of regional frameworks.

4.5 With regard to inter-agency coordination and liaison, the Office will continue to pursue cohesive and integrated approaches within the United Nations peace and security pillar and with other specialized United Nations agencies and other entities, such as the United Nations Youth Office, the Office for Digital and Emerging Technologies and the Coordinating Action on Small Arms mechanism, the United Nations system-wide inter-agency coordination mechanism for small arms and ammunition control and the reduction of armed violence. The Office will continue to work with other United

Nations entities to foster a holistic approach to addressing risks associated with arms, thereby contributing to conflict prevention, the protection of civilians and international peace and security. By working collaboratively across the United Nations system, the Office will encourage greater efforts to integrate disarmament, humanitarian and development activities.

4.6 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The political environment and developments are supportive of disarmament efforts and are conducive to the facilitation of negotiations on new arms limitation and disarmament agreements;

(b) Member States are willing to implement the recommendations, resolutions and decisions of relevant meetings and conferences;

(c) International organizations and entities cooperate;

(d) National institutions support the promotion of equal opportunities for women and the promotion of meaningful and inclusive participation and engagement of young people in disarmament, non-proliferation and arms control.

4.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, in line with organizational mandates and policies for mainstreaming a gender perspective into policies and programmes in the United Nations system (see Economic and Social Council resolution 2024/3). The Office will continue to accord high priority to assisting Member States in the implementation of Security Council resolutions on women and peace and security and to assisting States, upon request, in promoting the role of women in disarmament, non-proliferation and arms control and gender-sensitive policymaking and programming in line with General Assembly resolution 65/69 and subsequent resolutions on women, disarmament, non-proliferation and arms control, including through data collection and education.

4.8 In line with the United Nations Disability Inclusion Strategy and General Assembly resolutions 74/144 and 76/154, the Office will continue to implement its departmental action plan and collaborate with other United Nations entities to promote accessibility and the equal participation of persons with disabilities in disarmament discussions and decision-making processes.

4.9 The Office will continue to facilitate youth engagement and promote the meaningful and inclusive participation of young people in discussions in the field of disarmament and non-proliferation, in line with General Assembly resolution 78/31 on youth, disarmament and non-proliferation.

Legislative mandates

4.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

S-10/2	Final Document of the Tenth Special Session of the General Assembly	79/43	Relationship between disarmament and development
59/95	Improving the effectiveness of the methods of work of the First Committee	79/57	Women, disarmament, non-proliferation and arms control
77/298	The United Nations Global Counter-Terrorism Strategy: eighth review	79/80	Promoting international cooperation on peaceful uses in the context of international security
79/1	The Pact for the Future		

Security Council resolutions

1325 (2000)	1673 (2006)
1540 (2004)	1810 (2008)

1887 (2009)
1977 (2011)
2055 (2012)
2117 (2013)
2118 (2013)
2475 (2019)

Subprogramme 1
Multilateral negotiations and deliberations on disarmament and arms limitation

General Assembly resolutions and decisions

74/50 and 78/239; decisions 75/516, 76/515 and 77/514	Nuclear disarmament verification
75/31 and 78/15	Prohibition of the development and manufacture of new types of weapons of mass destruction and new systems of such weapons: report of the Conference on Disarmament
78/20 and 79/22	Reducing space threats through norms, rules and principles of responsible behaviours
78/238 and 79/21	Further practical measures for the prevention of an arms race in outer space
79/34	Implementation of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction
79/51	Transparency and confidence-building measures in outer space activities
79/58	Implementation of the Convention on Cluster Munitions
79/62	Lethal autonomous weapons systems
79/63	United Nations disarmament fellowship, training and advisory services
79/71	Report of the Conference on Disarmament
79/75	Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects
79/78	Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction
79/79	Strengthening and institutionalizing the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction
Decision 79/512	Open-ended working group on the prevention of an arms race in outer space in all its aspects

Subprogramme 2
Weapons of mass destruction

General Assembly resolutions and decisions

42/37 C	Measures to uphold the authority of the 1925 Geneva Protocol and to support the conclusion of a chemical weapons convention
42/38 C	Notification of nuclear tests
54/280	Agreement to regulate the relationship between the United Nations and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization
72/31	Taking forward multilateral nuclear disarmament negotiations
72/51	International Day against Nuclear Tests
73/71	Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia, 2020
Decision 73/546	Convening a conference on the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction
77/66	Eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons and its Preparatory Committee
78/17 and 79/16	Establishment of a nuclear-weapon-free zone in the region of the Middle East
78/28; decision 79/513	Treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices
78/63 and 79/74	The risk of nuclear proliferation in the Middle East
79/29	The Hague Code of Conduct against Ballistic Missile Proliferation
79/30	Mongolia's international security and nuclear-weapon-free status
79/32	Follow-up to the advisory opinion of the International Court of Justice on the legality of the threat or use of nuclear weapons
79/33	Reducing nuclear danger
79/38	Treaty of the Prohibition of Nuclear Weapons
79/39	Universal Declaration on the Achievement of a Nuclear-Weapon-Free World
79/42	Measures to prevent terrorists from acquiring weapons of mass destruction
79/47	Follow-up to the 2013 high-level meeting of the General Assembly on nuclear disarmament
79/48	Measures to uphold the authority of the 1925 Geneva Protocol
79/50	Nuclear disarmament

79/60 Addressing the legacy of nuclear weapons: providing victim assistance and environmental remediation to Member States affected by the use or testing of nuclear weapons

79/134 Cooperation between the United Nations and the Organisation for the Prohibition of Chemical Weapons

79/238 Nuclear war effects and scientific research

79/240 Group of Scientific and Technical Experts on Nuclear Disarmament Verification

79/241 Comprehensive study of the question of nuclear-weapon-free zones in all its aspects

Subprogramme 3
Conventional arms

General Assembly resolutions

77/33 Objective information on military matters, including transparency of military expenditures

77/69 Transparency in armaments

79/26 Conventional arms control at the regional and subregional levels

79/31 Assistance to States for curbing the illicit traffic in small arms and light weapons and collecting them

79/40 The illicit trade in small arms and light weapons in all its aspects

79/49 Effects of the use of armaments and ammunitions containing depleted uranium

79/53 Countering the threat posed by improvised explosive devices

79/54 Through-life conventional ammunition management

79/59 Information on confidence-building measures in the field of conventional arms

Subprogramme 4
Information and outreach

General Assembly resolutions and decisions

47/53 D World Disarmament Campaign

Decision 54/418 Advisory Board on Disarmament Matters

78/31 Youth, disarmament and non-proliferation

78/237 Developments in the field of information and telecommunications in the context of international security

79/23 Role of science and technology in the context of international security and disarmament

79/28 United Nations study on disarmament and non-proliferation education

79/45 Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control

79/46 Promotion of multilateralism in the area of disarmament and non-proliferation

79/69 United Nations Disarmament Information Programme

79/237 Open-ended working group on security of and in the use of information and communications technologies 2021–2025 established pursuant to General Assembly resolution 75/240

79/239 Artificial intelligence in the military domain and its implications for international peace and security

Subprogramme 5
Regional disarmament

General Assembly resolutions and decisions

Decision 77/511 Maintenance of international security – good neighbourliness, stability and development in South-Eastern Europe

78/13 Implementation of the Declaration of the Indian Ocean as a Zone of Peace

79/25 Regional disarmament

79/27 Confidence-building measures in the regional and subregional context

79/65 United Nations Regional Centre for Peace and Disarmament in Africa

79/66 United Nations Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean

79/67 United Nations Regional Centre for Peace and Disarmament in Asia and the Pacific

79/70 United Nations regional centres for peace and disarmament

79/76 Strengthening of security and cooperation in the Mediterranean region

Deliverables

4.11 Table 4.1 lists all cross-cutting deliverables of the programme.

Table 4.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**3**	**3**	**3**	**3**
Meetings of:				
1. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. The Committee for Programme and Coordination	1	1	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

4.12 The following evaluations conducted by the Office and completed in 2024 have guided the proposed programme plan for 2026:

(a) Evaluation of the Office's strategic plan for 2021–2025;

(b) Evaluation of the Office's work on engaging, educating and empowering young people.

4.13 In response to the results of the evaluations referenced above, the Office will place greater emphasis on regional cooperation, in particular through its regional centres, recognizing the importance of local contexts in addressing disarmament and arms control challenges. It will also enhance its focus on integrating disarmament and arms control into the broader United Nations system, as relevant and appropriate. The insights from the evaluation of the Office's strategic plan have also informed the next such plan, for the period 2026–2030.

4.14 An evaluation of the Office's work in supporting the integration of disarmament and arms control measures into common country analyses and United Nations Sustainable Development Cooperation Frameworks is planned for 2026.

Programme of work

Subprogramme 1
Multilateral negotiations and deliberations on disarmament and arms limitation

Objective

4.15 The objective, to which this subprogramme contributes, is to advance multilateral negotiations and deliberations on agreements on disarmament, arms limitation and non-proliferation in all its aspects, as required by States Parties to existing multilateral agreements and the Conference on Disarmament.

Strategy

4.16 To contribute to the objective, the subprogramme will:

(a) Provide support for negotiations in the Conference on Disarmament and in conferences and meetings of States Parties to various multilateral agreements on disarmament, arms limitation and non-proliferation in all its aspects at the organizational, procedural and substantive levels;

(b) Render assistance and provide support for the follow-up to decisions, recommendations and programmes of action adopted by conferences and meetings of States Parties to various multilateral disarmament, arms control and non-proliferation agreements and to treaty-making conferences, expert groups and other disarmament meetings under the responsibility of the subprogramme;

(c) Implement the United Nations Disarmament Fellowship, Training and Advisory Services Programme;

(d) Facilitate the efforts of Member States to prevent an arms race in outer space.

4.17 The above-mentioned work is expected to result in:

(a) Effective and efficient holding of the meetings of the Conference on Disarmament, other conferences, working groups and expert groups and of the various treaty bodies falling under the remit of the subprogramme;

(b) Strengthened operational viability and compliance with treaty obligations and adherence to and/or implementation of decisions, recommendations and programmes of action, as well as increased reporting by States Parties;

(c) Enhanced expertise of Member States in the field of disarmament and non-proliferation through participation in the United Nations Disarmament Fellowship, Training and Advisory Services Programme.

Programme performance in 2024

Progress of States towards the establishment of mechanisms for scientific and technological review and for international cooperation and assistance under the Biological Weapons Convention

4.18 At the ninth Review Conference of the States Parties to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction, held in 2022, States Parties agreed to establish the Working Group on the Strengthening of the Convention. The Working Group was mandated, inter alia, to develop mechanisms for scientific and technological review and for international cooperation and assistance, with a view to establishing such mechanisms. In 2024, the Group made progress towards establishing the mechanisms through substantive discussions, which were informed by intersessional work undertaken by the Friends of the Chair to develop potential recommendations for their establishment. Intersessional work will continue in 2025, with a view to the adoption of the recommendations during the year. The establishment of the mechanisms would contribute to the strengthening of the Convention and ultimately help to safeguard humanity from the risks posed by biological weapons.

4.19 Progress towards the objective is presented in the performance measure below (see table 4.2).

Table 4.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
The ninth Review Conference agreed to establish the Working Group on the Strengthening of the Convention, with a view to developing mechanisms for scientific and technological review and for international cooperation and assistance	The Working Group initiated discussions on the mechanisms for scientific and technological review and for international cooperation and assistance	The Working Group made progress towards the establishment of the mechanisms for scientific and technological review and for international cooperation and assistance

Planned results for 2026

Result 1: increase in deliberations and eventual negotiations in the Conference on Disarmament

Programme performance in 2024 and target for 2026

4.20 The subprogramme's work contributed to the establishment of subsidiary bodies during the 2024 session of the Conference on Disarmament and to the adoption of the reports of those bodies, including recommendations that they resume their work in 2025, which met the planned target.

4.21 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.3).

Table 4.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The Conference on Disarmament adopted two of the five reports of the subsidiary bodies and a procedural report of the Conference to the General Assembly	Formal and informal thematic discussions were held on agenda items of the Conference and other specific topics, consensus was reached on the annual report and a resolution was adopted by the General Assembly (resolution 78/61)	States members of the Conference reached an agreement on the establishment of subsidiary bodies and on recommendations for those bodies to resume their work in 2025	States members of the Conference are able to carry out substantive work in a sustained and progressive manner on priority and emerging issues	States members of the Conference are able to carry out substantive work in a sustained and progressive manner on priority and emerging issues

Result 2: prevention of an arms race in outer space

Programme performance in 2024 and target for 2026

4.22 The subprogramme's work contributed to the adoption of a substantive report by the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space and inclusion of agreed language on the prevention of an arms race in outer space in the Pact

for the Future, facilitating the work of future intergovernmental processes on the topic, which met the planned target.

4.23 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.4).

Table 4.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Adoption of substantive recommendations by the Disarmament Commission Conclusion of work within the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours Initiation of work in the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space	Adoption of a substantive report by the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space and inclusion of agreed language on the prevention of an arms race in outer space in the Pact for the Future	Substantive deliberations in intergovernmental bodies contribute to negotiations for the conclusion of an international agreement or agreements to prevent an arms race in outer space	Substantive deliberations in intergovernmental bodies contribute to negotiations for the conclusion of an international agreement or agreements to prevent an arms race in outer space

Result 3: strengthened disarmament expertise through the United Nations Disarmament Fellowship, Training and Advisory Services Programme

Proposed programme plan for 2026

4.24 Each year, the subprogramme provides training and study visit opportunities to representatives of Member States in the field of disarmament through the United Nations Disarmament Fellowship, Training and Advisory Services Programme. Since 1979, the Programme has trained over 1,125 officials from 172 Member States, with the aim of providing participants, in particular in developing countries, with further knowledge and professional competence to fulfil their duties in the field of disarmament and international security. It addresses theory and practice through lectures, practical exercises, simulations and, upon invitation, visits to international organizations and States.

Lessons learned and planned change

4.25 The lesson for the subprogramme, considering the value of in-country study visits in providing participants with practical exposure and a deeper understanding of key issues on disarmament, was the need to expand such study visits to cover all regions more equitably. In applying the lesson, the subprogramme will intensify efforts to enhance training, including by incorporating more practical experiences and progressively expanding its study visits to cover all geographical regions equitably.

4.26 Expected progress towards the objective is presented in the performance measure below (see table 4.5).

Table 4.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	For the first time since its establishment, the Programme conducted a study visit to an African country	Study visits under the Programme are conducted in all regions	Participants in the Programme are offered study visits that cover all geographical regions in an equitable manner

Deliverables

4.27 Table 4.6 lists all deliverables of the subprogramme.

Table 4.6
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

C. Substantive deliverables

Databases and substantive digital materials: databases relating to annual national reports on compliance, Protocol V and Amended Protocol II to the Convention on Certain Conventional Weapons, explosive remnants of war under Protocol V to the Convention, articles 7 and 8 (9) of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, and article 7 of the Convention on Cluster Munitions; electronic reporting system for the confidence-building measures and the cooperation and assistance database of the Biological Weapons Convention; website relating to the Conference on Disarmament, the Geneva Branch of the Office for Disarmament Affairs, including web pages on financial matters, fissile material, the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, the Convention on Cluster Munitions and the Anti-Personnel Landmines Convention and the United Nations Disarmament Fellowship, Training and Advisory Services Programme.

D. Communication deliverables

Outreach programmes, special events and information materials: briefings and outreach materials on disarmament, arms limitation and non-proliferation for the Geneva-based permanent missions and governmental, non-governmental and civil society organizations.

Digital platforms and multimedia content: web pages on financial issues in support of conventions; digital tools to improve national reporting and compliance (Biological Weapons Convention and Convention on Certain Conventional Weapons).

Subprogramme 2
Weapons of mass destruction

Objective

4.28 The objective, to which this subprogramme contributes, is to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery.

Strategy

4.29 To contribute to the objective, the subprogramme will:

(a) Support the process of negotiations, deliberations and consensus-building in the areas of disarmament and non-proliferation of weapons of mass destruction, in particular nuclear weapons and their means of delivery;

(b) Support the full implementation of international instruments dealing with the disarmament and non-proliferation of nuclear weapons, including the Treaty on the Non-Proliferation of Nuclear Weapons and the Treaty on the Prohibition of Nuclear Weapons, and for the entry into force of the Comprehensive Nuclear-Test-Ban Treaty;

(c) Support the enhancement and implementation of further ways and means of cooperation among the States Parties to nuclear-weapon-free zone treaties and the protocols thereto;

(d) Support Member States in their negotiations on the establishment of a Middle East zone free of nuclear weapons and all other weapons of mass destruction;

(e) Provide substantive and technical support to office bearers of the First Committee and the Disarmament Commission;

(f) Continue to raise awareness of the dangers posed by nuclear weapons, including through substantive and technical support to the International Day for the Total Elimination of Nuclear Weapons and the International Day against Nuclear Tests;

(g) Strengthen cooperation with relevant intergovernmental organizations, such as the International Atomic Energy Agency, including in areas such as nuclear security and non-proliferation, and expand interaction, as appropriate, with civil society, in particular research and academic institutions and non-governmental organizations working in the areas of disarmament and non-proliferation of nuclear weapons and their delivery systems;

(h) Continue its close cooperation with the Organisation for the Prohibition of Chemical Weapons (OPCW) to promote the universality and full implementation of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction;

(i) Support efforts to ensure accountability for the use of chemical weapons by, inter alia, supporting OPCW efforts in this regard and by working with members of the Security Council in order to build unity on the issue. The subprogramme will also continue to provide briefings to the Council on the implementation of resolution 2118 (2013) on the elimination of the chemical weapons programme of the Syrian Arab Republic;

(j) Continue to enhance the operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons by organizing, with interested Member States and relevant partners, training and capacity-building activities for experts and analytical laboratories.

4.30 The above-mentioned work is expected to result in:

(a) The building of trust and understanding among Member States in order to facilitate consensus on effective measures relating to the total elimination of nuclear weapons and measures to prevent any use of a nuclear weapon, and to uphold the norms against the proliferation and testing of nuclear weapons;

(b) The strengthening and reinforcement of the norm against chemical weapons use;

(c) Enhanced ability of Member States to uphold the global norms against the use of weapons of mass destruction;

(d) Strengthened coordination capabilities of Member States to respond to incidents involving the alleged use of biological weapons.

Programme performance in 2024

States Parties to treaties establishing nuclear-weapon-free zones strengthened cooperation and consultation mechanisms

4.31 As part of ongoing efforts by relevant States to strengthen coordination and cooperation among nuclear-weapon-free zones, the subprogramme co-organized a workshop with the Government of Kazakhstan to facilitate an exchange of views among representatives of States Parties to nuclear-weapon-free zone treaties on their experiences in implementing those treaties, including lessons learned and best practices. The workshop strengthened consultation and fostered cooperation

between Member States that are Parties to treaties establishing nuclear-weapon-free zones, including for coordination on future work. In addition, the subprogramme maintained and updated a dedicated platform on the programme's website to support States' efforts, which enhanced communication between zones.

4.32 Progress towards the objective is presented in the performance measure below (see table 4.7).

Table 4.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
A dedicated web-based platform on nuclear-weapon-free zones is available to States Parties to enhance cooperation and coordination	–	Strengthened cooperation and consultations among States Parties to nuclear-weapon-free zone treaties

Planned results for 2026

Result 1: strengthening the multilateral nuclear disarmament and non-proliferation regime

Programme performance in 2024 and target for 2026

4.33 The subprogramme's work contributed to the successful conduct of the second session of the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons, which met the planned target.

4.34 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.8).

Table 4.8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The 2020 Review Conference of the Parties to the Treaty, which was delayed by two years owing to the coronavirus disease (COVID-19) pandemic, was held States Parties established a working group to further strengthen the review process of the Treaty	The first session of the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons was held	The second session of the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons was held	The third session of the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons is held States agree on arrangements for the 2026 Review Conference	The 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons is held

Result 2: process to achieve the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction

Programme performance in 2024 and target for 2026

4.35 The subprogramme's work contributed to advancing the process of establishing a Middle East zone free of nuclear weapons and other weapons of mass destruction, with the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction undertaking substantive deliberations, including through meetings of its intersessional working committee, to advance the preparations for the negotiation of a legally binding treaty and contributing to the implementation of the decision adopted at its fourth session on the time of endorsement of the presidency of the annual sessions of the Conference, as contained in document A/CONF.236/2023/DEC.3, which met the planned target.

4.36 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.9).

Table 4.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	The Conference undertook substantive discussions and agreed to continue deliberations at its intersessional working committee meetings on, inter alia, nuclear verification, peaceful uses and technical cooperation and an index of the list of topics to be addressed by future sessions of the Conference	The Conference undertook substantive deliberations, including through meetings of its intersessional working committee, to advance the preparations for the negotiation of a legally binding instrument The decision adopted at the fourth session on the time of endorsement of the presidency of the annual sessions of the Conference was implemented	The President of the sixth session, together with the members of the Conference, undertakes organizational and substantive preparations, including through the intersessional working committee, for the sixth session aimed at reaching a common position on the negotiation of a Middle East zone treaty	The President of the seventh session, together with the members of the Conference, undertakes organizational and substantive preparations for the seventh session aimed at reaching a common position on the negotiation of a Middle East zone treaty

Result 3: improved readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons

Proposed programme plan for 2026

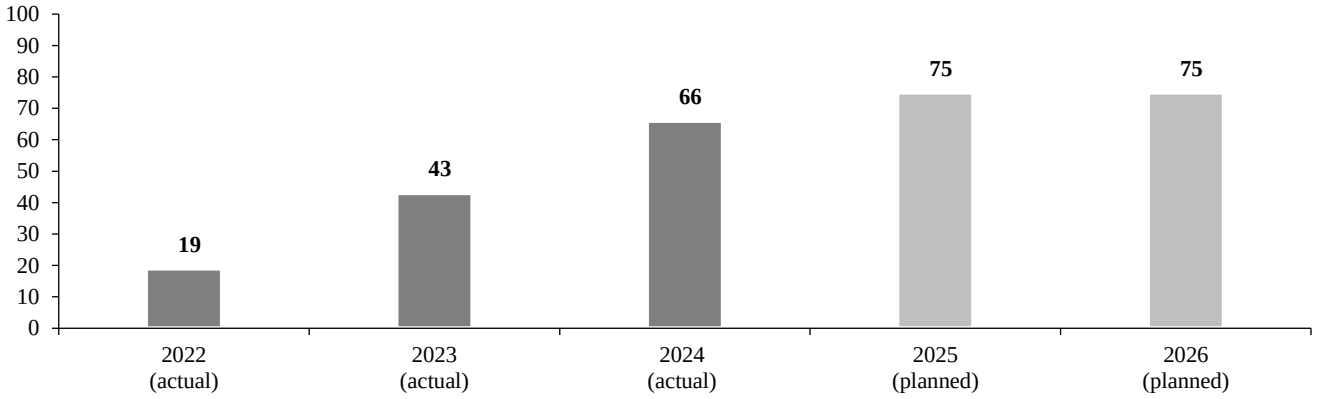
4.37 The mandate for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons was established in General Assembly resolution 42/37 C and reaffirmed in Security Council resolution 620 (1988). The subprogramme is tasked with ensuring its operational readiness to respond to reports from Member States. To this effect, the subprogramme maintains rosters of experts and analytical laboratories that may be called upon to support an investigation by the Mechanism in accordance with the guidelines and procedures in Assembly resolution 45/57 C.

Lessons learned and planned change

4.38 The lesson for the subprogramme was that a well-supported training programme for experts nominated by Member States was essential for enhancing the operational readiness of the Mechanism. In applying the lesson, the subprogramme will seek to expand training activities and foster a broader representation of experts from different regions who are prepared and available to support investigations if called upon.

4.39 Expected progress towards the objective is presented in the performance measure below (see figure 4.I).

Figure 4.I
Performance measure: number of trained experts on the Mechanism's roster (annual)



Deliverables

4.40 Table 4.10 lists all deliverables of the subprogramme.

Table 4.10

19. Pre-session consultations and meetings of the first Review Conference of the Parties to the Treaty on the Prohibition of Nuclear Weapons	–	–	–	70
20. Pre-session consultations and meetings for the Preparatory Committee for the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	30	30	32	–
21. Pre-session consultations and meetings related to the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	–	–	66
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**35**	**57**	**38**	**38**
22. Intersessional briefings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	3	8	8	8
23. Training courses for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons on chemical weapons investigations and updating the roster of experts	32	49	30	30

C. Substantive deliverables

Consultation, advice and advocacy: impartial technical, substantive and procedural advice provided to Member States; consultations with civil society, including on participation by civil society in treaty-related conferences; consultations with academia and specialized technical institutions; liaison with relevant intergovernmental organizations (e.g. OPCW, International Atomic Energy Agency and Comprehensive Nuclear-Test-Ban Treaty Organization); interdepartmental coordination, including as Vice-Chair of the United Nations Global Counter-Terrorism Coordination Compact Working Group on Emerging Threats and Critical Infrastructure Protection.

D. Communication deliverables

Outreach programmes, special events and information materials: fact sheets on weapons of mass destruction disarmament and associated treaties; side events at relevant United Nations and ad hoc conferences; newsletter of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons; outreach and advocacy to the general public and students conducted through events organized by the subprogramme.

Digital platforms and multimedia content: website and social media platforms related to weapons of mass destruction issues.

Subprogramme 3
Conventional arms

Objective

4.41 The objective, to which this subprogramme contributes, is to advance the regulation and limitation of conventional weapons and ammunition, taking into account the legitimate needs of States for self-defence.

Strategy

4.42 To contribute to the objective, the subprogramme will:

(a) Provide substantive support, including preparatory activities for intergovernmental processes, to the following:

(i) First Committee of the General Assembly and the Security Council;

(ii) Ninth Biennial Meeting of States to Consider the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and its open-ended technical expert group to address developments in small arms and light weapons manufacturing, technologies and design;

(iii) Preparatory meeting of States on the Global Framework for Through-life Conventional Ammunition Management;

(b) Support and assist with the development, updating, revision, translation and dissemination, as appropriate, of the following:

(i) International Ammunition Technical Guidelines through the Saf*er*Guard programme;

(ii) Database on military expenditures;

(iii) Register of Conventional Arms;

(iv) Modular Small-arms-control Implementation Compendium;

(v) Repository of military confidence-building measures;

(vi) Database on national reports of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects;

(vii) Online platform and reporting database related to the Global Framework for Through-life Conventional Ammunition Management;

(viii) Dedicated fellowship training programmes on through-life conventional ammunition management and on small arms and light weapons control;

(c) Implement and assist States in the implementation of the outcomes of the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects;

(d) Assist States in the regional and national implementation of the Global Framework for Through-life Conventional Ammunition Management;

(e) Provide capacity-building support for requesting States to collect and consolidate data to monitor indicator 16.4.2 of the Sustainable Development Goals;

(f) In partnership with United Nations system entities:

(i) Promote safe and secure weapons and ammunition management, in disarmament, demobilization and reintegration processes and in peace operation contexts;

(ii) Support the integration of small arms control considerations into United Nations country-level system-wide approaches to development;

(g) Support, implement and facilitate assistance projects that develop the capacity of national institutions with regard to conventional arms and ammunition control, including through the United Nations Trust Facility Supporting Cooperation on Arms Regulation, the Saving Lives Entity fund and the Safe*r*Guard Programme, as well as the maintenance and expansion of the roster of experts validated according to the International Ammunition Technical Guidelines, through the establishment and operationalization of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management; support the continued work of the Ammunition Management Advisory Team; and support the Silencing the Guns by 2030 and its Africa Amnesty Month initiative of the African Union;

(h) Implement, as required, relevant recommendations issued in 2025 by the Group of Governmental Experts on the United Nations Register of Conventional Arms;

(i) Manage the transparency instruments on military expenditures and the Register of Conventional Arms and provide support to States for their increased participation and use;

(j) Support initiatives and efforts for fostering military confidence-building measures at the subregional and regional levels;

(k) Support efforts to combat, prevent and eradicate the illicit trade in small arms and light weapons, their parts and ammunition in accordance with actions 18 (f) and 26 (g) of the Pact for the Future.

4.43 The above-mentioned work is expected to result in:

(a) Strengthened implementation of global arms control instruments, including legislation, policies and regulations on small arms and light weapons and conventional ammunition at the national, regional and subregional levels;

(b) Enhanced effectiveness of existing international assistance frameworks through the implementation of the Programme of Action on Small Arms, the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons (the International Tracing Instrument) and the Global Framework for Through-life Conventional Ammunition Management;

(c) Improved integration of small arms and light weapons and conventional ammunition control considerations into development and prevention processes and frameworks;

(d) Reduced armed violence and risk of armed conflict by reducing the destabilizing effect of increasing arms and ammunition transfers and accumulations, as well as fostering confidence-building measures among States;

(e) Continued relevance and improved participation of States in the United Nations Report on Military Expenditures and the Register of Conventional Arms.

Programme performance in 2024

Renewed commitments to combat illicit small arms and light weapons

4.44 The illicit trade in small arms and light weapons, and the risk of diversion to unauthorized recipients, may exacerbate the risk of armed conflict or violence. The subprogramme facilitated the convening in 2024 of the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, as well as the implementation of the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons. The Review Conference concluded with the adoption of a political declaration and action-oriented

measures for the period 2024–2030. In addition, the subprogramme supported Member States in preparing voluntary national reports on the implementation of the Programme of Action, resulting in 100 reports submitted, an increase from the previous reporting period.

4.45 Progress towards the objective is presented in the performance measure below (see table 4.11).

Table 4.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Adoption of an outcome document at the eighth Biennial Meeting of States on Small Arms	–	Adoption of an outcome document at the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects 100 voluntary national reports submitted by Member States on implementation of the Programme of Action

Planned results for 2026

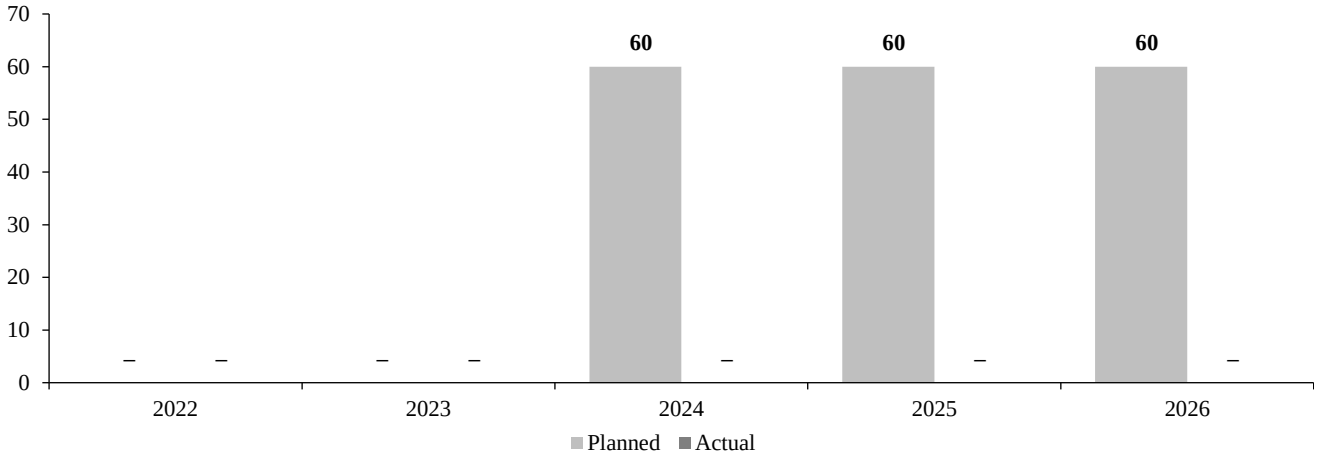
Result 1: strengthened implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons

Programme performance in 2024 and target for 2026

4.46 The subprogramme's work contributed to the development of course materials for a dedicated fellowship training programme on small arms and light weapons, which did not meet the planned target of 60 governmental officials benefiting from such a fellowship. The target was not met due to the liquidity situation of the Organization, which delayed the recruitment of staff to manage the programme.

4.47 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 4.II).

Figure 4.II
Performance measure: government officials benefiting from a dedicated fellowship training programme on small arms and light weapons to strengthen the implementation of the Programme of Action on Small Arms and the International Tracing Instrument
(Number of fellows)



Result 2: increased utilization of the global assistance mechanism for through-life ammunition management

Programme performance in 2024 and target for 2026

4.48 The subprogramme's work contributed to the successful conceptualization of the global assistance mechanism for through-life ammunition management, which met the planned target.

4.49 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.12).

Table 4.12
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	The General Assembly requested the establishment, under the Safe*r*Guard programme, of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management	The global assistance mechanism for through-life ammunition management, including its modalities and processes, was designed and conceptualized through multi-stakeholder consultations	Member States make requests and access offers for assistance in utilizing the global assistance mechanism for through-life ammunition management	Member States provide and receive assistance in through-life conventional ammunition management facilitated by the global assistance mechanism for through-life ammunition management

Result 3: addressing developments in the manufacturing, technology and design of small arms and light weapons to prevent, combat and eradicate their illicit trade and misuse

Proposed programme plan for 2026

4.50 In its resolution 79/40, the General Assembly decided to establish an open-ended technical expert group to develop agreed recommendations to ensure the full and effective implementation of the Programme of Action and the International Tracing Instrument in the light of developments in small arms and light weapons manufacturing, technology and design, in particular polymer and modular weapons and firearms produced using three-dimensional printing, focusing on the provision of international cooperation and assistance.

Lessons learned and planned change

4.51 The lesson for the subprogramme, on the basis of its experience supporting other expert groups, was the importance of providing information on the work of the open-ended technical expert group, to keep all States informed of progress made. In applying the lesson, the subprogramme will facilitate meetings of the expert group and increase information-sharing so that all Member States can monitor progress and outcomes.

4.52 Expected progress towards the objective is presented in the performance measure below (see table 4.13).

Table 4.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The eighth Biennial Meeting of States on Small Arms requested States to discuss the establishment of a dedicated expert group to address developments in the manufacturing, technology and design of small arms and light weapons	–	The General Assembly, in its resolution 79/40, decided to establish an open-ended technical expert group, which would meet for the first time in 2026	Substantive and procedural preparations for the convening of the open-ended technical expert group are conducted	The meeting of the open-ended technical expert group is held

Deliverables

4.53 Table 4.14 lists all deliverables of the subprogramme.

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

C. Substantive deliverables

Consultation, advice and advocacy: one briefing to delegates on United Nations transparency instruments (Register of Conventional Arms and United Nations Report on Military Expenditures) and one briefing to the Biennial Meeting of States on Small Arms on the Programme of Action on Small Arms; two regional briefings and consultations on the new Global Framework for Through-life Conventional Ammunition Management to support the development of regional and subregional commitments; and two expert seminars in preparation for the convening of the open-ended technical expert group.

Databases and substantive digital materials: online reporting systems related to global reported arms trade, military expenditures, military confidence-building measures and implementation of the Programme of Action on Small Arms available for use in voluntary reporting by Member States; online collaborative platform for International Ammunition Technical Guidelines management; online secured platform for the global assistance mechanism for through-life conventional ammunition management; online reporting and data collection platform related to the Global Framework for Through-life Conventional Ammunition Management.

D. Communication deliverables

Digital platforms and multimedia content: conventional arms webpage; website of the Saf*er*Guard programme on ammunition.

Subprogramme 4
Information and outreach

Objective

4.54 The objective, to which this subprogramme contributes, is to enhance awareness, understanding and knowledge by Member States and the public for advancing disarmament, non-proliferation and arms control.

Strategy

4.55 To contribute to the objective, the subprogramme will:

(a) Carry out outreach and information-sharing activities in cooperation with Member States and other relevant partners and stakeholders by organizing panel discussions, public events, exhibitions, media briefings, book launches, film screenings and other activities;

(b) Produce publications, implement a comprehensive media strategy and engage in outreach targeting audiences of different ages, genders, disabilities, geographic locations and perspectives;

(c) Support civil society engagement in intergovernmental forums by facilitating access arrangements, organizing consultative meetings and arranging for presentations by invited civil society representatives;

(d) Implement the recommendations of the 2002 United Nations study on disarmament and non-proliferation education, in cooperation with Member States and other relevant partners, by producing and disseminating educational materials, developing e-modules on substantive topics and organizing peace and disarmament education activities and contests, with particular emphasis on educating young people, including young women and those not traditionally engaged, to champion and promote disarmament efforts;

(e) Seek specific measures to promote the meaningful and inclusive participation and empowerment of young people on disarmament and non-proliferation issues, including through the dedicated digital platform Youth for Disarmament and token grants and awards supported by voluntary contributions.

4.56 The above-mentioned work is expected to result in:

(a) Increased interest in and support for multilateral disarmament efforts, enhancement of engagement by the general public and other stakeholders on these issues and the availability of clear, timely and impartial information to Member States;

(b) Better informed stakeholders, including government officials, civil society representatives and the general public;

(c) Progress in the development of common understandings in multilateral discussions by States on information and communications technology security in the context of international security, as well as improved awareness and knowledge of the subject among States and non-governmental actors.

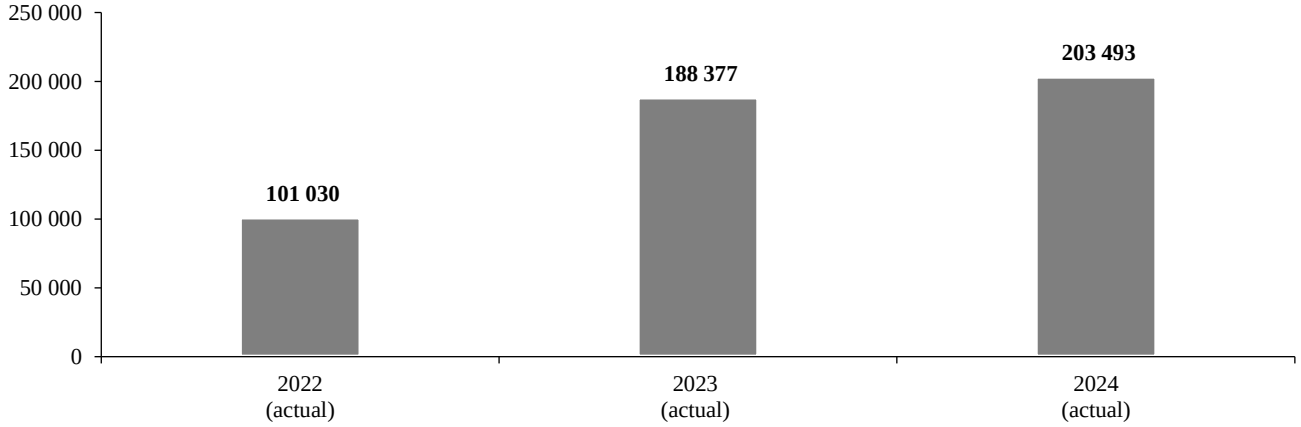
Programme performance in 2024

Enhanced awareness of global military expenditure among a wider audience

4.57 The subprogramme collaborated with the Department of Global Communications and other relevant entities to update a wall panel on military expenditure, first displayed in 2013, at the permanent disarmament exhibit at United Nations Headquarters. As a result, more than 200,000 visitors who visited the exhibit area in 2024 had access to up-to-date visual and educational information on global military expenditure, enhancing their understanding of the benefits of investing in disarmament efforts.

4.58 Progress towards the objective is presented in the performance measure below (see figure 4.III).

Figure 4.III
Performance measure: number of visitors to the permanent disarmament exhibit (annual)



Planned results for 2026

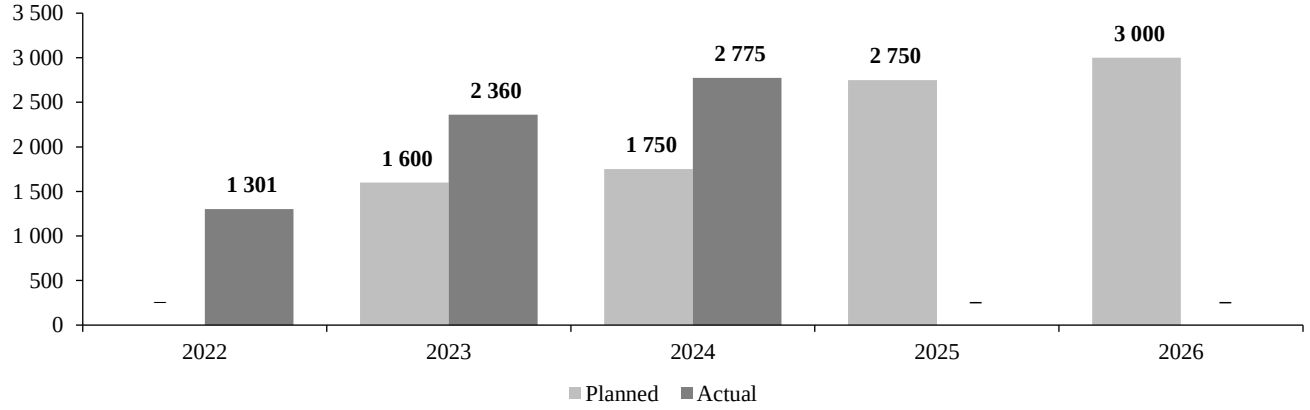
Result 1: *United Nations Disarmament Yearbook* – strengthened engagement and increased reach of topical issues and trends with respect to multilateral disarmament, non-proliferation and arms control

Programme performance in 2024 and target for 2026

4.59 The subprogramme's work contributed to 2,775 unique visitors to the *United Nations Disarmament Yearbook* website, which exceeded the planned target of 1,750.

4.60 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 4.IV).

Figure 4.IV
Performance measure: number of unique visitors to the *United Nations Disarmament Yearbook* website (annual)



Result 2: empowerment of youth in the field of disarmament and non-proliferation

Programme performance in 2024 and target for 2026

4.61 The subprogramme's work contributed to 100 youth leaders from 64 countries participating in the first phase of the Youth Leader Fund for a World without Nuclear Weapons programme, which met the planned target.

4.62 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.15).

Table 4.15
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Youth leaders developed projects to engage youth on topics related to disarmament, non-proliferation and arms control following the completion of the Leaders4Tomorrow training programme	100 youth leaders from 60 countries selected to participate in an online meeting to launch the Youth Leader Fund for a World without Nuclear Weapons	100 youth leaders from 64 countries participated in the first phase of the Youth Leader Fund for a World without Nuclear Weapons programme	Youth leaders organize and participate in activities, such as dialogues to raise awareness and networking events, related to nuclear disarmament and non-proliferation	Youth leaders participate in webinars, training sessions and site visits related to nuclear disarmament and non-proliferation for the second phase of the Youth Leader Fund for a World without Nuclear Weapons programme

Result 3: increased awareness of disarmament and non-proliferation issues

Proposed programme plan for 2026

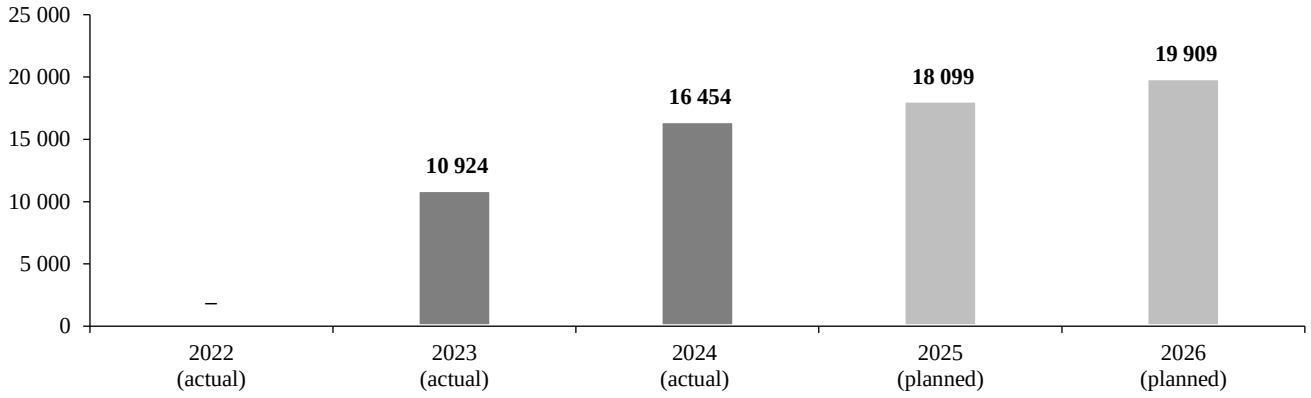
4.63 The subprogramme strives to enhance awareness and knowledge of and information on disarmament and non-proliferation issues among Member States, academia, civil society and the general public, in particular youth, through the increased production and dissemination of electronic publications, social media posts and other information materials.

Lessons learned and planned change

4.64 The lesson for the subprogramme was that traditional publications and dissemination methods were not effectively reaching younger demographics, as evidenced by stakeholder feedback collected during the 2023–2024 biennium. In applying the lesson, the subprogramme will strengthen its digital outreach strategy in social media through multilingual content and the development of accessible resources to enhance public understanding of disarmament issues, while continuing to engage with academic institutions and civil society organizations to support Member States' efforts in respect of disarmament processes.

4.65 Expected progress towards the objective is presented in the performance measure below (see figure 4.V).

Figure 4.V
Performance measure: average number of unique accounts reached per month on Instagram (annual)



Note: Data for 2022 were unavailable.

Deliverables

4.66 Table 4.16 lists all deliverables of the subprogramme.

Seminars, workshops and training events (number of days)	**1**	**1**	**1**	**1**
7. Training of teachers on disarmament and non-proliferation	1	1	1	1
Publications (number of publications)	**8**	**8**	**8**	**8**
8. On disarmament, including the *United Nations Disarmament Yearbook*, Occasional Papers and other serialized and non-serialized publications	8	8	8	8
C. Substantive deliverables				
Databases and substantive digital materials: database on the status of disarmament and arms regulation agreements, disarmament reference library and e-documents library.				
D. Communication deliverables				
Outreach programmes, special events and information materials: pamphlets, brochures, publicity kits, guides, posters, disarmament fact sheets; disarmament activities of the Messenger of Peace, including public service announcements; symposiums, workshops, youth contests and panel discussions on disarmament issues; briefings for visitors and outside groups on disarmament; disarmament and non-proliferation education materials; audiovisual resources, including videos, events and exhibits promoting disarmament and non-proliferation.				
External and media relations: opinion pieces placed in journals.				
Digital platforms and multimedia content: websites on disarmament education and Securing Our Common Future: An Agenda for Disarmament; Youth for Disarmament web platform, the Office's Meetings Place website and the *United Nations Disarmament Yearbook* website.				

Subprogramme 5
Regional disarmament

Objective

4.67 The objective, to which this subprogramme contributes, is to advance regional disarmament, non-proliferation and arms control efforts and initiatives, and the effective implementation of global and regional disarmament, non-proliferation and arms control treaties and other instruments, and strengthen partnerships with regional organizations.

Strategy

4.68 To contribute to the objective, the subprogramme will:

(a) Provide technical and legal training, conduct capacity-building activities and support the implementation by Member States of relevant treaties, international standards and guidelines, including the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects, the Arms Trade Treaty, the Biological Weapons Convention, Security Council resolutions 1325 (2000), 1540 (2004), 1673 (2006), 1810 (2008), 1977 (2011), 2055 (2012), 2325 (2016), 2370 (2017), 2572 (2021), 2622 (2022) and 2663 (2022) and General Assembly resolutions 79/57, 79/65, 79/66 and 79/67;

(b) Cooperate with relevant regional, subregional, civil society and other organizations, such as the African Union, the Caribbean Community (CARICOM), the Economic Community of West

African States, the Organization of American States, the Association of Southeast Asian Nations, the Organization for Security and Cooperation in Europe and the Pacific Islands Forum, in the field of disarmament, non-proliferation and arms control, building on existing synergies and avoiding duplication with efforts already undertaken by such organizations.

4.69 The above-mentioned work is expected to result in:

(a) Increased adherence to the disarmament instruments and strengthened small arms, light weapons and ammunition control, thereby curbing illicit trade and the circulation of small arms and light weapons to strengthen regional peace and security;

(b) Confidence-building measures among Member States;

(c) Closer partnerships with regional and subregional organizations.

Programme performance in 2024

Member States develop a road map for Central America and the Dominican Republic on preventing and combating illicit trafficking and the proliferation of firearms, ammunition and explosives

4.70 The trafficking of illicit small arms and light weapons and ammunition contributes to all forms of armed violence, while enabling and multiplying violence and crime. The subprogramme, in collaboration with the Organization of American States and the Central American Integration System, provided technical support to seven Member States in the Central American region to develop a road map on preventing the illicit trafficking and proliferation of arms and ammunition, which was adopted on 12 February 2025. The road map is focused on strengthening norms and institutional coordination; preventing armed violence and the misuse of firearms; managing the life cycle of weapons, ammunition and accessories; and investigating and criminally prosecuting illicit trafficking, possession and use of arms and ammunition. With sustained support from the international community, the road map will provide effective, sustainable and comprehensive mechanisms for enhancing arms control and ammunition management by bringing together States, promoting information-sharing and mobilizing resources to address urgent challenges.

4.71 Progress towards the objective is presented in the performance measure below (see table 4.17).

Table 4.17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Member States developed a road map for Central America and the Dominican Republic on preventing the trafficking of firearms, ammunition and explosives, along with an accompanying monitoring and evaluation framework

Planned results for 2026

Result 1: disarmament and non-proliferation education and training for all

Programme performance in 2024 and target for 2026

4.72 The subprogramme's work contributed to greater regional spread of educational opportunities and increased access to tailored learning content for students, teachers and civil society, which met the planned target.

4.73 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.18).

Table 4.18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The General Assembly adopted resolution 77/51, proclaiming 5 March as the International Day for Disarmament and Non-Proliferation Awareness A common framework for education in disarmament and non-proliferation was made available to Member States, regional organizations and other stakeholders to strengthen coherence and coordination of educational initiatives	Greater engagement of educational and training partners in developing disarmament education programmes and non-formal education opportunities	Greater regional spread of educational opportunities through an incremental expansion of partnerships with academia and training partners Increased access to tailored learning content for students, teachers and civil society through the delivery of tailored and contextualized education by educational partners and educators	Educators and educational partners, including academia, civil society and regional organizations, implement or contribute to educational initiatives in disarmament and non-proliferation in partnership with the subprogramme and use its educational materials, knowledge and skills development programmes Educational tools and available content for educators and partners are expanded and diversified to maximize reach of knowledge and skills development in disarmament and non-proliferation	Educators and partners have greater access and understanding of disarmament topics through the online learning platforms of the Office for Disarmament Affairs, and use them for related disarmament initiatives

Result 2: regional, subregional and national-level sensitization and support to the implementation of the Global Framework for Through-life Conventional Ammunition Management

Programme performance in 2024 and target for 2026

4.74 The subprogramme's work contributed to regional, subregional and national actors, including representatives of ministries of defence and interior, national militaries, law enforcement and investigative bodies, regional organizations and civil society, engaging in awareness-raising activities to promote the Global Framework for Through-life Conventional Ammunition Management, which met the planned target.

4.75 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 4.19).

Table 4.19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Adoption of the Global Framework for Through-life Conventional Ammunition Management by the General Assembly in resolution 78/47	Regional, subregional and national actors participated in activities to raise awareness of the Global Framework for Through-life Conventional Ammunition Management	States participate in the preparatory meeting of States and explore possible options for the development of the process and modalities for the effective implementation of the Global Framework at the regional, subregional and national levels	Increased information-sharing by States on ammunition management

Result 3: increased integration of disarmament into national development frameworks

Proposed programme plan for 2026

4.76 In its resolution 79/43, the General Assembly stressed the central role of the United Nations in the relationship between disarmament and development and encouraged the international community to make greater efforts to integrate disarmament, humanitarian and development activities.

Lessons learned and planned change

4.77 The lesson for the subprogramme is that promoting the integration of arms control and violence reduction into national development frameworks and into accompanying analytical, planning, political and programming support provided by the Organization will help to address both the supply of and demand for small arms and light weapons in a more holistic manner. In applying the lesson, the subprogramme will work more closely with resident coordinator offices and United Nations country teams across all regions to promote multisectoral approaches to increase arms control and reduce armed violence.

4.78 Expected progress towards the objective is presented in the performance measure below (see table 4.20).

Table 4.20
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	–	Member States in at least one region develop national strategies informed by an analysis of arms control and violence reduction	Member States in one additional region develop national strategies informed by an analysis of arms control and violence reduction

Deliverables

4.79 Table 4.21 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: substantive, technical and legal advice as well as training on the effective implementation of relevant instruments in accordance with Security Council and General Assembly mandates upon request by Member States, regional and subregional organizations and civil society organizations in Africa, Asia and the Pacific, and Latin America and the Caribbean.				
D. Communication deliverables				
Outreach programmes, special events and information materials: fact sheets on the work of the regional centres and liaison office in Vienna; outreach events for young people, women and other stakeholders; websites and e-learning platforms such as the Disarmament Education Dashboard.				
Digital platforms and multimedia content: website and social media accounts.				

B. Proposed post and non-post resource requirements for 2026

Overview

4.80 Pursuant to paragraph 20 of General Assembly resolution 77/262, the Office for Disarmament Affairs carried out a spending review as part of its proposed programme budget for 2026. Under the strategic guidance of the High Representative for Disarmament Affairs and with the engagement of all programme managers, a review was carried out for each component of the Office against the backdrop of a growing global need for disarmament, the rapid pace of scientific and technological advances in this field, the proliferation of conventional arms and rising military expenditure, and the critical need to fulfil long-standing commitments to nuclear disarmament amid increasing nuclear risks. The review also built on previous efforts undertaken by the Office aimed at achieving operational efficiency, including the changes presented and subsequently approved in the proposed programme budget for 2022 (A/76/6 (Sect. 4)), which resulted in the downward classification of two senior-level posts (1 D-2 to D-1 and 1 P-5 to P-4) and the upward reclassification of one P-2 post to P-3.[1]

4.81 The review included an in-depth analysis of the 73 posts and functional profiles in each office and location, and a comprehensive analysis of historical trends in non-post resource spending and distribution over the past five years, with a view to identifying efficiencies and resource realignments to support an optimal implementation of the Office's mandate and to achieving results, as set forth in the proposed programme plan for 2026. The review pointed to several opportunities for better and more efficient utilization of financial and human resources.

4.82 With regard to post resources, in response to the Advisory Committee's recommendation in paragraph II.75 of its first report on the 2025 proposed programme budget (A/79/7), endorsed by the General Assembly in its resolution 79/257, the Office conducted a systematic workload analysis of existing staffing capacities on the basis of workload indicators that are linked to its mandates, including a review of the structure and locations, to determine if there were opportunities for further optimization of post resources. The review also involved an analysis of skill sets aligned with United Nations 2.0 to ensure that the Office is well placed to deliver on its mandates in the future.

4.83 The spending review identified opportunities for alignment, consolidation and more efficient utilization of financial and human resources in the implementation of the Office's two global fellowship training programmes. The approved staffing structure to support the two programmes includes eight posts (1 P-4, 1 P-3, 1 General Service (Principal Level) and 5 National Professional Officer). Instead of having two separate teams, the fellowship programme would be supported by a unified team of six staff (1 P-4, 1 P-3, 1 General Service (Principal Level) and 3 National Professional Officer), resulting in the proposed abolishment of two posts (2 National Professional Officer) in the regional centres and a commensurate decrease of $152,800 under posts. In respect of non-post resources, the synergies created through the consolidation of the fellowship training programmes, including by finding lower costs for the delivery of training services and travel of fellows, would result in a total reduction of $308,600 ($37,800 under contractual services, $258,000 under grants and contributions and $12,800 under non-post costs associated with the abolished posts, comprising $4,600 under contractual services, $4,800 under general operating costs, $400 under supplies and materials, and $3,000 under furniture and equipment).

4.84 The total reduction of $461,400 would be repurposed to cover the proposed establishment of two new posts to support the Office's increased focus on the Secretary-General's Mechanism for the Investigation of Alleged Use of Chemical and Biological Weapons, for which one post of Political

[1] This resulted in the downward reclassification of the post of Director (D-2) of the Geneva Branch to Chief of Service (D-1) in order to align the management structure in Geneva with that of other subprogrammes of the Office, and the downward reclassification of one post of Senior Political Affairs Officer (P-5) to Political Affairs Officer (P-4). One post of Associate Information Technology Officer (P-2) was also reclassified as Information Systems Officer (P-3), responding to a need for stronger capacity to modernize information systems to meet the standard of service needed by Member States and the intergovernmental bodies supported by the Office.

Affairs Officer (P-3) is proposed within the Weapons of Mass Destruction Branch. The function would ensure that the Mechanism can sustainably maintain a roster of experts to carry out prompt investigations in response to allegations of the possible use of chemical and bacteriological (biological) and toxin weapons. In addition, one post of Associate Political Affairs Officer (P-2) is proposed for establishment in the Science, Technology and International Security Unit to enable the Office to address the growing number of requirements in the area of emerging technologies in the context of international security, and to provide efficient, timely and high-quality services in relation to this subject matter to Member States. Further details on the justification of both posts are provided in annex II.

4.85 The Office has also identified opportunities to mainstream United Nations 2.0 principles in its work to enhance efficiency and effectiveness to better support to Member States. Specifically, the Office would establish a common online platform for Member States to submit the national reports required under the instruments and conventions that the Office supports. The portal would increase efficiency and improve the accessibility, usability, transparency and integration of Member State data, as it would consolidate the existing databases the Office currently maintains, such as MilEX (military expenditure) and the Register of Conventional Arms. The portal is expected to eventually reduce the Office's reliance on consultancies for basic database maintenance and data entry, through consolidation and the automation of data processing tasks once the portal is fully developed and operational, which is anticipated to take two years. The cost for the development of the portal would amount to $102,000.

4.86 The review also indicated that there could be efficiencies gained from co-locating the Office's regional centre with larger regional presences. This would require further consideration, however, and is accordingly not being presented at this juncture. The review also showed that the resource requirements for consultants and experts are mainly for specific General Assembly mandates, the costs of which are predetermined, thus limiting the possibility of seeking further efficiencies.

4.87 With regard to other staff costs, the review highlighted the need to reflect existing operations with respect to the management of resources for other staff costs. The Executive Office currently has three staff (1 P-5 and 2 General Service (Principal Level)) and three general temporary assistance positions (two Administrative Assistant and one Finance and Budget Assistant (3 General Service (Other Level)). The costs of the three general temporary assistance positions are cost-shared among the subprogramme budgets for other staff costs. To streamline the process, the cost-neutral redeployment of resources from subprogrammes 1 through 5 to the Executive Office under the programme support component is proposed.

4.88 With regard to Office's travel budget, the review highlighted the growing demand for outreach and advocacy by senior management, in particular to countries of the global South. To ensure that travel and meetings in the same region are coordinated to maximize efficiencies and reduce costs, including through the prioritization of using hybrid and virtual engagement where feasible, and after taking into account the recent pattern of overexpenditure against the budget, which was distributed across five subprogrammes, it is proposed to consolidate travel resources under executive direction and management. The cost-neutral redeployment of resources from the respective subprogrammes to executive direction and management would allow for more coherent and optimized utilization of resources, while ensuring effective control of expenditure, which has in recent years exceeded the approved budget.

4.89 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 4.22 to 4.24.

4.90 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 4.25 to 4.27 and figure 4.VI.

4.91 As shown in tables 4.25 (1) and 4.26 (1), the overall resources proposed for 2026 amount to $20,389,100, reflecting a net increase of $1,261,400 (or 6.6 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

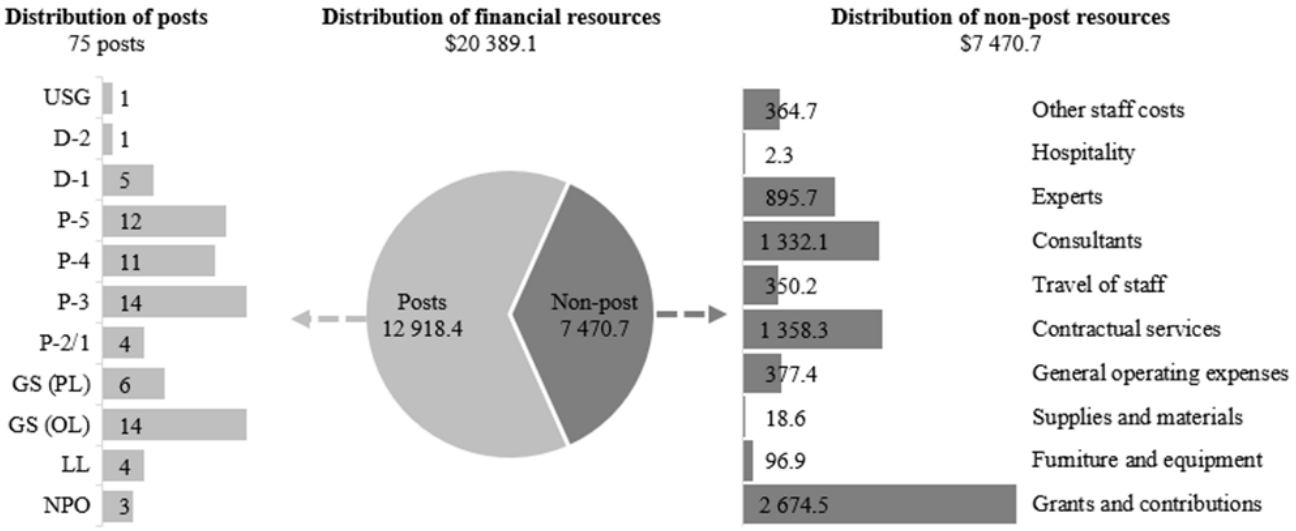
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

4.92 As shown in table 4.25 (1), resource changes reflect a net increase of $32,000, as follows:

(a) **Subprogramme 3, Conventional arms**. The net decrease of $18,800 is comprised of:

(i) A decrease of $233,600 related to the removal of non-recurrent provisions for consultants, experts and travel associated with the Group of Governmental Experts on the United Nations Register of Conventional Arms regarding transparency in armaments pursuant to General Assembly resolution 77/69 ($134,000); the removal of non-recurrent provisions related to revised estimates resulting from Assembly resolution 79/1, entitled “The Pact for the Future” (A/79/583) ($93,300); and the removal of non-recurrent provisions for furniture and equipment related to the new posts created in 2025 ($6,300);

(ii) An increase of $214,800 related to the higher provision at continuing vacancy rates for three posts – 1 Political Affairs Officer (P-4), 1 Programme Management Officer (P-3) and 1 Senior Programme Management Assistant (General Service (Principal Level)) – established in 2025 pursuant to Assembly resolution 78/47 on through-life conventional ammunition management, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

(b) **Subprogramme 5, Regional disarmament**. The increase of $50,800 relates to the higher provision at continuing vacancy rates for two posts of Programme Management Officer (National Professional Officer, level C) established in 2025 pursuant to Assembly resolution 78/47, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts.

New and expanded mandates

4.93 As shown in table 4.25 (1), resource changes reflect an increase of $1,406,300, as follows:

(a) **Executive direction and management**. The increase of $100,800 under travel of staff is comprised of $35,900 to support nationally owned assessments and scoping missions, upon request by States pursuant to General Assembly resolution 79/40 on the illicit trade in small arms and light weapons in all its aspects; and $64,900 to support the four-week in-person training programmes in the four regions starting in 2026 pursuant to Assembly resolution 78/47;

(b) **Subprogramme 2, Weapons of mass destruction**. The increase of $179,700 is comprised of (i) $111,500 for experts to cover travel of up to 25 experts, including the Chair, to participate in two meetings in New York, as well as for travel of the Chair to attend the presentation of the comprehensive study of the question of nuclear-weapon-free zones in all its aspects to the Assembly at its eighty-first session; (ii) $54,200 for consultants to provide substantive support to the Chair and the expert group during the meetings in New York and provide assistance in drafting the comprehensive study from the start of the process to the transmission of the study to the Assembly at its eighty-first session; and (iii) $14,000 for general temporary assistance to support the meetings pursuant to Assembly resolution 79/241 on a comprehensive study of the question of nuclear-weapon-free zones in all its aspects.

(c) **Subprogramme 3, Conventional arms**. The increase of $1,125,800 is comprised of:

(i) An increase of $167,600 under posts to cover the proposed establishment of two posts in New York (1 Political Affairs Officer (P-3) and 1 Administrative Assistant (General Service (Other Level)) pursuant to Assembly resolution 79/40 (see annex II);

(ii) An increase of $958,200 under non-posts as follows:

a. An amount of $53,700 to provide for travel of experts to undertake two technical assessment missions per year to support nationally owned assessments and scoping missions upon request by States pursuant to Assembly resolution 79/40;

b. An amount of $226,900 under contractual services to develop a structured procedure to process offers and requests for assistance submitted under the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Tracing Instrument to facilitate matching needs and resources pursuant to Assembly resolution 79/40; and for organizing in-person training programmes in four regions pursuant to resolution 78/47;

c. An amount of $9,900 to provide mainly for non-post requirements to support the two new posts proposed for establishment, including $2,800 under contractual services, $2,100 under general operating expenses, $400 for stationery and office supplies, and $4,600 under furniture and equipment;

d. An amount of $667,700 under grants and contributions to cover the costs of travel of 15 fellows per region (four regions) to participate in the four-week in-person training programmes in the four regions in connection with Assembly resolution 78/47.

Other changes

4.94 As shown in table 4.25 (1), resource changes reflect a net decrease of $176,900, as follows:

(a) **Policymaking organs**. The decrease of $9,200 under travel of staff relates to the redeployment of resources to executive direction and management as explained in paragraph 4.94 (b) (iii) below;

(b) **Executive direction and management**. The net increase of $256,500 comprises:

(i) An increase of $90,900 under posts relating to the proposed establishment of one post of Associate Political Affairs Officer (P-2), as explained in paragraph 4.84 (see annex II);

(ii) A decrease of $14,600 under other staff costs, as explained in paragraph 4.87;

(iii) An increase of $175,400 under travel of staff relating to the redeployment of resources for travel of staff from policymaking organs and subprogrammes 1 through 5 to executive direction and management, as explained in paragraph 4.88;

(iv) An increase of $4,800 relating to the non-post costs associated with the proposed establishment of one post, including $1,400 under contractual services, $900 under general operating costs, $200 under supplies and materials, and $2,300 under furniture and equipment;

(c) **Subprogramme 1, Multilateral negotiations and deliberations on disarmament and arms limitation**. The decrease of $76,000 is comprised of:

(i) A decrease of $39,300 under other staff costs, as explained in paragraph 4.87;

(ii) A decrease of $36,700 under travel of staff, as explained in paragraph 4.88;

(d) **Subprogramme 2, Weapons of mass destruction**. The net increase of $50,700 is comprised of:

(i) An increase of $108,800 under posts relating to the proposed establishment of one post of Political Affairs Officer (P-3), as explained in paragraph 4.84 (see annex II);

(ii) A decrease of $57,000 under other staff costs, as explained in paragraph 4.87;

(iii) A decrease of $5,900 under travel of staff, as explained in paragraph 4.88;

(iv) An increase of $4,800 relating to the non-post costs associated with the proposed post, including $1,400 under contractual services, $900 under general operating costs, $200 under supplies and materials and $2,300 under furniture and equipment;

(e) **Subprogramme 3, Conventional arms**. The decrease of $437,000 is comprised of:

(i) A decrease of $50,100 under other staff costs, as explained in paragraph 4.87;

(ii) A decrease of $91,100 under travel of staff, as explained in paragraph 4.88;

(iii) A decrease of $37,800 under contractual services, as explained in paragraph 4.83;

(iv) A decrease of $258,000 under grants and contributions, as explained in paragraph 4.83.

(f) **Subprogramme 4, Information and outreach**. The increase of $76,800 is comprised of:

(i) A decrease of $17,400 under other staff costs, as explained in paragraph 4.87;

(ii) A decrease of $7,800 under travel of staff, as explained in paragraph 4.88;

(iii) An increase of $102,000 under contractual services, as explained in paragraph 4.85;

(g) **Subprogramme 5, Regional disarmament**. The decrease of $207,200 is comprised of:

(i) A decrease of $152,800 under posts related to the proposed abolishment of two posts of National Professional Officer (one in Kathmandu and one in Lima), as explained in paragraph 4.83 (see annex II);

(ii) A decrease of $16,900 under other staff costs, as explained in paragraph 4.87;

(iii) A decrease of $24,700 under travel of staff, as explained in paragraph 4.88;

(iv) A decrease of $12,800 relating to the non-post costs associated with the proposed abolishment of two posts of National Professional Officer, including $4,600 under contractual services, $4,800 under general operating costs, $400 under supplies and materials and $3,000 under furniture and equipment;

(h) **Programme support**. The net increase of $168,500 is comprised of:

(i) An increase of $195,300 under other staff costs, as explained in paragraph 4.87. The costs would cover three general temporary assistance positions, comprising one Finance and Budget Assistant (General Service (Other Level)) to support various finance and budget functions and two Administrative Assistants (General Service (Other Level)) to support various administrative functions, including human resources, procurement and travel. The increase would be offset in full by a corresponding decrease in other staff costs under other components and subprogrammes as explained in paragraphs 4.94 (b) (ii), (c) (i), (d) (ii), (e) (i), (f) (i) and (g) (ii);

(ii) A decrease of $26,800 under contractual services relating to the adjustment of standard information and communications technology rates for Headquarters personnel, and non-field personnel outside of Headquarters.

Extrabudgetary resources

4.95 As reflected in tables 4.25 (2) and 4.26 (2), extrabudgetary resources amount to $19,995,000. The resources would complement regular budget resources and be used mainly to provide for 51 posts (2 P-5, 6 P-4, 19 P-3, 2 P-2 and 22 General Service (Other Level)). The resources would be used mainly to perform the following functions: (a) conduct research and analysis on topics such as conventional arms ammunition management and its global trends, biological and toxin weapons threats, new developments in weapon technologies, and women, youth and disarmament issues; (b) support meetings and conventions, raise awareness and build technical and substantive capacity at the national and regional levels; and (c) strengthen partnerships and participation aimed at contributing to the advancement of international agreements on disarmament best practices. Anticipated in-kind contributions would provide for rent-free premises with an estimated value of $86,800.

4.96 The extrabudgetary resources under the present section are subject to the oversight of the Office for Disarmament Affairs, in accordance with the delegation of authority by the Secretary-General. The extrabudgetary resources under the present section for the United Nations Institute for Disarmament Research (UNIDIR) are subject to the oversight of the Advisory Board on Disarmament Matters.

Policymaking organs

4.97 The resources proposed under this component would provide for the policymaking organs as shown in table 4.28.

Table 4.28
Policymaking organs
(Thousands of United States dollars)

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
Conference on Disarmament	Mandate: General Assembly resolution S-10/2, para. 120 The Conference on Disarmament is the single multilateral disarmament negotiating forum of the international community. As requested by the Assembly in its resolution 34/83 L, the Secretary-General provides staff, as well as the assistance and services needed by the Conference and any subsidiary bodies that it might establish, in accordance with the arrangements set out in its rules of procedure. The secretariat of the Conference consists of officers of the secretariat and the Geneva Branch of the Office for Disarmament Affairs Membership: 65 government officials, including representatives of 5 nuclear weapon States and other key militarily significant States Number of sessions in 2026: 1 session of 24 weeks conducted in 3 parts	9.2	–
Total		**9.2**	**–**

4.98 There are no regular budget resources proposed for 2026, reflecting a decrease of $9,200 compared with the approved budget for 2025. The proposed change is explained in paragraph 4.94 (a). Additional details on the distribution of the proposed resources for 2026 are reflected in table 4.29.

Executive direction and management

4.99 The executive direction and management component comprises the immediate Office of the High Representative for Disarmament Affairs, the Office of the Director and Deputy to the High Representative, the Science, Technology and International Security Unit and the Policy Coordination and Change Management Unit. The High Representative is assisted by a director who serves as Deputy. The component is responsible for the overall direction, supervision and management of the Office for Disarmament Affairs in the implementation of its mandates and its approved programme of work and advises and supports the Secretary-General on all disarmament, non-proliferation, arms control and related security matters and, in that respect, represents the Secretary-General, as required. The component is also responsible for providing authoritative analysis and assessment of developments for policy guidance and decision-making purposes and acts as focal point on these matters between the Secretariat and Member States.

4.100 The Office of the Director is responsible for supporting the High Representative; preparing and monitoring the implementation of the programme of work of the Office for Disarmament Affairs and the effective delivery of the programmatic mandates of the Office; preparing reports and notes on political and managerial issues; providing strategic guidance on programme implementation; and providing advice to the High Representative on all substantive, organizational, administrative, personnel and budgetary matters, including the overall coordination in the preparation and revision of the inputs of the Office to the annual programme plan and the programme budget.

4.101 The Science, Technology and International Security Unit provides advice to the Office of the High Representative, the Office of the Director and subprogrammes on scientific and technological issues in the context of international security, other strategic issues, including autonomous weapons, outer space, and information and telecommunications technology issues, and normative and analytical research activities, in support of the priorities of the Secretary-General related to disarmament. The Unit is responsible for the preparation of political analyses and substantive background notes on a broad range of initiatives and topics within its area of expertise.

4.102 The Policy Coordination and Change Management Unit provides direct support to the High Representative and the Office for Disarmament Affairs on cross-cutting policy issues, and internal coordination and change management, including coordination of the mainstreaming and inclusion of gender perspectives in the programmatic work of the Office and oversight of gender parity within the Office.

4.103 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office for Disarmament Affairs will continue to reduce its carbon footprint by significantly reducing the usage of photocopy paper and the printing of documentation by encouraging staff to work increasingly with only electronic versions of various documents, including mission reports, assessment notes, inter-office memorandums, submissions by Member States, background materials and talking points. Additional efforts will be made to reduce travel and instead optimize participation in meetings through videoconferencing.

4.104 Information on the timely submission of documentation and advance booking for air travel is reflected in table 4.30. The non-compliance rate in 2024 is due mainly to the late confirmation of meetings. Travel ticket purchases will continue to be monitored closely by the Office, and reports will be shared with all branch chiefs and the High Representative for intervention, as required.

Table 4.30

4.105 The proposed regular budget resources for 2026 amount to $3,235,100 and reflect an increase of $357,300 compared with the approved budget for 2025. The proposed change is explained in paragraphs 4.93 (a) and 4.94 (b). Additional details on the distribution of the proposed resources for 2026 are reflected in table 4.31 and figure 4.VII.

Programme of work

Subprogramme 1
Multilateral negotiations and deliberations on disarmament and arms limitation

4.106 The proposed regular budget resources for 2026 amount to $3,566,200 and reflect a decrease of $76,000 compared with the approved budget for 2025. The proposed change is explained in paragraph 4.94 (c). Additional details on the distribution of the proposed resources for 2026 are reflected in table 4.32 and figure 4.VIII.

4.107 Pursuant to General Assembly resolution 75/253 A, the amount of $3,566,200 includes a provision for a subvention in the amount of $786,500 to UNIDIR for 2026, reflecting no change compared with the appropriation for 2025. The amount is reflected under grants and contributions and includes a provision of: (a) $696,000 towards the costs of two posts (1 D-2 and 1 P-5) and general temporary assistance to help organize quarterly briefings for all regional groupings on research and ideas of relevant disarmament topics to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community; and (b) $90,500 to support the conduct of three events in countries that are not members of the Organisation for Economic Co-operation and Development to promote disarmament and non-proliferation knowledge, ideas and dialogue to a broader and more diverse community.

Subprogramme 2
Weapons of mass destruction

4.108 The proposed regular budget resources for 2026 amount to $2,257,100 and reflect a net increase of $230,400 compared with the approved budget for 2025. The proposed change is explained in paragraphs 4.93 (b) and 4.94 (d). Additional details on the distribution of the proposed resources for 2026 are reflected in table 4.33 and figure 4.IX.

Programme support

4.112 The Executive Office provides central administrative services related to human resources and financial and general administration, including resource planning and the use of common services, together with administrative support for policymaking organs and meetings, as required.

4.113 The proposed regular budget resources for 2026 amount to $924,700 and reflect an increase of $168,500 compared with the approved budget for 2025. The proposed change is explained in paragraph 4.94 (h). Additional details on the distribution of the proposed resources for 2026 are reflected in table 4.37 and figure 4.XIII.

[a] New posts.

Annex II

Summary of proposed post changes, by component and subprogramme

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Science, Technology and International Security Unit (under executive direction and management)	1	P-2	**Establishment** of Associate Political Affairs Officer (New York)	The proposed establishment reflects the outcome of the spending review as explained in paragraph 4.84. The post would enable the Office to address the growing number of requirements in the area of emerging technologies in the context of international security and to provide efficient, timely and high-quality delivery of services to Member States at a critical juncture. The incumbent would ensure adequate servicing of the open-ended working group on security of and in the use of information and communications technologies and the provision of support to the First Committee and Disarmament Commission, as well as the preparation of technical reports for the Secretary-General. The incumbent would also support the functions of the Science, Technology and International Security Unit, which include coordinating with other United Nations entities, representing the Office for Disarmament Affairs in working groups such as the Inter-Agency Working Group on Artificial Intelligence, the Global Digital Compact core group, the working group on digital technologies and the Pact for the Future steering committee. In addition, the Science, Technology and International Security Unit provides advice on the rapidly evolving technological issues in international security, autonomous weapons and information and communications technology, while providing political analysis and background notes on related initiatives, all of which have increased in scope, salience and urgency in recent times. The Unit is comprised of five staff and it was determined during the spending review that the functions of the new post cannot be absorbed by existing staff.
Subprogramme 2 Weapons of mass destruction	1	P-3	**Establishment** of Political Affairs Officer (New York)	The proposed establishment reflects the outcome of the spending review as explained in paragraph 4.84. The post will support the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons, as established by General Assembly resolution 42/37 C and reaffirmed by Security Council in its resolution 620 (1988). The post will ensure that the Mechanism can conduct regular training around the world and sustainably maintain a roster of experts to carry out prompt investigations in response to allegations of the possible use of chemical and bacteriological (biological) and toxin weapons, the threat of which has increased with the advent of new and emerging technology and advances in synthetic biology and artificial intelligence. The Weapons and Mass Destruction Branch is comprised of six staff and it was determined during the spending review that the functions of the new post cannot be absorbed by existing staff.
Subprogramme 3 Conventional arms	1	P-3	**Establishment** of Political Affairs Officer (New York)	To implement the mandate provided in paragraph 17 of General Assembly resolution 79/40, the incumbent would manage the establishment and maintenance of a structured procedure within the Secretariat, starting in 2026, to process offers of and requests for assistance under the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Tracing Instrument. The incumbent would coordinate the structured procedure, facilitate the identification and matching of assistance needs with resources and oversee the monitoring process. These matchmaking efforts would require scoping and assessment missions, data analysis and management, and monitoring and reporting, which the Political Affairs Officer and the Administrative Assistant would provide.

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				In addition, the post would be responsible for, inter alia, maintaining an up-to-date information-sharing platform related to implementation of the Programme of Action and the International Tracing Instrument, including the collection and sharing of good practices; liaising with bilateral and multilateral assistance providers; supporting requesting States in refining requests; supporting voluntary national assessments and scoping missions; and providing technical assistance and support for the development of project proposals. The structured procedure is a new mechanism to be established in the Office for Disarmament Affairs and cannot be undertaken within existing resources, as determined during the spending review.
Subprogramme 3 Conventional arms	1	GS (OL)	**Establishment** of Administrative Assistant (New York)	To implement the mandate provided in paragraph 17 of General Assembly resolution 79/40, the incumbent would support the Political Affairs Officer (P-3) with the establishment and maintenance of a structured procedure within the Secretariat, starting in 2026, to process offers of and requests for assistance under the Programme of Action and the International Tracing Instrument. The incumbent would manage the administrative and financial aspects of the structured procedure, including by monitoring budgets, taking the lead on logistical tasks and handling travel and contractual services. Requests will be received on a rolling basis, often through national reports under the Programme of Action, and must be responded to with a speed in line with the urgency of the requesting State. The structured procedure is a new mechanism to be established in the Office and cannot be undertaken within existing resources, as determined during the spending review.
Subprogramme 5	2	NOC	**Abolishment** of Programme Management Officer	The proposed abolishment reflects the outcome of the spending review, as explained in paragraph 4.83. The approved staffing structure of the two fellowship training programmes will be reconfigured under a unified team of six staff (1 P-4, 1 P-3, 3 NPO and 1 GS (PL)), resulting in the proposed abolishment of two posts (2 NOC) in the regional centres (Kathmandu and Lima).

Abbreviation: GS (OL), General Service (Other level); NOC, National Professional Officer, level C.

I. Department of Peace Operations

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

5.I.1 The Department of Peace Operations is responsible for supporting the maintenance of international peace and security by providing political and executive direction to peace operations within its purview in accordance with and by the authority derived from the principles and purposes of the Charter of the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including the Pact for the Future (resolution 79/1) and resolution 72/262 C, the annual comprehensive reviews of the entire question of peacekeeping operations in all their aspects and the annual consideration of cross-cutting issues related to peacekeeping operations. The objectives of the programme are also conceived by taking into account Security Council mandates. The Department provides integrated strategic, political, operational and management advice, direction and support on military, police, mine action and other relevant issues to all operations under its responsibility in order to ensure the effective implementation of their mandates. Through its efforts to improve peacekeeping, enhance its performance and adapt to contemporary risks and challenges, the Department will continue to help conflict-affected countries on their path back to sustainable peace. The work of the Department is critical to continuously ensuring the relevance and effectiveness of United Nations peacekeeping, which remains a vital instrument for international peace and security

Strategy and external factors for 2026

5.I.2 The strategy of the Department continues to be guided by all relevant Security Council mandates. The Department will continue to prioritize the full implementation of the peace and security reform objectives. The Action for Peacekeeping initiative and its implementation strategy will continue to guide the programme, in line with the commitments set out in the Declaration of Shared Commitments on United Nations Peacekeeping Operations, taking into account the views expressed by Member States. The Department will work to implement all actions in the Pact for the Future that are relevant to peacekeeping operations. The areas of focus continue to be:

(a) To enhance political strategies and advance lasting political solutions, including by developing country and regional strategies, through the integrated approach of the peace and security pillar, to develop proposals for the consideration of the Security Council on the sequencing and prioritization of mandates and to reflect Action for Peacekeeping priorities in reporting;

(b) To implement the women and peace and security agenda across all peacekeeping functions, including through gender-sensitive conflict analysis, the distribution of guidance to ensure women's full, equal and meaningful participation in peace processes and the systematization of reporting on women and peace and security outcomes;

(c) To strengthen the protection provided by peacekeeping operations, including by maintaining the protection of civilians, where mandated, as one of the core objectives of the relevant peacekeeping operations, updating and disseminating the policy and training standards on the protection of civilians in United Nations peacekeeping, integrating strategic approaches to protection into the strategic thinking and action of missions and conducting context-specific training, including predeployment training, on the protection of civilians, on the protection of children and on preventing and responding to conflict-related sexual violence;

(d) To support effective performance and accountability of all mission components through the ongoing implementation of the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework, to evaluate missions and strengthen their impact using data and analysis, as well as through enhanced implementation of the human rights due diligence policy on United Nations support to non-United Nations security forces;

(e) To strengthen the impact of peacekeeping on sustaining peace, including by implementing joint transition and mobilization strategies and coordinating closely with the Department of Political and Peacebuilding Affairs, including the Peacebuilding Support Office, as well as other United Nations entities and external partners;

(f) To improve the safety and security of peacekeepers, including by implementing the related action and training plans aimed at integrating new technologies and security protocols tailored to mission-specific environments, including specialized training on the use of technology to counter emerging threats, such as misinformation and disinformation and improvised explosive devices, which should be implemented with transparency and in consultation with Member States, as appropriate;

(g) To improve peacekeeping partnerships by strengthening United Nations-African Union cooperation on political efforts, including through joint field visits and briefings, as well as through standardized and tailored training, capacity-building and the light coordination mechanism, which will strengthen efforts to identify training requirements and match capacity-building providers with new and emerging troop-contributing countries in need of support;

(h) To strengthen the conduct of peacekeeping operations and personnel and ensure that all types of misconduct are addressed in accordance with the zero-tolerance approach.

5.I.3 With regard to cooperation with other entities at the global, regional, national and local levels, partnerships with peace and security actors, in particular regional organizations, and with humanitarian and development actors, including international financial institutions, will remain essential to strengthening the overall impact of international efforts in peacekeeping contexts. The Department will maintain its strategic and operational partnerships with the African Union and other regional and subregional organizations in Africa, as well as with the European Union. The Department will continue to cooperate closely with other regional organizations, including the League of Arab States, the North Atlantic Treaty Organization, the Collective Security Treaty Organization, the Association of Southeast Asian Nations and the Organization for Security and Cooperation in Europe, on issues related to policy, information-sharing and training, among others.

5.I.4 With regard to inter-agency coordination and liaison, the Department will continue to review and refine the implementation of the reform of the peace and security pillar and ensure coherence, working with the Department of Political and Peacebuilding Affairs with a view to, in particular, strengthening a common organizational culture that fosters inclusion, innovation and professional development. The Department will work closely with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support in assisting peacekeeping operations. The Department will maintain strong coordination with the reformed management and development pillars.

5.I.5 The Department will continue to maintain its strong relations with other United Nations agencies, funds and programmes by chairing or participating in a range of inter-agency groups and processes, including the United Nations-World Bank Working Group, the Inter-Agency Working Group on Disarmament, Demobilization and Reintegration, the Inter-Agency Security Sector Reform Task Force, the Inter-Agency Coordination Group on Mine Action and the Inter-Agency Task Force on Policing. Other cross-agency cooperation will be undertaken through the global focal point arrangement for the rule of law and the Peacebuilding Strategy Group.

5.I.6 With regard to the external factors, the Department considered applicable risks identified in its risk register and, accordingly, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States continue to support the advancement of the Action for Peacekeeping initiative and its implementation strategy;

(b) The Security Council reaches consensus on clear, focused and achievable mandates for peacekeeping operations and Member States support their implementation;

(c) Peacekeeping partners and other entities sustain the common political strategies supported by peacekeeping operations;

(d) Availability of capabilities required for deployment of peacekeeping operations and successful implementation of their mandates.

5.I.7 The Department integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, it implements the women and peace and security agenda through guidance on women's full and meaningful participation in peace and political processes, gender-sensitive analysis and the mainstreaming of a gender perspective into planning, budgeting, implementation and reporting, and through the promotion of the increased representation of women uniformed personnel.

5.I.8 In line with the United Nations Disability Inclusion Strategy, the Department will support Secretariat-wide efforts on disability inclusion, including through the implementation of a joint Department of Political and Peacebuilding Affairs-Department of Peace Operations disability inclusion action plan.

Legislative mandates

5.I.9 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

49/37; 78/291	Comprehensive review of the whole question of peacekeeping operations in all their aspects
58/296	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations
60/180	The Peacebuilding Commission
61/279; 65/290	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations
70/262	Review of the peacebuilding architecture
72/199	Restructuring of the United Nations peace and security pillar
72/262 C	Special subjects relating to the programme budget for the biennium 2018–2019 (sect. III)
76/74; 78/70	Assistance in mine action
76/84 B; 77/128 B	United Nations global communications policies and activities
76/274	Cross-cutting issues
77/64; 79/53	Countering the threat posed by improvised explosive devices
79/1	The Pact for the Future

Security Council resolutions

1325 (2000)	2436 (2018)
1894 (2009)	2447 (2018)
2151 (2014)	2518 (2020)
2185 (2014)	2553 (2020)
2250 (2015)	2589 (2021)
2272 (2016)	2594 (2021)
2282 (2016)	2668 (2022)
2365 (2017)	2686 (2023)
2382 (2017)	2719 (2023)

Deliverables

5.I.10 Table 5.I.1 lists all cross-cutting deliverables of the programme.

Table 5.I.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**12**	**11**	**11**	**11**
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
4. Formal session of the Special Political and Decolonization Committee	1	1	1	1
5. Formal session of the Special Committee on Peacekeeping Operations	1	1	1	1
6. Meetings of the Security Council on cross-cutting strategic, policy and structural issues related to peacekeeping	3	2	2	2
7. Meetings of the General Assembly and its subsidiary organs on the developments in peacekeeping missions and on cross-cutting strategic, policy and structural issues related to peacekeeping	4	4	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: visits to troop- and police-contributing countries and other Member States to develop strategic partnerships and build common approaches to support United Nations peacekeeping; and meetings with or briefings to Member States, regional organizations and groups of friends/contact groups on peacekeeping.				
D. Communication deliverables				
Outreach programmes, special events and information materials: 20 special events, including conferences and exhibits, as well as public briefings and associated promotional materials.				
External and media relations: media events, including interviews and press briefings on thematic and mission-specific topics; and approximately 25 media engagements of senior leadership.				
Digital platforms and multimedia content: approximately 1,500 items of peacekeeping-themed content on 10 digital and social media platforms.				

Evaluation activities

5.I.11 An evaluation on the contribution of strategic communications to fostering public trust in peacekeeping operations, conducted by the Office of Internal Oversight Services and completed in 2024, has guided the proposed programme plan for 2026.

5.I.12 In response to the results of the evaluation referenced above, the Department will continue to assist missions in updating their communications strategies, as needed, to align them with mandate provisions and mission objectives; coordinate on training issues for senior leadership in strategic communications; and continue to strengthen coordination with the Office of Military Affairs, through its strategic communications focal point, to unify civilian and military strategic communications and support the recruitment of experienced Military Strategic Communications Officers for peace operations. Pursuant to Security Council resolution 2436 (2018), the Department will continue to implement the Comprehensive Planning and Performance Assessment System in all United Nations peacekeeping operations as part of the integrated peacekeeping performance and accountability framework. The System remains a key component of that framework, enabling the Department and missions to evaluate overall mission performance using data and analysis to strengthen mandate implementation.

5.I.13 Three evaluations to be conducted by the Department on its programme activities are planned for 2026.

Programme of work

Subprogramme 1
Operations

Objective

5.I.14 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of all Security Council mandates to plan, establish and adjust peace operations within the purview of the Department, as well as the effective implementation of relevant General Assembly resolutions, in order to maintain international peace and security.

Strategy

5.I.15 To contribute to the objective, the subprogramme will:

(a) Improve mission- and context-specific analysis and reporting on peacekeeping to the Security Council, the General Assembly and other intergovernmental bodies and troop- and police-contributing countries;

(b) Ensure that integrated planning processes are completed according to Security Council substantive and time requirements, with an emphasis on supporting transitions between peacekeeping operations and follow-up United Nations presences, where required;

(c) Incorporate regional aspects into country- and mission-specific strategies as part of the emphasis on a regional approach to peace, security and stability further to the reform of the peace and security pillar.

5.I.16 The above-mentioned work is expected to result in:

(a) Better information on peacekeeping operations being available to the General Assembly, the Security Council and other intergovernmental bodies to inform their decision-making;

(b) Better planning for mandate delivery by peacekeeping operations and for transitions;

(c) More coherent and impactful United Nations engagement and support in matters of peace and security provided to countries and the regions in which they are situated.

Programme performance in 2024

Towards improved intercommunal relations in Cyprus

5.I.17 The United Nations Peacekeeping Force in Cyprus (UNFICYP) continued to implement its mandate of managing the situation in the buffer zone, promoting trust-building and intercommunal engagements and fostering people-to-people contacts across the island. With the subprogramme's support, the mission successfully expanded intercommunal peacebuilding efforts and partnerships aimed at broadening civil society engagement, strengthening gender-responsive approaches to intercommunal trust-building and supporting projects addressing common concerns, such as environmental sustainability, business and culture, entrepreneurship, and youth engagement in the peace process. A total of 914 intercommunal events were held between July 2023 and June 2024. In the buffer zone, notwithstanding a challenging environment and incidents of unauthorized activities, the operational focus of UNFICYP continued to be on the prevention and de-escalation of tensions. These efforts contributed to creating conditions conducive to a sustainable peace process in Cyprus.

5.I.18 Progress towards the objective is presented in the performance measure below (see table 5.I.2).

Table 5.I.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Trust-building and cooperation between Greek Cypriot and Turkish Cypriot communities, including through successful facilitation by UNFICYP, for the first time since 2019, of two pilgrimages of Turkish Cypriots and Turkish nationals to the Hala Sultan Tekke mosque, in April and June 2024

Planned results for 2026

Result 1: progress in the peace process in the Central African Republic is maintained, including through continued preparation for local and general elections

Programme performance in 2024 and target for 2026

5.I.19 The subprogramme's work contributed to the commencement of preparations to organize local and general elections, which met the planned target.

5.I.20 The subprogramme's work also contributed to progress in the implementation of the 2019 peace agreement, including through the decentralization of the peace process, with enhanced local capacities to prevent and resolve local conflicts through dialogue, which met the planned target.

5.I.21 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.I.3).

Table 5.I.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Planning and preparations to hold local elections continued; however, local elections were postponed to mid-2023 Dialogue was maintained between Central African authorities and those armed groups that remained committed to the 2019 peace agreement, resulting in the dissolution of four armed groups	Revitalization and decentralization of the peace process through enhanced national ownership Continued planning and preparations for the holding of local elections; however, local elections were postponed until 2024 or 2025 Progress in the operationalization of the Truth, Justice, Reparation and Reconciliation Commission continued	Preparations commenced for the organization of local and general elections Progress made in the implementation of the 2019 peace agreement, including through decentralization of the peace process, with enhanced local capacities to prevent and resolve local conflicts through dialogue	Preparations commence for the organization of general presidential and legislative elections scheduled for 2025 or 2026 Dialogue between the Government and armed groups in the context of the peace process is maintained	The President-elect is sworn in, in line with the constitutional timeline Dialogue between the Government and armed groups in the context of the peace process is sustained

Result 2: progress in the implementation of the 2018 Revitalized Agreement on the Resolution of the Conflict in the Republic of South Sudan

Programme performance in 2024 and target for 2026

5.I.22 The subprogramme's work contributed to the National Elections Commission and other relevant bodies taking action towards preparing for the general elections, including by developing budgets and strategies, conducting state-level visits, establishing state high election committees, adopting rules, recruiting and training staff, and formulating an election operations plan and a voter education strategy, which met the planned target. The general elections, which were initially scheduled for December 2024, were postponed to December 2026.

5.I.23 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.I.4).

Table 5.I.4
Performance measure: progress made in the peace process

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Limited progress in the implementation of the Revitalized Peace Agreement	Legislation on the National Elections Commission, the National Constitutional Review Commission and the Political Parties Council passed into law and members sworn in First and second batches of the Necessary Unified Forces trained and deployed	National Elections Commission and other relevant bodies took action towards preparing for the general elections, including by developing budgets and strategies, conducting state-level visits, establishing state high election committees, adopting rules, recruiting and training staff and formulating an election operations plan and a voter education strategy	The political transition is completed in accordance with the provisions contained in the Revitalized Peace Agreement	Credible, peaceful elections are conducted

Result 3: strengthened peacebuilding in Abyei through the Joint Programme of the Resident Coordinators in the Sudan and South Sudan in Abyei

Proposed programme plan for 2026

5.I.24 The lack of basic services is an aggravating factor in ongoing intercommunal tensions in Abyei. Since the launch of the United Nations Joint Programme in Abyei, the United Nations country teams in the Sudan and South Sudan, and the United Nations Interim Security Force for Abyei (UNISFA), have collaborated to help to address these service gaps and build the conditions necessary for peace. The Security Council welcomed the United Nations Joint Programme in Abyei in its resolution 2609 (2021) and encouraged UNISFA to continue to support that initiative of the Sudan and South Sudan country teams in its resolution 2760 (2024).

Lessons learned and planned change

5.I.25 The lesson for the subprogramme was that the United Nations Joint Programme in Abyei needed to adapt the delivery of assistance owing to the conflict in the Sudan, which affected supply routes,

causing delays in the delivery of critical supplies, in particular in northern Abyei. In applying the lesson, the subprogramme will focus on ensuring continued service delivery using safe supply routes, including through South Sudan, and contributing to building the presence of United Nations country team members in Abyei, with support provided by UNISFA.

5.I.26 Expected progress towards the objective is presented in the performance measure below (see table 5.I.5).

Table 5.I.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
UNISFA and United Nations country teams, in consultation with local and national stakeholders, developed plans for the Programme	More than 5,000 malnourished children received nutrition assistance 120 students, including 40 women, received vocational education	Medical service delivery was strengthened through the delivery of 20 metric tons of medical supplies and the provision of training to health workers	United Nations country team members maintain their current level of engagement in Abyei	The number of direct or indirect beneficiaries increases, while maintaining or expanding the United Nations presence in Abyei

Deliverables

5.I.27 Table 5.I.6 lists all deliverables of the subprogramme.

Table 5.I.6
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**55**	**35**	**36**	**33**
1. Reports of the Secretary-General to the Security Council on matters related to peacekeeping operations	35	27	23	23
2. Letters from the Secretary-General to the President of the Security Council	20	8	13	10
Substantive services for meetings (number of three-hour meetings)	**35**	**42**	**36**	**36**
3. Meetings of the Security Council on peacekeeping issues	35	42	36	36
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**13**	–	**7**	–
4. Workshops for heads of political components of peacekeeping operations	5	–	3	–
5. Workshops for regional and subregional political strategies for peacekeeping in the Middle East	3	–	2	–
6. Workshops for regional and subregional political strategies for peacekeeping in Africa	5	–	2	–
C. Substantive deliverables				
Consultation, advice and advocacy: advice and information on relevant aspects of peacekeeping operations to approximately 120 troop- and police-contributing countries; consultations with/among 5 regional organizations to promote regional peacekeeping capacities expanded in the context of specific operations; and advice to at least 120 permanent missions to the United Nations, the Bretton Woods institutions, 13 international and regional governance and security organizations and non-governmental organizations on peacekeeping issues.				

Subprogramme 2
Military

Objective

5.I.28 The objective, to which this subprogramme contributes, is to maintain international peace and security through the effective performance of military components of peace operations.

Strategy

5.I.29 To contribute to the objective, the subprogramme will:

(a) Provide briefings and analysis to Member States on the military aspects of new or anticipated developments, and crisis and security situations;

(b) Strengthen partnerships with regional organizations by supporting them in the development of plans for peace operations, generate and deploy appropriate military units, conduct operational assessments and advisory visits, and prepare new troop-contributing countries for future participation in peace operations;

(c) Train and enhance communication with senior military leaders, update military standards for the military component to validate the operational readiness of military units prior to deployment, and conduct in-mission performance evaluations, predeployment/pre-rotation visits and military capability studies;

(d) Facilitate the participation of women in peace operations, at all levels, through engagement with troop-contributing countries;

(e) Further refine the military performance evaluation system, including implementation of the military performance evaluation tool, further develop an evaluator training mechanism and initiate and deploy a performance evaluation process for individual uniformed personnel;

(f) Further refine and develop military doctrine, policies and training materials to support performance evaluation, enhance operational readiness and performance, and improve the safety and security of peacekeepers.

5.I.30 The above-mentioned work is expected to result in:

(a) Improved reporting to the Security Council, the General Assembly, intergovernmental bodies and troop-contributing countries;

(b) Rapid deployment and establishment of or adjustments to peacekeeping operations in response to Security Council mandates and related decisions;

(c) Deployment of better-tailored, better-equipped and more relevant military components to peacekeeping operations;

(d) Improved performance and increased safety of military components in peacekeeping operations;

(e) A safe and secure environment in the host country, with a view to enhancing the safety of civilians and the delivery of humanitarian services.

Programme performance in 2024

Improved conditions for peacekeepers in temporary operating bases in United Nations peacekeeping missions

5.I.31 The General Assembly, in its resolutions on cross-cutting issues, requested the Secretary-General, among others, to ensure that accommodations provided by the United Nations for uniformed and civilian personnel serving in peacekeeping operations met the relevant United Nations standards. In 2022, the

subprogramme established a working group on operating base management and accommodation in field missions, which brought together key Secretariat stakeholders, and supported an advisory board comprising representatives from 15 Member States, including major financial contributors and key troop-contributing countries. The working group provided a report with key findings and recommended the development of a guidance document on the use of temporary operating bases in field missions. In June 2024, new guidelines on the management of temporary operating bases in United Nations peacekeeping missions were promulgated, covering the entire life cycle of temporary operating bases, from establishment to closure, and including a tailored logistics support concept for specific scenarios.

5.I.32 Progress towards the objective is presented in the performance measure below (see table 5.I.7).

Table 5.I.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Working group on operating base management and accommodation in field missions established to improve the conditions of peacekeeping operations, following the adoption of General Assembly resolution 76/274	The advisory board considered requirements for and challenges to improving the conditions of peacekeeping operations, including the use of temporary operating bases, and implications for contingent-owned equipment	United Nations peacekeeping missions obtained access to the new guidelines on the management of temporary operating bases in United Nations peacekeeping missions

Planned results for 2026

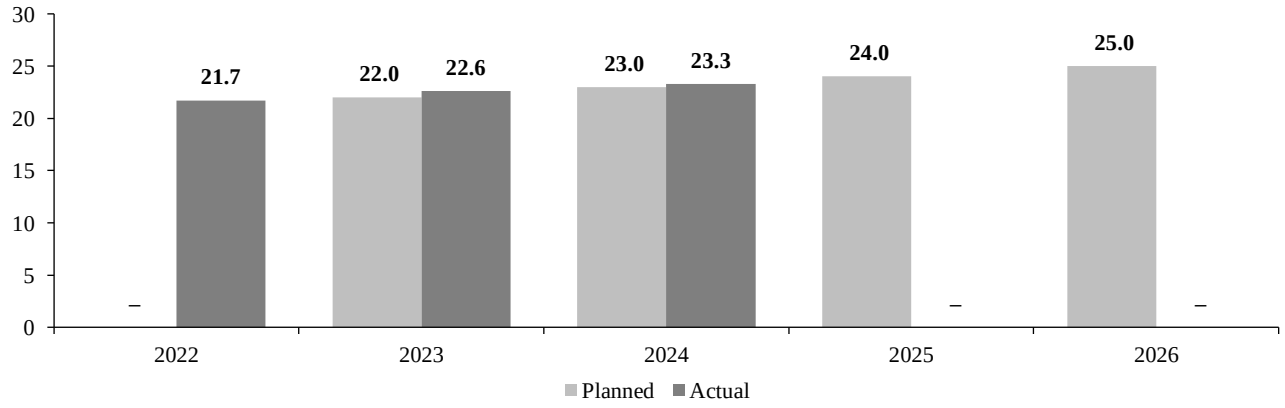
Result 1: advanced gender parity for military individual uniformed personnel in United Nations peace operations

Programme performance in 2024 and target for 2026

5.I.33 The subprogramme's work contributed to the percentage of female military individual uniformed personnel in United Nations peace operations reaching 23.3 per cent, which exceeded the planned target of 23 per cent.

5.I.34 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 5.I.I).

Figure 5.I.I
Performance measure: percentage of female military individual uniformed personnel in United Nations peace operations (annual)



Result 2: missions establish explosive ordnance disposal capabilities to respond to threats posed by improvised explosive devices

Programme performance in 2024 and target for 2026

5.I.35 The subprogramme's work contributed to the United Nations Interim Force in Lebanon (UNIFIL) fully establishing explosive ordnance disposal capabilities, which met the planned target.

5.I.36 The subprogramme's work did not meet the planned target of expanding the explosive ordnance disposal capabilities of the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA) to include infantry battalions with explosive ordnance disposal search-and-detect capabilities. The target was not met because force generation for the deployment of infantry battalions with explosive ordnance disposal search-and-detect capability is ongoing.

5.I.37 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.I.8).

Table 5.I.8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The United Nations Multidimensional Integrated Stabilization Mission in Mali established explosive ordnance disposal capabilities	MINUSCA and the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO) established explosive ordnance disposal capabilities	UNIFIL established explosive ordnance disposal capabilities	Explosive ordnance disposal capabilities are established or strengthened by any missions with such requirements	Additional explosive ordnance disposal capabilities are established or strengthened by any missions with such requirements

Result 3: peace operations respond to counter threats of hostile unmanned aircraft systems

Proposed programme plan for 2026

5.I.38 In February 2024, United Nations peacekeepers in MONUSCO came under direct attack from unmanned aircraft systems modified to deliver explosives. Other missions, such as UNISFA, MINUSCA, UNIFIL, UNFICYP and the United Nations Disengagement Observer Force, have been documenting an escalation in sightings of unmanned aircraft systems within their areas of operation. The increasing threat of such systems calls for the generation of counter-unmanned aircraft system capabilities in peace operations to ensure that United Nations peacekeeping personnel have the necessary protection. Accordingly, the subprogramme has started to engage with troop-contributing countries in this area.

Lessons learned and planned change

5.I.39 The lesson for the subprogramme was the need for a clear, structured approach for the development, operation and sustainment of counter-unmanned aircraft system capabilities in peace operations. In applying the lesson, the subprogramme will develop guidelines for counter-unmanned aircraft system capabilities, update the statement of unit requirements, solicit pledges for units with such capabilities in the Peacekeeping Capability Readiness System and increase overall counter-unmanned aircraft system capabilities in peace operations.

5.I.40 Expected progress towards the objective is presented in the performance measure below (see table 5.I.9).

Table 5.I.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
No fully operational counter-unmanned aircraft system capabilities	One peacekeeping mission (MINUSMA) established counter-unmanned aircraft system capabilities on a trial basis	One additional peacekeeping mission (MONUSCO) established counter-unmanned aircraft system capabilities	One additional peacekeeping mission establishes counter-unmanned aircraft system capabilities	Additional counter-unmanned aircraft system capabilities are established or strengthened by any missions with such requirements

Deliverables

5.I.41 Table 5.I.10 lists all deliverables of the subprogramme.

Table 5.I.10
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**181**	**132**	**161**	**147**
Training events:				
1. With senior military personnel for predeployment induction and post-appointment briefings and intensive orientation	44	22	34	20
2. For command-post exercises for force headquarters	25	14	20	20
3. On the development, revision and implementation of new military policies and guidance materials	28	20	28	24
4. To mainstream a gender perspective for military components of peacekeeping operations	28	31	21	21
5. To improve situational awareness and strengthen the performance of uniformed military components, targeting operational and tactical leadership (heads of military components, sector commanders and force chiefs of staff and infantry battalion commanders)	20	24	20	20
6. On peacekeeping-intelligence/information gathering and analysis	28	18	30	21
7. For evaluators on operational performance	8	3	8	6
8. On strategic force generation and the Peacekeeping Capability Readiness System	–	–	–	5
9. On misinformation and disinformation, hate speech and strategic communication	–	–	–	5
10. On conduct and discipline and sexual exploitation and abuse issues with Member States and troop-contributing countries	–	–	–	5
Technical materials (number of materials)	**116**	**109**	**99**	**102**
11. On significant operational developments in peacekeeping operations and on evolving conflict areas	40	53	36	40
12. On military performance evaluation, force and sector headquarters evaluation	12	6	6	7
13. For new or significantly adjusted peacekeeping operations (strategic military plans)	6	8	6	6
14. On threat assessments reports	12	11	11	11
15. On operational requirements and troop-contributing country capabilities and recommendations prepared after predeployment, assessment and operational advisory visits	20	11	20	15

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
16. On the deployment of military forces, observers and headquarters staff	12	12	12	12
17. On the military components of peacekeeping operations (policies, guidance materials and standard operating procedures)	4	4	4	7
18. On military performance evaluation standards (scoresheets) for infantry units	6	–	–	–
19. On mid- to long-term requirements and on existing capability gaps	4	4	4	4

C. Substantive deliverables

Consultation, advice and advocacy: briefings to approximately 120 troop-contributing countries and the Military Staff Committee on all military aspects of peacekeeping operations; strategic discussion with 10 Member States and 3 regional organizations on military aspects of peace negotiations, agreements, peacekeeping operations, strategic and operational planning, military performance, counter-improvised explosive devices and counter-unmanned aircraft systems, conduct and discipline, protection and strategic communication issues; and maintenance of an organized surge capacity comprising a key nucleus of military staff/support team of up to 14 seconded military officers for possible deployment to new and existing peacekeeping operations for up to 90 days.

Databases and substantive digital materials: information on pledged units registered in the Peacekeeping Capability Readiness System by 60 troop-/police-contributing countries; and a military performance management system.

D. Communication deliverables

Outreach programmes, special events and information materials: quarterly newsletter for approximately 120 troop- and police-contributing countries and all peacekeeping missions.

Subprogramme 3
Rule of law and security institutions

Objective

5.I.42 The objective, to which this subprogramme contributes, is to strengthen the rule of law and security sector governance to contribute to the maintenance of international peace and security in countries where peacekeeping operations and special political missions deploy, or where otherwise authorized, or requested by Member States, in full compliance with the Charter of the United Nations.

Strategy

5.I.43 To contribute to the objective, the subprogramme will provide advisory and operational support to peacekeeping operations and special political missions, as well as resident coordinators, and where otherwise authorized or requested by Member States. Specifically, the subprogramme will:

(a) Assist host States in the reform, restructuring and development of their police and other law enforcement institutions, provide operational support and, in rare circumstances, assume interim policing functions in line with the Strategic Guidance Framework for International Policing;

(b) Support nationally led efforts to ensure accountability for crimes that fuel armed conflict, in particular those perpetrated against civilians, and crimes committed against United Nations personnel in peacekeeping operations and special political missions, strengthen prison security and management, re-establish the host State’s justice and corrections institutions and engage in trust-building initiatives;

(c) Support the planning, design and evaluation of processes that remove weapons and individuals from armed groups and facilitate the reintegration of ex-combatants and elements associated with armed groups into society as civilians, and identify and formulate relevant lessons learned and guidance;

(d) Undertake research and develop knowledge and guidance in the areas of rule of law and security sector reform and governance, and provide targeted, strategic country support, upon request;

(e) Manage mine action programmes to mitigate explosive threats, train United Nations personnel and enhance national explosive ordnance disposal capacities;

(f) Rapidly deploy specialist capacities in all the above-mentioned areas.

5.I.44 The above-mentioned work is expected to result in:

(a) More effective and accountable security and justice institutions in countries receiving assistance, including increased accountability for crimes that fuel armed conflict and for crimes committed against United Nations personnel in peacekeeping operations and special political missions;

(b) Reduced threats posed by armed groups and explosive hazards;

(c) Sustainable peace and the prevention of armed conflict;

(d) Mitigation of risks affecting the services of national and local rule of law and security institutions;

(e) Continuity of United Nations operations in the areas of policing, justice, corrections, disarmament, demobilization and reintegration, security sector reform and governance, and mine action assistance.

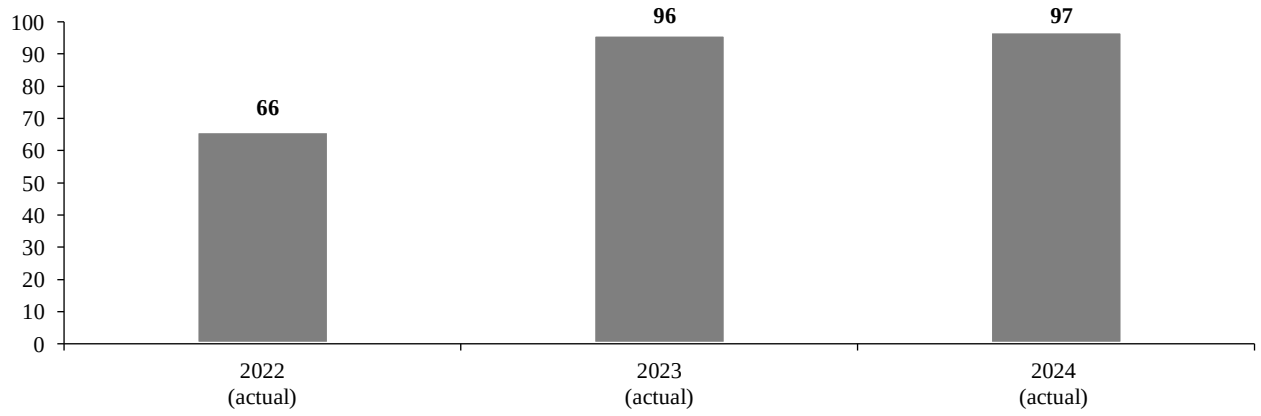
Programme performance in 2024

Enhanced accountability for crimes against United Nations peacekeepers

5.I.45 Since 1948, 1,075 personnel serving in United Nations peacekeeping operations have been killed as a result of malicious acts, including 339 personnel killed since 2013. Several thousand more have been injured. From January 2020 to December 2024, the subprogramme's work contributed to 97 convictions handed down by host country authorities in the Central African Republic, the Democratic Republic of the Congo,[1] Lebanon and Mali in relation to the killing of 36 United Nations personnel, in line with Security Council resolution 2589 (2021) on accountability for crimes against peacekeepers. This progress is significant, given that no individuals had been convicted in those countries in relation to the killing of United Nations peacekeepers between 1 January 2013 and 1 January 2020.

5.I.46 Progress towards the objective is presented in the performance measure below (see figure 5.I.II).

Figure 5.I.II
Performance measure: number of convictions for crimes against United Nations peacekeepers since 2020 in the Central African Republic, the Democratic Republic of the Congo, Lebanon and Mali[a] (cumulative)



[a] The data for Mali reflect the most recent available data as at 31 December 2023.

[1] In the case of the Democratic Republic of the Congo, statistics include convictions related to the assassination of two United Nations experts in 2017, who were not peacekeepers.

Planned results for 2026

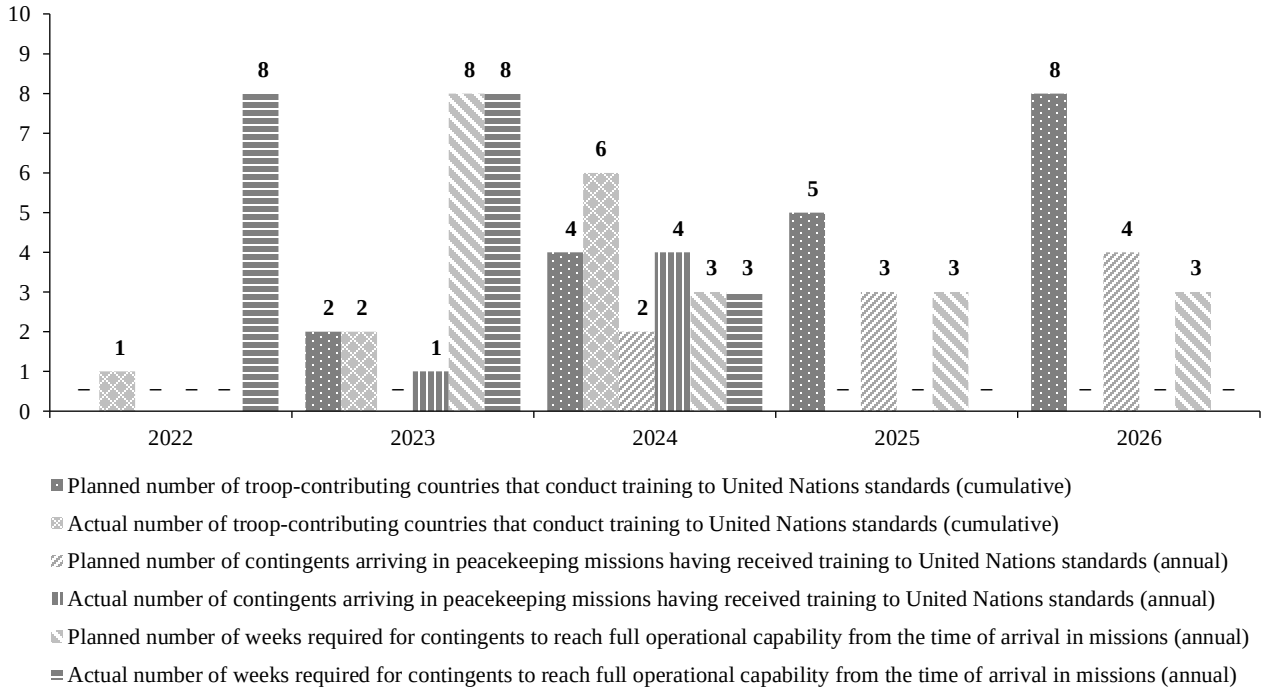
Result 1: troop-contributing countries generate well-prepared troops for deployment in high explosive ordnance threat environments

Programme performance in 2024 and target for 2026

5.I.47 The subprogramme's work contributed to six troop-contributing countries conducting explosive ordnance threat mitigation training to United Nations standards, which exceeded the planned target of four; four troop-contributing countries arriving in a peacekeeping mission having received the predeployment training to United Nations standards, which exceeded the planned target of two; and three weeks for contingents to reach full operational capability from the time of arrival in mission, which met the planned target.

5.I.48 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 5.I.III).

Figure 5.I.III
Performance measure: improved explosive ordnance threat mitigation training by troop-contributing countries and reduced time for trained contingents to reach full operational capability



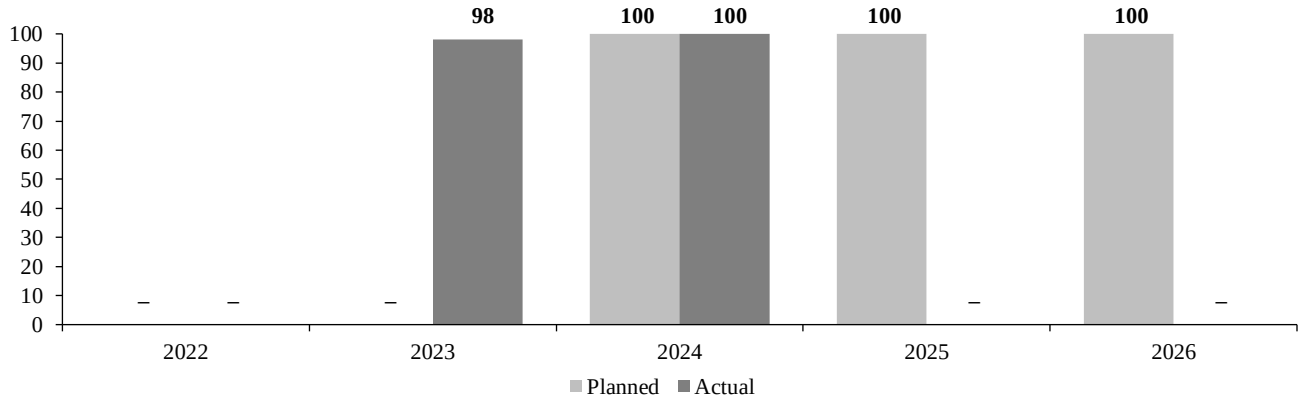
Result 2: improved performance of United Nations police to enhance mandate implementation

Programme performance in 2024 and target for 2026

5.I.49 The subprogramme's work contributed to 100 per cent of evaluations of United Nations formed police units receiving a performance level rating of satisfactory or above, which met the planned target.

5.I.50 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 5.I.IV).

Figure 5.I.IV
Performance measure: percentage of evaluations of United Nations formed police units that indicate a performance level of "satisfactory" or above (annual)



Result 3: host States enabled to continue and sustain progress on rule of law and security institutions reform during and after mission transitions

Proposed programme plan for 2026

5.I.51 United Nations peace operations are often mandated to conduct capacity-building and other early peacebuilding activities in support of rule of law and security institutions. Through its standing capacities, the subprogramme, among others, works to bring together peace and development actors, ensuring coherence of efforts and bridging the gap between United Nations missions in transition and successor arrangements for continuity in rule of law support.

Lessons learned and planned change

5.I.52 The lesson for the subprogramme was that, while standing capacities were previously focused on mission start-up, they were increasingly utilized in transitions because their flexible modality is adaptable to new and evolving contexts. In applying the lesson, the subprogramme will further expand its support for transitions, including by providing short- to mid-term surge support, with a view to preventing a relapse into conflict through targeted, adaptable assistance.

5.I.53 Expected progress towards the objective is presented in the performance measure below (see table 5.I.11).

Table 5.I.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Transition of disarmament, demobilization and reintegration processes from the African Union-United Nations Hybrid Operation in Darfur to the United Nations Integrated Assistance Mission in the Sudan, laying the	Transfer of a national strategy to combat insecurity in South Kivu from MONUSCO to the Congolese National Police	In the Democratic Republic of the Congo, launch of the implementation of a joint United Nations and government programme on rule of law, with a focus beyond mission withdrawal, and establishment, by the National Security	Rule of law and security institutions reform, and sustainability of disarmament, demobilization and reintegration and mine action processes in two transition settings	Rule of law and security institutions reform, and sustainability of disarmament, demobilization and reintegration and mine action processes in two transition settings

Publications (number of publications)	**1**	**1**	**1**	**1**
19. Multi-donor report on the activities of the Mine Action Service	1	1	1	1
Technical materials (number of materials)	**24**	**24**	**25**	**25**
20. On disarmament, demobilization and reintegration and community violence reduction	7	7	7	7
21. On strategic police capability, police operational plans, standard operating procedures and concepts of operation for police components	6	6	6	6
22. On policing for police-contributing countries, United Nations police and national authorities	4	4	4	4
23. To strengthen assistance in justice and corrections areas	1	1	2	2
24. On security sector reform and governance	2	2	2	2
25. On issues related to mine action	2	2	2	2
26. On the prevention, investigation and prosecution of serious crimes against United Nations personnel in peacekeeping operations and special political missions	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: consultations with and advice to 22 Member States to strengthen the capacities of national police services and other law enforcement entities; consultations with 47 Member State groupings, regional organizations and specialized institutions on policing; consultations with 35 Member States on disarmament, demobilization and reintegration and community violence reduction, including with the Group of Friends of Disarmament, Demobilization and Reintegration; policy and technical advice to 25 Member States to build the capacity of national authorities and local partners on mine action, weapons and ammunition management and improvised explosive device threat mitigation; consultations and advice to mobilize coordinated and integrated Member State and related partner support for national justice and corrections efforts; consultations with and advice to 40 Member States on issues related to the implementation of Security Council resolution 2589 (2021); and advice to and advocacy with Member States' senior police executives and other partners.

Databases and substantive digital materials: pledged formed police units registered in the Peacekeeping Capability Readiness System and other personnel matters in the computerized human resources system; and online database on accountability for crimes against peacekeepers, pursuant to Security Council resolution 2589 (2021).

D. Communication deliverables

Digital platforms and multimedia content: digital and social media content on activities of the subprogramme.

Subprogramme 4
Policy, evaluation and training

Objective

5.I.55 The objective, to which this subprogramme contributes, is to enhance the performance and effectiveness of peace operations within the purview of the Department.

Strategy

5.I.56 To contribute to the objective, the subprogramme will:

(a) Promote and facilitate policy development, evaluation, organizational learning, training and strategic foresight on issues relating to peacekeeping, taking into consideration the relevant actions and decisions contained in the Pact for the Future, as well as the Action for Peacekeeping initiative, its implementation strategy and the Strategy for the Digital Transformation of United Nations Peacekeeping, in line with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere;

(b) Support peacekeeping operations in the implementation of the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework;

(c) Formulate, update and disseminate policies and practical guidance and provide support to missions in specific thematic areas, such as the protection of civilians, conflict-related sexual violence, community engagement with a view to supporting sustainable political solutions, and child protection, as well as the use of strategic communications, the countering of hate speech, misinformation and disinformation and the distribution of accurate content;

(d) Strengthen knowledge-sharing and guidance development for peacekeeping operations and coordinate the development of guidance for the peace and security pillar and for the Department of Operational Support, in close cooperation with the Department of Political and Peacebuilding Affairs and the Department of Operational Support;

(e) Build the capacity of policy and best practices officers and focal points in field missions through advice, coordination and training, and further strengthen systems and infrastructure for knowledge management by increasing the quality and number of relevant documents available to users in field missions;

(f) Support Member States that are contributing uniformed personnel through strategic force generation engagement and expanded partnerships with national and regional training institutions and partners for the delivery of predeployment training and train-the-trainer courses and the timely completion and dissemination of core and specialist predeployment training materials to support predeployment training for troop- and police-contributing countries, specifically in areas related to emerging challenges;

(g) Provide civilian predeployment training and leadership and management training for all mission components and support the delivery of in-mission training through train-the-trainer courses in operational and support skills for uniformed and civilian personnel;

(h) Use a learning management system accessible by Member States to host courses, enable the registration of participants, deliver online elements of programmes and enable testing ahead of face-to-face course sessions.

5.I.57 The above-mentioned work is expected to result in:

(a) Improved and more responsive decision-making by senior mission management, utilizing data-based evidence from the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework;

(b) Increased use by missions of specialized information, thematic policy support and guidance, reflecting lessons learned and promoting an exchange of good practices between missions;

(c) Strengthened and sustained mission performance through consistently trained uniformed and civilian leaders, contingents and individuals.

Programme performance in 2024

Strengthened capability of uniformed personnel in United Nations peace operations to analyse hate speech, misinformation and disinformation

5.I.58 The growing impact of hate speech, misinformation and disinformation on the strategic goals of United Nations peacekeeping operations has been acknowledged by the General Assembly in its resolution 76/274 and by the Security Council in its resolution 2686 (2023). The use of misleading or manipulated information about a peacekeeping mission can affect its credibility, access to vulnerable populations, standing within political processes and capacity to operate safely. Hate speech by parties to conflict and by communities within host States can inflame intergroup tensions and undermine peace processes, increasing threats to civilians and imperilling efforts to achieve durable political settlements. The subprogramme has developed a comprehensive training package integrating conceptual, legal and operational frameworks to equip military and police commanders and personnel with the knowledge and skills to analyse these threats. The training package serves to establish a foundation for the implementation of proactive risk mitigation measures to maintain operational capability and ensure the safety and security of personnel.

5.I.59 Progress towards the objective is presented in the performance measure below (see table 5.I.13).

Table 5.I.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Civilian and uniformed peacekeeping personnel engaged in peer-to-peer learning and shared best practices for monitoring, analysing and responding to misinformation and disinformation	Troop- and police-contributing countries had access to comprehensive training materials tailored to address hate speech, misinformation and disinformation in peace operations	All military and police units in United Nations peacekeeping missions had access to the knowledge and skills required to analyse hate speech, misinformation and disinformation

Planned results for 2026

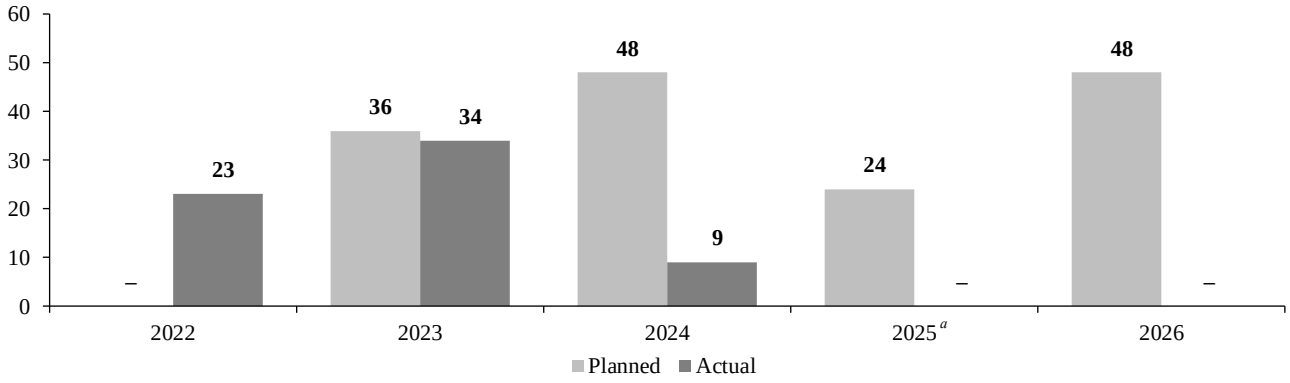
Result 1: troop-contributing countries prepare infantry battalions in line with United Nations standards

Programme performance in 2024 and target for 2026

5.I.60 The subprogramme's work contributed to nine troop-contributing countries deploying infantry battalions prepared in line with United Nations standards, which did not meet the planned target of 48 troop-contributing countries. The target was not met owing to changes in operational needs and the subsequent decision to revise the United Nations Infantry Battalion Manual. New materials were developed in 2024, and the roll-out of updated specialized training materials tailored to align with the new guidance and requirements is planned for 2025 and 2026.

5.I.61 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 5.I.V).

Figure 5.I.V
Performance measure: number of troop-contributing countries deploying infantry battalions prepared in line with United Nations standards (cumulative)



[a] The target for 2025 was amended owing to the revision of the United Nations Infantry Battalion Manual.

Result 2: an online platform to foster direct collaboration among Member States on the preparation of peacekeeping personnel

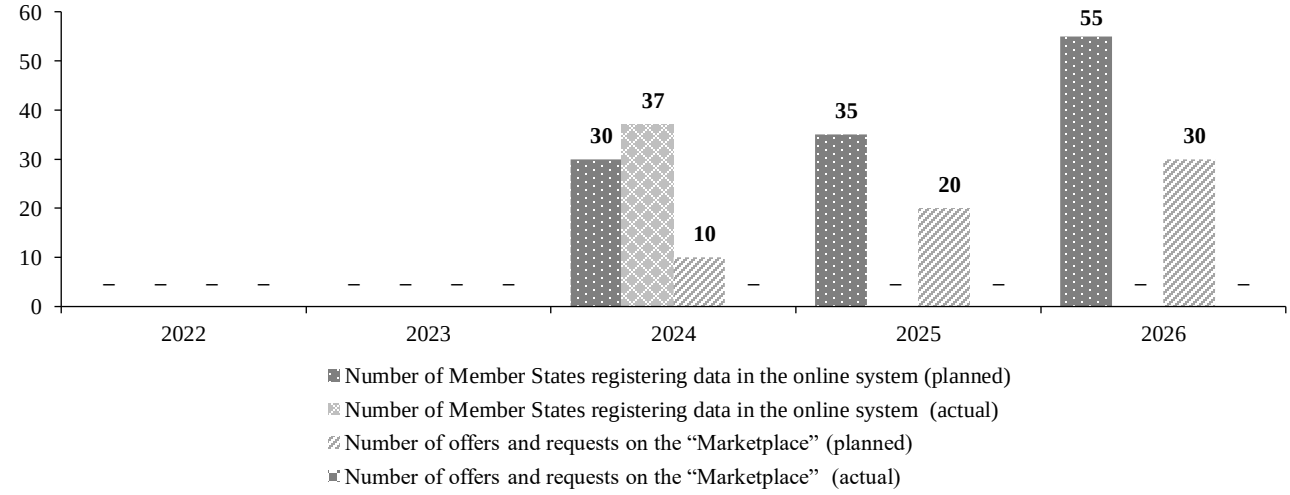
Programme performance in 2024 and target for 2026

5.I.62 The subprogramme's work contributed to 37 Member States registering their peacekeeping-related training and capacity-building data in the light coordination mechanism online system, which exceeded the planned target of 30 Member States.

5.I.63 The subprogramme's work also contributed to the development of the "Marketplace" feature and a user outreach campaign, which did not meet the planned target of 10 training and capacity-building offers and requests posted on the "Marketplace". The target was not met owing to delays in the deployment of the "Marketplace" feature related to the implementation of information and communications technology security standards and quality control.

5.I.64 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 5.I.VI).

Figure 5.I.VI
Performance measure: number of Member States registering their peacekeeping-related training and capacity-building data in the light coordination mechanism online system, and number of offers and requests on the "Marketplace"



Result 3: improved analysis and planning at the field office level to address local conflict dynamics and promote political solutions

Proposed programme plan for 2026

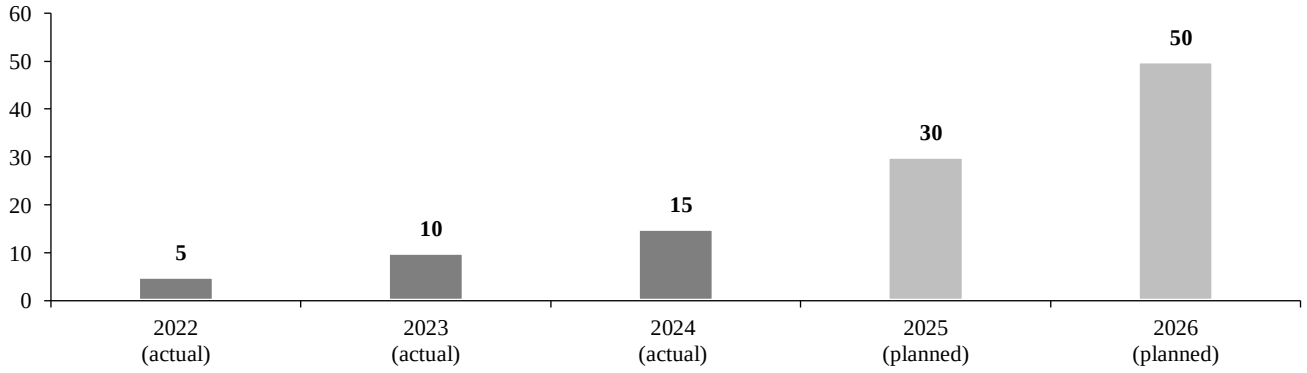
5.I.65 A key feature of peacekeeping operations in complex settings is the footprint of integrated field offices, which enables civilian and uniformed components to implement their mandates in support of communities in need and legitimate governance structures, with a view to addressing conflict drivers and threats to civilians. The subprogramme undertook a survey of practice on how peacekeeping operations address local conflict. The results highlighted that, while field offices were at the front line of the United Nations response to local conflicts, those interventions were often reactive in nature and disjointed in their implementation, undermining operational coherence. In 2021, the subprogramme rolled out a new tool for local conflict analysis and planning.

Lessons learned and planned change

5.I.66 The lesson for the subprogramme was that, the depth of knowledge and robust analysis of different field office components was rarely shared through a joint analytical process designed to reach a shared vision of the problem and agreement on shared key priorities. In applying the lesson, the subprogramme will build on previous train-the-trainer activities and conduct a series of training sessions for heads of field offices and field exercises in large multidimensional operations to promote the acquisition of analytical and planning skills and to mainstream the use of local conflict analysis and planning into all peacekeeping field offices facing local conflict dynamics, with a view to reducing levels of violence and casualties among civilians.

5.I.67 Expected progress towards the objective is presented in the performance measure below (see figure 5.I.VII).

Figure 5.I.VII
Performance measure: percentage of peacekeeping personnel dealing with local conflicts utilizing the local conflict analysis and planning tool



Deliverables

5.I.68 Table 5.I.14 lists all deliverables of the subprogramme.

Table 5.I.14
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**1**	**1**
1. Report of the Secretary-General on the implementation of the recommendations of the Special Committee on Peacekeeping Operations	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**38**	**38**	**40**	**40**
2. Meetings of the Special Committee on Peacekeeping Operations	34	34	36	36
3. Meetings of the Fourth Committee	4	4	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**5**	**5**	**5**	**5**
4. In the areas of protection of civilians, child protection, community engagement, conflict-related sexual violence, policy planning, partnerships and force generation	5	5	5	5
Seminars, workshops and training events (number of days)	**424**	**493**	**425**	**425**
5. Workshops for the provision of strategic guidance, training-of-trainers and assistance in curriculum development and delivery, training methodology, materials and training gap identification to Member States, regional peacekeeping training and policy institutions, and field missions	367	435	367	367
6. Training events on leadership, management and administration for senior civilian and uniformed personnel from field missions and supporting offices, Member States and regional organizations	47	47	47	47
7. Workshops for mission thematic advisers and focal points for knowledge-sharing and training on cross-cutting peacekeeping issues	10	11	10	10
8. Workshops for the European Union and its States members on operational support for United Nations peacekeeping operations	–	–	1	1
Technical materials (number of materials)	**36**	**36**	**34**	**39**
9. On all aspects of peacekeeping for Member States and field missions (policy papers, standard operating procedures, technical reports, lessons learned reports, training materials)	32	32	30	35
10. On capability requirements for United Nations peacekeeping operations	4	4	4	4

C. Substantive deliverables

Consultation, advice and advocacy: briefings and presentations to Member States on peacekeeping issues; expert advice to permanent missions to the United Nations, the Bretton Woods institutions, international and regional organizations and non-governmental organizations on peacekeeping issues.

Databases and substantive digital materials: the Comprehensive Planning and Performance Assessment System, as part of the integrated peacekeeping performance and accountability framework; the Peacekeeping Capability Readiness System; the troop- and police-contributing countries knowledge management system; the policy and practice database; and the peacekeeping resource hub accessible to all Member States.

D. Communication deliverables

Outreach programmes, special events and information materials: knowledge management newsletter for 15,000 staff; and training newsletters for approximately 120 troop- and police-contributing countries and their training institutions.

B. Proposed post and non-post resource requirements for 2026

Overview

5.I.69 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 5.I.15 to 5.I.17.

Table 5.I.15

5.I.70 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 5.I.18 to 5.I.20 and figure 5.I.VIII.

5.I.71 As shown in tables 5.I.18 (1) and 5.I.19 (1), the overall resources proposed for 2026 amount to $7,222,900, reflecting an increase compared with the approved budget for 2025. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

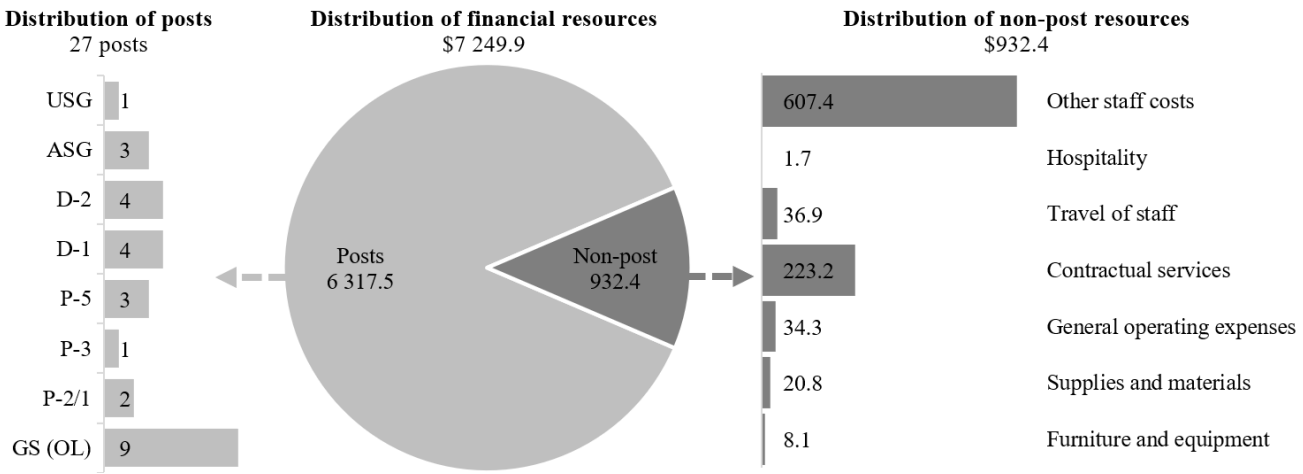
Figure 5.I.VIII
Distribution of proposed resources for 2026

(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

New and expanded mandates

5.I.72 As shown in table 5.I.18 (1), resource changes reflect an increase of $490,000, as follows:

(a) **Executive direction and management** (increase of $250,000). The proposed increase of $250,000 under other staff costs ($240,000) and travel of staff ($10,000) would provide for the establishment of general temporary assistance capacities to support the Office of the Under-Secretary-General in undertaking a review of the future of all forms of United Nations peace operations, taking into account lessons learned from previous and ongoing reform processes,

and in providing strategic and action-oriented recommendations for the consideration of Member States on how the United Nations toolbox can be adapted to meet evolving needs to allow for more agile, tailored responses to existing, emerging and future challenges, pursuant to General Assembly resolution 79/1 on the Pact for the Future. General temporary assistance capacities would be recruited as required to support outreach to Member States and other stakeholders and foster their engagement on various aspects required for the review. The provision would cover travel by the Under-Secretary-General to various field locations and liaison with Member States as part of the review process. The resources are non-recurrent and limited to the duration of the review, which will take place in 2026;

(b) **Subprogramme 4, Policy, evaluation and training** (increase of $240,000). The proposed increase of $240,000 under other staff costs would provide for the establishment of general temporary assistance capacities to support the subprogramme in the review of the future of all forms of United Nations peace operations pursuant to General Assembly resolution 79/1, as referenced in paragraph 5.I.72 (a). The capacity would play a key role in drafting the review's findings, policy recommendations and implementation strategies, ensuring that peacekeeping efforts are aligned with the objectives of the Pact for the Future and broader United Nations policies. The review would be closely coordinated with the Policy and Mediation Division of the Department of Political and Peacebuilding Affairs. The work would include organizing, coordinating and leading consultations with key stakeholders, conducting literature research and synthesizing the findings to provide comprehensive, well-documented advice. The resources are non-recurrent and limited to the duration of the review, which will take place in 2026.

Other assessed resources

5.I.73 As reflected in tables 5.I.18 (2) and 5.I.19 (2), other assessed resources amount to $116,428,400. The resources would complement regular budget resources and provide for the requirements indicated in report A/79/783.

Extrabudgetary resources

5.I.74 As reflected in tables 5.I.18 (3) and 5.I.19 (3), extrabudgetary resources amount to $75,080,500. The resources would complement regular budget resources and would be used mainly to provide for 112 posts (2 D-1, 13 P-5, 36 P-4, 34 P-3, 4 P-2/1, 3 General Service (Principal level) and 18 General Service (Other level)). In addition, non-post resources would be used to support the United Nations mine action programme, implementation of the Action for Peacekeeping initiative, digital innovation and transformation, the implementation of priorities related to women and peace and security, effective weapons management, regional capacity-building and the implementation of conflict-related sexual violence mandates.

5.I.75 The extrabudgetary resources under the present section are subject to the oversight of the Under-Secretary-General of the Department of Peace Operations in accordance with the delegation of authority by the Secretary-General.

Executive direction and management

5.I.76 The executive direction and management component comprises the Office of the Under-Secretary-General, the Gender Unit, the Integrated Assessment and Planning Unit, the Office of the Director for Peacekeeping Strategic Partnership, and the Office of the Director for Coordination and Shared Services.

5.I.77 The main responsibilities of the executive direction and management component include the following functions:

(a) Direct, manage and provide political and policy guidance and strategic direction to the Department-led operations, including in the performance of political, programmatic, managerial and administrative functions;

(b) Formulate guidelines and policies for peacekeeping operations, based on Security Council mandates;

(c) Advise the Security Council and the General Assembly on all matters related to peacekeeping activities and the future direction of United Nations peacekeeping, including strategic and policy issues and initiatives, such as peacemaking, peacekeeping, peacebuilding, transitions through partnerships with regional organizations and other peacekeeping partners, and protection of civilians;

(d) Maintain high-level contact with parties to conflict and Member States, particularly the Security Council, as well as troop-, police- and financially contributing countries, in the implementation of the Security Council mandates;

(e) Support peacekeeping operations.

5.I.78 The Integrated Assessment and Planning Unit will strengthen analysis and planning at Headquarters and in the missions and provide related guidance, training and support to planning processes in line with the Action for Peacekeeping Plus implementation strategy. The Gender Unit will continue to facilitate the implementation of commitments on gender equality and women and peace and security through strategic and policy guidance, capacity-building and knowledge management, data driven evidence-generation, gender analysis and systematized gender integration, including the operational and technical backstopping of peacekeeping operations.

5.I.79 The Office of the Director for Peacekeeping Strategic Partnership will continue to undertake reviews of peacekeeping operations mandated by the General Assembly. In particular, the Office will continue to coordinate and drive implementation of the action plan for improving the safety and security of United Nations peacekeepers with Headquarters and all high-risk missions and undertake integrated studies and after-action reviews.

5.I.80 The Office of the Director for Coordination and Shared Services, which reports to the Under-Secretaries-General of both the Department of Peace Operations and the Department of Political and Peacebuilding Affairs, includes the joint Executive Office, the Leadership Support Section, the Peacekeeping Situation Centre, the Strategic Communications Section, the Focal Point for Security, the Information Management Unit and the Registry. The Office will continue to provide support to peacekeeping operations for organizational resilience and crisis management, as well as the enhancement of reporting and data analytics capacities and products. The Office will pursue its strategic communication efforts in support of peacekeeping, with particular emphasis on social media and countering misinformation and disinformation. It will coordinate processes for the selection of, and support for, senior mission leadership and will continue outreach efforts to increase and diversify the pool of candidates.

5.I.81 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. The Department will continue to rely on electronic record-keeping and communications to reduce printing, paper-based filing and the use of photocopy paper. The Department also plans to improve e-waste management to facilitate the environmentally friendly disposal of expendable e-waste.

5.I.82 Information on the timely submission of documentation and advance booking for air travel is reflected in table 5.I.21. The Department has continued its efforts to raise awareness among staff through various forms of communication on the importance of early planning for travels and complying with the advance purchase policy. Managers are also required to implement preventive and corrective measures.

Table 5.I.21
Compliance rate

Air tickets purchased at least two weeks before the commencement of travel	33	33	66	100	100

5.I.83 The proposed regular budget resources for 2026 amount to $1,077,800 and reflect an increase of $250,000 compared with the approved budget for 2025. The proposed change is explained in paragraph 5.I.72 (a). Additional details on the distribution of the proposed resources for 2026 are reflected in table 5.I.22 and figure 5.I.IX.

Programme support

5.I.88 The programme support component comprises the Executive Office of the Department of Peace Operations. The Executive Office provides the central administrative and programme support functions necessary for the implementation of the mandated activities of the Department. It assists the Under-Secretary-General in the preparation of the programme plans, the preparation and monitoring of the implementation of the programme budget, the management of trust funds and extrabudgetary resources, relevant support services for the efficient utilization of human resources and the planning, control and coordination of requirements related to general office administration. The Executive Office also provides logistical support to the Department, including communication and information technology-related software and hardware replacement, property management and office space management.

5.I.89 The proposed regular budget resources for 2026 amount to $413,800 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of the proposed resources for 2026 are reflected in table 5.I.27 and figure 5.I.XIV.

II. United Nations Truce Supervision Organization

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

5.II.1 The United Nations Truce Supervision Organization (UNTSO) is mandated to assist the parties to the 1949 Armistice Agreements in the supervision of the application and observance of the terms of those Agreements. Its mandate derives from Security Council resolutions and decisions, including resolutions 50 (1948), 54 (1948) and 73 (1949). The military observers, assigned to assist the United Nations Mediator in supervising the truce in Palestine pursuant to resolution 50 (1948), became UNTSO pursuant to resolution 73 (1949) to supervise the Armistice Agreements between the parties to the Arab-Israeli conflict. Following the wars of 1956, 1967 and 1973, the functions of the observers were adapted in response to altered circumstances.

5.II.2 UNTSO activities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic are aimed at maintaining the regional liaison architecture established under the Armistice Agreements. UNTSO provides trained military observers to UNDOF and UNIFIL.

Programme of work

Objective

5.II.3 The objective, to which UNTSO contributes, is to ensure adherence to the Armistice Agreements of 1949 and related agreements.

Strategy and external factors for 2026

5.II.4 To contribute to the objective, UNTSO will:

(a) Provide trained military observers to UNDOF and UNIFIL to assist in their mandate implementation by providing timely and accurate observation, reports, investigations and inspections. The mission provides administrative, logistical, communications and security support to all outstations and liaison offices;

(b) Conduct regional liaison through strategic engagement and regular interaction with the parties, as well as with senior representatives of troop-contributing countries and other Member States in the mandate area, and conduct regular liaison, through offices in Egypt, Lebanon and the Syrian Arab Republic, and with Israel and Jordan from its headquarters;

(c) Support informed strategic analysis and decision-making within the Organization, with peacekeeping partners and among regional actors through regional assessments, and support peacekeeping partnerships in coordination with other United Nations entities;

(d) Conduct seminars, briefings and information exchanges with regional stakeholders, think tanks and senior representatives of troop-contributing countries and other Member States.

5.II.5 The above-mentioned work is expected to result in:

(a) Reliable communications channels and relations of confidence with the parties, conflict resolution, reduced tensions, avoidance of misunderstandings that could escalate into cross-boundary conflict and expanded liaison and information networks with national and local community representatives and with actors with influence in the areas of interest;

(b) Strengthened situational awareness and decision-making by other United Nations entities, enhancing the impact of regional United Nations presences;

(c) Improved cooperation and understanding of cross-cutting regional issues among regional counterparts.

5.II.6 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) All parties to the Armistice Agreements of 1949 and related agreements will cooperate with UNTSO in the performance of its functions;

(b) All parties will remain willing to resolve their disputes and to cooperate with the United Nations in fulfilment of the Security Council mandate.

5.II.7 With regard to cooperation with other entities and inter-agency coordination and liaison, UNTSO will foster cooperation with a range of national, regional and international entities. It will engage with relevant national and regional organizations and collaborate closely with its regional peacekeeping partners, special political missions, humanitarian coordinators, United Nations security management systems and other relevant agencies in all five countries where it operates. These engagements are intended to facilitate the sharing and validation of information from the ground, integrate assessments, ensure consistency in key United Nations messages and capture synergies to enhance the collective impact of United Nations presences in the region. Strategic cooperation will occur at multiple levels, through regular consultations and inter-mission engagements with heads of missions and agencies, as well as at the working level. In addition, UNTSO will expand its efforts to share information and analyse regional trends that affect the implementation of United Nations mandates, including through consultative inter-mission coordination activities.

5.II.8 The mission will continue to integrate a gender perspective into its operational activities, deliverables and results, as appropriate. This will include ensuring the inclusion of female military observers in operations and female language assistants in UNTSO activities.

Evaluation activities

5.II.9 An evaluation conducted by the office to assess how institutional knowledge is retained and shared between outgoing and incoming uniformed and civilian personnel was completed in 2024 and has guided the proposed programme plan for 2026.

5.II.10 In response to the results of the evaluation referenced above, UNTSO will standardize the transfer of institutional knowledge among mission personnel. Key documents specific to each of the mission's functional posts will be compiled, including important contacts and guidance to improve the mission's handover and takeover processes and ensure efficient and effective continuity of functions. UNTSO will introduce an electronic platform to digitize the transfer of institutional knowledge and streamline the handover processes and will revise the standard operating procedures to ensure that it reflects the evaluation recommendations.

5.II.11 An UNTSO evaluation on induction and continuation training at mission outstations is planned for 2026.

Programme performance in 2024

Adjusted UNTSO military observers' footprint in response to changing security environment

5.II.12 The mission responded to Lebanon's deteriorating security by adjusting UNTSO military observers' posture to ensure personnel safety and security, including by implementing flexible deployment strategies, such as, in coordination with UNIFIL, adjusting patrols, reinforcing field office security and enhancing coordination with local and international actors. That adaptive approach also enabled

the mission to continue its activities concerning the Golan, in coordination with UNDOF, related to monitoring violations in the area of separation and along the ceasefire line, providing reports and conducting inspections and investigations in a safe and secure manner. The proactive adjustments highlighted the UNTSO commitment to operational continuity and personnel protection in a challenging security environment.

5.II.13 Progress towards the objective is presented in the performance measure below (see table 5.II.1).

Table 5.II.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Timely observations, accurate reporting and a consistent presence in a high-tension environment

Planned results for 2026

Result 1: improved confidence in decision-making by the United Nations Disengagement Observer Force through upgraded observation

Programme performance in 2024 and target for 2026

5.II.14 The mission's work contributed to the maintenance of reporting through observation within existing capability, which did not meet the planned target of improved confidence in decision-making by UNDOF enabled by the improved accuracy and quality of reporting through upgraded 24-hour observation equipment at five observation posts. The target was not met owing to the uncertainty surrounding the liquidity situation, which entailed delays in the purchase of upgraded 24-hour observation equipment, as well as the security situation, which affected the installation of equipment at five observation posts.

5.II.15 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.II.2).

Table 5.II.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Limited visibility and object identification at night and lack of recording capability	Reporting maintained through observation with existing capability	Reporting maintained through observation with existing capability	Improved quality of reporting enabled by additional observation of the area of separation and its limits, the Alpha and Bravo lines	Improved quality of reporting enabled by additional observation of the area of separation and its limits, and the area of limitation

Result 2: increased engagement in the mandate and work of the United Nations Truce Supervision Organization

Programme performance in 2024 and target for 2026

5.II.16 The mission's work contributed to increased engagement by think tanks and academics with expertise in national and regional developments in the region on the mandate and activities of

UNTSO, enabling better analysis and awareness of national/regional dynamics and perspectives, which met the planned target.

5.II.17 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.II.3).

Table 5.II.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Information on the history and mandate of UNTSO available through the seventy-fifth anniversary commemorations and the corresponding Yearbook	Increased engagement by think tanks and academics, enabling better analysis and awareness of national and regional dynamics and perspectives	Enhanced regional liaison through diversified engagement with target audiences, including Member States, troop-contributing countries, think tanks and academics	Enhanced regional liaison through sustained diversified engagement with target audiences, including Member States, troop-contributing countries, think tanks and academics

Result 3: strengthened organizational ability to adapt to changing operating environments

Proposed programme plan for 2026

5.II.18 The mission aims to improve its flexibility to adapt to changing environments and effectively respond to such changes. This includes managing resources to quickly reallocate personnel, equipment and support as needs evolve. The approach began with a posture change during the conflict in Lebanon in 2024 and will be supported by a system to monitor regional trends and assess shifts in the political, security and humanitarian landscape, enabling timely adjustments to mission priorities.

Lessons learned and planned change

5.II.19 The lesson for the mission was the need for faster, more coordinated decision-making in rapidly evolving environments. In applying the lesson, the mission has focused on improving real-time communication and allocation of personnel, equipment and support to enable a quicker, more agile response to future challenges. UNTSO will further promote continuous learning, encourage innovation and conduct regular training and scenario-based exercises to prepare personnel for complex situations. By fostering cross-functional coordination and close collaboration with internal and external stakeholders, UNTSO will enhance its ability to anticipate changes and proactively meet mission objectives, utilizing new concepts of operations to continue mandate implementation in rapidly shifting contexts.

5.II.20 Expected progress towards the objective is presented in the performance measure below (see table 5.II.4).

Table 5.II.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Enhanced baseline training for military observers to improve their versatility and operational effectiveness across all mission countries	Enhanced operational readiness of military observers, through structured professional development programmes	Enhanced mission adaptability and capability to respond effectively to evolving operational environments

Legislative mandates

5.II.21 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to UNTSO.

Security Council resolutions

50 (1948)
54 (1948)
73 (1949)

Deliverables

5.II.22 Table 5.II.5 lists all deliverables of UNTSO.

Table 5.II.5
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**16**	**19**	**16**	**16**
1. Seminars on the implications of regional developments for peacekeeping areas	2	2	2	2
2. Seminars on UNTSO operations (requested by Member States and international organizations)	14	17	14	14
C. Substantive deliverables				
Consultation, advice and advocacy: consultation and liaison with national authorities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic, as well as local government officials, community leaders, international interlocutors and United Nations operations, organizations and country offices in the mission area to assess regional stability/security conditions, regional trend effects and potential disturbances among the parties and on peacekeeping areas of operation, and with the 32 troop-contributing countries and other Member State representatives.				
E. Enabling deliverables				
Administration: weekly, monthly, and annual situation reports; analytical assessment and thematic reports and briefings; tactical operational reports, including daily operational reports, incident reports and investigation reports; inter-mission support agreements with the Office of the Special Coordinator for the Middle East Peace Process, UNIFIL and UNDOF; and monthly mandatory induction training of incoming military observers prior to deployment in observer groups and liaison offices, and tactical training of military observers on the use of observation equipment.				

B. Proposed post and non-post resource requirements for 2026

Overview

5.II.23 Pursuant to paragraph 20 of General Assembly resolution 77/262, UNTSO carried out a spending review as part of its proposed programme budget for 2026. Under the strategic guidance of the Head of Mission and Chief of Staff, and with the engagement of all managers and the Human Resources Services Division of the Department of Operational Support, a review was carried out of the mission's operations. The review builds on previous process reviews undertaken by the mission to streamline support services across five countries and improve logistics support against the dynamically challenging areas of its operations, as well as lessons learned from the impact of the liquidity situation and the coronavirus disease (COVID-19) pandemic. The mission was subject to a civilian staffing review that was jointly undertaken with the Department and included an in-depth analysis of the mission's organizational structure, staffing composition and levels to determine optimal alignment with evolving mission priorities, enhance resource efficiency and effectiveness and ensure that staff possess the skills required to provide high-quality services, while incorporating succession plans and future operational needs. The review also included an analysis of historical trends in non-post resource spending and distribution over the past five years to identify opportunities for efficiencies and realignment to support optimal implementation of the mission's mandate and achieving results, as set out in the proposed programme plan for 2026. The review pointed to several opportunities for better and more efficient utilization of financial and human resources.

5.II.24 With regard to posts, while UNTSO is not proposing any increase or decrease in its staffing complement of 229 posts, several changes to the levels, functions and locations of existing posts are proposed as a result of the civilian staffing review, which reduces operational gaps and utilizes resources more effectively, while providing the mission with the flexibility needed to address emerging challenges. The proposed changes are as follows:

(a) **Office of the Chief of Mission Support**. The Chief of Mission Support is responsible for stewardship of the personnel, financial and property resources of UNTSO (and the Office of the Special Coordinator for the Middle East Peace Process) and acts as principal adviser to the mission leadership on management, logistics and administrative matters. The Chief also leads and guides the work of the mission support component carried out by the operations and resource management, service delivery management and supply chain management pillars, which is decentralized across five countries. The mission support component has 173 posts to support 159 military observers, 7 substantive posts and 48 security posts. The civilian staffing review identified workforce gaps in the immediate office of the Chief of Mission Support and in the areas of protocol, training and the environment. To address the workforce gaps, the following changes to the organizational structure and posts are proposed to enhance the oversight and effectiveness of managing cross-cutting functions in the Office. Through the restructuring effort, there would be clearer accountability, better coordination and quicker decision-making, enabling more effective response and support to mission needs, as follows:

(i) **Office of the Chief of Mission Support**. Redeployment of one Administrative Officer (Field Service) and one Administrative Assistant (Local level) from Service Delivery Management (formerly known as the Office of the Deputy Chief of Mission Support) to strengthen the existing capacity of the Office, which is comprised of one staff member at the D-1 level, one staff member in the Field Service and one National Professional Officer. The change reflects the evolving scope and complexity of the mission's support function and is aimed at ensuring that the Chief of Mission Support is better positioned to efficiently manage administrative functions, strengthen coordination across the mission and effectively drive key strategic priorities. It is proposed that the National Professional Officer be redeployed to Protocol, as explained in paragraph 5.II.24 (a) (ii);

(ii) **Protocol**. Redeployment of two posts (one Protocol Officer (National Professional Officer) from the Office of the Chief of Mission Support and one Movement Control Assistant (Local level), to be reassigned as a Protocol Assistant, from Supply Chain Management) to Protocol, to be established under the Office of the Chief of Mission Support. Since 2022, the role of Protocol has expanded and includes an increased scope in interactions with host government authorities and relationship management with various ministries and embassies;

(iii) **Environment**. Redeployment of one Environment Affairs Assistant (Local level) from Service Delivery Management (formerly the Office of the Deputy Chief of Mission Support) to Environment, to be established under the Office of the Chief of Mission Support to facilitate integration, management and oversight of environmental priorities and the related impact on the mission's operations;

(iv) **Learning and Development**. Redeployment of one Human Resources Assistant (Field Service) and one Administrative Assistant (Local level) from Human Resources Management to Learning and Development, to be established under the Office of the Chief of Mission Support. The two posts would be reassigned as Training Assistants (one Field Service and one Local level) to address the training and staff development gaps and ensure that all staff have access to targeted training, resources and ongoing development opportunities, in alignment with UNTSO strategic goals. Although the civilian staffing review recognized that the functions of training are normally managed under Human Resources Management, it was recommended, considering the size of the mission, that the unit be placed under the Office of the Chief;

(b) **Service Delivery Management (formerly Office of the Deputy Chief of Mission Support)**. It is proposed that the Office of the Deputy Chief of Mission Support be renamed Service Delivery Management and that the post of Deputy Mission Support Officer (P-5) be reassigned as Chief of Section, Service Delivery Management. The title "Deputy Chief of Mission Support" is no longer utilized in peacekeeping missions, and its reclassification as Chief of Section, Service Delivery Management, would reflect ongoing organizational needs (separation of service delivery and supply chain management functions) and ensure clarity in leadership roles and alignment with the mission support structure guidance. It is also proposed that one post of Administrative Assistant (Field Service) be redeployed from the Office of Mission Support to strengthen service delivery capacities, noting that the Office is redeploying the post of Administrative Officer (Field Service) and an Administrative Assistant (Local level) to the Office of the Chief of Mission Support, as reflected in paragraph 5.II.24 (a) (i);

(c) **Medical**. Reclassification of one Medical Officer from the Field Service category to a post of Medical Officer (P-4). Medical has two posts (one Field Service and one Local level), and the Field Service post (FS-7) is a dually classified post at the P-4 level. Given the discontinuation of dual classifications, the civilian staffing review recommended regularizing the post as a Medical Officer (P-4), who would be responsible for managing the Local level post (Nurse) in the unit and providing medical care to UNTSO personnel, both military and civilian, to ensure their health and well-being across the mission's area of operations;

(d) **Human Resources Management**. Reclassification of one Chief Human Resources Officer post from the Field Service category to a P-4 post. Human Resources Management currently has 15 posts (6 Field Service and 9 Local level), including 1 Field Service post (FS-7) that is dually classified post as a P-4 post. Given the discontinuation of dual classifications, the civilian staffing review recommended regularizing the post as a P-4 Chief Human Resources Officer, who would be responsible for managing the section, which in 2026 would include 12 posts (4 Field Service and 8 Local level), as 2 posts (1 Field Service and 1 Local level) are proposed for redeployment to Learning and Development, as explained in paragraph 5.II.24 (a) (iv);

(e) **Supply Chain Management**. Supply Chain Management provides a full spectrum of administrative and end-to-end logistics services support for the operations of UNTSO and the Office of the Special Coordinator for the Middle East Peace Process across several countries

and in over 40 different storage locations. It includes Supply Chain Performance and Business Intelligence, Acquisition Planning, Procurement, Centralized Warehouse and Movement Control. Proposals are as follows:

(i) **Acquisition Planning**. It is proposed that the unit be renamed Acquisition Management, and would involve: the reassignment of one post of Claims Assistant (Field Service) as an Acquisition Planning Officer (Field Service), Chief of Unit; the redeployment of one Information Systems Assistant (Local level) from Field Technology Services to the unit to which the post would be reassigned as an Acquisition Management Assistant (Requisitioner); and the reassignment of one Movement Control Assistant (Local level) as an Acquisition Planning Assistant (Local level). The proposed changes would address the recommendation from the Office of Internal Oversight Services audit to improve the acquisition process for goods and services and improve the management of critical operations, particularly in Receiving, Inspection and Property Disposal;

(ii) **Movement Control**. As reflected in paragraphs 5.II.24 (a) (ii) and (g), it is proposed that two posts be redeployed out to fill capacity gaps in other areas of operations;

(f) **Engineering and Facilities Management**. Reclassification of one Engineer post from the Field Service category to the P-3 level. There are 12 posts (2 Field Service and 10 Local level), including 1 Field Service post (FS-6) that is dually classified as a P-3 post. Given the discontinuation of dual classifications, the civilian staffing review recommended regularizing the post as an Engineer (P-3), who would be responsible for managing the 11 posts in the unit that provides support to all observation posts, patrol bases and UNTSO offices (as well as Office of the Special Coordinator for the Middle East Peace Process offices) across its various locations;

(g) **Transport**. Redeployment of one post of Vehicle Technician (Local level) from Jerusalem to Lebanon, and redeployment of one post of Movement Control Assistant (Local level) from Movement Control to Transport, to be reassigned as an Administrative Assistant. The post changes would strengthen the existing capacities in Transport, which provides transportation services to the mission headquarters, outstations, liaison offices and observation posts, and address the shift in work from routine maintenance to the refurbishment of light armoured vehicles, the majority of which is undertaken by Observer Group Lebanon.

5.II.25 With regard to non-post resources, the review identified a few areas in which, over time, UNTSO has improved its services by implementing cost-efficient and effective initiatives that have informed the 2026 programme budget as follows:

(a) **Vehicle fleet management**. The refurbishment of armoured vehicles from closing or downsizing missions in lieu of new acquisitions has proven to be a cost-effective and efficient alternative to new acquisitions. This approach reduces financial outlay and maximizes the utilization of United Nations resources. In addition, the mission plans to lease light passenger vehicles from UN Fleet in 2026, which would reduce financial outlay, while granting the mission access to newer, environmentally friendly and technologically advanced vehicles without the full cost of ownership. It also allows for easy fleet adjustments based on operational needs. The introduction of hybrid vehicles represents a step towards sustainable and environmentally responsible transportation. With three hybrid vehicles already in operation, UNTSO plans to acquire an additional eight through leasing in 2026, which would result in lower fuel consumption;

(b) **Energy-saving measures**. Following the implementation of energy-saving measures at mission headquarters, including light-emitting diode lighting and a variable refrigerant flow air-conditioning system, energy consumption decreased by 14 per cent in 2024 compared with 2023, decreasing to approximately 114,700 kWh, which is expected to stabilize or decrease in 2025 and 2026. Fuel expenditure decreased in 2024 compared with the period 2020–2023, due primarily to the installation of solar panels at three locations, reducing dependence on fuel-powered generators. With plans to install solar panels at nine additional locations in 2025,

further reductions in fuel consumption are anticipated in 2026. Consequently, the generator fuel budget for all 12 locations in 2026 is projected at 60,000 litres, down from 119,300 litres in 2024. Expanding solar energy usage will continue to enhance efficiency, sustainability and cost savings across operations;

(c) **Field remote infrastructure monitoring**. In 2026, the mission will continue to implement the field remote infrastructure monitoring initiative, which began in 2024. The initiative represents a crucial Internet of things-based platform tailored for real-time monitoring and management of essential resources (i.e. water, electricity and fuel) in remote areas. By facilitating precise and timely data collection, it allows UNTSO to make informed decisions regarding resource allocation, analyse consumption trends and anticipate potential shortages. The integration of advanced data analytics significantly boosts operational efficiency by pinpointing areas for improvement, fostering sustainability and optimizing resource utilization. Robust reporting capabilities enhance transparency and accountability, ensuring effective communication with stakeholders. Field remote infrastructure monitoring also incorporates automation to refine resource management processes, such as refuelling generators and maintaining a steady power supply during critical operations. The system's real-time monitoring capability allows for automated responses to fluctuating conditions, thereby improving operational readiness and efficiency while minimizing delays. Although the impact of field remote infrastructure monitoring may not always manifest itself in initial short-term cost reductions, its role in streamlining processes, improving decision-making and supporting sustainability initiatives optimizes resource management, enhances operational efficiency, minimizes waste over time and contributes to long-term operational savings and more effective resource utilization, ultimately reinforcing the overall objectives of the mission.

5.II.26 Another significant advancement has been the transition to Microsoft Teams telephony, replacing in 2026 outdated Internet Protocol phone systems. Microsoft Teams telephony offers numerous benefits, including significant cost savings by eliminating the need for traditional phone hardware and reducing maintenance expenses. It seamlessly integrates with Microsoft 365 applications, providing a unified communication experience. Beginning in 2026, the phased elimination of Internet Protocol phones will progressively reduce the need for Cisco licences until they are completely discontinued. This cost-effective strategy reinforces the mission's commitment to financial efficiency while enhancing operational effectiveness and the overall user experience.

5.II.27 The review also highlighted the need to strengthen the mission's capacities for Arabic language interpreters, who would bridge cultural and linguistic gaps and facilitate better understanding, clearer exchanges and more efficient operations due to the increasingly complex and diverse operational requirements in the region.

5.II.28 The budgetary impact of the aforementioned changes has been calculated on a cost neutral basis, as reflected in paragraphs 5.II.33 (a) and (b). Notwithstanding, the proposed budget for 2026 reflects a net increase of $126,200 under other changes compared with the approved budget for 2025 that could not be accommodated within existing capacities, as explained in paragraphs 5.II.33 (c) and (d).

5.II.29 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 5.II.6 to 5.II.9.

Table 5.II.6

5.II.30 Additional details on the distribution of the proposed resources for 2026 are reflected in table 5.II.9 and figure 5.II.I.

5.II.31 As shown in table 5.II.6, the overall resources proposed for 2026 amount to $43,335,100, reflecting a decrease of $854,500 compared with the approved budget for 2025. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Table 5.II.9

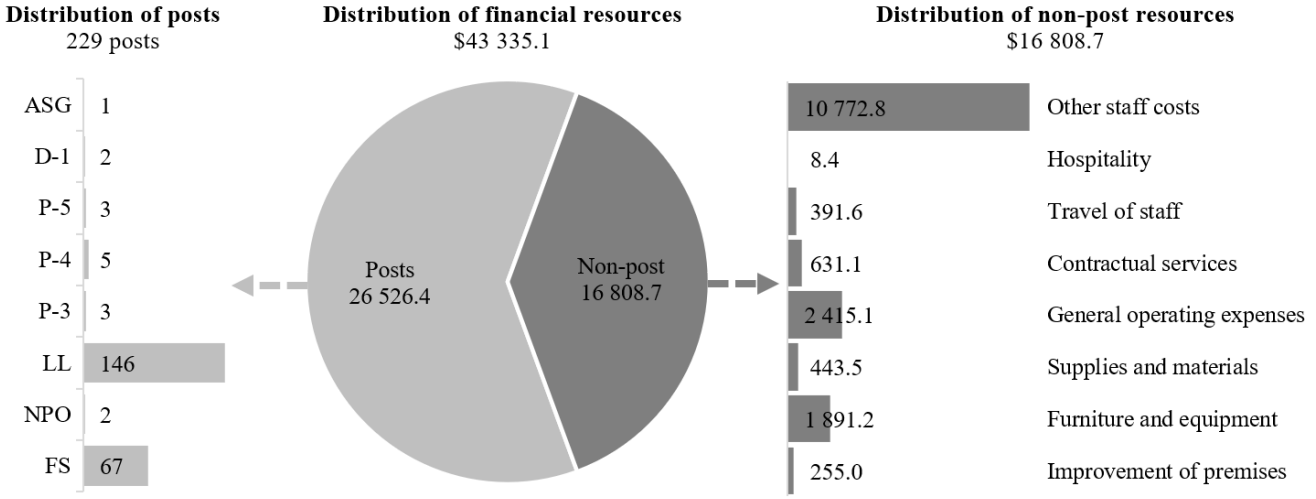
Figure 5.II.I
Distribution of proposed resources for 2026

(Number of posts/thousands of United States dollars)



Explanation of variances by factor and component

Overall resource changes

Technical adjustments

5.II.32 As shown in table 5.II.6, resource changes reflect a decrease of $980,700 under furniture and equipment relating to the removal of non-recurrent provisions for the purchase of six units of mid-range optical equipment to replace ageing observation equipment at observation posts on the Golan, which were approved for 2025.

Other changes

5.II.33 As shown in table 5.II.6, resource changes reflect a net increase of $126,200, which includes cost-neutral changes resulting from the spending review and other changes that could not be accommodated with existing capacities, as explained below:

Cost-neutral changes resulting from the spending review

(a) **Posts**. A net increase of $119,600 reflects the proposed reclassification of one Chief Human Resources Officer (P-4), one Medical Officer (P-4) and one Engineer (P-3) from the Field Service category, as explained in paragraphs 5.II.24 (c), (d) and (f) ($104,500); and the redeployment of one Vehicle Technician (Local level) from Jerusalem to Lebanon ($15,100), as explained in paragraph 5.II.24 (g) (see also annex II for further information on the functions of the proposed post changes);

(b) **Non-posts**. The net decrease of $119,600 reflects:

(i) An increase of $44,000 under contractual services, due mainly to the need to strengthen the mission's capacities for Arabic interpreters, as explained in paragraph 5.II.27;

(ii) An increase of $392,000 under general operating expenses that would provide for:

a. Increased maintenance costs for vehicles, as explained in paragraph 5.II.25 (a) ($85,300);

b. Leasing of eight hybrid 4 x 4 vehicles in lieu of acquisition, as explained in paragraph 5.II.25 (a) ($46,400);

c. Freight charges ($85,800);

d. Increased shared security services costs with the Department of Safety and Security and the Security Operations Centre in Jerusalem ($69,000);

e. Establishment of a cleaning and pest control services contract in lieu of hiring cleaners ($50,000);

f. Installation of a closed-circuit television system in Israel-Syria Mixed Armistice Commission (ISMAC) House in Damascus ($23,000);

g. Increase in the premium of the malicious acts insurance policy, due mainly to the increase in the number of exposures ($16,400);

h. Increase in the requirements of hardware supplies and engineering tools such as welding and drilling machines and air compressors ($16,100);

(iii) A decrease of $37,200 under supplies and materials, due mainly to a decrease in fuel consumption, as explained in paragraph 5.II.25 (b) ($17,300) and to reduced requirements for uniforms at mission headquarters in Jerusalem, as uniforms were purchased in 2024 ($13,900);

(iv) A decrease of $569,600 under furniture and equipment, due mainly to a reduction in the planned number of vehicles to be replaced in 2026, as explained in paragraph 5.II.25 (a);

(v) An increase of $51,200 under improvement of premises that would provide for the replacement of damaged and degraded ballistic glasses at observation posts on the Alpha side of the Golan to ensure clear vision and provide protection for military observers during their 24-hour observation activities;

Other changes that could not be absorbed within existing capacities (increase of $126,200)

(c) **Posts**. An increase of $28,500 is proposed to cover requirements for the upward reclassification of a Field Security Officer (P-3) to Deputy Chief Security Officer (P-4) (see annex II);

(d) **Other staff costs**. An increase of $88,000 is proposed to strengthen mission support capabilities in Protocol as a result of the increasing requirements for protocol support services;

(e) **Contractual services**. The increase of $9,700 relates to the adjustment of standard information and communications technology rates for non-field personnel outside United Nations Headquarters.

Other information

5.II.34 Information on advance booking for air travel is reflected in table 5.II.10. The ongoing conflict in Israel and the Middle East presented operational challenges for offices in the region, leading to travel disruptions and heightened security measures that undermined efforts to further enhance compliance performance. With continuous monitoring of regional developments and close collaboration with its military pillars, UNTSO strategically devised and implemented alternative travel routes while employing proactive planning to ensure compliance with the advance purchase policy.

III. United Nations Military Observer Group in India and Pakistan

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

5.III.1 The United Nations Military Observer Group in India and Pakistan (UNMOGIP) is responsible for observing and reporting to the Secretary-General any developments pertaining to the observance of the ceasefire, pursuant to Security Council resolution 307 (1971). In the resolution, the Council demanded that a durable ceasefire and cessation of all hostilities in all areas of conflict be strictly observed and remain in effect until withdrawals take place, as soon as practicable, of all armed forces to their respective territories and to positions which fully respect the ceasefire line in Jammu and Kashmir supervised by UNMOGIP. To complement its ceasefire monitoring efforts, UNMOGIP conducts balanced investigations on any received complaints of alleged ceasefire violations filed by parties.

Programme of work

Objective

5.III.2 The objective, to which UNMOGIP contributes, is to ensure that developments pertaining to ceasefire violations along the line of control are monitored in accordance with the mandate of UNMOGIP as contained in Security Council resolution 307 (1971).

Strategy and external factors for 2026

5.III.3 To contribute to the objective, UNMOGIP will:

(a) Continue to focus on the core mandated tasks of prevention, early warning, observation and reporting, and confidence-building;

(b) Provide timely and detailed reports on relevant developments in its area of operations in accordance with the implementation of its mandate;

(c) Continue to employ military observers on both sides of the line of control for the conduct of patrols, inspections and investigations of alleged violations of the ceasefire and the performance of other tasks in the vicinity of the line of control to the extent permitted by the host countries.

5.III.4 The above-mentioned work is expected to result in adherence to the ceasefire through the presence of United Nations military observers.

5.III.5 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Host countries cooperate with UNMOGIP in observing the ceasefire and refraining from hostilities and any action that may aggravate the situation or endanger international peace as embodied in Security Council resolution 307 (1971);

(b) India and Pakistan remain willing to support UNMOGIP in the conduct of its activities for the delivery of its mandate.

5.III.6 The mission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. This includes ensuring that the United Nations military observers engage in a comprehensive manner with local communities, among both men and women, to ensure that the mission has a gender-sensitive understanding of community perspectives of the situation on the ground and to facilitate the planning and conduct of mission operations.

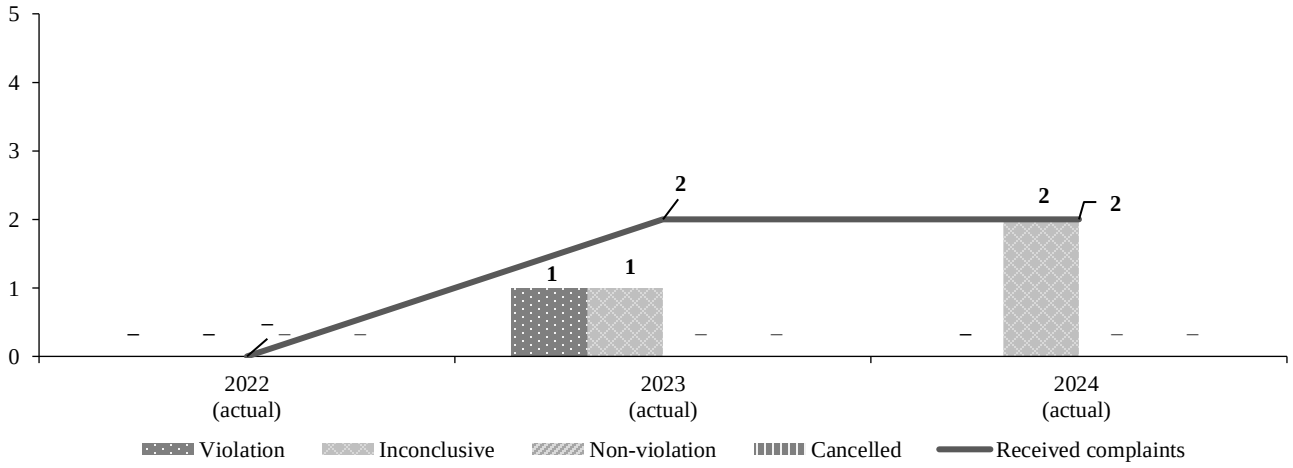
Programme performance in 2024

Limited number of complaints concerning alleged ceasefire violations

5.III.7 To implement its mandate, UNMOGIP undertakes best efforts to monitor the ceasefire between India and Pakistan at the line of control. During 2024, the mission ensured the supervision of the ceasefire through the presence of United Nations military observers at the 10 UNMOGIP field stations on both sides of the line of control. UNMOGIP continued to implement its mandate by performing core field tasks. UNMOGIP received two complaints concerning alleged ceasefire violations in 2024. In addition, the mission received 14 petitions from recognized political groups on the situation at and in the vicinity of the line of control in Jammu and Kashmir, expressing concern over developments affecting Kashmir, in both India and Pakistan.

5.III.8 Progress towards the objective is presented in the performance measure below (see figure 5.III.I).

Figure 5.III.I
Performance measure: number of investigated complaints (annual)



Planned results for 2026

Result 1: enhanced observation along the line of control

Programme performance in 2024 and target for 2026

5.III.9 The mission's work contributed to observation and reporting along the line of control using existing observation equipment, which did not meet the planned target of enhanced observation and reporting along the line of control with all field stations using the new observation equipment. The target was not met owing to the delayed acquisition of new observation equipment, which started to be delivered to all field stations only in the last quarter of 2024.

5.III.10 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.III.1).

Table 5.III.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced field observation and reporting at field stations with the new observation equipment	Use of new software to store, review and analyse data by a limited number of field stations	Observation and reporting along the line of control using existing observation equipment	Quality of observation and reporting maintained by all field stations	Quality of observation and reporting enhanced in all field stations, with all military observers trained in the use of new equipment

Result 2: improved situational awareness through geospatial information systems

Programme performance in 2024 and target for 2026

5.III.11 The mission's work contributed to situational awareness through the planning of patrols using existing operational maps, which did not meet the planned target of patrols planned through pilot testing of operational maps based on geospatial information systems with additional features. The target was not met owing to delayed implementation related to the need for an adjustment of software to align operational maps with location-specific data.

5.III.12 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 5.III.2).

Table 5.III.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Planning of observer missions through the introduction of the first stage of an operational map	Identification of requirements to enhance operational maps to ensure that they are fit for purpose	Situational awareness through the planning of patrols using existing operational maps	Enhanced security and improved planning of patrols through the use of comprehensive operational maps with real-time information	Enhanced security and improved planning of patrols through the use of comprehensive operational maps with real-time information and based on stable software, and with all military observers trained in use of the software

Result 3: continued presence at the line of control

Proposed programme plan for 2026

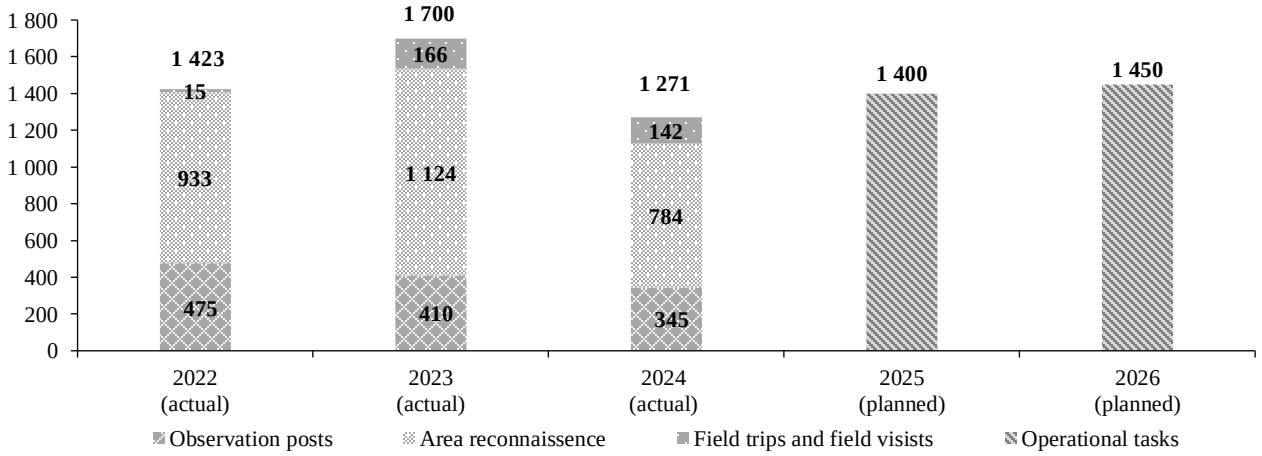
5.III.13 The mission monitors developments pertaining to ceasefire violations at the line of control through the presence of United Nations military observers at UNMOGIP field stations on both sides of the line of control. These military observers conduct patrols, inspections and investigations of alleged violations of the ceasefire.

Lessons learned and planned change

5.III.14 The lesson for the mission was a need to optimize available resources to combine operational tasks to ensure a continued presence at the line of control. In applying the lesson, the mission will leverage operational planning to maintain its presence at the line of control through the execution of observation post and area reconnaissance tasks, combining tasks whenever possible. The presence of the mission will enable it to observe the situation at the line of control and obtain confirmation of alleged ceasefire violations.

5.III.15 Expected progress towards the objective is presented in the performance measure below (see figure 5.III.II).

Figure 5.III.II
Performance measure: presence at the line of control (annual)
(Number of operational tasks)



Legislative mandates

5.III.16 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to UNMOGIP.

Security Council resolutions

39 (1948)
47 (1948)
307 (1971)

Deliverables

5.III.17 Table 5.III.3 lists all deliverables of UNMOGIP.

Table 5.III.3
Deliverables for 2026, by category and subcategory

Category and subcategory
C. Substantive deliverables
Consultation, advice, and advocacy: regular engagement with military personnel of host nations.
D. Communication deliverables
Outreach programmes, special events and information materials: briefings and presentations to troop-contributing countries' ambassadors and military attachés.
Digital platforms and multimedia content: UNMOGIP website.
E. Enabling deliverables
Administration: investigation reports, field trips reports, incident reports, daily, weekly, monthly and annual situation reports, monthly induction training of incoming military observers, and bimonthly training of officers-in-charge.

B. Proposed post and non-post resource requirements for 2026

Overview

5.III.18 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 5.III.4 to 5.III.6.

Table 5.III.4

5.III.19 Additional details on the distribution of the proposed resources for 2026 are reflected in table 5.III.7 and figure 5.III.III.

5.III.20 As shown in table 5.III.7, the overall resources proposed for 2026 amount to $10,080,500, reflecting an increase of $3,000 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

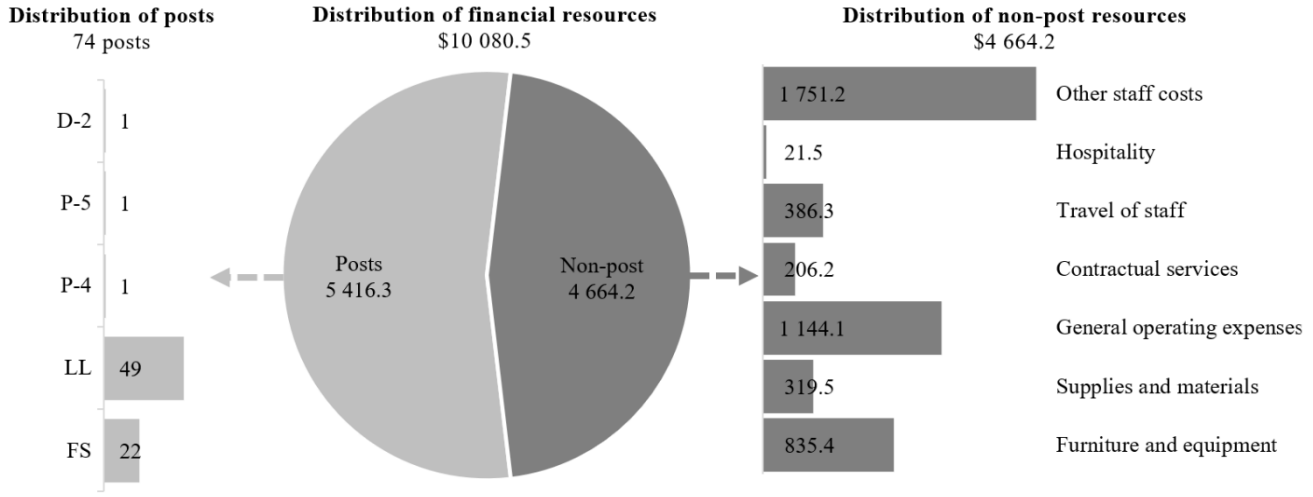
Distribution of proposed resources for 2026

(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Overall resource changes

Other changes

5.III.21 As shown in table 5.III.4, resource changes reflect an increase of $3,000 under contractual services, due to the adjustment of standard information and communications and technology rates for non-field personnel outside United Nations Headquarters for 2026. Resource changes also reflect cost-neutral changes from contractual services ($36,500), general operating expenses ($49,600) and supplies and materials ($102,000) to furniture and equipment ($191,100) to cover operational requirements.

Other information

5.III.22 Information on advance booking for air travel is reflected in table 5.III.8. UNMOGIP continues to raise awareness among staff and emphasize the importance and need to comply with the advance purchase rule. Managers are asked to implement preventive and monitoring corrective measures. Compliance rates are mentioned, and statistics and trends are distributed to managers on a quarterly basis.

Annex I

Organizational structure and post distribution for 2026

Seven charts showing the organization structure of section 5, Peacekeeping operations are presented below. Charts A and B reproduce the approved structure as contained in A/79/6 (Sect. 5) for the Department of Peace Operations while charts C and D present the proposed structure for 2026 for the Department. Chart E reproduces the approved structure as contained in A/79/6 (Sect. 5) for the United Nations Truce Supervision Organization (UNTSO), while chart F presents the proposed structure for 2026 for UNTSO. Chart G presents the proposed structure for 2026 for the United Nations Military Observer Group in India and Pakistan.

Justification for the proposed changes

Department of Peace Operation

The largest amount of work in the Office of Military Affairs is driven by the scale of the peacekeeping operations supported, which depends on two factors: (a) the total authorized military personnel; and (b) the number of troop-contributing countries. Therefore, the present proposal concentrates the staffing resources of the Office of Military Affairs where they are most needed in support of military components of peacekeeping operations, namely, in the functions performed by the proposed Military Planning, Operations and Analysis Section, the Military Doctrine and Performance Section and the existing Military Force Generation Section. Another major workload driver are events prompting changes in military capabilities, many of which involve incidents or conflict trends that necessitate new policies and training (e.g., the increased prevalence of uncrewed aerial systems creates the need for new troop capabilities), hence the proposed merger of the Policy and Doctrine Team and the Military Performance Evaluation Team, and the proposed creation of the Military Expertise Section. Finally, the reform initiatives in 2019 shifted parts of management responsibilities from the Executive Office of the Department of Peacekeeping Operations to the Office of Military Affairs. Accordingly, it is proposed to create a Military Management and Support Section focusing on the strategic planning and administration of the Office of Military Affairs.

United Nations Truce Supervision Organization

The establishment of the Protocol, the Learning and Development and the Environment Units under the Office of the Chief of Mission Support is to enhance the oversight of these functions. With better transparency, the Office of the Chief of Mission Support can respond more effectively to mission needs, ensuring that critical areas receive necessary attention. The realignment would help to close operational gaps and utilize resources more effectively, while providing the mission with the flexibility needed to address emerging challenges. As a result of the structural realignment, there is an overall more efficient management of the learning and development, the environmental and the protocol functions, as well as a greater level of autonomy and transparency to address existing structural gaps. It would allow the Chief of Mission Support to focus on strategic work as it relates to its role by allowing more autonomous operation of these newly created units.

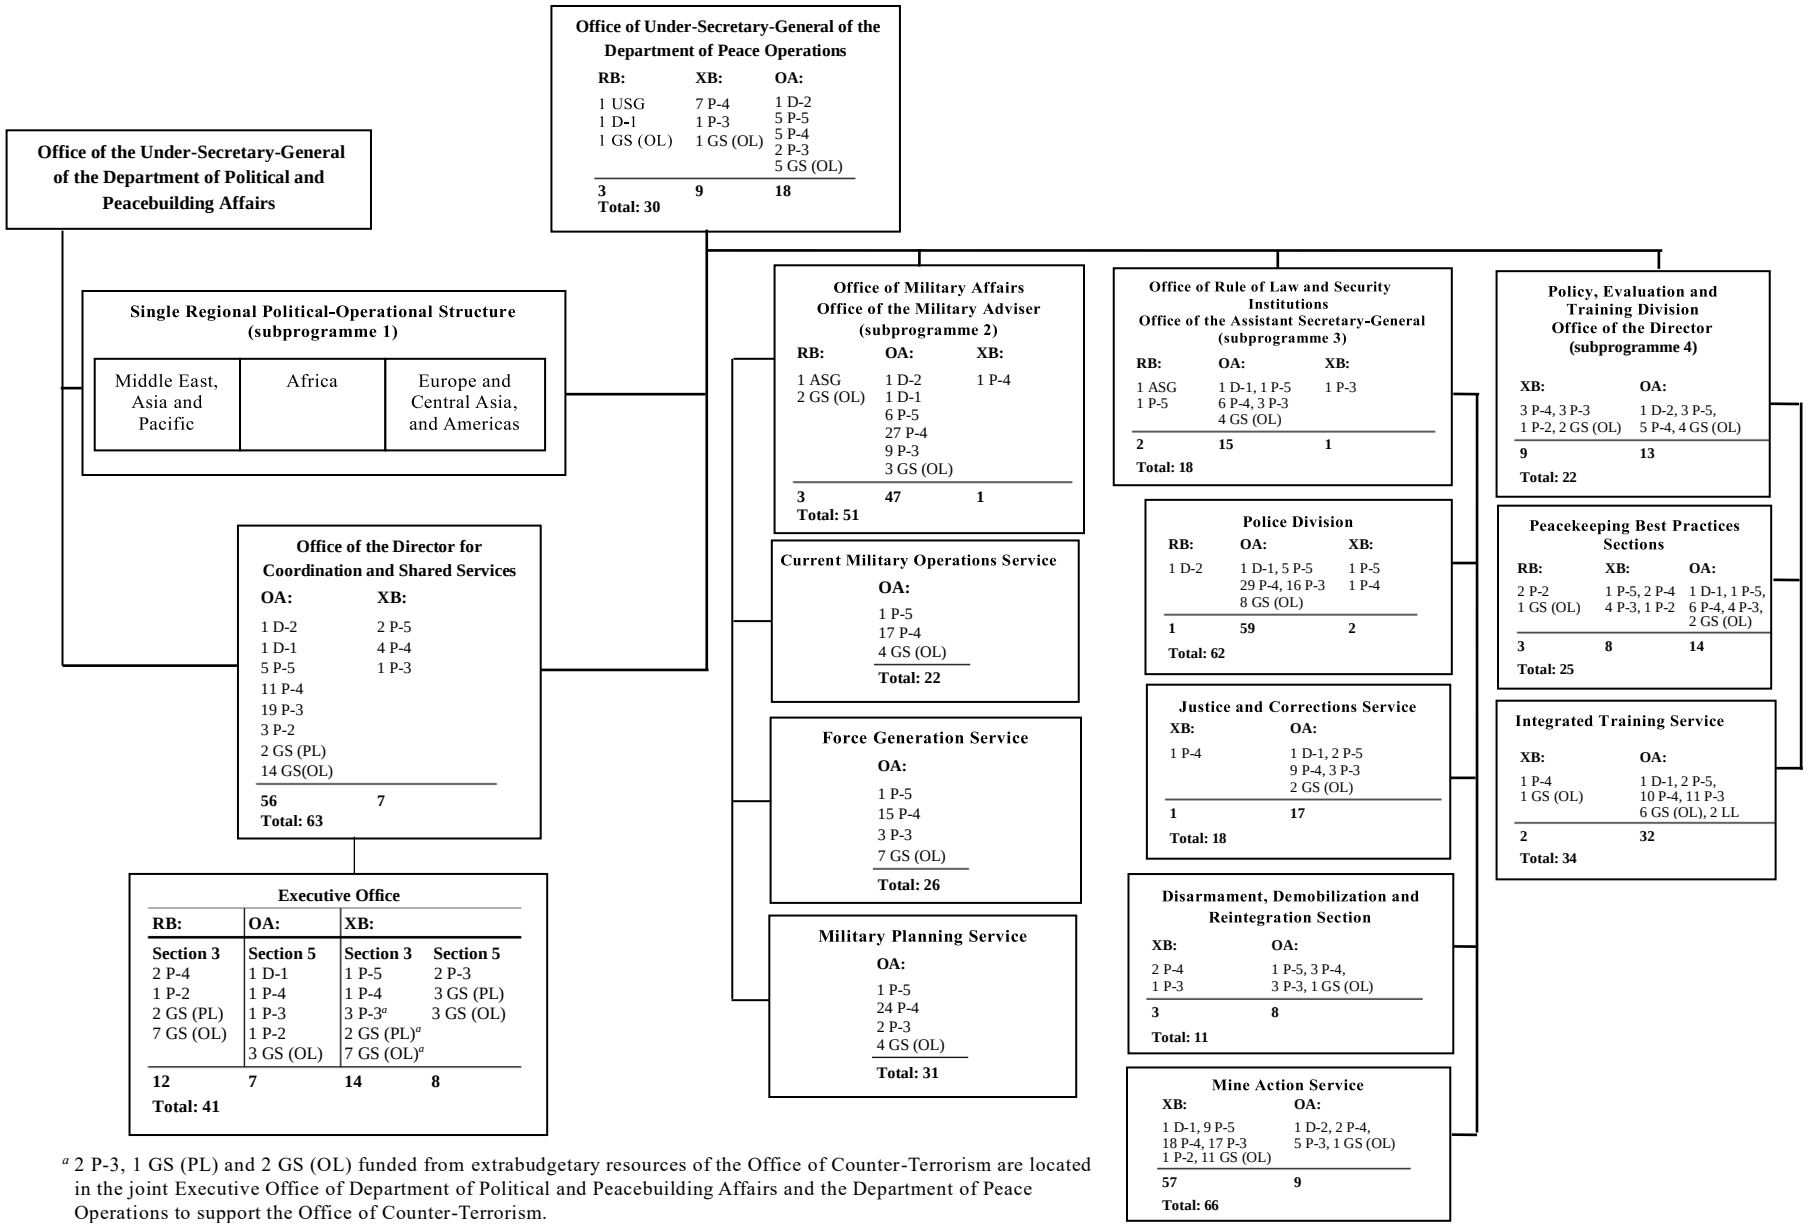
Protocol. The role of Protocol would be to facilitate effective liaison between UNTSO and the Office of the Special Coordinator for the Middle East Peace Process, host Government counterparts and the diplomatic communities by establishing and maintaining contacts with key stakeholders. Owing to operational complexities and fluid realities on the ground, the Protocol Unit requires two posts, supplemented by a general temporary assistant, as operational requirements have increased and require additional resources.

Environment. The Environment stand-alone capacity has been placed under the Office of the Chief of Mission Support to ensure greater oversight over environmental activities, which is critical to ensure compliance and sustainable practices. With its role in reviewing activities with environmental impacts and tracking mission-wide environmental performance, the placement under

the Office of the Chief of Mission Support ensures more effective oversight and integration of these priorities and alignment with United Nations policies and strategic goals.

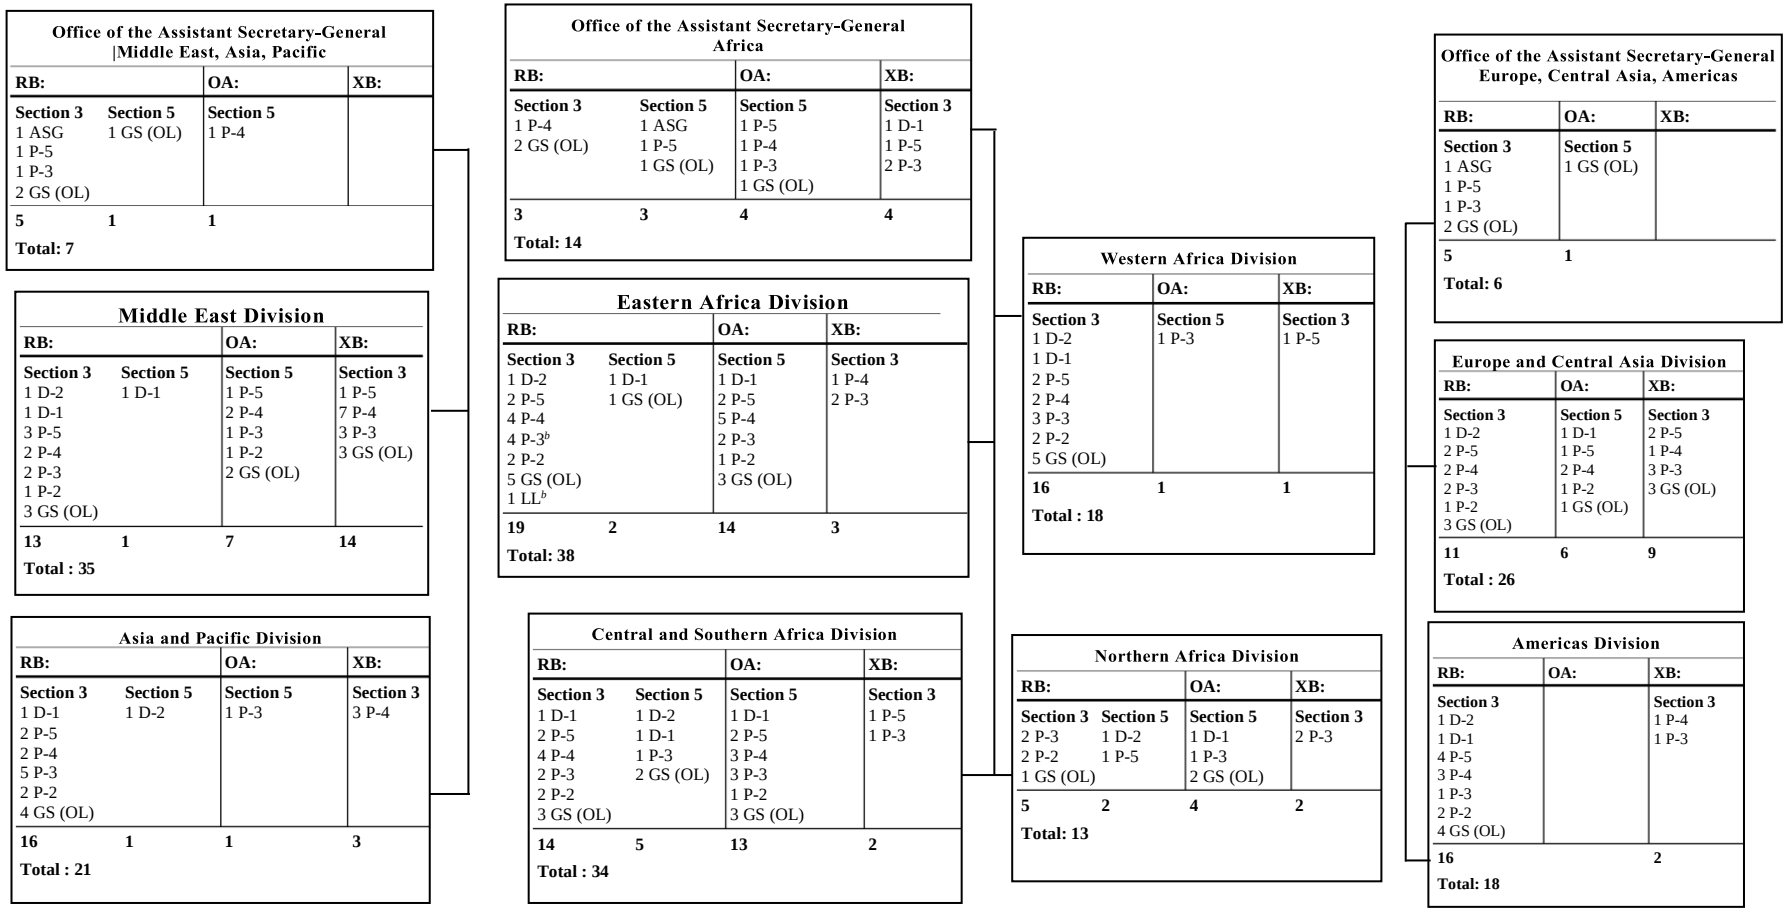
Learning and Development. There is a recognized gap in training and staff development. The mission has already initiated a restructuring process to ensure that all staff have access to targeted training, resources and ongoing development opportunities, in alignment with the strategic goals of UNTSO. A standalone Learning and Development Unit (redeployed from Human Resources Management) would allow for integrated civilian and military training, career growth and upskilling/reskilling of UNTSO workforce, ensuring a more professional and prepared workforce. The scope is being expanded to training as well as staff development areas, focusing on two key components: delivering training to enhance knowledge and expertise; and fostering career development by assessing staff aspirations, qualifications and gaps. The new unit will design personalized development paths, offer targeted training and cross-training, and identify targeted external learning opportunities to support staff in achieving their professional goals.

A. Department of Peace Operations: approved organizational structure and post distribution for 2025



[a] 2 P-3, 1 GS (PL) and 2 GS (OL) funded from extrabudgetary resources of the Office of Counter-Terrorism are located in the joint Executive Office of Department of Political and Peacebuilding Affairs and the Department of Peace Operations to support the Office of Counter-Terrorism.

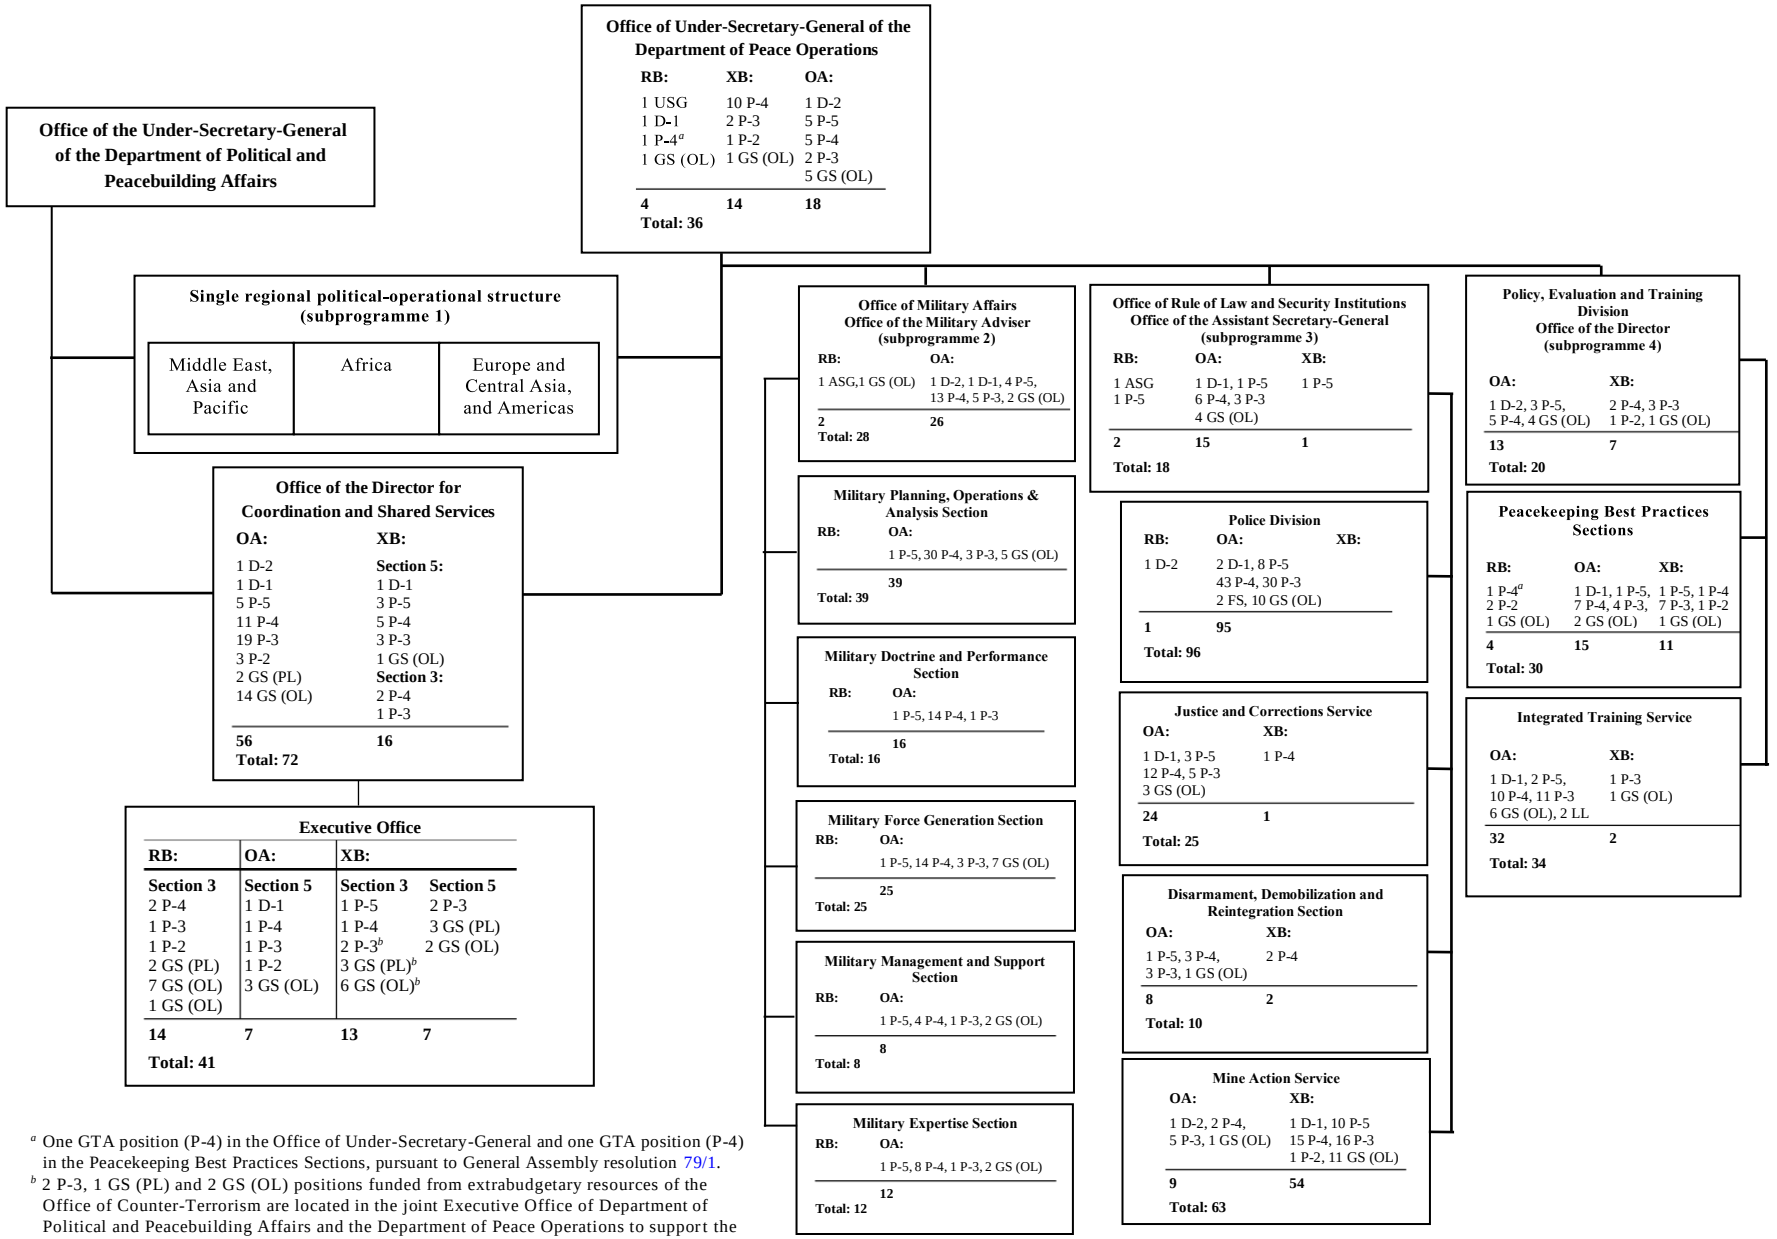
B. Single regional political-operational structure (subprogramme 1)[a]



[a] In line with General Assembly resolution 72/262 C, in which the Assembly stressed that the actions to restructure the United Nations peace and security pillar should be implemented with full respect for the relevant mandates, decisions and resolutions of the Assembly and of the Security Council, without changing established mandates, functions or funding sources of the peace and security pillar, information on post resources under section 3 are provided for information purposes.

[b] 1 P-3 post and 1 Local level post based in Nairobi.

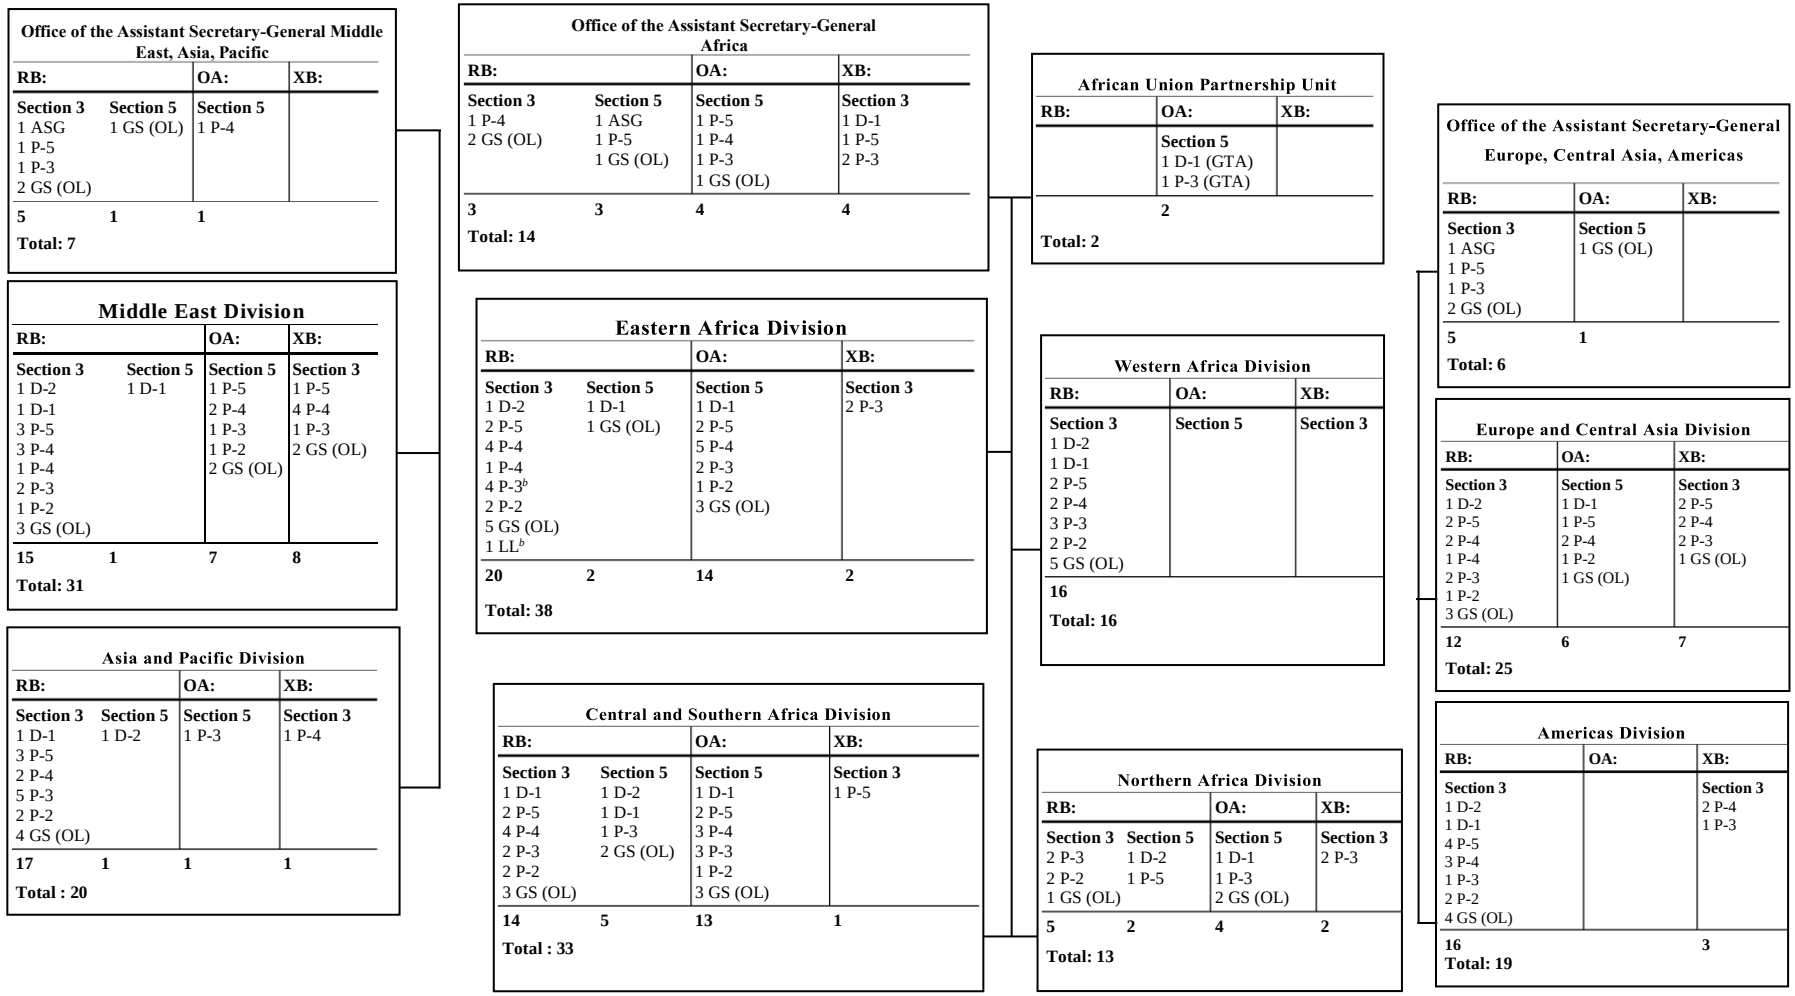
C. Department of Peace Operations: proposed organizational structure and post distribution for 2026



[a] One GTA position (P-4) in the Office of Under-Secretary-General and one GTA position (P-4) in the Peacekeeping Best Practices Sections, pursuant to General Assembly resolution 79/1.

[b] 2 P-3, 1 GS (PL) and 2 GS (OL) positions funded from extrabudgetary resources of the Office of Counter-Terrorism are located in the joint Executive Office of Department of Political and Peacebuilding Affairs and the Department of Peace Operations to support the

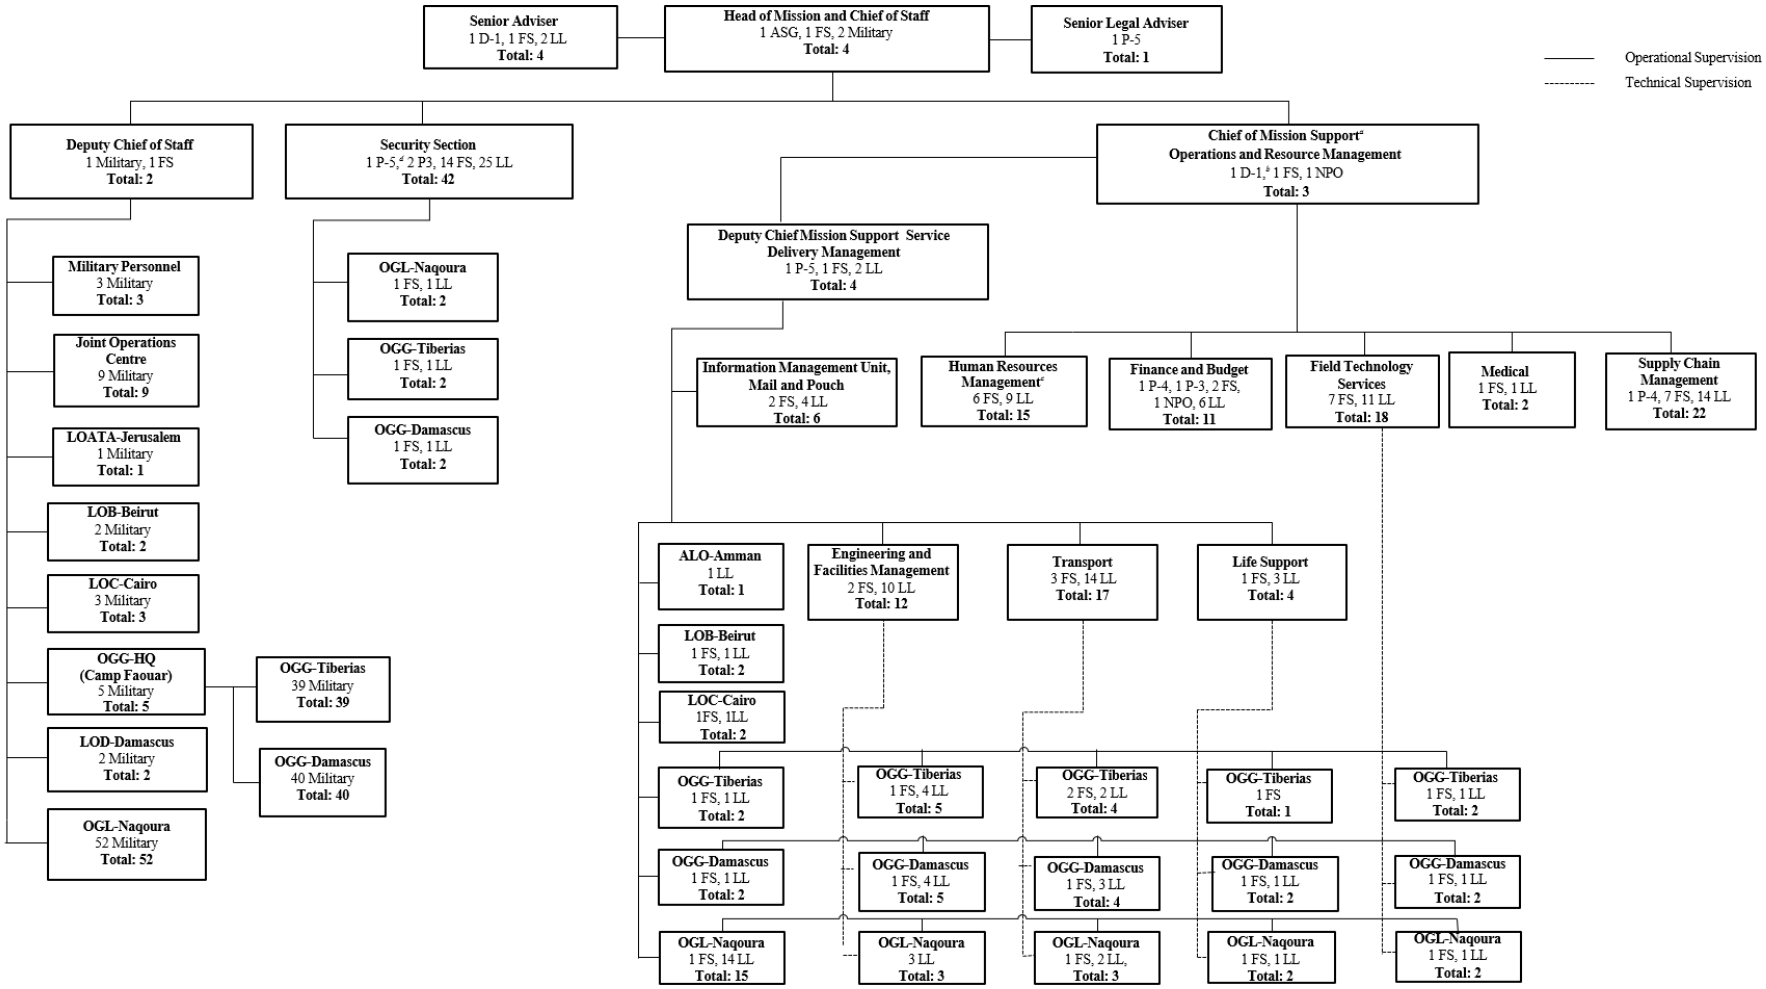
D. Single regional political-operational structure (subprogramme 1)[a]



[a] In line with General Assembly resolution 72/262 C, in which the Assembly stressed that the actions to restructure the United Nations peace and security pillar should be implemented with full respect for the relevant mandates, decisions and resolutions of the Assembly and of the Security Council, without changing established mandates, functions or funding sources of the peace and security pillar, information on post resources under section 3 are provided for information purposes.

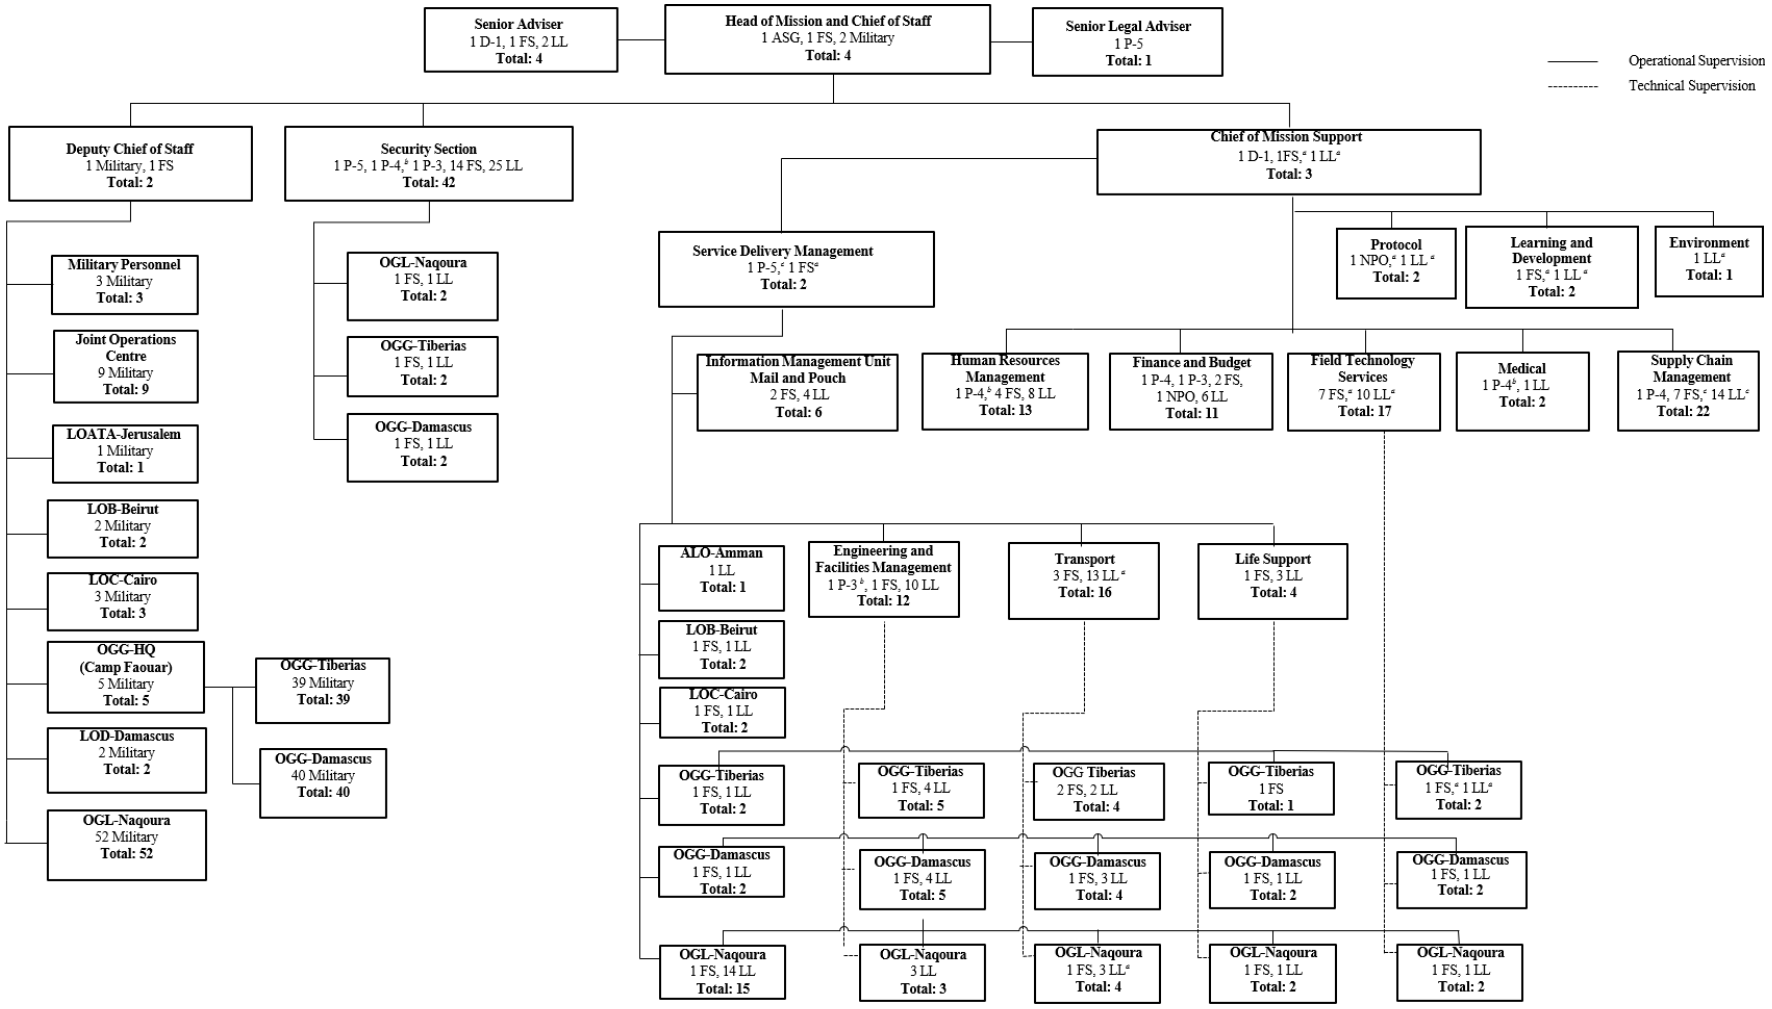
[b] 1 P-3 post and 1 Local level post based in Nairobi.

E. United Nations Truce Supervision Organization: approved organizational structure and post distribution for 2025



[a] D-1 Chief of Mission Support for United Nations Truce Supervision Organization and the Special Coordinator for the Middle East Peace Process.
[b] Includes Protocol and Occupational Health and Safety.
[c] Includes Travel Unit and Training Unit.
[d] Reclassification.

F. United Nations Truce Supervision Organization: proposed organizational structure and post distribution for 2026



[a] Redeployment.
[b] Reclassification.
[c] Reassignment.

G. United Nations Military Observer Group in India and Pakistan

Annex II

Summary of proposed post changes, by component and subprogramme

	Posts	Grade	Description	Rationale
United Nations Truce Supervision Organization				
Office of the Chief of Mission Support	1	FS	Redeployment of one Administrative Officer (FS) and Administrative Assistant (LL) from the Service Delivery Management to the Office of the Chief of Mission Support	The proposed redeployments reflect the outcome of the civilian staff review as explained in paragraph 5.II.24 (a) (i). The two posts would support the work of the Office and the Chief of Mission Support, who oversees and manages all administrative and support capabilities across the five countries in its area of operations, including the Office of the Special Coordinator for the Middle East Peace Process. The proposed redeployment would bridge the insufficient administrative support gap identified in the Office, which has created challenges in maintaining efficient operations. The Administrative Officer and the Administrative Assistant would support the Chief of Mission Support, not only in various administrative support functions, but also in the management of a substantial portfolio of critical initiatives, such as United Nations reforms, change management, risk management, business continuity and anti-racism efforts. The redeployment would further ensure that the Office is better positioned to efficiently manage administrative functions, strengthen coordination across the mission and effectively drive key strategic priorities. The work previously undertaken by the two posts in Service Delivery Management would be redistributed across existing capacities.
	1	LL		
Service Delivery Management (formerly Office of the Deputy Chief of Mission Support)	(1)	FS		
	(1)	LL		
Protocol Unit	1	NPO	Redeployment of one Protocol Officer (NPO) from the Office of the Chief of Mission Support, and one Movement Control Assistant (LL) from Supply Chain Management, to be reassigned as Protocol Assistant	The proposed redeployments reflect the outcome of the civilian staff review, as explained in paragraph 5.II.24 (a) (ii). The role of the Protocol Unit is to facilitate effective liaison between UNTSO (and the Office of the Special Coordinator for the Middle East Peace Process), host Government counterparts and the diplomatic communities, by establishing and maintaining contacts with key stakeholders. Operational requirements have increased due to the complex and challenging operating and political environment which requires strengthening of capacities in this area. The functions of the two posts would include preparing correspondence, managing applications, coordinating document
	1	LL		
Office of Chief of Mission Support	(1)	NPO		
Supply Chain Management	(1)	LL		

	Posts	*Grade*	*Description*	*Rationale*
				delivery, liaising with government officials and providing visa briefings. The functions of the Movement Control Assistant that was redeployed would be carried out from existing capacities in the Unit.
Environment Unit	1	LL	Redeployment of one Environment Affairs Assistant (LL) from the Service Delivery Management	The proposed redeployment reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (a) (iii). The proposed redeployment and direct reporting to the Chief of Mission Support would ensure direct oversight of environmental performance and management mission-wide, in line with the environmental priorities of the Mission and Organization. The incumbent would support the Chief of Mission Support in ensuring sustainability, leading renewable energy initiatives, monitoring hybrid solar installations and ensuring green standards for construction projects; support waste management and water conservation efforts; conduct biannual assessments for compliance; and ensure adherence to environmental policies and regulations. The move would strengthen the ability of the Chief of Mission Support to oversee and integrate these crucial environmental responsibilities across the mission
Service Delivery Management (formerly Office of the Deputy Chief of Mission Support)	(1)	LL		
Learning and Development Unit	1	FS	Redeployment of two Human Resources Assistants (1 FS and 1 LL) from Human Resources Management Section, to be reassigned as Training Assistants	The proposed redeployments reflect the outcome of the civilian staff review, as explained in paragraph 5.II.24 (a) (iv). It would expand the focus of mission intervention and support in addressing staff learning and development needs. A stand-alone capacity with a career development component would allow for integrated civilian and military training, career growth and upskilling/reskilling of the UNTSO workforce, ensuring a more professional and prepared workforce, that would be aligned with the policy on training for all United Nations peacekeeping personnel. In partnership with relevant stakeholders, the two staff members would report directly to the Chief of Mission Support and work on planning and implementing the mission's learning and development programme.
	1	LL		
Human Resources Management	(1)	FS		
	(1)	LL		
Service Delivery Management	1	P-5	Reassignment of Deputy Chief of Mission Support (P-5) to Chief, Service Delivery Management (P-5)	The proposed reassignment reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (b). The change would reflect ongoing organizational needs and ensure clarity in leadership roles, while also aligning with the Mission Support structure for

	Posts	*Grade*	*Description*	*Rationale*
				peacekeeping mission, where the title of "Deputy Chief of Mission Support" is no longer utilized in peacekeeping missions. The incumbent would be responsible for the stewardship of personnel, financial and property resources under Service Delivery Management, which comprises Information Management, Engineering and Facilities Management, Transport, and Life Support, at headquarters and outstations.
Service Delivery Management	1	FS	Redeployment of Administrative Assistant (FS) from Office of the Chief of Mission Support	The proposed redeployment reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (b). The redeployment of the Administrative Assistant (FS) would ensure that Service Delivery Management is adequately resourced to effectively respond to the operational demands of Service Delivery Management, after redeploying two posts (Administrative Officer (FS) and Administrative Assistant (LL)) to the Office of the Chief of Mission Support.
Office of the Chief, Mission Support	(1)	FS		
Medical	1	P-4	Reclassification of Medical Officer (FS-7) to Medical Officer (P-4)	The proposed reclassification reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (c). The current Medical Officer (Doctor), who serves as the Chief of Unit, is dually classified at the P-4/FS-7 level. With the discontinuation of dual classifications, the FS post is proposed to be regularized at the P-4 level. The incumbent would continue to provide medical support to all mission personnel, including military observers.
	(1)	FS		
Human Resources Management	1	P-4	Reclassification of Chief Human Resources Officer (FS-7) to Human Resources Officer (P-4)	The proposed reclassification reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (d). The current Chief Human Resources Officer, who serves as the Chief of Unit, is dually classified at the P-4/FS-7 level. With the discontinuation of dual classifications, the FS post is proposed to be regularized at the P-4 level. The incumbent would continue to manage and implement human resources policies and support the mission on its human resources requirements.
	(1)	FS		
Supply Chain Management	1	FS	Reassignment of one Claims Assistant (FS) to Acquisition Planning Officer; and one Movement and Control Assistant (LL) as an Acquisition Planning Assistant	The proposed reassignments reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (e) (i). The Acquisition Management Unit (under Supply Chain Management) facilitates and guides Cost Centre Managers on the planning, development and management of the acquisition process for various services and commodities, taking into
	1	LL		

	Posts	*Grade*	*Description*	*Rationale*
				account different sourcing options, including global and regional systems contracts, local market conditions and logistics forecasting, and supports demand planning, which is the core activity of developing an accurate and comprehensive plan/forecast of the mission requirements for goods and services. The proposed reassignments would help to close existing gaps in this area and address the recommendation of the Office of Internal Oversight Services (OIOS), which emphasized the need for an Acquisition Management Unit to oversee resource and budget planning, including Acquisition Planning, Requisitioning and Contract Performance Evaluation, in order to streamline and improve the acquisition process for mission services and commodities. The Acquisition Planning Officer (FS) would also serve as the Chief of the Unit, and the Acquisition Planning Assistant (LL) would perform preliminary analysis and review of stock holdings, consumption patterns, procurement cycle times, requirements and forecasts of internal and external customers, and would highlight areas of concern for attention, to ensure timely decision-making and minimize potential distribution gaps.
Supply Chain Management	1	LL	Redeployment of Information Systems Assistant (LL) from Field Technology Services, to be reassigned as an Acquisition Management Assistant (Requisitioner)	The proposed redeployment reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (e) (i). The redeployment would strengthen the Acquisition Management Unit's capacities, particularly in receiving, inspection and property disposal. Currently, a single staff member handles these functions across two missions (UNTSO and the Office of the Special Coordinator for the Middle East Peace Process), leading to delays and reduced efficiency. Furthermore, the specialized skills required for these functions highlight a gap in staffing, and at least two trained staff members are needed to ensure effective and timely execution of these operations, which was further noted by OIOS, as explained above.
Field Technology Services	(1)	LL		
Engineering and Facilities Management	1	P-3	Reclassification of one Engineer (FS-6) to Engineer (P-3)	The proposed reclassification reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (f). The current Engineer is dually classified at the P-3/FS-6 level. With the discontinuation of dual classifications, the FS post is proposed to be regularized at the P-3 level. The incumbent would continue to provide high-level support and advice in this field, including applying
	(1)	FS		

	Posts	*Grade*	*Description*	*Rationale*
				standard engineering practices in the design, construction, maintenance and repair of various premises, and manage the various engineering projects in the mission area.
Transport	1	LL	Redeployment of one post of Vehicle Technician (LL) from Jerusalem to Lebanon	The proposed redeployment reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (g). The UNTSO Observer Group Lebanon supports the UNIFIL mandate through daily patrols along the Blue Line and in southern Lebanon, requiring armoured vehicles due to security risks and uncleared mines. The deteriorating terrain has led to increased vehicle wear and tear, necessitating regular maintenance that exceeds the current staffing capacity. The Observer Group Lebanon transport activities, managed by one Transport Officer and two vehicle mechanics, are insufficient to maintain 40 vehicles, manage spare parts and assist with Observer Group Golan vehicle repairs. To ensure continuous operational readiness and emergency response, additional capacity requirements would be filled with the proposed redeployment.
Transport	1	LL	Redeployment of one Movement Control Assistant (LL) as Administrative Assistant (LL)	The proposed redeployment reflects the outcome of the civilian staff review, as explained in paragraph 5.II.24 (g). The Administrative Assistant would strengthen existing capacities within the Transport Section and support the Chief Transport Officer on all administrative matters.
Security Section	1 (1)	P-4 P-3	Reclassification of one Field Security Officer (P-3) to Deputy Chief Security Officer (P-4)	The proposed upward reclassification of the Field Security Officer reflects the additional responsibilities required of the post to address the dynamic and challenging security situation in the mission’s area of operations, and the need for broader regional oversight. The function requires increased coordination and frequent interaction with security teams in five host countries. The Deputy Chief Security Officer would be responsible for the management of three UNTSO Area Security Teams based in Naqoura, Tiberias and Damascus, and would have indirect liaison with Department of Safety and Security teams in Amman, Beirut, Cairo, Damascus and Jerusalem, to support the safe and secure delivery of the UNTSO mandate across five countries. In addition, the Deputy Chief Security Officer would be responsible for the management of guard force operations and the Personal Protection Unit in UNTSO headquarters in Jerusalem.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

6.1 The Office for Outer Space Affairs is responsible for advancing international cooperation in space activities. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions 1472 A (XIV), 76/3, entitled "The 'Space2030' Agenda: space as a driver of sustainable development", 79/87 on international cooperation in the peaceful uses of outer space and 76/55 on transparency and confidence-building measures in outer space activities, as appropriate.

6.2 The core functions of the Office are: (a) serving as the secretariat of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies (resolution 1472 A (XIV)), as the executive secretariat of the International Committee on Global Navigation Satellite Systems and its Providers' Forum (resolutions 61/111 and 64/86) and as the secretariat of the Space Mission Planning Advisory Group (resolution 71/90); (b) implementing the United Nations Programme on Space Applications (resolutions 2601 (XXIV) and 37/90) and the programme on the United Nations Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) (resolution 61/110); (c) maintaining the Register of Objects Launched into Outer Space (resolutions 1721 B (XVI) and 3235 (XXIX)); (d) discharging the responsibilities of the Secretary-General under the United Nations treaties and principles on outer space and related resolutions (resolutions 2222 (XXI), 2345 (XXII), 2777 (XXVI), 3235 (XXIX), 34/68, 37/92, 41/65, 47/68, 59/115 and 62/101); and (e) supporting Member States in fulfilling the "Space2030" Agenda implementation plan (resolution 76/3).

Programme of work

Peaceful uses of outer space

Objective

6.3 The objective, to which this programme contributes, is to strengthen international cooperation in the conduct of space activities for peaceful purposes and advance the use of space science and technology and their applications.

Strategy and external factors for 2026

6.4 To contribute to the objective, the Office will support the work of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies and promote international cooperation in the exploration and use of outer space for peaceful purposes. Specifically, the Office will:

(a) Provide substantive secretariat services to the Committee, the Scientific and Technical Subcommittee, the Legal Subcommittee, the International Committee on Global Navigation Satellite Systems and its Providers' Forum and the Space Mission Planning Advisory Group;

(b) Provide secretariat services to the working groups of the Committee and its subsidiary bodies, including the Working Groups on Legal Aspects of Space Resource Activities and on the Long-term Sustainability of Outer Space Activities and the Action Team on Lunar Activities Consultation;

(c) Work with Member States, intergovernmental and, where relevant and applicable, non-governmental entities and other partners to promote the peaceful use of outer space,

including through: (i) the implementation of the international legal framework governing space activities; (ii) the registration of space objects launched into outer space; (iii) space debris mitigation; (iv) transparency and confidence-building measures in outer space activities, as appropriate; (v) civil satellite-based positioning, navigation, timing and value added services; and (vi) assistance to the Committee in further developing the governance of outer space activities;

(d) Deliver training events and technical advisory support to assist States, upon their request, and institutions in: (i) enhancing their capacities in areas such as space law and policy, space sustainability, space economy, climate change, environmental monitoring, natural resources management, precision farming and agriculture, water resources, global health, satellite communications, education, space weather, space exploration, astronomy, search and rescue, disaster risk reduction and emergency response, and global navigation satellite systems; and (ii) developing collaborative platforms and promoting knowledge-sharing for space-based solutions;

(e) Enhance key initiatives, such as the United Nations Space Bridge and the United Nations Space Sustainability Days, to build the capacity of member States of the Committee and facilitate implementation of the international legal framework governing space activities in the lead-up to the convening of the Fourth United Nations Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE IV);

(f) Cooperate with the regional centres for space science and technology education affiliated to the United Nations to deliver capacity-building activities and training in space science and technology to support Member States in achieving the Sustainable Development Goals;

(g) Augment the impact of the work of the Committee and the Office on progress towards achieving the Sustainable Development Goals, through: (i) targeted outreach activities, publications and materials; (ii) exchanges with relevant stakeholders to promote more systematic sharing of space-based data and information to foster sustainable development and space sustainability; and (iii) promotion of the widest possible adherence to, and full compliance with, the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, and of the role of the Committee in discussions on the establishment of new frameworks for space traffic, space debris and space resources;

(h) Provide support to Member States that express interest in Committee membership with a view to increasing access to space solutions, partnerships and capacity-building, and participation in the governance of outer space activities.

6.5 The above-mentioned work is expected to result in:

(a) A safer and more sustainable outer space;

(b) Space-based solutions enabling monitoring of and progress towards the achievement of the Sustainable Development Goals;

(c) Greater understanding, acceptance and application of the international legal framework governing space activities;

(d) An increased number of countries with access to space and space benefits, in particular developing countries, in using science and technology and related applications, including space-based solutions, to achieve sustainable development, disaster risk reduction and emergency response;

(e) Greater compatibility and interoperability of global navigation satellite systems;

(f) Space capabilities being more readily available through strengthened cooperative relationships and new partnerships.

6.6 With regard to the external factors, the overall plan for 2026 is based on the planning assumption that governmental, intergovernmental and non-governmental organizations are able and willing to support the Office in implementing the programme and responding to increased requests for assistance from Member States.

6.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will, in line with its mandate, pursue new opportunities with established governmental, intergovernmental and non-governmental partners, including space agencies, industry, academia, institutions and other space-related entities, to strengthen the capacity of countries, in particular developing countries, in using space science and technology and their applications. The Office will also pursue cooperative relationships, including with the private sector. It will enhance transparency by regularly informing the Committee of the projects being implemented and of its partnerships with space agencies, governmental and non-governmental organizations and the private sector.

6.8 With regard to inter-agency coordination and liaison, the Office will lead the Inter-Agency Meeting on Outer Space Activities (UN-Space) to promote coherence and increase collaboration on space-related work among entities of the United Nations system, including through the establishment of an inter-agency hub for procurement of earth observation imagery, with a view to better coordinating data-sharing and cooperation on the procurement of space-based information.

6.9 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate, as demonstrated by its Space for Women project, which serves to promote the empowerment of women and girls in space science, technology, innovation and exploration and to increase awareness of education and career opportunities in science, technology, engineering and mathematics. The Office will work with partners to strengthen the capacity and skills of individuals and institutions, with an emphasis on enhancing the participation and retention of women and girls in space activities.

6.10 In line with the United Nations Disability Inclusion Strategy, the Office will promote inclusive practices for the employment of persons with disabilities in the space sector, as well as innovative tools and technologies to enable accessibility for people with disabilities.

Evaluation activities

6.11 The following evaluations conducted by the Office and completed in 2024 have guided the proposed programme plan for 2026:

(a) Strategic evaluation and review of the mandate of the Office;

(b) Evaluation of the Access to Space for All initiative;

(c) Evaluation of the Space for Women initiative.

6.12 In response to the results of the evaluations referenced above, the Office will prioritize actions and activities aimed at better addressing Member States' needs and promoting a more inclusive space governance, as outlined in result 3. The Office will also strengthen the implementation of its Space for Women portal through the use of project management tools, development of actionable and localized outcomes from expert meetings and enhanced communication of the project objectives in line with United Nations standards by promoting greater audience diversity. To ensure that the Access to Space for All initiative continues to foster innovation and contribute meaningfully to global capacity-building, the Office will strengthen relationships with key stakeholders, increase outreach to underrepresented groups, integrate emerging technologies, refine evaluation and feedback mechanisms and enhance post-programme support for participants and their institutions.

6.13 An evaluation by the Office of its Space Law for New Space Actors project is planned for 2026.

Programme performance in 2024

Enhanced preparedness for natural disasters in small island developing States

6.14 Small island developing states face significant risks from natural hazards and extreme weather events, making disaster preparedness a critical priority. At the request of Tonga, the Office and the Committee on Earth Observation Satellites collaborated with the country's disaster management authorities to develop a dedicated portal to receive satellite imagery and provide a platform for

visualization of that data in support of decision-making. The online platform, which was validated and refined to align its content with national priorities, integrates satellite data on multiple hazards, such as sea-level rise, ground subsidence, tsunamis and land cover change, with high-resolution imagery to map critical infrastructure like road networks and buildings. In addition, the Office facilitated the delivery, by a private sector partner, of a digital twin of the main island of Tonga, which features three-dimensional representation of buildings and landscapes and enables projections of flood levels, to support future disaster risk reduction planning. Dedicated training sessions, led by the Office, equipped local stakeholders to leverage the platform effectively.

6.15 Progress towards the objective is presented in the performance measure below (see table 6.1).

Table 6.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Enhanced preparedness for natural disasters through the adoption of satellite data and associated analysis for disaster preparedness initiatives in Tonga

Planned results for 2026

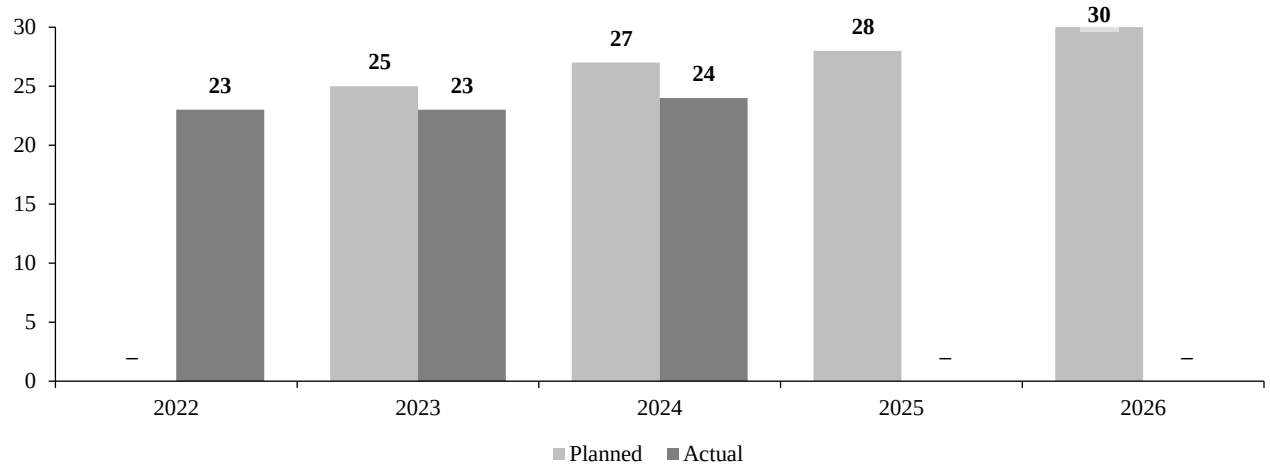
Result 1: direct access to space-based emergency response mechanisms

Programme performance in 2024 and target for 2026

6.16 The programme's work contributed to 24 national disaster management agencies becoming authorized users of the International Charter on Space and Major Disasters, which did not meet the planned target of 27. The target was not met because only one official request was received.

6.17 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 6.I).

Figure 6.I
Performance measure: number of national disaster management agencies becoming authorized users of the International Charter on Space and Major Disasters (cumulative)



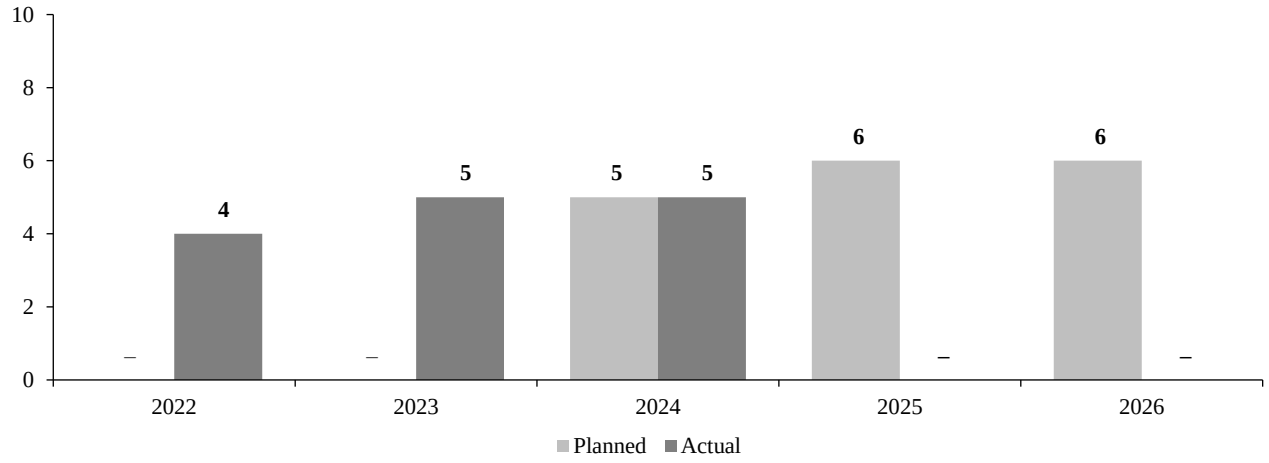
Result 2: increased access to space

Programme performance in 2024 and target for 2026

6.18 The programme's work contributed to the launch of five satellites into outer space through the Access to Space for All initiative, which met the planned target.

6.19 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 6.II).

Figure 6.II
Performance measure: number of satellites launched into outer space through the Access to Space for All initiative (cumulative)



Result 3: greater access to space solutions, partnerships, capacity-building and involvement in governance of outer space activities

Proposed programme plan for 2026

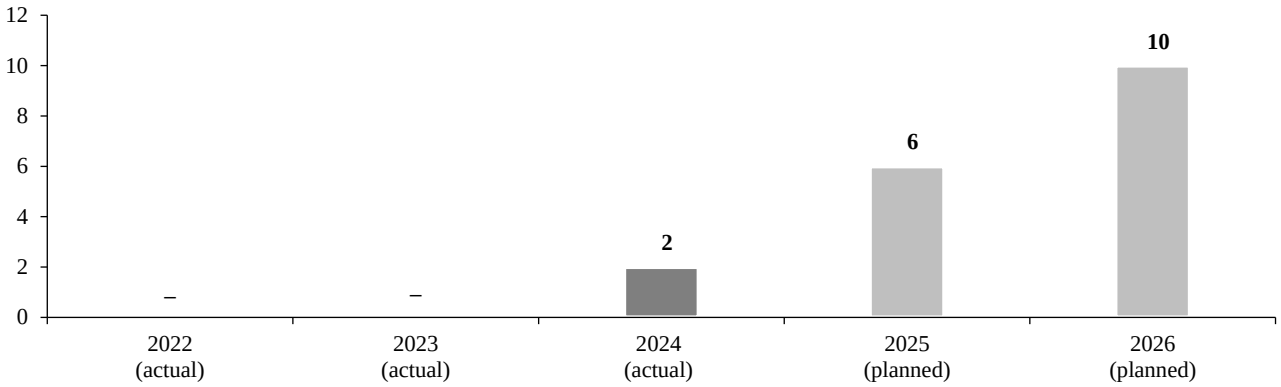
6.20 Space technologies are integral to the critical national infrastructure and socioeconomic development of every nation. Every country can benefit from space services and contribute to the future use, safety and sustainability of outer space activities. The programme supports Member States in the exploration and peaceful uses of outer space for economic, social and scientific development, in particular for the benefit of developing countries.

Lessons learned and planned change

6.21 The lesson for the programme was the need to meet the increasing demand from Member States in relation to enhancing their access to space technology, data and applications, as well as to becoming members of the Committee on the Peaceful Uses of Outer Space to contribute to the governance of outer space activities. In applying the lesson, the programme will enhance outreach, organize tailored activities on the safety and sustainability of outer space activities and, when requested, provide guidance on the membership requirements and process.

6.22 Expected progress towards the objective is presented in the performance measure below (see figure 6.III).

Figure 6.III
Performance measure: number of Member States applying to become members of the Committee on the Peaceful Uses of Outer Space (annual)



Legislative mandates

6.23 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

1472 A (XIV); 1721 B (XVI); 2453 A–B (XXIII); 2601 (XXIV); 3234 (XXIX); 61/111; 64/86; 71/90; 74/82; 77/121; 79/87	International cooperation in the peaceful uses of outer space
2222 (XXI)	Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies
2345 (XXII)	Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space
2777 (XXVI)	Convention on International Liability for Damage Caused by Space Objects
3235 (XXIX)	Convention on Registration of Objects Launched into Outer Space
34/68	Agreement Governing the Activities of States on the Moon and Other Celestial Bodies
37/90	Second United Nations Conference on the Exploration and Peaceful Uses of Outer Space
37/92	Principles Governing the Use by States of Artificial Earth Satellites for International Direct Television Broadcasting
41/65	Principles Relating to Remote Sensing of the Earth from Outer Space
47/68	Principles Relevant to the Use of Nuclear Power Sources in Outer Space
54/68	Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space
59/2	Review of the implementation of the recommendations of the Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space
59/115	Application of the concept of the “launching State”
61/110	United Nations Platform for Space-based Information for Disaster Management and Emergency Response
62/101	Recommendations on enhancing the practice of States and international intergovernmental organizations in registering space objects
65/271	International Day of Human Space Flight
68/74	Recommendations on national legislation relevant to the peaceful exploration and use of outer space
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
72/78	Declaration on the fiftieth anniversary of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies
72/79	Consideration of the fiftieth anniversary of the United Nations Conference on the Exploration and Peaceful Uses of Outer Space

73/6	Fiftieth anniversary of the first United Nations Conference on the Exploration and Peaceful Uses of Outer Space: space as a driver of sustainable development	76/3	The “Space2030” Agenda: space as a driver of sustainable development
74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	77/29	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	77/120	Space and global health
		79/1	The Pact for the Future
		79/86	International Year of Asteroid Awareness and Planetary Defence, 2029

Conference of the Parties to the United Nations Framework Convention on Climate Change decisions

1/CP.21	Adoption of the Paris Agreement

Deliverables

6.24 Table 6.2 lists all deliverables of the programme.

Table 6.2
Deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**105**	**97**	**105**	**105**
1. Reports to the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	105	97	105	105
Substantive services for meetings (number of three-hour meetings)	**72**	**75**	**65**	**65**
2. Meetings of the General Assembly	2	2	–	-
3. Meetings of the Fifth Committee	1	1	1	1
4. Meetings of the Committee for Programme and Coordination	1	1	1	1
5. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Meetings of the Fourth Committee and its Working Group of the Whole on the agenda item entitled “International cooperation in the peaceful uses of outer space”	3	3	3	3
7. Meetings of the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	56	56	56	56
8. Intersessional consultations of the Working Groups of the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	8	11	3	3
Conference and secretariat services for meetings (number of three-hour meetings)	**14**	**17**	**14**	**15**
9. Executive secretariat services to the International Committee on Global Navigation Satellite Systems and its Providers’ Forum	10	11	10	11
10. Secretariat services to the Space Mission Planning Advisory Group	4	6	4	4
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**80**	**74**	**76**	**74**
11. Training events on space law and policy, including for new space actors	17	20	17	17
12. Training events on space science and technology and their applications	24	24	24	24
13. Training events and technical advisory missions on the use of space technology in disaster management	30	23	24	24
14. World Space Forum	3	3	3	3
15. Planetary Defense Conference (asteroid and comet threats to Earth)	–	–	3	–

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
16. Panels on Space for Women	3	3	3	3
17. Open forum for Member States and meetings of United Nations entities on the use of space technology	3	1	2	1
Publications (number of publications)	**5**	**5**	**6**	**1**
18. Publications on the Office's activities and the Committee on the Peaceful Uses of Outer Space	5	5	6	1
Technical materials (number of materials)	**74**	**88**	**74**	**96**
19. Information furnished in accordance with the United Nations treaties and principles on outer space	4	5	4	6
20. Information furnished in accordance with the Convention on Registration of Objects Launched into Outer Space and General Assembly resolution 1721 B (XVI)	70	83	70	90

C. Substantive deliverables

Consultation, advice and advocacy: normative support to meetings on the sustainability of space activities, the Working Group C of the International Committee on Global Navigation Satellite Systems and the Space for Women network; expert and tailored advice to Member States, upon request, on: the registration of space objects; space science and technology and their applications; activities of the United Nations-affiliated regional centres for space science and technology education; the use of space-based information in disaster management plans, policies and disaster risk management activities in approximately 7 Member States; and space-based information to support emergency and humanitarian response in at least 5 developing countries; the organization of long-term training opportunities in the field of space science and technology and related applications.

Databases and substantive digital materials: Register of Objects Launched into Outer Space and Online Index of Objects Launched into Outer Space, UN-SPIDER knowledge portal, International Committee on Global Navigation Satellite Systems portal, Space for Water portal, Space Solutions Compendium (database), e-learning courses and national space law collection.

D. Communication deliverables

Outreach programmes, special events and information materials: exhibits, promotional and educational materials, and celebrations of achievements and other anniversaries relating to outer space.

External and media relations: press releases and press conferences on the work of the Office and the Committee on the Peaceful Uses of Outer Space.

Digital platforms and multi-media content: websites, social media campaigns, explainer videos for the Office for Outer Space Affairs, Space for Women, Space for Climate Action, and Space Sustainability.

B. Proposed post and non-post resource requirements for 2026

Overview

6.25 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 6.3 to 6.5.

Table 6.3
Overall: evolution of financial resources by object of expenditure
(Thousands of United States dollars)

			Changes					
Object of expenditure	*2024 expenditure*[a]	*2025 approved*	*Technical adjustments*	*New/expanded mandates*	*Other*	*Total*	*Percentage*	*2026 estimate*

6.26 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 6.6 to 6.8 and figure 6.IV.

6.27 As shown in tables 6.6 (1) and 6.7 (1), the overall resources proposed for 2026 amount to $5,544,100, reflecting an increase of $1,100 compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

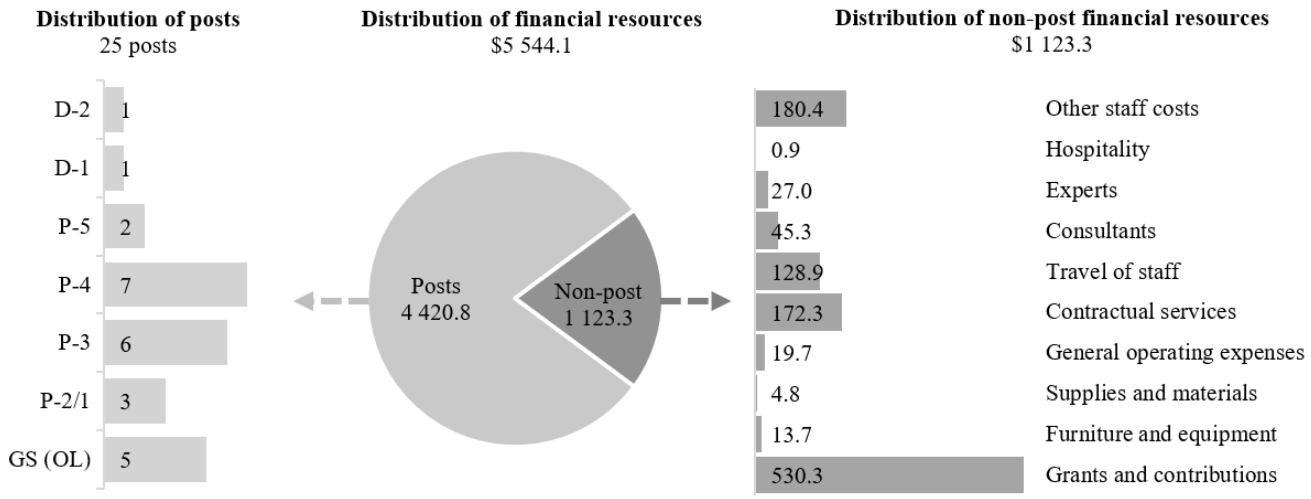
Figure 6.IV
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor and component

Overall resource changes

Other changes

6.28 As shown in tables 6.6 (1) and 6.7 (1), resource changes reflect an increase of $1,100, which relates to the higher standard price of information and communications technology charges for non-field personnel outside of United Nations Headquarters.

Extrabudgetary resources

6.29 As reflected in tables 6.6 (2) and 6.7 (2), extrabudgetary resources amount to $1,964,900. The resources would complement regular budget resources and would be used mainly to provide for eight posts (3 P-2 or P-1 and 5 General Service (Other level)) to perform the functions of supporting technical advisory services, capacity development activities and other assistance to Member States. In addition, non-post resources would be used to support those areas of work.

6.30 Anticipated in-kind contributions with an estimated value of $2,013,600 reflect Junior Professional Officers, staff provided on a non-reimbursable loan basis, expert support and launch services provided under the Access to Space for All initiative and the value of the provision of office space and conference facilities, meeting services, room and board for participants, transport and other contractual services provided by host countries on a no-cost basis for training events and other activities organized by the Office for Outer Space Affairs.

6.31 The extrabudgetary resources under the present section are subject to the oversight of the Office in accordance with the delegation of authority from the Secretary-General.

Other information

6.32 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office for Outer Space Affairs complies with the policies and procedures rolled out by the United Nations Office at Vienna.

6.33 Information on the timely submission of documentation and advance booking for air travel is reflected in table 6.9. Advance purchasing of some tickets was restricted owing to operational constraints arising from the late availability of extrabudgetary funding sources. The Office for Outer Space Affairs will review late bookings to mitigate instances that have an impact on compliance.

Table 6.9
Compliance rate
(Percentage)

Air tickets purchased at least two weeks before the commencement of travel	90	74	79	100	100

Annex

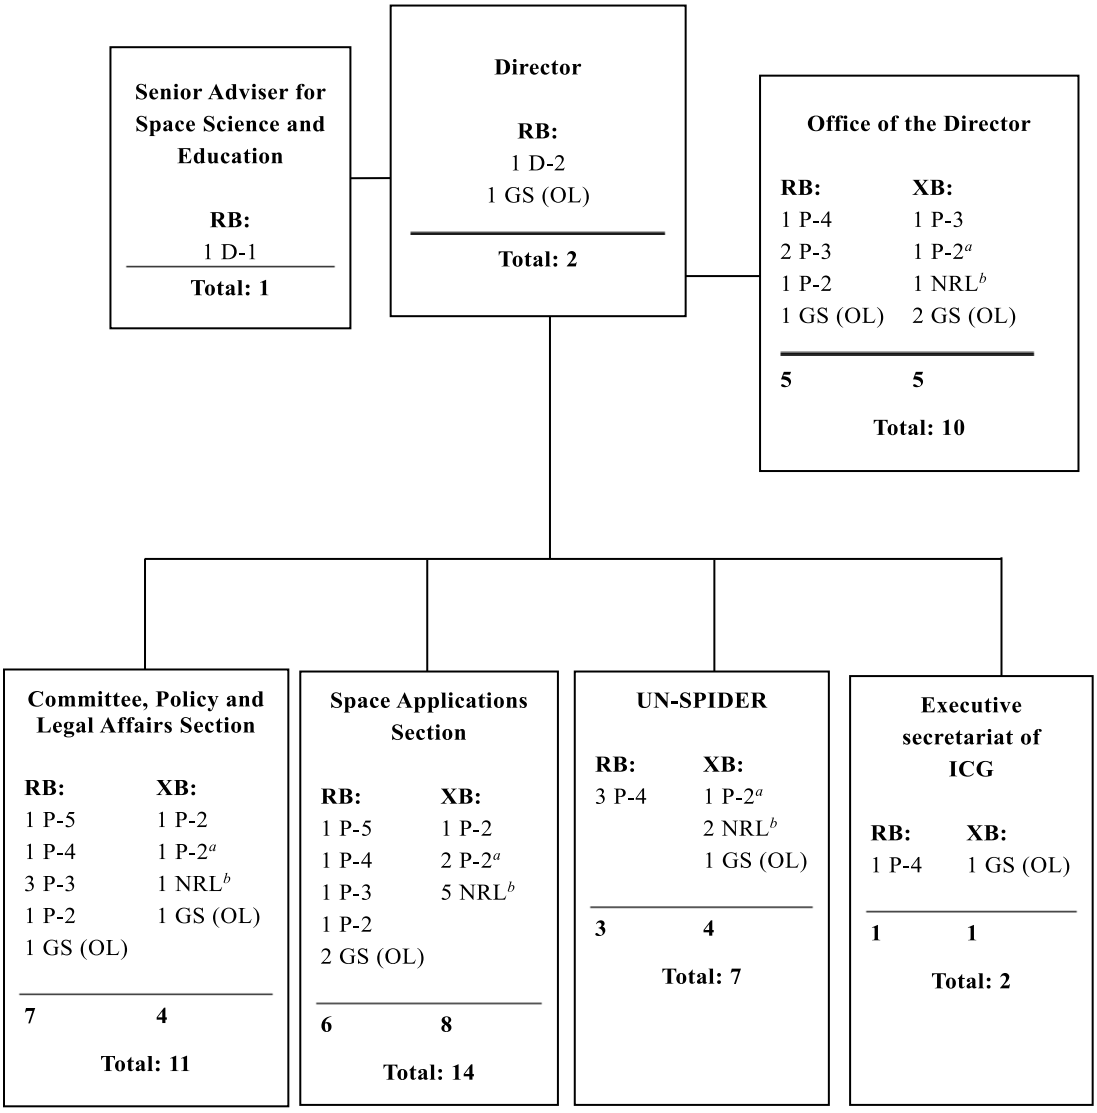
Organizational structure and post distribution for 2026

Two charts showing the organizational structure of the Office for Outer Space Affairs are presented below. Chart A reproduces the approved organizational structure and post distribution for 2025, as contained in document A/79/6 (Sect. 6), while chart B presents the proposed organizational structure and post distribution for 2026.

Justification for the proposed changes

Office of the Director, United Nations Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) and the executive secretariat of the International Committee on Global Navigation Satellite Systems. The proposed organizational structure reflects a change in the reporting lines of the Office of the Director, UN-SPIDER and the executive secretariat of the International Committee on Global Navigation Satellite Systems, from the Director to the Deputy Director, to strengthen the Office's leadership and provide strategic planning, enhance coordination, streamline collaboration across sections, address challenges and new opportunities, improve engagement with external stakeholders for a more focused and agile response and help to streamline operations, ensure efficient decision-making and provide for a clearer chain of command.

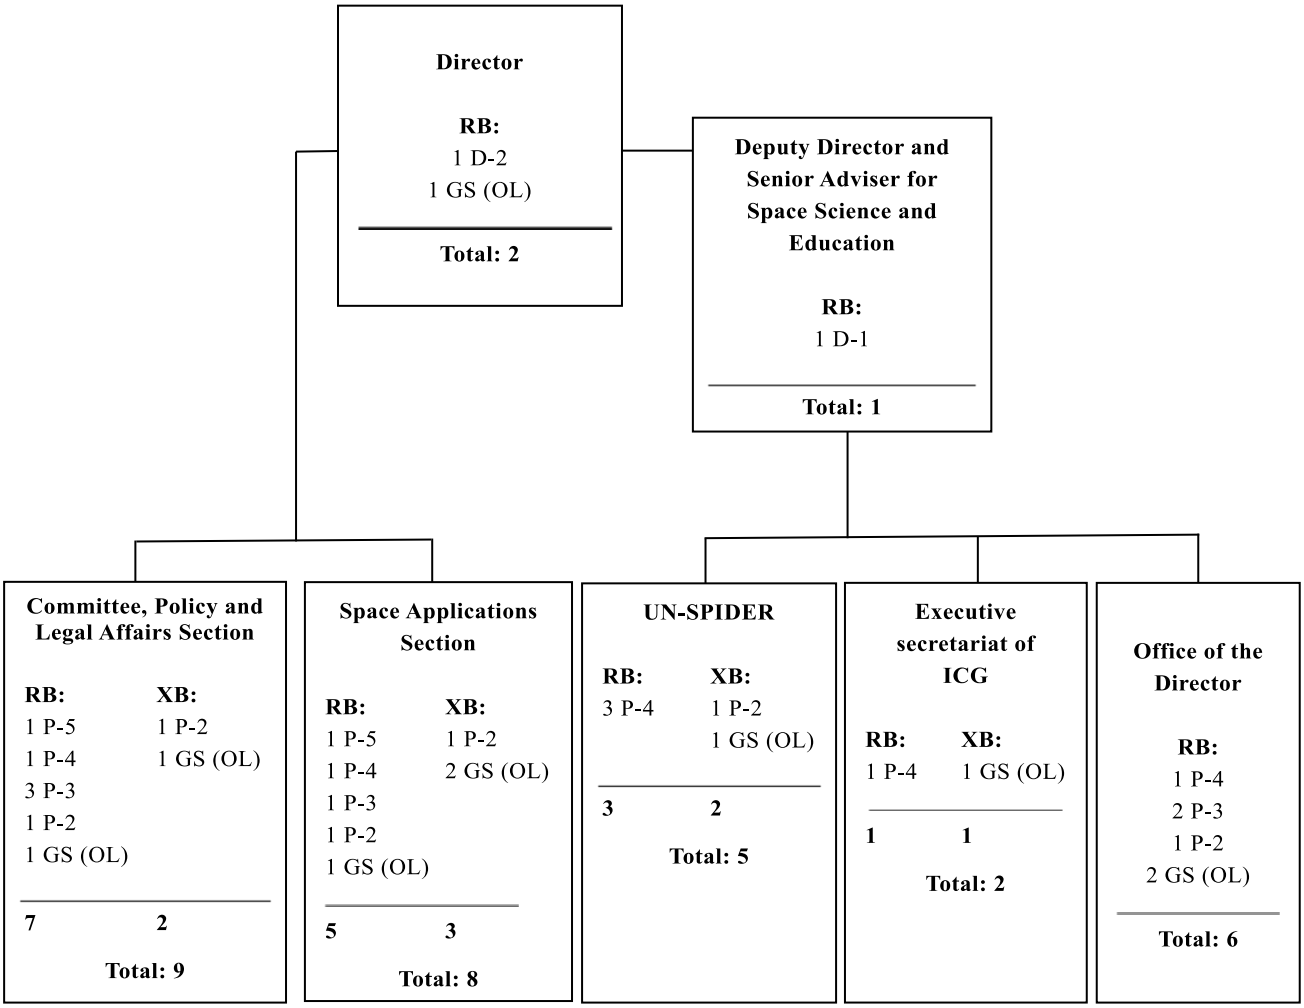
A. Approved organizational structure and post distribution for 2025



[a] Junior Professional Officer.

[b] Positions on a non-reimbursable loan basis are expected from the Brazilian Air Force, the China National Space Agency, the Government of France, the Government of the Republic of Korea, the Japan Aerospace Exploration Agency, the Ministry of Emergency Management of China and the United States Department of State.

B. Proposed organizational structure and post distribution for 2026



Abbreviations: GS (OL), General Service (Other level); ICG, International Committee on Global Navigation Satellite Systems; NRL, non-reimbursable loan; RB, regular budget; UN-SPIDER, United Nations Platform for Space-based Information for Disaster Management and Emergency Response; XB, extrabudgetary.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

7.1 The International Court of Justice is responsible for settling, in accordance with international law, legal disputes that are submitted to it by States and to give advisory opinions on legal questions referred to it by bodies authorized to do so under the terms of the Charter of the United Nations. It is composed of 15 judges elected by the General Assembly and the Security Council and is one of six principal organs of the United Nations and the principal judicial organ of the Organization. It functions in accordance with the Statute of the Court, which is an integral part of the Charter. All 193 States Members of the United Nations are Parties to the Statute, and 74 of them have recognized the Court's jurisdiction as compulsory, in line with Article 36, paragraph 2, of its Statute. In addition, more than 300 bilateral and multilateral treaties grant the Court compulsory jurisdiction in the resolution of various types of disputes. States that are not members of the United Nations may become Parties to the Statute on conditions to be determined in each case by the Assembly upon the recommendation of the Security Council. The Court may also be open to States not Parties to its Statute, subject to the conditions laid down by the Security Council and set out in its resolution 9 (1946), adopted on 15 October 1946. The Court submits annual reports to the Assembly, the most recent of which is contained in document A/79/4. Under the terms of regulation 2.14 of the Financial Regulations and Rules of the United Nations, the programme budget proposals of the Court are prepared by the Court, in consultation with the Secretary-General, and are submitted to the Assembly by the Secretary-General, together with such observations as the latter may deem desirable.

7.2 Although the Court cannot forecast its main workload indicators (e.g. the number of cases that will be pending before the Court in 2026 and the number of new proceedings that will be instituted, as well as the number of incidental proceedings in pending cases), it has made every effort to assess its requirements for 2026 against the background of its workload for the current and previous budgetary periods.

7.3 While the Court has no control over the volume of its activities, it must at all times be able to exercise the functions entrusted to it under the Charter. New cases are brought before the Court by States, and advisory opinions are requested of the Court by authorized organs of the United Nations and specialized agencies, all of whom may seize the Court at any time. When a case is pending before the Court, it is not possible to anticipate whether and when recourse will be made to incidental proceedings (e.g. requests for provisional measures or interventions). Historically, there have been significant variations in the number of new proceedings commenced in a given year, although in recent times there has been an upward trend in the Court's caseload. In order to meet the demands of its workload, the Court now routinely considers three cases simultaneously. In 2024, the Court was seized of four new cases, including one request for an advisory opinion, the fourth such request since 2023. In 2024, the Court also delivered four judgments, one advisory opinion and five orders on requests for the indication or modification of provisional measures. During the same period, the Court held nine sets of hearings, including two in advisory proceedings, one of which involved the participation of 96 States and 11 international organizations. With 26 cases pending on its General List as at 30 April 2025 – which involve, inter alia, 133 States Members of the United Nations – the Court will no doubt maintain its increased judicial workload in the years to come.

7.4 The workload represented by each case filed with the Court is high. In principle, the parties to cases brought before the Court each submit one set of written pleadings to the Court: a memorial and a counter-memorial. The Court may authorize them to submit a further set of pleadings, namely, a reply and a rejoinder. In practice, these additional pleadings are almost always submitted. The pleadings are tending to become increasingly voluminous, notwithstanding the Court's appeals to the parties not to repeat arguments already exposed. Hearings can also be long and complex, depending on the nature of the case. In cases involving difficult factual issues (e.g. of a highly technical character), parties may call witnesses and experts to testify. In addition, in recent years, a number of States have intervened in contentious proceedings, including at hearings. Once it has heard the submissions of the

parties, the Court delivers a decision within as short a time as possible, allowing for the complexity of the case. The entire proceedings must be conducted simultaneously in both of the Court's official languages, English and French, both at the written and oral stages and during deliberations.

7.5 In deciding the cases submitted to it, the Court renders decisions that form a coherent body of jurisprudence and which may assist in preventing disputes that could arise between other States. In addition, in giving advisory opinions in response to the requests of duly authorized organs and specialized agencies of the United Nations, the Court facilitates the proper functioning of the United Nations system and contributes to preventive diplomacy and the development of international law.

7.6 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must provide assistance to the Court in the exercise of its judicial functions as well as managing the administrative and budgetary matters of an international secretariat. The Registry is headed by the Registrar, assisted by the Deputy-Registrar, who both are elected by the Court for a term of seven years each and may be re-elected. In accordance with Article 21, paragraph 2, of the Statute, the staff of the Registry are appointed by the Court. The Court adopts its own staff regulations.

Programme of work

Registry

Objective

7.7 The objective, to which the Registry contributes, is to ensure that the needs of the Court are met in an efficient and effective manner for the sound administration of international justice and the fulfilment by the Court of its mandate under the Charter.

Strategy and external factors for 2026

7.8 To contribute to the objective, the Registry will:

(a) Respond to the needs of the Court in carrying out its judicial activities;

(b) Ensure the timely provision of substantive, conference, secretariat and documentation services and legal, diplomatic, linguistic and technical support in cases pending before the Court.

7.9 The above-mentioned work is expected to result in the needs of the Court being met in an effective and efficient manner in 2026.

7.10 With regard to the external factors, the overall plan for 2026 is based on the planning assumption that the Court's judicial activities in 2026 will involve as high a level of work as in 2024 and 2025.

7.11 With regard to cooperation with other entities, the Registry of the Court will continue to cooperate closely with United Nations offices and institutions in 2026.

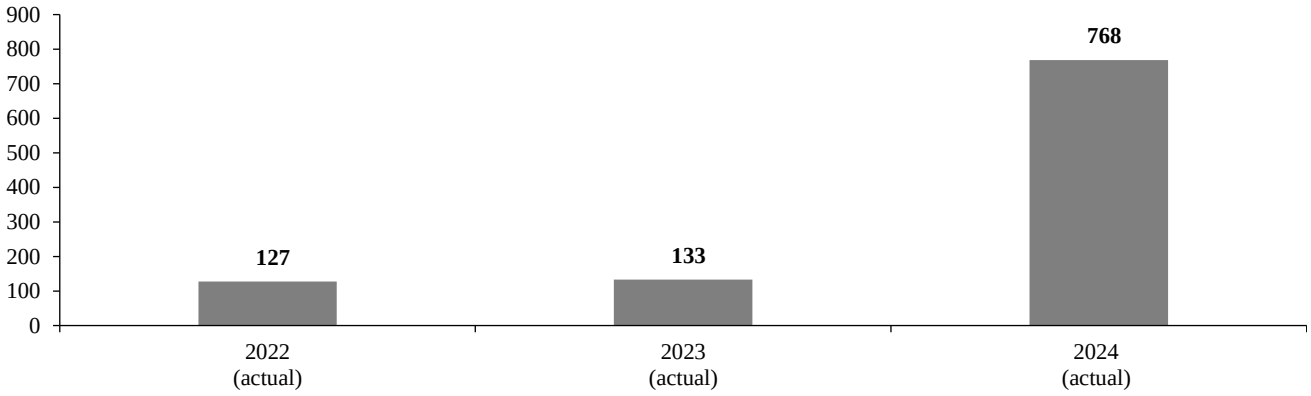
Programme performance in 2024

Increased visibility and understanding of the Court's activities among the general public

7.12 The work of the Registry contributed to making the public sittings of the Court (oral proceedings and delivery of the Court's decisions) more broadly accessible to representatives of the international media community and documentary film-makers. The Court adapted to the increase in its caseload and associated interest from journalists and film-makers by providing additional on-site facilities to allow all interested media representatives to attend sittings. The Registry further enhanced the dissemination of case-related background materials and increased support for individual film projects. These efforts contributed to increased visibility and understanding of the Court's activities among the general public.

7.13 Progress towards the objective is presented in the performance measure below (see figure 7.I).

Figure 7.I
Performance measure: number of international media representatives and documentary film-makers accredited to attend public sittings of the Court (annual)



Planned results for 2026

Result 1: increased dissemination of the Court's publications

Programme performance in 2024 and target for 2026

7.14 The Registry's work contributed to the availability in the United Nations iLibrary of six *Bibliographies* listing works and documents relating to the Court, eight volumes of *Acts and Documents concerning the Organization of the Court*, five editions of the *C.I.J. Annuaire-I.C.J. Yearbook*, 35 volumes in the series of *Pleadings, Oral Arguments, Documents* and the commemorative book published to mark the seventy-fifth anniversary of the Court, and to improved accessibility of the Court's publications on the redesigned "Publications" page on the Court's website, which met the planned target.

7.15 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 7.1).

Table 7.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Access by the general public to the anniversary book and the new catalogue of the Court's publications since 1946	Persons with print disabilities, including persons with a visual impairment, have access to the anniversary book; access by the general public to a catalogue of new publications and the entire set of the reprinted decisions of the Permanent Court of International Justice	Access by the general public to an increased digital collection of International Court of Justice publications in the United Nations iLibrary and on the redesigned "Publications" page on the Court's website	Access by the general public to an updated version of the Court's *Handbook*, a booklet of official case citations of the Permanent Court of International Justice and the International Court of Justice, and an interactive catalogue of new titles	Access by the general public to a commemorative publication, in English and French, to mark the eightieth anniversary of the Court

Result 2: enhanced process of transmission and receipt of documents relating to judicial proceedings

Programme performance in 2024 and target for 2026

7.16 The Registry's work contributed to the United Nations Secretariat receiving documents and notifications through electronic means, where appropriate, following the conclusion of a protocol establishing modalities for the electronic transfer of documents between the Registry of the Court and the United Nations Secretariat, which met the planned target.

7.17 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 7.2).

Table 7.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States and States entitled to appear before the Court receive case-related letters through electronic means, where appropriate	United Nations Secretariat receives documents and notifications through electronic means, where appropriate	Additional categories of case-related documents (written pleadings, hearing programmes and judges' folders for hearings) are distributed through electronic means, where appropriate	Enhanced use of electronic means for case-related documents and decrease in the number of hard copies filed by parties and participants in the Court's proceedings

Result 3: increased availability of information about the Court on social media platforms

Proposed programme plan for 2026

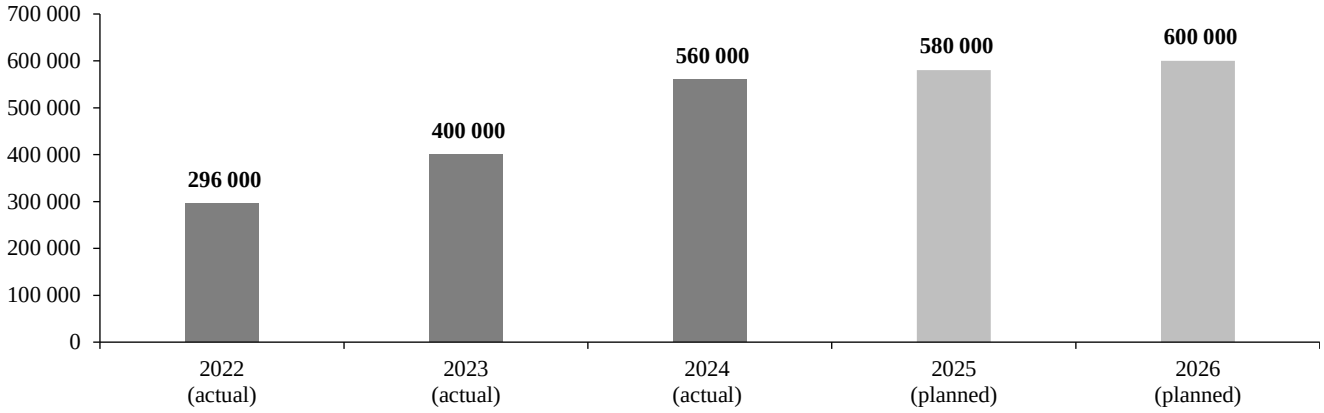
7.18 The work of the Court generates broad interest from a variety of stakeholders. The Registry uses social media platforms, among other tools, to cater to the information needs of different target audiences. Since 2015, the Registry has launched accounts on social media platforms to disseminate news, press releases, announcements and live streams of hearings, publications, vacancies, informational documents and videos, and quotes from Court officials. Since their launch, the Court's social media accounts have garnered an increasing number of followers.

Lessons learned and planned change

7.19 The lesson for the Registry was that information on the Court's role as the principal judicial organ of the United Nations and its activities could be made more broadly available to different target audiences by further diversifying the Court's online presence on social media platforms and increasing its activity thereon. In applying the lesson, the Registry will consider expanding its online presence on such platforms and making better use of the specific features that each individual platform offers, thus allowing more stakeholders to access information in a timely manner and contributing to strengthening the global reach and visibility of the Court.

7.20 Expected progress towards the objective is presented in the performance measure below (see figure 7.II).

Figure 7.II
Performance measure: number of followers on the Court's social media platforms



Legislative mandates

7.21 The International Court of Justice is the principal judicial organ of the United Nations. Its activities are governed by the Charter of the United Nations and by its Statute, which forms an integral part of the Charter. Pursuant to its Statute, the Court's role is to settle, in accordance with international law, legal disputes submitted to it by States and to give advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies.

Deliverables

7.22 Table 7.3 lists all deliverables of the Registry.

Table 7.3
Registry: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**30**	**43**	**35**	**50**
9. Presentations, briefings, workshops and conferences on proceedings of the Court for the diplomatic and legal community	30	43	35	50
Publications of the Court (number of publications)	**39**	**51**	**90**	**94**
10. Applications/special agreements (including annexes)	Unforeseeable[a]	5	Unforeseeable[a]	Unforeseeable[a]
11. *ICJ Reports*: bound volumes of judgments, advisory opinions and orders of the Court	2	2	2	2
12. Relevant chapter in the *Basic Facts about the United Nations* guidebook[b]	1	1	1	1
13. Pleadings series volumes	31[c]	36[c]	80[c]	84[c]
14. *C.I.J. Annuaire/I.C.J. Yearbook*	1	1	1	1
15. Other publications of the Court (non-recurrent, reprints, publications for special occasions (illustrated books, handbooks, etc.))	4	6	6	6

[a] It is inherently impossible to forecast the number of cases that will be pending before the Court and the number of new proceedings that will be instituted, including incidental proceedings in pending cases.

[b] In 2024, the Court's contribution on its work was included in the *Basic Facts about the United Nations* guidebook, instead of the *Yearbook of the United Nations*, which was discontinued in 2024.

[c] Includes the annexes to the pleadings, which are processed using Quick Response (QR) Codes. These annexes are accounted for at a rate of 1,000 pages per volume.

B. Proposed post and non-post resource requirements for 2026

Overview

7.23 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 7.4 to 7.6.

Table 7.4

7.24 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 7.7 to 7.9 and figure 7.III.

7.25 As shown in tables 7.7 and 7.9, the overall resources proposed for 2026 amount to $36,837,000, reflecting a net increase of $2,175,400 (or 6.3 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

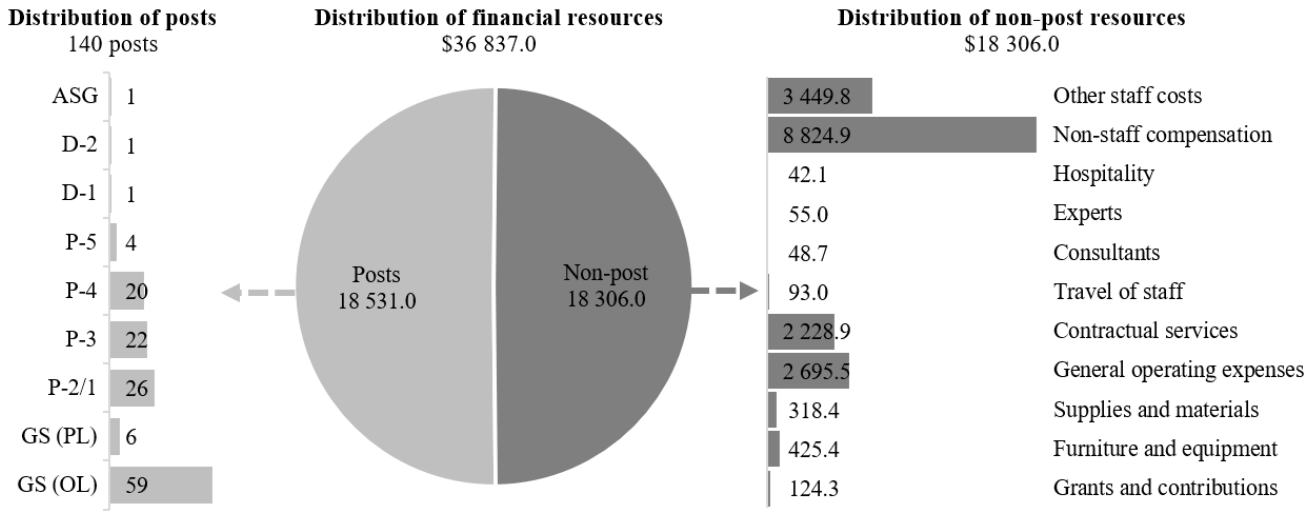
(Number of posts/thousands of United States dollars)



Explanation of variances by factor and component

Overall resource changes

Technical adjustments

7.26 As shown in table 7.9, resource changes reflect a net increase of $176,000, as follows:

(a) **Registry**. The net increase of $351,700 relates to the higher provision at continuing vacancy rates for seven posts (1 P-4, 2 P-3, 2 P-2 and 2 General Service (Other level)) established in 2025 pursuant to General Assembly resolution 79/257, which were subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts ($480,700). The increase is partially offset by the removal of non-recurrent provisions under other staff costs related to General Assembly resolution 79/232 ($129,000);

(b) **Programme support**. The decrease of $175,700 under contractual services ($117,200), general operating expenses ($54,300) and supplies and materials ($4,200) relates to the removal of non-recurrent provisions associated with the advisory proceedings pursuant to General Assembly resolutions 77/247, 77/276 and 79/232.

New and expanded mandates

7.27 As shown in table 7.9, resource changes under programme support reflect an increase of $99,800 for the printing and publishing of documents in the series *Pleadings, Oral Arguments, Documents* pursuant to General Assembly resolution 77/276.

Other changes

7.28 As reflected in table 7.9, resource changes reflect a net increase of $1,899,600, as follows:

(a) **Members of the Court**. The net increase of $18,200 relates to:

(i) *Non-staff compensation*. The net increase of $41,000 relates to the increase in the pension entitlements of former judges and widowed spouses ($80,000), partially offset by a decrease under travel of non-resident judges to Court sessions and of resident judges and their dependants to their home countries ($39,000);

(ii) *Travel of staff*. The increase of $7,400 reflects the revised travel plans by the President to New York for consultations on subjects of interest to the Court;

(iii) *Experts*. The decrease of $30,200 takes into account prior expenditure experience, and would cover the Court's needs on the basis of its provisional schedule of work;

(b) **Registry**. The net increase of $1,208,500 relates to:

(i) *Posts*. The increase of $1,051,000 would cover the proposed establishment of 15 new posts (1 Copy Preparer/Proofreader/Production Officer (French) (P-3), 1 Associate Data Protection and Privacy Officer (P-2), 4 Associate Legal Officers (P-2), 1 Human Resources Assistant (General Service (Other level)), 1 Language and Desktop Publishing Assistant (General Service (Other level)), 1 Digital Communications Assistant (General Service (Other level)), 4 Security Officers (General Service (Other level)), 1 temporary Digital Communications Officer (P-3) and 1 temporary Computational Linguist (P-3)); and the upward reclassification of one Legal Officer from P-3 to P-4 and one Associate Administrative Officer from P-2 to P-3 (to be reassigned as a Human Resources Officer) (see annex II for further details);

(ii) *Other staff costs*. The increase of $129,000 relates to the increase in the number of retirees and the cost of premiums under the Court's after-service health insurance contract with the service provider;

(iii) *Hospitality*. The increase of $31,900 would cover hospitality requirements (non-recurrent) to celebrate the eightieth anniversary of the Court;

(iv) *Travel of staff*. The increase of $12,500 reflects the revised travel plans by the Registry to attend meetings at United Nations Headquarters ($6,800); and one trip to each of Geneva and New York by one staff member in 2026 to set up the photographic exhibition on the history of the Court in celebration of its eightieth anniversary ($5,700);

(v) *Grants and contributions*. The decrease of $15,900 takes into account expenditure experience for the Court's contribution to the United Nations internal justice system;

(c) **Programme support**. The net increase of $672,900 relates to:

(i) *Contractual services*. The net increase of $347,100 mainly reflects: a. $301,700 under data processing services to cover the cost of new business initiatives that would reduce security vulnerabilities and increase efficiency, and requirements for information and communications technology services to support new staff; b. a non-recurrent provision of $51,500 for the printing of three publications to mark the eightieth anniversary of the Court; and c. $3,800 for laundry services. The increase is partially offset by a decrease of $9,900 in public information production costs, attributed to the planned reduction in the number of videos to be produced in 2026;

(ii) *General operating expenses*. The increase of $156,200 mainly relates to the Court's contribution for the use of the Peace Palace premises ($137,700), and non-recurrent provisions of $18,500 for memorabilia items required for the celebration of the eightieth anniversary of the Court;

(iii) *Supplies and materials*. The increase of $51,500 reflects non-recurrent provisions for the purchase of presentation stands and other supplies for the photographic exhibition on the history of the Court to mark its eightieth anniversary;

(iv) *Furniture and equipment*. The net increase of $118,100 would primarily cover the replacement of equipment in the Great Hall of Justice and the press room, which is crucial to maintaining high audiovisual standards and enhancing acoustics during public hearings ($152,500); the purchase of a coating and laminating machine to enhance the quality of products printed internally ($13,500); and the acquisition of information technology licences to reinforce information and communications technology security measures ($37,300). The increases are partially offset by a decrease of $85,200 relating to the reduced acquisition of vehicles as a result of the extended use of existing vehicles beyond their useful life.

Members of the Court

7.29 The International Court of Justice is composed of 15 judges ("members of the Court"), who are elected to nine-year terms of office by the General Assembly and the Security Council. Every three years, one third of the Court is elected, the sitting judges being eligible for re-election. The Court, as the principal judicial organ of the United Nations, is a universal body, within which the principal legal systems of the world and the main forms of civilization have to be represented in a balanced way (Article 9 of the Statute). It is as an institution composed in this broad-based way that the Court settles legal disputes submitted to it by States and gives advisory opinions on legal questions referred to it by authorized United Nations organs and specialized agencies. All the members of the Court are, in principle, required to participate in every case before it (Article 25 of the Statute). In accordance with Article 31 of the Court's Statute, a State party to a case may choose a judge ad hoc if the Court includes upon the Bench no judge of the nationality of the parties or a judge of the nationality of another party. Judges ad hoc take part in the decisions of the Court on terms of complete equality with the members of the Court.

7.30 The proposed regular budget resources for 2026 amount to $8,919,300 and reflect a net increase of $18,200 compared with the approved budget for 2025. The proposed change is explained in paragraph 7.28 (a) above. Additional details on the distribution of the proposed resources for 2026 are reflected in table 7.10 and figure 7.IV.

(Thousands of United States dollars)

Registry

7.31 Given that the Court is both a judicial body and an international institution that is administratively independent from the Secretariat, its Registry must take on the dual role of an *auxiliaire de la justice* and an international secretariat. The Registry provides legal, diplomatic, linguistic and technical support to the Court. It is responsible for administrative, conference, archival, distribution and documentary and library services, and acts as the regular channel for communications to and from the Court.

7.32 Information on the timely submission of documentation and advance booking for air travel is reflected in table 7.11. The Court will continue its efforts to improve its travel compliance rate by reinforcing internal controls and procedures. In 2024, the Court continued to submit all its documents within the prescribed timelines.

Table 7.11
Compliance rate
(Percentage)

	2022 actual	*2023 actual*	*2024 actual*	*2025 planned*	*2026 planned*
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least two weeks before the commencement of travel	61	73	64	100	100

7.33 The proposed regular budget resources for 2026 amount to $22,406,800 and reflect a net increase of $1,560,200 compared with the approved budget for 2025. The proposed change is explained in paragraphs 7.26 (a) and 7.28 (b) above. Additional details on the distribution of the proposed resources for 2026 are reflected in table 7.12 and figure 7.V.

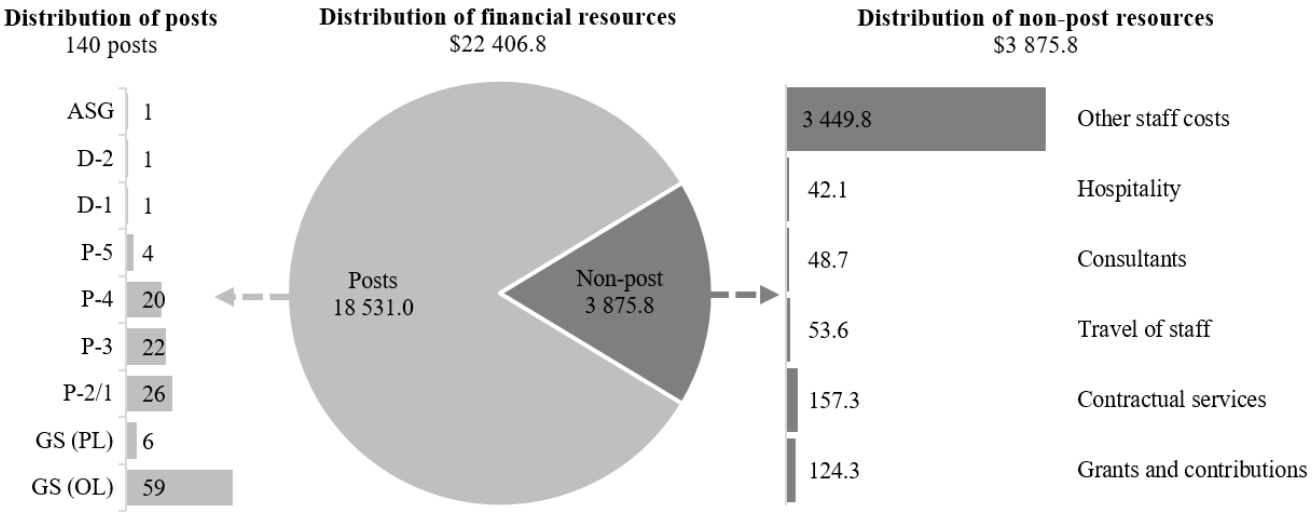
(Number of posts/thousands of United States dollars)



Programme support

7.34 The provisions under programme support relate to the common service requirements of the Court and its Registry, including the contribution of the United Nations to the Carnegie Foundation for the use of the Peace Palace at The Hague.

7.35 The proposed regular budget resources for 2026 amount to $5,510,900 and reflect a net increase of $597,000 compared with the approved budget for 2025. The proposed change is explained in paragraphs 7.26 (b), 7.27 and 7.28 (c) above. Additional details on the distribution of the proposed resources are reflected in table 7.13 and figure 7.VI.

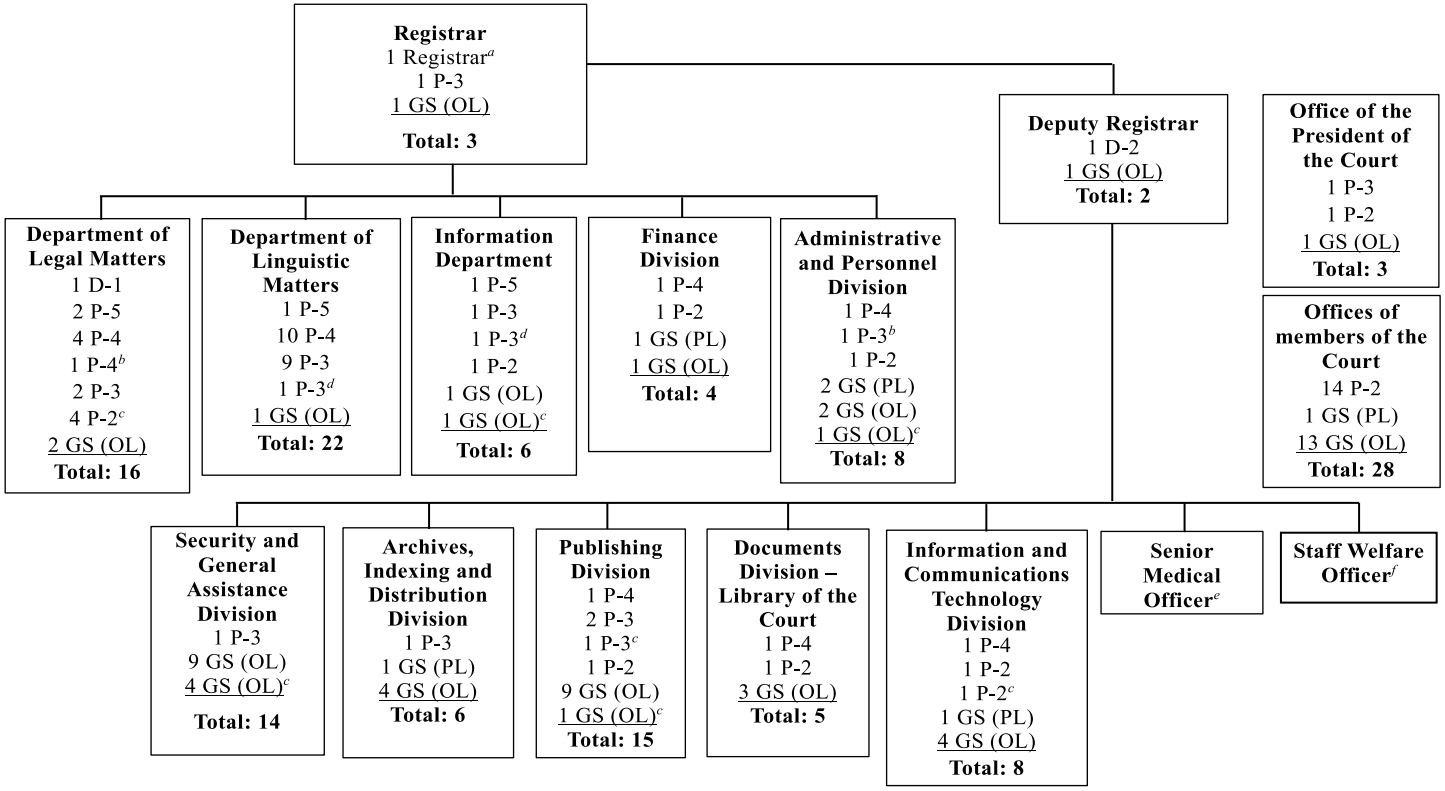
Annex I

Organizational structure and post distribution for 2026



Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level).

[a] In accordance with Articles 21 and 32 of the Statute of the Court, the Registrar is appointed by the Court, and the salary of the Registrar is fixed by the General Assembly on the proposal of the Court. The Registrar is budgeted at the Assistant Secretary-General level.

[b] Reclassification.

[c] Establishment.

[d] Establishment (temporary).

[e] One 25 per cent part-time general temporary assistance position (P-5).

[f] One 25 per cent part-time general temporary assistance position (P-3).

Annex II

Summary of proposed post changes, by component

Component	*Posts*	*Grade*	*Description*	*Reasons for change*
Registry	1	P-3	**Establishment** of one Copy Preparer/ Proofreader/Production Officer (French)	With the increasing volume of pre-press work (which has grown from 38,650 pages of printed materials processed in 2023 to more than 86,215 pages processed in 2024), there is a need for a full-time in-house Copy Preparer/Proofreader/Production Officer (French) (P-3). Between 2021 and 2024, the number of publications issued by the Court rose from 23 to 51, an increase of more than 120 per cent, and is expected to continue to increase steadily in 2025 and 2026 as a result of the publication of voluminous written pleadings in two recent advisory proceedings. Owing to a lack of internal capacity, the copy preparation and review of proofs of Court materials published in French is currently being outsourced to freelancers, under the supervision of the Head of the Publishing Division. A more permanent solution to enhance the Division's capacity to mitigate delays and backlogs generated by the unprecedented surge in workload and build in-house expertise is required. The work performed by the incumbent would mirror that currently done by the Copy Preparer/ Proofreader (English) and ensure an improved and more balanced internal working structure. Although a reduction in temporary assistance for meetings resources is not expected in 2026 owing to the accumulated workload and current backlog in publications, the requested post is expected to lead to a reduction of resources required under temporary assistance for meetings in 2027.
Registry	1	GS (OL)	**Establishment** of one Language and Desktop Publishing Assistant	The sustained increase in the Court's workload in recent years has resulted in a sharp rise in the number of pages processed by the Publishing Division, from 32,100 pages in 2016 to 98,100 pages in 2023 and 117,000 pages in 2024, representing an increase of more than 250 per cent between 2016 and 2024. During this nine-year period, one additional General Service (Other level) post funded through general temporary assistance was approved in 2024 to work on document production. The establishment of new posts and temporary positions in the Department of Linguistic Matters in 2024 (one post of Reviser (French) (P-4)) and 2025 (one post of Reviser (French) (P-4) and two temporary positions (one Reviser (French) (P-4) and one Translator (French) P-3)) funded through general temporary assistance to address the increased workload has generated a higher volume of translated documents to be processed by the Publishing Division. The proposed establishment would enable the Publishing Division to process the higher volume of translated documents while maintaining the high standards of quality required for the Court's judicial and administrative documents.
Registry	1	P-2	**Establishment** of one Associate Data Protection and Privacy Officer	The Court handles a large amount of sensitive judicial and administrative data (databases, records, archives, personal data of staff and judges, and contact information of State representatives) but currently lacks any rules or guidelines regarding storage, processing, use and access, disclosure and retention of the data at its disposal. The Court faces risks of data security breaches and possible loss of trust from both internal and external stakeholders in how it manages confidential information. With its current staffing levels, the work and expertise of the Information and Communications Technology Division is primarily focused on user support, technical operations and information and communications technology security, and the Division does not have the capacity or specialized skills to develop data protection policies, assess and prevent data security risks and handle privacy issues properly. The establishment of this post would permit the design and implementation of a comprehensive data protection and privacy programme for the Court to strengthen compliance with data protection and privacy standards and best practices adopted in the United Nations system, reduce the risk of data breaches and enhance the Court's capacity to safeguard sensitive information.

Component	*Posts*	*Grade*	*Description*	*Reasons for change*
Registry	4	P-2	**Establishment** of four Associate Legal Officers	The Court is composed of 15 judges (members of the Court) elected to nine-year terms of office by the General Assembly and the Security Council. Each member of the Court is assisted by an assigned law clerk, an Associate Legal Officer (P-2). Under the Statute of the Court, a State party to a case before the Court which does not have a judge of its nationality on the bench may choose a person to sit as judge ad hoc in that specific case. Once appointed, judges ad hoc take part in any decision concerning the case in terms of complete equality with members of the Court. In that regard, judges ad hoc, like their elected colleagues, are entitled to support from the Registry, including the legal assistance which is necessary for the exercise of their functions as judge ad hoc in the case(s) in which they have been nominated. The practice of the Court is to request a law clerk assigned to a member of the Court to also assist a judge ad hoc. With the recent increase in the number of cases pending on the Court's docket, the number of judges ad hoc has also increased, from 13 in 2018 to 19 as at 6 March 2025. The Court's sustained judicial activity has also increased the workload of the law clerks assisting members of the Court, who are no longer able to provide the requisite level of assistance to judges ad hoc in addition to the tasks assigned to them by members of the Court. The establishment of four posts of Associate Legal Officer in the Department of Legal Matters is requested to constitute a permanent pool of jurists to provide judges ad hoc with the legal support to which they are entitled to under the Court's Statute. The incumbents would also provide assistance to the Department in fulfilling its legal, administrative and diplomatic tasks.
Registry	1	GS (OL)	**Establishment** of one Human Resources Assistant	The workload of the Registry's Administrative and Personnel Division, particularly the human resources-related tasks, has expanded significantly due to the Court's growing workload. The Court's sustained judicial activity has led to an increased need to recruit and manage temporary staff, such as translators, interpreters and court reporters, often at short notice. The management of short-term language staff alone now accounts for 25.7 per cent of personnel actions handled by the Division. The volume of personnel actions, a key indicator of human resources activity, increased by 330 per cent between 2011 and 2024. In addition, the Division's responsibilities have expanded to include participating in all selection panels in an ex officio capacity, administering short-term language staff, members of the Court and ad hoc judges. Due to its limited resources, the Division has experienced delays in processing staff requests and the timely completion of recruitment processes, which often exceed the target duration of 120 days. The new post would enable the Division to address the higher workload and ensure the timely processing of staff requests in support of the Court's ongoing operations.
Registry	4	GS (OL)	**Establishment** of four Security Officers	In addition to the International Court of Justice, the Peace Palace houses the Permanent Court of Arbitration, and The Hague Academy of International Law and its library. The Carnegie Foundation is the owner and general manager of the entire site; it is responsible for the security of the external perimeter of the grounds and hires a private security company tasked with access control and the protection of the perimeter of the Peace Palace compound. The Registry's Security and General Assistance Division is responsible for the internal security of the Court's offices and shared spaces (such as the Great Hall of Justice), and the judges' and staff office spaces in the New Wing. These areas are not patrolled by the private security company contracted by the Carnegie Foundation. In the light of recent security incidents at the Peace Palace and the Court's heightened public profile, the Registry requested the assistance of the Department of Safety and Security of the United Nations Secretariat in conducting an on-site physical security assessment of the Peace Palace.

Component	*Posts*	*Grade*	*Description*	*Reasons for change*
				In its report, the Department of Safety and Security observed that the Division's current capacity (whose security staff include three General Service (Other level) security officers) was insufficient to cover the necessary operational needs, and recommended the creation of additional General Service (Other level) Security Officer posts to staff the security control room, including monitoring the closed-circuit television system on a continual basis, and to provide patrol and response capability in the New Wing and the Historical Building of the Peace Palace. In this regard, the establishment of four Security Officer posts is requested to provide the level of security required to adequately protect the principal judicial organ of the United Nations.
Registry	1	GS (OL)	**Establishment** of one Digital Communications Assistant	The Court's sustained judicial activity and the number of high-profile cases on the Court's docket have increased the workload of the Information Department with respect to external communications, with the number of press releases issued per year growing from 38 in 2020 to 86 in 2024 and the number of documents uploaded to the Court's website increasing from 1,491 in 2020 to 2,117 in 2024. At the same time, rising interest in the Court's work from the media, the general public and other stakeholders has increased the need for a more targeted and proactive approach towards digital communications, for which the Department currently lacks the necessary staffing resources and expertise. The establishment of this post would enable the Department to handle its increased workload and assist with the implementation of the Department's digital communications efforts, including the management and maintenance of the Court's digital properties, such as the Court's website, social media channels and other online products.
Registry	1	P-3	**Establishment** of one temporary post of Computational Linguist (P-3)	It is proposed that one temporary post of Computational Linguist (P-3) be established in the Department of Linguistic Matters (for a period of two years, with a possible one-year extension) to oversee the implementation and maintenance of the translation technology tools (the LogiTerm translation memory software in 2023 and neural machine translation software requested for 2026). Acquired in 2023, the LogiTerm translation memory has presented many advantages, but its ongoing maintenance and troubleshooting has placed an additional strain on the resources of both the Department of Linguistic Matters and the Information and Communications Technology Division. While the Department of Linguistic Matters has made good progress in fully implementing the software, it lacks the time and knowledge required to make full use of all its available functions, in particular the terminology database, term extraction engine and term record creation functions. The incumbent would ensure the smooth implementation and maintenance of new neural machine translation software, troubleshoot technical problems in the translation memory and neural machine translation tools, coordinate the alignment tasks and the input of data in all the Department's translation memory and neural machine translation tools, provide technical support to in-house staff and to external and temporary staff, liaise between the in-house and external linguists and the Information and Communications Technology Division and the supplier's technical support team when necessary, keep abreast of the latest developments and ensure that the Department is using its tools to maximum effect.
Registry	1	P-3	**Establishment** of one temporary post of Digital Communications Officer (P-3)	The Information Department, which is currently composed of four staff members (one Head of Department (P-5), one Information Officer (P-3), one Associate Information Officer (P-2) and one Administrative Assistant (General Service (Other level)), is assigned an array of tasks, including organizing public sittings, coordinating official visits and events, compiling informative publications, such as the Court's annual report to the General Assembly and the *C.I.J Annuaire-I.C.J Yearbook*, addressing protocol matters, giving presentations and briefings, and handling the Court's external communications and outreach efforts in print and online.

Component	*Posts*	*Grade*	*Description*	*Reasons for change*
				Despite the increased workload (as shown by the number of public sittings organized, which increased from 23 in 2020 to 62 in 2024, and the high level of participation and interest in recent advisory proceedings), the number of staff in the Department has remained the same since 2016. As the Court's level of activity continues to rise, it lacks the internal capacity and specialized skills to develop and implement a digital communications strategy to increase awareness and understanding of the Court's role and functioning for an expanding digital audience and to counter mis- and disinformation campaigns posing a risk to the Court's credibility as the principal judicial organ of the United Nations. The temporary post (for a period of two years, with a possible one-year extension) of Digital Communications Officer (P-3) in the Information Department would develop, manage and implement the strategic framework for the Court's digital communications activities across all platforms by drafting digital and social media strategies and campaigns and monitoring and reporting on the implementation and impact of the Court's digital and social media presence to improve the Court's engagement with and visibility among digital audiences.
Registry	1	P-3	**Reclassification** of one Legal Officer from P-3 to P-4	The upward reclassification would address the increased duties of the post and allow the Department of Legal Matters to continue to meet the greater demands placed upon it owing to the increase in the Court's workload observed in recent years. In the light of the fact that the Court now routinely considers multiple cases in parallel in order to deal with the cases on its docket, the volume of tasks carried out by the staff member has increased considerably, in direct correlation with the number of cases simultaneously under consideration by the Court. The functions associated with the post now include a wider portfolio of tasks, such as providing senior-level assistance to drafting committees for the Court's decisions, taking more direct responsibility for work assignments and reporting directly to the President and members of the Court, the Registrar and the Principal Legal Secretary on a more frequent basis, assuming increased responsibility for liaising with other Registry departments and divisions in the processing of the Court's decisions and reviewing case-related work, all of which require a high degree of decision-making authority that no longer corresponds to the P-3 level.
Registry	1	P-2	**Reclassification** of one Associate Administrative Officer from P-2 to P-3 and reassignment as Human Resources Officer	The Administrative and Personnel Division has three staff members in the Professional category: the Head of Division (P-4), the Associate Administrative Officer (P-2) and the Associate Procurement Officer (P-2). The Head of Division reports directly to the Registrar and oversees different specialized functions, namely, human resources management, procurement of goods and services, property management, office space management and protocol matters. The Head of Division also advises senior and middle management on all human resources-related matters, both strategic and operational. With the expansion of the Division's role and functions in recent years, broader responsibilities have been given to the Associate Administrative Officer (P-2) to cover human resources functions and a number of duties of greater complexity than those expected at the P-2 level. The job description for this post was revised in 2024 to better capture the duties performed, which include the development, application and interpretation of human resources policies, workforce planning, recruitment and selection, performance management, staff learning and development and the administration of justice. In addition, as the most senior team member, the incumbent acts as deputy to the Head of Division, supervises junior human resources staff in processing human resources transactions for payroll, staff benefits and entitlements, prepares the draft agenda and documents for the monthly meetings of the Court's Budgetary and Administrative Committee and keeps records of the Committee's decisions and recommendations.

I. Office of Legal Affairs

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

8.I.1 The Office of Legal Affairs is responsible for providing a unified central legal service for the Organization; represents the Secretary-General on legal issues, including in legal conferences and in judicial proceedings; performs substantive and secretariat functions for organs involved in public international law, including the General Assembly and its Sixth Committee (Legal Committee), the International Law Commission and the United Nations Commission on International Trade Law (UNCITRAL), as well as for the General Assembly plenary meetings concerning oceans and the law of the sea; and performs the depositary functions of the Secretary-General for multilateral treaties and the functions of registration and publication of treaties. The structure and main functions of the Office are described in Secretary-General's bulletin ST/SGB/2021/1.

8.I.2 The mandate derives from Articles 13, 98, 102, 104, 105 and other relevant provisions of the Charter of the United Nations, as well as the priorities established in relevant General Assembly resolutions, including resolution 13 (I) of 13 February 1946, as the central legal service for the Organization (including funds and programmes and treaty bodies institutionally linked to the Organization). The Office discharges mandates from the priorities established in relevant Assembly resolutions and decisions, including resolution 2205 (XXI), by which the Assembly established UNCITRAL to further the progressive harmonization and unification of the law of international trade, with the Office acting as its secretariat; resolution 49/28 and 52/26, by which the Assembly requested the Secretary-General to carry out responsibilities entrusted to him in the United Nations Convention on the Law of the Sea and related resolutions of the General Assembly; and resolution 68/70, on oceans and the law of the sea, by which the Assembly established the Office as the focal point for UN-Oceans. In addition, the Legal Counsel and the Office discharge the mandates derived from resolution 77/321.

Strategy and external factors for 2026

8.I.3 The Office will continue to support international law as the foundation for Member States to interact and cooperate in achieving their common goals. The Office will respond to the needs of its stakeholders and beneficiaries with a specialized legal skill set, institutional memory, credibility and neutrality, while delivering on a diverse and complex mandate.

8.I.4 The Office will respond to the increasing demands for legal services from the Secretariat and other United Nations organs, including through the provision of advice on questions relating to the interpretation and application of international law instruments and on general questions of public international law, to ensure that legal considerations are an integral part of the Organization's operations and the effective functioning of its principal and subsidiary organs.

8.I.5 The Office will support Member States in the implementation of the 2030 Agenda for Sustainable Development and be a key partner in the United Nations system efforts to advance the decade of action and delivery for sustainable development. The Office will continue to provide input and to support processes relating to the Sustainable Development Goals in which it has a specific mandate, such as Goals 8, 14 and 16. It will engage with stakeholders within and outside the United Nations system on ocean-related initiatives, to enhance the coordination and consistency with current processes and mandates. Similarly, it will support the processes and initiatives related to international law, including those contained in the Pact for the Future.

8.I.6 The Office will contribute to international justice and accountability and continue its role in supporting the Organization's efforts to strengthen its response to allegations of sexual exploitation and abuse and to hold accountable those who have engaged in such behaviour.

8.I.7 The Office will also support initiatives of the Secretary-General envisioned to increase the Organization's capacity to deliver, including by providing guidance on the legal aspects of data and innovation and on the policy on data protection and privacy for the Secretariat. The Office will also support the legal aspects relating to the implementation of the Secretary-General's strategic action plan on addressing racism and promoting dignity for all in the Secretariat.

8.I.8 With regard to the general legal services provided to United Nations organs and programmes, the Office will provide those services to maximize the protection of the legal interests of the Organization and minimize its legal liabilities. The Office will advise on the legal aspects arising from United Nations institutional and operational activities and provide legal services for resolving disputes of a private law character involving the operations of the Organization, its subsidiary bodies and organs, and its separately administered funds and programmes.

8.I.9 The Office will also support the progressive development and codification of international law and the conclusion of legal instruments resulting in the promotion of universal respect for international law, including by continuing to serve as the secretariats of the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences convened to consider and formulate legal instruments. The Office will disseminate materials on international law through the United Nations Audiovisual Library of International Law and major legal publications.

8.I.10 The Office will engage in processes relating to oceans and the law of the sea to support the increased participation of States in and the effective implementation and application of the United Nations Convention on the Law of the Sea and its implementing agreements. The Office will provide secretariat functions to oceans-related processes of the General Assembly and the Commission on the Limits of the Continental Shelf, as well as the temporary secretariat functions related to the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction, and support the implementation and promotion of the Sustainable Development Goals, in particular Goal 14. The Office will also continue to deliver capacity-building activities on that topic, including for developing countries.

8.I.11 To further the progressive harmonization, modernization and unification of the law of international trade, the Office will ensure the widespread adoption and use of harmonized and modernized substantive private law rules to govern international commercial transactions, strengthen technical cooperation and promote the participation of developing countries in the law-making activities of UNCITRAL. The Office will support Member States in the preparation of universally acceptable legislative and non-legislative texts.

8.I.12 The Office will intensify the use of technological tools and other means to enhance the custody, registration and publication of treaties, including the registration of treaties and treaty actions in line with Article 102 of the Charter, and fulfil the depositary functions of the Secretary-General. The Office will continue to provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties. The Office will also promote and ensure wider knowledge of the law of treaties, including through capacity-building activities and workshops, thereby preventing issues of interpretation and implementation of treaty provisions by contracting States.

8.I.13 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to enable the International Law Commission to exchange knowledge, experience and ideas with the President of the International Court of Justice, the African Union Commission on International Law, the Inter-American Juridical Committee, the Asian-African Legal Consultative Organization and the Committee of Legal Advisers on Public International Law of the Council of

Europe. The Office will also continue to cooperate with States and bodies established under the United Nations Convention on the Law of the Sea. In the fields of the law of the sea and ocean governance and of international trade law, the Office will continue to cooperate with international financial institutions, donor agencies, intergovernmental organizations, non-governmental organizations (NGOs) and natural and juridical persons.

8.I.14 With regard to inter-agency coordination and liaison, the Under-Secretary-General for Legal Affairs and United Nations Legal Counsel, as the focal point for UN-Oceans, the inter-agency coordination mechanism on oceans and coastal issues within the United Nations system, will continue to coordinate the delivery of UN-Oceans outputs and promote cross-sectoral and integrated activities, in particular in relation to the Agreement on Marine Biological Diversity of Areas beyond National Jurisdiction. In addition, the Office will coordinate the work of organizations dealing with international trade law and encourage cooperation among them. The Office will exchange knowledge with the networks of legal advisers of United Nations agencies, funds and programmes.

8.I.15 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Extrabudgetary resources are available to complement the programme budget, allowing the Office to respond to the increased demand for its services;

(b) Principal and subsidiary organs of the United Nations continue to request legal advice as a main component of the decision-making process;

(c) Specific mandates relating to international trade law, oceans and law of the sea and others are renewed or confirmed by the competent intergovernmental bodies.

8.I.16 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. The Office will continue to promote gender equality and the empowerment of women throughout all its subprogrammes in the context of the Office's capacity-building programmes and other related aspects.

8.I.17 In line with the United Nations Disability Inclusion Strategy, the Office will integrate disability inclusion in its work, as appropriate. The Office will continue to take the steps necessary to ensure that, in the committees it services, delegates with disabilities are provided with the materials needed to facilitate their participation.

Legislative mandates

8.I.18 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

Articles 26 and 36

General Assembly resolutions and decisions

37/66	Third United Nations Conference on the Law of the Sea
49/28	Law of the Sea
50/24; 56/13	Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks
52/26; 55/7; 60/30; 63/111; 64/71; 65/37 A and B; 67/78; 68/70; 69/245; 75/239; 79/144	Oceans and the law of the sea
52/251	Agreement on Cooperation and Relationship between the United Nations and the International Tribunal for the Law of the Sea
54/33	Results of the review by the Commission on Sustainable Development of the sectoral theme of "Oceans and seas": international coordination and cooperation
58/14; 59/25; 61/105; 71/123; 73/125; 74/18; 77/118; 79/145	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments
69/292	Development of an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
71/312	Our ocean, our future: call for action
72/249	International legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction
77/242; 78/128	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
77/321; 78/272; decision 78/560	Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas Beyond National Jurisdiction

Subprogramme 5
Progressive harmonization, modernization and unification of the law of international trade

General Assembly resolutions

2205 (XXI)	Establishment of the United Nations Commission on International Trade Law
79/117	Report of the United Nations Commission on International Trade Law on the work of its fifty-seventh session

Subprogramme 6
Custody, registration and publication of treaties

General Assembly resolutions

23 (I)	Registration of treaties and international agreements
24 (I)	Transfer of certain functions, activities and assets of the League of Nations
97 (I)	Registration and publication of treaties and international agreements: regulations to give effect to Article 102 of the Charter of the United Nations
364 (IV); 482 (V)	Registration and publication of treaties and international agreements
33/141	Registration and publication of treaties and international agreements pursuant to Article 102 of the Charter of the United Nations
51/158	Electronic treaty database
52/153; 54/28	United Nations Decade of International Law
73/210; 75/144; 76/120; 78/236	Strengthening and promoting the international treaty framework

Deliverables

8.I.19 Table 8.I.1 lists all cross-cutting deliverables of the programme.

Table 8.I.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**10**	**17**	**10**	**11**
1. Report and notes to the General Assembly	6	11	6	7
2. Report of the Committee on Relations with the Host Country	1	1	1	1
3. Letters to the Security Council	3	5	3	3
Substantive services for meetings (number of three-hour meetings)	**8**	**8**	**8**	**8**
Meetings of the:				
4. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. Committee for Programme and Coordination	1	1	1	1
6. Fifth Committee	1	1	1	1
7. Committee on Relations with the Host Country	5	5	5	5
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**5**	**5**	**6**	**6**
8. Workshops on international law	5	5	6	6
C. Substantive deliverables				
Consultation, advice and advocacy: advice and legal opinions in the context of the participation of the Legal Counsel in the Senior Management Group, the Executive Committee and other ad hoc groups.				
D. Communication deliverables				
Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office and issues of public international law, the law of the sea and international trade law; and events on international law, including those provided at the request of and in coordination with Member States.				
E. Enabling deliverables				
Internal justice and oversight: representation of the Secretary-General before the United Nations Appeals Tribunal and advice on administrative law of the Organization.				
Legal services: legal advice, opinions and services to all principal and subsidiary organs of the United Nations, as detailed in all the subprogrammes, and legal support for system-wide initiatives on data strategy and anti-racism.				

Evaluation activities

8.I.20 An evaluation, conducted by the Office, of the United Nations-Nippon Foundation capacity-building programmes for least developed countries, landlocked developing countries and small island developing States, as well as coastal African states, in the field of ocean affairs and the law of the sea was completed in 2024 and has guided the proposed programme plan for 2026.

8.I.21 In response to the results of the evaluation referenced above, the Office is enhancing outreach efforts to increase the participation of small island developing States, least developed countries and landlocked developing countries across all regions, while incorporating perspectives from local communities and integrating considerations related to gender equality into training sessions and research. The Office is also focusing on strengthening relationships with academic host institutions and maintaining up-to-date alumni and host institution databases, while leveraging technological tools to improve the management of applications, address an expected increase in applications and streamline internal selection processes.

8.I.22 An evaluation to be conducted by the Office focusing on the impact of its capacity-building activities on participants is planned for 2026.

Programme of work

Subprogramme 1
Provision of legal services to the United Nations system as a whole

Objective

8.I.23 The objective, to which this subprogramme contributes, is to ensure respect for and adherence to public international law, and the development of international justice and accountability.

Strategy

8.I.24 To contribute to the objective, the subprogramme will:

(a) Provide legal advice on questions relating to the interpretation and application of the Charter, legal agreements and United Nations resolutions, rules and regulations, as well as on general questions of public international law, including international human rights law, international humanitarian law and international criminal law;

(b) Advise the United Nations and United Nations-assisted criminal tribunals and their oversight bodies, and other international accountability mechanisms, including on their founding arrangements, statutes, terms of reference and rules of procedure, and on the functions of the Secretary-General thereunder.

8.I.25 The above-mentioned work is expected to result in:

(a) A uniform and consistent practice of the law and, subsequently, in the effective functioning of the principal and subsidiary organs of the United Nations in accordance with international law;

(b) The protection of the privileges and immunities of the United Nations;

(c) The effective functioning of the United Nations and entities entrusted with mandates in the areas of international law;

(d) The appointment and reappointment of the principals of the United Nations and United Nations-assisted international criminal tribunals and other international accountability mechanisms.

Programme performance in 2024

The International Court of Justice has access to a dossier of documents in relation to the request of the General Assembly for an advisory opinion on the legal consequences arising from the policies and practices of Israel in the Occupied Palestinian Territory, including East Jerusalem

8.I.26 On 30 December 2022, the General Assembly, in its resolution 77/247, requested the International Court of Justice to render an advisory opinion regarding the legal consequences arising from the policies and practices of Israel in the Occupied Palestinian Territory, including East Jerusalem. The subprogramme prepared and submitted a dossier containing a collection of all documents that were likely to throw light on the questions raised by the Assembly in its request for an advisory opinion in order to assist the Court in its consideration of the request.

8.I.27 Progress towards the objective is presented in the performance measure below (see table 8.I.2).

Table 8.I.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Publication of a dossier of documents on the International Court of Justice website in relation to an advisory opinion regarding the legal consequences arising from the policies and practices of Israel in the Occupied Palestinian Territory, including East Jerusalem	The International Court of Justice issued an advisory opinion regarding the legal consequences arising from the policies and practices of Israel in the Occupied Palestinian Territory, including East Jerusalem, which included a reference to the dossier

Planned results for 2026

Result 1: legal and procedural framework for United Nations conferences, including the fourth International Conference on Small Island Developing States

Programme performance in 2024 and target for 2026

8.I.28 The subprogramme's work contributed to the finalization and signature of the host country agreement and the holding of the fourth International Conference on Small Island Developing States, which met the planned target.

8.I.29 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.3).

Table 8.I.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Decision by the General Assembly to convene the fourth International Conference on Small Island Developing States	General Assembly adopted resolution 77/328 on further modalities of the fourth International Conference on Small Island Developing States Progress towards the finalization and signature of the host country agreement with necessary privileges and immunities and related requirements allowing for full participation by all participants in the Conference	Finalization and signature of the host country agreement allowing for full participation by all participants in the fourth International Conference on Small Island Developing States	Signature of the host country agreement for the 2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14 2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14 is held	Member States host other large-scale conferences away from Headquarters on the basis of host country agreements

Result 2: conclusion of an agreement concerning continuing residual functions of the Extraordinary Chambers in the Courts of Cambodia

Programme performance in 2024 and target for 2026

8.I.30 The subprogramme's work contributed to an agreement between the Government of Cambodia and the United Nations regarding the continuing residual functions of the Extraordinary Chambers in the Courts of Cambodia and the time period and framework for performance of those functions, which met the planned target.

8.I.31 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.4).

Table 8.I.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Implementation of the Addendum and commencement of negotiations regarding supplementary arrangements	Continued implementation of the Addendum by the Government of Cambodia and the United Nations	Government of Cambodia, in consultation with the United Nations, agreed on the continuing residual functions required and the time period and framework for the performance of those functions	Government of Cambodia, in partnership with the United Nations, undertakes action required to ensure that the legal framework reflects agreement concerning the continuing residual functions after 2025, the time period for those functions and the framework for the performance of those functions	Continued implementation of the Addendum by the Government of Cambodia and the United Nations in accordance with the agreement reached between the Parties

Result 3: legal and procedural framework for United Nations conferences, including the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6: Ensure availability and sustainable management of water and sanitation for all

Proposed programme plan for 2026

8.I.32 The subprogramme is responsible for ensuring that the necessary legal framework is adopted prior to the holding of international United Nations conferences and also assists with preparatory processes and legal and procedural matters arising during such conferences. The General Assembly, in its resolution 77/334, decided to convene the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6: Ensure availability and sustainable management of water and sanitation for all and, in its resolution 78/327, decided that the Conference would be co-hosted by Senegal and the United Arab Emirates and held in the United Arab Emirates.

Lessons learned and planned change

8.I.33 The lesson for the subprogramme was the value in better identifying challenges and best practices during the process of advising on the legal frameworks for such conferences. In applying the lesson, the subprogramme will assess past similar examples to identify general cross-cutting issues relating

to legal, procedural and operational matters and possible actions to ensure responsiveness to stakeholders and a consistent approach to legal frameworks that properly reflects the status, privileges and immunities of the Organization.

8.I.34 Expected progress towards the objective is presented in the performance measure below (see table 8.I.5).

Table 8.I.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Decision by the General Assembly to convene the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6	Decision by the General Assembly on the modalities for the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6	Progress towards the conclusion of the host country agreement allowing for full participation by all participants in the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6	Signature of the host country agreement for the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6 The 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6 is held

Deliverables

8.I.35 Table 8.I.6 lists all deliverables of the subprogramme.

Table 8.I.6
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

13. Committee on Relations with the Host Country	5	5	4	5
14. Panels of experts of the Secretary-General's trust fund to assist States in the settlement of disputes through the International Court of Justice	–	–	–	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**22**	**18**	**18**	**18**
15. Workshops on international law matters	10	6	6	6
16. Training events on United Nations rules of procedure	2	2	2	2
17. Training events on peacekeeping matters	2	2	2	2
18. Annual meeting of the legal advisers and legal liaison officers of the United Nations offices, funds and programmes, specialized agencies and related and other organizations and field legal advisers and officers	8	8	8	8

C. Substantive deliverables

Consultation, advice and advocacy: legal advice to and consultation with the General Assembly, the Security Council and the Main Committees of the Assembly on constitutional, institutional and procedural questions.

D. Communication deliverables

Outreach programmes, special events and information materials: speeches and presentations to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of the Legal Counsel and issues of public international law; and events to promote public international law.

E. Enabling deliverables

Legal services: legal advice to and support for the Secretariat and the funds and programmes on privileges and immunities, in particular in support of host country agreements entered into by the United Nations, and public international law, including international humanitarian law, international human rights law and the pacific settlement of disputes; legal advice to and support for 1 United Nations criminal tribunal and its oversight body and other international accountability mechanisms; legal advice to and support for an estimated 11 peacekeeping and 34 special political missions; liaison with the International Court of Justice and fulfilment of the responsibilities of the Secretary-General under the Statute of the Court; legal advice to and support for 4 Secretariat offices and 4 other entities and bodies on disarmament, sanctions and security; and legal advice to 18 United Nations entities on the interpretation and implementation of the Relationship Agreement between the United Nations and the International Criminal Court.

Subprogramme 2
General legal services provided to United Nations organs and programmes

Objective

8.I.36 The objective, to which this subprogramme contributes, is to maximize the protection of the legal interests of the Organization and to minimize its legal liabilities.

Strategy

8.I.37 To contribute to the objective, the subprogramme will:

(a) Assist in ensuring external accountability of United Nations and related personnel, including on internal sanctions and external enforcement action and liaison with national authorities;

(b) Advise on the legal aspects arising from United Nations institutional and operational activities, including the Organization's development, technical assistance, peacekeeping, humanitarian and other operations;

(c) Assist the Organization, its organs or its separately administered funds and programmes by providing legal advice on procurement and substantial contracts and on operational and technical assistance activities of those entities;

(d) Provide legal services for resolving disputes of a private law character involving the operations of the Organization, its organs or its funds and programmes, including representing the Organization in settlement negotiations and in arbitral proceedings;

(e) Advise on management issues and matters in the system for the administration of justice, including determining whether to appeal against a judgment of the United Nations Dispute Tribunal, and represent the Secretary-General before the United Nations Appeals Tribunal;

(f) Respond to requests by the Organization for urgent legal advice arising from humanitarian and emergency situations.

8.I.38 The above-mentioned work is expected to result in:

(a) The full maintenance of the status, legal rights and privileges and immunities of the Organization arising from United Nations operational activities;

(b) The minimization of legal liabilities of the Organization.

Programme performance in 2024

Successful negotiation of a lease for the DC2 Building

8.I.39 In 2024, the subprogramme provided legal assistance to the Department of Operational Support to support the negotiation of the Secretariat's lease for the DC2 Building. The subprogramme ensured that the Department secured lease terms that appropriately reflected the status of the United Nations and protected its legal interests.

8.I.40 Progress towards the objective is presented in the performance measure below (see table 8.I.7).

Table 8.I.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Access by the Department of Operational Support to legal assistance with respect to the negotiation of a lease for the DC2 Building

Planned results for 2026

Result 1: a model contract for global freight-forwarding

Programme performance in 2024 and target for 2026

8.I.41 The subprogramme's work contributed to a revised draft model freight-forwarding contract being made available, taking into account comments received, which met the planned target.

8.I.42 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.8).

Table 8.I.8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Receipt by Department of Operational Support of ad hoc legal support on freight-forwarding contracts	Preliminary draft model freight-forwarding contract made available for comments	Revised draft model freight-forwarding contract made available, taking into account comments received	Final model freight-forwarding contract made available	Model freight-forwarding contract in use by the Department of Operational Support

Result 2: access by client offices to legal advice facilitated by the updated matter management system

Programme performance in 2024 and target for 2026

8.I.43 The subprogramme's work contributed to the development of a new matter management system with basic features, which met the planned target.

8.I.44 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.9).

Table 8.I.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Matter management system developed with basic features	Access by client offices to legal advice facilitated by the updated matter management system	Access by client offices to legal advice facilitated by the enhanced workflow elements of the matter management system

Result 3: access by client offices to updated United Nations General Conditions of Contract

Proposed programme plan for 2026

8.I.45 The Organization enters into a large number of commercial contracts with respect to its operations worldwide. With a view to minimizing the legal risks of commercial contracting, the subprogramme has been providing legal support with respect to commercial contracting for United Nations global operations, including by providing a set of standard contractual provisions, the United Nations

General Conditions of Contract, which are recommended to be incorporated into all United Nations procurement contracts.

Lessons learned and planned change

8.I.46 The lesson for the subprogramme was that the current set of the General Conditions could benefit from being updated. In applying the lesson, the subprogramme will update the current set of the General Conditions, which was last updated in 2012, to reflect changes in contracting practice.

8.I.47 Expected progress towards the objective is presented in the performance measure below (see table 8.I.10).

Table 8.I.10
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Access by client offices to the 2012 edition of the United Nations General Conditions of Contract	Access by client offices to an updated version of the United Nations General Conditions of Contract	Relevant client offices provide feedback on the use of the updated United Nations General Conditions of Contract

Deliverables

8.I.48 Table 8.I.11 lists all deliverables of the subprogramme.

Table 8.I.11
Subprogramme 2: deliverables for 2026, by category and subcategory

Category and subcategory
E. Enabling deliverables
Internal justice and oversight: legal advice and services to all United Nations offices and departments, all principal and subsidiary organs of the United Nations, all peacekeeping and special political missions, all regional commissions, all funds and programmes, and the resident coordinator system, on administrative law, on criminal accountability for United Nations personnel, on procurement activities and drafting and negotiating contracts and other commercial matters, on commercial claims and representation before arbitral tribunals, on operational and technical assistance activities of the United Nations, including in the economic, social and humanitarian fields, on partnerships with the private sector, on the legislative and operational arrangements governing the staffing, supply and provision of peace operations, and representing the Secretary-General before the United Nations Appeals Tribunal.

Subprogramme 3
Progressive development and codification of international law

Objective

8.I.49 The objective, to which this subprogramme contributes, is to progressively develop, codify and advance knowledge of international law.

Strategy

8.I.50 To contribute to the objective, the subprogramme will:

(a) Provide substantive support to the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments by assisting in the conduct of proceedings, rendering legal advice, preparing draft texts of legal instruments, resolutions and decisions and preparing background documents, analytical studies and reports;

(b) Provide legal bodies of the General Assembly with assistance when considering the use by States of the procedures envisaged under the relevant resolutions of the Assembly;

(c) Implement the mandates of the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. This includes the planning, organization and conduct of four in-person training programmes, namely, the International Law Fellowship Programme and the United Nations Regional Courses in International Law for Africa, for Latin America and the Caribbean and for Asia-Pacific;

(d) Further develop, disseminate and maintain the United Nations Audiovisual Library of International Law and prepare and disseminate major legal publications and information on the legal work of the United Nations;

(e) Support Member States by assisting the bureaux of the bodies that the subprogramme services in devising and implementing working methods and work programmes that ensure business continuity.

8.I.51 The above-mentioned work is expected to result in:

(a) The smooth deliberations of legislative and legal bodies, the conclusion of draft legal instruments and the promotion of universal respect for international law;

(b) The wider awareness and appreciation of international law by a wider audience.

Programme performance in 2024

The General Assembly adopted resolution 79/128 and decided to elaborate and conclude a legally binding instrument on the protection of persons in the event of disasters by the end of 2027

8.I.52 Following work undertaken over a period of nine years, the International Law Commission, in 2016, adopted a set of draft articles on the protection of persons in the event of disasters and recommended that it serve as a basis for the elaboration of an international convention. In 2024, the subprogramme provided procedural guidance to delegations in the Sixth Committee, including in its working group dedicated to the topic, which contributed to the successful conclusion of the work of the working group and the subsequent recommendation by the Committee that a legally binding instrument be concluded by the end of 2027, thereby contributing towards the fulfilment of action 15 of the Pact for the Future (General Assembly resolution 79/1, para. 36 (a)).

8.I.53 Progress towards the objective is presented in the performance measure below (see table 8.I.12).

Table 8.I.12
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Working group on the protection of persons in the event of disasters held its debate on the basis of a new structure organized in thematic clusters	Working group on the protection of persons in the event of disasters concluded its consideration of the draft articles proposed by the International Law Commission The General Assembly adopted resolution 79/128, in which it decided to elaborate and conclude a legally binding instrument on the protection of persons in the event of disasters by the end of 2027

Planned results for 2026

Result 1: advancement of the consideration by the International Law Commission of the subsidiary means for the determination of rules of international law

Programme performance in 2024 and target for 2026

8.I.54 The subprogramme's work contributed to the consideration by the International Law Commission of the second part of the Secretariat research memorandum on the topic of subsidiary means for the determination of rules of international law, which met the planned target.

8.I.55 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.13).

Table 8.I.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Inclusion by the International Law Commission of the topic of subsidiary means for the determination of rules of international law in its regular programme of work and request by the Commission that the subprogramme prepare an in-depth study of the topic	Consideration by the International Law Commission of the first part of the research memorandum on the topic	Consideration by the International Law Commission of the second part of the research memorandum on the topic	Advancement in the consideration by the International Law Commission of the first reading of the draft conclusions on subsidiary means for the determination of rules of international law	Conclusion by the International Law Commission of the first reading of the draft conclusions on subsidiary means for the determination of rules of international law

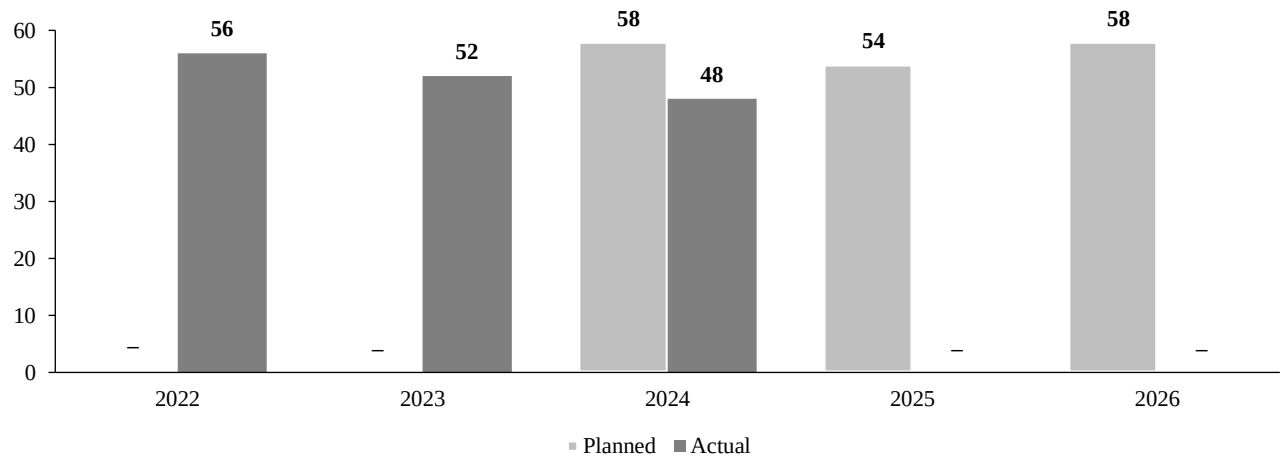
Result 2: applications from more States for the training programmes in international law under the Programme of Assistance

Programme performance in 2024 and target for 2026

8.I.56 The subprogramme's work contributed to the percentage of applicants from States that had few participants between 2016 and 2020 in the training programmes conducted under the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law reaching 48 per cent for the training programmes held in 2024, which did not meet the planned target of 58 per cent. The target was not met due to a 145 per cent increase in the total number of applicants, from 573 in 2023 to 1,404 in 2024.

8.I.57 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 8.I.I).

Figure 8.I.I
Performance measure: applicants from States that had few participants between 2016 and 2020 in the training programmes conducted under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law (annual)
(Percentage)



Note: For the purposes of this table, applicants are those from eligible States that had fewer than five applicants to and no participants attending the training programmes conducted under the Programme of Assistance between 2016 and 2020.

Result 3: increased access by the international legal community to documentary materials of a legal character concerning the United Nations and related intergovernmental organizations in the *United Nations Juridical Yearbook*

Proposed programme plan for 2026

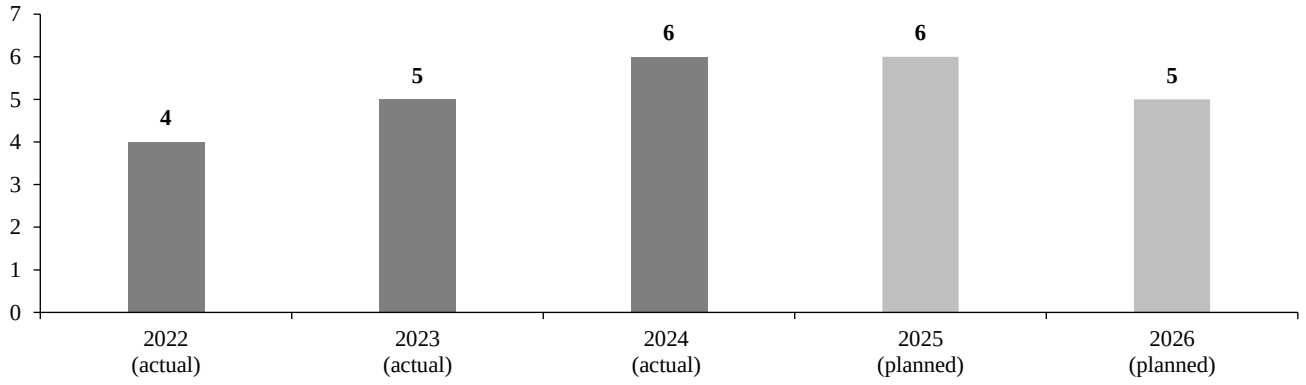
8.I.58 Pursuant to the request of the General Assembly contained in its resolution 1814 (XVII), the subprogramme has published since 1963 the *United Nations Juridical Yearbook*, following an outline established by the Assembly. The *Yearbook* details documentary materials of a legal character such as legislative texts, treaty provisions and judicial decisions concerning the United Nations, legal materials produced by the United Nations and related intergovernmental organizations and selected legal opinions of their secretariats. Available to Member States and the wider legal community, the *Yearbook* promotes public interest in the legal work of the United Nations and familiarizes the general public with the principles and rules that govern international relations. In 2022, the subprogramme published the 2016 *Yearbook*.

Lessons learned and planned change

8.I.59 The lesson for the subprogramme was that using internal capabilities for desktop publishing has expedited the issuance of some of its legal publications and contributed to making them available to the international legal community in a timely manner. In applying the lesson, the subprogramme will explore ways to further advance work on the publication of the pending volumes of the *Yearbook*.

8.I.60 Expected progress towards the objective is presented in the performance measure below (see figure 8.I.II).

Figure 8.I.II
Performance measure: number of pending volumes of the *United Nations Juridical Yearbook* (annual)



Deliverables

8.I.61 Table 8.I.14 lists all deliverables of the subprogramme.

Table 8.I.14
Subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

12. United Nations Regional Course in International Law for Latin America and the Caribbean	17	15	17	17
Publications (number of publications)	**8**	**5**	**8**	**9**
13. *Repertory of Practice of United Nations Organs*	1	–	1	1
14. *Yearbook of the International Law Commission*	5	5	5	5
15. *United Nations Juridical Yearbook*	1	–	1	2
16. *Reports of International Arbitral Awards*	1	–	1	1
Technical materials (number of materials)	**25**	**–**	**25**	**25**
17. Entries in the United Nations Audiovisual Library of International Law, including lectures	25	–	25	25
C. Substantive deliverables				
Consultation, advice and advocacy: advice to intergovernmental and expert bodies, including the Sixth Committee and the International Law Commission; and provision of technical expertise to the Special Rapporteurs of the International Law Commission, including in relation to reports to the Commission.				
D. Communication deliverables				
Outreach programmes, special events and information materials: lectures and briefings, upon request, on public international law.				
Digital platforms and multimedia content: Sixth Committee, International Law Commission and United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law websites; and online United Nations Audiovisual Library of International Law, which provides high-quality legal content to an unlimited number of individuals and institutions around the world at no charge.				

Subprogramme 4
Law of the sea and ocean affairs

Objective

8.I.62 The objective, to which this subprogramme contributes, is to strengthen the law of the sea for the peaceful use of the oceans and for their conservation and sustainable use, and as the basis for national, regional and global action and cooperation in the marine sector.

Strategy

8.I.63 To contribute to the objective, the subprogramme will:

(a) Provide expert advice to States and international organizations on the law of the sea and ocean affairs, in particular with respect to the United Nations Convention on the Law of the Sea of 1982, the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks of 1995, the Agreement on Marine Biological Diversity of Areas beyond National Jurisdiction, and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries;

(b) Support the implementation of the Convention and the United Nations Fish Stocks Agreement in respect of sustainable fisheries-related cooperative activities among States and other entities;

(c) Provide secretariat services to intergovernmental bodies and the Commission on the Limits of the Continental Shelf;

(d) Undertake capacity-building activities (fellowships, training courses and workshops) relating to oceans and the law of the sea in collaboration with relevant stakeholders, including to promote a better understanding of the Agreement on Marine Biological Diversity of Areas beyond National Jurisdiction.

8.I.64 The above-mentioned work is expected to result in:

(a) An increased number of States parties to the Convention and its implementing agreements and their effective implementation by States;

(b) Enhanced cooperation and coordination among stakeholders on ocean and coastal issues, leading to enhanced conservation and sustainable use of the oceans and their resources;

(c) A better understanding of the legal regime for the oceans and the enhanced human resource capacity of Member States, in particular developing countries, to implement that regime effectively.

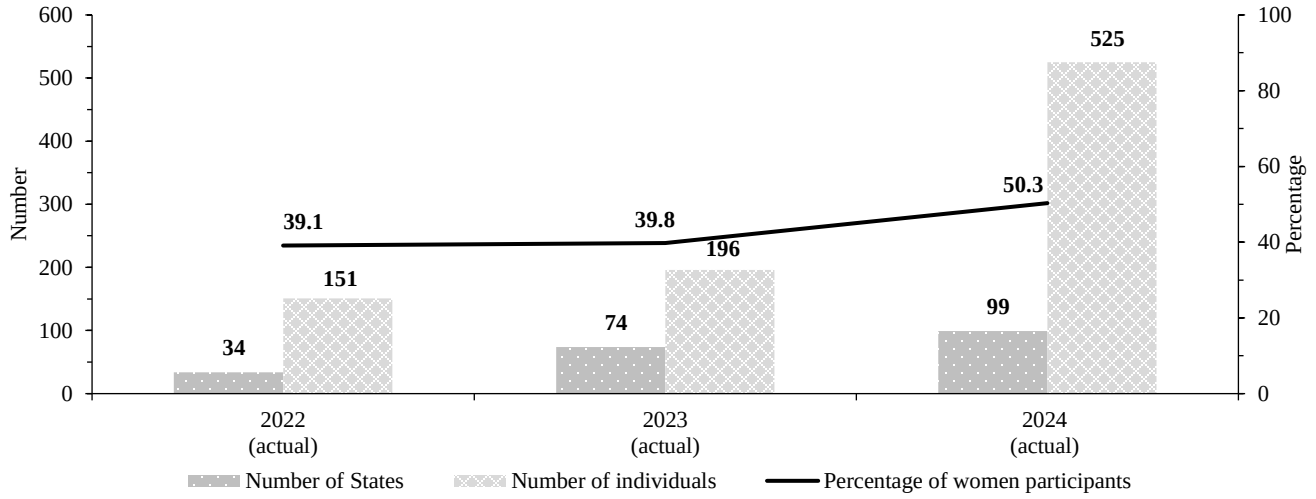
Programme performance in 2024

Enhanced capacity for the conservation and sustainable use of oceans and their resources

8.I.65 The subprogramme, in line with the mandates related to the United Nations Convention on the Law of the Sea and its implementing agreements, as reflected in the relevant General Assembly resolutions, most recently resolution 79/144, is continuously expanding capacity-building and technical assistance activities to support developing States, including small island developing States. This includes the training of civil servants and other ocean professionals with a view to enabling them to actively participate in multilateral ocean processes and the implementation of the Convention and related agreements at the global, regional and national levels. Such training activities are needs-driven and developed jointly with the beneficiaries, and cover various topics of strategic relevance to the beneficiaries, including: (a) law of the sea, including the Convention and its implementing agreements; (b) ocean affairs, including best practices, and national adaptations; (c) the 2030 Agenda and its Sustainable Development Goals, as well as relevant actions and decisions contained in the Pact for the Future; (d) sustainable ocean-based economies; and (e) oceans and climate change. In 2024, the subprogramme expanded these training activities to support more than 95 Member States and more than 500 participants. In addition, over 20 years, the United Nations-Nippon Foundation fellowships have supported participants in advancing to senior roles in ocean-related ministries and bodies and have contributed to multilateral negotiations and national legal and policy developments, for example, in the context of maritime boundary negotiations, climate change proceedings, the development of national legislation and marine spatial planning.

8.I.66 Progress towards the objective is presented in the performance measure below (see figure 8.I.III)

Figure 8.I.III
Performance measure: number of States and individuals and percentage of women benefiting from training programmes (annual)



Planned results for 2026

Result 1: strengthened role of the Commission on the Limits of the Continental Shelf and its subcommissions in accordance with the United Nations Convention on the Law of the Sea

Programme performance in 2024 and target for 2026

8.I.67 The subprogramme's work contributed to enabling the Commission on the Limits of the Continental Shelf to continue to fulfil its role to the satisfaction the General Assembly, as expressed in its resolution 79/144, which met the planned target for 2024.

8.I.68 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.15).

Table 8.I.15
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Progress in the work of the Commission on the Limits of the Continental Shelf noted with satisfaction by the General Assembly in its resolution 77/248	Progress in the work of the Commission on the Limits of the Continental Shelf noted with satisfaction by the General Assembly in its resolution 78/69	Progress in the work of the Commission on the Limits of the Continental Shelf noted with satisfaction by the General Assembly in its resolution 79/144	Satisfaction for the Commission's progress expressed by the General Assembly in its annual resolution on oceans and the law of the sea	Satisfaction for the Commission's progress expressed by the General Assembly in its annual resolution on oceans and the law of the sea

Result 2: enhanced commitment of Member States to the conservation and sustainable use of oceans and their resources through the implementation of international law

Programme performance in 2024 and target for 2026

8.I.69 The subprogramme's work contributed to the identification by Member States of relevant gaps and challenges, including with regard to synergies, in the effective implementation of international law, and with regard to the science-policy interface, in preparation for the United Nations Ocean Conference to be held in June 2025, as reflected in the note by the Secretary-General on the preparatory process of the Conference (A/78/880), which met the planned target.

8.I.70 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.16).

Table 8.I.16
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States identified gaps and challenges in the effective implementation of international law, in preparation for the 2025 Ocean Conference	Member States identified gaps and challenges, including with regard to synergies, in the effective implementation of international law and with regard to the science-policy interface, as reflected in the note by the Secretary-General on the preparatory process of the Conference (A/78/880)	Member States adopt an intergovernmentally agreed declaration on conserving and sustainably using the ocean, seas and marine resources, in line with the United Nations Convention on the Law of the Sea	Stocktaking by Member States and the United Nations system of how the United Nations system can better assist Member States in implementing the outcomes of the 2025 United Nations Ocean Conference, including in relation to the effective implementation of international law

Result 3: strengthened science-policy interface for the protection of the marine environment and the conservation and sustainable use of marine resources

Proposed programme plan for 2026

8.I.71 The Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects, was established by the General Assembly in its resolutions 57/141 and 58/240 with the aim of improving the science-policy interface regarding the protection of the marine environment and the conservation and sustainable use of marine resources through, inter alia, the preparation of comprehensive World Ocean Assessments. Following the publication of the first and second Assessments in 2016 and 2021, respectively, the subprogramme is supporting the publication of the third World Ocean Assessment (World Ocean Assessment III), in 2025. The subprogramme will also support the preparations and provide substantive servicing for the fourth World Ocean Assessment, the main output of the fourth cycle of the Regular Process launched in 2024 and covering the period 2026–2030.

Lessons learned and planned change

8.I.72 The lesson for the subprogramme was the need for a customized web platform aimed at increasing outreach regarding past and future assessments, and to provide an interactive interface to writing

teams throughout the development process of the fourth World Ocean Assessment. In applying the lesson, the subprogramme will implement such a platform and conduct outreach and awareness-raising activities, which were initiated for the first time during the third cycle, to ensure the strengthening of the ocean science-policy interface.

8.I.73 Expected progress towards the objective is presented in the performance measure below (see table 8.I.17).

Table 8.I.17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Expansion of the pool of experts and constitution of writing teams for the production of World Ocean Assessment III	Consideration by the General Assembly of World Ocean Assessment III and approval of its summary	Access by Member States to thematic summaries outlining policy-relevant information from World Ocean Assessment III

Deliverables

8.I.74 Table 8.I.18 lists all deliverables of the subprogramme.

Table 8.I.18
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

C. Substantive deliverables

Consultation, advice and advocacy: information, advice and assistance to States, organizations of the United Nations system, other intergovernmental organizations and relevant expert bodies in the field of the law of the sea and ocean affairs, in particular in the context of the work of the General Assembly and its subsidiary bodies; advice to the Meeting of States Parties to the United Nations Convention on the Law of the Sea and the Commission on the Limits of the Continental Shelf; advice for the implementation by Member States of the oceans-related Sustainable Development Goals; promotion of a better understanding of the Agreement on Marine Biological Diversity of Areas beyond National Jurisdiction and support for its future implementation, in particular through UN-Oceans; substantive advice in relation to the outcomes of the 2025 United Nations Ocean Conference and on the implementation of the United Nations Decade of Ocean Science for Sustainable Development; advice and support to the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea; advice to the United Nations Framework Convention on Climate Change on oceans and climate; and advisory services to relevant inter-agency groups, such as the Inter-agency Consultative Group on Small Island Developing States and the Inter-agency Consultative Group for Landlocked Developing Countries.

Databases and substantive digital materials: Geographical Information System for the deposit of charts and geographical coordinates; and legal web-based information in relation to maritime zones.

D. Communication deliverables

Outreach programmes, special events and information materials: publicly accessible materials, briefings and events to promote a better understanding of the United Nations Convention on the Law of the Sea, the United Nations Fish Stocks Agreement, the Agreement on Marine Biological Diversity of Areas beyond National Jurisdiction, and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries; events for World Oceans Day; and UN-Oceans side events.

Digital platforms and multimedia content: content on the law of the sea and ocean affairs on web portals, publications, websites and social media.

Library services: specialized reference collection and bibliographic database on the law of the sea and ocean affairs.

E. Enabling deliverables

Information and communications technology: specialized repository of geospatial data and information on outer limits of maritime zones and maritime boundaries.

Subprogramme 5
Progressive harmonization, modernization and unification of the law of international trade

Objective

8.I.75 The objective, to which this subprogramme contributes, is to further the progressive harmonization and unification of the law of international trade.

Strategy

8.I.76 To contribute to the objective, the subprogramme will:

(a) Serve as the secretariat for UNCITRAL, provide Member States with working papers, draft reports and draft substantive private law rules on international trade, and give advice on and assistance in intergovernmental negotiations and coordinate those activities with equivalent activities of other international organizations in accordance with the UNCITRAL mandate and propose that UNCITRAL recommend the use or adoption of relevant instruments from other organizations;

(b) Provide technical assistance and capacity-building to Governments, including diagnostic assessments, implementation guidance and interpretative materials, as well as training activities and advice on the enactment of UNCITRAL texts in national law;

(c) Conduct research and facilitate the exchange of experience among Member States on reinforcing the resilience of international trade and global supply chains, with a particular focus on micro-, small and medium-sized enterprises, and explore possible future legislative development to meet the challenges identified for consideration by the Member States.

8.I.77 The above-mentioned work is expected to result in:

(a) Well-informed, transparent and inclusive deliberations of delegations in working groups and the Commission;

(b) Governments agreeing on substantive private law rules governing international trade and their reflection in universally acceptable instruments;

(c) The availability of additional UNCITRAL instruments to harmonize and unify international trade law and to encourage resilience in international trade;

(d) Increased government use and adoption of UNCITRAL instruments in national law and increased legal decisions on those instruments;

(e) Increased treaty actions, enactments and legal decisions based on UNCITRAL texts.

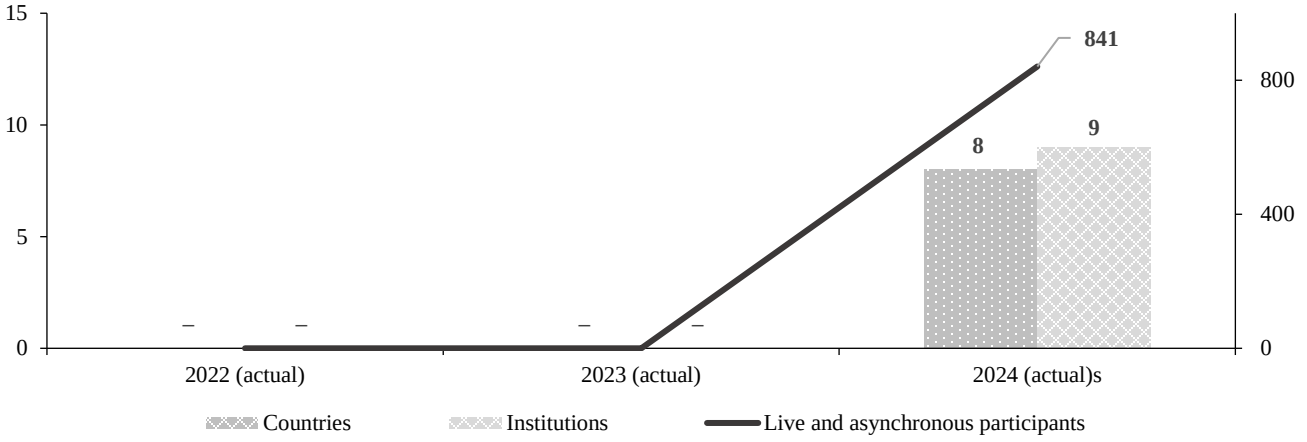
Programme performance in 2024

Legal practitioners in the Arab States further equipped to apply and interpret texts of the United Nations Commission on International Trade Law

8.I.78 UNCITRAL legislative texts are designed to ensure legal certainty for all commercial parties engaged in cross-border trade. Legal advisers, the judiciary and arbitrators must be well equipped to apply these rules effectively. Ensuring that the texts are uniformly interpreted worldwide is a key element of their success and the harmonization of international trade law. To achieve this goal, the subprogramme launched the UNCITRAL Days programme in 2014, starting in the Asia-Pacific region, to build capacity among academics, policymakers and legal professionals through awareness-raising events with higher education institutions. The initiative was later expanded to Latin America and the Caribbean in 2020 and Africa in 2022. In 2024, responding to requests from practitioners and government representatives in the Middle East and North Africa region, the subprogramme introduced the UNCITRAL Days programme in Arab States. The programme comprised nine events focusing on UNCITRAL texts on arbitration, investor-State dispute settlement reform, e-commerce, the international sale of goods and insolvency law to equip participants to effectively interpret and apply such texts. The initiative generated interest and engagement among government representatives, legal practitioners and industry professionals, since many jurisdictions in the region were modernizing their commercial legal frameworks in order to strengthen their economies. This widespread interest resulted in follow-up discussions with the subprogramme on potential technical assistance for legal reforms, underscoring the programme's positive impact in the region.

8.I.79 Progress towards the objective is presented in the performance measure below (see figure 8.I.IV).

Figure 8.I.IV
Performance measure: number of countries, institutions and individuals further equipped to apply and interpret texts of the United Nations Commission on International Trade Law in the Arab States through the UNCITRAL Days programme (annual)



Planned results for 2026

Result 1: reforms to investor-State dispute settlement through development of multiple solutions

Programme performance in 2024 and target for 2026

8.I.80 The subprogramme's work contributed to the adoption in principle by Working Group III of the statute of the Advisory Centre on International Investment Dispute Resolution and the initiation of the Centre's operationalization, which met the planned target.

8.I.81 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.19).

Table 8.I.19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Consensus reached by Working Group III on a code of conduct for adjudicators and on treaty provisions and guidelines on investment mediation	Codes of conduct for arbitrators and judges and treaty provisions and guidelines on investment mediation adopted by UNCITRAL	The statute of the Advisory Centre on International Investment Dispute Resolution adopted in principle by Working Group III and operationalization of the Centre initiated	Consensus reached by Working Group III on the reform of a wide range of procedural and cross-cutting issues, and continued development of institutional reforms, including a standing mechanism to resolve investment disputes	Consensus reached by Working Group III on procedural and cross-cutting issues and a standing mechanism to resolve investment disputes, and continued development of the framework convention to implement investor-State dispute settlement reforms

Result 2: greater legal certainty for commercial data transactions

Programme performance in 2024 and target for 2026

8.I.82 The subprogramme's work contributed to Working Group IV making progress in deliberations on the scope and content of default rules, which did not meet the planned target of consensus reached by UNCITRAL member States on the scope and content of default rules. The target was not met owing to only one of the two planned sessions of the Working Group being held in 2024, due to liquidity constraints.

8.I.83 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.20).

Table 8.I.20
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
UNCITRAL member States mandated Working Group IV to commence work on data provision contracts, while requesting other types of data transactions to be monitored	Working Group IV had access to draft default rules on data provision contracts and made progress on deliberations for the future direction of the project	Progress made by Working Group IV on reaching consensus on the scope and content of default rules	Consensus reached by UNCITRAL member States on default rules for data provision contracts and assessment of possible future work on other data transactions	Consensus reached within Working Group IV on new projects on data transactions

Result 3: United Nations Commission on International Trade Law considers the relevance of its instruments to climate action

Proposed programme plan for 2026

8.I.84 Through legal research and preparatory work, the subprogramme has supported States members of UNCITRAL in examining how the Commission can contribute to the international community's efforts to combat climate change and mitigate its effects by updating existing private law instruments and developing new enabling legal mechanisms, if necessary. Upon the request of UNCITRAL, two colloquiums were held, in 2023 and 2024, respectively, on this topic.

Lessons learned and planned change

8.I.85 The lesson for the subprogramme, based on the outcomes of the colloquiums held in 2023 and 2024, was the need to strengthen research on the relevance of UNCITRAL instruments to climate action. In applying the lesson, the subprogramme will collaborate closely with international organizations, States and other stakeholders to conduct further research, with a view to enhancing support for the States members of UNCITRAL on this topic.

8.I.86 Expected progress towards the objective is presented in the performance measure below (see table 8.I.21).

Table 8.I.21
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
UNCITRAL member States had access to a study on private law aspects of climate change	UNCITRAL member States increased awareness through a colloquium on climate change and international trade law	UNCITRAL member States increased awareness through a second colloquium on the relevance of UNCITRAL instruments to climate action	UNCITRAL member States consider updating the framework on public procurement to address issues concerning climate action	UNCITRAL member States consider establishing a working group to commence deliberations on relevant issues to update the framework on public procurement

Deliverables

8.I.87 Table 8.I.22 lists all deliverables of the subprogramme.

Table 8.I.22
Subprogramme 5: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

11. Legal texts (international conventions, UNCITRAL model laws, legislative guides and other legal texts)	5	6	3	9
12. UNCITRAL publications (*Yearbook of the United Nations Commission on International Trade Law*, guides to UNCITRAL, digests of case law)	1	–	1	1

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned
Technical materials (number of materials)	**84**	**91**	**84**	**84**
13. Promotional and technical assistance materials	3	6	3	3
14. Case Law on UNCITRAL Texts (CLOUT) abstracts	81	85	81	81

C. Substantive deliverables

Consultation, advice and advocacy: advice to all Member States, upon request, on the adoption and application of international trade law texts prepared by UNCITRAL.

Databases and substantive digital materials: CLOUT (an online public database with over 2,200 records on case law on UNCITRAL texts, accessed by over 45,000 practitioners, judges, arbitrators, academics and other interested users); Transparency Registry (an online public registry with 33 records for the publication of information and documents in treaty-based investor-State arbitration, involving 11 economic sectors); and online materials, including 12 online training courses for prospective UNCITRAL delegates, government officials, researchers and practitioners with a general interest in UNCITRAL and presentations on UNCITRAL texts.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, flyers and information kits on UNCITRAL; seven lectures to groups of legal and other practitioners, academics and law students; one colloquium on international trade law; six international commercial law moot court competitions; and one commemoration event.

External and media relations: press releases and social media posts related to UNCITRAL meetings, accession by States to UNCITRAL texts and issuance of publications.

Digital platforms and multimedia content: UNCITRAL website.

Library services: UNCITRAL Law Library.

Subprogramme 6
Custody, registration and publication of treaties

Objective

8.I.88 The objective, to which this subprogramme contributes, is to ensure the transparency of the international treaty framework, wider knowledge of the law of treaties and broader participation in multilateral treaties concluded under the auspices of the United Nations and deposited with the Secretary-General.

Strategy

8.I.89 To contribute to the objective, the subprogramme will:

(a) Undertake the registration and publication of treaties and treaty actions submitted under Article 102 of the Charter of the United Nations and provide timely and accurate information relating to deposited treaties, registered treaties and related actions through the electronic dissemination of treaty-related information on the online United Nations Treaty Collection and the publication of the United Nations *Treaty Series*;

(b) Provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties, including final clauses of treaties, the depositary practice of the Secretary-General and the registration and publication of treaties. Such assistance would be provided in particular during the negotiation of multilateral treaties and through the holding of capacity-building seminars at Headquarters and at the national and regional levels, as well as through the elaboration of topical reference publications;

(c) Fulfil the depositary functions of the Secretary-General in respect of more than 600 multilateral treaties and hold and conduct treaty events, including during the high-level week of the annual session of the General Assembly.

8.I.90 The above-mentioned work is expected to result in:

(a) Improved access to treaties deposited with the Secretary-General and related treaty actions, including information on their status, and to treaties and related treaty actions submitted for registration and publication with the Secretariat;

(b) The prevention of issues of interpretation and implementation of final clauses of multilateral treaties by contracting States and enhanced familiarity with and understanding by States of the technical and legal aspects of participating in the multilateral treaty framework and registering treaties;

(c) The entry into force of multilateral treaties deposited with the Secretary-General and the universal participation of States in such treaties.

Programme performance in 2024

Member States have improved access to information on treaty law and practice

8.I.91 Workshops on treaty law and practice increase the awareness and knowledge of representatives of Member States on issues pertaining to the international treaty framework, and facilitate the work of Member States in joining multilateral treaties deposited with the Secretary-General and registering treaties and treaty actions pursuant to Article 102 of the Charter of the United Nations. Since 2016, including owing to insufficiency of voluntary funds, it has not been possible to hold workshops at the national and regional levels. In 2023, by its resolution 78/236, the General Assembly invited States and interested organizations and institutions to make voluntary contributions to support the financing of workshops at the national and regional levels, as a complement to workshops held at Headquarters.

8.I.92 In 2024, the subprogramme held two workshops at the regional level for representatives of States members of the Central American Integration System and of the Association of Southeast Asian Nations. The former was hosted by the Government of El Salvador and jointly organized with the United Nations Institute for Training and Research, and the latter was hosted by the Government of Singapore and jointly organized with the Centre for International Law of the National University of Singapore. These workshops benefited representatives of 16 Member States in total.

8.I.93 Progress towards the objective is presented in the performance measure below (see table 8.I.23).

Table 8.I.23
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Increased the knowledge of 16 Member States on treaty law and practice through two regional workshops

Planned results for 2026

Result 1: action by States on multilateral treaties during the treaty event

Programme performance in 2024 and target for 2026

8.I.94 The subprogramme's work contributed to States taking actions during the 2024 treaty event held from 24 to 27 September 2024, which met the planned target.

8.I.95 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.24).

Table 8.I.24
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
States took treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States took treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States took treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States take treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event	States take treaty actions under multilateral treaties deposited with the Secretary-General during the treaty event

Result 2: Member States advance discussion on treaty practice

Programme performance in 2024 and target for 2026

8.I.96 The subprogramme's work contributed to Member States and international organizations submitting information on their treaty practice, which met the planned target.

8.I.97 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.I.25).

Table 8.I.25
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	In its resolution 78/236, the General Assembly requested the subprogramme to support the regular thematic debate in the Sixth Committee, including for the preparation of the report on the subtopic selected	Member States and international organizations submitted information on their treaty practice	The Sixth Committee holds a debate on the subtopic "The role of technology in shaping treaty-making practice"	Knowledge of Member States is enhanced on the role of technology in shaping their treaty-making practice, as a result of technical exchange of views in the Sixth Committee

Result 3: treaties and treaty actions are made publicly available in the United Nations *Treaty Series*

Proposed programme plan for 2026

8.I.98 The subprogramme fulfils the mandate of the Secretariat under Article 102 of the Charter of the United Nations to publish in the United Nations *Treaty Series* treaties and treaty actions registered by Member States and international organizations. Since 1946, more than 76,000 treaties and 130,000 actions have been submitted for registration and publication, resulting in the publication of more than 3,100 volumes of the *Treaty Series*.

Lessons learned and planned change

8.I.99 Further to an evaluation of its treaty publication process, the lesson for the subprogramme was that the efficiency and effectiveness of the publication process and the editorial quality of the *Treaty Series* could be enhanced by moving to a full digital workflow. In applying the lesson, the subprogramme will develop and upgrade its electronic treaty database with a new publication module to enhance efficiency in the publication process and improve quality control through the development of workflow automation functions to capture internal feedback and lessons learned, track technical issues, identify bottlenecks and facilitate data-driven strategic planning.

8.I.100 Expected progress towards the objective is presented in the performance measure below (see table 8.I.26).

Table 8.I.26
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Member States have access to the United Nations *Treaty Series*	New publication module developed to upgrade the Treaty Information and Publication System	Improved editorial quality of the United Nations *Treaty Series* through the launch of a new publication module

Deliverables

8.I.101 Table 8.I.27 lists all deliverables of the subprogramme.

Table 8.I.27
Subprogramme 6: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**–**	**–**	**3**	**–**
1. Meetings of the Sixth Committee of the General Assembly (informal consultations and plenary meetings)	–	–	3	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**2**	**6**	**2**	**2**
2. Seminar on treaty law and practice	2	6	2	2
Publications (number of publications)	**40**	**45**	**40**	**40**
3. United Nations *Treaty Series* volumes	40	45	40	40

C. Substantive deliverables

Consultation, advice and advocacy: advice to intergovernmental bodies on final clauses and the law of treaties during the negotiations of treaties to be deposited with the Secretary-General; consultation and legal advice concerning the law of treaties, depositary practice and registration of treaties to States, international organizations, secretariats and treaty bodies.

Databases and substantive digital materials: daily online updates of depositary notifications on treaty actions and formalities regarding multilateral treaties deposited with the Secretary-General; original of treaties and certified true copies of treaties deposited with the Secretary-General; certificates of registration and other registration documents regarding treaties and treaty actions registered and filed and recorded by Member States and other entities; and the United Nations Treaty Collection database.

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

D. Communication deliverables

Outreach programmes, special events and information materials: annual treaty event during the opening session of the General Assembly and special treaty events dedicated to a particular treaty deposited with the Secretary-General.

Digital platforms and multimedia content: up-to-date content for the United Nations Treaty Collection website.

E. Enabling deliverables

Legal services: legal advice to and support for United Nations offices, departments and regional commissions on the law of treaties, depositary practice and the registration of treaties.

B. Proposed post and non-post resource requirements for 2026

Overview

8.I.102 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 8.I.28 to 8.I.30.

Table 8.I.28
Overall: evolution of financial resources by object of expenditure
(Thousands of United States dollars)

8.I.103 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 8.I.31 to 8.I.33 and figure 8.I.V.

8.I.104 As shown in tables 8.I.31 (1) and 8.I.32 (1), the overall resources proposed for 2026 amount to $32,909,500, reflecting a net decrease of $1,084,900 (or 3.2 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Overall resource changes

Technical adjustments

8.I.105 As shown in table 8.I.31 (1), resource changes reflect a net decrease of $998,100, as follows:

(a) **Subprogramme 4, Law of the sea and ocean affairs**. The net decrease of $577,800 relates to the following:

(i) An increase of $84,200 relating to the higher provision at continuing vacancy rates for one temporary post (P-3) established in 2025 pursuant to General Assembly resolution 79/258, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

(ii) A decrease of $662,000 relating to the abolishment of three temporary posts (P-3, P-2 and General Service (Other level)) ($456,700) and the removal of non-recurrent requirements under hospitality ($400), consultants ($43,600), experts ($69,600), travel of staff ($18,600), contractual services ($20,600), general operating expenses ($3,500), supplies and materials ($500) and furniture and equipment ($48,500). The resources were approved pursuant to General Assembly resolution 75/239 to support the fifth year of the third cycle of the regular process for the period 2021–2025;

(b) **Subprogramme 5, Progressive harmonization, modernization and unification of the law of international trade**. The decrease of $420,300 relates to the abolishment of three temporary posts (P-3, P-2 and General Service (Other level)) ($414,000) and the removal of non-recurrent requirements under contractual services ($5,700) and supplies and materials ($600) that were approved by the General Assembly in its resolution 76/229 to support the reform of investor-State dispute settlement being conducted by the United Nations Commission on International Trade Law Working Group III for the period 2022–2025.

New and expanded mandates

8.I.106 As shown in table 8.I.31 (1), resource changes reflect an increase of $26,400, as follows:

(a) **Subprogramme 3, Progressive development and codification of international law**. The increase of $7,800 under experts relates to travel costs of the Special Rapporteur on crimes against humanity of the International Law Commission to attend the first session of the Preparatory Committee in 2026 pursuant to General Assembly resolution 79/122 titled “United Nations Conference of Plenipotentiaries on Prevention and Punishment of Crimes against Humanity”;

(b) **Subprogramme 4, Law of the sea and ocean affairs**. The increase of $18,600 relates to the provision of consultancy services to conduct research and support the drafting of the report of the Secretary-General on an overview of the impact of bottom fisheries on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks, pursuant to General Assembly resolution 79/145.

Other changes

8.I.107 As shown in table 8.I.31 (1), resource changes reflect a net decrease of $113,200, as follows:

(a) **Policymaking organs**. The net increase of $326,600 comprises:

(i) An increase of $417,300 under travel of representatives to participate in the first part of the seventy-seventh session of the International Law Commission, to be held in New York pursuant to General Assembly resolution 79/121;

(ii) A decrease of $90,700 under travel of staff due to reduced travel provisions for Headquarters staff servicing the International Law Commission secretariat;

(b) **Executive direction and management**. The decrease of $3,700 under contractual services relates to the lower standard price of information and communications technology charges for Headquarters personnel;

(c) **Subprogramme 1, Provision of legal services to the United Nations system as a whole**. The decrease of $4,500 under contractual services is as explained in paragraph 8.I.107 (b);

(d) **Subprogramme 2 General legal services provided to United Nations organs and programmes**. The decrease of $8,600 under contractual services is as explained in paragraph 8.I.107 (b);

(e) **Subprogramme 3, Progressive development and codification of international law**. The net increase of $90,100 comprises:

(i) Cost-neutral changes under posts and other staff costs due to the proposed conversion of two general temporary assistance positions (P-3 and General Service (Other level)) to posts (see annex II);

(ii) An increase of $99,200 under general operating expenses, which would cover miscellaneous services required to support the conduct of various United Nations regional courses and the United Nations International Law Fellowship Programme;

(iii) A decrease of $9,100 under contractual services is as explained in paragraph 8.I.107 (b);

(f) **Subprogramme 4, Law of the sea and ocean affairs**. The decrease of $519,300 comprises:

(i) A decrease of $502,500 under travel of staff ($88,700), travel of experts ($5,500), consultants ($127,600) and grants and contributions ($280,700) that takes into account the lower-than-anticipated requests from States in 2024 for national technical assistance relating to the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction, and the planned reduction in the number of capacity-building and technical assistance workshops from five to two;

(ii) A decrease of $16,800 under contractual services is as explained in paragraph 8.I.107 (b);

(g) **Subprogramme 5, Progressive harmonization, modernization and unification of the law of international trade**. The increase of $51,100 comprises:

(i) An increase of $50,200 under contractual services due to the estimated amount of cost-recovery charges that are not part of the recurring budget of the Office in 2026;

(ii) An increase of $900 under contractual services relating to the higher standard price of the core software package for non-field personnel outside of Headquarters;

(h) **Subprogramme 6, Custody, registration and publication of treaties**. The decrease of $10,300 under contractual services is as explained in paragraph 8.I.107 (b);

(i) **Programme support**. The decrease of $34,600 under contractual services is as explained in paragraph 8.I.107 (b).

Other assessed resources

8.I.108 As reflected in tables 8.I.31 (2) and 8.I.32 (2), other assessed resources amount to $5,279,100. The resources would complement regular budget resources and provide for the requirements indicated in the report of the Secretary-General on the budget for the support account for peacekeeping operations for the period from 1 July 2025 to 30 June 2026 (A/79/783).

Extrabudgetary resources

8.I.109 As reflected in tables 8.I.31 (3) and 8.I.32 (3), the Office expects to continue to receive both cash and in-kind contributions, which would complement regular budget resources. In 2026, extrabudgetary resources are estimated at $12,849,700 and would provide for 32 posts (2 D-1, 2 P-5, 7 P-4, 10 P-3, 2 P-2, 7 General Service (Other level) and 2 Local level) and non-post resources, whose functions would include the provision of legal advice and assistance to facilitate the implementation of substantive mandates and to protect the legal interests and minimize the legal liabilities of the United Nations.

8.I.110 Anticipated in-kind contributions with an estimated value of $544,400 would provide for: (a) donated right-to-use arrangements between the United Nations, the Ministry of Justice of the Republic of Korea and the city of Incheon regarding the operation of and financial contributions to the United Nations Commission on International Trade Law Regional Centre for Asia and the Pacific ($42,000); (b) other services, such as expert advice from two legal experts, for the Regional Centre ($97,700); and (c) technical assistance, administrative support and other services as a contribution for the World Oceans Day event ($404,700).

8.I.111 The extrabudgetary resources for the Office of Legal Affairs are subject to the oversight of the Office, which has delegated authority from the Secretary-General.

Policymaking organs

8.I.112 The resources proposed under this component would provide for the policymaking organs as shown in table 8.I.34.

Table 8.I.34

(Thousands of United States dollars)

Executive direction and management

8.I.114 The executive direction and management component comprises the Office of the Under-Secretary-General for Legal Affairs and the Evaluation and Strategic Planning Unit. The component is responsible for the following functions:

(a) Provide the overall policy direction, supervision, administration and management of the Office of Legal Affairs;

(b) Represent the Secretary-General at meetings and conferences of a legal nature and in judicial and arbitral proceedings, certify legal instruments issued on behalf of the United Nations, convene meetings of the legal advisers of the United Nations system and represent the Organization at such meetings;

(c) Monitor the resources of the Office of Legal Affairs to address the changing organizational needs and workload and to improve the Office's management systems;

(d) Formulate recommendations to the Secretary-General in interdepartmental and inter-agency bodies, support the coordination of the United Nations Legal Advisers Network and provide legal advice to high-level inter-agency bodies;

(e) Ensure the consistent monitoring and self-evaluation of subprogrammes and support subprogrammes with the identification, development and review of monitoring and self-evaluation methodologies and practices;

(f) Coordinate the working groups on monitoring and evaluation and on the Sustainable Development Goals within the Office of Legal Affairs;

(g) Act as the focal point for information on all aspects of the work of the Office of Legal Affairs, including on capacity-building activities coordinated by the Office, coordinate interdepartmental activities and consult and negotiate with other departments, offices, subsidiary bodies and related agencies of the United Nations system on matters of mutual concern;

(h) Act as the centre for coordination and supervision of all capacity-building activities, including those undertaken under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law (subprogramme 3), and for the

strengthening of the capacity of the Office of Legal Affairs to concentrate the planning, implementation, monitoring and evaluation of those activities to allow for a more strategic and integrated management of capacity-building efforts, the leveraging of partnerships and the replication of good practices regarding legal technical assistance across organizational units to better assist relevant stakeholders and better respond to requests by Member States.

8.I.115 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office integrates environmental management practices into its operations. This includes decreasing its greenhouse gas emissions by encouraging the use of videoconference facilities for interviews and meetings, reducing print services and ensuring that all printers are set to double-sided printing and encouraging staff to turn off computers and monitors at the end of the workday.

8.I.116 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.I.36. The timeliness of booking compliance was affected by several factors, such as the change in participants for workshops and seminars by sponsoring Member States, delays in participants obtaining entry visas and delayed confirmations of travellers and sponsors regarding their participation in activities.

II. Independent Investigative Mechanism for Myanmar

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

8.II.1 The Independent Investigative Mechanism for Myanmar is mandated to collect, consolidate, preserve and analyse evidence of the most serious international crimes and violations of international law committed in Myanmar since 2011 and prepare files that can be shared with competent investigative, prosecutorial and judicial authorities ("competent authorities") in order to facilitate fair and independent criminal proceedings in national, regional or international courts or tribunals. The mandate derives from Human Rights Council resolutions 39/2, 42/3, 43/26, 46/21, 47/1, 49/23, 50/3, 52/31, 53/26 and 56/1. In its resolution 43/26, the Council called for close and timely cooperation between the Mechanism and any future investigations by the International Criminal Court or the International Court of Justice. The mandate is further elaborated in the Mechanism's terms of reference (A/73/716, annex).

8.II.2 The General Assembly welcomed the creation of the Mechanism in its resolution 73/264 and, in its resolutions 75/238, 76/180, 77/227, 78/219 and 79/182, called upon the United Nations to ensure that the Mechanism was afforded flexibility in terms of staffing, location and operational freedom so that it could deliver as effectively as possible on its mandate.

Programme of work

Objective

8.II.3 The objective, to which the Mechanism contributes, is to ensure accountability of perpetrators and justice for victims of the most serious international crimes and violations of international law committed in Myanmar since 2011.

Strategy and external factors for 2026

8.II.4 To contribute to the objective, the Mechanism will:

(a) Collect and analyse information and evidence regarding crimes within its mandate, including by undertaking investigative missions;

(b) Provide protection and support services to witnesses and information providers, including through cooperation with national authorities and other partners;

(c) Develop and maintain a secure electronic information management system that can protect against evolving risks to information and communications technology security and facilitate the analysis of vast quantities of data in multiple formats and languages;

(d) Share evidence and analysis with competent authorities in accordance with its mandate, including for proceedings at the International Criminal Court and the International Court of Justice;

(e) Engage in outreach to relevant stakeholders, in particular to victims and witnesses, using various communication tools and civil society dialogues.

8.II.5 The above-mentioned work is expected to result in:

(a) The collection and preservation of information and evidence that can be shared with competent authorities in relation to crimes within the Mechanism's mandate;

(b) The initiation of fair and independent criminal proceedings by competent authorities in relation to the aforementioned crimes;

(c) Greater understanding of the Mechanism's mandate, work and expected results by all relevant stakeholders, including victims and the general public, in particular inside Myanmar.

8.II.6 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Some relevant Member States will permit the Mechanism to conduct evidence collection and witness interviews on their territory and facilitate the safety and well-being of witnesses and information providers;

(b) Some competent authorities will seek to exercise jurisdiction over the crimes within the Mechanism's mandate and such authorities will continue to request information from the Mechanism.

8.II.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism continues to engage with Member States, individuals, civil society organizations and business entities to seek relevant information and ensure support for its mandate.

8.II.8 With regard to inter-agency coordination and liaison, the Mechanism continues to consult with international courts and other accountability mechanisms, in particular in the areas of legal and judicial cooperation, information management systems, investigation of sexual and gender-based crimes, witness protection and support, and development of methodologies and policies. The Mechanism also seeks the support of other United Nations entities working on issues relating to Myanmar to facilitate its activities.

8.II.9 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Mechanism will continue its focus on sexual and gender-based crimes and crimes against children, including in the evidence and analysis it shares with competent authorities and through appropriate access to protection and support measures for victims of such crimes.

8.II.10 In line with the United Nations Disability Inclusion Strategy, the Mechanism will actively ensure appropriate access to protection and support measures to witnesses and victims with disabilities.

Evaluation activities

8.II.11 An evaluation conducted by the Mechanism on the establishment of cooperation arrangements with Member States for the purpose of facilitating the collection of testimonial and documentary evidence in their territory was completed in 2024 and has guided the proposed programme plan for 2026.

8.II.12 The evaluation affirmed the Mechanism's progress in advancing numerous cooperation arrangements with a concrete impact on the Mechanism's efforts, as reflected in results 1 and 3. In response to the results of the evaluation referenced above, the Mechanism will continue regular consultations with States and national authorities, including through regional networks; adopt pragmatic and flexible approaches to negotiating cooperation arrangements, including to encourage greater cooperation by States; and, as necessary, adopt alternative arrangements for collecting evidence. The evaluation will also inform efforts to improve efficiencies in the submission of requests to States to collect evidence in their territory and their consideration of such requests.

8.II.13 The following evaluations to be conducted by the Mechanism are planned for 2026:

(a) Evaluation of the Mechanism's methodology for sharing information with national authorities and related outcomes;

(b) Evaluation of the Mechanism's witness protection and support measures;

(c) Evaluation of the Mechanism's security systems and applications, including their impact.

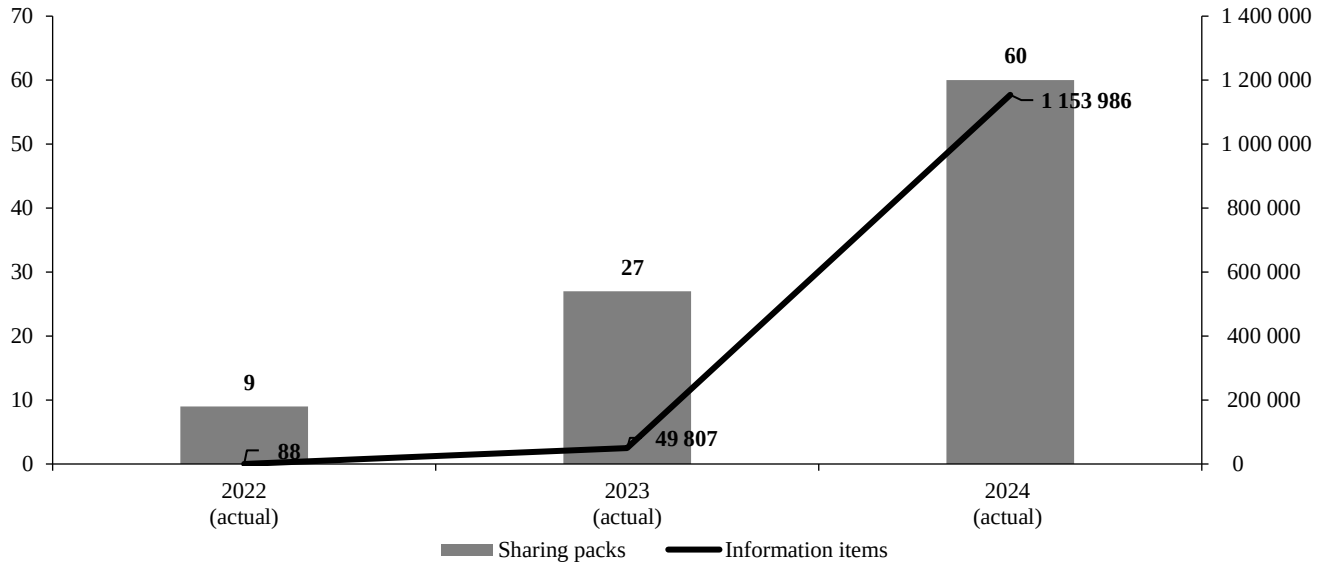
Programme performance in 2024

National and international authorities utilize diverse formats of evidentiary material to advance ongoing legal proceedings

8.II.14 The Mechanism was established to enable national and international authorities to deliver justice for victims of serious international crimes committed in Myanmar. To that end, the Mechanism has been supporting three ongoing proceedings related to crimes committed against the Rohingya population in Myanmar that are being conducted by the International Court of Justice, the International Criminal Court and Federal Prosecutor's Office No. 9 of Argentina. To date, the Mechanism has shared with competent authorities over 1 million information items in diverse formats, including witness statements, documents, photographs, videos, audio files, geospatial imagery, open-source materials and in-depth analytical products, on various matters of high contextual and evidentiary value to the ongoing proceedings. In September and November 2024 respectively, the Federal Prosecutor's Office No. 9 of Argentina and the Office of the Prosecutor of the International Criminal Court made submissions to their respective judicial authorities seeking arrest warrants for certain individuals who are alleged to be responsible for serious international crimes committed against the Rohingya. The written submissions phase of the proceedings at the International Court of Justice regarding alleged violations by Myanmar of the Convention on the Prevention and Punishment of the Crime of Genocide concluded in late 2024 and oral hearings on the merits are expected to begin in 2025.

8.II.15 Progress towards the objective is presented in the performance measure below (see figure 8.II.I).

Figure 8.II.I
Performance measure: number of evidentiary materials accessed by competent authorities (annual)



Planned results for 2026

Result 1: domestic and international authorities have access to evidence that assists in establishing specific crimes and identifying perpetrators

Programme performance in 2024 and target for 2026

8.II.16 The Mechanism's work contributed to domestic and international authorities having access to tailored, comprehensive and timely analytical products and underlying evidence in diverse formats that can assist such authorities in establishing specific crimes and identifying perpetrators of the most serious international crimes, which met the planned target.

8.II.17 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.II.1).

Table 8.II.1
Performance measure: domestic and international authorities have access to:

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Repository and analysis of information and evidence regarding priority situations and incidents	Repository of evidence and targeted analysis of hate speech; military structures and chain of command; sexual and gender-based crimes; and two post-coup priority incidents in Kayah and Sagaing	Repository of evidence and targeted analysis, including of (a) financial structures and connections between persons and groups of interest; (b) three post-coup priority incidents in Sagaing; and (c) geolocation of sites of interest	Repository of evidence and analysis pertaining to key suspected individuals linked to priority situations and incidents	Repository of evidence and analysis pertaining to additional persons and groups of interest and priority situations and incidents, including in Rakhine State

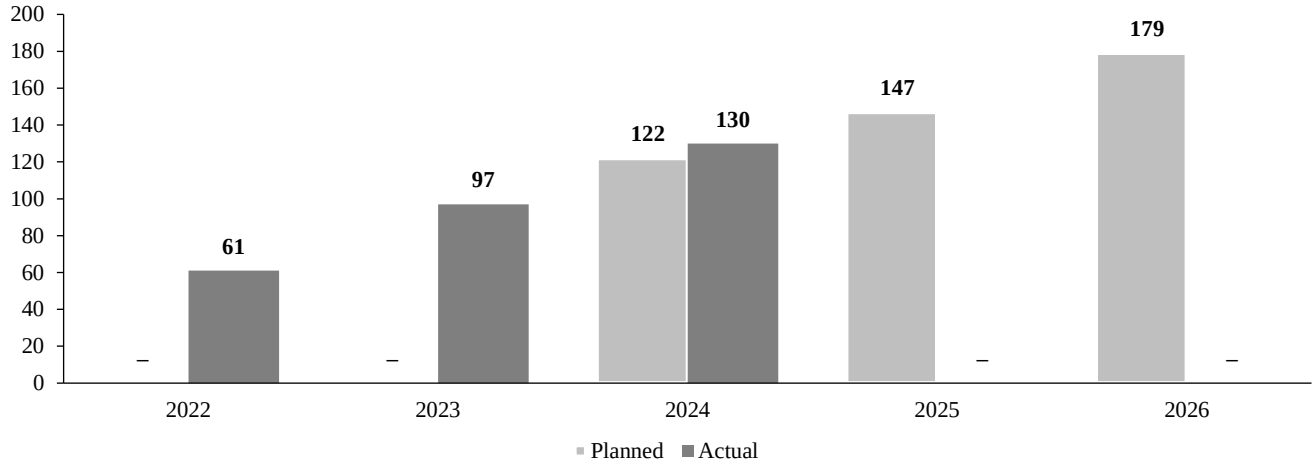
Result 2: victims, survivors, civil society and information providers engage in accountability processes

Programme performance in 2024 and target for 2026

8.II.18 The Mechanism's work contributed to 33 engagements with victims, survivors, civil society representatives and information providers, for a cumulative total of 130 engagements, which exceeded the planned target of 122 engagements.

8.II.19 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 8.II.II).

Figure 8.II.II
Performance measure: number of engagements of victims, survivors, civil society representatives and information providers (cumulative)



Result 3: increased access to evidence with the broadest possible admissibility in national, regional and international courts

Proposed programme plan for 2026

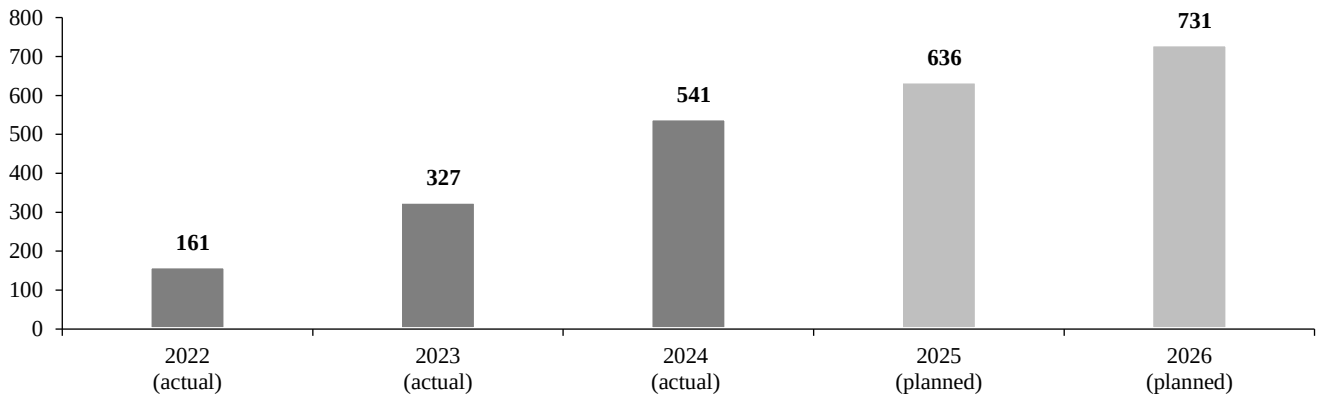
8.II.20 Building complex international criminal cases requires forensically reliable and probative evidence. In accordance with best practices, the Mechanism has conducted screenings (preliminary interviews) and detailed interviews with victims and witnesses who have relevant information. The Mechanism has shared screening notes and witness statements with relevant competent authorities, contributing to progress in ongoing proceedings.

Lessons learned and planned change

8.II.21 The lesson for the Mechanism is that competent authorities have greatly valued the detailed witness statements that the Mechanism has taken in person from individuals with first-hand knowledge relevant to crimes. In applying the lesson, the Mechanism will continue to engage with more victims and individuals who witnessed the commission, planning or ordering of serious crimes to collect testimonies. In doing so, the Mechanism will continue to engage with individuals from a wide range of locations and backgrounds in an effort to increase the pool of witnesses in stable security situations who may be available to testify in judicial proceedings. Furthermore, the Mechanism will utilize more culturally informed interviewing techniques and focus the interviews on the core elements of crimes and evidence of the identity and responsibility of alleged perpetrators.

8.II.22 Expected progress towards the objective is presented in the performance measure below (see figure 8.II.III).

Figure 8.II.III
Performance measure: number of screening notes and witness statements available for sharing (cumulative)



Legislative mandates

8.II.23 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the Mechanism.

General Assembly resolutions

73/264	Situation of human rights in Myanmar	75/287	The situation in Myanmar
74/246; 75/238; 76/180; 77/227; 78/219; 79/182	Situation of human rights of Rohingya Muslims and other minorities in Myanmar		

Human Rights Council resolutions

39/2; 42/3; 47/1; 50/3; 53/26; 56/1	Situation of human rights of Rohingya Muslims and other minorities in Myanmar	43/26; 46/21; 49/23; 52/31; 55/20	Situation of human rights in Myanmar

Deliverables

8.II.24 Table 8.II.2 lists all deliverables of the Mechanism.

13. Investigation missions to interview witnesses and collect evidence	6	6	5	5

C. Substantive deliverables

Consultation, advice and advocacy: consultations with more than 50 entities, including Member States and civil society organizations.

Databases and substantive digital materials: databases and technical systems to securely register, preserve and verify information and evidence; systems and tools for analysis of the repository of evidence; information technology systems for safe and secure operations; and tools for artificial intelligence-assisted search.

Direct service delivery: protection and support measures for witnesses, including 180 threat and risk assessments to identify security risks to witnesses; 180 psychosocial assessments to identify support needs; in-house psychosocial services to facilitate witness interviews and screenings; and referrals of witnesses to service providers to facilitate psychosocial support.

D. Communication deliverables

Outreach programmes, special events and information materials: one conference with relevant stakeholders on the Mechanism's mandate and activities; three newsletters; five visual materials about the Mechanism's work in at least two languages of Myanmar in addition to the Myanmar language (Burmese).

External and media relations: 15 press conferences and media interviews; panels and events; and at least four briefings to the diplomatic and academic communities on progress of the Mechanism's work.

Digital platforms and multimedia content: Mechanism's website and social media accounts.

B. Proposed post and non-post resource requirements for 2026

Overview

8.II.25 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 8.II.3 to 8.II.5.

Table 8.II.3
Overall: evolution of financial resources by object of expenditure
(Thousands of United States dollars)

			Changes

8.II.26 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 8.II.6 to 8.II.8 and figure 8.II.IV.

8.II.27 As shown in tables 8.II.6 (1) and 8.II.7 (1), the overall resources proposed for 2026 amount to $15,834,600, reflecting a net increase of $180,800 (or 1.2 per cent) compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of the Mechanism's mandate.

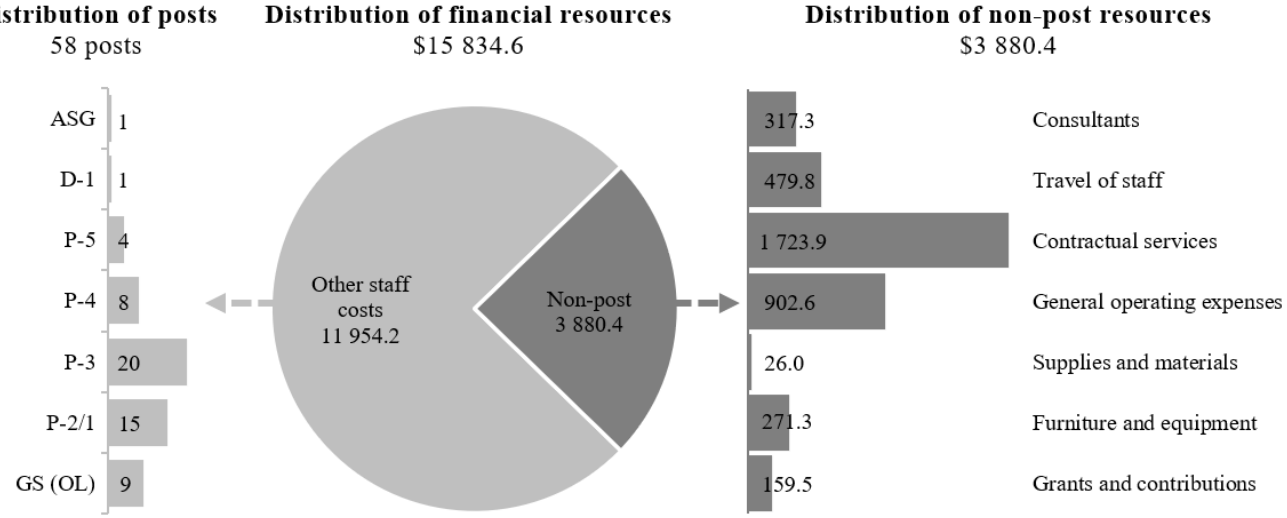
Figure 8.II.IV
Distribution of proposed resources for 2026
(Number of positions/thousands of United States dollars)



Explanation of variances by factor

Other changes

8.II.28 As shown in tables 8.II.6 (1) and 8.II.7 (1), resource changes reflect an increase of $180,800, as follows:

(a) An increase of $168,400 under other staff costs related to the proposed establishment of one position of Associate Field Security Coordination Officer (P-2) in Geneva (see annex II);

(b) An increase of $10,100 related to the non-post provisions associated with the proposed establishment of the position of Associate Field Security Coordination Officer (P-2), comprising contractual services ($3,600), general operating expenses ($2,500) and furniture and equipment ($4,000);

(c) An increase of $2,300 under contractual services relating to the higher standard price of the core software package for non-field personnel outside of Headquarters.

Extrabudgetary resources

8.II.29 As reflected in tables 8.II.6 (2) and 8.II.7 (2), extrabudgetary resources amount to $3,946,200. The resources would complement regular budget resources and would be used mainly to provide for 14 general temporary assistance positions (3 P-4, 5 P-3 and 6 P-2) to perform the functions of investigating sexual and gender-based crimes and crimes against and affecting children; financial and open-source investigations; information management; and programme management and administration. In addition, non-post resources would be used to cover the costs for information technology services, travel of staff, consultants, general operating expenses and specialized training required to implement the mandate.

8.II.30 The extrabudgetary resources under the Mechanism are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.

Other information

8.II.31 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability

information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Mechanism continues to minimize energy consumption at its facilities, where it installed special external walls with thermal insulation panels to reduce the dispersion of heat, thermal windows with energy-efficient features designed to resist the loss of heat and cold, light-emitting diode lights in all office and common areas, and a heating, ventilation and air-conditioning system with thermostats in all offices and common areas to enable better control of the system. The Mechanism also raises the awareness of its staff on energy-saving practices in the workplace.

8.II.32 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.II.9. The Mechanism will continue its efforts to improve the travel compliance rate through frequent monitoring of compliance with advance booking requirements for air travel, periodic briefings to staff on travel policies and monthly updates to managers.

Table 8.II.9

III. International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

8.III.1 The Mechanism is responsible for assisting in the investigation and prosecution of persons responsible for the most serious international crimes committed in the Syrian Arab Republic since March 2011. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 71/248, as further elucidated in the Mechanism's terms of reference (A/71/755, annex). The Mechanism has a responsibility to support criminal accountability and in doing so provides support to ongoing investigations and prosecutions in competent jurisdictions. It also generates analytical products that can be shared with competent jurisdictions that either currently, or may in the future, have jurisdiction over the crimes within the Mechanism's mandate.

Programme of work

Objective

8.III.2 The objective, to which the Mechanism contributes, is to achieve accountability for the most serious international crimes committed in the Syrian Arab Republic since March 2011.

Strategy and external factors for 2026

8.III.3 To contribute to the objective, the Mechanism will:

(a) Build the central repository through existing or new cooperation agreements and focused investigative work and analysis of evidence within the framework of its structural investigation and in response to requests for assistance from competent jurisdictions;

(b) Prepare analytical products in the context of projects within active lines of inquiry in its structural investigation;

(c) Share information, evidence, analytical products and expertise with national, regional or international courts and tribunals that have jurisdiction over these alleged crimes;

(d) Develop and implement its victim- and survivor-centred approach and integrate a focus on gender-based violence, including sexual violence, and crimes against children throughout its work, as well as addressing broader justice objectives, such as assisting efforts to clarify the fate of missing persons;

(e) Promote an integrated and inclusive approach to justice and accountability through effective dialogue and coordination, including with criminal justice actors, civil society and other United Nations actors;

(f) Provide support and protection to witnesses who cooperate with the Mechanism to ensure that they can do so in safety and security;

(g) Engage with the Syrian caretaker authorities, within the scope of its mandate, and other accountability actors in supporting justice processes for victims and survivors.

8.III.4 The above-mentioned work is expected to result in:

(a) Requesting parties having access to crucial evidence of alleged crimes, stored in a central repository and available for collation and distribution;

(b) Strengthened investigations, prosecutions and trials by jurisdictions with competence over the alleged crimes within the Mechanism's mandate;

(c) Greater accessibility to, and influence over, justice processes for victims and survivors, including those disadvantaged by gender-based and/or age-related discrimination, of crimes in the Syrian Arab Republic;

(d) The strengthening of the broadest possible range of justice initiatives compatible with the Mechanism's mandate.

8.III.5 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Entities and individuals will provide and/or facilitate the Mechanism's access to information and evidence in various formats for inclusion in the central repository;

(b) Access to the territory of the Syrian Arab Republic will be granted to the Mechanism for operations in furtherance of its mandate.

8.III.6 With regard to cooperation with other entities at the global, regional, national and local levels, the Mechanism will continue to request access to a growing number of States for evidence-gathering as well as to cooperate with competent jurisdictions, international organizations, Syrian and international civil society organizations and individuals, utilizing a variety of cooperation frameworks.

8.III.7 With regard to inter-agency coordination and liaison, the Mechanism will continue to cooperate with other United Nations entities working on issues related to the Syrian Arab Republic, including the Organisation for the Prohibition of Chemical Weapons, the Independent International Commission of Inquiry on the Syrian Arab Republic and the Independent Institution on Missing Persons in the Syrian Arab Republic, in accordance with its mandate.

8.III.8 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Mechanism continues to incorporate a gender perspective into its evidentiary strategies to avoid bias that results in the incomplete or inaccurate recording of harm experienced by females and to ensure that due attention is paid to sexual violence against males.

8.III.9 In line with the United Nations Disability Inclusion Strategy, the Mechanism will integrate throughout its work the experiences and perspectives of persons with disabilities in the Syrian context. This is consistent with its victim- and survivor-centred approach, whereby the Mechanism seeks to bring to light and address the experiences of a broad range of victims and survivors who have been historically overlooked.

Evaluation activities

8.III.10 An evaluation of the infrastructure and capacity needs of the Internet Resources Unit and its effectiveness in supporting analysis and sharing activities (postponed from 2025) is planned for 2026.

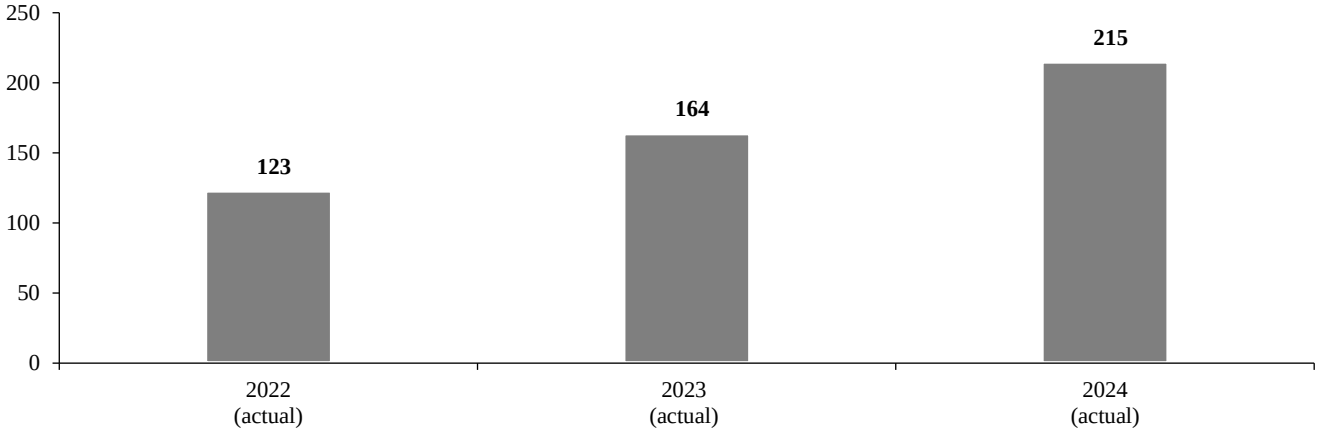
Programme performance in 2024

Competent jurisdictions' investigations furthering criminal accountability

8.III.11 The Mechanism is mandated to support criminal accountability and, in doing so, supports ongoing investigations and prosecutions of the most serious international crimes committed in the Syrian Arab Republic since March 2011 in competent jurisdictions. The Mechanism has supported investigations and prosecutions by sharing information, data sets, witness evidence, evidentiary modules and analytical products with competent jurisdictions.

8.III.12 Progress towards the objective is presented in the performance measure below (see figure 8.III.I).

Figure 8.III.I
Performance measure: number of distinct investigations enhanced with information provided by the Mechanism (cumulative)



Planned results for 2026

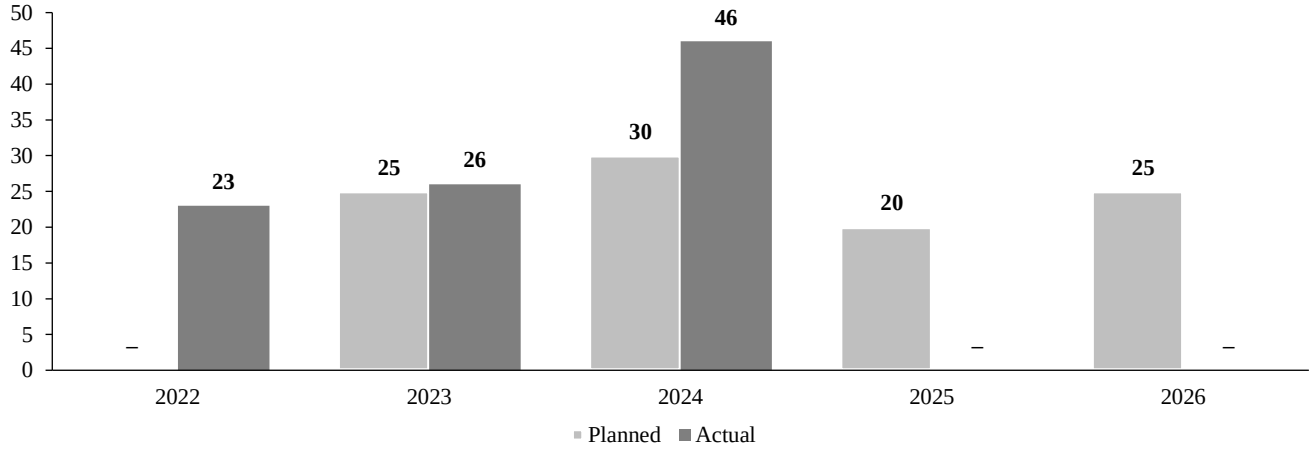
Result 1: increased availability of information in support of ongoing investigations and prosecutions and the search for missing persons

Programme performance in 2024 and target for 2026

8.III.13 The Mechanism's work contributed to 46 information and evidence packages proactively made available to competent jurisdictions and to assist the search for missing persons, which exceeded the planned target of 30 proactive sharing activities.

8.III.14 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 8.III.II).

Figure 8.III.II
Performance measure: number of information and evidence packages proactively made available to competent jurisdictions and to assist the search for missing persons (annual)



Result 2: enhanced protection and support to victims, witnesses or other sources cooperating with the Mechanism

Programme performance in 2024 and target for 2026

8.III.15 The programme's work contributed to the safety and security of witnesses cooperating with the Mechanism in carrying out its investigative mandate, with integrated protection and support mechanisms available throughout the investigative process, which met the planned target.

8.III.16 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 8.III.1).

Table 8.III.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Protection and support for witnesses, victims and other sources, including integrated protective measures and support mechanisms available throughout the investigative process	Witnesses, victims and other sources have access to systematic support, including standing referral pathways to Member States for protection and support-related services	Witnesses, victims and other sources have access to necessary protection and support in countries where they reside

Result 3: an integrated approach for inclusive justice

Proposed programme plan for 2026

8.III.17 Meaningful and inclusive justice requires active engagement with victims and survivors to reflect in accountability processes their experiences, perspectives and priorities. The Mechanism takes appropriate measures to respect and ensure respect for the confidentiality, privacy, interests and personal circumstances of victims and survivors, including their age, sex, gender and health. The Mechanism has developed dedicated thematic strategies related to these factors, with the recognition

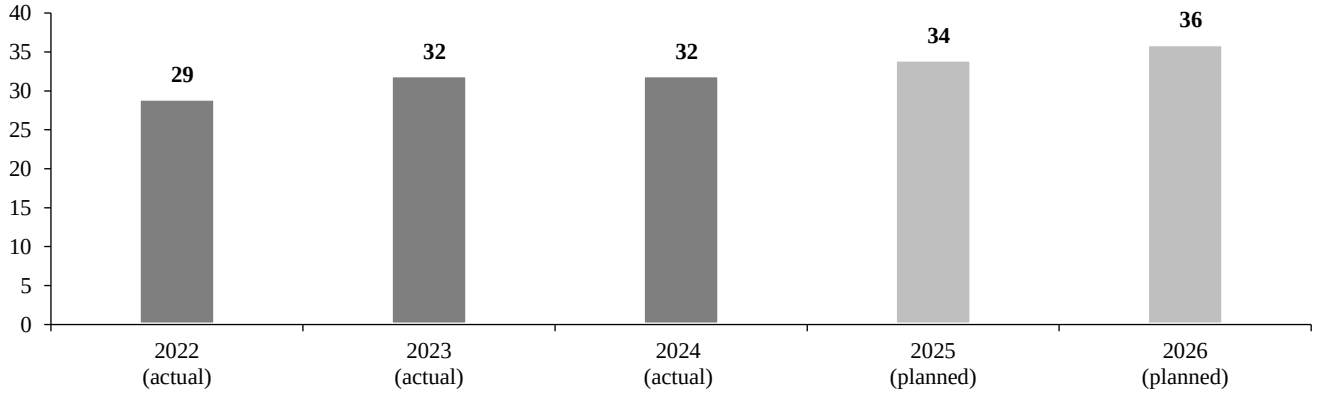
that, without proactive strategies, the experiences of specific groups of victims and survivors are insufficiently addressed in accountability processes. These thematic strategies have been developed and implemented since the commencement of the Mechanism's work and continue to be further refined as part of the Mechanism's victim- and survivor-centred approach, as reported to the General Assembly.

Lessons learned and planned change

8.III.18 The lesson for the Mechanism was that a consolidated framework that brings together the different components of its victim- and survivor-centred approach, and its thematic strategies, can enable more coherent and inclusive outcomes in justice processes. In applying the lesson, the Mechanism will utilize a consolidated framework to facilitate enhanced integration of a broad range of experiences, perspectives and priorities of victims and survivors.

8.III.19 Expected progress towards the objective is presented in the performance measure below (see figure 8.III.III).

Figure 8.III.III
Performance measure: number of engagements with relevant stakeholders on the integrated approach to inclusive justice (annual)



Legislative mandates

8.III.20 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the Mechanism.

General Assembly resolutions

71/248	International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011	75/193; 76/228; 77/230; 78/222; 79/185	Situation of human rights in the Syrian Arab Republic

Deliverables

8.III.21 Table 8.III.2 lists all deliverables of the Mechanism.

Table 8.III.2

11. Packages of analytical products relevant to individual criminal responsibility for specific international crimes	3	3	2	1
Fact-finding, monitoring and investigation missions (number of missions)	**20**	**16**	**20**	**20**
12. Investigation-related missions to identify and meet sources and potential witnesses, to interview witnesses and/or to collect evidence for the Mechanism's repository of information and evidence	20	16	20	20
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with and cooperation in support of national judicial authorities from more than 15 countries; and consultations with civil society, including a broad range of victim and survivor communities.				
Databases and substantive digital materials: central repository of evidence of crimes committed in the Syrian Arab Republic since March 2011.				
Direct service delivery: protection and support measures for Mechanism witnesses, including threat assessments to identify security risks to witnesses and referrals of witnesses to service providers to facilitate medical and psychosocial support.				
D. Communication deliverables				
Outreach programmes, special events and information materials: periodic bulletins for some 1,500 NGOs and other entities; videos, animations, information and "frequently asked questions" for general dissemination; background papers about the Mechanism; and awareness-raising meetings for United Nations partners of the Mechanism.				
External and media relations: press statements, press conferences and interviews; panels and events; and briefings to the diplomatic and academic communities.				
Digital platforms and multimedia content: the Mechanism's website.				

B. Proposed post and non-post resource requirements for 2026

Overview

8.III.22 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 8.III.3 to 8.III.5.

Table 8.III.3
Overall: evolution of financial resources by object of expenditure
(Thousands of United States dollars)

			Changes					
Object of expenditure	*2024 expenditure*	*2025 approved*	*Technical adjustments*	*New/ expanded mandates*	*Other*	*Total*	*Percentage*	*2026 estimate*

8.III.23 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 8.III.6 to 8.III.8 and figure 8.III.IV

8.III.24 As shown in tables 8.III.6 (1) and 8.III.7 (1), the overall resources proposed for 2026 amount to $20,883,100, reflecting a net increase of $448,800 (or 2.2 per cent) compared with the approved budget for 2025. Resource changes result from other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

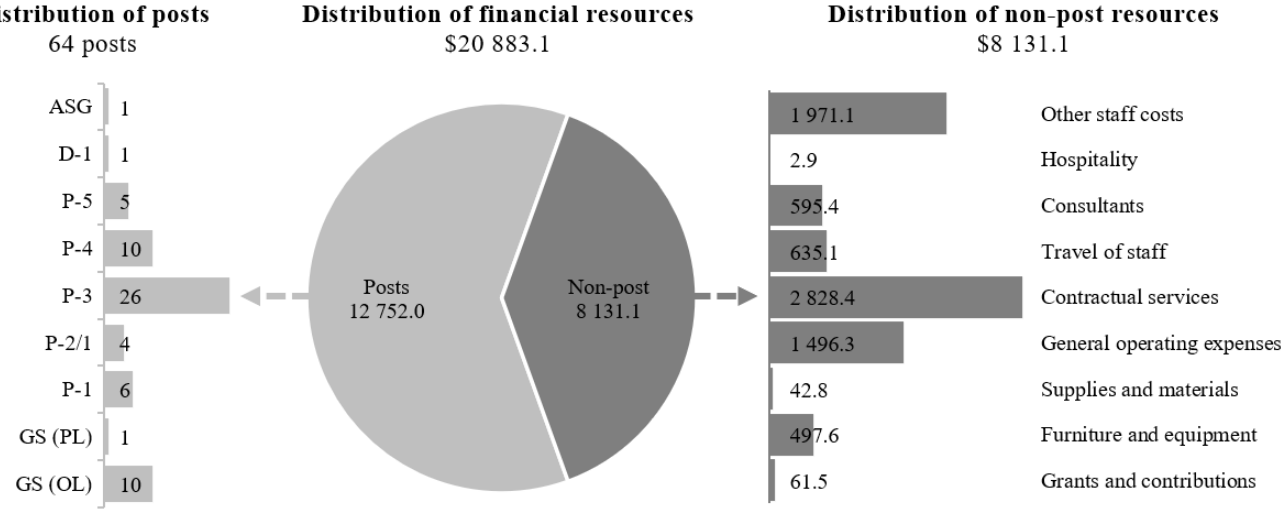
(Number of posts/thousands of United States dollars)



Explanation of variances by factor

Other changes

8.III.25 As shown in table 8.III.6 (1) and 8.III.7 (1), resource changes reflect a net increase of $448,800, as follows:

(a) An increase of $468,600 under posts to cover the proposed establishment of four new posts: Witness Protection Officer (P-4); Political Affairs Officer (P-4); Information Analyst (P-3); and Logistics Assistant (General Service (Other level)). In addition, cost-neutral changes are proposed, including the upward reclassification of one Security Coordination Officer (P-3) in the Operational Support Section to P-4 and redeployed to the Office of the Head of the Mechanism; the downward reclassification of one Reviser (P-4) to Field Interpreter (P-3) in the Section; and the reassignment of one Legal Officer (P-3) from the Office of Head of the Mechanism as a Data Scientist to be placed in the Information Systems Management Section (see annex II);

(b) An overall net decrease of $19,800 under non-post resources due mainly to realized efficiencies and a change in the implementation of a number of activities, which has resulted in the proposed redistribution of resources, as follows:

(i) The proposed decrease of $434,800, under contractual services ($339,900), furniture and equipment ($66,200) and grants and contributions ($28,700), is due mainly to the replacement of investigative software and satellite imagery services with more cost-effective solutions; a shift towards more online training of investigators in lieu of in-person attendance; and the reduced planned travel of witnesses to Geneva because resources will be used instead to cover additional investigative and non-investigative missions to the Syrian Arab Republic;

(ii) The proposed increase of $415,000, under consultants ($163,900), travel of staff ($89,900), general operating expenses ($143,700) and supplies and materials ($17,500), reflects mainly increased requirements for expertise on various thematic areas, including Syrian law, and planned travel to support additional investigative and non-investigative missions to the Syrian Arab Republic; an increase in rental and maintenance requirements, including the planned installation of a cooling system in Villa La Fenêtre,

which houses the Mechanism; and non-post resources associated with the establishment of the new posts.

Extrabudgetary resources

8.III.26 As reflected in tables 8.III.6 (2) and 8.III.7 (2), extrabudgetary resources amount to $5,167,100. The resources would complement regular budget resources and would be used mainly to provide for 20 posts (1 P-5, 6 P-4, 7 P-3, 5 P-2 and 1 General Service (Other level)) to perform mainly the functions of legal support, external relations and outreach, investigation, information management and analyses, witness support, interpretation and security management expertise. Non-post resources will be used to fund witness protection and other activities in support of the Mechanism's mandate.

8.III.27 The extrabudgetary resources for the Mechanism are subject to the oversight of the Mechanism, which has delegated authority from the Secretary-General.

Other information

8.III.28 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Mechanism is integrating environmental management practices into its operations. The Mechanism will seek to minimize its environmental footprint by participating in energy conservation efforts led by the United Nations Office at Geneva and, where applicable, by the Secretariat, utilizing shared technological services.

8.III.29 Information on the timely submission of documentation and advance booking for air travel is reflected in table 8.III.9. The nature of the Mechanism's work means that staff members are often required to travel at short notice, given that they need to be reactive to the schedules of the Mechanism's sources. The Mechanism continues to enhance centralized monitoring and disseminate a guidance document on official travel containing clear procedures with regard to the travel approval process.

Table 8.III.9

Annex II

Summary of proposed post changes, by component and subprogramme

Office of Legal Affairs

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Subprogramme 3 Progressive development and codification of international law	1 1	P-3 GS (OL)	**Conversion** from general temporary assistance to posts	The proposed conversion of two general temporary assistance positions of Legal Officer (P-3) and Video Production Assistant (General Service (Other level)) to posts reflects the long-term needs for their functions. The positions were established in the biennium 2016–2017 pursuant to the request contained in General Assembly resolution 69/117 to support the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law, including the organization of regional courses and fellowships and the further development of the lecture series of the Audiovisual Library of International Law, as well as the availability of its historic archives in the official languages of the United Nations.

Independent Investigative Mechanism for Myanmar

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Programme of work	1	P-2	**Establishment** of one Associate Field Security Coordination Officer	The proposed establishment is to address the significant rise in security threats and risks to the Mechanism's personnel, premises and assets resulting primarily from: (a) the continued increase in serious international crimes in Myanmar and the accompanying increase in the Mechanism's investigative activities in high-risk areas and engagements with high-risk witnesses, in particular since the February 2021 coup in Myanmar, with more than 28 million information items, including witness statements, documents, videos, photographs and other evidentiary material collected to date; (b) increased workload linked to the Mechanism's annual civil society dialogue, which required more than 200 personal risk assessments in 2023 and 2024, and approximately four months of preparatory work per dialogue to mitigate complex security challenges; and (c) growing prospects for justice and accountability requiring more robust and proactive security measures in response to new vulnerabilities for the Mechanism as it becomes more exposed to threat actors with significant capabilities to impede the Mechanism's work and cause serious harm to its personnel. The Mechanism currently has one post of Security Coordination Officer (P-3). The incumbent would support the Security Coordination Officer in undertaking security assessments in countries where the Mechanism undertakes diplomatic and investigative missions, implementing plans necessary to mitigate security risks and threats and assisting in developing a mission-specific security risk management approach, identifying comprehensive security risk mitigation measures and coordinating closely with relevant Mechanism personnel on their implementation. The incumbent would also maintain regular communication and coordinate with the Department of Safety and Security and host country security counterparts.

International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Programme of work	1	P-4	**Establishment** of one Political Affairs Officer	The Political Affairs Officer is proposed in order to support the Office of the Head of the Mechanism in its political engagements and discussions with the caretaker authority of the Syrian Arab Republic and regional stakeholders. In December 2024, the Mechanism was granted access to the territory of the Syrian Arab Republic for the first time and eight years after its establishment by the General Assembly. While the Mechanism has operated for the past eight years with non-State entities in the country, it now faces a very fluid political landscape that is likely to continue. Given that there are no Political Affairs Officer posts in the Mechanism, the proposed establishment of the Political Affairs Officer at the P-4 level would facilitate a more informed understanding and analysis of the political situation and the impact on its mandate delivery.
	1	P-4	**Establishment** of one Witness Protection Officer	The Witness Protection Officer is proposed in order to support the work of the Operational Support Section relating to witness protection services and ensuring that all witnesses, victims and any others who cooperate with the Mechanism can do so in safety and security. The current and near-term state of affairs in the Syrian Arab Republic, including access to the territory, is likely to increase the number of witnesses, as well as sensitive and security-related issues that need to be addressed in parallel. The incumbent will help the Mechanism not only to manage this level of risk and complexity, but also to successfully interact with relevant third-party actors. The incumbent will also lead and supervise the activities of the Mechanism's witness protection and support unit, which currently has one P-3 post.
	1	P-3	**Establishment** of one Information Analyst	The Information Analyst is proposed in order to support the Investigation and Analysis Section. On the basis of an early assessment of the current state of affairs, it is anticipated that the Mechanism will have access to additional substantial amounts of highly relevant evidentiary material. To adequately position itself to efficiently and effectively review and analyse new evidentiary material in parallel to working on materials already in its central repository, the Mechanism requires additional analytical capacity to plan and execute complex analytical assignments, including the testing, integration and optimization of new analytical tools and infrastructure. The additional analytical research capacity is driven by the growth in investigative activities, given the additional sources of information and evidence that are available in the Syrian Arab Republic. The current Information Analysts are working at full capacity analysing the material that the Mechanism holds in its central repository, supporting 61 open requests for assistance and the Mechanism's structural investigation. As capacity permits, the Information Analyst will also provide feedback to information providers regarding evidence that they have shared and participate in external engagement events discussing the Mechanism's substantive work.
	1	GS (OL)	**Establishment** of one Logistics Assistant	The Logistics Assistant is proposed in order to support the Mechanism's work related to the expected increase in engagements in and substantive missions to the territory of the Syrian Arab Republic. It is estimated that 20 annual missions will take place in the country during 2025 and 2026. The

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				missions require significant logistical arrangements and liaison with the United Nations country team on the ground in several countries (Jordan, Lebanon and the Syrian Arab Republic), a capacity that does not yet exist in the Mechanism. To date, the logistics needs of the entity have been provided by the Senior Administrative Officer, in addition to the incumbent's regular duties. This is no longer sustainable, given the increase in travel and the complexity of logistics requirements in the Syrian Arab Republic, including arrangements for ground transportation to and from the borders with Lebanon and/or Jordan and within Syrian territory, in order to ensure effective security management throughout the duration of the mission and provide the necessary office and hotel accommodation.
	1	P-3	**Reassignment** of one Legal Officer as Data Scientist (cost-neutral change)	The proposed reassignment reflects the need to strengthen data management capabilities by using existing capacities to the extent possible. The recent change in regime and access to the territory of the Syrian Arab Republic is expected to increase the review and management of new evidentiary materials requiring expertise in data science and management of the evidence pipeline, processing lab and multimedia analysis platform. Given the immense volume and complexity of data collected by the Mechanism, now totalling 281 terabytes, with most of those terabytes representing multimedia content such as video, imagery and audio, the need for specialized data science expertise has become critical. Approximately one third of the Mechanism's evidentiary records contain complex multimedia data that are not text-searchable without advanced artificial intelligence and data analysis techniques, making crucial evidence inaccessible without the right expertise. The creation of this post will address the long-term need for such capacity and will ensure that the collection, preservation and processing of non-text data is accomplished beyond a mere performative baseline. While the Mechanism's initial staffing table focused on resourcing eDiscovery, digital forensics and information security, disciplines that remain essential, what has become clear over time is that scalable, advanced data science capabilities, in particular in artificial intelligence and multimodal analysis, are now indispensable for fulfilling the mandate. The work of the Legal Officer post has been reviewed with a view to gaining efficiencies in the Office of the Head of the Mechanism through the redistribution of tasks to three other staff in the Office.
	1	P-3 to P-4	**Reclassification** of one Security Coordination Officer	The proposed upward reclassification of the Security Coordination Officer from P-3 to P-4 relates to the need to strengthen security management functions in the light of recent access to the territory of the Syrian Arab Republic. In 2024, the Mechanism conducted 72 missions for diplomatic and substantive (witness/victim engagement and evidence collection) purposes. All missions were undertaken in Europe and North America. Since December 2024, the Mechanism has conducted consecutive missions to the Syrian Arab Republic, initially for political engagements. Approximately 95 missions are estimated annually for 2025 and 2026, including 20 to the Syrian Arab Republic. Missions to a country in political transition require significantly different risk and threat assessments for the Mechanism, as well as an escort to the mission area to provide on-site security advice in a fluid environment. In addition, the reclassification of the post to a higher level will improve the responsiveness to requests from

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				the Security Coordination Officer from both internal and external stakeholders and facilitate access to information and participation in high-level meetings. The reclassified Security Coordination Officer will be placed in the Office of the Head of the Mechanism. The cost for the upward reclassification will be offset by the downward reclassification of a post of Reviser (P-4) to a Field Interpreter (P-3), as explained below.
	1	P-4 to P-3	**Reclassification** of one Reviser (P-4) to Field Interpreter (P-3)	The proposed downward reclassification reflects the increased need for field interpretation. With the increase in investigative activity, witness protection and support, and meetings with civil society organizations and others resulting from the political change in the Syrian Arab Republic, the need for a reviser, working on written texts and documents, has been superseded by the need for additional interpretation capacity. There will be significant opportunities to gain access to evidence through the Mechanism's sources, including interviews requiring interpretation. Although the translation and revision of texts is still required, it is possible for the entity to outsource this, even when covering subjects requiring experience and recognized proficiency. The Field Interpreter (P-3) (Arabic) is required to provide consecutive interpretation support to the Mechanism's investigative teams (including witness interviews) and for protection and support assessments and calls in the mission or the duty station, meetings with civil society organizations and secondary translation support as and when required. The Field Interpreter will coordinate the outsourcing of all interpretation needs that exceed the capacity of in-house interpretation resources, require simultaneous interpretation skills or involve different language combinations.

Abbreviation: GS (OL), General Service (Other level).

I. Proposed organizational structure and post distribution for 2026 85
II. Summary of proposed post changes, by component and subprogramme 86

*** In keeping with paragraph 10 of General Assembly resolution 77/267, the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

9.1 The Department of Economic and Social Affairs supports the development pillar of the United Nations Secretariat by fostering international cooperation for sustainable development for all. The Department's responsibilities include: (a) providing substantive support to the United Nations bodies dealing with development issues, namely, the General Assembly, the Economic and Social Council and its functional commissions, and expert bodies; (b) monitoring and analysing development trends, prospects and policy issues globally; and (c) supporting the translation of policy frameworks developed in United Nations conferences and summits into policies and programmes at the country level and assisting Member States in building their national capacities. In doing so, the Department supports the implementation of the 2030 Agenda for Sustainable Development and the achievement of its Sustainable Development Goals through, among others, the regular programme of technical cooperation and United Nations Development Account projects. The mandate derives from the proposals put forward in the 1997 report of the Secretary-General entitled "Renewing the United Nations: a programme for reform" (A/51/950); in implementing the proposals, the General Assembly, in its resolution 52/220, noted the creation of the new Department of Economic and Social Affairs.

9.2 The Department forms the backbone of the normative and analytical support provided by the Secretariat to intergovernmental bodies and processes addressing the economic, social and environmental dimensions of sustainable development.

Strategy and external factors for 2026

9.3 The world continues to suffer setbacks in development progress, characterized by conflict, climate change, debt distress and high and rising inequalities. Countries in special situations, including the least developed countries, landlocked developing countries and small island developing States, remain particularly challenged. Middle-income countries still face challenges in achieving sustainable development.

9.4 Amid these challenges, a coherent and integrated approach in support of Member States is critical to accelerate progress in achieving the Sustainable Development Goals. The Department supports the commitments made by Member States through the political declarations of the Sustainable Development Goals Summit in 2019 and 2023, while being informed by the report of the Secretary-General on Our Common Agenda, adopted by the General Assembly in its resolution 76/6.

9.5 The Department continues to champion synergistic, future-focused approaches to sustainable development and approaches that address multiple, interlinked crises to improve the lives and livelihood of all people. This includes its work on climate action, sustainable infrastructure investment and risk-informed development cooperation.

9.6 The Department deploys foresight to anticipate economic, social and population trends. It generates, analyses and compiles a wide range of data and statistics to inform Member States and other stakeholders as they take stock of policy options to address global trends.

9.7 The Department identifies emerging trends and policy options for eradicating poverty, addressing inequalities and promoting opportunities for global progress.

9.8 In 2026, the Department will continue to support the delivery of the Pact for the Future, follow-up to the Antigua and Barbuda Agenda for Small Island Developing States and the 2026 United Nations Water Conference. The Department will strengthen the availability of critical social, demographic

and economic data to inform transformative policy in crisis recovery. It will be a thought leader on sustainable development through analysis that accounts for the differentiated impacts of existing emerging trends, as well as policies and programmes, on the poorest and most vulnerable, and on women and girls. The Department will leverage workstreams on climate action, digital transformation, data accessibility, foresight and frontier issues analysis, as well as on financing for development, including reforms to the international financial architecture and international tax cooperation. It will provide strategic substantive support to the resident coordinator system and United Nations country teams, enhancing national implementation of internationally agreed objectives, with a focus on countries in Africa and countries in special situations. It will also support development cooperation with middle-income countries, in accordance with its mandate.

9.9 With regard to cooperation with other entities at the global, regional, national and local levels, the Department contributes to building multi-stakeholder partnerships and capacity development in thematic areas, including forests, natural resources, water, energy, climate, the ocean, transport, science and technology, and special concerns of small island developing States.

9.10 With regard to inter-agency coordination and liaison, the Department continues to support the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in collaboration with United Nations system entities and the United Nations Sustainable Development Group. In collaboration with the Development Coordination Office, the Department facilitates structured engagement with resident coordinators strengthening delivery of capacity-building activities. These efforts assist in translating global norms and policy frameworks into national action towards the 2030 Agenda and other internationally agreed objectives. In addition, the Department, through the expanded Executive Committee on Economic and Social Affairs Plus, collaborates to ensure common approaches and synergies that support implementation of the 2030 Agenda, including on the voluntary national reviews and reporting of progress on the achievement of the Sustainable Development Goals. Furthermore, the Department continues to work with various agencies and stakeholders to improve the policy analysis and knowledge products for Member States. To ensure coherence within and across topic areas, the Department continues to chair or co-chair inter-agency mechanisms for persons with disabilities, Indigenous Peoples, older persons and young people, legal identity, financing for development, statistics, and science, technology and innovation, among others. Moreover, the United Nations Economists' Network continues to advance policy research on key current and emerging economic and financial issues, and their impact on sustainable development.

9.11 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Continued cooperation with policymakers and relevant national, regional and international stakeholders and entities on sustainable development issues in the various intergovernmental processes;

(b) Continued availability of up-to-date and accurate information, data and trends for analytical products;

(c) Governments and other relevant stakeholders continue to collaborate in undertaking the proposed programme activities with the necessary capacity and resources.

9.12 The Department integrates a gender perspective into its normative and analytical work and its support for intergovernmental bodies, including in its programme activities, deliverables and results, as appropriate. It continues to apply gender analysis in its work and highlight issues related to gender equality in the substantive documentation and deliberations of intergovernmental bodies, as appropriate.

9.13 In line with the United Nations Disability Inclusion Strategy, the Department promotes inclusive sustainable development for all, including persons with disabilities, and realizes the promise of the 2030 Agenda to leave no one behind. As secretariat to the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Department facilitates global dialogue to

address existing gaps in translating the international commitments to persons with disabilities into development policies, programming and practices at the national and international levels. This includes the compilation and analysis of disability data and the highlighting of best practices in fostering more accessible and disability-inclusive societies.

Legislative mandates

9.14 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

47/190	Report of the United Nations Conference on Environment and Development
47/191	Institutional arrangements to follow up the United Nations Conference on Environment and Development
50/227	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields
51/176	Implementation of the Programme of Action of the International Conference on Population and Development
51/240	Agenda for Development
55/2	United Nations Millennium Declaration
52/220	Questions relating to the proposed programme budget for the biennium 1998–1999
56/177; 79/146	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
57/144	Follow-up to the outcome of the Millennium Summit
57/253	World Summit on Sustainable Development
57/270 B	Integrated and coordinated implementation of and follow-up to the outcomes of major United Nations conferences and summits in the economic and social fields
58/220	Economic and technical cooperation among developing countries
58/269	Strengthening of the United Nations: an agenda for further change
59/243	Integration of the economies in transition into the world economy
60/1	2005 World Summit Outcome
60/265	Follow-up to the development outcome of the 2005 World Summit, including the Millennium Development Goals and the other internationally agreed development goals
66/288	The future we want
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway
69/151	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
69/214	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
69/321	Revitalization of the work of the General Assembly
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
74/4; 78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
74/228; 79/216	Role of the United Nations in promoting development in the context of globalization and interdependence
75/290 A	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
75/290 B	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council
76/194; 78/138	Commodities

76/258	Doha Programme of Action for the Least Developed Countries
77/184; 78/166	Operational activities for development of the United Nations system
78/132; 79/194	Information and communications technologies for sustainable development
78/152; 79/205	Disaster risk reduction
78/164; 79/221	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
78/165; 79/225	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
78/317	The Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity
78/322	Multidimensional vulnerability index
79/1	The Pact for the Future
79/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

Economic and Social Council resolutions

1998/7	Importance of population census activities for evaluation of progress in implementing the Programme of Action of the International Conference on Population and Development
2007/2	The role of the United Nations system in providing full and productive employment and decent work for all
2009/29; 2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16
2014/14; 2015/15	Progress in the implementation of General Assembly resolution 67/226 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2021/30	Open-source technologies for sustainable development
2023/11; 2024/3	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2023/14	Creating full and productive employment and decent work for all as a way of overcoming inequalities to accelerate the recovery from the COVID-19 pandemic and the full implementation of the 2030 Agenda for Sustainable Development
2023/31; 2024/19	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system

Economic and Social Council agreed conclusion

2007	Ministerial declaration on strengthening efforts to eradicate poverty and hunger, including through the global partnership for development

Ministerial communiqués of the high-level segment of the substantive session of the Economic and Social Council

2002	The contribution of human resources development, including in the areas of health and education, to the process of development
2003	Promoting an integrated approach to rural development in developing countries for poverty eradication and sustainable development
2004	Resources mobilization and enabling environment for poverty eradication in the context of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001–2010
2006	Creating an environment at the national and international levels conducive to generating full and productive employment and decent work for all, and its impact on sustainable development

2007	Strengthening efforts at all levels to promote pro-poor sustained economic growth, including through equitable macroeconomic policies	2008	Annual ministerial review on the theme "Implementing the internationally agreed goals and commitments in regard to sustainable development"
2007	Annual ministerial review on the theme "Strengthening efforts to eradicate poverty and hunger, including through the global partnership for development"	2015	Managing the transition from the Millennium Development Goals to the sustainable development goals: what it will take
2008	Development Cooperation Forum		

Ministerial declarations of the high-level segment of the Economic and Social Council and the high-level political forum on sustainable development, convened under the auspices of the Council

E/HLS/2016/1	Implementing the post-2015 development agenda: moving from commitments to results; Ensuring that no one is left behind	E/HLS/2022/1	Building back better from the coronavirus disease (COVID-19) while advancing the full implementation of the 2030 Agenda for Sustainable Development
E/HLS/2017/1	Eradicating poverty in all its forms and dimensions through promoting sustainable development, expanding opportunities and addressing related challenges Eradicating poverty and promoting prosperity in a changing world	E/HLS/2024/1	Ministerial declaration of the high-level segment of the 2024 session of the Economic and Social Council and the 2024 high-level political forum on sustainable development convened under the auspices of the Council on the theme "Reinforcing the 2030 Agenda for Sustainable Development and eradicating poverty in times of multiple crises: the effective delivery of sustainable, resilient and innovative solutions"
E/HLS/2021/1	Sustainable and resilient recovery from the COVID-19 pandemic that promotes the economic, social and environmental dimensions of sustainable development: building an inclusive and effective path for the achievement of the 2030 Agenda in the context of the decade of action and delivery for sustainable development		

Subprogramme 1
Intergovernmental support and coordination for sustainable development

General Assembly resolutions and decisions

45/264	Restructuring and revitalization of the United Nations in the economic, social and related fields	68/1; 72/305	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council
48/162	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	70/106	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
48/209	Operational activities for development: field offices of the United Nations development system	70/201	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
S-19/2	Programme for the Further Implementation of Agenda 21	70/262	Review of the United Nations peacebuilding architecture
52/12 B	Renewing the United Nations: a programme for reform	70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level
60/180	The Peacebuilding Commission	72/276	Follow-up to the report of the Secretary-General on peacebuilding and sustaining peace
60/252	World Summit on the Information Society	74/228; 77/175	Role of the United Nations in promoting development in the context of globalization and interdependence
61/16	Strengthening of the Economic and Social Council		
63/311; 64/289	System-wide coherence		
67/290	Format and organizational aspects of the high-level political forum on sustainable development		

74/298	Review of the implementation of General Assembly resolution 67/290 on the high-level political forum on sustainable development, resolution 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level and resolution 72/305 on the strengthening of the Economic and Social Council
74/537 B	Revitalization of the work of the Second Committee
75/511	United Nations Pledging Conference for Development Activities
76/4	Review of the functioning of the reinvigorated resident coordinator system, including its funding arrangement
77/150; 78/132	Information and communications technologies for development
77/182	Human resources development
78/285	Review of the implementation of General Assembly resolution 75/290 A on the strengthening of the Economic and Social Council and resolution 75/290 B on the high-level political forum on sustainable development and the follow-up and review of the 2030 Agenda for Sustainable Development at the global level

Economic and Social Council resolutions and decisions

1996/31	Consultative relationship between the United Nations and non-governmental organizations
1999/51	Restructuring and revitalization of the United Nations in the economic, social and related fields and cooperation between the United Nations and the Bretton Woods institutions
2000/19	Funding operational activities for development of the United Nations system
2001/27	Implementation of General Assembly resolutions 50/227 and 52/12 B: improving the working methods of the functional commissions of the Economic and Social Council
2002/225	Establishment of the general voluntary trust fund in support of the United Nations NGO Informal Regional Network
2004/52	Long-term programme of support for Haiti
2006/44	Role of the Economic and Social Council in the integrated and coordinated implementation of the outcomes of and follow-up to major United Nations conferences and summits, in the light of General Assembly resolutions 50/227, 52/12 B and 57/270 B
2008/4	Measures to improve the quadrennial reporting procedures
2009/32; 2023/352	African countries emerging from conflict
2019/15; 2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2020/2	Support to the Sahel region
2022/334	Review of the functional commissions and expert bodies of the Economic and Social Council
2024/20	Ad Hoc Advisory Group on Haiti
2024/342	Improving the work of the Committee on Non-Governmental Organizations
2024/345	Sustainable development in the Sahel

Economic and Social Council agreed conclusions

1995/1	Coordinated follow-up by the United Nations system and implementation of the results of the major international conferences organized by the United Nations in the economic, social and related fields
1997/1	Fostering an enabling environment for development: financial flows, including capital flows, investment and trade
2000/2	Assessment of the progress made within the United Nations system, through the conference reviews, in the promotion of an integrated and coordinated implementation of the outcomes of and follow-up to major United Nations conferences and summits in the economic, social and related fields
2001/1	Role of the United Nations in promoting development, particularly with respect to access to and transfer of knowledge and technology, especially information and communication technologies, inter alia, through partnerships with relevant stakeholders, including the private sector
2002/1	Strengthening further the Economic and Social Council, building on its recent achievements, to help it fulfil the role ascribed to it in the Charter of the United Nations as contained in the United Nations Millennium Declaration
2008/2	Progress in the implementation of General Assembly resolution 62/208 on the triennial comprehensive policy review of operational activities for development of the United Nations system

2008/5	Strengthening of the Non-Governmental Organizations Branch of the Department of Economic and Social Affairs of the United Nations Secretariat	2008/29	Role of the Economic and Social Council in the integrated and coordinated implementation of the outcomes of and follow-up to major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16

Ministerial communiqués of the high-level segment of the substantive session of the Economic and Social Council

1998	Market access: developments since the Uruguay Round, implications, opportunities and challenges, in particular for the developing countries and the least developed among them, in the context of globalization and liberalization	2010	Implementing the internationally agreed goals and commitments in regard to gender equality and empowerment of women
		2011	Implementing the internationally agreed goals and commitments in regard to education
1999	The role of employment and work in poverty eradication: the empowerment and advancement of women	2012	Promoting productive capacity, employment and decent work to eradicate poverty in the context of inclusive, sustainable and equitable economic growth at all levels for achieving the Millennium Development Goals
2000	Development and international cooperation in the twenty-first century: the role of information technology in the context of a knowledge-based global economy	2013	Science, technology and innovation, and the potential of culture, for promoting sustainable development and achieving the Millennium Development Goals
2001	The role of the United Nations system in support of the efforts of African countries to achieve sustainable development	2014	Addressing ongoing and emerging challenges for meeting the Millennium Development Goals in 2015 and for sustaining development gains in the future
2008	Implementing the internationally agreed goals and commitments in regard to sustainable development		
2009	Implementing the internationally agreed goals and commitments in regard to global public health		

Subprogramme 2
Inclusive social development

General Assembly resolutions

37/52	World Programme of Action concerning Disabled Persons	62/10	World Day of Social Justice
		65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding
45/106; 46/91	Implementation of the International Plan of Action on Ageing and related activities		
47/196	Observance of an international day for the eradication of poverty	66/127	Follow-up to the Second World Assembly on Ageing
48/96	Standard Rules on the Equalization of Opportunities for Persons with Disabilities	66/149	World Down Syndrome Day
		67/139	Towards a comprehensive and integral international legal instrument to promote and protect the rights and dignity of older persons
50/81	World Programme of Action for Youth to the Year 2000 and Beyond		
50/141	International Year of Older Persons: towards a society for all ages	68/3	Outcome document of the high-level meeting of the General Assembly on the realization of the Millennium Development Goals and other internationally agreed development goals for persons with disabilities: the way forward, a disability-inclusive development agenda towards 2015 and beyond
51/58	The role of cooperatives in the light of new economic and social trends		
54/120; 76/137; 78/179	Policies and programmes involving youth		
S-24/2	Further initiatives for social development		
61/106	Convention on the Rights of Persons with Disabilities	69/2	Outcome document of the high-level plenary meeting of the General Assembly known as the World Conference on Indigenous Peoples
61/295	United Nations Declaration on the Rights of Indigenous Peoples		

69/142	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond
69/145	World Youth Skills Day
69/202	The role of the United Nations in promoting a new global human order
70/170	Towards the full realization of an inclusive and accessible United Nations for persons with disabilities
72/6	Building a peaceful and better world through sport and the Olympic ideal
72/162; 74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto
74/124; 75/153	Follow-up to the twentieth anniversary of the International Year of the Family and beyond
75/18; 79/8	Sport as an enabler of sustainable development
76/133; 78/172	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
76/134; 77/188	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
76/135; 78/175	Cooperatives in social development
76/136, 78/178	Promoting social integration through social inclusion
76/139; 79/150	Observance of the thirtieth anniversary of the International Year of the Family in 2024
76/154	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: participation
77/189; 79/149	Inclusive development for and with persons with disabilities
77/240	Promoting and mainstreaming easy-to-understand communication for accessibility for persons with disabilities
77/324	World Basketball Day
78/10	Building a peaceful and better world through sport and the Olympic ideal
78/195	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: situations of risk and humanitarian emergencies
78/261	“World Social Summit” under the title “Second World Summit for Social Development”
78/281	World Football Day
78/310	World Fair Play Day
78/318	Modalities of the “World Social Summit”, under the title “the Second World Summit for Social Development”
78/324	Consideration of decision 14/1 of the Open-ended Working Group on Ageing, entitled “Recommendations regarding the identification of possible gaps in the protection of the human rights of older persons and how best to address them”
78/325	United Nations Games
78/328	Enhancing the participation of Indigenous Peoples’ representatives and institutions in meetings of relevant United Nations bodies on issues affecting them
79/147	Follow-up to the Second World Assembly on Ageing
79/159	Rights of Indigenous Peoples
79/213	Promoting the social and solidarity economy for sustainable development

Economic and Social Council resolutions and decisions

1996/7	Follow-up to the World Summit for Social Development and the future role of the Commission for Social Development
1996/31	Consultative relationship between the United Nations and non-governmental organizations
2000/22	Establishment of a Permanent Forum on Indigenous Issues
2008/18	Promoting full employment and decent work for all
2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all
2016/8	Rethinking and strengthening social development in the contemporary world
2017/12	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the implementation of the 2030 Agenda for Sustainable Development
2018/5	Strategies for eradicating poverty to achieve sustainable development for all
2018/219	Report of the Commission for Social Development on its fifty-sixth session and provisional agenda and documentation for its fifty-seventh session
2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies
2020/7	Affordable housing and social protection systems for all to address homelessness
2021/8; 2023/12	Future organization and methods of work of the Commission for Social Development

2021/10	Socially just transition towards sustainable development: the role of digital technologies on social development and well-being of all
2023/13; 2024/5	Social dimensions of the New Partnership for Africa's Development

Economic and Social Council agreed conclusions

1996/1	Coordination of the United Nations system activities for poverty eradication

Commission for Social Development resolutions

45/2	Youth
59/5; 61/1	Policies and programmes involving youth
2023/15	Fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002
2024/4	Promoting care and support systems for social development
2006	Ministerial declaration on creating an environment at the national and international levels conducive to generating full and productive employment and decent work for all, and its impact on sustainable development

Subprogramme 3
Sustainable development

General Assembly resolutions

49/122	Global Conference on the Sustainable Development of Small Island Developing States (Barbados Plan of Action)
S-22/2	Declaration and state of progress and initiatives for the future implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
59/311	International Meeting to Review the Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States (Mauritius Strategy for the Further Implementation)
65/2	Outcome document of the High-Level Review Meeting on the Implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
67/215	Promotion of new and renewable resources of energy
71/222	International Decade for Action, "Water for Sustainable Development", 2018–2028
71/312	Our ocean, our future: call for action
72/212; 78/148	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
73/226	Midterm comprehensive review of the implementation of the International Decade for Action, "Water for Sustainable Development", 2018–2028
74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
76/296	Our ocean, our future, our responsibility
77/158	International Year of Glaciers' Preservation, 2025
77/169; 79/210	Harmony with Nature
77/242; 78/128	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
77/286	World Sustainable Transport Day
77/328	Further modalities of the fourth International Conference on Small Island Developing States
77/334	Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
78/151; 79/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
78/153; 79/206	Protection of global climate for present and future generations of humankind
78/157; 79/211	Ensuring access to affordable, reliable, sustainable and modern energy for all

Subprogramme 4
Statistics

General Assembly resolutions

68/261	Fundamental Principles of Official Statistics
69/266	A global geodetic reference frame for sustainable development
69/282	World Statistics Day
71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development

Economic and Social Council resolutions and decisions

2006/6	Strengthening statistical capacity
2011/24	Committee of Experts on Global Geospatial Information Management
2013/21	Fundamental Principles of Official Statistics
2014/31	A global geodetic reference frame for sustainable development
2015/10	2020 World Population and Housing Census Programme
2016/27	Strengthening institutional arrangements on geospatial information management
2018/2	Future organization and methods of work of the United Nations Group of Experts on Geographical Names
2018/14	Strategic Framework on Geospatial Information and Services for Disasters
2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2022/3	Ensuring that the work in the field of statistics and data is adaptive to the changing statistical and data ecosystem
2022/24	Enhancing global geospatial information management arrangements
2023/337	World Geographical Names Database
2023/338	Report of the United Nations Group of Experts on Geographical Names on its 2023 session and provisional agenda and dates of its 2025 session
2024/2	An inclusive and representative Statistical Commission to leave no one behind
2024/312	Report of the Statistical Commission on its fifty-fifth session and provisional agenda and dates of the fifty-sixth session of the Commission
2025/303	Report of the Committee of Experts on Global Geospatial Information Management on its fourteenth session and provisional agenda and dates of the fifteenth session of the Committee

Subprogramme 5
Population

General Assembly resolutions

49/128	Report of the International Conference on Population and Development
S-21/2	Key actions for the further implementation of the Programme of Action of the International Conference on Population and Development
57/299	Follow-up to the outcome of the twenty-sixth special session: implementation of the Declaration of Commitment on HIV/AIDS
65/234	Follow-up to the International Conference on Population and Development beyond 2014
68/4	Declaration of the High-level Dialogue on International Migration and Development
71/1	New York Declaration for Refugees and Migrants
72/281	International Day of Family Remittances
73/195	Global Compact for Safe, Orderly and Regular Migration
73/326	Format and organizational aspects of the international migration review forums
76/266	Progress Declaration of the International Migration Review Forum
77/176; 79/217	International migration and development

Economic and Social Council resolutions and decisions

1994/2	Work programme in the field of population
1995/55	Implementation of the Programme of Action of the International Conference on Population and Development
1997/2	International migration and development
1997/42	Follow-up to the International Conference on Population and Development
1999/10	Population growth, structure and distribution
2005/213	Improvement of the work of the Commission on Population and Development
2016/25	Future organization and methods of work of the Commission on Population and Development
2022/332	Cycle for the review and appraisal of the implementation of the Programme of Action of the International Conference on Population and Development

Commission on Population and Development resolutions

1997/2	Reporting requirements to the Commission on Population and Development
1997/3	Work programme in the field of population
1998/1	Health and mortality
2000/1	Population, gender and development
2001/1	Population, environment and development
2003/1	Population, education and development
2004/1	Work programme in the field of population
2004/2	Follow-up to the Programme of Action of the International Conference on Population and Development
2005/1	Population, development and HIV/AIDS, with particular emphasis on poverty
2005/2	Contribution of the implementation of the Programme of Action of the International Conference on Population and Development, in all its aspects, to the achievement of the internationally agreed development goals, including those contained in the United Nations Millennium Declaration
2006/1	Methods of work of the Commission on Population and Development
2006/2	International migration and development
2007/1	Changing age structures of populations and their implications for development
2008/1	Population distribution, urbanization, internal migration and development
2009/1	The contribution of the Programme of Action of the International Conference on Population and Development to the internationally agreed development goals, including the Millennium Development Goals
2010/1	Health, morbidity, mortality and development
2011/1	Fertility, reproductive health and development
2012/1	Adolescents and youth
2013/1	New trends in migration: demographic aspects
2014/1	Assessment of the status of implementation of the Programme of Action of the International Conference on Population and Development
2016/1	Strengthening the demographic evidence base for the 2030 Agenda for Sustainable Development
2021/1	Population, food security, nutrition and sustainable development
2022/1	Population and sustainable development, in particular sustained and inclusive economic growth

Subprogramme 6
Economic analysis and policy

General Assembly resolutions

118 (II)	Reports on world economic conditions and trends
61/210	Integration of the economies in transition into the world economy
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development
67/221	Smooth transition for countries graduating from the list of least developed countries
68/18; 73/133	Graduation of countries from the least developed country category
75/259	Extension of the preparatory period preceding the graduation of Angola from the least developed country category
76/8	Graduation of Bangladesh, the Lao People's Democratic Republic and Nepal from the least developed country category
76/191; 78/135	Unilateral economic measures as a means of political and economic coercion against developing countries
76/215; 78/162	Development cooperation with middle-income countries

76/217; 77/246	Follow-up to the second United Nations Conference on Landlocked Developing Countries
77/151; 78/134	International trade and development
77/174; 79/215	Towards a New International Economic Order
77/323	Extension of the preparatory period preceding the graduation of Solomon Islands from the least developed country category
78/125	Graduation of Bhutan from the least developed country category
78/126	Deferral of the graduation of Angola from the least developed country category to a later date
78/233; 79/218	Follow-up to the Fifth United Nations Conference on the Least Developed Countries
79/230	Graduation of Cambodia and Senegal from the least developed country category

Economic and Social Council resolutions and decisions

1990/52	Role of the United Nations in the early identification, analysis and forecasting of world economic developments
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields
2011/274	Review of United Nations support for small island developing States
2020/10	Report of the Committee for Development Policy on its twenty-second session
2020/16; 2021/19	Programme of Action for the Least Developed Countries for the Decade 2011–2020
2021/33	Report of the Committee for Development Policy on its twenty-third session
2022/8	Report of the Committee for Development Policy on its twenty-fourth session
2023/10	Report of the Committee for Development Policy on its twenty-fifth session
2023/29; 2024/18	Doha Programme of Action for the Least Developed Countries for the decade 2022–2031
2024/7	Report of the Committee for Development Policy on its twenty-sixth session

Subprogramme 7
Public institutions and digital government

General Assembly resolutions

50/225; 60/34	Public administration and development
69/228	Promoting and fostering the efficiency, accountability, effectiveness and transparency of public administration by strengthening supreme audit institutions
69/327	Promoting inclusive and accountable public services for sustainable development
70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society
71/256	New Urban Agenda
74/236; 77/182	Human resources development
75/194; 77/235	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption
76/213; 78/160	Science, technology and innovation for sustainable development
79/231	Promoting and fostering the efficiency, accountability, effectiveness and transparency of public administration by strengthening supreme audit institutions

Economic and Social Council resolutions

2001/45	Restructuring and revitalization of the Group of Experts on the United Nations Programme in Public Administration and Finance
2016/26	Report of the Committee of Experts on Public Administration on its fifteenth session
2017/23	Report of the Committee of Experts on Public Administration on its sixteenth session
2018/12	Report of the Committee of Experts on Public Administration on its seventeenth session
2019/26	Report of the Committee of Experts on Public Administration on its eighteenth session
2020/21	Report of the Committee of Experts on Public Administration on its nineteenth session

2022/9	Report of the Committee of Experts on Public Administration on its twenty-first session
2023/3; 2024/13	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
2023/28	Report of the Committee of Experts on Public Administration on its twenty-second session
2024/14	Science, technology and innovation for development
2024/16	Report of the Committee of Experts on Public Administration on its twenty-third session

Subprogramme 8
Sustainable forest management

General Assembly resolutions

62/98	Non-legally binding instrument on all types of forests
67/200	International Day of Forests
70/199	United Nations forest instrument
71/285	United Nations strategic plan for forests 2017–2030
78/320	Fostering sustainable forest management, including afforestation and reforestation, in degraded lands, including drylands, as an effective solution to environmental challenges

Economic and Social Council resolutions

2000/35	Report of the fourth session of the Intergovernmental Forum on Forests
2015/33	International arrangement on forests beyond 2015
2017/4	United Nations strategic plan for forests 2017–2030 and quadrennial programme of work of the United Nations Forum on Forests for the period 2017–2020
2020/14	Outcome of the fifteenth session of the United Nations Forum on Forests
2021/6	Programme of work of the United Nations Forum on Forests for the period 2022–2024
2022/17	Outcome of the seventeenth session of the United Nations Forum on Forests
2024/15	Outcome of the nineteenth session of the United Nations Forum on Forests

Subprogramme 9
Financing for sustainable development

General Assembly resolutions

56/210 B	International Conference on Financing for Development
57/250	High-Level Dialogue on strengthening international economic cooperation for development through partnership
57/273	Ensuring effective secretariat support for sustained follow-up to the outcome of the International Conference on Financing for Development
63/239	Doha Declaration on Financing for Development: outcome document of the Follow-up International Conference on Financing for Development to Review the Implementation of the Monterrey Consensus
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development
67/289; 71/327	The United Nations in global economic governance
71/213	Promotion of international cooperation to combat illicit financial flows in order to foster sustainable development
72/278	Interaction between the United Nations, national parliaments and the Inter-Parliamentary Union
73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
76/195; 78/139	Financial inclusion for sustainable development
76/197; 78/141	Promoting investments for sustainable development
78/136; 79/196	International financial system and development
78/137; 79/197	External debt sustainability and development
78/140; 79/234	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development

78/167; 79/236	South-South cooperation	78/231; 79/199	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
78/230; 79/235	Promotion of inclusive and effective international tax cooperation at the United Nations	78/271	Further modalities of the Fourth International Conference on Financing for Development

Economic and Social Council resolutions

2004/69; 2006/48; 2017/2	Committee of Experts on International Cooperation in Tax Matters	2014/11	Follow-up to the International Conference on Financing for Development
2009/30	A strengthened and more effective intergovernmental inclusive process to carry out the financing for development follow-up	2017/3	United Nations code of conduct on cooperation in combating international tax evasion
2010/26	Follow-up to the International Conference on Financing for Development and the 2008 Review Conference	E/FFDF/2024/3	Report of the Economic and Social Council forum on financing for development follow-up (Follow-up and review of the financing for development outcomes and the means of implementation of the 2030 Agenda for Sustainable Development)

Deliverables

9.15 Table 9.1 lists all cross-cutting deliverables of the programme.

Evaluation activities

9.16 An evaluation conducted by the Department on its information and communications technology (ICT) governance and services, completed in 2024, has guided the proposed programme plan for 2026.

9.17 In response to the results of the evaluation referenced above, the Department will, in 2026, identify additional ways to optimize resources for ICT to better meet the expectations of Member States and will promote innovation and enhance data and digital capabilities.

9.18 An evaluation to be conducted by the Department on cross-cutting or thematic topics across subprogrammes, in line with its 2024–2026 evaluation plan, is planned for 2026.

Programme of work

Subprogramme 1
Intergovernmental support and coordination for sustainable development

Objective

9.19 The objective, to which this subprogramme contributes, is to advance the roles of the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development in the integrated implementation of and follow-up to the 2030 Agenda and the outcomes of other United Nations conferences and summits in the economic, social, environmental and related fields.

Strategy

9.20 To contribute to the objective, the subprogramme will continue to support the Economic and Social Council and the high-level political forum on sustainable development in the promotion and review of the integrated implementation of the 2030 Agenda and related international commitments within the context of the follow-up to the 2023 political declaration adopted at the high-level political forum convened under the auspices of the General Assembly and the 2024 ministerial declaration of the high-level political forum. Specifically, the subprogramme will:

(a) Provide evidence-based analysis and advice to the Council by: (i) facilitating policy dialogue and the formulation of policy recommendations; (ii) monitoring and leveraging the work of its subsidiary bodies and United Nations system entities; (iii) identifying new and emerging issues having an impact on achievement of the Sustainable Development Goals; and (iv) reinforcing the links between policy discussions and reviews and national sustainable development efforts;

(b) Support the high-level political forum on sustainable development in the follow-up to and implementation of the 2030 Agenda by: (i) facilitating the progress review, policy dialogue and developing policy recommendations for the accelerated achievement of the 2030 Agenda, including through enhanced advocacy and communication efforts; (ii) assisting countries in preparing evidence-based, inclusive and analytical voluntary national reviews of their implementation of the 2030 Agenda; and (iii) engaging United Nations country teams, other subprogrammes of the Department and United Nations system entities in supporting the review process;

(c) Provide substantive support, upon request, to policy discussions and negotiations of the General Assembly, notably its Second Committee (economic and financial issues);

(d) Provide evidence and analysis for Member States to review and guide the operational activities of the United Nations development system based on mandates from the General Assembly's 2024 quadrennial comprehensive policy review of the operational activities for development of the United Nations system, including through the redesigned quadrennial comprehensive review monitoring and reporting framework, in collaboration with United Nations system entities;

(e) Support the resident coordinator system in guiding United Nations country teams in assisting countries in conducting voluntary national reviews and in enabling the country teams to provide coordinated assessment of the implementation of the quadrennial comprehensive policy review, in coordination with the Development Coordination Office;

(f) Support the work of the Ad Hoc Advisory Group on Haiti in providing advice on the long-term development strategy of the country, promoting socioeconomic recovery, reconstruction and sustainability and encouraging international support, based on Haiti's national development priorities;

(g) Provide analysis, evidence and recommendations on effective, people-centred and gender-sensitive approaches to address the multiple and interlinked global crises and accelerate the implementation of the 2030 Agenda, including addressing the impacts of crises on women and people in vulnerable situations, ensuring that no one is left behind;

(h) Support the engagement of non-governmental organizations (NGOs) in the work of the Council and the participation of major groups and other stakeholders in relevant intergovernmental processes, including the high-level political forum on sustainable development;

(i) Strengthen the engagement of young people in the work of the United Nations by improving the annual Council youth forum, in cooperation with the United Nations Youth Office and subprogramme 2 and facilitating the participation of youth speakers in other Council segments, forums, special meetings and the high-level political forum on sustainable development.

9.21 The above-mentioned work is expected to result in:

(a) Enhanced policy and operational guidance by the General Assembly and the Economic and Social Council on the implementation of the 2030 Agenda at the global, regional and country levels;

(b) A strengthened Council and high-level political forum on sustainable development, which will include improved understanding of the role of the Council as a principal Charter body for the coordinated and integrated implementation of the 2030 Agenda and that of the high-level political forum for more effective follow-up and review of the achievement of the Sustainable Development Goals;

(c) Better understanding among Member States, United Nations system organizations and other stakeholders of the multiple and interlinked global crises affecting implementation of the 2030 Agenda, and of policy options and practical measures for addressing the global crises, while accelerating progress towards the achievement of the Sustainable Development Goals and the implementation of the Pact for the Future, and better coordination and coherence in the global response to ongoing crises;

(d) Progress at the country level towards realizing the Sustainable Development Goals, including in countries presenting voluntary national reviews at the high-level political forum on sustainable development;

(e) Effective, efficient and coordinated United Nations development system support towards implementing the 2030 Agenda and responding to crises, including support for voluntary national reviews, as well as improved and clearer guidance from Member States to the United Nations development system;

(f) Increased and coordinated international support for Haiti's long-term development, stability and sustainable development;

(g) The voice of young people being heard at deliberations through the Council's youth forum;

(h) Improved engagement of NGOs in the work of the United Nations through support for the Committee on Non-Governmental Organizations, including through the integrated civil society organization system;

(i) Increased participation of major groups and other stakeholders in the work of the high-level political forum on sustainable development, as mandated in General Assembly resolution 67/290.

Programme performance in 2024

Advancing the implementation of the 2030 Agenda through effective multilateral solutions

9.22 The subprogramme supported the Economic and Social Council in leveraging the technical expertise and policy recommendations of its subsidiary bodies and the work of the United Nations system for informed policy-making through the Council's 2024 coordination and management segments. The subprogramme assisted Member States in reaching consensus on the ministerial declaration of the

2024 high-level segment of the Council and the high-level political forum on sustainable development under the auspices of the Council, and on the 2024 quadrennial comprehensive policy review resolution, and facilitated implementation of the operational activities segment. The Council, through the subprogramme's support, brings in young people, civil society and other stakeholders to engage with Member States to advance the 2030 Agenda.

9.23 Progress towards the objective is presented in the performance measure below (see table 9.2).

Table 9.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Intergovernmental dialogue linking coronavirus disease (COVID-19) pandemic recovery and sustainable development, focusing on building back better	Intergovernmental dialogue focused on strengthened multilateralism to navigate crises	Intergovernmental dialogue informed a comprehensive review of the implementation of the 2030 Agenda and facilitated the adoption of the ministerial declaration of the Economic and Social Council and the high-level political forum on sustainable development, building momentum for the 2024 Summit of the Future

Planned results for 2026

Result 1: strengthened coordinated global response to multiple interlinked crises

Programme performance in 2024 and target for 2026

9.24 The subprogramme's work contributed to enhanced international coordination and cooperation among Member States, the United Nations system and other stakeholders in response to multiple, interlinked crises, which met the planned target.

9.25 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.3).

Table 9.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Member States pursue coordinated response to interlinked global crises through policy dialogue and intergovernmental cooperation	Adoption of a forward-looking political declaration at the 2023 Sustainable Development Goals Summit	Accelerated efforts among Member States to achieve the Sustainable Development Goals by 2030, including by addressing ongoing and emerging global challenges in sustainable development, within the context of the 2024 high-	Building on the momentum from previous forums, Member States commit to concrete, integrated and targeted policies and action to implement the 2030 Agenda	Member States undertake a comprehensive review of the arrangements for the Economic and Social Council and the high-level political forum on sustainable development, as contained in General Assembly resolutions 75/290 A

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
		level political forum on sustainable development and the Summit of the Future		and 75/290 B and the follow-up and review of the 2030 Agenda, in line with resolution 78/285

Result 2: strengthened role of the Economic and Social Council to support Member States to translate commitments from the Sustainable Development Goals Summit into actions and national policies

Programme performance in 2024 and target for 2026

9.26 The subprogramme's work contributed to the Economic and Social Council providing policy guidance for the Summit of the Future, including through segments and special meetings that advanced discussions on key issues addressed in the Pact for the Future and its annexes, which met the planned target.

9.27 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.4).

Table 9.4
Performance measure

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
–	Strengthened coordination between the Economic and Social Council and the General Assembly, leading to policy guidance from the Council that helps Member States to translate commitments from the Sustainable Development Goals Summit into national policies and programmes	Economic and Social Council provided policy guidance to the preparations for the Summit of the Future through the ministerial declaration of the Council and the high-level political forum on sustainable development, calling for accelerated action for the achievement of the Sustainable Development Goals and full implementation of the political declaration of the 2023 Sustainable Development Goals Summit	Economic and Social Council and its subsidiary bodies provide policy guidance towards intergovernmental meetings, including the Fourth International Conference on Financing for Development	Economic and Social Council provides further guidance to enhance the work of its subsidiary bodies, including through its review of the implementation of the recommendations of the 2022 review of its functional commissions and expert bodies

Result 3: accelerated achievement of the Sustainable Development Goals through an effective preparatory process for voluntary national reviews

Proposed programme plan for 2026

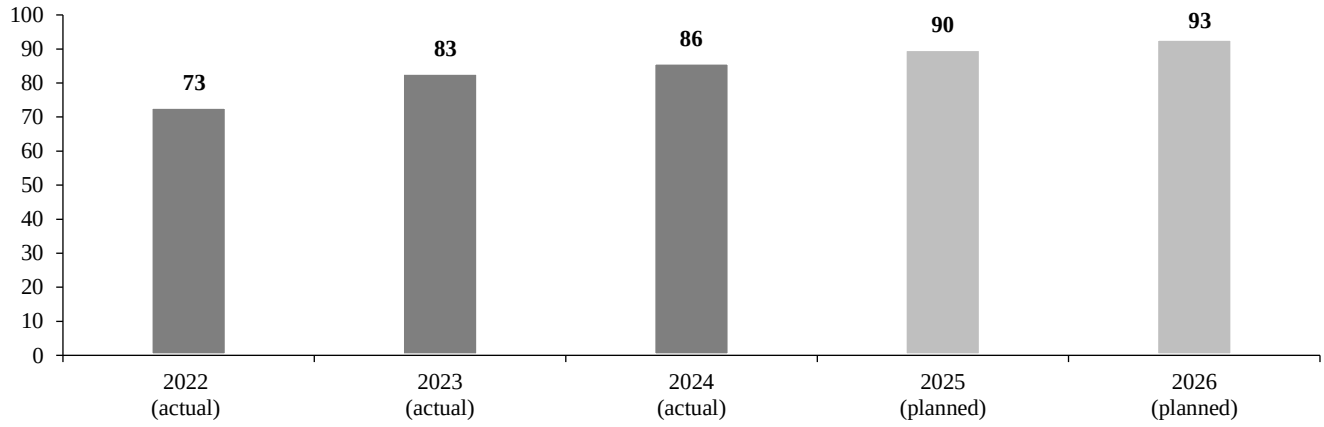
9.28 Implementing the commitments of the 2030 Agenda and the Sustainable Development Goals requires greater cooperation at all levels. To better assess the implementation and progress at the national and subnational levels and to facilitate the sharing of experiences, successes, challenges and lessons learned, the subprogramme supports the preparations and presentations of inclusive voluntary national reviews, including organizing annual workshops.

Lessons learned and planned change

9.29 The lesson for the subprogramme was the need to facilitate better the connection between the United Nations country teams and Member States during the voluntary national reviews. In applying the lesson, the subprogramme will work closely with the Development Coordination Office to strengthen coherence in the achievement of the Sustainable Development Goals at the national level.

9.30 Expected progress towards the objective is presented in the performance measure below (see figure 9.I).

Figure 9.I
Performance measure: countries that engaged more than one national entity in the preparation of their voluntary national reviews (percentage)



Deliverables

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: consultations on: General Assembly and Economic and Social Council resolutions, the quadrennial comprehensive policy review of United Nations system operational activities for development, ministerial declarations of the Council and the high-level political forum on sustainable development, and reports of the Committee on Non-Governmental Organizations; advice and analysis to the President and the Bureau of Economic and Social Council, the Bureau of the Second Committee and joint Bureaux meetings, Member States and stakeholders on sustainable development issues; consultation and advice to the Ad Hoc Advisory Group on Haiti; advocacy for the accelerated implementation of the 2030 Agenda and participation of NGOs, major groups and other stakeholders in the work of the Council and the high-level political forum; advocacy for the funding compact; and advice on inter-agency coordination mechanisms.

Databases and substantive digital materials: database on voluntary national reviews (406 entries); database on input to the high-level political forum on sustainable development (1,400 entries); paperless committee for official documentation of the Committee on Non-Governmental Organizations (41 sessions); integrated information and communications technology platforms for 6,468 NGOs in consultative status; indicator framework on the implementation of the quadrennial comprehensive policy review for Member States (400 new entries); database on the funding of United Nations operational activities for development (25,000 new entries); and database on the funding compact agreed to by Member States and the United Nations Sustainable Development Group in 2024.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on the work of the Economic and Social Council, the General Assembly and the high-level political forum on sustainable development; content for social media platforms, in collaboration with the Department of Global Communications; and webinars for some 6,000 NGOs in consultative status on participation in the activities of the Council and the United Nations.

Digital platforms and multimedia content: web pages and multimedia content for the Economic and Social Council and the high-level political forum on sustainable development; and website of the integrated Civil Society Organizations System.

Subprogramme 2
Inclusive social development

Objective

9.32 The objective, to which this subprogramme contributes, is to advance policies for the eradication of poverty, the reduction in inequality and the achievement of greater social inclusion and well-being for all.

Strategy

9.33 To contribute to the objective, the subprogramme will:

(a) Conduct evidence-based research and analysis, including on Indigenous Peoples, persons with disabilities, older persons and young people;

(b) Monitor national and global socioeconomic trends to identify emerging issues and assess their implications for social policy at the national and international levels, which will help Member States to make progress towards achieving Sustainable Development Goals 1 to 11 and 16;

(c) Provide substantive support for intergovernmental dialogue and processes, including the sessions of the Commission for Social Development, the Permanent Forum on Indigenous Issues, the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Economic and Social Council and the General Assembly;

(d) Provide analyses, technical advice and capacity development to requesting countries in partnership with resident coordinators and United Nations entities, including through the use of sport as an enabler of development and peace, as foreseen in the preamble of the 2030 Agenda. The subprogramme's analytical work will include a focus on reducing inequality, insecurity and strengthening social protection systems, and it will advance the situation of

vulnerable segments of the population and engage more closely with United Nations country teams to enhance action at the national level;

(e) Support Member States on issues related to shocks and recovery by promoting socially inclusive policy responses designed to eradicate poverty, reduce inequalities and protect the most vulnerable populations.

9.34 The above-mentioned work is expected to result in:

(a) Enhanced knowledge and awareness of Member States to ensure that no one is left behind;

(b) Recognition by Member States of specific social development issues as a basis for action at the national level;

(c) Increased capacity of Member States to effectively implement the social dimension of the 2030 Agenda;

(d) Progress of Member States in achieving more resilient and inclusive societies, placing the world back on track to implementing the 2030 Agenda.

Programme performance in 2024

Increased capacity and awareness of Member States to ratify and implement the Convention on the Rights of Persons with Disabilities

9.35 More than 1.3 billion people worldwide live with disabilities. However, persistent gaps remain between persons with disabilities and persons without disabilities, including women and girls with disabilities. Advancing and promoting disability inclusion across all fronts is pivotal in the realization of the Sustainable Development Goals. The subprogramme conducted research, provided policy recommendations to address the gaps and organized capacity-building and awareness-raising workshops for government officials at the national and local levels and representatives of persons with disabilities, to increase capacity and awareness on the ratification and implementation of the Convention on the Rights of Persons with Disabilities. For example, the subprogramme published the *Disability and Development Report 2024*, in which good practices and recommended action in accessibility and inclusion for the effective implementation of the Convention were identified.

9.36 Progress towards the objective is presented in the performance measure below (see table 9.6).

Table 9.6
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
The General Assembly, in its resolution 77/189, encouraged the ratification of the Convention on the Rights of Persons with Disabilities by Member States and its implementation by States Parties	Member States build their knowledge and awareness on the ratification and implementation of the Convention	Member States undertook action to implement the Convention, such as drafting guidelines for the implementation of the national plan for the ratification of the Convention

Planned results for 2026

Result 1: improved accessibility for the full and inclusive participation of persons with disabilities at the Conference of States Parties to the Convention on the Rights of Persons with Disabilities

Programme performance in 2024 and target for 2026

9.37 The subprogramme's work contributed to Member States and other stakeholders exchanging good practices on the use of specific modalities promoting accessibility before and during the Conference, which met the planned target.

9.38 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.7).

Table 9.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Greater inclusion through introduction of official documents in easy-to-read format	Guidance and feedback on specific modalities promoting accessibility were incorporated into the organization of the Conference of States Parties	Member States and stakeholders exchanged good practices on the use of specific modalities promoting accessibility	Good practices on the use of specific modalities are incorporated to continuously enhance the accessibility of the Conference	Enhanced accessibility of the Conference results in positive feedback among participants in a post-sessional survey

Result 2: improved coherence of the United Nations system efforts in addressing the needs of Indigenous Peoples

Programme performance in 2024 and target for 2026

9.39 The subprogramme's work contributed to the development of an indicator framework for the system-wide action plan on the rights of Indigenous Peoples, which did not meet the planned target of piloting the draft framework in selected countries. The target was not met because further consultations were required for the development of an indicator framework.

9.40 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.8).

Table 9.8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	The Inter-Agency Support Group on Indigenous Peoples' Issues identified elements to develop an indicator framework for the system-wide action plan on the rights of Indigenous Peoples	Indicator framework for the system-wide action plan developed	Additional countries use a final indicator framework for the system-wide action plan on the rights of Indigenous Peoples	A reporting mechanism for the system-wide action plan is in use by United Nations country teams

Result 3: accelerated social development through the Second World Summit for Social Development

Proposed programme plan for 2026

9.41 Since the adoption of the Copenhagen Declaration on Social Development and the Programme of Action in 1995, Member States have expressed concern that progress towards full implementation has been slow and uneven, and decided to convene the Second World Summit for Social Development to review the gaps and reaffirm commitments. The subprogramme will support the Summit and its preparatory process by developing analytical outputs, facilitating intergovernmental negotiations and coordinating inter-agency collaboration.

Lessons learned and planned change

9.42 The lesson for the subprogramme was that previous experience and knowledge for holding large conferences from across the United Nations system could better inform and strengthen the preparatory process for the Summit. In applying the lesson, the subprogramme will incorporate feedback from other United Nations entities and Member States through targeted consultations and regular dialogue, ensuring effective support for Member States in their engagement and negotiations.

9.43 Expected progress towards the objective is presented in the performance measure below (see table 9.9).

Table 9.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States express concern about the uneven and slow progress in social development	The General Assembly adopted resolutions 78/261 and 78/318, on convening the Second World Summit for Social Development	The Summit is held in Qatar and an action-oriented political declaration is adopted by Member States	A follow-up plan to the outcome of the Summit is developed by Member States

Deliverables

9.44 Table 9.10 lists all deliverables of the subprogramme.

Table 9.10
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**23**	**22**	**27**	**23**
Documentation for:				
1. The General Assembly on ageing, cooperatives in development, persons with disabilities, policies and programmes concerning young people, follow-up to the International Year of the Family, follow-up to the World Summit for Social Development, social inclusion and other social development issues, the Third United Nations Decade for the Eradication of Poverty (2018–2027) and sport for development and peace	7	7	10	7
2. The Commission for Social Development	5	4	6	4
3. The Permanent Forum on Indigenous Issues	7	7	7	8
4. The Conference of States Parties to the Convention on the Rights of Persons with Disabilities	4	4	4	4
Substantive services for meetings (number of three-hour meetings)	**85**	**83**	**85**	**77**
Meetings of:				
5. The Second Committee of the General Assembly	4	4	4	4
6. The Third Committee of the General Assembly	6	6	6	6
7. The Open-ended Working Group on Ageing	8	8	8	–
8. The Economic and Social Council	6	6	6	6
9. The high-level political forum on sustainable development	1	1	1	1
10. The Commission for Social Development	20	18	20	20
11. The Permanent Forum on Indigenous Issues	24	24	24	24
12. The Conference of States Parties to the Convention on the Rights of Persons with Disabilities	16	16	16	16
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**2**	**2**	**2**	**2**
13. Projects on social policy formulation	2	2	2	2
Seminars, workshops and training events (number of days)	**10**	**10**	**10**	**10**
14. Training events on social issues for Member States and other stakeholders, including lectures and multi-stakeholder panels	10	10	10	10
Publications (number of publications)	**1**	**1**	**–**	**–**
15. *World Youth Report*	1	–	–	–
16. Publication on Indigenous Peoples	–	1	–	–
Technical materials (number of materials)	**7**	**6**	**6**	**7**
17. Outcome documents of expert groups on various social issues	7	5	5	7
18. Update on the *Disability and Development Report*	–	1	–	–
19. Segments of the report of the Secretary-General on homelessness (joint report with the United Nations Human Settlements Programme (UN-Habitat))	–	–	1	–

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: advice to requesting Member States on socioeconomic situations and normative, policy and administrative frameworks on the social dimensions of sustainable development and the Sustainable Development Goals; and expert advice to more than 40 Member States on sustainable development issues, including on high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: database on policies and measures to combat hunger and poverty.

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including commemorations of international days on various social issues; and policy briefs and communication activities to promote advancement of social development.

External and media relations: briefings, press conferences and press releases on various social issues.

Digital platforms and multimedia content: electronic, audio and video messaging on ageing, cooperatives, disability, family, issues concerning Indigenous Peoples, young people and sport for development and peace.

Subprogramme 3
Sustainable development

Objective

9.45 The objective, to which this subprogramme contributes, is to accelerate the implementation of the 2030 Agenda, including the achievement of the Sustainable Development Goals and their targets and commitments, through increased engagement of Member States and other stakeholders.

Strategy

9.46 To contribute to the objective, the subprogramme will:

(a) Prepare analytical reports and assessments, maintain online databases and organize thematic expert meetings and conferences on specific Sustainable Development Goals and their interlinkages;

(b) Organize, in the lead up to the high-level political forum on sustainable development expert group meetings and conferences for Member States, on the themes of the forum and Sustainable Development Goals that are under review;

(c) Play a central role in inter-agency coordination mechanisms on water, energy, small island developing States, oceans and transport and in the area of science, technology and innovation, and through its long-standing cooperation with specific agencies on issues such as climate change and partnership-building for sustainable development;

(d) Coordinate the work of the Technology Facilitation Mechanism, including the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the online platform on existing science, technology and innovation initiatives (2030 Connect);

(e) Convene special events in connection with the high-level political forum on sustainable development, including the Sustainable Development Goals business forum and the local and regional governments forum, enabling the sharing of lessons learned and good practices among Member States and stakeholders in the development arena;

(f) Organize, in coordination with the regional commissions, resident coordinator offices and United Nations country teams, as applicable, capacity-building activities at the global, regional and national levels on the above topics.

9.47 The above-mentioned work is expected to result in:

(a) Increased knowledge of Member States and stakeholders of the 2030 Agenda and its Sustainable Development Goals, including for their deliberations during the high-level political forum on sustainable development and other related forums, and for the development of related national policies and programmes;

(b) Increased use of science and technology to leverage their full potential in the achievement of the Sustainable Development Goals by Member States and other stakeholders;

(c) Increased integration of Sustainable Development Goals into inclusive national planning processes, policies and strategies, and increased action and initiatives taken by Member States and other stakeholders to accelerate the implementation of the 2030 Agenda.

Programme performance in 2024

Advancing the implementation of the United Nations Decade of Sustainable Transport (2026–2035)

9.48 The General Assembly, in its resolution 78/148, called for a United Nations Decade of Sustainable Transport to commence in 2026 and requested an associated implementation plan. The subprogramme launched the preparations for the Decade and its implementation plan through consultations with Member States, civil society, academia and multilateral development banks. The dialogue provided opportunities and tools for intergraded policymaking on sustainable transport.

9.49 Progress towards the objective is presented in the performance measure below (see table 9.11).

Table 9.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Outcomes of the second United Nations Global Sustainable Transport Conference, held in Beijing in 2021, enriched discussions at Member State briefings and transport sector events	General Assembly resolution 78/148 adopted An expert group meeting on sustainable transport initiated planning for the United Nations Decade	Member States and stakeholders engage in peer learning and have access to tools for integrated policymaking on sustainable transport, including through consultations on the implementation plan of the Decade, including global online consultations for civil society

Planned results for 2026

Result 1: strengthened commitment and action to address the unique needs of small island developing States

Programme performance in 2024 and target for 2026

9.50 The subprogramme's work contributed to the fourth International Conference on Small Island Developing States, held in Antigua and Barbuda, and its outcome document approving the development of a monitoring and evaluation framework, which met the planned target.

9.51 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.12).

Table 9.12
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
A first set of modalities of the 2024 Conference was defined by Member States	Member States, including 118 representatives of small island developing States, participated in the preparatory process for the fourth Conference, comprising 3 regional meetings and 1 interregional meeting The report of the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States was issued	The Conference was held in Antigua and Barbuda in May 2024 The outcome document, titled the Antigua and Barbuda Agenda for Small Island Developing States, was adopted by Member States	New and additional mandates emanating from the outcome document of the fourth Conference are implemented, including the possible operationalization of the multidimensional vulnerability index Coordinated capacity-building support to small island developing States is initiated	Intergovernmental dialogue on the first report on the implementation of the Antigua and Barbuda Agenda Member States engage in a biennial review of progress made in the implementation of the Antigua and Barbuda Agenda across all small island development States

Result 2: accelerated progress for Sustainable Development Goal 14 through the third United Nations Ocean Conference

Programme performance in 2024 and target for 2026

9.52 The subprogramme's work contributed to accelerating the achievement of Sustainable Development Goal 14 through a preparatory meeting for the third United Nations Ocean Conference, at which Member States agreed on the overall thematic framework of the Conference and determined the topics of the 10 ocean action panels, which met the planned target.

9.53 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.13).

Table 9.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The General Assembly decides to convene the third United Nations Ocean Conference, in 2025	Adoption by the General Assembly of resolution 78/128 on the modalities for the third Ocean Conference	Preparatory meeting for the third Ocean Conference held in July 2024 Member States agreed on the overall programme of the Conference	A political declaration, with commitments, is adopted by Member States at the third Ocean Conference	Member States advance the objectives contained in the political declaration and support the implementation of commitments made during the third Ocean Conference

Result 3: accelerating the achievement of Sustainable Development Goal 6 through the 2026 United Nations Water Conference

Proposed programme plan for 2026

9.54 Action to achieve the Sustainable Development Goals, including Goal 6 on water and sanitation, ensuring the interlinkages and co-benefits among them, should remain a priority. The subprogramme will ensure the successful planning and organization of the 2026 United Nations Water Conference to advance Goal 6 realization and enable Member States to achieve the Goals and implement the 2030 Agenda as a whole.

Lessons learned and planned change

9.55 The lesson for the subprogramme was that robust stakeholder participation was crucial to the success of the 2023 United Nations Water Conference. In applying the lesson, the subprogramme will build on the momentum generated, strengthen stakeholder engagement, enhance advocacy and analytical work, and support Member States in accelerating the achievement of the water and sanitation-related Sustainable Development Goals, leaving no one behind.

9.56 Expected progress towards the objective is presented in the performance measure below (see table 9.14).

Table 9.14
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	2023 United Nations Water Conference attracted more than 2,000 participants 200 Sustainable Development Goal 6 commitments registered	United Nations System-wide Strategy for Water and Sanitation launched in July 2024 General Assembly resolution[a] on the modalities for the 2026 United Nations Water Conference to Accelerate the achievement of Sustainable Development Goal 6 adopted	Preparatory meetings held with the themes of six interactive dialogues determined by Member States	The 2026 United Nations Water Conference is held in December on accelerated and collective action to support the achievement of Sustainable Development Goal 6, leaving no one behind

[a] Resolution 78/327.

Deliverables

9.57 Table 9.15 lists all deliverables of the subprogramme.

Table 9.15
Subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**12**	**22**	**12**	**18**
Documentation for:				
1. The General Assembly	6	14	6	12
2. The high-level political forum on sustainable development	5	7	5	5
3. The multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**88**	**169**	**88**	**88**
Meetings of:				
4. The General Assembly	42	120	42	42
5. The Economic and Social Council	2	2	2	2
6. The high-level political forum on sustainable development	30	37	30	30
7. The multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	4	10	4	4
8. The independent group of scientists for the *Global Sustainable Development Report*	10	–	10	10
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**7**	**11**	**5**	**8**
9. Projects on sustainable development (water, energy, sustainable transport, sustainable consumption and production, stakeholder engagement, small island developing States, partnerships, micro-, small and medium-sized enterprises, etc.)	7	11	5	8
Seminars, workshops and training events (number of days)	**100**	**126**	**100**	**100**
10. Training events on strengthening national capacities in all areas of sustainable development for and with national policymakers in developing countries and small island developing States with economies in transition	100	126	100	100
Publications (number of publications)				
11. Global Sustainable Development Report (quadrennial report)	–	–	–	–
Technical materials (number of materials)	15	17	15	15
12. On the 2030 Agenda for Sustainable Development	15	17	15	15

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings, and materials related to stakeholder engagement in the 2030 Agenda follow-up and review, and on multi-stakeholder partnerships in support of the Sustainable Development Goals.

Databases and substantive digital materials: public databases on voluntary initiatives, small island developing States, partnerships (8,200 registered), voluntary commitments made during the United Nations Conference to Support the Implementation of Sustainable Development Goals 14 (2,200 registered), Sustainable Development Goals good practices (500 registered), the United Nations system achievement of the Goals, Sustainable Development Goals acceleration actions (450 registered), the Technology Facilitation Mechanism, UN-Energy (200 commitments registered), harmony with nature and other topics of sustainable development.

D. Communication deliverables

Outreach programmes, special events and information materials: special meetings and side events on sustainable development issues during major United Nations conferences; and the issuance of the *Natural Resources Forum*.

Digital platforms and multimedia content: redesigned Sustainable Development Website (sdgs.un.org).

Subprogramme 4
Statistics

Objective

9.58 The objective, to which this subprogramme contributes, is to strengthen the capacity of Member States with regard to the production and use of high-quality, timely, disaggregated, open data and national statistics and geospatial information as a basis on which to inform policy and decision-making for the 2030 Agenda and for other United Nations policy agendas and to review progress at the national and international levels.

Strategy

9.59 To contribute to the objective, the subprogramme will:

(a) Develop, disseminate and support the implementation by Member States of statistical and geospatial information frameworks, standards and methods, especially those related to the Sustainable Development Goals, the Integrated Geospatial Information Framework and other new emerging policy issues;

(b) Provide technical assistance and advice to Member States through training on the modernization of statistical information systems, the Integrated Geospatial Information Framework, the use of big data, artificial intelligence and data science, population data systems, environmental-economic accounting, quality assurance, survey instruments and citizen data, to fill data gaps and leave no one excluded from decision-making and policies that affect them;

(c) Facilitate and expand the coordination and coherence of international statistical and geospatial information programmes and activities by promoting the availability, accessibility and application of geospatial information, including the standardization of geographical names, and better integration of statistical and geospatial information;

(d) Cooperate with the resident coordinator system and United Nations country teams in data and statistical activities and their interaction with the global statistical community, including through the Global Network of Data Officers and Statisticians; cooperate closely with other international organizations and establish partnerships with civil society organizations, academia and private sector data providers, including through the Collaborative on Citizen Data;

(e) Collect, compile and disseminate global statistical information and data in the areas of economic, social, demographic and environmental statistics, including the Sustainable Development Goals indicators, through the use of technology and interoperability standards, such as the Statistical Data and Metadata Exchange;

(f) Issue flagship data publications, maintain databases and data platforms and continue to modernize UNdata as a United Nations system-wide portal, and support the development of open data hubs and labs to showcase innovative uses of data, artificial intelligence and data science, and enhance the visualization of data and metadata;

(g) Collect information from Member States on the implementation of the Integrated Geospatial Information Framework and the Medellín Framework for Action on Data for Sustainable Development relating to the 2030 Agenda, including on financing needs in the specific areas included in the Framework, under the guidance of the High-level Group for Partnership, Coordination and Capacity-Building for Statistics for the 2030 Agenda for Sustainable Development and in collaboration with issue partners;

(h) Develop and share guidance and information on initiatives, tools and best practices to help national statistics systems to continue to operate and respond to the new specific data needs to address and mitigate the impact of global crises on societies, advance responsible, equitable

and interoperable data governance approaches, and address issues of open and timely access to critical data needed by Governments and all sectors of society to accelerate the implementation of the 2030 Agenda.

9.60 The above-mentioned work is expected to result in:

(a) Enhanced quality, availability and access to policy-relevant statistical and geospatial information;

(b) Increased production and dissemination by Member States of better data and national statistics and geospatial information that are comparable and in line with the adopted international frameworks and standards, and provision of enhanced and open access to them;

(c) Enhanced coherence and more effective functioning and transformation of the global statistical and geospatial information systems;

(d) Increased statistical and geospatial information capacity of Member States and the United Nations system.

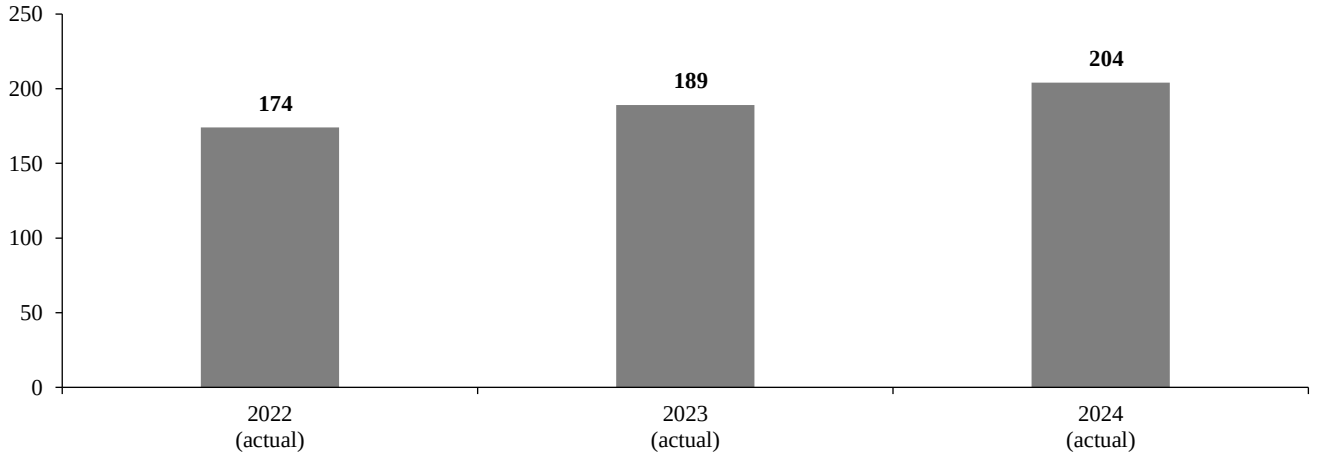
Programme performance in 2024

Digital technologies and capacity-building drove successful population and housing census implementation in the 2020 round

9.61 The population and housing census provides detailed, reliable and periodical statistics for small areas and population groups essential for evidence-based decision-making, facilitating equitable resource allocation, public administration and policymaking. Sixty-nine countries and areas, covering 27 per cent of the world's population, conducted population and housing censuses (2022 to 2024), including those postponed from 2020 and 2021 owing to the COVID-19 pandemic. By the end of the 2020 census round in December 2024, 204 countries and areas had conducted a census. The subprogramme supported those censuses through organizing regional workshops, providing ad hoc technical assistance and emphasizing the use of digital technologies, including georeferencing and the integration of administrative data to enhance efficiency and data quality. Countries reported achievements in these areas such as successful budget management and timely data dissemination. Other achievements included increased use of census data for Sustainable Development Goals monitoring, geocoded census results and the adoption of international standards. The 2020 census round saw advancements in technology, methodology and operational efficiency, producing high-quality data for evidence-based policymaking and planning.

9.62 Progress towards the objective is presented in the performance measure below (see figure 9.II).

Figure 9.II
Performance measure: number of countries and areas that conducted a census (cumulative)



Planned results for 2026

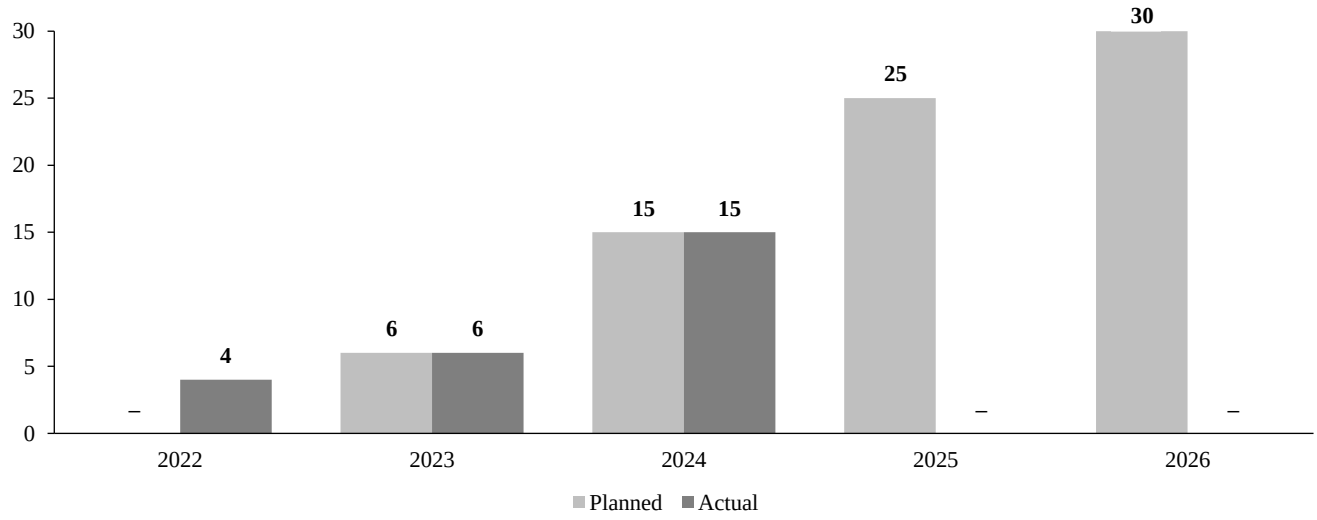
Result 1: accelerated implementation of the Integrated Geospatial Information Framework

Programme performance in 2024 and target for 2026

9.63 The subprogramme's work contributed to the inclusive engagement and development of 15 country-level action plans based on the Integrated Geospatial Information Management Framework, which met the planned target.

9.64 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.III).

Figure 9.III
Performance measure: number of countries that developed action plans based on the Integrated Geospatial Information Framework (cumulative)



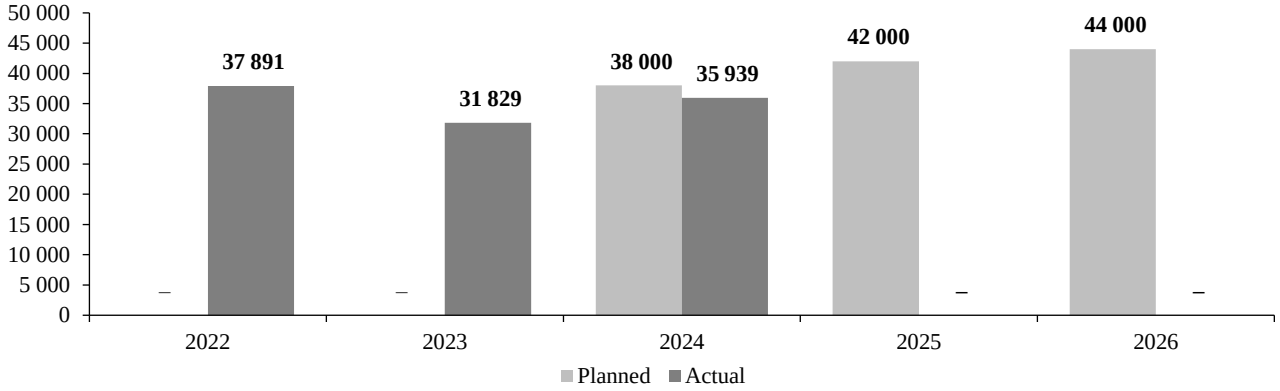
Result 2: UNdata modernization: a single entry point for authoritative statistical data from the United Nations system

Programme performance in 2024 and target for 2026

9.65 The subprogramme's work contributed to an average of 35,939 UNdata user sessions per month, which did not meet the planned target of 38,000. The target was not met owing to the decline in legacy traffic, which was offset in part by an increase in traffic to the new UNdata interface, launched in September 2023.

9.66 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.IV).

Figure 9.IV
Performance measure: average number of UNdata user sessions per month



Result 3: improved global capacity for evidence-based Sustainable Development Goals progress monitoring

Proposed programme plan for 2026

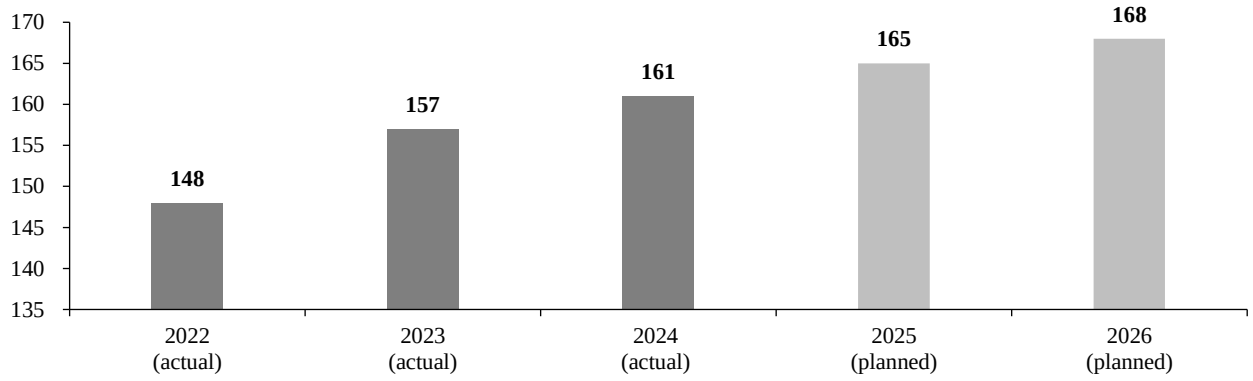
9.67 In the 2030 Agenda, the critical role of high-quality, accessible, timely and reliable data for measuring progress towards achieving the Sustainable Development Goals is emphasized. National statistical capacity is fundamental for producing and disseminating indicators of the Goals, enabling evidence-based decision-making. The subprogramme, in collaboration with custodian agencies, has supported national statistical offices through technical assistance, methodological guidance and training activities, leading to a nine-fold increase in data availability in the global indicator database, with data records rising from 330,000 in 2016 to 2.9 million by 2024. The number of tier I indicators – those with good data coverage regularly produced for at least 50 per cent of relevant countries – rose from 82 in 2016 to 161 in 2024, demonstrating improved global capacity for evidence-based progress monitoring.

Lessons learned and planned change

9.68 The lesson for the subprogramme was that strengthening national statistical capacity required a comprehensive approach combining technical training, methodological support and sustained engagement with national statistical offices. In applying the lesson, the subprogramme will provide targeted technical assistance, develop e-learning platforms for Sustainable Development Goals monitoring, implement standardized data-collection tools and support countries in adopting international statistical standards for reporting on the Goals.

9.69 Expected progress towards the objective is presented in the performance measure below (see figure 9.V).

Figure 9.V
Performance measure: number of tier I indicators in the global Sustainable Development Goals indicator database (cumulative)



Deliverables

9.70 Table 9.16 lists all deliverables of the subprogramme.

Table 9.16
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice on economic, demographic and social and environmental statistics and geospatial information, Sustainable Development Goals indicators and cross-cutting statistical areas; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

Databases and substantive digital materials: UN Comtrade Database, containing more than 123 billion records on trade in goods and services, with 5 million users; UNdata platform, containing 95 million records, with approximately 280,000 active users; Global Sustainable Development Goals Indicators Database, containing 2.9 million data records, with more than 100,000 users; and databases on cross-cutting statistical areas, with data for more than 200 statistical territories (includes countries and areas).

D. Communication deliverables

Outreach programmes, special events and information materials: outreach, events and information materials on economic, demographic, social and environmental statistics and geospatial information, Sustainable Development Goals indicators and cross-cutting statistical areas.

Subprogramme 5
Population

Objective

9.71 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interaction between population change and sustainable development among policymakers and the public, and strengthen the international community's capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

Strategy

9.72 To contribute to the objective, the subprogramme will:

(a) Prepare studies on population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;

(b) Produce comprehensive global data sets on selected topics, as well as reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;

(c) Provide capacity development on population data and analysis to requesting countries and to United Nations country teams;

(d) Provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;

(e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, focusing on the global monitoring of Sustainable Development Goals indicators on reproductive health, international migration, child and maternal mortality and population ageing, often in partnership with other entities of the United Nations system;

(f) Improve the United Nations estimates and projections of the global population and study the interaction of COVID-19 and other crises with demographic phenomena, including mortality, population ageing, fertility and family planning and international migration, and including these analyses, as appropriate, in publications and technical materials.

9.73 The above-mentioned work is expected to result in:

(a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme's data and findings in the work of stakeholders;

(b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;

(c) Advancement in the international community's use of scientifically grounded information about the demographic impacts of the COVID-19 pandemic and other crises.

Programme performance in 2024

Improved monitoring of progress towards achieving safe, orderly and regular migration

9.74 In the Progress Declaration of the International Migration Review Forum in May 2022, Member States requested the Secretary-General to propose a limited set of indicators to review progress related to the implementation of the Global Compact for Safe, Orderly and Regular Migration, drawing on the Sustainable Development Goals indicator framework and other frameworks, as well as a comprehensive strategy for improving disaggregated migration data. The subprogramme co-led a workstream established by the United Nations Network on Migration that undertook consultations with Member States and stakeholders, including regional consultations in 2023, global consultations in 2024 and online surveys. The proposed indicators, consisting of 27 core and 83 additional indicators, are a voluntary tool for Member States to conduct inclusive progress reviews on the implementation of the Global Compact.

9.75 Progress towards the objective is presented in the performance measure below (see table 9.17).

Table 9.17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Member States requested a limited set of indicators for monitoring the implementation of the Global Compact for Safe, Orderly and Regular Migration	Member States and stakeholders engaged in consultations and online surveys on the indicator framework	Member States and stakeholders have access to the new voluntary indicator framework to monitor progress made in the implementation of the Global Compact

Planned results for 2026

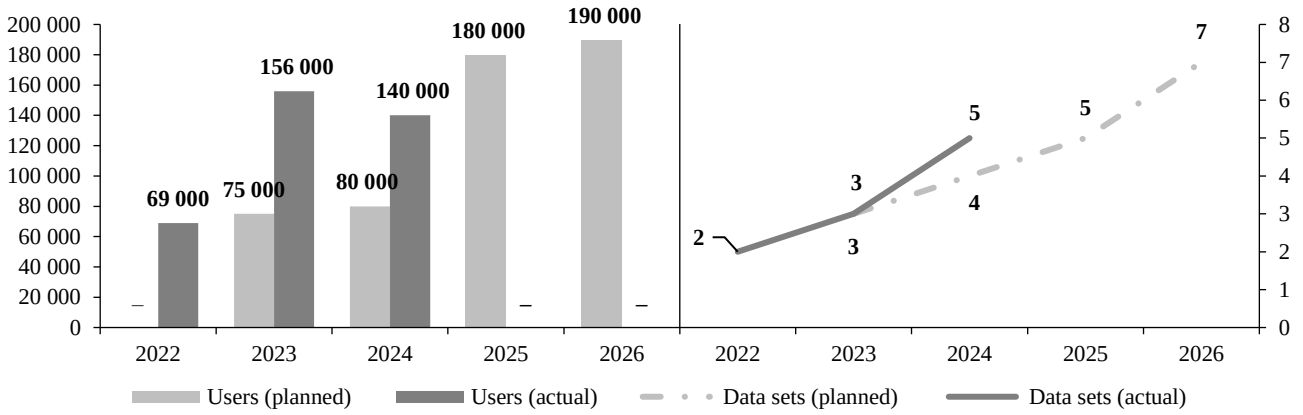
Result 1: enhanced integration of the population dimension into implementation of the 2030 Agenda by Member States

Programme performance in 2024 and target for 2026

9.76 The subprogramme's work contributed to 140,000 users consulting the Data Portal and five data sets contained therein, which exceeded the planned target of 80,000 users and four data sets.

9.77 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.VI).

Figure 9.VI
Performance measure: number of users of the Data Portal (annual) and number of data sets contained in the Data Portal (cumulative)



Result 2: enhanced comparability of estimates and projections of urbanization and spatial distribution for the Sustainable Development Goals

Programme performance in 2024 and target for 2026

9.78 The subprogramme's work contributed to Member States and other stakeholders providing input for the compilation of data on urban and rural populations from the 2020 census round for 106 countries, which met the planned target.

9.79 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.18).

Table 9.18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Selected countries piloted the new methodology to measure urbanization	Stakeholders and Member States contributed to methodological advancements in the estimation and projection of urbanization time series	Member States and other stakeholders contributed to the compilation of data on urban and rural populations from the 2020 census round for 106 countries	An increased number of stakeholders and Member States implement the new "degree of urbanization" to enable comparable global urbanization trends	Stakeholders and Member States benefit from updated estimates using both national definitions and a globally comparable definition to assess sustainable urbanization

Result 3: enhanced online tools for demographic analysis, projection and visualization

Proposed programme plan for 2026

9.80 World Population Prospects and related guidance on producing population projections are fundamental resources for Member States. The subprogramme has increased the reproducibility of the estimates and projections and the transparency of the metadata provided in the last two editions of World Population Prospects.

Lessons learned and planned change

9.81 The lesson for the subprogramme was that the development of user-friendly online tools for countries to produce demographic analyses and population projections using new country data and compare these to results from World Population Prospects would help to harmonize national and international population estimates and projections. In applying the lesson, the subprogramme will leverage and expand online platforms to enhance the dissemination and use of the 2026 edition of World Population Prospects.

9.82 Expected progress towards the objective is presented in the performance measure below (see table 9.19).

Table 9.19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Upgrade of World Population Prospects gives Member States access to more detailed demographic estimates and projections and improved metadata	Development work initiated on online demographic analysis and population projection platforms	Platforms enhanced with data from World Population Prospects 2024	Member States participate in testing of online platforms to inform any further upgrade	Member States have access to fully developed online platforms that incorporate the input and methods of the 2026 revision of World Population Prospects and related training materials

Deliverables

9.83 Table 9.20 lists all deliverables of the subprogramme.

Table 9.20
Subprogramme 5: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**4**	**3**	**2**	**3**
1. Reports to the General Assembly	1	1	–	1
2. Reports to the Commission on Population and Development	3	2	2	2
Substantive services for meetings (number of three-hour meetings)	**36**	**34**	**29**	**36**
Meetings of:				
3. The General Assembly	7	7	–	7
4. The Economic and Social Council	1	1	1	1
5. The Commission on Population and Development	24	24	24	24
6. Experts on population topics	4	2	4	4
B. Generation and transfer of knowledge				
Publications (number of publications)	**3**	**2**	**4**	**3**
7. *World Population Prospects: Highlights*	1	1	–	1
8. Highlights report on selected demographic trends	–	–	1	1
9. *World Fertility and Family Planning: Highlights*	1	1	–	1

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
10. *World Population Ageing: Highlights*	–	–	–	–
11. *Population Megatrends*	–	–	1	–
12. Questionnaire for the United Nations Inquiry among Governments on Population and Development	1	–	–	–
13. *World Urbanization Prospects: Summary of Results*	–	–	1	–
14. *World Population Policies: Highlights*	–	–	1	–
Technical materials (number of materials)	**8**	**8**	**8**	**8**
15. Major data sets on population topics	2	2	2	2
16. Sustainable Development Goal indicator data sets	1	1	1	1
17. Reports of expert group meetings on population topics	2	2	2	2
18. Technical papers on population topics	3	3	3	3

C. Substantive deliverables

Consultation, advice and advocacy: briefings and consultations with Member States concerning the annual session of the Commission on Population and Development; and briefings/expert advice to Member States on population and sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: databases and data sets on population topics, including documentation.

D. Communication deliverables

Outreach programmes, special events and information materials: policy briefs, key messages and information kits on population topics; and special events on population topics.

External and media relations: press conferences and press releases related to the Commission on Population and Development; press releases to support the launch of major publications or data sets; and responses to requests from Member States, the media, United Nations entities, resident coordinators and other stakeholders.

Digital platforms and multimedia content: interactive data visualizations and social media and multimedia content on population topics.

Subprogramme 6
Economic analysis and policy

Objective

9.84 The objective, to which this subprogramme contributes, is to strengthen national capacities and international policy coordination for identifying and managing short-term macroeconomic risks, to shape medium- and long-term socioeconomic policies for development and to accelerate sustainable development, especially of least developed countries, small island developing States and other countries in special situations.

Strategy

9.85 To contribute to the objective, the subprogramme will:

(a) At the national, regional and global levels, monitor and forecast the macroeconomic situation, focusing on countries in special situations, including the least developed countries, and support Member States in the formulation of global, regional and national policies through expert group meetings, country-level empirical evidence analysis and background studies on short- and long-term economic development thematic issues;

(b) Broaden the scope of economic forecasting and simulation tools to assess policy trade-offs in promoting economic growth, while reducing poverty and inequality and enhancing environmental sustainability, in line with the 2030 Agenda;

(c) Support the Committee for Development Policy and provide analytical input to the intergovernmental processes related to the least developed countries, as well as to the annual themes of meetings of the Economic and Social Council and of the high-level political forum on sustainable development;

(d) Design and implement capacity development activities for a range of countries, including for graduating and recently graduated least developed countries, enhancing capacity for economic planning monitoring and policymaking;

(e) Examine rapid technological change, noting both its constructive and disruptive potential and identifying the strategies and policies necessary to harness its positive potential for achieving sustainable development, while mitigating its possible negative effects;

(f) Provide policy guidance and recommendations on selected topics to Member States for recovery from recurrent shocks, crises and challenges, building on the subprogramme's analytical work;

(g) Provide analytical input and customized online resources to the resident coordinator system for supporting Member States and for the preparation of common country analyses and United Nations Sustainable Development Cooperation Frameworks, and other pertinent topics;

(h) Deliver the substantive leadership and coordination of the United Nations Economists' Network, bringing together United Nations system economists to share perspectives from the local, national, regional and global levels;

(i) Maintain the global economic outlook database, the least developed country criteria database, the Support Measures Portal for Least Developed Countries on international support measures and other online resources available to policymakers and other national and international stakeholders.

(j) Advance the formulation of a specific response plan, aimed at better addressing the multidimensional nature of sustainable development and facilitating sustainable development cooperation and coordinated and inclusive support to middle-income countries based on their specific challenges and diverse needs.

9.86 The above-mentioned work is expected to result in:

(a) Greater articulation of short-term macroeconomic stability with long-term development goals, while advancing the achievement of the Sustainable Development Goals, through the improved integration of economic, social and environmental priorities into national development plans and strategies;

(b) Improved awareness among Member States of the multilateral efforts and economic policy options necessary for a sustainable recovery from recurrent shocks, crises and challenges, consistent with the 2030 Agenda;

(c) Improved information basis for the Committee for Development Policy and the Economic and Social Council when assessing and recommending least developed countries for graduation;

(d) Enhanced awareness and knowledge of Member States and the international community of the development trajectory of the least developed countries, their risks and challenges and the specific support options;

(e) Increased capacity of Member States to effectively use international support measures, prepare for graduation from the least developed country category and ensure the stability of their development progress and the realization of the 2030 Agenda;

(f) Enhanced collaboration, coordination and efficacy of the United Nations development system, which will provide a more coherent cooperation framework towards the implementation of the 2030 Agenda and bolster sustainable development at the country level.

Programme performance in 2024

Strengthened policy analysis and recommendations on national and global action to build resilience

9.87 In recent years, converging shocks, crises and challenges that produce long-lasting impacts on social development have risen. National action and international collaboration that are mutually complementary are essential for advancing social development amid converging crises. The subprogramme led the preparation of the *World Social Report 2024: Social Development in Times of Converging Crises: A Call for Global Action*, which highlighted how both national efforts and international action need to evolve to advance social development with evidence-based policy analysis and recommendations.

9.88 Progress towards the objective is presented in the performance measure below (see table 9.21).

Table 9.21
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Member states and other stakeholders have enhanced understanding of recurrent crises and their impact on Sustainable Development Goals as reflected in policy discussions	Intergovernmental dialogue focused on an in-depth analysis in specialized areas with proposed policy options	Member States and other stakeholders have access to policy options for both national and collective action presented in the *World Social Report 2024*, launched on the International Day for the Eradication of Poverty, to enhance resilience in times of converging crises

Planned results for 2026

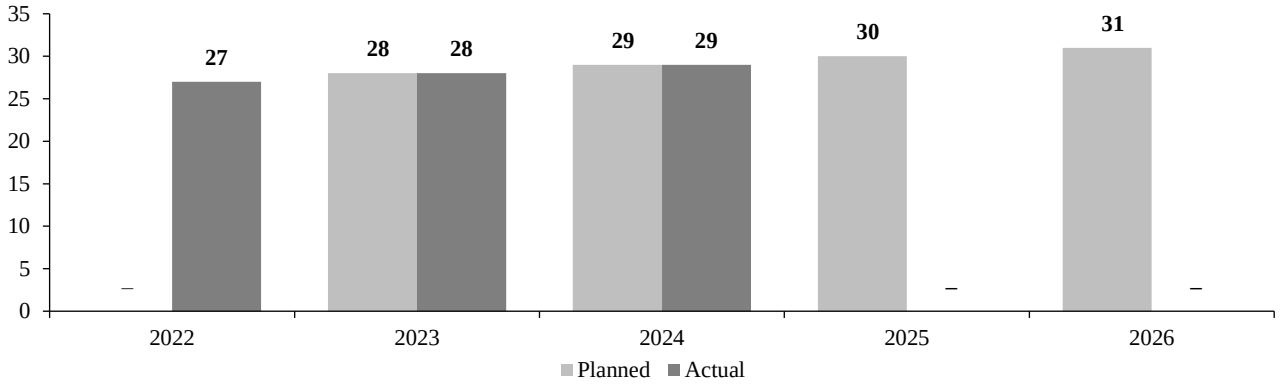
Result 1: enhanced policy coherence in the implementation of the 2030 Agenda through a revitalized United Nations Economists' Network

Programme performance in 2024 and target for 2026

9.89 The subprogramme's work contributed to the revitalization of the United Nations Economists' Network, with the engagement of 29 entities in the Network, which met the planned target.

9.90 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.VII).

Figure 9.VII
Performance measure: number of entities in the United Nations system with members in the United Nations Economists' Network (cumulative)



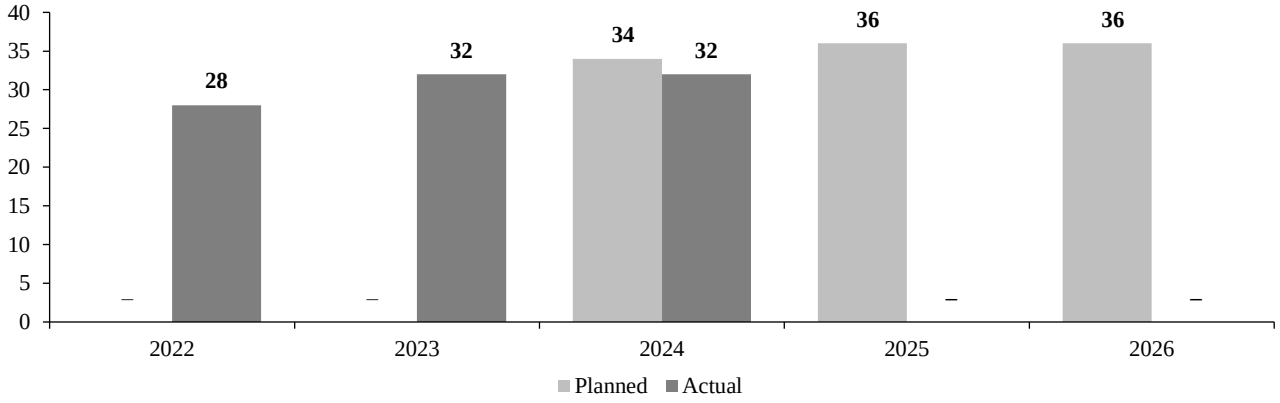
Result 2: use of advanced policy simulation tools for data-driven and evidence-informed policymaking

Programme performance in 2024 and target for 2026

9.91 The subprogramme's work contributed to the use of advanced policy simulation tools in 32 countries, which did not meet the planned target of 34 countries. The target was not met because, at Member States' request, additional capacity-building events were organized to improve their knowledge of existing tools and ability to link different simulation tools for policy formulation.

9.92 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.VIII).

Figure 9.VIII
Performance measure: number of countries conducting quantitative assessments for coherent policymaking on sustainable development (cumulative)



Result 3: increased engagement and use of analytical products for evidence-based policymaking

Proposed programme plan for 2026

9.93 Access to analytical products is important for evidence-based policymaking. The subprogramme has taken steps to further disseminate its analytical products and engage stakeholders through targeted efforts. Findings and policy options have been presented and discussed with representatives and experts from Member States, international organizations, academia, NGOs and civil society.

Lessons learned and planned change

9.94 The lesson for the subprogramme was that this more holistic and targeted approach to the delivery of analytical products helped to inform evidence-based policies. In applying the lesson, the subprogramme will assess its stakeholder engagement and areas requiring improvement to ensure that the products meet users' needs.

9.95 Expected progress towards the objective is presented in the performance measure below (see table 9.22).

Table 9.22
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Stakeholders engaged through the Economic and Social Council and in collaboration with the Dag Hammarskjöld Library, United Nations University and United Nations Academic Impact	Member States and stakeholders engage in consultations on key analytical products	Member States and stakeholders use insights from analyses of key global challenges and development issues to inform discussions and drive policymaking

Deliverables

9.96 Table 9.23 lists all deliverables of the subprogramme.

Table 9.23
Subprogramme 6: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

13. Committee for Development Policy background studies	10	11	10	10
14. Technical input for common country analyses/United Nations Sustainable Development Cooperation Frameworks	12	7	12	10
15. Policy briefs	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: policy advice on economic thematic issues and/or economic national situations to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: ePing, an online platform with approximately 25,000 registered users, covering 192 countries; Support Measures Portal for Least Developed Countries on international support measures (224 updates/new entries); least developed country data and impact assessments (3 online databases, covering 142 countries and 24 years of data); modelling tools for sustainable development policies; and global economic outlook database.

D. Communication deliverables

External and media relations: 2 global and 5 regional press releases on the world economic situation.

Subprogramme 7
Public institutions and digital government

Objective

9.97 The objective, to which this subprogramme contributes, is to advance effective, accountable and inclusive governance and public institutions for sustainable development, including through innovation, digital government and digital transformation.

Strategy

9.98 To contribute to the objective, the subprogramme will:

(a) Service the Committee of Experts on Public Administration by organizing expert meetings and preparing analytical papers and technical guidelines to operationalize the principles of effective governance for sustainable development, developed by the Committee and endorsed by the Economic and Social Council in 2018, together with all relevant stakeholders;

(b) Promote policy guidance on innovation, digital government and digital transformation, including the use of artificial intelligence, for the Sustainable Development Goals through the United Nations E-Government Survey, monitor global developments on institutional dimensions covered by Goals 16 and 17 and review national institutional arrangements for the achievement of the Goals, with a specific focus on countries in special situations, and in direct support of the follow-up on and review of the 2030 Agenda;

(c) Foster policy dialogue and advocacy for the implementation of the outcomes of the World Summit on the Information Society and facilitate the implementation of and follow-up on its assigned action lines, namely, C1 (the role of Governments and all stakeholders in the promotion of ICT for development), C7 (ICT applications: benefits in all aspects of life (e-government)) and C11 (international and regional cooperation);

(d) Facilitate multi-stakeholder policy dialogue on Internet governance, including discussion of public policy issues related to key elements of Internet governance, such as data governance, digital inclusion and data protection (General Assembly resolution 70/125, para. 63), and shape policy decisions at the global, national and local levels by supporting the annual meeting of the Internet Governance Forum and intersessional activities;

(e) Expand capacity development to respond to Member States' requests for technical cooperation on strengthening their governance, public institutions and human resources capacities in alignment with the decade of action and delivery for sustainable development, including through partnerships with regional commissions and the resident coordinator system and increased efforts to support international peer exchanges on effective governance for sustainable development;

(f) Expand work on equipping the public sector workforce with the capacities to realize the 2030 Agenda and the Pact for the Future, which includes developing and piloting new methodologies on leadership and changing mindsets, institutional arrangements for policy coherence, transparency and integrity in the public service, strategic foresight, digital government and data governance, and innovation for public service delivery, with an emphasis on countries in special situations, in collaboration with the resident coordinator system;

(g) Strengthen the capacity of Member States to promote innovation in public governance through follow-up mechanisms to the United Nations Public Service Day Awards Ceremony and Forum, such as peer-to-peer learning for the transfer and adaptation of innovative practices, including on gender-sensitive analysis, and through the United Nations Public Administration Network;

(h) Support supreme audit institutions on auditing Sustainable Development Goals achievement by providing analytical work, expert advice, technical assistance and capacity-building, on the basis of existing demand for support by groups of the International Organization of Supreme Audit Institutions;

(i) Promote and leverage public governance innovative practices and digital government strategies action plans and road maps.

9.99 The above-mentioned work is expected to result in:

(a) Enhanced awareness of emerging governance and public administration issues at the national and subnational levels and countries contextualizing institutional aspects of their voluntary national reviews so that Member States can develop their capacities to promote effective governance for sustainable development in a dynamic international context;

(b) Increased capacities of Member States to build effective, accountable and inclusive institutions at all levels to achieve the Sustainable Development Goals and deliver on the Pact for the Future;

(c) Increased capacity of Member States in designing and implementing effective and inclusive digital government policies, strategies and services to improve people's lives at all levels of government;

(d) Improved capacities of public servants to deliver services to people in areas such as health and education, justice, social protection and employment, focusing on professionalization of the public sector workforce, an ethical, responsive and ICT-enabled public administration and progress towards gender equality in the public sector;

(e) Adjustments by Member States at the structural, organizational and programme levels to accelerate Sustainable Development Goals delivery;

(f) Adoption of digital government strategies to build resilient societies and close digital divides.

Programme performance in 2024

Adoption of road maps and action plans for transformational change in governance

9.100 Strategic foresight, shifting mindsets and data governance are crucial in pursuing transformational change for improved planning and achievement of the Sustainable Development Goals. The subprogramme has designed and implemented its capacity development work by addressing strategic foresight, behavioural science and data governance in an integrated manner and has supported Member States through the curriculum on governance for the Goals, a set of training of trainers' toolkits and a webinar series. By adopting this approach, the subprogramme has enabled Member States to become more resilient and adopt instruments that allow them to anticipate, prepare, respond and adapt to increasingly complex new realities.

9.101 Progress towards the objective is presented in the performance measure below (see table 9.24).

Table 9.24
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Public officials increased awareness of a forward-thinking culture, enabling transformational change in governance to thrive	Public officials have enhanced knowledge and competencies needed for new solutions to accelerate progress on the Sustainable Development Goals	Public officials adopted road maps and action plans for foresight-informed decision-making on national priorities and agendas

Planned results for 2026

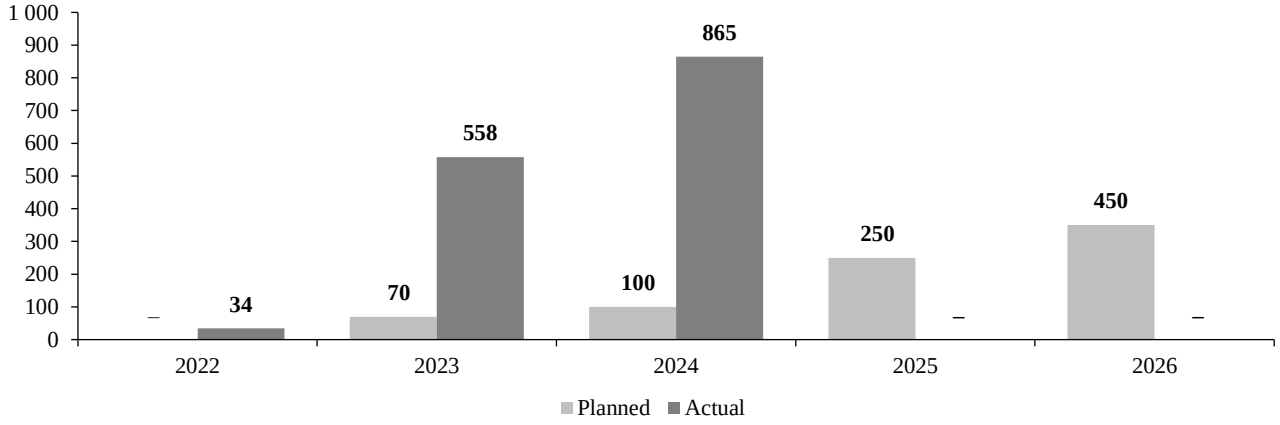
Result 1: enhanced innovation and digital government transformation for effective and inclusive public service delivery

Programme performance in 2024 and target for 2026

9.102 The subprogramme's work contributed to 865 civil servants supporting the preparation of action plans and road maps on innovation and digital government, which exceeded the planned target of 100 civil servants.

9.103 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.IX).

Figure 9.IX
Performance measure: number of civil servants supporting the preparation of action plans and road maps on innovation and digital government (annual)



Result 2: national implementation of the principles of effective governance for sustainable development to enhance trust in public institutions

Programme performance in 2024 and target for 2026

9.104 The subprogramme's work contributed to public officials raising awareness of accountability, transparency and inclusiveness in building effective governance systems and integrating the assessment of these aspects into monitoring and evaluation systems, which met the planned target.

9.105 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.25).

Table 9.25
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Public officials implemented administrative acts that seek to implement long-term sustainable development	Public officials at the national level promoted effective localization	Public officials raised awareness of accountability, transparency and inclusiveness in building effective governance systems, and integrated the assessment of those aspects into monitoring and evaluation systems	Public officials utilize the principles of effective governance for sustainable development and associated tools to perform their functions	Public officials increase their capacity for institutional collaboration for sound policymaking in support of the 2030 Agenda

Result 3: efficient and resilient response to future challenges and opportunities to accelerate sustainable development

Proposed programme plan for 2026

9.106 Establishing anticipatory governance frameworks for long-term strategic planning while cultivating a foresight-driven organizational culture allows governments to proactively address present and future opportunities and risks. The subprogramme has provided policy advice and capacity development

support in systems thinking, strategic foresight and changing mindsets, enhancing the knowledge of policymakers, including on promoting the presence and leadership of women within public institutions.

Lessons learned and planned change

9.107 The lesson for the subprogramme was the need for a whole-of-government and whole-of-society approach and a shift in mindsets towards strategic foresight, to address multiple crises and adapt to rapid changes. In applying the lesson, the subprogramme will strengthen its capacity development work on implementing a holistic approach to anticipatory governance.

9.108 Expected progress towards the objective is presented in the performance measure below (see table 9.26).

Table 9.26
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Public officials enhanced their awareness of the need for strategic foresight in governance	Public officials acquired knowledge and competencies on strategic planning and foresight	Public officials implemented institutional reforms for long-term strategic planning and multi-stakeholder engagement, formulating national development plans and promoting the presence and leadership of women within public institutions	Public officials cultivate a foresight-driven organizational culture and use foresight and systems thinking insights for decision-making to achieve the Sustainable Development Goals	Public officials shift mindsets towards strategic foresight to enhance anticipatory governance

Deliverables

9.109 Table 9.27 lists all deliverables of the subprogramme.

Table 9.27
Subprogramme 7: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**9**	**10**	**10**	**10**
1. Reports to the General Assembly	1	1	1	1
2. Reports to the Economic and Social Council	1	1	1	1

Meetings of:				
4. The General Assembly	2	2	2	2
5. The Economic and Social Council	6	6	6	6
6. The Committee of Experts on Public Administration	10	9	10	10

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects, including the United Nations Project Office on Governance (number of projects)	**6**	**6**	**6**	**6**
7. Field projects on various matters related to public administration	6	6	6	6
Seminars, workshops and training events (number of days)	**12**	**12**	**14**	**14**
8. Training events related to the United Nations Public Service Awards and the United Nations Public Service Day (forum)	2	2	2	2
9. Training events on various issues related to public institutions, including expert groups meetings	4	4	4	4
10. Workshop with ministers from different regions on emerging trends in governance and public institutions related to the achievement of Sustainable Development Goals, including collaboration with regional commissions and United Nations agencies	1	1	1	1
11. Seminars on Internet governance (forum)	1	1	1	1
12. Training events on various matters related to public administration	4	4	6	6
Publications (number of publications)	**1**	**1**	**1**	**1**
13. *United Nations E-Government Survey*	1	1	–	1
14. *World Public Sector Report*	–	–	1	–
Technical materials (number of materials)	**7**	**15**	**7**	**7**
15. Online training courses on matters related to public administration	2	3	2	2
16. Technical materials on issues related to governance and public institutions for sustainable development	3	10	3	3
17. Compendium of best practices and innovation in public service delivery	1	1	1	1
18. Compendium of best practices on public institutions and digital government for sustainable development	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on governance and public administration aspects of sustainable development, including consultations and intergovernmental meetings; and knowledge-sharing and networks, including the United Nations Public Administration Network, a global network (more than 30 members and 5,000 users) that connects relevant international, regional, subregional and national institutions and experts worldwide working on effective governance for sustainable development in line with Sustainable Development Goals 16 and 17.

Databases and substantive digital materials: databases, including the United Nations Public Service Innovation Hub, with more than 350 good practices in public administration innovation at the national and subnational levels, and the e-government knowledge base, covering 193 Member States and the most populous cities in each Member State.

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations Public Administration Network newsletter; social media content and alerts; and virtual and in-person outreach activities on major deliverables.

Digital platforms and multimedia content: subprogramme websites, including of the United Nations Public Administration Network, the Division for Public Institutions and Digital Government, the United Nations Project Office on Governance and the Internet Governance Forum.

Subprogramme 8
Sustainable forest management

Objective

9.110 The objective, to which this subprogramme contributes, is to ensure the effective implementation of sustainable management of all types of forests at all levels in accordance with the United Nations strategic plan for forests 2017–2030.

Strategy

9.111 To contribute to the objective, the subprogramme will:

(a) Support the intergovernmental forest policy dialogue through the United Nations Forum on Forests, in accordance with the strategic plan, the quadrennial programme of work (2025–2028) and the outcomes of the nineteenth session of the Forum, including the 2024 midterm review of the effectiveness of the international arrangement on forests, and coordinate the Forum's input to the high-level political forum on sustainable development;

(b) Advance coordination and cooperation with relevant United Nations entities, member organizations of the Collaborative Partnership on Forests and other stakeholders;

(c) Develop the online clearinghouse of the Global Forest Financing Facilitation Network and assist countries and partners in designing forest financing strategies, facilitating access to financing and assisting Member States in mobilizing resources for sustainable forest management;

(d) Place an emphasis on the special needs and circumstances of Africa, the least developed countries, countries with low forest cover, countries with high forest cover, countries with medium forest cover and low deforestation and small island developing States, as well as countries with economies in transition (Economic and Social Council resolution 2017/4, para. 63);

(e) Advance the implementation of the United Nations strategic plan for forests 2017–2030, including through assisting countries in developing a robust national reporting format for the submission of national reports to the United Nations Forum on Forests, preparing the second global forest goals report and implementation of strategic plan's communication and outreach strategy;

(f) Support common country analyses, which inform the United Nations Sustainable Development Cooperation Framework, thereby providing resident coordinators with the tools to tailor their responses to countries' specific needs and priorities and to support the implementation of the 2030 Agenda, including through national implementation of sustainable forest management;

(g) Support Member States, as appropriate, on issues related to sustainable forest management, through its normative work, technical assistance and capacity-building activities, including the international policy dialogue on the integration of sustainable forest management into decision-making processes concerning land use planning and development, in line with United Nations Forum on Forests' resolutions.

9.112 The above-mentioned work is expected to result in:

(a) Strengthened political commitment and action for sustainable forest management, leading to increased contributions by forests to Sustainable Development Goals achievement, including on climate change, biodiversity, land and greater integration of forests into national sustainable development plans and poverty reduction strategies;

(b) Improved capacity of eligible countries to mobilize and gain access to financing for sustainable forest management, and improved information on and access to existing and emerging multilateral and other funding sources and data;

(c) Member States' progress towards achieving the global forest goals and the forest-related Sustainable Development Goals;

(d) Increased awareness among Member States of the benefits of forests based on the 2026 theme of the International Day of Forests, and on highlighting the interdependent role of forests in enabling the world to meet the Sustainable Development Goals that will be reviewed during the 2026 high-level political forum on sustainable development.

Programme performance in 2024

Member States track progress on implementation of the United Nations strategic plan for forests

9.113 Comprehensive forest monitoring, assessment and reporting is essential for informed and evidence-based decision-making, while systematic data are critical for understanding how forests contribute to livelihoods, poverty reduction, health and well-being, and sustainable development. Following workshops to strengthen national capacities to identify data sources and systematic data collection in 2023, the subprogramme developed a road map and timeline for the second national reporting cycle in 2024 and an online reporting platform to streamline the national reporting process. Member States and partners will use this platform for their voluntary national reports and track progress in implementing the United Nations strategic plan for forests 2017–2030. The findings from this second round of national reporting will contribute to the second Global Forest Goals Report, to be published in May 2026.

9.114 Progress towards the objective is presented in the performance measure below (see table 9.28).

Table 9.28
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Member States have enhanced capacity to create and/or improve existing monitoring and reporting mechanisms for tracking sustainable forest management	Member States used the online reporting format tool to produce national reports on progress made in the implementation of the United Nations strategic plan for forests 2017–2030

Planned results for 2026

Result 1: accelerating progress towards implementing the United Nations strategic plan for forests and achieving the global forest goals, including through partnerships

Programme performance in 2024 and target for 2026

9.115 The subprogramme's work contributed to the adoption of two joint initiatives with the Convention on Biological Diversity secretariat, and with the Food and Agriculture Organization of the United Nations, the International Union for the Conservation of Nature and Natural Resources and the Society for Ecological Restoration, which met the planned target.

9.116 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.29).

Table 9.29
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Business and industry major group designated a new focal point to help to facilitate coordination and discussion on United Nations Forum on Forests-related	Joint initiatives were signed to foster collaborative activities on forests and sustainable land management, conservation and sustainable use of forest biodiversity	Two joint initiatives to foster collaborative activities on harnessing synergies between the global forest and biodiversity agendas	Three joint initiatives to support reporting and data-sharing activities on the implementation of the United Nations strategic plan for forests	Major groups and other stakeholders develop a strategy and joint workplan to accelerate implementation of the United Nations

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
issues with the private sector	and sustainable management of tropical forests			strategic plan for forests 2017–2030

Result 2: increased reach of the United Nations Forum on Forests and contribution of forests to the 2030 Agenda

Programme performance in 2024 and target for 2026

9.117 The subprogramme's work contributed to Member States having access to best practices and relevant information through the redesigned website of the United Nations Forum on Forests, including social media content for the International Day of Forests, the Sustainable Development Goals pavilion and sessions of the Forum, which met the planned target.

9.118 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.30).

Table 9.30
Performance measure

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
–	Member States have access to communications products with user-friendly design and functionality on issues related to forests and health, forest fires, and the contributions of forests to sustainable energy and livelihoods	Member States have access to best practices and relevant information through the redesigned website of the Forum, including social media products to raise awareness on the benefits of forests	Member States exchange best practices and access new communications products to raise awareness on the social, economic and environmental benefits of forests	Member States exchange best practices and access new communication products on the multiple benefits of forests and trees beyond the forest sector, and on the important role of people in vulnerable situations, including Indigenous Peoples, and women and girls

Result 3: advancement of the Sustainable Development Goals through the United Nations strategic plan for forests 2017–2030

Proposed programme plan for 2026

9.119 The programme of work for the period 2025–2028 of the United Nations Forum on Forests includes fundamental interlinkages between global forest goals and the Sustainable Development Goals. The subprogramme assisted countries in delivering consistent messages on the interlinkages in line with national priorities and relevant mandates.

Lessons learned and planned change

9.120 The lesson for the subprogramme was that an in-depth analysis of international forest related developments and their interlinkages was necessary to inform advancement of the implementation of the United Nations strategic plan for forests 2017–2030. In applying the lesson, the subprogramme will conduct further analytical work on these interlinkages to accelerate the achievement of the Goals, minimize duplication and increase complementarity of the globally agreed forest related

goals, targets and commitments, and continue to develop knowledge-promoting materials in collaboration with the Collaborative Partnership on Forests.

9.121 Expected progress towards the objective is presented in the performance measure below (see table 9.31).

Table 9.31
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States and forest stakeholders discussed the interlinkages of forests and the Sustainable Development Goals, climate, biodiversity and land	Member States and forest stakeholders highlighted the significance of forests during meetings of the conferences of parties of the Rio Conventions, and the Collaborative Partnership on Forests governing bodies	Member States and forest stakeholders accelerate action on forests, addressing climate change, biodiversity loss and sustainable development	Member States and forest stakeholders build political momentum on forests and their contributions to sustainable development through the adoption of a resolution at the twenty-first session of the United Nations Forum on Forests

Deliverables

9.122 Table 9.32 lists all deliverables of the subprogramme.

Table 9.32
Subprogramme 8: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**8**	**8**	**8**	**8**
1. Reports of the United Nations Forum on Forests	8	8	8	8
Substantive services for meetings (number of three-hour meetings)	**20**	**16**	**20**	**20**
2. Meetings of the United Nations Forum on Forests	16	16	16	16
3. Meetings of experts on sustainable forest management, the midterm review of the international arrangement on forests and contributions of forests to various issues, including the Sustainable Development Goals, forest financing and other various issues related to forests	4	–	4	4
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**8**	**8**	**8**	**8**
4. Projects on forest financing and development of national financing strategies	6	8	6	6
5. Projects on achievement of the global forest goals and implementation of the United Nations strategic plan for forests	2	–	2	2
Seminars, workshops and training events (number of days)	**7**	**7**	**7**	**5**
6. Training events on forest financing	6	6	6	4
7. Training events on sustainable forest management	1	1	1	1
Publications (number of publications)	**–**	**–**	**–**	**1**
8. Progress towards achieving the Global Forest Goals and targets of the United Nations strategic plan for forests 2017–2030	–	–	–	1

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Technical materials (number of materials)	**7**	**4**	**7**	**7**
9. Technical materials on sustainable forest management	3	–	3	3
10. Technical materials on contributions of forests to various issues, including forest-related Sustainable Development Goals	2	–	2	2
11. Technical materials on materials financing and development of national financing strategies	2	4	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice on various issues related to forests.

Databases and substantive digital materials: database on clearinghouse mechanism.

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including the International Day of Forests and events of the Collaborative Partnership on Forests; and fact sheets and policy briefs on sustainable forest management, forest financing and other issues related to forests.

External and media relations: press releases and articles on the United Nations Forum on Forests and the International Day of Forests.

Subprogramme 9
Financing for sustainable development

Objective

9.123 The objective, to which this subprogramme contributes, is to advance the follow-up on and review of the implementation of the outcomes of the International Conferences on Financing for Development, including the Addis Ababa Action Agenda, and the delivery of the means of implementation of the 2030 Agenda.

Strategy

9.124 To contribute to the objective, the subprogramme will:

(a) Promote and support the follow-up to the agreements and commitments reached at the Fourth International Conference on Financing for Development;

(b) Build on continuing analytical work in collaboration with the Inter-Agency Task Force on Financing for Development and prepare the annual *Financing for Sustainable Development Report*, and other reports for the Economic and Social Council forum on financing for development follow-up and for Second Committee and other deliberations;

(c) Scale up investment for the Sustainable Development Goals with concrete solutions building on the work of the Global Investors for Sustainable Development Alliance and facilitate the dialogue on sustainable investment, including through the Sustainable Development Goals Investment Fair, enabling direct engagement between Member States and investors;

(d) Provide policy support to intergovernmental processes and capacity-building to foster more inclusive and effective international tax cooperation; support Member States in enhancing tax policies and administration, improving domestic resource mobilization and addressing tax evasion, aggressive tax avoidance and illicit financial flows; and advance progress towards achieving the Sustainable Development Goals and climate action, focusing on countries in special situations;

(e) Enhance support for the Development Cooperation Forum in its reviews of trends, progress and emerging issues in international development cooperation, focusing on policies and practices to support those with the fewest resources and the weakest capacities;

(f) Support countries in designing and implementing integrated national financing frameworks, through the Integrated National Financing Framework Facility. The Facility, a joint initiative of the Department, the United Nations Development Programme, the Organisation for Economic Co-operation and Development, the United Nations Children's Fund, the European Union and a few Member States, facilitates knowledge exchange and access to technical guidance on financing frameworks.

9.125 The above-mentioned work is expected to result in:

(a) Policy and action on financing for sustainable development through strengthened analytical foundations for the outcomes of the Economic and Social Council forum on financing for development follow-up and Second Committee deliberations;

(b) Countries designing and using integrated national financing frameworks, including actionable policy options, to mobilize financing for sustainable development;

(c) Accelerated mobilization of resources for the Sustainable Development Goals, leading to greater investment opportunities with positive impacts, including in countries in special situations;

(d) Improved solutions at all levels for strengthening international tax cooperation, improving domestic resource mobilization and more effective implementation by Governments and other stakeholders of United Nations policy and practical guidance on tax matters;

(e) Utilization by Governments and other stakeholders of policy guidance to enhance international development cooperation, for the effective implementation of the 2030 Agenda, the Addis Ababa Action Agenda, the Paris Agreement and the Sendai Framework for Disaster Risk Reduction 2015–2030.

Programme performance in 2024

Evidence-based intergovernmental preparations for the Fourth International Conference on Financing for Development

9.126 Substantive and evidence-based discussions are fundamental to informing the preparatory process of the Fourth International Conference on Financing for Development. The subprogramme has set up an "academic track" to systematically promote research, analysis and policy recommendations of academics and think tanks, which culminated in the "Financing for development dialogues: from evidence to action" conference that featured panel discussions on various topics. The conference enabled Member States and academia to deliberate and explore evidence-based solutions and innovative ideas for financing for development.

9.127 Progress towards the objective is presented in the performance measure below (see table 9.33).

Table 9.33
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Academics and think tanks engaged in financing for sustainable development deliberations in an ad hoc manner	Consultations with an array of experts and in-depth analysis informed the Financing for Sustainable Development Report 2023, addressing financing for development challenges	Preparation for the Fourth International Conference on Financing for Development benefited from the analysis and recommendations of 400 members of academia and think tanks through the dedicated "academic track"

Planned results for 2026

Result 1: creditors and debtor countries agree on global challenges and policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals

Programme performance in 2024 and target for 2026

9.128 The subprogramme's work contributed to Member States, civil society and international organizations discussing and agreeing on policy solutions to address debt, liquidity and fiscal space for development, through the elements paper for the outcome document of the Fourth International Conference on Financing for Development, which met the planned target.

9.129 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 9.34).

Table 9.34
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Member States and relevant partners in the United Nations system provided feedback and guidance on priority issues related to debt, liquidity and fiscal space to inform the development of policy dialogues	Member States, civil society and international organizations discussed and agreed on policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals, as reflected in the elements paper for the outcome document of the Fourth International Conference on Financing for Development	Member States agree on concrete action to advance policy solutions on debt, liquidity and fiscal space for investment in the Sustainable Development Goals as part of an outcome document of the Fourth International Conference on Financing for Development	Member States begin to implement policy action on debt contained in the outcome document of the Fourth International Conference on Financing for Development

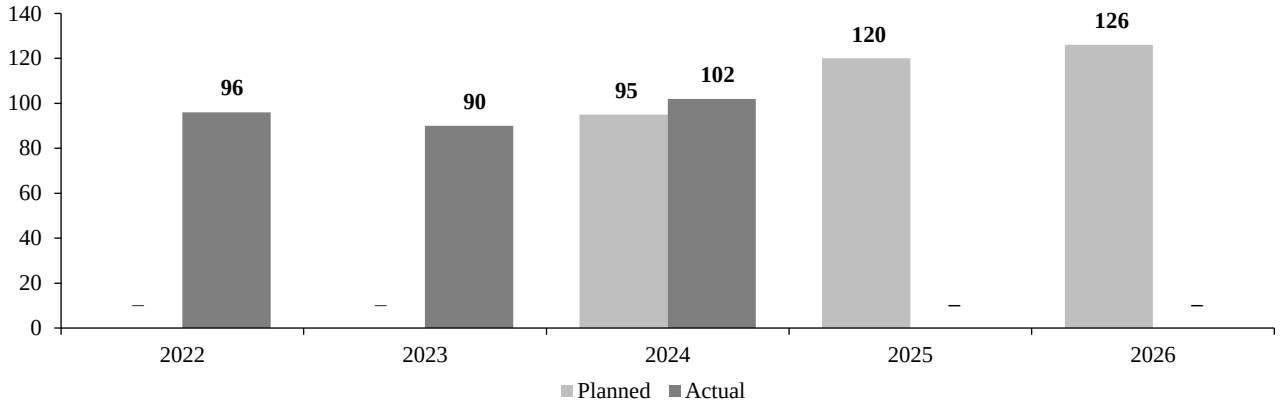
Result 2: strengthened engagement of Member States in the financing for development follow-up process to improve coherence and implementation of agreed outcomes

Programme performance in 2024 and target for 2026

9.130 The subprogramme's work contributed to strengthening the engagement of Member States in the financing for development process, with 102 countries participating in the intergovernmental follow-up, which exceeded the planned target of 95 countries.

9.131 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 9.X).

Figure 9.X
Performance measure: number of countries participating in the intergovernmental follow-up process to the international conferences on financing for development (annual)



Result 3: enhanced engagement of developing countries in shaping tax international norms

Proposed programme plan for 2026

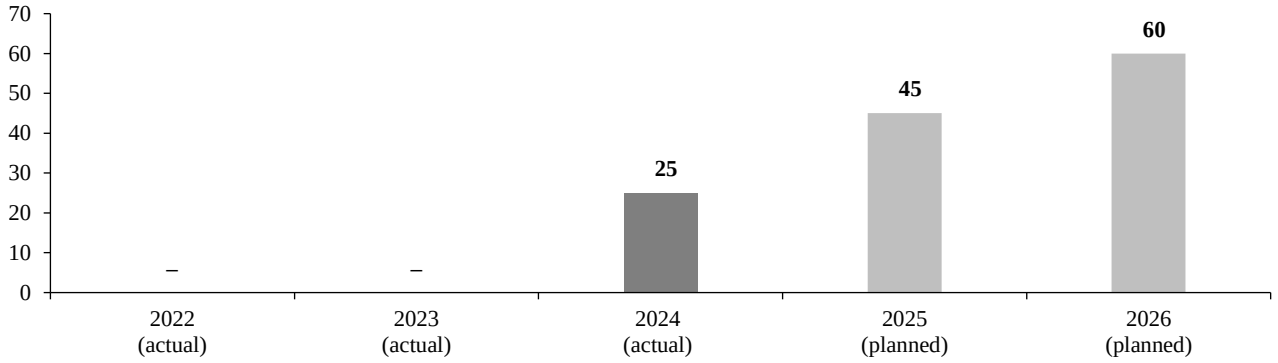
9.132 The launch of negotiations towards a United Nations framework convention on international tax cooperation creates opportunities for universal participation in tax norm-setting, while many developing countries need enhanced support to effectively participate in this complex process. The subprogramme has provided integrated technical support and analysis, as well as capacity-building activities, enabling more developing countries to engage effectively in international tax discussions and strengthen the inclusiveness and effectiveness of international tax norms.

Lessons learned and planned change

9.133 The lesson for the subprogramme was the need for more targeted support to facilitate the effective participation of developing countries in international norm-setting processes, galvanizing their technical expertise in tax matters. In applying the lesson, the subprogramme will implement a phased approach, establishing core capacity for immediate negotiation support needs, while gradually expanding integrated technical support to the Member State-led negotiations and targeted capacity-building to enhance countries' engagement and their capabilities to shape international tax norms.

9.134 Expected progress towards the objective is presented in the performance measure below (see figure 9.XI).

Figure 9.XI
Performance measure: number of developing countries engaging in shaping international tax norms (cumulative)



Deliverables

9.135 Table 9.35 lists all deliverables of the subprogramme.

Table 9.35
Subprogramme 9: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**36**	**55**	**43**	**35**
1. Documents for the General Assembly	4	4	10	3

14. Workshops on tax issues and domestic resource mobilization	35	67	35	40

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
15. Seminars on financing for development, including interactive discussions with the participation of Governments and institutional and non-institutional stakeholders (civil society and the private sector)	2	2	2	2
Publications (number of publications)	**1**	**1**	**–**	**1**
16. *Financing for Sustainable Development Report* of the Inter-Agency Task Force on Financing for Development	1	1	–	1
Technical materials (number of materials)	**3**	**2**	**3**	**4**
17. United Nations Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries	–	–	–	1
18. Building on Monterrey: selected policy issues on financing for development	1	1	1	1
19. Analytical studies on selected issues in development cooperation, including South-South cooperation, and an independent assessment of trends and progress in development cooperation	2	1	2	2

C. Substantive deliverables

Consultation, advice and advocacy: briefings to Member States; consultations on the work of the Group of Friends on Financing the Sustainable Development Goals; consultations on financing sustainable development and the Goals to civil society organizations, the private sector, including the Global Investors for Sustainable Development Alliance, academia, foundations and other entities of the United Nations system; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

D. Communication deliverables

Outreach programmes, special events and information materials: Development Cooperation Forum outreach materials; and information kit for events on financing for sustainable development.

External and media relations: press releases on its annual work, including: Economic and Social Council forum on financing for development follow-up; quadrennial General Assembly high-level dialogue on financing for development; the Fourth International Conference on Financing for Development; biennial Development Cooperation Forum high-level meeting; event on financing for sustainable development multi-stakeholder consultations on financing for development; work of the Committee of Experts on International Cooperation in Tax Matters; work of the United Nations framework convention (tax) committee; work on sustainable infrastructure asset management; Sustainable Development Goals Investment Fair; launch of the *Financing for Sustainable Development Report*; and work of the Global Investors for Sustainable Development Alliance.

Digital platforms and multimedia content: Op-eds and blogs; websites of the Financing for Sustainable Development Office, the Fourth International Conference on Financing for Development, including the International Commission of Experts on Financing for Development and the financing for development dialogues, the Development Cooperation Forum, the Committee of Experts on International Cooperation in Tax Matters, the United Nations framework convention (tax) committee, related digital platforms for capacity development activities, and website of the joint Department of Economic and Social Affairs/United Nations Capital Development Fund and United Nations Office for Project Services global capacity development initiative on infrastructure asset management; and the website of the Global Investors for Sustainable Development Alliance and the integrated national financing frameworks knowledge platform.

B. Proposed post and non-post resource requirements for 2026

Overview

9.136 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 9.36 to 9.38.

[a] Includes nine temporary posts (3 P-5, 2 P-4, 3 P-3 and 1 GS (OL)), which were approved pursuant to General Assembly resolutions 70/248 and 71/272.

9.137 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 9.39 to 9.41 and figure 9.XII.

9.138 As reflected in tables 9.39 (1) and 9.40 (1), the overall resources proposed for 2026 amount to $104,780,500, reflecting a net decrease of $1,816,000 (or 1.7 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

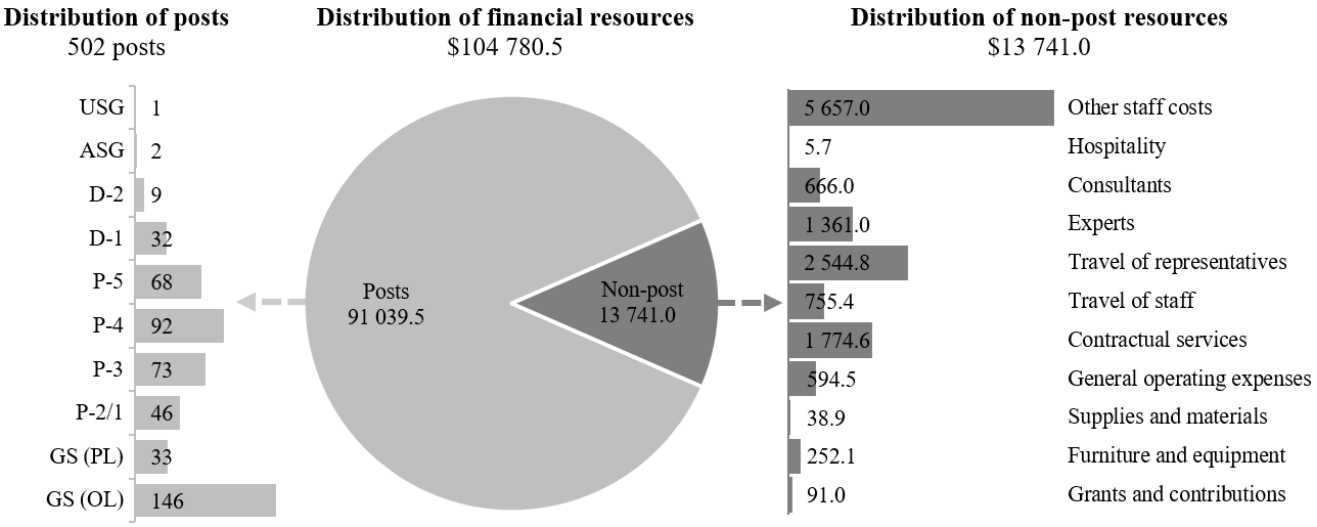
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

9.139 As shown in table 9.39 (1), resource changes reflect a net decrease of $2,052,800, as follows:

(a) **Subprogramme 1, Intergovernmental support and coordination for sustainable development**. The net increase of $119,600 relates to the higher provision at continuing vacancy rates for two posts (Programme Management Officer (P-3) and Research Assistant (General Service (Other level)) established in 2025 pursuant to Economic and Social Council decision 2024/342, which were subject to a 50 per cent vacancy rate in accordance with the established practice ($127,500), offset in part by the removal of non-recurrent provisions under furniture and equipment ($7,900) that were approved for 2025 pursuant to the same Council decision;

(b) **Subprogramme 2, Inclusive social development**. The decrease of $587,400 relates to the removal of non-recurrent provisions under general temporary assistance, consultants, experts, travel of staff, contractual services, general operating expenses and supplies and materials that were approved for 2025 pursuant to General Assembly resolutions 78/172 and 78/318;

(c) **Subprogramme 3, Sustainable development**. The decrease of $323,300 relates to the removal of non-recurrent provisions under general temporary assistance, consultants and experts that were approved for 2025 pursuant to General Assembly resolutions 78/317 and 79/1;

(d) **Subprogramme 4, Statistics**. The decrease of $830,900 relates to the removal of non-recurrent provisions under general temporary assistance, consultants, experts, travel of staff and general operating expenses that were approved for 2025 pursuant to General Assembly resolutions 78/317, 78/322 and 79/1;

(e) **Subprogramme 6, Economic analysis and policy**. The net decrease of $143,800 relates to the removal of non-recurrent provisions under general temporary assistance ($222,200) associated with the report of the Committee for Programme and Coordination (A/79/16), as endorsed by the General Assembly in its resolution 79/247, that were approved for 2025, and the removal of non-recurrent provisions under furniture and equipment ($3,900) that were approved for 2025 pursuant to Economic and Social Council resolution 2024/7, offset in part by the higher provision at continuing vacancy rates for one post of Economic Affairs Officer (P-3) established in 2025 pursuant to the same Council resolution, which was subject to a 50 per cent vacancy rate in accordance with the established practice ($82,300);

(f) **Subprogramme 9, Financing for sustainable development**. The net decrease of $311,900 relates to the removal of non-recurrent provisions under consultants, contractual services, supplies and materials, and furniture and equipment that were approved for 2025 pursuant to General Assembly resolutions 78/231 and 79/235, offset in part by the adjustments for the higher provision for general temporary assistance positions pursuant to Assembly resolution 79/235;

(g) **Programme support**. The increase of $24,900 relates to the higher provision for general temporary assistance positions pursuant to General Assembly resolution 79/235.

New and expanded mandates

9.140 As shown in table 9.39 (1), resource changes reflect an increase of $577,900, as follows:

(a) **Policymaking organs**. The increase of $61,900 relates to the recurrent provision under travel of representatives for an additional 10 members of the Statistical Commission in 2026, pursuant to Economic and Social Council resolution 2024/2;

(b) **Subprogramme 3, Sustainable development**. The increase of $58,200 relates to the non-recurrent provision under consultants to support the development and refinement of the handbook on vulnerability-resilience country profiles, pursuant to General Assembly resolution 78/322;

(c) **Subprogramme 4, Statistics**. The increase of $457,800 relates to the non-recurrent provision under general temporary assistance for an Executive Secretary (P-5) and a Programme Management Officer (P-3) ($446,200) to support the work of the independent high-level expert group pursuant to General Assembly resolution 79/1, as well as for related travel of staff ($11,600) to present the work of the expert group.

Other changes

9.141 As reflected in table 9.39 (1), resource changes reflect a decrease of $341,100, as follows:

(a) **Subprogramme 1, Intergovernmental support and coordination for sustainable development**. Cost-neutral changes relate to the proposed conversion of two long-term positions of Economic Affairs Officer (P-4 and P-3) from general temporary assistance to posts, in line with General Assembly resolution 79/257 of 24 December 2024, as described in annex II;

(b) **Subprogramme 4, Statistics**. Cost-neutral changes relate to the proposed conversion of a long-term position of Statistician (P-4) from general temporary assistance to post, in line with General Assembly resolution 79/257 of 24 December 2024, as described in annex II;

(c) **Programme support**. The decrease of $341,100 relates mainly to the lower standard price of the core software package at United Nations Headquarters under contractual services.

Extrabudgetary resources

9.142 As reflected in tables 9.39 (2) and 9.40 (2), extrabudgetary resources amount to $104,775,900. The resources would complement regular budget resources and would be used mainly to provide for various substantive and capacity development activities. Extrabudgetary estimates also include resources in the amount of $56,355,000 for the trust fund for the Junior Professional Officers Programme, which the Department administers (reflected under programme support).

9.143 Anticipated in-kind contributions will provide for donated right of use of premises for project offices with an estimated value of $406,000 ($204,000 under subprogramme 3, $158,000 under subprogramme 4 and $44,000 under subprogramme 7), and other services such as the provision of technical experts on a non-reimbursable loan basis, use of training facilities and provision of equipment, with an estimated value of $262,000 ($122,000 under subprogramme 3 and $140,000 under subprogramme 7).

9.144 The extrabudgetary resources under this section are subject to the oversight of the Under-Secretary-General for Economic and Social Affairs, who has delegated authority from the Secretary-General.

Policymaking organs

9.145 The resources proposed under this component would provide for the policymaking organs as shown in table 9.42.

Table 9.42
Policymaking organs
(Thousands of United States dollars)

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
High-level political forum on sustainable development	Mandate: General Assembly resolutions 66/288, 67/290, 70/299 and 75/290 B Membership: all States Members of the United Nations and States members of the specialized agencies Number of sessions in 2026: 1 (annual session under the auspices of the Economic and Social Council)	412.9	412.9
Commission for Social Development	Mandate: Economic and Social Council resolutions 10 (II), 1139 (XLI), 1996/7 and 2016/6 Membership: 46 government officials Number of sessions in 2026: 1	140.7	140.7
Permanent Forum on Indigenous Issues	Mandate: Economic and Social Council resolution 2000/22 Membership: 16 experts Number of sessions in 2026: 1	243.6	243.6
Statistical Commission	Mandate: Economic and Social Council resolution 1566 (L), reaffirming its resolution 8 (I), as amended by 8 (II) of 1946; and resolutions 2006/6, 2020/5 and 2022/3 Membership: 24 government officials Number of sessions in 2026: 1	144.5	206.4

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
Committee of Experts on Global Geospatial Information Management	Mandate: Economic and Social Council resolutions 2011/24, 2016/27 and 2022/24 Membership: experts from all Member States and experts from international organizations who participate as observers Number of sessions in 2026: 1	–	–
Commission on Population and Development	Mandate: Economic and Social Council resolutions 3 (III), 150 (VII) and 2016/25 and decision 1995/320, and General Assembly resolution 49/128 Membership: 47 government officials Number of sessions in 2026: 1	144.5	144.5
Committee for Development Policy	Mandate: Economic and Social Council resolutions 1998/46 and 2023/10 and General Assembly resolution 67/221 Membership: 24 experts serving in their personal capacity from the fields of economic development, social development and environmental protection Number of sessions in 2026: 1	237.9	237.9
Committee of Experts on Public Administration	Mandate: Economic and Social Council resolutions 2001/45 and 2003/60 Membership: 24 experts serving in their personal capacity from the interrelated fields of public economics, public administration and public finance Number of sessions in 2026: 1	230.1	230.1
United Nations Forum on Forests	Mandate: Economic and Social Council resolutions 2000/35 and 2015/33 and General Assembly resolution 71/285 Membership: 197 government officials Number of sessions in 2026: 1	69.6	69.6
Committee of Experts on International Cooperation in Tax Matters	Mandate: Economic and Social Council resolutions 1273 (XLIII), 2004/69 and 2017/2 and General Assembly resolution 69/313 Membership: 25 experts nominated by Governments and acting in their expert capacity Number of sessions in 2026: 2	459.2	459.2
Total		**2 083.0**	**2 144.9**

9.146 The proposed regular budget resources for 2026 amount to $2,144,900 and reflect an increase of $61,900 compared with the approved budget for 2025. The proposed change is explained in paragraph 9.140 (a). Additional details on the distribution of the proposed resources for 2026 are reflected in table 9.43.

Executive direction and management

9.147 The Under-Secretary-General for Economic and Social Affairs is responsible for the overall management and administration of the Department in the effective implementation of its mandates and its approved programme of work, and the accountable use of the Department's human, financial and physical resources. The Under-Secretary-General serves as the convener of the Executive Committee on Economic and Social Affairs; a member of the United Nations Sustainable Development Group; and Programme Manager of the United Nations Development Account, including capacity development activities. The Under-Secretary-General is assisted by the Assistant Secretary-General for Policy Coordination and the Assistant Secretary-General for Economic Development.

9.148 The Assistant Secretary-General for Policy Coordination supports the Under-Secretary-General by providing substantive policy advice on departmental support to intergovernmental processes, including the General Assembly, the Economic and Social Council and its subsidiary bodies, and the high-level political forum on sustainable development. The incumbent also supports the work of the United Nations Sustainable Development Group and the United Nations System Chief Executives Board for Coordination.

9.149 The Assistant Secretary-General for Economic Development serves as the principal economic adviser to the Under-Secretary-General and assists in providing thought leadership and guidance on the Department's policy research and analysis work, including on frontier and emerging issues. The incumbent also coordinates and reviews the publications of the Department, reports of the Secretary-General and other technical products that amplify and deliver the work of the Department on global development policy.

9.150 Furthermore, the Assistant Secretaries-General are assigned responsibility for the substantive oversight and coordination of specific subprogrammes, within the authority delegated by the Under-Secretary-General, as reflected in the proposed organizational structure and post distribution for 2026 (see annex I).

9.151 The Office of the Under-Secretary-General supports the senior leadership in the overall coordination and management of its programmes and resources, the implementation of Department-wide initiatives and the overall programming, monitoring and evaluation activities. It also facilitates the work of the Department's network of gender focal points and is responsible for the review of legislative reports and flagship publications of the Department.

9.152 Within the Office of the Under-Secretary-General are the Strategic Planning and Communications Service and the Programme, Monitoring and Evaluation Unit. The Strategic Planning and Communications Service supports the Under-Secretary-General in advancing the Department's strategic direction, integration and policy coherence, including its collaborative work with other Secretariat entities in the areas of knowledge management, communications, websites, social and multimedia outreach, publishing and information technology. It supports the Department's engagement in the Secretary-General's Executive Committee and coordinating mechanisms or bodies and represents the Department in relevant Secretariat policy and normative bodies, including the Publications Board, the Information and Communications Technology Board and the United Nations Communications Group. It also supports the Department's editorial board and departmental strategic planning and communications networks, as well as the implementation of the Department's strategic communications framework.

9.153 The Programme, Monitoring and Evaluation Unit coordinates the preparation of the Department's annual programme plan and is responsible for the internal monitoring and evaluation of the Department's work. It supports evaluations and audits by oversight bodies. It also produces monitoring reports for senior management decision-making. The Unit operates independently from other operational and management functions within the Department.

9.154 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in

paragraph 19 of General Assembly resolution 72/219, the Department is integrating environmental management practices into its operations. The Department uses online platform tools and organizes meetings and workshops in a virtual or hybrid format, whenever possible. In 2026, the Department will continue to encourage the electronic distribution of documents and materials, increase the paperless conduct of meetings and focus its efforts on the online readability of publications. Whenever supported by donors, the Department will offset the greenhouse gas emissions generated by air travel in connection with large-scale conferences.

9.155 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 9.44. The travel compliance improved in 2024 compared with that of 2023, although advance planning has remained challenging. The Department provided further internal guidance on the advance purchase policy after the revised administrative instructions on official travel were issued. The late receipt of voluntary contributions and late nominations of non-staff travellers continued to affect the rate of compliance. The Department will continue its efforts to improve the compliance rate by, among other efforts, promoting advance planning for all Department events and working more closely with Governments on the nominations of representatives. In 2024, the Department continued to submit nearly all its documents within the prescribed timelines.

Table 9.44
Compliance rate
(Percentage)

	2022 actual	*2023 actual*	*2024 actual*	*2025 planned*	*2026 planned*
Timely submission of documentation	97	96	92	100	100
Air tickets purchased at least two weeks before the commencement of travel	48	60	68	100	100

9.156 The proposed regular budget resources for 2026 amount to $5,606,500 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of the proposed resources for 2026 are reflected in table 9.45 and figure 9.XIII.

Programme of work

Subprogramme 1
Intergovernmental support and coordination for sustainable development

9.157 The proposed regular budget resources for 2026 amount to $9,162,800 and reflect a net increase of $119,600 compared with the approved budget for 2025. The proposed changes are explained in paragraphs 9.139 (a) and 9.141 (a). Additional details on the distribution of the proposed resources for 2026 are reflected in table 9.46 and figure 9.XIV.

Programme support

9.166 Programme support comprises the Executive Office and the Capacity Development Programme Management Office.

9.167 The Executive Office supports the Under-Secretary-General, as follows: (a) in his exercise of the delegation of authority to manage the human, financial and physical resources of the Department; (b) in the context of the monitoring and accountability framework; and (c) as his main interlocutor with the Department of Management Strategy, Policy and Compliance and the Department of Operational Support, including in relation to participation in focal point networks or committees in support of various management-related reform initiatives. The Executive Office also provides administrative support to other entities at Headquarters.

9.168 The Capacity Development Programme Management Office coordinates the Department's capacity development functions by providing strategic guidance and coordination for the formulation and implementation of coherent and integrated capacity development activities. Such efforts support Member States in translating the outcomes of major United Nations conferences and intergovernmental processes into national strategies and plans. The Office manages both regular and extrabudgetary resources. It also promotes and supports strategic cooperation and partnerships within the Secretariat and with the broader United Nations development system, including the resident coordinator system, to ensure more coherent and integrated support for the implementation of the 2030 Agenda and the Addis Ababa Action Agenda at the country level. The Office supports the Under-Secretary-General in his role as Programme Manager of the United Nations Development Account. It also manages the Junior Professional Officers Programme for the Secretariat and the resident coordinator system.

9.169 The proposed regular budget resources for 2026 amount to $5,454,800 and reflect a net decrease of $316,200 compared with the approved budget for 2025. The proposed changes are explained in paragraphs 9.139 (g) and 9.141 (c). Additional details on the distribution of the proposed resources for 2026 are reflected in table 9.55 and figure 9.XXIII.

[a] Conversion.

[b] Reassignment.

Annex II

Summary of proposed post changes, by component and subprogramme

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Subprogramme 1, Intergovernmental support and coordination for sustainable development	1 1	P-4 P-3	**Conversion** of 2 Economic Affairs Officers from general temporary assistance to posts	The conversion has been proposed because the functions performed are of a continuing nature. The provision was first approved by the General Assembly in its resolution 68/246 and became effective in 2014 pursuant to Assembly resolution 67/226 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, and the functions have been carried out since then. The proposed conversion would strengthen the subprogramme's support for the continuous monitoring of and reporting by the Secretary-General on the funding and performance of the United Nations development system, with the most recent mandate reflected in Assembly resolution 79/226. The incumbents undertake research and analysis on key trends and policy issues relating to operational activities for development; the design and evaluation of data to assess the funding, coherence, efficiency and effectiveness of operational activities for development; the establishment and growth of stakeholder relationships and networks on operational activities for development and implementation of quadrennial comprehensive policy reviews, including with inter-agency and intergovernmental bodies; and the production of reports to the Economic and Social Council and the General Assembly on the implementation of the quadrennial comprehensive policy review.
Subprogramme 1, Intergovernmental support and coordination for sustainable development	1	P-3	**Reassignment** of 1 Programme Management Officer as Information Systems Officer	The proposed reassignment is aimed at addressing the increased demand for awareness building, communications and stakeholder engagement and the improvement of the websites of the high-level political forum and the Economic and Social Council, as well as the non-governmental organizations platform. There is a significant need for an Information Systems Officer with the technical skills to develop, maintain and troubleshoot existing websites and platforms and computer information systems, so as to enhance those platforms and meet the growing demand for more secure, dynamic and accessible websites, which are critical to the delivery of the work of the subprogramme.
Subprogramme 4, Statistics	1	P-4	**Conversion** of 1 Statistician from general temporary assistance to post	The conversion has been proposed because of continuing need, although the functions performed have evolved over the years. The provision was first included under the subprogramme in 1998, as approved by the General Assembly in its resolution 52/220, to support the development of the United Nations Economic and Social Information System. The functions later evolved to support the Millenium Development Goals and, subsequently, the Sustainable Development Goals, through the continuous improvement and update of the database containing international data series for the monitoring and assessment of progress towards achieving the Goals.

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
				The proposed conversion would enhance efficiency, streamline responsibilities and ensure the sustainability of key initiatives related to the United Nations World Data Forum, data stewardship, capacity development and global coordination efforts for data and statistics for the 2030 Agenda and the post-2030 Agenda. The incumbent would support methodological work on data development, including data stewardship and data governance; the High-level Group for Partnership, Coordination and Capacity-Building for Statistics for the 2030 Agenda for Sustainable Development; and the organization of the United Nations World Data Forum.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

10.1 The Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States is responsible for advocating, undertaking research and analysis, mobilizing support and resources, coordinating and reporting on the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States, as well as the achievement of other internationally agreed goals, including the Sustainable Development Goals. The mandate of the Office derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 56/227, whereby the Assembly decided to establish the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States.

10.2 The work of the Office is grounded in the three programmes of action, namely, resolution 76/258, whereby the Assembly endorsed the Doha Programme of Action for the Least Developed Countries for the Decade 2022–2031; resolution 78/317, whereby the General Assembly endorsed the Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity; and resolution 79/233, whereby the Assembly endorsed the new Programme of Action for Landlocked Developing Countries for the Decade 2024–2034. The 2030 Agenda for Sustainable Development, including its global follow-up and review processes, is integral and complementary to the three programmes of action.

Strategy and external factors for 2026

10.3 In 2026, the least developed countries and their development partners will prepare for the comprehensive high-level midterm review of the implementation of the Doha Programme of Action for the Least Developed Countries. The central task ahead for the least developed countries and the international community is to strengthen partnerships that leave no one behind and boost progress towards the 2030 Agenda. Implementation of the provisions of the Doha Programme of Action by the least developed countries and their development partners will be prioritized, through the mobilization of commensurate resources and knowledge in support of accelerating their sustainable development and enhanced monitoring and accountability.

10.4 Building on the first year of implementation of the Programme of Action for Landlocked Developing Countries for the Decade 2024–2034, landlocked developing countries and their development partners will intensify efforts to operationalize its objectives and key deliverables. To support the successful implementation of the Programme of Action, in 2026 the Office will help with the mobilization of adequate financial, technical and capacity-building resources, undertake efforts to strengthen partnerships, and support countries with integrating the Programme of Action into national development plans and relevant global frameworks, with a view to addressing the specific vulnerabilities of landlocked developing countries. These measures will contribute to accelerating progress towards the 2030 Agenda through structural transformation, resilience-building and sustainable development in the landlocked developing countries.

10.5 In 2026, small island developing States and their development partners will commence the second full year of implementing the Antigua and Barbuda Agenda for Small Island Developing States, focusing on key targets under its monitoring and evaluation framework, as well as the full operationalization of the small island developing States centre of excellence. The Office will actively advocate for the strengthening of global partnerships, including through the Small Island Developing States Global Business Network, utilization of the Multidimensional Vulnerability Index, enhanced access to concessional and climate financing, and by building the capacity of small island developing

States national focal points to integrate the Antigua and Barbuda Agenda for Small Island Developing States into national development plans. In addition, leveraging the Small Island Developing States Partnership Framework and engaging international financial institutions will be central to driving structural transformation and resilience-building. These efforts aim to deliver early, tangible results under the Antigua and Barbuda Agenda for Small Island Developing States that address the unique challenges and special needs of these States.

10.6 The Office will utilize its strategic position in dealing with the three groups of countries to respond, with enhanced complementarity and coherence, to new and emerging development issues of potential concern, in particular those of a regional or global nature. In this regard, and in response to an assessment of functions under subprogramme 1, the Office is proposing to establish a new subprogramme – subprogramme 4, advocacy, outreach and analysis – to centralize those functions under a dedicated subprogramme that directly supports the three groups of countries. This restructuring would enable a more coordinated implementation of the programmes of action, while improving the Office's capacity to produce analysis across regions and groups of countries, strengthen its research and data management capabilities and ensure more effective advocacy on shared development challenges. For example, it will mobilize support and contribute to building consensus, with an increased focus on policy recommendations to overcome the shared challenges of the most vulnerable countries, such as access to sustainable energy and broadband, on the basis of cross-cutting research carried out by the Office.

10.7 The new subprogramme will also strengthen connections in the follow-up and review arrangements of relevant United Nations conferences and processes, including the 2030 Agenda and the Fourth International Conference on Financing for Development, including by sharing lessons learned and best practices among the three groups of countries to enhance awareness of progress in implementing the three programmes of action. It will also mobilize resources to ensure that the least developed countries, landlocked developing countries and small island developing States have their voices heard in global deliberations. Resource mobilization efforts will also have an increased focus on joint initiatives, which can amplify impact among the three groups of countries. Furthermore, representatives of the most vulnerable countries will benefit from capacity-building activities, peer learning and the exchange of best practices, all on thematic areas relevant to the Sustainable Development Goals and to building resilience to future crises.

10.8 With regard to cooperation with other entities at the global and regional levels, the Office will convene the inter-agency consultative groups for the least developed countries, landlocked developing countries and small island developing States. These groups will enable United Nations entities, funds and programmes and other international organizations to exchange information on their work, strengthen coordination of their activities and mount joint inter-agency activities. At the national level, the Office will cooperate with the networks of national focal points that act as an interface between the global, regional and national processes. The national focal points will promote coherence and coordination on issues relevant to the three groups of countries and facilitate policy formulation, implementation, follow-up and review of their programmes of action, ensuring full alignment with the 2030 Agenda and other global frameworks.

10.9 With regard to inter-agency coordination and liaison, the Office will work closely with resident coordinators to promote the integration of the programmes of action into the United Nations strategic plans and the United Nations Sustainable Development Cooperation Frameworks and to act as an interface with Member States on the ground supporting the mainstreaming of the programmes of action into national strategies.

10.10 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The security and political situation in the least developed countries, landlocked developing countries and small island developing States and in their surrounding regions is conducive to the implementation of the three programmes of action;

(b) Continued international support measures in the areas of development finance, market access, technology and technical assistance are made available by development partners.

10.11 The Office will further explore the ways of cooperation, support and participation in the global efforts towards the implementation of the 2030 Agenda, with special attention given to the needs of those in vulnerable situations, women, young people, persons with disabilities and older persons.

10.12 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, the Office will implement its updated gender equality strategy for the period 2025–2029 with a view to further integrating gender equality and the empowerment of women into its work. In addition, as part of its monitoring and reporting work, the Office will include sex-disaggregated data and analysis across its reports for the three groups of countries.

10.13 In line with the United Nations Disability Inclusion Strategy, the Office will continue to mainstream the rights of persons with disabilities and disability inclusion into its programme of work through the implementation of its disability inclusion strategy and action plan. The Office will conduct training sessions to increase the capacity of staff at all levels on disability inclusion in all areas of the Office's work programme, including monitoring, reporting and advocacy activities, in accordance with its mandates.

Legislative mandates

10.14 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

56/227	Third United Nations Conference on the Least Developed Countries	79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	79/1	The Pact for the Future

Subprogramme 1
Least developed countries

General Assembly resolutions

65/280	Programme of Action for the Least Developed Countries for the Decade 2011–2020	76/258	Doha Programme of Action for the Least Developed Countries
70/294	Political Declaration of the Comprehensive High-level Midterm Review of the Implementation of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020	77/177; 78/233; 79/218	Follow-up to the Fifth United Nations Conference on the Least Developed Countries

Economic and Social Council resolutions

2023/29; 2024/18	Doha Programme of Action for the Least Developed Countries for the decade 2022–2031

Subprogramme 2
Landlocked developing countries

General Assembly resolutions

69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	73/243; 74/233; 75/228; 76/217; 77/246; 78/163	Follow-up to the second United Nations Conference on Landlocked Developing Countries

74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	79/233	Programme of Action for Landlocked Developing Countries for the Decade 2024–2034

Subprogramme 3
Small island developing States

General Assembly resolutions

69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	78/317	The Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity
73/228; 74/217; 75/215; 76/203; 77/245; 78/232; 79/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States		

Deliverables

10.15 Table 10.1 lists all cross-cutting deliverables of the programme.

Table 10.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**3**	**3**	**4**	**5**
Meetings of:				
1. The groups of least developed countries, landlocked developing countries and small island developing States	–	–	1	2
2. The Fifth Committee	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
4. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	**3**	**–**	**5**	**–**
5. Thematic reports of the Office on challenges facing the least developed countries, landlocked developing countries and small island developing States, including shared challenges such as vulnerabilities to external shocks, access to sustainable energy and access to broadband services	3	–	5	–

Evaluation activities

10.16 An evaluation conducted by the Office on the effectiveness of the support to the network of national focal points of the Least Developed Countries, completed in 2024, has guided the proposed programme plan for 2026.

10.17 In response to the results of the above-mentioned evaluation, subprogramme 1 will provide more systematic, tailored and sustainable support to strengthen the role of national focal points in coordinating the implementation of the Doha Programme of Action at the national level, including through a more structured collaboration with resident coordinators in the least developed countries in preparation for the comprehensive high-level midterm review of the Doha Programme of Action.

10.18 An evaluation to be conducted by the Office on strengthening the capacity of landlocked developing countries to estimate transport and trade costs is planned for 2026.

Programme of work

Subprogramme 1
Least developed countries

Objective

10.19 The objective, to which this subprogramme contributes, is to strengthen policies to eradicate poverty in the least developed countries and accelerate structural transformation of their economies; and to ensure effective graduation from the least developed country category.

Strategy

10.20 To contribute to the objective, the subprogramme will:

(a) Provide support to Member States in their intergovernmental processes relating to the priorities of the least developed countries, including by supporting the implementation of the Doha Programme of Action, including its deliverables, namely, an online university to support graduate and postgraduate university-level education in science, technology, engineering and mathematics, an investment support centre, a resilience-building mechanism, a Sustainable Graduation Support Facility and a system of food stockholding for the least developed countries on a regional and subregional basis, or alternative means, such as cash transfers, taking into account possible economic implications and risks;

(b) Prepare research and analytical materials relating to the six key focus areas of the Doha Programme of Action and facilitate knowledge exchange and peer learning on critical enablers to poverty eradication and structural transformation, including by mainstreaming a gender perspective;

(c) Promote resource mobilization, especially public and private financing, including innovative finance, for resilience-building, and monitor the road map for the accelerated implementation of the Doha Programme of Action, in partnership with the United Nations system, parliaments, civil society, the private sector, the media, academia and foundations in focus areas of the Doha Programme of Action, in preparation for the comprehensive high-level midterm review of the Doha Programme of Action;

(d) Lead the inter-agency task forces on: (i) least developed country graduation, including by organizing workshops and technical support on establishing consultative mechanisms with development partners and preparing smooth transition strategies, and by facilitating peer learning between graduated and graduating countries; and (ii) developing operational guidelines

for the United Nations system's support to least developed countries in conflict and post-conflict situations;

(e) Monitor sectoral policy developments of the intergovernmental processes of relevant international and regional organizations, including multilateral development banks;

(f) Build the capacity of national focal points to implement and monitor the Doha Programme of Action, through annual meetings and training programmes, to share experiences and best practices, including through the application of guidelines for mainstreaming and monitoring the implementation of the Doha Programme of Action, and with a more structured collaboration with resident coordinators, in preparation for the comprehensive high-level midterm review of the Doha Programme of Action;

(g) Partner with the Technology Bank for the Least Developed Countries to strengthen science, technology and innovation capacity, including in graduated and graduating countries.

10.21 The above-mentioned work is expected to result in:

(a) Least developed countries accelerating progress towards achieving the Sustainable Development Goals and achieving the focus areas of the Doha Programme of Action and other internationally agreed development goals;

(b) Graduating countries making a smooth transition out of the least developed country category;

(c) Stronger alignment of intergovernmental discussions with the priorities of least developed countries, reflecting a deeper understanding of their realities;

(d) Greater accountability of least developed countries, development partners, international organizations, civil society and the private sector in the implementation of the commitments of the Doha Programme of Action.

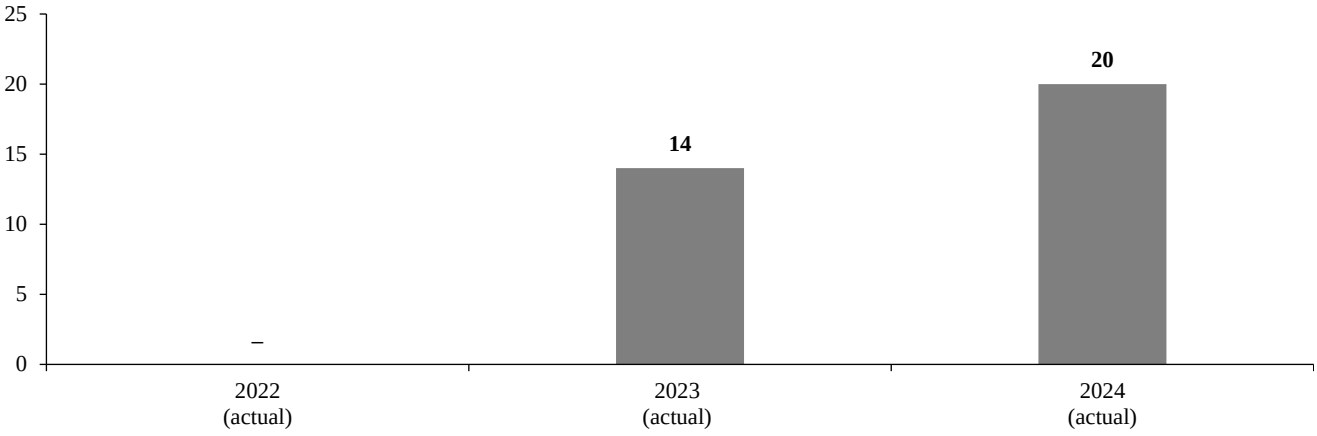
Programme performance in 2024

Doha Programme of Action integrated into national development plans of least developed countries

10.22 The subprogramme supports least developed countries with the integration of the Doha Programme of Action into national development strategies, ensuring alignment with country-specific goals and facilitating effective implementation of the Doha Programme of Action. To catalyse this process, the subprogramme developed comprehensive guidelines for the mainstreaming and monitoring of the Doha Programme of Action. These guidelines also serve as a resource for United Nations country teams, enabling targeted support. In 2024, the subprogramme organized a strategic training programme for national focal points in least developed countries, in partnership with resident coordinators. The three-day event provided in-depth orientation on the Doha Programme of Action mainstreaming and monitoring tools, facilitated knowledge exchange on best practices and identified critical capacity-building needs.

10.23 Progress towards the objective is presented in the performance measure below (see figure 10.I).

Figure 10.I
Number of least developed countries that have initiated or completed mainstreaming of the Doha Programme of Action into their national sustainable development plans (cumulative)



Planned results for 2026

Result 1: improved tertiary education options in least developed countries through an online university for science, technology, engineering and mathematics education

Programme performance in 2024 and target for 2026

10.24 The subprogramme's work contributed to advanced consultations on the establishment of an online university for science, technology, engineering and mathematics education for the least developed countries, which did not meet the planned target of Member States agreeing to a proposal to establish an online university dedicated to students from least developed countries. The target was not met due to additional consultations with relevant stakeholders taking place to facilitate the development of recommendations for the report of the Secretary-General.

10.25 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 10.2).

Table 10.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Member States agree to include in the Doha Programme of Action a target to undertake feasibility studies to explore the possibility of establishing an online university or other equivalent platforms for least developed countries	Consultations with Member States and relevant United Nations entities on the possible establishment of an online university	Advanced consultations with Member States and relevant United Nations entities on the possible establishment of an online university	An online university dedicated to students from least developed countries is operational	An online university dedicated to students from least developed countries is operational

Result 2: a new food stockholding mechanism to reduce food insecurity in least developed countries

Programme performance in 2024 and target for 2026

10.26 The subprogramme's work contributed to Member States input into the conceptualization of a food stockholding system for the least developed countries, which met the planned target.

10.27 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 10.3).

Table 10.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Doha Programme of Action for the least developed countries recognized the need to address severe food insecurities	Member States at the United Nations Food Systems Summit +2 Stocktaking Moment highlighted the urgency of establishing a food stockholding system for the least developed countries	Member States provided input to the conceptualization of a food stockholding system for the least developed countries	Agreement by Member States to establish a food stockholding system for the least developed countries	Initial phase of operation of a food stockholding system is operationalized

Result 3: strengthened resilience to external shocks in the least developed countries

Proposed programme plan for 2026

10.28 To address the various challenges facing the least developed countries, the subprogramme prepared a report on the status of multi-hazard early warning systems in least developed countries, which contained proposals toward strengthening resilience to external shocks.

Lessons learned and planned change

10.29 The lesson for the subprogramme, on the basis of the findings of the report, was the need to prioritize the strengthening risk governance, disaster risk knowledge, operational systems and infrastructure, and to enhance the capacity and coverage of early warning systems in least developed countries. In applying the lesson, the subprogramme will support those countries in preparing and implementing national adaptation plans and related projects, share knowledge and build capacity on the means to build financial resilience through insurance and other instruments.

10.30 Expected progress towards the objective is presented in the performance measure below (see table 10.4).

Table 10.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Member States consider policy recommendations in the report on the status of multi-hazard early warning systems in the least developed countries, which identified critical areas for engagement to support the least developed countries	Ten least developed countries build national and community response capabilities to increase multi-hazard resilience to external shocks	A further five least developed countries build national and community response capabilities to increase multi-hazard resilience to external shocks

Deliverables

10.31 Table 10.5 lists all deliverables of the subprogramme.

Table 10.5
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**3**	**3**	**2**	**1**
1. Reports to the General Assembly and the Economic and Social Council, including on the implementation of the Doha Programme of Action for the Least Developed Countries	3	3	2	1
2. Official documents of the Fifth United Nations Conference on the Least Developed Countries	–	–	–	–
Substantive services for meetings (number of three-hour meetings)	**46**	**31**	**46**	**48**
3. Meetings of the General Assembly	13	8	13	13
4. Meetings of the Economic and Social Council, including on the implementation of the Doha Programme of Action for the Least Developed Countries, and the high-level political forum on sustainable development	10	6	10	10
5. Regional review meetings on the Doha Programme of Action for the Least Developed Countries	2	–	–	2
6. Ministerial meetings of the least developed countries and related consultations	5	5	7	7
7. Meetings of ad hoc expert groups on the implementation of the Doha Programme of Action for the Least Developed Countries and related priority topics thereof	6	6	6	6
8. Meetings of the Group of Least Developed Countries	10	6	10	10
9. Meetings of the Fifth United Nations Conference on the Least Developed Countries	–	–	–	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	**17**	**14**	**17**	**18**
10. Workshops for national focal points of the least developed countries and round-table discussions on the implementation and monitoring of the Doha Programme of Action for the Least Developed Countries	10	8	10	10

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned
11. Seminars on partnerships for the least developed countries to strengthen the engagement of stakeholders	3	2	4	4
12. Workshops for government officials and other practitioners on the establishment of the main deliverables of the Doha Programme of Action for the Least Developed Countries	3	2	2	2
13. Least Developed Countries Future Forum to strengthen dialogue between researchers and policymakers	1	2	1	2
Publications (number of publications)	**2**	**1**	**2**	**1**
14. On the state of the least developed countries	1	–	1	1
15. On the implementation of the Doha Programme of Action for the Least Developed Countries and synergies with the Fourth International Conference on Financing for Development	1	1	1	–
Technical materials (number of materials)	**14**	**12**	**15**	**15**
16. On progress towards the graduation of the least developed countries	1	1	1	1
17. On the implementation of specific areas of the Doha Programme of Action for the Least Developed Countries, including preparation of the comprehensive high-level midterm review of the Doha Programme of Action	5	3	5	5
18. On issues relating to the least developed countries	8	8	8	8
19. Report on the implementation of the road map for accelerated implementation of the Doha Programme of Action for the Least Developed Countries, including its monitoring	–	–	1	1

C. Substantive deliverables

Consultation, advice and advocacy: substantive advice to the group of 44 least developed countries on the implementation of the Doha Programme of Action for the Least Developed Countries; briefing to Member States on the work of the Office and the Technology Bank for the Least Developed Countries; advice and substantive support to the work of the Broadband Commission; advocacy for improved international support measures catered to least developed countries; and consultation through the Inter-Agency Consultative Group for the Least Developed Countries to mobilize enhanced support for least development countries, including enhanced smooth transition measures for least developed countries and participation in high-level meetings.

Databases and substantive digital materials: Database for monitoring of the implementation of commitments of the Doha Programme of Action for the Least Developed Countries.

D. Communication deliverables

Outreach programmes, special events and information materials: promotional materials for the Doha Programme of Action for the Least Developed Countries and communications campaigns on upcoming graduations of the least developed countries, the fourth Least Developed Countries Future Forum and ministerial meetings.

External and media relations: press releases, press conferences and op-eds on issues relating to the least developed countries; information campaign (including videos, infographics and other social media material) on progress achieved in the Doha Programme of Action for the Least Developed Countries.

Digital platforms and multimedia content: webpages on the Doha Programme of Action for the Least Developed Countries to provide real-time information on progress of targets; and interactive graphics and visuals tailored for social media.

Subprogramme 2
Landlocked developing countries

Objective

10.32 The objective, to which this subprogramme contributes, is to strengthen policies and capacities to improve the connectivity of landlocked developing countries, with the aim of supporting their sustainable development, reduce their trade transaction costs, enhance their regional cooperation and increase their regional, subregional and global trade, and strengthen their institutions and social and environmental protection; and to increase structural transformation in landlocked developing countries for sustainable development.

Strategy

10.33 To contribute to the objective, the subprogramme will:

(a) Provide support to Member States in their intergovernmental processes relating to the priorities of landlocked developing countries, including by supporting the implementation of the new programme of action for landlocked developing countries;

(b) Undertake research and analytical assessments to assist landlocked developing countries in enacting policies conducive to their developmental priorities in line of those contained in the new programme of action for landlocked developing countries;

(c) Mobilize international support for the implementation of the new programme of action for landlocked developing countries and other relevant agendas;

(d) Coordinate, monitor and assess progress made in relation to the programme of action for landlocked developing countries, including through the inter-agency consultative group on landlocked developing countries;

(e) Build capacity of the national focal points of landlocked developing countries, in collaboration with the resident coordinators, to facilitate the mainstreaming of the programme of action for landlocked developing countries into their national development plans.

10.34 The above-mentioned work is expected to result in:

(a) Increased support towards landlocked developing countries from the international community to address the needs and challenges arising from their lack of direct access to the sea and transit constraints;

(b) Increased adoption and implementation by landlocked developing countries of initiatives to enhance transit, connectivity, trade facilitation and climate change adaptation and mitigation;

(c) Landlocked developing countries devising, formulating and implementing policies that promote economic diversification, integration into global and regional value chains, and structural economic transformation;

(d) Strengthened social protection for all groups of population in landlocked developing countries, including through access to decent jobs.

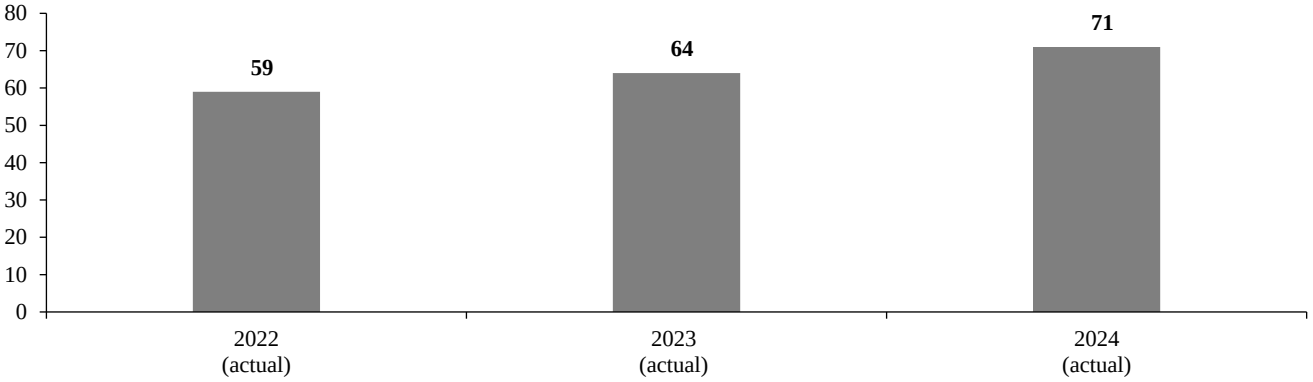
Programme performance in 2024

Increased implementation of the World Trade Organization Trade Facilitation Agreement by landlocked developing countries

10.35 Implementation of the World Trade Organization (WTO) Trade Facilitation Agreement can help reduce trade costs and enhance trade competitiveness. The subprogramme increased its advocacy in support of the implementation of trade facilitation measures. The subprogramme collaborated with WTO to organize events focusing on trade facilitation, including during the WTO Global Review of Aid for Trade, the WTO Committee on Trade and Development and the WTO Public Forum event. These efforts contributed to an increased number of trade facilitation measures implemented by landlocked developing countries in 2024.

10.36 Progress towards the objective is presented in the performance measure below (see figure 10.II).

Figure 10.II
Performance measure: rate of implementation of the World Trade Organization Trade Facilitation Agreement by landlocked developing countries
(Percentage)



Planned results for 2026

Result 1: accelerated progress towards sustainable development in landlocked developing countries

Programme performance in 2024 and target for 2026

10.37 The subprogramme's work contributed to preparations for the third United Nations Conference on the Landlocked Developing Countries and intergovernmental processes leading to the adoption of the programme of action for landlocked developing countries by the General Assembly in December 2024, which did not meet the planned target of at least two landlocked developing countries initiating action to mainstream the new programme of action. The target was not met due to the postponement of the third United Nations Conference on the Landlocked Developing Countries, which contributed to the delayed adoption of the programme of action.

10.38 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 10.6).

Table 10.6
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Landlocked developing countries were engaged to provide input into the preparations for the third United Nations Conference on Landlocked Developing Countries through meetings, events and reports	3 regional preparatory meetings held, which supported the identification of the priorities of landlocked developing countries as part of the preparations for the third United Nations Conference on the Landlocked Developing Countries	The General Assembly adopted the programme of action for landlocked developing countries	10 landlocked developing countries initiate action to mainstream the programme of action for landlocked developing countries	5 additional landlocked developing countries initiate action to mainstream the programme of action for landlocked developing countries

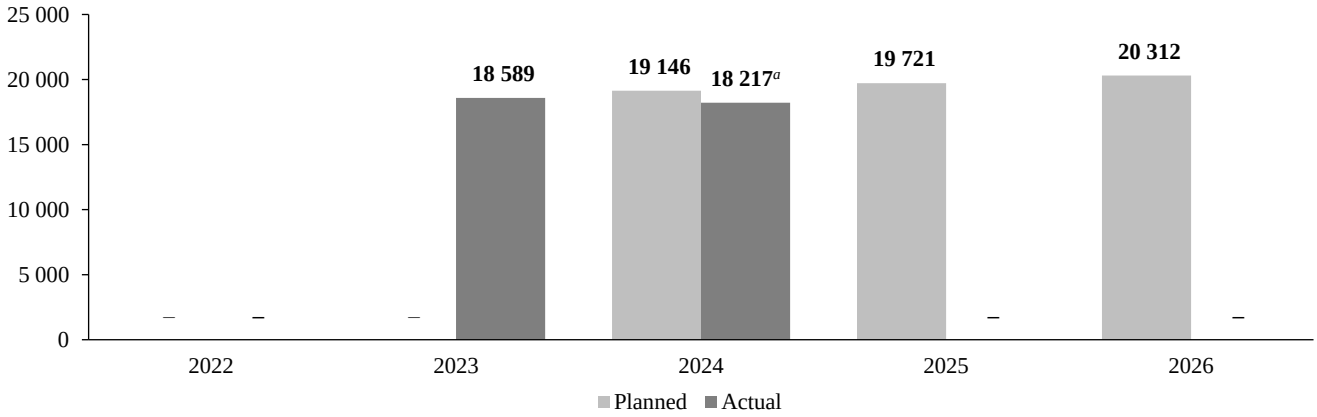
Result 2: strategic financing for development initiatives to enhance landlocked developing countries' economic resilience

Programme performance in 2024 and target for 2026

10.39 The subprogramme's work contributed to $18.217 million in foreign direct investment inflows, which did not meet the planned target of $19.146 million. The target was not met as foreign direct investment inflows were negatively affected by several interconnected challenges, including tightening financial conditions.

10.40 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 10.III).

Figure 10.III
Performance measure: foreign direct investment inflows to landlocked developing countries (annual)
(Millions of United States dollars)



[a] Based on the application of estimates for developing countries for 2024 from the Global Investment Trends Monitor No.48, January 2025.

Result 3: advancement of freedom of transit issues for landlocked developing countries

Proposed programme plan for 2026

10.41 Landlocked developing countries often experience increased trade costs and reduced economic competitiveness. The subprogramme has undertaken research and capacity-building activities aimed at promoting freedom of transit and strengthening regional collaboration, including advocating for smoother and more efficient cross-border movement of goods.

Lessons learned and planned change

10.42 The lesson for the subprogramme was that more targeted and inclusive consultations among key stakeholders would help ensure that policies and procedures are adapted to the specific needs of landlocked developing countries. In applying the lesson, the subprogramme will enhance stakeholder engagement, including Member States, regional organizations and international institutions, in the process of supporting the work of the high-level panel of experts.

10.43 Expected progress towards the objective is presented in the performance measure below (see table 10.7).

Table 10.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	Member States agree to establish a high-level panel of experts to examine the application of existing international laws and agreements, identify constraints and make recommendations on the freedom of transit for landlocked developing countries	A high-level panel of experts to examine the application of existing international laws and agreements, identify constraints and make recommendations on the freedom of transit for landlocked developing countries is established and meets twice in person	Member States consider the high-level panel of experts report and its recommendations with a view to developing a road map on issues of freedom of transit for landlocked developing countries

Deliverables

10.44 Table 10.8 lists all deliverables of the subprogramme.

Table 10.8
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

18. Panel discussion on best practices and solutions to specific needs of landlocked developing countries	1	–	1	1
19. Training events covering energy, information and communications technology, infrastructure, Sustainable Development Goal 14, climate change and desertification	2	–	2	2
20. Events in preparation for the third United Nations Conference on Landlocked Developing Countries on thematic areas, including transit, trade facilitation, corridor development, connectivity, global value chains, climate change, water, desertification and road safety	3	4	–	–
21. Workshops on mainstreaming the programme of action for landlocked developing countries for the decade 2024–2034 and developing the road map and monitoring framework	2	1	2	2
Technical materials (number of materials)	**5**	**2**	**4**	**3**
22. On monitoring the implementation of the programme of action for landlocked developing countries for the decade 2024–2034 and the 2030 Agenda	2	–	1	1
23. On thematic development issues in landlocked developing countries	2	2	2	1
24. Guide on mainstreaming the programme of action for landlocked developing countries	1	–	1	1

C. Substantive deliverables

Consultation, advice and advocacy: advice to the Group of Landlocked Developing Countries; briefings to 32 landlocked developing countries, 34 transit countries and 28 development partners on the work of the Office.

Databases and substantive digital materials: database of indicators for landlocked developing countries for the programme of action for landlocked developing countries.

D. Communication deliverables

Outreach programmes, special events and information materials: promotional materials, global outreach campaigns and events to raise awareness on priority issues, thematic agendas and events relevant to landlocked developing countries.

External and media relations: press releases, including op-eds and press conferences on development issues relating to landlocked developing countries.

Digital platforms and multimedia content: web pages relating to landlocked developing countries, including on the programme of action, and multimedia content, including interactive graphics and videos.

Subprogramme 3
Small island developing States

Objective

10.45 The objective, to which this subprogramme contributes, is to increase sustainable development and economic, social and environmental resilience in small island developing States.

Strategy

10.46 To contribute to the objective, the subprogramme will:

(a) Mobilize support for the special case of small island developing States in achieving sustainable development by engaging with development partners, international financial institutions and the private sector;

(b) Support resource mobilization efforts for small island developing States in priority areas, including through a targeted resource mobilization strategy and by developing tailored policy tools;

(c) Provide structured support through the Small Island Developing States Partnership Framework for the facilitation of collaborative partnerships, especially between small island developing States and the private sector;

(d) Strengthen coherence and coordination at the national, regional and global levels, including by providing more structured support to the small island developing States national focal points network and increasing coordination between United Nations entities supporting those States;

(e) Develop and strengthen the implementation frameworks for the Antigua and Barbuda Agenda for Small Island Developing States.

10.47 The above-mentioned work is expected to result in:

(a) Strengthened international support measures aimed at enabling small island developing States to implement the 2030 Agenda, the Antigua and Barbuda Agenda for Small Island Developing States, the Paris Agreement and other priorities of those States for sustainable development;

(b) Enhanced access to finance for small island developing States;

(c) Small island developing States formulating and implementing policies that promote sustainable development and make progress towards the achievement of internationally agreed development goals.

Programme performance in 2024

Strengthened assessment of multidimensional vulnerabilities for small island developing States

10.48 Small island developing States remain a special case for sustainable development and have continued challenges in achieving sustained high levels of economic growth, owing in part to their vulnerabilities to the ongoing negative impacts of environmental challenges and other external economic and financial shocks. To better assess the vulnerabilities of small island developing States, the subprogramme continued to support the process to advance a multidimensional vulnerability index, which culminated in the adoption of the index by the General Assembly. The subprogramme also supported advocacy efforts with international financial institutions, international organizations and multilateral development banks to consider using the multidimensional vulnerability index, as appropriate, as a complement to their existing practices and policies, in line with their respective mandates.

10.49 Progress towards the objective is presented in the performance measure below (see table 10.9).

Table 10.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
The General Assembly established the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States	A pilot of the multidimensional vulnerability index was undertaken by the Caribbean Development Bank in accordance with the final report and recommendations of the High-level Panel on the Development of a Multidimensional Vulnerability Index for Small Island Developing States	The General Assembly decided to advance the multidimensional vulnerability index and invited international financial institutions, international organizations and multilateral development banks to consider using the multidimensional vulnerability index, as appropriate, as a complement to their existing practices and policies, in line with their respective mandates

Planned results for 2026

Result 1: strengthened private sector partnerships to build resilience in small island developing States

Programme performance in 2024 and target for 2026

10.50 The subprogramme's work contributed to increased engagement of the private sector in small island development States through a strengthened small island development States Global Business Network, which met the planned target.

10.51 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 10.10).

Table 10.10
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Strengthened private sector engagement at the Small Island Developing States Global Business Network forum, held in April 2022, with increased private sector participation, including the creation of a partnership to connect supply and demand of fish and prevent overfishing and waste through big data, thereby contributing towards the achievement of Sustainable Development Goal 14	5 partnerships between small island developing States and the private sector developed in priority areas in preparation for launch at the Small Island Developing States Global Business Network forum to be held in 2024	Increased engagement of the private sector in small island development States through a strengthened small island development States Global Business Network	10 partnerships between small island developing States and the private sector developed in priority areas agreed in the context of the Antigua and Barbuda Agenda for Small Island Developing States	12 additional partnerships between small island developing States and the private sector developed in priority areas of the Antigua and Barbuda Agenda for Small Island Developing States

Result 2: data-driven decisions to address structural vulnerabilities and resilience of small island developing States

Programme performance in 2024 and target for 2026

10.52 The subprogramme's work contributed to the establishment of the small island developing States centre of excellence, which met the planned target.

10.53 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 10.11).

Table 10.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Government of Antigua and Barbuda decides to establish a centre of excellence that will include the small island developing States global data hub	The fourth International Conference on Small Island Developing States launched the centre of excellence	The small island developing States global data hub provides analytics and data that Member States may use to inform decision-making processes related to sustainable development and climate change, among others, on the basis of their development priorities	The small island developing States global data hub contributes to the improved availability, accessibility and utilization of data, including geospatial information, and knowledge resources to inform decision-making processes

Result 3: small island developing States use the monitoring and reporting framework for the Antigua and Barbuda Agenda for Small Island Developing States to inform national planning strategies

Proposed programme plan for 2026

10.54 To help develop national capacities for systematic monitoring and evaluation of the Antigua and Barbuda Agenda for Small Island Developing States, the subprogramme conducted consultations and analysis with a range of relevant stakeholders, development partners and financing institutions, and proposed the development of a toolkit.

Lessons learned and planned change

10.55 The lesson for the subprogramme was that practical support to small island developing States was particularly useful to help countries develop national monitoring and evaluation capacities. In applying the lesson, the subprogramme will provide practical support to small island developing States and development partners to advance the use of the implementation toolkit, with a focus on facilitating the monitoring of the implementation of the Antigua and Barbuda Agenda for Small Island Developing States, and to inform the design and implementation of targeted and effective sustainable development policies.

10.56 Expected progress towards the objective is presented in the performance measure below (see table 10.12).

Table 10.12
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	–	The General Assembly adopted the Antigua and Barbuda Agenda for Small Island Developing States	Small island developing States agree on a monitoring and reporting framework for the Antigua and Barbuda Agenda for Small Island Developing States	Small island developing States use the agreed monitoring and evaluation framework to inform national planning strategies

Deliverables

10.57 Table 10.13 lists all deliverables of the subprogramme.

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**14**	**11**	**15**	**14**
1. Meetings of the Second Committee of the General Assembly	6	5	3	3
2. Meetings and consultations of the high-level political forum on sustainable development of the Economic and Social Council	2	2	3	3
3. Review meetings on the implementation of the Antigua and Barbuda Agenda for Small Island Developing States	–	–	–	2
4. Meetings of the group of small island developing States	3	3	6	3
5. Expert group meetings on mainstreaming the small island developing States programme of action and issues relating to small island developing States in the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	3	1	3	3
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**1**	**–**	**1**	**1**
6. On strengthening the capacity of small island developing States to attract climate finance from the private sector	1	–	1	1
Seminars, workshops and training events (number of days)	**16**	**17**	**16**	**16**
7. Seminars on the support from development partners to small island developing States for the achievement of the Sustainable Development Goals and implementation of the small island developing States programme of action	2	1	2	2
8. Seminars in support of the Alliance of Small Island States relating to the implementation of the small island developing States programme of action and the 2030 Agenda	4	3	4	4
9. Seminars with national focal points on the coordination of efforts to achieve and monitor the implementation of the small island developing States programme of action and the 2030 Agenda	3	2	2	2

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
10. Seminars on strengthening collaboration through joint efforts and activities in the United Nations system and other international organizations, including regional intergovernmental organizations of which the small island developing States are members	3	7	3	3
11. Seminars on private sector involvement in supporting implementation of the small island developing States programme of action	2	2	4	3
12. Seminars on the access of small island developing States to climate change-related finance for development goals	2	2	1	2
Publications (number of publications)	**1**	**1**	**1**	**1**
13. On mainstreaming the small island developing States programme of action and issues relating to small island developing States into the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	1	1	1	1
Technical materials (number of materials)	**10**	**4**	**10**	**10**
14. On implementing the Samoa Pathway	2	2	2	2
15. On international support provided to small island developing States for the achievement of the Sustainable Development Goals and implementation of the small island developing States programme of action	2	–	2	2
16. On matters relating to the financing, implementation and monitoring of the small island developing States programme of action and the 2030 Agenda	2	1	2	2
17. On issues relevant to the implementation of the 2030 Agenda in small island developing States	2	1	2	2
18. On mainstreaming the small island developing States programme of action and issues relating to small island developing States into the work of the United Nations system and enhancing the coherence of issues relating to small island developing States in United Nations processes	2	–	2	2

C. Substantive deliverables

Consultation, advice and advocacy: briefings to 38 Member States on the work of the Office; and advocacy in appropriate forums for the special case of small island developing States in achieving sustainable development.

D. Communication deliverables

Outreach programmes, special events and information materials: substantive events to provide support to 38 small island developing States; and campaigns on matters relating to small island developing States and sustainable development.

External and media relations: press releases and press appearances on issues relating to small island developing States, including relevant United Nations processes and activities.

Digital platforms and multimedia content: web pages, including updates on the small island developing States programme of action.

Subprogramme 4
Advocacy, outreach and analysis

Objective

10.58 The objective, to which this subprogramme contributes, is to advance the sustainable development priorities and the shared challenges of the least developed countries, landlocked developing countries and small island developing States.

Strategy

10.59 To contribute to the objective, the subprogramme will:

(a) Generate data analysis and insights and publish analytical research for the least developed countries, landlocked developing countries and small island developing States, including cross-cutting flagship reports, analytical briefs and trend analysis, on topics that align with and support the advancement of three programmes of action and global development agendas;

(b) Provide, in preparing for intergovernmental processes, substantive support on the regional and country specificities of research and trend analysis for ongoing and emerging issues affecting the three groups of countries;

(c) Build research partnerships and networks, particularly in emerging areas and for enhanced data collection and analysis among and within the three groups of countries;

(d) Develop outreach campaigns using, data-driven storytelling and multimedia products, on the specific challenges and opportunities of the three groups of countries and the priorities of the three programmes of action;

(e) Advocate for sustained and adequate international support for the three programmes of action and the integration of these priorities into global agendas by organizing high-level events, convening multi-stakeholder dialogues and engaging in targeted advocacy with decision-makers in intergovernmental forums.

10.60 The above-mentioned work is expected to result in:

(a) Strengthened implementation of evidence-based policies and decision-making by the least developed countries, landlocked developing countries and small island developing States;

(b) Increased understanding and engagement of target audiences, particularly decision-makers, in support of and for the advancement of the priorities of the three programmes of action.

Planned result for 2026

10.61 The planned result for 2026 is a new result.

Strengthened integration of the three programmes of action into relevant intergovernmental processes

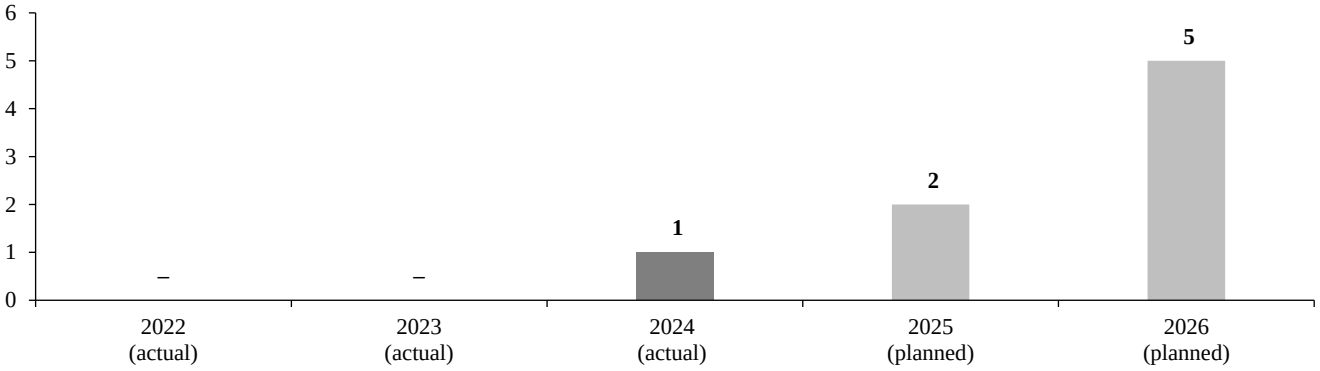
10.62 The Office amplifies the voices of the most vulnerable countries through targeted advocacy, by raising global awareness and by driving action on their unique challenges and priorities.

Lessons learned and planned change

10.63 The lesson for the Office was that there were further opportunities to support countries in integrating the three programmes of action into other intergovernmental processes, including monitoring progress on globally agreed goals and targets. In applying the lesson, the subprogramme will increase its advocacy efforts to promote the use of research and analytical tools that can support policymakers in evidence-based decision-making. For example, the subprogramme will advocate with national focal points to showcase best practices from the implementation of the programmes of action, in preparation for countries' participation in the voluntary national review process. The subprogramme will also facilitate speaking engagements and support side-events to promote the integration of the programmes of action into the voluntary national review process during intergovernmental meetings, such as the high-level political forum.

10.64 Expected progress towards the objective is presented in the performance measure below (see figure 10.IV).

Figure 10.IV
Performance measure: number of least developed countries, landlocked developing countries and small island developing States integrating their programmes of action into the voluntary national reviews (cumulative)



Deliverables

10.65 Table 10.14 lists all deliverables of the subprogramme.

Table 10.14
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**–**	**–**	**–**	**2**
1. Meetings of the groups of least developed countries, landlocked developing countries and small island developing States	–	–	–	2
B. Generation and transfer of knowledge				
Publications (number of publications)	**–**	**–**	**–**	**3**
2. Thematic reports on the challenges facing the least developed countries, landlocked developing countries and small island developing States, including shared challenges such as vulnerabilities to external shocks, debt sustainability, access to sustainable energy and access to broadband services	–	–	–	3
Technical materials (number of materials)	**–**	**–**	**–**	**2**
3. Policy briefs for each country group to provide timely, concise and data-driven insights on topics related to the priorities of the three programmes of action	–	–	–	2
C. Substantive deliverables				
Databases and substantive digital materials: databases and interactive digital materials on relevant statistics, including on monitoring the implementation of the three programmes of action with related analytics and modelling results.				
D. Communication deliverables				
Outreach programmes, special events and information materials: communications materials to support global outreach campaigns for the three programmes of action and shared challenges and opportunities for the three groups of countries.				
External and media relations: press releases, media briefings and targeted interviews with select media to highlight key milestones, events and progress on United Nations initiatives addressing structural challenges in countries in special situations.				
Digital platforms and multimedia content: the Office's website, updated to reflect thematic priorities, events and research findings, while tracking and reporting progress on the three programmes of action.				

B. Proposed post and non-post resource requirements for 2026

Overview

10.66 Pursuant to paragraph 20 of General Assembly resolution 77/262, the Office carried out a spending review as part of the preparation of its proposed programme budget for 2026. Under the strategic guidance of the High Representative and with the engagement of all programme managers, a review was carried out for the executive direction and management component and for each of the Office's subprogrammes. The review included a comprehensive analysis of historical trends in the distribution and expenditure of non-post resources and the Office's post complement and functional profiles, with a view to identifying efficiencies and resource realignments to support the optimal implementation of the Office's mandate and the achievement of results, as set forth in the proposed programme plan for 2026.

10.67 As a result of an analysis of prior expenditure of non-post resources, current performance and projected future requirements against the Office's mandated activities, a redistribution of resources across various objects of expenditure under the executive direction and management component is proposed for 2026, as follows:

(a) Under executive direction and management, a cost-neutral net internal redeployment of $16,100 ($9,400 from contractual services, $2,500 from general operating expenses and $4,200 from supplies and materials) to furniture and equipment is proposed, to address increased costs associated with replacing office information technology equipment that is no longer under warranty. This adjustment is aimed at ensuring business continuity in support of Member States. The review also identified efficiency gains through reduced mobile phone usage, the cancellation of Cisco phone subscriptions and the consolidation of voice services using Microsoft Teams for the front office of the Under-Secretary-General. Additional savings relating to the reduced cost of centrally provided information technology support under the service-level agreement with the Office of Information and Communications Technology were identified;

(b) Within general operating expenses, a further reallocation of $21,000 is proposed, moving funds from communications and miscellaneous services to the provision for meeting and technical services provided by the Broadcast and Conference Support Section. This adjustment responds to the increase in the cost of services in recent years and is necessary to support the effective organization of expert group meetings, panel discussions and special events at Headquarters and other locations for the benefit of the least developed countries, landlocked developing countries and small island developing States.

10.68 With regard to other non-post resources under executive direction and management and the Office's subprogrammes, consumption patterns over the past five years were reviewed against the budgets for travel of staff, travel of representatives and consultants. While the analysis resulted in negligible changes to the distribution of resources, all subprogramme managers placed renewed emphasis on the importance of supporting the participation of the least developed countries, landlocked developing countries and small island developing States in face-to-face meetings relevant to the implementation of their programmes of action. In view of the level of non-post resources, compared with the broad scope of the programmes of action, the subprogramme managers reiterated that they regularly sought to collaborate, plan and align events across all subprogrammes, as well as with United Nations and other partner entities. Programme managers routinely pursue measures aimed at increasing efficiencies, such as organizing inter-agency consultative group meetings through Microsoft Teams and other virtual platforms, arranging back-to-back meetings, organizing meetings on cross-cutting issues for all three groups and using recorded messages of the High Representative, whenever appropriate or feasible, to make the most efficient use of resources by reducing travel costs and duration, while seeking to maximize participation.

10.69 In response to the recommendation of the Advisory Committee on Administrative and Budgetary Questions set out in paragraph IV.41 of its first report on the proposed programme budget for 2025 (A/79/7) and endorsed by the General Assembly in its resolution 79/257, the Office carried out an

independent review of its structure, in which the Office's approved organization chart for 2025 was assessed against its actual operations, and a recommendation was made with respect to the best option for revising the organization chart to align resources with the Office's mandates in the most effective way. The main issue with the Office's current structure identified during the review is one of imbalance. Subprogramme 1 (Least developed countries) has a total of 17 posts (14 Professional and 3 General Service). Two cross-cutting functional areas (the Policy Development and Coordination, Monitoring and Reporting Service and the Advocacy and Outreach Unit) are also located within subprogramme 1; the total number of posts of those areas comprise 1 Chief of Service (D-1), 4 Professional staff and 1 General Service (Other level) staff. Subprogramme 1 therefore comprises a total of 23 posts, which is more than half of all the Office's posts (53.5 per cent). Drawing on standard evaluation criteria to understand and analyse an intervention (relevance, coherence, effectiveness, efficiency, impact and sustainability), the independent review offered an informed assessment of the pros and cons of two alternative strategies: maintaining the status quo or restructuring the Office's organization chart, which had remained unchanged since the Office was established. The independent review underscored the importance of a comprehensive, well-resourced and highly competent subprogramme 1. Nevertheless, maintaining the status quo would bring into question the adequacy of resourcing and input for subprogramme 2 (Landlocked developing countries), subprogramme 3 (Small island developing States) and the core functions of advocacy, outreach, research and analysis performed by the Office, which cover all three groups.

10.70 The core recommendation of the independent review is to establish a fourth subprogramme, focused on advocacy, outreach and analysis, alongside the existing three subprogrammes, which would improve the coherence of the structure of the Office. The new Advocacy, Outreach and Analysis Section has been conceived as a horizontal, cross-cutting service entity that would deliver cross-cutting and distinct advocacy and analytical outputs, services and deliverables to the Office of the High Representative and to each of the other three subprogrammes. This proposal would entail the redeployment of five posts delivering cross-cutting services, as described in annex II. The independent review also recommended the redeployment of the Chief of Service (D-1) and one General Service (Other level) post from the Policy Development and Coordination, Monitoring and Reporting Service, which is also within subprogramme 1, to executive direction and management, given that the Chief is traditionally responsible for overseeing the work of all subprogrammes, not just that of subprogramme 1. As a result of the proposed changes, the Service would cease to exist, and the functions of the Advocacy and Outreach Unit would be redeployed to subprogramme 4. These redeployments would be enabled by the redistribution of functions within subprogramme 1 and from that subprogramme to the new subprogramme 4 and the absorption of cross-cutting functions by the new subprogramme. Moving the cross-cutting functions of advocacy and communication and the capacities in data analysis and research to a dedicated section under subprogramme 4 would increase effectiveness and synergies between workstreams and optimize the use of existing capacities to support the three groups of countries, individually and collectively, through a more seamless operational modality in which the Office's strategic position is better utilized to address the shared challenges and key development issues facing the three groups of countries and the increased demand for the Office's support to monitor the three programmes of action.

10.71 The subprogramme managers reviewed detailed staffing tables and the reporting lines of all staff, along with justifications for the continuing need for each post, in line with the approved programme of work. The workforce review was enriched with information on the current composition of each subprogramme across a number of dimensions, including the distribution of staff by grade, the projected retirements by level and by year through 2060, and the current vacancy rates by count and by level, in order to comprehensively review the changing nature of the workforce and identify any current or future opportunities to optimize or enhance organizational structures. While changes to the grades of existing posts were not recommended as a result of the spending review, subprogramme managers reiterated that a desirable outcome would be to move posts responsible for cross-cutting functions out of subprogramme 1. The review also involved an analysis of opportunities to strengthen future skill requirements, including in such areas as data analytics and management, strategic communications and strategic foresight, so that such requirements are fully considered and reflected,

where appropriate, in the underlying job descriptions. The results of the spending review will enable the Office to deliver mandates more effectively in the future by strengthening workforce capabilities in the aforementioned areas and rejuvenating the workforce through the use of retirement projections.

10.72 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 10.15 to 10.17.

10.73 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 10.18 to 10.20 and figure 10.V.

10.74 As reflected in tables 10.18 (1) and 10.19 (1), the overall resources proposed for 2026 amount to $10,894,600, reflecting a net decrease of $290,200 (or 2.6 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

10.75 As shown in table 10.18 (1), resource changes reflect a net decrease of $592,800, as follows:

(a) **Executive direction and management** (net increase of $77,200). The increase of $84,400 under posts relates to the higher provision at continuing vacancy rates for the Programme Management Officer (P-3) established in 2025 pursuant to General Assembly resolution 79/257, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts. It is offset in part by the decrease of $7,200 under non-post resources relating to the removal of the non-recurrent provision associated with the furniture and equipment for the post that were approved for 2025;

(b) **Subprogramme 1, Least developed countries** (increase of $98,700). The increase of $98,700 under posts relates to the higher provision at continuing vacancy rates for the Programme Management Officer (P-4) established in 2025 pursuant to General Assembly resolution 79/257, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts;

(c) **Subprogramme 2, Landlocked developing countries** (decrease of $518,700). The decrease of $518,700 under non-post resources relates to the removal of non-recurrent provisions for general temporary assistance ($205,800), consultants ($114,700) and experts ($198,200) that were approved for 2025 pursuant to General Assembly resolution 79/233;

(d) **Subprogramme 3, Small island developing States** (decrease of $250,000). The decrease of $250,000 under non-post resources relates to the removal of non-recurrent provisions for general temporary assistance ($189,400) and consultants ($60,600) that were approved for 2025 pursuant to General Assembly resolutions 78/317 and 78/322.

New and expanded mandates

10.76 As shown in table 10.18 (1), resource changes reflect an increase of $302,600 under subprogramme 2, Landlocked developing countries, relating to additional requirements under general temporary assistance ($266,480) for a Senior Economic Affairs Officer (P-5) and under contractual services ($36,100), pursuant to General Assembly resolution 79/233.

Other changes

10.77 As shown in table 10.18 (1), resource changes reflect cost-neutral redeployments, as follows:

(a) **Executive direction and management** (net increase of $184,700):

(i) The increase of $345,700 under posts relates to the cost-neutral inward redeployment of the Chief of Service (D-1) and one Staff Assistant (General Service (Other level)) from subprogramme 1, as explained in paragraphs 10.68 and 10.69 above and as detailed in annex II;

(ii) The decrease of $161,000 under posts relates to the outward redeployment of one Associate Data Analyst (P-2) to subprogramme 4 as explained in paragraphs 10.68 and 10.69 above and as detailed in annex II;

(iii) In addition, the resources reflect the cost-neutral redeployment of resources detailed in paragraph 10.66 (a) above;

(b) **Subprogramme 1, Least developed countries** (decrease of $1,385,600):

(i) The decrease of $1,271,500 under posts relates to the outward redeployment of one Senior Economic Affairs Officer (P-5), two Public Information Officers (P-4 and P-3) and one Statistician (P-3) to subprogramme 4, and of the Chief of Service (D-1) and one Staff Assistant (General Service (Other level)) to executive direction and management, as explained in paragraphs 10.68 and 10.69 above and as detailed in annex II;

(ii) The decrease of $114,100 under non-post resources relates to the outward redeployment of provisions under travel of staff ($36,900) and contractual services ($77,200) associated with the redeployment of the functions of the Advocacy and Outreach Unit to subprogramme 4;

(c) **Subprogramme 4, Advocacy outreach and analysis** (increase of $1,200,900):

(i) The increase of $1,086,800 under posts relates to the cost-neutral inward redeployment of the post from executive direction and management and the four posts from subprogramme 1, as indicated above and as detailed in annex II;

(ii) The increase of $114,100 under non-post resources relates to the inward redeployment of provisions under travel of staff ($36,900) and contractual services ($77,200) associated with the inward redeployment of the functions of the Advocacy and Outreach Unit indicated above from subprogramme 1.

Extrabudgetary resources

10.78 As reflected in tables 10.18 (2) and 10.19 (2), extrabudgetary resources are estimated at $3,239,100. The resources would complement regular budget resources and would be used mainly to provide for three posts (1 P-5, 1 P-4 and 1 General Service (Other level)) for carrying out activities relating to follow-up to the Fifth United Nations Conference on the Least Developed Countries, the third United Nations Conference on Landlocked Developing Countries and the fourth International Conference on Small Island Developing States. The anticipated decrease of $1,995,400 in 2026 relates to the removal of non-recurrent resources raised in 2025 to support Member States' participation at the third United Nations Conference on Landlocked Developing Countries, to be held in August 2025.

10.79 The extrabudgetary resources under the present section are subject to the oversight of the Under-Secretary-General and High Representative, who has delegated authority from the Secretary-General.

Executive direction and management

10.80 The Under-Secretary-General and High Representative is responsible for the overall leadership and direction of the Office in the implementation of its mandates and approved programme of work under section 10. The High Representative engages in high-level consultations with Member States, organizations of the United Nations system, multilateral and regional financial institutions, the private sector, and civil society groups and academia and supports the Economic and Social Council and the General Assembly in their reviews and assessments of progress achieved in the implementation of the programmes of action for the three groups of countries and the 2030 Agenda, as it relates to these countries.

10.81 The Office advises the Under-Secretary-General and High Representative on issues of policy and management; acts as a focal point for information on all aspects of the work of the Office and ensures that such information is disseminated internally and projected externally, as appropriate; and consults, negotiates and coordinates with other departments, offices, funds and programmes, as well as with non-United Nations entities, on matters of common concern. The Office is headed by a Director (D-2), who deputizes for and is accountable to the Under-Secretary-General and High Representative.

10.82 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. As the secretariat for the third United Nations Conference on Landlocked Developing Countries, to be held in August 2025, the Office will use the Secretariat Sustainable Events Checklist as a guiding framework to ensure that the conference meets high environmental sustainability standards. Insights and best practices drawn from major recent events, including the Fifth United Nations Conference on the Least Developed Countries and the fourth International Conference on Small Island Developing States, will further inform and enhance the environmental sustainability strategies for the third United Nations Conference on Landlocked Developing Countries. The Office remains committed to monitoring its carbon dioxide emissions associated with air travel. Such monitoring enables informed decision-making and the benchmarking of the Office's air travel emissions as a proportion of total carbon dioxide emissions reported by United Nations entities, facilitating continuous improvement in emissions management.

10.83 Information on the timely submission of documentation and advance booking for air travel is reflected in table 10.21. Significant progress was made with respect to compliance with advance booking for air travel. The Office will continue to make efforts to improve its timely submission of documentation.

Table 10.21
Compliance rate
(Percentage)

Timely submission of documentation	86	43	25	100	100
Air tickets purchased at least two weeks before the commencement of travel	46	47	91	100	100

10.84 The proposed regular budget resources for 2026 amount to $2,410,900 and reflect an increase of $261,900 compared with the approved budget for 2025. The proposed changes are explained in paragraphs 10.74 (a) and 10.76 (a) above. Additional details on the distribution of the proposed resources for 2026 are reflected in table 10.22 and figure 10.VI.

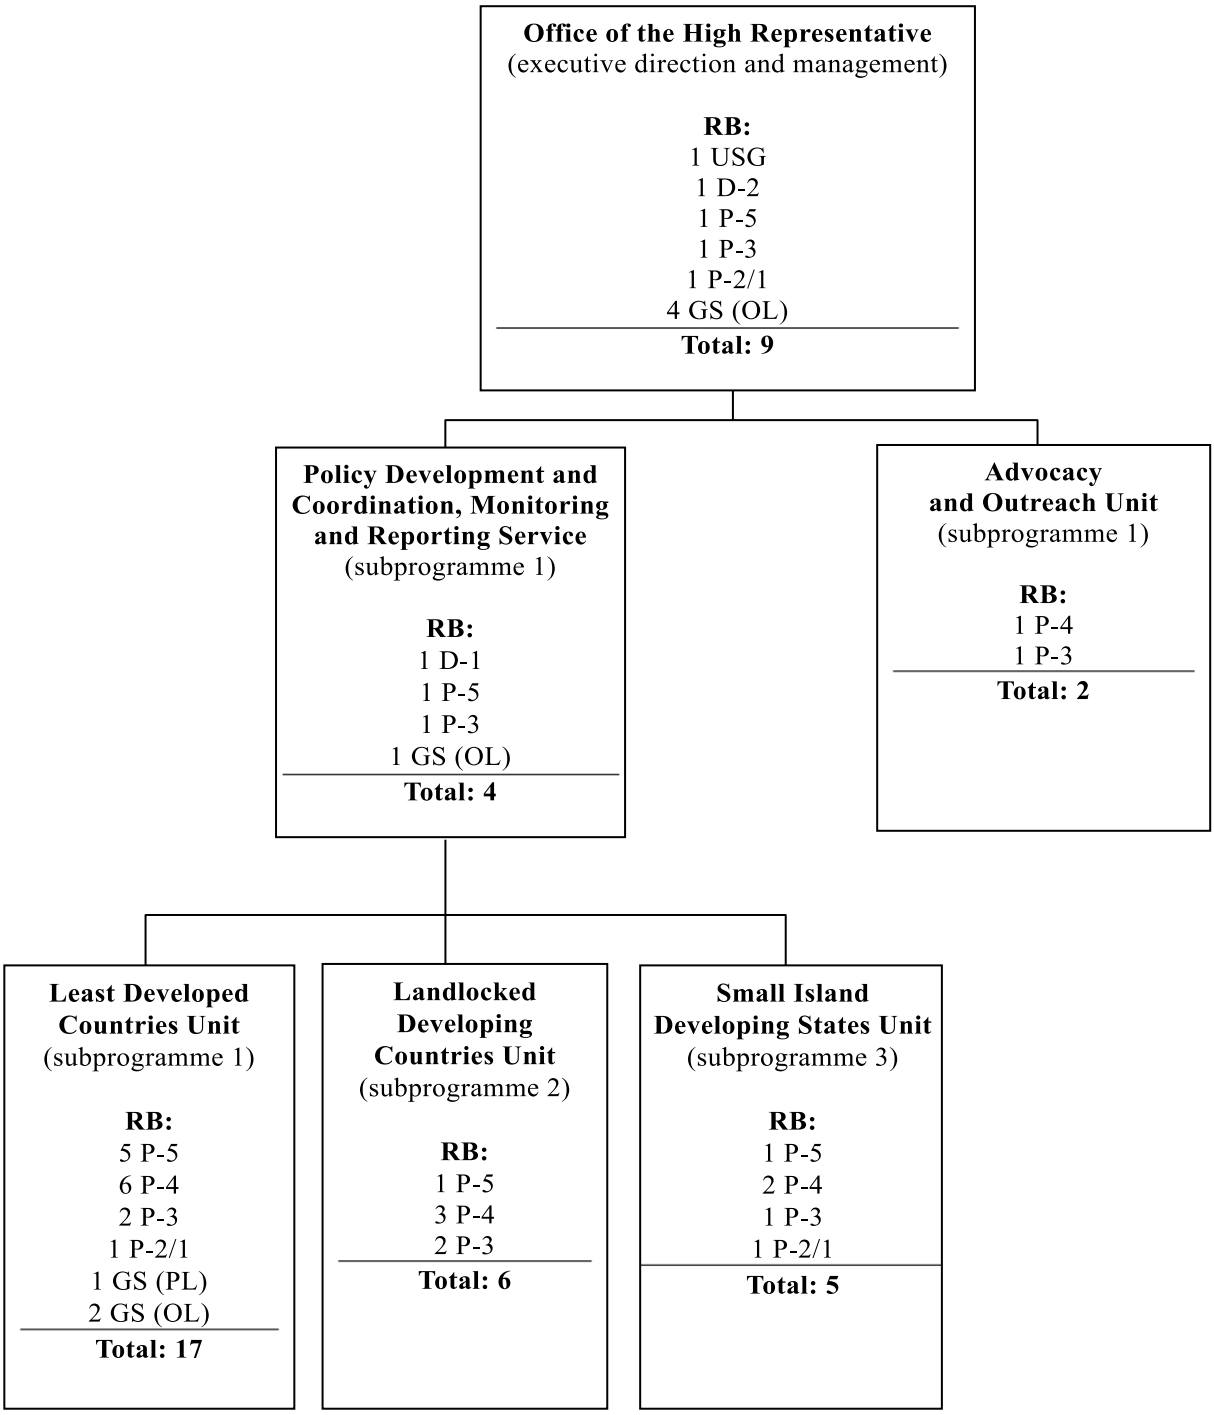
Annex I

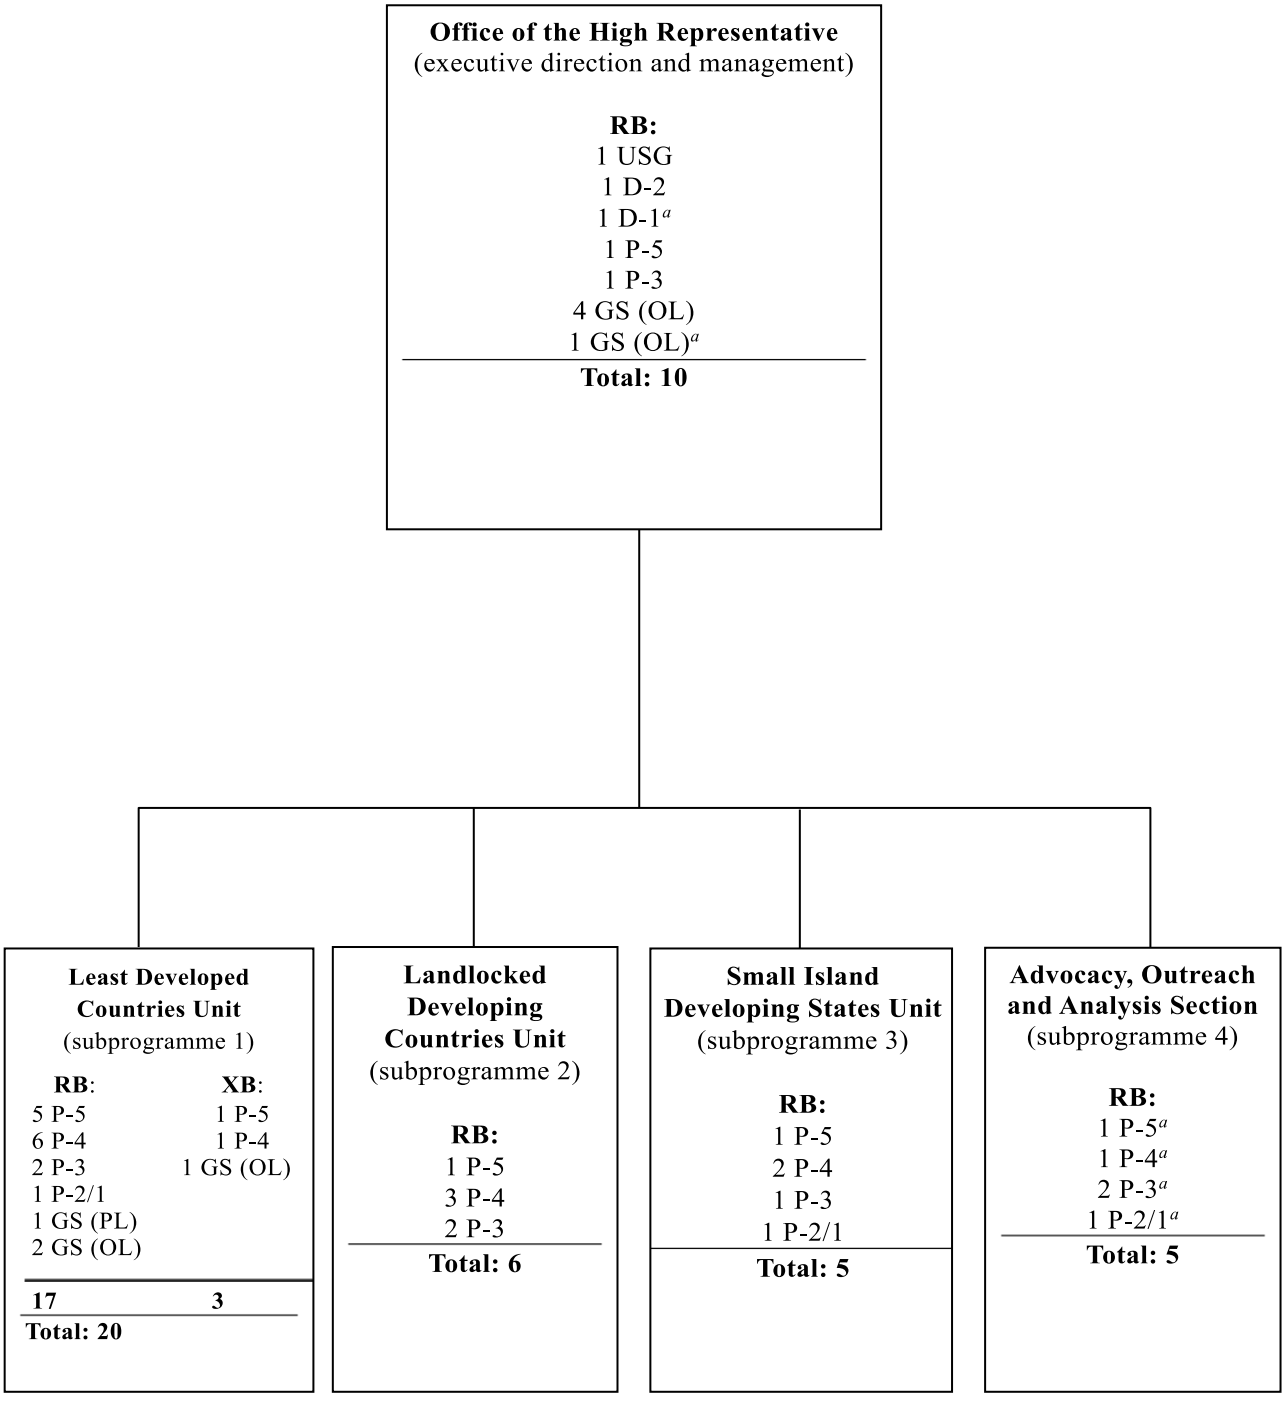
Organizational structure and post distribution for 2026

Two charts showing the organizational structure of the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States are presented below. Chart A presents the approved organizational structure and post distribution for 2025, while chart B presents the proposed organizational structure and post distribution for 2026. The proposed changes are explained in paragraphs 10.68 and 10.69 above.

A. Approved organizational structure and post distribution for 2025



B. Proposed organizational structure and post distribution for 2026



Abbreviations: GS (OL), General Service (Other level); GS (PL), General Service (Principal level); RB, regular budget; XB, extrabudgetary; USG, Under-Secretary-General.

[a] Redeployment.

Annex II

Summary of proposed post changes, by component and subprogramme

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Executive direction and management	(1)	P-2	**Redeployment** of 1 Associate Data Analyst (P-2)	The proposed redeployments relate to the recommendations of the independent review of the Office's organizational structure as explained in paragraphs 10.68 to 10.69 above. It is proposed that five posts delivering cross-cutting services be redeployed to the new subprogramme 4: one Senior Economic Affairs Officer (P-5) and one Statistician (P-3) from the Policy Development and Coordination, Monitoring and Reporting Service (subprogramme 1); two Public Information Officers (P-4 and P-3) from the Advocacy and Outreach Unit (subprogramme 1); and one Associate Data Analyst (P-2) (executive direction and management). In addition, the independent review recommended the redeployment of the Chief of Service (D-1) and one General Service (Other level) staff from the Policy Development and Coordination, Monitoring and Reporting Service (subprogramme 1) to the Office of the High Representative (executive direction and management), given that the Chief is traditionally responsible for overseeing the work of all subprogrammes, not just that of subprogramme 1.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

11.1 The Office of the Special Adviser on Africa supports the Secretary-General in ensuring a coherent and integrated approach to United Nations support for Africa; promoting greater coherence in the work of the United Nations system and the African Union in support of Agenda 2063; following up on the implementation of all relevant global summit and conference outcomes of the United Nations relating to Africa; coordinating and guiding the preparation of Africa-related reports and input; initiating reports on critical issues affecting Africa; monitoring the implementation of Sustainable Development Goal commitments made towards Africa's development; and coordinating global advocacy in support of the African Union's Agenda 2063: The Africa We Want. The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States, fostering intraregional integration and promoting international cooperation for the development of Africa. ECA is mandated to operate at the regional and subregional levels to harness United Nations assets and bring them to bear on Africa's priorities. ECA places a special focus on collecting up-to-date and original regional statistics in order to ground its policy research and advocacy in clear objective evidence; promoting policy consensus; and providing capacity development and advisory services. The Department of Global Communications raises international awareness of the economic, political and social situation in Africa, as well as the efforts made by Africa, the United Nations and the international community to promote the economic recovery and sustainable development of the region in pursuit of the goals of the New Partnership for Africa's Development (NEPAD) and the achievement of the Goals. The mandates of the Office, ECA and the Department derive from the priorities established in relevant resolutions and decisions, including General Assembly resolutions 32/197, 57/7, 57/300, 61/296, 66/293 and 76/236 and Economic and Social Council resolutions 671 (XXV) A and 1998/46.

Strategy and external factors for 2026

11.2 In 2024, over 40 per cent of African countries allocated more funds to debt service than to health expenditure (A/79/295), a stark reflection of how debt obligations are undermining the continent's development goals. The programme's strategy for 2026 will focus on promoting initiatives to enhance resilience at all levels through investment in strong country systems and the development of capacities that enable African States to effectively prevent and mitigate the impact of external shocks, address the root causes of debt unsustainability and shift the global financing for development paradigm. To this end, the programme will continue to engage with partners and stakeholders to advance its new narrative on Africa – one that reflects and strengthens Africa's role as a key stakeholder and a vital player in the global arena; that brings to the global debate issues that are key for Africa's development, such as domestic resource mobilization, energy access and digitalization; and that is of Africa and from Africa, to be fully embraced within the United Nations and beyond.

11.3 The implementation of the programme's strategy is guided by the vision of an empowered Africa that drives its own development to fulfil its potential as a continent of hope, opportunities and prosperity, with the support of the international system. The programme will further strengthen its data capacities and knowledge base, to feed advisory services, awareness-raising, communications and advocacy that mobilize the United Nations system, African Member States, international partners, civil society and the private sector at the global and regional levels with regard to the transformative vision of the African Union and in support of the joint implementation of the 2030 Agenda for Sustainable Development and Agenda 2063. In doing so, the programme will aim to foster improved coherence and synergies between the two agendas, through a consistent partnership on the basis of the strategic objectives of the second 10-year implementation plan of Agenda 2063.

11.4 The Office, ECA and the Department of Global Communications will continue to promote the new narrative through coordinated and complementary action in policy analysis and innovation, research and development, advocacy, communications, global and regional coordination, monitoring and evaluation and support for Member States. The strategic agenda, developed in consultation with the Group of African States and other stakeholders, continues to guide the programme activities in six cluster areas identified as key for Africa's development because of their multiplying impact: shifting the paradigm on financing for development; achieving sustainable development to deliver durable peace; governance, resilience and human capital; science, technology and innovation; industrialization, the demographic dividend and trade, with a focus on the African Continental Free Trade Area; and a balanced energy mix and climate adaptation. Considering the crucial role that young people play in the continent's development, special attention will be given to promoting youth-focused policies and proposals under each cluster area.

11.5 With regard to cooperation with other entities at the global, regional, national and local levels, the programme will continue to work closely with African Member States and African Union institutions as its main partners, in particular with the African Union Commission, the secretariat of the African Union Development Agency-NEPAD, the regional economic communities and the African Capacity-Building Foundation. The programme will also work closely with the African Peer Review Mechanism to advance the development goals of Africa and promote good governance, peace, security and sustainable development across the continent. The programme will continue to promote partnerships with an array of Member States, international organizations, civil society, the private sector, academia, think tanks and the African diaspora to enhance common approaches and synergies in their efforts to support Africa's development in the key areas identified in the programme's strategy.

11.6 With regard to inter-agency coordination and liaison, the programme will ensure strategic-level coordination among United Nations entities through the interdepartmental task force on African affairs by identifying priorities for building forward and building better, promoting results-based planning to develop the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and monitoring the implementation of the agreed plans and priorities. The Regional Collaborative Platform for Africa will ensure operational-level coordination among United Nations entities in the field and with the resident coordinator system.

11.7 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) African countries continue to guide their priorities towards implementing Agenda 2063;

(b) International partners continue to support Africa's sustainable development through financial contributions, technical support and policy frameworks that support African ownership and empowerment;

(c) The partnership between the United Nations and the African Union is further strengthened through the continued implementation of the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, the renewed approach to the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development, and the African Union-United Nations Framework on Human Rights;

(d) International organizations and partners are committed to the implementation of multi-stakeholder projects and programmes in support of the 2030 Agenda, Agenda 2063 and the priorities of African countries;

(e) United Nations entities actively engage in the interdepartmental task force on African affairs and the Regional Collaborative Platform for Africa;

(f) External stakeholders and potential partners, including media organizations, academic institutions, civil society organizations and creative communities, continue to engage with the programme's priorities;

(g) Member States and partners continue to advocate for and find joint solutions to mitigate the impacts of external shocks on Africa.

11.8 The programme integrates a gender perspective into its operational activities, deliverables and results, as appropriate, including through consultation with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the African Union and specialized civil society organizations. Subprogramme 1 promotes inclusive programme delivery through its analytical and policy documents, as well as its advocacy activities. The Office will collaborate with the African Women Leaders Network to support the participation and leadership of women in all areas of development. Subprogramme 2 enables United Nations support for the implementation of the priorities of the African Union, including the use of sex-disaggregated statistics, and addressing challenges that have an effect on the employment of women. Subprogramme 3 promotes gender equality and the empowerment of women by producing and disseminating communications products, through *Africa Renewal* platforms, that counter stereotypes and discrimination against women, and by promoting a balanced presence of women and men in all its multimedia products, promotional campaigns and events.

11.9 In line with the United Nations Disability Inclusion Strategy, the programme will promote analysis, policy recommendations and proposals that specifically foster the inclusion of persons with disabilities and will take the measures necessary to increase the accessibility of its products and events.

Legislative mandates

11.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

32/197	Restructuring of the economic and social sectors of the United Nations system	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
57/2	United Nations Declaration on the New Partnership for Africa's Development	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development	71/254	Framework for a Renewed United Nations-African Union Partnership on Africa's Integration and Development Agenda 2017–2027
57/300	Strengthening of the United Nations: an agenda for further change	76/236	Programme planning
63/1	Political declaration on Africa's development needs	79/211	Ensuring access to affordable, reliable, sustainable and modern energy for all
67/302	Cooperation between the United Nations and the African Union	79/264	Promotion of durable peace through sustainable development in Africa

Security Council resolutions

1197 (1998)	2282 (2016)
2033 (2012)	2457 (2019)

Economic and Social Council resolutions

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2024/19	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2024/5	Social dimensions of the New Partnership for Africa's Development		

Subprogramme 1
Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

General Assembly resolutions

53/92; 54/234; 57/296	The causes of conflict and the promotion of durable peace and sustainable development in Africa
58/233; 79/263	New Partnership for Africa's Development: progress in implementation and international support
66/293	A monitoring mechanism to review commitments made towards Africa's development
74/302; 76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
75/327	Implementation of the recommendations contained in the report of the Secretary-General on the promotion of durable peace and sustainable development in Africa

Subprogramme 2
Regional coordination of United Nations support for the integrated implementation of the 2030 Agenda for Sustainable Development and Agenda 2063

General Assembly resolution

71/254	Framework for a Renewed United Nations – African Union Partnership on Africa's Integration and Development Agenda 2017–2027

Economic and Social Council resolutions

671 (XXV) A	Establishment of an Economic Commission for Africa

Subprogramme 3
Public information and awareness activities in support of Agenda 2063

General Assembly resolution

79/93 B	Questions relating to information: United Nations global communications policies and activities

Deliverables

11.11 Table 11.1 lists all cross-cutting deliverables of the programme.

Table 11.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

7. Outcome document of the Africa Dialogue Series	1	1	1	1
Technical materials (number of materials)	**3**	**3**	**3**	**3**
8. Fact sheets and other technical materials informing discussions for the Africa Dialogue Series	3	3	3	3
D. Communication deliverables				
Digital platforms and multimedia content: one quarterly joint audio product on issues relating to Africa's sustainable development.				

Programme of work

Subprogramme 1
Data and knowledge management for evidence-based policies and advocacy in support of Agenda 2063

Objective

11.12 The objective, to which this subprogramme contributes, is to advance effective implementation of the 2030 Agenda and Agenda 2063 through coherent, integrated and effective United Nations system engagement, global advocacy and strategic partnership with African Member States and the African Union.

Strategy

11.13 To contribute to the objective, the subprogramme will:

(a) Act as the focal point for the African Union Commission and its agencies at Headquarters; support enhanced collaboration between the United Nations system and the African Union Commission, regional economic communities, the African Union Development Agency-NEPAD, the African Peer Review Mechanism and other African Union communities; and contribute to strengthening the implementation of the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development;

(b) Coordinate the interdepartmental task force on African affairs and monitor United Nations system support for Africa's sustainable development to promote strategic planning and programming in the United Nations system in Africa in accordance with the priorities of the African Union and African Member States as enshrined in Agenda 2063 and its second 10-year implementation plan;

(c) Perform horizon scanning and analyse emerging trends, challenges and opportunities in the areas of strategic focus of the programme, as well as develop policy proposals to maximize opportunities and minimize and mitigate identified risks, through the management of data and knowledge, and promote policy innovation initiatives that have the potential to act as multiplier interventions to support Africa's sustainable development;

(d) Assess commitments made toward Africa's development aligned with the 2030 Agenda and Agenda 2063, applying a cluster-based approach aimed at identifying challenges faced and, when appropriate, propose corrective measures;

(e) Facilitate intergovernmental deliberations on issues relating to Africa's sustainable development and support African Member States in their participation in intergovernmental processes;

(f) Develop and implement communication and global advocacy strategies in support of Agenda 2063, in coordination with subprogrammes 2 and 3;

(g) Promote strategic partnerships with African Member States and African Union institutions, leveraging United Nations knowledge and capacities through technical cooperation with United Nations agencies, funds and programmes regarding flagship initiatives and projects;

(h) Implement a fellowship programme for young African scholars and engage in new initiatives with partners to strengthen institutional capacities in policy analysis, design and monitoring.

11.14 The above-mentioned work is expected to result in:

(a) Empowerment of African Member States to mobilize increased domestic resources for Africa's development and maximize their impact through targeted data and evidence-based policies;

(b) Strengthened cooperation between the United Nations system and the African Union and other African institutions, as well as increased complementarity of their activities in support of the implementation of the 2030 Agenda and Agenda 2063;

(c) A more coherent and integrated approach by the United Nations system support for Africa to challenges affecting Africa's development that includes and addresses existing gaps and leverages opportunities through impact-focused priorities with a multiplying impact;

(d) Stronger alignment of intergovernmental discussions with the priorities of African countries and the African Union, as well as increased integration of African perspectives into global debates and decisions;

(e) Greater accountability of stakeholders in the implementation of commitments to Agenda 2063 and the 2030 Agenda;

(f) Increased awareness and understanding of the international community of the perspective of the African Union and the realities and priorities of African countries.

Programme performance in 2024

African policymakers equipped to assess the interlinkages between governance, financing and country systems to promote sustainable development and durable peace

11.15 Advancing durable peace and sustainable development in Africa remains a priority in addressing the continent's interrelated challenges. Governance, financing and country systems are critical levers for ensuring stability, promoting growth and mitigating the risks of armed conflict. Recognizing the complex interplay between these factors, the subprogramme developed a conceptual framework to provide African government officials with actionable insights to strengthen governance and development practices. This work was informed by the subprogramme's key knowledge production outputs across the past three years. Building on this groundwork, the subprogramme launched an innovative self-paced online training course in 2024. Through a flexible learning format and by integrating theoretical foundations with practical data-driven analysis tools, the course gave participants a holistic understanding of leveraging governance, financing and country systems to address peace and development challenges. Since its launch, the course has reached officials from 26 countries across Africa. Early results from pre- and post-course assessments demonstrated a 30 per cent increase in participants' knowledge, highlighting the effectiveness of the training in equipping decision makers with the skills and understanding necessary to integrate the interlinked conceptual framework into policymaking.

11.16 Progress towards the objective is presented in the performance measure below (see table 11.2).

Table 11.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Policymakers from across Africa strengthened their knowledge and skills related to the interlinkages between governance, financing and country systems to promote sustainable development and durable peace

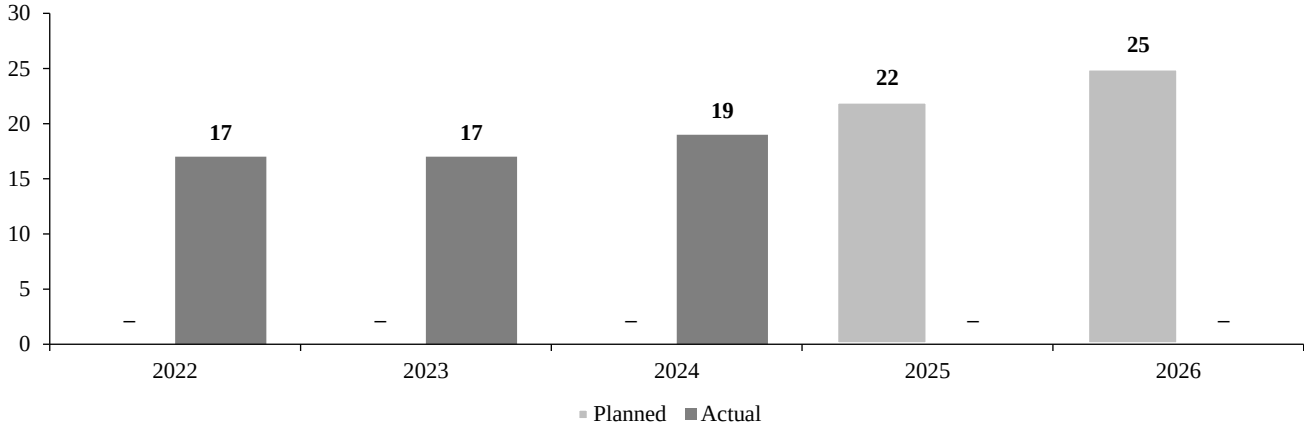
Result 1: strong country systems for development, social cohesion and peace and stability in Africa

Programme performance in 2024 and target for 2026

11.17 The subprogramme's work contributed to 19 African States achieving an e-government development index score of "high" or "very high" and also contributed to the design and adoption of the African Digital Compact in support of e-government development in Africa. Due to the discontinuation of data production for the source previously used to assess progress, the subprogramme has updated the performance measure from the number of African States that have a whole-of-government approach to public sector digital transformation to the number of African states with high or very high e-government development index scores. The actual and planned figures therefore reflect the updated performance measure.

11.18 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 11.I).

Figure 11.I
Performance measure: number of African States with high or very high e-government development index scores (cumulative)



Result 2: digital solutions to transform financial systems and manage debt in Africa

Programme performance in 2024 and target for 2026

11.19 The subprogramme's work contributed to the African Union Commission presenting for consideration a formal proposal for the creation of an alliance on domestic resource mobilization, which did not meet the planned target. The target was not met because it was decided to adopt a different strategy for the establishment of the alliance, which required additional procedural steps that could not be completed in 2024.

11.20 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 11.3).

Table 11.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
ECA Conference of Ministers expressed concern that the continent's debt vulnerabilities had been exacerbated by insufficient domestic resource mobilization (resolution 982 (LIV))	General Assembly adopted specific recommendations to advance domestic resource mobilization and unlock financing for accelerating the achievement of the Sustainable Development Goals (resolution 78/262)	The African Union Commission agreed to the proposed creation of an alliance on domestic resource mobilization and presented it to the seventh Specialized Technical Committee on Finance, Monetary Affairs, Economic Planning and Integration	Domestic resource mobilization alliance members adopt a road map targeting inefficient public spending, inefficient tax incentives, trade mispricing and tax administration deficiencies, leveraging digital solutions to strengthen national domestic resource mobilization systems	Building on the outcomes of the Fourth International Conference on Financing for Development, African countries begin implementing integrated measures to address key development challenges, with coordinated support from the United Nations system and partners

Result 3: policy ecosystems to equip the workforce of Africa in a global digital economy

Proposed programme plan for 2026

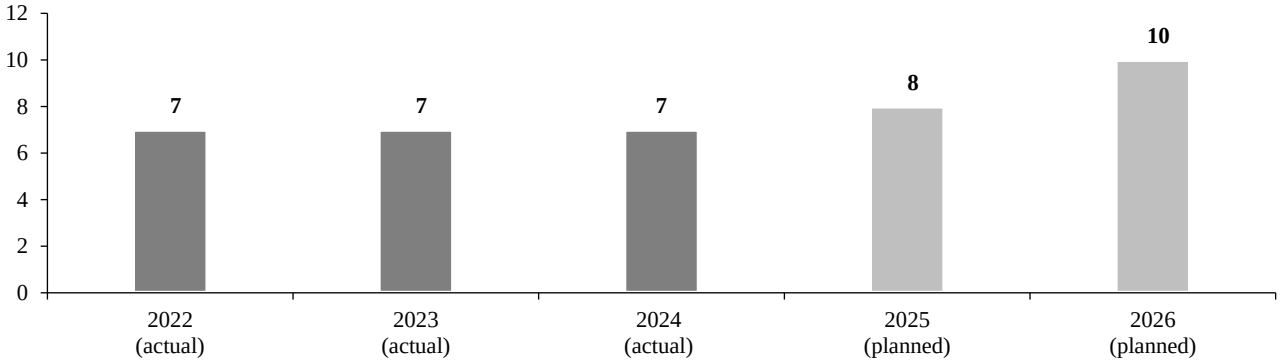
11.21 The youth of Africa, the fastest-growing demographic globally, are projected to make up 85 per cent of the global workforce by 2050, presenting a key opportunity for African States to harness a global digital economy to fuel the continent's transformation. However, 95 per cent of employed young Africans work in the informal sector (International Labour Organization, 2023), which presents a significant challenge to realizing this goal. To drive transformative growth and enhance resilience, Africa must shift its economies and supply chains towards high-value services and industries. This requires strong education in science, technology, engineering and mathematics, as well as robust science, technology and innovation ecosystems, to integrate young Africans into the formal sector, supported by policies that recognize the interconnectedness of decent jobs, education and social protection. To foster sustainable socioeconomic transformation, indigenous knowledge and models should be embraced and aligned within broader development frameworks.

Lessons learned and planned change

11.22 The lesson for the subprogramme was the need to foster integrated policy ecosystems to equip the African workforce in a global digital economy, with focus on science, technology and innovation ecosystems; science, technology, engineering and mathematics education; decent jobs; and context-specific social protection models. Achieving this will require strong institutions, with an emphasis on robust domestic resource mobilization and the effective management of financial flows. In applying this lesson, the subprogramme will utilize its advisory, advocacy, monitoring and coordination functions to engage stakeholders in developing such policy approaches.

11.23 Expected progress towards the objective is presented in the performance measure below (see figure 11.II).

Figure 11.II
Performance measure: number of African countries that have developed and operationalized a national strategy for youth employment (cumulative)



Note: The actual numbers for 2022, 2023 and 2024 reflect the latest available data.

Deliverables

11.24 Table 11.4 lists all deliverables of the subprogramme.

Table 11.4
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

Technical materials (number of materials)	**11**	**12**	**11**	**11**
10. On Africa's sustainable development, including financing for development, promotion of durable peace, governance, resilience and human capital, science, technology and innovation, industrialization, and energy and climate action	10	11	10	10
11. Online training course on links between peace and development	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: consultations and strategic-level coordination with African Union institutions; consultations on an annual results-oriented workplan for the interdepartmental task force on African affairs; evidence-based and data-driven advice and policy proposals provided to United Nations leadership and African Member States, including monthly briefings focused on trends, foresight and policy analysis, as well as quarterly briefings and materials in support of the participation of African Member States in intergovernmental processes; and advocacy products focused on the prioritization of policy proposals aimed at supporting Africa's transformational agenda, including panels, round tables and side events during the Economic and Social Council youth forum, the high-level political forum on sustainable development and other major United Nations conferences aimed at an audience of approximately 200 participants (government and academia) for each advocacy event, and at least 4 advocacy videos.

Databases and substantive digital materials: online knowledge repository with digital copies of the work of the Office of the Special Adviser on Africa in at least 4 official languages of the United Nations; United Nations monitoring mechanism database; data on United Nations action in Africa made available to complement the Office's reporting mandate; database of African think tanks and non-governmental organizations; and online country dashboards for African members of the Security Council and the Peacebuilding Commission.

D. Communication deliverables

Outreach programmes, special events and information materials: awareness-raising events, including the Africa's Youth Voices initiative; and outreach campaigns, including audiovisual materials on key issues affecting Africa's sustainable development.

External and media relations: press releases, press conferences and media dialogues on issues relating to Africa's sustainable development, peace and security and human rights in Africa.

Digital platforms and multimedia content: Office of the Special Adviser on Africa website and social media with updated content in at least 4 official languages of the United Nations; multimedia documents in all United Nations official languages; and communication and multimedia content that meet the full accessibility standards issued by the Office.

Subprogramme 2
Regional coordination of United Nations support for the integrated implementation of the 2030 Agenda for Sustainable Development and Agenda 2063

Objective

11.25 The objective, to which this subprogramme contributes, is to accelerate the integrated implementation of Agenda 2063 and the 2030 Agenda through United Nations system-wide coherence and collaboration and to enhance capacities of African Union organs and agencies, in particular the African Union Commission, the African Union Development Agency-NEPAD and the regional economic communities, at the regional and subregional levels.

Strategy

11.26 To contribute to the objective, the subprogramme will:

(a) Conduct policy research and analysis on African Union priorities and transboundary issues relevant to Africa's regional transformation and integration, and disseminate the findings across the five subregions of Africa;

(b) Provide technical assistance and advisory services within the framework of Agenda 2063 and the 2030 Agenda, taking into account the United Nations-African Union cooperation frameworks and the African Union strategic priorities, including the second 10-year implementation plan of Agenda 2063;

(c) Support the African Union Development Agency-NEPAD in the context of continental priorities in collaboration with subprogrammes 1 and 2, and build the capacity of subregional entities to formulate strategies for the integrated implementation of development priorities of regional economic communities and intergovernmental organizations in collaboration with ECA subprogrammes;

(d) Work under the architecture of the Regional Collaborative Platform for Africa, with the opportunity and issue-based coalitions, to promote coherent United Nations system-wide support for the African Union and for resident coordinators and United Nations country teams towards the realization of Agenda 2063 and the 2030 Agenda.

11.27 The above-mentioned work is expected to result in:

(a) Increased and more effective United Nations support for the African Union and its development priorities as reflected in Agenda 2063;

(b) Development and implementation by Member States of their national development priorities, aligned with global and regional frameworks on sustainable development.

Programme performance in 2024

Member States access digital platforms and other instruments to operationalize the second 10-year implementation plan of Agenda 2063

11.28 In 2024, States members of the African Union endorsed the second 10-year implementation plan of Agenda 2063, reflecting their collective commitment to advancing sustainable and inclusive development across the continent. With a view to supporting member States in operationalizing the implementation plan, the subprogramme, through the African Union-United Nations technical working group on the preparation and monitoring of the second 10-year implementation plan, supported the development of numerous instruments, including: (a) a digital platform for translating the goals of the implementation plan into actionable plans at the national level; (b) a domestic resource mobilization strategy; (c) a communication strategy; and (d) a handbook containing a monitoring and evaluation framework and core indicators, providing a standardized measurement system for monitoring and evaluating progress on the implementation plan. These tools will enable member States to tailor implementation of the plan to their unique contexts while remaining aligned with continental objectives.

11.29 Progress towards the objective is presented in the performance measure below (see table 11.5).

Table 11.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	The recommendations from the evaluation of the first 10-year implementation plan of Agenda 2063 were validated by the African Union and informed the development of the second 10-year implementation plan	The second 10-year implementation plan of Agenda 2063 was endorsed by States members of the African Union Member States have access to numerous tools and instruments to operationalize the implementation plan at the national and subnational levels

Planned results for 2026

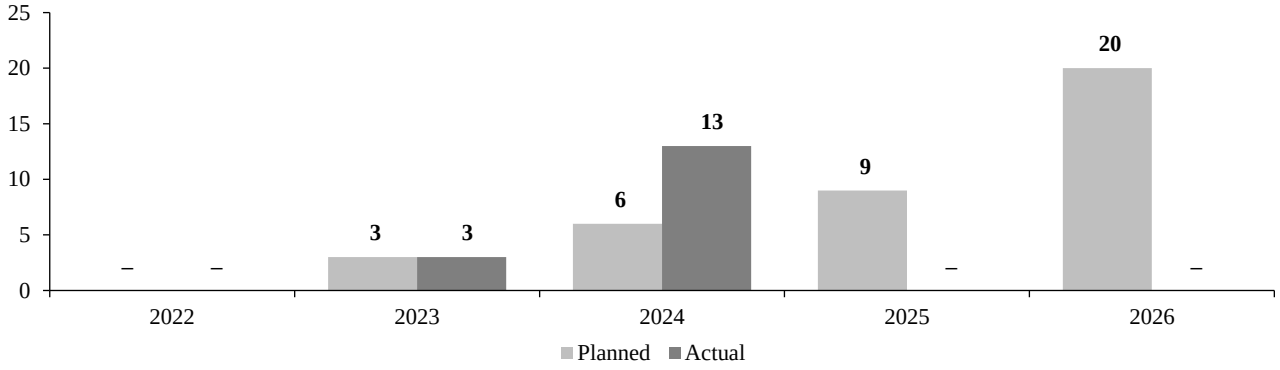
Result 1: accelerated progress towards the 2030 Agenda and Agenda 2063 at the regional, subregional and national levels through an integrated approach

Programme performance in 2024 and target for 2026

11.30 The subprogramme's work contributed to the adoption of 10 additional integrated initiatives at the regional level to accelerate progress towards the 2030 Agenda and Agenda 2063, for a total of 13 such initiatives, which exceeded the planned target of 6 initiatives.

11.31 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 11.III).

Figure 11.III
Performance measure: number of integrated initiatives adopted by national or subnational authorities or at the regional level to accelerate progress towards the 2030 Agenda and Agenda 2063 (cumulative)



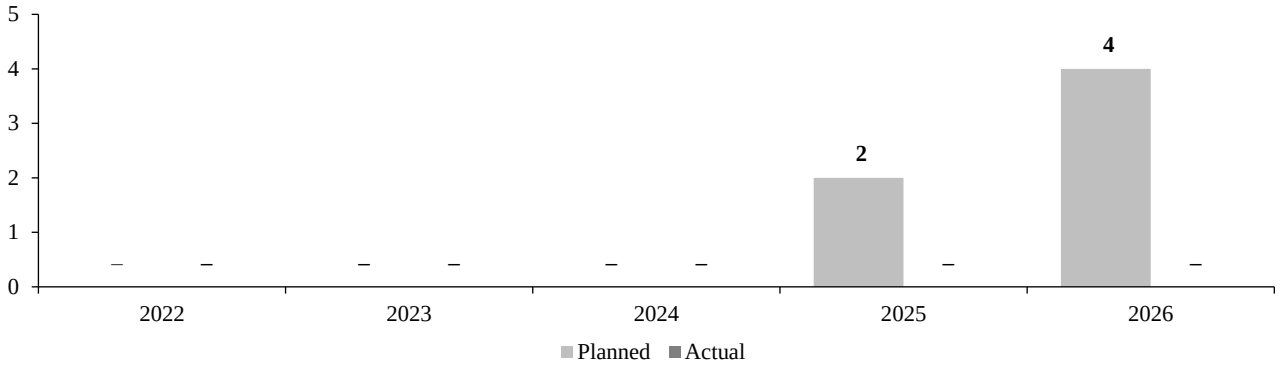
Result 2: long-term strategies for debt management in Africa

Programme performance in 2024 and target for 2026

11.32 The subprogramme's work contributed to progress towards the development of longer-term strategies to manage debt in an integrated manner, including through support to Member States in identifying priority focus areas, making efforts to improve tax systems and exploring debt swaps to create fiscal space.

11.33 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 11.IV).

Figure 11.IV
Performance measure: number of Economic Commission for Africa member States that develop longer-term strategies to manage debt in an integrated manner



Result 3: strengthened responsiveness and accountability of public institutions

Proposed programme plan for 2026

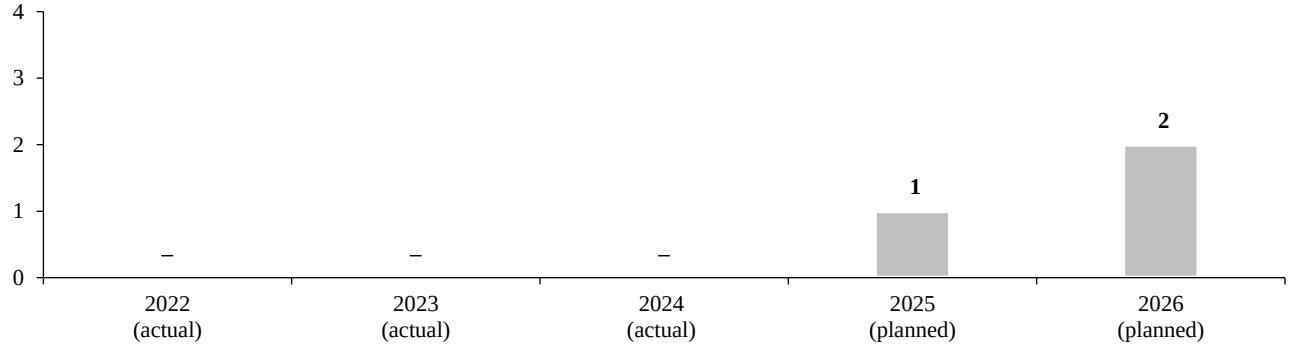
11.34 During 2020 and 2021, the subprogramme carried out five subregional studies in Africa on the interlinkages between development, peace and security, human rights and humanitarian affairs. The overall findings of the studies indicated that governance was the foundation of these interconnections. The second 10-year implementation plan of Agenda 2063 of the African Union outlines seven key ambitions, referred to as "moonshots", including the need for more responsive public institutions (moonshot 3). The implementation plan underscores lessons from the first decade of implementation, emphasizing the importance of accountability, democracy, justice and human rights in governance. It also calls for strengthening the capacity of public servants to build resilient and responsive institutions that serve African citizens effectively.

Lessons learned and planned change

11.35 The lesson for the subprogramme was the need to foster greater collaboration among United Nations entities to support Member States in advancing the strategic objectives outlined under moonshot 3 of the second 10-year implementation plan of Agenda 2063. In applying the lesson, the subprogramme will work to bring entities across the United Nations system together, through relevant opportunity- and issue-based coalitions under the Regional Collaborative Platform for Africa, to promote knowledge-sharing on good governance practices, build the capacity of national governance and electoral institutions on accountability and sound policymaking, and strengthen participatory approaches in the implementation of local development programmes. The efforts will enable Member States to design and implement targeted initiatives to strengthen the responsiveness and effectiveness of their public institutions.

11.36 Expected progress towards the objective is presented in the performance measure below (see figure 11.V).

Figure 11.V
Performance measure: number of national initiatives launched by member States to strengthen responsiveness and accountability of public institutions (cumulative)



Deliverables

11.37 Table 11.6 lists all deliverables of the subprogramme.

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services, upon request, relating to integrated implementation of Agenda 2063 and the 2030 Agenda for ECA member States, the African Union Commission, the African Union Development Agency-NEPAD and the six regional economic communities; and advocacy relating to capacity-building support for the African Union in the context of United Nations-African Union frameworks.				
D. Communication deliverables				
Outreach programmes, special events and information materials: pamphlets, booklets and celebrations and commemorations of special events and exhibits.				
Digital platforms and multimedia content: website on the work of the subprogramme.				

Subprogramme 3
Public information and awareness activities in support of Agenda 2063

Objective

11.38 The objective, to which this subprogramme contributes, is to achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa.

Strategy

11.39 To contribute to the objective, the subprogramme will:

(a) Develop global comprehensive editorial plans on priority issues affecting Africa, including by generating support in Africa and beyond for the African Union Development Agency-NEPAD and the implementation of Agenda 2063 and the 2030 Agenda, as well as the work of subprogrammes 1 and 2 and their advocacy strategies. This is under the umbrella of the strategy of the Africa Section of the Department of Global Communications and in line with the global communications strategy;

(b) Produce external communications content, including through the *Africa Renewal* digital platforms, media advisories and other public information, for use by external media, both African and international, and provide external communications support to the Office;

(c) Produce or translate select content into languages such as French and Kiswahili.

11.40 The above-mentioned work is expected to result in enhanced awareness of key thematic issues of the African Union Development Agency-NEPAD and other issues relating to economic recovery and sustainable development in Africa.

Programme performance in 2024

Africa on the global stage: innovative solutions for Africa at the Sustainable Development Goals media zone

11.41 In September 2024, during the high-level week of the seventy-ninth session of the General Assembly, the subprogramme organized a weeklong discussion series in the Sustainable Development Goals media zone, entitled "Africa renewal: spotlight on the Sustainable Development Goals". The discussions focused on themes critical to Africa, including gender equality, addressing hate speech, financing for climate action and the debt challenge. The series, which provided a global platform for African leaders and activists, culminated in a youth town hall that was produced in collaboration with the African Union and the British Broadcasting Corporation (BBC) World Service and featured the Special Envoy on Youth of the African Union, along with youth advocates from across the continent. The town hall served to amplify the voices of African youth on climate action and economic development. On 30 September, the Africa youth town hall aired on the BBC "Focus on Africa" programme. The subprogramme also secured media partnerships with other broadcasters, helping to further expand audience engagement with the discussion series.

11.42 Progress towards the objective is presented in the performance measure below (see table 11.7).

Table 11.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Innovative solutions for Africa and African youth perspectives amplified by international, regional and national media, including BBC Africa, CNN and News Central (Nigeria)

Planned results for 2026

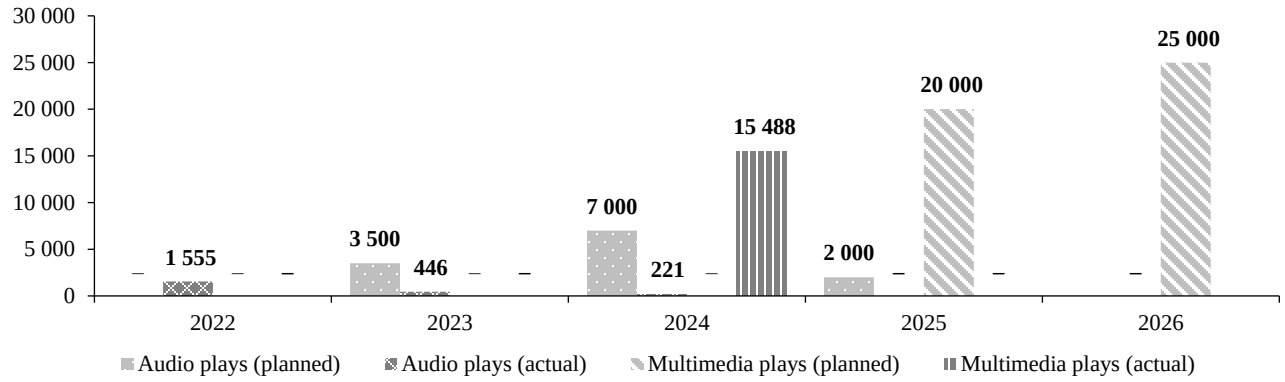
Result 1: increased awareness of the general public on peace and security issues in Africa

Programme performance in 2024 and target for 2026

11.43 The subprogramme's work contributed to 221 plays of *Africa Renewal* audio stories on peace and security issues, which did not meet the planned target of 7,000 audio plays. The target was not met as the subprogramme determined that audio plays did not fully and accurately capture consumption trends across the African continent. The subprogramme therefore pivoted to multimedia content, including videos and webinars, to increase awareness among the general public on peace and security issues in Africa, which contributed to 15,488 multimedia plays in 2024.

11.44 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 11.VI).

Figure 11.VI
Performance measure: number of plays of *Africa Renewal* audio stories on peace and security issues[a] (annual)



[a] Figures for 2024 (actual), 2025 (planned) and 2026 (planned) have been updated to also reflect the number of multimedia plays, in addition to the number of audio plays.

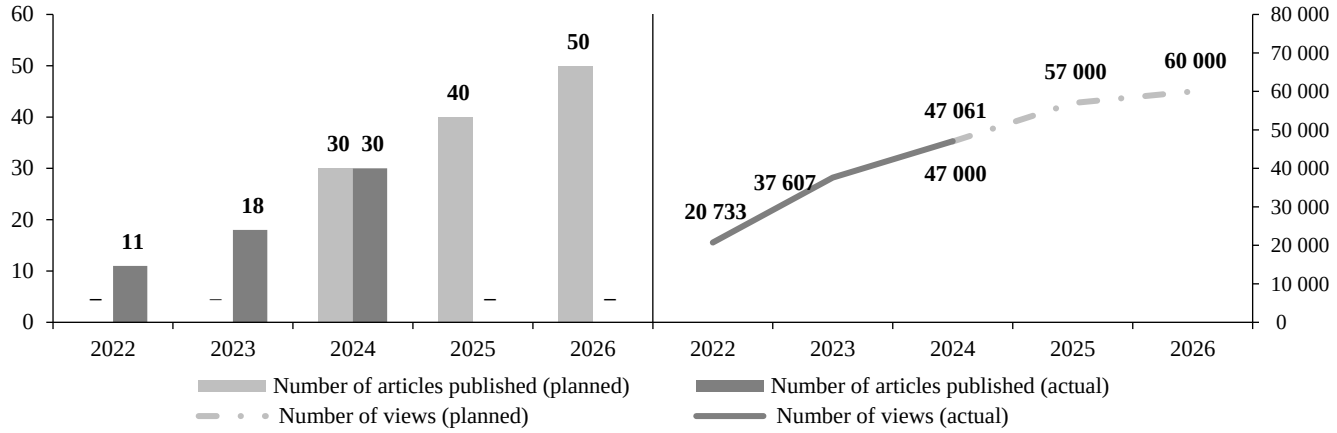
Result 2: engagement of the general public on Africa's debt burden and potential solutions

Programme performance in 2024 and target for 2026

11.45 The subprogramme's work contributed to 47,061 views generated for 30 articles and multimedia stories, which exceeded the planned target of 47,000 views.

11.46 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 11.VII).

Figure 11.VII
Performance measure: increased engagement of the general public on Africa's debt burden and potential solutions (annual)



Result 3: strengthened outreach by media partners on education, decent jobs and social protection in Africa

Proposed programme plan for 2026

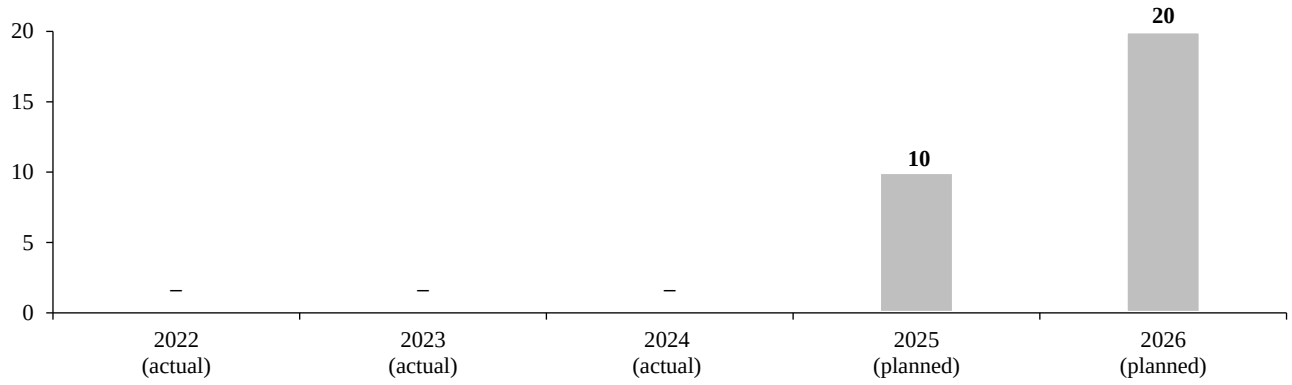
11.47 The subprogramme will work in collaboration with subprogrammes 1 and 2 and the African Union to increase awareness of policies that enable the vulnerable to be protected and to thrive while reducing inequalities among the most vulnerable, including women, especially rural women, the elderly and those living with disabilities. Through multimedia content, outreach and partnerships, the subprogramme will highlight solutions to providing equitable education for all, the need for decent jobs on the African continent and how to support domestic resource mobilization to reduce poverty, as well as social protection issues such as gender equality and access to adequate healthcare across the continent.

Lessons learned and planned change

11.48 The lesson for the subprogramme was to better target media partners to engage with content showcased on the *Africa Renewal* platform and to better tailor content for media partner digital platforms. In applying this lesson, the subprogramme will focus on engaging national, regional and international media to increase the awareness of the general public of education, decent jobs and social protection as a means to achieving a sustainable future.

11.49 Expected progress towards the objective is presented in the performance measure below (see figure 11.VIII).

Figure 11.VIII
Performance measure: number of media partners engaged in the distribution of *Africa Renewal* content



Deliverables

11.50 Table 11.8 lists all deliverables of the subprogramme.

Table 11.8
Subprogramme 3: deliverables for 2026, by category and subcategory

Category and subcategory
D. Communication deliverables
Outreach programmes, special events and information materials: outreach to major media houses in Africa and other countries, education institutions, civil society organizations and creative communities to amplify *Africa Renewal* content for wider distribution and dissemination; 4 webinars with key stakeholders covering issues related to youth, financial architecture, gender equality, and peace and security; external communications products relating to the annual Africa Dialogue Series, the Commission on the Status of Women, the Economic and Social Council youth forum, the General Assembly and African Union flagship events; contributions to the work of the Regional Collaborative Platform for Africa and the interdepartmental task force on African affairs; and publicity in support of international, regional and local initiatives and campaigns that foster or have an impact on Africa's economic and social development.
External and media relations: media round tables; content tailored to specific media outlets interested in Africa's development for syndication or citation and in including relevant information on United Nations support for Africa in their own materials; international, regional and local initiatives and campaigns that foster or affect Africa's economic and social development; and public information material, including media advisories.
Digital platforms and multimedia content: multimedia content for the *Africa Renewal* website and social media accounts, monthly curated newsletters and a mobile phone application.

B. Proposed post and non-post resource requirements for 2026

Overview

11.51 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 11.9 to 11.11.

Table 11.9

11.52 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 11.12 to 11.14 and figure 11.IX.

11.53 As shown in tables 11.12 (1) and 11.13, the overall resources proposed for 2026 amount to $11,126,100, reflecting a net increase of $390,300 (or 3.6 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments and new and expanded mandates. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

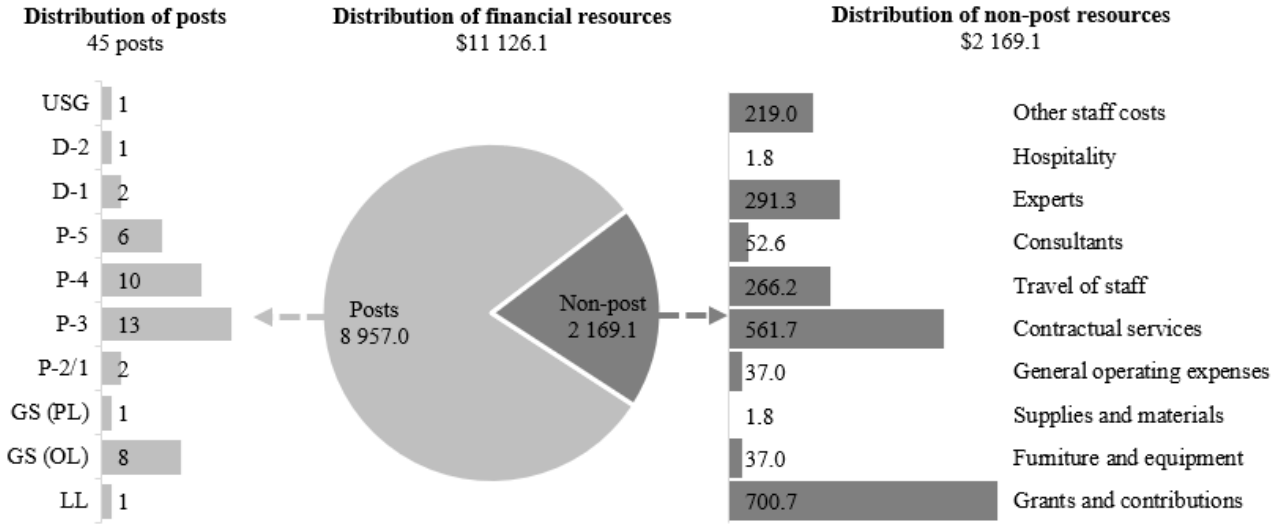
Figure 11.IX
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

11.54 As shown in table 11.12 (1), resource changes reflect a net increase of $68,900 under executive direction and management, as follows: an increase of $71,300 under posts relates to the higher provision at continuing vacancy rates for one post of Associate Administrative Officer (P-2) established in 2025 pursuant to General Assembly resolution 78/263, which was subject to a 50 per cent vacancy rate in accordance with the established practice for newly established posts. The increase would be offset in part by a decrease of $2,400 under furniture and equipment, which relates

to the removal of non-recurrent provisions associated with the establishment of the post that were approved for 2025 and are no longer required in 2026.

New and expanded mandates

11.55 As shown in table 11.12 (1), resource changes reflect an increase of $321,400 under executive direction and management. The increase under grants and contributions relates to the support for the African Policy Innovation Fellowship Programme and would provide for a monthly stipend, onboarding and repatriation travel, separation grant and medical insurance for a second cohort of 10 fellows during a six-month period from January to June 2026, for a total of two cohorts of 10 fellows each (20 in total) per year from 2026 onward pursuant to General Assembly resolution 78/263.

Extrabudgetary resources

11.56 As reflected in table 11.12 (2), extrabudgetary resources amounting to $611,000 would complement regular budget resources and sustain initiatives established in 2023, 2024 and 2025. Non-post resources would be used to promote strong country systems for development, social cohesion and peace and stability in Africa, supporting digital solutions to transform financial systems and manage debt in Africa, and developing policy ecosystems to equip the African workforce in a global digital economy through activities such as the online course on developing strategies for the promotion of durable peace through sustainable development interventions, the United Nations Office of the Special Adviser on Africa academic conference, activities complementing or expanding the African Policy Innovation Fellowship Programme, and the establishment of a network to allow academics and policymakers to exchange and jointly develop knowledge products on issues of priority for the African continent.

11.57 The extrabudgetary resources under the present section are subject to the oversight of the Special Adviser on Africa on the basis of the delegated authority from the Secretary-General.

Executive direction and management

11.58 The executive direction and management component comprises the Office of the Under-Secretary-General and the Strategic Management Unit.

11.59 The main responsibilities of the executive direction and management component include:

(a) To represent the programme and facilitate the interaction of the three subprogrammes with other entities and stakeholders;

(b) To contribute to and facilitate debate among Member States, in particular those in the Group of African States, on the strategic direction of programme 9;

(c) To develop a forward-looking strategy for the activities of programme 9 to respond to emerging and foreseeable priorities of African Member States and the African Union;

(d) To coordinate joint activities related to planning and performance monitoring of programme 9 and to provide strategic guidance for the prioritization of issues within the programme;

(e) To provide strategic guidance for the development of policy for, and to provide direction for and ensure the implementation of, the programme of work of the Office, through continuous planning, monitoring and evaluation of subprogrammes performance;

(f) To promote transparency, cooperation, synergies and coherence among the three subprogrammes;

(g) To provide guidance for the mainstreaming of data analysis and management in the programme's activities;

(h) To manage all administrative issues regarding the functioning of the Office, including the African Policy Innovation Fellowship Programme, and to provide logistical and administrative support for subprogramme 1;

(i) To contribute to United Nations reform discussions, in relation to improving system-wide coherence in United Nations development work in Africa.

11.60 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Office is integrating environmental management practices into its operations. The Office will continue to reduce its carbon footprint by utilizing virtual platforms for strategic engagement and interaction with its stakeholders, as feasible, and by implementing measures to limit energy waste, recycling obsolete information technology equipment and raising staff awareness.

11.61 Information on the timely submission of documentation and advance booking for air travel is reflected in table 11.15. The lower compliance rate is due to late receipt of documents for travel requests or participation as part of delegations of senior officials. The Office will continue to take measures to enable the timely submission of travel requests.

Table 11.15
Compliance rate
(Percentage)

	2022 actual	*2023 actual*	*2024 actual*	*2025 planned*	*2026 planned*

11.62 The proposed regular budget resources for 2026 amount to $3,166,500 and reflect a net increase of $390,300 compared with the approved budget for 2025. The proposed change is explained in paragraphs 11.54 and 11.55. Additional details on the distribution of the proposed resources for 2026 are reflected in table 11.16 and figure 11.X.

2. Memorandum of Understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets 53
Programme of work 53
Subprogramme 1. Globalization, interdependence and development 53
Subprogramme 2. Investment and enterprise 54
Subprogramme 3. International trade and commodities 55
Subprogramme 4. Technology and logistics 56
Subprogramme 5. Africa, least developed countries and special programmes 57
Programme support 58
Annex
Organizational structure and post distribution for 2026 60

*** In keeping with paragraph 10 of General Assembly resolution 77/267, the part consisting of the post and non-post resource requirements (part III) is submitted through the Advisory Committee on Administrative and Budgetary Questions for the consideration of the Assembly.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

12.1 The United Nations Conference on Trade and Development (UNCTAD) is responsible for assisting developing countries in integrating beneficially into the global economy in support of inclusive, resilient and sustainable growth and development. This task is more critical than ever, in the light of the multiple current crises, the uneven impacts left behind by the pandemic and the fast changes driven by technological advancements and shifting political landscapes. The Bridgetown Covenant, the outcome document of the fifteenth quadrennial session of UNCTAD, contains calls for UNCTAD to counter the negative impact of the pandemic on the global economy and trade and to help developing countries to transform their economies through diversification, sustainability and resilience, to transform how development is financed and to strengthen multilateralism. Special attention is called for the least developed countries, landlocked developing countries, small island developing States, African countries, other structurally weak, vulnerable and small economies, and countries in conflict and post-conflict situations, while also taking account of the challenges facing middle-income countries. The Covenant also contains a reaffirmation of the role of UNCTAD as the focal point within the United Nations system for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development. UNCTAD will also respond to a number of underlying issues for sustainable, inclusive and equitable growth and development, as mandated in the Bridgetown Covenant.

Strategy and external factors for 2026

12.2 The world faces multiple challenges: debt distress, slow growth, growing poverty and hunger, widening inequalities, risks of fragmentation of trade and investment, geopolitical tensions, armed conflicts and climate change. Therefore, fostering more inclusive and sustainable development and enhancing resilience to these challenges will continue to guide the work of UNCTAD, in accordance with the particular needs and challenges of the member States and the Bridgetown Covenant. In line with its mandate, UNCTAD will continue to rely on its three interrelated pillars of work: (a) conducting high-quality and evidence-based research and policy analysis that contribute to national, regional and international policies with the aim of generating inclusive and sustainable development under the principle of leaving no one behind; (b) providing technical cooperation to developing countries on the basis of such analysis; and (c) bringing member States together through its intergovernmental machinery to build consensus on policies that allow developing countries to maximize the opportunities of globalization and economic integration, as well as to address cross-cutting economic, social and environmental challenges.

12.3 The challenges that countries face are also interrelated. Mounting debt in low-income, and many middle-income, developing countries remains a major obstacle to the achievement of the Sustainable Development Goals. Servicing debt also constrains the ability of many developing countries to adapt to climate change and transform into low-emission economies. UNCTAD will thus continue addressing debt vulnerability and the high cost of debt, while also strengthening its support relating to how trade, investment and technology can support diversification and help the transition towards a low emission, competitive and climate-resilient and sustainable economy. UNCTAD will remain committed to addressing interrelated issues essential to all countries in attaining sustainable and equitable growth and development, including through its work on South-South and triangular cooperation and regional integration, while being particularly mindful of the needs and priorities of developing countries.

12.4 In accordance with its mandate in the interrelated areas of trade and development, and as the custodian of nine Sustainable Development Goal indicators at the global level, UNCTAD will support

the implementation, monitoring and review of the 2030 Agenda for Sustainable Development and the relevant targets of the Goals, including by continuing to develop international standards and recommending methodologies for monitoring Goal indicators. It will also support the implementation of the Pact for the Future, notably the reform of the international financial architecture, the work on beyond gross domestic product (GDP), interoperable data governance and making the digital economy more inclusive.

12.5 Alongside global agendas, UNCTAD will strive in particular to ensure the implementation of mandates reconfirmed and reinforced at its fifteenth session as outlined in the Bridgetown Covenant. UNCTAD will be guided by four major transformations to move to a more resilient, inclusive and sustainable world: transforming economies through diversification; transforming to a more sustainable and more resilient economy; transforming how development is financed; and transforming multilateralism. UNCTAD will also adapt to any mandate that is adopted at its sixteenth quadrennial session, to be held in October 2025.

12.6 The Bridgetown Covenant emphasized the threat of climate change and the need to decouple economic growth from environmental degradation and enhance climate resilience. UNCTAD will contribute to new global trade, financial and policy frameworks that more fully integrate inclusiveness, climate change and the environment. This work will focus on supporting the scaling up of climate finance, using the potential of trade for climate action, reducing greenhouse gas emissions of the logistics of trade and global value chains, boosting sustainable investments and supporting a transition to a low-emission, competitive and climate-resilient and sustainable economy, including through critical energy transition minerals. UNCTAD will continue to promote and advance the issue of the integrated treatment of development economics in international forums, such as the annual sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change or the Conference of the Parties to the Convention on Biological Diversity. UNCTAD will ensure organizational coherence across subprogrammes through an established cross-divisional environment and climate change working group.

12.7 To support its member States in promoting structural transformation, in accordance with the Bridgetown Covenant, UNCTAD will continue to support developing countries in making more accurate diagnostics and to inform policy choices by measuring productive capacities. UNCTAD will remain at the forefront of understanding the impact of technological advancements and continue its work to make digitalization, a key driver for transforming economies, a force of inclusivity. UNCTAD will align its activities with the strategy to support small island developing States that was developed to address the specific challenges and vulnerabilities of this group of countries.

12.8 The UNCTAD Statistics Service will continue to provide timely and high-quality statistical information and indicators in the interrelated areas of trade and development. UNCTAD will treat data as an integrated and cross-cutting resource and ensure coordinated statistical capacity development at the organizational level. The Service will support developing countries in building their capacity to collect and compile data and measure progress in sustainable, inclusive and equitable trade, growth and development. The Service will strive to further develop its databases and make use of novel methods, such as enhancing nowcasts by combining the power of artificial intelligence and official statistics, or using data collected and reported by countries of the South within their own frameworks to measure South-South cooperation and inform global debates on development support. The Service will continue to report on developments relating to the Sustainable Development Goals by providing an update on the evolution of a selection of official indicators and complementary data and statistics and an update on progress in the development of new concepts and methodologies.

12.9 As requested in the Bridgetown Covenant, UNCTAD will continue to support countries, through technical cooperation, in building their resilience to future economic shocks by building productive capacities, and to develop the capacity of Governments to formulate and implement policies on financing for development, investment, international trade, science and technology and logistics.

12.10 With regard to cooperation with other entities at the global, regional, national and local levels, UNCTAD will continue to combine its expertise with the reach and in-country presence of partners.

Regionally, UNCTAD will continue to work closely with partner organizations, such as the secretariat of the African Continental Free Trade Area through its Regional Office for Africa, as well as regional economic communities, business communities and strategic development partners, to foster regional economic integration and growth. UNCTAD will also continue to foster cooperation with international financial institutions, multilateral development banks, the Organisation for Economic Co-operation and Development and the Group of 20 to contribute to international policy debates on trade, investment and finance.

12.11 With regard to inter-agency coordination and liaison, UNCTAD will continue to collaborate with resident coordinator offices, including through involvement in the preparation of common country assessments and United Nations Sustainable Development Cooperation Frameworks. UNCTAD will continue to work with the World Trade Organization (WTO) and the International Trade Centre (ITC) in a complementary manner to support developing countries in their efforts to be integrated into and benefit from the multilateral trading system. UNCTAD will lead the inter-agency dialogue on monitoring and accountability of the means for the implementation of targets through the dedicated follow-up to the Addis Ababa Action Agenda commitments and participation in the Inter-Agency Task Force on Financing for Development. UNCTAD will adapt its role as decided in the outcome document of the Fourth International Conference on Financing for Development in 2025. UNCTAD will continue to support the Inter-Agency and Expert Group on Sustainable Development Goal Indicators and lead the United Nations Inter-Agency Cluster on Trade and Productive Capacity in "delivering as one" operational activities at the country level. UNCTAD will continue to support the implementation of outcomes related to science, technology and innovation of the 2030 Agenda and the Pact for the Future, including the Technology Facilitation Mechanism, the Technology Bank for the Least Developed Countries and the multi-stakeholder working group on data governance. Furthermore, for the implementation of the Pact for the Future, UNCTAD will collaborate with the Department of Economic and Social Affairs and the United Nations Development Programme on Beyond GDP and the reform of the international financial architecture, with the United Nations Office on Drugs and Crime and the Department of Economic and Social Affairs on illicit financial flows, and with the Statistical Commission of the United Nations on South-South cooperation. In coordination with the United Nations Environment Programme and the Climate Action Team, UNCTAD will continue to lead implementation of the actionable recommendations of the United Nations Secretary-General's Panel on Critical Energy Transition Minerals.

12.12 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Up-to-date and accurate economic and financial information and data at the country and regional levels continue to be available and cooperation continues with relevant entities on the production of statistics;

(b) Extrabudgetary funding continues to be available for technical cooperation programmes, and conditions and capacities exist in member States to adopt and implement policies and strategies;

(c) There is political will to achieve consensus in intergovernmental meetings on matters related to UNCTAD;

(d) Member States will provide the necessary support for any new mandate for UNCTAD adopted at its quadrennial session in October 2025.

12.13 UNCTAD integrates a gender perspective in its operational activities, deliverables and results, in line with the Bridgetown Covenant. It will continue to strengthen the capacity of member States to design and implement policies and establish institutions, frameworks and/or mechanisms that support women's economic empowerment, economic security and rights and enhance their economic and digital skills and opportunities. UNCTAD will continue to work on the links between gender equality, women's and girls' empowerment and trade and development through its women-focused programmes, and to advocate for gender-sensitive policy responses. UNCTAD will expand its work on trade and sex-disaggregated statistics and on measuring the ways in which women and men

participate in and benefit from trade. Organizational coherence across divisions will be further increased through the interdivisional committee providing strategic guidance.

12.14 In line with the United Nations Disability Inclusion Strategy, UNCTAD will continue to incorporate disability inclusion considerations into the design and evaluation of technical cooperation projects. UNCTAD will also advance the work of the Inter-Agency Technical Working Group on Trade and Disability Inclusion established in conjunction with the International Labour Organization, ITC and WTO to integrate and enhance disability inclusion in trade and development agendas. Access by delegates and participants to UNCTAD meetings organized at the headquarters is managed and ensured by the United Nations Office at Geneva. For meetings serviced outside the duty station, UNCTAD strives to ensure that all venues and conference facilities are accessible to persons with disabilities.

Legislative mandates

12.15 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

1995 (XIX)	Establishment of the United Nations Conference on Trade and Development as an organ of the General Assembly
63/204	Report of the twelfth session of the United Nations Conference on Trade and Development
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development
66/288	The future we want
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
70/133	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
73/241	International migration and development
73/245	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection
73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
76/258	Doha Programme of Action for the Least Developed Countries
76/264	State of global food insecurity
78/135	Unilateral economic measures as a means of political and economic coercion against developing countries
78/162	Development cooperation with middle-income countries
78/317	The Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity
79/1	The Pact for the Future
79/195	International trade and development
79/196	International financial system and development
79/199	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
79/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
79/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
79/218	Follow-up to the Fifth United Nations Conference on the Least Developed Countries
79/219	Follow-up to the Third United Nations Conference on Landlocked Developing Countries
79/221	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
79/223	Women in development
79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

79/233	Programme of Action for Landlocked Developing Countries for the Decade 2024–2034	79/235	Promotion of inclusive and effective international tax cooperation at the United Nations
79/234	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development	79/236	South-South cooperation

Economic and Social Council resolutions

2021/30	Open-source technologies for sustainable development	2024/3	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2022/3	Ensuring that the work in the field of statistics and data is adaptive to the changing statistical and data ecosystem		

United Nations Conference on Trade and Development reports

TD/442, TD/442/Corr.1 and TD/442/Corr.2	Report of the United Nations Conference on Trade and Development on its twelfth session	TD/519/Add.2 and TD/519/Add.2/Corr.1	Report of the United Nations Conference on Trade and Development on its fourteenth session: Nairobi Maafikiano
TD/500/Add.1	Report of the United Nations Conference on Trade and Development on its thirteenth session: the Doha Mandate	TD/541/Add.2	Report of the United Nations Conference on Trade and Development on its fifteenth session: the Bridgetown Covenant

Subprogramme 1
Globalization, interdependence and development

General Assembly resolutions

66/188	Addressing excessive price volatility in food and related financial and commodity markets	77/22	Committee on the Exercise of the Inalienable Rights of the Palestinian People
72/227	Role of the United Nations in promoting development in the context of globalization and interdependence	79/141	Assistance to the Palestinian people
		79/197	External debt sustainability and development
74/205	Financial inclusion for sustainable development	79/215	Towards a New International Economic Order

Subprogramme 2
Investment and enterprise

General Assembly resolutions

79/201	Entrepreneurship for sustainable development	79/198	Promoting investments for sustainable development

Subprogramme 3
International trade and commodities

General Assembly resolutions

35/63	Restrictive business practices	78/133	Promoting creative economy for sustainable development
70/186	Consumer protection	78/138	Commodities
71/312	Our ocean, our future: Call for action	79/7	Necessity of ending the economic, commercial and financial embargo imposed by the United States of America against Cuba
74/198	International Year of Creative Economy for Sustainable Development, 2021		
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development		

Subprogramme 4
Technology and logistics

General Assembly resolutions

60/252	World Summit on the Information Society	75/17	International cooperation to address challenges faced by seafarers as a result of the COVID-19 pandemic to support global supply chains
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	75/316	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	78/160	Science, technology and innovation for sustainable development
70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	79/194	Information and communications technologies for sustainable development
72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals		

Economic and Social Council resolutions

2015/26; 2020/12; 2023/3; 2024/13	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society	2024/21	Support to Non-Self-Governing Territories by the specialized agencies and international institutions associated with the United Nations
2024/14	Science, technology and innovation for development		

Subprogramme 5
Africa, least developed countries and special programmes

General Assembly resolutions

67/221	Smooth transition for countries graduating from the list of least developed countries	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
68/18	Graduation of countries from the least developed country category		
68/225	Specific actions related to the particular needs and problems of landlocked developing countries: outcome of the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation		

Economic and Social Council resolutions

2020/10	Report of the Committee for Development Policy on its twenty-second session	2023/10	Report of the Committee for Development Policy on its twenty-fifth session
2021/11	Report of the Committee for Development Policy on its twenty-third session	2024/7	Report of the Committee for Development Policy on its twenty-sixth session
2022/8	Report of the Committee for Development Policy on its twenty-fourth session	2024/18	Doha Programme of Action for the Least Developed Countries for the decade 2022–2031

Deliverables

12.16 Table 12.1 lists all cross-cutting deliverables of the programme.

Table 12.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**10**	**10**	**10**	**10**
1. Conference room paper for the Trade and Development Board	1	1	1	1
2. Report on the follow-up to the major United Nations conferences and summits in the areas of UNCTAD expertise	1	1	1	1
3. Report on matters requiring action by the Trade and Development Board in relation to the fifteenth session of UNCTAD	1	1	1	1
4. Conference room papers and working papers prepared for the Working Party on the Programme Plan and Programme Performance	4	4	4	4
5. Overview of the external evaluations of UNCTAD programmes and projects	1	1	1	1
6. Report on the external evaluation of an UNCTAD subprogramme	1	1	1	1
7. Review of the technical cooperation activities of UNCTAD and their financing	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**107**	**112**	**111**	**107**
Meetings of:				
8. The Trade and Development Board, including annual, special and executive sessions of the Board and its subsidiary bodies	92	92	88	92
9. The Working Party on the Programme Plan and Programme Performance	12	14	12	12
10. The Advisory Committee on Administrative and Budgetary Questions	1	2	1	1
11. The Fifth Committee	1	3	1	1
12. The Committee for Programme and Coordination	1	1	1	1
13. The sixteenth quadrennial session of UNCTAD	–	–	8	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**1**	**3**	**1**	**2**
14. On statistics related to trade and development	1	3	1	2
Seminars, workshops and training events (number of days)	**24**	**25**	**28**	**24**
15. Seminars on topics to be determined by the Secretary-General of UNCTAD, in consultation with member States	3	3	3	3
16. Seminars, including with civil society and member States, to generate and transfer knowledge in connection with the work programme of UNCTAD	2	2	2	2
17. Seminar on topical trade and development issues	1	1	1	1
18. Seminar on topical international trade and development issues	1	1	1	1
19. Seminars to advance the trade and development agenda through international cooperation	2	2	2	2
20. Seminar on the coordination of national development strategies oriented towards sustainable development	1	2	1	1
21. Workshops with academia, civil society and youth	14	14	18	14
Publications (number of publications)	**3**	**3**	**3**	**3**
22. *UNCTAD Handbook of Statistics*	1	1	1	1
23. *SDG Pulse*	1	1	1	1
24. UNCTAD annual report	1	1	1	1
Technical materials (number of materials)	**12**	**11**	**11**	**11**
25. Policy briefs on trade and development issues	3	2	2	2
26. Reports on independent evaluations (including reports on evaluations of United Nations Development Account projects and reports of external evaluations)	5	4	5	5

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned
27. Economic and maritime statistical country profiles	2	2	2	2
28. Statistical papers, including on international trade and development	2	3	2	2

C. Substantive deliverables

Databases and substantive digital materials: UNCTAD civil society database and civil society electronic alerts and UNCTAD Youth Network; UNCTAD statistical data centre; UNCTAD Data Insights, complementing the Handbook of Statistics with a live statistical feed; UNCTAD trade-in-services statistics information system; UNCTAD global data set of indicators on gender equality in trade.

Consultation, advice and advocacy: policy advice to policymakers for statistical capacity in the area of trade and development.

D. Communication deliverables

Outreach programmes, special events and information materials: integrated marketing strategy through a client relationship management tool and strategic outreach programme; "UNCTAD at a Glance"; press kits, media briefs and flyers for flagship publications; news briefs and opinion pieces; public information materials, including brochures and posters; and at least 10 specialized information sessions for media students, delegates, academics and youth visiting UNCTAD and, upon request, in other locations, including online outreach.

External and media relations: around 10 press conferences, 25 press releases in all 6 official United Nations languages, 30 media alerts and information notes.

Digital platforms and multimedia content: UNCTAD website and social media content, including podcasts and blogs about UNCTAD meetings, events and publications, including policy briefs; UNCTAD digital monthly newsletter; UNCTAD Data Hub, showcasing UNCTAD data and statistics.

Evaluation activities

12.17 The following evaluations completed in 2024 have guided the proposed programme plan for 2026:

(a) UNCTAD subprogramme 3, International trade and commodities;

(b) Four evaluations on United Nations Development Account projects related to a range of trade, transport and economic development issues.

12.18 In response to the results of the evaluations referenced above, UNCTAD is refining its results framework with more comprehensive indicators to capture long-term outcomes and impact. On the sustainability of interventions, UNCTAD will engage national consultants who can act as local champions for continued results and use communication strategies to widen outreach and impact. UNCTAD will also deepen collaboration with resident coordinator offices, regional commissions, civil society and development partners to leverage expertise and funding. UNCTAD will further integrate considerations related to gender equality, disability and environment into programmes and projects by conducting sector-specific analysis, reflecting diverse stakeholder needs and interests.

12.19 The following evaluations are planned for 2026:

(a) Independent evaluation of subprogramme 4, Technology and logistics;

(b) Independent evaluation of subprogramme 5, Africa, least developed countries and special programmes (to be submitted in 2027);

(c) Five independent evaluations of completed projects covering various subprogrammes.

Programme of work

Subprogramme 1
Globalization, interdependence and development

Objective

12.20 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development, sustained growth, full employment and decent work for all through evidence-based economic policies and strategies at the national, regional and international levels and to achieve progress towards durable solutions on debt, economic resilience and poverty eradication in developing countries, especially the least developed countries, including through North-South cooperation, complemented but not substituted by South-South and triangular cooperation.

Strategy

12.21 To contribute to the objective, the subprogramme will identify specific needs and measures arising from the interdependence of trade, finance, investment, technology and macroeconomic policies, from the point of view of their effects on development through the three pillars of work of UNCTAD referred to in paragraph 12.2 above. Specifically, the subprogramme will:

(a) Support developing countries in their efforts to formulate development strategies and practical policy options and recommendations at all levels, including through technical cooperation, training and the dissemination of best practices;

(b) Promote cooperation at all levels of the interplay between successful development finance strategies, debt sustainability and effective debt management, in accordance with its mandate and complementing the work done by other relevant stakeholders;

(c) Focus on the challenges in short- and long-term debt sustainability in developing countries;

(d) Support countries in the mobilization of sustainable domestic and international finance for development, which will help member States to make progress towards the achievement of Sustainable Development Goals 16 and 17;

(e) Support countries in engaging in international forums and negotiations on issues including debt and the international financial architecture, by equipping them with relevant analysis and information;

(f) Undertake research and analysis on trends in the global economy and prospects for closer cooperation and integration among developing countries and inform their development strategies, including on specific ways in which South-South cooperation can enhance development effectiveness;

(g) Provide technical assistance and research and analysis to support the Palestinian people, in line with paragraph 127 (bb) of the Bridgetown Covenant and responding to the request of the General Assembly in its resolutions 77/22, on the Committee on the Exercise of the Inalienable Rights of the Palestinian People, and 77/30, on assistance to the Palestinian people;

(h) Analyse the relationship between trade and development and the environment and propose sustainable development policies, in line with paragraph 75 of the Bridgetown Covenant, which requires enhancing the ability of countries and economies to adapt to higher temperatures.

12.22 The above-mentioned work is expected to result in:

(a) Increased coherence between international economic rules, practices and processes and national policies and development strategies;

(b) Strengthened linkages between economic and development policies and decision-making and improvements in the compilation and dissemination of the official statistics of member States;

(c) Strengthened national capacities for effective debt management and an increased understanding at the international level of debt issues and debt sustainability;

(d) Increased understanding by developing countries of the global economic environment and of policy choices for inclusive and sustained development;

(e) Trade and development policies that are responsive to the challenges posed by climate change and the type of support and action needed.

Programme performance in 2024

Small island developing States diagnose funding gaps for the achievement of climate-related Sustainable Development Goals

12.23 The harmful impact of the recent pandemic and further cascading crises on progress towards achieving the Sustainable Development Goals has been recognized by the General Assembly in its resolution 78/1. The scale of the impact is especially acute in small island developing States, making them more vulnerable to economic and financial shocks than other developing countries, which is further compounded by limited financial, technological and policy design capacities. The path to a more sustainable and equitable recovery requires addressing underlying structural fragilities, including the development finance gap, which is also in line with the UNCTAD strategy to support small island developing States. The subprogramme has been working to strengthen the national capacities of selected small island developing States in Africa and Latin America and the Caribbean to mobilize affordable external financial resources for climate resilience and sustainable development, thereby simultaneously achieving climate-related priorities and external financial sustainability. The work in this area includes the development of a sustainable development finance assessment framework for target countries, considering the funding gaps related to the climate-related Goals, and supporting these countries in implementing a national external financial strategy and enhancing their development finance management capacity.

12.24 Progress towards the objective is presented in the performance measure below (see table 12.2).

Table 12.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	Member States have access to the first version of the extended and enhanced UNCTAD Sustainable Development Finance Assessment framework based on needs and requirements related to small island developing States	Enhanced understanding in Belize, Cabo Verde, the Comoros and Saint Vincent and the Grenadines on the funding gaps for achieving the climate-related Sustainable Development Goals while ensuring external financial sustainability, and on changes required to adopt innovative financial instruments in each country

Planned results for 2026

Result 1: developing countries are equipped with policy proposals and measures to develop sustainable industrialization strategies to establish more resilient economies

Programme performance in 2024 and target for 2026

12.25 The subprogramme's work contributed to building consensus among a subgroup of Latin American countries (Brazil, Colombia, Dominican Republic and Honduras) on priority industrial policy measures at the national and regional levels to favour the development of sustainable regional value chains, which met the planned target.

12.26 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.3).

Table 12.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Member States had access to a vast array of sustainable industrial policy options and ideas to mobilize resources to finance sustainable industrialization through the UNCTAD Division on Globalization and Development Strategies publication entitled "South-South cooperation for climate adaptation and sustainable development"	The Bolivarian Republic of Venezuela identified its priority sustainable value chains and Brazil and Honduras started the identification process and definition of the overall integration strategy to be pursued over the period 2024–2027	Consensus reached by Brazil, Colombia, the Dominican Republic and Honduras on priority industrial policy measures to deploy at the national and regional levels to favour the development of sustainable regional value chains	At least two countries in Latin America are prepared and have the capacity to implement the priority industrial policies	Increased capacities of policymakers and other stakeholders from at least five developing countries to formulate sustainable industrial and structural transformation policies

Result 2: enhanced debt data transparency of developing countries

Programme performance in 2024 and target for 2026

12.27 The subprogramme's work contributed to enhanced understanding in developing countries of the interlinkages between debt data transparency and the role of credit rating agencies in determining the cost of sovereign borrowing, which did not meet the planned target of at least three developing countries agreeing to participate in the pilot transparency initiative and guidelines on the implementation of the initiative being made available to the fiscal authorities of the three selected countries. The target was not met due to the request by member States to refocus the subprogramme's work on improving their understanding of the internal functioning and data requirements of credit rating agencies.

12.28 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.4).

Table 12.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
New approach to increase debt transparency available to member States	Informal discussions and consultations resulting in at least three countries expressing interest in being involved in the pilot initiative	Enhanced understanding by 16 developing countries of the interlinkages between debt data transparency and the role of credit rating agencies, including their data requirements	Improved data collection, monitoring and transparency on public debt in three developing countries	Improved interactions between at least three developing countries and credit rating agencies

Result 3: developing economies design sustainable industrial and structural transformation policies through South-South and triangular cooperation

Proposed programme plan for 2026

12.29 The Bridgetown Covenant highlights the close link between developing countries' ability to pursue viable development strategies and the impact of climate change on their structural transformation efforts. South-South cooperation is an essential element of multilateral negotiations on climate change adaptation and mitigation. Thus, the subprogramme has supported developing countries in Asia in assessing the status of their capacities to design industrial policies that foster sustainable structural transformation through South-South and triangular cooperation.

Lessons learned and planned change

12.30 The lesson for the subprogramme was that informal policy networks and partnerships established at the regional level for South-South cooperation can have a beneficial impact on advancing sustainable industrialization and climate resilience. In applying the lesson, the subprogramme will increase its efforts and participation in these networks and will further use its advanced toolkit to help to advance sustainable industrialization policies in developing countries through regional cooperation, including by extending its work to the Africa and Latin America regions.

12.31 Expected progress towards the objective is presented in the performance measure below (see table 12.5).

Table 12.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Capacity gaps and binding constraints for sustainable industrialization policies in Türkiye are identified	Capacity gaps and binding constraints for sustainable industrialization policies in Pakistan are identified	Capacity gaps and binding constraints for sustainable industrialization policies identified in Kazakhstan and Malaysia	Enhanced capacity of four developing countries in Asia to design and implement integrated policies for sustainable transformation and industrialization	A regional South-South policy platform is established in Latin America to facilitate peer-to-peer policy coordination, synergies and learning on

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
			A regional network to strengthen South-South cooperation on sustainable industrialization is established and used regularly by policymakers from at least four countries in Asia	sustainable industrialization At least four countries in Africa join South-South cooperation platforms on sustainable industrialization in Asia and Latin America

Deliverables

12.32 Table 12.6 lists all deliverables of the subprogramme.

Table 12.6
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**6**	**6**	**7**	**6**
1. Reports for the General Assembly, including on external debt sustainability and development and the economic cost of occupation for the Palestinian people	2	2	2	2
2. Reports for the Trade and Development Board, including on financing for development issues and on UNCTAD assistance to the Palestinian people	2	2	2	2
3. Reports for the sixteenth quadrennial session of UNCTAD	–	–	1	–
4. Reports for the Trade and Development Commission and the Investment, Enterprise and Development Commission	1	1	1	1
5. Reports for the Intergovernmental Group of Experts on Financing for Development	1	1	1	1
Substantive services for meetings (number of three-hour meetings)	**19**	**14**	**30**	**27**
Meetings of:				
6. The General Assembly (Second Committee) and the Economic and Social Council and its subsidiary bodies	4	2	4	4
7. The Trade and Development Board	3	2	3	3
8. The Working Party on the Programme Plan and Programme Performance	2	2	2	2
9. The sixteenth quadrennial session of UNCTAD, including preparatory meetings	–	–	12	–
10. The Trade and Development Commission and related multi-year expert meetings	3	2	3	6
11. The Intergovernmental Group of Experts on Financing for Development	6	6	6	6
12. The Debt Management Conference	1	–	–	6
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**16**	**16**	**16**	**11**
13. Enhancing public, private and/or international capacity related to assistance to the Palestinian people	1	–	1	1
14. Installation, update and maintenance of the Debt Management and Financial Analysis System	15	16	15	10

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Seminars, workshops and training events (number of days)	**142**	**168**	**142**	**162**
15. Seminars and workshops for policymakers, including on formulating development strategies and policy recommendations; sovereign borrowing and lending; and globalization, trade and development	22	43	22	20
16. Seminars on inclusive growth and the Sustainable Development Goals, including ad hoc expert discussions on the interdependence between trade, finance, investment, technology and macroeconomic policies	5	5	5	2
17. Training events on Debt Management and Financial Analysis System for administrators and debt auditors from selected countries in recording debt data, reporting, debt statistics, debt analysis and debt auditing	115	120	115	140
Publications (number of publications)	**6**	**7**	**6**	**5**
18. *Trade and Development Report* and its overview	1	2	1	2
19. Studies on external debt, resource mobilization, South-South cooperation, regional integration and Palestinian economic development	5	5	5	3
Technical materials (number of materials)	**7**	**5**	**7**	**10**
20. On macroeconomic, development, financing and debt, structural transformation and South-South cooperation issues	4	2	4	5
21. Debt Management and Financial Analysis System documentation and software	3	3	3	5

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to policymakers, including on domestic resource mobilization, structural transformation, growth policy (Group of 20), debt renegotiation at the Paris Club, financial instability and debt sustainability.

Databases and substantive digital materials: UNCTAD financial database; world economic macro-level modellers database; financial stress and debt sustainability indicators.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures and presentations on external debt, development finance and macroeconomic and development policy issues; newsletters and brochures on the Debt Management and Financial Analysis System and the Virtual Institute.

External and media relations: press releases, press conferences and interviews, including on developing country debt and external financing, South-South cooperation and regional integration and assistance to the Palestinian people.

Digital platforms and multimedia content: Debt Management and Financial Analysis System; Virtual Institute.

Subprogramme 2
Investment and enterprise

Objective

12.33 The objective, to which this subprogramme contributes, is to advance inclusive growth and sustainable development through investment and enterprise development for productive capacity-building, economic diversification and job creation.

Strategy

12.34 To contribute to the objective, the subprogramme will:

(a) Assist member States through research, policy analysis and technical assistance in designing and implementing policies to scale up mobilization of public and private finance and enhanced investment and entrepreneurship for sustainable development;

(b) Monitor, assess and analyse regional and global trends and prospects in international investment and prepare the annual World Investment Report and other analytical publications on international investment for development;

(c) Conduct reviews of national investment policies and backstop policy dialogue on the international investment agreement regime and support and design new international investment agreements that are better aligned with nationally and internationally agreed development objectives;

(d) Provide policy advice to Governments on investment promotion, including on incentives in the context of the global tax reform implications for developing countries, and support with the implementation of business practices and investment facilitation for development agreements, including through digital government tools;

(e) Promote innovative financing for the Sustainable Development Goals, including through stock exchanges and institutional funds, as well as incentives in the context of the global tax reform implications for developing countries;

(f) Support enhancement of the international competitiveness of member States' enterprises through advice on policies aimed at stimulating enterprise development, including mobilizing global efforts in financing and investment in micro-, small and medium-sized enterprises to support their sustainable development transformation, as well as by promoting best practices in corporate social responsibility, accounting and sustainability reporting;

(g) Foster dialogue and an exchange of best practices related to investment and enterprise development issues through consensus-building mechanisms and the World Investment Forum;

(h) Provide an assessment of the impact of multiple and cascading challenges on investment, global value chains and enterprise development, as well as policy advice, frameworks and tools for recovery.

12.35 The above-mentioned work is expected to result in:

(a) Increased capacity of member States to close the gaps related to Sustainable Development Goal investment, especially with regard to climate change mitigation and adaptation, in particular for countries that are most vulnerable to the adverse impacts of climate change;

(b) Improved ability of countries to leverage policies, innovations and tools, and to address key and emerging issues related to investment and investment policies that promote development, including policies on international investment agreements and on the opportunities of remittances and diaspora investment for development;

(c) Member States collecting, analysing and reporting on foreign direct investment and multinational enterprise data and formulating development-oriented investment policies;

(d) Additional resources leveraged and channelled towards global investment development objectives and addressing concerns pertaining to "SDG washing" and "greenwashing";[1]

(e) Increased productive capacity, including through attracting investment capital, growing business linkages with multinational enterprises and participating in global and regional value chains;

(f) Mitigation of the effect of multiple and cascading challenges on the ability of member States to attract and benefit from investment for development and in fostering private sector recovery;

(g) Progress by member States towards the achievement of Sustainable Development Goals 1, 4, 5, 8, 9, 10, 12, 13, 16 and 17.

[1] The terms "SDG washing" and "greenwashing" refer to products and strategies presented as sustainable without making a meaningful contribution to sustainable development, including the achievement of the Sustainable Development Goals.

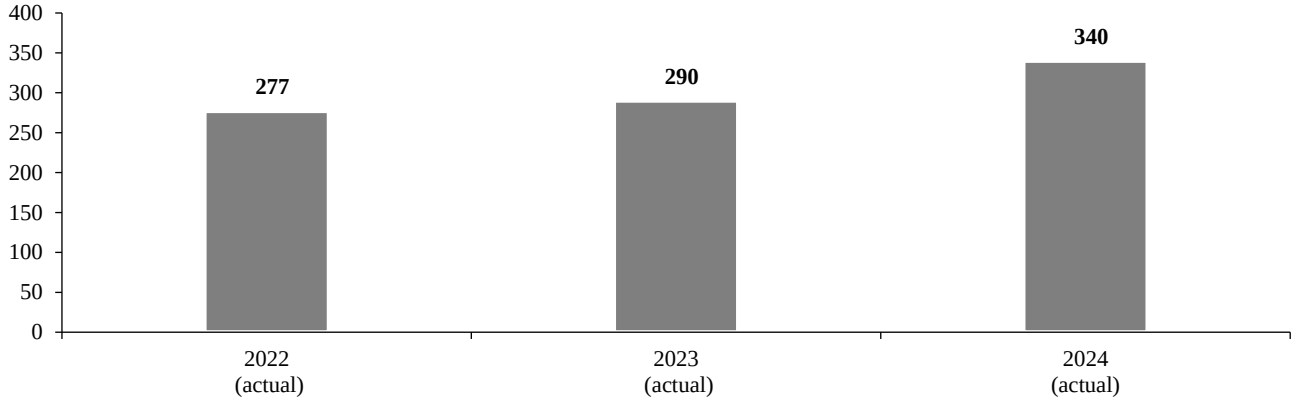
Programme performance in 2024

Improved sustainability practices in investment and finance ecosystems

12.36 The mobilization of funds for Sustainable Development Goal investment through sustainable finance products in global capital markets continues to grow, though at a slower pace, due to increasing concerns regarding greenwashing. Greenwashing poses a significant challenge to the sustainable fund market and an obstacle to tackling climate change, as it promotes false solutions to the climate change crisis that distract from and delay concrete, credible action. To improve sustainability practices in investment, the subprogramme has been providing policy guidance and tools to member States. In 2024, this included launching new tools such as the Sustainability Integration Framework for Institutional Investors, conducting capacity-building activities for regulators, stock exchanges and institutional investors and raising awareness through instruments such as the sustainable funds database, the Sustainable Finance Regulations Platform and the Asset Owner Rankings. All this work contributed to increased transparency and the promotion of credible action to improve sustainability practices.

12.37 Progress towards the objective is presented in the performance measure below (see figure 12.I).

Figure 12.I
Performance measure: number of stakeholders using tools and instruments developed by the United Nations Conference on Trade and Development to promote sustainable investment finance (cumulative)



Planned results for 2026

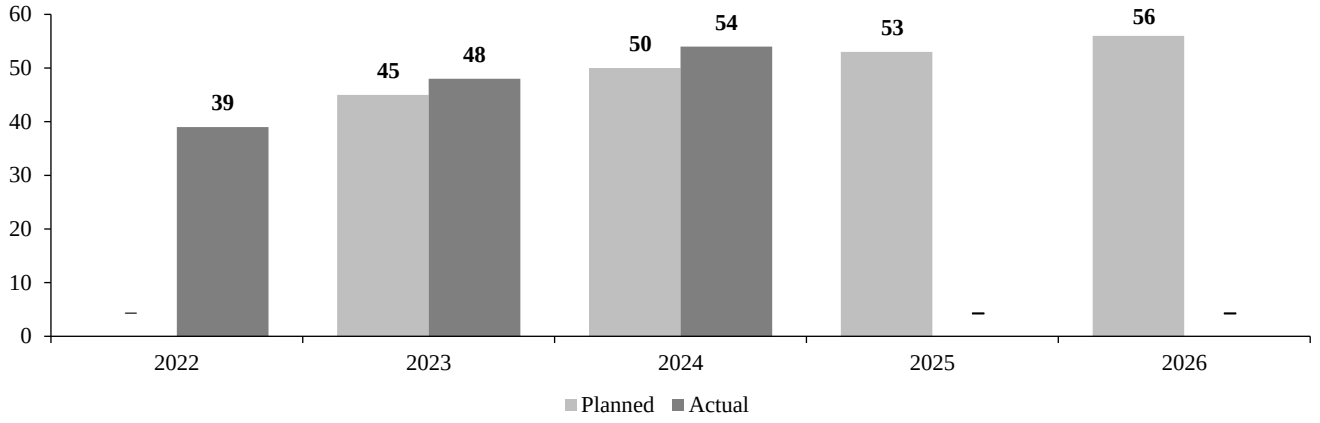
Result 1: investment financing strategies and tools to decouple economic growth from environmental degradation

Programme performance in 2024 and target for 2026

12.38 The subprogramme's work contributed to 54 member States adopting UNCTAD financing strategies and tools in support of the attainment of climate and environmental goals of the 2030 Agenda, which exceeded the planned target of 50 member States.

12.39 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 12.II).

Figure 12.II
Performance measure: number of member States adopting United Nations Conference on Trade and Development investment financing strategies and tools in support of the attainment of the climate and environmental goals of the 2030 Agenda (cumulative)



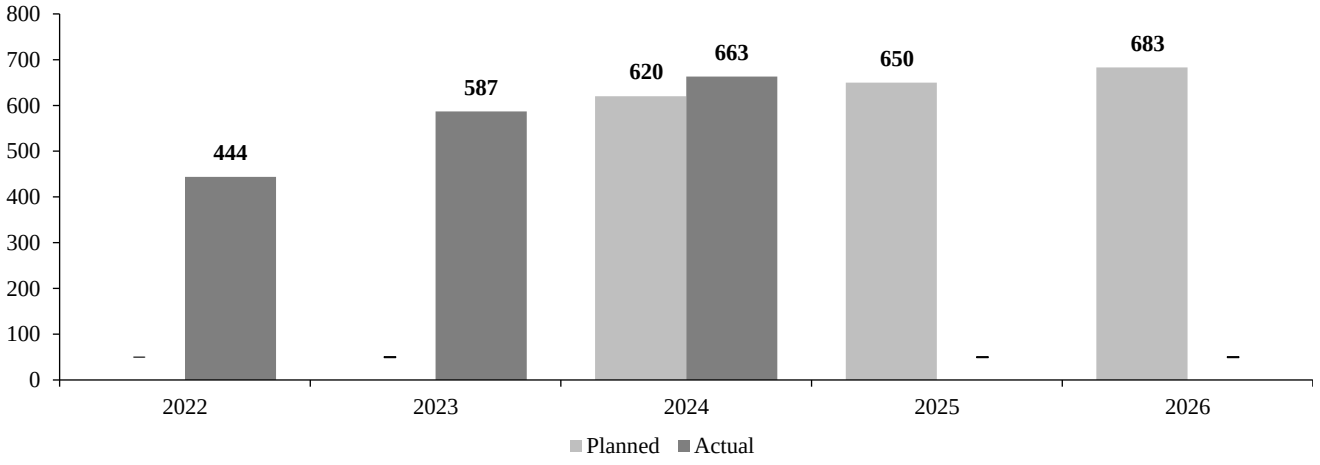
Result 2: accelerated Sustainable Development Goal investment

Programme performance in 2024 and target for 2026

12.40 The subprogramme's work contributed to 663 investment-development stakeholders adopting recommendations from the set of priority actions identified by UNCTAD to accelerate investment in the Sustainable Development Goals, which exceeded the planned target of 620 investment-development stakeholders.

12.41 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 12.III).

Figure 12.III
Performance measure: number of investment-development stakeholders that have adopted recommendations from the set of priority actions to accelerate investment in the Sustainable Development Goals (cumulative)



Result 3: member States foster conducive business and investment climate

Proposed programme plan for 2026

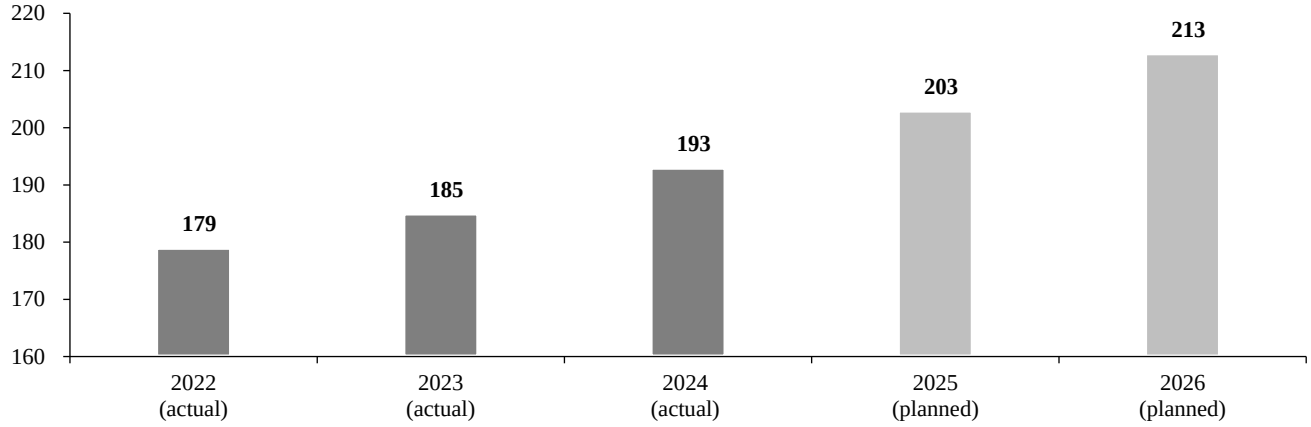
12.42 In 2024, UNCTAD reported a 26 per cent fall in international project finance. Therefore, further efforts are required to promote and facilitate investment for development. The development of smart industrial policies at the national and regional levels, a conducive business environment, with clear and predictable investment rules, and the development of absorptive capacities, including through a resilient and competitive micro-, small and medium-sized enterprise sector, are a prerequisite for building a more sustainable and resilient economy. The subprogramme has supported member States in promoting and facilitating investment for development, including by offering digital tools to facilitate the provision of information, transparent rules and regulations and streamlined administrative procedures. In 2024, out of the 193 instruments adopted in support of a better business environment, a total of 102 electronic business facilitation platforms were implemented by member States with the support of the subprogramme, documenting over 4,000 procedures and reducing business registration steps by 80 per cent.

Lessons learned and planned change

12.43 The lesson for the subprogramme was that it could augment the nature and scope of the support provided to member States, given that digital investment facilitation should go beyond investment procedures and become a stepping stone for wider digital government implementation, thereby addressing governance challenges that often undermine investor confidence. In applying the lesson, the subprogramme will support member States in reaping the benefits of digital government for the promotion of investment in sustainable and inclusive development through the formulation of specific recommendations and the development of instruments in support of a better business environment.

12.44 Expected progress towards the objective is presented in the performance measure below (see figure 12.IV).

Figure 12.IV
Performance measure: number of instruments adopted by member States in support of a better business environment (cumulative)



Deliverables

12.45 Table 12.7 lists all deliverables of the subprogramme.

49. On measures affecting international investment	2	2	2	2
50. International investment agreement issues notes	3	3	3	3
51. On responsible and impact investment for sustainable development	1	–	2	2
52. On enterprise development and entrepreneurship policy support	2	4	1	1

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to developing countries, including on policies to attract foreign direct investment; advice on statistics and international investment, including responsible investment; advice to all member States, upon request, on national policies and international investment agreements and sustainable development, as well as investment promotion and facilitation, entrepreneurship and enterprise development and business facilitation, with a focus on the most vulnerable, and on accounting and reporting standards; and advocacy and advisory services to some 200 investment promotion agencies, over 5,000 special economic zones and other stakeholders in the global investment chain and some 50 EMPRETEC centres.

Databases and substantive digital materials: databases on foreign direct investment, national policies, international investment agreements and related databases; sustainable finance and gender equality databases.

D. Communication deliverables

External and media relations: International Standards of Accounting and Reporting updates, electronic EMPRETEC newsletters for more than 2,000 subscribers and newsletters, booklets and newsflashes on responsible investment; World Investment Forum report for more than 8,000 recipients; development and maintenance of the World Investment Network of over 18,000 recipients.

Digital platforms and multimedia content: Global Enterprise Registration portal; Investment Policy Hub; other digital platforms pertaining to investment and enterprise for development.

Subprogramme 3
International trade and commodities

Objective

12.46 The objective, to which this subprogramme contributes, is to ensure that international trade and commodities enable the economic diversification, sustainable and resilient economy and multilateralism transformations needed to create a more inclusive, resilient, sustainable and prosperous world through the participation of all member States.

Strategy

12.47 To contribute to the objective, the subprogramme will:

(a) Support developing countries in fostering structural transformation through economic diversification towards a more sustainable and resilient economy;

(b) Enhance the participation of developing countries in the multilateral and regional trading systems, ensuring that developing countries' participation in trade in goods and services at all levels of the value chain, including through broader UNCTAD support for the analysis and utilization of the relevant data, works as a driver for inclusive and sustainable development;

(c) Support the adoption of, improvement in and enforcement of national and regional competition and consumer protection legislation, through best practices, guidelines and peer reviews;

(d) Strengthen the capacity of trade policymakers to make well-informed policy decisions through improved understanding of and transparency in international trade and trade policy trends and trade-related regulations, and build private sector capacities to cope with policy and market requirements;

(e) Foster the mainstreaming of gender equality into trade policies and build the capacity of member States through research findings, training workshops and policy dialogues to design and implement trade policies that allow women to benefit more from the opportunities arising from international trade;

(f) Contribute to research on international trade as an engine for development in the report of the Inter-Agency Task Force on Financing for Development, *The Sustainable Development Goals Report*, *World Tariff Profiles* and *World Economic Situation and Prospects*;

(g) Monitor and report on current trade trends and policies and their impact on inclusive, sustainable and resilient development to provide policy recommendations to member States;

(h) Examine the effects of climate change in terms of trade on developing countries, and how environmental sustainability can promote global trade and inclusive development, including through trade policies facilitating global energy transition and supporting the competitiveness of developing countries in the production and trade of renewable and low-emission energy;

(i) Support member States, through research, capacity-building activities and the fostering of policy dialogue, in their efforts to break away from commodity dependence and realize trade and economic diversification gains, including for critical minerals, by adding value to their commodities and strengthening non-commodity activities.

12.48 The above-mentioned work is expected to result in:

(a) Enhanced understanding and policy response regarding current trends in the global economy, including ongoing environmental degradation, and improved ability of member States to benefit from international trade and foster the recovery of the trade sectors;

(b) Member States designing and implementing trade-policy responses to climate change from a development perspective;

(c) Member States identifying and addressing the trade barriers and supply-side obstacles that disproportionately affect women and girls;

(d) Member States and the international community understanding and addressing the cost and market access impacts of non-tariff measures, as well as their beneficial use for inclusive and sustainable development policies;

(e) Member States achieving positive development outcomes in relation to increased trade integration and activity;

(f) Member States seizing opportunities emerging from commodity trade and enhanced international and regional cooperation;

(g) Member States' increased adoption, revision and/or effective implementation of competition and consumer protection legislation and institutional frameworks;

(h) Member States harnessing opportunities related to trade in environmentally sustainable products, and increasing capacities to assess the economic potential of the ocean, biodiversity and plastic substitutes-related sectors, and devising integrated sustainable use and trade action plans;

(i) Member States creating an enabling environment for the promotion of services and the creative economy to leapfrog into new, high-growth sectors of the world economy;

(j) Progress by member States towards the achievement of Sustainable Development Goals 1, 2, 3, 5, 7, 8, 9, 12, 13, 14 and 17.

Programme performance in 2024

Improved competition and consumer laws and policies in developing countries

12.49 Competition law and policies stimulate innovation, productivity and competitiveness, contributing to an effective business environment and thereby generating economic growth and employment. The subprogramme has been supporting Portuguese-speaking countries in fostering a culture of competition law and policy and establishing a framework for ongoing regional cooperation. The

subprogramme contributed to increased knowledge of emerging competition issues among competition and sectoral regulatory experts by conducting four training events with government officials from six countries, including representatives of Brazil and Portugal. Further, the subprogramme has supported the drafting of the competition law of Timor-Leste as part of its WTO accession (2024), the development of the new Mozambique leniency programme to facilitate the enforcement of laws against anti-competitive practices, and ongoing assessments of the competition and consumer protection laws of Guinea-Bissau. Furthermore, Guinea-Bissau, Sao Tome and Principe and Timor-Leste have integrated competition policy into their development strategies.

12.50 Progress towards the objective is presented in the performance measure below (see table 12.8).

Table 12.8
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Timor-Leste competition law drafted	Enhanced cross-border collaboration and enforcement capacity of member States through the conclusion of seven bilateral memorandums of understanding on competition among Portuguese-speaking African member States, Brazil and Portugal	Guinea-Bissau and Mozambique revised their competition and consumer protection legal frameworks Mozambique leniency programme implemented

Planned results for 2026

Result 1: enhanced policymaking to facilitate economic diversification through increased data capacities in services trade

Programme performance in 2024 and target for 2026

12.51 The subprogramme's work contributed to Iraq and Uzbekistan implementing services trade-related policies informed by better data collection and use, which did not meet the planned target of at least three additional countries adopting, revising or implementing services trade-related policies. The target was not met as the subprogramme's planned work to support the State of Palestine could not be undertaken in 2024.

12.52 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.9).

Table 12.9
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Member States benefit from the establishment of an open-ended and time-bound working group on data for services trade and development policies	Angola and Uzbekistan revised their services trade-related policies informed by better data collection and use	Iraq and Uzbekistan implemented services trade-related policies informed by better data collection and use	At least four additional countries adopt, revise or implement services trade-related policies	At least two additional countries adopt, revise or implement services trade-related policies

Result 2: strengthened implementation of nationally determined contributions through trade policies by developing countries

Programme performance in 2024 and target for 2026

12.53 The subprogramme's work contributed to recommendations on trade-related measures for reducing greenhouse gas emissions in nationally determined contributions and a framework for the increased use of trade measures in nationally determined contributions being made available to member States, which met the planned targets.

12.54 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.10).

Table 12.10
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
–	Preliminary mapping of trade-related measures in nationally determined contributions, and a pilot analysis on fishing fleets and the energy transition, were available to member States	Recommendations on trade-related measures for reducing greenhouse gas emissions in nationally determined contributions made available to member States A framework for the increased use of trade measures in nationally determined contributions made available to member States	At least one pilot country increases the integration of trade policies in its nationally determined contributions Trade and development policy capacity of 100 decision makers and stakeholders is increased	At least two pilot countries increase the integration of trade policies in their nationally determined contributions Trade and development policy capacity of 200 decision makers and stakeholders is increased

Result 3: member States harness critical energy transition minerals for sustainable development

Proposed programme plan for 2026

12.55 Global demand is soaring for critical energy transition minerals such as copper, lithium, nickel and cobalt. Developing countries hold most of the world's critical mineral reserves, with African countries accounting for about 25 per cent of global reserves. This is an opportunity to create jobs, diversify economies and boost revenues. To allow these countries to move beyond raw material supply, the subprogramme has been supporting them in identifying issues related to trade in critical minerals, climate action and sustainable development, and in exploring pathways for economic diversification in commodity-dependent developing countries. Furthermore, in 2024 the United Nations Secretary-General's Panel on Critical Energy Transition Minerals outlined key principles and actionable recommendations that will be used by the subprogramme to assist countries.

Lessons learned and planned change

12.56 The lesson for the subprogramme was that African economies, particularly least developed countries, require increased support in order to harness critical energy transition minerals for sustainable development through benefit-sharing, value addition and economic diversification. In applying the lesson, the subprogramme will support member States in understanding their comparative and competitive advantages in value chains and their institutional readiness. The subprogramme will assist developing countries endowed with critical energy transition minerals with a rapid assessment of their: (i) strategic positioning in selected value chains; (ii) diversification endowment; and (iii) institutional strengths and weaknesses. It will also enhance policymakers' capacity to improve regulatory and institutional frameworks and to collect and use data.

12.57 Expected progress towards the objective is presented in the performance measure below (see table 12.11).

Table 12.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Pathways to economic diversification in commodity-dependent developing countries endorsed by member States in the context of the 2022 Multi-year Expert Meeting on Commodities and Development	Critical energy transition minerals issues are further advanced through the adoption by the General Assembly of resolution 78/138 on commodities	Member States have access to principles and recommendations on benefit-sharing, value addition and economic diversification through the report issued by the United Nations Secretary-General's Panel on Critical Energy Transition Minerals	At least two countries adopt, revise or implement policies for harnessing critical energy transition minerals for sustainable development	At least two additional countries adopt, revise or implement policies for harnessing critical energy transition minerals for sustainable development

Deliverables

12.58 Table 12.12 lists all deliverables of the subprogramme.

Table 12.12
Subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**19**	**18**	**21**	**17**
1. Reports to the General Assembly on international trade and development and world commodity trends and prospects	1	1	2	1
2. Background documentation for the sixteenth quadrennial session of UNCTAD	–	–	1	–
3. Reports for the Trade and Development Board	3	3	3	1
4. Background documentation for the Trade and Development Commission	6	6	6	1

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
5. Background documentation for the Multi-year Expert Meeting on Commodities and Development	–	–	–	3
6. Background documentation for the Multi-year Expert Meeting on Trade, Services and Development	–	–	–	2
7. Reports of the Intergovernmental Group of Experts on Competition Law and Policy and the Intergovernmental Group of Experts on Consumer Protection Law and Policy	9	8	9	9
Substantive services for meetings (number of three-hour meetings)	**33**	**34**	**46**	**30**
8. Meetings of the General Assembly (Second Committee)	2	2	2	1
9. Meetings of the sixteenth quadrennial session of UNCTAD	–	–	15	–
10. Annual and executive sessions of the Trade and Development Board	2	2	2	2
11. Meetings of the Working Party on the Programme Plan and Programme Performance	2	4	2	3
12. Meetings of the annual sessions of the Trade and Development Commission and related expert meetings	16	15	14	2
13. Meetings of the annual sessions of the Multi-year Expert Meeting on Commodities and Development	–	–	–	6
14. Meetings of the annual sessions of the Multi-year Expert Meeting on Trade, Services and Development	–	–	–	6
15. Meetings of the annual sessions of the Intergovernmental Group of Experts on Competition Law and Policy and the Intergovernmental Group of Experts on Consumer Protection Law and Policy	10	10	10	10
16. Annual meeting of the Intergovernmental Forum on Mining, Minerals, Metals and Sustainable Development	1	1	1	–
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**20**	**19**	**20**	**18**
17. On trade, a gender perspective and development	1	–	1	1
18. On assisting developing countries in acceding to WTO, on generalized and global systems of trade preferences, on services, regional and multilateral trading negotiations, on strengthening the creative economy, and on dispute settlement and commercial diplomacy	6	6	6	5
19. On competition and consumer protection laws and policies	4	5	3	3
20. On trade, the environment and development	4	3	4	3
21. On collecting, monitoring, reporting on and disseminating data on non-tariff measures, on formulating development-oriented trade policies, and on sustainability standards	3	5	4	4
22. On assistance to commodity-dependent countries in achieving greater diversification and value addition	2	–	2	2
Seminars, workshops and training events (number of days)	**156**	**165**	**170**	**167**
23. On the World Integrated Trade Solution, the Trade Analysis and Information System and non-tariff measures, and sustainability standards	27	26	31	30
24. On preferential trading arrangements, WTO accession, services policies and frameworks, emerging development challenges in the international trading system and trade, international trade negotiations, and the creative economy	39	40	44	42
25. On trade, a gender perspective and development	12	9.5	12	11
26. On trade, the environment and development	29	45	29	35
27. On competition and consumer protection laws and policies	27	30	33	31
28. On supporting commodity-dependent developing countries to formulate strategies and policies and harness development gains, and respond to the challenges and opportunities of commodity markets	14	10.5	10	10
29. On challenges and opportunities of international trade for the promotion of sustainable development, and on the changing international trade landscape and trade costs	3	3	6	4

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
30. Ad hoc expert discussions on the role of competition law and policy, and on consumer protection law and policy	1	1	1	1
31. Geneva Trade and Development Workshop series, held jointly by UNCTAD, WTO, the University of Geneva and the Graduate Institute of International and Development Studies	4	–	4	–
32. Annual meeting of the Intergovernmental Forum on Mining, Minerals, Metals and Sustainable Development	–	–	–	3
Publications (number of publications)	**26**	**29**	**17**	**22**
33. On trade and the environment	4	6	4	5
34. On trade, a gender perspective and development	3	1	2	2
35. On trade, services, the international trading system and the creative economy	4	6	3	3
36. On trade trends and policy in the international context	8	10	3	6
37. On trade, market efficiency and consumer welfare and on competition and consumer protection policies	4	3	2	3
38. On trade, commodities, economic diversification and value addition	3	3	3	3
Technical materials (number of materials)	**13**	**17**	**12**	**16**
39. Global Trade Update	–	–	–	3
40. Reports on UNCTAD work on competition and consumer protection policies and on the Global Commodities Forum	2	6	2	2
41. Handbooks and policy briefs on classification of non-tariff measures, the Generalized System of Preferences and effective competition and/or consumer protection agencies	3	3	3	3
42. *Manual on Consumer Protection*	1	1	1	1
43. Model law on competition	1	1	1	1
44. On competition and consumer protection under the UNCTAD Research Partnership Platform	1	1	1	1
45. UNCTAD, WTO and ITC publication *World Tariff Profiles*	1	1	1	1
46. Trade-related aspects of the *Sustainable Development Goals Report*	1	1	1	1
47. United Nations Forum on Sustainability Standards	1	1	–	1
48. On topics in international trade negotiations	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advice on trade-related decision-making to five member States and two regional South-South economic integration groupings; advice on integration into the global economy and participation in regional and multilateral trade agreements; advice on integration of trade concerns into national trade and services policies; consultation on cooperation and partnerships for inclusive growth and sustainable development; advice on trade and a gender perspective; advice on developing competition and consumer protection frameworks; consultation on trade and environment issues and creative economy potential for sustainable development.

Databases and substantive digital materials: World Integrated Trade Solution and Trade Analysis and Information System; online training courses on non-tariff measures for approximately 300 people and on negotiating regional trade agreements for trade in times of crisis and pandemic; a teaching package on trade and a gender perspective.

D. Communication deliverables

Outreach programmes, special events and information materials: multi-stakeholder meeting on commodities and development; BioTrade Congress; event on trade and a gender perspective; event on the creative economy; lectures and exhibits on issues related to the work of the subprogramme; newsletters, brochures, flyers, booklets and fact sheets related to the work of the subprogramme.

External and media relations: news items, press releases, op-ed pieces and media appearances, including podcasts.

Digital platforms and multimedia content: interactive tools related to national competition and consumer protection laws, commercial diplomacy and dispute settlement; UNCTAD, WTO and ITC website on trade-related Sustainable Development Goals and indicators.

Subprogramme 4
Technology and logistics

Objective

12.59 The objective, to which this subprogramme contributes, is to harness innovation and technology, including e-commerce and the digital economy, improve trade logistics and increase human capacities for inclusive and sustainable trade and development in developing countries and economies in transition.

Strategy

12.60 To contribute to the objective, the subprogramme will:

(a) Provide research and analysis and policy recommendations for capturing value in the digital economy and generating more inclusive outcomes, including through the flagship publication *Digital Economy Report*, and support developing countries in measuring e-commerce and the digital economy;

(b) Foster and ensure that the interests of developing countries are identified and integrated into international policy dialogues on e-commerce and the digital economy, including through the Intergovernmental Group of Experts on E-commerce and the Digital Economy and UNCTAD eWeek;

(c) Assist developing countries in systematically assessing the state of play and readiness to engage and integrate into the digital economy, through eTrade Readiness Assessments, e-commerce strategies and action plans, as well as by providing sustained support for their implementation, including through the eTrade Reform Tracker, to facilitate the coordination, monitoring and follow-up of national e-commerce policy reform actions;

(d) Ensure that international debates on science, technology and innovation incorporate the perspectives and priorities of developing countries through the Commission on Science and Technology for Development and the Technology Facilitation Mechanism, among others;

(e) Inform policies and deliberations on science, technology and innovation for development, especially on frontier technologies, through research and analysis, such as the flagship publication *Technology and Innovation Report* and other reports analysing policy options, including for the Inter-Agency Task Force on Financing for Development;

(f) Develop the knowledge of policymakers on various aspects of trade policies and interrelated issues of finance, investment and technology and sustainable development, and build the capacities of member States in science, technology and innovation for development, including through science, technology and innovation policy reviews, technology assessment and foresight exercises;

(g) Support implementation of trade facilitation reforms, in particular the WTO Agreement on Trade Facilitation, and enhance its support for the development and implementation of appropriate legal and regulatory frameworks that reduce trade transaction costs, as well as supporting trade facilitation reforms and automation through the Automated System for Customs Data;

(h) Provide technical assistance, data and policy recommendations and promote the sharing of best practices on the formulation and integration of strategic national policies of developing countries into regional and global supply and value chains and transport networks, through the flagship publication *Review of Maritime Transport* and other research products, legislative frameworks and capacity-building, including the Training Development in the Field of International Trade (TrainForTrade) programme on port management;

(i) Foster international policy dialogue on trade logistics issues, ensuring that the interests and specific challenges facing developing countries are addressed in relevant regional and international forums, and in this context continue to address specific trade logistics challenges affecting small island developing States and landlocked developing countries;

(j) Mainstream the cross-cutting issue of gender equality and the empowerment of women and girls across the three pillars of the subprogramme, with a special focus on empowering women digital entrepreneurs and enhancing their digital skills and opportunities.

12.61 The above-mentioned work is expected to result in:

(a) Improved capacity and policy formulation at the national, regional and global levels on e-commerce and digital economy for sustainable and inclusive development;

(b) Improved coordination among Governments, together with development partners, civil society and the private sector, to implement policies on e-commerce and the digital economy that work for sustainable and inclusive development;

(c) Improved knowledge and understanding of policy options by policymakers and international consensus on emerging challenges and opportunities in science, technology and innovation for sustainable and inclusive development, as well as increased capacity of policymakers to assess, analyse and formulate policies on key issues on the international economic agenda;

(d) Member States implementing the outcomes of the World Summit on the Information Society and of the Technology Facilitation Mechanism;

(e) Member States harnessing science, technology and innovation for their national development strategies;

(f) Countries addressing key and emerging issues in trade logistics, including maritime transport policies and port management;

(g) Member States implementing trade facilitation reforms, including the WTO Agreement on Trade Facilitation;

(h) Enhanced capacity of member States to design and implement policies and action aimed at improving the efficiency of trade transactions, as well as the management of transport operations, including through the Automated System for Customs Data programme.

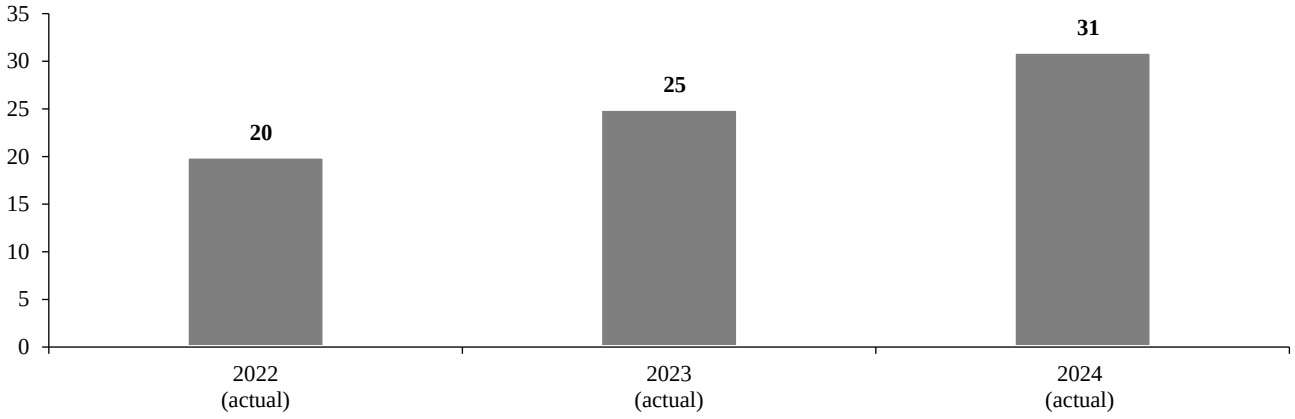
Programme performance in 2024

Enhanced capacity of young women scientists to leverage science, technology and innovation for sustainable economic development

12.62 Training young female scientists from developing countries in science, technology, engineering and mathematics fields can advance gender equality and the achievement of Sustainable Development Goal 5, and enable scientific progress, economic development and global cooperation while adding more diverse voices in research and innovation worldwide. The subprogramme and Okayama University in Japan joined forces to build the capacity of women researchers in developing countries through the Young Female Scientist Programme, an initiative under the Commission on Science and Technology for Development. In addition to training, mentorship and development in science, technology, engineering and mathematics fields, in 2024 the programme provided a platform for female researchers and entrepreneurs to network and share experiences on development issues in their areas of expertise.

12.63 Progress towards the objective is presented in the performance measure below (see figure 12.V).

Figure 12.V
Performance measure: number of young women scientists from developing countries completing the training in science, technology, engineering and mathematics fields (cumulative)



Planned results for 2026

Result 1: efficient and resilient port management in developing countries for their integration into regional and global supply chains

Programme performance in 2024 and target for 2026

12.64 The subprogramme's work contributed to eight additional port entities in seven countries adopting policy measures to improve resilience resulting from increased skills and capacities of 1,325 port practitioners from 142 port communities related to ports management during pandemics and disruptions, which exceeded the planned targets of at least five additional port entities and 1,200 port practitioners from 130 port communities.

12.65 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.13).

Table 12.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Increased essential skills and capacities of 1,000 port practitioners from 112 port communities related to ports management during pandemics and disruptions	12 port entities in 12 countries (Bolivia (Plurinational State of), Cameroon, Ecuador, Ghana, Namibia, Pakistan, Philippines, Senegal, Solomon Islands, Somalia, Togo and United Republic of Tanzania) adopted policy measures to improve resilience by delivering more	Eight additional port entities in Bolivia (Plurinational State of), Côte d'Ivoire, Dominican Republic, Gambia, Haiti, Mauritania and Papua New Guinea adopted policy measures to improve resilience resulting from increased essential skills and capacities of 1,325 port	At least 10 port entities adopted policy measures identified in the compendium on building port resilience against pandemics	The lessons learned and experiences of new policy measures shared among 100 port entities

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
	efficient port management in order to increase trade flows and by creating port networks	practitioners from 142 port communities related to ports management during pandemics and disruptions		

Result 2: improved availability of digital economy statistics in developing countries

Programme performance in 2024 and target for 2026

12.66 The subprogramme's work contributed to 23 member States participating in developing internationally agreed guidelines and recommendations on measuring e-commerce value, which met the planned target.

12.67 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.14).

Table 12.14
Performance measure

2022 (actual)	2023 (actual)	2024 (actual)	2025 (planned)	2026 (planned)
–	Establishment of the international task group on measuring e-commerce value	23 member States participated in developing internationally agreed guidelines and recommendations on measuring e-commerce value	At least two countries start using the internationally agreed guidelines	An additional two countries start using the guidelines

Result 3: enhanced efficiency and sustainability of trade procedures

Proposed programme plan for 2026

12.68 Harnessing digital technologies is becoming ever more critical for tackling the effects of climate change. While the Sustainable Development Goals have defined measurable targets for member States to assess their transition to a climate-resilient and sustainable economy, many developing countries are facing a tougher burden from the crisis of climate change and are lagging behind in the transition due to a lack of financial and technological resources. To ensure that trade is part of the solution, the subprogramme has been working closely with developing countries through its Automated System for Customs Data, which helps countries to increase public revenues, reduce costs and ease trade while eliminating the use of paper, promoting sustainable transport and improving supply chain efficiency, as supported by data on the ground showing a reduction in paper use by up to 90 per cent and reduced emissions in the clearance processes.

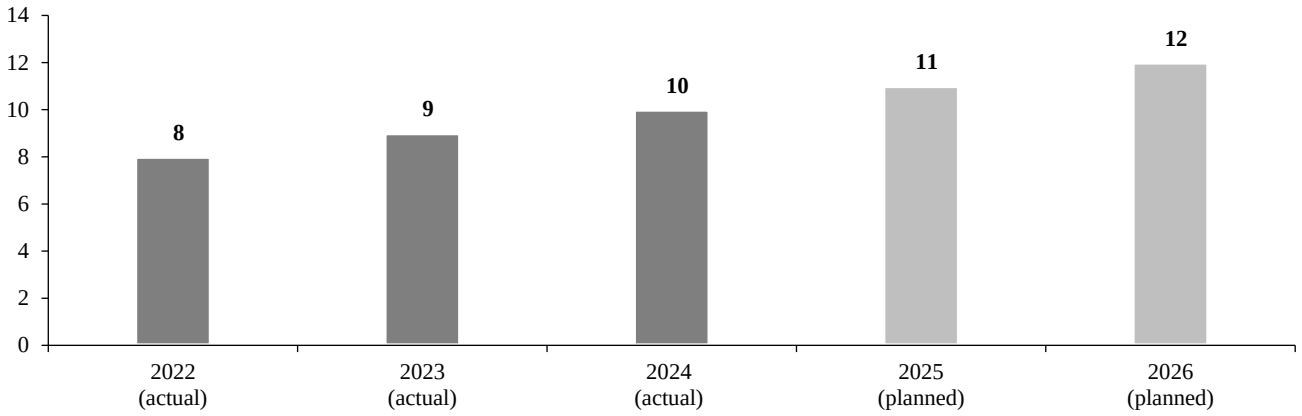
Lessons learned and planned change

12.69 The lesson for the subprogramme was that there was a need for targeted support to facilitate the alignment of regulatory practices in many government agencies participating in the customs clearance processes as a first step in transitioning towards digitalized procedures and automated processes. In applying the lesson, the subprogramme will ensure that its assistance is both

multifaceted and coherent and takes into consideration regulatory aspects and the needs of all stakeholders. In this context, the subprogramme will support government agencies in the review and alignment of regulatory practices by digitally connecting government agencies responsible for approving the release of consignments.

12.70 Expected progress towards the objective is presented in the performance measure below (see figure 12.VI).

Figure 12.VI
Performance measure: number of government agencies transitioning from paper-based procedures to digitalized procedures through the implementation of the Automated System for Customs Data (cumulative)



Deliverables

12.71 Table 12.15 lists all deliverables of the subprogramme.

Table 12.15
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**19**	**17**	**21**	**21**
1. Reports to the General Assembly on the outcomes of the World Summit on the Information Society, and on science and technology for development	1	1	3	3
2. Reports to the Commission on Science and Technology for Development and its intersessional panels	6	5	6	6
3. Reports and background documentation for the sixteenth quadrennial session of UNCTAD	–	–	1	–
4. Background notes and reports for the Trade and Development Board	2	2	2	2
5. Note by the UNCTAD secretariat and reports for the Investment, Enterprise and Development Commission and related expert meetings on issues related to science, technology and innovation	2	1	1	2
6. Note by the UNCTAD secretariat and reports for the Trade and Development Commission and related expert meetings	4	4	4	4

41. eTrade Readiness Assessments	3	1	3	3
Technical materials (number of materials)	**13**	**15**	**13**	**13**
42. Policy briefs on the following topics: science, technology and innovation; e-commerce and the digital economy; and trade logistics	4	1	4	4
43. Automated System for Customs Data annual report	1	1	1	1
44. *Year in Review* of the e-commerce and the digital economy programme	1	1	1	1
45. Technical notes on information and communications technology for development	2	1	2	2
46. Technical notes on trade facilitation	1	1	1	1
47. Background notes for the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	1	1	1
48. Economic and maritime country profiles	1	1	1	1
49. Report of the UNCTAD TrainForTrade Advisory Group on Strengthening Training Capacity and Human Resource Development	1	1	1	1
50. Technical note on science, technology and innovation for development	1	7	1	1

C. Substantive deliverables

Consultation, advice and advocacy: UNCTAD eWeek; advisory services in the area of e-commerce and the digital economy; multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals; sessions of the UNCTAD TrainForTrade Advisory Group on Strengthening Training Capacity and Human Resource Development; policy advice on science, technology and innovation policies for development and consultations on policy and practical aspects of e-commerce and the digital economy, transport policies and international legal instrument standards and rules related to the facilitation of international trade, transport and transport security for port operators and the eTrade for All initiative.

Databases and substantive digital materials: UNCTAD platform for learning and capacity-building managed by the TrainForTrade programme, which trains approximately 1,500 beneficiaries per year; port performance statistics platform; online repository on national trade facilitation committees; Global Cyberlaw Tracker; online e-learning modules for the courses on key issues on the international economic agenda, for 200 users annually; online platform for sustainable freight transport; eTrade for All online platform; digital economy statistics in the UNCTADstat database.

D. Communication deliverables

Outreach programmes, special events and information materials: newsletters on the Automated System for Customs Data and eTrade for All for more than 5,000 subscribers; transport and trade facilitation newsletter for more than 6,000 recipients; newsletter on science, technology and innovation; brochures, flyers and information kits on the work of the subprogramme.

External and media relations: press releases, press briefings, interviews, press conferences and news items related to the issuance of major publications under the subprogramme and the organization of important events.

Digital platforms and multimedia content: TrainForTrade; Commission on Science and Technology for Development; Automated System for Customs Data and paragraph 166 of the Bangkok Plan of Action website; eTrade for All platform; online platforms for innovation policy learning.

Subprogramme 5
Africa, least developed countries and special programmes

Objective

12.72 The objective, to which this subprogramme contributes, is to enhance the effective integration of Africa, the least developed countries and other groups of countries in special situations (landlocked developing countries, small island developing States and other structurally weak, vulnerable and small economies) into the global economy through fostering sustainable structural transformation, reducing vulnerabilities and developing domestic productive capacities in the targeted groups.

Strategy

12.73 To contribute to the objective, the subprogramme will:

(a) Carry out research and technical cooperation activities to diversify the exports, foster the productive capacities and explore the financing structures of the above-mentioned countries, including through contributions to reports of the Secretary-General to the General Assembly and the reports on the implementation and follow-up of relevant agendas and programmes of action;

(b) Implement technical cooperation programmes and develop strategic evidence- and policy-based options to promote sustainable structural economic transformation through productive capacity-building, diversification and support aimed at addressing vulnerability and building resilience, in particular for developing countries;

(c) Advocate consensus in the international development community regarding the policy measures that best address the sustainable development problems of least developed countries, small island developing States and landlocked developing countries, including at the multilateral level, through the identification of new policy approaches and methodologies, training and capacity-building workshops, as well as greater interaction with research institutes in least developed countries and with development partners;

(d) Strengthen efforts to provide domestic policy support and capacity-building to the targeted groups derived from its innovative research and analysis, development of analytical tools and technical support;

(e) Provide technical support to least developed countries that are either in the process of graduation or recently graduated from the least developed country category, including through the provision of General Assembly-mandated vulnerability profiles, as applicable, to ensure their graduation with momentum and a smooth transition towards their new status;

(f) Broaden its country-based technical support to include aspects such as national strategies for the development of productive capacities and structural economic transformation, regional trade integration, rules of origin, inequality, poverty and vulnerability, enhanced market access and preference utilization, value addition in strategic products and geographical indications;

(g) Support member States in addressing the socioeconomic impact of external shocks on economies in target countries, through research work and technical cooperation, in order to facilitate specific, data-driven policy design and implementation aimed at building resilience;

(h) Support African countries in addressing their special concerns and needs, including as articulated in the New Partnership for Africa’s Development and in Agenda 2063: The Africa We Want, and in implementing the Agreement Establishing the African Continental Free Trade Area through research, technical cooperation and targeted policy advice;

(i) Deliver training, capacity-building activities and ad hoc research on market access, the productive capacities index, trade preferences and rules of origin to support the WTO least developed countries group to identify and negotiate in line with the needs of the least developed countries result-oriented common positions for the relevant WTO committee meetings.

12.74 The above-mentioned work is expected to result in:

(a) Enhanced role of productive capacities in fostering structural transformation for inclusive growth and development in beneficiary countries;

(b) Enhanced capacity of member States to develop and implement policies and programmes to deepen domestic and regional markets and accelerate industrialization and socioeconomic transformation;

(c) Improved development policy formulation and implementation capacities in countries with specific needs for more effective technical cooperation;

(d) Enhanced implementation of the African Continental Free Trade Area by member States;

(e) Greater participation by member States in multilateral forums dedicated to enhanced trade through transparent, predictable and simple rules of origin;

(f) Improved development policy formulation, implementation and monitoring capacities of member States, including greater policy coherence, and capacities to account for current and future shocks, reduce exposure to external shocks and build resilience;

(g) Progress by member States, in particular least developed countries and other groups of countries in special situations, towards the achievement of Sustainable Development Goals 9 and 17.

Programme performance in 2024

Least developed countries have access to options for enhancing policies on intellectual property rights

12.75 Innovation and technological upgrading can play a central role in accelerating the economic growth and structural transformation necessary to tackle development challenges in least developed countries. However, systematic assessment of how least developed countries can use intellectual property protection strategically to stimulate innovation and development and craft regimes and systems for intellectual property rights that help to build productive capacities, enable technological upgrading, boost trade and investment and drive economic transformation has thus far not been made available. The subprogramme worked on the provision of evidence-based insights to help create an enabling environment for intellectual property rights and equipped policymakers in least developed countries with options on how to use them strategically to unlock innovation, boost trade, attract investment and promote technological upgrading.

12.76 Progress towards the objective is presented in the performance measure below (see table 12.16).

Table 12.16
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
¬	Enhanced knowledge of least developed countries on intellectual property rights through assessment of existing intellectual property rights regimes and their potential application to facilitate technological upgrading, foster innovation and increase trade	Least developed countries have access to specific policy options on how intellectual property rights can be harnessed to stimulate creativity, attract investment and promote technological advancement to support economic transformation and development

Planned results for 2026

Result 1: least developed countries are able to graduate through the development of comprehensive strategies and policies for a graduation with momentum and beyond

Programme performance in 2024 and target for 2026

12.77 The subprogramme's work contributed to two least developed countries (Comoros and Senegal) using industrial policy more effectively for graduation with momentum, which met the planned target.

12.78 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.17).

Table 12.17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Least developed countries have access to policy guidance on the development of a strategy for "graduation with momentum"	Three least developed countries (Cambodia, Senegal and Zambia) that have qualified for graduation have taken steps towards the drafting of a strategy for "graduation with momentum"	Senegal adopted a systemic transformation strategy and the Comoros formulated a road map for structural transformation, concordant with the priorities articulated by the vulnerability profiles and with a view to graduating with momentum	At least two least developed countries implement industrial policy measures as articulated in the vulnerability profile At least two least developed countries have engaged in new trade initiatives to adjust their trade policies as a result of graduation	At least two least developed countries adopt industrial policy initiatives aimed at the structural transformation of their economies

Result 2: enhanced statistical capacity of least developed countries and other developing countries, to help embrace a paradigm shift in the formulation of holistic economic diversification policies

Programme performance in 2024 and target for 2026

12.79 The subprogramme's work contributed to Ethiopia and Nigeria referring to productive capacities, including the productive capacities index, in their national development strategies, to the availability for member States of the updated database on rates of utilization of the Generalized System of Preferences (gsp.unctad.org) and to statistical training for representatives of 11 least developed countries, which met the planned targets.

12.80 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 12.18).

Table 12.18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Capacities of national statisticians in nine least developed countries (Bangladesh, Bhutan, Cambodia, Ethiopia, Kenya, Lao People's Democratic Republic, Nepal, Timor-Leste and Zambia) were enhanced on the use of the productive capacities index for policymaking and on the database on rates of utilization of the Generalized System of Preferences	Second generation of the productive capacities index was made available to member States	Ethiopia and Nigeria referred to productive capacities in their national development strategies, including the productive capacities index Member States have access to the updated database on rates of utilization of the Generalized System of Preferences Representatives of 11 least developed countries benefited from statistical training	At least two least developed countries or other most vulnerable countries apply the statistical tools, including the productive capacities index, to monitor trade and development progress, contributing to structural economic transformation	At least four least developed countries or other vulnerable countries develop holistic programmes to foster productive capacities using the productive capacities index

Result 3: enhanced capacity of small island developing States to build productive capacities

Proposed programme plan for 2026

12.81 The Antigua and Barbuda Agenda for Small Island Developing States emphasizes the importance of productive capacities for small island developing States in advancing sustainable development and recognizes the need for capacity-building to strengthen their data governance and management, including in measuring and benchmarking productive capacities. The subprogramme has been supporting developing countries, including small island developing States, in assessing the status of their productive capacities and identifying ways to improve them through its innovative tools and methodologies, which will allow for the formulation of holistic strategies for their sustainable development and structural transformation.

Lessons learned and planned change

12.82 The lesson for the subprogramme was that the approach to fostering productive capacities needs to be reoriented towards strategies specifically aimed at creating new, and expanding existing, capacities necessary for economic transformation in small island developing States. In applying the lesson, the subprogramme will enhance the capacity of small island developing States to formulate evidence-based policies to build domestic productive capacities by strengthening their statistical capacity in the measurement of productive capacities, and their capacity to identify their gaps and challenges in order for those to be effectively addressed.

12.83 Expected progress towards the objective is presented in the performance measure below (see table 12.19).

Table 12.19
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Haiti has access to National Productive Capacities Gap Assessments	The Comoros has access to National Productive Capacities Gap Assessments	Increased understanding of Antigua and Barbuda, Maldives and Saint Vincent and the Grenadines on how productive capacities contribute to building socioeconomic resilience and on the role of the productive capacities index in supporting integration into global and regional value chains	Enhanced statistical capacity in productive capacities index methodology and its use in at least two small island developing States At least two small island developing States apply the productive capacities index in their national statistics	At least two small island developing States use the productive capacities index to identify productive capacity-enabling policies in selected relevant sectors

Deliverables

12.84 Table 12.20 lists all deliverables of the subprogramme.

Table 12.20
Subprogramme 5: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**3**	**3**	**4**	**5**
1. Reports for the Economic and Social Council, including on vulnerability profiles	1	1	1	3
2. Reports for the Trade and Development Board on UNCTAD-wide activities for least developed countries and UNCTAD-wide activities in favour of Africa	2	2	2	2
3. Reports and background documentation for the sixteenth quadrennial session of UNCTAD	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	**8**	**8**	**14**	**8**
4. Meetings of the General Assembly and the Economic and Social Council and its Committee for Development Policy	1	1	1	1
5. Meetings of the sixteenth quadrennial session of UNCTAD, including preparatory sessions	–	–	6	–
6. Annual and executive sessions of the Trade and Development Board	5	5	5	5
7. Meetings of the Working Party on the Programme Plan and Programme Performance	2	2	2	2
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**3**	**4**	**1**	**2**
8. On trade, finance, transit and development to build national capacity	3	4	1	2

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Seminars, workshops and training events (number of days)	**30**	**41**	**50**	**46**
Workshops:				
9. On trade issues relevant to least developed and African countries, including on duty-free and quota-free market access, structural transformation and support for least developed country graduation	10	14	22	20
10. On the implementation of the new initiatives that will replace the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the Antigua and Barbuda Agenda for Small Island Developing States, issues of thematic or sectoral relevance to landlocked developing countries, the Doha Programme of Action for the Least Developed Countries for the decade 2022–2031, national productive gap assessments and holistic development programmes, and trade and poverty	14	21	20	20
11. On matters relevant to development in least developed countries and Africa	6	6	8	6
Publications (number of publications)	**13**	**13**	**12**	**9**
12. *The Least Developed Countries Report* and its overview	2	2	2	2
13. *The Economic Development in Africa Report* and its overview	2	2	2	2
14. Report on building and measuring productive capacities	1	1	1	–
15. Report on enhancing coherence between trade and industrial strategies for poverty alleviation in Africa and a special issues paper on Africa	2	2	1	1
16. Analytical studies on duty-free and quota-free market access and rules of origin	1	1	1	–
17. Lessons learned on geographical indications and related analysis for least developed countries	1	–	1	–
18. Sectoral, statistical and thematic issues of interest for developing countries: policy implications for fostering productive capacities and structural economic transformation and on the national productive capacities gap assessments	1	2	2	2
19. Research papers on economic development issues in least developed countries and Africa	3	3	2	2
Technical materials (number of materials)	**5**	**5**	**7**	**6**
20. Technical material on trade and poverty	2	1	1	1
21. Technical material on trade and development in vulnerable economies, including small island developing States	3	3	5	4
22. Technical material on transit, transport and trade facilitation	–	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: policy advice to ministries of trade, transport and planning on the new programme of action that will replace the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and to national statistical offices on measuring productive capacities for targeted groups of countries; advice on strategies for graduation with momentum for graduating and graduated least developed countries; advice on trade and development issues for small island developing States, landlocked developing countries and African countries; advice for least developed countries on trade issues relevant to them; consultations on UNCTAD activities related to the New Partnership for Africa's Development; and consultations with United Nations partner agencies and African countries for the implementation of the Third Industrial Development Decade for Africa.

D. Communication deliverables

Outreach programmes, special events and information materials: lectures on issues related to least developed countries and African development, trade policy, globalization, trade development strategies and policy coherence for the benefit of member States, for a minimum of 100 participants; and policy briefs related flagship reports.

External and media relations: press releases, press conferences and interviews and opinion pieces on flagship reports and other topical research, including policy recommendations.

B. Proposed post and non-post resource requirements for 2026

Overview

12.85 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 12.21 to 12.23.

Table 12.21

12.86 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 12.24 to 12.26 and figure 12.VII.

12.87 As shown in tables 12.24 (1) and 12.25 (1), the overall resources proposed for 2026 amount to $88,288,400, reflecting a net decrease of $1,706,600 (or 1.9 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

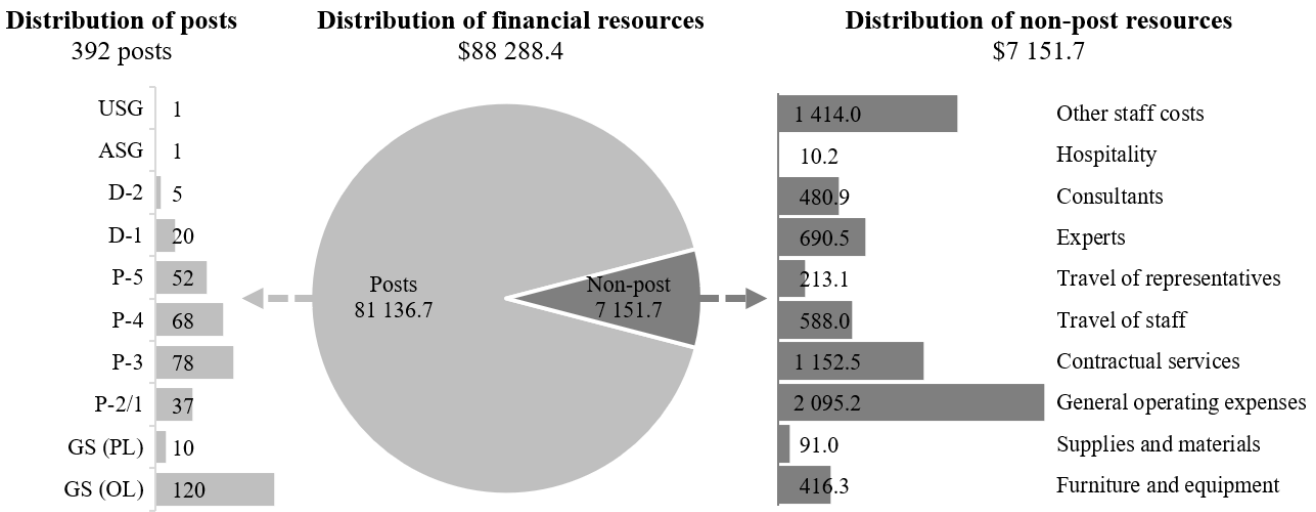
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

12.88 As shown in table 12.24 (1), resource changes reflect a net decrease of $2,075,000, as follows:

(a) **Executive direction and management** (net increase of 431,300). The proposed net increase relates to the following:

(i) The increase of $430,800 under posts, reflecting the delayed impact of the establishment of five temporary posts in 2025, which were subject to a 50 per cent vacancy rate in accordance with the established practice for new posts;

(ii) The increase of $13,000 under contractual services, reflecting a full-year provision for the requirements relating to administrative and information and communications technology-related services for the five temporary posts established in 2025;

(iii) The decrease of $12,500, reflecting the removal of non-recurrent provisions associated with General Assembly resolutions 79/1, 79/236 and 79/234 that were approved for 2025 and are no longer required in 2026. The amounts fall under travel of staff ($4,700) and furniture and equipment (7,800);

(b) **Executive direction and management: Memorandum of Understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets** (decrease of $2,514,300). The proposed decrease relates to the removal of all requirements to support the Memorandum of Understanding, which is scheduled to expire on 22 July 2025. The amounts fall under other staff costs ($1,213,600), consultants ($539,700), travel of staff ($520,200) and general operating expenses ($240,800);

(c) **Subprogramme 1, Globalization, interdependence and development** (net increase of $8,000). The proposed net increase relates mainly to the delayed impact of the establishment in 2025 of one post of Economic Affairs Officer (P-3), which was subject to a 50 per cent vacancy rate in accordance with the established practice for new posts ($86,000), offset in part by the decrease under other staff costs ($64,000) and travel of staff ($14,000) reflecting the removal of non-recurrent provisions associated with General Assembly resolution 79/1 that were approved for 2025 and are no longer required in 2026.

New mandates

12.89 As shown in table 12.24 (1), resource changes reflect a non-recurrent increase of $355,200, as follows:

(a) **Policymaking organs** (increase of $233,800). The proposed non-recurrent increase under other staff costs would provide for one general temporary assistance position of Economic Affairs Officer (P-4) based in Geneva for one year to provide specialized substantive support to the working group on data governance for implementation of the request contained in paragraph 48 of the Global Digital Compact (annex I to General Assembly resolution 79/1 entitled “The Pact for the Future”);

(b) **Executive direction and management** (increase of $121,400). The proposed increase reflects additional non-recurrent requirements needed for implementation of the request contained in paragraphs 81 (a) and 81 (b) of General Assembly resolution 79/1, entitled “The Pact for the Future”, as follows:

(i) The increase of $106,700 under other staff costs would provide for an additional six months of one position of Data Scientist (P-4) for the provision of substantive, technical and analytical backstopping support to the independent high-level expert group

developing recommendations for a limited number of country-owned and universally applicable indicators of sustainable development that complement and go beyond GDP; and to the United Nations-led intergovernmental process to be initiated following completion of the work of the independent high-level expert group;

(ii) The increase of $14,700 under travel of staff would provide for in-person and interactive direct dialogue with member States and partner institutions on the recommendations developed by the independent high-level expert group.

Other changes

12.90 As shown in table 12.24 (1), resource changes reflect an increase of $13,200, which relates to an increase under programme support that reflects a higher standard price for the core software package for non-field personnel outside of United Nations Headquarters. Other changes also reflect the cost-neutral redeployment of resources between supplies and materials and contractual services within the programme support component.

Extrabudgetary resources

12.91 As reflected in tables 12.24 (2) and 12.25 (2), extrabudgetary resources amount to $ 60,299,000. The resources would complement regular budget resources and would be used to provide for 15 posts (1 D-2, 1 P-5, 2 P-4, 2 P-3 and 9 General Service (Other level)) to perform mainly the administrative functions related to the extrabudgetary activities. In addition, non-post resources would be used to perform various technical cooperation activities, such as technical advisory services, training, workshops, seminars and field projects.

12.92 The extrabudgetary resources under the present section are subject to the oversight of the Secretary-General of UNCTAD, who has delegated authority from the Secretary-General of the United Nations.

Policymaking organs

12.93 The resources proposed under this component would provide for the policymaking organs as shown in table 12.27.

Table 12.27
Policymaking organs
(Thousands of United States dollars)

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
Commission on Science and Technology for Development	Mandate: General Assembly resolution 46/235. Membership: 43 government experts One session per year One intersessional panel per year One session per year of the working group on data governance	359.4	593.2
Investment, Enterprise and Development Commission	Mandate: General Assembly resolution 49/130 TD/442, TD/442/Corr.1 and TD/442/Corr.2 (Accra Accord), para. 202 Membership: 16 experts One session per year	37.8	37.8

Executive direction and management

1. Executive direction and management

12.95 The Office of the Secretary-General of UNCTAD coordinates cross-cutting institutional processes, such as the systematic inclusion of gender equality aspects in all areas of the work of UNCTAD and reaching gender parity in staff. To that end, the Office of the Secretary-General of UNCTAD will continue to coordinate the Gender Task Force, which is chaired by the Deputy Secretary-General of UNCTAD and is mandated to improve and better coordinate gender mainstreaming activities, including by appointing, for each UNCTAD subprogramme, gender focal points whose responsibilities include reviewing and clearing trust fund project documents from a gender mainstreaming perspective. The Statistics Coordination Task Force, chaired by the Deputy Secretary-General of UNCTAD, which has the mandate to improve the coordination of statistical activities in UNCTAD and to exploit synergies, sets strategic priorities for UNCTAD statistics and coordinates statistical activities, including production, dissemination and capacity development.

12.96 In addition, the Office of the Secretary-General of UNCTAD undertakes communication and external relations activities, which include the planning and delivery of UNCTAD media outreach and external relations activities, web content management, civil society liaison and implementation of the communications strategy, including the production and dissemination of information and media products targeted to specific audiences. It also promotes cooperation and working relationships with civil society organizations, including non-governmental organizations (NGOs), trade unions, academia and intergovernmental organizations, and carries out fundraising and intergovernmental liaison activities in respect of civil society work.

12.97 Furthermore, the Office of the Secretary-General of UNCTAD coordinates and conducts evaluation activities that serve to ensure and enhance the quality and resonance of UNCTAD programmes and projects, by providing internal oversight, including oversight and management of external evaluations mandated by the Trade and Development Board, oversight and management of project evaluations funded by the United Nations Development Account and external evaluations required by contribution agreements, thus providing strategic support and advice to management on oversight, self-assessments and self-evaluations.

12.98 In addition, the work of enhancing outreach and promoting UNCTAD objectives at United Nations Headquarters and with relevant actors based in New York and Washington, D.C., including enhancing coordination with all United Nations system entities, funds and specialized programmes, diplomatic missions, the press corps, research institutions, NGOs and technical assistance agencies in the areas of trade, investment, technology and development, is undertaken by the liaison office in New York under the direct guidance of the Office of the Secretary-General of UNCTAD.

12.99 The Statistics Service is responsible for supporting the coordination, standardization and coherence of statistical activities throughout the organization and conducting independent quality assurance on UNCTAD statistics. The cross-organizational Service provides relevant and timely statistics and indicators on trade and development, cutting across the areas of work of UNCTAD, including the interrelated issues of finance, technology, transport, investment and sustainable development, for enhanced and data-driven research, analysis and policy action, and, by implementing the UNCTAD Statistics Quality Assurance Framework, aligning the organization’s overall statistical requirements to enable better planning, more synergies and quality controls. The Service coordinates data and statistical activities in UNCTAD by developing methods, standards and tools for the collection, compilation, dissemination and use of high-quality statistics adhering to international standards. The Service also contributes to the development of national statistical capacity and global statistics, supports countries’ efforts to strengthen their national statistical capacity and develops statistics with international collaboration on topics related to the UNCTAD mandate.

12.100 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly

resolution 72/219, UNCTAD is integrating environmental management practices into its operations. UNCTAD will continue to reduce its carbon footprint by reviewing all air travel at the senior management level to ensure that all alternatives are considered and substituting air travel through the use of information and communications tools whenever possible. As a non-resident entity housed within the premises of the United Nations Office at Geneva, the UNCTAD carbon footprint comprises mostly air travel-related emissions.

12.101 Information on the timely submission of documentation and advance booking for air travel is reflected in table 12.29. UNCTAD will continue to make efforts to further increase the compliance rate, including by monitoring advance ticket purchase compliance in the Management Information System (UNCTAD management dashboard) and reporting to senior management once a month. The Mission Travel Portal, which identifies requests that are not compliant with the advance air ticket purchase policy and sends automated warnings to senior managers, is used by staff members to clear their travel requests with senior management before initiating travel requests in Umoja. In addition, UNCTAD continues to make efforts to raise awareness among staff members and to encourage early planning of meetings and conferences, whenever possible.

12.102 The proposed regular budget resources for 2026 amount to $11,409,600 and reflect an increase of $552,700 compared with the approved budget for 2025. The proposed change is explained in paragraphs 12.88 (a) and 12.89 (b). Additional details on the distribution of the proposed resources for 2026 are reflected in table 12.30 and figure 12.IX.

Programme support

12.109 Programme support is responsible for administrative activities that support the smooth workings of the programme, including in the areas of human resources, finance and budget, programme planning, intergovernmental activities and technical cooperation.

12.110 The proposed regular budget resources for 2026 amount to $14,967,500 and reflect an increase of $13,200 compared with the approved budget for 2025. The proposed change is explained in paragraph 12.90. Additional details on the distribution of the proposed resources for 2026 are reflected in table 12.37 and figure 12.XV.

Annex

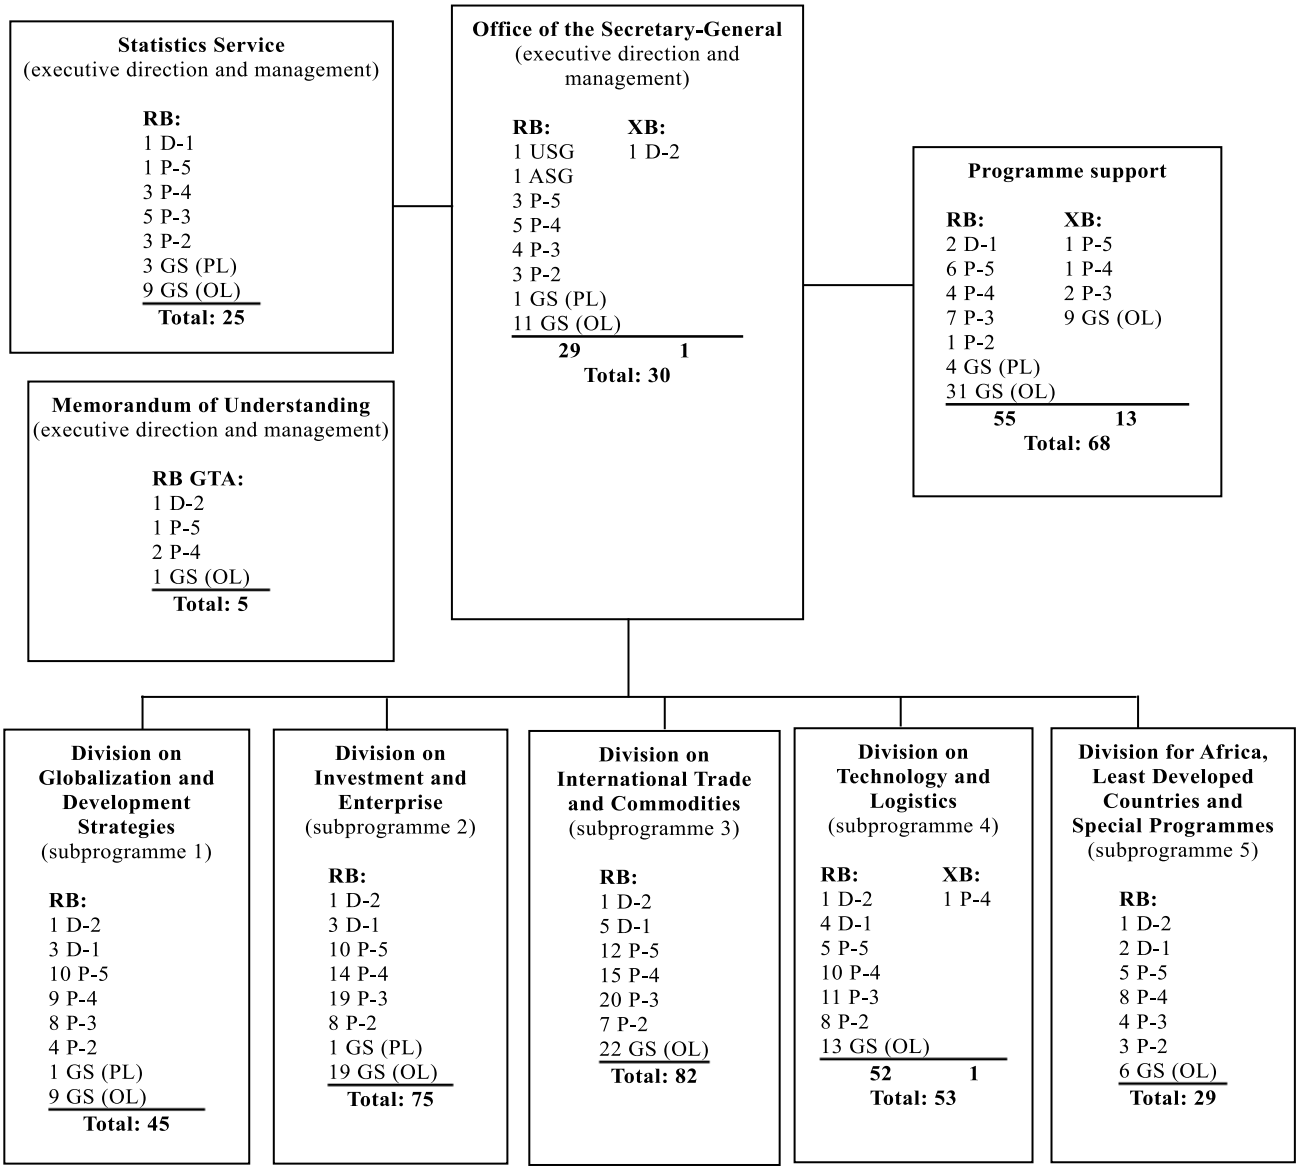
Organizational structure and post distribution for 2026

Two charts showing the organizational structure of UNCTAD are presented below. Chart A reproduces the approved organizational structure for 2025, as contained in document A/79/6 (Sect. 12) and amended to include five additional temporary posts established in 2025. Chart B presents the proposed organizational structure for 2026.

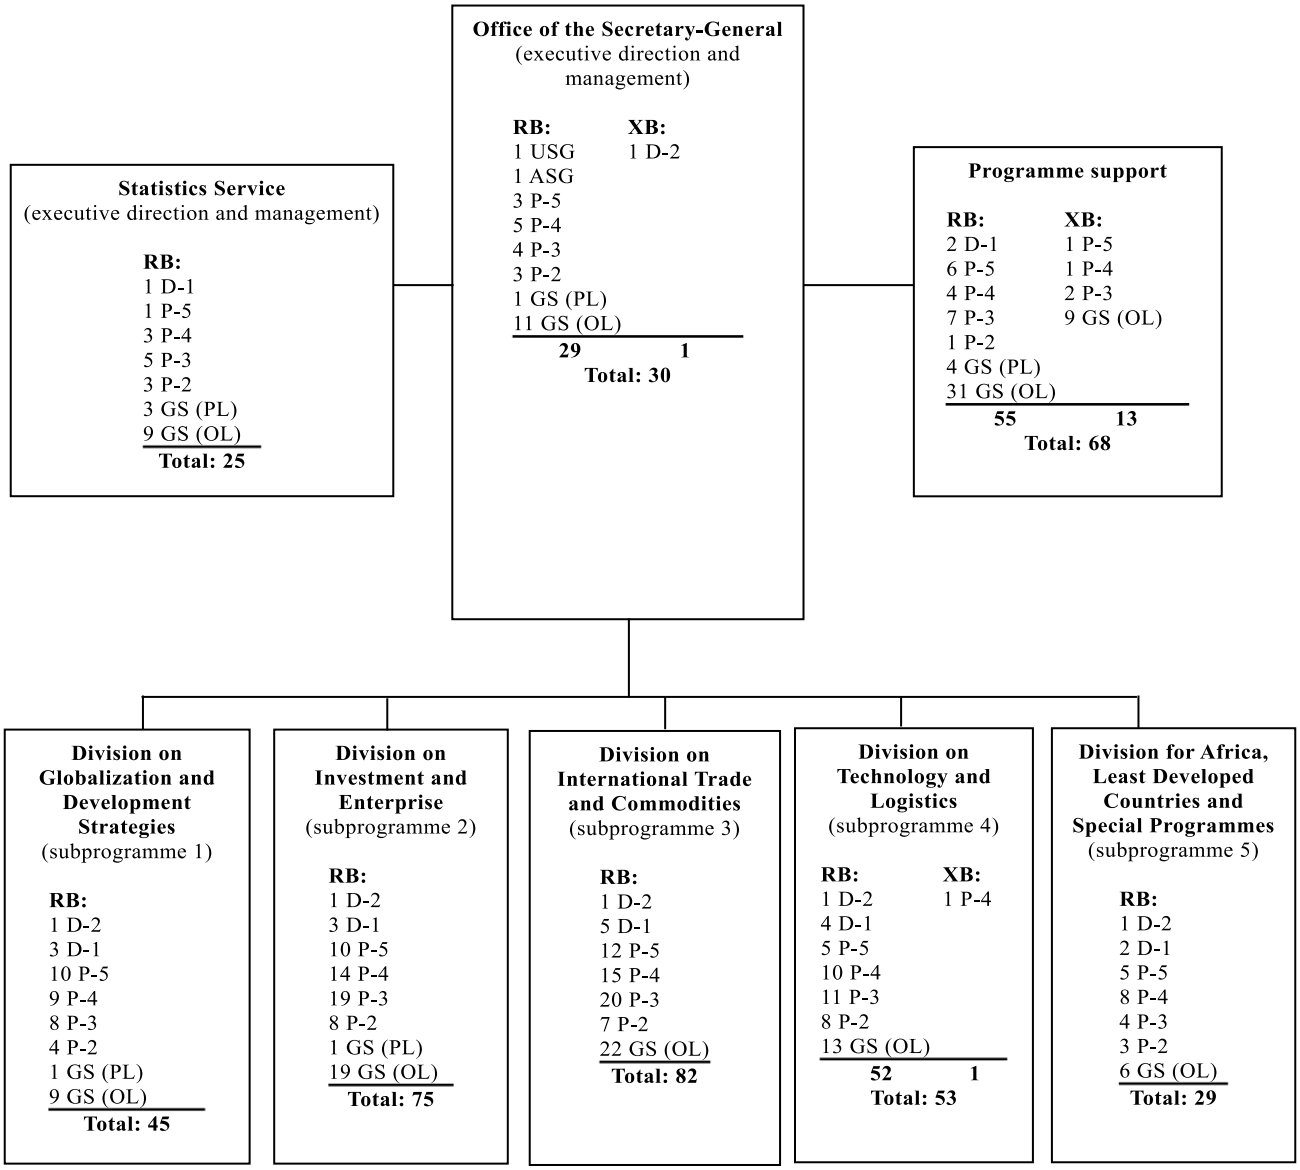
Justification for the proposed changes

The removal of the organizational unit named Memorandum of Understanding under executive direction and management reflects the removal of all requirements to support the Memorandum of Understanding between the Russian Federation and the Secretariat of the United Nations on promoting Russian food products and fertilizers to the world markets, which is scheduled to expire on 22 July 2025.

A. Approved organizational structure and post distribution for 2025



B. Proposed organizational structure and post distribution for 2026



Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); GS (PL), General Service (Principal level); GTA, general temporary assistance; RB, regular budget; USG, Under-Secretary-General; XB, extrabudgetary.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

13.1 The International Trade Centre (ITC) is responsible for the business aspects of trade development, as the joint technical cooperation agency of the United Nations and the World Trade Organization (WTO). The mandate derives from the priorities established by the contracting parties to the General Agreement on Tariffs and Trade (GATT) on 19 March 1964 and the General Assembly on 12 December 1967 (Assembly resolution 2297 (XXII)). Since 1 January 1968, ITC has operated under the joint auspices of GATT/WTO and the United Nations. In its resolution 1819 (LV) of 9 August 1973, the Economic and Social Council reaffirmed the Centre's mandate as the focal point for technical assistance and cooperation activities for trade promotion within the United Nations system of assistance for developing countries.

13.2 In the context of the 2030 Agenda for Sustainable Development, Member States explicitly recognized trade as a key engine for sustainable and inclusive economic growth and poverty eradication, specifically through target 8.a of the Sustainable Development Goals, to increase Aid for Trade support, and targets 17.10 and 17.11 of the Goals, for an open, rules-based, transparent and fair trading system and a significant increase in exports from developing countries. In the Pact for the Future, Member States reiterated their commitment to a rules-based, non-discriminatory, open, fair, inclusive, equitable and transparent multilateral trading system and emphasized the promotion of export-led growth in developing countries, in line with WTO commitments.

13.3 Against the backdrop of trade tensions and the severe negative impact on trade and development caused by the coronavirus disease (COVID-19) pandemic, the General Assembly, in its resolutions 79/195 and 78/134, reiterated this position for the target beneficiaries of ITC – micro-, small and medium-sized enterprises – which make up over 90 per cent of the world's businesses, account for over two thirds of employment and form the economic backbone of every community.

Programme of work

Subprogramme 6
Operational aspects of trade promotion and export development

Objective

13.4 The objective, to which ITC contributes, is to enhance inclusive and sustainable growth and development through trade and international business development for micro-, small and medium-sized enterprises in developing countries, especially the least developed countries, and countries with economies in transition, through increased business capacities of those enterprises to trade and through a conducive business environment and strengthened institutional ecosystems for those enterprises.

Strategy and external factors for 2026

13.5 To contribute to the objective, ITC will provide advisory services, training and awareness-building to enterprises, business support institutions and government agencies in areas that are key to the international competitiveness of micro-, small and medium-sized enterprises. In particular, ITC will:

(a) Build enterprise-level capacities in the areas of market analysis, value addition, quality, e-commerce, marketing, access to finance and investment, climate resilience and environmental risk mitigation;

(b) Provide micro-, small and medium-sized enterprises with market knowledge and new market linkage opportunities, including through initiatives related to digital and sustainable trade and the "Alliances for Action" initiative, which connect businesses to foreign markets and develop public-private partnerships in targeted value chains, strengthening existing and opening new trade channels;

(c) Enable business transactions and investment for micro-, small and medium-sized enterprises, with a focus on growing local, regional, South-South and global value chains, working with women-owned businesses, youth entrepreneurs, refugees, internally displaced persons and artisan and farmer communities, including through the ITC SheTrades initiative, the Ye! ("young entrepreneurs") community and the Refugee Empowerment through Markets Initiative;

(d) Strengthen the governance, performance, advocacy capacities, quality and scope of services of national, subnational and regional business support institutions and ecosystems, including trade and investment promotion agencies, chambers of commerce, sector associations, youth and women's business groups, cooperatives, incubators and technical and vocational training providers;

(e) Support policymakers in leading public-private dialogues and consensus-building and decision-making processes that foster the growth and internationalization of micro-, small and medium-sized enterprises, including through the promotion of the benefits of a universal, rules-based, open, predictable, inclusive, non-discriminatory and equitable multilateral trading system under WTO;

(f) Scale up its comprehensive and globally accessible trade intelligence that addresses information and knowledge gaps, including databases, such as the ITC Sustainability Map and Market Access Map, and the SME Trade Academy digital learning platform;

(g) In line with the ITC country engagement strategy, strengthen its trade advocacy, partnerships and programmatic planning through an enhanced regional and national presence.

13.6 The above-mentioned work is expected to result in:

(a) Increased resilience of micro-, small and medium-sized enterprises to external shocks and their enhanced competitiveness, sustainable business practices and integration into regional and international value chains that generate business transactions, investments, sustainable jobs and higher incomes, especially for women, youth and persons in vulnerable situations;

(b) Improved usefulness of services provided by business support institutions to micro-, small and medium-sized enterprises, including enhanced management and operational functioning of the service providers;

(c) Better-informed government decision makers, with options for new or improved inclusive trade-related policies, strategies and regulatory frameworks that contribute to an enabling environment for micro-, small and medium-sized enterprises to participate in international trade;

(d) Increased awareness among policymakers, business support organizations and businesses related to trade opportunities and challenges for micro-, small and medium-sized enterprises, market access conditions and sustainable business practices.

13.7 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Extrabudgetary resources will remain stable;

(b) Political, economic and social conditions in programming countries will remain conducive to development interventions;

(c) International trade and investment conditions do not deteriorate significantly compared with 2025.

13.8 With regard to cooperation with other entities at the global, regional, national and local levels, ITC will maintain and develop partnerships with the private sector, civil society, academia and trade and development organizations to support market access and provide supplier programmes for micro-, small and medium-sized enterprises in order to advance the 2030 Agenda, the Pact for the Future and the Global Digital Compact annexed thereto. ITC will focus on partnerships that contribute to the ITC Global Small and Medium-sized Enterprises Ministerial Meeting; to the operationalization of key value chains in support of the African Continental Free Trade Area; and to scalable initiatives, especially for the least developed countries, small island developing States and landlocked developing countries. ITC will also focus on partnerships that support key outcomes in areas such as digital trade, investment facilitation, women and trade, and micro-, small and medium-sized enterprises and trade in the run-up to the fourteenth WTO Ministerial Conference, to be held in Cameroon.

13.9 With regard to inter-agency coordination and liaison, ITC will continue to coordinate with United Nations entities, including through membership in the United Nations Sustainable Development Group and United Nations regional and country teams. ITC will collaborate with the United Nations Conference on Trade and Development and WTO, and with other entities and initiatives, such as the World Intellectual Property Organization, the International Telecommunication Union, the International Labour Organization, the International Organization for Migration and the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States.

13.10 ITC integrates a gender perspective in its operational activities, deliverables and results, as appropriate. ITC will mainstream gender equality and women's empowerment throughout its workstreams, including by catalysing reforms of government procurement frameworks to mainstream a gender perspective; changing how business support organizations and financial institutions serve women; strengthening the voice of women's organizations in the African Continental Free Trade Area; and serving more women in vulnerable situations.

13.11 In line with the United Nations Disability Inclusion Strategy, ITC will increase the attention given to disability inclusion in its programming and will implement more initiatives that foster the inclusion of persons with disabilities in trade.

Evaluation activities

13.12 The following evaluations completed in 2024 have guided the proposed programme plan for 2026:

(a) 2024 annual evaluation synthesis report: midterm evaluation of the ITC strategic plan for the period 2022–2025;

(b) Evaluation of the ITC Ethical Fashion Initiative;

(c) Midterm evaluation of the project "Linking Ukrainian SMEs in the Fruit and Vegetables Sectors to Global and Domestic Markets and Value Chains – Phase II";

(d) Midterm evaluation of the Netherlands Trust Fund Phase V programme;

(e) Evaluation of the Systematic Mechanism for Safer Trade project.

13.13 In response to the results of the evaluations referenced above, ITC will leverage findings to enhance its impact on Member States' national development objectives, informing future approaches to maximize impact. For example, ITC will reinforce collaboration with partner institutions to sustain capacity-building for small and medium-sized enterprises. The ITC partnership and capacity-building approaches have also fostered ownership and sustainability and will be replicated by, for example, expanding private sector engagement, enhancing business-to-business matchmaking and strengthening market linkages for micro-, small and medium-sized enterprises, as well as by improving its alignment with the resident coordinator system, adapting to donor funding decentralization and deepening its country-level presence, all in line with the ITC country engagement strategy.

13.14 The following evaluations are planned for 2026:

(a) 2026 annual evaluation synthesis report;

(b) One corporate-level evaluation;

(c) One evaluation of an ITC thematic area;

(d) One large project evaluation.

Programme performance in 2024

Enhanced access to financing for women entrepreneurs in the digital economy

13.15 In developing countries, there are about 8 to 10 million formal small and medium-sized enterprises with at least one female owner. Digital trade is the fastest-growing segment of international trade, with an estimated average annual growth rate of 8 per cent since 2005 and $4.3 trillion in value. Lack of access to financing is one of the key obstacles to the growth of women's entrepreneurship in international trade. ITC launched the joint WTO-ITC Women Exporters in the Digital Economy Fund in February 2024. Operationalized through the ITC SheTrades initiative, the Fund aims to raise $50 million for thousands of women entrepreneurs in developing and least developed countries. The Fund will provide financing for women entrepreneurs, enabling them to adopt digital technologies and expand the online presence of their enterprises.

13.16 Progress towards the objective is presented in the performance measure below (see table 13.1).

Table 13.1
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	The WTO-ITC Women Exporters in the Digital Economy Fund mobilized over $21 million in pledges, of which $10 million is already available for kick-starting the first phase in four countries targeting at least 400 women-led small and medium-sized enterprises from 2025 onwards Over 600 business support organizations responded to a call by the Fund for applications to participate in the programme

Planned results for 2026

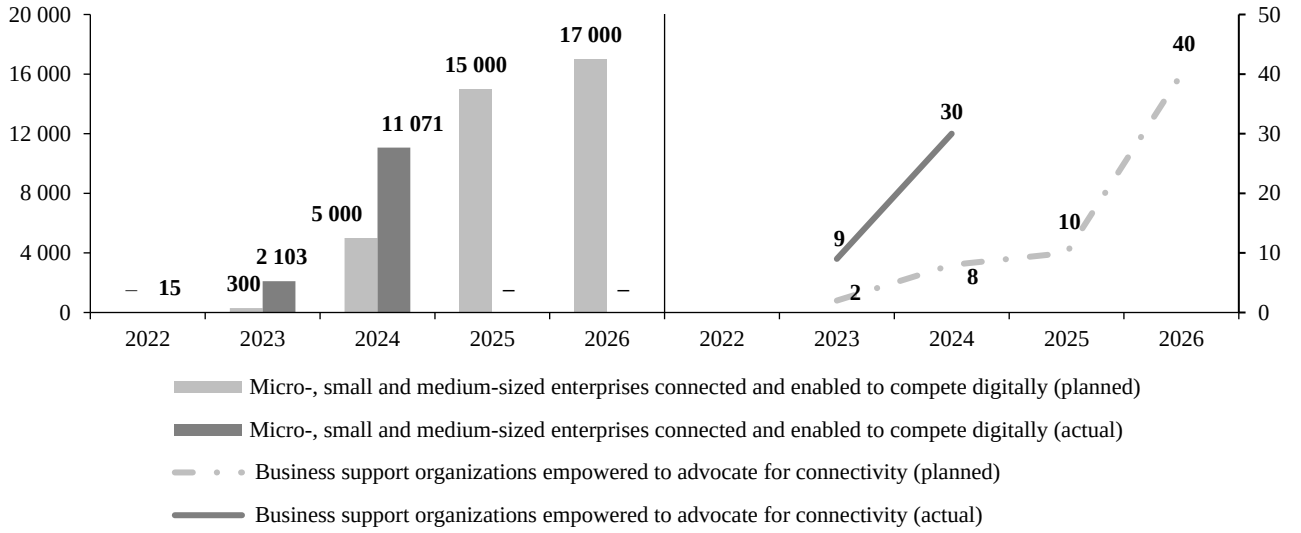
Result 1: strengthened digital trade capacity of micro-, small and medium-sized enterprises

Programme performance in 2024 and target for 2026

13.17 The Centre's work contributed to 11,071 micro-, small and medium-sized enterprises enabled to compete digitally and 30 business support organizations empowered to advocate for connectivity, which exceeded the planned target of 5,000 micro-, small and medium-sized enterprises and 8 business support organizations.

13.18 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 13.I).

Figure 13.I
Performance measure: number of micro-, small and medium-sized enterprises enabled to digitally compete and number of business support organizations empowered to advocate for connectivity (cumulative)



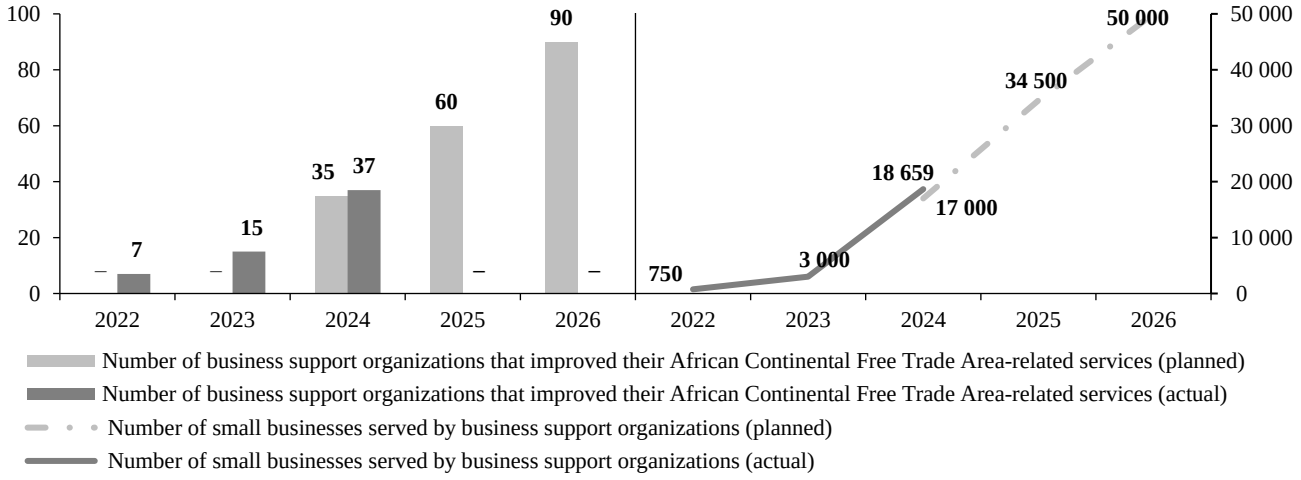
Result 2: strengthened services provided by local business support organizations to small businesses to capitalize on the African Continental Free Trade Area

Programme performance in 2024 and target for 2026

13.19 The Centre's work contributed to 37 business support organizations that improved their African Continental Free Trade Area-related services and 18,659 small businesses served by business support organizations, which exceeded the planned target of 35 business support organizations and 17,000 micro-, small and medium-sized enterprises.

13.20 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 13.II).

Figure 13.II
Performance measure: number of business support organizations that improved their African Continental Free Trade Area-related services and number of small businesses served by those business support organizations (cumulative)



Result 3: transition of textile and clothing small and medium-sized enterprises in Africa and the Asia-Pacific region to sustainable operations

Proposed programme plan for 2026

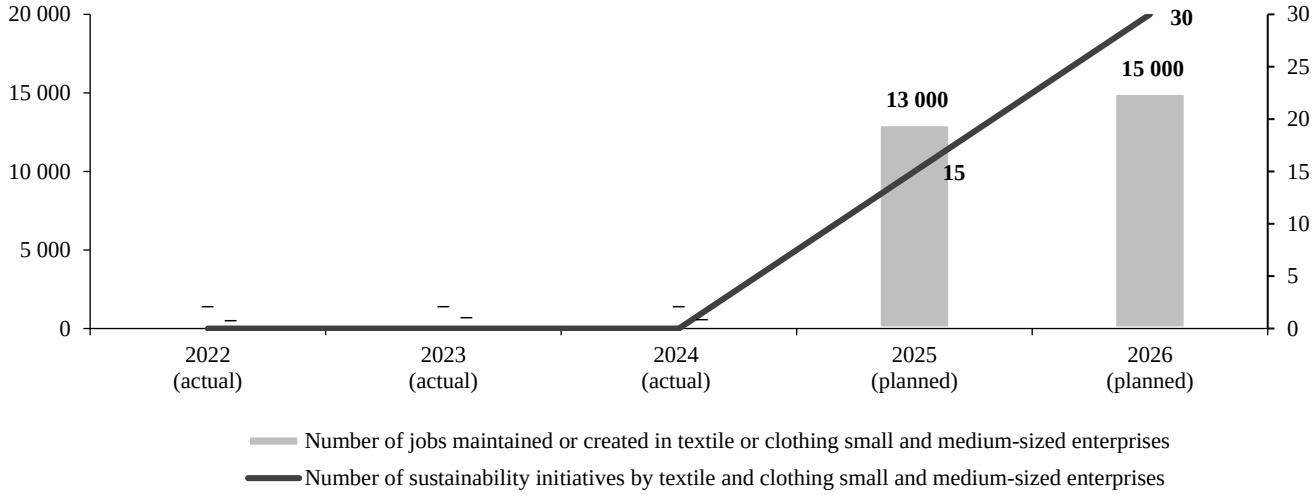
13.21 In the textile and clothing industry, the transition towards digitalization and sustainability – in particular its environmental aspects – may increase opportunities for inclusion in global value chains for small and medium-sized enterprises in developing countries. ITC has traditionally worked in textile and clothing value chains in a broad manner, addressing almost all aspects of production and trade to improve competitiveness.

Lessons learned and planned change

13.22 The lesson for ITC was that changing market requirements and industry practices made it necessary to prioritize support for small and medium-sized enterprises in the transition of the textile and clothing industry towards digitalization and sustainability. This will enable small and medium-sized enterprises to meet markets' increasing demand for more sustainable products in compliance with industry standards and forthcoming regulations. In applying the lesson, ITC will increase its focus on the competitiveness of textile and clothing small and medium-sized enterprises in identified areas and engage with policymakers and business support organizations to provide the framework for textile sustainability and foster a more effective business ecosystem. These changes are expected to enable growth, higher revenues and job creation for textile and clothing small and medium-sized enterprises, while reducing the sector's impact on the environment.

13.23 Expected progress towards the objective is presented in the performance measure below (see figure 13.III).

Figure 13.III
Performance measure: number of jobs and sustainability initiatives in textile and clothing small and medium-sized enterprises in Africa and the Asia-Pacific region (cumulative)



Legislative mandates

13.24 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to ITC.

General Assembly resolutions

2297 (XXII)	International Trade Centre
66/288	The future we want
67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled "Environmental pillar in the context of sustainable development", of the outcome document of the United Nations Conference on Sustainable Development
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
71/243; 75/233; 79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
71/279	Micro-, Small and Medium-sized Enterprises Day
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
73/195	Global Compact for Safe, Orderly and Regular Migration
73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
74/231; 76/215; 78/162	Development cooperation with middle-income countries
74/235; 77/181; 79/223	Women in development
75/211; 77/160; 79/201	Entrepreneurship for sustainable development

13. Books on trade-related subjects	4	5	4	4
14. Papers on trade-related subjects, such as inclusive and sustainable trade, trade and market intelligence, and competitiveness of micro-, small and medium-sized enterprises (including those that are women- or youth-led)	25	30	25	26

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: advice to policymakers, trade support institutions and enterprises to address the international competitiveness challenges for micro-, small and medium-sized enterprises in developing countries and countries with economies in transition, to facilitate public-private dialogue on improvements to the business environment and to ensure that trade supports inclusive and sustainable development; advisory services to disadvantaged groups among micro-, small and medium-sized enterprises, such as women- and youth-owned enterprises, on improving their productive capacity and market access; advisory and advocacy services for policymakers and business support institutions on how to consider the needs of micro-, small and medium-sized enterprises and disadvantaged groups in their service offer; and advocacy that allows for the systematic inclusion of such enterprises and disadvantaged groups in policy and strategy processes.

Databases and substantive digital materials: databases and other online tools to make global trade more transparent and facilitate market access and business and policy decisions. Databases cover trade flows, tariffs and non-tariff measures, export potential, procurement opportunities, rules of origin, private standards and knowledge on sustainable trade and youth and women entrepreneurship. They include the SheTrades database for over 48,000 active women entrepreneurs, "SheTrades Outlook", the ITC "SME Trade Academy", the Ye! community and platform for over 51,000 young entrepreneurs, the Benchmarking for Trade platform, the Quality for Trade platform reaching 3,700 users, the ecomConnect platform, the suite of regional integrated solutions (African Trade Observatory, West African Competitiveness Observatory, Euromed Trade Helpdesk and Eastern Partnership Trade Helpdesk), which received more than 54,000 visits from over 30,000 users in 2024, and the suite of market analysis tools (Trade Map, Market Access Map, Rules of Origin Facilitator, Export Potential Map, Investment Map, Procurement Map and Global Trade Helpdesk) accessed by more than 2.3 million users, generating over 10.3 million visits in 2024; the Strategies Implementation Management Tool with 57 registered users, the Sustainability Map, with 19,000 active users, the Standards Map, with 89,000 active users, and the ePing platform, with a total of 25,300 registered users.

D. Communication deliverables

Outreach programmes, special events and information materials: special events, including the Global Small and Medium-sized Enterprises Ministerial Meeting, the Trade for Sustainable Development Forum, and Micro-, Small and Medium-sized Enterprises Day; the *International Trade Forum* digital magazine; newsletters on trade-related subjects for over 9,000 recipients; and information materials and outreach, including on export strategy, trade support networks and capacities, entrepreneurship, skills and export development opportunities, world trade trends, the multilateral trading system, regional integration, technical regulations and standards for export, and trade and the Sustainable Development Goals.

Digital platforms and multimedia content: ITC website and social media accounts, engaging sustainable micro-, small and medium-sized enterprises and women and youth entrepreneurs.

Library services: on-demand services for ITC clients related to trade information.

B. Proposed post and non-post resource requirements for 2026

Overview

13.26 ITC carried out a spending review pursuant to paragraph 20 of General Assembly resolution 77/262, as part of its proposed budget exercise for 2026. Under the overall guidance of the Executive Director and with the engagement of all programme managers, a review was carried out for each division of ITC, including an in-depth analysis of the latest post complement and functional profiles, as well as non-post resource types and distribution, with a view to determining the optimal level and types of resources required to implement the mandates of ITC, as set out in the proposed programme plan for 2026.

13.27 The spending review process was implemented in parallel with the development of the ITC strategic plan for the period 2026–2030, which is anchored to the commitment of ITC to fostering inclusive and sustainable economic transformation in developing countries through enhanced competitiveness and trade of small and medium-sized enterprises; this provided an opportunity to align resource allocation with the Centre's renewed long-term vision. The review pointed to several opportunities for better and more efficient utilization of financial and human resources, including through the reconfiguration of staffing structures, the repurposing of existing posts and the redistribution of non-post resources. The spending review proposals support the realization of the five transformational outcome priorities identified in the strategic plan for the period 2026–2030, namely: (a) the acceleration of trade diversification and value addition; (b) the advancement of the sustainable transition for small and medium-sized enterprises; (c) the enhanced inclusion of small and medium-sized enterprises in the digital economy; (d) the achievement of transformational benefits from trade for small and medium-sized enterprises; and (e) the amplification of the contributions of small and medium-sized enterprises to global advocacy and decision-making. Through the spending review process, ITC aims to reinforce the strategic coherence of its operations and ensure that its resource base is positioned to respond to emerging priorities of Member States and unforeseen challenges over the coming period covered by the strategic plan.

13.28 The outcome of the spending review process highlighted the need for strengthening the trade advocacy, partnerships and programmatic planning of ITC in line with the ITC country engagement strategy, which envisions a more decentralized ITC with a stronger in-country and regional presence to better meet countries' needs and increase global reach. The ITC country engagement strategy is shaped by several key factors, namely: (a) the need for greater visibility and more direct engagement in country-level discussions; (b) the growing complexity of the ITC project portfolio, requiring stronger coordination at the country level; (c) the increasingly complex needs of countries; (d) the competitive Aid for Trade space, requiring ITC to demonstrate its unique value proposition; and (e) the decentralization of strategic and funding decisions by development partners.

13.29 Furthermore, ITC will launch a new flagship initiative – the Global Small and Medium-sized Enterprises Ministerial Meeting – designed to serve as a high-level platform for strategic dialogue on the development of small and medium-sized enterprises. This initiative will bring together ministers and key global stakeholders to identify and shape policy responses to the most pressing challenges faced by small and medium-sized enterprises, including limited access to finance, uneven digital connectivity and the demands of the sustainable transition. This flagship initiative will also feature a dedicated business and innovation space, aimed at fostering interaction between policymakers and private sector actors, encouraging the exchange of innovative solutions and facilitating investment opportunities in support of the growth of small and medium-sized enterprises. Funding requirements for this initiative are planned to be provided through the reconfiguration of non-post resources in line with the findings of the spending review.

13.30 The proposed regular budget resources for 2026 are reflected in table 13.3.

Table 13.3
Overall United Nations grant to ITC: evolution of financial resources by object of expenditure
(Thousands of United States dollars)

			Changes					
Object of expenditure	*2024 expenditure*	*2025 approved*	*Technical adjustments*	*New/expanded mandates*	*Other*	*Total*	*Percentage*	*2026 estimate*
Grants and contributions[a]	21 631.7	23 376.8	–	–	–	–	–	23 376.8
Total	**21 631.7**	**23 376.8**	**–**	**–**	**–**	**–**	**–**	**23 376.8**

[a] Represents the United Nations share of the ITC full regular budget disbursed as a grant.

13.31 ITC operates, from an administrative point of view, on the basis of arrangements agreed upon between the United Nations and GATT/WTO. These arrangements were reviewed in 1998, 1999 and 2004, with the most recent consolidated version (A/79/6 (Sect. 13), annex II) approved in 2024 by the General Assembly in its resolution 79/257 and by the General Council of WTO at its meeting held on 22 and 23 July 2024. The recently approved administrative arrangements consolidate two decades of changes in the budgeting processes of both organizations into a single document, incorporating technical and administrative updates that had not previously been documented in one place; the administrative arrangements also streamline the budget format and review timeline, ensuring alignment between the annual budget cycle of the United Nations and the biennial cycle of WTO. In conformity with the administrative arrangements, the regular budget of ITC is denominated in Swiss francs and is funded equally by the United Nations and WTO. The United Nations share of the ITC full regular budget is disbursed as a grant.

13.32 In accordance with the biennial budget cycle of WTO and the administrative arrangements of ITC, the proposed biennial budget for 2026–2027, which will be submitted for review by WTO bodies, will be set at twice the amount presented in the present document.

13.33 The grant proposed for 2026 amounts to $23,376,800, reflecting no change in the resource level compared with the approved appropriation for 2025. The full regular budget requirements of ITC amount to SwF 38,431,300, net of projected miscellaneous income of SwF 200,000. The United Nations grant remains at 50 per cent of the ITC full regular budget, or SwF 19,215,700. After applying an exchange rate of SwF 0.8220 to $1.00, the United States dollar equivalent is $23,376,800. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

13.34 The total resource requirements for 2026 for ITC, comprising its planned full regular budget in Swiss francs and projected extrabudgetary resources in Swiss francs, are reflected in tables 13.4 and 13.5 and figure 13.IV. For increased clarity and transparency, details of ITC post resources to be provided for by the proposed grants from the United Nations and WTO are presented in tables 13.6 and 13.7 and annex I, notwithstanding that these posts are not part of the proposed or approved staffing table of the United Nations regular budget.

Explanation of variances by factor, component and subprogramme

Overall resource changes

Other changes

13.35 As reflected in tables 13.5 and 13.6, planned resource changes reflect overall cost-neutral changes, as follows:

(a) Decreased requirements of SwF 25,000 under posts, reflecting:

(i) The planned redeployment of one D-1 post (formerly intended for the ITC Addis Ababa liaison office) from the Division of Sustainable and Inclusive Trade and one Programme Management Officer (P-3) post from the Division of Country Programmes, both currently located in Geneva, to the ITC regional office in Nairobi, as reflected in annex II (decreased requirements of SwF 25,000). The spending review identified the need for a geographical redeployment of resources in line with the strategic shift of ITC towards enhanced regional presence and proximity to beneficiaries, with the objective of strengthening national- and regional-level engagements, facilitating more responsive technical assistance and enhancing the impact of ITC work in sub-Saharan Africa. The planned redeployment also addresses the recommendation contained in paragraph IV.110 of the first report of the Advisory Committee on Administrative and Budgetary Questions on the proposed programme budget for 2025 (A/79/7);

(ii) The planned reclassification of one Chief of Section at the P-5 level in the Division of Country Programmes as Director, Division of Sustainable and Inclusive Trade (D-1); and one Senior Trade Promotion Officer (P-4) as Trade Investment Officer (P-3) in the Division of Market Development, as reflected in annex II (cost-neutral). The spending review recognized the need for leadership at the D-1 level in the Division of Sustainable and Inclusive Trade and identified opportunities for staffing reconfiguration within existing resources while avoiding a top-heavy organizational structure;

(iii) The planned reassignment of one Programme Management Officer (P-4) as Statistician, one Programme Management Officer (P-3) as Data Analyst and one Driver (General Service (Other level)) as General Services Assistant, as reflected in annex II (cost-neutral).

Informed mainly by efforts by ITC to strengthen data management and analysis capacity, the spending review identified the need to reassign three posts for strengthening the capacity required for the customized and data-based analytical support that ITC provides to Member States, including through the global public goods platforms, and the capacity required for the provision of timely, high-quality and effective general administration-related services;

(b) An increase of SwF 25,000 under non-post resources, as follows:

(i) Decreased requirements under other staff costs (SwF 55,000), reflecting the anticipated reduction in general temporary assistance needs, mainly through optimization of the staffing arrangements during peak workload periods;

(ii) Decreased requirements under consultants (SwF 50,000), reflecting the expenditure trend and the anticipated reduction in the need for consultant requirements through small additions to the work assignments of staff members who had worked closely with consultants;

(iii) Increased requirements under travel of staff (SwF 17,200) to facilitate missions of the staff of the newly established ITC regional office in Nairobi for the provision of technical assistance at the national level, direct stakeholder engagement and representation in key intergovernmental and regional events;

(iv) Increased requirements under contractual services (SwF 218,700), reflecting the resources required to support the organization of flagship events, including a high-level ministerial meeting, and digitalization efforts of ITC, including the development and enhancement of online normative tools, policy frameworks and digital platforms, such as the global public goods platforms, and their dissemination to a broader range of stakeholders;

(v) Increased requirements under general operating expenses (SwF 35,000), reflecting increased requirements of SwF 115,000 for operating expenses, including the rental and maintenance of premises for the ITC regional office in Nairobi, which will be located in the United Nations Office at Nairobi complex, offset in part by decreased requirements of SwF 80,000 for postage and pouch services, mainly through the use of digital dissemination methods for publications;

(vi) Decreased requirements under supplies and materials (SwF 40,000), reflecting the recent expenditure trends and digitalization efforts of ITC;

(vii) Decreased requirements under grants and contributions (SwF 100,900), reflecting mainly the planned strategic rationalization in the use by ITC of joint administrative services through the optimization of internal processes and redesigned workflows for the more efficient deployment of existing staff capacity.

Extrabudgetary resources

13.36 As reflected in table 13.4 (2), extrabudgetary resources amount to SwF 94,530,000. The extrabudgetary resources would complement regular budget resources and would be used to provide for 20 posts (1 P-5, 3 P-4, 3 P-3, 1 P-2/1 and 9 General Service (Other level) in Geneva and 1 P-3 and 2 General Service (Other level) in the ITC regional office in Nairobi) to perform functions such as human resources management, financial management, monitoring and evaluation, and information and communications technology functions, and similar activities related to the implementation of extrabudgetary projects. In addition, the non-post resources, including project personnel, would be used to implement technical cooperation projects, complementing and leveraging the core expertise and global offering of ITC provided through regular budget resources, at the request of Member States. Extrabudgetary projects will focus on sustainable and resilient value chains, inclusive trade, sustainable trade, digital trade and regional integration, including South-South trade and investment, to illustrate how ITC is transforming trade to drive sustainable development, particularly in an increasingly fragile global landscape. ITC continues to negotiate with donors for the funding of large-scale integrated projects.

13.37 The extrabudgetary resources under the present section are subject to the oversight of ITC, in accordance with the delegation of authority by the Secretary-General, and their use is guided by the Financial Regulations and Rules of the United Nations.

Other information

13.38 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the Centre will continue to integrate environmental management practices into its operations. ITC offsets its carbon footprint, which includes emissions from travel and building operations, by purchasing carbon certificates through the United Nations carbon offset platform. This initiative is aligned with the Climate Neutral Now programme of the United Nations Framework Convention on Climate Change secretariat. ITC calculates its greenhouse gas emissions annually and actively seeks ways to reduce them. However, despite these efforts, there remain residual emissions, and, to achieve climate neutrality, ITC purchases an equivalent amount of carbon credits.

13.39 Information on the timely submission of documentation and advance booking for air travel is reflected in table 13.8. All ITC personnel receive a monthly newsletter containing compliance rates and the category of non-compliance justifications, as recorded in the enterprise resource planning system, by division, and all managers receive compliance rates on a weekly basis.

Table 13.8
Compliance rate
(Percentage)

	2022 actual	*2023 actual*	*2024 actual*	*2025 planned*	*2026 planned*
Timely submission of documentation	100	100	100	100	100
Air tickets purchased at least two weeks before the commencement of travel	67	62	68	100	100

Annex I

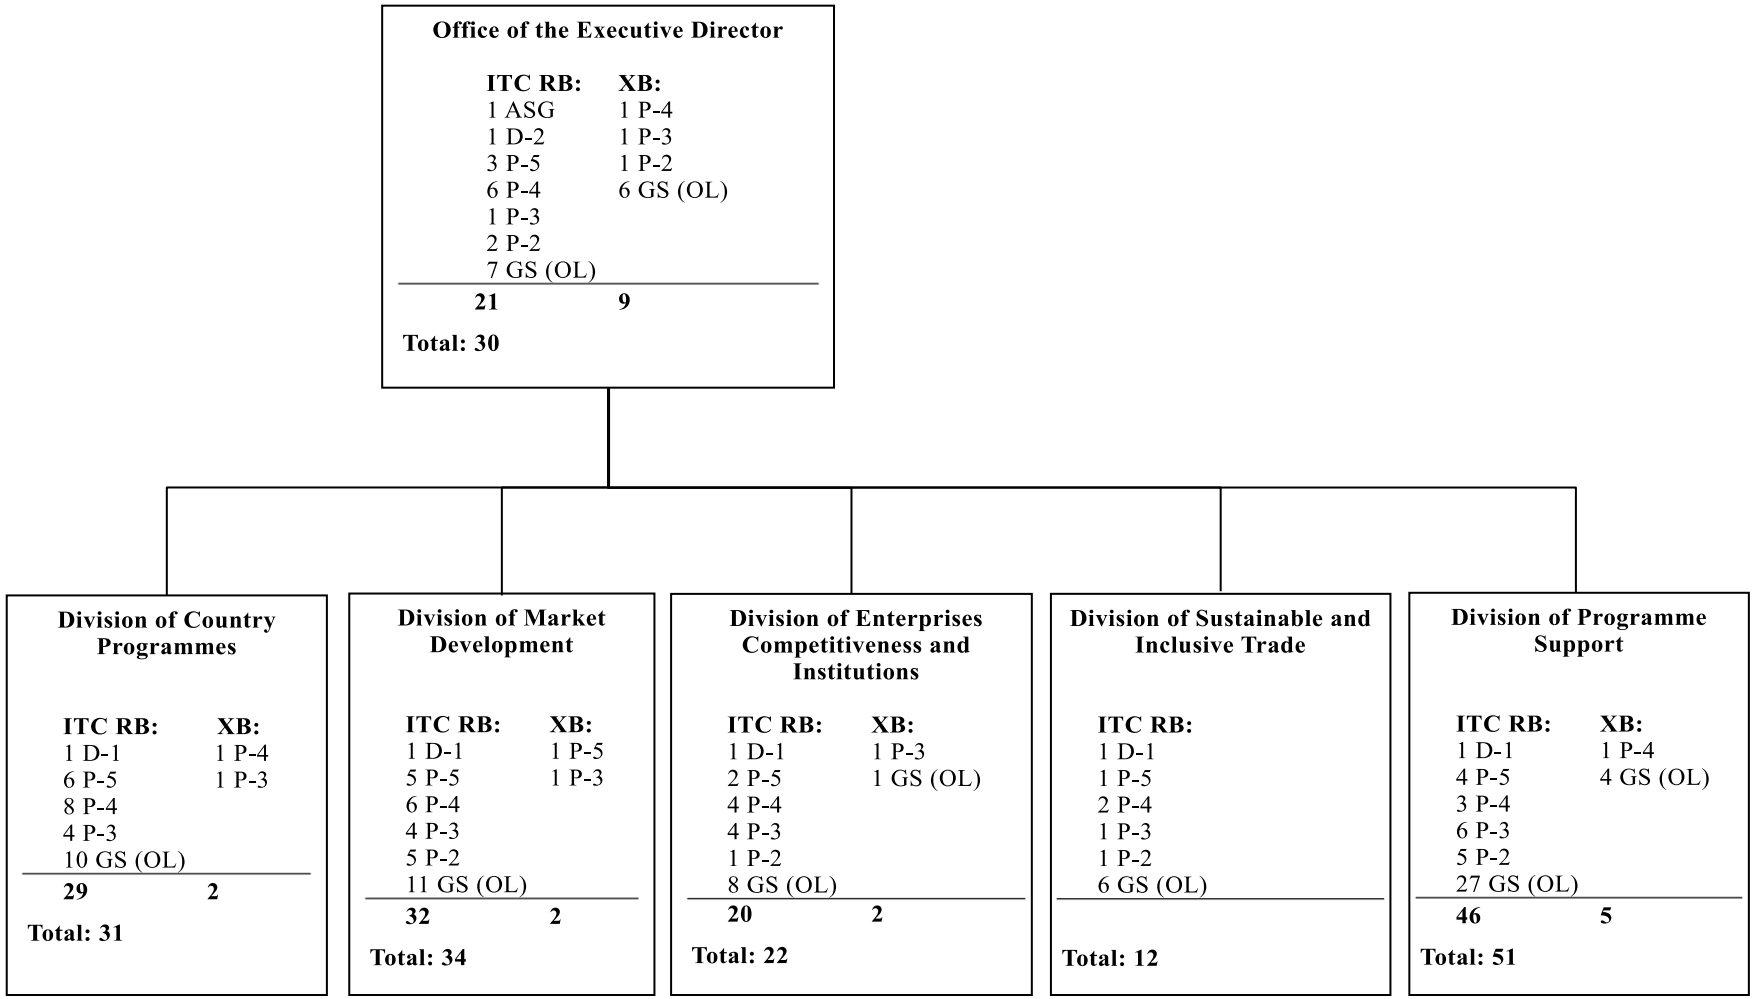
Organizational structure and post distribution for 2026

Two charts showing the organizational structure of the International Trade Centre (ITC) are presented below. Chart A reproduces the approved organizational structure and post distribution for 2025, as contained in document A/79/6 (Sect. 13), while chart B presents the organizational structure and post distribution for 2026.

Justification for the planned changes

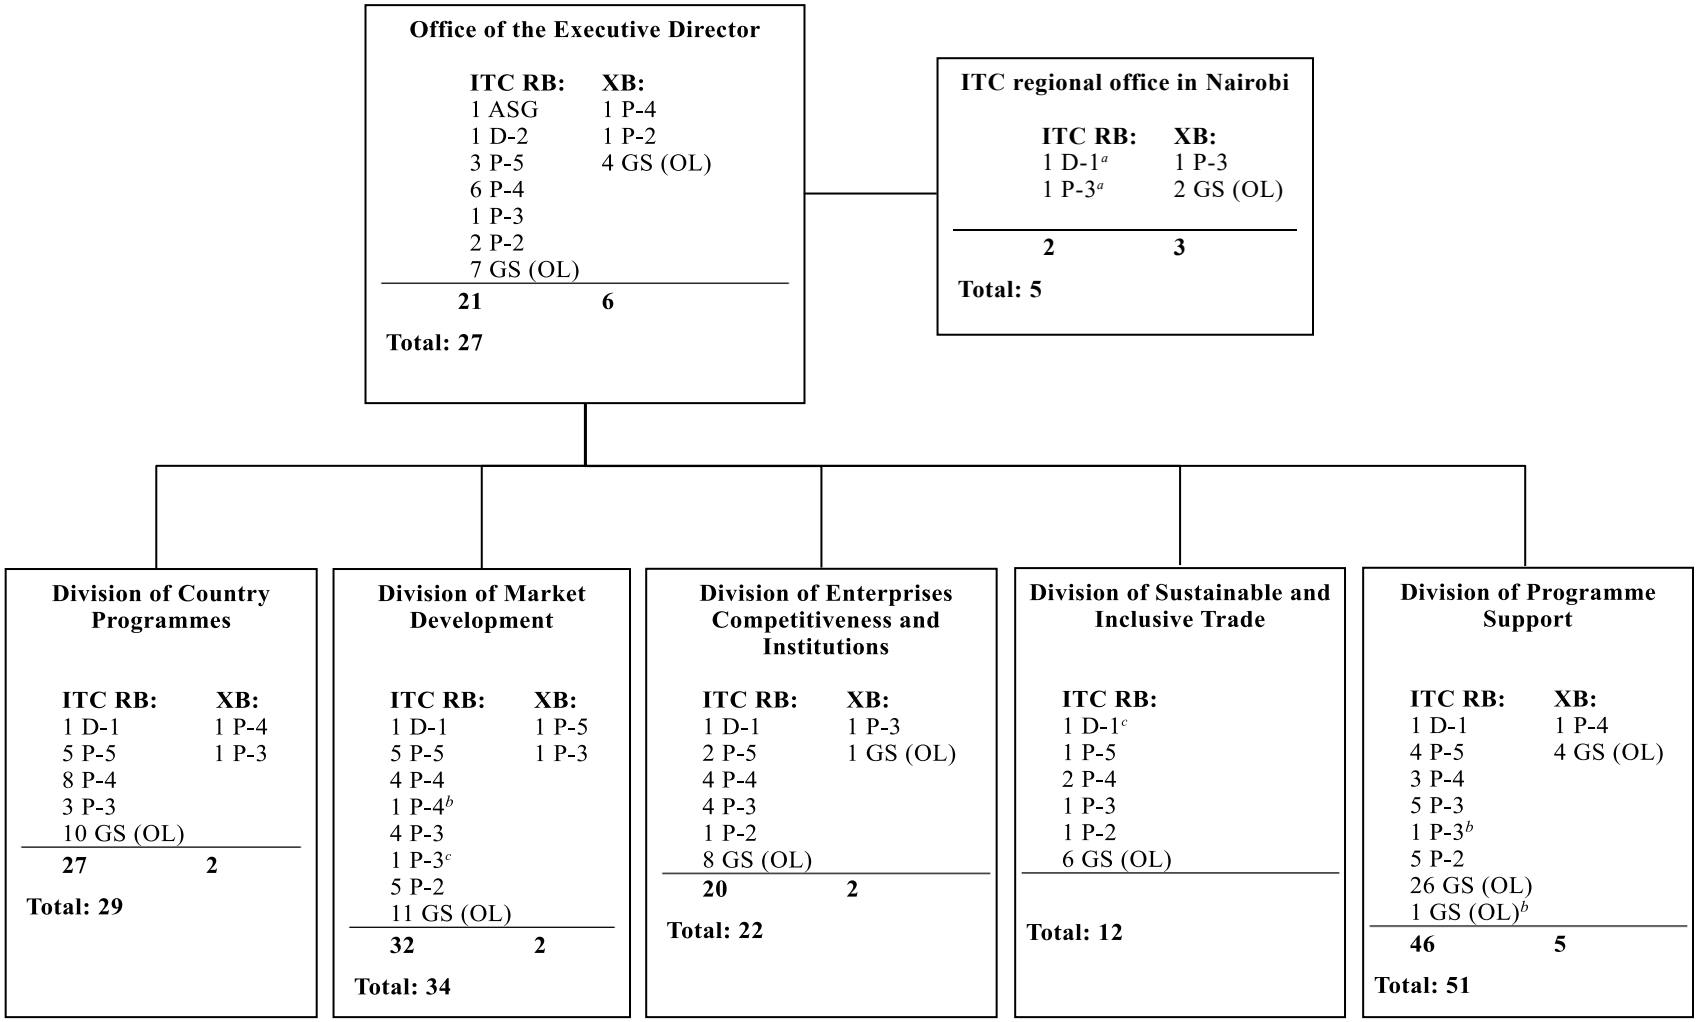
ITC has aligned its structure and delivery requirements to enable the implementation of its strategic plan for the period 2026–2030. The newly created ITC regional office in Nairobi works to advance the Centre's commitment to fostering inclusive and sustainable economic transformation in developing countries through enhanced competitiveness and trade of small and medium-sized enterprises. The ITC regional office in Nairobi would strengthen the trade advocacy, partnerships and programmatic planning of ITC in line with the ITC country engagement strategy, which envisions a more decentralized ITC with a stronger in-country and regional presence to better meet countries' needs and increase the global reach of ITC.

A. Approved organizational structure and post distribution for 2025



Note: ITC RB posts refer to ITC full regular budget posts, which are not part of the proposed United Nations regular budget staffing table. XB posts are funded through the special account for programme support costs. The total number of posts for 2025 remains unchanged compared with 2024: 160 funded from the ITC full regular budget and 20 from extrabudgetary sources.

B. Organizational structure and post distribution for 2026



Note: ITC RB posts refer to ITC full regular budget posts, which are not part of the proposed United Nations regular budget staffing table. XB posts are funded through the special account for programme support costs. The total number of posts for 2026 remains unchanged compared with 2025: 160 funded from the ITC full regular budget and 20 from extrabudgetary sources.

Abbreviations: ASG, Assistant Secretary-General; GS (OL), General Service (Other level); ITC RB, International Trade Centre full regular budget; XB, extrabudgetary.

[a] Redeployment.

[b] Reassignment.

[c] Reclassification.

Annex II

Summary of planned post changes

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Subprogramme 6 Operational aspects of trade promotion and export development			**Redeployment** of the following posts from Geneva to the ITC regional office in Nairobi:	The planned geographical redeployment of two ITC full regular budget posts from Geneva to Nairobi relates to the establishment of the ITC regional office in Nairobi, which would strengthen the presence of ITC at the national and regional levels and its support to Member States on trade advocacy, partnerships and programmatic planning, in line with the ITC country engagement strategy. The redeployment would enable ITC to provide customized solutions for the trade-related needs of Member States, including for the operationalization of key value chains in support of the African Continental Free Trade Area, through direct interactions at the national and subregional levels. The planned redeployment also addresses the recommendation contained in paragraph IV.110 of the first report of the Advisory Committee on Administrative and Budgetary Questions on the proposed programme budget for 2025 (A/79/7).
	–	D-1	1 Director;	
	–	P-3	1 Programme Management Officer	
			Reassignment of:	The planned reassignments relate to efforts by ITC to transform the skill sets, competencies and organizational culture towards a modern, data-driven organization in the context of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere. The planned reassignments would also strengthen the data management and analysis capacity required for the customized analytical support, including through the global public goods platforms, that ITC provides to Member States. The incumbents of the reassigned posts would be responsible for extracting deep insights from large amounts of data through the use of complex models and algorithms.
	–	P-4	1 Programme Management Officer as Statistician;	
	–	P-3	1 Programme Management Officer as Data Analyst	
	–	GS (OL)	**Reassignment** of one Driver as General Services Assistant	The planned reassignment relates to the reduced demand for traditional driver services in Geneva and the increased demand for broader administration-related services. The General Services Assistant would strengthen the capacity for the provision of timely, high-quality and effective general administration-related services and would allow for the more efficient use of the post.
	(1) 1	P-5 D-1	**Upward reclassification** of one Chief of Section at the P-5 level in the Division of Country Programmes as Director, Division of Sustainable and Inclusive Trade	The planned upward reclassification relates to the findings of the spending review, which recognized the need for leadership at the D-1 level in the Division of Sustainable and Inclusive Trade. Established in 2022, the Division oversees a growing portfolio comprising 12 ITC full regular budget posts and 56 project-funded positions. Therefore, leadership at the D-1 level is essential to effectively respond to the increasing demand for ITC services and to ensure the advancement of critical initiatives focused on environmental sustainability, gender equality, youth empowerment and support for vulnerable communities.
	(1) 1	P-4 P-3	**Downward reclassification** of one Senior Trade Promotion Officer as Trade Investment Officer in the Division of Market Development	The planned downward reclassification reflects the rejuvenation efforts of ITC. The reclassification would help to prevent the ITC staffing structure from becoming more top-heavy by offsetting the planned upward reclassification (P-5 to D-1) described above.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

14.1 The United Nations Environment Programme (UNEP) is responsible for leading and coordinating action on environmental matters within the United Nations system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 2997 (XXVII), and by the Governing Council of UNEP in its decision 19/1. That decision set out the Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme, which the Assembly subsequently endorsed in 1997 in the annex to its resolution S-19/2 and further reaffirmed in its resolutions 53/242, in 1999, and 66/288 and 67/213, in 2012. In Assembly resolution 70/1, Member States recognized the importance of the environmental dimension to the successful implementation of the 2030 Agenda for Sustainable Development. Within its mandate, UNEP will support Member States by providing strategic direction towards the achievement of environmental sustainability, while contributing to a balanced integration of the economic, social and environmental dimensions of sustainable development. Acknowledging the integrated nature of the challenges that countries face, UNEP will play a critical role in catalysing the fulfilment of the commitments and actions that drive transformational change for sustainable development.

Strategy and external factors for 2026

14.2 The medium-term strategy for the period 2026–2029 will guide the strategic direction and operational activities of UNEP to support Member States in intensifying efforts towards the environmental dimension of sustainable development and addressing the crises of climate change, biodiversity and nature loss, and pollution and waste. The strategy, which is to be considered by Member States at the seventh session of the United Nations Environment Assembly, will be based on inclusive, regular consultations with Member States and relevant stakeholders, and will be informed by an assessment of progress, ongoing challenges and emerging issues, while incorporating lessons learned from the implementation of its medium-term strategy for the period 2022–2025. UNEP will continue to advocate for science to remain at the centre of all decision-making processes, including on emerging issues, and for improved global environmental governance, aligned closely with the multilateral environmental agreements for which it provides the secretariats, and the direction set by the 2030 Agenda and relevant actions and decisions contained in the Pact for the Future.

14.3 With regard to cooperation with other entities at the global, regional, subregional, national and local levels, UNEP will continue to raise ambitions and promote leadership through advocacy and a normative and standard-setting approach. It will support Member States through transformative strategic partnerships that deliver sustainable solutions, integrating health, education, poverty reduction, and economic and social well-being. Its partnerships with the secretariats of multilateral environmental agreements will remain pivotal to securing stronger synergies and enhancing the impact of the work of the relevant parties. UNEP will encourage non-governmental stakeholders, including the private sector and the finance community, to increase investment in new and renewable sources of energy and improve environmental sustainability. Within the context of those partnerships, action will be aimed at making a broader impact in support of sustainable development, while strengthening the ability of countries to rapidly respond to the environmental impacts of disasters and armed conflicts.

14.4 With regard to inter-agency coordination and liaison, UNEP has the overall responsibility for leading and coordinating the response on environmental issues within the United Nations system. Through the United Nations Environment Management Group, UNEP will catalyse international action to enhance the coherence of environmental sustainability strategies and provide more visibility on

partnership initiatives. UNEP will leverage the United Nations development system reform to continue to address the crises of climate change, biodiversity and nature loss, and pollution and waste, and enhance its guiding role, raise ambitions and accelerate and scale up progress during the decade of action to deliver the Sustainable Development Goals. It will continue to focus on ensuring that its work is reflected and embedded in the new generation of United Nations country teams and the reinvigorated resident coordinator system through engagement with the Development Coordination Office and to leverage its work and expertise at the regional, subregional and country levels. UNEP will also integrate the priorities of the multilateral environmental agreements into global follow-up and review processes, in particular the 2030 Agenda.

14.5 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States and partners remain committed to the development and implementation of science-based environmental policies;

(b) The continued availability of extrabudgetary funding for the implementation of UNEP planned activities.

14.6 UNEP integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will work to fully implement United Nations Environment Assembly resolution 4/17 on promoting gender equality and the human rights and empowerment of women and girls in environmental governance and will continue to operationalize it in programme and project design and delivery. UNEP will support Member States in their achievement of Sustainable Development Goal 5 in the context of the environment, calling for women's full and effective participation and equal opportunities for leadership at all levels of environmental decision-making.

14.7 In line with the United Nations Disability Inclusion Strategy, UNEP will be attentive and responsive to the inclusion of persons with disabilities, including by raising awareness of their needs and concerns in its programme and project design and implementation and tailoring its projects to fit the conditions and needs of local communities. For example, addressing the concerns and needs of persons with disabilities will be emphasized when supporting climate change-related early warning systems or in projects that deal with environmental disasters and armed conflicts. UNEP will continue to reinforce the promotion and protection of the rights of persons with disabilities through its safeguard risk screening and mitigation procedure.

Legislative mandates

14.8 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

2997 (XXVII)	Institutional and financial arrangements for international environmental cooperation	66/288	The future we want
47/190	Report of the United Nations Conference on Environment and Development	67/251	Change of the designation of the Governing Council of the United Nations Environment Programme
S-19/2	Programme for the Further Implementation of Agenda 21	68/99	Strengthening of international cooperation and coordination of efforts to study, mitigate and minimize the consequences of the Chernobyl disaster
53/242	Report of the Secretary-General on environment and human settlements		
65/2	Outcome document of the High-level Review Meeting on the Implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States		

68/215	Report of the Governing Council of the United Nations Environment Programme on its first universal session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
73/238	The role of the international community in the prevention of the radiation threat in Central Asia
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
75/271	Nature knows no borders: transboundary cooperation – a key factor for biodiversity conservation, restoration and sustainable use
76/201	Sustainable tourism and sustainable development in Central America
76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
77/159	Enhancing the role of parliaments in accelerating the achievement of the Sustainable Development Goals
77/161	Promoting zero-waste initiatives to advance the 2030 Agenda for Sustainable Development
78/128	2025 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
78/146	Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea
78/159	Strengthening cooperation for integrated coastal zone management for achieving sustainable development
78/160	Science, technology and innovation for sustainable development
78/161	Culture and sustainable development
78/163	Follow-up to the second United Nations Conference on Landlocked Developing Countries
78/179	Policies and programmes involving youth
79/1	The Pact for the Future
79/45	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control
79/85	Effects of atomic radiation
79/139	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
79/140	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
79/171	The right to food
79/194	Information and communications technologies for sustainable development
79/195	International trade and development
79/196	International financial system and development
79/197	External debt sustainability and development
79/198	Promoting investments for sustainable development
79/199	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
79/200	Oil slick on Lebanese shores
79/201	Entrepreneurship for sustainable development
79/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
79/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
79/205	Disaster risk reduction
79/207	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
79/209	Report of the United Nations Environment Assembly of the United Nations Environment Programme
79/212	Combating sand and dust storms
79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
79/228	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
79/234	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
79/263	New Partnership for Africa’s Development: progress in implementation and international support

Governing Council of the United Nations Environment Programme decisions

SS.VIII/1, sect. II, 25/1, sect. II	Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme
SS.XI/2	United Nations Environment Programme support for Haiti: strengthening environmental response in Haiti
19/1	Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme
23/7	Strengthening environmental emergency response and developing disaster prevention, preparedness, mitigation and early-warning systems in the aftermath of the Indian Ocean tsunami disaster
23/11	Gender equality in the field of the environment
24/11	Intensified environmental education for achieving sustainable development
26/15	Strengthening international cooperation on the environmental aspects of emergency response and preparedness
27/2	Implementation of paragraph 88 of the outcome document of the United Nations Conference on Sustainable Development
27/11	State of the environment and contribution of the United Nations Environment Programme to meeting substantive environmental challenges

United Nations Environment Assembly resolutions and decisions

1/1	Ministerial outcome document of the first session of the United Nations Environment Assembly of the United Nations Environment Programme
1/4	Science-policy interface
1/8	Ecosystems-based adaptation
1/10	Different visions, approaches, models and tools to achieve environmental sustainability in the context of sustainable development and poverty eradication
1/11	Coordination across the United Nations system in the field of the environment, including the Environment Management Group
1/12	Relationship between the United Nations Environment Programme and multilateral environmental agreements
1/13	Implementation of Principle 10 of the Rio Declaration on Environment and Development
1/16	Management of trust funds and earmarked contributions
1/17	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility
2/2	Role and functions of the regional forums of ministers of the environment and environment authorities
2/3	Investing in human capacity for sustainable development through environmental education and training
2/4	Role, functions and modalities for United Nations Environment Programme implementation of the SAMOA Pathway as a means of facilitating achievement of the Sustainable Development Goals
2/5	Delivering on the 2030 Agenda for Sustainable Development
2/6	Supporting the Paris Agreement
2/13	Sustainable management of natural capital for sustainable development and poverty eradication
2/15	Protection of the environment in areas affected by armed conflict
2/16	Mainstreaming of biodiversity for well-being
2/17	Enhancing the work of the United Nations Environment Programme in facilitating cooperation, collaboration and synergies among biodiversity-related conventions
2/18	Relationship between the United Nations Environment Programme and the multilateral environmental agreements for which it provides the secretariat
2/19	Midterm review of the fourth Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme IV)
2/20	Proposed medium-term strategy for 2018–2021 and programme of work and budget for 2018–2019
2/24	Combating desertification, land degradation and drought and promoting sustainable pastoralism and rangelands
2/25	Application of Principle 10 of the Rio Declaration on Environment and Development in the Latin America and Caribbean Region
3/1	Pollution mitigation and control in areas affected by armed conflict or terrorism
3/2	Pollution mitigation by mainstreaming biodiversity into key sectors
3/3	Contributions of the United Nations Environment Assembly to the high-level political forum on sustainable development
3/4	Environment and health

3/5	Investing in innovative environmental solutions for accelerating the implementation of the Sustainable Development Goals
3/6	Managing soil pollution to achieve sustainable development
3/8	Preventing and reducing air pollution to improve air quality globally
3/9	Eliminating exposure to lead paint and promoting environmentally sound management of waste lead-acid batteries
3/10	Addressing water pollution to protect and restore water-related ecosystems
3/11	Implementation of paragraph 88 (a)–(h) of the outcome document of the United Nations Conference on Sustainable Development, entitled “The future we want”
4/3	Sustainable mobility
4/17	Promote gender equality, and the human rights and empowerment of women and girls in environmental governance
4/18	Poverty-environment nexus
4/20	Fifth Programme for the Development and Periodic Review of Environmental Law (Montevideo V): delivering for people and the planet
4/21	Implementation plan “Towards a pollution-free planet”
4/22	Implementation and follow up of United Nations Environment Assembly resolutions
4/23	Keeping the world environment under review: enhancing the United Nations Environment Programme science-policy interface and endorsement of the Global Environment Outlook
5/1	Animal welfare – environment – sustainable development nexus
5/2	Sustainable nitrogen management
5/3	Future of the Global Environment Outlook
5/4	Sustainable lake management
5/5	Nature-based solutions for supporting sustainable development
5/6	Biodiversity and health
5/7	Sound management of chemicals and waste
5/8	Science-policy panel to contribute further to the sound management of chemicals and waste and to prevent pollution
5/9	Sustainable and resilient infrastructure
5/10	The environmental dimension of a sustainable, resilient and inclusive post-COVID-19 recovery
5/11	Enhancing circular economy as a contribution to achieving sustainable consumption and production
5/12	Environmental aspects of minerals and metals management
5/13	Due regard to the principle of equitable geographical distribution, in accordance with paragraph 3 of Article 101 of the Charter of the United Nations
5/14	End plastic pollution: towards an international legally binding instrument
6/1	Circularity of a resilient and low-carbon sugar cane agro-industry
6/2	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility
6/3	Enhancing the role and viability of regional forums of environment ministers and United Nations Environment Programme regional offices in achieving multilateral cooperation in tackling environmental challenges
6/4	Promoting synergies, cooperation or collaboration for national implementation of multilateral environmental agreements and other relevant environmental instruments
6/5	Environmental aspects of minerals and metals
6/6	Fostering national action to address global environmental challenges through increased cooperation between the United Nations Environment Assembly, the United Nations Environment Programme and multilateral environmental agreements
6/7	Combating sand and dust storms
6/8	Promoting sustainable lifestyles
6/9	Sound management of chemicals and waste
6/10	Promoting regional cooperation on air pollution to improve air quality globally
6/11	Highly hazardous pesticides
6/12	Environmental assistance and recovery in areas affected by armed conflict
6/13	Effective and inclusive solutions for strengthening water policies to achieve sustainable development in the context of climate change, biodiversity loss and pollution
6/14	Strengthening international efforts to combat desertification and land degradation, restore degraded land, promote land conservation and sustainable land management, contribute to land degradation neutrality and enhance drought resilience
6/15	Strengthening ocean efforts to tackle climate change, marine biodiversity loss and pollution

Subprogramme 1
Climate action

General Assembly resolutions

69/225	Promotion of new and renewable sources of energy	79/206	Protection of global climate for present and future generations of humankind
73/230	Effective global response to address the impacts of the El Niño phenomenon	79/211	Ensuring access to affordable, reliable, sustainable and modern energy for all

Governing Council of the United Nations Environment Programme decision

27/10	Climate Technology Centre and Network

Subprogramme 2
Digital transformation in supporting environmental action

Governing Council of the United Nations Environment Programme decision

23/1, sect. I	Implementation of decision SS.VII/1 on international environmental governance: Bali Strategic Plan for Technology Support and Capacity-building

Subprogramme 3
Nature action

General Assembly resolutions

65/161	Convention on Biological Diversity	79/145	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments
68/205	World Wildlife Day		
68/232	World Soil Day and International Year of Soils		
73/251	World Pulses Day		
77/172	Sustainable mountain development		
77/285	Implementation of the United Nations Decade of Action on Nutrition (2016–2025)	79/204	Towards the sustainable development of the Caribbean Sea for present and future generations
77/325	Tackling illicit trafficking in wildlife		
78/144	Agricultural technology for sustainable development	79/208	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
79/144	Oceans and the law of the sea		
		79/210	Harmony with Nature
		79/227	Agriculture development, food security and nutrition

Governing Council of the United Nations Environment Programme decisions

26/14	Global Environment Monitoring System/ Water Programme	27/3	International water quality guidelines for ecosystems
26/16	Promoting South-South cooperation on biodiversity for development	27/4	Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services
		27/6	Oceans

United Nations Environment Assembly resolutions

1/9	Global Environment Monitoring System/ Water Programme (GEMS/Water)	4/12	Sustainable management for global health of mangroves
2/10	Oceans and seas	4/13	Sustainable coral reefs management
2/14	Illegal trade in wildlife and wildlife products	4/15	Innovations in sustainable rangelands and pastoralism
4/10	Innovation on biodiversity and land degradation	4/16	Conservation and sustainable management of peatlands

Subprogramme 4
Environmental governance

Governing Council of the United Nations Environment Programme ministerial declarations and decisions

SS.VI/1	Malmö Ministerial Declaration	27/5	Coordination across the United Nations system, including the Environment Management Group
SS.VII/4	Compliance with and enforcement of multilateral environmental agreements	27/9	Advancing justice, governance and law for environmental sustainability
SS.XI/5	Environmental law		
SS.XII/3	International environmental governance		
25/11	Environmental law		

United Nations Environment Assembly resolution

1/3	Illegal trade in wildlife

Subprogramme 5
Chemicals and pollution action

General Assembly resolutions

74/212	International Day of Clean Air for blue skies	79/2	Political declaration of the high-level meeting on antimicrobial resistance
77/161	Promoting zero-waste initiatives to advance the 2030 Agenda for Sustainable Development		

Governing Council of the United Nations Environment Programme decisions

SS.IX/1	Strategic Approach to International Chemicals Management	SS.XII/5	Enhancing cooperation and coordination within the chemicals and wastes cluster
SS.XII/4	Consultative process on financing options for chemicals and wastes	24/4	Prevention of illegal international trade
		25/5	Chemicals management, including mercury
		27/12	Chemicals and waste management

United Nations Environment Assembly resolutions

1/5	Chemicals and waste	2/11, 4/6	Marine plastic litter and microplastics
1/6	Marine plastic debris and microplastics	4/7	Environmentally sound management of waste
1/7	Strengthening the role of the United Nations Environment Programme in promoting air quality	4/9	Addressing single-use plastic products pollution
3/7	Marine litter and microplastics		

Subprogramme 6
Finance and economic transformations

General Assembly resolutions

74/209	International Day of Awareness of Food Loss and Waste	79/220	Promotion of sustainable and resilient tourism, including ecotourism, for poverty eradication and environment protection
74/214	Sustainable tourism and sustainable development in Central Asia		

Governing Council of the United Nations Environment Programme decisions

27/7	Work by the United Nations Environment Programme on sustainable consumption and production	27/8	Green economy in the context of sustainable development and poverty eradication

United Nations Environment Assembly resolutions

2/8	Sustainable consumption and production	4/2	Promoting sustainable practices and innovative solutions for curbing food loss and waste
2/9	Prevention, reduction and reuse of food waste	4/4	Addressing environmental challenges through sustainable business practices
4/1	Innovative pathways to achieve sustainable consumption and production	4/5	Sustainable infrastructure

Subprogramme 7
Science policy

General Assembly resolution

71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development

Governing Council of the United Nations Environment Programme decisions

SS.X/5	Global Environment Outlook: environment for development	SS.XII/6	World environmental situation

United Nations Environment Assembly ministerial declarations and decisions

Decision 3/1	Extension of the delivery date for the sixth Global Environment Outlook report	UNEP/EA.4/HLS.1	Ministerial declaration of the United Nations Environment Assembly at its fourth session: innovative solutions for environmental challenges and sustainable consumption and production

Deliverables

14.9 Table 14.1 lists all cross-cutting deliverables of the programme.

Table 14.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	**4**	**4**	**4**	**3**
Meetings of:				
1. United Nations Environment Assembly	1	1	1	–
2. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Committee for Programme and Coordination	1	1	1	1
4. Fifth Committee	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**2**	**2**	**2**	**2**
5. To assess environmental risks from disasters and armed conflicts	1	1	1	1
6. On institutional and legal frameworks to improve national and local preparedness to mitigate environmental risks from disasters and armed conflicts	1	1	1	1
Publications (number of publications)	**2**	**2**	**3**	**3**
7. On disaster risk reduction, preparedness assessments and road maps	1	1	2	2
8. UNEP annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to humanitarian and military actors on environmental footprint reduction; and advice to 31 Member States, upon request, on the monitoring and implementation of strategies to enhance environmental risk reduction, environmental emergency response and environmental recovery and to make progress towards the achievement of the Sustainable Development Goals.				

Evaluation activities

14.10 The following evaluations conducted by UNEP and completed in 2024 have guided the proposed programme plan for 2026:

(a) Evaluation of subprogramme 1, Climate action (2014–2023);

(b) Formative evaluation of the UNEP delivery model and associated programmatic approach.

14.11 In response to the results of the evaluations referenced above, UNEP will align its climate action work more closely with the Paris Agreement, strengthen its role as a knowledge broker and enhance its visibility in global climate action arenas. UNEP will also improve project sustainability and develop strategies for scalable mitigation and adaptation solutions, while enhancing country-level engagement, including through greater coordination within United Nations country teams. Lastly, UNEP will develop robust theories of change and strengthen results-based management.

14.12 The following evaluations to be conducted by UNEP are planned for 2026:

(a) Evaluation of subprogramme 3, Nature action (2014–2024);

(b) Evaluation of subprogramme 7, Science policy (2020–2025).

Programme of work

Subprogramme 1
Climate action

Objective

14.13 The objective, to which this subprogramme contributes, is to advance the transition of countries to low-emission economic development and increase their adaptation and resilience to climate change.

Strategy

14.14 To contribute to the objective, the subprogramme will:

(a) Support Member States in the development of policies and standards to promote low-emission development plans and investment in clean energy and improve the global rate of energy efficiency;

(b) Support Member States in implementing gender-sensitive policies that achieve quantifiable social and environmental benefits, including through the reduction in greenhouse gas emissions from deforestation and forest degradation;

(c) Build the technical capacity of Member States to integrate ecosystem-based management into their national adaptation plans, put in place institutional arrangements to coordinate such plans and gain access to climate change adaptation finance for implementing such plans;

(d) Collaborate with the private sector in constructive and results-oriented partnerships that leverage climate finance and scale up the ambitions and impacts of climate action globally;

(e) Advocate and provide evidence and technical support for the use of climate strategies, such as a fiscal stimulus, in the context of sustainable recovery;

(f) Support Member States in making progress towards the achievement of Sustainable Development Goals 1, 5, 7, 11, 15 and 17.

14.15 The above-mentioned work is expected to result in:

(a) Member States lowering their emissions of greenhouse gases and other pollutants by reducing energy intensity and demand in sectors such as lighting, appliances, equipment, buildings and transport;

(b) Member States increasingly capitalizing on investment opportunities that reduce greenhouse emissions from deforestation and forest degradation with adequate social and environmental safeguards;

(c) Member States increasingly capable of better institutionalizing, implementing and monitoring their national adaptation plans alongside efforts to deliver sustainable development;

(d) Member States making use of innovative models to enhance financing for sustainable investment and the dissemination of low-emission technologies that help to significantly reduce greenhouse gas emissions, promote access to energy and enhance productive energy use;

(e) Increased low-emission investment as a result of countries using climate strategies to guide investments.

Programme performance in 2024

Strengthened commitment of Member States to increase the sustainability of the buildings and construction sector

14.16 The buildings and construction sector represents more than one fifth of global greenhouse gas emissions. In 2023, the subprogramme launched the "Buildings Breakthrough" initiative at the twenty-eighth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change to strengthen international collaboration towards increasing the sustainability of the sector and enhancing the climate resilience of buildings. In 2024, the subprogramme, through the Global Alliance for Buildings and Construction, published the *Global Status Report for Buildings and Construction: Beyond Foundations*, which outlined that, in 2022, the buildings sector was responsible for 34 per cent of global energy demand and 37 per cent of energy and process-related carbon dioxide emissions. To maintain the momentum for the Buildings Breakthrough initiative, in 2024 the subprogramme co-organized, with the Government of France, the first Buildings and Climate Global Forum, which gathered national ministers and high-level representatives from across the buildings sector value chain to discuss pathways for mainstreaming sustainable solutions to reduce the sector's emissions. The Forum concluded with 70 countries adopting the Chaillot Declaration, which set a foundation international cooperation on the issue.

14.17 Progress towards the objective is presented in the performance measure below (see table 14.2).

Table 14.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	27 countries pledged their commitment to the Buildings Breakthrough initiative	70 countries adopted the Chaillot Declaration at the first Buildings and Climate Global Forum 2 additional countries pledged their commitment to the Buildings Breakthrough initiative

Planned results for 2026

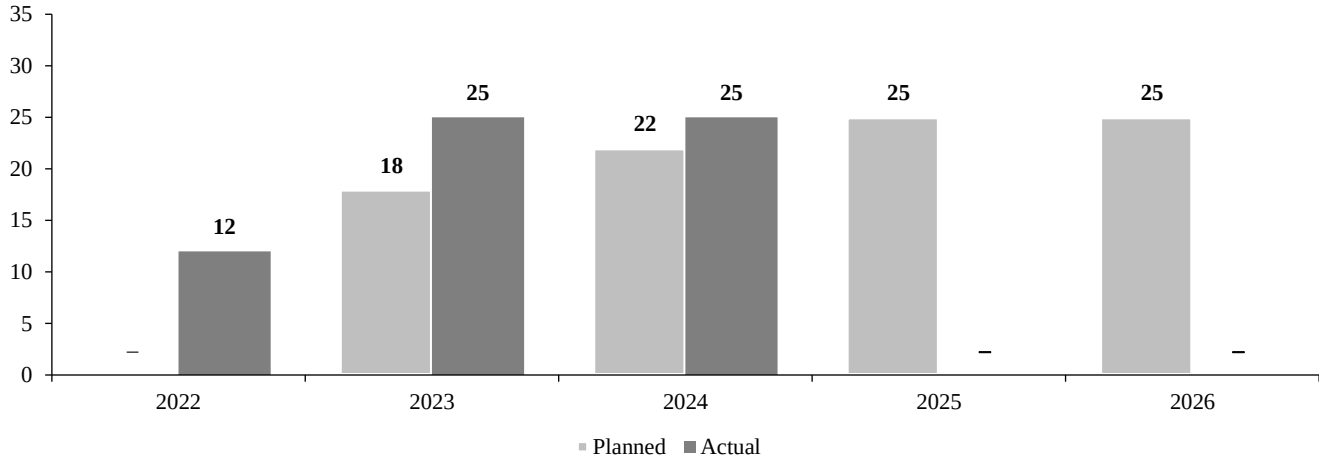
Result 1: enhanced national early warning systems

Programme performance in 2024 and target for 2026

14.18 The subprogramme's work contributed to 25 countries establishing early warning systems, which exceeded the planned target of 22 countries.

14.19 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.I).

Figure 14.I
Performance measure: number of countries that have established early warning systems (cumulative)



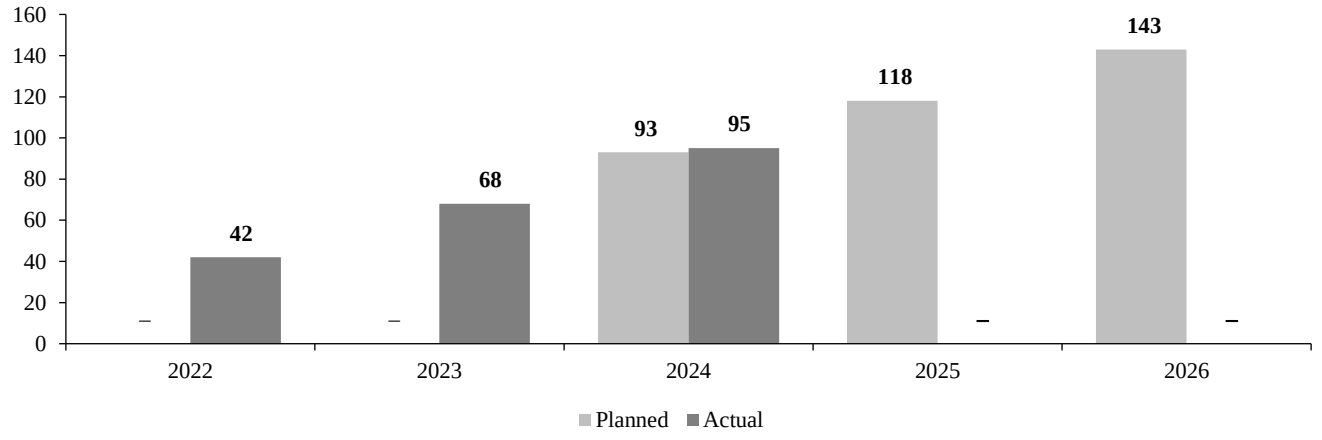
Result 2: Member States develop national methane road maps and action plans

Programme performance in 2024 and target for 2026

14.20 The subprogramme's work contributed to an additional 27 countries developing national methane road maps and action plans, for a total of 95, which exceeded the planned target of 93.

14.21 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.II).

Figure 14.II
Performance measure: number of countries that have developed national methane road maps and action plans (cumulative)



Result 3: Member states adopt environmentally sound technologies for climate change mitigation and adaptation

Proposed programme plan for 2026

14.22 UNEP promotes the accelerated transfer of environmentally sound technologies for climate change mitigation and adaptation at the request of developing countries through the Climate Technology Centre and Network. The Network provides technology solutions, capacity-building and advice on policy, legal and regulatory frameworks tailored to the needs of individual countries by harnessing

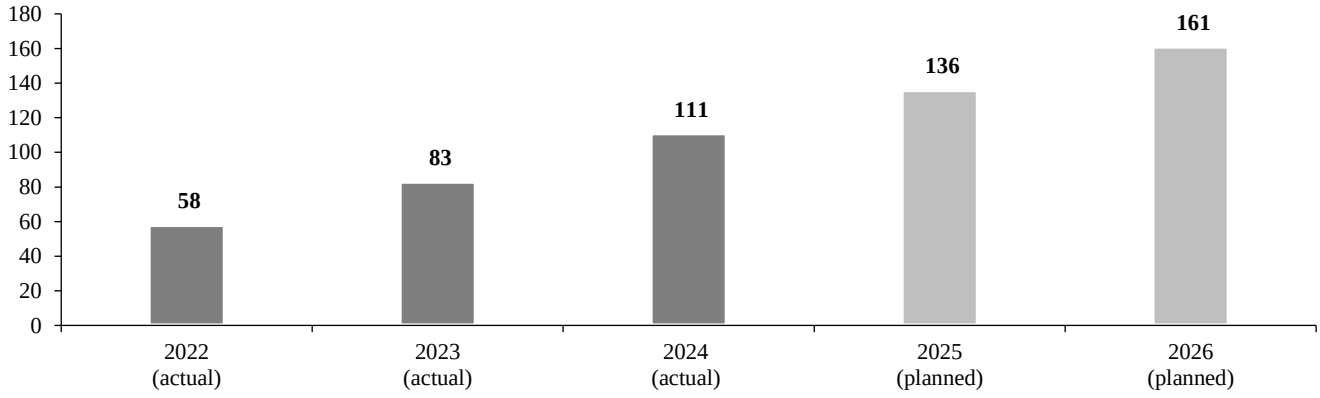
the expertise of a global network of technology companies and institutions. The subprogramme supports these efforts by providing scientific evidence, leading advocacy, promoting knowledge-sharing and providing technical guidance to requesting Member States.

Lessons learned and planned change

14.23 The lesson for the subprogramme was the need to leverage the next cycle of nationally determined contributions, recognizing their potential as investment blueprints, to attract funding and support for climate initiatives, including technology support. In applying the lesson, the subprogramme will advocate for the development of ambitious nationally determined contributions and support the transfer and uptake of environmentally sound technologies for climate change mitigation and adaptation. In addition, it will work closely with its partners to mobilize resources, foster collaboration and scale solutions aimed at ensuring that Member States integrate capacity-building and technology transfer into their broader development strategies.

14.24 Expected progress towards the objective is presented in the performance measure below (see figure 14.III).

Figure 14.III
Performance measure: number of countries equipped to implement technology policies and solutions for climate mitigation and adaptation (cumulative)



Deliverables

14.25 Table 14.3 lists all deliverables of the subprogramme.

Table 14.3
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**3**	**12**	**3**	**3**
1. On mitigation and adaptation technologies through the Climate Technology Centre and Network	3	12	3	3
Publications (number of publications)	**6**	**8**	**6**	**6**
2. On renewable energy, energy efficiency and the energy sector	3	4	3	3
3. On adaptation and resilience (assessments and tools)	3	4	3	3

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

C. Substantive deliverables

Consultation, advice and advocacy: advice to 85 countries on climate matters, including South-South cooperation, ecosystem-based adaptation, climate financing, the United Nations Framework Convention on Climate Change, short-lived climate pollutants, low-emission development, sustainable energy and energy efficiency, and the Warsaw Framework for REDD-plus.

D. Communication deliverables

Outreach programmes, special events and information materials: 50 side events, media outreach, goodwill ambassador outreach, 5 Global Adaptation Network newsletters, 6 regional forums on nationally determined contributions and 16 events on climate action, reaching an audience in excess of 1 million.

Digital platforms and multimedia platforms: some 16 stories and 5 videos for social media platforms and web pages.

Subprogramme 2
Digital transformations in supporting environmental action

Objective

14.26 The objective, to which this subprogramme contributes, is to advance the use of data and analytics on environmental issues to allow more effective policies, decisions, actions and investments by Member States and the private sector towards the achievement of the targets of the Sustainable Development Goals related to climate, nature and pollution, and of relevant multilateral environmental agreements.

Strategy

14.27 To contribute to the objective, the subprogramme will support and scale up access to environmental information through an effectively governed and inclusive data architecture and digital ecosystem for the planet. Specifically, the subprogramme will:

(a) Through its enabling role, digitize scientific knowledge and democratize its availability across the thematic subprogrammes of UNEP, using digital tools to enable, accelerate and amplify impact, as well as to bring more transparency to knowledge about the state of the planet;

(b) Initiate partnerships with public and private sector actors to harness data, digital technologies and computational sustainability, in order to help Member States to amplify and accelerate deeper structural transformations, with a view to driving markets, value chains, consumer behaviours and decision-making towards the achievement of environmentally sustainability outcomes;

(c) Use integrated data sets and analysis, based on digital norms and governance frameworks, to produce actionable, real-time and predictive insights, enabling the automatic monitoring of global, national and local progress towards achieving key targets of the Sustainable Development Goals related to climate, biodiversity and pollution and relevant internationally agreed frameworks, including multilateral environmental agreements;

(d) Work with Member States, the private sector and civil society to improve digital literacy and use digital platforms to enable further public participation in decision-making, open innovation and citizen science, helping to make progress towards achievement of the targets under Sustainable Development Goals 9, 16 and 17;

(e) Provide normative support, upon request, on closing the digital divide through the use of information and communications technologies procured in accordance with sustainability standards.

14.28 The above-mentioned work is expected to result in:

(a) Increased capacity of Member States to monitor the world environmental situation through the adoption of a global data architecture, governance frameworks, safeguards and standards for environmental and climate data and related digital public goods;

(b) Improved ability of Member States to predict and address future environment-related risks through the development of big data platforms that can measure the increasing convergence of environmental and climate stress and disaster vulnerability over space and time and to provide predictive analytics and an early warning system;

(c) Accelerated adoption of low-carbon and low-emission behaviours, lifestyles and products by consumers and citizens, through increased greenhouse gas emissions transparency, digital eco-labelling and digital nudging, including through e-commerce platforms and digital games;

(d) Identification and scaled adoption of digital technologies by Member States to support the conservation, sustainable use and equitable benefit-sharing of biodiversity;

(e) Reduced environmental impacts, e-waste and greenhouse gas emissions arising from the procurement and installation of digital infrastructure used to bridge the digital divide.

Programme performance in 2024

Member States and companies took action to reduce methane emissions

14.29 The General Assembly, in its resolution 79/1 on the Pact for the Future, further recognized the need for accelerating and substantially reducing non-carbon dioxide emissions globally, including, in particular, methane emissions, by 2030. The International Methane Emissions Observatory provides transparent, reliable and actionable data to reduce and mitigate methane emissions. In 2024, the subprogramme enhanced the platform to assemble a public database of empirically verified methane emissions data, sourced from satellites and global scientific measurement campaigns. That comprehensive approach enabled countries and companies to take swift, targeted action to reduce emissions. In 2024, the Observatory's system notified companies and Governments of approximately 1,900 releases. The alerts spanned five continents and helped emitters to plug major leaks. Overall, data from the observatory have prevented the release of greenhouse gases equivalent to the amount produced by more than 1 million cars over the course of a year.

14.30 Progress towards the objective is presented in the performance measure below (see table 14.4).

Table 14.4
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	National Governments and private sector companies received approximately 1,900 methane release notifications, enabling them to take swift mitigation action

Planned results for 2026

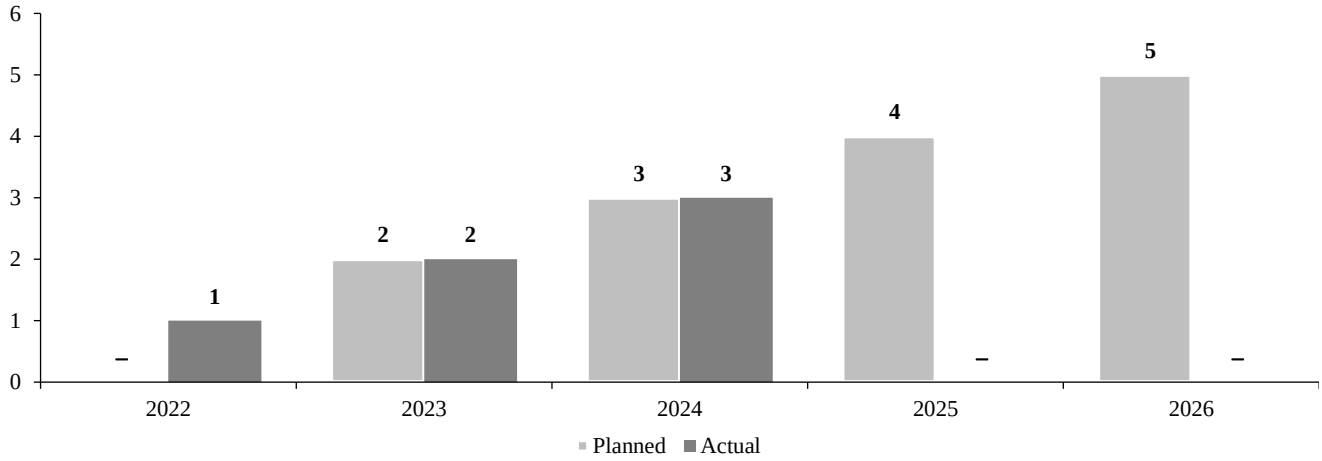
Result 1: increased effectiveness of data platforms

Programme performance in 2024 and target for 2026

14.31 The subprogramme's work contributed to one additional digital platform (a citizen science platform containing regional and country-level data) integrated with the World Environment Situation Room, for a cumulative total of three digital platforms, which met the planned target.

14.32 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.IV).

Figure 14.IV
Performance measure: number of digital regional platforms integrated with the World Environment Situation Room (cumulative)



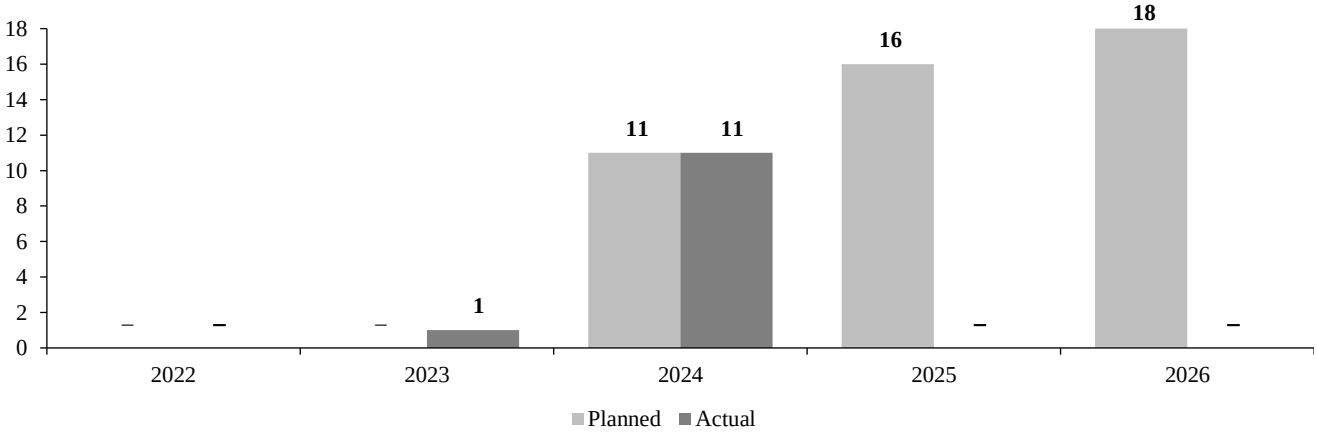
Result 2: increased interoperability of global environmental data

Programme performance in 2024 and target for 2026

14.33 The subprogramme's work contributed to 10 additional data partnerships that enhanced the interoperability of global environmental data, for a total of 11 partnerships, which met the planned target.

14.34 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.V).

Figure 14.V
Performance measure: number of data partnerships that enhance the interoperability of global environmental data (cumulative)



Result 3: strengthened digital capacities to drive environmental sustainability

Proposed programme plan for 2026

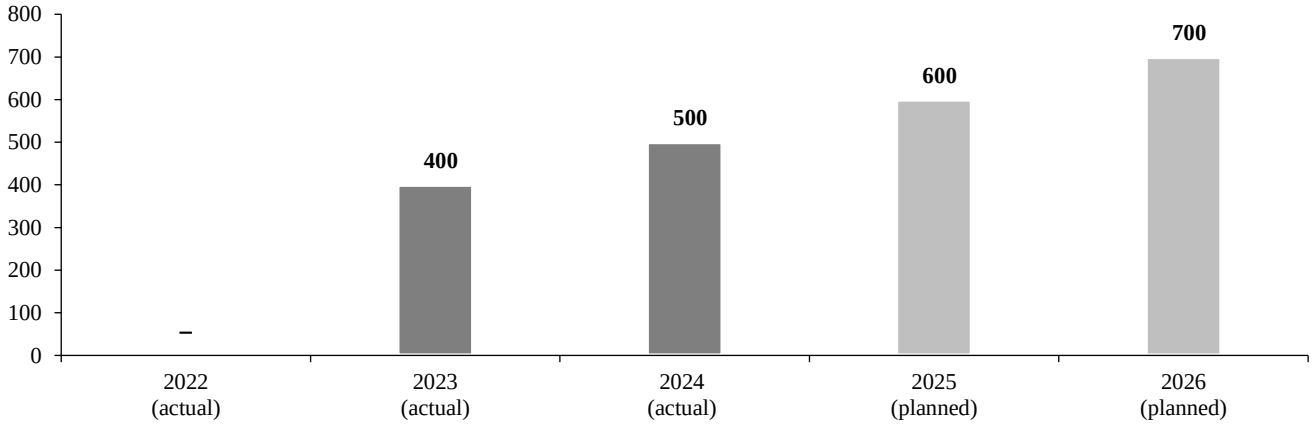
14.35 In the ministerial declaration adopted at the sixth session of the United Nations Environment Assembly, the importance of leveraging emerging technologies and closely monitoring their development to ensure that they contribute to sustainability, while ensuring that digitalization remained inclusive, equitable and sustainable, was emphasized. Strengthening Member States' digital capacities, while bridging the digital divide, is essential to leveraging data-driven technologies that foster informed decision-making and sustainable environmental action. The subprogramme has achieved significant progress in digital capacity-building through initiatives such as the Digital4Sustainability learning path, an e-learning course that explores the transformational role that digital solutions and innovations can play in advancing environmental sustainability, and the Digital Accelerator Lab, an innovation platform to scale digital technologies and data for sustainable development.

Lessons learned and planned change

14.36 The lesson for the subprogramme was that it needed to provide further capacity-building support to Member States in emerging areas, such as artificial intelligence, for environmental management. In applying the lesson, the subprogramme will develop targeted training programmes and resources for Member States to enable the uptake of digital solutions to address environmental challenges, while focusing on underserved regions to bridge the digital divide. The subprogramme will also work to strengthen digital capacities across other subprogrammes. These efforts will drive impactful action towards environmental sustainability.

14.37 Expected progress towards the objective is presented in the performance measure below (see figure 14.VI).

Figure 14.VI
Performance measure: number of stakeholders equipped to utilize digital solutions to address environmental challenges (annual)



Deliverables

14.38 Table 14.5 lists all deliverables of the subprogramme.

Table 14.5
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**2**	**2**	**3**	**4**
1. Using the World Environment Situation Room at the global, regional or national levels	2	2	3	4
Seminars, workshops and training events (number of days)	**24**	**18**	**24**	**24**
2. Training events on digital transformation for environmental sustainability – national training	6	4	6	6
3. Seminars and workshops on the development of a global environmental data strategy and digital cooperation framework	6	6	6	6
4. Seminars and workshops on development of the World Environment Situation Room and identification of transformative applications	6	4	6	6
5. Seminars and workshops on development and implementation of the environmental action plan for the Secretary-General's Road Map for Digital Cooperation	6	4	6	6
Publications (number of publications)	**4**	**4**	**4**	**4**
6. On digital technologies to achieve climate neutrality and pollution-reduction	4	4	4	4
Technical materials (number of materials)	**2**	**2**	**2**	**2**
7. On minimizing the environmental, climate and e-waste footprint of the information and communications technology sector	2	2	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: consultation with at least 100 Member States and other entities on the global environmental data strategy and on integration methods for environmental data and analytics; advice to 15 Member States and stakeholders on strengthening the adoption of data and digital transformation to achieve national climate, nature and pollution targets; and advice to approximately 15 Member States and stakeholders on using digital platforms and tools to enhance public participation in decision-making, open innovation and citizen science.				
Databases and substantive digital materials: World Environment Situation Room; and Digital Accelerator Lab				

Subprogramme 3
Nature action

Objective

14.39 The objective, to which this subprogramme contributes, is to strengthen the capacity of countries to manage marine, freshwater and terrestrial ecosystems through an integrated approach for maintaining and restoring their biodiversity and long-term functioning and ensuring the supply of ecosystem goods and services.

Strategy

14.40 To contribute to the objective, the subprogramme will:

(a) Advance cooperation with Member States, regional entities and other partners, including the United Nations Educational, Scientific and Cultural Organization and the Food and Agriculture Organization of the United Nations, to support education on sustainability by engaging with formal and non-formal education activities that shift knowledge, attitudes, behaviours and norms;

(b) Promote knowledge-sharing among countries and other non-governmental sectoral partners within the scope of existing transboundary cooperation frameworks, including the uptake and use of knowledge products, such as scenarios, spatial plans, trade-off analyses and ecosystem-based sectoral monitoring systems, disseminating publications and conducting normative work;

(c) Raise awareness on how to take into consideration nature and the ecosystem approach in public and private economic decision-making and provide technical advice, policy support and capacity-building to Member States on sustainable approaches to natural resource management and on biodiversity and health links among various sectors. In doing so, the subprogramme will support Member States in making progress towards the achievement of Sustainable Development Goals 2, 3, 6, 12 to 15 and 17.

14.41 The above-mentioned work is expected to result in:

(a) More coherent and cross-sectoral participation and cooperation among countries worldwide, including at the transboundary level, for the management and effective monitoring of nature;

(b) Youth-led action that addresses the indirect drivers of biodiversity loss and the degradation of nature;

(c) An enabling environment for embedding nature considerations into the financial and economic decision-making of public and private sector entities at multiple levels (global, regional, subregional and national) using a well-coordinated, whole-of-government approach that balances the demands of various sectors;

(d) Development of updated national plans for natural capital accounting by Member States;

(e) Enhanced capacity of Member States to manage and reduce risks to both human and ecosystem health and to integrate nature into national and international public health decision-making through science-based approaches.

Programme performance in 2024

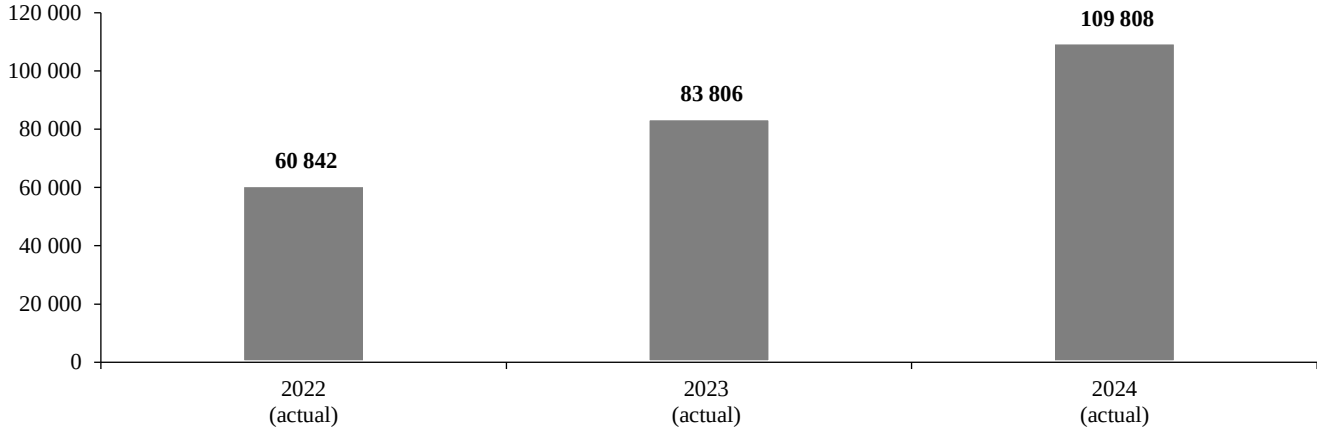
Policymakers and practitioners equipped to apply management and conservation approaches to strengthen resilience to disasters and the impacts of climate change

14.42 Nature offers many solutions to reduce the impacts of disasters and climate change, such as protecting forests on steep slopes and maintaining sand dunes along coastlines and wetlands to buffer excess rainwater. In 2021, the subprogramme, in partnership with the SDG Academy, launched an

open online course to equip participants with in-depth knowledge on the application of nature-based solutions, ecosystem-based approaches and other management and conservation approaches to strengthen resilience to disasters and the impacts of climate change. As at the end of 2024, 109,808 participants from 168 countries had enrolled in the course. Aimed at policymakers and practitioners and designed for global accessibility, the course is offered in seven languages: Arabic, English, Spanish, French, Hindi, Bahasa Indonesia and Chinese. The course fosters critical knowledge that not only enhances global awareness, but also empowers participants to influence policy frameworks, drive governmental action and implement sustainable practices.

14.43 Progress towards the objective is presented in the performance measure below (see figure 14.VII).

Figure 14.VII
Performance measure: number of people equipped to apply management and conservation approaches to build resilience to disasters and the impacts of climate change (cumulative)



Planned results for 2026

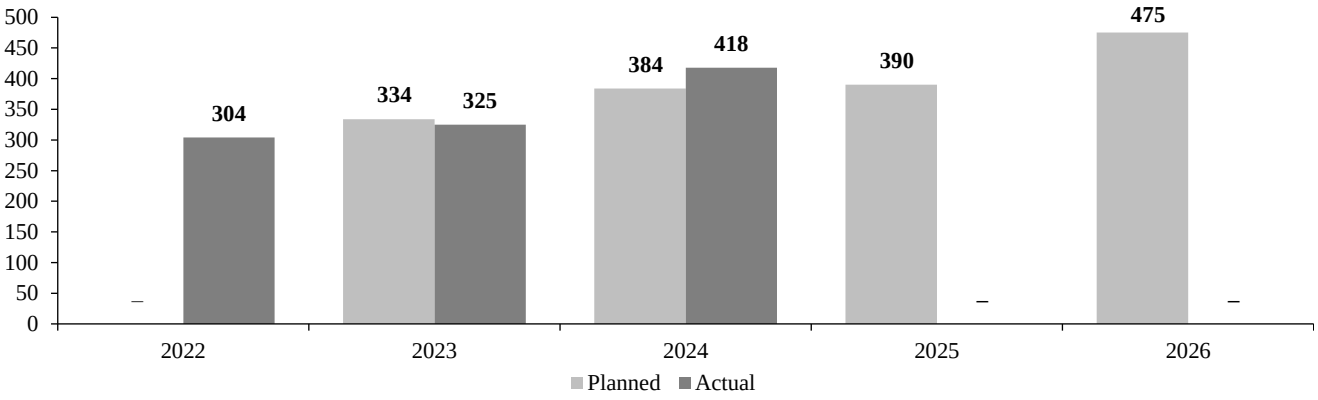
Result 1: finance sector commits itself to biodiversity target-setting

Programme performance in 2024 and target for 2026

14.44 The subprogramme's work contributed to 93 additional financial institutions making commitments to setting portfolio-wide biodiversity targets, for a total of 418 financial institutions, which exceeded the planned target of 384.

14.45 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.VIII).

Figure 14.VIII
Performance measure: number of financial institutions that signed a commitment to set biodiversity targets to reduce their impacts on nature (cumulative)



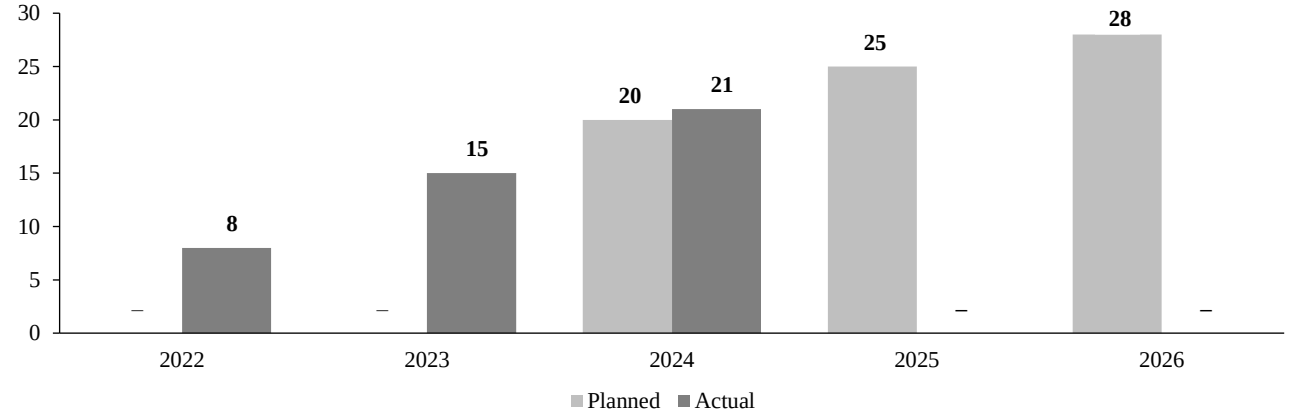
Result 2: public sector institutions capture the economic contribution of biodiversity and ecosystem services in decision-making

Programme performance in 2024 and target for 2026

14.46 The subprogramme's work contributed to 6 additional public sector institutions capturing the economic valuation of biodiversity and ecosystem services in their policies, for a total of 21 institutions, which exceeded the planned target of 20.

14.47 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.IX).

Figure 14.IX
Performance measure: number of public sector institutions that capture the economic valuation of biodiversity and ecosystem services in their policies (cumulative)



Result 3: strengthened resilience of coastal reef ecosystems and local communities

Proposed programme plan for 2026

14.48 The Global Fund for Coral Reefs is the world's leading financial vehicle to ensure a future for coral reefs and related ecosystems. As an implementation vehicle for the Kunming-Montreal Global Biodiversity Framework and Sustainable Development Goal 14, the subprogramme, in partnership with the Fund coalition, supports the strengthening of the resilience of coastal reef ecosystems, local communities and economies by mobilizing new public and private resources that advance sustainable

businesses and innovative financial solutions. The Fund invests in solutions in more than 20 countries with coral reefs, including businesses and financial mechanisms that have a positive impact on coral reef resilience while providing sustainable benefits for ecosystems, economies and local communities.

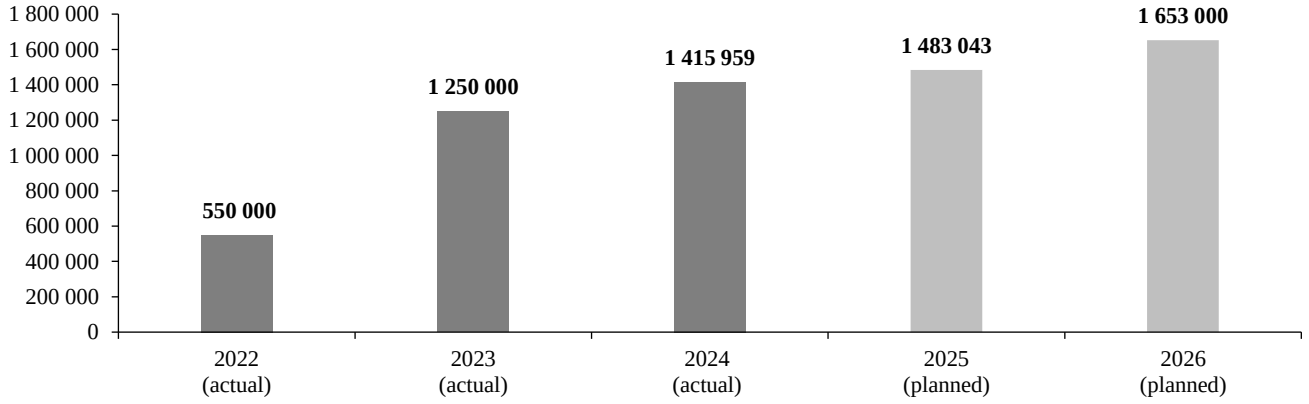
Lessons learned and planned change

14.49 The lesson for the subprogramme was the need for an effective monitoring and evaluation framework to measure progress towards meeting the ambitious goals of the Global Fund for Coral Reefs, to support demonstration and learning across the portfolio of supported interventions and to inform the replication and scaling-up of successful investments. In applying the lesson, the subprogramme will strengthen its technical assistance and capacity-building support to the Fund's beneficiaries and apply a structured and standardized approach to assess the progress and effectiveness of the Fund's programmes, including in the global tracking of the impact indicators of the fund.

14.50 Expected progress towards the objective is presented in the performance measure below (see figure 14.X).

Figure 14.X
Performance measure: area of coral reefs under improved management (cumulative)

(Hectares)



Deliverables

9. On investing in nature (assessments, tools and methodologies)	2	2	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advice to Member States to implement the Kunming-Montreal Global Biodiversity Framework, supporting 138 countries participating in the early action support project for the Framework.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach campaigns on sustainable management and use of natural resources and the United Nations Decade on Ecosystem Restoration.				

Subprogramme 4
Environmental governance

Objective

14.52 The objective, to which this subprogramme contributes, is to ensure that countries achieve environmental policy coherence and abide by strong legal and institutional frameworks that increasingly implement environmental goals in the context of sustainable development at the global, regional and national levels.

Strategy

14.53 To contribute to the objective, the subprogramme will:

(a) Facilitate relevant meetings and intergovernmental processes at the global, regional and national levels involving Governments, other United Nations entities, inter-agency mechanisms and regional ministerial forums through information management products, technical support and advisory services on environmental law and policy;

(b) Support the coherent implementation of the multilateral environmental agreements operating in similar clusters by strengthening national efforts to achieve global environmental targets and supporting parties in national reporting to related conventions, including to ease the national reporting load by promoting effective knowledge management across ministries and administrative units;

(c) Develop and disseminate innovative knowledge management tools and initiatives such as the United Nations Information Portal on Multilateral Environmental Agreements and the Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme), supported by training, technical assistance and communication activities, including mainstreaming a gender perspective;

(d) Promote the uptake of environmentally sound practices across the United Nations system through the provision of policy advice and cooperate with United Nations country teams to

mainstream lessons learned through the implementation of programmes, including replicating and scaling up interventions;

(e) In doing so, support Member States in making progress towards the achievement of Sustainable Development Goals 1, 5, 16 and 17.

14.54 The above-mentioned work is expected to result in:

(a) Increased efficiency and effectiveness of environmental policymaking processes leading to coherent and science-based policies, including through Member States' concerted action on international environmental issues;

(b) Improved governance and partnerships with major groups and stakeholders in the development of synergistic national programmes, as well as increased integration of the environment into national and subnational planning and budgeting processes on sustainable development.

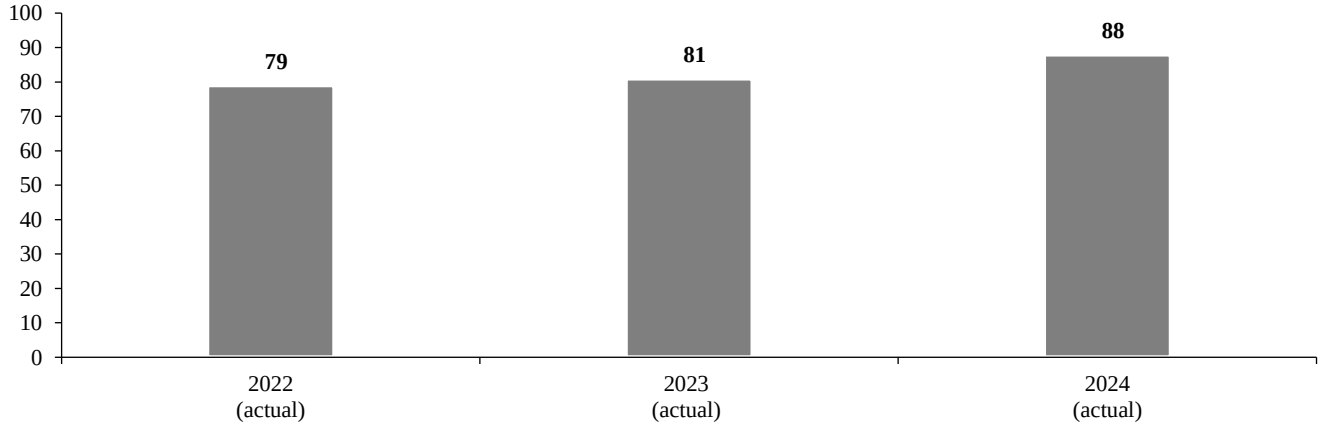
Programme performance in 2024

Sustained integration of the environmental dimension into United Nations Sustainable Development Cooperation Frameworks

14.55 The subprogramme has continued to leverage the United Nations system to strengthen its support for Governments and national stakeholders in identifying and responding to national environmental challenges. In addition to providing environmental analysis through input to United Nations common country analyses and the development of environmental summaries, the subprogramme has enhanced the capacities of United Nations country teams and their national counterparts by providing guidance and integrated advisory services on the environmental dimension of the 2030 Agenda. These efforts have led to the integration of the environmental dimension into United Nations Sustainable Development Cooperation Frameworks, as well as various national policies and strategic plans.

14.56 Progress towards the objective is presented in the performance measure below (see figure 14.XI).

Figure 14.XI
Performance measure: number of countries with United Nations Sustainable Development Cooperation Frameworks that integrate the environmental dimension of sustainable development (cumulative)



Planned results for 2026

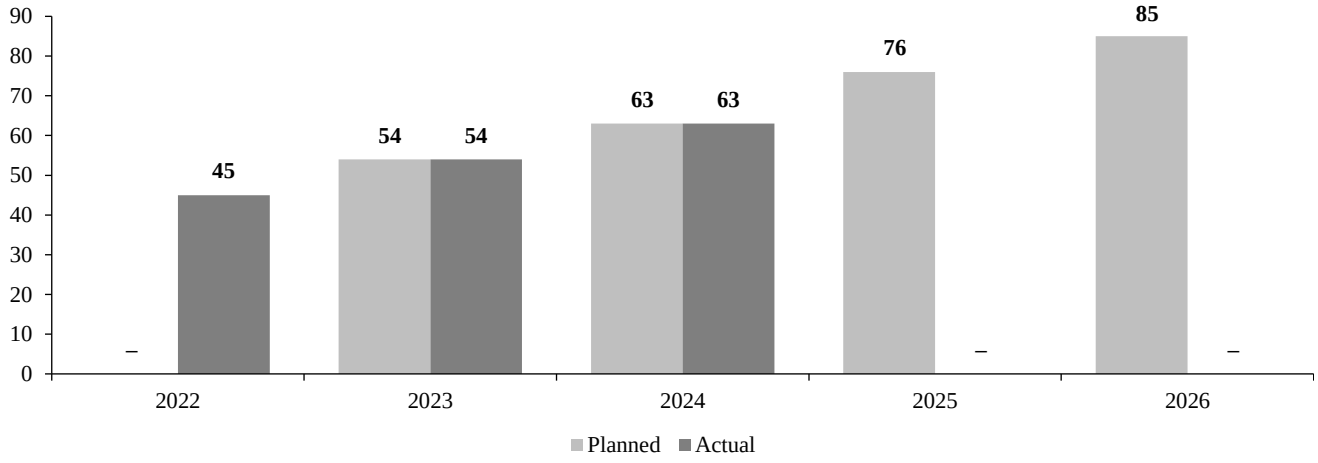
Result 1: strengthened development and implementation of environmental law at the international and national levels

Programme performance in 2024 and target for 2026

14.57 The subprogramme's work contributed to an additional 9 countries drafting environmental legislation to address environmental goals, for a total of 63 countries, which met the planned target.

14.58 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XII).

Figure 14.XII
Performance measure: number of countries that drafted environmental legislation to address environmental goals (cumulative)



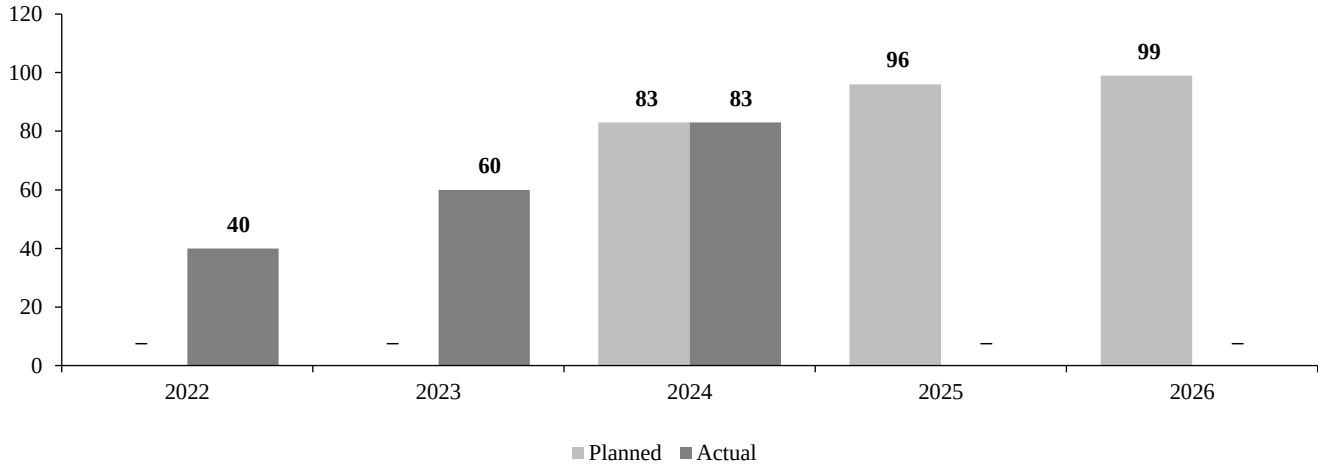
Result 2: reduced production and consumption of hydrofluorocarbons through the implementation of the Kigali Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer

Programme performance in 2024 and target for 2026

14.59 The subprogramme's work contributed to 23 additional countries implementing the Kigali Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer, for a total of 83 countries, which met the planned target.

14.60 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XIII).

Figure 14.XIII
Performance measure: number of countries implementing the Kigali Amendment to the Montreal Protocol on Substances that Deplete the Ozone Layer (cumulative)



Result 3: legal stakeholders enhance the implementation and enforcement of environmental law

Proposed programme plan for 2026

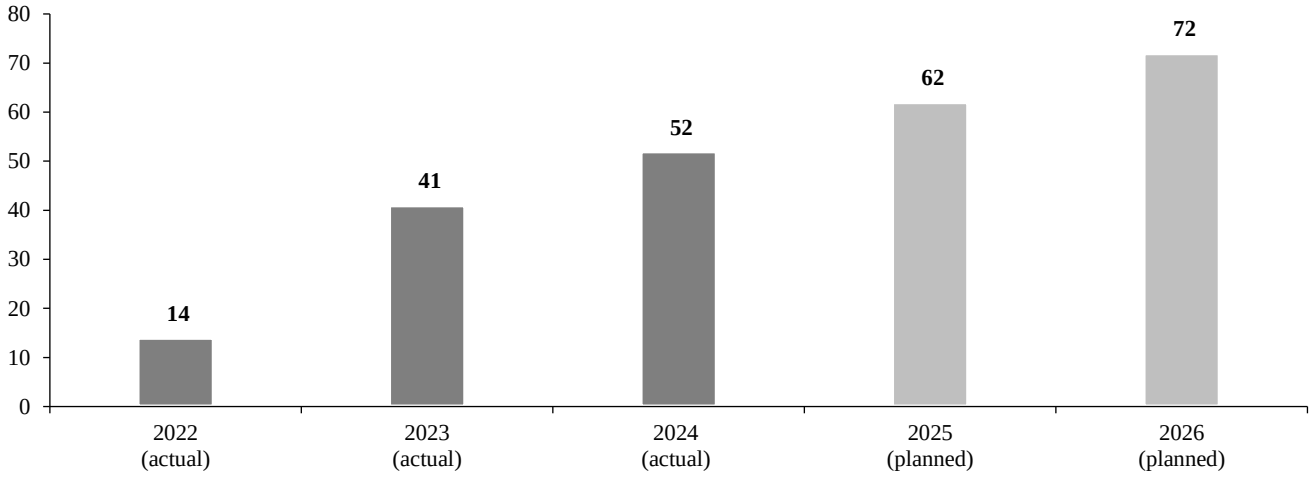
14.61 Legal stakeholders, including judges, prosecutors, legal practitioners, parliamentarians and enforcement officials, play a crucial role in countries' environmental law implementation and enforcement, including through safeguarding access to justice and remedies. Without the rule of law and the enforcement of legal rights and obligations, environmental governance may be discretionary, subjective and unpredictable. Enhancing the knowledge of legal stakeholders on how to implement and enforce environmental laws is vital to improving the effectiveness of legal and institutional frameworks.

Lessons learned and planned change

14.62 The lesson for the subprogramme was that there was a need for sustained and continuous capacity-building for legal stakeholders on various aspects of environmental law implementation and enforcement. This is essential owing to the frequent turnover of stakeholders, institutional changes and evolving legal and policy frameworks, which necessitate ongoing training to ensure consistency and effectiveness in implementation and enforcement. In applying the lesson, the subprogramme will build on its successes by enhancing the capacities of legal stakeholders, such as judges, prosecutors, legal practitioners, parliamentarians and enforcement officials, through regular training programmes, capacity-building events and dialogues on issues of environmental law. This work will also be complemented by the development of toolkits, legislative assessment reports and targeted guidance materials.

14.63 Expected progress towards the objective is presented in the performance measure below (see figure 14.XIV).

Figure 14.XIV
Performance measure: number of countries with strengthened capacities of legal stakeholders on the implementation and enforcement of environmental law (cumulative)



Deliverables

14.64 Table 14.7 lists all deliverables of the subprogramme.

Table 14.7
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Conference and secretariat services for meetings (number of three-hour meetings)	**40**	**40**	**50**	**50**
1. Meetings of the Committee of Permanent Representatives on environmental law and governance	40	40	50	50
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**6**	**6**	**16**	**16**
2. On environmental law development and support to mainstream environmental issues, the implementation of multilateral environmental agreements and the linkages between poverty and the environment	6	6	16	16
Seminars, workshops and training events (number of days)	**15**	**15**	**15**	**15**
3. Train-the-trainer events on environmental governance	15	15	15	15
Publications (number of publications)	**8**	**3**	**3**	**3**
4. On environmental law (global)	8	3	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: advice to approximately 25 Member States, upon request, on the monitoring and implementation of multilateral environmental agreements, legislative strategies and frameworks to counter environmental degradation resulting from climate change and crimes that affect the environment.				
Databases and substantive digital materials: 20 online courses introducing various multilateral environmental agreements.				

Subprogramme 5
Chemicals and pollution action

Objective

14.65 The objective, to which this subprogramme contributes, is to advance the sound management of chemicals and waste and improve air quality at all levels in order to achieve a healthier environment and better health for all.

Strategy

14.66 To contribute to the objective, the subprogramme will:

(a) Provide technical advice, policy support and capacity-building to Member States, the private sector and civil society, within the framework of relevant multilateral environmental agreements and the broader international chemicals and waste agenda, for enabling the development and implementation of policies, strategies, legislation and action plans on sound chemicals and waste management, including, but not limited to, mercury, persistent organic pollutants and lead, as well as on waste prevention and the sound management of electronic and other forms of waste;

(b) Provide technical and advisory support to Member States regarding the development and implementation of policies, strategies and mechanisms on the prevention of and reduction in waste, and environmentally sound waste treatment and disposal of the waste, including in the context of disaster or conflict-related environmental emergencies;

(c) Support the reduction in pollution release, building institutional capacity for the development and use of air quality assessments with publicly accessible monitoring data and for the development of policies and legal, regulatory, financial and technical measures to reduce air, water, soil and ocean pollutants;

(d) In doing so, will help Member States to make progress towards the achievement of targets 6.3, 12.3, 12.4 and 14.1 of the Sustainable Development Goals.

14.67 The above-mentioned work is expected to result in:

(a) An increased number of Member States developing or implementing policies, strategies, legislation or action plans that promote sound chemical and waste management and/or the implementation of multilateral environmental agreements and the existing framework on chemicals and waste;

(b) An increased number of Member States developing or implementing policies, strategies and mechanisms to prevent or reduce waste and ensure environmentally sound waste treatment or disposal, including in the context of disaster or conflict-related environmental emergencies;

(c) An increased number of policy, regulatory, financial and technical measures developed to reduce pollution in air, water, soil and the ocean;

(d) A reduction in the release of pollutants to the environment;

(e) Enhanced action by the private sector and civil society on pollution prevention and control.

Programme performance in 2024

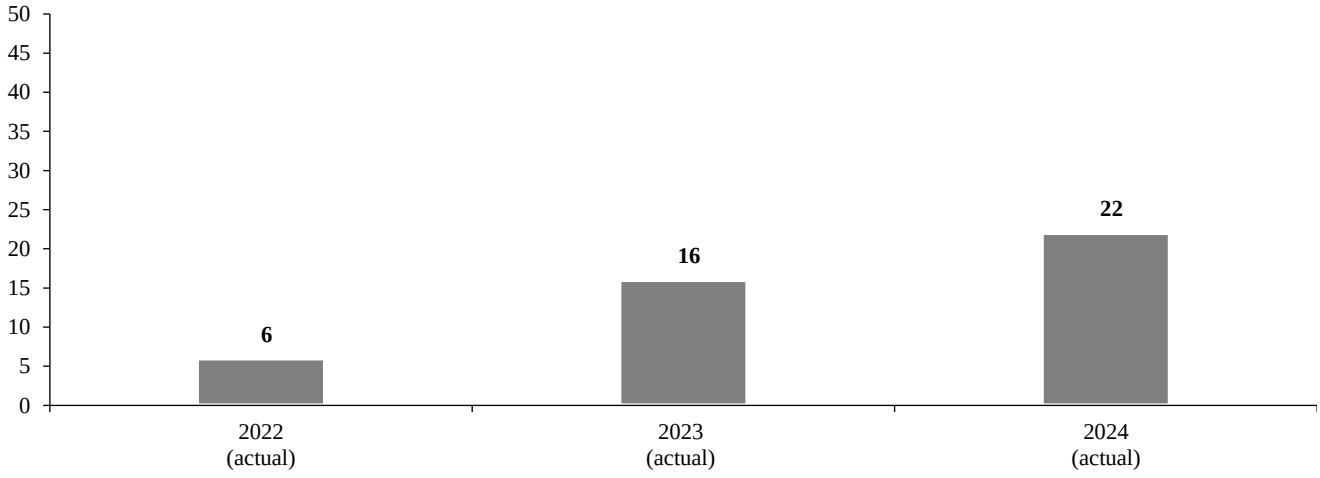
Strengthened waste and wastewater management systems

14.68 Improving waste and wastewater management can reduce pollution affecting the most vulnerable significantly. The subprogramme delivers interventions at the subnational, national, regional and global levels by supporting the development and implementation of policies, strategies and mechanisms and promoting cooperation, capacity-building and knowledge generation and

knowledge-sharing. At the subnational level, the subprogramme provided policy recommendations and facilitated multi-stakeholder collaboration on wastewater and sanitation in Sabah, Malaysia. In Iraq, in partnership with the International Office on Migration, the subprogramme established a pilot wetland system in Islah, Dhi Qar Governorate, to recycle wastewater, which is expected to benefit 30,000 people by 2025. In Comoros, the subprogramme supported integrating extended producer responsibility principles into national waste legislation. In the Gambia, the subprogramme funded and guided the development of a national solid waste management strategy based on circular economy principles. Regionally, the UNEP zero waster in the Caribbean initiative supported the eighth high-level forum on waste management, held in Port of Spain in October 2024, at which ministers adopted a declaration on regional action towards zero waste. Circular economy approaches, improved waste management policies, financial mobilization, digital transformation and enhanced data systems to support sustainable waste management are emphasized in the declaration. Globally, UNEP convened the Climate and Clean Air Coalition and co-launched the declaration on reducing methane from organic waste at the twenty-ninth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, in November 2024. More than 30 countries, responsible for nearly 50 per cent of global methane emissions from organic waste, endorsed the declaration and committed themselves to integrating targets for reducing methane emissions into future nationally determined contributions.

14.69 Progress towards the objective is presented in the performance measure below (see figure 14.XV).

Figure 14.XV
Performance measure: number of countries that strengthened their waste and wastewater management systems (cumulative)



Planned results for 2026

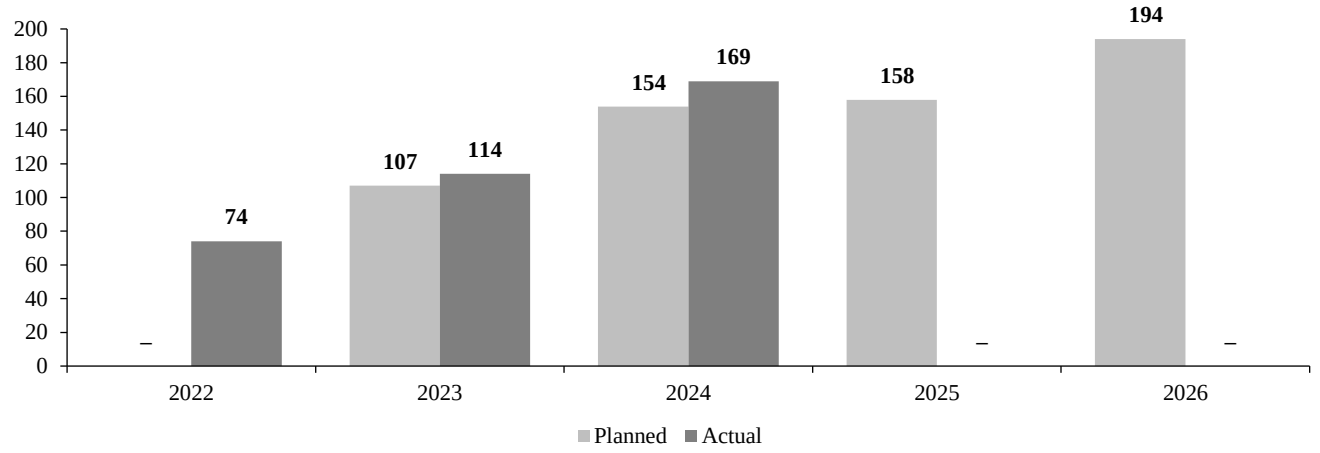
Result 1: policies and regulatory, financial and technical measures developed to reduce pollution

Programme performance in 2024 and target for 2026

14.70 The subprogramme's work contributed to the development of an additional 55 policies and measures to reduce pollution, for a total of 169 policies and measures, which exceeded the planned target of 154.

14.71 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XVI).

Figure 14.XVI
Performance measure: number of policies and regulatory, financial and technical measures developed to reduce pollution in air, water, soil and the ocean (cumulative)



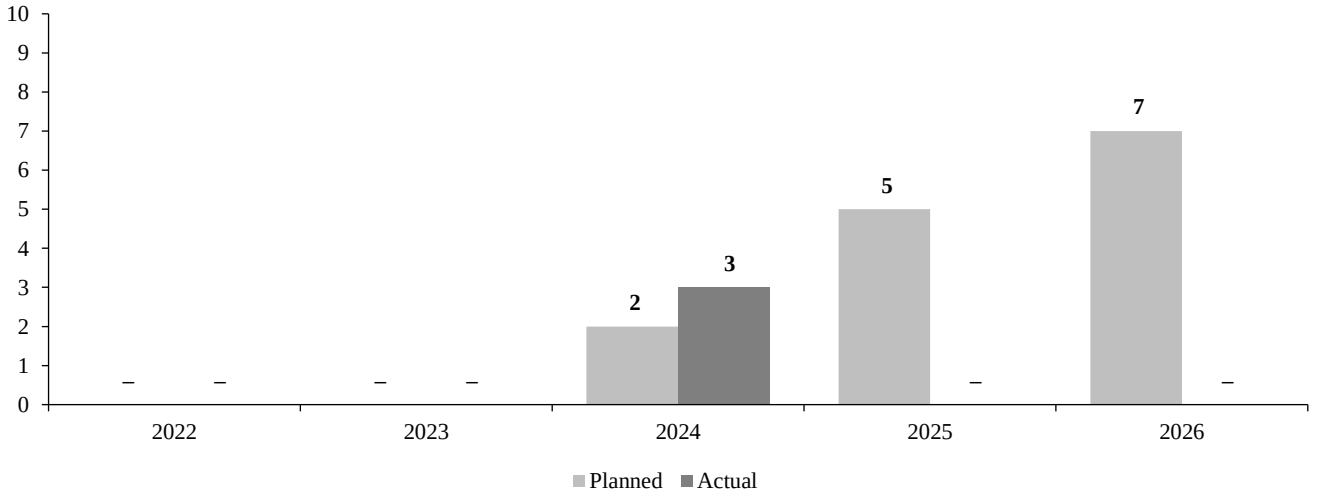
Result 2: adoption of circular economy policies and practices in high-impact sectors to reduce pollution

Programme performance in 2024 and target for 2026

14.72 The subprogramme's work contributed to three governments (Argentina, Malaysia and Nigeria) taking policy action to advance extended producer responsibility and similar scheme development to prevent and reduce pollution, which exceeded the planned target of two governments, including subnational governments, and producer responsibility organizations.

14.73 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XVII).

Figure 14.XVII
Performance measure: number of governments, including subnational governments, and producer responsibility organizations taking policy action to advance extended producer responsibility and similar scheme development to prevent and reduce pollution (cumulative)



Result 3: adoption of policies and strategies to address the environmental dimensions of antimicrobial resistance

Proposed programme plan for 2026

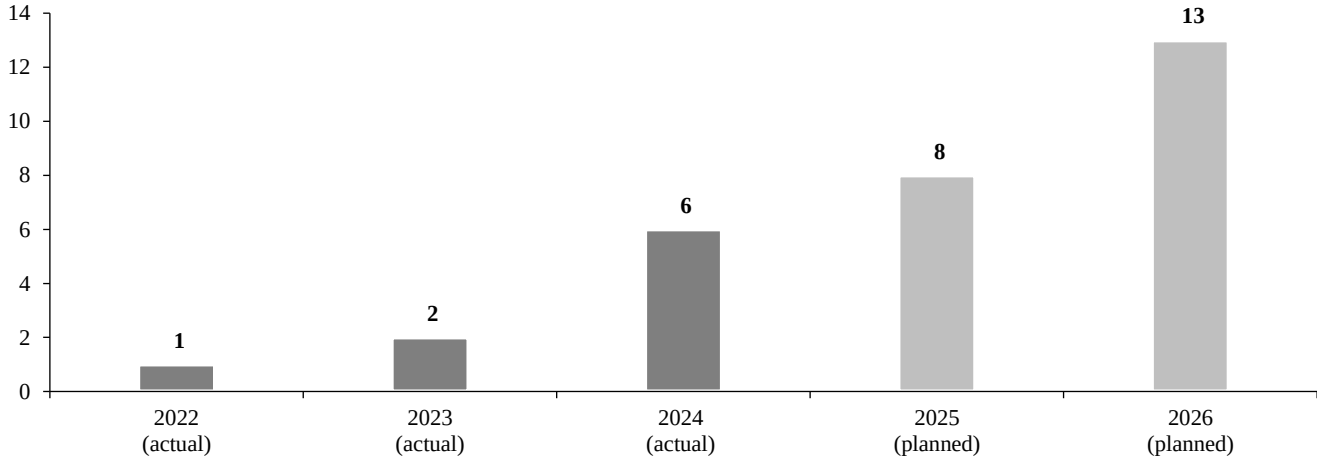
14.74 Antimicrobial resistance is a pressing global health issue that demands urgent action to safeguard the ability to treat diseases, enhance food safety, food security and nutrition, foster economic development, equity, and a healthy environment, and advance the Sustainable Development Goals. In 2022, the subprogramme partnered with the Food and Agriculture Organization of the United Nations, the World Health Organization and the World Organization for Animal Health to form a quadripartite alliance to raise awareness, coordinate a global, multisectoral response and support countries in developing and implementing national action plans on antimicrobial resistance.

Lessons learned and planned change

14.75 The lesson for the subprogramme was the need to foster greater private sector engagement to ensure a coordinated multisectoral response to address antimicrobial resistance. In applying the lesson, the subprogramme will increase its efforts to facilitate engagement and commitment from industry actors in the three economic sectors and their value chains that are key drivers of antimicrobial resistance development and spread in the environment (i.e., pharmaceuticals and other chemicals, agriculture and food, and healthcare). The subprogramme will also continue to work within the quadripartite framework to update the global action plan on antimicrobial resistance and to provide technical support and advisory services to Member States in integrating the environmental considerations into national action plans on antimicrobial resistance and into national chemical pollution and waste management programmes.

14.76 Expected progress towards the objective is presented in the performance measure below (see figure 14.XVIII).

Figure 14.XVIII
Performance measure: number of initiatives, policies, strategies or action plans undertaken by public or private actors from key economic sectors to address the environmental factors driving antimicrobial resistance (cumulative)



Deliverables

14.77 Table 14.8 lists all deliverables of the subprogramme.

Table 14.8
Subprogramme 5: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**8**	**8**	**8**	**8**
1. On the development of policies and legal, institutional or fiscal strategies and mechanisms for sound chemicals management	8	8	8	8
Seminars, workshops and training events (number of days)	**8**	**9**	**10**	**10**
2. Seminars and training events on the sound management of chemicals and waste	8	9	10	10
Publications (number of publications)	**1**	**2**	**1**	**1**
3. Global assessment of the state of and trends in laws, regulations and fiscal policies for sound chemicals and waste management	1	2	1	1
Technical materials (number of materials)	**4**	**4**	**6**	**6**
4. On status, trends and related risks and improvements in chemicals and waste management at various scales	2	2	3	3
5. On action plans related to air quality at various scales, in particular at the subnational, national and regional levels	2	2	3	3
Fact-finding, monitoring and investigation missions (number of missions)	**4**	**6**	**4**	**4**
6. Monitoring missions on the status and trends relating to chemicals management, waste management and air quality, including on marine litter and other forms of pollution	4	6	4	4
C. Substantive deliverables				
Consultation, advice and advocacy: advice to 3 countries and 5 entities of the private sector and civil society on pollution prevention and control.				
D. Communication deliverables				
Outreach programmes, special events and information materials: outreach programmes, campaigns and information materials for Member States and stakeholders to increase awareness of pollution prevention and reduction in achieving the Sustainable Development Goals.				

Subprogramme 6
Finance and economic transformations

Objective

14.78 The objective, to which this subprogramme contributes, is to advance the transition by countries and businesses to sustainable development through multiple pathways, including the uptake of green economy in the context of sustainable development and poverty eradication, the adoption of sustainable consumption and production patterns and the decoupling of economic activity from unsustainable resource use and environmental impact, while improving human well-being.

Strategy

14.79 To contribute to the objective, the subprogramme will:

(a) Deliver country assessments, promote the uptake of policy planning and implementation tools and convene knowledge platforms that will enable policymakers and businesses to actively pursue sustainable pathways;

(b) Generate and disseminate knowledge through its extensive network of partners in the public and private sectors, including the financial sector, as well as civil society and academia;

(c) Promote sustainable patterns of consumption and production through policy recommendations on the green economy in the context of sustainable development and poverty eradication, on sustainable finance and on business practices and tools and knowledge that allow consumers to make informed choices, while considering issues related to generational and gender equality;

(d) Catalyse the alignment of finance and investment with sustainability objectives and policy priorities by developing or contributing to the norms for sustainable finance, providing the basis for standard-setting and promoting the role of private sustainable finance in complementing public finance;

(e) Support Governments and subnational governments in strengthening institutional capacities and implementing national development plans, policies and/or action plans; and support businesses adopting and implementing sustainable management and cleaner production practices across value chains, helping Member States to make progress towards the achievement of targets under Sustainable Development Goals 1, 4, 5, 7 to 9, 11 to 13 and 17;

(f) Strengthen the capacities of Member States and other stakeholders to integrate environmental sustainability and sustainable patterns of consumption and production into their decision-making approaches, including on sustainable finance, trade and infrastructure.

14.80 The above-mentioned work is expected to result in:

(a) Integrated sustainable development pathways, including policies and frameworks on the green economy in the context of sustainable development and poverty eradication or on sustainable consumption and production, for improved resource efficiency and human well-being and reduced ecological and material footprints;

(b) Improved environmental sustainability of private sector actors, including in the financial sector, in their core business practices and across their value chains, such as through sustainable investment and resource extraction, transformation and use, to create sustainable and more inclusive markets and economies;

(c) Public, private and individual consumers having access to and increasingly demanding and consuming sustainable goods and services.

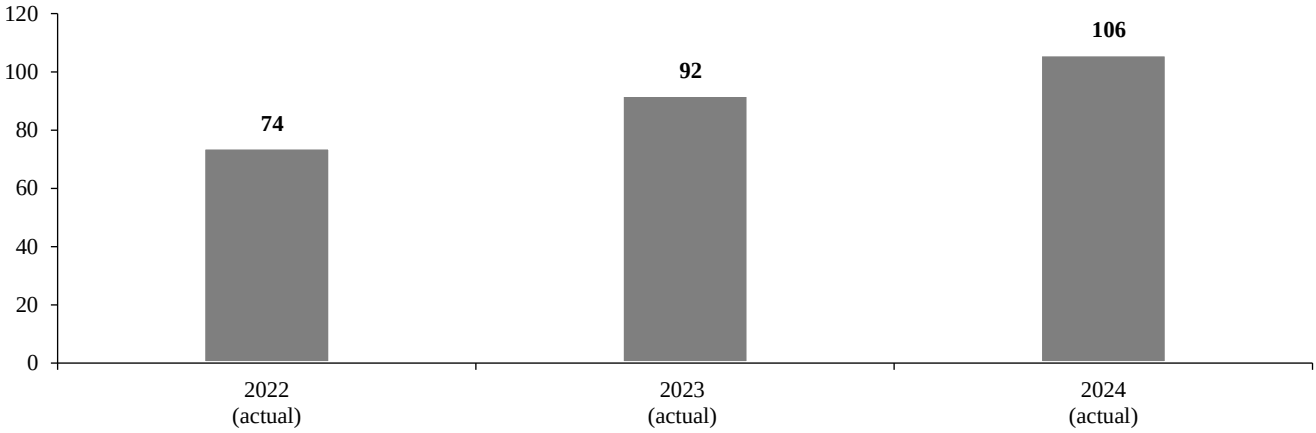
Programme performance in 2024

Member States adopted enabling policies to advance environmental sustainability

14.81 In order to meet the 2030 Agenda objectives, it is necessary to manage resources more responsibly while also addressing sustainability, poverty, equity, employment, economic growth, security and health objectives. Building on the long-standing work on sustainable finance, life cycle thinking and green economy in the context of sustainable development and poverty eradication, the subprogramme responded to heightened demand from Member States for support in policy formulation and implementation by enhancing capacity-building, fostering sectoral partnerships and promoting access to technologies. In 2024, the subprogramme worked to foster sustainability through targeted capacity-building, multi-stakeholder partnerships and integrating circular economy approaches into national and regional frameworks. For example, the subprogramme facilitated the adoption of 14 policies to advance sustainable transitions globally, including in Brazil, Chile, Indonesia, Kazakhstan and Uruguay. The subprogramme's work also contributed to the development of the Latin America and the Caribbean regional strategy on sustainable consumption and production (2024–2030) and to the adoption of United Nations Environment Assembly resolutions 6/1, on the circularity of a resilient and low-carbon sugar cane agro-industry, and 6/8, on promoting sustainable lifestyles.

14.82 Progress towards the objective is presented in the performance measure below (see figure 14.XIX).

Figure 14.XIX
Performance measure: number of economic, finance, industry and trade policies adopted by Member States to enable sustainable transitions (cumulative)



Planned results for 2026

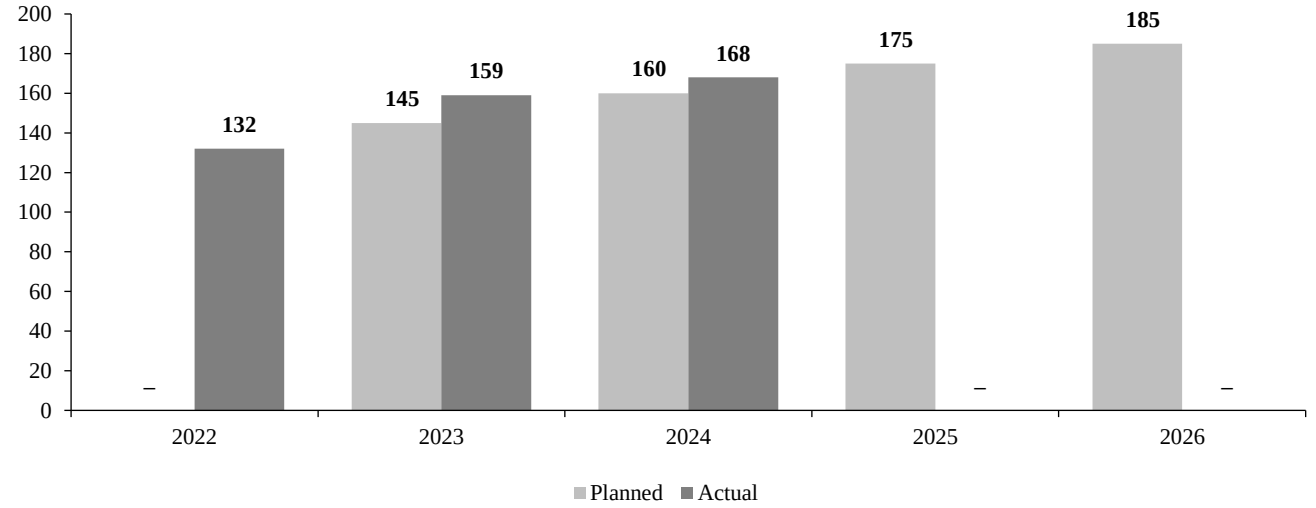
Result 1: increased availability of sustainable insurance

Programme performance in 2024 and target for 2026

14.83 The subprogramme's work contributed to an additional 9 insurance companies adopting the UNEP Finance Initiative Principles for Sustainable Insurance, for a total of 168 companies, which exceeded the planned target of 160. These principles represent an industry standard for responsible insurance.

14.84 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XX).

Figure 14.XX
Performance measure: number of insurance companies that adopted the Principles for Sustainable Insurance (cumulative)



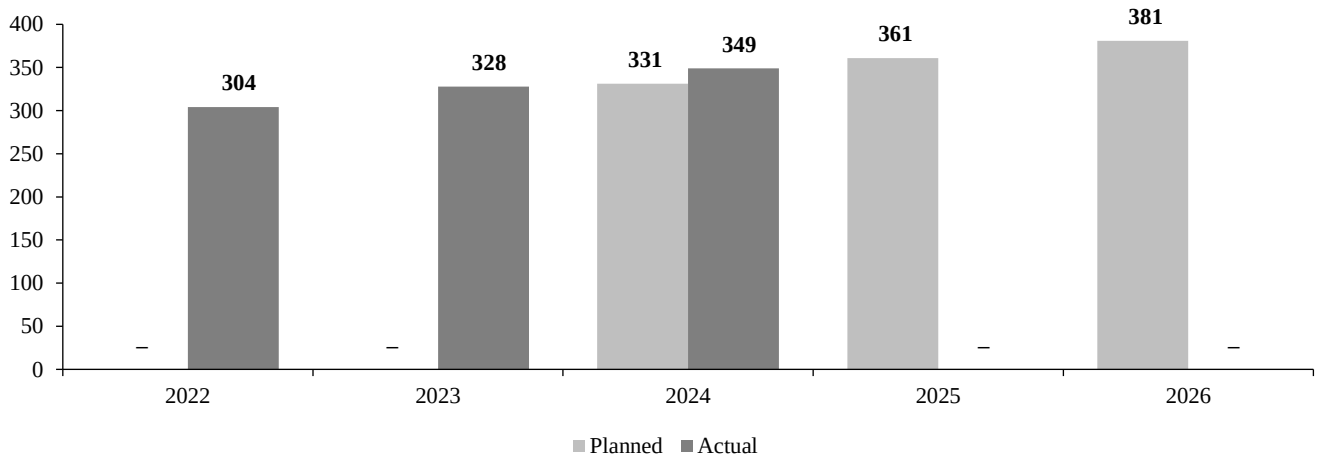
Result 2: increased availability of tools and measures to transform choices and behaviour by governments, businesses and individual consumers for environmental sustainability

Programme performance in 2024 and target for 2026

14.85 The subprogramme's work contributed to an additional 21 consumer information and education tools and products that inform decision-making, choices and changes in behaviour towards sustainability, for a total of 349 tools and products, which exceeded the planned target of 331.

14.86 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XXI).

Figure 14.XXI
Performance measure: number of consumer information and education tools and products that inform decision-making, choices and changes in behaviour towards sustainability (cumulative)



Result 3: accelerating progress towards sustainable consumption and production patterns

Proposed programme plan for 2026

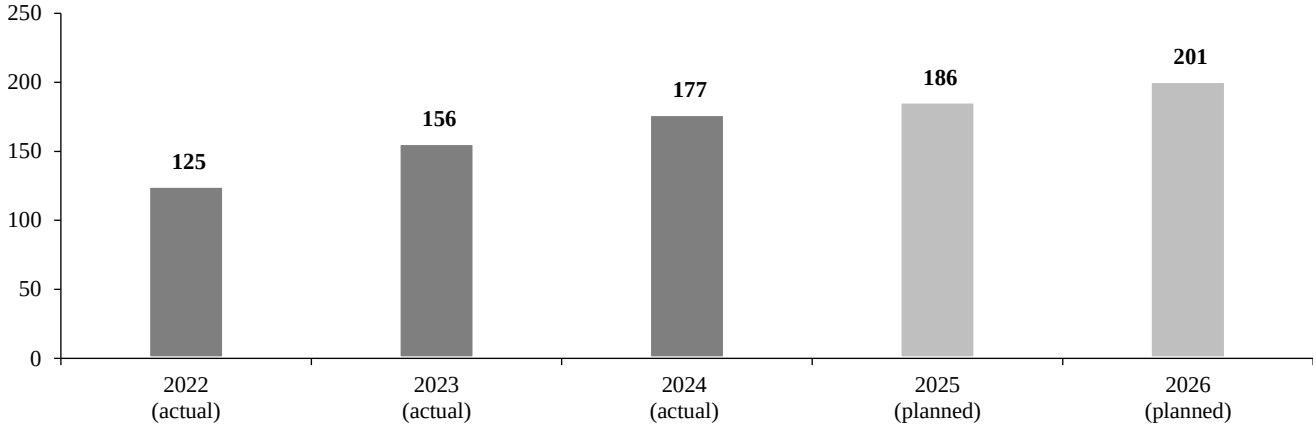
14.87 Unsustainable patterns of consumption and production are key drivers of natural resource depletion, climate change, biodiversity loss, pollution, malnutrition and land degradation. Fundamental changes in the way in which societies produce and consume goods and services are required, by making the transition to more sustainable economic and business models that promote sustainable consumption and production patterns and sustainable lifestyles. The subprogramme has provided policy advice, developed global knowledge products and facilitated global and regional policy initiatives in high-impact sectors to support countries in providing the enabling conditions for sustainable consumption and production (market signals, policy frameworks, incentives, innovation, infrastructure and education), accelerating the transition to sustainable development and the achievement of the Sustainable Development Goals.

Lessons learned and planned change

14.88 The lesson for the subprogramme was the importance of capacity-building tailored to the unique socioeconomic contexts of countries, given that past experience demonstrated that a tailored approach was critical for ensuring local ownership and institutional readiness to implement reforms. In applying the lesson, the subprogramme will enhance its focus on capacity-building initiatives, while fostering stronger partnerships with local institutions and stakeholders. It will also implement adaptive monitoring mechanisms to track progress and refine strategies dynamically. This adaptive approach will ensure that transitions towards sustainable consumption and production are context-sensitive, inclusive and resilient, ultimately driving greater impact and sustainable outcomes.

14.89 Expected progress towards the objective is presented in the performance measure below (see figure14.XXII).

Figure 14.XXII
Performance measure: number of initiatives undertaken by Member States to integrate sustainable consumption and production and economic and financial incentives into national planning and/or sectoral strategies (cumulative)



Deliverables

14.90 Table 14.9 lists all deliverables of the subprogramme.

Table 14.9
Subprogramme 6: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**15**	**18**	**20**	**16**
1. On finance and economic transformations	15	18	20	16
Seminars, workshops and training events (number of days)	**15**	**19**	**20**	**15**
2. Seminars and training events on finance and economic transformation approaches	15	19	20	15
Publications (number of publications)	**4**	**4**	**2**	**2**
3. On finance and economic transformation approaches	4	4	2	2
Technical materials (number of materials)	**8**	**9**	**8**	**5**
4. On finance and economic transformations approaches	8	9	8	5

C. Substantive deliverables

Consultation, advice and advocacy: advice on sustainable lifestyles, resource efficiency, the green economy in the context of sustainable development and poverty eradication, sustainable consumption and production, and finance and economic transformations to 8 Member States; 3 national assessments in high-impact sectors on sustainable livelihoods for young people; consultations on circular economy approaches to 5 governments; and 1 meeting of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns and the One Planet network.

Databases and substantive digital materials: global platform on circular economy approaches; and skills hub on green economy in the context of sustainable development and poverty eradication.

D. Communication deliverables

Outreach programmes, special events and information materials: 1 side event of the 10-Year Framework of Programmes and the One Planet network at the 2026 high-level political forum on sustainable development; and 1 technical workshop and 2 online training courses for policymakers on youth employment in high-impact sectors in 3 countries.

Subprogramme 7
Science policy

Objective

14.91 The objective, to which this subprogramme contributes, is to strengthen the capacity of governments and non-government actors to access, generate and use quality environmental data and analysis and to sustain a strengthened science-policy interface that generates evidence-based environmental assessments, identifies emerging environmental issues and fosters relevant policy action at the global, regional and national levels, including for the achievement of the environment-related Sustainable Development Goals.

Strategy

14.92 To contribute to the objective, the subprogramme will:

(a) Review the world environmental situation and strengthen the interface between science and policymaking across the sustainable development agenda, including through collaboration with the Statistical Commission and the five regional commissions;

(b) Develop scientifically credible and unbiased data, information and knowledge and provide policy-relevant analysis and policy recommendations to catalyse and accelerate solutions and action for the environment, based on a continuous review of the global status of the environment and trends;

(c) Catalyse systematic and transformative shifts that can drive progress towards the aspirations of achieving the environmental dimension of the 2030 Agenda, through gender-sensitive partnerships across all geographical areas, involving Governments and non-governmental organizations, the business and scientific communities, and citizens;

(d) Pursue broad stakeholder engagement as a critical step in enhancing societal understanding, acceptance and uptake of its scientific analysis and serve as a knowledge broker that builds consensus on existing and emerging environmental issues through platforms and networks, such as the Science-Policy-Business Forum on the Environment, the International Resource Panel, the World Adaptation Science Programme and the One Planet network;

(e) Provide analytical research, increase awareness of the environmental dimension of sustainable development and build capacity to measure, monitor and report on progress, helping Member States to integrate common methods for tracking and measuring the environment-related Sustainable Development Goals, including in their national processes, in particular Goals 6, 12 to 15 and 17.

14.93 The above-mentioned work is expected to result in:

(a) Increased production and use of scientific environmental data by Member States and other stakeholders;

(b) A more coherent approach to harmonizing country data, tracking progress and science-based environmental policymaking within and among countries;

(c) Increased capacity of Member States to measure progress towards achieving the Sustainable Development Goals and to increase policy coherence for the integration of national sustainable development plans and other internationally agreed environmental goals.

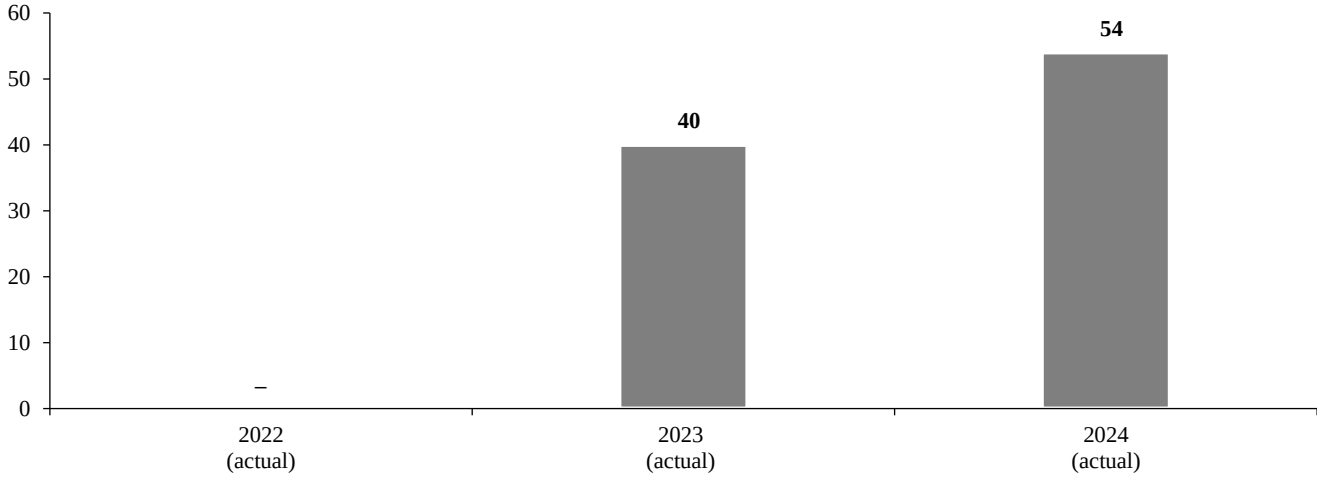
Programme performance in 2024

Strengthened evidence base for environmental policymaking in Africa

14.94 Strengthening the availability of science-based evidence is critical for policymakers to improve their understanding of the environmental priority action required to achieve sustainable development. The subprogramme has been working towards enhancing the use of environmental data and statistics to inform government policy and decision-making. Since 2023, the subprogramme has spearheaded the development of national environment summary reports, which provide critical information on climate, nature and pollution to support member States in increasing the policy coherence of national sustainable development plans with other internationally agreed environmental goals. These summary reports also contribute to the strengthening of the evidence base for United Nations country programming by harmonizing country data, while facilitating enhanced policy coherence for sustained development planning and supplementing the development of United Nations Sustainable Development Cooperation Frameworks.

14.95 Progress towards the objective is presented in the performance measure below (see figure 14.XXIII).

Figure 14.XXIII
Performance measure: number of national environmental summaries available to Member States (cumulative)



Planned results for 2026

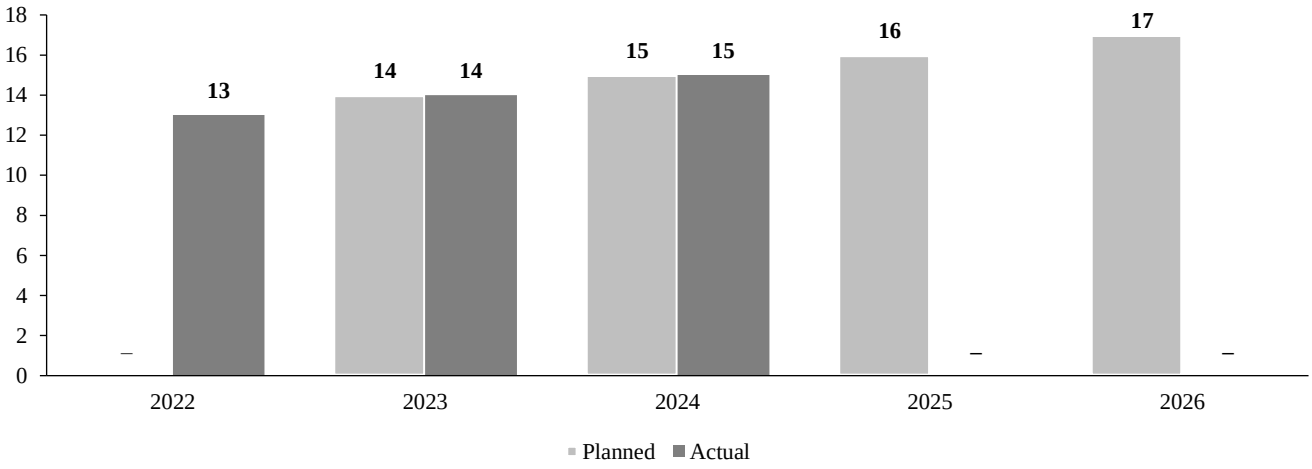
Result 1: improved country-level monitoring of water quality

Programme performance in 2024 and target for 2026

14.96 The subprogramme's work contributed to 1 additional country submitting quality-assured data on surface and groundwater quality to the Global Freshwater Quality Database, for a total of 15 countries, which met the planned target.

14.97 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XXIV).

Figure 14.XXIV
Performance measure: number of countries that submit quality-assured data on surface and groundwater quality to the Global Freshwater Quality Database (cumulative)



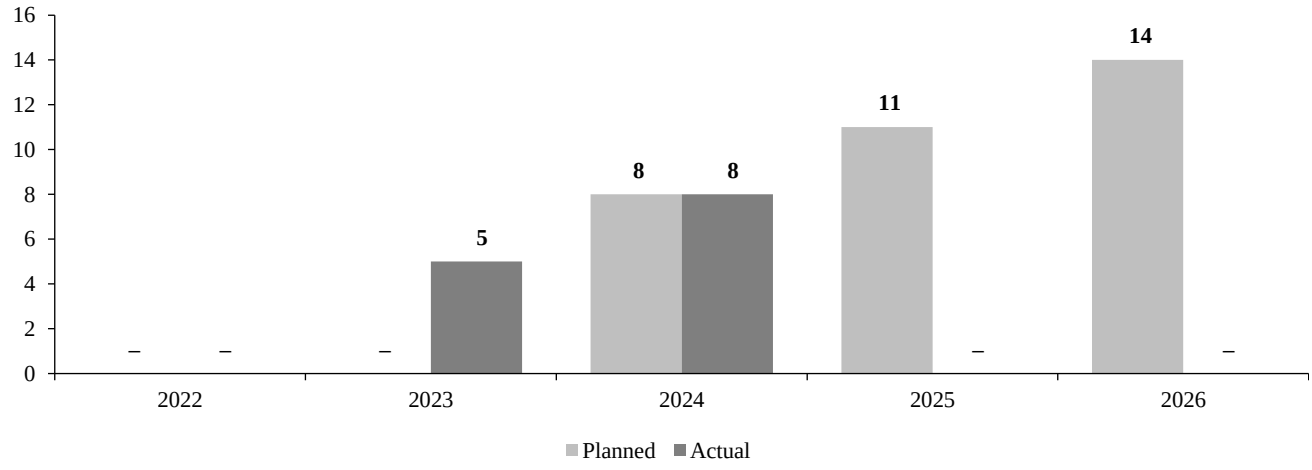
Result 2: improved electronic waste (e-waste) monitoring and collection

Programme performance in 2024 and target for 2026

14.98 The subprogramme's work contributed to three additional countries establishing e-waste monitoring frameworks, for a total of eight countries, which met the planned target.

14.99 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 14.XXV).

Figure 14.XXV
Performance measure: number of countries that have established an e-waste monitoring framework (cumulative)



Result 3: strengthened science-policy interface in Latin America and the Caribbean

Proposed programme plan for 2026

14.100 Following decision 5/2021 of the Forum of Ministers of Environment of Latin America and the Caribbean, UNEP has been working towards bridging the gap between science and policy in the region.

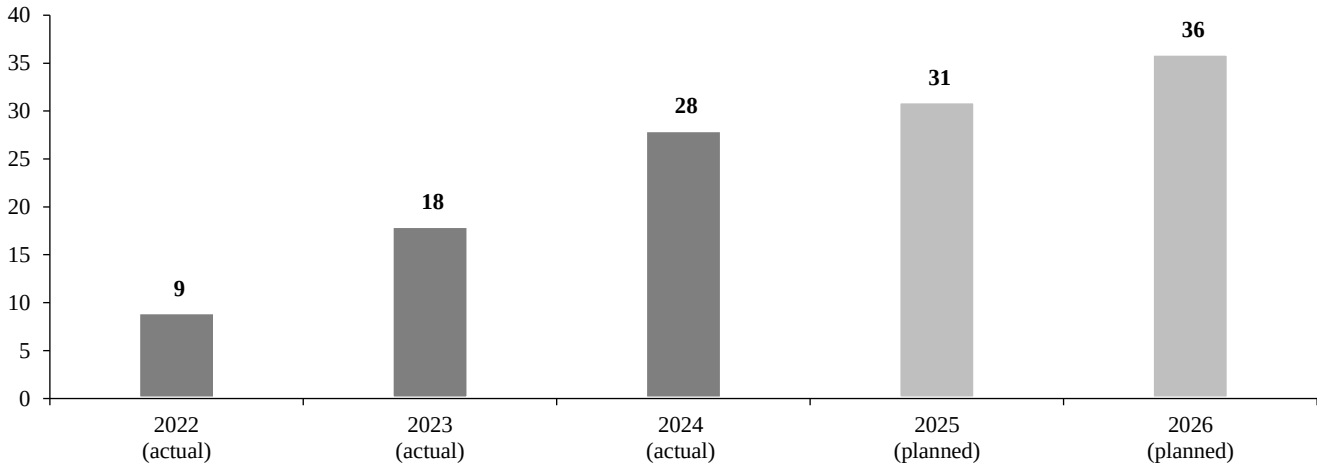
The decision emphasized the need for a stronger science-policy interface, highlighting the importance of improving data capacities and continuously monitoring the region's environmental status.

Lessons learned and planned change

14.101 The lesson for the subprogramme was that expanding knowledge management and collaboration among experts and professionals was essential in providing tailored and targeted training for stakeholders. In applying the lesson, the subprogramme fostered collaboration among governments, scientific institutions and international organizations through thematic working groups to address priority areas such as environmental data management and integrating scientific evidence into policymaking. Recognizing the unique challenges of the Caribbean, dedicated working groups will focus on the subregion's specific issues. These initiatives will be assessed for their relevance, impact and effectiveness in guiding decision makers with robust scientific analyses, ensuring that they contribute to evidence-based policies that address the region's pressing environmental challenges.

14.102 Expected progress towards the objective is presented in the performance measure below (see figure 14.XXVI).

Figure 14.XXVI
Performance measure: number of ministerial decisions and related initiatives adopted in Latin America and the Caribbean informed by scientific evidence (cumulative)



Deliverables

14.103 Table 14.10 lists all deliverables of the subprogramme.

Table 14.10

C. Substantive deliverables

Consultation, advice and advocacy: consultation with some 25 Member States and stakeholders on methodology development and capacity development in data-collection methodologies relating to the Sustainable Development Goals; advice to at least 20 Member States and stakeholders on strengthening the science-policy interface; and advice to at least 25 Member States and stakeholders on implementing national environmental information systems.

D. Communication deliverables

Digital platforms and multimedia content: web pages, multimedia material and audio, video and social media content on the scientific work of UNEP to be utilized by Member States, stakeholders and the public.

B. Proposed post and non-post resource requirements for 2026

Overview

14.104 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 14.11 to 14.13.

Table 14.11
Overall: evolution of financial resources by object of expenditure

[a] Includes one temporary post (P-3) pursuant to General Assembly resolution 79/2.

14.105 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 14.14 to 14.16 and figure 14.XXVII.

14.106 As shown in tables 14.14 (1) and 14.15 (1), the overall resources proposed for 2026 amount to $24,273,400, reflecting a net decrease of $227,700 (or 0.9 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

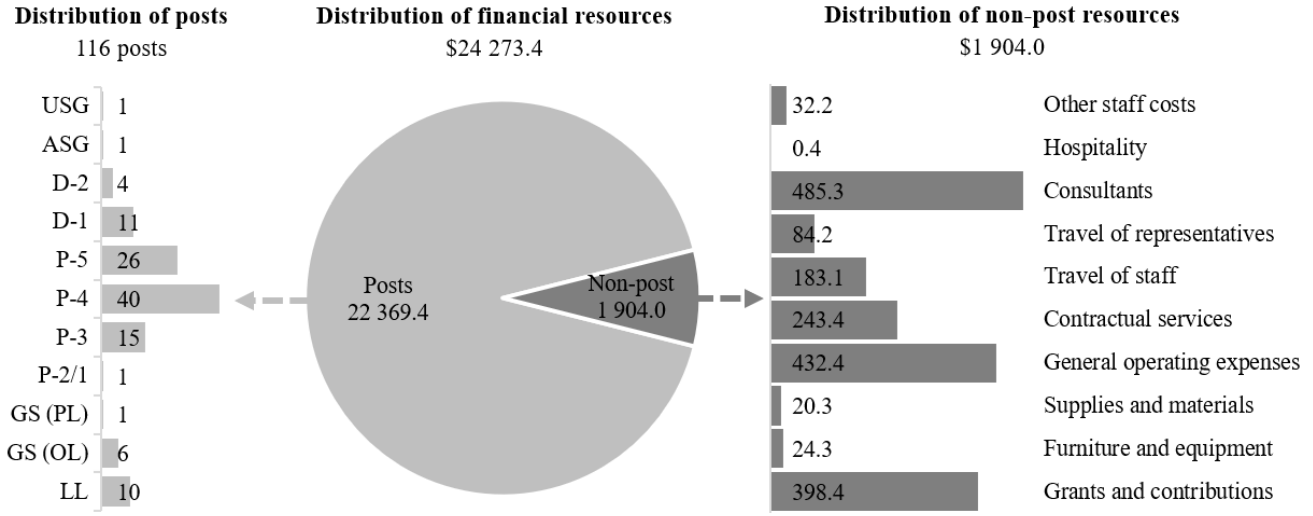
Figure 14.XXVII
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

14.107 As shown in table 14.14 (1), resource changes reflect a decrease of $469,000 under policymaking organs, which is related to the removal of the non-recurrent provisions associated with the seventh session of the United Nations Environment Assembly that were approved for 2025 and are not required in 2026. These consist of other staff costs ($208,000), hospitality ($20,100), contractual services ($45,100) and general operating expenses ($195,800).

New and expanded mandates

14.108 As reflected in table 14.14 (1), resource changes reflect an increase of $240,900 under subprogramme 5, Chemicals and pollution action, which is related to the request to update the global action plan on antimicrobial resistance pursuant to General Assembly resolution 79/2 titled “Political declaration of the high-level meeting on antimicrobial resistance”. The requirements consist of one temporary Programme Management Officer (P-3) ($110,800) costed at a 50 per cent vacancy rate in accordance with established practice for newly established posts, consultants ($95,100), travel ($10,000), contractual services ($20,000) and general operating expenses ($5,000).

Other changes

14.109 As shown in table 14.14 (1), resource changes reflect a net increase of $400 under subprogramme 4, Environmental governance, and relate to a higher standard price of the core software package for non-field personnel outside of United Nations Headquarters under contractual services.

Extrabudgetary resources

14.110 As reflected in table 14.14 (2), extrabudgetary resources amount to $578,485,500. The resources would complement regular budget resources and would be used mainly to provide for 1,013 posts (1 Assistant Secretary-General, 3 D-2, 36 D-1, 94 P-5, 200 P-4, 190 P-3, 83 P-2/1, 12 National Professional Officer and 394 Local level), as well as non-post requirements. In addition, the non-post

resources would be used in line with the priorities and deliverables approved by the United Nations Environment Assembly for the 2026–2027 programme of work. The programme of work will be presented for approval to the Environment Assembly in December 2025. Accordingly, the post numbers in the present document to be funded from extrabudgetary resources for 2026 are preliminary.

14.111 The extrabudgetary resources under the present section are subject to the oversight of the United Nations Environment Assembly.

Policymaking organs

14.112 The resources proposed under this component would provide for the policymaking organs as shown in table 14.17.

Table 14.17
Policymaking organs
(Thousands of United States dollars)

	Membership: 50 accredited Member States		
	Number of sessions in 2026: 1		
Total		**477.3**	**8.3**

14.113 The proposed regular budget resources for 2026 amount to $8,300 and reflect a decrease of $469,000 compared with the approved budget for 2025. The proposed change is explained in paragraph 14.106. Additional details on the distribution of the proposed resources for 2026 are reflected in table 14.18 and figure 14.XXVIII.

Executive direction and management

14.114 The executive direction and management component comprises the Office of the Executive Director and the United Nations Scientific Committee on the Effects of Atomic Radiation. The proposed regular budget resources for 2026 amount to $4,600,600 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of the proposed resources for 2026 are reflected in table 14.19 and figure 14.XXIX below.

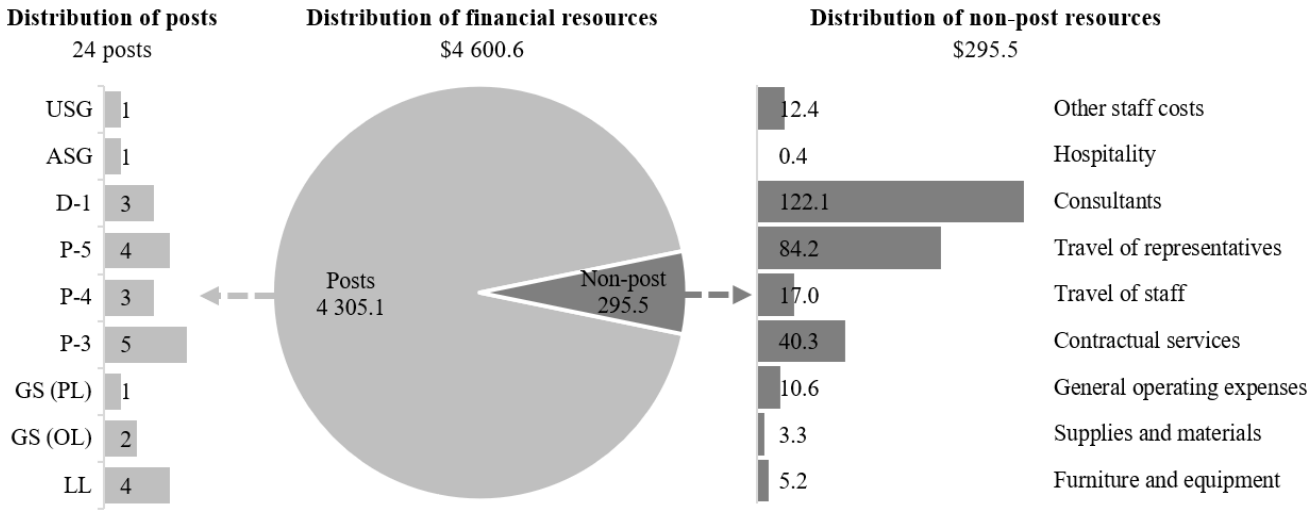
(Number of posts/thousands of United States dollars)



Office of the Executive Director

14.115 The executive direction and management component comprises the Executive Office, the Governance Affairs Office and an independent Evaluation Office that reports directly to the Executive Director. The Executive Office provides executive and support services to the Executive Director, the Deputy Executive Director and other members of the UNEP senior management team. It provides guidance and policy clearance on all programmatic and administrative matters with the support of the Corporate Services and Policy and Programme Divisions. The Executive Director, with the support of the Deputy Executive Director, provides the vision and direction for the work of UNEP in accordance with its legislative mandates and has overall responsibility for the management of UNEP resources.

14.116 The main responsibilities of the executive direction and management component also include leading UNEP in order to provide general policy guidance for the coordination of coherent environmental action within the United Nations system and keeping its implementation under review (see General Assembly resolution 2997 (XXVII)) and to provide leadership on the environmental dimension of sustainable development, informing global processes. This will be informed by assessments of the causes and effects of environmental challenges, as well as emerging issues of global, regional and national significance. UNEP will work through inter-agency mechanisms such as the United Nations Environment Management Group and the United Nations System Chief Executives Board for Coordination and its subsidiary bodies, to support and enhance coordination, cooperation and collaboration across the United Nations system through system-wide strategies and common approaches on the environment, such as the common approach on biodiversity and the common approach on pollution. In addition, UNEP will work to integrate the priorities of multilateral environmental agreements into United Nations country programming, ensuring a more coordinated and effective response to specific country needs. The year 2026 will mark the first year of the implementation of the UNEP medium-term strategy and programme of work for the period 2026–2027. UNEP has a new set of targets for 2026 and 2027, focusing on indicators that are aligned with organizational objectives, the Sustainable Development Goals and internationally agreed environmental commitments. UNEP strives to monitor change over a term longer than the four years of its strategy by employing impact metrics with project performance dashboards and cross-project leader boards to gauge effectiveness and assess the level of uptake of its products and services.

14.117 UNEP will continue to provide leadership on the environmental dimension of sustainable development, informing and influencing global environmental policymaking through global intergovernmental processes within the United Nations such as the General Assembly, the Economic and Social Council, the Human Rights Council and the Security Council.

14.118 The UNEP Sustainable United Nations facility will continue to coordinate the implementation of phase I (environmental sustainability in the area of management) of the Strategy for Sustainability Management in the United Nations System 2020–2030, including by measuring the progress of the United Nations system environmental footprint and efforts to reduce that footprint annually at the system-wide and entity levels. Work of the facility responds also to paragraph 35 of General Assembly resolution 79/226 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in which the Assembly called upon the entities of the United Nations development system to advance a system-wide approach, implement measures and report regularly on their efforts to reduce their environmental footprint.

14.119 In accordance with target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UNEP is integrating environmental management practices into its operations, including the sound management of waste.

14.120 Information on the timely submission of documentation and advance booking for air travel is reflected in table 14.20. The lower rates of compliance for 2024 were due mainly to late nomination of travellers. UNEP continues to streamline its processes and, accordingly, has issued internal guidelines to all staff. In addition, numerous outreach sessions were held to bring more awareness to the requirement of timely submission. UNEP will continue to minimize travel and monitor compliance through the enhanced travel dashboard.

Table 14.20
Compliance rate
(Percentage)

	Actual 2022	*Actual 2023*	*Actual 2024*	*Planned 2025*	*Planned 2026*

Air tickets purchased at least 2 weeks before the commencement of travel	37	82	78	100	100

14.121 The proposed regular budget resources for 2026 amount to $3,406,800 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of the proposed resources for 2026 are reflected in table 14.21 and figure 14.XXX.

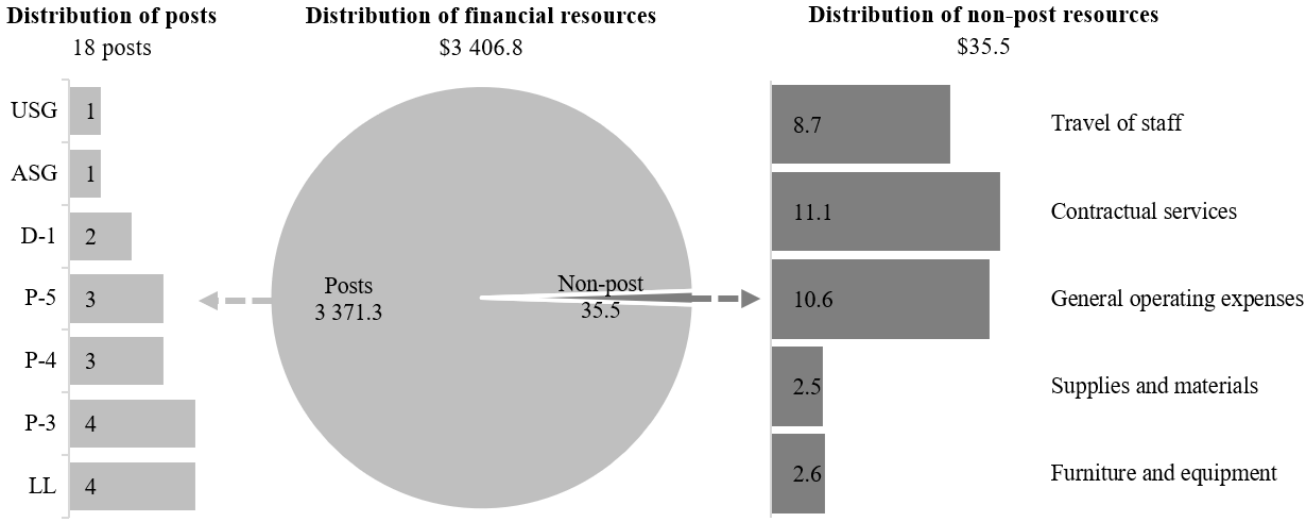
(Number of posts/thousands of United States dollars)



United Nations Scientific Committee on the Effects of Atomic Radiation

14.122 The General Assembly, by its resolution 913 (X), established the United Nations Scientific Committee on the Effects of Atomic Radiation to undertake broad scientific evaluations of developing knowledge on sources of ionizing radiation and its effects on human health and the environment. Since 1955, the Committee has played an important role in improving international scientific understanding of levels of exposure to ionizing radiation and its health and environmental effects. The Assembly, in its resolution 79/85, reaffirmed the functions of the Committee

14.123 The Committee conducts evaluations on behalf of all States Members of the United Nations, which are used to assess the levels, trends and effects of exposure to radiation in areas such as medicine, research, agriculture and industry. The Committee's scientific synthesis of the most up-to-date radiobiological and epidemiological knowledge provides a recognized authoritative benchmark for scientists around the world. Moreover, the Committee's publications play a fundamental role in the international radiation safety regime, critically underpinning international standards for protecting the public, workers, patients and the environment against ionizing radiation. In turn, these standards serve as a basis for national and international programmes and legislative instruments.

14.124 During the annual session of the Committee, more than 170 scientific advisors representing the 31 States members of the Committee, as well as observers from relevant international organizations, scrutinize the scientific content of several complex documents. Organizational responsibility for serving the Committee lies with UNEP. The secretariat of the Committee convenes the annual

sessions and coordinates the development of such documents, which are compiled using scientific and technical information obtained from Member States and scientific literature in accordance with the Committee's requests. Once approved by the Committee, these documents are published periodically as scientific annexes to the report of the Committee to the General Assembly, after a formulation period that lasts, in general, four to five years, in a rolling publication scheme. The secretariat arranges for the dissemination of the Committee's findings to the Assembly, the scientific community and the public.

14.125 In relation to the Sustainable Development Goals, the work of the Committee contributes to the achievement of Goals 3, 10, 14, 15 and 17. At its seventy-first session, held from 20 to 24 May 2024, the Committee approved its related report (A/79/46) containing two scientific reports. The first report, on second primary cancer after radiotherapy, establishes the basis for long-term medical care and preventive intervention that will benefit the growing population of cancer survivors globally, while the second, on an evaluation of public exposure to ionizing radiation, provides the scientific basis for radiation protection of the public from natural and anthropogenic sources of radiation, which contributes to achieving several Goals, especially Goal 3.

14.126 Also at its seventy-first session, the Committee approved its future programme of work for 2025–2029 and its public information and outreach strategy for the period 2025–2029. It reviewed the progress made in its scientific evaluations, namely, epidemiological studies of ionizing radiation and cancer, the effects of ionizing radiation on the circulatory system and the effects of ionizing radiation on the nervous system, and endorsed its strategy to improve the collection, analysis and dissemination of data on radiation exposure, including consideration of the Committee's ad hoc working group on sources and exposure.

14.127 The Committee has identified its thematic priorities for 2026 with the continuation of the evaluations on the effects of ionizing radiation on the nervous system and the effects of ionizing radiation on the eye, as well as the commencement of the evaluations on the effects of ionizing radiation on the immune system and the update of the evaluation of medical exposure to ionizing radiation. The new evaluations will support Sustainable Development Goals 3 and 10. The evaluations on the effects of ionizing radiation on the eye and on the effects of radiation on the immune system have been postponed to 2025 and 2026, respectively, owing to liquidity constraints.

14.128 In line with General Assembly resolution 79/85, the secretariat continues to maintain the online platform for the collection of data from Member States on public, medical and occupational exposure, to facilitate the Committee's regular evaluation and monitoring of trends in such exposures. The current network consists of 200 national contact persons and alternates from 112 Member States who are actively involved in the exchange of information and the formulation of data.

14.129 The proposed regular budget resources for 2026 amount to $1,193,800 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of proposed resources for 2026 are reflected in table 14.22 and figure 14.XXXI.

Programme support

14.137 The programme support component comprises the Corporate Services and the Policy and Programme Divisions. The component aims to ensure efficient and effective development and delivery of the programmatic priorities of the medium-term strategy, underpinned by sound resource management, risk management and leadership practices. Programme management and support provide guidance on programme and project design, delivery and closure; governance of resources; corporate policy development and oversight; programme monitoring and reporting; building of staff knowledge and capacity; and the development of programme and resource management tools that support decision-making.

14.138 The main responsibilities of the programme support component include the strategic management of UNEP financial, human and information technology resources, ensuring alignment of the resources with programmatic needs and strategic objectives, such as gender balance in the workplace. The

component works in close collaboration and coordination with the United Nations Office at Nairobi and its other United Nations service providers, including the United Nations Office at Geneva, in respect of accounting, payroll and payments, recruitment and staff services, staff development, network and other systems administration, information and communications technology, procurement and inventory management. The component also interacts with the United Nations Office at Nairobi in the areas of host country relations, buildings management, conference management, medical services, and security and safety.

14.139 In 2026, the component will continue with its strong engagement in keeping with its role in promoting the coherent implementation of the environmental dimension of sustainable development within the United Nations system.

14.140 The proposed regular budget resources for 2026 amount to $1,215,400 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of the proposed resources for 2026 are reflected in table 14.30 and figure 14.XXXIX.

Annex II

Summary of proposed post changes, by component and subprogramme

Component/subprogramme	*Posts*	*Grade*	*Description*	*Reason for change*
Subprogramme 5, Chemicals and pollution action	1	P-3	**Establishment** of Programme Management Officer	The proposed establishment is related to the need to strengthen the capacity required to enhance the environmental dimension of antimicrobial resistance pursuant to General Assembly resolution 79/2. The incumbent would: (a) update the global action plan by 2026; (b) support input to the report on antimicrobial resistance for the eighty-first session of the General Assembly; and (c) support the substantive arrangements for the high-level meeting on antimicrobial resistance in 2029. The post would be established as a temporary post for the period 2026–2029.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

15.1 The United Nations Human Settlements Programme (UN-Habitat) is the focal point for sustainable urbanization and human settlements in the United Nations system. It supports Member States in the development of sustainable cities and human settlements through its normative and operational work at the global, regional, national and local levels. UN-Habitat leads and coordinates the monitoring of and reporting on global progress in the implementation of the New Urban Agenda and the achievement of Sustainable Development Goal 11. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution 3327 (XXIX), by which the Assembly established the United Nations Habitat and Human Settlements Foundation, and resolution 32/162, by which the Assembly established the United Nations Centre for Human Settlements (Habitat). The Assembly, through its resolution 56/206, transformed the Centre into the United Nations Human Settlements Programme (UN-Habitat), effective 1 January 2002. The Assembly, through its resolution 73/239, established a new governance structure for the Programme, consisting of the universal UN-Habitat Assembly, the 36-member Executive Board and the Committee of Permanent Representatives. The UN-Habitat Assembly adopted resolutions providing further guidance on the work of UN-Habitat at its first and second sessions, held in May 2019 and June 2023, respectively.

15.2 The Programme's support is aimed at developing the capacity at all levels of government and other key stakeholders to formulate and implement policies, plans and concrete activities for sustainable urban development. Such support is also provided through the implementation of projects under the regular programme of technical cooperation and the United Nations Development Account.

Strategy and external factors for 2026

15.3 UN-Habitat operates in a world that will continue to urbanize over the coming three decades. Approximately 90 per cent of urban growth is taking place in less developed regions, where unplanned growth is driving the rise of informal settlements, slums and homelessness, exacerbating urban poverty, inequality and a lack of adequate and affordable housing. By contrast, many cities in other parts of the world are facing negative growth and shrinking populations. The global housing challenge is intensifying, with the demand for affordable and adequate housing outpacing supply, further deepening inequality and vulnerability, in particular in urban areas. Globally, more than 1.6 billion people live in inadequate housing and more than 1.12 billion reside in slums and informal settlements.[1] In addition, there are 304 million international migrants, most of whom live in urban areas, and 75.9 million internally displaced persons.[2]

15.4 Growing inequalities, housing challenges, climate change and biodiversity loss, conflicts and other natural and human-made disasters often converge in cities, with the urban poor suffering the worst consequences. Being prepared for and overcoming these challenges is critical for a better urban future. The UN-Habitat strategy for 2026 will be guided by the UN-Habitat strategic plan for 2026–2029, to be considered by the UN-Habitat Assembly in May 2025. In the strategic plan, greater focus will be placed on access to adequate housing, land and basic services, with a view to strengthening its impact. UN-Habitat will also focus on pathways to transformative change and showcase examples of cities that reached a tipping point and turned the corner by instituting innovative policies and planning regimes.

15.5 Cities are hotspots for environmental challenges, accounting for approximately 75 per cent of global energy consumption, 70 per cent of global greenhouse gas emissions and more than 70 per cent of

[1] United Nations Human Settlements Programme (UN-Habitat), Global Urban Indicators database (2025).

[2] United Nations, Department of Economic and Social Affairs, "International migrant stock 2024: key facts and figures", advance unedited version (January 2025); International Displacement Monitoring Centre, *Global Report on Internal Displacement 2024* (Geneva, 2024).

resource use.[3] In the Pact for the Future (General Assembly resolution 79/1), Member States reiterated their commitment to ensuring access for all to adequate, safe and affordable housing and supporting developing countries in planning and implementing just, safe, healthy, accessible, resilient and sustainable cities. In that context UN-Habitat will support cities in integrating urban and territorial planning, management, and investment and finance aspects and will support national and local governments in developing sustainable construction value chains and policies, supported by innovations and technology, that help to overcome inequalities and build resilience.

15.6 The deterioration in progress towards achieving the Sustainable Development Goals and implementing the Paris Agreement in the context of interrelated global crises calls for more transformative multilevel action. UN-Habitat will continue to fast-track integration between its normative and operational work, scaling up and accelerating the impact of the organization. UN-Habitat recognizes that rapid urban growth requires bold, forward-looking and collective action to shape cities in ways that address the most pressing urban challenges. As a global advocate for urban development, UN-Habitat will support countries in navigating complex housing issues, including by supporting the open-ended intergovernmental expert working group on adequate housing for all, by providing evidence-based policy advice and technical support and by driving urban programmes to address complex housing issues.

15.7 In line with its capacity-building strategy for the implementation of the 2030 Agenda for Sustainable Development and the New Urban Agenda, UN-Habitat will continue to localize the Sustainable Development Goals and to respond to local challenges by identifying and targeting specific capacity gaps while raising awareness and building skills in the area of transformative solutions. UN-Habitat will strengthen capacity development as a cross-cutting function across its operations, through the continued digitalization and dissemination of knowledge and tools, supported by strategic partnerships for innovation, knowledge and learning across practices.

15.8 In its catalytic role as a knowledge hub and partner convenor, UN-Habitat will carry out advocacy, communication and outreach activities and mobilize broad-based support for the implementation of the New Urban Agenda. It will operationalize stronger stakeholder engagement and collaboration with universities and centres of knowledge and research in order to continue to leverage advocacy and knowledge platforms, including the thirteenth session of the World Urban Forum, the Urban Agenda Platform, coalitions, global corporate events, regional ministerial conferences, the ministerial meeting on urbanization and climate change and the intersessional activities of the open-ended intergovernmental expert working group on adequate housing for all.

15.9 Furthermore, UN-Habitat will continue to monitor and report on global trends and provide evidence for policymaking, including through the enhanced use of technologies for data collection and analysis, data visualization and management of information. It will continue to expand the roll-out of the Global Urban Monitoring Framework and its support for Member States and other stakeholders in monitoring and reporting on the progress on the implementation of the New Urban Agenda and other global agendas and the achievement of the Sustainable Development Goals.

15.10 With regard to cooperation with other entities at the global, regional, national and local levels, UN-Habitat will continue its close cooperation with international and regional organizations, such as the Organisation for Economic Co-operation and Development, the World Bank, the European Union and regional development banks. UN-Habitat will also explore and deepen partnerships with relevant institutions from the global South. UN-Habitat will maintain its focus on partnerships with local authorities and their associations and city networks, grass-roots organizations, foundations, international financial institutions, the private sector and academia to promote participatory and multilevel governance and support municipal efforts in the localization of the Sustainable Development Goals and will continue to serve as the secretariat and co-Chair of the Local2030 coalition.

15.11 With regard to inter-agency coordination and liaison, UN-Habitat will continue to collaborate with the Department of Economic and Social Affairs and the United Nations regional economic and social commissions and strengthen its strategic inter-agency partnerships, building on the United Nations system-wide strategy on sustainable urban development and agency-specific collaborative

[3] International Energy Agency, *Empowering Urban Energy Transitions: Smart Cities and Smart Grids* (2024).

frameworks. UN-Habitat will also continue to advance the goals of the United Nations reform aimed at increasing sustainable development impacts at the country level. A focus on regional collaboration will be achieved through the regional development cooperation platforms and issue-based coalitions. UN-Habitat will also deepen its collaboration with the Development Coordination Office to strengthen the United Nations system-wide impact on sustainable development by providing technical guidance, contributing to the revision of system-wide guidance, helping to build capacity for the use of innovative diagnostic and planning methodologies, and working with the resident coordinator system and United Nations country teams on the common country analyses and United Nations Sustainable Development Cooperation Frameworks.

15.12 To pursue stronger integration of environmental, social and economic sustainability and the protection of biodiversity into urban development, UN-Habitat will continue to strengthen its collaboration with the United Nations Environment Programme in serving as the secretariat for the Secretary-General's Advisory Board of Eminent Persons on Zero Waste and as a partner in the Global Alliance for Buildings and Construction, which is led by the United Nations Environment Programme. It will also continue to collaborate with the Office of the United Nations High Commissioner for Refugees, the United Nations Development Programme, the International Organization for Migration, the United Nations Office for Disaster Risk Reduction, the World Food Programme and all relevant United Nations entities and international actors to integrate sustainable urban development into resilience, humanitarian response, solutions to forced displacement and urban recovery.

15.13 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Adequate unearmarked extrabudgetary resources are available to implement the planned work and produce the deliverables;

(b) Countries remain committed to the New Urban Agenda and the 2030 Agenda;

(c) National and local governments continue to request policy advice and technical assistance from UN-Habitat in the development and implementation of their urban legislation, policies, plans and strategies;

(d) Urban indicators, data and information are used to formulate policies, with adequate mechanisms available for impact monitoring and performance assessments;

(e) Countries in which UN-Habitat delivers large programmes maintain political, economic and social conditions that allow for the implementation of programmes and projects.

15.14 UN-Habitat will continue to mainstream social inclusion to address cross-cutting issues relating to women and girls, older persons, persons with disabilities, children and young people. It will also continue to implement platforms and mechanisms to engage young people, such as the UN-Habitat Youth Advisory Board and the one-stop youth resource centres, and develop critical programmes in the areas of livelihoods, public space and climate change, such as the Youth 2030 Cities programme and the Young Gamechangers initiative.

15.15 UN-Habitat integrates a gender perspective into its operational activities, deliverables and results, as appropriate, through its gender policy and action plan. Furthermore, the Advisory Group on Gender Issues advises the Executive Director on how to promote gender equality and women's empowerment in sustainable urban development. UN-Habitat, in collaboration with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), will continue to support Member States with policy, legislation, planning and financing instruments to achieve integrated, inclusive and participatory results. For example, UN-Habitat will continue to promote land and housing policies that incorporate a gender perspective and improve tenure security for all, especially women.

15.16 In line with the United Nations Disability Inclusion Strategy, UN-Habitat will continue to work with its partners, including the World Blind Union and World Enabled, to integrate disability inclusion into its programmatic work. It will implement an action plan that ensures that disability inclusion is mainstreamed throughout the organization's work, highlight good practices and identify key areas that require capacity development, technical resources and assistance. The action plan will strengthen the established environmental and social safeguards framework that is applied to all projects.

Legislative mandates

15.17 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

3327 (XXIX)	Establishment of the United Nations Habitat and Human Settlements Foundation
34/114	Global report on human settlements and periodic reports on international cooperation and assistance on human settlements
42/146	Realization of the right to adequate housing
53/242	Report of the Secretary-General on environment and human settlements
S-25/2	Declaration on Cities and Other Human Settlements in the New Millennium
56/206	Strengthening the mandate and status of the Commission on Human Settlements and the status, role and functions of the United Nations Centre for Human Settlements (Habitat)
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
71/256	New Urban Agenda
71/327	The United Nations in global economic governance
76/183	Integrating sport into youth crime prevention and criminal justice strategies
77/161	Promoting zero-waste initiatives to advance the 2030 Agenda for Sustainable Development
77/286	World Sustainable Transport Day
78/122	World Cleanup Day
78/149	The pivotal role of reliable and stable energy connectivity in driving sustainable development
78/150	Achieving gender equality and empowering all women and girls for realizing all Sustainable Development Goals
78/172	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
78/178	Promoting social integration through social inclusion
78/179	Policies and programmes involving youth
78/180	Violence against women migrant workers
78/181	Improvement of the situation of women and girls in rural areas
79/1	The Pact for the Future
79/170	The right to development
79/211	Ensuring access to affordable, reliable, sustainable and modern energy for all
79/214	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
79/223	Women in development
79/225	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

UN-Habitat Assembly resolutions and decisions

1/2	United Nations System-Wide Guidelines on Safer Cities and Human Settlements
1/3	Enhancing capacity-building for the implementation of the New Urban Agenda and the urban dimension of the 2030 Agenda for Sustainable Development
1/4	Achieving gender equality through the work of the United Nations Human Settlements Programme to support inclusive, safe, resilient and sustainable cities and human settlements
2/1	International guidelines on people-centred smart cities
2/2	Accelerating the transformation of informal settlements and slums by 2030
2/3	World Cleanup Day
2/4	Biodiverse and resilient cities: mainstreaming biodiversity and ecosystem services into urban and territorial planning
2/5	Enhancing the interlinkage between urbanization and climate change resilience
2/6	Localization of the Sustainable Development Goals
2/7	Adequate housing for all
2/8	Urban planning and sustainable infrastructure
2/9	Creation of a human settlements resilience framework for early warning, foresight, risk reduction, crisis response and post-crisis recovery and reconstruction
2/10	Equitable financing and effective monitoring of the implementation of resolutions adopted by the United Nations Habitat Assembly
Decision 1/3	Arrangements for the transition towards the new governance structure of the United Nations Human Settlements Programme
Decision 2/1	Extension of the strategic plan for the period 2020–2023 until the year 2025
Decision 2/2	Dates of the resumed second session of the United Nations Habitat Assembly

Decision 2/3	Term of office of the members of the Executive Board and the Bureau of the United Nations Habitat Assembly
Decision 2/4	Stakeholder engagement policy of the United Nations Human Settlements Programme

Executive Board decisions

2023/5	Implementation of the normative and operational activities of UN-Habitat; reporting on the programmatic activities of the Programme in 2022; implementation of subprogrammes, flagship programmes and technical cooperation activities
2023/6	Implementation of the outcomes of the second session of the UN-Habitat Assembly including preparation of the strategic plan for the period 2026–2029
2024/3	Update on the implementation of resolutions adopted by the UN-Habitat Assembly
2024/5	Financial, budgetary and administrative matters of UN-Habitat; the work programme of UN-Habitat and the budget for 2025 and 2026; implementation of the strategic plan for the period 2020–2025 and preparation of the strategic plan for the period 2026–2029; implementation of the recommendations of the Joint Inspection Unit based on its review of the management and administration of UN-Habitat
2024/6	Implementation of the normative and operational activities of the UN-Habitat; reporting on the programmatic activities of the Programme in 2024, implementation of subprogrammes, flagship programmes and technical cooperation activities
2024/7	Update on the implementation of resolutions adopted by the United Nations Habitat Assembly and preparations for its resumed second session

Committee of Permanent Representatives recommendations

1/1	Implementation of the resolutions adopted by the United Nations Habitat Assembly at its first session, in May 2019
1/2	Implementation of resolution 1/1 on the United Nations Human Settlements strategic plan for the period 2020–2023
1/3	Quadrennial report of the Secretary-General on the implementation of the New Urban Agenda, the high-level meeting of the General Assembly to assess progress in the implementation of the New Urban Agenda, and the eleventh session of the World Urban Forum

Governing Council resolutions

19/4	Cooperation between the United Nations Human Settlements Programme and the United Nations Environment Programme
19/11	Strengthening the United Nations Habitat and Human Settlements Foundation
20/6	Best practices, good policies and enabling legislation in support of sustainable urbanization and the attainment of internationally agreed development goals
20/16	Enhancing the involvement of civil society in local governance
21/3	Guidelines on decentralization and strengthening of local authorities
21/7	Sustainable public-private partnership incentives for attracting large-scale private-sector investment in low-income housing
21/8	Africa fund/financing mechanism on slum prevention and upgrading
21/9	Women's land and property rights and access to finance
21/10	Strengthening the Habitat and Human Settlements Foundation: experimental financial mechanisms for pro-poor housing and infrastructure
22/9	South-South cooperation in human settlements
23/3	Support for pro-poor housing
23/4	Sustainable urban development through access to quality urban public spaces
23/8	Third United Nations conference on housing and sustainable urban development
23/10	Future activities by the United Nations Human Settlements Programme in urban economy and financial mechanisms for urban upgrading, housing and basic services for the urban poor
23/17	Sustainable urban development through expanding equitable access to land, housing, basic services and infrastructure
24/2	Strengthening the work of the United Nations Human Settlements Programme on urban basic services
24/5	Pursuing sustainable development through national urban policies
24/7	Making slums history: a worldwide challenge
24/9	Inclusive national and local housing strategies to achieve the Global Housing Strategy paradigm shift

24/11	Promoting sustainable urban development by creating improved economic opportunities for all, with special reference to youth and gender
24/13	Country activities by the United Nations Human Settlements Programme
25/1	Contribution of the United Nations Human Settlements Programme to the post-2015 development agenda in order to promote sustainable urban development and human settlements
25/2	Strengthening national ownership and operational capacity
25/6	International guidelines on urban and territorial planning
25/7	United Nations Human Settlements Programme governance reform
26/4	Promoting safety in cities and human settlements
26/5	Regional technical support on sustainable housing and urban development by regional consultative structures
26/6	World Urban Forum
26/9	Human settlements development in the Occupied Palestinian Territory

Economic and Social Council resolutions

2003/62	Coordinated implementation of the Habitat Agenda
2017/24	Human settlements
2020/7	Affordable housing and social protection systems for all to address homelessness
2022/7	Inclusive and resilient recovery from COVID-19 for sustainable livelihoods, well-being and dignity for all: eradicating poverty and hunger in all its forms and dimensions to achieve the 2030 Agenda
2024/3	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2024/19	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system

Subprogramme 1
Reduced spatial inequality and poverty in communities across the urban-rural continuum

General Assembly resolutions

69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development
76/255	Integration of mainstream bicycling into public transportation systems for sustainable development
77/334	Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
78/148	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
78/172	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
78/206	The human rights to safe drinking water and sanitation
78/290	Improving global road safety
78/327	Modalities of the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6: Ensure availability and sustainable management of water and sanitation for all

Subprogramme 2
Enhanced shared prosperity of cities and regions

General Assembly resolutions

78/160	Science, technology and innovation for sustainable development
79/175	The right to privacy in the digital age
79/194	Information and communications technologies for sustainable development

Governing Council resolution

24/3	Inclusive and sustainable urban planning and elaboration of international guidelines on urban and territorial planning

UN-Habitat Assembly resolution

1/5	Enhancing urban-rural linkages for sustainable urbanization and human settlements

Economic and Social Council resolutions

2021/30	Open-source technologies for sustainable development
2024/14	Science, technology and innovation for development

Subprogramme 3
Strengthened climate action and improved urban environment

General Assembly resolutions

63/217	Natural disasters and vulnerability
67/263	Reliable and stable transit of energy and its role in ensuring sustainable development and international cooperation
79/202	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
79/203	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
79/205	Disaster risk reduction
79/206	Protection of global climate for present and future generations of humankind
79/207	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, particularly in Africa
79/208	Implementation of the Convention on Biological Diversity and its contribution to sustainable development

Governing Council resolution

22/3	Cities and climate change

United Nations Environment Assembly of the United Nations Environment Programme resolutions

5/5	Nature-based solutions for supporting sustainable development

Subprogramme 4
Effective urban crisis prevention and response

General Assembly resolutions

69/280	Strengthening emergency relief, rehabilitation and reconstruction in response to the devastating effects of the earthquake in Nepal
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
73/230	Effective global response to address the impacts of the El Niño phenomenon
78/161	Culture and sustainable development
78/185	Assistance to refugees, returnees and displaced persons in Africa
78/205	Protection of and assistance to internally displaced persons
79/139	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
79/140	Strengthening of the coordination of emergency humanitarian assistance of the United Nations
79/217	International migration and development

Governing Council resolutions

20/17	Post-conflict, natural and human-made disaster assessment and reconstruction
23/18	Natural disaster risk reduction, preparedness, prevention and mitigation as a contribution to sustainable urban development
26/2	Enhancing the role of UN-Habitat in urban crisis response

Economic and Social Council resolution

2024/8 Strengthening of the coordination of emergency humanitarian assistance of the United Nations

Deliverables

15.18 Table 15.1 lists all cross-cutting deliverables of the programme.

Table 15.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**–**	**2**
1. Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat): report of the Secretary-General	1	1	–	1
2. Report of the Secretary-General on progress in the implementation of the New Urban Agenda	–	–	–	1
Substantive services for meetings (number of three-hour meetings)	**15**	**21**	**30**	**22**
Meetings of:				
3. The governing bodies (UN-Habitat Assembly, Executive Board and Committee of Permanent Representatives)	12	18	26	18
4. The Committee for Programme and Coordination	1	1	1	1
5. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. The Fifth Committee	1	1	1	1
7. The General Assembly on the review of the implementation of the New Urban Agenda	–	–	1	1
B. Generation and transfer of knowledge				
Publications (number of publications)	**2**	**2**	**1**	**2**
8. World Cities Report	1	1	–	1
9. UN-Habitat annual report	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: consultations with all Member States on resolutions of the General Assembly and of the Economic and Social Council; and briefings to all Member States on sustainable development issues and processes.				
Databases and substantive digital materials: Global Urban Indicators database with more than 3,000 users updated with new data for 114 urban-related indicators; and the Global Urban Monitoring Framework, an indicator framework to monitor the implementation of the quadrennial comprehensive policy review and progress towards achieving the Sustainable Development Goals, and which currently contains 114 indicators, with substantive improvements to the Framework to include the addition of 20 new housing-focused indicators and an integrated partner information management system containing information on networks and alliances for housing and urban development.				
D. Communication deliverables				
Outreach programmes, special events and information materials: digital and print materials about UN-Habitat and ministerial meetings at the Conference of the Parties to the United Nations Framework Convention on Climate Change; materials and reports for the commemoration of international days and events, including the thirteenth session of the World Urban Forum and Urban October; and the UN-Habitat annual report; the World Cities Report.				
External and media relations: interviews and commentaries about UN-Habitat focus themes: housing, urban climate action, urban crisis response and shared prosperity; and articles and blogs about Sustainable Development Goal 11 and local action to achieve sustainable cities and communities.				
Digital platforms and multimedia content: Urban Agenda Platform; materials on adequate housing, land and basic services, urban climate action, urban crisis response and shared prosperity; and social media materials for the UN-Habitat annual report, and online and social media materials for sustainable urban development topics at the General Assembly.				

Evaluation activities

15.19 The following evaluations completed in 2024 have guided the proposed programme plan for 2026:

(a) Midterm evaluation conducted by the Office of Internal Oversight Services of the UN-Habitat strategic plan for the period 2020–2025;

(b) Evaluations conducted by UN-Habitat of 10 projects and programmes, including on the Global Future Cities Programme, climate change, the water sector, urban policies, land-sea planning and management, the response to the coronavirus disease (COVID-19) pandemic and accountability systems.

15.20 In response to the results of the evaluations referenced above, UN-Habitat has incorporated the findings and recommendations from the midterm evaluation of its strategic plan for 2020–2025 into the development of its strategic plan for 2026–2029. For example, the strategic plan for 2026–2029 will contain a single strategic focus on access to adequate housing, land and basic services for all, including the urgent transformation of informal settlements and slums. In addition, in response to the results and recommendations from the midterm evaluation of a project on land-sea planning and management, UN-Habitat will strengthen capacity-building for regional and county governments, establish a coastal region data management system and draft land-sea planning guidelines.

15.21 The following evaluations are planned for 2026:

(a) Final evaluation of the UN-Habitat strategic plan for the period 2020–2025;

(b) Evaluation of thirteenth session of the World Urban Forum;

(c) One country programme evaluation;

(d) One thematic evaluation;

(e) Sixteen project and programme evaluations.

Programme of work

Subprogramme 1
Reduced spatial inequality and poverty in communities across the urban-rural continuum

Objective

15.22 The objective, to which this subprogramme contributes, is to reduce inequality between and within communities and to reduce poverty in communities across the urban-rural continuum through increased and equal access to basic services, sustainable mobility, accessible and safe public space, increased and secure access to land, adequate and affordable housing and effective human settlements growth and regeneration.

Strategy

15.23 To contribute to the objective, the subprogramme will:

(a) Develop standards, tools and guidelines for local and national governments, and engage them in policy dialogues, learning and best practices, in addition to capacity-building with regard to adequate housing, infrastructure, planning, water, sanitation, mobility, waste management and energy, localizing the Sustainable Development Goals and designing low-emission and climate-resilient actions;

(b) Provide technical support to Member States with policy, legislation, strategic planning and financing instruments to implement integrated, inclusive, low-emission, climate-resilient and

gender-sensitive land and housing policies, strategies and action plans, and provide technical support to an intergovernmental expert working group on accelerating progress towards the universal achievement of adequate housing;

(c) Advocate for adequate, safe and affordable housing, a more integrated, comprehensive and inclusive approach thereto, including the prevention of unlawful forced evictions, and the implementation of sustainable building codes, regulations and certification tools;

(d) Provide technical assistance to national and local governments seeking to implement sustainable and inclusive urban transformation, expansion and regeneration, and support partner cities in institutionalizing urban regeneration and adequate housing through planning, policies and equitable solutions, in line with the International Guidelines on Urban and Territorial Planning and the principles of sustainable urbanization;

(e) Support national and local governments in addressing structural inequalities, developing technical guidelines, scaling up access to basic and social services and infrastructure, sustainable mobility and safe public spaces, taking transformative actions targeting homelessness, slums and informal settlements, and putting the most vulnerable first, by co-producing programmes with a multilevel governance and partnership approach and initiating learning, innovations and long-term commitments towards inclusive and sustainable urbanization.

15.24 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 2, 5, 6, 7, 10, 11, 12, 14, 15 and 17.

15.25 The above-mentioned work is expected to result in:

(a) Safer, more accessible and inclusive public spaces integrated into national and local urban policies and sectoral plans, with diverse stakeholders supporting the localization of transformative actions, in particular for the most vulnerable;

(b) Increased accessibility to low-emission, adequate and affordable housing, and strengthened capacities of policymakers, in particular local and regional governments, to implement sustainable transformative actions, including land governance systems, while leaving no one behind;

(c) Sustainable, integrated transformation and regeneration of urban areas into socially and economically inclusive and climate resilient neighbourhoods that offer improved quality of life to all, including improved access to basic services.

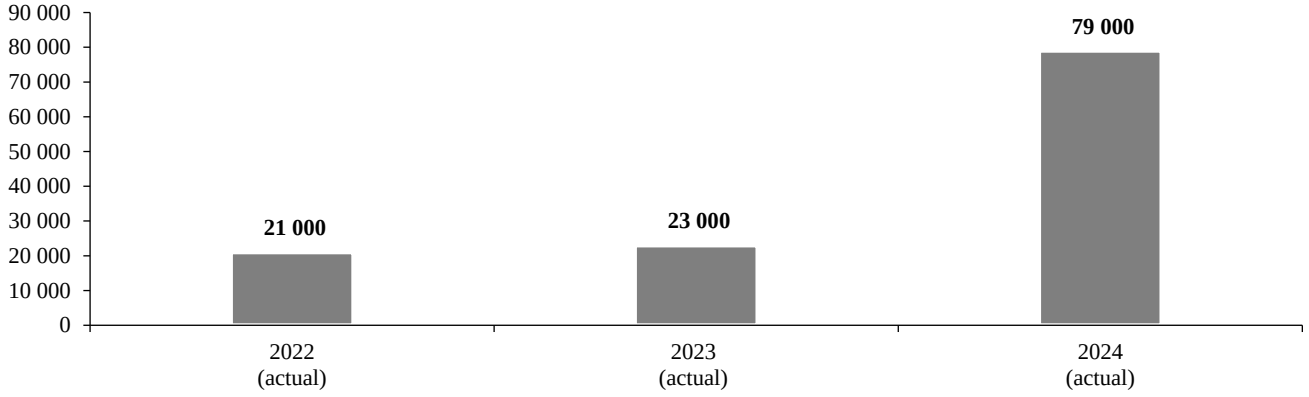
Programme performance in 2024

Enhanced water, sanitation and hygiene services in the Lao People's Democratic Republic

15.26 More than 70 per cent of the population of the Lao People's Democratic Republic depends on small-scale water sources for daily needs, which are increasingly vulnerable to the impacts of climate change, such as droughts, erratic rainfall and floods. In partnership with the Ministry of Public Works and Transport and the Ministry of Natural Resources and Environment, the subprogramme implemented projects to enhance water, sanitation and hygiene services and build the climate resilience of local communities. In Sekong, Attapeu and Saravan Provinces, a comprehensive climate risk and vulnerability assessment informed urban planning, resulting in the development of water, sanitation and hygiene resilience plans. Between 2022 and 2024, this initiative benefited some 123,000 people directly, who had access to enhanced water, sanitation and hygiene services. The subprogramme also supported the Government in developing a national climate risk and vulnerability assessment. In addition, capacity-building workshops have benefited more than 200 local stakeholders by enhancing their knowledge on climate-resilient practices and infrastructure management. The projects have not only improved water, sanitation and hygiene services, but also fostered healthier communities that are more resilient to the impacts of climate change.

15.27 Progress towards the objective is presented in the performance measure below (see figure 15.I).

Figure 15.I
Performance measure: number of people with access to enhanced water, sanitation and hygiene services in the Lao People's Democratic Republic (annual)



Planned results for 2026

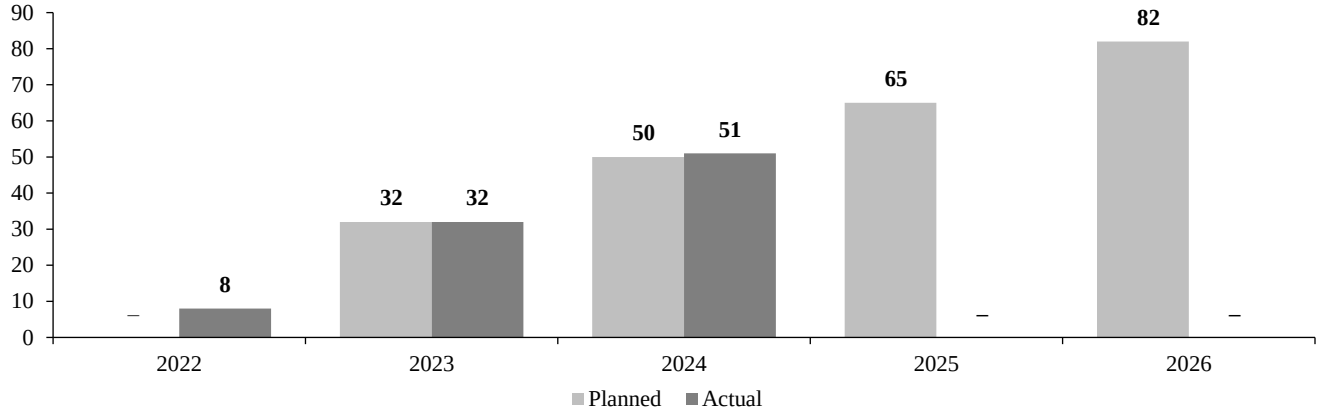
Result 1: inclusive cities and communities through urban regeneration

Programme performance in 2024 and target for 2026

15.28 The subprogramme's work contributed to an additional 19 cities implementing urban and territorial regeneration initiatives, for a total of 51 cities across eight countries in the Middle East and North Africa and the Latin America and the Caribbean regions, which exceeded the planned target of 50 cities.

15.29 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.II).

Figure 15.II
Performance measure: number of partner cities that have implemented urban and territorial regeneration initiatives (cumulative)



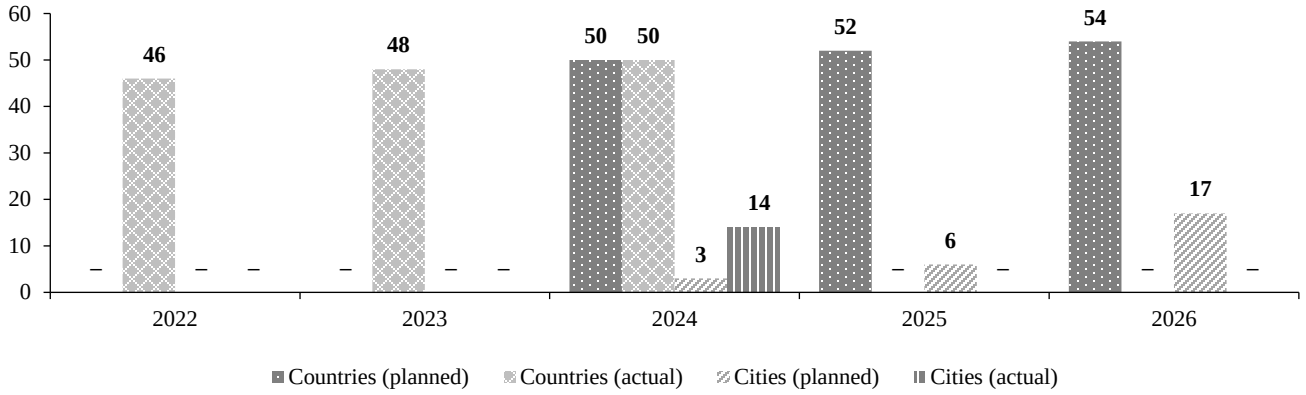
Result 2: cities and countries commit to providing adequate housing for all and addressing homelessness and housing exclusion

Programme performance in 2024 and target for 2026

15.30 The subprogramme's work contributed to two additional countries and 14 cities adopting strategies towards ending homelessness, which met the planned target and exceeded the planned target of 3 cities, respectively.

15.31 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.III).

Figure 15.III
Performance measure: number of partner cities and countries that have adopted strategies towards ending homelessness and ensuring sustainable access to adequate housing for all (cumulative)



Result 3: increased security of tenure rights to land

Proposed programme plan for 2026

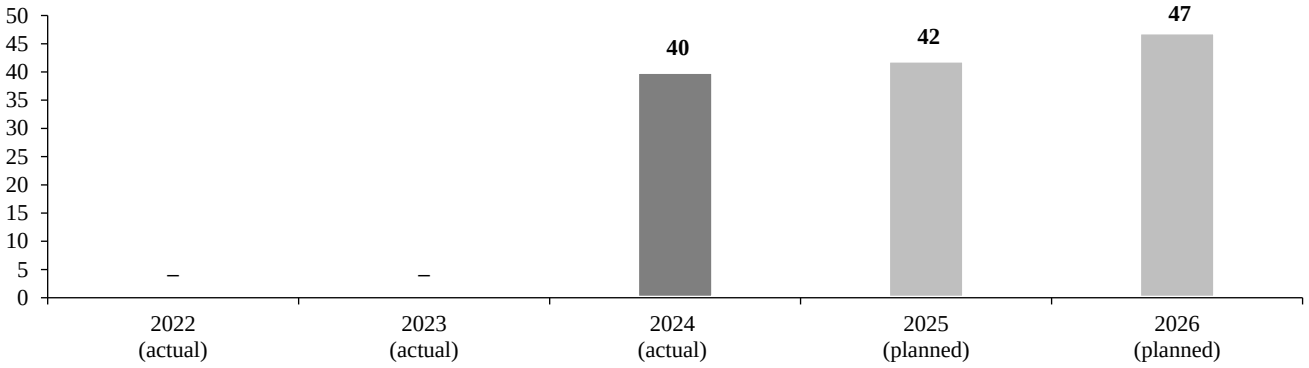
15.32 Access to land and other natural resources and the associated security of tenure have significant implications for human development. However, land tenure insecurity remains a significant challenge for many countries and cities, especially for the poor and vulnerable. Conventional ways to manage and administer land and housing have failed in large part to deliver secure tenure at an affordable cost for all. Furthermore, the complex interplay between land tenure security and housing availability can severely limit individuals' ability to gain and maintain access to stable housing. The subprogramme supported 40 cities in implementing innovative land tools and approaches to improve tenure security, such as the Social Tenure Domain Model and participatory and inclusive land readjustment approaches.

Lessons learned and planned change

15.33 The lesson for the subprogramme was that capacity-building for land actors on innovative land tools and approaches, as well as on the institutionalization of those tools, had contributed significantly to land reforms at the local and national levels. In applying the lesson, the subprogramme will support a sustained focus on secure land and housing tenure by strengthening partnerships with cities, building the capacity of local and national authorities to promote scaled implementation, and institutionalizing land tools within countries' policy and implementation frameworks.

15.34 Expected progress towards the objective is presented in the performance measure below (see figure 15.IV).

Figure 15.IV
Performance measure: number of partner cities implementing innovative strategies, tools or approaches in order to increase the security of tenure rights to land (cumulative)



Deliverables

15.35 Table 15.2 lists all deliverables for the subprogramme.

Table 15.2
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**38**	**38**	**38**	**38**
1. Projects on urban basic services: mobility, water and sanitation, energy and solid waste management and safe, inclusive and accessible public space	14	14	15	15
2. Projects on development of national and local policies on urban heritage, historical landscape and culture	1	1	1	1
3. Projects on housing, slum upgrading, innovative financing for housing and land readjustment and on integrated urban and territorial renewal and regeneration	9	9	9	9
4. Projects on land tenure security, land-based financing and implementation of the Secretary-General's guidance note on land and conflict	7	7	6	6
5. Projects on integrated urban and territorial planning and effective planning laws	5	5	6	6
6. Projects on urban monitoring, evidence-based policies for crime prevention and community safety and social cohesion in cities and human settlements	2	2	2	2
Seminars, workshops and training events (number of days)	**57**	**57**	**59**	**60**
7. Training sessions on urban basic services: mobility, water and sanitation, energy and solid waste management	23	23	25	25
8. Training sessions on slum upgrading, housing, heritage in urban development, regeneration and urban growth, urban design governance, public space, urban planning, design labs, crime prevention and urban safety	13	13	14	15
9. Global and regional training workshops on land, housing, slum upgrading, housing studios and practitioner labs	6	6	6	6
10. Technical workshops on monitoring the Sustainable Development Goals and the New Urban Agenda	5	5	5	5
11. Training sessions on policy, planning and design, governance, legislation and finance and data collection	7	7	7	7
12. Training sessions on land and conflict and on land tenure, governance and financing; and expert group meetings on urban land governance	3	3	2	2

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Publications (number of publications)	**3**	**3**	**6**	**5**
13. Publication on land tenure and land degradation	1	1	1	1
14. Publication on land governance, finance and territorial planning	1	1	2	2
15. Publication on affordable and sustainable housing, including homelessness and slum transformation	1	1	2	2
16. Global report on localizing the Sustainable Development Goals and the state of water and sanitation service providers	–	1	1	–
Technical materials (number of materials)	**13**	**13**	**15**	**14**
17. Compendium of policies, plans and good practices on urban planning, regeneration, heritage conservation and extension	1	1	1	1
18. Best practices, guides and case studies on increased and equal access to basic services, sustainable mobility and public space	3	3	4	4
19. Guide for land management and spatial plans for poverty reduction and spatial equality	1	1	1	1
20. Guidelines on the right to adequate housing and prevention of homelessness among those in vulnerable situations, including migrants	1	1	1	1
21. Guide series for innovative land, legal and financial mechanisms in relation to conservation and regeneration	1	1	1	1
22. Toolkits, housing profiles and technical guides for city leaders on planning, on managing and implementing affordable and sustainable housing and on slum upgrading programmes	2	2	3	3
23. Guides and tools to improve land management and tenure security	1	1	1	1
24. Guidelines and handbooks on slum upgrading solutions	2	2	2	1
25. Neighbourhood planning guidelines on participation and inclusive regeneration	1	1	1	1

C. Substantive deliverables

Consultation, advice and advocacy: technical advice to requesting Member States on monitoring and implementation of the New Urban Agenda, the Sustainable Development Goals and UN-Habitat Assembly resolutions; urban basic services and integrated inclusive slum upgrading; inclusive and integrated urban planning; and the right to housing and tenure security for all, urban law reform and effective urban regeneration and growth management and urban land administration and management.

Databases and substantive digital materials: UrbanLex database; global knowledge platforms on adequate housing; digital materials on global commitments related to land, housing, urban basic services, mobility, energy, water and sanitation, solid waste management, air quality, climate change mitigation and adaptation and cultural heritage; and African Clean Cities Platform and the Waste Wise Cities platform.

D. Communication deliverables

Outreach programmes, special events and information materials: Global Network of Public Space; dedicated housing campaign under the World Urban Campaign umbrella; Best Practices Awards; global initiative on transforming informal settlements and slums by 2030; and brochures, leaflets and spotlights on slum upgrading, urban regeneration, public space and housing, urban land governance and management, and urban basic services.

External and media relations: media kits, press releases, web stories and social media content on inclusive cities.

Digital platforms and multimedia content: video documentaries, infographics, webinars and open digital platforms on urban safety, heritage, regeneration and urban growth.

Subprogramme 2
Enhanced shared prosperity of cities and regions

Objective

15.36 The objective, to which this subprogramme contributes, is to enhance the shared prosperity of cities and regions through improved spatial connectivity and productivity, increased and equitably distributed locally generated revenue and expanded deployment of frontier technologies and innovation.

Strategy

15.37 To contribute to the objective, the subprogramme will:

(a) Support Member States and other partners through the formulation of national urban policies and related legal, financial and implementation frameworks integrated into whole-of-government planning, policy and financing frameworks; knowledge transfer; capacity-building; and the development of tools on urban and rural territorial planning and design;

(b) Provide technical assistance, capacity-building and advisory services to cities on:

(i) Developing participatory and accountable budgeting approaches, optimizing local revenue systems through data collection and the development of municipal databases, and leveraging private sources of capital for sustainable urban development;

(ii) Effectively procuring, testing and implementing people-centred frontier technologies and innovations such as sensor networks, machine-to-machine communication, artificial intelligence, virtual and augmented reality, geographic information systems, remote sensing and big data processing and visualization;

(c) Build on the lessons learned from challenges to local revenue generation exposed by global risks to develop tailored policies and technical assistance, with a focus on effective local public financial management.

15.38 In doing so, the subprogramme will assist Member States in making progress towards Sustainable Development Goals 1, 8, 9, 10 and 11.

15.39 The above-mentioned work is expected to result in:

(a) Balanced territorial development and better-connected human settlements;

(b) Enactment by local authorities of institutional and legal reforms conducive to the generation of additional financial resources, including through public-private partnerships, land-based revenue and financing tools;

(c) Strengthened urban-level action to address inequalities and bridge social, spatial and digital divides.

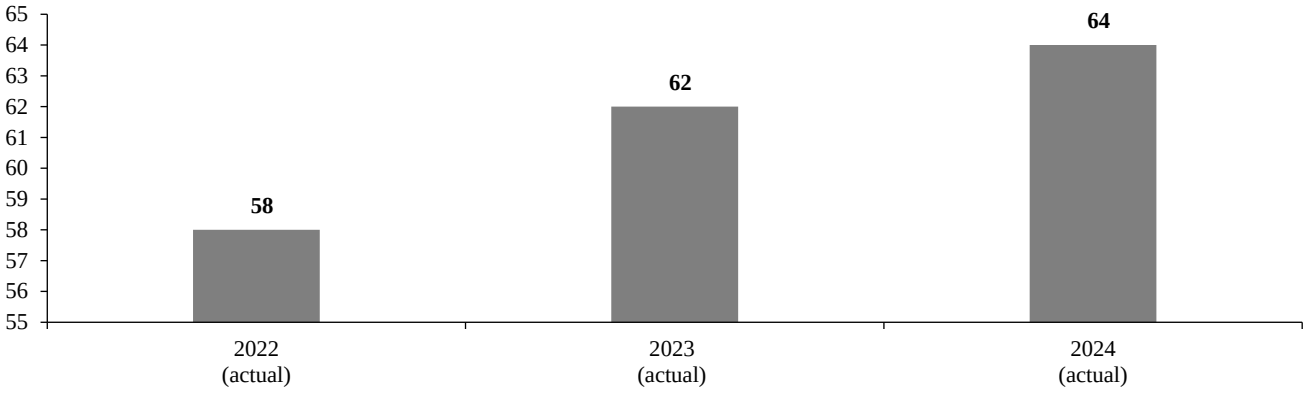
Programme performance in 2024

Multilevel policies for sustainable urban development

15.40 Home to approximately half of the world's population, cities are hubs of economic, social and cultural activity, acting as engines of growth, innovation and global connectivity, and accounting for more than 80 per cent of the world's gross domestic product. However, challenges such as climate change and inequalities in cities are jeopardizing sustainable development. The targets related to the urban resilience of many cities are below the 2015 baselines. While several factors can explain poor progress, a critical factor is often limited coordination across levels of government and policy areas. Given that cities influence economic, social and environmental outcomes beyond their boundaries, it is essential that sustainable urban development policy interventions be designed and implemented across wider territorial scales. In that respect, national urban policies can provide a clear strategic framework and an effective coordination mechanism to articulate policies across the urban-rural continuum, including at metropolitan and regional scales. The subprogramme has, to date, supported 64 countries in developing national urban policies, with a view to enhancing spatial connectivity and productivity and advancing sustainable urban development. In Paraguay, for example, the urban planning, housing and habitat policy was adopted by presidential decree in 2024 and will support the country's transformative housing programme, through which the Government has already provided more than 17,000 housing units. In addition, the subprogramme, in collaboration with Organisation for Economic Co-operation and Development, published the report *Global State of National Urban Policy 2024: Building Resilience and Promoting Adequate, Inclusive and Sustainable Housing*, which highlights how national urban policies have become critical instruments in localizing the Sustainable Development Goals, especially Goal 11.

15.41 Progress towards the objective is presented in the performance measure below (see figure 15.V).

Figure 15.V
Performance measure: number of countries that have developed national urban policies with the support of UN-Habitat (cumulative)



Planned results for 2026

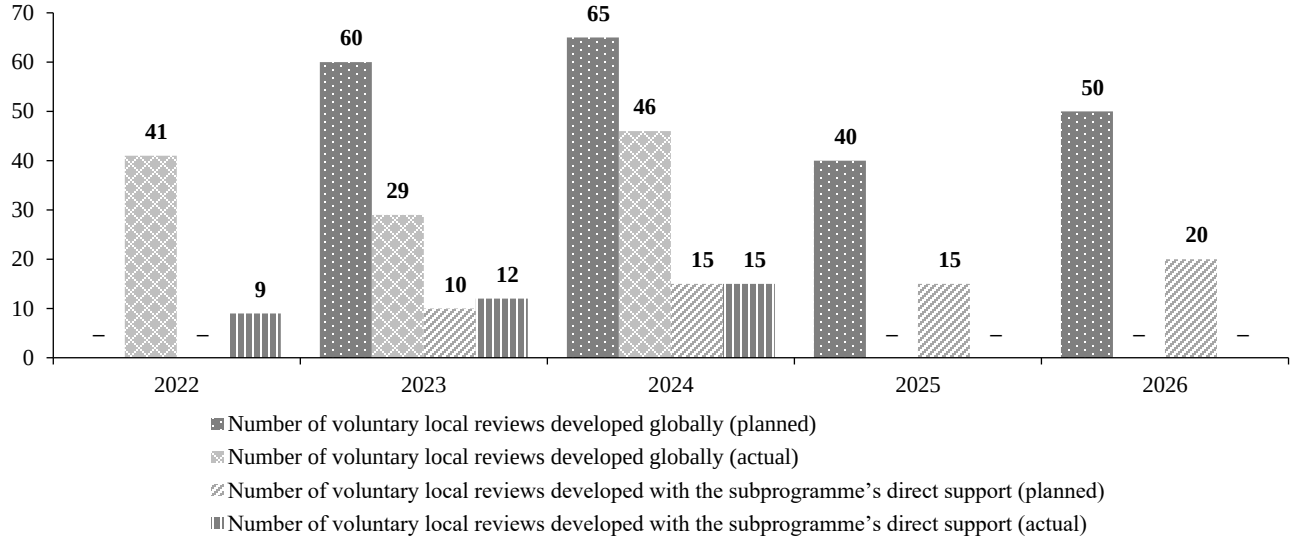
Result 1: voluntary local reviews to enhance the shared prosperity of cities and regions globally through Sustainable Development Goal localization

Programme performance in 2024 and target for 2026

15.42 The subprogramme's work contributed to the development of 15 voluntary local reviews by local and regional governments with the subprogramme's direct support, which met the planned target, and to the monitoring of the development of 46 voluntary local reviews globally, which did not meet the planned target of 65. The target was not met owing to the competing priorities of local and regional governments.

15.43 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.VI).

Figure 15.VI
Performance measure: number of voluntary local reviews prepared by local and regional governments (annual)



Result 2: digital transformation for sustainable urban development

Programme performance in 2024 and target for 2026

15.44 The subprogramme's work contributed to 20 cities piloting strategies, plans and projects to inform the development of the international guidelines on people-centred smart cities, which did not meet the planned target of 25 cities. The target was not met owing to lower-than-expected voluntary contributions and the focus of the subprogramme on the development of the international guidelines, which delayed the operationalization of projects.

15.45 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 15.3).

Table 15.3
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Thirty cities adopted people-centred smart city strategies	UN-Habitat Assembly adopted resolution 2/1 Fifteen cities developed people-centred smart city strategies and plans	Twenty cities piloted strategies, plans and projects to inform the development of the international guidelines on people-centred smart cities	The international guidelines on people-centred smart cities are endorsed by the UN-Habitat Assembly	Ten cities pilot the international guidelines on people-centred smart cities

Result 3: upgraded own-source revenue systems to improve the performance of local governments

Proposed programme plan for 2026

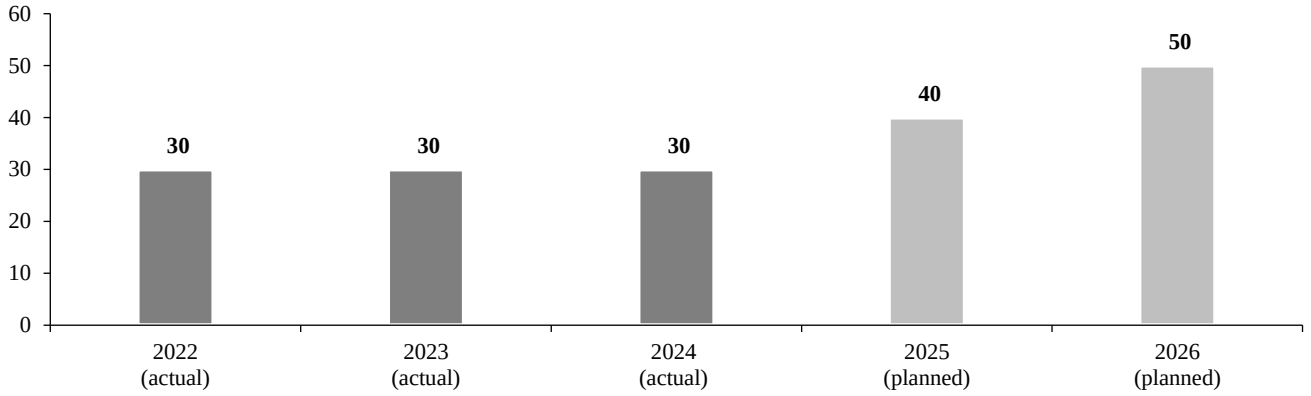
15.46 Effective devolution of authority and service delivery require robust own-source revenue systems for local governments. Own-source revenue enhances flexibility, creditworthiness and accountability, driving improved service delivery and representation in exchange for tax contributions. To support own-source revenue reforms, the subprogramme has provided technical assistance to more than 30 local governments, developed an e-learning course on own-source revenue and upgraded the rapid own-source revenue analysis tool for self-assessment. Efforts also include fostering participatory budgeting and engaging civil society while reforming national fiscal decentralization and intergovernmental transfer mechanisms.

Lessons learned and planned change

15.47 The lesson for the subprogramme was that own-source revenue reforms required multilevel interventions to guarantee their sustainability. In applying the lesson, the subprogramme will expand its online tools to empower more local governments to strengthen their own-source revenue frameworks. It will also engage more closely with national authorities and civil society to ensure broader and more sustainable implementation of the own-source revenue reforms.

15.48 Expected progress towards the objective is presented in the performance measure below (see figure 15.VII).

Figure 15.VII
Performance measure: number of local governments that have developed strategies and reform initiatives to enhance own-source revenue (annual)



Deliverables

15.49 Table 15.4 lists all deliverables for the subprogramme.

Table 15.4
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**27**	**27**	**27**	**27**
1. Projects on spatial connectivity, urban policies and spatial frameworks, urban planning and design, urban-rural links and integrated territorial development	13	13	13	13
2. Projects on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	6	6	6	6
3. Projects on best practices, centres of excellence, university partnerships, prosperity indices, frontier technologies and legal and governance frameworks for sustainable, inclusive and innovative development of cities and regions	8	8	8	8

Publications (number of publications)	**2**	**2**	**2**	**2**
7. National cities reports	2	2	2	2
Technical materials (number of materials)	**12**	**12**	**12**	**12**
8. Technical materials on spatial connectivity, urban planning and design, metropolitan planning, urban and rural links, action planning, urban and territorial planning, national urban policies and people-centred smart cities	6	6	6	6
9. Technical materials on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	3	3	3	3

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
10. Technical materials on frontier technologies and innovation, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the achievement of the Sustainable Development Goals	3	3	3	3

C. Substantive deliverables

Consultation, advice and advocacy: advisory services to 20 Member States on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring, financing sustainable urban development, smart cities and private sector-focused engagement frameworks.

Databases and substantive digital materials: national urban policy database comprising approximately 160 countries; compendium of urban-rural links case studies; e-learning courses on urban policy and urban-rural linkages; and global municipal database, comprising 50 countries and approximately 110 cities.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, leaflets, profiles and events on national urban policy, urban-rural links, metropolitan development, territorial development, urban monitoring, financing sustainable urban development, smart cities and private sector-focused engagement frameworks.

Digital platforms and multimedia content: content for social media.

Subprogramme 3
Strengthened climate action and improved urban environment

Objective

15.50 The objective, to which this subprogramme contributes, is strengthened climate action and improved urban environments through reducing greenhouse gas emissions and improving air quality, improving resource efficiency and protecting ecological assets, and the effective adaptation of communities and infrastructure to climate change.

Strategy

15.51 To contribute to the objective, the subprogramme will:

(a) Provide technical support for the development of low-emission and climate-resilient cities and the integration of climate action into domains of sustainable urban development;

(b) Provide assistance on sustainable approaches to urban climate action to requesting Member States through innovative technologies, knowledge transfer, capacity-building, data and the development of an evidence base, policy advice and peer-to-peer engagement in global and regional networks;

(c) Provide assistance to Member States on the integration of the urban dimension into nationally determined contributions, national adaptation plans and other national climate change policies, strategies and plans and support their implementation across all levels of government;

(d) Promote solutions to environmental protection, renovation and restoration through the development of tools, guidelines and field projects;

(e) Promote innovative solutions to address climate change adaptation, mitigation, loss and damage and mobilize climate finance through the facilitation of global, regional and national joint networks of practitioner and researchers networks and the development of tools and guidelines;

(f) Provide assistance in the formulation of policy and legislation, urban planning and design, multilevel governance and financing instruments, including through its flagship programme titled “RISE-UP: resilient settlements for the urban poor”, which focuses on mobilizing investment to address climate resilience issues affecting urban communities in vulnerable situations;

(g) Support the implementation of global adaptation initiatives, such as the National Adaptation Plan Global Support Programme and the Nationally Determined Contributions Partnership.

15.52 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14 and 15.

15.53 The above-mentioned work is expected to result in:

(a) Multidimensional climate action and urban environment planning by Member States and partner cities that reduces greenhouse gas emissions, builds the climate resilience of urban systems and communities, preserves, regenerates and restores urban biodiversity, and reduces air and water pollution;

(b) Mobilization of additional financial resources for adaptation to climate change at the national and subnational levels;

(c) Member States' nationally determined contributions and national climate adaptation plans incorporating urban dimensions;

(d) More climate- and pandemic-resilient cities, human settlements and communities.

Programme performance in 2024

Policymakers, experts and other stakeholders identify knowledge gaps and action priorities for climate action in cities

15.54 The accelerated dissemination and application of innovations are necessary to stimulate climate action at the urban level. The subprogramme, in response to UN-Habitat Assembly resolution 2/5, advanced the dissemination of information on innovations relating to climate action, with an emphasis on closing research and knowledge gaps. In 2024, the subprogramme, in collaboration with the Global Covenant of Mayors for Climate and Energy, organized the Innovate4Cities conference, convening nearly 2,000 experts, leaders and advocates across research, government, business and civil society. Directly informed by the 2024 conference, the subprogramme also co-developed an updated "Global research and action agenda on cities and climate change science", in which 160 knowledge gaps and 259 action priorities were identified that, if addressed, could accelerate climate action implementation at the speed and scale needed to meet Paris Agreement goals and the Sustainable Development Goals. The action agenda is also intended to infuse cutting-edge practice, research and innovation into climate action in cities. The UN-Habitat *World Cities Report 2024* drew from the cutting-edge knowledge presented at Innovate4Cities, expert knowledge and good practice. The subprogramme also ensured that the outcomes of the Innovate4Cities conference and recommendations contained in *World Cities Report 2024* informed the upcoming Intergovernmental Panel on Climate Change special report on climate change and cities.

15.55 Progress towards the objective is presented in the performance measure below (see table 15.5).

Table 15.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
–	–	Policymakers, experts and other stakeholders exchanged views and identified 160 knowledge gaps and 259 action priorities for climate action in cities

Planned results for 2026

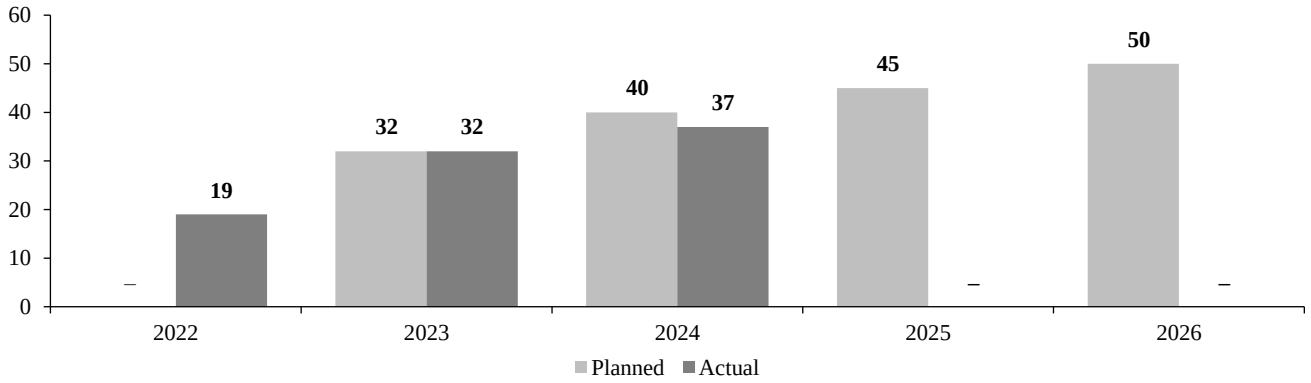
Result 1: conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, to improve the livelihoods and resilience of urban poor communities

Programme performance in 2024 and target for 2026

15.56 The subprogramme's work contributed to an additional 5 cities with resources mobilized and implementing conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches, for a total of 37 towns and cities, which did not meet the planned target of 40 towns and cities. The target was not met owing to lower-than-expected voluntary contributions.

15.57 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.VIII).

Figure 15.VIII
Performance measure: number of towns and cities implementing conservation, management and sustainable use approaches, such as nature-based solutions and ecosystem-based approaches (cumulative)



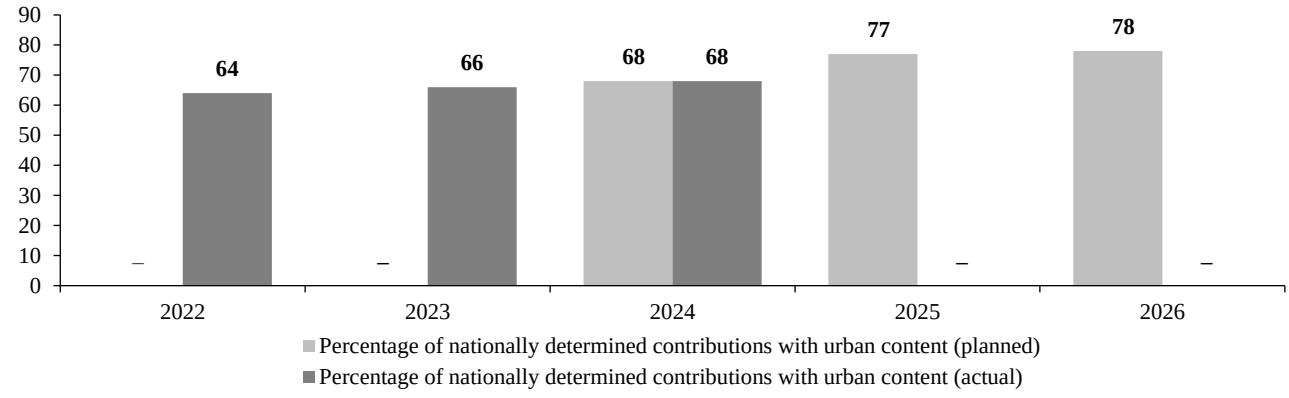
Result 2: nationally determined contributions increasingly contain urban content

Programme performance in 2024 and target for 2026

15.58 The subprogramme's work contributed to 68 per cent of nationally determined contributions with urban content, which met the planned target.

15.59 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.IX).

Figure 15.IX
Performance measure: percentage of nationally determined contributions with urban content (cumulative)



Result 3: urban climate action plans to build the resilience of the most vulnerable

Proposed programme plan for 2026

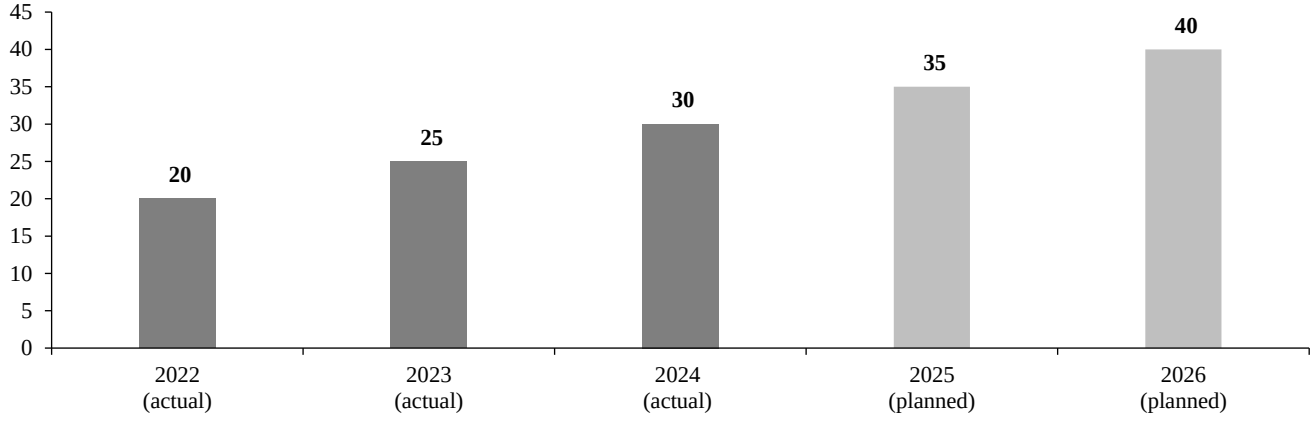
15.60 Approximately one in four urban dwellers, or more than 1.1 billion people, live in slums or informal settlements globally, the majority of whom are extremely vulnerable to the impacts of climate change. At the same time, climate change is exacerbating pre-existing vulnerabilities within slums, trapping the urban poor in an unrelenting cycle of enduring hardship. The subprogramme has worked to strengthen the climate resilience of these communities, with a focus on those residing in informal settlements. Building on UN-Habitat's long-standing experience in participatory slum upgrading, Member States have been supported through direct interventions at the community level and through capacity-building and governance support at the city level.

Lessons learned and planned change

15.61 The lesson for the subprogramme was that integrated approaches to climate resilience that take into account economic development, poverty eradication, social integration, disaster risk reduction, nature-based solutions, ecosystem-based approaches and other management and conservation approaches are effective in improving resilience and development outcomes. In applying the lesson, the subprogramme will foster such integrated approaches through support for local and national authorities in developing urban climate action plans that are coordinated at the subnational level and aligned with national adaptation plans, nationally determined contributions and/or national climate change policies and strategies. Such action plans would help cities to attract further climate and development finance and increase the resilience of the most vulnerable.

15.62 Expected progress towards the objective is presented in the performance measure below (see figure 15.X).

Figure 15.X
Performance measure: number of integrated urban climate action plans developed by local and national authorities focusing on the most vulnerable (cumulative)



Deliverables

15.63 Table 15.6 lists all deliverables of the subprogramme.

Table 15.6
Subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**30**	**30**	**37**	**45**
1. Projects on improving urban air quality, the urban environment, climate change mitigation, and increased access to low-emission basic services, more sustainable infrastructure and buildings	4	4	5	5
2. Projects on policies, legal instruments, plans and strategies for better urban air quality, the urban environment, climate change mitigation, low-emission basic services and sustainable infrastructure and buildings	2	2	3	6
3. Projects on effective adaptation of communities and infrastructure to climate change, informed by participatory processes, assessments of local vulnerabilities and innovative data collection (e.g., remote sensing) and processing	16	16	18	20
4. Projects on policies, legal instruments, plans and strategies for strengthened resilience and effective adaptation of communities and infrastructure to climate change	4	4	5	6
5. Projects on urban environmental management and restoration, biodiversity protection, circular economy and ecosystem services	2	2	4	4
6. Projects on urban resource management and efficiency, including circular economy, efficient use of urban land, service provision and sustainable water and waste management, and promotion of cleaner energy and energy efficiency	2	2	2	4
Seminars, workshops and training events (number of days)	**47**	**47**	**61**	**61**
7. Training events for partners and those in vulnerable situations (e.g., in informal settlements) on climate change mitigation, air quality and low-emission basic services	12	12	15	15
8. Training events on effective adaptation of communities and infrastructure to climate change	30	30	35	35
9. Training events on sustainable city models and their application, sustainable infrastructure and urban planning	–	-	6	6
10. Training events for national and local government partners and other urban stakeholders on urban environmental management, restoration and renovation, biodiversity protection, circular economy and ecosystem services	5	5	5	5
Publications (number of publications)	**4**	**4**	**6**	**6**
11. Publications on climate change mitigation and air quality	2	2	2	2
12. Publications on effective adaptation of communities of slums and other urban communities in vulnerable situations in urban neighbourhoods, and infrastructure, to climate change	1	1	2	2
13. Publications on improved low-emission urban services and resource efficiency (e.g. focusing on technological innovation)	1	1	2	2
Technical materials (number of materials)	**8**	**8**	**10**	**12**
14. Technical materials on improved resource efficiency and protection of ecological assets, including sectoral materials	2	2	2	3
15. Technical materials on climate change mitigation and air quality	2	2	2	2
16. Technical materials on climate action, basic services or environment in human settlements	2	2	2	3
17. Technical materials on national, regional and local guidelines, plans, coordination mechanisms and strategies on climate action, the urban environment, ecosystems and biodiversity, ecological assets and ecosystem services	1	1	2	2
18. Technical materials on improved low-emission urban services, resource efficiency and (electric) mobility solutions and infrastructure (including monitoring)	1	1	2	2
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services to 20 Member States on reducing urban greenhouse gas emissions to achieve climate change mitigation and adaptation, improving air quality and low-emission urban services, improving resource efficiency and protecting ecological assets.				

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned

Databases and substantive digital materials: databases on urban climate- or environment-relevant subjects, and simulations, including a global database on the urban dimension of nationally determined contributions; urban climate resilience frameworks in Southern Africa, ecosystems-based adaptation solutions in South-East Asia, the Arab region and Latin America and the Caribbean and a toolbox for urban biodiversity solutions; and e-mobility toolbox supporting the shift to electric mobility.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, campaigns and events on greenhouse gas emissions and air quality, resource efficiency, protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

External and media relations: press articles on climate action and the urban environment.

Digital platforms and multimedia content: websites and content for social media accounts; and multimedia content on urban climate- or environment-relevant subjects.

Subprogramme 4
Effective urban crisis prevention and response

Objective

15.64 The objective, to which this subprogramme contributes, is to enhance urban crisis prevention and response and advance social integration and inclusive communities, as well as improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees.

Strategy

15.65 To contribute to the objective, the subprogramme will:

(a) Engage in-country comprehensive, participatory and inclusive operational programmes that respond to crises, establishing fit-for-purpose land administration aimed at the achievement of tenure security for all in crisis-affected areas, while supporting measures for national urban frameworks;

(b) Support Member States in adopting evidence-based recovery approaches, settlement-based approaches and community participatory processes while ensuring equitable representation;

(c) Build the capacity of national, regional and local actors to increase social cohesion, reduce discrimination in urban crisis situations and prevent disaster risk, including through foresight and early warning;

(d) Prioritize improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees, focusing on housing, land and basic services and by supporting integrated urban development strategies for host communities and the displaced;

(e) Develop evidence-based local disaster risk reduction and resilience strategies and support their implementation in target cities and territories;

(f) Facilitate early collaboration between humanitarian and development actors in displacement situations.

15.66 In doing so, the subprogramme will assist Member States in making progress towards achieving Sustainable Development Goals 1, 5, 8, 9, 10, 11, 13 and 16.

15.67 The above-mentioned work is expected to result in:

(a) Increased community participation in crisis-affected areas in local decision-making related to recovery, thereby ensuring social inclusion;

(b) Increased number of cities offering secure tenure, sustainable basic services and adequate housing, safety and security for the displaced and host communities;

(c) Reduced multidimensional risks and increased protection for those in vulnerable situations in cities;

(d) Strengthened city-level infrastructure analysis and decision-making, with a focus on resilience, in particular in crisis settings;

(e) Increased adoption of an integrated settlements approach to manage the presence of the displaced across a territory and in cities.

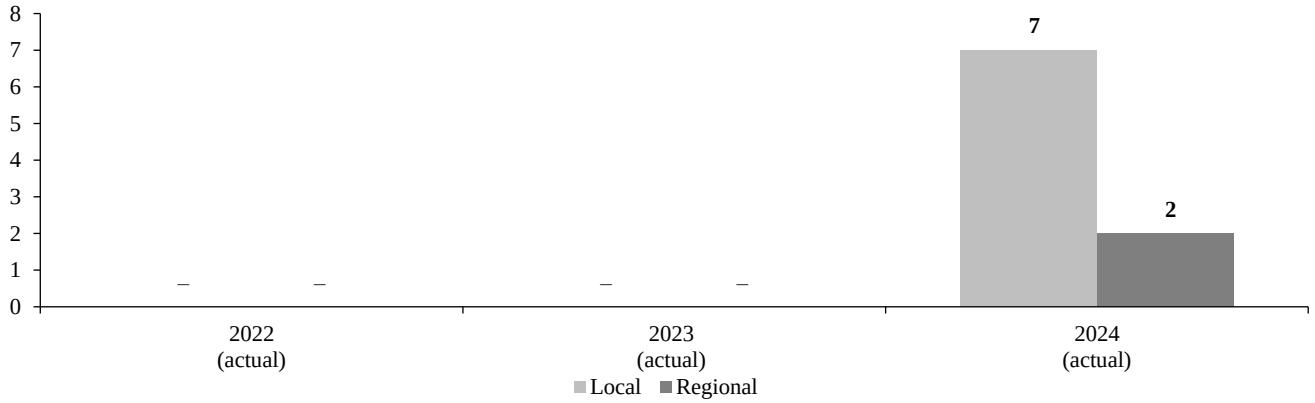
Programme performance in 2024

Sustainable integration of displacement-affected communities for improved access to housing, land and property

15.68 Ethiopia hosts one of the world's largest populations of internally displaced persons, with 4.51 million identified as of February 2022, according to the International Organization for Migration Displacement Tracking Matrix. In response, the Government of Ethiopia launched a durable solutions initiative in 2019, providing a framework for multisectoral programme support for the return, relocation and local integration of internally displaced persons. In 2024, the subprogramme completed a report on the legal, policy and institutional frameworks for housing, land and property rights in the Oromia and Somali regions, providing a foundational analysis for advancing durable solutions. More than 116 regional, zonal and district officials have been trained on durable solutions, housing, land and property rights, mainstreaming internally displaced persons into planning and budgeting, solid waste management, and geographical information systems and remote sensing-based early warning and monitoring systems. As a result of this support, two settlement plans have been finalized, with six others undergoing consultation. The subprogramme also co-delivered, with displacement-affected communities and civil society organizations, solutions for wind and flood protection through tree-planting initiatives and distributed solid waste management equipment and awareness-raising materials in local languages across six sites. The subprogramme contributed to increasing the capacities of seven local and two regional administrations to enhance displacement-affected communities' access to housing, land and property rights.

15.69 Progress towards the objective is presented in the performance measure below (see figure 15.XI).

Figure 15.XI
Performance measure: number of regional and local administrations that supported access to housing, land and property rights in Ethiopia



Planned results for 2026

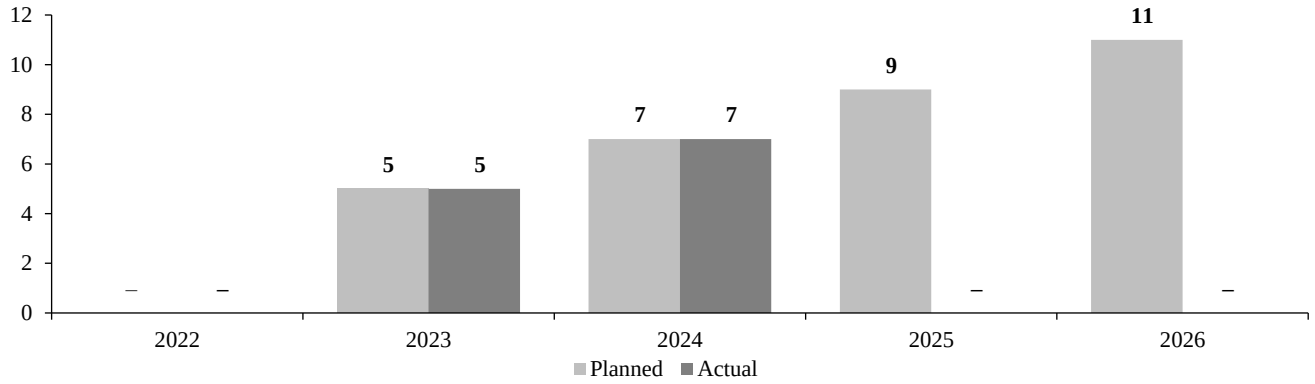
Result 1: enhanced sustainable solutions to migration

Programme performance in 2024 and target for 2026

15.70 The subprogramme's work contributed to the adoption of context-specific responses to urban migration and forced displacement in two additional countries (Burkina Faso and Ukraine), for a total of seven countries, which met the planned target.

15.71 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.XII).

Figure 15.XII
Performance measure: number of countries adopting a context-specific response to urban migration and displacement (cumulative)



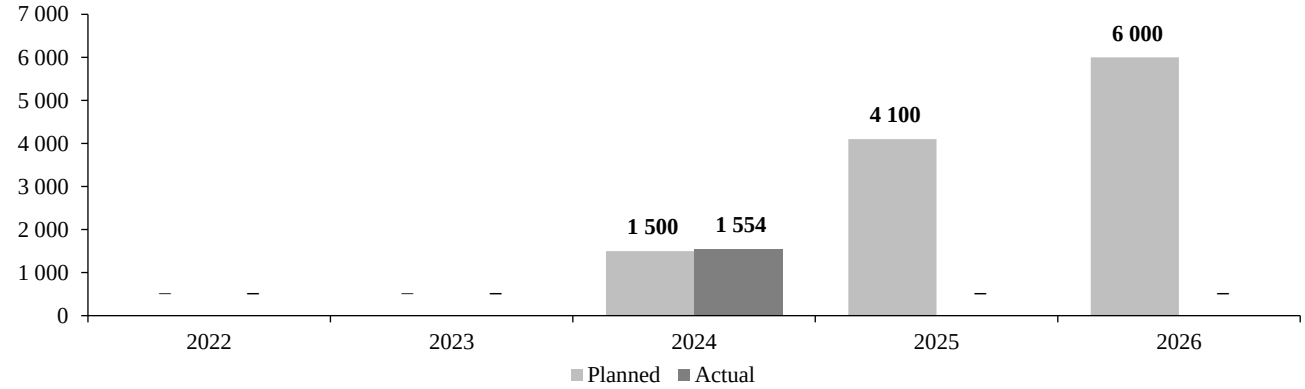
Result 2: sustainable integration of displaced communities in urban areas in Somalia

Programme performance in 2024 and target for 2026

15.72 The subprogramme's work contributed to the integration of displaced communities in Somalia through the issuance of 1,554 land title and tenure security documents, which exceeded the planned target of 1,500.

15.73 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 15.XIII).

Figure 15.XIII
Performance measure: number of land title deeds and tenure security documents issued in Somalia in support of integrating displaced communities (cumulative)



Result 3: integrated and participatory urban planning and inclusive development

Proposed programme plan for 2026

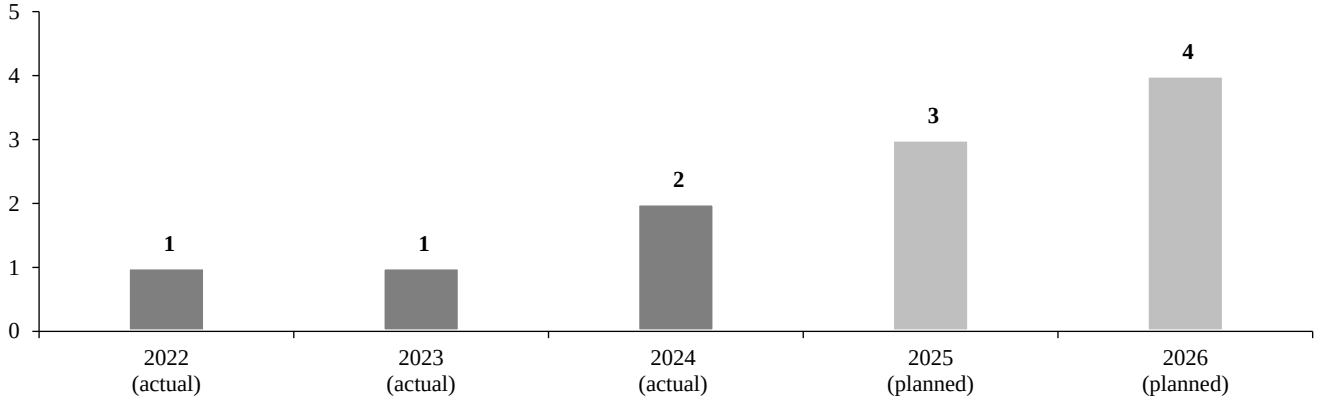
15.74 Displaced populations are increasingly settling in urban areas, which may strain urban infrastructure and services. Addressing these challenges requires sustainable and inclusive approaches that target the needs of both displaced and host communities. To this end, the subprogramme has focused on housing, land and basic services for displaced populations, supporting a comprehensive whole-of-system response, including greater cooperation, coherence, coordination and complementarity in terms of development, disaster risk reduction, humanitarian action and sustaining peace. Efforts include urban planning initiatives, community-based approaches and enhancing partnerships with local governments to ensure durable solutions in displacement contexts.

Lessons learned and planned change

15.75 The lesson for the subprogramme was the need to prioritize collaboration with local actors and to better align humanitarian and development activities, given that this can help to support a comprehensive whole-of-system response and enable the scalability of interventions. In applying the lesson, the subprogramme will strengthen engagement with local governments and adopt cross-sectoral, area-based approaches that integrate displaced and host communities. These efforts will focus on spatial urban planning, enhancing land tenure security and housing and building on urban systems for sustainable infrastructure development, while embedding resilience-building into crisis responses to support inclusive urban development.

15.76 Expected progress towards the objective is presented in the performance measure below (see figure 15.XIV).

Figure 15.XIV
Performance measure: number of settlements with displaced populations adopting integrated, participatory urban planning and inclusive development approaches (cumulative)



Deliverables

15.77 Table 15.7 lists all deliverables of the subprogramme.

Table 15.7

9. Technical materials on improved living standards and inclusion of migrants, refugees and internally displaced persons	3	3	3	3
10. Technical materials on enhanced resilience of the built environment and infrastructure	2	2	2	2

C. Substantive deliverables

Consultation, advice and advocacy: advisory services provided to five Member States on urban crisis mitigation and response and on enhancing urban resilience to multi-hazard threats, including impacts from ongoing conflicts, climate change and crises related to migration and displacement.

Databases and substantive digital materials: urban migration indicators in the UN-Habitat Global Urban Monitoring Framework.

D. Communication deliverables

Outreach programmes, special events and information materials: brochures, leaflets and online awareness-raising and digital learning materials on social inclusion and the response to migration and displacement, urban recovery and reconstruction, risk reduction, and early warning systems and foresight.

Digital platforms and multimedia content: content for social media accounts, blogs and websites related to the social and economic inclusion of migrants, refugees, internally displaced persons and returnees in urban crisis contexts; and risk reduction and recovery in urban areas.

B. Proposed post and non-post resource requirements for 2026

Overview

15.78 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 15.8 to 15.10.

Table 15.8

15.79 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 15.11 to 15.13 and figure 15.XV.

15.80 As shown in tables 15.11 (1) and 15.12 (1), the overall resources proposed for 2026 amount to $14,989,900 and reflect a decrease of $65,100 (or 0.4 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

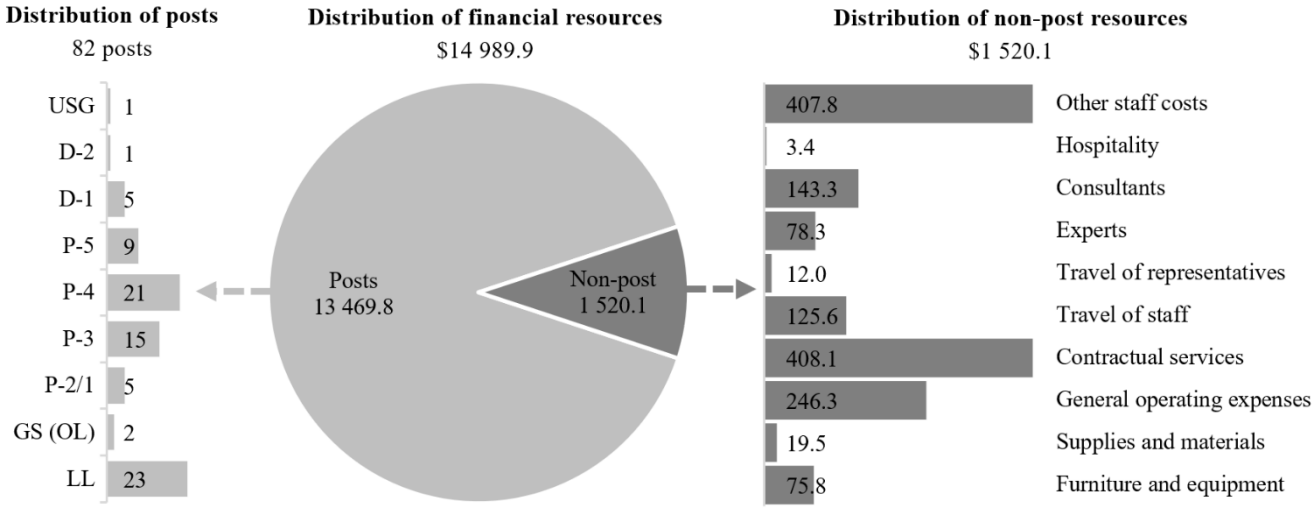
Distribution of proposed resources for 2026
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

15.81 As shown in tables 15.8 and 15.11 (1), resource changes reflect a decrease of $64,800, which relates to subprogramme 1. The decrease of $64,800 relates to the removal of non-recurrent provisions associated with the resource requirements related to the report to the General Assembly on the progress achieved and remaining challenges in addressing homelessness requested by the Assembly in its resolution 78/172, entitled “Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)”, that were approved for 2025 and are no longer required in 2026.

Other changes

15.82 As shown in table 15.11 (1), resource changes reflect a decrease of $300, which relates to a decrease under programme support. The decrease relates to changes to the standard price of the core software package.

Extrabudgetary resources

15.83 As reflected in tables 15.11 (2) and 15.12 (2), extrabudgetary resources amount to $175,326,600. The resources would complement regular budget resources and would be used mainly to provide for 66 posts (1 Assistant Secretary-General, 5 D-1, 9 P-5, 9 P-4, 13 P-3, 3 P-2, 2 National Professional Officer, level B, and 24 Local Level), to perform mainly the functions of programme support and some normative roles. In addition, non-post resources would be used for payments directly associated with the posts under service-level agreements with internal service providers, procurement of office automation equipment and payments to some external service providers, and in relation to projects implemented in country offices.

15.84 The extrabudgetary resources under the present section are subject to the oversight of the Executive Board, which has delegated authority from the UN-Habitat Assembly.

Policymaking organs

15.85 The resources proposed under this component would provide for the policymaking organs as shown in table 15.14.

Table 15.14
Policymaking organs
(Thousands of United States dollars)

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
UN-Habitat Assembly	Provides policy guidance on human settlements and sustainable urbanization and strategic oversight of UN-Habitat. The UN-Habitat Assembly approves the UN-Habitat four-year strategic plan. It reports every four years on its work to the General Assembly through the Economic and Social Council at its substantive session. The UN-Habitat Assembly meets every four years for five days. Its first session was held in May 2019. The second session was held in June 2023, while the resumed second session is scheduled to be held on 29 and 30 May 2025. Mandate: General Assembly resolution 73/239 and note by the Secretary-General (A/73/726) UN-Habitat Assembly rules of procedure Membership: 193 government officials Number of sessions in 2026: 0	–	–
Committee of Permanent Representatives	Permanent intersessional subsidiary body of the UN-Habitat Assembly. The Committee is responsible for a high-level midterm review of the implementation of Assembly decisions and resolutions and of the UN-Habitat strategic plan, and for preparing for the next session of the Assembly. It meets twice every four years: once prior to the Assembly session, in preparation for that session, and a second time for a high-level midterm review. The open-ended meeting of the Committee of Permanent Representatives on preparations for the resumed second session of the UN-Habitat Assembly and midterm review is scheduled to be held from 26 to 28 May 2025. Mandate: General Assembly resolutions 73/239 and 56/206 and note by the Secretary-General (A/73/726) UN-Habitat Assembly rules of procedure Membership: 193 government officials Number of sessions in 2026: 0	–	–

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
Executive Board	Permanent intersessional subsidiary body of the UN-Habitat Assembly. The Executive Board is responsible for strengthening the oversight of UN-Habitat operations and enhancing the accountability, transparency, efficiency and effectiveness of UN-Habitat. It oversees the preparation of the draft strategic plan before its approval by the Assembly and is responsible for the review and approval of the annual programme of work and budget and the resource mobilization strategy, in accordance with the strategic plan and guidance provided by the Assembly. The Board meets two to three times per year as provided in the rules of procedure. Its sessions in 2026 are scheduled to be held in March and November. Mandate: General Assembly resolution 73/239 and note by the Secretary-General (A/73/726) UN-Habitat Assembly resolution 1/1, adopted by the Assembly at its first session in May 2019 UN-Habitat Assembly rules of procedure Rules of procedure of the Executive Board of UN-Habitat Membership: 36 Number of sessions in 2026: 2	823.1	823.1
Total		**823.1**	**823.1**

15.86 The proposed regular budget resources for 2026 amount to $823,100 and reflect no change compared with the approved budget for 2025. Additional details on the distribution of the proposed resources for 2026 are reflected in table 15.15 and figure 15.XVI.

Executive direction and management

15.87 The executive direction and management component comprises the Office of the Executive Director, the Office of the Deputy Executive Director, the Office of the Chief of Staff, the liaison offices in New York, Brussels and Geneva, the Governing Bodies Secretariat, the Legal Unit and the Independent Evaluation Unit. The Executive Director is also supported by the Office of the Principal Adviser, which undertakes special assignments.

15.88 The overall responsibilities of the executive direction and management component include the following functions:

(a) To provide overall direction, translating the vision of the Executive Director and the guidance from the Executive Board into the Programme's work priorities;

(b) To foster relationships with Member States and keep abreast of the needs of the Executive Board, the Committee of Permanent Representatives, the UN-Habitat Assembly and stakeholders affiliated with the Economic and Social Council;

(c) To coordinate the planning and ensure the implementation of the UN-Habitat strategic plan by ensuring the overall effectiveness of the Programme's organizational structure. It provides direction and alignment through the Executive Committee, which is chaired by the Executive Director, whom it assists in providing policy direction in order to ensure the effectiveness of the Programme;

(d) To contribute, in close cooperation with other United Nations agencies, to discussions on, and the implementation of, United Nations reforms, in particular in relation to improving system-wide coherence in United Nations development work, with a special focus on sustainable urbanization;

(e) To foster the mainstreaming of gender and disability inclusion into the four subprogrammes of UN-Habitat.

15.89 In accordance with the 2030 Agenda for Sustainable Development, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, UN-Habitat continues to integrate environmental

management practices into its operations. UN-Habitat will continue to incrementally improve the environmental management performance of its operations and facilities management in a number of ways. In 2024, in partnership with the Secretariat and in accordance with the United Nations Framework Convention on Climate Change, UN-Habitat offset its greenhouse gas emissions for the year 2024.

15.90 Information on the timely submission of parliamentary documentation and advance booking for air travel is reflected in table 15.16. In 2025, UN-Habitat is maintaining centralized monitoring and oversight of the timely purchase of air tickets, with exceptions requiring approval from the Office of the Executive Director. The rate of compliance for timely submission of documentation to the Department for General Assembly and Conference Management improved in 2024. However, the rate of travel compliance fell from 58 per cent to 52 per cent, due largely to the late nomination of meeting participants, including for the session of the World Urban Forum held in 2024. In response, the Executive Director has issued additional guidance and reminders to support improvement in this statistic.

Table 15.16

Programme support

15.96 The programme support component comprises the Management Advisory and Compliance Service of UN-Habitat.

15.97 The main responsibilities of the programme support component include the following functions: human resources management; budget and finance; information and communications technology; oversight and internal controls; and operations support.

15.98 The proposed regular budget resources for 2026 amount to $1,526,500 and reflect a decrease of $300 compared with the approved budget for 2025. The proposed decrease is explained in paragraph 15.82. Additional details on the distribution of the proposed resources for 2026 are reflected in table 15.22 and figure 15.XXII.

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

16.1 The United Nations Office on Drugs and Crime (UNODC) is responsible for supporting Member States in making the world safer from drugs, crime, corruption and terrorism, with a view to promoting security and justice for all. The mandate derives from the priorities established in relevant United Nations conventions and General Assembly resolutions, including Assembly resolutions 45/179, 46/152 and 46/185 C. The work of the Office is grounded in a series of conventions and other international instruments for which the Office acts as guardian and advocate. They include the three international drug control conventions, the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the United Nations Convention against Corruption, the 19 international conventions and protocols against terrorism, the United Nations standards and norms in crime prevention and criminal justice, and the United Nations Convention against Cybercrime; Strengthening International Cooperation for Combating Certain Crimes Committed by Means of Information and Communications Technology Systems and for the Sharing of Evidence in Electronic Form of Serious Crimes, adopted by the General Assembly on 24 December 2024. The thematic focus areas of the Office include addressing and countering the world drug problem, preventing and countering transnational organized crime, corruption and economic crime, terrorism and cybercrime, and undertaking crime prevention and criminal justice reform. UNODC supports Member States by facilitating multilateral cooperation and partnerships, by delivering technical assistance, by expanding the evidence base and by developing the capacity of Governments to formulate and implement coherent policies to address these issues.

Strategy and external factors for 2026

16.2 As a United Nations entity whose mandate contributes to the three pillars of the United Nations, the Office supports Member States through three broad, interconnected and mutually supportive workstreams:

(a) Normative work, including policy, advocacy and legislative assistance to promote the ratification and implementation of the relevant international treaties and the provision of secretariat and substantive services to the treaty-based, governing and other Member State-driven bodies that help identify priorities, challenges, responses and commitments in relevant mandate areas relating to drugs, crime, corruption and terrorism;

(b) Research and policy support work to expand the evidence base and inform policymaking processes at the national, regional and global levels, through increased knowledge and understanding of drug and crime issues;

(c) Technical cooperation to enhance the capacity of Member States and other stakeholders to prevent and counter illicit drugs, crime, corruption, and terrorism at the local, national, regional and global levels through the Office's specialized assistance, expertise and extensive field presence.

16.3 In 2026, the work of the Office will be guided by a new UNODC strategy for the period 2026–2030, building upon best practices and lessons learned from the implementation and review of the UNODC Strategy 2021–2025. Under the new strategy, the strong field presence and thematic expertise of UNODC will be utilized to deepen cross-sectoral partnerships, promote cross-border cooperation and ensure systematic coordination across UNODC mandates. The implementation of specific thematic and geographic strategies will guide the Office in better supporting Member States in addressing priority emerging issues. Moreover, the Office will strengthen its capacity in cross-cutting areas, including

promoting human rights, mainstreaming a gender perspective and empowering youth. The Office will further strengthen its capacity to respond to increasing requests for support for country-led evaluations.

16.4 With regard to cooperation with other entities, UNODC will continue to work closely with international and regional organizations and promote systematic South-South cooperation, enabling the exchange of information and expertise between countries facing similar challenges. Moreover, the Office will facilitate multi-stakeholder engagement in partnerships with civil society. Within these partnerships, particularly with academia, UNODC will promote an evidence-based analysis and understanding of the nature of the challenges faced by Member States and design coherent programmes and policies to support the implementation of the 2030 Agenda for Sustainable Development.

16.5 With regard to inter-agency coordination and liaison, UNODC will continue to coordinate and participate in all relevant groups linked to its mandated areas. It will continue to jointly implement projects on women's empowerment (United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women)); drug prevention, treatment and rehabilitation (World Health Organization (WHO)); corruption (United Nations Development Programme); terrorism prevention (Office of Counter-Terrorism of the Secretariat); access to justice for children (United Nations Children's Fund); and measuring illicit financial flows (United Nations Conference on Trade and Development). The Office also remains an active co-sponsor of the Joint United Nations Programme on HIV/AIDS.

16.6 With regard to external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) Member States recognize in their policies, programmes and budgets that challenges related to security, justice, governance, and the rule of law must be addressed as part of an integrated effort to implement the 2030 Agenda;

(b) The United Nations system and other multilateral organizations highlight the importance of addressing issues under UNODC mandates, to contribute to the implementation of the 2030 Agenda and other multilateral commitments in a holistic manner;

(c) Member States share real-time, statistical and operational data with the UNODC Research and Trend Analysis Branch and with their counterparts across borders;

(d) Extrabudgetary resources, including general-purpose funding for core functions, continue to be available.

16.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, through a systemic and institutional approach guided by the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women. In 2026, the focus will be on contextualizing the implementation of commitments towards gender equality and the empowerment of women in field contexts, taking into account local needs and priorities. A third iteration of the Strategy, covering the period 2027–2031, will be developed for launch in 2027.

16.8 In line with commitments set out in the United Nations Youth Strategy, the Office aims to mainstream meaningful youth engagement through the Youth Empowerment Accelerator Framework. In 2026, the Office will focus on strengthening meaningful youth participation in commissions and conventions, including in the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice. It will also advocate for the youth and peace and security agenda, supporting progress towards Sustainable Development Goal 16.

16.9 In line with the United Nations Disability Inclusion Strategy, the Office will continue to promote the inclusion of persons with disabilities throughout its work. The implementation of the disability inclusion action plan for the period 2025–2026 will ensure the continuity of the institutional approach to mainstreaming disability inclusion. In 2026, the Office will develop a new iteration of

the action plan for the period 2027–2028, building on best practices and lessons learned from the implementation and review of the previous action plan. UNODC will maintain a twin-track approach on disability inclusion in technical assistance and normative support provided to Member States.

Legislative mandates

16.10 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

Conventions and protocols

- Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
- Convention on Psychotropic Substances of 1971
- United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
- United Nations Convention against Transnational Organized Crime and the Protocols thereto
- Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
- United Nations Convention against Corruption
- United Nations Convention against Cybercrime; Strengthening International Cooperation for Combating Certain Crimes Committed by Means of Information and Communications Technology Systems and for the Sharing of Evidence in Electronic Form of Serious Crimes

General Assembly resolutions

S-20/2	Political Declaration
S-20/4	Measures to enhance international cooperation to counter the world drug problem
34/180; 70/131	Convention on the Elimination of All Forms of Discrimination against Women
44/25; 45/104	Convention on the Rights of the Child
45/179	Enhancement of the United Nations structure for drug abuse control
46/104; 47/101	United Nations International Drug Control Programme
48/12	Measures to strengthen international cooperation against the illicit production, sale, demand, traffic and distribution of narcotic drugs and psychotropic substances and related activities
48/104	Declaration on the Elimination of Violence against Women
48/112; 52/92	International action to combat drug abuse and illicit production and trafficking
59/162	Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking
66/177	Strengthening international cooperation in combating the harmful effects of illicit financial flows resulting from criminal activities
66/180; 68/186	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking
67/186	Strengthening the rule of law and the reform of criminal justice institutions, particularly in the areas related to the United Nations system-wide approach to fighting transnational organized crime and drug trafficking
69/237	Building capacity for the evaluation of development activities at the country level
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
70/182	International cooperation against the world drug problem

71/256	New Urban Agenda
72/194	Technical assistance for implementing the international conventions and protocols related to counter-terrorism
72/197	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues
73/183	Enhancing the role of the Commission on Crime Prevention and Criminal Justice in contributing to the implementation of the 2030 Agenda for Sustainable Development
73/185	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals
74/175; 78/226	Technical assistance provided by the United Nations Office on Drugs and Crime related to counter-terrorism
74/253; 76/273	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
76/181	Fourteenth United Nations Congress on Crime Prevention and Criminal Justice
76/188	International cooperation to address and counter the world drug problem
76/270	Interaction between the United Nations, national parliaments and the Inter-Parliamentary Union
77/10	The situation in Afghanistan
77/209	Torture and other cruel, inhuman or degrading treatment or punishment
77/325	Tackling illicit trafficking in wildlife
78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
78/179	Policies and programmes involving youth
78/180	Violence against women migrant workers
78/181	Improvement of the situation of women and girls in rural areas
78/187	Rights of the child
78/188	The girl child
78/229	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
79/1	The Pact for the Future
79/136	Cooperation between the United Nations and the International Criminal Police Organization (INTERPOL)
79/154	Trafficking in women and girls
79/172	Human rights in the administration of justice
79/180	Combating intolerance, negative stereotyping, stigmatization, discrimination, incitement to violence and violence against persons, based on religion or belief
79/186	Follow-up to the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice
79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
79/234	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
79/243	United Nations Convention against Cybercrime; Strengthening International Cooperation for Combating Certain Crimes Committed by Means of Information and Communications Technology Systems and for the Sharing of Evidence in Electronic Form of Serious Crimes

Economic and Social Council resolutions and decisions

1946/9 (I)	Commission on Narcotic Drugs
1985/11	Cooperation for the control of illicit drug trafficking and drug abuse in the African region
1987/34	Meeting of Heads of National Drug Law Enforcement Agencies, Latin America and Caribbean Region
1991/38	Terms of reference of the Commission on Narcotic Drugs
1993/40	Implementation of measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances
1997/41	Implementation of comprehensive measures to counter the illicit manufacture, trafficking and abuse of amphetamine-type substances and their precursors
1999/30	Review of the United Nations International Drug Control Programme: strengthening the United Nations machinery for international drug control within the scope of the existing international drug control treaties and in accordance with the basic principles of the Charter of the United Nations
2001/14	Prevention of diversion of precursors used in the illicit manufacture of synthetic drugs
2005/14	Model bilateral agreement on the sharing of confiscated proceeds of crime or property covered by the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
2006/23; 2007/22	Strengthening basic principles of judicial conduct

2007/21	Information-gathering instrument in relation to United Nations standards and norms in crime prevention and criminal justice
2008/23	Protection against trafficking in cultural property
2009/25	Improving the collection, reporting and analysis of data to enhance knowledge of trends in specific areas of crime
2010/19	Crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking
2010/20; 2011/34	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime
2011/36; 2013/40	Crime prevention and criminal justice responses against illicit trafficking in endangered species of wild fauna and flora
2012/19	Strengthening international cooperation in combating transnational organized crime in all its forms and manifestations
2013/31	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking
2013/39	International cooperation in the prevention, investigation, prosecution and punishment of economic fraud and identity-related crime
2013/42	United Nations Guiding Principles on Alternative Development
2019/23	Combating transnational organized crime and its links to illicit trafficking in precious metals and illegal mining, including by enhancing the security of supply chains of precious metals
2022/14	Strengthening national and international efforts, including with the private sector, to protect children from sexual exploitation and abuse
2024/3	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
Decision 2011/259	Joint meetings of the reconvened sessions of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice
Decision 2022/316	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
Decision 2022/317	Organization of the thematic discussions at future sessions of the Commission on Crime Prevention and Criminal Justice

Security Council resolutions

2370 (2017)
2462 (2019)
2482 (2019)

Commission on Crime Prevention and Criminal Justice resolutions

21/3	Strengthening international cooperation to address the links that in some cases may exist between transnational organized criminal activities and terrorist activities
24/2	Strengthening crime prevention and criminal justice responses with respect to trafficking in cultural property and other related offences
27/5	International cooperation against trafficking in cultural property
30/3	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime

Commission on Narcotic Drugs resolutions

44/14	Measures to promote the exchange of information on new patterns of drug use and on substances consumed
49/3	Strengthening systems for the control of precursor chemicals used in the manufacture of synthetic drugs
50/11	International cooperation in preventing the illegal distribution of internationally controlled licit substances via the Internet
51/14	Promoting coordination and alignment of decisions between the Commission on Narcotic Drugs and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS
53/11	Promoting the sharing of information on the potential abuse of and trafficking in synthetic cannabinoid receptor agonists
54/3	Ensuring the availability of reference and test samples of controlled substances at drug testing laboratories for scientific purposes
54/8	Strengthening international cooperation and regulatory and institutional frameworks for the control of precursor chemicals used in the illicit manufacture of synthetic drugs
54/11	Improving the participatory role of civil society in addressing the world drug problem

55/1	Promoting international cooperation in responding to the challenges posed by new psychoactive substances
56/8	Promoting initiatives for the safe, secure and appropriate return for disposal of prescription drugs, in particular those containing narcotic drugs and psychotropic substances under international control
56/10	Tools to improve data collection to monitor and evaluate the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem
56/13	Precursors: raising awareness on the diversion in international trade of non-scheduled substances for use as alternatives to scheduled substances in the illicit manufacture of narcotic drugs and psychotropic substances
57/9	Enhancing international cooperation in the identification and reporting of new psychoactive substances and incidents involving such substances
58/5	Supporting the collaboration of public health and justice authorities in pursuing alternative measures to conviction or punishment for appropriate drug-related offences of a minor nature
58/6	Strengthening international cooperation in preventing and combating illicit financial flows linked to drug trafficking, from the anti-money-laundering perspective
58/7	Strengthening cooperation with the scientific community, including academia, and promoting scientific research in drug demand and supply reduction policies in order to find effective solutions to various aspects of the world drug problem
58/10	Promoting the use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances
58/11	Promoting international cooperation in responding to new psychoactive substances and amphetamine-type stimulants, including methamphetamine
59/5	Mainstreaming a gender perspective in drug-related policies and programmes
59/7	Promotion of proportionate sentencing for drug-related offences of an appropriate nature in implementing drug control policies
59/8	Promotion of measures to target new psychoactive substances and amphetamine-type stimulants
60/4	Preventing and responding to the adverse health consequences and risks associated with the use of new psychoactive substances
60/5	Increasing international coordination relating to precursors and non-scheduled precursor chemicals used in the illicit manufacture of narcotic drugs and psychotropic substances
60/6	Intensifying coordination and cooperation among United Nations entities and relevant domestic sectors, including the health, education and criminal justice sectors, to address and counter the world drug problem
60/9	Enhancing the capacity of law enforcement, border control and other relevant agencies to counter illicit drug trafficking through training
61/5	Promoting the implementation of the electronic International Import and Export Authorization System for licit trade in narcotic drugs and psychotropic substances
61/8	Enhancing and strengthening international and regional cooperation and domestic efforts to address the international threats posed by the non-medical use of synthetic opioids
61/9	Protecting children from the illicit drug challenge
62/2	Enhancing detection and identification capacity for synthetic drugs for non-medical use by increasing international collaboration
62/4	Advancing effective and innovative approaches, through national, regional and international action, to address the multifaceted challenges posed by the non-medical use of synthetic drugs, particularly synthetic opioids
62/5	Enhancing the capacity of Member States to adequately estimate and assess the need for internationally controlled substances for medical and scientific purposes
63/1	Promoting efforts by Member States to address and counter the world drug problem, in particular supply reduction-related measures, through effective partnerships with private sector entities
63/2	Promoting and improving the collection and analysis of reliable and comparable data to strengthen balanced, integrated, comprehensive, multidisciplinary and scientific evidence-based responses to the world drug problem
64/7	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
65/2	Strengthening international cooperation to address the links between illicit drug trafficking and illicit firearms trafficking
65/3	Intensifying efforts to address the diversion of non-scheduled chemicals frequently used in the illicit manufacture of drugs and the proliferation of designer precursors
66/1	Preparations for the midterm review to be held during the sixty-seventh session of the Commission on Narcotic Drugs, in 2024

67/2	Promoting awareness-raising, education, training and data collection as part of a comprehensive approach to ensuring access to and the availability of controlled substances for medical and scientific purposes, including for the treatment of children, and ensuring their rational use

Subprogramme 1
Countering transnational organized crime

General Assembly resolutions

64/293	United Nations Global Plan of Action to Combat Trafficking in Persons
71/1	New York Declaration for Refugees and Migrants
74/173	Promoting technical assistance and capacity-building to strengthen national measures and international cooperation to combat cybercrime, including information-sharing
75/282	Countering the use of information and communications technologies for criminal purposes
76/7	2021 Political declaration on the implementation of the United Nations Global Plan of Action to Combat Trafficking in Persons
76/185	Preventing and combating crimes that affect the environment
76/266	Progress Declaration of the International Migration Review Forum
78/228	Improving the coordination of efforts against trafficking in persons
78/267	International Day for the Prevention of and Fight against All Forms of Transnational Organized Crime
79/31	Assistance to States for curbing the illicit traffic in small arms and light weapons and collecting them
79/40	The illicit trade in small arms and light weapons in all its aspects
79/144	Oceans and the law of the sea
79/189	Strengthening and promoting effective measures and international cooperation on organ donation and transplantation to prevent and combat trafficking in persons for the purpose of organ removal and trafficking in human organs

Security Council resolutions

2117 (2013)	2388 (2017)
2220 (2015)	2551 (2020)
2331 (2016)	2616 (2021)

Commission on Crime Prevention and Criminal Justice resolutions

20/4	Promoting further cooperation in countering transnational organized crime
25/1	Preventing and combating trafficking in human organs and trafficking in persons for the purpose of organ removal
27/2	Preventing and combating trafficking in persons facilitated by the criminal misuse of information and communications technologies
27/3	Improving the protection of children against trafficking in persons, including by addressing the criminal misuse of information and communications technologies
27/4	Strengthening measures against trafficking in persons
28/2	Countering the smuggling of commercial goods in cases falling within the scope of the United Nations Convention against Transnational Organized Crime
28/3	Strengthening regional and international cooperation in crime prevention and criminal justice responses to illicit trafficking in wildlife
30/1	Strengthening international cooperation in addressing the smuggling of migrants
31/1	Strengthening the international legal framework for international cooperation to prevent and combat illicit trafficking in wildlife
32/1	Taking action against trafficking in persons in business operations, public procurement and supply chains for goods and services
33/1	Countering trafficking in persons in the context of rapid technological change

Conference of the Parties to the United Nations Convention against Transnational Organized Crime resolutions

5/4	Illicit manufacturing of and trafficking in firearms, their parts and components and ammunition
6/2	Promoting accession to and implementation of the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
7/1	Strengthening the implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto
7/2	Importance of the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
8/1	Enhancing the effectiveness of central authorities in international cooperation in criminal matters to counter transnational organized crime
9/1	Establishment of the Mechanism for the Review of the Implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto
9/2	Enhancing and ensuring effective implementation of the Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
9/3; 12/1	Implementation of the provisions on international cooperation of the United Nations Convention against Transnational Organized Crime
10/1	Launch of the review process of the Mechanism for the Review of the Implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto
10/2	Strengthening international cooperation against the illicit manufacturing of and trafficking in firearms, their parts and components and ammunition
10/3; 11/5	Effective implementation of the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime
10/4	Celebrating the twentieth anniversary of the adoption of the United Nations Convention against Transnational Organized Crime and promoting its effective implementation
10/5	Preventing and combating the manufacturing of and trafficking in falsified medical products as forms of transnational organized crime
10/6	Preventing and combating crimes that affect the environment falling within the scope of the United Nations Convention against Transnational Organized Crime
11/2; 12/2	Implementation of the provisions on technical assistance of the United Nations Convention against Transnational Organized Crime
11/3	Outcomes of the joint thematic discussion of the Working Group of Government Experts on Technical Assistance and the Working Group on International Cooperation on the application of the United Nations Convention against Transnational Organized Crime for preventing and combating transnational organized crimes that affect the environment
11/4	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking in any situations, including in the context of all armed conflicts and natural disasters
11/6	Strengthening international cooperation to prevent, combat and eradicate the illicit manufacturing of and trafficking in firearms, their parts and components and ammunition
12/3	Enhancing measures, including under the Firearms Protocol, to prevent, combat and eradicate the illicit manufacturing of and trafficking in firearms, their parts and components and ammunition, in view of technological developments
12/4	Enhancing measures to prevent and combat crimes that affect the environment falling within the scope of the United Nations Convention against Transnational Organized Crime

Subprogramme 2
A comprehensive and balanced approach to counter the world drug problem

General Assembly resolutions

S-20/3	Declaration on the Guiding Principles of Drug Demand Reduction
S-26/2	Declaration of Commitment on HIV/AIDS
S-30/1	Our joint commitment to effectively addressing and countering the world drug problem
60/262	Political Declaration on HIV/AIDS
65/277	Political Declaration on HIV and AIDS: Intensifying Our Efforts to Eliminate HIV and AIDS
70/266	Political Declaration on HIV and AIDS: On the Fast Track to Accelerating the Fight against HIV and to Ending the AIDS Epidemic by 2030

73/2	Political declaration of the third high-level meeting of the General Assembly on the prevention and control of non-communicable diseases
74/20	Global health and foreign policy: an inclusive approach to strengthening health systems
75/153	Follow-up to the twentieth anniversary of the International Year of the Family and beyond
75/284	Political Declaration on HIV and AIDS: Ending Inequalities and Getting on Track to End AIDS by 2030
78/131	Enhancing action at the national, regional and international levels to address the global public health and security challenges posed by synthetic drugs
79/191	Addressing and countering the world drug problem through a comprehensive, integrated and balanced approach

Economic and Social Council resolutions and decisions

2003/32	Training in precursor control, countering money-laundering and drug abuse prevention
2003/36	Establishment of national networks to counter money-laundering in the framework of national and international drug control plans
2004/35	Combating the spread of HIV/AIDS in criminal justice pretrial and correctional facilities
2005/28	Frequency of meetings of Heads of National Drug Law Enforcement Agencies, Europe
2007/9	The need for a balance between demand for and supply of opiates used to meet medical and scientific needs
2023/30	Joint United Nations Programme on HIV/AIDS
Decision 2009/250	Proposed amendment to the Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol

Commission on Narcotic Drugs resolutions and decisions

49/4	Responding to the prevalence of HIV/AIDS and other blood-borne diseases among drug users
58/4	Promoting the implementation of the United Nations Guiding Principles on Alternative Development
64/3	Promoting scientific evidence-based, quality, affordable and comprehensive drug prevention, treatment, sustained recovery and related support services
64/5	Facilitating access to comprehensive, scientific evidence-based drug demand reduction services and related measures, including for people impacted by social marginalization
65/1	Promoting alternative development as a development-oriented drug control strategy, taking into account measures to protect the environment
65/4	Promoting comprehensive and scientific evidence-based early prevention
66/4	Promoting alternative development as a development-oriented drug control strategy that is sustainable and inclusive
67/1	Promoting recovery and related support services for people with drug use disorders
67/3	Celebrating the tenth anniversary of the United Nations Guiding Principles on Alternative Development: effective implementation and the way forward
67/4	Preventing and responding to drug overdose through prevention, treatment, care and recovery measures, as well as other public health interventions, to address the harms associated with illicit drug use as part of a balanced, comprehensive, scientific evidence-based approach

Commission on Narcotic Drugs statements and declarations

Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem

Joint Ministerial Statement of the 2014 high-level review by the Commission on Narcotic Drugs of the implementation by Member States of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem

Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem

High-level declaration by the Commission on Narcotic Drugs on the 2024 midterm review, following up to the Ministerial Declaration of 2019

Commission on Crime Prevention and Criminal Justice resolutions

26/2	Ensuring access to measures for the prevention of mother-to-child transmission of HIV in prisons

Subprogramme 3
Countering corruption

General Assembly resolutions

S-32/1	Our common commitment to effectively addressing challenges and implementing measures to prevent and combat corruption and strengthen international cooperation
79/190	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption

Conference of the States Parties to the United Nations Convention against Corruption resolutions and decisions

1/1; 2/1	Review of implementation
1/4	Establishment of an intergovernmental working group on asset recovery
1/5	Technical assistance
2/3; 3/3	Asset recovery
3/1	Review mechanism
4/1	Mechanism for the Review of Implementation of the United Nations Convention against Corruption
4/2	Convening of open-ended intergovernmental expert meetings to enhance international cooperation
4/4	International cooperation in asset recovery
4/6	Non-governmental organizations and the Mechanism for the Review of Implementation of the United Nations Convention against Corruption
5/6	Private sector
6/1	Continuation of the review of implementation of the United Nations Convention against Corruption
6/2	Facilitating international cooperation in asset recovery and the return of proceeds of crime
6/3	Fostering effective asset recovery
6/5	St. Petersburg statement on promoting public-private partnership in the prevention of and fight against corruption
6/10	Education and training in the context of anti-corruption
7/1	Strengthening mutual legal assistance for international cooperation and asset recovery
7/2	Preventing and combating corruption in all its forms more effectively, including, among others, when it involves vast quantities of assets, based on a comprehensive and multidisciplinary approach, in accordance with the United Nations Convention against Corruption
7/3	Promoting technical assistance to support the effective implementation of the United Nations Convention against Corruption
7/4	Enhancing synergies between relevant multilateral organizations responsible for review mechanisms in the field of anti-corruption
7/5	Promoting preventive measures against corruption
7/7; 8/11; 10/2	Strengthening the implementation of the United Nations Convention against Corruption in small island developing States
7/8	Corruption in sport
8/1	Strengthening of international cooperation on asset recovery and of the administration of frozen, seized and confiscated assets
8/3	Promoting integrity in the public sector among States parties to the United Nations Convention against Corruption
8/4	Safeguarding sport from corruption
8/5	Enhancing integrity by raising public awareness
8/6	Implementation of international obligations to prevent and combat bribery as defined under the United Nations Convention against Corruption
8/7	Enhancing the effectiveness of anti-corruption bodies in fighting corruption
8/8; 10/3	Follow-up to the Marrakech declaration on the prevention of corruption
8/9	Strengthening asset recovery to support the 2030 Agenda for Sustainable Development
8/10	Measurement of corruption
8/12	Preventing and combating corruption as it relates to crimes that have an impact on the environment
8/13	Abu Dhabi declaration on enhancing collaboration between the supreme audit institutions and anti-corruption bodies to more effectively prevent and fight corruption
8/14	Promoting good practices in relation to the role of national parliaments and other legislative bodies in preventing and combating corruption in all its forms

9/1	Sharm el-Sheikh declaration on strengthening international cooperation in the prevention of and fight against corruption during times of emergencies and crisis response and recovery
9/2	Our common commitment to effectively addressing challenges and implementing measures to prevent and combat corruption and strengthening international cooperation: follow-up to the special session of the General Assembly against corruption
9/3	Follow-up to the Abu Dhabi declaration on enhancing collaboration between the supreme audit institutions and anti-corruption bodies to more effectively prevent and fight corruption, and the use of information and communications technologies
9/4	Strengthening the implementation of the United Nations Convention against Corruption at regional levels
9/5	Enhancing international anti-corruption law enforcement cooperation
9/7	Enhancing the use of beneficial ownership information to facilitate the identification, recovery and return of proceeds of crime
9/8	Promoting anti-corruption education, awareness-raising and training
10/1	Atlanta 2023: promoting integrity, accountability and transparency in the fight against corruption
10/4	Methodologies and indicators for measuring corruption and the effectiveness of anti-corruption frameworks
10/5	Measures to address corruption involving organized criminal groups
10/6	Enhancing the use of beneficial ownership information to strengthen asset recovery
10/7	Promoting international cooperation in civil and administrative proceedings related to corruption as provided in the United Nations Convention against Corruption
10/8	Protection of reporting persons
10/9	Promoting transparency and integrity in public procurement in support of the 2030 Agenda for Sustainable Development
10/10	Addressing the societal impacts of corruption
10/11	Follow-up to the Sharm el-Sheikh declaration on strengthening international cooperation in the prevention of and fight against corruption during times of emergencies and crisis response and recovery
10/12	Providing incentives for the private sector to adopt integrity measures to prevent and combat corruption
Decision 7/1	Work of the subsidiary bodies established by the Conference
Decision 8/1	Extension of the second cycle of the Mechanism for the Review of Implementation of the United Nations Convention against Corruption
Decision 10/2	Further extension of the second cycle of the Mechanism for the Review of Implementation of the United Nations Convention against Corruption

Subprogramme 4
Terrorism prevention

Conventions and protocols

- Convention on Offences and Certain Other Acts Committed on Board Aircraft of 1963 as amended by the Protocol of 2014
- Convention for the Suppression of Unlawful Seizure of Aircraft of 1970 as supplemented by the Protocol of 2010
- Convention for the Suppression of Unlawful Acts against the Safety of Civil Aviation of 1971 as supplemented by the Protocol for the Suppression of Unlawful Acts of Violence at Airports Serving International Civil Aviation of 1988
- Convention on the Prevention and Punishment of Crimes against Internationally Protected Persons, including Diplomatic Agents, of 1973
- International Convention against the Taking of Hostages of 1979
- Convention on the Physical Protection of Nuclear Material of 1980 and its Amendment of 2005
- Convention for the Suppression of Unlawful Acts against the Safety of Maritime Navigation of 1988 as amended by the Protocol of 2005
- Protocol for the Suppression of Unlawful Acts Against the Safety of Fixed Platforms Located on the Continental Shelf of 1988 as amended by the Protocol of 2005

- Convention on the Marking of Plastic Explosives for the Purpose of Detection of 1991
- International Convention for the Suppression of Terrorist Bombings of 1997
- International Convention for the Suppression of the Financing of Terrorism of 1999
- International Convention for the Suppression of Acts of Nuclear Terrorism of 2005
- Convention on the Suppression of Unlawful Acts Relating to International Civil Aviation of 2010

General Assembly resolutions

58/136; 59/153	Strengthening international cooperation and technical assistance in promoting the implementation of the universal conventions and protocols related to terrorism within the framework of the activities of the Centre for International Crime Prevention	72/180	Protection of human rights and fundamental freedoms while countering terrorism
		72/284; 75/291; 77/298	The United Nations Global Counter-Terrorism Strategy and the reviews thereof
		79/129	Measures to eliminate international terrorism

Security Council resolutions

1267 (1999)	1624 (2005)
1373 (2001)	2133 (2014)
1540 (2004)	2610 (2021)

Subprogramme 5
Justice

General Assembly resolutions

34/169; 35/170	Code of Conduct for Law Enforcement Officials	51/60	United Nations Declaration on Crime and Public Security
40/33	United Nations Standard Minimum Rules for the Administration of Juvenile Justice (the Beijing Rules)	52/86	Crime prevention and criminal justice measures to eliminate violence against women
40/34	Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power	55/59	Vienna Declaration on Crime and Justice: Meeting the Challenges of the Twenty-first Century
43/173	Body of Principles for the Protection of All Persons under Any Form of Detention or Imprisonment	56/261	Plans of action for the implementation of the Vienna Declaration on Crime and Justice: Meeting the Challenges of the Twenty-first Century
45/110	United Nations Standard Minimum Rules for Non-custodial Measures (the Tokyo Rules)	57/170	Follow-up to the plans of action for the implementation of the Vienna Declaration on Crime and Justice: Meeting the Challenges of the Twenty-first Century
45/111	Basic Principles for the Treatment of Prisoners	65/228	Strengthening crime prevention and criminal justice responses to violence against women
45/112	United Nations Guidelines for the Prevention of Juvenile Delinquency (the Riyadh Guidelines)	65/229	United Nations Rules for the Treatment of Women Prisoners and Non-custodial Measures for Women Offenders (the Bangkok Rules)
45/113	United Nations Rules for the Protection of Juveniles Deprived of their Liberty	67/185	Promoting efforts to eliminate violence against migrants, migrant workers and their families
45/118	Model Treaty on the Transfer of Proceedings in Criminal Matters	67/187	United Nations Principles and Guidelines on Access to Legal Aid in Criminal Justice Systems
45/119	Model Treaty on the Transfer of Supervision of Offenders Conditionally Sentenced or Conditionally Released		
46/152	Creation of an effective United Nations crime prevention and criminal justice programme		

69/194	United Nations Model Strategies and Practical Measures on the Elimination of Violence against Children in the Field of Crime Prevention and Criminal Justice
70/175	United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules)
70/176	Taking action against gender-related killing of women and girls
72/193	Promoting the practical application of the United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules)
74/174	Countering child sexual exploitation and sexual abuse online
76/183	Integrating sport into youth crime prevention and criminal justice strategies
77/233	Strengthening national and international efforts, including with the private sector, to protect children from sexual exploitation and abuse
78/227	Equal access to justice for all
79/161	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
79/187	Reducing reoffending through rehabilitation and reintegration
79/188	Preventing and countering violence against children by organized criminal groups and terrorist groups in the field of crime prevention and criminal justice

Economic and Social Council resolutions and decisions

1984/47	Procedures for the effective implementation of the Standard Minimum Rules for the Treatment of Prisoners
1984/50; 1996/15	Safeguards guaranteeing protection of the rights of those facing the death penalty
1989/57; 2000/15	Implementation of the Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power
1989/60	Procedures for the effective implementation of the Basic Principles on the Independency of the Judiciary
1989/61	Guidelines for the effective implementation of the Code of Conduct for Law Enforcement Officials
1989/64	Implementation of the safeguards guaranteeing protection of the rights of those facing the death penalty
1989/65	Effective prevention and investigation of extralegal, arbitrary and summary executions
1995/9	Guidelines for the prevention of urban crime
1997/30;[1] 1999/28	Administration of juvenile justice
1997/31	Victims of crime and abuse of power
1997/36	International cooperation for the improvement of prison conditions
1998/21;[2] 2004/28	United Nations standards and norms in crime prevention and criminal justice
1998/22	Status of foreign citizens in criminal proceedings
1998/23[3]	International cooperation aimed at the reduction of prison overcrowding and the promotion of alternative sentencing
1999/23	Work of the United Nations Crime Prevention and Criminal Justice Programme
1999/25	Effective crime prevention
1999/26	Development and implementation of mediation and restorative justice measures in criminal justice
1999/27[4]	Penal reform
2002/12	Basic principles on the use of restorative justice programmes in criminal matters
2002/13;[5] 2005/22	Action to promote effective crime prevention
2002/14	Promoting effective measures to deal with the issues of missing children and sexual abuse or exploitation of children
2005/20	Guidelines on Justice in Matters involving Child Victims and Witnesses of Crime
2005/21	Strengthening the technical cooperation capacity of the United Nations Crime Prevention and Criminal Justice Programme in the area of the rule of law and criminal justice reform
2006/20	United Nations standards and norms in crime prevention
2006/22	Providing technical assistance for prison reform in Africa and the development of viable alternatives to imprisonment

[1] In particular the annex, entitled “Guidelines for Action on Children in the Criminal Justice System”.
[2] In particular the annex, entitled “Plan of action for the implementation of the Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power”.
[3] In particular the annex, entitled “Kadoma Declaration on Community Service”.
[4] In particular the annex, entitled “Arusha Declaration on Good Prison Practice”.
[5] In particular the annex, entitled “Guidelines for the Prevention of Crime”.

2006/25	Strengthening the rule of law and the reform of criminal justice institutions, including in post-conflict reconstruction
2006/29	Crime prevention and criminal justice responses to violence against women and girls
2007/24	International cooperation for the improvement of access to legal aid in criminal justice systems, particularly in Africa
2008/24	Strengthening prevention of urban crime: an integrated approach
2009/26	Supporting national and international efforts for child justice reform, in particular through improved coordination in technical assistance
2011/33	Prevention, protection and international cooperation against the use of new information technologies to abuse and/or exploit children
2014/21	Strengthening social policies as a tool for crime prevention
2016/17	Restorative justice in criminal matters
2016/18	Mainstreaming holistic approaches in youth crime prevention
2017/19	Promoting and encouraging the implementation of alternatives to imprisonment as part of comprehensive crime prevention and criminal justice policies
2024/12	Treatment of children associated with terrorist groups, including children who are recruited and exploited by those groups
Decision 2005/247	Report of the Secretary-General on capital punishment and the safeguards guaranteeing protection of the rights of those facing the death penalty

Commission on Crime Prevention and Criminal Justice resolutions and decisions

17/2	Strengthening the rule of law through improved integrity and capacity of prosecution services
18/1	Supplementary rules specific to the treatment of women in detention and in custodial and non-custodial settings
18/2	Civilian private security services: their role, oversight and contribution to crime prevention and community safety
25/2	Promoting legal aid, including through a network of legal aid providers
27/6	Restorative justice
28/1	Strengthening the engagement of all members of society in crime prevention

Subprogramme 6
Research, trend analysis and forensics

General Assembly resolutions

834 (IX)	United Nations Narcotics Laboratory
1395 (XIV)	Technical assistance in narcotics control

Economic and Social Council resolutions

1988/13	Strengthening of cooperation and coordination in international drug control
2015/24	Improving the quality and availability of statistics on crime and criminal justice for policy development

Commission on Crime Prevention and Criminal Justice resolutions

19/5	International cooperation in the forensic field

Commission on Narcotic Drugs resolutions and decisions

42/3	Monitoring and verification of illicit cultivation
47/5	Illicit drug profiling in international law enforcement: maximizing outcome and improving cooperation
48/1	Promoting the sharing of information on emerging trends in the abuse of and trafficking in substances not controlled under the international drug control conventions
50/4	Improving the quality and performance of drug analysis laboratories
50/9	Use of drug characterization and chemical profiling in support of drug law enforcement intelligence-gathering and operational work, as well as trend analysis
52/7	Proposal concerning quality evaluation of the performance of drug analysis laboratories

54/9	Improving quality and building monitoring capacity for the collection, reporting and analysis of data on the world drug problem and policy responses to it
56/5	Promoting the sharing of expertise in and knowledge on forensic drug profiling
58/9	Promoting the role of drug analysis laboratories worldwide and reaffirming the importance of the quality of the analysis and results of such laboratories
59/3	Promoting informal networking within the scientific community and the sharing of scientific evidence-based findings that may inform policies and practices to address the world drug problem
61/3	Laboratory support for the implementation of the scheduling decisions of the Commission on Narcotic Drugs
66/2	Safe handling and disposal of synthetic drugs, their precursors and other chemicals used in the illicit manufacture of drugs
66/3	Strengthening information-sharing to increase scientific evidence-based support for international scheduling and the effective implementation of international scheduling decisions
Decision 63/15	Improved and streamlined annual report questionnaire

Subprogramme 8
Technical cooperation and field support

General Assembly resolutions

76/298	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
78/166	Operational activities for development of the United Nations system
79/263	New Partnership for Africa's Development: progress in implementation and international support

Commission on Narcotic Drugs resolutions

54/7	Paris Pact initiative

Subprogramme 9, component 1
Provision of secretariat services and substantive support to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the United Nations Congress on Crime Prevention and Criminal Justice

General Assembly resolutions

415 (V)	Transfer of functions of the International Penal and Penitentiary Commission
72/305	Review of the implementation of General Assembly resolution 68/1 on the strengthening of the Economic and Social Council

Economic and Social Council resolutions

1992/22	Implementation of General Assembly resolution 46/152 concerning operational activities and coordination in the field of crime prevention and criminal justice

Commission on Narcotic Drugs decisions

Decision 60/1	Strengthening the subsidiary bodies of the Commission on Narcotic Drugs

Subprogramme 9, component 2
Provision of secretariat services and substantive support to the International Narcotics Control Board

Security Council resolutions

1817 (2008)

Economic and Social Council resolutions

1966/1106 (XL)	Implementation of the Single Convention on Narcotic Drugs, 1961	1992/29	Measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances
1967/1196 (XLII); 1991/48	Administrative arrangements to ensure the full technical independence of the International Narcotics Control Board	1996/29	Action to strengthen international cooperation to control precursors and their substitutes used in the illicit manufacture of controlled substances, in particular amphetamine-type stimulants, and to prevent their diversion
1973/1775 (LIV)	Keeping in force the administrative arrangements to ensure the full technical independence of the International Narcotics Control Board	2003/39	Strengthening systems of control over chemical precursors and preventing their diversion and trafficking
1981/7	Implementation of the 1971 Convention on Psychotropic Substances	2004/38	Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking
1991/44	Prevention of diversion from international trade into illicit channels of psychotropic substances listed in Schedules III and IV of the Convention on Psychotropic Substances of 1971		

Commission on Narcotic Drugs resolutions

50/5	Identifying sources of precursors used in illicit drug manufacture	62/1	Strengthening international cooperation and comprehensive regulatory and institutional frameworks for the control of precursors used in the illicit manufacture of narcotic drugs and psychotropic substances
54/6	Promoting adequate availability of internationally controlled narcotic drugs and psychotropic substances for medical and scientific purposes while preventing their diversion and abuse	62/8	Supporting the International Narcotics Control Board in fulfilling its treaty-mandated functions in cooperation with Member States and in collaboration with the Commission on Narcotic Drugs and the World Health Organization

Deliverables

16.11 Table 16.1 lists all cross-cutting deliverables of the programme.

Table 16.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	**3**	**3**	**3**	**3**
Meetings of:				
1. The Fifth Committee	1	1	1	1
2. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. The Committee for Programme and Coordination	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**2**	**2**	**2**	**2**
4. On gender equality	1	1	1	1
5. On the independent evaluation function	1	1	1	1
Seminars, workshops and training events (number of days)	**8**	**14**	**15**	**12**
6. Food-for-thought conferences and side events on gender equality	8	7	7	4
7. Trainings for national counterparts on gender equality	–	6	6	6
8. Side events and conferences on topics related to evaluation	–	1	2	2

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Technical materials (number of materials)	**21**	**17**	**22**	**19**
9. On topics related to gender equality	5	2	3	2
10. On evaluation (independent, joint and system-wide evaluations and synthesis studies)	15	14	16	15
11. On evaluation tools, methodologies and approaches and evaluation capacity development	1	1	3	2

C. Substantive deliverables

Consultation, advice and advocacy: advisory services in the fields of drug control, crime prevention, anti-corruption, and terrorism prevention and cooperation with Member States, intergovernmental organizations and civil society; advocacy of drug control, crime prevention, anti-corruption and terrorism prevention issues with Member States and civil society; technical advice and advisory services on country-led evaluations on drug control, crime prevention, anti-corruption and terrorism prevention in cooperation with Member States, intergovernmental organizations and civil society.

Databases and substantive digital materials: Unite Evaluations.

D. Communication deliverables

Outreach programmes, special events and information materials: evaluation briefs, presentations, events and training; speaking engagements with internal and external stakeholders, conferences, information dissemination, public awareness and representation of the Secretary-General at international events and forums.

Digital platforms and multimedia content: UNODC website and social media accounts.

Evaluation activities

16.12 The following independent evaluations and evaluative work completed in 2024 have guided the proposed programme plan for 2026:

(a) The triennial review of the implementation of recommendations on the programme evaluation of UNODC, completed by the Office of Internal Oversight Services;

(b) Three in-depth evaluations by the UNODC Independent Evaluation Section on criminal justice reform, strengthening resilience among youth against crime, violence and drugs, and illegal deforestation;

(c) Ten project evaluations by the UNODC Independent Evaluation Section, including two joint evaluations, on victim-centred investigations and prosecutions of trafficking in persons, maritime security, anti-corruption, business integrity, cognitive therapy treatment in prisons, organized crime, anti-money-laundering, management of violent extremist prisoners, criminal justice and prevention of violent extremism;

(d) One evaluation synthesis by the UNODC Independent Evaluation Section on violence prevention programmes and their impacts on homicides and conflict-related deaths.

16.13 In response to the evaluations referenced above, which fully met the required standards of independence set out in the administrative instruction on evaluation (ST/AI/2021/3), UNODC replicated successful interventions promoting resilience against child recruitment by terrorist groups and reintegration; implemented baseline surveys and needs assessments for administration of justice initiatives, ensuring the further integration of human rights, gender equality and disability inclusion; and strengthened partnerships for system-wide evaluation efforts. Capacity training for staff and the roll-out of Unite Evaluations beyond UNODC have been initiated. Lessons learned will be integrated into technical assistance provided to Member States on country-led evaluations in 2026 to continue promoting evaluations for evidence-based policymaking across UNODC mandate areas.

16.14 The following evaluations are planned for 2026 (themes will be determined with Member States, UNODC senior management and project staff):

(a) Strategic and subprogramme evaluations;

(b) Evaluations and syntheses at the programmatic, thematic, country, regional and project levels;

(c) System-wide evaluation and synthesis efforts.

Programme of work

Subprogramme 1
Countering transnational organized crime

Objective

16.15 The objective, to which this subprogramme contributes, is to prevent and combat transnational organized crime and illicit trafficking.

Strategy

16.16 To contribute to the objective, the subprogramme will:

(a) Promote adherence to and implementation of the international drug control conventions and the United Nations Convention against Transnational Organized Crime and the Protocols thereto, including by developing tools and providing targeted assistance to policymakers, legislators, legislative drafters and criminal justice practitioners, as well as collecting and disseminating knowledge on organized crime;

(b) Support the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, including the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto, by assisting States Parties in participating successfully in the review process, both as States Parties under review and reviewing States Parties;

(c) Provide technical assistance to Member States in preventing and countering transnational organized crime, including in its evolving and emerging forms, ranging from trafficking in persons, smuggling of migrants and trafficking in firearms to other forms of organized crime and trafficking, such as trafficking in cultural property and falsified medical products, organized fraud, crimes that affect the environment, the use of information and communications technologies for criminal purposes and money laundering related to such crimes;

(d) Promote international cooperation on transnational organized crime, by building the capacities of central authorities and other criminal justice actors in international cooperation in criminal matters and acting as a facilitator of mutual legal assistance requests through its support to international judicial cooperation networks and to individual Member States, particularly in trafficking cases as well as through global, regional and interregional initiatives;

(e) Provide support to Member States to strengthen border management, interdict contraband and develop post-seizure criminal justice cooperation along drug and other trafficking routes aimed at disrupting the organized crime groups behind them, involving, as appropriate, relevant international organizations, civil society, the private sector and other actors and actively promote the use of special investigative techniques against drug trafficking and in organized crime investigations.

16.17 The above-mentioned work is expected to result in:

(a) Active and effective participation of States Parties to the United Nations Convention against Transnational Organized Crime in the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto and strengthened legislative, strategic and institutional frameworks to prevent and counter organized crime;

(b) Increased international cooperation and strengthened institutional and legislative capacity of Member States to detect, prevent, investigate and prosecute transnational organized crime and new and emerging crimes;

(c) Reduced trafficking in persons and smuggling of migrants, and trafficking in drugs, firearms and other contraband, through the dismantling of greater numbers of organized criminal groups.

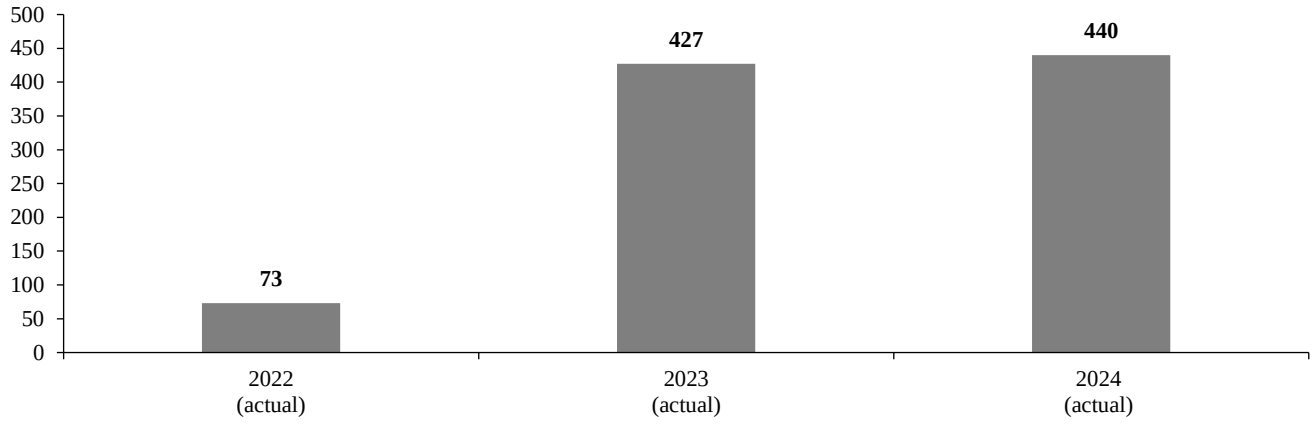
Programme performance in 2024

African Member States are better equipped to investigate emerging money-laundering threats

16.18 In Africa, precious metals and stones and virtual assets are increasingly exploited to facilitate illicit financial flows. Precious metals and stones are often illegally mined and smuggled or misrepresented in trade transactions to obscure the origins of illegally gained funds. A form of trade-based money laundering, this manipulation enables criminals to launder money through legitimate trade channels by under-invoicing or falsifying trade records. Limited capacity to investigate such complex cases compounds the problem and allows these practices to thrive. At the same time, virtual assets, which offer anonymity and swift cross-border transfers, are used in conjunction with trade-based money laundering schemes, enabling criminals to further hide and move illicit profits across borders undetected. In combination, these methods amplify the challenge of curbing financial crime in Africa. The subprogramme developed tailored capacity-building programmes that benefit policymakers as well as officers of financial intelligence units and law enforcement and customs agencies, prosecutors and regulators to strengthen their capacities to regulate, understand, detect, investigate and prosecute these methods of money-laundering.

16.19 Progress towards the objective is presented in the performance measure below (see figure 16.I).

Figure 16.I
Performance measure: number of African anti-money-laundering/countering the financing of terrorism officers better equipped to address money-laundering investigations (annual)



Planned results for 2026

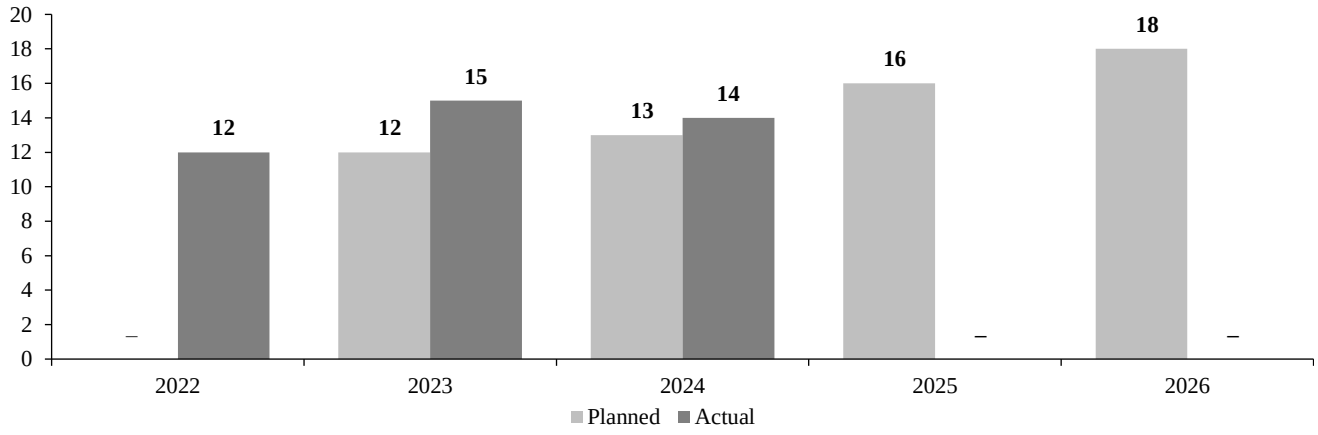
Result 1: increased cooperation between countries along human trafficking and migrant smuggling routes, especially countries of origin and transit countries, including through South-South cooperation

Programme performance in 2024 and target for 2026

16.20 The subprogramme's work contributed to 14 South-South cooperation instances between countries along human trafficking and migrant smuggling routes, which exceeded the planned target of 13 instances.

16.21 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.II).

Figure 16.II
Performance measure: legal and operational cooperation instances among two or more beneficiary countries (annual)



Result 2: improved registration and traceability of firearms, parts, components and ammunition

Programme performance in 2024 and target for 2026

16.22 The subprogramme's work contributed to the initial customization of the UNODC firearms registry software goIFAR in Honduras and Senegal, which did not meet the planned target of those two countries adopting goIFAR and two additional countries developing actions plans to customize goIFAR. The target was not met due to delays in the recruitment of staff with the required information technology-related experience. In an effort to remedy this situation, the subprogramme recruited an information technology consultant.

16.23 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16.2).

Table 16.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
The beta version of goIFAR underwent internal and external review	Honduras and Senegal developed action plans to customize goIFAR	Customization of goIFAR in Honduras and Senegal is proceeding but has not been finalized	Two additional countries adopt goIFAR	Those two countries develop action plans to customize goIFAR

Result 3: enhanced detection of trafficking by air, sea and land

Proposed programme plan for 2026

16.24 Organized criminal groups are exploiting instability and gaps in the rule of law to expand their trafficking operations. For example, despite the ban imposed in April 2022, the trafficking of drugs originating from Afghanistan continues. Furthermore, cocaine production has reached record highs, while synthetic drugs have shorter production times and no fixed geography, and their illegal manufacture has expanded to low- and middle-income countries, including countries with a strong rule of law. The trafficking of other goods, including wildlife, timber, hazardous waste, precious minerals and firearms also remains a major concern. The subprogramme strengthens passenger and

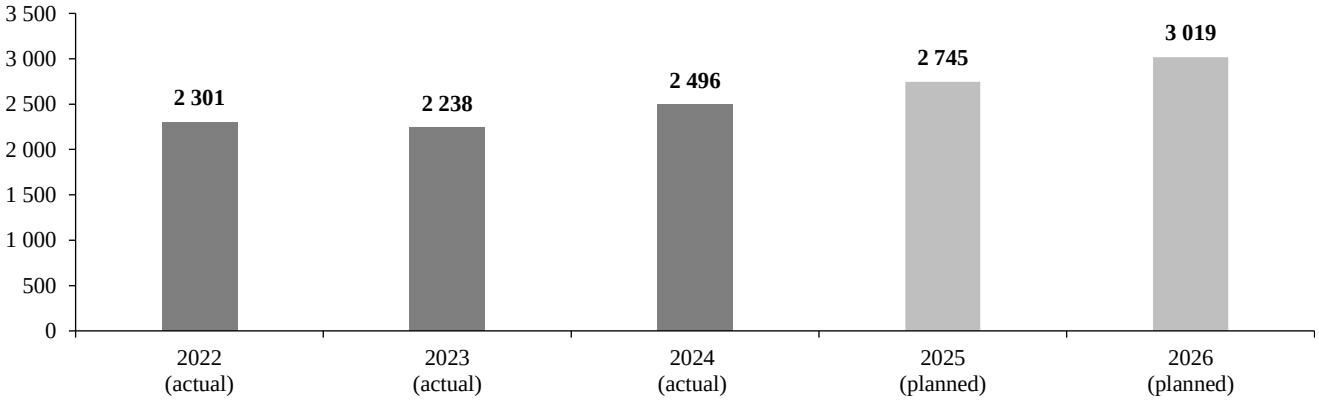
supply-chain security to prevent the trafficking of illicit goods through comprehensive and cohesive border management approaches.

Lessons learned and planned change

16.25 The lesson for the subprogramme was that the alignment of complementary mandates of multiple agencies and increased information-sharing among them at the international level can effectively counter the trafficking of illicit goods. In applying the lesson, the subprogramme will promote an inter-agency approach within UNODC-supported national units and further enhance international cooperation among participating units through the sharing of best practices, the exchange of information, networking and joint actions.

16.26 Expected progress towards the objective is presented in the performance measure below (see figure 16.III).

Figure 16.III
Performance measure: number of seizures in cargo, postal mail and from passengers, as reported by UNODC-supported national units (annual)



Deliverables

16.27 Table 16.3 lists all deliverables of the subprogramme.

Table 16.3
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**42**	**46**	**32**	**58**
1. Documents of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime and the Protocols thereto and its working groups	32	34	32	32
2. Documents of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	10	12	–	26
Substantive services for meetings (number of three-hour meetings)	**46**	**70**	**26**	**56**
3. Meetings of the Conference of the Parties, including its working groups	26	30	26	26
4. Meetings of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	20	40	–	30

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**11**	**11**	**11**	**10**
5. To prevent and combat transnational organized crime	2	2	2	2
6. To prevent and combat trafficking in illicit goods and strengthen border management	5	5	5	4
7. To prevent and combat trafficking in firearms and related crimes	1	1	1	1
8. To prevent and combat trafficking in persons and the smuggling of migrants	1	1	1	1
9. To prevent and combat the use of information and communications technologies for criminal purposes and money-laundering	2	2	2	2
Publications (number of publications)	**5**	**14**	**10**	**10**
10. On organized crime and illicit trafficking	5	14	10	10
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on accession to the United Nations Convention against Transnational Organized Crime and the Protocols thereto for 10 remaining non-Parties to those instruments; advisory services on legislative implementation of the instruments for 20 States Parties; advocacy on the implementation of the instruments for all 192 Parties; advisory services for five Member States in relation to the three drug control conventions; and contribution to the advice provided to the International Narcotics Control Board, upon request.				
Databases and substantive digital materials: Sharing Electronic Resources and Laws on Crime (SHERLOC) platform, containing over 13,600 annotated legislative excerpts, 257 strategies and more than 3,370 case summaries covering 15 crime types.				

Subprogramme 2
A comprehensive and balanced approach to counter the world drug problem

Objective

16.28 The objective, to which this subprogramme contributes, is to ensure comprehensive and balanced responses to the world drug problem through integrated demand reduction and related measures, supply reduction and related measures, and enhanced international cooperation.

Strategy

16.29 The strategy and results contributing to achievement of the objective are complemented by the strategies and results under subprogramme 1, Countering transnational organized crime, and subprogramme 6, Research, trend analysis and forensics, especially in relation to law enforcement and laboratory and scientific services.

16.30 To contribute to the objective, the subprogramme will:

(a) Promote comprehensive and balanced approaches to countering the world drug problem in full conformity with the purposes and principles of the Charter of the United Nations, the three international drug control conventions and in line with scientific evidence and assist Member States, upon request, in:

(i) Implementing the three international drug control conventions and all the international drug policy commitments to address and counter the world drug problem;

(ii) Establishing and/or expanding drug use prevention approaches and services, as well as drug dependence treatment, care and rehabilitation services and systems for people with drug use disorders;

(iii) Establishing and/or expanding HIV/AIDS prevention, treatment and care and support services for people who use drugs, including people in prison and other custodial settings;

(iv) Establishing and/or expanding access to and availability of controlled substances for medical and scientific use;

(b) Support Member States' progress in each of the above-mentioned areas through advocacy, technical assistance, capacity-building, the provision of standards and operational guidelines based on science and evidence, and the development and dissemination of manuals, toolkits, reports and issue papers based on science and evidence;

(c) Assist Member States, upon request, by promoting sustainable livelihoods to reduce the illicit cultivation of drug crops through alternative development, including preventive alternative development;

(d) In coordination with subprogramme 1, promote the exchange of criminal intelligence and encourage multilateral operations targeting transnational criminal organizations involved in drug trafficking and provide enhanced technical assistance in accordance with the principle of shared responsibility;

(e) Build the capacity of national counterparts, at the request of Member States, to detect, interdict, investigate and prosecute drug-related offences, including the illicit cultivation, production, manufacturing and trafficking of narcotic drugs and psychotropic substances;

(f) Facilitate the exchange of best practices and training curricula, methodologies and materials through the network of law enforcement training institutions, in coordination with subprogramme 1, helping Member States to make progress towards the achievement of Sustainable Development Goals 3, 4, 5, 10 and 16.

16.31 The above-mentioned work is expected to result in:

(a) Increased access to quality healthcare services that include scientific evidence-based interventions in the areas of drug abuse prevention, drug dependence treatment, HIV/AIDS prevention, treatment and care, and access to controlled substances, for medical and scientific use;

(b) Increased resilience, quality of life and diversified, licit, sustainable income for families in rural areas affected by or at risk of illicit cultivation, production of and trafficking in narcotic drugs and psychotropic substances;

(c) Reduced illicit supply of drugs through joint and coordinated work by law enforcement authorities to strengthen maritime, air and land border control, and to track and dismantle networks engaging in drug production, trafficking and distribution both online and offline.

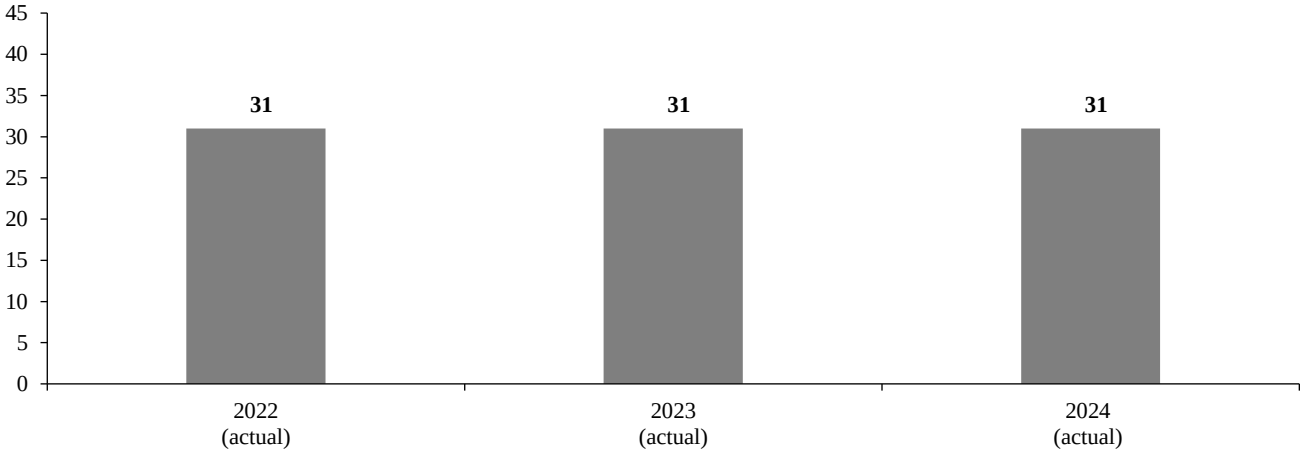
Programme performance in 2024

Health and development interventions implemented by Member States in Latin America and the Caribbean in the context of addressing the world drug problem in line with international standards and guidance

16.32 South and Central America and the Caribbean report the highest proportion of people in drug treatment due to cocaine use, with 50 per cent of those treated in South America being young people (18 to 24 years old). The manufacture of pure cocaine in South America reached a record high of 2,757 tons in 2022. The subprogramme worked with Member States in the region to strengthen their responses to drug production, prevention and treatment and HIV prevention in line with evidence-based international standards and guidelines. In particular, the subprogramme prevented drug use in schools and families, promoting healthy and safe child development; ensured the quality of drug treatment services for all, including Indigenous populations; strengthened HIV responses in prison settings and for women in vulnerable situations; and, worked with farmer groups, community organizations and the private sector to promote high-yield, marketable crops, supporting transitions from illicit to licit economies while ensuring environmental sustainability.

16.33 Progress towards the objective is presented in the performance measure below (see figure 16.IV).

Figure 16.IV
Performance measure: number of strengthened interventions on health and development in the context of addressing the world drug problem by Member States in Latin America and the Caribbean in line with international standards and guidelines (annual)



Planned results for 2026

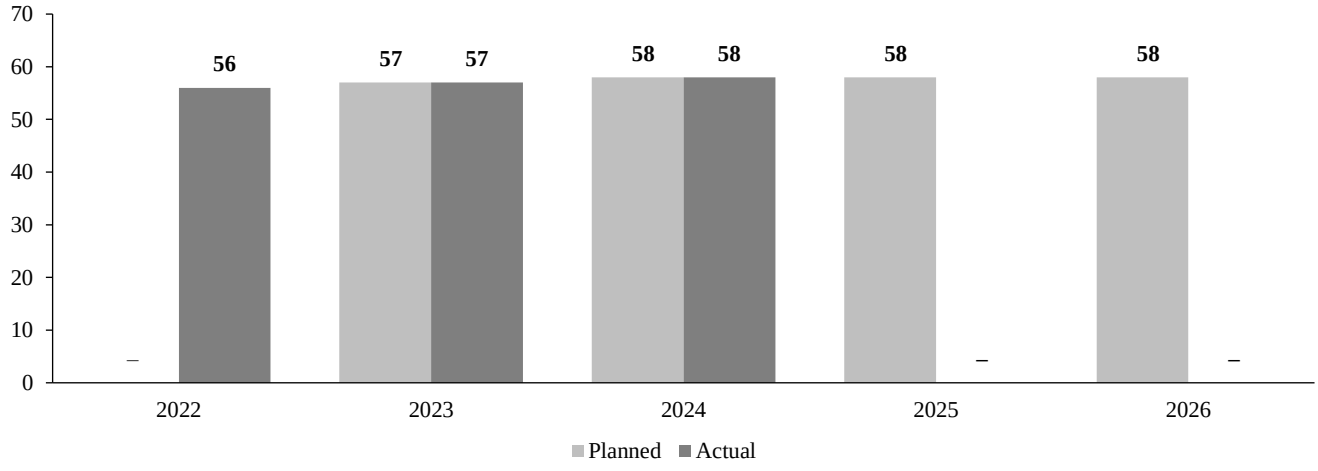
Result 1: Member States in South-East Asia implement stronger health and development interventions in the context of addressing the world drug problem

Programme performance in 2024 and target for 2026

16.34 The subprogramme's work contributed to the implementation of 58 strengthened health and development interventions by Member States in South-East Asia, including drug and HIV prevention and treatment, alternative development, and access to controlled medicines for pain management while preventing diversion and non-medical use, which met the planned target.

16.35 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.V).

Figure 16.V
Performance measure: number of strengthened interventions on drugs and HIV/AIDS prevention, treatment, care and rehabilitation by Member States in South-East Asia (annual)



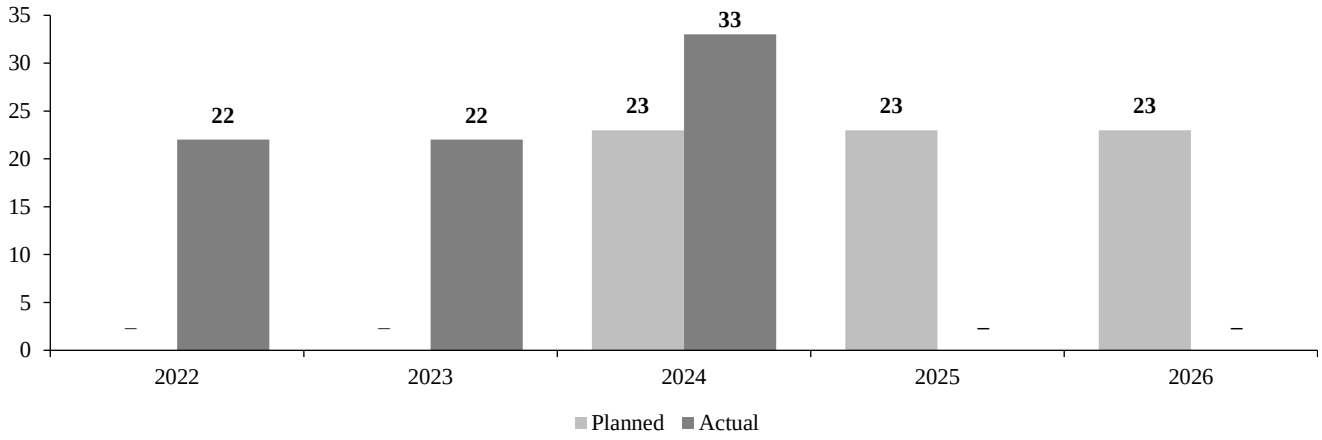
Result 2: Member States in sub-Saharan Africa implement stronger health and development interventions in the context of addressing the world drug problem

Programme performance in 2024 and target for 2026

16.36 The subprogramme's work contributed to the implementation of 33 health and development interventions in sub-Saharan Africa, including drug and HIV prevention and treatment, alternative development in urban settings, and access to controlled medicines while preventing diversion and non-medical use, which exceeded the planned target of 23.

16.37 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.VI).

Figure 16.VI
Performance measure: number of health and development responses of Member States in sub-Saharan Africa that take into account international standards (annual)



Result 3: global gaps in service provision filled through new health and development initiatives implemented at the national level

Proposed programme plan for 2026

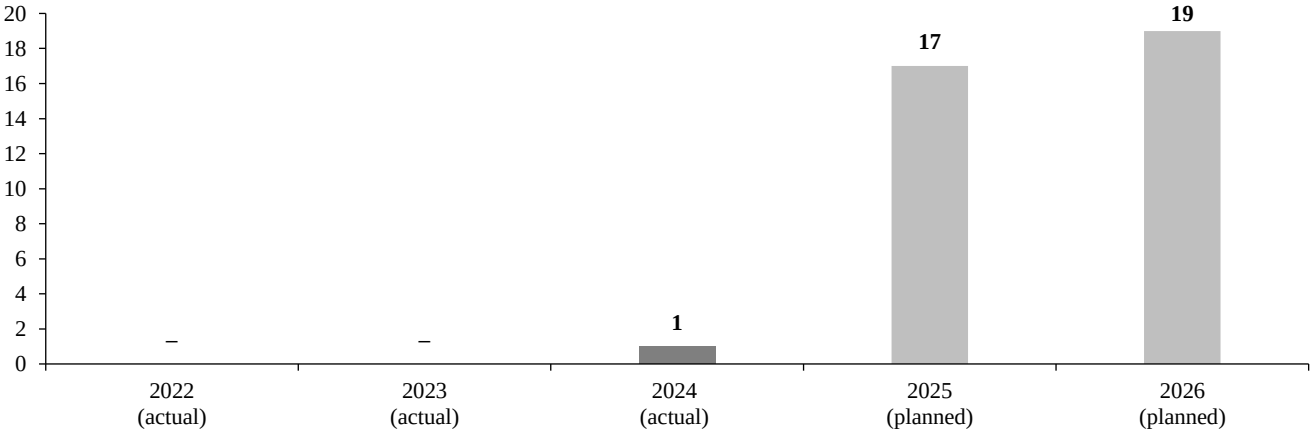
16.38 In 2024, the subprogramme launched new initiatives, including Children Amplified Prevention Services (CHAMPS), to strengthen drug prevention for children; #ScaleUp, to develop scalable treatments for stimulant use disorders; a programme to increase access to controlled medicines while preventing misuse; STRIVE, to address gender-based violence among people who use drugs and people in prison; IMPACT, to ensure the involvement of law enforcement in a human rights- and evidence-based HIV response; and expanding alternative development to urban areas and along drug trafficking routes, and addressing other illicit economies.

Lessons learned and planned change

16.39 The lesson for the subprogramme was that, when supporting Member States in strengthening their health and development responses to the world drug problem, it was better to address the persistent gaps through evidence-based action (e.g. by scaling up proven solutions for stimulant use disorders) or through a change in implementation strategy (e.g. by implementing an integrated drug prevention system rather than separate programmes). In applying the lesson, the subprogramme will work to address these gaps through these newly launched initiatives.

16.40 Expected progress towards the objective is presented in the performance measure below (see figure 16.VII).

Figure 16.VII
Performance measure: number of new initiatives implemented by Member States that address gaps in drug and health service provision (annual)



Deliverables

16.41 Table 16.4 lists all deliverables of the subprogramme.

Table 16.4
Subprogramme 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**10**	**5**	**5**	**5**
1. Reports to the Commission on Narcotic Drugs on progress made by Member States in fulfilling the commitments in the 2009 Political Declaration and Plan of Action, and resolutions pertaining to drug demand reduction and related matters, HIV/AIDS, drug supply reduction and related matters and alternative development	3	3	3	3
2. Reports to the Commission on Narcotic Drugs on regional drug trafficking trends	5	–	–	–
3. Note to the Commission on Narcotic Drugs on coordination and alignment between the Commission and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS	2	2	2	2
Substantive services for meetings (number of three-hour meetings)	**42**	**36**	**39**	**36**
Meetings of:				
4. The Commission on Narcotic Drugs on issues related to drug demand reduction and related matters, HIV/AIDS, drug supply reduction and related matters and alternative development	21	21	21	21
5. The subsidiary bodies of the Commission on Narcotic Drugs (Heads of National Drug Law Enforcement Agencies and the Subcommission on Illicit Drug Traffic and Related Matters in the Near and Middle East)	15	9	12	9
6. The Commission on Crime Prevention and Criminal Justice on issues related to drug demand reduction, HIV/AIDS prevention, treatment and care, and sustainable livelihoods	1	1	1	1
7. Expert groups on drug demand reduction, HIV/AIDS and alternative development	5	5	5	5
B. Generation and transfer of knowledge				
Field and technical cooperation projects[a] (number of projects)	**11**	**3**	**3**	**3**
8. On drug use prevention, treatment, care and rehabilitation, and availability of and access to controlled substances for medical purposes	5	1	1	1

9. On HIV/AIDS prevention, treatment and care	5	1	1	1
10. On alternative development and sustainable livelihoods	1	1	1	1
Seminars, workshops and training events (number of days)	**24**	**24**	**24**	**24**
11. Training courses on drug control conventions and drug supply reduction	15	15	15	15
12. Training on drug demand reduction, HIV/AIDS and alternative development	9	9	9	9
Publications (number of publications)	**3**	**3**	**3**	**3**
13. On drug use prevention and treatment, and access to controlled substances	2	2	2	2
14. On HIV/AIDS prevention, treatment and care	1	1	1	1
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on law enforcement and the implementation of the drug control conventions; substantive and technical advice on evidence-based drug prevention, treatment and care; HIV/AIDS prevention, treatment and care; access to controlled substances for medical and scientific use; and alternative development and sustainable livelihoods.				
D. Communication deliverables				
Outreach programmes, special events and information materials: social media campaigns and events on International Day against Drug Abuse and Illicit Trafficking, World Mental Health Day and World AIDS Day.				

[a] For field and technical cooperation projects on drug supply reduction and publications thereon, please refer to deliverables B.6 and B.10 under table 16.3.

Subprogramme 3
Countering corruption

Objective

16.42 The objective, to which this subprogramme contributes, is to prevent and counter corruption through the effective implementation of the United Nations Convention against Corruption.

Strategy

16.43 To contribute to the objective, the subprogramme will:

(a) Provide policy and legislative advice, build the capacities of relevant actors and facilitate the transfer of expertise in the areas of prevention, international cooperation, asset recovery, criminalization and law enforcement;

(b) Assist Member States, upon request, in strengthening public sector institutions and the role of civil society, parliamentarians, the private sector, academia, youth and the general public in the prevention of corruption, including by providing technical assistance to States in the follow-up to country reviews conducted under the Mechanism for the Review of Implementation of the United Nations Convention against Corruption, as well as other types of technical assistance;

(c) Implement the mandates given by policymaking and treaty bodies, in particular the Conference of the States Parties to the Convention, its subsidiary bodies and other governing organs, and support related intergovernmental processes, including the follow-up to the special session of the General Assembly against corruption held in 2021;

(d) Promote international cooperation regarding the investigation, prosecution and adjudication of corruption and related offences and provide technical assistance on the recovery of stolen assets, including through the Global Operational Network of Anti-Corruption Law Enforcement Authorities (GlobE Network) and the convening of expert group meetings;

(e) Develop and disseminate knowledge products on the implementation of the Convention and assist States, upon request, in producing data and conducting statistical and analytical studies and research into corruption, including in collaboration with academia and other stakeholders, and further emphasize South-South cooperation and encourage the sharing of knowledge and good practices at the national and regional levels.

16.44 The above-mentioned work is expected to result in:

(a) States Parties participating actively and effectively in the Mechanism for the Review of Implementation of the United Nations Convention against Corruption;

(b) States' legal, policy and institutional frameworks addressing corruption risks in line with the Convention;

(c) States being able to systematically and in a timely manner trace, seize, freeze, confiscate and return assets stolen by officials through acts of corruption, within the framework of the Convention;

(d) Anti-corruption practitioners and other stakeholders having and using the capacity to prevent and counter corruption;

(e) Policymakers, practitioners and other stakeholders using evidence-based knowledge and tools on anti-corruption to inform decision-making;

(f) Partners actively supporting and promoting implementation of the Convention in a coordinated effort.

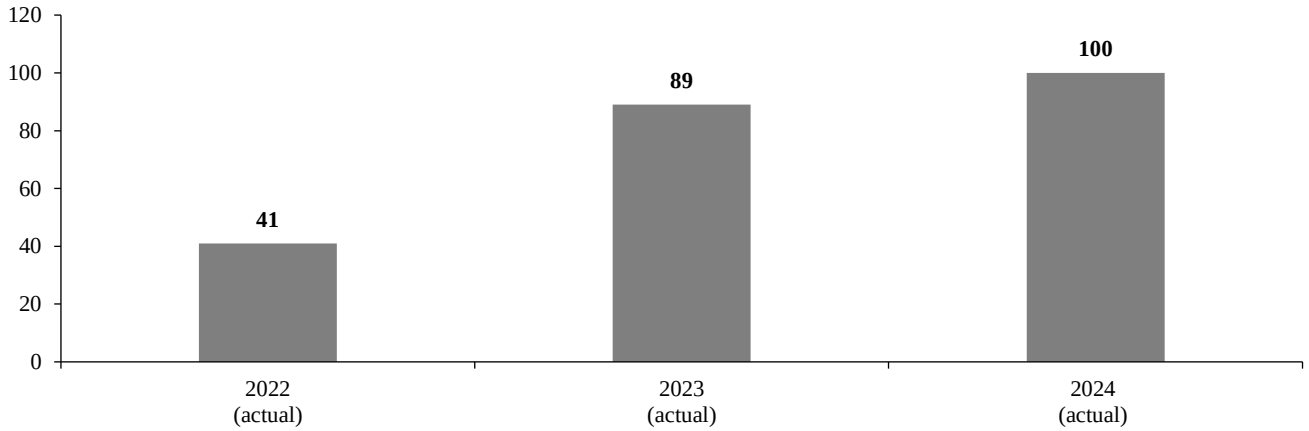
Programme performance in 2024

Corruption in sport effectively tackled by States

16.45 The past two decades have witnessed a substantial increase in corruption and criminal activities in sports. Globalization, a huge influx of money, the rapid growth of legal and illegal sports betting, and technological advances have transformed the way sport is played and consumed. Criminal groups exploit vulnerabilities linked to these changes and the weaknesses of legislative and regulatory frameworks that govern sport. In response, States have recognized the need to tackle corruption in sport in several resolutions adopted by the Conference of the States Parties to the United Nations Convention against Corruption. Since 2018, the subprogramme has supported government and sports officials in implementing these resolutions by conducting awareness-raising activities, building capacities and enhancing cooperation to effectively prevent, detect, investigate and sanction corruption in sport at all levels. In 2024, following the multi-stakeholder conference on safeguarding sport from corruption for officials from sports organizations and criminal justice authorities in South Asia, held in 2023, the subprogramme took follow-up actions such as a workshop for investigators and prosecutors. As a result, Sri Lankan investigators and prosecutors conducted a high-profile investigation into the manipulation of cricket matches, which led to the indictment of criminals.

16.46 Progress towards the objective is presented in the performance measure below (see figure 16.VIII).

Figure 16.VIII
Performance measure: number of countries with improved understanding on how to tackle corruption in sport (annual)



Planned results for 2026

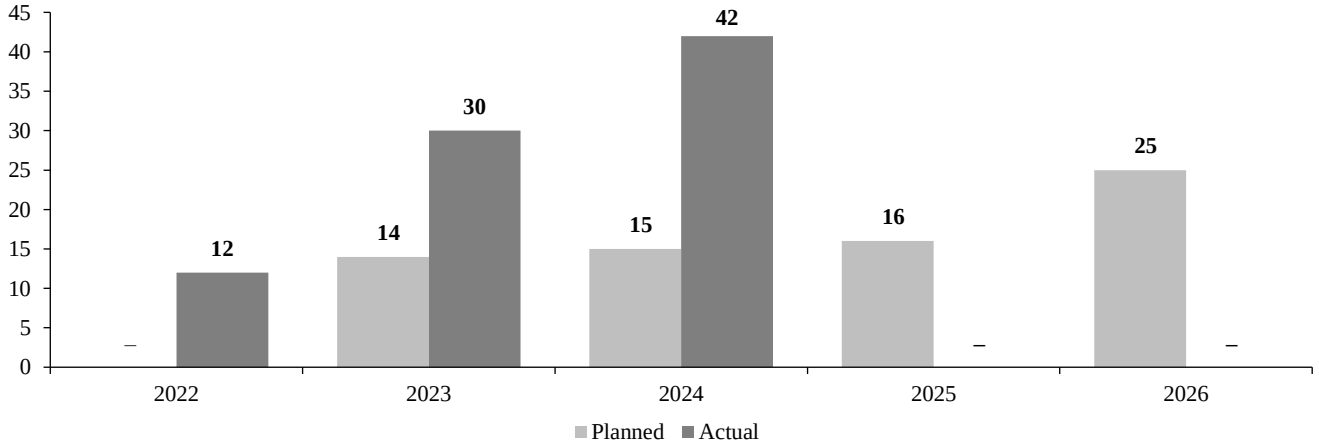
Result 1: national anti-corruption institutions are strengthened

Programme performance in 2024 and target for 2026

16.47 The subprogramme's work contributed to strengthening anti-corruption institutions in 42 countries, which exceeded the planned target of 15 countries.

16.48 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.IX).

Figure 16.IX
Performance measure: number of countries with strengthened anti-corruption institutions (annual)



Result 2: States' use of beneficial ownership information in anti-corruption efforts strengthened

Programme performance in 2024 and target for 2026

16.49 The subprogramme's work contributed to strengthening six States' cooperation, information-sharing and peer-learning on beneficial ownership, which exceeded the planned target of five countries.

16.50 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16.5).

Table 16.5
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Three countries strengthened their national frameworks for disclosing beneficial ownership information	11 countries enhanced their knowledge base on beneficial ownership Second beneficial ownership resolution adopted	Six countries strengthened cooperation, information-sharing and peer-learning on beneficial ownership	Three countries develop policies and practices on beneficial ownership	Three countries strengthen their institutional structure for the collection and use of beneficial ownership information

Result 3: strengthened cooperation among States at the regional level to counter corruption

Proposed programme plan for 2026

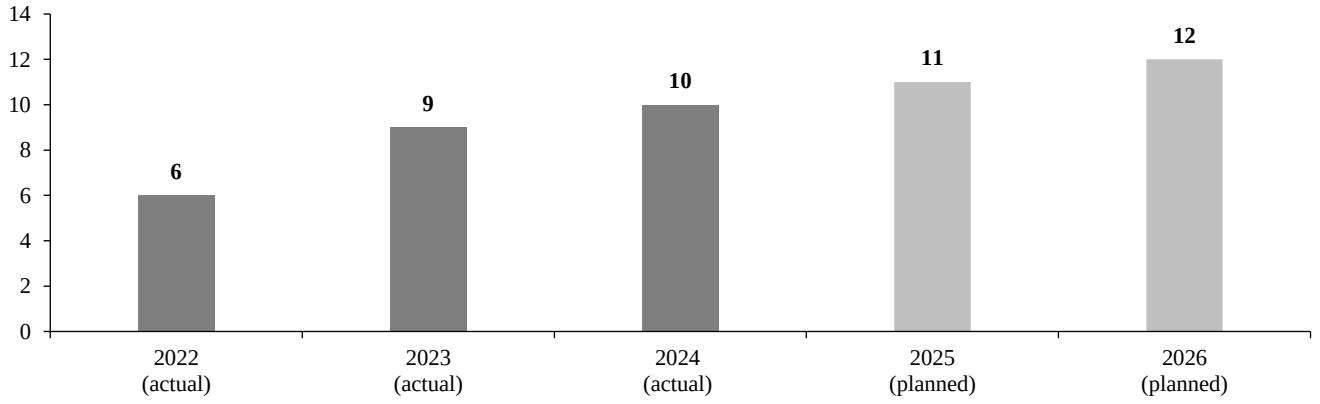
16.51 Regional anti-corruption platforms are groups of countries that come together to identify common challenges and priorities in implementing the United Nations Convention against Corruption and devise strategies and commitments to address these challenges. Through these platforms, the subprogramme creates a mechanism to support countries from the same region in identifying shared corruption-related challenges, adopting a road map of commitments and activities, and facilitating peer-learning.

Lessons learned and planned change

16.52 The lesson for the subprogramme was that corruption cannot be tackled in isolation, hence the need to foster collaboration in tackling common challenges and respond faster to anti-corruption priorities and technical assistance needs at the regional and country levels. In applying the lesson, the subprogramme will assist States in creating and maintaining regional anti-corruption platforms to support them in identifying challenges, priorities and good practices and in adopting a road map to accelerate implementation of the Convention.

16.53 Expected progress towards the objective is presented in the performance measure below (see figure 16.X).

Figure 16.X
Performance measure: number of active regional anti-corruption platforms (cumulative)



Deliverables

16.54 Table 16.6 lists all deliverables of the subprogramme.

Table 16.6
Subprogramme 3: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services throughout the country review process under the Implementation Review Mechanism, in support of the completion and analysis of self-assessment checklist responses, the conduct of country visits and the preparation of country review reports and executive summaries.				
Databases and substantive digital materials: database of laws and jurisprudence, as well as other knowledge relevant to the implementation of the United Nations Convention against Corruption, including on asset recovery; database of competent authorities, asset recovery focal points and central authorities; the online anti-corruption portal known as Tools and Resources for Anti-Corruption Knowledge (TRACK); the GlobE Network portal; electronic tools and training materials on standards, policies, operational procedures and good practices in the implementation of the Convention by States Parties.				

Subprogramme 4
Terrorism prevention

Objective

16.55 The objective, to which this subprogramme contributes, is to strengthen a criminal justice regime against terrorism that is implemented by Member States in line with internationally agreed rule of law and obligations under relevant United Nations conventions and binding resolutions and the United Nations Global Counter-Terrorism Strategy.

Strategy

16.56 To contribute to the objective, the subprogramme will:

(a) Provide normative and capacity-building support to prevent terrorism and violent extremism as and when conducive to terrorism, at the request of Member States, by initiating and supporting the development of cooperation frameworks with Member States at the national, regional and global levels, based on the strategic objectives of Member States and in line with internationally agreed rule of law and obligations under relevant United Nations conventions and binding resolutions;

(b) Implement projects in coordination and through integrated planning with partners, that support Governments with terrorism prevention, in particular the United Nations Global Counter-Terrorism Coordination Compact led by the Office of Counter-Terrorism and its working groups, helping Member States to make progress towards Sustainable Development Goals 5 and 16;

(c) Deliver counter-terrorism technical assistance tools and training activities to requesting Member States, in accordance with its mandate under resolutions of the General Assembly[6] and the Security Council,[7] as well as the United Nations Global Counter-Terrorism Strategy, adopted by the Assembly in 2006 in its resolution 60/288, and the biennial reviews of the Strategy.

16.57 The above-mentioned work is expected to result in:

(a) Ratification by Member States of an increased number of international legal instruments against terrorism, and enactment and revision of domestic counter-terrorism legislation;

(b) Development by Member States of strategies, policies and action plans for preventing and combating terrorism;

(c) Effective criminal justice investigation, prosecution and adjudication of terrorism offences in line with the relevant international legal instruments and norms, relevant obligations of Member States in accordance with international legal instruments on human rights and good practices;

(d) Increased national, regional and international cooperation, especially between criminal justice entities, to prevent and counter terrorism;

(e) Advanced implementation by Member States of the United Nations Global Counter-Terrorism Strategy and relevant United Nations conventions and resolutions, through structural changes in their legal and criminal justice measures and internal functioning that are sustainable over time.

Programme performance in 2024

Member States built resilience to terrorism through strong legal frameworks

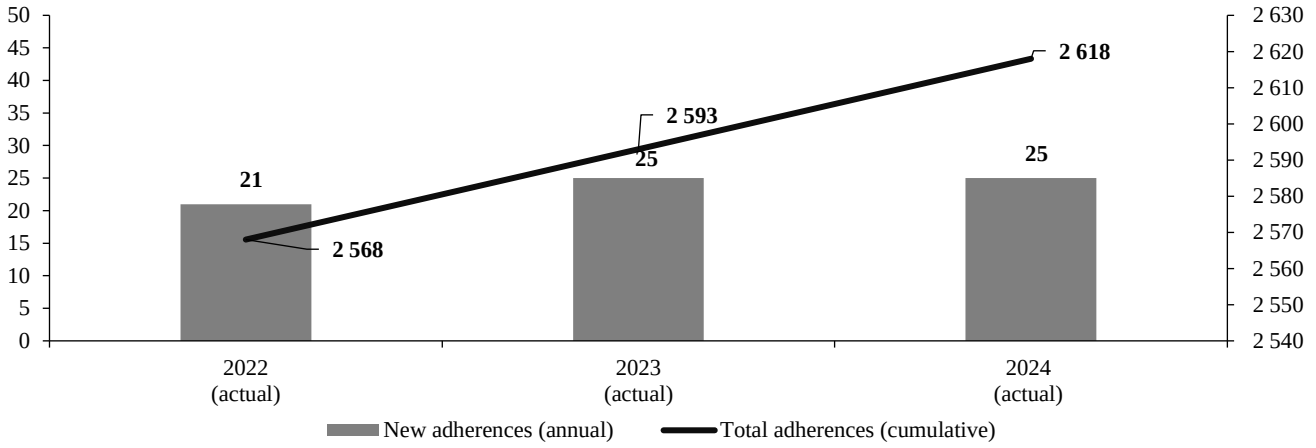
16.58 Member States' adherence to the 19 international legal instruments against terrorism is critical to effectively preventing and countering terrorism. Becoming a Party to these instruments strengthens international cooperation and reinforces the rule of law in the fight against terrorism. The subprogramme promoted the international legal framework against terrorism to Member States through initiatives that highlighted the benefits of adhering to these instruments and through the provision of legislative services, including the revision of counter-terrorism legislation. In 2024, 25 adherences to the international legal instruments against terrorism were recorded by Member States, making them more equipped to prevent and counter terrorism.

16.59 Progress towards the objective is presented in the performance measure below (see figure 16.XI).

[6] See General Assembly resolutions 72/194, 72/284 and 74/175.

[7] See Security Council resolution 2482 (2019) and previous related Council resolutions.

Figure 16.XI
Performance measure: number of adherences by Member States to the international legal framework against terrorism



Planned results for 2026

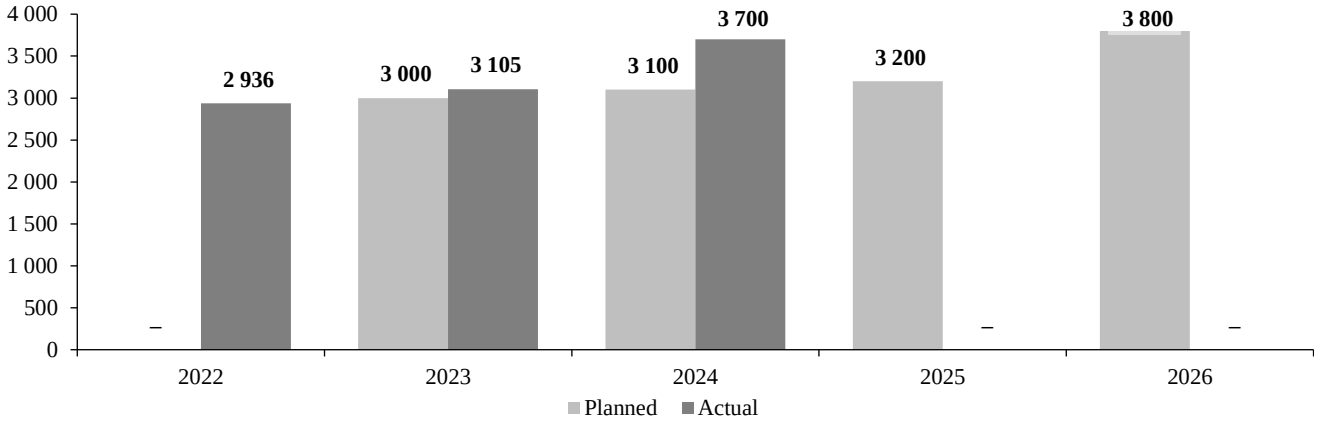
Result 1: increased institutional capacity of Member States to prevent and counter terrorism

Programme performance in 2024 and target for 2026

16.60 The subprogramme's work contributed to building Member States' counter-terrorism normative frameworks and policies and enhancing the skills and knowledge of 3,700 criminal justice officials to prevent and counter terrorism, which exceeded the planned target of 3,100 officials.

16.61 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XII).

Figure 16.XII
Performance measure: criminal justice officials developing the skills and knowledge to prevent and counter terrorism (annual)



Result 2: institutional change in Southern Africa to build strong and accountable criminal justice systems and counter terrorism

Programme performance in 2024 and target for 2026

16.62 The subprogramme's work contributed to the establishment of the Central Cabinet against Transnational Organized Crime in Mozambique, which includes a counter-terrorism unit, which met the planned target.

16.63 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16.7).

Table 16.7
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Mozambique established the Central Cabinet against Transnational Organized Crime and a specialized team on counter-terrorism investigations within the National Criminal Investigation Service	Mozambique developed a framework for training and mentoring with the Mozambique Legal and Judicial Training Centre	Mozambique strengthened coordination mechanisms within the Central Cabinet against Transnational Organized Crime and harmonized procedures to ensure a more unified and effective response to terrorism across all districts in Cabo Delgado and Maputo	One country promotes and strengthens national policies and legal and institutional counter-terrorism frameworks	One country strengthens its capacity to implement the national counter-terrorism strategy and to operationalize the newly created counter-terrorism centre

Result 3: increased contributions of women officials to the strengthening of criminal justice systems against terrorism

Proposed programme plan for 2026

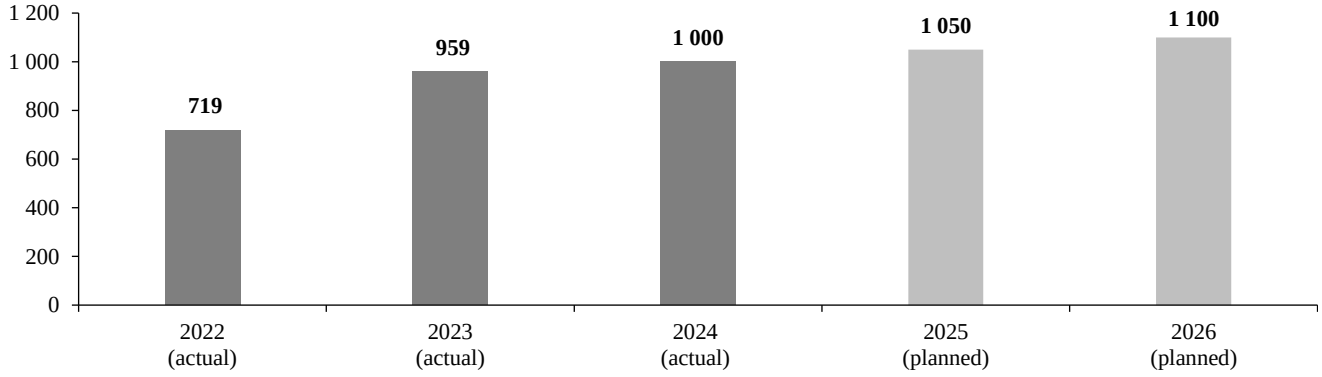
16.64 The international community has increasingly recognized the need to prevent and counter terrorism in a gender-responsive manner, as reiterated in the eighth review of the United Nations Global Counter-Terrorism Strategy. This must consider how men and women are involved with and affected by terrorism in different ways, how gender dimensions can impact engagement with the criminal justice process, and lastly, the important role of women in efforts to address terrorism, both in their communities and as part of government responses. The subprogramme actively promotes the role of women in criminal justice responses to terrorism through its new global programme launched in 2022.

Lessons learned and planned change

16.65 The lesson for the subprogramme was that it should further mainstream gender in its capacity-building programming. In applying the lesson, the subprogramme will continue to incorporate a gender perspective in the design and delivery of its training, engage in targeted outreach to encourage the active involvement of women and further collaborate with women's organizations.

16.66 Expected progress towards the objective is presented in the performance measure below (see figure 16.XIII).

Figure 16.XIII
Performance measure: number of women criminal justice officials developing the skills and knowledge to address terrorism (annual)



Deliverables

16.67 Table 16.8 lists all the deliverables of the subprogramme.

Table 16.8
Subprogramme 4: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

C. Substantive deliverables				
Consultation, advice and advocacy: advisory services on legislative drafting and strategies and plans of action; consultation on the development of technical assistance plans; advisory services on the visits of the Counter-Terrorism Committee; advice to national training institutions; advice and advocacy related to the 19 international legal instruments.				
Databases and substantive digital materials: SHERLOC counter-terrorism tools, including the database of national central authorities for counter-terrorism cases.				
D. Communication deliverables				
Outreach programmes, special events and information materials: information kits in legal, criminal justice and related areas.				
Digital platforms and multimedia content: website and social media accounts; dedicated communication campaigns for international days related to counter-terrorism matters.				

Subprogramme 5
Justice

Objective

16.68 The objective, to which this subprogramme contributes, is to prevent crime and ensure more effective, fair, humane and accountable criminal justice systems as a basis for the rule of law and sustainable development.

Strategy

16.69 To contribute to the objective the subprogramme will:

(a) Promote the application and facilitate the development of United Nations standards and norms in crime prevention and criminal justice through support for criminal justice reform and coordination with all relevant sectors in national criminal justice systems and all crime prevention and criminal justice reform actors;

(b) Provide assistance, upon request, to Member States' crime prevention and criminal justice actors by supporting Member States with institution-building and providing capacity-building and technical advice in cooperation with other sectors, including education, health and social services, in the areas of: community and knowledge-based crime prevention to address risk factors and root causes of offending and reoffending; access to justice, including through policing with full respect for human rights, access to legal aid, alternatives to imprisonment and restorative justice; preparation, response and recovery from crisis; violence against women; violence against children; as well as penal and prison reform, including related to treatment of violent extremist[8] prisoners, radicalization and social reintegration upon release;

(c) Develop and disseminate practical tools, such as guidance notes, handbooks, training curricula and model legislation, and support crime prevention and criminal justice actors in applying these tools, and share studies, good practices and online resources;

(d) Incorporate cross-cutting issues related to: developments in the delivery of justice through the use of new technology; victims and witnesses; mainstreaming a gender perspective into crime prevention and criminal justice policies and programmes; and children in the criminal justice system.

16.70 In doing so, the subprogramme will help Member States to make progress towards achievement of the Sustainable Development Goals, in particular, Goals 5, 11 and 16.

16.71 The above-mentioned work is expected to result in:

(a) Improved frequency and quality in application of alternatives to imprisonment in appropriate cases, effective and efficient prison management and humane treatment of prisoners and enhanced capacity of and coordination between justice actors to address excessive and arbitrary police and pretrial detention;

(b) Improved prosecution and adjudication of cases of violence against women and girls and improved prevention of and responses to violence against children;

(c) Increased equal access to justice for people in vulnerable situations and increased public trust in the justice system, including through nationwide legal aid services that are accessible to all and are tailored to the rights and needs of the population;

(d) Enhanced support for social reintegration of prisoners and prevention of recidivism;

(e) Prevention of victimization and creation of safer communities;

[8] The terms "violent extremist" and "violent extremism" refer to violent extremism as and when conducive to terrorism (see General Assembly resolution 77/237).

(f) Empowerment of women and girls within crime prevention and criminal justice programmes and systems;

(g) Continued functioning of criminal justice systems during health and other crises and reduced risk of violations of the rights of those affected disproportionately, in particular detainees, prisoners and victims of crime.

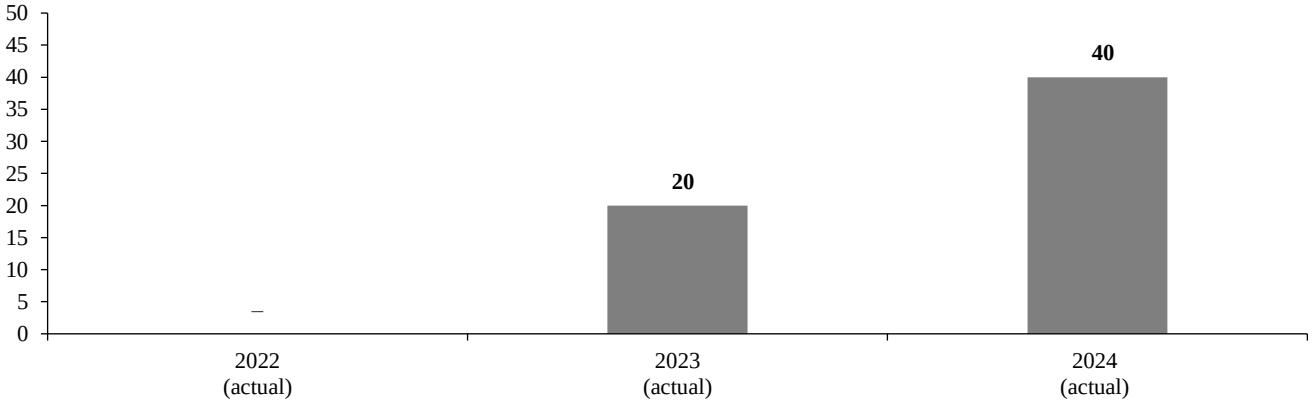
Programme performance in 2024

Enhanced multi-stakeholder engagement in preventing and responding to femicide through femicide review committees

16.72 Efforts to end violence against women and girls continue to face challenges, with the highest number of female homicides recorded in 2022 for the past 20 years. In-depth femicide reviews offer an opportunity to identify limitations of existing responses to gender-based violence against women, as well as opportunities for cross-sector collaboration aimed at ending all forms of violence against women and girls. The subprogramme convened a global expert group meeting in 2023 and regional consultations in South Africa in 2024 on femicide review committees. The meetings, informed by the UNODC background paper on femicide review committees, gathered justice, health and social sector professionals, along with activists from civil society organizations supporting families affected by femicide, to exchange experiences and explore opportunities to establish femicide review committees in their countries. Partnering with the Committee on the Elimination of Discrimination against Women, the Special Rapporteur on violence against women and girls, its causes and consequences, WHO and the United Nations Population Fund further bolstered global action against femicide by pooling resources and maximizing the outreach.

16.73 Progress towards the objective is presented in the performance measure below (see figure 16.XIV).

Figure 16.XIV
Performance measure: number of stakeholders engaged in evidence-building, knowledge exchange and preparatory work towards the establishment of femicide review committees (cumulative)



Planned results for 2026

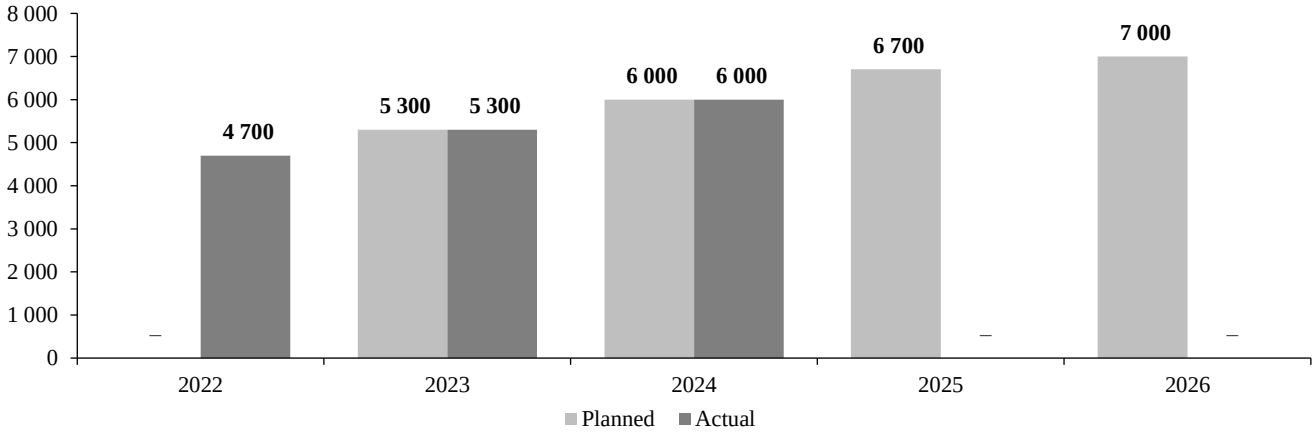
Result 1: criminal justice institutions are effective and accessible

Programme performance in 2024 and target for 2026

16.74 The subprogramme's work contributed to ensuring the operation of fair, effective, representative, transparent and accountable criminal justice institutions while promoting equal access to justice for all, with a specific focus on people in vulnerable situations, by strengthening the capacity of 6,000 criminal justice actors to provide more people-centred justice services, which met the planned target.

16.75 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XV).

Figure 16.XV
Performance measure: criminal justice actors with strengthened capacities to provide more people-centred justice services (cumulative)



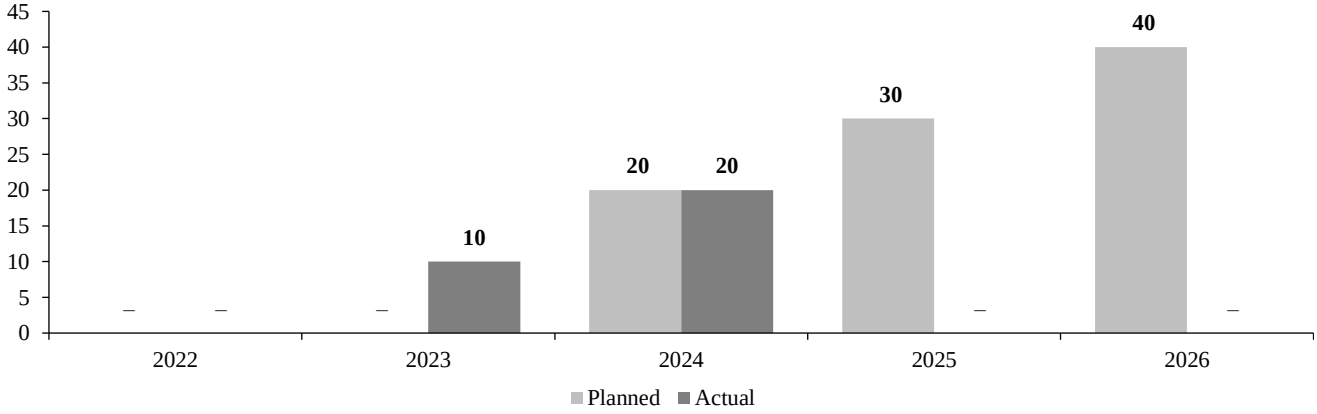
Result 2: crime prevention and criminal justice reform efforts with full respect for human rights

Programme performance in 2024 and target for 2026

16.76 The subprogramme's work contributed to 20 Member States integrating human rights in crime prevention and criminal justice reform with the aim of creating just and equitable societies, in which all individuals are treated with dignity and respect, which met the planned target.

16.77 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XVI).

Figure 16.XVI
Performance measure: number of Member States undertaking crime prevention and criminal justice reform efforts with full respect for human rights (cumulative)



Result 3: children and youth empowered to prevent child involvement in crime and violence

Proposed programme plan for 2026

16.78 Over 1 billion children between the ages of 2 and 17 are subjected to crime and violence from organized crime and terrorist groups. Between 2022 and 2024, the subprogramme supported Member

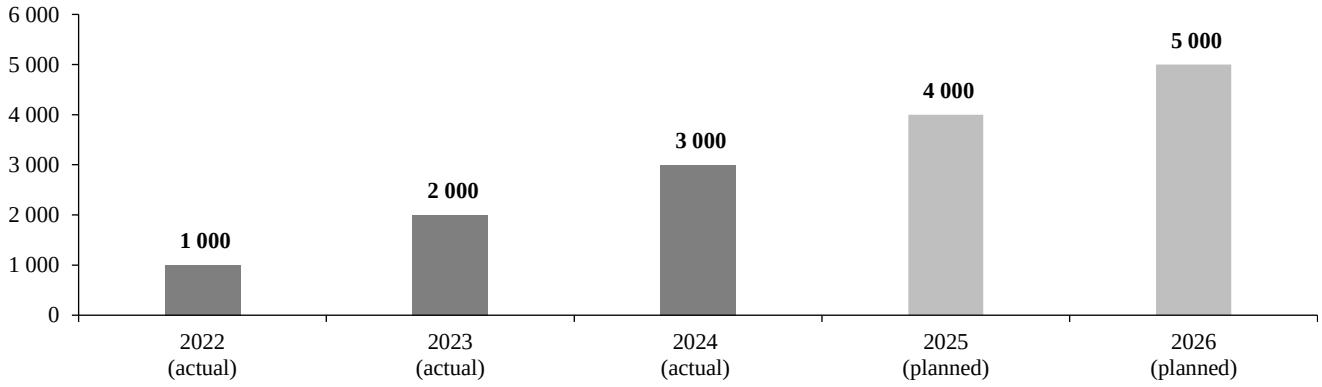
States in preventing and responding to violence against children, which benefited 3,000 children through prevention, rehabilitation and reintegration. Moreover, the subprogramme introduced innovative educational materials, such as the manual on child-sensitive psychosocial assessment and the research study on child recruitment and exploitation by terrorist groups in Indonesia, Iraq and Nigeria. The materials were designed to foster resilience and critical thinking among children, and sensitized training professionals on preventing the recruitment and exploitation of children by terrorist groups. To expand these efforts, the subprogramme empowered Youth Peace Champions with skills to engage with local communities, facilitate intergenerational dialogue and contribute to fostering safer environments for children.

Lessons learned and planned change

16.79 The lesson for the subprogramme was that strengthening the role of beneficiaries as active agents of change enhances programmatic sustainability and impact. In applying the lesson, the subprogramme will further expand beneficiary-led programming while maintaining its integrated approach to addressing justice-related challenges.

16.80 Expected progress towards the objective is presented in the performance measure below (see figure 16.XVII).

Figure 16.XVII
Performance measure: number of children and youth engaged in actions to prevent child involvement in crime and violence (cumulative)



Deliverables

16.81 Table 16.9 below lists all deliverables of the subprogramme.

Table 16.9
Subprogramme 5: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**2**	**2**	**1**
1. Reports for the Commission on Crime Prevention and Criminal Justice	1	2	2	1
Substantive services for meetings (number of three-hour meetings)	**1**	**1**	**1**	**1**
2. Meetings of the Commission on Crime Prevention and Criminal Justice	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**4**	**4**	**4**	**2**
3. To support Member States in the field of crime prevention and criminal justice	4	4	4	2

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
Seminars, workshops and training events (number of days)	**80**	**80**	**80**	**80**
4. Training courses, seminars and workshops on crime prevention and criminal justice	80	80	80	80
Publications (number of publications)	**4**	**4**	**4**	**3**
5. Guidance materials (e.g. handbooks, tools, studies)	4	4	4	3
Technical materials (number of materials)	**20**	**20**	**20**	**20**
6. E-learning modules	20	20	20	20

C. Substantive deliverables

Consultation, advice and advocacy: substantive and technical advice on crime prevention and criminal justice to 70 Member States, relevant organizations and agencies, as well as 18 national and regional programmes; advice on best practices in crime prevention and criminal justice reform.

D. Communication deliverables

Outreach programmes, special events and information materials: campaigns to observe Nelson Mandela International Day; promotional materials on UNODC mandate areas in crime prevention and criminal justice.

External and media relations: fundraising initiatives and strategic partnerships with international organizations and civil society organizations.

Subprogramme 6
Research, trend analysis and forensics

Objective

16.82 The objective, to which this subprogramme contributes, is to ensure that Member States have enhanced knowledge of trends on drugs and crime for effective scientific and evidence-based policy formulation and access to and use of quality forensic science data, information and tools in their efforts against drugs, crime and terrorism.

Strategy

16.83 To contribute to the objective, the subprogramme will:

(a) Provide timely, accurate and gender-sensitive statistics and analyses of world drug and crime problems, with particular attention to specific manifestations of crime and its transnational dimensions through the production of global and thematic reports, an online monitoring platform and a data-sharing portal;

(b) Generate high-quality and relevant evidence through strengthened research capacity in the field and technical oversight at headquarters, including in coordination with the regional Centres of Excellence in Mexico and the Republic of Korea;

(c) Support countries through workshops, training, the provision of guidelines and other capacity-building efforts, in the collection of and reporting on data regarding drugs and crime, including as required to monitor progress against certain Sustainable Development Goals and targets, in particular Goals 3, 5, 15 and 16, as they relate to drug use, trafficking, illicit financial flows, justice, corruption, crime and crime-related violence;

(d) Build capacity of national statistical systems and other relevant national institutions, upon request, to produce, disseminate and analyse drug and crime data and statistics, and assist Member States, upon request, in identifying trends, emerging issues and priorities in drugs, crime and corruption;

(e) Provide technical assistance and expert advice to drug-testing laboratories, forensic institutions and Member States on forensics standard setting, early warning systems and the exchange of quality forensic data, services and support for policymaking and decision-making;

(f) Develop and disseminate forensic best practices guidelines and scientific-technical publications on drugs and crime;

(g) Provide scientific support to the three treaty bodies under the international drug conventions, namely the Commission on Narcotic Drugs, the International Narcotics Control Board and WHO.

16.84 The above-mentioned work is expected to result in:

(a) Enhanced knowledge among Member States, the international community and other relevant stakeholders on formulating strategic responses to existing and emerging drugs and crime issues;

(b) Production and analysis of gender-sensitive statistical data on trends by Member States, including trends in specific and emerging drugs and crime issues;

(c) Enhanced scientific and forensic capacity of law enforcement personnel, national drug testing and toxicology laboratories and forensic service providers in line with internationally accepted standards of performance;

(e) Enhanced scientific support to the three treaty bodies under the international drug conventions.

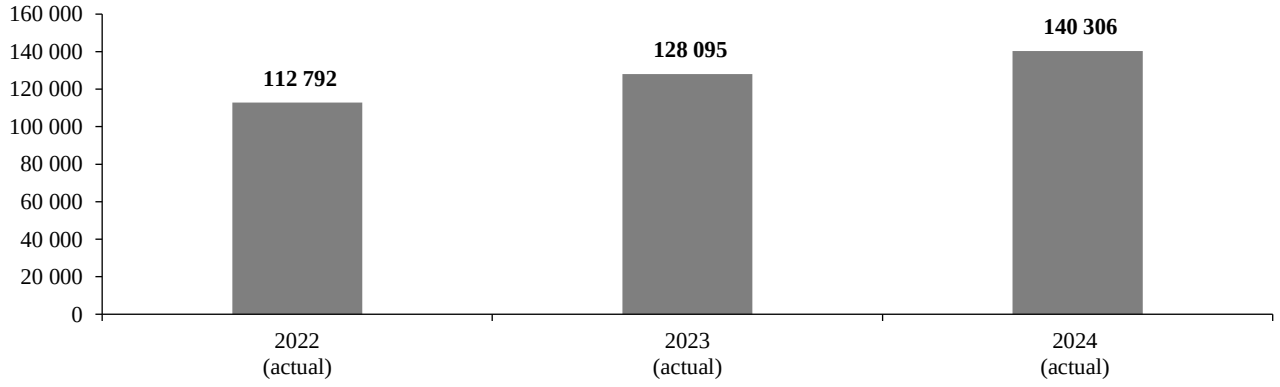
Programme performance in 2024

Enhanced knowledge of Member States to effectively counter wildlife trafficking

16.85 Despite two decades of concerted efforts at both the international and the national levels, wildlife trafficking continues to persist worldwide. Trafficking reduces wildlife populations and can disrupt ecosystems and affect climate resilience. It also threatens socioeconomic benefits that people derive from nature, such as income, food and medicine, and undermines governance by fostering corruption and illicit financial flows. Understanding the scale, geographical scope and trends of wildlife trafficking is key for effective policy formulation and law enforcement responses at the national and international levels. The subprogramme contributed to these efforts by collecting and analysing wildlife seizures data provided by Member States and complemented by other sources, and by providing global and thematic analyses based on these records. As at 2024, UNODC had collated over 140,000 seizure records from 162 countries and territories, dated between 2015 and 2021. On the basis of this data, the subprogramme compiled the 2024 World Wildlife Crime Report, which found signs of progress in reducing trafficking of some iconic species, such as elephants and rhinoceroses. For these species, a combination of preventive efforts on both the demand and supply sides has produced positive outcomes. However, the available evidence did not provide confidence that wildlife trafficking is being substantially reduced overall.

16.86 Progress towards the objective is presented in the performance measure below (see figure 16.XVIII).

Figure 16.XVIII
Performance measure: number of wildlife seizure cases reported by Member States and complemented by other sources (cumulative)



Planned results for 2026

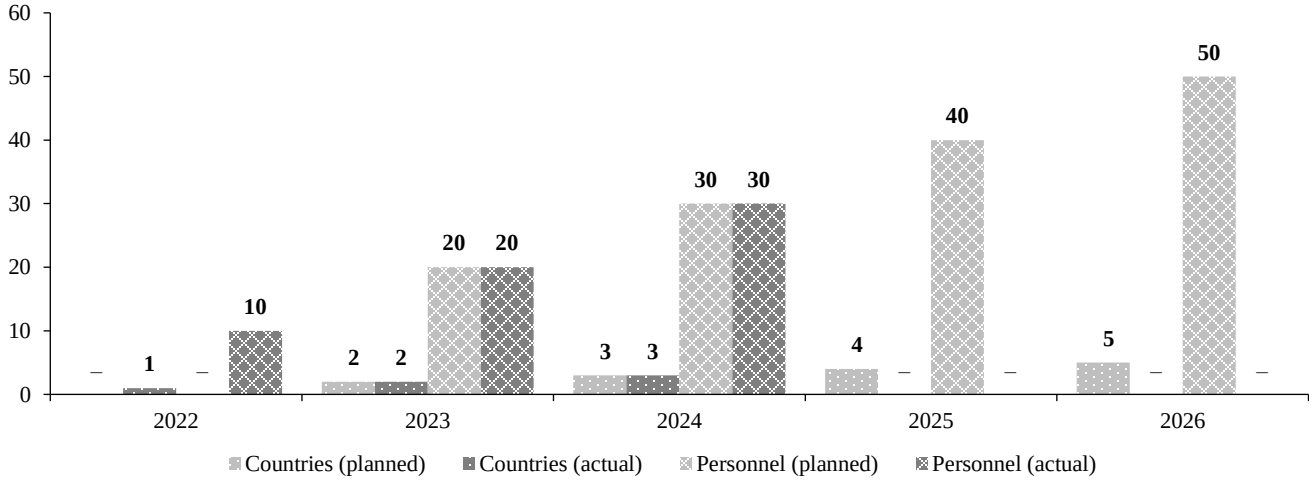
Result 1: safe handling and disposal of drugs and the precursor chemicals used in their illicit manufacture by Member States

Programme performance in 2024 and target for 2026

16.87 The subprogramme's work contributed to three countries with national inter-agency disposal plans and 30 national experts with enhanced knowledge on the disposal of drugs and precursor chemicals in a safe, sustainable and environmentally friendly manner, which met the planned targets.

16.88 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XIX).

Figure 16.XIX
Performance measure: number of countries with national disposal plans and personnel with enhanced knowledge on the disposal of drugs and precursor chemicals (annual)



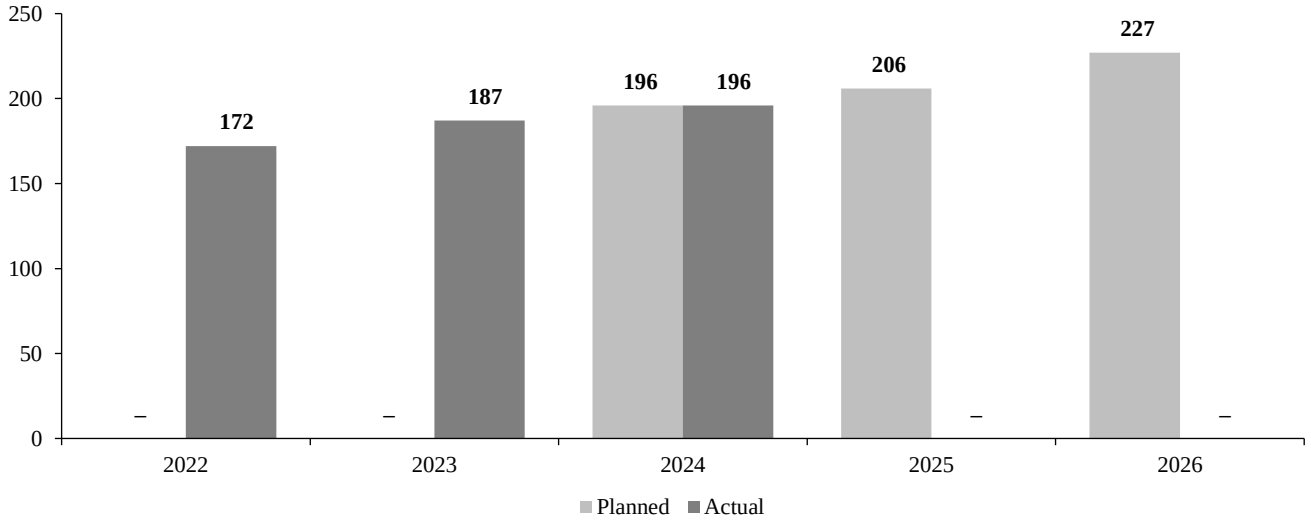
Result 2: Member States drug testing and toxicology laboratories monitor their performance as part of quality assurance practices

Programme performance in 2024 and target for 2026

16.89 The subprogramme's work contributed to the continuous participation of 196 drug testing and toxicology laboratories in the UNODC laboratory's proficiency test in the analysis and identification of drugs, helping Member States to better ensure the accuracy and reliability of testing procedures and foster a culture of continuous improvement, which met the planned target.

16.90 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XX).

Figure 16.XX
Performance measure: number of forensic laboratories continuously participating in the UNODC drug analysis proficiency test (cumulative)



Result 3: greater access to the evidence needed by Member States to understand and combat trafficking in persons

Proposed programme plan for 2026

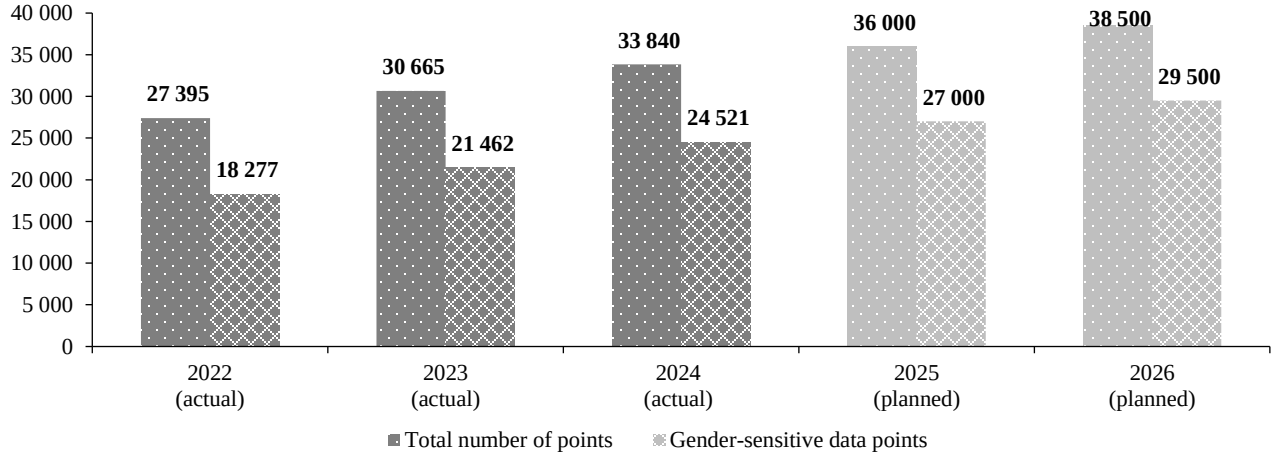
16.91 Trafficking in persons is the recruitment, transportation, transfer, harbouring or receipt of people through force, fraud or deception, with the aim of exploiting them for profit. Men, women and children of all ages and from all backgrounds can become victims of this crime, which occurs in every region of the world. The subprogramme supports Member States by informing their responses in their efforts to combat the crime and protect the victims in accordance with the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime.

Lessons learned and planned change

16.92 The lesson for the subprogramme was that empirical evidence, collected and analysed through the UNODC Global Research on Trafficking in Persons programme, supports Member States by informing their responses. Gender-sensitive data on trafficking in persons, collected from Member States and made available on the UNODC data portal, have become invaluable in providing the evidence and analysis needed to sharpen responses and improve prevention. In applying the lesson, the subprogramme will increasingly solicit and make available relevant data from Member States to the international community.

16.93 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXI).

Figure 16.XXI
Performance measure: number of data points on trafficking in persons reported by Member States available on the United Nations Office on Drugs and Crime data portal (cumulative)



Deliverables

16.94 Table 16.10 lists all deliverables of the subprogramme.

Table 16.10
Subprogramme 6: deliverables for the period of 2023–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**2**	**2**
1. Report to the Commission on Narcotic Drugs on world drug abuse	1	1	1	1
2. Report to the Commission on Crime Prevention and Criminal Justice on world crime trends	1	1	1	1

Seminars, workshops and training events (number of days)	**10**	**10**	**10**	**10**
5. Workshops and training on drug control, crime prevention and forensics	10	10	10	10
Publications (number of publications)	**10**	**10**	**10**	**10**
6. Research publications on drug control and crime prevention	5	5	5	5
7. Forensic publications on drug control and crime prevention	4	4	4	4
8. Journals on narcotics, and crime and society	1	1	1	1
Technical materials (number of materials)	**14**	**14**	**14**	**14**
9. On the monitoring of illicit drug crops	5	5	5	5
10. On drug control and crime prevention	9	9	9	9
C. Substantive deliverables				
Consultation, advice and advocacy: approximately 60 briefings, and dissemination events to Governments, international, regional and national organizations, institutions and laboratories on drugs and crime statistics and on forensics.				
Databases and substantive digital materials: UNODC crime and drug data, with 750,000 data portal views; near real-time data on drug seizures available for analysis, including 16,000 recent data points; early warning advisory on new psychoactive substances, with 10,000 monthly sessions; United Nations Toolkit on Synthetic Drugs, with 3,500 monthly sessions.				

Subprogramme 7
Policy support

Objective

16.95 The objective, to which this subprogramme contributes, is to advance institutional reform and strengthen policy and operational responses by Member States on drug control, crime prevention and criminal justice.

Strategy

16.96 To contribute to the objective, the subprogramme will:

(a) Conduct dialogues with Member States, international organizations and private sector entities to mobilize resources and carry out targeted advocacy and communication activities in substantive areas such as combating transnational organized crime, trafficking in drugs and corruption;

(b) Provide assistance to headquarters and field-based offices related to supporting institutional reforms and ensuring policy coherence through strengthening policy dialogue and enhancing interdivisional coordination;

(c) Further institutionalize a results-based management culture across UNODC by providing technical advice and quality oversight with a view to further strengthening transparency and accountability in UNODC interventions;

(d) Undertake policy analysis and coordinate with other United Nations agencies on emerging and cross-cutting issues related to drugs, crime, corruption and terrorism, in particular promoting the Sustainable Development Goals and the empowerment of youth;

(e) Strengthen the strategic engagement of non-governmental stakeholders in assisting Member States to prevent and combat corruption, crime and terrorism in support of the Sustainable Development Goals, as appropriate and as determined in relevant treaties.

16.97 The above-mentioned work is expected to result in:

(a) Increased awareness and capacity of Member States to address the interlinked issues of drugs, crime, corruption and terrorism at the global, regional, national and local levels and these issues being reflected within broader national development efforts;

(b) Promotion of participation of civil society on issues related to drugs, crime and corruption, as mandated in relevant conventions and policy instruments, and enhanced engagement between Member States, the private sector, academia and civil society;

(c) Greater public awareness of issues related to drugs, crime, corruption and terrorism.

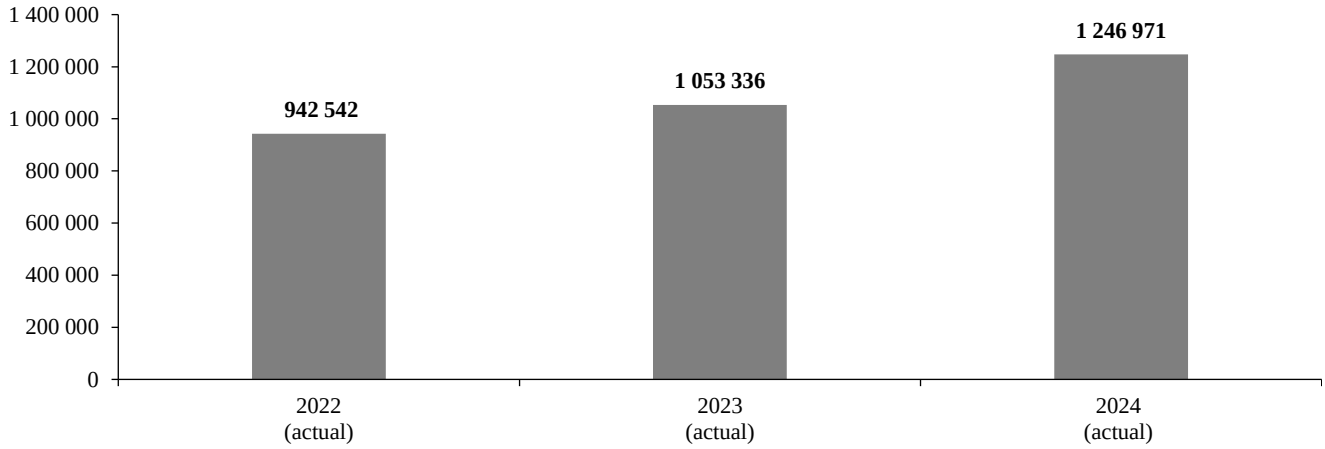
Programme performance in 2024

Improved public awareness of United Nations Office on Drugs and Crime mandate areas

16.98 Member States have benefited from greater access to information about the Office's work and its responses to global challenges, as evidenced by an increase in the number of views of the UNODC corporate website. Focused social media outreach, press releases increasingly translated into additional languages and made available to a wider and more targeted list of journalists, featured web stories accompanied by engaging photos, events, and publications featured on the website played a key role in providing insights and updates to Member States, leading to increased global visibility and improved awareness of the Office's mandates. For example, from 2023 to 2024, the view count of the World Drug Report web page increased by 24 per cent, while the view count of the International Anti-Corruption Day campaign page increased by 22 per cent.

16.99 Progress towards the objective is presented in the performance measure below (see figure 16.XXII).

Figure 16.XXII
Performance measure: average number of monthly views of the United Nations Office on Drugs and Crime website



Planned results for 2026

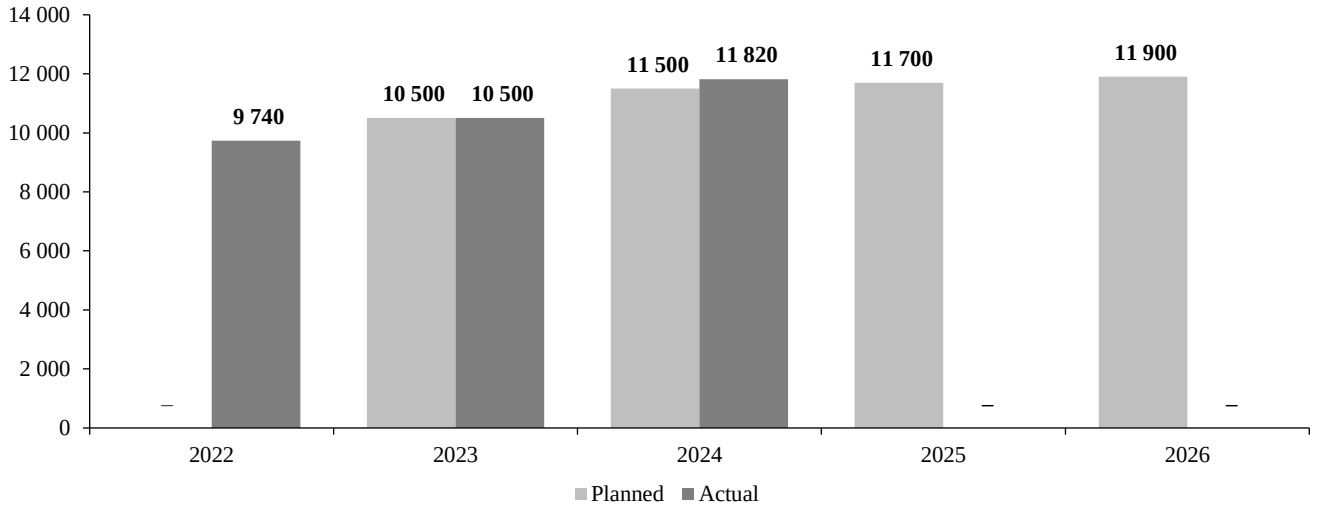
Result 1: victims of trafficking in persons receive critical assistance for their social, physical and psychological recovery

Programme performance in 2024 and target for 2026

16.100 The subprogramme's work contributed to 11,820 direct beneficiaries receiving humanitarian, legal and psychological support and vocational training through specialized organizations, which exceeded the planned target of 11,500 direct beneficiaries.

16.101 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XXIII).

Figure 16.XXIII
Performance measure: number of direct beneficiaries that have received legal and financial assistance through specialized organizations (annual)



Result 2: young people engage meaningfully in decision-making processes on drugs, crime and corruption

Programme performance in 2024 and target for 2026

16.102 The subprogramme's work contributed to the launch of the Generation Justice (GenJust) initiative at the Commission on Crime Prevention and Criminal Justice, which met the planned target.

16.103 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16.11).

Table 16.11
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
First Youth Consultation alongside the eleventh Conference of the Parties to the United Nations Convention against Transnational Organized Crime	"Youth changemakers" held at the twentieth Conference of the States Parties to the United Nations Convention against Corruption	Generation Justice (GenJust) initiative launched at the Commission on Crime Prevention and Criminal Justice	Regional Youth Consultations to support the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice	Generation Justice Youth Network provides support to the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice

Result 3: public-private partnership initiatives are implemented in the context of the United Nations Convention against Cybercrime

Proposed programme plan for 2026

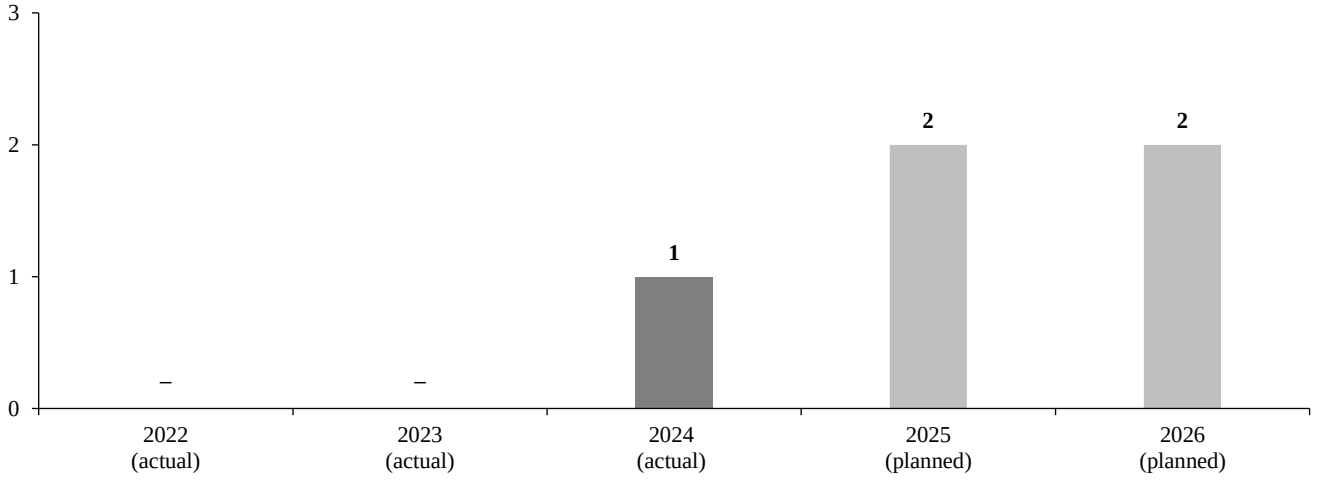
16.104 In December 2024, the General Assembly adopted the United Nations Convention against Cybercrime, which foresees the cooperation of States Parties with private sector entities, academia and civil society in the fight against cybercrime, including on preventive measures, technical assistance and the exchange of information. In addition, based on the dialogue with stakeholders undertaken in the context of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes, stakeholders acknowledged that effectively addressing cybercrime required collaborative efforts among diverse actors. Through the Global Programme on Cybercrime and the Cybercrime Stakeholder Engagement Initiative, the subprogramme brought together representatives from the public and private sectors, civil society, and international and regional organizations to discuss collaborative strategies for preventing and responding to cybercrime in the context of the United Nations Convention against Cybercrime. Participants explored areas of cooperation and approaches that contribute to developing new and strengthening existing multi-stakeholder collaboration in fighting cybercrime as well as to identifying needs and opportunities for future action.

Lessons learned and planned change

16.105 The lesson for the subprogramme was that the public-private model facilitates integration and compliance with international standards by all stakeholders creating platforms that bolster and streamline collaboration. In applying the lesson, the subprogramme will foster such initiatives at the local, national, regional and international levels.

16.106 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXIV).

Figure 16.XXIV
Performance measure: number of new public-private partnerships to address cybercrime (annual)



Deliverables

16.107 Table 16.12 lists all deliverables of the subprogramme.

Table 16.12
Subprogramme 7: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*

7. On results-based management and mainstreaming the 2030 Agenda	1	1	3	1
D. Communication deliverables				
Outreach programmes, special events and information materials: global campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons, International Day for the Prevention of and Fight against All Forms of Transnational Organized Crime, and International Anti-Corruption Day; promotional materials on UNODC mandate areas.				
External and media relations: press releases and events; fundraising outreach and strategic partnerships with international financial institutions, international organizations and the private sector.				
Digital platforms and multimedia content: UNODC website and social media channels.				

Subprogramme 8
Technical cooperation and field support

Objective

16.108 The objective, to which this subprogramme contributes, is to strengthen Member State-owned programmes countering drugs, crime and terrorism.

Strategy

16.109 To contribute to the objective, the subprogramme will:

(a) Provide policy advice, strategic guidance and coordination to all UNODC field offices for the development and implementation of integrated operational programmes and ensure their full implementation;

(b) Ensure operational accountability and programmatic efficiency, including by engaging in the development of business operational strategies and common back offices, monitoring risks and ensuring the inclusion of results-based management in the planning, monitoring and reporting of all UNODC field presences;

(c) Provide substantive, technical and policy advice through its field offices, according to their mandates and at the request of Member States, and ensure the inclusion of governance, security, and preventing and countering drugs, crime and terrorism with full respect for human rights in the implementation of joint United Nations programmes through technical assistance;

(d) Support the development of regional strategies and operational programmes promoting the joint pursuit of justice, public security and development that build on the normative and technical assistance of the Office, through policy dialogue and coordination, and by serving as a common platform for joint efforts with United Nations partners, international financial institutions, other multilateral bodies and civil society;

(e) Provide technical and legislative assistance among partner countries designed to foster full ownership by regional entities to support the establishment of South-South cooperation and interregional cooperation;

(f) Provide targeted capacity-building to Member States to support the achievement of the Sustainable Development Goals, including through North-South, South-South and triangular cooperation.

16.110 The above-mentioned work is expected to result in:

(a) Improved legal and policy responses and strengthened capacity of Member States to address the world drug problem, prevent and counter transnational organized crime, corruption and terrorism and promote justice and the rule of law and participate more effectively in joint initiatives and cross-border and transnational cooperation;

(b) Member States advancing in evidence-based and tailored programmes in priority areas of UNODC mandates, to support relevant Sustainable Development Goals based on contextual needs assessments;

(c) Renewed cooperation and coherence with offices of the United Nations resident coordinators, other United Nations entities and regional Development Coordination Office desks under both development system and business operations reforms, thus enhancing the efficiency of support to Member States.

Programme performance in 2024

Enhanced national and international collaboration to combat terrorist attacks on the basis of xenophobia, racism and other forms of intolerance, or in the name of religion or belief

16.111 Terrorist attacks on the basis of xenophobia, racism and other forms of intolerance, or in the name of religion or belief undermine social cohesion and pose significant threats to global security. Their transnational nature creates a need for increased international and regional cooperation. In line with the eighth review of the Global Counter-Terrorism Strategy, the subprogramme worked to develop effective responses to these challenges by training and raising awareness among law enforcement officials. This helped to strengthen national and international strategies against such threats, fostering collaboration among countries to address and counter phenomena related to xenophobia, racism and other forms of intolerance, or in the name of religion or belief more effectively.

16.112 Progress towards the objective is presented in the performance measure below (see table 16.13).

Table 16.13
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
Manual on Prevention of and Responses to Terrorist Attacks on the Basis of Xenophobia, Racism and Other Forms of Intolerance, or in the Name of Religion or Belief available to Member States	Law enforcement experts increased their expertise in investigating and prosecuting cases related to terrorist acts and violent extremism on the basis of xenophobia, racism and other forms of intolerance, or in the name of religion or belief	Criminal justice officials from Latin America increased information-sharing when working on transnational cases related to xenophobia, racism and other forms of intolerance, or in the name of religion or belief that are of common interest, including with the Spanish National Police and the Department of State and Federal Bureau of Investigation of the United States of America

Planned results for 2026

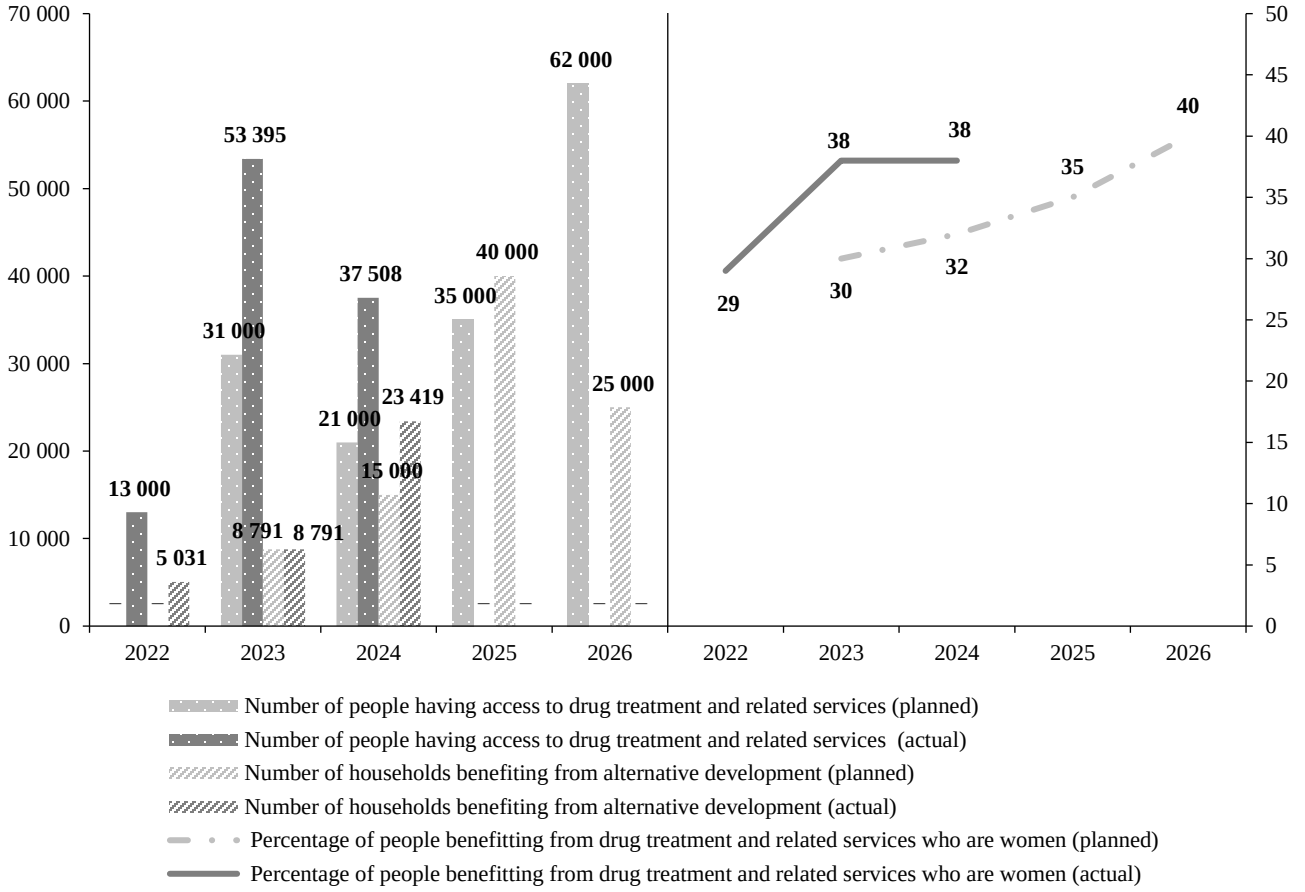
Result 1: drug production and use are addressed through alternative livelihood and health services

Programme performance in 2024 and target for 2026

16.113 The subprogramme's work supported 23,419 households (2,241 headed by women) in Afghanistan, which exceeded the planned target of 15,000. The subprogramme also contributed to increased access to evidence-based drug use prevention, treatment and reintegration services, reducing negative health and social consequences, and reached 37,508 people (38 per cent of whom were women), which exceeded the planned targets of 21,000 and 32 per cent.

16.114 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XXV).

Figure 16.XXV
Performance measure: beneficiaries in Afghanistan of United Nations Office on Drugs and Crime programmes on alternative development and prevention and treatment of drug use and drug use disorders (cumulative)



Result 2: navigating challenges to safety at sea through strengthened maritime safety management systems

Programme performance in 2024 and target for 2026

16.115 The subprogramme's work contributed to the establishment of one new port control unit in Port Louis, Mauritius, and to three ports – Moroni (Comoros), Lamu (Kenya) and Victoria (Seychelles) – becoming International Ship and Port Facility code compliant, which did not meet the planned target of five ports. The target was not met because the other two ports benefiting from the programme had already achieved International Ship and Port Facility code compliance prior to 2024 through proactive efforts and training, and thus cannot be included in the 2024 results.

16.116 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16.14).

Table 16.14
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Enhanced regional coordination in the prosecution of maritime crime	Ports in nine countries started to conduct daily patrols and review their port facility security plans Protected radiata tortoises seized in Madagascar A new port control unit established in Maputo	One new port control unit established in Port Louis, Mauritius Three additional ports in the Comoros, Kenya and Seychelles are International Ship and Port Facility code compliant	At least one port in each of the nine countries assisted is International Ship and Port Facility code compliant	At least two ports in each of the nine countries assisted is International Ship and Port Facility code compliant

Result 3: enhanced transparency and efficiency in asset management for improved crime prevention and public trust

Proposed programme plan for 2026

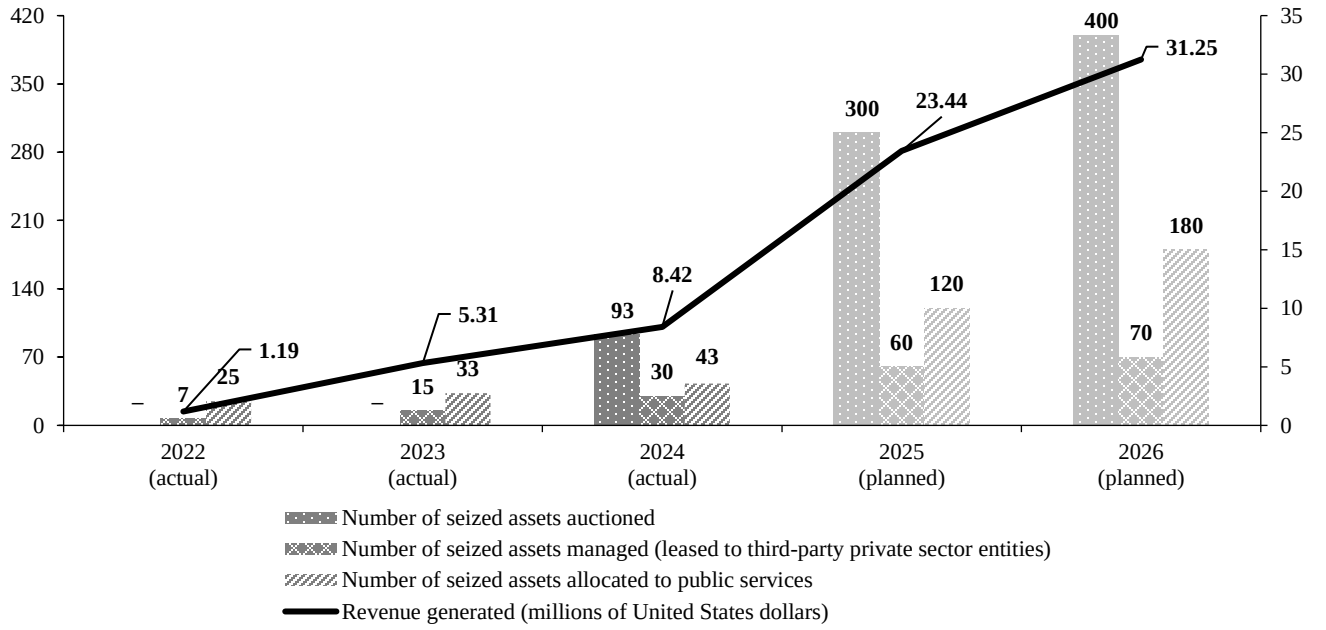
16.117 Seizing and confiscating crime-derived assets is crucial for disrupting organized crime, as it deprives criminal networks of their resources. Strengthening the capacity to effectively manage seized and confiscated assets is crucial for upholding the rule of law, while also generating revenue for States, which can be reinvested in crime prevention and social services. For example, the subprogramme has significantly strengthened the capacity of Mozambique to manage seized assets. Key achievements include the enactment of a dedicated regulatory framework, the establishment of the Asset Management Office and the creation of a real-time asset tracking portal.

Lessons learned and planned change

16.118 The lesson for the subprogramme was the importance of leveraging technology to enhance transparency and efficiency in asset management and the need for more advanced digital tools to streamline processes and ensure accountability. In applying the lesson, the subprogramme will support Mozambique in implementing a comprehensive digital asset management system, that is fully interoperable with existing platforms, and in developing an electronic auction portal to increase public participation and maximize revenues from seized assets.

16.119 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXVI).

Figure 16.XXVI
Performance measure: asset management and revenue generation in Mozambique (annual)



Deliverables

16.120 Table 16.15 lists all deliverables of the subprogramme.

Table 16.15
Subprogramme 8: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**13**	**13**	**13**	**13**
1. Regional and country programmes on UNODC mandate areas	13	13	13	13
Technical materials (number of materials)	**2**	**2**	**2**	**2**
2. On business continuity, United Nations reform and the efficiency agenda	2	2	2	2
Seminars, workshops and training events (number of days)	**13**	**13**	**13**	**13**
3. Seminars on programme development and the 2030 Agenda	13	13	13	13
C. Substantive deliverables				
Consultation, advice and advocacy: advisory services through field office network for approximately 150 Member States and stakeholders on policies, strategies and cooperation frameworks; consultations with Member States and partners on strategic priorities and new programmes; and strategic and operational field support and substantive oversight services in UNODC mandate areas.				
D. Communication deliverables				
Outreach programmes, special events and information materials: national campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, World Day against Trafficking in Persons, and the International Anti-Corruption Day.				
External and media relations: fundraising outreach and partnerships with international financial institutions, international organizations and the private sector specifically focused on country or regional contexts.				
Digital platforms and multimedia content: UNODC field offices websites.				
E. Enabling deliverables				
Safety and security: safety and security services to approximately 125 physical field office locations in 97 countries.				

Subprogramme 9

Component 1
Provision of secretariat services and substantive support to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the United Nations Congress on Crime Prevention and Criminal Justice

Objective

16.121 The objective, to which component 1 of this subprogramme contributes, is to ensure the effective and efficient functioning of the United Nations intergovernmental bodies dealing with issues relating to drugs, crime and terrorism, as well as the effective and efficient functioning of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC and of the United Nations Congress on Crime Prevention and Criminal Justice in fulfilling their advisory roles.

Strategy

16.122 To contribute to the objective, the component will:

(a) Provide substantive, technical and organizational services to the Commission on Narcotic Drugs and its five subsidiary bodies, to the Commission on Crime Prevention and Criminal Justice and to the United Nations congresses on crime prevention and criminal justice, including the follow-up to the Fourteenth Congress and the implementation of the provisions of its outcome document;

(b) Provide support to the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC by facilitating the preparations for and the organization of the formal and informal meetings of the working group.

16.123 The above-mentioned work is expected to result in:

(a) Enhanced cooperation among Member States in accelerating the implementation of international drug policy commitments as well as comprehensive strategies for crime prevention towards social and economic development and integrated approaches to challenges faced by criminal justice systems;

(b) Enhanced understanding of Member States of governance and financial matters relating to UNODC;

(c) Increased participation by a broad and inclusive group of representatives.

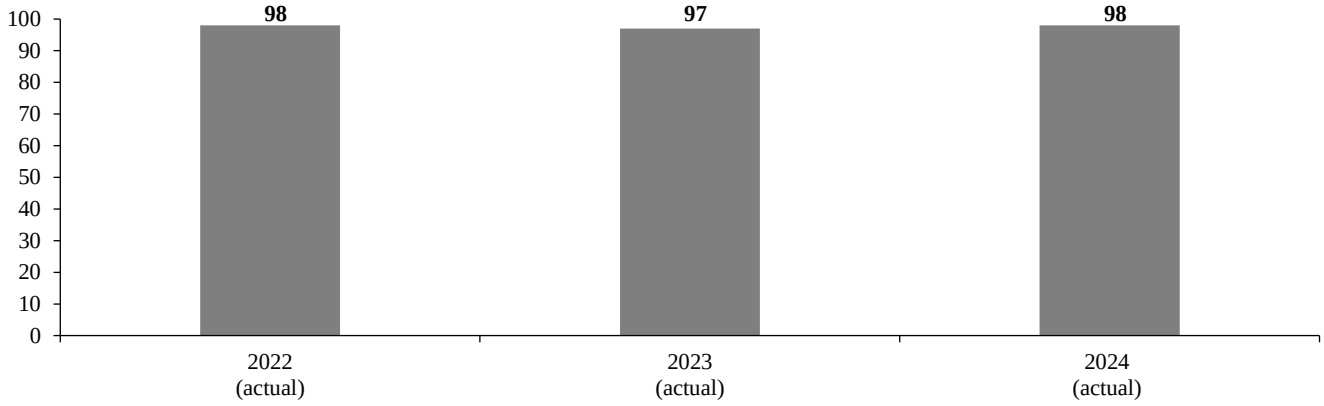
Programme performance in 2024

Successful 2024 high-level midterm review of progress made in implementing all international drug policy commitments

16.124 In the 2019 Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem, Member States resolved to review the progress made in implementing all international drug policy commitments in the Commission on Narcotic Drugs in 2029, with a midterm review in 2024. The component supported the successful conduct of the 2024 high-level review process, including the negotiations of the Commission on the high-level declaration on the 2024 midterm review adopted at the opening meeting, two high-level round tables and a programme of high-level events. The component also supported the “Pledge for action” initiative of the Chair of the Commission, which was aimed at mobilizing Member States’ commitment to concrete and impactful actions to address the challenges outlined in the 2019 Ministerial Declaration. In line with the 2019 Declaration and the outcome of the 2024 midterm review, the component also led the organization of intersessional thematic discussions in November 2024, as part of the lead-up to the final review in 2029.

16.125 Progress towards the objective is presented in the performance measure below (see figure 16.XXVII).

Figure 16.XXVII
Performance measure: Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, including in the context of the 2024 high-level midterm review
(Percentage)



Planned results for 2026

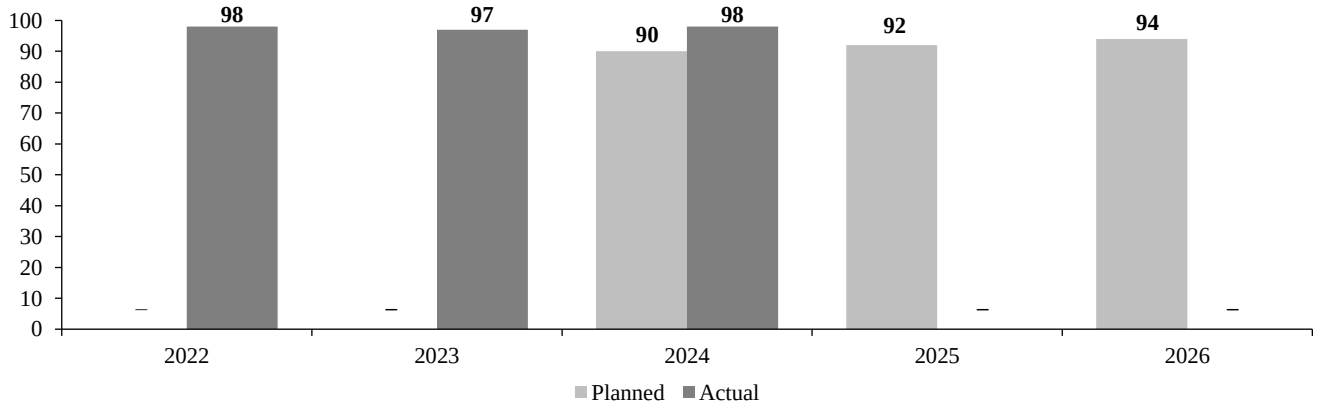
Result 1: accelerated implementation of international drug policy commitments to effectively address and counter the world drug problem

Programme performance in 2024 and target for 2026

16.126 The component's work contributed to 98 per cent of Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned target of 90 per cent.

16.127 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XXVIII).

Figure 16.XXVIII
Performance measure: Member States participating in the meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies
(Percentage)



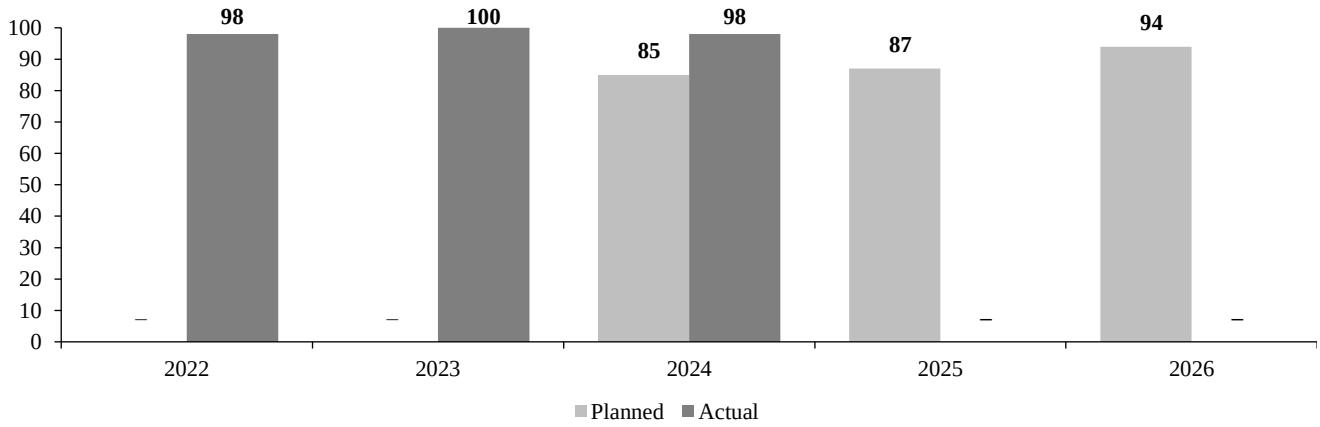
Result 2: strengthened implementation of international crime prevention and criminal justice policy commitments

Programme performance in 2024 and target for 2026

16.128 The component's work contributed to 98 per cent of Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, which exceeded the planned target of 85 per cent.

16.129 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XXIX).

Figure 16.XXIX
Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies
(Percentage)



Result 3: accelerated crime prevention, criminal justice and the rule of law through the adoption and implementation of the Abu Dhabi declaration

Proposed programme plan for 2026

16.130 In its resolution 79/186, the General Assembly encouraged Member States to finalize negotiations of the Abu Dhabi declaration in a timely manner prior to the commencement of the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice so that the declaration could be adopted on its opening day. The component supports the Commission on Crime Prevention and Criminal Justice, as the preparatory and follow-up body for the crime congresses, in negotiating a policy outcome document of the Fifteenth Congress.

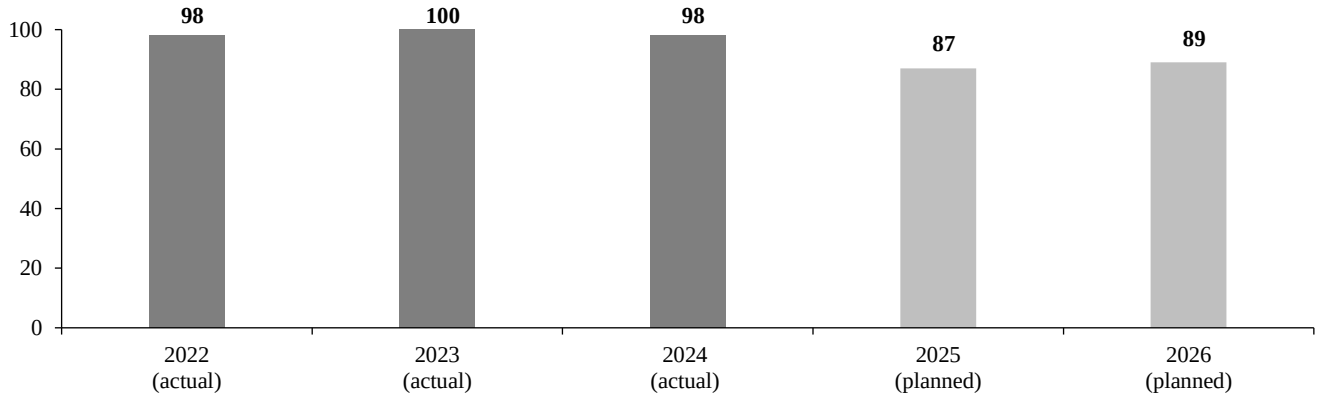
Lessons learned and planned change

16.131 The lesson for the component was that effective implementation of international drug policy commitments requires a comprehensive approach and inclusive participation in meetings by all Member States and relevant stakeholders. In applying the lesson, the component will work on formats that can further increase participation and meet the needs and expectations of Member States and stakeholders.

16.132 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXX).

Figure 16.XXX
Performance measure: Member States participating in the meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the Secretariat to the Governing Bodies, including in the context of the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice

(Percentage)



Deliverables

16.133 Table 16.16 lists all deliverables of the component.

Table 16.16
Subprogramme 9, component 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**69**	**55**	**92**	**84**
1. Reports to the General Assembly on international cooperation to counter the world drug problem and on crime prevention and criminal justice, including reports on the United Nations congresses on crime prevention and criminal justice	5	7	4	20
2. Notes to the Economic and Social Council on the contribution of the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice to the annual high-level political forum on sustainable development	2	2	2	2
3. Annual reports to the Economic and Social Council on the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice	4	4	4	4
4. Annual reports to the Commission on Crime Prevention and Criminal Justice	14	18	17	15
5. Reports to the Commission on Narcotic Drugs	14	16	13	13
6. Reports and notes by the Secretariat to subsidiary bodies of the Commission on Narcotic Drugs	28	–	30	28
7. Notes by the Secretariat to the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice	2	2	2	2
8. Reports to the regional preparatory meetings of the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice	–	6	20	–
Substantive services for meetings (number of three-hour meetings)	**154**	**105**	**195**	**181**
Meetings of:				
9. Economic and Social Council	6	6	6	6
10. Commission on Crime Prevention and Criminal Justice	46	34	46	46
11. Commission on Narcotic Drugs	46	48	46	46
12. The subsidiary bodies of the Commission on Narcotic Drugs	40	–	50	40

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
13. The standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC	16	17	17	17
14. Regional preparatory meetings of the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice	–	–	30	26
B. Generation and transfer of knowledge				
Publications (number of publications)	**5**	**5**	**5**	**5**
15. On the manufacture of narcotic drugs and psychotropic substances and their precursors	1	1	1	1
16. Directory of competent national authorities under the international drug control treaties	1	1	1	1
17. Schedules and tables of the international drug control conventions	3	3	3	3
C. Substantive deliverables				
Consultation, advice and advocacy: substantive and technical advice to the Vienna-based Commissions, representatives of Member States, permanent missions in Vienna and other relevant stakeholders; notes verbales as notifications under the international drug control treaties; advice on the follow-up to the mandates contained in relevant resolutions and decisions adopted by the Commissions.				
Databases and substantive digital materials: online information on the manufacture of narcotic drugs and psychotropic substances and their precursors as well as on the competent national authorities under the international drug control treaties; database on resolutions and decisions by the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special events of the Commissions, including the launch of the annual World Drug Report.				
Digital platforms and multimedia content: websites for the Commissions and the United Nations congresses on crime prevention and criminal justice, secure web pages for use by the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC; social media accounts highlighting key developments in the work of the Commissions.				

Component 2
Provision of secretariat services and substantive support to the International Narcotics Control Board

Objective

16.134 The objective, to which component 2 of this subprogramme contributes, is to ensure the effective and efficient functioning of the International Narcotics Control Board in fulfilling its treaty-based mandate, through such measures as monitoring and promoting the full implementation of and full compliance with the three international drug control treaties and supporting Member States in implementing their treaty obligations.

Strategy

16.135 To contribute to the objective, the component will:

(a) Provide independent secretariat services and substantive support to the International Narcotics Control Board, including ensuring that the Board is provided with advice on treaty implementation;

(b) Raise awareness of Governments and the international community about the implementation of the international drug control conventions, through the publication and dissemination of the treaty-mandated reports of the Board and on the need to develop and implement national drug control policies and regulatory control systems for narcotic drugs, psychotropic substances and precursor chemicals, helping Member States to make progress towards Sustainable Development Goals 3, 10, 11 and 16;

(c) Support Governments in meeting their treaty-based obligations for reporting to the Board, in monitoring the international movement of precursors and the illicit use of internationally controlled and non-scheduled precursors as well as equipment, and in promoting cooperation and the exchange of import and export authorizations, including through the International Narcotics Control Board learning programme and the International Import and Export Authorization System (I2ES), as well as information on licit and illicit activity, through electronic means such as the Pre-Export Notification Online system, the Pre-Export Notification Online Light system and the Precursors Incident Communication System, projects Prism and Cohesion and task force efforts; and support Governments in enhancing cooperation with relevant private sector entities, helping Member States to make progress towards Goals 3, 11, 16 and 17;

(d) Provide technical advice to the Board in assessing substances for scheduling recommendations under the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988;

(e) Build the capacity of and enhance cooperation among law enforcement, customs, postal and other national agencies to ensure the availability of controlled substances for licit purposes and to safely detect and interdict controlled substances, new psychoactive substances and non-medical synthetic opioids, through the Global Rapid Interdiction of Dangerous Substances programme, helping Member States to make progress towards Sustainable Development Goals 3, 16, and 17;

(f) Raise awareness and provide training to relevant national authorities on:

(i) Implementing the international drug control conventions;

(ii) Identifying and responding to changing patterns in trafficking in and misuse of controlled substances, new psychoactive substances and non-medical synthetic opioids;

(iii) Implementing the simplified control measures for international trade in controlled substances during emergency situations.

16.136 The above-mentioned work is expected to result in:

(a) Advancement of the Board's dialogue with Governments to promote implementation of the drug control conventions and the Board's recommendations and engagement on treaty-related matters;

(b) Effective functioning of the international system for licit trade in controlled substances;

(c) More accurate identification and reporting by Governments on their needs for and consumption of narcotic drugs and psychotropic substances for medical and scientific purposes;

(d) Increased availability of controlled substances, with improved cooperation among Member States to ensure a balance between the supply of and demand for controlled substances;

(e) Decreased availability of precursor chemicals and essential equipment for the illicit manufacture of drugs;

(f) Reduction in trafficking in and misuse of internationally controlled substances and new psychoactive substances;

(g) Improved response of Member States to emergency situations, and their impacts on the demand for and trafficking of new psychoactive substances and non-medical synthetic opioids;

(h) Improved measures by Member States to respond to emergency situations requiring expedited trade in and humanitarian supply of controlled substances for medical purposes.

Programme performance in 2024

Equipment prevented from use in illicit drug manufacture through enhanced implementation by Member States of article 13 of the 1988 Convention

16.137 Article 13 of the 1988 Convention, which addresses the diversion of materials and equipment for illicit drug manufacture, is underutilized.[9] The component's work sensitized Member States to the need to address the trade in and diversion of equipment used in illicit drug manufacture as part of global efforts to reduce illicit drug supply, and provided relevant resources, tools and platforms facilitating multilateral cooperation to this end.

16.138 Progress towards the objective is presented in the performance measure below (see table 16.17).

Table 16.17
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*
More than 150 experts and government representatives exchanged good practices during meeting on illicit drug manufacturing equipment Governments have access to the Board's technical paper on illicit drug manufacturing equipment and article 13 of the 1988 Convention 10 Governments shared information about measures to implement article 13 Governments have access to the compendium of Board tools and resources related to equipment used in illicit drug manufacture	Cooperation with the World Customs Organization to establish unique subheadings for 13 pieces of equipment to assist Governments in improving equipment trade monitoring	63 Governments engaged in a survey on illicit drug manufacturing equipment Experts from 12 countries shared challenges and good practices on implementation of article 13 Officials from 9 Governments use the Board's Precursors Incident Communication System for cooperation and information-sharing on equipment incidents

Planned results for 2026

Result 1: relevant national industrial sectors proactively cooperate with competent national authorities in reducing the risk of exploitation by drug traffickers

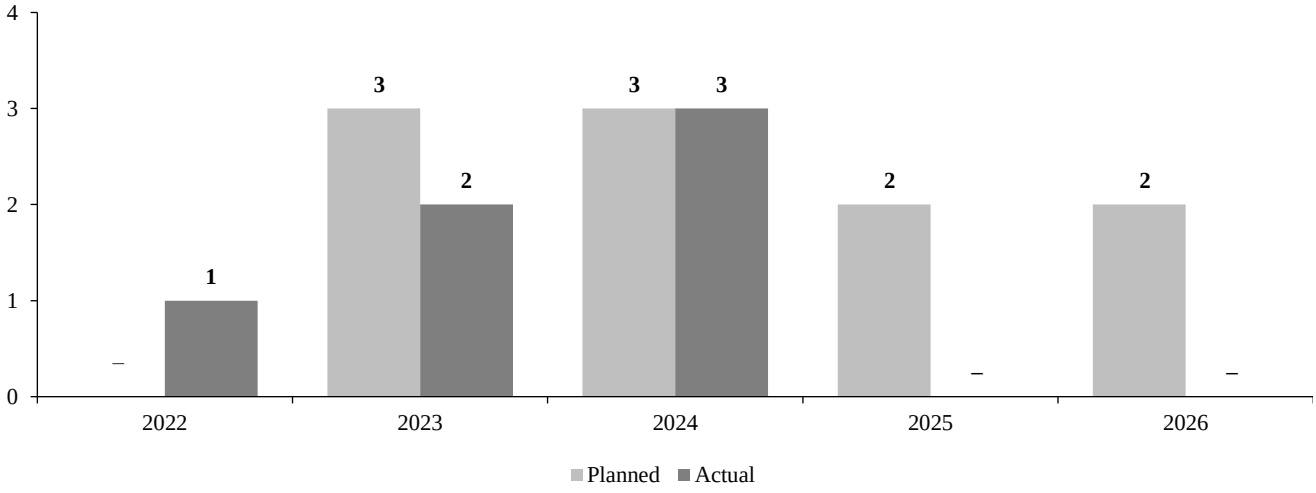
Programme performance in 2024 and target for 2026

16.139 The component's work contributed to three countries conducting national mapping exercises on the structure of industry sectors manufacturing and trading chemicals possibly used in illicit drug manufacture, which met the planned target.

16.140 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 16.XXXI).

[9] Resolution 63/1 and 65/3 of the Commission on Narcotic Drugs.

Figure 16.XXXI
Performance measure: number of countries that have conducted national industry mapping exercises (annual)



Result 2: reduced trafficking in highly potent new psychoactive substances and non-medical synthetic opioids

Programme performance in 2024 and target for 2026

16.141 The component's work contributed to 55 Member States engaging in voluntary cooperation with the private sector to prevent trafficking and marketing of new psychoactive substances and non-medical synthetic opioids through national, regional and global public-private events, which exceeded the planned target of 25 Member States.

16.142 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 16.18).

Table 16.18
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
Law enforcement and regulatory officers use updated incident communication (Project Ion Incident Communication System) and analysis (Global Rapid Interdiction of Dangerous Substances Intelligence) tools	Member States have access to guidance for voluntary cooperation with e-commerce, express courier industry, freight forwarding industry and Internet-related services	55 Member States engaged in voluntary cooperation with the private sector to prevent trafficking and marketing of new psychoactive substances and non-medical synthetic opioids	Member States increase the number of seizures of new psychoactive substances and non-medical synthetic opioids	Member States increase the number of seizures of new psychoactive substances and non-medical synthetic opioids

Result 3: strengthened capacity of Member States to ensure adequate availability of internationally controlled substances for medical, scientific and industrial purposes

Proposed programme plan for 2026

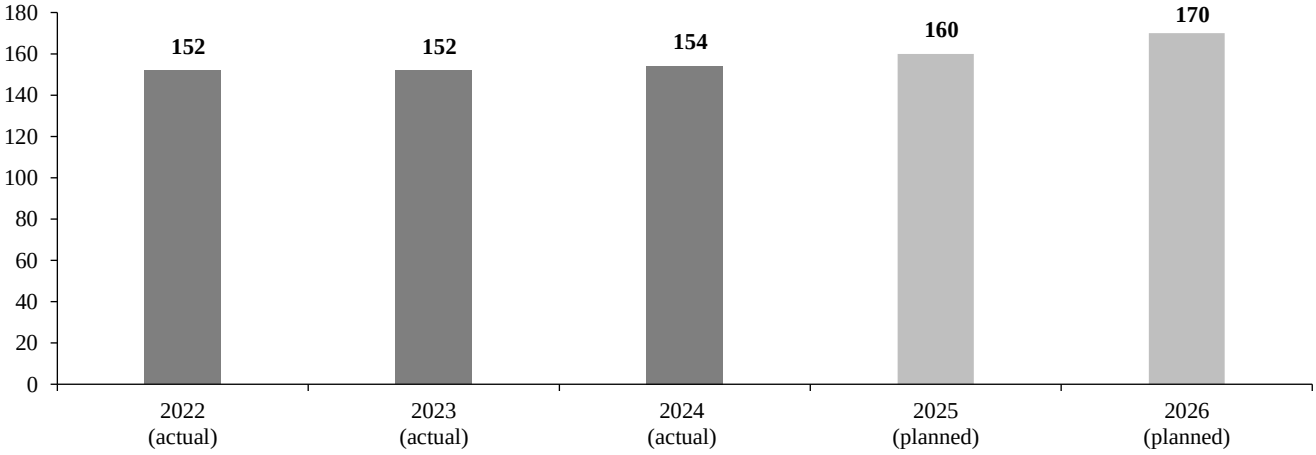
16.143 The submission by Member States of accurate and comprehensive estimates and assessments of national requirements for controlled substances for licit purposes and related statistics enables the International Narcotics Control Board to carry out its mandate to promote the implementation of the international drug control treaties and ensure the availability of internationally controlled substances for medical, scientific and industrial purposes. The component, through e-modules and virtual and in-person capacity-building activities delivered through the Board's learning programme, has strengthened the level of knowledge of Member States of the international control mechanisms to ensure that the use of narcotic drugs, psychotropic substances and precursors is limited to medical, scientific and industrial purposes.

Lessons learned and planned change

16.144 The lesson for the component was that the International Narcotics Control Board learning e-modules are an important tool to improve Member States' knowledge of the control mechanisms and provide a solid foundation for treaty-based reporting to the Board. In applying the lesson, the component will continue to encourage countries and territories, particularly in Africa, Central Asia and the Caribbean, and the Pacific island States, to utilize the e-modules to close knowledge gaps related to the submission of data.

16.145 Expected progress towards the objective is presented in the performance measure below (see figure 16.XXXII).

Figure 16.XXXII
Performance measure: number of countries and territories enrolled in the International Narcotics Control Board e-learning modules (cumulative)



Deliverables

16.146 Table 16.19 lists all deliverables of the component.

Table 16.19
Subprogramme 9, component 2: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**52**	**36**	**52**	**52**
1. Annual report of the International Narcotics Control Board	1	1	1	1
2. Report of the International Narcotics Control Board on the implementation of article 12 of the 1988 Convention, on narcotic drugs and on psychotropic substances	3	3	3	3
3. Reports on the supervision of the movement of narcotic drugs, psychotropic substances and precursor chemicals for licit purposes and on the supply of opiate raw materials and demand for opiates for medical and scientific purposes	8	8	8	8
4. Reports of the Committee on Finance and Administration and the Standing Committee on Estimates, and reports on intersessional developments, the implementation of decisions, and matters examined and decisions taken by the International Narcotics Control Board	11	12	11	11
5. Estimated requirements for narcotic drugs, assessments of requirements for psychotropic substances, and assessments of licit requirements for amphetamine-type stimulant precursors	6	6	6	6
6. Evaluation of overall treaty compliance by Governments, report on measures to ensure the execution of the international drug control treaties, reports on missions conducted by the International Narcotics Control Board, and specific studies on and evaluation of implementation by Member States of recommendations made by the Board	23	6	23	23
Substantive services for meetings (number of three-hour meetings)	**98**	**171**	**98**	**98**
Meetings of:				
7. The International Narcotics Control Board and its Standing Committee on Estimates	60	58	60	60
8. Ad hoc expert groups to advise the International Narcotics Control Board	18	8	18	18
9. The International Narcotics Control Board with Member States, international and regional organizations, the private sector and academia, as appropriate	20	105	20	20
Conference and secretariat services for meetings (number of three-hour meetings)	**98**	**171**	**98**	**98**
Meetings of:				
10. The International Narcotics Control Board and its Standing Committee on Estimates	60	58	60	60
11. Ad hoc expert groups to advise the International Narcotics Control Board	18	8	18	18
12. The International Narcotics Control Board with Member States, international and regional organizations, the private sector and academia, as appropriate	20	105	20	20
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	**3**	**3**	**3**	**3**
13. To support Government compliance with the international drug control conventions	3	3	3	3
Seminars, workshops and training events (number of days)	**4**	**13**	**4**	4
14. Training courses on compliance with drug control treaties and availability of internationally controlled substances for licit purposes while preventing diversion and abuse	4	13	4	4
Technical materials (number of materials)	**96**	**106**	**96**	**96**
15. Estimates and assessments of medical and scientific requirements for narcotic drugs and psychotropic substances	64	64	64	64
16. Forms for treaty-mandated reporting by Member States on narcotic drugs, psychotropic substances and precursor chemicals under the 1961, 1971 and 1988 Conventions and related Economic and Social Council resolutions, and annual update of the lists of narcotic drugs, psychotropic substances and precursor chemicals controlled under the three conventions	12	12	12	12

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned
17. Tables of countries that require authorizations for the import of substances listed in Schedules III and IV of the 1971 Convention, and the special international surveillance list of non-scheduled chemicals	5	13	5	5
18. Training materials for national authorities on implementing the provisions of the three drug-control conventions	15	17	15	15

C. Substantive deliverables

Consultation, advice and advocacy: substantive support to country missions of the International Narcotics Control Board to review implementation of the conventions and to make recommendations to Governments aimed at improving treaty adherence and implementation with a view to ensuring the availability of internationally controlled substances while preventing diversion, trafficking and misuse; consultations with Member States on the control of narcotic drugs, psychotropic substances and precursor chemicals, as well as on issues relating to non-scheduled chemicals, including designer precursors, equipment and materials used in illicit drug manufacture, and new psychoactive substances and synthetic opioids.

Databases and substantive digital materials: International Drug Control System Database used by the International Narcotics Control Board secretariat; International Import and Export Authorization System (I2ES), with 78 registered countries and territories; Pre-Export Notification Online and Pre-Export Notification Online Light systems, with 169 registered countries and territories; Precursors Incident Communication System, used by approximately 130 Governments; and Project Ion Incident Communication System and Global Rapid Interdiction of Dangerous Substances Intelligence, used by around 189 Governments.

D. Communication deliverables

Outreach programmes, special events and information materials: side events during intergovernmental meetings and meetings of the International Narcotics Control Board with Member States and civil society; and information materials on the recommendations and positions of the Board to decision-makers and the general public.

External and media relations: press releases and press conferences on activities of the International Narcotics Control Board; responses to media requests; statements by members of the Board at intergovernmental meetings; and newsletters for Governments.

Digital platforms and multimedia content: website of the International Narcotics Control Board and institutional social media accounts; and secure web pages for Board members and competent national authorities.

B. Proposed post and non-post resource requirements for 2026

Overview

16.147 The proposed regular budget resources for 2026, including the breakdown of resource changes, as applicable, are reflected in tables 16.20 to 16.22.

16.148 Additional details on the distribution of the proposed resources for 2026 are reflected in tables 16.23 to 16.25 and figure 16.XXXIII.

16.149 As reflected in tables 16.23 (1) and 16.24 (1), the overall resources proposed for 2026 amount to $29,475,500, reflecting a net increase of $1,710,500 (or 6.2 per cent) compared with the approved budget for 2025. Resource changes result from technical adjustments, new and expanded mandates, and other changes. The proposed level of resources provides for the full, efficient and effective implementation of mandates.

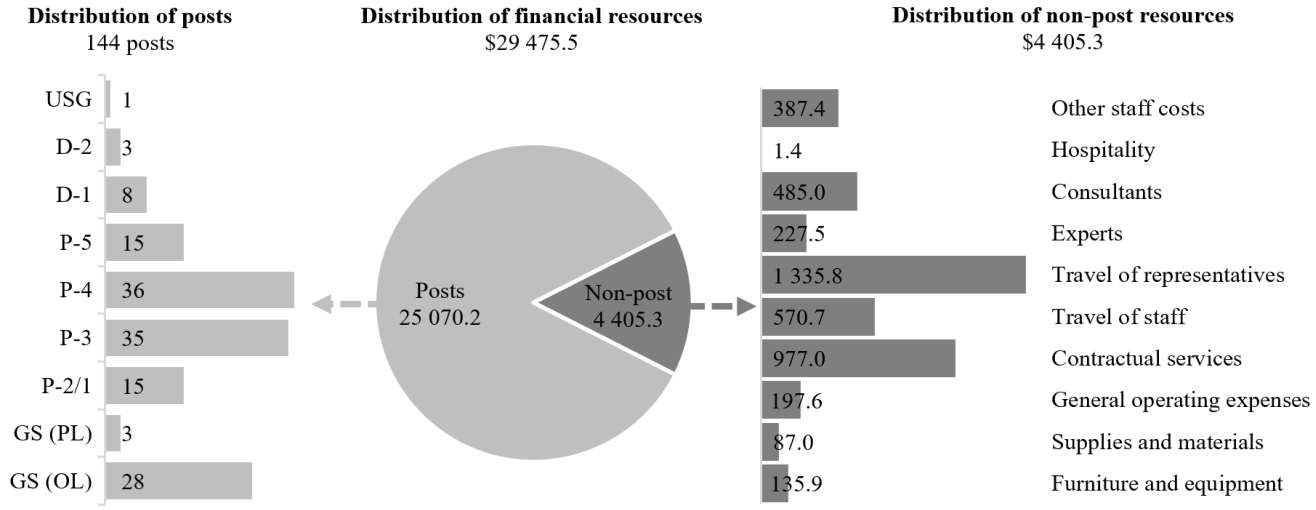
(Number of posts/thousands of United States dollars)



Explanation of variances by factor, component and subprogramme

Overall resource changes

Technical adjustments

16.150 As reflected in table 16.23 (1), resource changes reflect a net increase of $692,700, which includes the following:

(a) **Policymaking organs**. A net decrease of $462,000 comprises the removal of one-time provisions under other staff costs ($83,900), consultants ($49,200), travel of representatives ($207,200), travel of staff ($85,500) and contractual services ($36,200) related to the non-recurrent resource requirements for the preparatory meetings held in 2025 for the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice;

(b) **Subprogramme 1, Countering transnational organized crime**. A net increase of $1,010,700 comprises:

(i) The removal of one-time provisions under experts ($24,900), travel of representatives ($33,800) and furniture and equipment ($44,200) related to the non-recurrent resource requirements for 2025 to promote the rapid entry into force of the United Nations Convention against Cybercrime, pursuant to General Assembly resolution 79/243;

(ii) Additional requirements of $1,113,600 related to the delayed impact of 15 posts established in 2025 to support the implementation of the United Nations Convention against Cybercrime, pursuant to General Assembly resolution 79/243, which were subject to a 50 per cent vacancy rate in accordance with the established practice for new posts;

(c) **Subprogramme 6, Research, trend analysis and forensics**. A net increase of $144,000 comprises:

(i) The removal of one-time provisions under contractual services ($700) related to the non-recurrent resource requirements for 2025 for the promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development;

(ii) Additional requirements of $144,700 related to the delayed impact of two temporary posts established in 2025 to support the promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development, pursuant to General Assembly resolution 79/234, which were subject to a 50 per cent vacancy rate in accordance with the established practice for new posts.

New and expanded mandates

16.151 As reflected in table 16.23 (1), resource changes reflect a net increase of $1,012,800, which includes the following:

(a) **Policymaking organs**. A net increase of $627,000 comprises the provision under other staff costs ($124,700), consultants ($101,100), travel of representatives ($341,800), travel of staff ($21,700) and contractual services ($37,700) with respect to new and expanded mandates relating to the Fifteenth United Nations Congress on Crime Prevention and Criminal Justice, scheduled to be held in the United Arab Emirates in 2026, pursuant to Economic and Social Council resolution 155 C (VII) and General Assembly resolutions 415 (V), 46/152, 56/119 and 78/223;

(b) **Subprogramme 1, Countering transnational organized crime**. A net increase of $385,800 comprises:

(i) The provision under other staff costs ($1,200), consultants ($86,700), travel of staff ($52,600), contractual services ($132,900) and general operating expenses ($41,600) with respect to new and expanded mandates relating to the United Nations Convention against Cybercrime, pursuant to General Assembly resolution 79/243;

(ii) The provision under other staff costs ($70,800) with respect to new mandates relating to strengthening and promoting effective measures and international cooperation on organ

donation and transplantation to prevent and combat trafficking in persons for the purpose of organ removal and trafficking in human organs, pursuant to General Assembly resolution 79/189.

Other changes

16.152 As reflected in table 16.23 (1), resource changes reflect an increase of $5,000, resulting from a higher standard price of the core software package for non-field personnel outside of United Nations Headquarters, and a set of cost-neutral changes, as shown below:

(a) **Subprogramme 1, Countering transnational organized crime**. A net decrease of $17,500, which comprises:

(i) The reduced scope of expertise required in the area of organized crime and illicit trafficking, offset by additional support required for the collection and analysis of the data in preparation for the thirteenth session of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime ($9,200);

(ii) Lower travel requirements related to transnational organized crime processes and ad hoc meetings, offset by additional support required for the collection and analysis of data in preparation for the thirteenth session of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime ($7,500);

(iii) Reduced communication costs ($800). These reduced requirements under consultants, travel of staff and general operating expenses supported the proposed increase under contractual services under programme support to strengthen the provision to cover the costs of data processing services, including workstation support and licences;

(b) **Subprogramme 6, Research, trend analysis and forensics**. Resource changes reflect a decrease of $3,800, which resulted largely from reduced requirements under contractual services and travel of staff for this subprogramme and supported the proposed increase under contractual services for programme support to strengthen the provision to cover the costs of data processing services, including workstation support and licences;

(c) **Subprogramme 9, Provision of secretariat services and substantive support to the United Nations intergovernmental bodies, the International Narcotics Control Board and the United Nations Congress on Crime Prevention and Criminal Justice**. Resource changes reflect a decrease of $3,800, which comprises:

(i) The overall cost-neutral conversion of two general temporary assistance positions of a continuing nature to regular posts, which entails an increase of $216,800 under posts, offset by a reduction of $180,900 under other staff costs, as well as reductions reflecting reduced requirements under experts and contractual services;

(ii) Reduced requirements ($3,800) under contractual services for this subprogramme that supported the proposed increase under contractual services for programme support to strengthen the provision to cover the costs of data processing services, including workstation support and licences;

(d) **Programme support**. Resource changes reflect an increase of $30,100, which comprises:

(i) The higher standard price of the core software package for non-field personnel outside of United Nations Headquarters ($5,000);

(ii) Additional resources ($25,100) to strengthen the provision for data processing services for workstation support covering the end user, and for central infrastructure hardware for UNODC regular budget activities.

Policymaking organs

16.153 The resources proposed under this component would provide for requirements relating to standing intergovernmental organs and expert bodies and intergovernmental processes, the servicing of which

is the responsibility of UNODC. The provisions for experts serving on committees in their individual capacity are in accordance with General Assembly resolution 2491 (XXIII), as amended by resolutions 41/176, 42/25, section VI, and 43/217, section IX, while the provisions for members of the functional commissions are in accordance with Assembly resolutions 1798 (XVII), 2128 (XX) and 2245 (XXI). Table 16.26 provides information on the standing intergovernmental organs and related resource requirements under the regular budget.

Table 16.26
Policymaking organs

Policymaking organ	*Additional information*	*2025 approved*	*2026 estimate*
United Nations Congress on Crime Prevention and Criminal Justice	Mandate: General Assembly resolutions 46/152, 56/119 and 78/223 Membership: 193 government officials Number of sessions in 2026: 1	462.0	627.0
Commission on Crime Prevention and Criminal Justice	Mandate: Economic and Social Council resolution 1992/1 Membership: 40 government officials Number of sessions in 2026: 2	65.7	65.7
Commission on Narcotic Drugs and its subsidiary bodies	Mandate: Economic and Social Council resolution 1999/30 Membership: 53 government officials Number of sessions in 2026: 2	189.7	189.7
Standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime	Mandate: Economic and Social Council decisions 2009/251 and 2022/316 Membership: N/A (open-ended) Number of sessions in 2026: 1[a]	–	–
International Narcotics Control Board	Mandate: General Assembly resolution 1774 (XVII); Economic and Social Council resolutions 1966/1106 (XL) and 1967/1196 (XLII); and the 1961 Convention as amended by the 1972 Protocol, article 9 Membership: 13 members Number of sessions in 2026: 3	605.8	605.8
Conference of the Parties to the United Nations Convention against Transnational Organized Crime	Mandate: General Assembly resolutions 55/25 and 55/255; the United Nations Convention against Transnational Organized Crime, article 32, and rule 3 of the rules of procedure for the Conference Membership: 192 parties Number of sessions in 2026: 1[a]	–	–
Conference of the States Parties to the United Nations Convention against Corruption and its subsidiary bodies	Mandate: General Assembly resolution 58/4, the United Nations Convention against Corruption, article 63, and rule 3 of the rules of procedure for the Conference Membership: 191 parties Number of sessions in 2026: 0	–	–
Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes	Mandate: General Assembly resolution 79/243 Membership: 193 Member States Number of sessions in 2026: 1[a]	–	–
Total		**1 323.2**	**1 488.2**

[a] Requirements for these sessions have been budgeted under subprogramme 1, Countering transnational organized crime.

16.154 The proposed regular budget resources for 2026 amount to $1,488,200 and reflect a net increase of $165,000 compared with the approved budget for 2025. The proposed change is explained in paragraphs 16.150 and 16.151. Additional details on the distribution of the proposed resources for 2026 are reflected in table 16.27 and figure 16.XXXIV.

Executive direction and management

16.155 The executive direction and management component comprises the Office of the Executive Director and the Independent Evaluation Section.

16.156 The Executive Director is responsible for coordinating and providing leadership for all United Nations drug control and crime prevention activities to ensure the coherence of actions within the programme and the coordination, complementarities and non-duplication of such activities across the United Nations system. In that capacity, the Executive Director participates in the work of the United Nations System Chief Executives Board for Coordination. The Executive Director acts on behalf of the Secretary-General in fulfilling the responsibility that devolves upon the Executive Director under the terms of international treaties and resolutions of United Nations organs relating to international drug control or crime prevention. The responsibilities are combined with those of the Director-General of the United Nations Office at Vienna. The Office of the Executive Director is integrated with that of the Director-General and is supported with resources from the regular budget under section 1, Overall policymaking, direction and coordination.

16.157 The core functions of the Office of the Executive Director are: (a) to assist the Executive Director in the overall executive direction and management of UNODC; (b) to facilitate inter-office cooperation in the implementation of workplans and administrative matters; (c) to ensure the timely implementation of decisions and the coordination of inputs from all organizational units to the activities of the Office; and (d) to support the Executive Director in the overall leadership and coordination of the activities of UNODC with extensive research and substantive information to advise on issues of policy, resources and results management.

16.158 The Office of the Executive Director also coordinates cross-cutting institutional issues, such as the systematic inclusion of gender equality aspects in all areas of UNODC work and reaching gender parity in staff. The Gender Team in the Office of the Executive Director coordinates the implementation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2026) to ensure delivery of United Nations commitments on gender equality and the empowerment of women, including Sustainable Development Goal 5, through activities, such as supporting field offices to contextualize gender commitments to their setting, ensuring that the institutional mechanisms on gender mainstreaming are efficient, raising awareness and providing capacity-building for personnel to further strengthen capacity on gender issues across the UNODC programme of work. The United Nations Office at Vienna and UNODC continue to recognize high-impact policies and programmes on gender issues through an annual Gender Award and have strengthened their efforts on male engagement to promote gender equality and women's empowerment.

16.159 The Independent Evaluation Section provides evaluation-based knowledge for decision-making to the Executive Director and Member States on countering and preventing drugs, crime and terrorism. The Section delivers high-quality human rights-responsive, gender-sensitive and contextualized independent evaluations, syntheses of evaluations and other oversight results, and evaluation capacity development for internal and external stakeholders, as well as the innovative web-based evaluation and knowledge management application, Unite Evaluations, to foster accountability and learning. By working in conjunction with a diverse set of partners, including United Nations, regional and national entities as well as academia and research entities, the Section responds to strategic priorities in UNODC mandated areas of work and offers technical advice to Member States on conducting their own government-led evaluations. Furthermore, the Section leads efforts for delivering results through joint and system-wide work, thereby, for example, delivering strategic evaluation-based products on countering and preventing terrorism and Sustainable Development Goal 16.

16.160 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, in which organizations are encouraged to integrate sustainability information into their reporting cycles, and in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution 72/219, the United Nations Office at Vienna and UNODC are integrating environmental management practices into their operations.

16.161 Information on the timely submission of documentation and advance booking for air travel is reflected in table 16.28. The low travel compliance rate in 2024 (40 per cent) was largely due to the late nomination of travellers and late event planning, which resulted in the late booking of travel. Compliance rates continue to be monitored with the introduction of the new mission travel request application as well as awareness-raising sessions for staff.

Table 16.28
Compliance rate
(Percentage)

	2022 actual	*2023 actual*	*2024 actual*	*2025 planned*	*2026 planned*

A. Proposed programme plan for 2026 and programme performance in 2024

Overall orientation

Mandates and background

17.1 The United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) is responsible for supporting the achievement of gender equality and the fulfilment of the rights and empowerment of all women and girls as actors and beneficiaries of sustainable development, human rights, humanitarian action and peace and security. The mandate derives from the priorities established in relevant General Assembly, Economic and Social Council and Security Council resolutions, including General Assembly resolutions 64/289, in which the Assembly established UN-Women as a composite entity that functions as a secretariat, carries out operational activities at the country and regional levels, and leads, coordinates and promotes the accountability of the United Nations system in its work on gender equality and the empowerment of women; 70/1 on the 2030 Agenda for Sustainable Development, pursuant to which UN-Women supports systematic mainstreaming of a gender perspective in the implementation of the 2030 Agenda; 72/279 on the repositioning of the United Nations development system; and 79/226 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in which the Assembly reiterated its call upon the United Nations development system to enhance and accelerate gender mainstreaming through the full implementation of the System-wide Action Plan on Gender Equality and the Empowerment of Women, developed under the leadership of UN-Women, as well as the United Nations country team performance indicators for gender equality and the empowerment of women (the UNCT SWAP "scorecard"), in particular with regard to gender-responsive performance management and strategic planning.

17.2 The mandate of UN-Women endows it with a unique role and capacity to: (a) support the strengthening and development of global norms and standards, including with country-level experiences; (b) promote more effective coordination, coherence and gender mainstreaming across the United Nations system in support of commitments for gender equality and the empowerment of women; and (c) support Member States, upon request, to translate global norms and standards into legislation, policies and development plans as part of its operational activities. UN-Women also has a critical role in supporting the mobilization of civil society, the private sector and other relevant stakeholders, at all levels, in support of the implementation of the Beijing Declaration and Platform for Action and the gender-responsive implementation of the 2030 Agenda. UN-Women will continue to support Member States' commitment to achieve gender equality and the empowerment of all women and girls as a crucial contribution to progress across all the Sustainable Development Goals, as reiterated in the Pact for the Future.

Strategy and external factors for 2026

17.3 The UN-Women strategic plan 2026–2029 will guide the Entity's activities and its strategic direction, objectives and approaches to support the efforts of Member States towards the achievement of gender equality and the empowerment of all women and girls and the realization of their human rights.

17.4 The strategic plan will be based on an extensive consultative process and draw from analysis of progress and persistent challenges, including recommendations from the 30-year review and appraisal of the implementation of the Beijing Declaration and Platform for Action, the review of the implementation of the 2030 Agenda and its Sustainable Development Goals, particularly related to gender equality and the rights and empowerment of women and girls, the gender equality commitments in the Pact for the Future, and lessons learned from the midterm review of the UN-Women strategic plan 2022–2025.

17.5 In 2026, UN-Women will continue its work on its established thematic impact areas: (a) governance and participation in public life; (b) women's economic empowerment; (c) ending violence against women and girls; and (d) women and peace and security, humanitarian action and disaster risk reduction. Given the interconnected nature of global challenges, UN-Women will continue to focus on integrated approaches to address the root causes of gender inequality and discrimination against women and girls and effect broader systems change by advancing seven systemic outcomes across the four thematic impact areas: (a) the strengthening of global normative frameworks and gender-responsive laws, policies and institutions; (b) financing for gender equality; (c) positive social norms, including by engaging men and boys; (d) equitable access by women to services, goods and resources; (e) women's voices, leadership and agency; (f) the production, analysis and use of gender statistics, sex-disaggregated data, and knowledge; and (g) United Nations system coordination for gender equality and the empowerment of women and girls.

17.6 UN-Women will continue to implement its programme by leveraging its normative support function, United Nations system coordination role and operational activities in an integrated and mutually reinforcing manner for transformative results.

17.7 UN-Women will continue to act as a knowledge hub to support gender mainstreaming and provide research and data analysis to inform policies, strategies and other interventions, and substantive and technical support and expertise to requesting Member States. It will continue to facilitate the mainstreaming of a gender perspective into intergovernmental norms and standards. It will also provide support to Member States, upon request, in implementing commitments to gender equality and the empowerment of women and girls through operational activities. UN-Women will continue to work in partnership with a range of actors and support, at the request of Member States, civil society, the private sector and other relevant stakeholders, for accelerated action for gender equality and the rights and empowerment of women and girls.

17.8 UN-Women will continue to place business transformation at the heart of its organizational effectiveness and efficiency framework, including by strengthening capabilities in innovation, digital transformation and strategic foresight, in line with paragraph 73 (a) of the Pact for the Future, under action 45, and will enhance its culture of accountability and strengthening organizational performance management through a cascading internal management system.

17.9 With regard to inter-agency coordination and liaison, UN-Women will continue to leverage its mandate to further enhance country, regional and global efforts of the United Nations system towards gender equality and the empowerment of women and girls, including through the repositioned United Nations development system for integrated, cost-effective support to partners. UN-Women will continue to promote accountability for gender equality through support for the implementation of frameworks such as the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women and the United Nations country team System-wide Action Plan "scorecard" and their recommendations at the country level. UN-Women will continue to build strategic partnerships with United Nations entities to deliver coordinated and coherent results for women and girls across the development, peace and security and humanitarian contexts. Further, the Entity will collaborate with other United Nations entities, including through the Inter-Agency and Expert Group on Sustainable Development Goal Indicators, providing a gender perspective on methodology development, monitoring and follow-up, as well as capacity development. UN-Women will also collaborate with departments and offices of the United Nations Secretariat, including on issues related to women and peace and security, sexual violence in conflict, gender mainstreaming in peacekeeping operations and gender parity. UN-Women will continue its cooperation with and support to the Security Council, the Peacebuilding Commission and the Human Rights Council, as requested. UN-Women will continue to brief the Security Council, upon request, and provide secretariat services to the Council's Informal Expert Group on Women and Peace and Security.

17.10 Where it has a presence, UN-Women will support the integration of a gender perspective in United Nations country team programming processes, including the common country assessments and the United Nations Sustainable Development Cooperation Frameworks, joint initiatives, collective advocacy and coordination to ensure a coherent system-wide approach in operational activities.

Where a humanitarian response is in place, UN-Women will support the integration of a gender perspective into the planning and implementation of the humanitarian response. UN-Women will continue to chair or co-chair the gender theme groups[1] of United Nations country teams.

17.11 With regard to the external factors, the overall plan for 2026 is based on the following planning assumptions:

(a) The continued availability of voluntary contributions, which account for approximately 98 per cent of the resources of UN-Women;

(b) The commitment of Member States to advance gender equality and the rights and empowerment of all women and girls, including by achieving consensus in relevant intergovernmental meetings;

(c) The commitment of Member States to adopt and implement laws, policies and strategies, allocate adequate resources, and create and maintain an enabling environment for civil society and women's organizations in their work for the promotion of gender equality and the empowerment of women and girls.

17.12 In line with the United Nations Disability Inclusion Strategy and the UN-Women global strategy on the empowerment of women and girls with disabilities, UN-Women, together with other United Nations entities, will accelerate the effective mainstreaming of disability inclusion and promote accessibility in its institutional processes, collaboration and programming, in partnership with Member States, organizations of persons with disabilities and other partners. UN-Women will continue to chair the United Nations Inter-agency Group on Gender Equality and Disability Inclusion. Where it has a presence, UN-Women will facilitate an intersectional approach to disability inclusion by leveraging the United Nations country team presence and operational and programming processes.

Legislative mandates

17.13 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to UN-Women.

General Assembly resolutions

34/180	Convention on the Elimination of All Forms of Discrimination against Women
50/42	Fourth World Conference on Women
50/203	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action
54/4	Optional Protocol to the Convention on the Elimination of All Forms of Discrimination against Women
54/134	International Day for the Elimination of Violence against Women
64/289	System-wide coherence
66/130	Women and political participation
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
78/180	Violence against women migrant workers
78/181	Improvement of the situation of women and girls in rural areas
78/182	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
79/1	The Pact for the Future
79/152	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: the digital environment

[1] See https://unsdg.un.org/resources/gender-theme-groups-standards-and-procedures.

79/153	Intensifying global efforts for the elimination of female genital mutilation
79/154	Trafficking in women and girls
79/223	Women in development
79/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

Economic and Social Council resolutions and decisions

76 (V)	Communications concerning the status of women
304 (XI)	Report of the Commission on the Status of Women (fourth session)
1992/19	Communications on the status of women
1996/6	Follow-up to the Fourth World Conference on Women
1996/31	Consultative relationship between the United Nations and non-governmental organizations
1999/257	Enabling the Commission on the Status of Women to continue to carry out its mandate
2005/232	Declaration of the Commission on the Status of Women on the occasion of the tenth anniversary of the Fourth World Conference on Women
2009/16	Working Group on Communications on the Status of Women of the Commission on the Status of Women
2020/15	Multi-year programme of work of the Commission on the Status of Women
2022/4	Future organization and methods of work of the Commission on the Status of Women
2022/5	Thirtieth anniversary of the Fourth World Conference on Women
2024/3	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

1999	Women and health
1999	Institutional mechanisms for the advancement of women
2001	Women, the girl child and human immunodeficiency virus/acquired immunodeficiency syndrome
2001	Gender and all forms of discrimination, in particular racism, racial discrimination, xenophobia and related intolerance
2002	Eradicating poverty, including through the empowerment of women throughout their life cycle, in a globalizing world
2002	Environmental management and the mitigation of natural disasters
2003	Participation in and access of women to the media, and information and communication technologies and their impact on and use as an instrument for the advancement and empowerment of women
2004	The role of men and boys in achieving gender equality
2004	Women’s equal participation in conflict prevention, management and resolution and in post-conflict peacebuilding

S-23/2	Political declaration
S-23/3	Further actions and initiatives to implement the Beijing Declaration and Platform for Action

2005	Political declaration on the occasion of the tenth anniversary of the Fourth World Conference on Women
2006	Enhanced participation of women in development: an enabling environment for achieving gender equality and the advancement of women, taking into account, inter alia, the fields of education, health and work
2006	Equal participation of women and men in decision-making processes at all levels
2007	Elimination of all forms of discrimination and violence against the girl child
2008	Financing for gender equality and the empowerment of women
2009	The equal sharing of responsibilities between women and men, including caregiving in the context of HIV/AIDS
2011	Access and participation of women and girls in education, training and science and technology, including for the promotion of women's equal access to full employment and decent work
2013	Elimination and prevention of all forms of violence against women and girls
2014	Challenges and achievements in the implementation of the Millennium Development Goals for women and girls
2015	Political declaration on the occasion of the twentieth anniversary of the Fourth World Conference on Women
2016	Women's empowerment and the link to sustainable development
2017	Women's empowerment in the changing world of work
2018	Challenges and opportunities in achieving gender equality and the empowerment of rural women and girls
2019	Social protection systems, access to public services and sustainable infrastructure for gender equality and the empowerment of women and girls
2020	Political declaration on the occasion of the twenty-fifth anniversary of the Fourth World Conference on Women
2021	Women's full and effective participation and decision-making in public life, as well as the elimination of violence, for achieving gender equality and the empowerment of all women and girls
2022	Achieving gender equality and the empowerment of all women and girls in the context of climate change, environmental and disaster risk reduction policies and programmes
2023	Innovation and technological change, and education in the digital age for achieving gender equality and the empowerment of all women and girls
2024	Accelerating the achievement of gender equality and the empowerment of all women and girls by addressing poverty and strengthening institutions and financing with a gender perspective

Deliverables

17.14 Table 17.1 lists all cross-cutting deliverables of the programme.

Table 17.1
Cross-cutting deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**1**	**1**	**3**	**1**
1. Annual report of the Under-Secretary-General/Executive Director of the United Nations Entity for Gender Equality and the Empowerment of Women	1	1	1	1
2. Biennial integrated budget estimates for UN-Women	–	–	1	–
3. Strategic plan 2026–2029	–	–	1	–
Substantive services for meetings (number of three-hour meetings)	**3**	**3**	**3**	**3**
Meeting of:				
4. The Fifth Committee	1	1	1	1
5. The Committee for Programme and Coordination	1	1	1	1
6. The Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Evaluation activities

17.15 The following evaluations conducted by the UN-Women Independent Evaluation Service and completed in 2024 have guided the proposed programme plan for 2026:

(a) *Corporate Thematic Evaluation of UN-Women's Support to Women's Political Participation: Insights from the Field*;

(b) *Are We Getting There? A Synthesis of United Nations System Evaluations of Sustainable Development Goal 5, and its companion report, Getting There Together: A Synthesis of Inter-Agency Programme Evaluations on Sustainable Development Goal 5*.

17.16 In response to the results of the evaluations referenced above, UN-Women refined its programmatic approach, notably on women's political participation, to incorporate key recommendations, such as multi-stakeholder, multi-year designs to achieve sustainable change and address barriers to women's political participation. Evidence from nearly 300 evaluations informed the Sustainable Development Goal 5 syntheses, highlighting the effectiveness of integrated programming and the importance of data, advocacy and civil society partnerships.

17.17 An evaluation of the effectiveness of the role of UN-Women in advancing one of the seven systemic outcomes is being planned for 2026.

Programme of work

Subprogramme 1
Intergovernmental support, coordination and strategic partnerships

Objective

17.18 The objective, to which this subprogramme contributes, is to strengthen the achievement of gender equality and the empowerment of all women and girls, including full enjoyment of their human rights.

Strategy

17.19 To contribute to the objective, the subprogramme will:

(a) Support the normative processes of intergovernmental bodies, including the Commission on the Status of Women, by facilitating the exchange of good practices and lessons learned among Governments and other relevant stakeholders, including through meetings, the issuance of reports and the presentation of analyses and policy options that enable discussion on key gender equality issues;

(b) Lead, coordinate and promote the accountability of the United Nations system for gender equality and the empowerment of women, and gender mainstreaming. This includes providing expertise, advocacy, monitoring of the development of relevant tools and guidance and capacity-building within the United Nations system. Actions towards system-wide improvement of the status of women will also be undertaken;

(c) Develop strategic partnerships by enabling civil society actors and other stakeholders to contribute to relevant intergovernmental processes, including through information dissemination, the convening of stakeholders to share lessons learned and recommendations for actions and the provision of funding for attending capacity- and alliance-building opportunities.

17.20 In doing so, the subprogramme will assist Member States in their efforts to accelerate the implementation of the Beijing Declaration and Platform for Action, achieve Sustainable

Development Goal 5 and systematically mainstream a gender perspective into the implementation of the 2030 Agenda.

17.21 The above-mentioned work is expected to result in:

(a) A strengthened global normative framework and increased reflection of a gender perspective in the outcomes of intergovernmental processes;

(b) An enabling working environment to accelerate gender mainstreaming and progress towards gender parity goals in the United Nations system, leading to greater achievement of results towards gender equality;

(c) Enhanced cooperation among stakeholders and Governments on gender equality and the empowerment of women, as well as enhanced opportunities for stakeholders to present lessons learned and good practices in conjunction with intergovernmental processes, and the availability of a growing resource base.

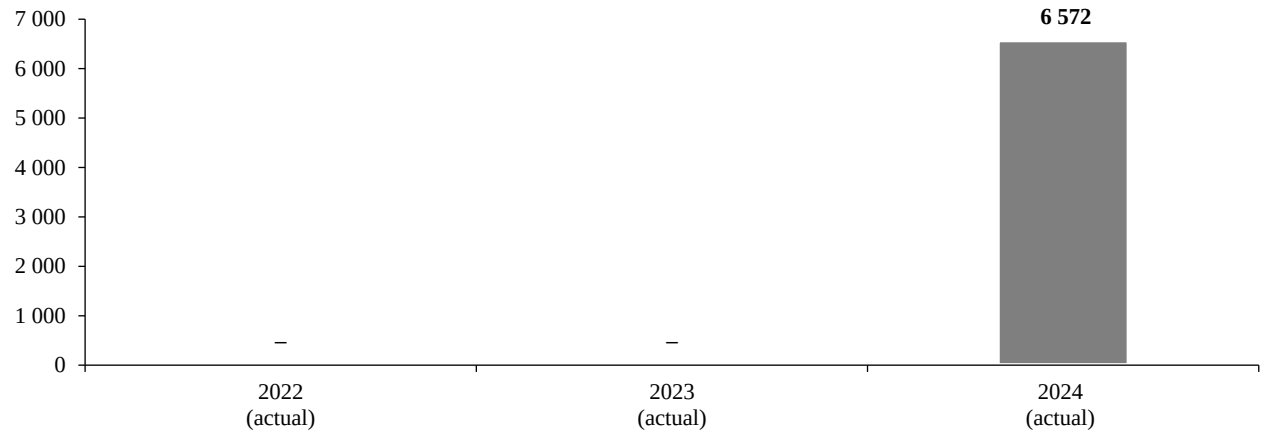
Programme performance in 2024

Civil society and young women and girls have effective channels to shape the implementation of the Beijing Platform for Action to reflect their needs

17.22 The contribution of civil society, including young women and girls, to the implementation of the Beijing Platform for Action is crucial. The subprogramme engaged civil society in the 30-year review and appraisal of the implementation of the Beijing Declaration and Platform for Action. In 2024, the subprogramme supported consultations with civil society, young people and adolescent girls by creating intergenerational common engagement platforms for sharing information and strengthening advocacy capacities. Virtual meetings reached 930 civil society representatives, while regional and national meetings engaged 5,072 young women and girls, creating strategic pathways for young people to influence the regional discussions. The subprogramme facilitated the participation of 570 youth representatives in the review meetings of the regional commissions, ensuring that diverse voices influenced intergovernmental processes.

17.23 Progress towards the objective is presented in the performance measure below (see figure 17.I).

Figure 17.I
Performance measure: number of civil society and youth representatives participating in consultations and capacity-building workshops on the 30-year review of the implementation of the Beijing Declaration and Platform for Action



Planned results for 2026

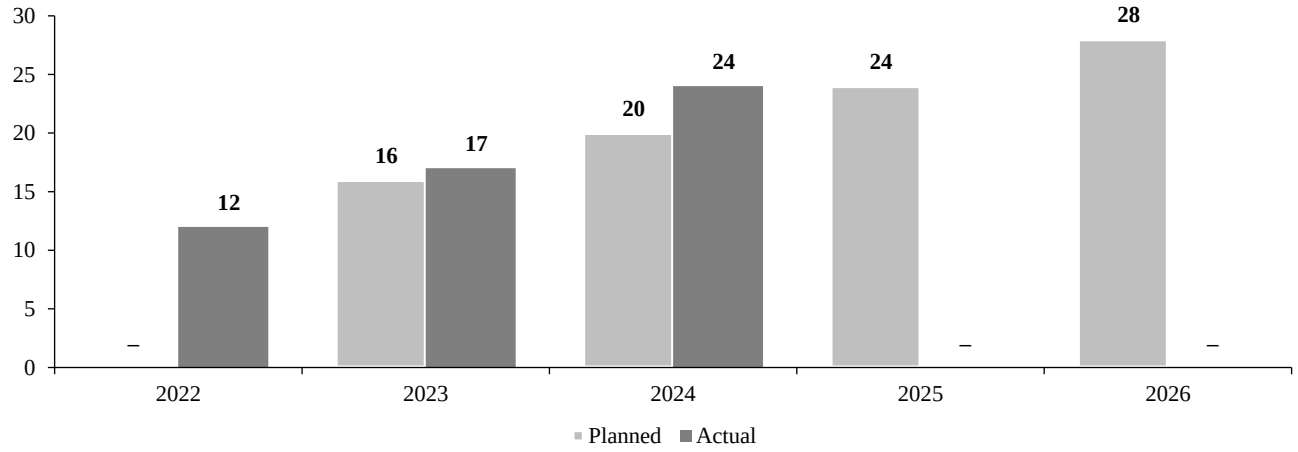
Result 1: leaving no women or girls with disabilities behind

Programme performance in 2024 and target for 2026

17.24 The subprogramme's work contributed to 24 organizations of persons with disabilities collaborating and partnering with United Nations country offices to address the specific needs and demands of women and girls with disabilities, which exceeded the planned target of 20 organizations.

17.25 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 17.II).

Figure 17.II
Performance measure: number of organizations of persons with disabilities partnering with United Nations country offices to address the specific needs and demands of women and girls with disabilities (cumulative)



Result 2: strengthened global norms and standards on gender equality and the empowerment of all women and girls

Programme performance in 2024 and target for 2026

17.26 The subprogramme's work contributed to 94 per cent of recommendations in the report of the Secretary-General on the priority theme of the Commission on the Status of Women being reflected in the agreed conclusions of the Commission at its sixty-eighth session, which exceeded the planned target of 90 per cent.

17.27 Progress towards the objective and the target for 2026 are presented in the performance measure below (see table 17.2).

Table 17.2
Performance measure

2022 (actual)	*2023 (actual)*	*2024 (actual)*	*2025 (planned)*	*2026 (planned)*
91 per cent[a]	97 per cent[a]	94 per cent[a]	Member States adopt a political declaration on the occasion of the thirtieth anniversary of the Fourth World Conference on Women	90 per cent[a]

[a] Percentage of recommendations in the report of the Secretary-General on the priority theme of the Commission on the Status of Women that are reflected in the agreed conclusions of the Commission.

Result 3: a gender perspective mainstreamed in United Nations Sustainable Development Cooperation Frameworks

Proposed programme plan for 2026

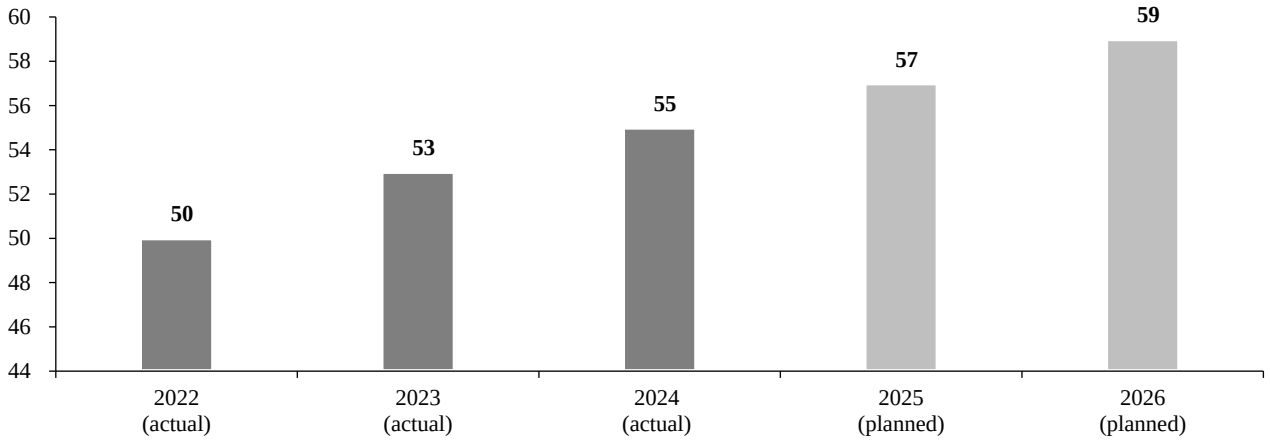
17.28 The United Nations Sustainable Development Cooperation Framework is a critical planning instrument from which the funds and programmes derive their country programme document outcomes. The Framework's guidance identifies gender equality and women's empowerment as one of the eight guiding principles. The subprogramme has led an inter-agency initiative to develop training material for United Nations country teams on mainstreaming a gender perspective in the Frameworks.

Lessons learned and planned change

17.29 The lesson for the subprogramme was the critical need to offer ongoing technical support to country teams to sustain institutional knowledge and technical capacity. Specific tools are required to support new cohorts of countries rolling out the United Nations Sustainable Development Cooperation Frameworks. In applying the lesson, the subprogramme will continue to offer technical support and capacity-building to country teams. It will also develop new country strategic notes, with outcomes aligned with the Frameworks to ensure that a gender perspective is mainstreamed.

17.30 Expected progress towards the objective is presented in the performance measure below (see figure 17.III).

Figure 17.III
Performance measure: percentage of new United Nations Sustainable Development Cooperation Frameworks containing a stand-alone outcome on gender equality (annual)



Deliverables

17.31 Table 17.3 lists all deliverables of the subprogramme.

Table 17.3
Subprogramme 1: deliverables for the period 2024–2026, by category and subcategory

Category and subcategory	*2024 planned*	*2024 actual*	*2025 planned*	*2026 planned*
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	**2**	**2**	**4**	**2**
Reports for:				
1. The General Assembly, including on the improvement of the status of women	–	–	2	–
2. The Economic and Social Council, including on mainstreaming a gender perspective in the United Nations system	1	1	1	1
3. The Commission on the Status of Women on the normative aspects of the work of UN-Women	1	1	1	1

Technical materials (number of materials)	**4**	**4**	**4**	**5**
9. On gender parity in the United Nations system and on the implementation of the United Nations System-wide Action Plan on Gender Equality and the Empowerment of Women, the gender equality marker, the United Nations country team System-wide Action Plan gender equality “scorecard” and the United Nations country team gender equality marker	4	4	4	5

Category and subcategory	2024 planned	2024 actual	2025 planned	2026 planned
C. Substantive deliverables				
Consultation, advice and advocacy: cross-sectoral dialogues and ministerial round tables, with broad regional representation and participation; multi-stakeholder side events on gender equality and the empowerment of women in meetings, conferences and summits for an average of 100 participants per event; consultations on gender mainstreaming in an area in which gender dimensions are absent or need strengthening, with at least four experts and representatives of Governments (per consultation).				
D. Communication deliverables				
Digital platforms and multimedia content: UN-Women website.				

Subprogramme 2
Policy and programme activities

Objective

17.32 The objective, to which this subprogramme contributes, is to enhance efforts in the elimination of discrimination against women and girls and the achievement of gender equality in, among other things, the fields of sustainable development, human rights and peace and security, including through enhanced accountability of the United Nations system.

Strategy

17.33 To contribute to the objective, the subprogramme will:

(a) Serve as a global knowledge centre on gender equality and the empowerment of women, including in the areas of women and peace and security, ending violence against women, the economic empowerment of women, and governance, by undertaking and disseminating research, analysis and evaluation of trends, including on new and emerging issues and their impact on the situation of women;

(b) Provide advisory, technical and advocacy support, training and capacity development, including through field offices, to Member States, upon request, to advance the implementation of their commitments on gender equality and the empowerment of women, in line with their national priorities;

(c) Ensure the accountability of the United Nations system, including the United Nations country and regional teams and their thematic groups on gender equality, by offering guidance and through engagement in their work on gender equality and the empowerment of women.

17.34 In doing so, the subprogramme will assist Member States in their efforts to achieve Sustainable Development Goal 5 and to systematically mainstream a gender perspective into the implementation of the 2030 Agenda.

17.35 The above-mentioned work is expected to result in:

(a) Policies and actions taken by national and regional bodies to implement United Nations instruments, standards and resolutions that contribute to gender equality and the empowerment of women, focusing on the Beijing Declaration and Platform for Action, the outcome of the twenty-third special session of the General Assembly and the Convention on the Elimination of All Forms of Discrimination against Women;

(b) Increased capacity of Member States to implement, monitor and evaluate laws, policies and strategies that contribute to the achievement of gender equality and the empowerment of women and girls and the realization of their human rights;

(c) Improved ability of United Nations programmes to more effectively support Member States, at their request, in the implementation of commitments to eliminate discrimination against women and girls.

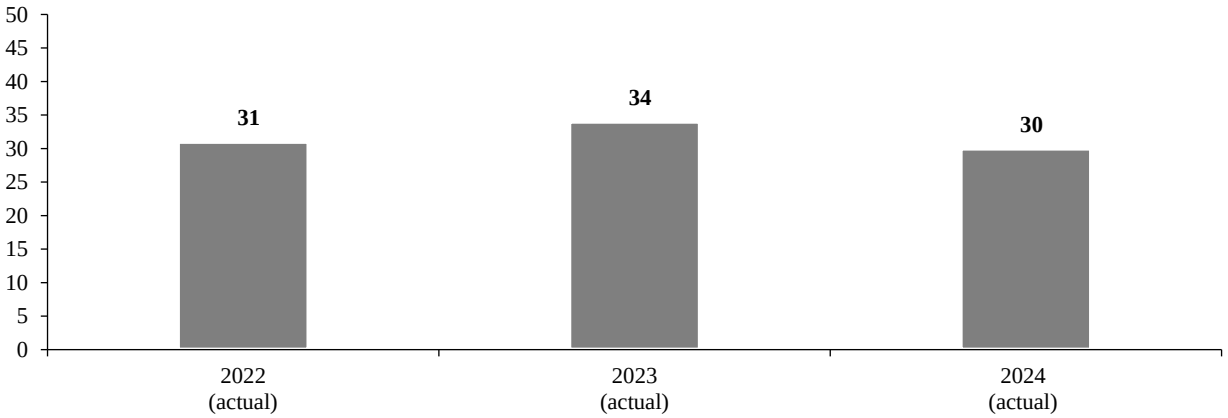
Programme performance in 2024

Strengthened disaster risk reduction policies

17.36 Gender-sensitive disaster risk reduction policies, plans and programmes are crucial to ensure that disaster policies address the unique and differentiated needs of, access to resources by and opportunities for women and men. Recognizing this, UN-Women, through its Women's Resilience to Disasters programme, expanded global knowledge in 2024 to support the development and implementation of disaster risk reduction policies that reflect these differentiated needs. The Women's Resilience to Disasters policy tracker[2] identifies good practices that support the resilience of women to disasters across 193 Member States in order to facilitate peer learning and South-South cooperation. To date, the tracker has identified 283 national and regional disaster risk reduction frameworks that support gender equality. During 2024, with the technical support of UN-Women, 30 countries developed gender-sensitive disaster risk reduction legislation, policies, strategies, plans and assessments.

17.37 Progress towards the objective is presented in the performance measure below (see figure 17.IV).

Figure 17.IV
Performance measure: number of countries that developed gender-sensitive disaster risk reduction legislation, policies, strategies, plans and assessments with the technical support of the Entity (annual)



Planned results for 2026

Result 1: governments adopt policies and make investments to transform the care economy

Programme performance in 2024 and target for 2026

17.38 The subprogramme's work contributed to 1,020 institutions benefiting from the support of UN-Women to improve the provision of essential services, goods and/or resources for women, which exceeded the planned target of 1,014 institutions.

17.39 Progress towards the objective and the target for 2026 are presented in the performance measure below (see figure 17.V).

[2] See https://wrd.unwomen.org/practice/resources/policy-tracker.
