

PART II: NATIONAL SUSTAINABLE DEVELOPMENT STRATEGIES

Please indicate the stages of NSDS (see Annex II for the list of key characteristics) development/implementation in your country, by responding to the question below:

- 1- Is your country implementing an approved NSDS or its equivalent?
-X- Yes --No

If **No**, go directly to question #2

If Yes:

- a) How was the NSDS or its equivalent developed?

..... Multi-stakeholder consultations undertaken;
..... Training or workshops undertaken;
..... On the basis of inter-ministerial consultations;
..... By one ministry responsible (State Planning Organization (SPO) &The
The Ministry of Public Works and Settlement) SPO has established a Council of
sustainable development

- b) Do you have a national body designated to implement and/or monitor your country's NSDS (or its equivalent) ?

...X. Yes No State Planning Organization used to monitor
Please give the year it started the country by the 5 year development plans on the
basis of sectors. The
Ministry of Public Works and Settlement
initiates the physical according to this.

Please also give the name and composition of such a body:

- c) How is your NSDS (or its equivalent) being implemented? Please give specific actions/activities undertaken for this purpose : At central government level ministries and at the local level mostly municipalities are responsible from the implementation of planning programs.

- d) Is the implementation of NSDS (or its equivalent) being monitored?

..... Monitored on a regular basis. ...X...Not monitored on a regular basis
Has the implementation of NSDS (or its equivalent) been evaluated?

..... Has been evaluated Has not yet been evaluated

- 2- Does your country have a national or federal NSDS or its equivalent approved by the government but not yet implemented?

...X.... Yes No

If yes, please give the name of NSDS or its equivalent and the year of approval:

Name: In our country the new period is going to start SPD left the 5 year development plan understanding and started the mid-term reports for 2 years.

Year of approval:

Countries which are already implementing NSDS: please skip questions #3-5

- 3- Has your country already developed an NSDS, but not yet formally approved it?

.....Yes, a NSDS has been developed, waiting for a formal approval it?

...X...NSDS is under development.

This survey was originally circulated to all member States on 27 October 2004. If you have already responded and if your information has not change, please disregard this request.

If your country is in the process of developing an NSDS, have there been:

-Multi-stakeholder consultations;
-Traning or workshops undertaken;
-National coordination body established or designeted?

..... No, NSDS has not yet been developed but is under consideration.

4- If your country does not have an NSDS process (or its eguivalent)in place,do you have any of the following components that could cotribute to an NSDS (please check all that apply)

- Poverty Reduction Strategy (PRS)
- ...X National Development Plan
- National Environmental Action Plan
- Other – please specify: _____

5- Click here if no action has been taken regarding NSDS OR its eguivalent

6- If your country has developed a PRS but not NSDS,

Does the PRS incorporate and integrate environmental,economic and social aspects of development?

..... Yes No

7- If your country has developed both an NSDS and PRS,is the PRS linked to the NSDS?

.....YesNo

8- Does your PRS or NSDS terget the Millennium Dvelopment Goals (MDGS)?

.....YesNo

Comments: In Turkey, the typical problem is the confict and gaps among the responsible authorities (Especially in planning and sustainable development in settlements.)

There are few ministries and all municipalities have planning competance. Nevertheless the oldest planning ministry is the Ministry of Public Works and Settlement has been trying to coordinateall the efforts in the country and has currently been revising the Development Act No:3194

Where possible,please provide either an electronic copy of your National Sustainable Development Strategy,or eguivalent,or a Web link to the Strategy

ENVIRONMENTAL IMPACT ASSESSMENT APPLICATIONS For HIGHWAYS PROJECTS

In Turkey, Environment Law numbered 2872 was put in the application in 1983 According to that law, Environmental Impact Assessment (EIA) Regulation was put into application by the Ministry of Environment in 7th of February 1993. It was lastly revised at 16 December 2003.

According to EIA Regulation (now in the agenda):

1- for motorways expreeways, national roads and rehabilitation projects for constructing the existing road as divided one and meterial guarry areas;

- a) if area of material extraction is about 25 hectar or more than that and.
- b) If amount of material processing is about 100.00 metreküp/year or more than that

Environment Impact Assessment (EIA) Report are prepared.

2- for provincial roads material guarry areas;

- a) if area of material extraction is less than 25 hector and
- b) if amound of material processing is about 25.000 metreküp/year or more than that

Pre-EIA reports are prepared.

Main items cited in an EIA Format which has been prepared by the Ministry of Environment:

- Part I : Purpose and identification of the Project
- Part II : Location of the Project area
- Part III : Existing state of environment properties of Project location and impact area.
- Part IV : Environmental impacts of the Project and mitigation measures to be taken
- Part V : Public Participation
- Part VI : Summary/conclusion

Main items cited in an Pre-EIA Format

- 1- Non-technical summary of the report
- 2- Properties of the Project
- 3- Location of the Project
- 4- Possible impacts on the existing stiuation of the Environment
- 5- Alternatives of the Project
- 6- Results

In environmental impact assessment (EIA) studies, existing situation of water quality air and noise Levels are calculated/measured. If these values are higher then the limits stated in the Water Quality control Regulation, Air Quality Control regulation and Noise Control Regulational then Necessary preventive measures are identified in the report.
