LOCAL AUTHORITIES STATEMENT

Thank you, Lady Chair. My name is Emilio D'Alessio and I am here representing Local Authorities.

Local Governments of the world are committed to achieving the Millennium Development Goals through integrated management policies based on the interdependency between economy, society, ecology and good governance.

Local Authorities recommend an immediate examination of the effects of the current global financial crisis and the growing impact of climate change on each of the specific themes of the Commission.

Local Authorities are the closest level of government to the people and they are the ones who will put into practice the policies and the decisions of this Commission.

On the specific theme of Africa local government capacity building in conflict prevention and response should be supported by providing technical and financial assistance and also promoting urban-rural regional cooperation.

In addition, local government can help promote sustainable production and consumption activities through private and public awareness programs.

We ask you to consider the previous in your deliberations.
