Co-Facilitators,

I have the following points, there seems to be a mix with regards to the role of the Statistical Commission in assessing the adequacy of international statistics related to FfD, while the same commission is currently undergoing discussions on a matrix for indicators that does not include indicators for goal 17 up until now. This needs to be addressed in line with our goal of achieving coherence between the Post 2015 process and the FfD. The proposal to request business forums to report on their members' implementation of FfD commitments, which we have not been detailed here and our group is working on the basis of the Strengthened Global Partnership.

Furthermore, the proposals contained in the Elements-paper on the establishment of a dedicated intergovernmental or expert body to monitor FfD commitments, and the complementarity and integration of the FfD follow up mechanisms with other related processes, and convergences and divergences with the role of HLPF.

Thank you
