

Part II. GUIDELINES FOR REPORTING ON NATIONAL SUSTAINABLE DEVELOPMENT STRATEGIES

The 1997 Special Session of the UN General Assembly set a target date of 2002 for the formulation and elaboration of national strategies for sustainable development (NSDS). It also reaffirmed that all sectors of society should be involved in their development and implementation. The Johannesburg Plan of Implementation urges States to take immediate steps to make progress in the formulation and elaboration of NSDS and begin their implementation by 2005.

The NSDS global map, distributed at the eleventh session of the CSD, attempts to capture the status of development and implementation of NSDSs at the global level, based on information contained in the 2002 Country Profiles and in the National Assessment Reports, prepared for the WSSD. The purpose of the map is to encourage those countries that have not yet completed the process, to proceed in their efforts to meet the goal of 2005, while at the same time serving as a tool for the CSD to monitor progress in this area.

In order to properly track broad progress in the area of NSDS development and implementation, the CSD Secretariat intends to issue an updated version of the map for distribution at the CSD sessions on an annual basis until 2006.

Please indicate the stages of NSDS development/implementation in your country, by responding to the questions below:
